MINUTES OF 289th MEETING OF REGISTRATION BOARD HELD ON 14th-16th MAY, 2019

==*=*=*

Drug Regulatory Authority of Pakistan
T.F. Complex, Mauve Area, G 9/4
Islamabad.

289th meeting of Registration Board was held on 14–16th May, 2019 in the committee room, Drug Regulatory Authority of Pakistan, G-9/4, Islamabad. The meeting was chaired by Dr.Obaidullah, Director, Pharmaceutical Evaluation & Registration Division, DRAP. The meeting started with recitation of the Holy Verses. The meeting was attended by following:-

1.	Dr. Rafeeq Alam Khan Meritorious Professor Dean, Faculty of Pharmacy, Zia-ud-Din Univeristy. (Pharmacologist)	Member
2.	Maj.Gen. Dr. Tahir Mukhtar Sayed. Director General Medicine, Pak Army, Rawalpindi. (Physician)	Member
3.	Prof.Dr.Ghulam Sarwar. Dean,Faculty of Pharmacy, Jinnah University for Women, Karachi (Expert in Drug Manufacturing)	Member
4.	Dr.Aslam Shah, Senior Manager, Indus Hospital, Karachi (Expert in Hospital Pharmacy)	Member
5.	Dr.Qurban Ali, ex-Director General, National Veterinary Laboratory (Expert in Veterinary Medicine)	Member
6.	Dr. Amanullah Khan, Director, Drugs Testing Laboratory, Quetta Government of Balochistan/ Provincial Member	Member
7.	Dr. Muhammad Khalid Javaid, Director, Drugs Testing Laboratory, Peshawar Government of Khyber Pakhtunkhwa/ Provincial Member	Member
8.	Mr.Abid Saeed Baig, Director, Drugs Testing Laboratory, Rawalpindi Dr. Shafiq ur Rehman, Director, Drugs Testing Laboratory, Lahore Government of Punjab/ Provincial Member	Member
9.	Syed Adnan Rizvi, Director, Drugs Testing Laboratory, Karachi Government of Sindh/ Provincial Member	Member
10.	Mr. Muhammad Aslam, Assistant Draftsman-II, Ministry of Law & Justice, Islamabad	Member
11.	Mr.Ghulam Mujtaba Representative of IPO	
12.	Dr. Noor-us-Saba Director, Biological Evaluation & Research Division, DRAP	Member
13.	Dr. Hafsa Karam Ellahi, Additional Director, Representative of QA&LT Division, DRAP	Member
14.	Dr. Muhammad Akram, Represntative of Animal Husbandry Commissioner, M/o National Food Security & Research.	Co-opted Member
15.	Mr. Abdullah, Additional Director (PE&R), DRAP.	Member/ Secretary

Ms.Tahreem Sara (Dy.Director,RRR), Mr. Asif Jalil, Incharge PEC and respective Assistant Directors, presented the agenda of PE&R Division. Director, BE&R assisted by respective Assistant Directors, presented the agenda of Biological Evaluation & Research Division. Dr. Hafsa Karam Ellahi (Additional Director, QA&LT) assisted by respective Assistant Director, presented the agenda of QA & LT Division.

Mr. Shamim Ahmad, Mr. Hamid Raza, Mr. Arshad Mehmood (PPMA), Mr.Rashid Mureed & Mr. Nadeem Alamgeer (Pharma Bureau) and Mr. M.Asad Malik (PCDA) attended the meeting as observers.

Item No. I: Confirmation of Minutes of 288th Meeting of Registration Board.

288th meeting of Registration Board was held on 14th to 15th February 2019. The draft minutes of 288th meeting of Registration Board were circulated among the members of the meeting on 18th March, 2019 with the request to forward their comments (if any) within five days. None of the members disagreed the draft minutes. Accordingly, minutes were approved by the Chairman Registration Board and circulated to all concerned.

Decision: Registration Board confirmed minutes of 288th meeting.

Item No. II: Cases Referred by Members of Registration Board.

A. Dr. Amanullah Khan, Director DTL, Quetta.

1. Email of May 3, 2019

Comment	Response
As earlier through email and during various meetings I have pointed out my serious concern over the way the panels are constituted for inspection within the country and outside the country because such panels are not acceptable to me because to me it's violation of the law as the panels for inspection are not approved by the board rather it is constituted by only one individual which is based by personal pick and choose and is against the teachings of our Prophet Hazarat Muhammad (P.B.U.H). Therefore across the board all those Inspection's which are done or going to be done without the approval of the Registration Board for me they are not Approved. In the each decision of the panel inspection my note of dissent shall be added and read as not Approved	Matter has already been deliberated at length and decided in 286th meeting Registration Board held on 14-16th November, 2018.

2. Email of January 26, 2018

a. Biological Drugs Registration.

It is submitted with great concerned that in my opinion the Biological Division has few very important issues which relates with the working capacity of the division and other issues related with DRAP and Board.

a. Biological Drugs Registration:

S.No.	Comment	Response
1.	It is submitted with great concerned that in my opinion the Biological Division has few very important issues which relates with the working capacity of the division and other issues related with DRAP and Board.	**Reply of DBER:** 1.1 The working in the DBER has improved tremendously after the appointment of permanent Director with relevant experience which has been duly acknowledged by Dr. Amanullah on different occasions. 1.2 Biological Drug is a highly specialized rapidly evolving subject; therefore the DRAP Policy Board in its first meeting in 2013 had rightly approved the formation of a separate registration board. This decision has been acknowledged by the present Registration Board many times. When this decision is implemented the Biological Drugs Board will engage the relevant experts in the field of oncology, vaccinology, hematology, endocrinology, virology, bacteriology, biotechnology, epidemiology, biotechnology quality control and manufacturing expertise etc. for both human and veterinary biological drugs. 1.3 In DRAP fresh 100 Assistant Directors were recruited who are still undergoing trainings for evaluation of dossiers, majority have no relevant experience in manufacturing or quality control of drugs let alone biological drugs. 1.4 It takes years of teaching to become knowledgeable in the field of biological drugs as this subject is not taught in practical terms in any university or college of our country at graduate of masters level. Initially 09 Asst. Directors were appointed in DBER. Out of which 04 were latter on transferred to NCLB and 01 was transferred to CDL, Karachi. The 04 transferred to NCLB were later on transferred to Health & OTC Division which were then transferred to other divisions. Out of remaining 04 Asst. Directors, 01 was recently transferred to Pharmaceutical Evaluation Cell after working in DBER for

		more than two years. All this is happening without the consent of Director DBER who is currently working with only 03 Asst. Directors instead of full strength. 1.5 Now, the renewal cases are also being referred to Biological drugs from RRR section and due to work load and less human resource the timely processing of renewal applications is becoming really difficult. 1.5. Despite such work load and limited human resource the Biological Drugs Division has no pendency of new registration applications and is able to achieve many mile stones shown below. **Further deliberations in Registration Board:** For constitution of separate Board for Biological drugs, the Board advised to process case at appropriate forum. Appropraite distribution of human resource is primalrily function and responsibility of the management of an organization. It would be appropriate that Biological Division may process case keeping in view existing workload of present officers and upcoming/ pending work to DRAP's management for suitable decision.
2.	The present staff is inexperienced due to which the biological product(s) case(s) are not properly presented before the registration board.	**Reply of DBER:** 2.1 In DRAP over 100 fresh Assistant Directors were recruited who are still undergoing trainings for evaluation of dossiers, majority have no relevant experience in manufacturing or quality control of drugs let alone biological drugs. 2.2 The cases are presented on approved format if there is any deficiency in the format the Board may review the pattern. 2.3As noted by Dr. Amanullah in previous meetings the working has improved after the appointment of permanent Director with relevant experience in vaccinology. 2.4 The incumbent Director being the only experienced person in the relevant field with this new staff has managed to achieve the following during the past one year: a. Developed the biosimilarity guidelines for registration of imported biotherapeutic products. b. Developed the biosimilarity guidelines for registration of locally biotherapeutic products. c. Developed the guidelines for registration of imported Enoxaparin Injections. d. Developed the guidelines for registration of locally manufactured Enoxaparin Injections. e. Processed the registration applications which were pending since 2013. 2.5. Moreover, it is evident by comparing the agenda of recent meetings with previous meetings that all the important information e.g. Biosimilarity studies, stability studies etc. as required by the Registration Board is included in the agenda of meeting. 2.6Further, now every registration application is being evaluated as per checklist of Form-5 or Form-5A and the checklists are attached with the applications or office files as permanent record of evaluation report while previously that was not the practice. 2.7. As compared to other drugs the Biological Drugs applications are already submitted on CTD dossiers for the past many years. This format is now being adopted for other drugs as well and after uniform assessment the Board will be able to

		judge all drugs on same criteria thus avoiding the present two systems of applications. **Further deliberations in Registration Board:** Registration Board considers abd decide the applications in light of available data and status of the product / formulation in reference regulatory authorities. If any case is deficient in any information / data, then such applications are deferred for having required data.
3.	After the resignation by the biological member from the registration board and to date no replacement of the biological member by the DRAP is done and it is one of the factor that the registration board has some difficulty in the grant of registration for biological products, so there is immediate need to nominate biological expert/ member so the registration of the biological products becomes smooth.	**Reply of DBER:** 3.1 The Biological Drugs Division has already forwarded the file for nomination of another expert on 05-05-2017. The nomination is still pending. 3.2 However, currently Dr. Qurban Ali and Maj. Gen. Tahir Mukhtar Sayed are the biological expert but it seems that Dr. Amanullah is not satisfied with their contribution. It is further clarified that both of these members were fully involved in the development of above guidelines. 3.3 Moreover, Directors of pharmaceutical Drug Testing Laboratories are the members of the Board while the relevant Director NCLB which is responsible for the Lot release of Biological Drugs is not the member of the Board it is once again submitted that Director NCLB should be part of the DRB on permanent basis. **Further deliberations in Registration Board:** Point at 3.2 above was refuted by Director DTL, Quetta and other members of Registration Board.
4.	Unfortunately non-technical persons are nominated in the panel for inspection biological products/units abroad which is not in the public interest and it is because that the registration board is not allowed to constitute panel of experts that is right person for a right job rather it is based on pick and choose and favoritism simply to accommodate each other.	**Reply of DBER:** 4.1 Initially there was a committee for constitution of panel for inspection abroad which included the concerned Director DBER along with Director PE&R and was Chaired by CEO, DRAP. But currently, the DBER refers the cases to Director DPER for constitution of panel. 4.2 The list of past inspections may be presented in the board and made part of minutes. **Further deliberations in Registration Board:** Matter for constitution of panel has has already been deliberated at length and decided in 286th meeting Registration Board held on 14-16th November, 2018. Chairman, Registration Board dispelled the impression about nomination of non-technical members in such inspection. He shared that for inspection aborad panel comprises of 02 relevant experts taken from DRAP's statutory Boards and senior officers of DRAP having sufficient knowledge and experience. All these nominations are endorsed by CEO, DRAP and administratively approved by Secretray, M/o NHSR&C. During meeting, data of inspections (panel members, manufacturing sites inspected, name of molecule(s)/ product(s) and decision) conducted during 2017 and 2018 was also shared with Director DTL, Quetta for further query (if any).
5.	As we know that at Government level we have some visa problem with our neighboring importing county (India) so it is proposed that if any WHO Prequalified biological products coming from that manufacturing site or if any biological product of that particular manufacturing site is already	**Reply of DBER:** The matter is related to current Import Policy for finished drugs. However, as per current policy if a plant has been inspected for a particular type of product, the exemption may be granted for the same type of product within 05 years of inspection. **Further deliberations in Registration Board:** In addition to above, all products either pre-qualified by WHO or approved by reference regulatoty authorities are exempted

	registered with DRAP I think we can exempt inspection abroad of that manufacturing site(s) in the public interest as to ensure availability of that drug for our people.	from inspection of manufacturer.

b. Manufactures Abroad Inspection Reports

Comment	Response
Reference to my couple of Note of dissents regarding unlawful constitution of panel of experts for inspection locally and abroad for the Product specific Inspection and GMP of the manufacturer. It is observed with great concerned that the August board members are never appraised about the inspection reports of manufacturers abroad. I strongly demand that all the manufacturers abroad inspection reports should be shared with the august board members for the final approval of the products likewise the local manufacturer products inspection reports and products are discussed for final approval or otherwise. The imported products/ molecules are initially discussed in the board and its approval is subject to inspection report but unfortunately the abroad inspection reports are never discussed in the board. It is also demanded that the board should be appraised about the number of inspections abroad during the year 2018, like name of molecule(s)/ product(s), Name of the inspectors and country of import conclusion of the panel.	Already responded in point 4 above.

B. Dr. Aslam Shah Member Registration Board, DRAP.

Comment	Response
Now a days majority of Oncology Pharmaceuticals are not available in market, even with it's authorized distirbuors & the Patients are suffering, because their Chemotherapy cycles are disturbing due to non availability of drugs. The local manufacturer Pharmadac Supplies are also short because of their production facility problems. The Anti cancer non availability problem is in now becoming chronic & I am expecting that very soon the Voice from Oncologist, Patients, & social media will be viral, so need immediate proactive actions to resolve this problem. I would request the Secretary & Chairman of Registration board to kindly look in to this matter to resolve on priority.	Keeping in view importance of the matter, Registration Board is already considering anti-cancer products on priority basis and applications submitted till December, 2018 has already been decided. The Board was apprised that some brands of anti-cancer drugs are in short supply / not available due to closure of their abroad manufacturing facilities either due to renovation or other organizational matters but other alternate brands / therapeutic equivalents are available. To cater such situation, DRAP is also granting permission for import of un-registered drugs for exclusive use of institutions and concerned DRAP field offices have been authorized for such granting such permissions. As far as matter of M/s Pharmaduc is concerned, the manufacturing facility is non-operative due to GMP non-compliance issues. Members were also requested to identify any non-available drug for taking up the matter accordingly. For this purpose, DRAP has already notified a committee on availability of drugs who work in close liason with manufacurers / importers, provincial governments, institutions etc.

ItemNo.III: Miscellaneous Cases:

Case No.01: World Health Organization (WHO) Collaborative Procedure for Accelerated Registration

Pakistan became signatory of WHO Collaborative Procedure for Accelerated Registration on 23rd February 2018. The collaborative registration procedure serves to facilitate and accelerate national registration of pharmaceutical products which the WHO Prequalification of Medicines Team (WHO/PQT) has already assessed and prequalified. Under this agreement, WHO/PQT assessment and inspection reports will be shared with DRAP on requirement. DRAP Authority in its 57th meeting held on 27th March, 2018 endorsed the signing of agreement between DRAP and WHO-PQ and gave its consent to proceed further.

Accordingly, PE&R division has prepared proposed steps for this procedure in light of WHO Technical Report Series (TRS) as follows:

1. The foreign company must have local agent/representative in Pakistan with valid drug sale license.
2. Applicants (companies) shall express interest (Submission of Expression of Interest) in applying the procedure for accelerated registration to their prequalified products. The applicant shall fill Appendix 3 Part A *(WHO TRS 996_2016)*.
3. Applicants authorize WHO to share its assessment and inspection outcomes for the specific product(s). The applicant shall fill Appendix 2 *(WHO TRS 996_2016)*.
4. The authorized representative (sole agent) must submit process Fee and the complete information required under Module 1 of DRAP CTD template (Appendix 1) *(WHO TRS 996_2016)*.
5. The authorized representative must also submit the complete CTD dossier with proof that same version was submitted to WHO along with any post registration variation thereunder.
6. DRAP shall communicate its decision on whether to apply the procedure and shall fill Appendix 3 Part B *(WHO TRS 996_2016)*.
7. If DRAP accepts to use the collaborative procedure, DRAP will complete evaluation process out of queue and communicate deficiencies/additional requirement within 30 days after submission.
8. In case any clarification required authorized representative (sole agent) must submit the complete reply within 30 days.
9. On-site inspection shall be exempted for all products under this procedure being WHO pre-qualified product.
10. Once Registration requirement are fulfilled by principle manufacturer through its authorized representative, DRAP will complete registration process within 60 Days after final submission. DRAP shall communicate its decision to accept/ reject registration of the product also using Appendix 3 Part C. However, the pricing may take additional days.
11. Registration shall be granted for 5 years until and unless cancelled or revoked by Registration Board.
12. In situations where the applicant intended to apply the procedure to a registration application which is already pending with DRAP, the applicant should first update the dossier to ensure that the technical part of the information is the same as that submitted to WHO. The applicant shall fill Appendix 2 and Appendix 3 Part A *(WHO TRS996_2016)*.
13. All post-prequalification variations submitted to WHO shall be submitted simultaneously to the DRAP.

Decision: **Registration Board appreciated steps taken by DRAP for adopting internationally harmonized regulation and signing agreement with international health partners. The Board also endorsed above above procedure which is in line with WHO Technical Report Series (TRS).**

Case No. 02 Review of Quinolone- and fluoroquinolone-containing medicinal products

The case was deferred by Registration Board for further deliberation in 287th meeting.
In May 2016 the FDA conducted a review of disabling and potentially permanent serious side effects of systemically applied fluoroquinolones resulting in a restriction of use in less severe infections such as acute sinusitis, acute bronchitis, and uncomplicated urinary tract infections, particularly in patients who have other treatment options. A similar approach was recently followed by Health Canada.

In view of the above, Germany decided to refer the matter to the Pharmacovigilance Risk Assessment Committee (PRAC) on 1st February 2017 that it gives its recommendation as to whether marketing authorizations of these products should be maintained, varied, suspended, or revoked. The referral included following drugs in all strengths, and pharmaceutical forms for systemic and inhalational use: (Accessed from https://www.ema.europa.eu/documents/referral/quinolone-fluoroquinolone-article-31-referral-notification_en.pdf dated: 31-12-2018)

1. Nalidixic acid
2. Pipemidic acid
3. Cinoxacin
4. Enoxacin
5. Pefloxacin
6. Lomefloxacin
7. Ciprofloxacin
8. Levofloxacin
9. Ofloxacin
10. Moxifloxacin
11. Norfloxacin
12. Prulifloxacin
13. Rufloxacin
14. Flumequin

PRAC on 5th October 2018 completed its review and issued recommendations (Accessed from: https://www.ema.europa.eu/documents/referral/quinolone-fluoroquinolone-article-31-referral-prac-recommends-restrictions-use_en.pdf dated 31-12-2018) which were forwarded to Committee for Medicinal Products for Human Use (CHMP) for its opinions. The final opinion of CHMP was published on 16th November 2018 (Accessed from: https://www.ema.europa.eu/documents/referral/quinolone-fluoroquinolone-article-31-referral-disabling-potentially-permanent-side-effects-lead_en.pdf dated 31-12-2018). The recommendations will be forwarded to European Commission for final decision. The overall recommendations are as follows:

Disabling and potentially permanent side effects lead to suspension or restrictions of quinolone and fluoroquinolone antibiotics

EMA has reviewed serious, disabling and potentially permanent side effects with quinolone and fluoroquinolone antibiotics given by **mouth, injection or inhalation**. The review incorporated the views of patients, healthcare professionals and academics presented at EMA's public hearing on fluoroquinolone and quinolone antibiotics in June 2018.

EMA's human medicines committee (CHMP) has endorsed the recommendations of EMA's safety committee (PRAC) and concluded that the marketing authorization of following medicines should be **SUSPENDED**.

1. Cinoxacin
2. Flumequine
3. Nalidixic acid and
4. Pipemidic acid

The CHMP confirmed that the use of the remaining fluoroquinolone antibiotics which included following should be **RESTRICTED**.

1. Enoxacin
2. Pefloxacin
3. Lomefloxacin
4. Ciprofloxacin
5. Levofloxacin
6. Ofloxacin
7. Moxifloxacin
8. Norfloxacin
9. Prulifloxacin
10. Rufloxacin

In addition, the prescribing information for healthcare professionals and information for patients will describe the disabling and potentially permanent side effects and advice patients to stop treatment with a fluoroquinolone antibiotic at the first sign of a side effect involving muscles, tendons or joints and the nervous system.

Restrictions on the use of fluoroquinolone antibiotics will mean that they should **NOT** be used:

- to treat infections that might get better without treatment or are not severe (such as throat infections);
- to treat non-bacterial infections, e.g. non-bacterial (chronic) prostatitis;
- for preventing traveller's diarrhoea or recurring lower urinary tract infections (urine infections that do not extend beyond the bladder);
- to treat mild or moderate bacterial infections unless other antibacterial medicines commonly recommended for these infections cannot be used.

Importantly, fluoroquinolones should generally be **AVOIDED** in patients who have previously had serious side effects with a fluoroquinolone or quinolone antibiotic. They should be used **With Special Caution** in the elderly, patients with kidney disease and those who have had an organ transplantation because these patients are at a higher risk of tendon injury. Since the use of a corticosteroid with a fluoroquinolone also increases this risk, combined use of these medicines should be avoided.

The CHMP opinion was forwarded to the European Commission, which issued a final legally binding decision on 14 February 2019 for Quinsair and on 11 March 2019 for other quinolone and fluoroquinolone antibiotics given by mouth and by injection, which is applicable in all EU countries. National authorities will enforce this decision for the fluoroquinolone and quinolone medicines authorised in their countries and they will also take other appropriate measures to promote the correct use of these antibiotics.. Medicines and Healthcare products Regulatory Agency (MHRA) of UK also decided to adopt the decision of EC as a result of the EMA review.

Quinolone- and fluoroquinolone-containing medicinal products

Information for Healthcare Professionals:

- Fluoroquinolones are associated with prolonged (up to months or years), serious, disabling and potentially irreversible drug reactions affecting several, sometimes multiple, systems, organ classes and senses.
- The serious side effects include tendonitis, tendon rupture, arthralgia, pain in extremities, gait disturbance, neuropathies associated with paraesthesia, depression, fatigue, memory impairment, sleep disorders, and impaired hearing, vision, taste and smell.
- Tendon damage (especially to Achilles tendon but also other tendons) can occur within 48 hours of starting fluoroquinolone treatment but the damage may be delayed several months after stopping treatment.
- Patients who are older, have renal impairment or have had solid organ transplantation and those being treated with a corticosteroid are at higher risk of tendon damage. Concomitant treatment with a fluoroquinolone and a corticosteroid should be avoided.
- Fluoroquinolone treatment should be discontinued at the first sign of tendon pain or inflammation and patients should be advised to stop treatment with a fluoroquinolone and speak with the doctor in case of symptoms of neuropathy such as pain, burning, tingling, numbness or weakness so as to prevent development of potentially irreversible condition.
- Fluoroquinolones should generally not be used in patients who have had serious adverse reactions associated with the use of quinolone or fluoroquinolone medicines.
- Up-to-date summary of product characteristics should be consulted for authorized indications when considering treatment with a fluoroquinolone medicine. This is because the indications for these medicines have been restricted.
- The benefits and risks of fluoroquinolones will be monitored continuously and a drug utilization study will evaluate the effectiveness of the new measures to reduce inappropriate use of fluoroquinolones by investigating changes in prescribing behavior.

Information for Patients:

- Fluoroquinolone medicines (which contain ciprofloxacin, levofloxacin, lomefloxacin, moxifloxacin, norfloxacin, ofloxacin, pefloxacin, prulifloxacin and rufloxacin) can cause long-lasting, disabling and potentially permanent side effects involving tendons, muscles, joints and the nervous system.
- These serious side effects include inflamed or torn tendon, muscle pain or weakness, and joint pain or swelling, walking difficulty, feeling pins and needles, burning pain, tiredness, depression, problems with memory, sleeping, vision and hearing, and altered taste and smell.

- Tendon swelling and injury may occur within 2 days of starting treatment with a fluoroquinolone but may even occur several months after stopping treatment.
- Stop taking a fluoroquinolone medicine and contact your doctor at once in the following cases:
    - at the first sign of tendon injury, such as tendon pain or swelling – rest the painful area;
    - if you get pain, feel pins and needles, tingling, tickling, numbness or burning, or weakness especially in the legs or arms;
    - if you get swelling in the shoulder, arms or legs, have walking difficulty, feel tired or depressed or have problems with your memory or with sleeping or you notice changes with your vision, taste, smell or hearing. You and your doctor will decide if you can continue treatment or if you need to take another type of antibiotic.

- You may be more prone to joint pain or swelling or tendon damage if you are aged over 60 years, your kidneys do not work well or you have received organ transplantation.
- Speak with your doctor if you are taking a corticosteroid (medicines such as hydrocortisone and prednisolone) or need to have treatment with a corticosteroid. You may be especially prone to tendon damage if you are taking a corticosteroid and a fluoroquinolone medicine at the same time.
- You should not take a fluoroquinolone medicine if you have ever had a serious side effect with a fluoroquinolone or a quinolone medicine and you should speak with your doctor immediately.
- If you have any questions or concerns about your medicines, speak to your doctor or pharmacist.

Decision: Keeping in view status of product in reference regulatory authorities, Registration Board decided as follows:

- **to initiate process / issuance of show cause for suspension / cancellation of first generation quinolones (cinoxacin, flumequine, nalidixic acid and pipemidic acid) due to serious safety concerns in injectable, oral and inhalational formulations.**
- **To update indications of second generation fluoroquinolones for consideration of Registration Board.**

Case No.03: De-Registration of Dettol Liquid (Reg. No.000150) – M/s Reckitt Benckiser Pakistan Ltd, Karachi

M/s Reckitt Benckiser Pakistan Ltd, Karachi has informed that Dettol Liquid, Reg. No.000150 registered in April, 1976 as per Drugs Act 1976 (―Act‖) as an antiseptic and disinfectant. However as per promulgation of DRAP Act, 2012 disinfectants belong in ―health and OTC products (non –drugs)‖catetory. This category is now headed by a separate Directorate Health & OTC products (non-drugs) for which registration and licensing is done separately for which the OTC Enlistment Rules are soon to be notified.

Dettol is a world famous brand used by general population for personal cleaning and hygiene since generations. The proposed OTC Enlistment Rules clearly states, as per definition para (d) and (i), as follows;

(d) "Disinfectant" means a health product or ingredient used for destroying or inhibiting micro –organisms that may b harmful to humans or animals. Disinfectants also include ingredients or products having additional antiseptic activity.

(i) "Health products" means Health and OTC products (non-drugs) as denined in the Act and include pro-biotics, disinfectants, food supplements, nutritional products, baby milk and foods, medicated cosmetics, medicated soaps, medicated shampoos, medical plasters and derma-care products or any other which may be notified in official gazette y DRAP as Health and OTC products;

Also as per the National Essential medicines List of Pakistan, Ministry of Health, Government of Pakistan – 2007 list, clause number 15.2, chloroxylenol 4.8% is included as a disinfectant. The present usage of their product Dettol ASL (after dilution) as per a local study conducted by M/s TNS Aftab& Associates in 2010, is as follows;

- Bathing – 80%
- Cuts & Bruises – 58%
- Washing clothes – 58%
- Shaving – 45%
- Nappies cleaning – 31%
- Allergy – 20%
- Floor Cleaning – 12%
- Kitchen slab cleaning – 9%
- Bathroom cleaning – 8%

The above data clearly delineates that the product usage is OTC unlike any medicine by general public and not requiring any prescription by physicians. The study in its entirety is attached for perusal.

Their product Dettol ASL is also amenable to Sales Tax on goods under the Sales Tax Act, 1990 while all products registered under the Drugs Act, 1976 are exempt from sales tax. An exception has been created for those products that are registered under the Act but are disinfectants. Their product, is therefore, also treated as a disinfectant by all taxing authorities.

That all that is sated above categorically demonstrates that their product, Dettol ASL is a disinfectant under the Act and clearly falls under the sub-category of Health and OTC products (Non-Drugs) under the DRAP Act. This sub-category is now liable to be treated separately under the OTC Rules, as it is presumed there will be less stringent regulation for those products that are not life saving or therapeutic drugs, for which an entirely separate Directorate has been created.

Therefore, by enlistment of their product they would continue paying GST along with deregulation and de-registration by DRAP from the general category and eventual enlistment and registration in the specific sub-category they fall within. This will enable their consumers to continue their endeavors in attaining health and hygiene resulting in;

- Maintaining continuous revenue for the government
- Spreading of Health Education with ongoing projects like **—Save the Children"** with Government of Pakistan
- Their company has initiated various health and hygiene programs in **Schools and Hospitals** for the benefit of common people.

In view of the foregoing, they would humbly urge to look into the matter with the above facts mentioned which favor Dettol Antiseptic Liquid being enlisted separately as a Health & OTC product (non-drug) after which a fresh letter of registration and new MRP may be issued keeping the facts that it is not a life saving or essential therapeutic drug in mind.

Decision of M-245: *Registration Board deferred all products for personal hearing / presentation before Registration Board.*

M/s Reckitt Benckiser Pakistan Private Limited has filed a Civil Suit No.264-2016 by before the High Court of Sindh vs Federation of Pakistan and others and Sindh High Court has passed an order dated 29-04-2019 i.e., summarized as under:

> *"The plaintiff has impuged letter dated 07.07.2015 which has been issued in response to the Plaintiff's application dated 16.02.2015 whereby, they had requested the Drug Regulatory Authority to enlist their product covered by this suit under the alternative Medicines & Health Products Enlistment Rules, 2014. In the said letter it is stated by the DRAP that since the product in question has already registered under the Drug's Act 1976, hence, now, it cannot be enlisted under the 2014 Rules. On perusal of the said letter it appears that DRAP has not assigned proper reasons as to the objections raised by the Plaintiff vis-à-vis. the applicability of the DRAP Act, 2012. Since apparently proper reasons have not been assigned by DRAP through letter dated 07.07.2015, the matter is remanded to the Drug Regulatory Authority of Pakistan to decide the application of the Plaintiff with proper reasons after affording opportunity of hearing to the plaintiff and pass appropriate orders in accordance with law. Furthermore, such exercise be preferably carried out within a maximum of 60 days from today and till then, no coercive action shall be taken against the Plaintiff."*

Aforementioned in view, M/s Reckitt Benckiser Pakistan was called (vide letter dated 09-05-2019) for personal hearing before the Registration Board on 14-05-2019. However, the firm, vide their letter dated 13-05-2019, raised following objections to the contents of letter issued for personal hearing:

a. The High Court has not remanded the matter back to the Registration Board. You will note that the order makes specific reference to letter dated 07th July 2015.Such letter was issued by the Directorate Health & OTC Products (non-drugs).Therefore, the remand order is directed at the Directorate Health & OTC Products (non-drugs) and the personal hearing is to be conducted by officials of such Directorate.
b. Furthermore, the Registration Board is not a defendant in Suit No.264 of 2016. Defendant No.3 is the Director Health & OTC Products (Non-drugs) and Defendant No.4 is the Deputy Drug Controller Health & OTC Products (Non-drugs). The direction of the High Court in the Order is quite clearly issued to such Defendants and not to a party that is not a Defendant in the Suit.

Furthermore, the firm has also stated that:

1. Without prejudice to the above, the Company is also in the process of filing a High Court Apeal ("HCA") against the order of the High Court. It seeks reversal of the Order and suspension in the interim and shall, therefore, not enter any remand proceedings whether before the Registration Board or the Directorate Health & OTC Products (non-drugs) till such time that the HCA is first heard. Entering remand proceedings shall divest the Company of its right of impugning the remand order & you are, therefore, requested to permit the Company to exercise its statutory right of appeal for which it has 20days from the date of issuance of the Order under the law.
2. In the meanwhile you are requested to respond to our objections with reasons of alternatively, and ideally, to transfer the matter to the competent authority in light of Order of the High Court which has remanded the matter to and ordered that a personal hearing be granted by

the Directorate Health & OTC Products (Non-Drugs) (Defendant Nos. 3 & 4) and not the Registration Board.

3. Consequent to the above, internal and legal representatives of the Company will not be attending the personal hearing on the 14 May, 2019.

4. It may be noted that the company also reserves its right to file an appropriate application before the High Court in Suit No. 264 of 2016 in the event that the Registration Board proceeds any further in this matter.

Decision: Keeping in view the above mentioned sitauation, Registration Board decided to seek opinion of Legal Affairs Division, DRAP for further processing of case.

Case No.04. Risks & Concerns Associated with Dydrogesterone.

A number of applications have been received by Pharmaceutical Evaluation & Registration Division for registration of Dydrogesterone Tablets. While evaluation, it was identified that the applied formulations were based on "Cis Isomer" of Dydrogesteronei.e not in compliance with the USP monograph for dydrogesterone tablet & European Pharmacopeial monograph for dydrogesterone API, both of which state "trans isomeric form".

The observation was further confirmed by reviewing innovator's formulation approved by following Reference Regulatory Authorities:

a. ANSM France (Duphaston, Authorization Holder: MYLAN MEDICAL SAS)
b. CBGMEB Netherlands (Duphaston; Reg. No. RVG 107765/ 05619)
c. AGES Austria (Duphaston, Owner: BGP Products GmbH, Perfektastrasse 84A, 1230 Vienna, Austria)
d. Swissmedic Switzerland

Concerns Raised by Abbott Laboratories:

M/ s Abbott Laboratories (Pakistan) Ltd. has raised the same issue and highlighted following points of concern & risks associated with the use of mislabeled Dydrogesterone:

- Solvay Pharmaceuticals is the only company in the world which manufactures dydrogesterone because manufacturing requires a proprietary technique.
- In Pakistan, dydrogesterone was only marketed by Solvay's agents, Highnoon Laboratories Limited under the brand name of DUPHASTON i.e currently owned by Abbott Laboratories.
- Dydrogesterone manufacturing process involves, as an essential step, a photochemical reaction which leads to conversion of configuration. The manufacturing of 6-dehydroprogesterone lacks the photochemical conversion step resulting in substantially different 3D structure.
- Different structures lead to different pharmacological profile such that efficacy of these two molecules differ significantly.
- The clinical data on efficacy and/or safety is not available for 6-dehydroprogesterone lacking the proof that this is any beneficial for the patient. As there is no data in support of 6- Dehydroprogesterone, it cannot be evaluated in comparison to dydrogesterone in terms of safety & efficacy.

Furthermore, M/s Abbott has submitted following supportive studies:

i. Drug analysis conducted on products claiming as dydrogesterone at:
   1) Abbott's MS&T Analytical Sciences & Technology, Weesp, The Netherlands.
   2) Industrial Analytical Center, HEJ Research Institute of University, University of Karachi.

The results of the chemical analysis revealed the main component as 6-dehydroprogesterone & not dydrogesterone.

ii. Results Deduced From Comparative Molecular Modeling Study:

Dydrogesterone possesses a biological potency significantly higher than progesterone itself as it takes advantage both from its retro structure and from the presence of the C6-C7 double bond, which constricts the molecule into a rigid conformation probably suitable for the interaction with the progesterone receptor. Moreover, as a consequence of its better bioavailability and the progestational activity of its main metabolites (20-, 21- and 16-hydroxy derivatives), its equivalent dose, regarding the endometrial proliferation, is 10-20 times lower than that of progesterone itself**.**

Previous Proceeding:

In 2008 M/s Zafa Pharmaceutical Laboratories (Pvt) Ltd. Karachi, appealed before the Appellate Board against the decision of Registration Board regarding stoppage of production of their drug "Dirogest Tablets" containing "Dydrogesterone Cis Isomer", for local manufacture. The Appellate Board in its 134th meeting held on 17-06-2008 after considering the following arguments & merits of the case, accepted the appeal since no scientific evidence contravened the arguments made by M/s Zafa.

Mr. Muhammad Amin Khan, C.E.O., Mr. Jawad Amin Khan, MD, Mr.Muhammad Aslam Shah, GM Technical & Mr. Hassan Masood Naqvi, Assistant Sales Manager of the firm appeared before the Board on behalf of the firm & stated that "Dirogest Tablets" containing "Dydrogesterone Cis Isomer was registered in 2002 and since then they are marketing the said drug without any complaint from the doctors/ market. They had been selling more than 100000 packs per year & no complaint had been received about their efficacy. They further added that the said drug was also available in Israel & Syria. They informed the board that comparative study of the two different dosage of the drug had been conducted in John Hopkins Bloomberg School of Public Health and some trials in different hospitals in Pakistan had been conducted. They also informed the board that their drug was cheaper than its competitors in the market.

It is however, submitted that Duphaston is the proprietary name of the dydrogesterone containing product registered by Ministry of Health, Israel in the name of ABBOT MEDICAL LABRATORIES LTD, ISRAEL. Moreover, M/s Zafa, in order to prove their stance, is obliged to provide data regarding aforementioned comparative study.

Findings:

Besides progesterone, the natural progestational agent, many synthetic progestins are known. One of the classes is represented by “Retrosteroids” and the most representative compound among these is 6-dehydroretroprogesterone (dydrogesterone). Another progestin considered in this regard is 6-deydroprogesterone (Cis Isomer), having a molecular structure almost identical to that of 6-dehydroretroprogesterone (dydrogesterone), however in dydrogesterone molecule, the hydrogen atom at C-9 is at beta position & methyl group at C-10 is at the alpha position (Figure1). Whereas 6-Dehydroprogesterone has a reverse configuration at position C-9 & C-10 (Figure2), hence the term ‘retro’ progesterone. The acetyl group at C-17 in both structures have same configuration.

Structural Comparison of 6 – Dehydroprogesterone and Dydrogesterone

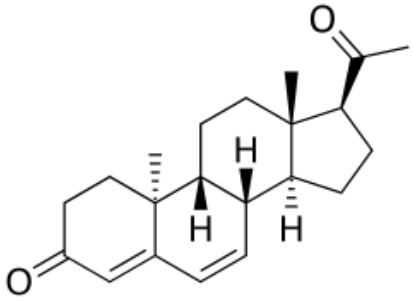

Figure1

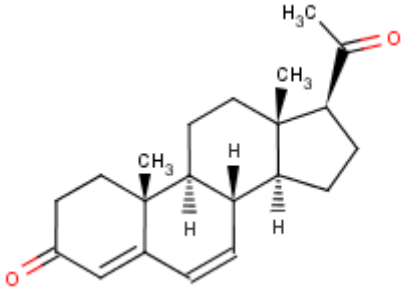

Figure 2

Both the isomers have different physical properties confirming these to be different pharmaceutical entities.

S.No.	Attributes	Cis Isomer	Trans Isomer
1	Chemical Name	6-Dehydroprogesterone	6-Dehydroretroprogesterone
2	Molecular Weight	312.45	312.45
4	CAS Number	1162-56-7	152-62-5
5	Specific Rotation	+170º- +182º	-469-485(dried substance) measured at 25ºC
6	Melting point	142-148ºC	167-171ºC
7	Relative Retention Time towards Dydrogesterone (Reverse phase HPLC with UV Detector) USP38-NF33	1.17 min	1min

The Registration Board in its 281st meeting deferred the case for final comments from PPMA. The board advised the observers of the PPMA to submit their response in the matter within 15 days without waiting for any letter from DRAP. Board further directed to present all the deferred cases in the next meeting.

Decision of M-284:

Registration Board deferred the case for final comments from PPMA. The board advised the observers of the PPMA to submit their response in the matter within 15 days without waiting for any letter from DRAP. Board further directed to present all the deferred cases in the next meeting.

In this regard, a reminder has also been issued to PPMA dated 22-10-2018 to comments within 07 days for consideration and finalization of the case by PPMA.

Decision of M-286: *Registration Board deliberated the case in the light of above stated facts and findings and decided as under:*

Since USP monograph for Dydrogesterone states CAS No. "152-62-5" i.e assigned to "Trans Isomeric Form; 6-Dehydroretroprogesterone" and as per Drugs Specification Rules 1978, "drug products registered with any official pharmacopoeial specifications shall follow specifications present in the latest edition of that publication". Furthermore, as per information

available on web, approval status of "Cis Isomeric Form" of dydrogesterone could neither be confirmed in any Reference Regulatory Authority nor in Syria and Israel. Therefore, the Board referred the case to the Appellate Board with the request to review the decision taken vide its 134th meeting, held on 17-06-2008.

Accordingly, the case was considered by the Appellate Board as per following details.

i. The representative of M/s Zafa Pharmaceutical Laboratories (Pvt) Ltd, requested for adjournment.

ii. The Representative of M/s Abbott Laboratories Pakistan Ltd, contended that there are following differences Dydrogesterone and 6-Dehydroprogesterone.

Dydrogesterone (Duphaston)	**6-Dehydroprogesterone.**
Dydrogestrone is "Retro-Steroid" shaped by photochemical conversion (Trans-Isomer)	A synthetic derivative and natural metabolite of progesterone, a steroid isomer of Dydrogesterone but not retro-steroid (Cis-Isomer)
Due to Retro Steroidal nature it is highly selective for the progesterone receptor.	No such benefit is offered as the chemical structure is not retro-steroid.
Due to the retro-steroidal nature its metabolites are progestogenic	Non-retro-steroid are not only metabolized to a greater extent but also have a potential to generate in active metabolites with secondary effects that are non-progestrogenic.
As of April 22, 2019, 623 articles are available for the use of Dydrogestrone out of which 205 publications are clinical trials in humans.	Clinical data for use of 6-Dehydroprogesterone is lacking.
Extensive data and clinical experience world vide.	Due to lack of data there is a possibility of patient exposed to increased health risk or worsening of their medical condition.

iii. It was further argued that there are various companies promoting medicines containing 6-Dehydroprogeesterone but claiming that the active ingredient is Drydrogesterone and that they have the same indications, properties and action as Abbott's original molecule Dydrogesterone (Duphastan). The clinical data/study on the efficacy and safety is not available for 6-Dehydrogprogesterone. Available pre-clinical data is conclusive of the fact that 6-Dehydroprogesterone as a very low biological activity as compared to progesterone. In the absence of clinical data supporting the use of 6-Dehydroprogesterone, it cannot be evaluated if this molecule is comparable to Dydrogesterone in terms of safety and efficacy. Mislabeled dygrogesterone has not been fully tested for its safety or efficacy and therefore patient offered such medicines are not only exposed to increased health risks in terms of suboptimal effects leading to compromised health, but also to direct side effects. This further becomes point of concern in cases where with use of mislabeled products there is expected exposure to fetus.

iv. The Board considered the facts of the case and decided not to adjourned the hearing as requested by M/s Zafa Pharmnaceuticals Laboratories (Pvt) Ltd, Karachi, being a matter of public health importance. The board agreed with the scientific opinion/justification and interpretation of the drugs (Specifications) rules,1986 by the registration board in its 286th meeting held on 14th-16th November, 2018. The board directed the pharmaceutical Evaluation and Registration Division to ensure that all registered formulation/products and evaluation of Dydrogesterone products must comply with the official pharmacopeial monograph i.e USP. The board further directed the division of QA&LT to allow the import of API for registered products of Dydrogesterone as per official monograph only and to issue a circular for information of all concerned.

Decision: Registration Board advised to comply directions / decision of Appellate Board.

Case No. 05: Minutes of 07th Meeting of Expert Working Group on Veterinary Drugs Held on 13th May, 2019.

A. Use of multidose Oxytocin vials in Veterinary.

The meeting was conducted on the issue of alleged misuse of Oxytocin multi-dose vials in veterinary for the purpose of milk production. The matter was deliberated extensively by the participants. Decisions/discussion is as follow;

a. Dr. Muhammand Akram informed the committee that Oxytocin is, primarily, used in veterinary for the purpose of milk letdown. He further informed that the half life of Oxytocin Injection is around 02 minutes and withdrawal period of oxytocin in milk and meat is zero hours and zero days respectively. About 1-2cc of the injection is used for milk letdown.
b. The Committee/participants decided to expand the consultation horizon to a national consultation process/level and include the following relevant/technical experts in order to probe the matter in detail and a meeting in this regard shall be convened in near future;
    i. Human and veterinary Endocrinologists.
    ii. Expert from M/o. Food Security.
    iii. Director General's of livestock departments of all provinces.

Decision:- Registration Board endorsed the decision made in 07th meeting of Expert Working Group on Veterinary Drugs.

B. M/s. Mustafa Brothers, Faisalabad:

Importer and Manufacturer	**Brand Name and Composition**	**Decision of 269th meeting**
M/s. Mustafa Brothers 186-D, Peoples Colony No. 1, Faisalabad **Manufacturer:** M/s. Federal Governmental Budgetary Institution "Federal Centre for Animal Health" (FGBI"ARRIAH") 600901, Russia, Vladimir region, Vladimir, microrayonYur' evets	**ARRIAH PPRV** (Virus vaccine against PesteDesPetitis Ruminants Cultural Dry) The Virus vaccine against PesteDesPetitis Ruminants Cultural Dry contains Peste Des Petitis Ruminants virus of "ARRIAH" strain. Each inoculating dose contains: PPRV vaccine strain "ARRIAH" not less than 1000$TCID_{50}$.	**269th** Registration Board approved the product as per import policy for finished drugs and as per valid legalized GMP & Free sale certificate **Approved**

Decision of 5th meeting of Expert working group: - Expert working group deferred the application for submission of exact strain name of PPRV virus used along with its scientific immunological relevance in Pakistan by the firm.

Now the firm has submitted the following reply.

a) PPRV "Virus Vaccine Against Peste Des Petits Ruminants Cultural Dry" strain clarification received from our manufacturer FGBI ARRIAH "Federal Center For Animal Health" Vladimir Russia is enclosed. The main virus of this vaccine strain is Nigeria 75/1 "ARRIAH" enclosed.
b) Publication ab2out PPRV "Virus Vaccine Against Peste Des Petits Ruminants Cultural Dry" manufactured by FGBI "ARRIAH" enclosed.
c) Scientific immunological relevance of PPRV "Virus Vaccine Against PesteDes Petits Ruminants Cultural Dry" in Pakistan "Nigeria 75/1" is attached:

For scientific immunological relevance in Pakistan, the firm has submitted a research article title,authors details,Abstract and its conclusion is reproduced as under.(The submitted article is annexed with the agenda**)**

"Peste des Petits Ruminants Vaccine
(Nigerian Strain 75/1) Confers Protection for at Least 3 Years in Sheep and Goats

Aamer Bin Zahur[1], Hamid Irshad[1], Aman Ullah[1], Muhammad Afzal[2], Asma Latif[1], RiasatWasee Ullah[1], Umer Farooq[1], Muhammad Humayoon Samo[2], Muhammad Jahangir[2], Giancarlo Ferrari[3], Manzoor Hussain[2], M. Munir Ahmad[4]

Abstract

The present study reports the duration of immunity and protective efficacy of Peste des Petits Ruminants (PPR) vaccine (Nigerian strain 75/1) in sheep and goats. A total of 105 sheep and goats were divided into three groups A, B and C. Group A received normal recommended dose (1.0ml) of PPR vaccine, group B received half dose (0.5ml) of PPR vaccine and group C was kept as unvaccinated control group in contact with vaccinated animals. The post vaccination dynamics of antibodies against PPR virus was studied. It was found that significant antibody titres persisted for 3 years post vaccination in sheep and goats vaccinated with either full dose or half dose of PPR vaccine. The challenge protection studies were carried out in experimental animals at 24 and 36 month post vaccination. The vaccinates withstood challenge and were found completely resistant clinically and virologically to virulent PPR virus for 24 and 36 months post vaccination. The unvaccinated control animals developed typical clinical signs of PPR and the challenged virus was detected in ocular, nasal and oral secretions of these animals. This study demonstrated that a single immunization with PPR vaccine conferred solid protection in sheep and goats for 3 years.

Conclusion

The economic life of small ruminants is about 3 years. This study indicated that PPR vaccine (Nigerian strain 75/1) provides immunity for 3 years. Therefore, the strategic use of this vaccine will be useful in reducing the impact of infection in the areas where the disease is endemic."

Decision :

Expert working group noted that the Peste Des Petitis Ruminants (PPR) virus strainARRIAH is brand name of the Peste Des Petitis Ruminants (PPR) vaccine (Nigerian strain 75/1). The same strain is already registered in Pakistan therefore the working group recommended the veterinary vaccine i.e. ARRIAH PPRV by M/s. Mustafa Brothers, Faisalabad for registration and recommended the replacement of the word "ARRIAH" with "PPR vaccine (Nigerian strain 75/1)" in composition.

Decision:- Keeping in view the recommendation of Expert Working Group on Veterinary Drugs, Registration Board decided to approv the above mentioned product of M/s. Mustafa Brothers, Faisalabad with replacement of the word "ARRIAH" with "PPR vaccine (Nigerian strain 75/1)" in composition.

Case no. 01 Registration Applications for Local Manufacturing of (Human) Drugs.

a. New Cases:

1.	Name and address of manufacturer / Applicant	"M/s Aspin Pharma Pvt Ltd. Plot # 10 & 25, Sector 20, Korangi Industrial Area, Karachi 74900, Pakistan"
	Brand Name +Dosage Form + Strength	Onran 4mg Tablet
	Composition	"Each Film Coated Tablet Contains: Ondansetron as hydrochloride dihydrate …….4mg"
	Diary No. Date of R& I & fee	Dy. No 10161 dated 19-03-2018 Rs. 20,000/- 19-03-2018
	Pharmacological Group	Antiemetic
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per latest DPC
	Approval status of product in Reference Regulatory Authorities	Approved by MHRA of UK
	Me-too status (with strength and dosage form)	Oniron 4mg Tablets of M/s Genome Pharmaceuticals, (Reg.# 068374)
	GMP status	Firm has submitted copy of GMP inspection report conducted on 20-2-2018, concluding as under: "Based on the areas inspected the document reviewed and considering the finding of inspection M/s Aspin Pharma is considered to be operating at satisfactory level of compliance with respect to cGMP guidelines as per Drug Act 1976 and DRAP Act 2012."
	Remarks of the Evaluator[II]	
	Decision: Approved.	
2.	Name and address of manufacturer / Applicant	"M/s Aspin Pharma Pvt Ltd. Plot # 10 & 25, Sector 20, Korangi Industrial Area, Karachi 74900, Pakistan"
	Brand Name +Dosage Form + Strength	Onran 8mg Tablet
	Composition	"Each Film Coated Tablet Contains: Ondansetron as hydrochloride dihydrate …….8mg"
	Diary No. Date of R& I & fee	Dy. No 10162 dated 19-03-2018 Rs. 20,000/- 19-03-2018
	Pharmacological Group	Antiemetic
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per latest DPC
	Approval status of product in Reference Regulatory Authorities	Approved by MHRA of UK
	Me-too status (with strength and dosage form)	Oniron 8mg Tablets of M/s Genome Pharmaceuticals, (Reg.# 068375)
	GMP status	As recorded for above application
	Remarks of the Evaluator[II]	
	Decision: Approved.	
3.	Name and address of manufacturer / Applicant	"M/s Aspin Pharma Pvt Ltd. Plot # 10 & 25, Sector 20, Korangi Industrial Area, Karachi 74900, Pakistan"
	Brand Name +Dosage Form + Strength	Fosvac 20mg Tablet
	Composition	"Each Tablet Contains: Fosinopril Sodium…20mg"
	Diary No. Date of R& I & fee	Dy. No 10164 dated 19-03-2018 Rs. 20,000/- 19-03-2018
	Pharmacological Group	Antihypertensive.
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per latest DPC
	Approval status of product in Reference Regulatory Authorities	Approved by MHRA of UK

	Me-too status (with strength and dosage form)	Not available
	GMP status	As recorded for above application
	Remarks of the Evaluator[II]	Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm or else apply on form 5-D along with stability data.
	Decision: Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm or else apply on relevant Form along with stability data.	
4.	Name and address of manufacturer / Applicant	"M/s Aspin Pharma Pvt Ltd. Plot # 10 & 25, Sector 20, Korangi Industrial Area, Karachi 74900, Pakistan"
	Brand Name +Dosage Form + Strength	Fosvac 10mg Tablet
	Composition	"Each Tablet Contains: Fosinopril Sodium…10mg"
	Diary No. Date of R& I & fee	Dy. No 10163 dated 19-03-2018 Rs. 20,000/- 19-03-2018
	Pharmacological Group	Antihypertensive.
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per latest DPC
	Approval status of product in Reference Regulatory Authorities	Approved by MHRA of UK
	Me-too status (with strength and dosage form)	Aksopril Tablets 10mg of M/s Akson Pharmaceutical (Pvt) Ltd (Reg.#023747)
	GMP status	As recorded for above application
	Remarks of the Evaluator[II]	
	Decision:Approved.	
5.	Name and address of manufacturer / Applicant	"M/s Aspin Pharma Pvt Ltd. Plot # 10 & 25, Sector 20, Korangi Industrial Area, Karachi 74900, Pakistan"
	Brand Name +Dosage Form + Strength	Jormia XR 1000mg Tablet
	Composition	"Each Extended Release Tablet Contains: Metformin Hydrochloride…1000mg"
	Diary No. Date of R& I & fee	Dy. No 10160 dated 19-03-2018 Rs. 20,000/- 19-03-2018
	Pharmacological Group	Antidiabetic
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per latest DPC
	Approval status of product in Reference Regulatory Authorities	Approved by USFDA
	Me-too status (with strength and dosage form)	Dowphage ER 1000mg Tablet of M/s Martin Dow Ltd. Karachi. (Reg.#081129)
	GMP status	As recorded for above application
	Remarks of the Evaluator[II]	
	Decision:Approved.	
6.	Name and address of manufacturer / Applicant	"M/s Aspin Pharma Pvt Ltd. Plot # 10 & 25, Sector 20, Korangi Industrial Area, Karachi 74900, Pakistan"
	Brand Name +Dosage Form + Strength	Fosvac 40mg Tablet
	Composition	"Each Tablet Contains: Fosinopril Sodium…40mg"
	Diary No. Date of R& I & fee	Dy. No 10165 dated 19-03-2018 Rs. 20,000/- 19-03-2018
	Pharmacological Group	Antihypertensive.
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per latest DPC
	Approval status of product in Reference	Approved by MHRA of UK

	Regulatory Authorities	
	Me-too status (with strength and dosage form)	Not available
	GMP status	As recorded for above application
	Remarks of the Evaluator[II]	Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm or else apply on form 5-D along with stability data shall be submitted. Upon communication of above observation firm has replied that We would like to inform you that we are working on Form 5D dossier of the subject product and will provide updated dossier once completed as required by your good office"
	Decision:Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm or else apply on relevant Form along with stability data.	
7.	Name and address of manufacturer / Applicant	"M/s Aspin Pharma Pvt Ltd. Plot # 10 & 25, Sector 20, Korangi Industrial Area, Karachi 74900, Pakistan"
	Brand Name +Dosage Form + Strength	Anprox 500mg Tablets
	Composition	"Each Tablet Contains: Naproxen Sodium 547.74mg Eq. to Naproxen…500mg"

Diary No. Date of R& I & fee	Dy. No 12246 dated 03-04-2018 Rs.20,000/- 03-04-2018
Pharmacological Group	Adrenergics in combination with corticosteroids or other drugs, excluding Anticholinergics.
Type of Form	Form-5
Finished product Specifications	USP
Pack size & Demanded Price	60's; Rs. 1500/-
Approval status of product in Reference Regulatory Authorities	Advair diskus approved by USFDA
Me-too status (with strength and dosage form)	Seretide Diskus 50/500mcg Powder For Inhalation of M/s Glaxosmithkline Pakistan Limited, 35-Dockyard Road, West Wharf, Karachi. (Reg.#074728).
GMP status	GMP inspection dated 26-06-2018 wherein firm was considered to be operating at an acceptable level of compliance with GMP guidelines as of today.

Remarks of the Evaluator[II]

- The applied formulation is approved in USFDA is supplied as a disposable purple plastic inhaler containing a foil blister strip with 60 blisters. The inhaler is packaged in a plastic-coated, moisture-protective foil.

Sr. #	Observations	Response by Firm
i.	Under standardized in vitro test conditions, ADVAIR DISKUS delivers 233mcg of fluticasone propionate and 45mcg of salmeterol base per blister from ADVAIR DISKUS when tested at a flow rate of 60L/min. for 2 seconds while you have not submitted any label claim for delivered dose	Please refer to submitted finished product specification wherein we have mentioned that Delivered-Dose Uniformity should be as per USP monograph i.e., Saltra DPI delivers 233mcg of fluticasone propionate and 45mcg of salmeterol base per capsule when tested at a flow rate of 60L/min. for 2 seconds.
ii.	In reference products referred by you, formulation is pre-dispensed in a foil blister strips, whereas applied formulation is primarily pre-dispensed in hard capsules. Justification shall be submitted for change in primary container closure system with respect to compatibility of applied formulation with the hard gelatin capsule.	This is to bring to your kind attention that DRAP has already approved Salmeterol + Fluticasone propionate DPI 50mcg + 250mcg in hard capsules in its 275th DRB Meeting for M/s Macter International Ltd., Karachi with the brand name of Salmicort DPI (Salmeterol + Fluticasone propionate) Capsules 50mcg + 250mcg (extract attached). In order to confirm the compatibility of applied formulation with hard capsules, this is to inform you that HMPC based capsule shell is inert in nature and has no impact on formulation. Also, the primary packaging of our applied product and reference product is same i.e., Blister foil.
iii.	Clarification regarding intended manufacturing area, since applied formulation contains Fluticasone, which is a steroid.	This is to inform your good office that we have established a segregated facility for the manufacturing of Dry Powder Inhalers (DPI) Capsules. Layout of the said facility has been approved by DRAP (copy of approval letter attached). Further, we have requested Central Licensing Division of DRAP for the constitution of panel for the inspection of our newly established Dry Powder Inhalers (DPI) manufacturing facility (copy of request letter attached). We hereby declared that after registration of 'Saltra DPI', the said product will be manufactured in our segregated DPI manufacturing facility.

	Decision: Deferred for further deliberation upon manufacturing requirement of applied formulation.

	Approval status of product in Reference Regulatory Authorities.	Xenical 120mg capsule (USFDA Approved)

	Me-too status	Orly capsule 120mg of M/s Rotex Medica Pakistan
	GMP status	26-05-2017-Routine GMP Inspection; Firm is GMP compliant
	Remarks of the Evaluator.	• Firm has submitted only real time stability study data of three batches of pellets for 24 months.
	Previous Decision:	Registration Board in its 282nd meeting deferred for further deliberation upon requirement of accelerated stability study data of Orlistat pellets
	Evaluation by PEC:	• Firm has submitted declaration form M/s Vision Pharmaceuticals (Pvt.) Ltd. as under: "Orlistat melts at about 42°C and its formulation becomes unstable at higher temperature so it's not suitable to perform stability studies at accelerated conditions i.e., 40 ± 2°C and 75% ± 5%, due to this reason accelerated stability studies for orlistat immediate release pellets is not being performed. We are performing only real time stability studies (i.e., 30 ± 2°C and 65% ± 5%).
	Decision: Deferred for further deliberation upon stability data requirement for orlistat pellets.

	Previous Remarks of the Evaluator.	• Clarify the difference between product license owner and product license holder mentioned on Form 5A. License Holder/MAH G.E.S Genericos Espanoles Laboratorio, S. A. Colquide 6-Portal 2,1 –Oficina F 28230 Las Rozas Madrid Spain Product Owner M/s Altan Pharma Limited , 2 Harbour Square, Crofton Road Dun Laoghair , Co. Dublin, Ireland Both companies belong to same shareholder Altan Pharma Limited. Tha Altan Pharma Limited is the ultimate shareholder of its affiliate G.E.S Genericos Espanoles Laboratorios and Biomendi , S. A. • "Not require any special storage condition".

		• Test for Water loss has been determined i.e. test for semi-permeable membrane. Shortcomings • Name of drug in COPP is TIROFIBAN GES 50 micrograms / ml solution for perfusion EFG. • Valid drug sale license is missing Provide notary attested photocopy. Applied for Renewal, not yet received.
	Previous Decision: Registration Board in its 285th meeting Deferred for the following reasons: • Clarification regarding the difference in brand name mentioned on COPP i.e. "TIROFIBAN GES 50 micrograms / ml solution for perfusion EFG" and on Form • 5A i.e. "Thrombostat Injection 12.5mg/250mg Solution for Infusion". • Submission of valid drug sale license. • Justification for submission of stability data at 30 °C ± 2 °C/65% RH ± 5% RH as the requirement for aqueous-based products packaged in semi-permeable containers is at 30 °C ± 2 °C/35% RH.	
	Evaluation by PEC: The firm has submitted as under: • The brand name in Spain is as mentioned on COPP that is "Tirofiban GES 50micrograms/ml solution for perfusion EFG" but we are proposing the brand name "Thrombostat Injection" for Pakistan. Both the products are same only the brand name is different in Pakistan. • We have been authorized by the principal for this brand name (copy of communication via e-mail enclosed) and we have received from the Trade marks registry, Karachi, the certificate of Registration of trade mark section 33 (4) for "Thrombostat" dated, 04 Oct. 2018 (copy enclosed). • Copy of valid DSL for M/s Medinet Pharmaceuticals, Building No. 601, Lane No. 5, Main Peshawar Road, District Rawalpindi, valid upto 13-12-2019. • Firm has submitted stability studies data for three batches at 30 °C ± 2 °C/35% ± 5% RH.	
	Decision: Approved with Innovator's specifications.as per Policy for inspection of Manufacturer abroad.

Case No. 06 Registration Applications of Drugs for which Stability Study Sata is Submitted.

a. Deferred Cases.

396.	Name and address of manufacturer / Applicant	M/s Sami Pharmaceuticals Pvt. Ltd, Karachi.
	Brand Name+Dosage Form+ Strength	Iburo Injection 800mg/8ml
	Composition	Each vial contains: Ibuprofen…800mg
	Diary No. Date of R& I & fee	Dy. No. 31027; 14-09-2018; Rs. 50,000/-, 14-09-2018
	Pharmacological Group	NSAID
	Type of Form	Form-5D
	Finished product Specifications	Innovator specifications
	Pack size & Demanded Price	Rs. 13,500/vial Rs. 13,5000/10's vial
	Approval status of product in Reference Regulatory Authorities	Approved in USFDA Caldolor by Cumberlands Pharmaceuticals
	Me-too status (with strength and dosage form)	N/A
	GMP status	Last GMP Inspection dated 3-10-2017 with conclusive remarks of good level of GMP compliance.

STABILITY STUDY DATA

Drug	Iburo Injection 800mg/8ml		
Name of Manufacturer	M/s Sami Pharmaceuticals Pvt. Ltd		
Manufacturer of API	SI Group ,Orangeburg, SC, USA		
API Lot No.	4050-3159		
Description of Pack (Container closure system)	Glass Vial		
Stability Storage Condition	Real Time: 30°C ± 2°C / 65% ± 5%RH Accelerated:40°C ±2°C / 75% ± 5%RH		
Time Period	Real Time: 06 Months Accelerated:06Months		
Frequency	Real Time: 0,3,6 Months(on going) Accelerated: 0,1,2,3,4,6 Months		
Batch No.	Lab-01	Lab-02	Lab-03
Batch Size	10.5 liter (1333 vials)	10.5 liter (1333 vials)	10.5 liter (1333 vials)
Manufacturing Date	Dec 2017	Dec 2017	Dec 2017
Date of Initiation	Jan 2018	Jan 2018	Jan 2018
No. of Batches	03		
Date of Submission	Dy. No. 31027; 14-09-2018		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API	Yes Lot number: 4050-3159
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	SI Group, Inc. ,725 Cannon Bridge Road, Orangeburg, South Carolina (SC) 29115, United States (USA) 12/31/2019

3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Yes Invoice No:442831 Ibuprofen 40 Microns ADC Attested Invoice dated: 09-10-2017 Quantity: 5 Kg
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

- The firm has claimed In House specifications and the product is not present in USP/BP.

Sr. No.	Deficiencies/Shortcomings	Reply by Firm
1.	Justify the quantity of API i.e. 805.713/vial used in the formulation as the label claim is 800mg/vial.	Quantity of API has been calculated on the basis of its potency and considering the assay value, moisture content etc.,
2.	Batch No of API not mentioned on ADC invoice and Form 6.	We attached herewith FORM 7 marked as Annexure 02, which in essence is batch declaration obtained from the Manufacturer on its letter head as per Drug Act, 1976. FORM 6 and endorsement from ADC was applied against FORMs 3 and 7.
3.	Approval of API by regulatory authority of country of origin or valid GMP certificate of API manufacturer issued by regulatory authority of country of origin.	SI Group, Inc., 725 Cannon Bridge Road, Orangeburg, South Carolina (SC) 29115, United States (USA) Registration of Establishment No. 3011012288 Validity: 12/31/2019
4.	Clarify how 10.5 L batch size is equivalent to 1333 vials?	Batch size of the lab scale batches are 10.5 liters, vials produced from 10.5 liters are 1312 vials approx. 903 vials sent for stability, remaining vials utilized in initial test analysis Due to typographical error in analytical reports; no. of vials 1333 was mistakenly written instead of 903 vials- Sorry
5.	The batch no Lab-01 the standard 3 was ran on 7 July 2018 at 6:09 pm and sample on 8 July 2018 at 2:34 am. Justify the time gap between standard and sample. (Accelerated Condition).	• Method of analysis of assay has gradient program of 75 minutes • Complete analysis at single frequency of stability at 3rd and 6th month consist of at least 15 runs • At 6th month time point, in analysis of Ibuprofen sequence of injections started on Saturday, July 07, 2018 at 3:38:01 PM • Ended on Sunday, July 08, 2018 at 10:34:28 AM that is also verified by our attached audit trail marked as Annexure 06
6.	The batch no Lab-01 the standard 3 was ran on 3 April 2018 at 6:09 pm and sample on 4 April 2018 at 3:00 am. Justify the time gap between standard	• Method of analysis of assay has gradient program of 75 minutes • Complete analysis at single frequency of stability at 3rd and 6th month consist of at least 15 runs

	and sample. (Real time Condition).	• Similarly, at 3rd month time point, sequence of injections started on Tuesday, April 03, 2018 at 3:37:22 PM and • Ended on Wednesday, April 04, 2018 at 09:20:01 AM that is also verified by our attached audit trail marked as Annexure 07
7.	The batch no Lab-2 an intense peak has been observed in both standards and samples at RT between 50 min and 60minutes, especially in standard .Justify. (Accelerated Condition).	Due to system behavior, extra peak appears on both standard and samples that means this peak is due to system response, not due to degradation

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Iburo (Ibuprofen) 800mg/8ml Injection by M/s Sami Pharmaceuticals Pvt. Limited, Karachi.

Reference No: F.13-11/2017-PEC (Pt) dated 23rd January, 2019.
Investigation Date and Time: 28th January, 2019. (Forenoon)
Investigation Site: Factory premises of M/s Sami Pharmaceuticals Pvt. Ltd. Karachi.

Background:

Chairman Registration Board considered the applications of M/s. Sami Pharmaceuticals (Pvt.) Ltd., Karachi for registration of Iburo (Ibuprofen) 800mg/8ml Injectionand constituted a three member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

1. An intense peak was observed for batch no. Lab-02 in both standard and sample at Retention time between 50min and 60mins. The firm provided the following justification that "Due to system behaviour extra peak appears on both standard and samples shall mean this peak is due to system response, not due to degradation".

Composition of Panel:

1. Dr. Rafeeq Alam, Meritorious Professor, Department of Pharmacology, University of Karachi, Karachi, Member Registration Board.
2. Mr. Aslam Shah, Member Registration Board.
3. Dr. Affan Ali Qureshi, Assistant Director, CDL, DRAP, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Details of Investigation:

S.No.	Description	Observation by panel
1	Do you have documents confirming the import of API including approval from DRAP?	The firm has imported 5.0kg Ibuprofen raw material from M/s SI Group Inc, United States, vide invoice no. 442831 dated 05-09-2017 and has obtained approval from DRAP Karachi. Batch No. | Quantity Imported 4050-3159 | 5.0kg
2	Do you have any rationale behind selecting the particular manufacturer	There is proper vendor evaluation process being implemented by the firm and the rationale behind vendor selection is controlled through: • Postal Audit checklist • GMP approval by competent authority
3	Do you have documents confirming the Import of Reference standard and Impurities standards?	The firm has imported EP grade 250mg of reference standard and impurity standard from EDQM

4	Do you have certificate of analysis of the API reference standard and impurities standards?	The firm has Certificate of Analysis for API, working standards and impurity standard.
5	Do you have any approval of API or GMP certificate of manufacturer issued by regulatory authority of country of origin?	The API manufacturer is registered establishment by USFDA the USFDA identifier is 3011012288 which is valid till 31-Dec-2019. The firm has also provided copy of GMP certificate issued by TGA Australia.
6	Do you use API manufacturer method of Testing for testing of API?	The firm has used pharmacopoeial method of testing.
7	Do you have stability Studies Report on API?	The firm has stability studies report of API Ibuprofen conducted by API manufacturer.
8	If Yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The manufacturer of API has performed the stability studies of API as per SIM Method.
9	Do you have method for quantifying the impurities in the API?	The firm has methods for quantifying the impurities in API.
10	Do you have some remaining quantities of the API, Its reference standard and impurities standard?	The firm has 3.20Kg API Ibuprofen but have consumed all reference standard and impurity standard.
11	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipient L-arginine.
12	Do you have documents confirming the import of the used excipients	The firm has documents confirming the import of the used excipients.
13	Do you have test reports and other records on the excipients?	The firm has test reports and other records on the excipients.
14	Do you have written and authorized protocols for the development of Iburo 800mg/8ml Injection?	The firm has written and authorized protocol for the development of Iburo 800mg/8ml Injection.
15	Have you performed Drug-Excipient compatibility studies?	Since firm has used same excipients as used by the innovator. Therefore, compatibility studies were not performed.
16	Have you performed comparative studies?	The firm has performed comparative studies on the basis of physical, chemical and microbiological analysis.
17	Do you have Product Development / R&D Section?	The firm has product development (R&D) Section with the facility of manufacturing oral and topical preparation only. The product under consideration has been manufactured in routine sterile area of the firm. The firm has dedicated analytical section for development of analytical methods and testing of new products.
18	Do you have necessary equipment's available in product development section for development of Iburo 800mg/8ml Injection?	The firm has necessary equipment available in routine sterile area for development ofIburo Injection 800mg/8ml.
19	Are the equipment's in product development qualified?	The available equipment in Product Development and sterile area are qualified.
20	Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD?	There is proper maintenance / calibration program for the equipment used in PD.

<table>
<tr><td>21</td><td>Do you have qualified staff in product development section with proper knowledge and training in product development?</td><td>The firm has 08 Pharmacists and 02 Chemists for Product Development Formulation and 6 Pharmacist and 4 Chemists in Analytical side.</td></tr>
<tr><td>22</td><td>Have you manufactured three stability batches for the stability studies of Iburo 800mg/8ml Injection as required?</td><td>The firm has manufactured three stability batches of each 10.5L.<table><tr><th colspan="3">Iburo 800mg/8ml Injection</th></tr><tr><td>Batch No</td><td>Date of Mfg.</td><td>Expiry Date</td></tr><tr><td>Lab-01</td><td>12-17</td><td>11-19</td></tr><tr><td>Lab-02</td><td>12-17</td><td>11-19</td></tr><tr><td>Lab-03</td><td>12-17</td><td>11-19</td></tr></table></td></tr>
<tr><td>23</td><td>Do you have any criteria for fixing the batch size of stability of batches?</td><td>The criteria for fixing the batch size of stability batches is the number of Injection per testing frequencies.</td></tr>
<tr><td>24</td><td>Do you have complete record of production of stability batches?</td><td>The firm has complete record for the stability batches of Iburo 800mg/8ml Injection.</td></tr>
<tr><td>25</td><td>Do you have protocols for stability testing of stability batches</td><td>The firm has protocols for testing of stability batches.</td></tr>
<tr><td>26</td><td>Do you have developed and validated the method for testing of stability batches</td><td>The firm has developed and validated method of testing of finish product Iburo 800mg/8ml Injection, based on method of testing of API.</td></tr>
<tr><td>27</td><td>Do you have method transfer studies in case when the method of testing being used by your firm is by any other lab.</td><td>Method transfer studies is not applicable as the firm developed and validated their own method.</td></tr>
<tr><td>28</td><td>Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of the product's API and product Iburo 800mg/8ml Injection?</td><td>The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of the Iburo 800mg/8ml Injection.</td></tr>
<tr><td>29</td><td>Do your method of analysis Stability indicating?</td><td>The firm's Method of analysis is Stability indicating.</td></tr>
<tr><td>30</td><td>Do your HPLC software 21CFR compliant?</td><td>The HPLC software is 21CFR compliant.</td></tr>
<tr><td>31</td><td>Can you show audit trail reports on Iburo 800mg/8ml Injection testing?</td><td>The firm has audit trail Reports on testing.</td></tr>
<tr><td>32</td><td>Do you have some remaining quantities of degradation products and stability batches?</td><td>The firm has some remaining quantities of stability batches only.</td></tr>
<tr><td>33</td><td>Do you have batches kept on stability testing?</td><td>The firm has three stability batches kept on stability for Real time stability testing. 9 Months Real Time and 6 months Accelerated stability studies has been completed.</td></tr>
<tr><td>34</td><td>Do you have valid calibration status for the equipment's used in Iburo 800mg/8ml Injection production and analysis?</td><td>The firm has valid calibration status for the equipment used in Iburo 800mg/8ml Injection production and analysis.</td></tr>
<tr><td>35</td><td>Do Proper and Continuous monitoring and control are available for stability chamber?</td><td>Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software 21CFR compliance.</td></tr>
<tr><td>36</td><td>Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?</td><td>Related manufacturing area, equipment, personnel and utilities can be rated as GMP compliant.</td></tr>
</table>

37	Any other query raised by the Pharmaceutical Evaluation Cell? An intense peak was observed for batch no. Lab-02 in both standard and sample at Retention time between 50min and 60mins. The firm provided the following justification that "Due to system behaviour extra peak appears on both standard and samples shall mean this peak is due to system response, not due to degradation".	1. The panel observed a peak of similar nature in mobile phase run at same retention time, this type of peak is also observed in other runs too. However, the peak area is very less as compared to the mentioned peak. 2. The panel disagrees with the firm's response and conclude the peak to be of mobile phase.

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Iburo 800mg/8ml Injection (Ibuprofen) is verifiable to satisfactory level.
2. The related manufacturing area, equipments, personnel and utilities are compliant and are suited for the manufacturing of Iburo 800mg/8ml Injection.

Decision of 288th meeting: Registration Board after thorough deliberation deferred the case for submission of documented analytical evidence wherein it has been identified that an intense peak observed in both standard and sample at retention time between 50min and 60mins is of mobile phase.

Remarks of Evaluator:

Firm has submitted as under:

- To investigate the issue of extra peak eluted in analysis of IBURO 800mg/8ml Injection at 56th minute, few exercises have been performed to prove that the particular unknown peak at 56 minute was not linked with any impurity, degradation or related substance
- To further support our claim that the said unknown peak is due to chromatographic condition gradient system generated, we have performed following exercises:

EXERCISE # 1:

- Analysis with extended run time of 100 minutes instead of 75 minutes inject the mobile phase, standard, sample and impurity standards to see whether any impurity eluted after the normal run time.

OBSERVATION:

- No peak of API and any impurity related to API were eluted after normal stop time i.e. 75 minutes.
- The approx. relative retention time of ibuprofen and its impurities (as listed below) and none of these impurities were observed at 56th minute.
- Kindly note a peak is eluted at 56th minute when we have a change in ratio of mobile phase in gradient programme at 55th minute.

TIME	MOBILEPHASE A	MOBILE PHASE B
25	100	0
55	15	85
70	15	85

CONCLUSION:

- None of these impurities were eluted or gave peak at 56th minute. Hence, it is due to system generated jerk because of significant change in gradient program.
- Reference chromatograms of mobile phase, standard, sample and impurity standards are attached and marked as annexure 1.

EXERCISE # 2:

- To Identify that any API impurity is eluting at 56 minutes the fraction discharge of sample and standard at run time 55 minute ± 10 minutes are collected and inject on same HPLC system

OBSERVATION:

- During whole run time, no peak of API and its related impurity is observed only the same peak was observed at same retention time which was due to significant change in gradient programme

CONCLUSION:

- It was concluded that the fraction discharge which was collected and run on HPLC shows no peak of impurity, API and related compound
- However, the same response were observed which as mentioned above was due to significant change in gradient programme
- Please again note a peak is again eluted at 56th minute when we have a change in ratio of mobile phase in gradient programme at 55th minutes
- Reference chromatograms of fractional discharge of standard and sample are attached and marked as annexure- 2

EXERCISE # 3:

- To investigate the behavior of system due to change in gradient program at particular time , we have changed the ratio of mobile phase at 60 minutes instead of 55 minutes and again injected mobile phase, standard , sample and impurity standard

OBSERVATION:

- It was observed that after changing gradient program, the peak which was observed at 56 minutes shifted to 61 minutes

CONCLUSION:

- After this study we have concluded that the said peak is purely system generated jerk because of significant change in mobile phase ratio
- Reference chromatograms are attached and marked as annexure - 3

Firm has also submitted relevant chromatograms for the above cited studies.

Decision: Registration Board decided to approve registration of "Iburo (Ibuprofen) 800mg/8ml Injection by M/s Sami Pharmaceuticals Pvt. Limited, Karachi. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

b. Verification of stability study data

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability / Local Availability GMP Inspection Report Date & Remarks
397.	M/s Macter International Ltd, F-126, SITE, Karachi. Report on Investigation of Authenticity / Genuineness of data submitted for registration of Sacval 24mg+26mg, 49mg+51mg, 97mg+103mg (Sacubitril - Valsartan) Tablets by M/s. Macter International Ltd., F-216, S.I.T.E, Karachi.

Reference No: F.13-11/2017-PEC (Vol. I) dated 06th March, 2019.
Investigation Date and Time: 23th April, 2019 (Afternoon).
Investigation Site: M/s. Macter International Ltd., F-216, S.I.T.E, Karachi.

Background:

Chairman Registration Board considered the applications of M/s. Macter International Ltd., F-216, S.I.T.E, Karachi for registration of Sacval (Sacubitril - Valsartan) 24mg+26mg, 49mg+51mg, 97mg+103mg Tablets. PER Division considered scientifically rational laboratory scale data submitted by the firm as pre-requisite of registration being new formulation and constituted a three-member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Rafeeq Alam Khan, Meritorious Professor and Dean, Faculty of Pharmacy, Ziauddin University. (Member Registration Board)
2. Dr. Saif-ur-Rehman Khattak, Director / FGA, CDL, DRAP, Karachi.
3. Dr. Krishan Das, Assistant Director, DRAP, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Detail of Investigation:

S. No.	Question	Observation

1.	Do you have documents confirming the import of Sacubitril - Valsartan API including approval from DRAP?	The firm has imported 2Kg Sacubitril - Valsartan (Co-crystal) API from M/s. Zhuhai Rundu Pharmaceutical Co. Ltd vide invoice No. RIS17087 dated: 10.10.2017. There is proper approval from DRAP Karachi on Form 6 (2966-17)
2.	What was the rationale behind selecting the particular manufacturer of API?	The rationale behind selecting the particular manufacturer of API is the vendor evaluation process based on audit and other criteria like manufacturer GMP status, DMF source etc.
3.	Do you have documents confirming the import of Sacubitril - Valsartan reference standard and impurity standards?	The firm has imported Sacubitril - Valsartan working standard and two impurity standards from the API manufacturer.
4.	Do you have certificate of Analysis of the API, reference standards and impurity standards?	The firm has Certificate of Analysis of API, working standard of API and impurities standards.
5.	Do you have GMP certificate of API manufacturer issued by regulatory authority of country of origin?	The firm has GMP certificates for API manufacturer issued by Zhuhai Food & Drug administration, China.
6.	Do you use API manufacturer method of testing for testing API?	The firm has used API manufacturer method of testing.
7.	Do you have stability studies reports on APIs?	The firm has stability studies report on API (Sacubitril - Valsartan) conducted by API manufacturer.
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The manufacturer of API has performed the stability studies as per SIM method. The process related impurities have been quantified, however, no degradation product has been observed.
9.	Do you have method for quantifying the impurities in the API?	The firm has method for quantifying impurities.
10.	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has some remaining quantities of API (Sacubitril - Valsartan) working standard and impurity standard.
11.	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipients including Microcrystalline cellulose, Hydroxypropyl cellulose, Crospovidone, Magnesium stearate, Talcum Powder & Colloidal Silicon dioxide.
12.	Do you have documents confirming the import of the used excipients?	The firm has necessary documents confirming the import of the used excipients.
13.	Do you have test reports and other records on the excipients used?	The firm has test reports and other records for the excipients used.
14.	Do you have written and authorized protocols for the development of Sacubitril - Valsartan Tablets?	The firm has written and authorized protocol for the development of Sacval (Sacubitril - Valsartan)24mg+26mg, 49mg+51mg, 97mg+103mg tablets.
15.	Have you performed Drug-excipient compatibility studies?	The firm has not performed Drug Excipient compatibility studies as composition of their product is similar to that of innovator product (Entresto Tablets, from Novartis, UK.
16.	Have you performed comparative dissolution studies?	The firm has perform comparative dissolution profile with innovator product. The firm's product shows comparable dissolution profile.
17.	Do you have product development (R&D) section	The firm has product development (R&D) section with requisite facilities.

<table>
<tr><td>18.</td><td>Do you have necessary equipments available in product development section for development Sacubitril - Valsartan Tablets?</td><td>The firm has all the necessary equipment available in product development section for the development of Sacubitril - Valsartan tablets.</td></tr>
<tr><td>19.</td><td>Are the equipment in product development section qualified?</td><td>The equipment in product development section are qualified.</td></tr>
<tr><td>20.</td><td>Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?</td><td>The firm has proper maintenance / calibration / re-qualification program for the equipment used in PD section.</td></tr>
<tr><td>21.</td><td>Do you have qualified staff in product development section with proper knowledge and training in product development?</td><td>The firm has qualified staff in PD section with proper knowledge and training in Product Development including 01 Ph.D., 04 Pharmacists 04 MSc Chemistry and 01 BEMS & M.Phil.</td></tr>
<tr><td>22.</td><td>Have you manufactured three stability batches for the stability studies of Sacubitril - Valsartan Tablets required?</td><td>The firm has manufactured three stability batches as follows;
Sacubitril - Valsartan 24mg +26mgtablets:
<table>
<tr><th>Sr. No.</th><th>B. No.</th><th>Batch size</th></tr>
<tr><td>1</td><td>001P</td><td>1500</td></tr>
<tr><td>2</td><td>002P</td><td>1500</td></tr>
<tr><td>3</td><td>003P</td><td>1500</td></tr>
</table>
Sacubitril - Valsartan 49mg+51mg tablets:
<table>
<tr><th>Sr. No.</th><th>B. No.</th><th>Batch size</th></tr>
<tr><td>1</td><td>001P</td><td>1500</td></tr>
<tr><td>2</td><td>002P</td><td>1500</td></tr>
<tr><td>3</td><td>003P</td><td>1500</td></tr>
</table>
Sacubitril - Valsartan 97mg+103mg tablets:
<table>
<tr><th>Sr. No.</th><th>B. No.</th><th>Batch size</th></tr>
<tr><td>1</td><td>001P</td><td>1500</td></tr>
<tr><td>2</td><td>002P</td><td>1500</td></tr>
<tr><td>3</td><td>003P</td><td>1500</td></tr>
</table>
The tablets are packed in Alu Alu blisters with pack size 14s for both potencies.</td></tr>
<tr><td>23.</td><td>Do you have any criteria for fixing the batch size of stability batches?</td><td>The criteria for fixing the batch size of stability batches is the number of tablets required per testing frequency and number of testing frequencies.</td></tr>
<tr><td>24.</td><td>Do you have complete record of production of stability batches?</td><td>The firm has complete records of production of stability batches.</td></tr>
<tr><td>25.</td><td>Do you have protocols for stability testing of stability batches?</td><td>The firm has detailed protocol for the stability testing of Sacubitril - Valsartan tablets.</td></tr>
<tr><td>26.</td><td>Do you have developed and validated the method for testing of stability batches?</td><td>The firm has developed and validated method for testing of stability batches of finished product i.e. Sacubitril - Valsartan tablets based on the API method of testing provided by the API manufacturer.</td></tr>
<tr><td>27.</td><td>Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?</td><td>The firm has developed and validated method based on API manufacturer for testing of finished product.</td></tr>
</table>

28.	Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of Sacubitril - Valsartan and the finished drug?	The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of the API (Sacubitril - Valsartan) and the finished drug Sacval (Sacubitril - Valsartan) tablets.
29.	Do your method of analysis stability indicating?	The firm method of analysis is stability indicating as evidence by forced degradation studies and spiking studies of the two major impurities. Both the impurities are process related and the forced degradation studies also confirmed that there is no degradation product.
30.	Do your HPLC software 21CFR Compliant?	The HPLC software is 21CFR compliant as per record available with the firm.
31.	Can you show Audit trail reports on Sacubitril - Valsartan testing?	Audit Trail on the testing reports on Sacubitril - Valsartan API and Sacval tablets is available.
32.	Do you have some remaining quantities of degradation products and stability batches?	The firm has only remaining quantities of stability batches kept on real-time stability testing.
33.	Do you have stability batches kept on stability testing?	The firm has three lab scale batches kept on stability studies for real time stability testing. Currently 12 months studies have been completed with satisfactory results.
34.	Do you have valid calibration status for the equipment used in Sacubitril - Valsartan Tablets production and analysis?	The firm has valid calibration status for the equipment used in Sacval (Sacubitril - Valsartan) tablets production and analysis.
35.	Do proper and continuous monitoring and control are available for stability chamber?	The firm has adequate monitoring and control system for stability chambers.
36.	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	The related manufacturing area, equipment, personnel and utilities are GMP compliant at time of inspection.

Conclusions:

1. On the basis of risk based approach the genuineness / authenticity of stability data submitted by the firm for registration of Sacval 24mg+26mg (Sacubitril - Valsartan) Tablets , Sacval 49mg+51mg (Sacubitril - Valsartan) Tablets, Sacval 97mg+103mg Tablets (Sacubitril - Valsartan) Tablets is verifiable satisfactory level.
2. The related manufacturing area, equipments, personnel and utilities are GMP compliant and well suited for the manufacturing of Sacval 24mg+26mg (Sacubitril - Valsartan) Tablets, Sacval 49mg+51mg (Sacubitril - Valsartan) Tablets , Sacval 97mg+103mg (Sacubitril - Valsartan) Tablets.

Recommendation

1. Keeping in view above mentioned conclusion registration of Sacval 24mg+26mg, 49mg+51mg, 97mg+103mg tablets is recommended in the name of manufacturer.

Decision: Registration Board decided to approve registration of "Sacval tablet 24/26 (Sacubitril/valsartan)", "Sacval tablet 49/51 (Sacubitril/valsartan)" "Sacval tablet 97/103 (Sacubitril/valsartan)" by M/s Macter International Ltd, F-126, SITE, Karachi.Manufacturer will place first three production batches of all products on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents To Be Provided**	**Status**
1.	CoA of API	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	M/s Nantong Chanyoo Pharmatech Co. Limited, China: • Photocopy of GMP Certificate issued by People's Republic of China, Nantong, Jiangsu is submitted. • Photocopy of Certificate of GMP compliance of a manufacturer by Agency for medicinal products and medical devices of the Republic

		of Solvenia is submitted.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Photocopy of ADC (Karachi) attested Commercial Invoice is submitted. Commercial invoice is from M/s Changzhou Pharmaceutical Factory, No. 518 Loading East Road, Changzhou, China.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

Sr.#	Deficiency/ Observation	Response by M/s Indus Pharma
i.	Initial analysis of finished dosage form is not submitted.	Raw data sheets of initial analysis showing relevant calculations still need to be submitted.
ii.	Justify the time gap between withdrawal of sample and its analysis.	The main reason for time gap between withdrawal and analysis of stability samples of Canazin tablets is to reduce workload of analysis to club all three batches (i.e. B. No. Tr-1-Can 300 tab, P-1-Can 300 tab and P-2 Can 300 tab) including accelerated and long term-analysis. Canazin tablets B No. Tr-1-Can 300 tab was withdrawn at 12-03-2018 while P-1 Can 300 tab and P-2-Can 300 tab at 20-03-2018 from stability chamber for 6 month analysis. Analysis was started at 20-03-2018 and was done at 02-04-2018.
iii.	Provide system generated (U-V 1800) Absorbance Values of all time points.	Reply needs to be submitted.

FOR PANEL:

- Verify Dissolution Testing of all Time Points on U-V 1800.
- The Assay Results in Stability Data Sheets of Initial Testing do not match with the Summary Report of the First Batch i.e. Batch No. Tr-1-Can 300 Tab.
- In the submitted reply, for the first batch i.e. Batch No. TR-01-Can 300mg Tab, Dissolution is 92.96% while in the stability sheet, it is mentioned as 93.19%.
- The percentage of assay in the submitted reply of initial analysis is 100.43% while in the stability sheet, it is mentioned as 100.06%.
- Raw data sheets of initial analysis showing relevant calculations still need to be submitted.
- Regarding justification of the time gap between withdrawal of sample and its analysis, firm had replied that analysis was started at 20-03-2018 and was done at 02-04-2018.While in the submitted raw data sheets of Canazin tablets Batch No. Tr-1-Can 300 Tab ; withdrawal Date is mentioned as 11-03-18 and Analysis Date is mentioned as 02-04-2018. Justification / Clarification is needed.

401.	Name and address of manufacturer / Applicant	M/s Indus Pharma (Pvt.) Ltd. Plot No. 26, 27, 63, 64, 65, 66 & 67, Sector 27, Korangi Industrial Area, Karachi
	Brand Name +Dosage Form + Strength	Canazin Film Coated Tablets 100mg
	Diary No. Date of R& I & fee	Dy No. 11346, Rs: 50,000/- 28-03-2018

	Composition	Each film coated tablet contains:- Canagliflozin as hemihydrate ….100mg
	Pharmacological Group	Sodium-glucose co-transporter 2 (SGLT2) inhibitors ATC Code: A10BK02 Anti-diabetic
	Type of Form	Form 5-D
	Finished Product Specification	Manufacturer Specs.
	Pack size & Demanded Price	Pack of 10's
	Approval status of product in Reference Regulatory Authorities.	Invokana tablet-USFDA approved
	Me-too status	Not applicable
	GMP status	Last inspection report 16-8-2017 firm was considered to be operating at an acceptable level of compliance with GMP.
	Remarks of the Evaluator.	• Method is as per USFDA.

REMARKS OF EVALUATOR

. The firm has claimed In House specifications and the product is not present in USP/BP.
i. Approved in USFDA with box warning.

Shortcoming	**Reply**
Commercial invoice issuer Changzhou Pharmaceutical Factory (3.2kg) is mentioned. Whereas GMP is of M/s NANTONG Chanyoo Pharmatech Co., Ltd, China.	Firm submitted relationship letter.
The stability data of initial time point shows following discrepancies: • Batch no. TR-01—Can 100 mg, the COA mentions assay 107.00% however, in stability data sheet is 107.03%. • Batch no. TR-01—Can 100 mg, the COA mentions Dissolution results as 101.70% however, in stability data sheet is 102.77%. • Batch no. P-1—Can 100 mg, the COA mentions Dissolution results as 99.72% however, in stability data sheet is 100.76%. • Batch no. P-2—Can 100 mg, the COA mentions Dissolution results as 93.46% however, in stability data sheet is 94.44%. Clarify and justify the same.	Firm has submitted that the identified difference is due to typographical error and has revised all stability data sheets.

Remarks of the Evaluators:
The following observations were noted in the stability files as mentioned against each.

Sr. No.	**Name of Applicant**	**Brand Name, Composition**	**Observations**
1.	M/s Indus Pharma (Pvt.) Limited, Plots No. 26, 27, 63-67, Sector-27, Korangi Industrial Area, Karachi. 			Batch No TR-01-Can 300mg / Stability Summary report / COA Assay / 100.06% / 100.43% Dissolution / 93.19% / 92.96%
			• Confirmation and justification regarding the time gap of 22 days between withdrawal of sample from stability chamber and its analysis for Batch No. Tr-1-Can 300 Tab. Sample withdrawal Date :11-03-18 Analysis Date: 02-04-2018.
2.	M/s Indus Pharma (Pvt.) Limited, Plots No. 26, 27, 63-67, Sector-27, Korangi Industrial Area, Karachi.	Canazin tablet 100mg Each film-coated tablet contains: Canagliflozin (as Canagliflozin Hemihydrate)…….100mg	Confirmation of performance of assay and dissolution at initial time point as the assay result mentioned in Stability Data Sheets of Initial Testing do not match with the COA. Tests / Stability Summary report / COA

			TR-01—Can 100 mg
			Assay: 107.03%. / 107.00%
			Dissolution: 102.77%. / 101.70%
			P-1—Can 100 mg
			Dissolution: 100.76%. / 99.72%
			P-2—Can 100 mg
			Dissolution: 94.44%. / 93.46%
			Firm has submitted that the identified difference is due to typographical error and has revised all stability data sheets which needs to be confirmed.

Now, the firm has also claimed exemption. However, as per last product specific inspection report of Sacutan 97mg/103mg "The HPLC Software is 21 CFR complaint as per record available with the firm. However, practically implementation of 21 CFR part-11 compliance needs further improvement.by the firm."

Therefore on the directions of Chairman Registration Board letter was issued to M/s Indus Pharma, Karachi regarding improvements made so far by the firm for practical improvement of 21 CFR II compliance of HPLC software as pointed out in last PSI inspection report. The firm has replied that the following points already exist.

1. The HPLC software is 21 CFR part 11 complaint where all user level are properly defined.
2. No user or main user can delete, edit or manipulate data from software.
3. All actions are recorded in audit trails.
4. Created strict policies on windows and disable options like "Delete, Copy, Paste and rename" of any file from user level.

Furthermore, the following improvement are being made in order to strengthen it further.

1. A new HPLC of "Agilent Infinity series" has been installed in Quality Control Laboratory & two more are under procurement and will be commissioned by the mid of 2019.
2. Chromatography Data System (CDS) Software is also being procured for compliance and Data Security.

With the ever-evolving emphasis on data security, data integrity, and compliance, it is of vital importance that the software provides comprehensive preventive and detection technical controls. This will enable to meet the latest regulatory requirements and ensure the highest levels of data quality.

Decision of 287th meeting: Registration Board decided to constitute panel for the Canazin 100mg & Canazin 300mg Tablet for onsite investigation to confirm genuineness / authenticity of stability data and associated documents, import of API, quality, specification, test analysis, facilities etc., along with following observations.

<table>

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Canazin 100mg & 300mg Tablets (Canagliflozin) Tablets by M/s. Indus Pharma (Pvt.) Limited, Korangi Industrial Area, Karachi.

Reference No: F.13-11/2017-PEC (Vol-I) dated 20th, February, 2019.
Investigation Date and Time: 14th March, 2019 (Morning).
Investigation Site: Factory premises of M/s. Indus Pharma (Pvt.) Limited, Korangi Industrial Area, Karachi.

Background:

Chairman Registration Board considered the applications of M/s. Indus Pharma, Plots No. 26, 27, 63-67, Sector 27, Korangi Industrial Area, Karachi for registration of Canazin 100mg & 300mg (Canagliflozin) Tabletsand constituted a three-member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Rafeeq Alam Khan, Meritorious Professor, Department of Pharmacology, University of Karachi, Karachi, Member Registration Board, Islamabad.
2. Dr. Saif ur Rehman Khattak, Director, CDL, DRAP, Karachi.
3. Dr. Sajjad Abbasi, Area FID, DRAP Office, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

CANAZIN 100MG & 300MG TABLETS

Sr. No	Question	Observation by Panel
1.	Do you have documents confirming the import of Canagliflozin API including approval from DRAP?	Thefirmhasimported 3.2kgCanagliflozin Hemihydrate fromM/s Nantong Chanyoo, China vide invoice no:CY117185 dated:17/05/2017 with properapprovalfromDRAP Office,Karachi.
2.	What was the rationale behind selecting the particular manufacturer of API?	There is proper vendor evaluation process being implementedincludingPostalAudit checklist,Testing of API, DMF and GMP approval by competent authority.
3.	Do you have documents confirming the import of Canaglifloz in reference standard and impurity standard?	The firm has documents confirming the import of Canagliflozin Hemihydrate working standard and 05 major impurities standards.
4.	Do you have certificate of Analysis of the API, reference standard of the API and impurity standard?	The firm has certificate of analysis of the API,referencestandardoftheAPIand impuritystandards.
5.	Do youhave GMP certificate of API manufacturers issued by regulatory authorities of country of origin?	The firm has valid GMP certificate of the API manufacturer issued by the concerned provincial RegulatoryAuthorityofthecountryoforigin.
6.	Do you use API manufacturer method of testing fortesting API?	ThefirmhasusedAPImanufacturermethodfor testing API.
7.	Do you have stability studies report on API?	The firmhasstabilitystudies reports on the API.
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing has been performedas perSIM method.
9.	Do you have method for quantifying the impurities in the API?	The firmhasHPLCmethodforquantifying the impurities in the API.
10.	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has remainingquantitiesof the API, its reference standard and impuritiesstandards.
11.	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipients including lactose anhydrous, microcrystalline cellulose, hydroxy propyl cellulose, croscarmellose sodium, purified talc, magnesium stearate & opadry II 85G68918 white (same composition as that of innovator INVOKANA tablet range).
12.	Do you have documents confirming the import of the used excipients?	Thefirmhasnecessarydocumentsconfirmingtheimpor t of the used excipient.
13.	Do you have test reports and other records on the excipients used?	The firm has test reports and other records on the excipient used.
14.	Do you havewritten and authorized protocols for the development of Canagliflozin tablets?	The firmhas written and authorized protocols for the developmentofCanagliflozin tablets 100mg & 300mg.
15.	Have you performed Drug-excipient compatibility studies?	
16.	Have you performed comparative dissolution studies?	Thefirmhasperformedcomparativedissolutionstudies on their tablets0 (100mg & 300mg)against

		theinnovator product Invokana 100mg tablet batch no:HBL4Y00 & Invokana 300mg Tablet Batch No:GKL 9Q000.Thefirm's tablets (100mg & 300mg) have comparabledissolutionprofileswiththatoftheinnovator tablets.
17.	Doyouhaveproductdevelopment(R&D) section?	The firm does not have dedicated product development section. They have equipments for manufacturing lab scale batches. Some of these equipments are used while shifting them to the commercial manufacturing area; whereas, some equipments of commercial scale manufacturing are being used for product development. Dedicated area for product devlopement is in process. Design for the same has been finalized. New equipment is under custom clearance and will be commissioned after renovation.
18.	Do you have necessary equipment available inproduct development section for development of Canagliflozin capsules?	As above.
19.	Are the equipment in product development section qualified?	Theavailableequipmentsforproductdevelopmentsection are qualified.
20.	Do you have proper maintenance calibration/ re-qualification program for the equipment used in PD section?	Thefirmhaspropermaintenance/calibrationwithre-qualificationprogramfortheequipmentusedforproduct development.
21.	Do you have qualified staff in product development section with proper knowledge and training in product development?	Thefirmhasateamof05technicalpersons (04 Pharmacist & 01 M.Sc. Chemistry) for product development. These personnel have proper knowledge and training in productdevelopment.
22.	Have you manufactured three stability batches for the stability studies of Canagliflozin tablets asrequired?	The firm has manufactured three stability batches of Canagliflozin Tablets. Canagliflozin 100mg tablets having batch No. TR-01-CAN 100 TAB, P-1 /CAN 100mg TAB, P-2/CAN 100mg TAB each of 2500tablets. The tablets are packed in Alu Alu blister pack of 1x.10s Canagliflozin Tablet 300mg havingbatch#TR-01 CAN 300, P-1CAN 300mg, P-2 CAN 300mgeachof2500 tablet.The tablets are packed in Alu Alu blisters of pack size 5x2s. Firm has changed the manufacturing process from wet granulation (innovator) to direct compression.
23.	Do you have any criteria for fixing the batch size of stability batches?	The criteria for fixing the batch size of stability batches is the quantity of tablets required pertesting frequency and the number of testingfrequencies.
24.	Do you have complete record of production of stability batches?	The firm has complete record of production of stability batches. All the Log Books are properly maintained.
25.	Do you have protocols for stability testing of stability batches?	The firm has detailed protocols for stability testing of stability batches.
26.	Do you have developed and validated the method for testing of stability batches?	The method is based upon the API method of API manufacturer which has been validated and used for the testing finish product in stability testing. The method is supported by forced degradation studies on the product hence stability indicating.
27.	Do you have method transfer studies in case	The firmhasperformed complete validation studies.

	when the method of testing being used by your firm is given by any other lab?	
28.	Do you have documents confirming the qualification of equipment/instruments being used in the test and analysis of Canagliflozin API and the finished drug?	The firm has proper documents confirming the qualification of equipment/instruments being used in the test and analysis of the API and the finished drug.
29.	Do yourmethod of analysis stability indicating?	The firm has performed forced degradation (FD) study on their product Canagliflozin Tablet 100mg& Canagliflozin Tablet 300mg for the conformance of stability indicating nature of their method for testing the finished product during stability studies.
30.	Do your HPLC software 21CFR Compliant?	1. Yes HPLC software is 21 CFR Part 11 compliant where all user levels are properly defined. 2. No user or main user can delete, edit or manipulate data from software. 3. All actions are recorded in audit trails. 4. Created strict policies on windows and disable options like "Delete, Copy, Paste and rename" of any file from user level. Furthermore, the following improvements are being made in order to strengthen it further. 1. A new HPLC of "Agilent Infinity series" has been installed in Quality Control Laboratory & two more are under procurement and will be commissioned by the mid of 2019. 2. Chromatography Data System (CDS) Software is also being procured for Compliance and Data Security. With the ever-evolving emphasis on data security, data integrity, and compliance, it is of vital importance that the software provides comprehensive preventive and detection technical controls. This will enable us to meet the latest regulatory requirements and ensure the highest levels of data quality.
31.	Can you show Audit trail reports on Canagliflozintesting?	Audittrailonthetestingreports is available.
32.	Do you have some remaining quantities of degradation products and stability batches?	The firm has remaining quantities of stability batches only.
33.	Do youhave stability batches kept on stabilitytesting?	The firm has three stability batches kept on realtime stability testing. 12months studies have been completed on the sebatches with satisfactory results.
34.	Do you have valid calibration status for the equipment's used in Canagliflozin capsules production andanalysis?	The firm has valid calibration status for the equipment used in Canagliflozin 300mg tablet production and analysis.
35.	Do proper and continuous monitoring and control are available for stability chamber?	Adequate monitoring and control are available for stability chambers including data loggers and centralized controlling software.
36.	Do related manufacturing area, equipment, personnel and utilitiesberated as GMP compliant?	Related manufacturing area, equipment, personnel and utilities are in compliance.
37.	**Observations of PEC?** Assay and observation results initially provided to PEC were wrong.	1. The resubmitted data is correct and has been verified from system and concerned log books.

	Correct data was resubmitted to the PEC. All revised stability data sheets needs to be confirmed.	

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Canazin 100mg & 300mg (Canagliflozin) Tablets is verifiable to satisfactory level.
2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and suited for the manufacturing of Canazin 100mg & 300mg (Canagliflozin) Tablets.

Recommendations:

1. Since canagliflozin is falls in BCS Class IV (poor solubility and poor permeability) and the manufacturer has also changed the manufacturing process therefore, post registration bioequivalence studies should be conducted before marketing the product.

2. Registration of Canazin 100mg & 300mg tablets may kindly be granted in the name of the manufacturer.

Note: The firm has submitted written undertaking for post registration bioequivalence studies on the tablets (copy enclosed).

Decision: Registration Board decided to approve registration of "Canzin 100mg tablets (Canagliflozin 100 mg) and Canzin 300mg tablets (Canagliflozin 300mg) by M/s Indus Pharma (Pvt.) Ltd.Plot No. 26, 27, 63, 64, 65, 66 & 67, Sector 27Korangi Industrial Area, Karachi. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability / Local Availability GMP Inspection Report Date & Remarks
402.	M/s Abbott Labs, Pak Ltd, Landhi, Karachi.	Brufen Duo tablet Each film coated tablet contains:- Paracetamol …500mg Ibuprofen …… 150mg (Analgesic, Antipyretic)	Form 5-D Diary No. 5307 dated 14-02-2018 Rs. 50,000/- dated 13-02-2018 2 x 14's, 2 x 7's	Combogesic 500/150 tablets approved by MHRA of UK

Evaluation by PEC:

The firm has submitted stability data along with documents as per checklist approved in 278th meeting of Registration Board. Moreover firm has stated that they are submitting following actual technical data of the product along with the stability data, as the previously submitted data in the dossier was tentative data:

Details of submitted data are as under: (Dy.# 42171 dated 10-12-2018)

STABILITY STUDY DATA

Drug	Brufen Duo tablet
Name of Manufacturer	M/s Abbott Labs, Pak Ltd, Landhi, Karachi.
Manufacturer of API	Ibuprofen: M/s Shandong Xinhua Pharmaceutical Co., Ltd., China Paracetamol: M/s Zenith Chemical Industries (Pvt.) Ltd. Lahore
API Lot No.	Ibuprofen: 17112353 Paracetamol: ZPAR17-355
Description of Pack (Container closure system)	PVC-Alu foil
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COAs of APIs	Yes.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Ibuprofen: Copy of GMP certificate (Certificate# SD20140251) issued by China Food and Drug Administration valid till 12-12-2018. Paracetamol: Copy of DML issued by DRAP, with issuance date of 15-06-2011
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Ibuprofen: Copy of invoice attested by ADC DRAP, Karachi dated 30-11-2017invoice has been submitted. Paracetamol: Not applicable
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Brufen Duo 500mg / 150mg (Paracetamol / Ibuprofen) Tablets by M/s. Abbott Laboratories, Pakistan Limited, Landhi, Karachi.

Reference No: F.13-11/2017-PEC(Pt) dated 18th January, 2019.
Investigation Date and Time: 28th February, 2019 (Evening).
Investigation Site: Factory premises of M/s. Abbott Laboratories, Pakistan Limited, Landhi, Karachi.
Background:

Chairman Registration Board considered the applications of M/s Abbott Laboratories, Pakistan Limited, Landhi, Karachi for registration of Brufen Duo 500mg / 150mg (Paracetamol / Ibuprofen) Tabletsand constituted a three-member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Saif ur Rehman Khattak, Director, CDL, DRAP, Karachi.
2. Dr. Rafeeq Alam Khan, Meritorious Professor, Department of Pharmacology, University of Karachi, Karachi, Member Registration Board, Islamabad.

3. Dr. Kirshan Das, Assistant Director, DRAP Office, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

BRUFEN DUO 500MG / 150MG TABLETS

Sr. No.	Question	Observation by panel
1	Do you have documents confirming the import of APIs?	The firm has imported 50kg Ibuprofen (Lot # 17112353) from M/s. Shandong Xinhua Pharmaceutical Co., Ltd., China. 1500kg Paracetamol (Lot # ZPAR17-355) has been purchased locally for these batches from M/s. Zenith Chemical Industries (Pvt) Ltd., Lahore, Pakistan.
2	What was the rationale behind selecting the particular manufacturers of APIs?	There is proper vendor qualification program being implemented by the firm which includes GMP Status, provision of DMF, reference standard, impurity standards etc. However, in the instant case both the sources of both the material have already been approved by the firm for manufacturing of other registered products like Brufen Tablets and Cofcol Tablets.
3	Do you have documents confirming the import of the APIs, reference standard of the APIs and impurity standards of the APIs?	The firm has documents confirming the import of Ibuprofen. Paracetamol has been purchased locally for which there are proper documents of purchase. The firm has also imported USP reference standards of the APIs. An impurity standard for Paracetamol and two major impurity standards for Ibuprofen have also been imported from USP for which proper import documents are available.
4	Do you have certificate of Analysis of the APIs, reference standards and impurity standards?	The firm has certificates of analysis for both APIs, reference standards of the APIs and their impurities standards.
5	Do you have any approval of API or GMP certificate of API manufacturer issued by regulatory authority of country of origin?	The firm has GMP certificates of manufacturers of both APIs.
6	Do you use API manufacturer method of testing?	The firm has used USP methods for testing of the APIs.
7	Do you have stability studies reports on APIs?	The firm has stability studies reports on both APIs conducted by the API manufacturers.
8	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing has been performed as per SIM methods and degradation products have been quantified.
9	Do you have method for quantifying the impurities in the API?	The firm has method for quantifying the impurities in the APIs.
10	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has some remaining quantities of the APIs, reference standards of the APIs and impurities standards.
11	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipients. The excipients include: Microcrystalline cellulose, Pregelatinized Starch, Corn starch, Cross Carmellose

		sodium, talc, magnesium stearate, methocel 15cps, PEG 8000 and titanium dioxide.
12	Do you have documents confirming the import of the used excipients?	Except corn starch which is locally purchased all the other excipients are imported with proper import documents.
13	Do you have test reports and other records on the excipients used?	The firm has test reports and other records on the excipients used.
14	Do you have written and authorized protocols for the development of Brufen Duo tablets?	The firm has written and authorized protocols for the development of Brufen Duo 500mg / 150mg (Paracetamol / Ibuprofen) Tablets.
15	Have you performed Drug-excipient compatibility studies?	Drug-excipients compatibility studies were not performed as formulation of Brufen Duo tablets is the same as that of the innovator product (Combogesic 500mg / 150mg tablets, manufactured by M/S. ICN Polfa, Poland). The firm is advised to conduct proper compatibility testing in future cases as impurities and differences of sources may impact the studies.
16	Have you performed comparative dissolution studies?	The firm has performed comparative dissolution studies against the innovator product (Combogesic 500mg / 150mg tablets) while employing FDA guidance document for comparative dissolution profile. The firm formulation have comparable dissolution profile with that of the innovator product.
17	Do you have product development (R&D) section?	The firm has well equipped product development laboratory with equipment for manufacturing of tablet dosage form whereas the analytical activities are performed in routine QC lab.
18	Do you have necessary equipment available in product development section for development of tablets?	The firm has necessary equipment for product development in product development laboratory. The analytical work has been performed in routine QC lab with dedicated equipments and personnel.
19	Are the equipment in product development section qualified?	The available equipment in product development section are qualified.
20	Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?	The firm has SOP for the maintenance/ calibration/ requalification of equipment used on PD section.
21	Do you have qualified staff in product development section with proper knowledge and training in product development?	The firm has 02 qualified staff (pharmacists) in manufacturing part whereas 04 personnels (03 chemists and 01 pharmacists) in analytical part of the product development.
22	Have you manufactured three stability batches for the stability studies of Brufen Duo tablets as required?	The firm has manufactured three stability batches (pilot scale, 20kg each) for the accelerated and real time stability studies of Brufen Duo 500mg / 150mg tablets with batch No. 87654XZ, 86652XZ and 87653XZ each of 24390 tablets. The tablets are packed in PVC / Alu blisters with pack size of 2x14's and 2x7's.
23	What was the criteria for fixing the batch size of stability batches?	The criteria for fixing the batch size of stability batches is the ICH guidelines.
24	Do you have complete record of production of stability batches?	The firm has complete record of production of stability batches. Necessary log books of equipment used have been available with the firm.
25	Do you have protocols for stability testing of stability batches?	The firm has protocol for stability testing of stability batches.
26	Do you have developed and validated the method for testing of stability batches?	The firm has developed and validated the method for testing stability batches. The method is based upon force degradation studies.

27	Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?	The method for testing the finish product has been developed and validated by M/S. I&D, Abbott Laboratory, India. The method was transferred to M/S. Abbott Laboratories, Pakistan through testing on one pilot scale batch manufactured by M/S. I&D, Abbott Lab, India as test method transfer studies as per USP requirement of method transfer.
28	Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of API and the finished drug?	The firm has documents confirming the qualification of equipment / instruments being used in the test and analysis of API and finished drug.
29	Do your method of analysis stability indicating?	The firm's method of analysis is stability indicating. The stability studies on the three stability batches show quantification of the degradation products along with the active components of the tablets.
30	Do your HPLC software is 21CFR compliant?	The HPLC software is 21CFR Compliant as per record available with the firm.
31	Can you show Audit Trail reports on API and finish product testing ?	The firm showed the audit trail reports on API and finish product testing.
32	Do you have some remaining quantities of degradation products and stability batches?	The firm has remaining quantities of stability batches and degradation products.
33	Do you have stability batches kept on real time stability testing?	The firm has completed accelerated stability testing. The real time stability testing is in progress on all the three stability batches. 09 months real time stability studies have been performed on all three batches with satisfactory results.
34	Do you have valid calibration status for the equipment used in the production and analysis of API and tablets?	The firm has valid calibration status for the equipment used in Brufen Duo tablets production and analysis.
35	Do proper and continuous monitoring and control are available for stability chamber?	Continuous power supply and monitoring are available for stability chambers.
36	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	The related manufacturing area, equipment, personnel and utilities are rated as GMP compliant.

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Brufen Duo 500mg / 150mg (Paracetamol / Ibuprofen) Tablets is verifiable to satisfactory level.
2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and well suited for the manufacturing of Brufen Duo 500mg / 150mg (Paracetamol / Ibuprofen) Tablets**.**

Recommendations:

1. The firm may kindly be granted necessary registration of Brufen Duo 500mg / 150mg (Paracetamol / Ibuprofen) Tablets

Decision: Registration Board decided to approve registration of "Brufen Duo 500mg / 150mg (Paracetamol / Ibuprofen) Tablets by M/s. Abbott Laboratories, Pakistan Limited, Landhi, Karachi.Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

c. Exemption from onsite verification of stability data

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents To Be Provided**	**Status**
1.	COA of API	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Empagliflozin Firm has provided copy of valid GMP certificate of M/s Ruyuan HEC Pharm Co., Ltd, China for Empagliflozin valid till 21-01-2019, issued by Shaoguan FDA.
		Metformin HCl Firm also provided copy of GMP certificate of M/s Wanbury Ltd., India for Metformin HCl valid till

		28-07-2018 issued by Director, Drugs Control Administration, Government of Andhra Pradesh - India. Submit valid GMP certificate.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Yes
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

REQUEST OF EXEMPTION ROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "Wymly Tablets 25 mg", which was conducted on 9th April, 2018. (Afternoon) and was presented in 281st meeting of Registration Board. Following observations were reported in the report: ✓ The HPLC software is 21CFR compliant and having certificates of Compliance by USFDA ✓ The firm has audit trail Reports on testing. ✓ Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software 21CFR compliance.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	**EMPAGLIFLOZIN** ➢ **Declaration by WIS Pharmtec Co. Ltd, China** The firm has imported Empagliflozin API 750 g from M/s WIS Pharmtec Co. Ltd, China and the declaration includes the following information. Batch No.: EGLZ-RD20171101A Mfg Date: 01-11-2017 ➢ **Details of ADC attested commercial Invoice by WIS Pharmtec Co. Ltd, China** Invoice No. WIS170152 Quantity imported: 0.75 Kg Date of import: 29-06-2016 ADC Attestation Date: 07-12-2017 Manufacturer: Ruyuan HEC Co. Pharm. Co. Ltd. Xiaba Development Zone, Ruyuan County, Shaoguan City, Guangdong Province, China. Commercial invoice doesnot mention the batch no.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents To Be Provided**	**Status**
1.	COA of API	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Empagliflozin Firm has provided copy of valid GMP certificate of M/s Ruyuan HEC Pharm Co., Ltd, China for Empagliflozin valid till 21-01-2019, issued by Shaoguan FDA.
		Metformin HCl Firm also provided copy of GMP certificate of M/s Wanbury Ltd., India for Metformin HCl valid till 28-07-2018 issued by Director, Drugs Control Administration, Government of Andhra Pradesh - India. Submit valid GMP certificate.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Yes
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

REQUEST OF EXEMPTION ROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "Wymly Tablets 25 mg", which was conducted on 9th April, 2018. (Afternoon) and was presented in 281st meeting of Registration Board. Following observations were reported in the report: ✓ The HPLC software is 21CFR compliant and having certificates of Compliance by USFDA ✓ The firm has audit trail Reports on testing. ✓ Adequate monitoring and control are available for stability

Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	04-2018	04-2018	04-2018
Date of Initiation	11-04-2018	11-04-2018	11-04-2018
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT INITIALLY

Sr.#	Documents To Be Provided	Status
i.	COA of API	Yes
ii.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	**Empagliflozin:** Copy of GMP certificate (2017029) issued by M/s Shaoguan Food & Drug Administration, valid upto 21-01-2019 for M/s Ruyuan HEC Pharm Co., Ltd. **Metformin HCl:** Copy of GMP certificate issued by DCA Andhra Pradesh valid upto 05-02-2022 for M/s Wanbury Ltd.,West Godavari District, Andhra Pradesh, India
iii.	Protocols followed for conduction of stability study and details of tests.	Yes
iv.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
v.	Documents confirming import of API etc.	**Empagliflozin:** Copy of Commercial Invoice signed & stamped by ADC DRAP, Islamabad of Empagliflozin has been attached. **Batch No.** / **Invoice No.** / **Quantity Imported.** EGLZ-RD20171101A / WIS170152 / 750gm **Metformin HCl:** Copy of Commercial Invoice signed & stamped by ADC DRAP, Islamabad of Metformin HCl has been attached.
vi.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
vii.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
viii.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR[2]

- The firm has provided 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Lab Scale Batches.

</table>

reports. The details of reference product & Sample product are as follows:

Feature	Reference product	Product of M/s Genix
Brand name	Synjardy 5/500mg tablet	Empag-M 5/500mg tablet
Batch No.	803151	18SB-093-01
Expiry date	02-2021	--

- Comparative dissolution studies have been performed in following mediums:
  a. 0.1N HCl buffer
  b. pH 4.5 Acetate buffer
  c. pH 6.8 Phosphate buffer
- Firm has submitted relevant chromatograms and results for the CDP study showing acceptable f2 values.

19. Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

- Firm has submitted audit trail reports of stability studies of applied formulation

Remarks of Evaluator:

- Raw material analytical test method of Empagliflozin submitted by firm differs from supplier's testing method as per following details:

Test parameter	Method of M/s Ruyuan HEC	Method of M/s Genix
Detector wavelength of HPLC for Assay test	210	223

- Clarify why potency adjustment not done for Empagliflozin and Metformin as assay is 99.20% and 99.69%, respectively.
- Test for "Content of Uniformity" for Empagliflozin has not been performed for all three stability batches.

Upon communication of above observation vide letter no. F.1-1/2017/PEC-DRAP (AD PEC-II) dated 18-01-2019. Firm responded as under vide its letter no. RA/038/19 (dated 12-02-2019):

- Empagliflozin shows its maxima at 223nm. Reference spectrum of Empagliflozin is attached. Revised method from supplier of Empagliflozin with wavelength at 223nm has been submitted.
- Test for "Content of Uniformity" for Empagliflozin has been performed for all three stability batches at the most recent time point of long term stability studies.
- Firm has submitted that "we have revised the SOP of Product development for potency adjustment of Active Raw materials and potency will be adjusted upto 100% for all trial products as we dispense after adjustment the potency upto 100% for commercial batches. It I sour practice for all API dispense after potency adjustment for commercial products."

Decision:Registration Board decided to approve registration of "Empag-M Tablet 5mg/500mg (Empagliflozin/Metformin hydrochloride), Empag-M Tablet 5mg/1000mg (Empagliflozin/Metformin hydrochloride), Empag-M Tablet 12.5mg/1000mg (Empagliflozin/Metformin hydrochloride) and Empag-M Tablet 12.5mg/500mg (Empagliflozin/Metformin hydrochloride) by M/s M/s Genix Pharma Pvt. Ltd. Karachi. Manufacturer will place first three production batches of all products on long term stability studies throughout proposed shelf life and on accelerated studies for six months

REMARKS OF EVALUATOR

- Dissolution method submitted by you in finished product testing method is different from that recommended by USFDA.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

Now the firm has requested for Exemption from On-site Investigation of their submitted stability data of and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection reports of their product "NUVALDI Tablets 400mg (Sofosbuvir)", which was presented in 281st meeting of Registration Board wherein Registration Board decided to approve registration of "NUVALDI Tablets 400mg (Sofosbuvir) by M/s. Neutro Pharma (Pvt.) Ltd., Lahore. Following observations were recorded in the report: • Firm have used HPLC system from KNAUR (Germany) for testing of stability batches. Software ClarityChrom® which is 21CFR Compliant. 02 Users (QCM - Mr. Shahzad and Analyst - Ms. Sumbul) have access to the HPLC software as observed at the time of inspection. However the analyst had access to QCM's account as well. The firm was advised to change this practice at once. • Firm have shown audit trail reports on stability study testing.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Commercial invoice (invoice# WIS70072) dated 28-06-2017, from M/s WIS Pharmatech Co., Ltd, China in the name of M/s Neutro Pharma (Pvt.) Ltd. Lahore for Daclatasivr dihydrochloride. The said invoice has been attested by AD DRAP (I&E) Lahore, dated 14-07-2014.
3.	Documents for the procurement of reference standard and impurity standards.	Firm has submitted a copy of a label declaring content as "Daclatasvir reference standard" with Batch# PRS-17023 & quantity 100mg. Manufacturer is M/s Ruyuan HEC Pharm Co., Ltd. China. No document for impurity standard has been submitted.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP certificate issued by Shaoguan Food and Drug Administration valid upto 17-06-2018.
5.	Mechanism for Vendor pre-qualification	• The firm has submitted SOP for Vendor Supplier Evaluation.
6.	Certificate of analysis of the API, reference standards and impurity standards	Photocopy of COA of Daclatasivr dihydrochloride with Batch No. DSV-RD201706101 by M/s Ruyuan HEC Pharm Co., Ltd. China is submitted.

<tr><td>18.</td><td>Record of comparative dissolution data.</td><td>• Firm has submitted Comparative Dissolution reports. The details of reference product & Sample product are as follows:
<table>
<tr><th>Feature</th><th>Reference product</th><th>Product of M/s Neutro</th></tr>
<tr><td>Brand name</td><td>Mydacla 60mg of</td><td>Dacla 60mg tablet</td></tr>
</table></td></tr>
</table>

		m/s Mylan India • Comparative dissolution studies have been performed in 0.1M HCl buffer. • Firm has submitted relevant UV spectrums and results for the CDP study. • Firm has performed CDP in one buffer medium only for 6 tablets only, whereas as per guidelines CDP shall be performed in three dissolution mediums using 12 units each of reference and sample product.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	• Firm has submitted audit trail reports of stability studies of applied formulation

Remarks of Evaluator:

Observation	Response
Submitted digital data logging record of accelerated stability chamber shows fall in humidity measurement from 70% for the time period dated 06-03-2018 to 23-03-2018 as well as in the month of April, 2018 7 August, 2018. Clarification shall be submitted in this regard	Firm has replied as under: **"**It is clarified that the product was placed for accelerated stability studies at 40°C ± 2°C / 75% ± 5%RH. During the said period of time when humidity ranges were out of limit, the climate chamber of accelerated stability studies was out of order and the product was shifted to a parallel accelerated stability chamber which was being operated at the same conditions of temperature and humidity (40°C ± 2°C / 75% ± 5%RH) to avoid any effect on the study. So, it is assured that throughout the accelerated stability period, the product was exposed to optimum conditions of temperature and humidity for accelerated stability studies."
Relevant chromatograms, FTIR spectrum, lab reports, raw data sheets & COAs of API analysis by M/s Neutro Pharma (Pvt.) Ltd. Lahore shall be submitted.	As per submitted analytical record for API analysis, firm has not applied supplier's method of analysis for Assay analysis since the elution program mentioned in supplier's method of analysis is gradient with run time of 35 minutes, whereas submitted chromatograms show run time of only 10 minutes.
Relevant analytical record i.e., chromatograms, raw data sheets for dissolution analysis for the complete stability studies have not been submitted.	Firm has submitted UV spectrums and raw data sheets for the dissolution analysis for the complete stability studies.
Finished product testing method mentions HPLC method for dissolution analysis whereas CDP samples have been analysed by UV spectrophotometric method.	Firm has stated that "Practically we used UV method for dissolution test, but mistakenly not written in SOP while HPLC method was lodged. We have rectified and providing you UV method for dissolution test in SOP for Declatasvir 60mg tablet. Next time we shall try to avoid such mistakes.
Firm has performed CDP in one buffer medium only for 6 tablets only, whereas as per guidelines CDP shall be performed in three dissolution mediums using 12 units each of reference and sample product.	Firm has submitted new data for CDP in one buffer of 0.1N HCl, using 12 tablets each of both reference product (Mydacla) and the trial product. F2 factor = 78.42 has been calculated by firm for the said CDP study.

- Dissolution method submitted by firm in finished product testing method is different from that recommended by USFDA in terms of Dissolution medium since firm has used 0.1M HCl while USFDA has recommended Phosphate Buffer, pH 6.8 with 0.75% Brij 35, as dissolution medium.
- The dossier has been submitted with brand name of "Dacla 60mg tablets", whereas most of the stability studies have been performed with Product name as Hepadec tablet.

Decision: Registration Board deferred the case for following reasons:

- **Documeneted evidence for the activity of shifting the samples of applied product to a parallel accelerated stability chamber, during the period when humidity ranges were out of limit for the parent Accaelerated stability studies chamber.**
- **Performance of dissolution test on the next time point of long term stability studies as per USFDA recommended method for all three stability batches.**

STABILITY STUDY DATA SUBMITTED INITIALLY

Drug	Xpedia-Met 12.5mg/500mg Tablets		
Name of Manufacturer	M/s Saffron Pharmaceuticals Pvt Ltd., 19-Km, Sheikhupura Road, Faisalabad		
Manufacturer of API	**Alogliptin Benzoate**: M/s Ruyuan HEC Pharm Co., Ltd. China **Metformin HCl**: M/s IPCA Lab. Aurangabad, India		
API Lot No.	Alogliptin benzoate: $AGLT_{II}$-201608101U Metformin HCl: 17322ML 2RMI		
Description of Pack (Container closure system)	Alu-Alu blister foil with unit carton		
Stability Storage Condition	Accelerated: 40°C ± 2°C / 75% ± 5%RH Real Time: 30°C ± 2°C / 65% ± 5%RH		
Time Period	Accelerated: 6 Months Real Time: 6 Months		
Frequency	Real Time: 0,3,6,9 7 12(months) Accelerated: 0,1,2,3,4 & 6 (months)		
Batch No.	T-002	T-003	T-004
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	07-2017	08-2017	09-2017
Date of Initiation	02-08-2017	20-09-2017	06-10-2017
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT INITIALLY

	Documents To Be Provided	Status
	COA of API	Yes
	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of **Alogliptin Benzoate** for M/s Ruyuan HEC Pharm Co Ltd. China Issued by Shaoguan Food and Drug Administration China valid upto 18-12-2019. Firm has submitted copy of GMP Certificate (certificate no. GMP/17/2014-157-3) of **Metformin** for M/s IPCA Lab. Aurangabad, India Issued by FDA Maharashtra State Aurangabad dated 28-07-2014. Validity of certificate is not evident for submitted document.
	Protocols followed for conduction of stability study and details of tests.	Yes

	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
	Documents confirming import of API etc.	**Alogliptin Benzoate** Firm has submitted copy of ADC attested invoice (Invoice# PH60093) confirming import of 1.5 Kg **Alogliptin** from WIS Pharmatech. The invoice was cleared on 08.11.2016. **Metformin** Firm has submitted copy of ADC attested invoice confirming import of 500 Kg **Metformin HCl** from IPCA Lab. Ltd., India. The invoice was cleared on 15-12-2016.
	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR[2]

- The firm has provided 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Lab Scale Batches.

REMARKS OF EVALUATOR[2]

- The firm has provided 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Lab Scale Batches.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

Now the firm has requested for Exemption from On-site Investigation of their submitted stability data of Xpedia Met 12.5/500mg Tablets & Xpedia-Met 12.5mg/1000mg vide Letter no. Saf/018/426 & Saf/018/427 respectively dated 19-12-2018 and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:
(Date of submission: 21-12-2018 vide diary no. 43534 & 43535)

Administrative Portion

1.	Reference of last onsite panel	Firm has referred to onsite inspection report of their product

	inspection for instant dosage form conducted during last two years.	Saffaldi Tablet 400mg (Sofosbuvir), which was conducted on 8th January, 2018 and was presented in 279th meeting of Registration Board held on 28th February-2nd March, 2018. Following two observations were reported in the report: • The firm has used two HPLC systems in the stability studies of Saffaldi 400mg tablet details of which are as under: i. Schimadzu Lab solution (Equipment ID: QC-75) ii. Schimadzu LC solution (Equipment ID: QC-101) • Firm has demonstrated audit trail reports for the submitted stability studies. The relevant log books for stability studies were also verified. • The firm has stability chambers for accelerated and real time stability studies with uninterrupted power supply and digital data loggers. Records of digital data logger for both chambers were demonstrated.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	**Alogliptin Benzoate** Firm has submitted copy of ADC attested invoice (Invoice# PH60093) confirming import of 1.5 Kg **Alogliptin** from WIS Pharmatech. The invoice was cleared on 08.11.2016. **Metformin** Firm has submitted copy of ADC attested invoice confirming import of 500 Kg **Metformin HCl** from IPCA Lab. Ltd., India. The invoice was cleared on 15-12-2016.
3.	Documents for the procurement of reference standard and impurity standards.	Not submitted. Firm has stated that manufacturers have not provided impurity.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of **Alogliptin Benzoate** for M/s Ruyuan HEC Pharm Co Ltd. China Issued by Shaoguan Food and Drug Administration China valid upto 18-12-2019. Firm has submitted copy of GMP Certificate (certificate no. GMP/17/2014-157-3) of **Metformin** for M/s IPCA Lab. Aurangabad, India Issued by FDA Maharashtra State Aurangabad dated 28-07-2014. Validity of certificate is not evident for submitted document.
5.	Mechanism for Vendor pre-qualification.	Firm has submitted copy of SOPs for vendor qualification.
6.	Certificate of analysis of the API, reference standards and impurity standards.	The firm has submitted certificates of analysis for Alogliptin Benzoate & Metformin HCl.COAs of reference standard has been submitted while COA of any impurity has not been submitted.
7.	Documents for the procurement of excipients used in product development?	The firm has submitted photocopy of Purchase Order/Invoices for the procurement of excipients used in product development
8.	List of qualified staff involved in product development with relevant experience.	The firm has submitted photocopy of List of qualified staff (2 members) involved in Research & Development department.
	Production Data	
9.	Authorized Protocols/SOP for the development & stability testing of trial batches.	The firm has submitted photocopy of following documents **a.** SOP for Pharmaceutical Product Development protocol. **b.** SOP for conducting stability studies.

<table>
<tr><td>10.</td><td>Complete batch manufacturing record of three stability batches.</td><td>The firm has submitted photocopy of Batch Manufacturing Record and Batch Packaging Record of three stability batches for the stability studies of Xpedia-Met 12.5/500mg &Xpedia-Met 12.5/1000mg tablets such as.

Sr .#	Documents To Be Provided	Status
i.	COA of API	Yes
ii.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 16061165) dated 27-06-2016 issued by Food and Drugs control Administration Gujrat State India.
iii.	Protocols followed for conduction of stability study and details of tests.	Yes
iv.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
v.	Documents confirming import of API etc.	Firm has submitted following • Copy of form 6 dated 16-05-2017, confirming license to import of M/s Scotmann with M/s Glenmark Pharmaceuticals Ltd, Z/103/I, Dahej SEZ Part-II, Opposite to GCPTTL, Dahej Gujrat • ADC attested commercial invoice confirming import of 1.125Kg Ticagrelor
vi.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
vii.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
viii.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR[2]

- The firm has provided 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Lab Scale Batches.

REQUEST OF EXEMPTION ROM ON SITE INSPECTION

Now the firm has requested for Exemption from On-site Investigation of their submitted stability data of Velocity 60mg tablets vide Letter no. SM/DRA/DRAP/0119/490 dated 17-01-2019 and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:
(Date of submission: 17-01-2019 vide diary no. 2086)

	Administrative Portion	
1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product Dascot Tablet 30mg (Daclatasvir), which was conducted on 26th January, 2018 and was presented in 278th meeting of Registration Board held on 29-31st January, 2017. Following two observations were reported in the report: i. The HPLC software is 21CFR Compliant. ii. Firm has shown all Audit trail reports. iii. Adequate monitoring and control are available for stability chambers. Data Loggers are also placed in stability chambers for monitoring
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted following • Copy of form 6 dated 16-05-2017, confirming license to import of M/s Scotmann with M/s Glenmark Pharmaceuticals Ltd, Z/103/I, Dahej SEZ Part-II, Opposite to GCPTTL, Dahej Gujrat • ADC attested commercial invoice confirming import of 1.125Kg Ticagrelor
3.	Documents for the procurement of reference standard and impurity standards.	Firm has submitted copy of invoice for 500mg Ticagrelor along with impurity standard A (50mg), B (7.5mg) and C (7.5mg)
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 1808965) dated 09-08-2018 issued by Food and Drugs control Administration Gujrat State India, valid upto 09-08-2018.
5.	Mechanism for Vendor pre-qualification	Firm has submitted copy of vendor evaluation form and vendor evaluation report
6.	Certificate of analysis of the API, reference standards and impurity standards	Firm has submitted COA of API and reference standard.
7.	Documents for the procurement of excipients used in product development?	Firm has submitted documents for procurement of excipients.
8.	List of qualified staff involved in product development with relevant experience.	Firm has provided list of technical staff of product development section.
	Production Data	
9.	Authorized Protocols/SOP for the development & stability testing of trial batches.	Firm has submitted authorized protocols/SOPs for the development & testing of trial batches.
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the three batches

11.	Record of remaining quantities of stability batches.	Firm has provided following remaining quantities for each batch for long term stability studies: • Trial#01: 176 Tablets • Trial#02: 176 Tablets • Trial#03: 176 Tablets
	QA / QC DATA	
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers.
13.	Method used for analysis of API along with COA.	Firm has submitted COA and method of analysis of API.
14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	Firm has submitted method of analysis of FPP and complete record of testing of stability batches along with chromatograms.
15.	Reports of stability studies of API from manufacturer.	Firm has submitted both accelerated (40°C ± 2°C & 75±5%RH) stability studies & long term (30°C ± 2°C & 65±5%RH) stability studies reports of three batches.
16.	Analysis reports for excipients used.	Firm has submitted analysis reports for all excipients used.
17.	Drug-excipients compatibility studies.	Firm has submitted that their formulation is as per innovator and provided various references for the formulation compatibility
18.	Record of comparative dissolution data.	• Firm has submitted data of comparative dissolution profile against reference product Brilinta tablets (Lot# KM0394) at pH 1.2, 4.5 and 6.8.and calculated values of f1 and f2 which were within accepted range
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports for HPLC analysis for all the three batches.

Decision: Registration Board decided to approve registration of "Velocity tablets 60mg (Ticagrelor) by M/s Scotmann Pharmaceuticals, 5-D, I-10/3, Industrial Area, Islamabad". Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Protocols followed for conduction of stability study and details of tests.	Yes
Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
Documents confirming import of API etc.	The firm has submitted • Photocopy of ADC (Peshawar) attested commercial invoice for 300kg Sitagliptin phosphate monohydrate invoice # HN170727-C dated: 12-08-2017, lot No. M-20170112-D02-M06-01 from Beijing Huikang Boyuan Chemical Tech Co, Ltd – China • Photocopy of ADC (Peshawar) attested commercial invoice for 1000kg Metformin HCl invoice # MEG1718/1631990 dated: 12/02/2018 lot No. 17127ML2ARM from M/s Ipca Laboratories Limited – India.
All provided documents will be attested (name, sign and stamp) for	Yes

ensuring authenticity of data / documents.	
Commitment to continue real time stability study till assigned shelf life of the product.	Yes
Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR[2]

- The firm has provided 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Lab Scale Batches.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

Now the firm has requested for Exemption from On-site Investigation of their submitted stability data of Sitagen-M XR Tablets 100/1000 mg vide Letter no. PDFLL-657212091, dated 12-02-2019 and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting: (Date of submission: 14-02-2019 vide diary no. 6562)

Name & Address of Manufacturer / Applicant

Sr. #	Question	Submission
1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "INVICTA TABLETS" (Sofosbuvir 400mg and Velpatasvir 100mg), which was conducted on 16-March 2018 and was presented in 281st meeting of Registration board. Registration Board decided to approve registration of "INVICTA TABLETS" by M/s. Ferozsons Laboratories Limited. According to the report following points were confirmed • HPLC is 21 CFR compliant • Audit trails of the test reports were available. • Related manufacturing area equipment's personals and utilities were found GMP compliant.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted • Photocopy of ADC (Peshawar) attested commercial invoice for 300kg Sitagliptin phosphate monohydrate invoice # HN170727-C dated: 12-08-2017, lot No. M-20170112-D02-M06-01 from Beijing Huikang Boyuan Chemical Tech Co, Ltd – China • Photocopy of ADC (Peshawar) attested commercial invoice for 1000kg Metformin HCl invoice # MEG1718/1631990 dated: 12/02/2018 lot No. 17127ML2ARM from M/s Ipca Laboratories Limited – India.
3.	Documents for the procurement of reference standard and impurity standards.	• Copy of NOC from DRAP Peshawar along with invoice for import of Sitagliptin Phosphate USP Reference Standard has been submitted. • Copy of P.O and invoice for import of Metformin HCl USP Reference Standard has been submitted. • No relevant document for procurement of impurity standards has been submitted.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	**Sitagliptin:** • Copy of GMP Certificate issued on January 03, 2018 by Fuxin Food and Drug Administration People's Republic of China in the name of M/s Beijing Huikang Boyuan Chemical Tech Co, Ltd – China, has been submitted. **Metformin:** • Copy of GMP Certificate issued on August 28, 2018 by Food and Drug Administration, M.S. Bandra (E), Mumbai, Maharashtra State,

- In contrary to reference product wherein extended release metformin core has been prepared by incorporating matrix forming polymer in the metformin core, whereas firm has applied an extended release coating over the metformin core. Clarification/justification shall be submitted for this variation.
- **Upon communication of above observations vide letter no. F.1-1/2017/PEC-DRAP (AD PEC-II) dated 04-04-2019, firm has responded as under:**
- Firm has submitted analytical record for performance of dissolution data as per USFDA recommendations for all the three stability batches of both strengths, wherein the results of Sitagliptin are more than 90% in 30 minutes. Moreover firm has committed that in future we will follow USFDA recommendations for testing the dissolution of our products placed on real time stability.
- Firm has referred to literature of various formulations of Metformin Extended release tablets approved by USFDA, wherein an extended release coating over the metformin core has been applied and this technology has been named as "osmotic pump technology system".

Decision: Registration Board was apprised of the decision of 151st meeting of Appellate Board regarding Sovel 400/100mg Tablet (Sofosbuvir/Velpatasvir) of M/s Indus Pharmaceuticals, Karachi, wherein Board agreed with the submission made by the firm and allowed the appeal regarding GMP status of their supplier of Sofosbuvir i.e. M/s Bejing Huikang Boyuan Chemical Co., Ltd. Subsequently Registation Board in its 288th meeting approved the said product of M/s Indus Pharmaceuticals, Karachi.
Hence considering the baove cited reference and submitted stability studies data decided to approve Sitagen-M 100/1000 Tablets of M/s Ferozsons Labs, Amangarh, Nowshera. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.
The Board also approved the change of formulation of Sitagen –M 50/1000 tablets as per reference product.

</table>
• Comparative dissolution studies have been performed in following mediums:
i. pH 1.2 HCl buffer
ii. pH 4.5 Acetate buffer
iii. pH 6.8 Phosphate buffer
• As per submitted reports both reference and trial product</td></tr>
</table>

		released more than 85% at all three dissolution mediums. • Firm has submitted UV spectrums and raw data sheets for the CDP study.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	• Firm has submitted audit trail reports of stability studies of applied formulation

Remarks of Evaluator:

- Firm has also submitted report from FID, Karachi for verification of storage facility concluding as under:

"The above facility based on its suitability is recommended for the storage of all types of bio-tech vaccines required to be stored at 2-8^{o}C.

- Firm has also submitted a declaration from M/s YiChang HEC ChangJiang Pharmaceutical Co., Ltd, Hubei Province, China stating that the company name, Yichang Dongyang Chingjiang Pharm Co., Ltd on Chinese cFDA website is the exactly same company with us. The translation issue causes the difference that Dongyang is our Chinese name pronunciation.

Decision: Registration Board decided to approve registration of "Hilfo-B 25 mg Tablet (Tenofovir Alafenamide fumarate equivalent to 25 mg) by M/s Hilton Pharma (Pvt.) Ltd. Karachi.Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports for complete stability studies analysis of three batches.
Decision: Registration Board decided to approve registration of "Sofolos Tablet400/90 (Sofosbuvir/Ledipasvir) by M/s Scilife Pharma (Pvt.) Ltd, Plot FD-57/58-A2Korangi Creek Industrial Park , Karachi - Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.		

Case No. 07 Miscellaneous Cases.

a. Cases Referred by Appellate Board:

1. Omera (Omeprazole) & Esomega (Esomeprazole) Injections by M/s BF Biosciences Ltd., 5-Km, Sundar Raiwind Road, Raiwind.

Following cases were presented in 277th meeting of Registration Board, submitted on Form 5 along with enclosures on CTD format. The details of cases & decisions of Board are reproduced as under:

416.	Name and address of manufacturer / Applicant	M/s BF Biosciences Ltd., 5-Km, Sundar Raiwind Road, Raiwind.
	Brand Name +Dosage Form + Strength	Omera 40mg Infusion (Lyophilized Powder For Solution For Intravenous Injection)
	Composition	Each vial contains: Omeprazole (as sodium) …40mg
	Diary No. Date of R& I & fee	Dy. No.16942; 04-10-2017; Rs.20,000/- (03-10-2017)
	Pharmacological Group	Proton pump inhibitors
	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications
	Pack size & Demanded Price	1's;As per SRO
	Approval status of product in Reference Regulatory Authorities.	Approved by MHRA of UK
	Me-too status	Risek Injection 40mg of M/s Getz Pharma (Reg.#024170)
	GMP status	Last inspection report 08-09-2017 Panel concludes good level of GMP compliance.
	Remarks of the Evaluator.	• Firm has section approval for Biological parenteral only whereas applied formulation does not fall in this category. • Firm has submitted Enclosures along with form 5 as per

		CTD format approved in 264th meeting of registration Board. • Firm has submitted reports of accelerated & real time stability studies for three batches.
	Decision: Registration Board deferred the case for personal hearing for clarification of firm's request to manufacture applied formulation in Biological parenteral section.	
417.	Name and address of manufacturer / Applicant	M/s BF Biosciences Ltd., 5-Km, Sundar Raiwind Road, Raiwind.
	Brand Name +Dosage Form + Strength	Esomega 40mg Infusion (Lyophilized Powder For Solution For Intravenous Injection)
	Composition	Each vial contains: Esomeprazole (as sodium) …40mg
	Diary No. Date of R& I & fee	Dy. No.16941; 04-10-2017; Rs.20,000/- (03-10-2017)
	Pharmacological Group	Proton pump inhibitors
	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Approved by MHRA of UK
	Me-too status	X-Prazole 40mg Infusion of M/s Mediate Pharmaceuticals, Karachi (Reg.#057925)
	GMP status	Last inspection report 08-09-2017 Panel concludes good level of GMP compliance.
	Remarks of the Evaluator.	• Firm has section approval for Biological parenteral only whereas applied formulation does not fall in this category. • Firm has submitted Enclosures along with form 5 as per CTD format approved in 264th meeting of registration Board. • Firm has submitted reports of accelerated & real time stability studies for three batches.
	Decision: Registration Board deferred the case for personal hearing for clarification of firm's request to manufacture applied formulation in Biological parenteral section.	

Following details have been submitted of Module 3 (Quality / CMC) for both above cited applications:

Contents of Module: 3 (Quality / CMC)

Module	Section	Sub-section	Contents	Data submitted
3	**3.2.S**		**DRUG SUBSTANCE**	
		3.2.S.1	**General Information**	Detail submitted for i. Nomenclature ii. Structure iii. General properties

		3.2.P.1	**Description and Composition of Drug Product**	Detail submitted for Composition of Drug Product
		3.2.P.2	**Pharmaceutical Development**	Detail submitted for Components of the Drug Product.
		3.2.P.3	**Manufacture**	Detail submitted for i. Manufacturer(s) ii. Batch Formula iii. Description of Manufacturing Process and Process Controls iv. Controls of Critical Steps and Intermediates Undertaking has been submitted for Process validation
		3.2.P.4	**Control of Excipient**	Detail submitted for i. Specifications ii. Analytical Procedures All excipients used are of Pharmacopoeal grades
		3.2.P.5	**Control of Drug Product**	Detail submitted for i. Specification(s) ii. Analytical Procedures iii. Validation of Analytical Procedures (Protocol & report have been submitted)
		3.2.P.6	**Reference Standards or Materials**	Detail submitted for Reference Standards or Materials
		3.2.P.7	**Container Closure System**	Detail submitted for Container Closure System
		3.2.P.8	**Stability**	Following have been submitted: i. Stability Summary and Conclusions ii. Post-approval Stability Protocol and Stability Commitment iii. Stability Data (Only reports have been submitted.)

- Now, the firm has requested for personal hearing before the Honourable Drug Registration Board to enable to them to present their case. The representatives of the firm now have been called upon for personal hearing.

Proceedings: Dr. Ajmal Nasir (Director Technical) appeared before the Board and briefed regarding justification for the manufacturing of non- biologicals along with bio-pharmaceuticals at BF Biosciences Ltd as under:

"BF Biosciences is manufacturing six products i.e. Interferon Alpha 2a, Interferon Alpha 2b, Pegylated interferon alpha 2a, Erythropoietin, Filgrastim and Terlipressin acetate injections.

Drug Substances manufactured using a Biological system using living organisms/cell lines through culturing or Recombinant DNA are termed as BIOLOGICALS, whereas Drug Products manufactured using already produced Biological Drug Substances (which no longer contain living organisms) are termed as Bio-Pharmaceuticals. Dedicated facility is required for the

manufacturing of BIOLOGICAL SUBSTANCES and certain other highly sensitizing compounds etc., but not for biopharmaceuticals.
All above-mentioned products manufactured at BF Biosciences are ***Bio-Pharmaceuticals***. These bio-pharmaceutical formulations are peptides that are easily denatured by temperature as well as pH changes, and thus can be eliminated from the facility through cleaning validation between production batches. These do not therefore bear contamination risks carried by penicillin-based antibiotics and other products requiring dedicated manufacturing facilities.

Bio-Pharmaceuticals formulation and filling / Lyophilization (if required) is allowed as per WHO [1], Eudralex [2]and FDA [3] guidelines along with non-Biopharmaceuticals on Campaign basis.

At BF Biosciences we intend to avail this allowance to manufacture non-Biologicals along with Bio-Pharmaceuticals on Campaign basis.

All required controls and systems are in place and are compliant to requirements for campaign-based manufacturing of bio- pharmaceuticals and non- biologicals."

3) **FDA approves BioMarin's manufacturing facility in Cork, Ireland** he FDA has approved BioMarin Pharmaceutical's bulk biologics manufacturing plant, located in Cork, Ireland for production of the formulated bulk substance. Niamh Marriott (European Pharmaceutical Review)

- It is pertinent to mention that M/s BF Biosciences Ltd. Lahore was previously granted registration for Omega injection (Omeprazole), Reg. No. 067967, in same manufacturing facility vide letter no. F.15-7/2010-Reg-V (M-228) dated 10-12-2010.
  Later Central Licensing Board in 235th meeting while discussing the case of renewal of DML of M/s BF Bio Sciences, Lahore passed following orders in respect of Omega injection (Omeprazole) , Reg. No. 067967:-3
  "The Board was apprised by licensing division that the firm in its renewal application has mentioned that they have registration of omeprazole at biotech facility where as panel in the inspection report has mentioned that the firm has dedicated biotech manufacturing facility only. The Board in this regard advised to refer the case of registration of Omega injection (Omeprazole), Reg. No. 067967 to Drug Registration Board for its consideration and further necessary action accordingly".

  Registration Board in its 245th meeting held on 29th & 30th September, 2014 decided to issue show cause for cancellation of registration of Omega injection (Omeprazole), Reg. No. 067967, registered in the name of M/s BF Biosciences Ltd. Lahore.

Subsequently Omega injection (Omeprazole), Reg. No. 067967 of M/s BF Biosciences Ltd. Lahore, was de-registered vide letter no. F.15-2/2015-Reg-V (M-247)

Decision of 278th meeting: Registration Board deliberated the matter in detail and decided to refer the case to Central Licensing Board for their comments on firm's request as CLB has granted for Biological parenteral section only.

Subsequently the firm appealed before the Appellate Board, wherein the case was presented in 151st meeting of the Appellate Board. The proceedings and order of the Appellate Board are reproduced as under:

BEFORE THE APPELLATE BOARD IN ITS 151ST SITTING HELD ON 16TH JANUARY, 2019

ORDER

Appeal No.	**32/2018**
Appellant:	**M/s BF Biosciences, Lahore**
Appeal preferred against the decision of:	**Central Licensing Board**
Decision Appealed Against:	**Appeal against rejection of application for manufacturing of non-biological parental preparations at the facility of biological preparations.**
Date of the issuance of the decision:	**07-08-2018**
Date of the Appeal received:	**04-10-2018**

Present:

1. Dr. Dr. Shaikh Akhter Hussain	Chairman
2. Dr. Jamil Anwar	Member
3. Mr. Qaiser Muhammad	Member
4. Mr. Salim Khan	Member
5. Dr. Farzana Chaudhary	Member (Expert)
6. Brig. Dr. Akbar Waheed	Member (Expert)
7. Prof. Dr. Maqsood Ahmad	Member (Expert)
8. Mr. Shahid Nasir	Member (Expert)

Appellant represented by:

1. Mr. Omar Waheed, General Manager, M/s BF Biosciences, Lahore.
2. Mr. Baqar Hasan, Director (Reg. & Legal), M/s BF Biosciences, Lahore.
3. Dr. Ajmal Nasir, Director (Technical), M/s BF Biosciences, Lahore.

Proceedings:

The appellant challenged the decision passed by the Central Licensing Board in its 264th meeting held on 09-07-2018 whereby the Central Licensing Board in its 264th meeting held on 9th July, 2018 has considered their request for campaign manufacturing of non-biological products in biological manufacturing facility under DML No. 000655 and decided as under:

> "The Central Licensing Board considered the report of the Technical Evaluation Committee and decided to regret the permission for manufacture of non-biological parental preparations at the facility of biological preparations at M/s BF Biosciences Limited, Lahore under Drug Manufacturing License no. 000655 (formulation) on campaign manufacture basis as no such circumstances /exceptional case of emergency exists as required under the rules. The same may be conveyed to Drug Registration Board as the case was referred by the said Board for comments. The Central Licensing Board however, considered the recommendations at Serial No. 2 of the Committee and also decided to forward the same to Drug Registration Board for consideration."

2. Furthermore, the Central Licensing Board approved the recommendations of Technical Evaluation Committee at Serial No. 2 that BF Biosciences may be facilitated by processing pending applications for biological drugs on priority to overcome underutilization of the facility as country needs biological products as well.

3. The representative of the firm delivered a comprehensive presentation. The main thrust of argument of the appellant was that the firm is not producing biological but bio-pharmaceuticals. He further submitted that the terms "biological" and "biopharmaceutical" are defined as follows:-

> **BIOLOGICAL PRODUCT:--**A virus, therapeutic serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product, or analogous product, or arsphenamine or derivative of arsphenamine (or any other trivalent organic arsenic compound), applicable to the prevention, treatment, or cure of a disease or condition of human beings.
> REFERENCE: 42 U.S. Codex. 262(a) FDA
>
> Since all the products filled by BF Biosciences are peptides and proteins in nature they did not fall in the definition of Biologics as described above and hence are not Biologics. Peptides and proteins are considered a s Biopharmaceuticals due to the use of Living organism in the manufacture of the final product. However, the finished product does not contain any live organism as given in definition below.
>
> **BIO PHARMACEUTICALS:--**A therapeutic product made through the genetic manipulation of living things or their cells, including (but not limited) *proteins and monoclonal antibodies, peptide, and other molecules that are not chemically synthesized,* along with gene therapies, cell therapies and engineered tissues. Biopharmaceuticals ethical pharmaceutical drugs derived through bioprocessing.
> REFERENCE: Glossary, International Society of Pharmaceutical Engineers (ISPE)

4. The representative of the firm added that there is no reference in any guideline requirement for separate formulation and filling sections for biopharmaceutical and pharmaceutical products. However extra care is advised vide:-

(i) EudraLex The Rules Governing Medical Product in the European Union (Vol. 4).

(ii) EU Guideline for Good Manufacturing Practice for Medicinal Products for Human and Veterinary Use.

5. Following examples of permissions to manufacture biopharmaceutical & non biopharmaceutical on campaign basis were quoted by the firm:-

(i) FDA has approved BioMarin Pharmaceuticals's bulk biologics manufacturing plant, located in Cork, Ireland for production of the formulated bulk substance. (Elsufase alfa (trade name Vimizim) is a drug for the treatment of Morquio syndrome which is caused by deficiency in the enzyme N-acetylagalcatosamine-6-sulfatase. Elosulfase alfa is synthetic version of the enzyme (non Biological product). This facility is for the manufacturing of Bulk biologics and allowed to manufacture bulk for their product Vimizim (Elosulfase alfa) is a non-biological product on campaign based manufacturing by following The above mentioned

guidelines for change over and campaign based manufacturing and use facility as multiproduct facility.

(ii) Baxter's facility at Halle Germany. Based on "Risk Assessment" combined with State of the Art Organizational Procedures & Technical Standards in accordance with Industry Standards Baxter was allowed to manufacture:

- Small Molecules (cytotoxic & non Cytotoxic)
- Liposomal & NOano particle Formulation
- Monoclonal antibodies
- ADCs (Antibody Drug Conjugates)
- Nocleic Acid Products e.g. Gene Therapeutics.

Baxter was allowed to manufacture small molecules (non biopharmaceuticals) along with biopharmaceuticals including Liposomal and Nano particle formulation, MABS, DCs etc based on guidelines on campaign based manufacturing and risk assessment and mitigation.

Bio Pharmaceuticals	**Non Biopharmaceuticals**
Liposome's	Oxiplatin
Enoxaparin Sodium	Lidocaine
Heparin Sodium	Gentamicin
MABs (Monoclonal Anti Bodies)	
ADCs (antibody Drug Conjugates	

6. Responding to a query raised by the Chairman regarding campaign manufacturing timetable, the firm proposed to change over on quarterly basis due to shelf life requirement in tender business. Following checklist will be strictly observed on change over from biopharmaceutical to non-biopharmaceuticals (and *vice versa*) which will be verified by DRAP:

CHANGE OVER CHECKLIST			
Sr.	**Activity**	**Date:**	
1	Last Production campaign was for		
		Yes	**No**
2	All manufacturing/Formulation Equipment for last manufacturing campaign removed from area and kept segregated.		
3(a)	Dispensing area is cleaned, sanitized as per SOP after last campaign and logged in.		
3(b)	Formulation Area is cleaned, sanitized as per SOP after last campaign and logged in.		
3(c)	Filling Area is cleaned, sanitized as per SOP after last campaign and logged in.		
4	Changeover of Machine and filling machine as per change over SOP & logged in.		
5	Freeze dryer is cleaned and sterilized through CIP & SIP procedure and logged in after last campaign.		
6	New change parts are installed after cleaning as per approved SOP and Sterilization.		
7	All Manufacturing equipment & filling parts are product specific / dedicated and logged in.		

7. Prof. Dr. Maqsood Ahmad stated the protocols are different for both products i.e. biological and pharmaceutical. Patients cannot be put to risk by allowing campaign manufacturing. The firm clarified that they are manufacturing bio-pharmaceuticals and not biological products. As per international guidelines, manufacturing of bio-pharmaceuticals with pharmaceuticals on campaign basis is allowed.

Decision:

8. The Board noted that the firm has very stringent quality assurance mechanism with state of the art manufacturing and quality control facility in line with the international regulations.

9. The Board allowed the appeal and permitted M/s BF Biosciences, Lahore for manufacturing of proton-pump inhibitors (Omeprazole & Esomeprazole) in already approved section for biological drugs on campaign manufacturing basis. The Secretary, Registration Board is directed to place the following products of the appellant before the Registration Board in its forthcoming meeting and issue registrations within 30 days thereof:-

(i) Omera (Omeprazole) 40mg injection.
(ii) Esomega (Esomeprazole) 40mg injection.

10. The appellant may be allowed to manufacture other proton-pump inhibitors, including Lansoprazole and Dexlansoprazole, if it fulfills the requirement of CTD dossier. However, the campaign manufacturing is allowed on the basis of change over checklist mentioned in paragraph 6 (above) subject to verification by the panel comprising the following, before each interval of production:-

(i) Mr. Shahid Nasir (Member, Appellate Board); and
(ii) Mt. Asim Rauf, Additional Director (E&M), DRAP, Lahore.

Decision of 288th meeting: Registration Board deferred above products for the submission of following as required by the CTD:

i. Stability data of three batches as per Zone-IVA conditions according to directions of Registration board in oits 278th meeting.
ii. Process validation data.

Evaluation by PEC: The firm has submitted that our applications of "Omera (Omeprazole) 40mg injection" & "Esomega (Esomeprazole) 40 mg injection" were also submitted on Form-5 dated 04-10-2017 & 03-10-2017 respectively. Hence the firm as requested to consider their products on Form-5 where the stability data and process validation is not required for registration.

Decision: **Registration Board acceded with firm's request and approved "Omera (Omeprazole) 40mg injection" & "Esomega (Esomeprazole) 40 mg injection". The campaign manufacturing is allowed on the basis of change over checklist mentioned in paragraph 6 (above) subject to verification by the panel comprising the following, before each interval of production:-**

(i) Mr. Shahid Nasir (Member, Appellate Board); and
(ii) Mt. Asim Rauf, Additional Director (E&M), DRAP, Lahore.

b. Registration of Cysteamine

Chief Drugs Controller, Punjab vide letter No. CDC/INT-CC/172/2019 dated 08-01-2019 has requested the CEO, DRAP to take the needful action to ensure the availability of Cysteamine in Pakistan by registering it at earliest, since the said drug is not registered in Pakistan and it is indicated for life threatning genetic disorder named Cystinosis.

In this regard it is submitted for information of Board that till date no registration application of "Cysteamine" could be identified in available entered record.

Decision: **Registration Board decided that any submitted application of "Cysteamine" will be considered on priority upon completion of relevant codal formalities.**

Case no. 01: Registration applications for local manufacturing of (Human) drugs

a. Deferred cases

418.	Name and address of manufacturer / Applicant	M/s Novamed Pharmaceuticals (Pvt) Ltd., 28 KM, Ferozepur Road, Lahore.
	Brand Name +Dosage Form + Strength	Tamflo Capsule
	Composition	Each capsule contains: Tamsulosin hydrochloride…..0.4mg
	Diary No. Date of R& I & fee	Dy No. 1174: 15-10-2014 PKR 20,000/-: 02-10-2014
	Pharmacological Group	Selective alpha 1 receptor antagonist
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	10's: As per SRO
	Approval status of product in Reference Regulatory Authorities.	Diffundox XL 400 microgram Capsules by Winthrop Pharmaceuticals (MHRA Approved)
	Me-too status	Tamsolin capsule by Getz
	GMP status	GMP inspection conducted on 5th and 27th December 2017 with conclusive remarks that firm is compliant to good cGMP at the time of inspection.
	Remarks of the Evaluator[3]	Source of pellets along with GMP of manufacturer, stability study data of pellets is not submitted.
	Decision of previous meeting of Registration Board	Registration Board deferred the case for further deliberation**(M-284)**
	Evaluation by PEC	Firm has submitted source of pellets from Vision Pharmaceuticals, Islamabad along with stability data of 3 batches. After the use of pellets, the label claim will become Each capsule contains: Tamsulosin hydrochloride (as SR pellets)……..0.4mg
	Decision: Approved.	
419.	Name and address of manufacturer / Applicant	M/s Delta Pharma Pvt Ltd.Plot. No. 9, Nowshera Industrial Estate, Risalpur, Kpk, Pakistan
	Brand Name +Dosage Form + Strength	Ventodine 2mg/5ml Liquid Suspension
	Composition	Each 5ml of Suspension Contains: Sulbutamol as Sulphate…2mg
	Diary No. Date of R& I & fee	Dy. No 39940: 04-12-2018 PKR 20,000/- : 04-12-2018
	Pharmacological Group	Selective beta-2-adrenoreceptor agonists
	Type of Form	Form-5
	Finished Product Specification	BP
	Pack size & Demanded Price	60ml, 120ml: As per SRO
	Approval status of product in Reference Regulatory Authorities.	Ventolin Syrup by Glaxo Wellcome (MHRA Approved)
	Me-too status	Ventolin Syrup by GSK
	GMP status	Firm is granted additional sections Oral liquid (general) and dry suspension (general) section on the basis of inspection dated 12-10-2018
	Remarks of the Evaluator.	• Justify the formulation of liquid suspension, since the MHRA approved reference formulation is liquid solution / syrup. In case of revision of formulation fee (for revision of formulation) needs to be submitted.
	Decision of 287th meeting of RB	Deferred for revision of formulation as per reference product along with submission of requisite fee for change of formulation
	Evaluation by PEC	• Firm has revised formulation as per reference product along with submission of 5,000 fee dated 07-02-2019. The revised formulation submitted by the firm is as: Each 5ml of solution Contains:

		Sulbutamol as Sulphate…2mg
	Decision of 288th meeting of Registration Board	Deferred for submission of fee for revision of dosage form.
	Evaluation by PEC	Firm has submitted the balance fee i.e. 15,000/- dated 09-05-2019 for revision of dosage form
	Decision: Approved.	
420.	Name and address of manufacturer / Applicant	M/s Delta Pharma Pvt Ltd. Plot. No. 9, Nowshera Industrial Estate, Risalpur, KPK, Pakistan
	Brand Name +Dosage Form + Strength	Zindell 20mg/5ml Liquid Suspension
	Composition	Each 5ml Contains: Zinc as Sulphate Monohydrate…20mg
	Diary No. Date of R& I & fee	Dy. No 39943: 04-12-2018 PKR 20,000/- : 04-12-2018
	Pharmacological Group	Zinc supplement
	Type of Form	Form-5
	Finished Product Specification	International pharmacopoeia
	Pack size & Demanded Price	60ml: As per SRO
	Approval status of product in Reference Regulatory Authorities.	WHO recommended formulation
	Me-too status	Zincat-OD Syrup by Atco Pharma
	GMP status	Firm is granted additional sections Oral liquid (general) and dry suspension (general) section on the basis of inspection dated 12-10-2018

Case No. 03: Registration Applications of Categories to be Considered on Priority

d. Local manufacturing applications of priority categories defined by Registration Board in its 257th meeting

444.	Name and address of manufacturer / Applicant	M/s Dyson Research Laboratories (Pvt) Ltd. 28th KM Ferozepur Road Lahore
	Brand Name +Dosage Form+ Strength	Tamoxen Tablet 20mg
	Composition	Each tablet contains: Tamoxifen (as citrate)……..20mg
	Diary No. Date of R& I & fee	Dy No. 40263: 05-12-2018 PKR 20,000/-: 05-12-2018
	Pharmacological Group	Anti-estrogens (L02BA)
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	TAMOXIFEN CITRATE20mg Tablet (**USFDA** Approved)
	Me-too status	Tamoxifen-Sandoz 20mg Tablet by Novartis
	GMP status	Last inspection report 01-8-2017 with conclusion that panel Recommended issuance of GMP certificate to the firm.
	Remarks of the Evaluator[3]	•
	Decision: Approved.	
445.	Name and address of manufacturer / Applicant	M/s Shaheen Pharmaceuticals, 3Km Murghzar Road, Saidu Sharif Swat Pakistan
	Brand Name+Dosage Form + Strength	Shetrozole Tablet 2.5mg
	Composition	Each film coated tablet contains: Letrozole…….2.5mg
	Diary No. Date of R& I & fee	Dy No. 39883: 04-12-2018 PKR 20,000/-: 04-12-2018
	Pharmacological Group	Aromatase Inhibitor (L02BG)
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO

	Approval status of product in Reference Regulatory Authorities.	Femara 2.5mg Tablet by Novartis (**MHRA** Approved)
	Me-too status	Femara 2.5mg Tablet by Novartis
	GMP status	Last GMP inspection conducted on 13-09-2018and the report concludes that overall the firm was found to be GMP compliant.
	Remarks of the Evaluator[3]	•
	Decision:Registration Board approved registration of product in general manufacturing areas with condition that manufacturer shall provide safety and protective measures for workers and personnel which remain in direct contact or are involved in close handling of these drugs.	
446.	Name and address of manufacturer / Applicant	M/s Shaheen Pharmaceuticals, 3Km Murghzar Road, Saidu Sharif Swat Pakistan
	Brand Name +Dosage Form + Strength	Carolimus Tablet 5mg
	Composition	Each Tablet contains: Everolimus……5mg
	Diary No. Date of R& I & fee	Dy No. 39889: 04-12-2018 PKR 20,000/-: 04-12-2018
	Pharmacological Group	Selective immunosuppressant (L04AA)
	Type of Form	Form 5
	Finished Product Specification	Innovator's
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Linevero 5mg Tablet by Ethypharm (**MHRA** Approved)
	Me-too status	Afinitor 5mg Tablet by Novartis
	GMP status	Last GMP inspection conducted on 13-09-2018 and the report concludes that overall the firm was found to be GMP compliant.
	Remarks of the Evaluator[3]	•
	Decision: Approved.

	Name and address of manufacturer	M/s Cisen Pharmaceutical Co., Ltd., Tongji Tech Industry Garden, Jining High & New Technology Industries Development Zone, Jining, Shandong Province China (As per CoPP)
	Name and address of marketing authorization holder	M/s Cisen Pharmaceutical Co., Ltd., Tongji Tech Industry Garden, Jining High & New Technology Industries Development Zone, Jining, Shandong Province China (As per CoPP and Sole agency agreement) **Exporting agent for Pakistan:** M/s Ninhua Group Co., Ltd., 21 Jiangxia St. Ningbo, P.R. China (as per sole agency agreement)
	Name of exporting country	China
	Brand Name +Dosage Form + Strength	CARBOPLATIN IV Injection 100mg Freeze dried cake for solution for IV injection (Lyophilized Powder)
	Composition	Each vial contains: Carboplatin…….100mg
	Finished Product Specification	USP
	Pharmacological Group	Antineoplastic
	Shelf life	2 years
	Type of Form	Form 5-A
	Diary No. & Date of R& I	Dy. No. 392 Dated 16/03/2017
	Fee including differential fee	Rs. 100,000/- Dated 15/03/2017
	Demanded Price	As per SRO
	Pack size	1×1's
	International availability	Cannot be confirmed
	Me-too status	Carboplatin for injection 100mg/vial by M/s Mehran International. (Imported from China) (Reg # 052270) Carboplatin for injection 100mg/vial by PakChina International (Imported from China)(Reg # 066006)
	Detail of certificates attached	Original Legalized CoPP issued by Jining Food and Drug Administration **valid till 14/12/2017** confirms the free of the product in exporting country. The facilities and operation conform to GMP as recommended by WHO.
	Remarks of the Evaluator.	• The firm has applied for registration with generic name. • Approval status of the product with strength 100mg/vial cannot be confirmed. However product with 50mg/vial,

	150mg/vial and 450mg/vial are approved by USFDA. • Firm has initially submitted real-time stability data conducted at 25 ± 2°c and 65 ± 5%RH, letter was issued to submit stability study data conducted according to the conditions of zone IV-A. In response to the letter firm has submitted stability data sheet specifying stability conditions as 30 ± 2°c and 65 ± 5%RH with same results at each time point.

Previous Decision(M-274):

The Registration Board deferred the cases for;

- Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true
- Evidence of approval status of the product in reference regulatory authorities in the applied strength.
- Detail of diluent to be used for reconstitution.

Evaluation by PEC:

Shortcomings	Response by the firm
Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true.	Firm has submitted stability study data sheets duly signed by the authorized personnel of manufacturer of 3 batches conducted as per the conditions of zone IV-A. The data submitted is only for 6 months. The firm has **NOT** submitted any clarification regarding already submitted stability data sheets having same values at both conditions.
Detail of diluent to be used for reconstitution.	Firm has submitted details of preparation and administration of the applied formulation.
Evidence of approval status of the product in reference regulatory authorities in the applied strength.	Firm has not submitted any reference

After the evaluation of the response, another letter of shortcoming No. F.1-1/2017/PEC-DRAP(AD PEC-V) was issued by dated 23-11-2018. Now the response of the firm against that letter is also received.

Shortcomings	**Response by the firm**
Clarifythe formulation whether Freeze dried cake or lyophilized powder	Lyophilized powder
The certifying authority for CoPP is Jinning Food and Drug Administration which is not a state or provincial certifying authority.	Firm has submitted that "as per the announcement of Shandong province food and drug administration, shandong province food and drug administration authorize the city level food and drug administration to issue CoPP. Since the manufacturer M/s Cisen Pharmaceutical Co. Ltd. is in Shandong province, therefore the city level Jinning food and drug administration is authorized to issue CoPP. Firm has also submitted following link but it could not be accessed http://www.sfda.gov.cn/art/2017/12/20/art_8045_782171.html
Evidence of approval of applied formulation in reference regulatory authorities which were approved by Registration Board in its 275th meeting	Firm has submitted evidence of USFDA **which could not be verified**
Product is present in USP and specification of pH are more stringent in USP 5-7 while your	Firm has submitted that their inner control standards (6.0-7.0) are more stringent than USP.

	claimed specification are 5.5-7.5	
	Long term stability data of at least one year is required for grant of 2 years shelf life whereas you have provided data of 6 months with results of related substances out of specification.	Firm has submitted accelerated stability study stability data of 3 batches for one year instead of long term stability study data till claimed shelf life
	Decision: Deferred for following submissions: • **Evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting** • **Real time stability study data of 3 batches as per zone IV-A for the complete shelf life.**	
459.	Name and address of Applicant	M/s Mehran International , Pliva Avenue Hume Road Near World Map, Karachi, Pakistan
	Detail of DSL	**Address:** Mehran International, Plot No. JM 25/1 S.T. Homes shop No. 4/4-A, Jamshed quarter, Karachi. **Validity:** 16/01/2019
	Name and address of manufacturer	M/s Cisen Pharmaceutical Co., Ltd., Tongji Tech Industry Garden, Jining High & New Technology Industries Development Zone, Jining, Shandong Province China (As per CoPP)

Previous Decision(M-274):

The Registration Board deferred the cases for;

- Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true.
- Detail of diluent to be used for reconstitution.
- Evidence of approval of the product in reference regulatory authorities in the same strength/volume/dosage form.
- Submission of original, legalized and valid CoPP.

Evaluation by PEC:

Shortcomings	Response by the firm
Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true.	Firm has submitted stability study data sheets duly signed by the authorized personnel of manufacturer of 3 batches conducted as per the conditions of zone IV-A. The data submitted is only for 6 months. The firm has **NOT** submitted any clarification regarding already submitted stability data sheets having same values at both conditions.
Detail of diluent to be used for reconstitution.	Firm has submitted details of preparation and administration of the applied formulation.
Evidence of approval status of the product in reference regulatory authorities in the applied strength.	Firm has not submitted any reference
Submission of original, legalized and valid CoPP	Firm has submitted new CoPP which is valid till 26-02-2020.

After the evaluation of the response, another letter of shortcoming No. F.1-1/2017/PEC-DRAP(AD PEC-V) was issued by dated 23-11-2018. Now the response of the firm against that letter is also received.

Shortcomings	**Response by the firm**
Clarifythe formulation whether Freeze dried cake or lyophilized powder	Lyophilized powder
The certifying authority for CoPP is Jinning Food and Drug Administration which is not a state or provincial certifying authority.	Firm has submitted that "as per the announcement of Shandong province food and drug administration, shandong province food and drug administration authorize the city level food and drug administration to issue CoPP. Since the manufacturer M/s Cisen Pharmaceutical Co. Ltd. is in Shandong province, therefore the city level Jinning food and drug administration is authorized to issue CoPP. Firm has also submitted following link but it could not be accessed http://www.sfda.gov.cn/art/2017/12/20/art_8045_782171.html
Evidence of approval of applied formulation in reference regulatory authorities which were approved by Registration Board in its 275th meeting	Firm has submitted evidence of USFDA **which could not be verified**
Variation in address mentioned on DSL and Form 5A. Clarify	Firm has submitted revised Form 5A
Long term stability data of at least one year is required for grant of 2 years shelf life whereas you have provided data of 6 months with results of related substances out of specification.	Firm has submitted accelerated stability study stability data of 3 batches for one year instead of long term stability study data till claimed shelf life

Decision: Deferred for following submissions:

- **Evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting**
- **Real time stability study data of 3 batches as per zone IV-A for the complete shelf life.**

Fee including differential fee	Rs. 100,000/- Dated 15/03/2017
Demanded Price	As per SRO
Pack size	1×1's (7ml glass vial)
International availability	ELOXATIN for injection (50mg 100mg) by M/s SANOFI AVENTIS US, **USFDA** approved
Me-too status	Celdach 50 injection by Hakimsons (Reg # 72565) 64
Detail of certificates attached	Original Legalized CoPP (certificate No. 151100B0/47076) issued by Jining Food and Drug Administration on 16/09/2015 is attached which confirms the free sale of the product in exporting country. The facilities and operations conform to GMP as recommended by WHO.
Remarks of the Evaluator.	• The firm has claimed In House manufacturing specifications while the product is available in USP. As per USP the product contains Oxaliplatin and Lactose monohydrate while according to formulation provided by the firm the product contains Oxaliplatin and Mannitol. • Firm has initially submitted real-time stability data conducted at 25 ± 2°c and 65 ± 5%RH, letter was issued to submit stability study data conducted according to the conditions of zone IV-A. In response to the letter, firm has submitted stability data sheet specifying stability conditions as 30 ± 2°c and 65 ± 5%RH with same results at each time point.

Previous Decision(M-274):

The Registration Board deferred the cases for;

- Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true.
- Detail of diluent to be used for reconstitution.
- Clarification regarding formulation since USP specifies the formulation containing Oxaliplatin with Lactose monohydrate while submitted formulation by you contains Oxaliplatin and Mannitol.

Evaluation by PEC:

Shortcomings	Response by the firm
Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true.	Firm has submitted stability study data sheets duly signed by the authorized personnel of manufacturer of 3 batches 170610, 170611, 170612 conducted as per the conditions of zone IV-A. The data submitted is only for 6 months. Additionally the impurities identified at various time points exceeds the limit identified in acceptance criteria i.e. NMT 0.2%. The firm has **NOT** submitted any clarification regarding already submitted stability data sheets having same values at both conditions.
Detail of diluent to be used for reconstitution.	Firm has submitted details of preparation and administration of the applied formulation.

Clarification regarding formulation since USP specifies the formulation containing Oxaliplatin with Lactose monohydrate while submitted formulation by you contains Oxaliplatin and Mannitol	Firm has submitted that their principle manufacturer has informed that China FDA does not approved lactose as excipient of lyophilized powder instead they accept mannitol because it provides more stability.

After the evaluation of the response, another letter of shortcoming No. F.1-1/2017/PEC-DRAP(AD PEC-V) was issued by dated 23-11-2018. Now the response of the firm against that letter is also received.

Shortcomings	**Response by the firm**
Clarifythe formulation whether Freeze dried cake or lyophilized powder	Lyophilized powder
The certifying authority for CoPP is Jinning Food and Drug Administration which is not a state or provincial certifying authority.	Firm has submitted that "as per the announcement of Shandong province food and drug administration, shandong province food and drug administration authorize the city level food and drug administration to issue CoPP. Since the manufacturer M/s Cisen Pharmaceutical Co. Ltd. is in Shandong province, therefore the city level Jinning food and drug administration is authorized to issue CoPP. Firm has also submitted following link but it could not be accessed http://www.sfda.gov.cn/art/2017/12/20/art_8045_782171.html
Evidence of approval of applied formulation in reference regulatory authorities which were approved by Registration Board in its 275th meeting	Eloxatin Injection 50mg by M/s Sanofi Aventis Inc USA. (**USFDA** Approved)
According to the specification of related substances any individual impurity specs in NMT 0.2%. However the results are greater than 0.2% i.e. out of specs, clarification is required.	Firm has submitted specifications of oxaliplatin and comparison of its specs with USP and inner control standards but the firm has **NOT** submitted justification of their results outside the acceptance criteria.
Long term stability data of at least one year is required for grant of 2 years shelf life whereas you have provided data of 6 months with results of related substances out of specification.	Firm has submitted accelerated stability study stability data of 3 batches for one year instead of long term stability study data till claimed shelf life

Decision: Deferred for following submissions:

- **Real time stability study data of 3 batches as per zone IV-A for the complete shelf life.**
- **Scientific justification for out of specification impurities (i.e. results greater than 0.2%) while the acceptance criteria was NLT 0.2%.**

	Detail of DSL	**Address:** Mehran International, Plot No. JM 25/1 S.T. Homes shop No. 4/4-A, Jamshed quarter, Karachi. **Validity:** 16/01/2019
	Name and address of manufacturer	M/s Cisen Pharmaceutical Co. Ltd., Tongji Tech-Industry Garden, Jining High & New Technology Ind. Development Zone, Jining, Shandong Province, China.
	Name and address of marketing authorization holder	M/s Cisen Pharmaceutical Co. Ltd., Tongji Tech-Industry Garden, Jining High & New Technology Ind. Development Zone, Jining, Shandong Province, China. (as per CoPP and Sole agency agreement) **Exporting agent for Pakistan:** M/s Ninhua Group Co., Ltd., 21 Jiangxia St. Ningbo, P.R. China (as per Sole Agency Agreement)
	Name of exporting country	China

Brand Name +Dosage Form + Strength	OXALIPLATIN for injections 100mg Freeze dried cake for solution for IV injections (lyophilized)
Composition	Each Vial Contains: Oxaliplatin….. 100mg
Finished Product Specification	In House
Pharmacological Group	Antineoplastic
Shelf life	3 years
Type of Form	Form 5-A
Diary No. & Date of R& I	Dy. No. 398 Dated 16/03/2017
Fee including differential fee	Rs. 100,000/- Dated 15/03/2017
Demanded Price	As per SRO
Pack size	1×1's
International availability	ELOXATIN for injection (50mg 100mg) by M/s SANOFI AVENTIS US, USFDA approved
Me-too status	Celdach 50 injection by Hakimsons (Reg # 72564)
Detail of certificates attached	Original Legalized CoPP (certificate No. 151100B0/47077) issued by Jining Food and Drug Administration on 16/09/2015 is attached which confirms the free sale of the product in exporting country. The facilities and operations conform to GMP as recommended by WHO.
Remarks of the Evaluator.	• The firm has claimed In House manufacturing specifications while the product is available in USP. As per USP the product contains Oxaliplatin and Lactose monohydrate while according to formulation provided by the firm the product contains Oxaliplatin and Manitol. • Firm has initially submitted real-time stability data conducted at 25 ± 2°c and 65 ± 5%RH, letter was issued to submit stability study data conducted according to the conditions of zone IV-A. In response to the letter firm has submitted stability data sheet specifying stability conditions as 30 ± 2°c and 65 ± 5%RH with same results at each time point.

Previous Decision(M-274):

The Registration Board deferred the cases for;

- Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true.
- Detail of diluent to be used for reconstitution.
- Clarification regarding formulation since USP specifies the formulation containing Oxaliplatin with Lactose monohydrate while submitted formulation by you contains Oxaliplatin and Mannitol.

Evaluation by PEC:

Shortcomings	Response by the firm
Submission of clarification regarding since the data/assay values in the stability studies are unjustifiable/irrational as there is no difference in assay values of initially submitted stability data (at 25 ± 2°c and 60 ± 5%RH) and the stability data submitted after issuance of letter (at 30 ± 2°c and 65 ± 5%RH). Since this ambiguity shows that the revised data (at 30 ± 2°c and 65 ± 5%RH) is not true.	Firm has submitted stability study data sheets duly signed by the authorized personnel of manufacturer of 3 batches 170613, 170614, 170615 conducted as per the conditions of zone IV-A. The data submitted is only for 6 months. Additionally the impurities identified at various time points exceeds the limit identified in acceptance criteria i.e. NMT 0.2%. The firm has **NOT** submitted any clarification regarding already submitted stability data sheets having same values at both conditions.

Detail of diluent to be used for reconstitution.	Firm has submitted details of preparation and administration of the applied formulation.
Clarification regarding formulation since USP specifies the formulation containing Oxaliplatin with Lactose monohydrate while submitted formulation by you contains Oxaliplatin and Mannitol	Firm has submitted that their principle manufacturer has informed that China FDA does not approved lactose as excipient of lyophilized powder instead they accept mannitol because it provides more stability.

After the evaluation of the response, another letter of shortcoming No. F.1-1/2017/PEC-DRAP(AD PEC-V) was issued by dated 23-11-2018. Now the response of the firm against that letter is also received.

Shortcomings	**Response by the firm**
Clarifythe formulation whether Freeze dried cake or lyophilized powder	Lyophilized powder
The certifying authority for CoPP is Jinning Food and Drug Administration which is not a state or provincial certifying authority.	Firm has submitted that "as per the announcement of Shandong province food and drug administration, shandong province food and drug administration authorize the city level food and drug administration to issue CoPP. Since the manufacturer M/s Cisen Pharmaceutical Co. Ltd. is in Shandong province, therefore the city level Jinning food and drug administration is authorized to issue CoPP. Firm has also submitted following link but it could not be accessed http://www.sfda.gov.cn/art/2017/12/20/art_8045_782171.html
Evidence of approval of applied formulation in reference regulatory authorities which were approved by Registration Board in its 275th meeting	Eloxatin Injection 100mg by M/s Sanofi Aventis Inc USA. (**USFDA** Approved)
According to the specification of related substances any individual impurity specs in NMT 0.2%. However the results are greater than 0.2% i.e. out of specs, clarification is required.	Firm has submitted specifications of oxaliplatin and comparison of its specs with USP and inner control standards but the firm has **NOT** submitted justification of their results outside the acceptance criteria.
Long term stability data of at least one year is required for grant of 2 years shelf life whereas you have provided data of 6 months with results of related substances out of specification.	Firm has submitted accelerated stability study stability data of 3 batches for one year instead of long term stability study data till claimed shelf life

Decision: Deferred for following submissions:

- **Real time stability study data of 3 batches as per zone IV-A for the complete shelf life.**
- **Scientific justification for out of specification impurities (i.e. results greater than 0.2%) while the acceptance criteria was NLT 0.2%.**

ii. Veterinary

	Name and address of marketing authorization holder	Alfasan Nederland B.V. Kuipersweg 9, 3449 JA Woerden Netherlands
	Name of exporting country	Netherlands
	Type of Form	Form 5-A

Diary No. & Date of R& I	Dy No. 21411: 17-11-2017
Fee including differential fee	PKR 100,000/-: 17-11-2017
Brand Name +Dosage Form + Strength	Alfamec1% solution for injection
Composition	Each ml contains: Ivermectin……..10mg
Finished Product Specification	Firm has claimed inhouse specification while the finished product monograph is available in BP/USP
Pharmacological Group	Antiparasitic
Shelf life	36 months
Demanded Price	Decontrolled
Pack size	100ml
International availability	Netherland approved
Me-too status	Ivoron Injection by Breeze Pharma (Reg # 059152)
Detail of certificates attached	• Original, legalized CoPP (No. 247607) issued by Medicines Evaluation Board Agency, Veterinary Medicinal Products Unit, and Ministry of Economic Affairs, Netherlands dated 13 June 2017 confirms free sale status and GMP of the manufacturer. • Copy of GMP certificate of M/s Alfasan International issued by Medicine Evaluation Board dated 1 and 2 February 2017 is also submitted. • Copy of letter of exclusive sole distributor authorization dated 05-05-2017 between M/s Alfasan International B.V and M/s Chakwal Pharma International.

Remarks of the Evaluator.

Firm was asked to clarify the following vide letter dated 4th September 2018, The firm has now provided following clarifications:

Shortcomings	**Reply of the firm**
Clarification is required regarding the name of manufacturer since Form 5-A specify Alfasan International as manufacturer, while the manufacturer mentioned in CoPP is Alfasan Nederland, and the GMP certificate submitted is also of Alfasan International B.V. Furthermore the sole agency agreement is with M/s Alfasan International B.V, which is product license holder in country of origin, justification in this regard is also required.	Firm has submitted original, legalized letter from Alfasan International stating that as per agreement between Alfasan Nederland and Alfasan International BV it is agreed that Alfasan International is allowed to export the product for which Alfasan Nederland BV is the registration holder. Firm has further stated that Alfasan is a multilayer group of companies all based in same physical address. Alfasan Nederland is the full holding company and registration holder of all products. Alfasan International's factory inspected by Dutch veterinary Authority is also based at the same address, therefore the GMP certificate has been issued in the name of Alfasan International.
Real time and accelerated stability study data of 3 batches as per the conditions of Zone IV-A, since the submitted stability studies are conducted at different conditions.	Firm has submitted data of 36 months of 3 batches conducted at 30°C and 65% RH.

Firm has further submitted that their principle has performed stability studies as per **BP** monograph.

Decision of 288th meeting of Registration Board:

Deferred for revision of Form5A for manufacturer revised agreement with Marketing authorization holder as per CoPP

Evaluation by PEC:

Firm has submitted revised Form 5-A with address of manufacturer as per CoPP and sole agency agreement

Decision:Approved with BP specifications as per Policy for inspection of manufacturer abroad.

Firm has performed stability testing as per in house specification while the product monograph is also available in USP. The difference in the specifications is provided in the table below:

Test	Specification limit of the firm	Limits specified by USP
pH	3.0 – 7.0	4.5 – 5.5

The stability data initially provided by the firm at zone II specified pH as 3.0 – 7.0, while the stability data provided by the firm afterwards contains the limit of pH 5.0 – 6.0. The results of pH at all-time points were within the USP limits.

	Remarks of Evaluator: The firm has submitted stability study data along with required documents as per checklist approved in 251st meeting of Registration Board. Detailsof submitted data are as under: **(Dy.# 17881 dated 15-5-2018)**			

STABILITY STUDY DATA	
Drug	Carlep Tablets 200mg
Name of Manufacturer	M/s Genix Pharma (Pvt) Ltd., 44, 45-B, Korangi Creek Road, Karachi
Manufacturer of API	Ami Lifesciences Pvt. Ltd., Block No. 82/B, ECP Road, AT & Post Karakhadi, Tal Padra, City Karakhadi, District: Vadodara Gujrat State, India.
API Lot No.	ECA/50010117
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 4, 6, 8, 12, 16, 20, 24, 26 (Weeks) Real Time: 0, 1, 2, 3, 4, 6, 8 (Months)		
Batch No.	TR001	TR002	TR003
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	06-2017	06-2017	06-2017
Date of Initiation	10-7-2017	10-7-2017	10-7-2017
No. of Batches	03		
Date of Submission	**Dy.# 17881 dated 15-5-2018**		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	COA of API	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Ami Lifesciences Pvt. Ltd., Block No. 82/B, ECP Road, AT & Post Karakhadi, Tal Padra, City Karakhadi, District: Vadodara Gujrat State, India. Valid till 26-4-2019 issued by Food and Drugs Control Administration Gujrat State India.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Firm has submitted ADC attested commercial invoice dated 24-2-2017confirming import of 3 Kg Eslicarbazepine acetate. The commercial invoice contains the address of head office of the firm.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

Shortcoming communicated	Response by the firm
Justify the partial mode of testing i.e. without dissolution and assay at 1st and 3rd months in real time stability study data of all the three batches.	Firm has submitted that they have performed stability studies as per guidelines of Registration Board. The guidelines of Registration Board in 251st meeting specify weekly testing intervals while firm has used monthly testing intervals and claimed that they are following guidelines of Registration Board.
Justify the specifications of dissolution (i.e. NLT 80% of the labeled amount in 45 minutes) submitted under finished product specification, since the reference product approved by USFDA Aptiom Tablets have updated the dissolution specification for 200	Firm has submitted that as per correspondence document by CDER "*it seems to be unacceptableof dissolution criteria Q at 15 minutes as mentioned*". Firm has also provided a reference link for this data https://www.accessdata.fda.gov/drugsatfda_docs/nda/2013/022416Orig1s000AdminCorres.pdf

mg strength, to a single point **Q*** at 15 minutes since its dissolution profile was not-similar to the appropriate comparator as specified in the executive summary of the chemistry review for NDA 22416 (Ref: https://www.accessdata.fda.gov/drugsatfda_docs/nda/2013/022416Orig1s000ChemR.pdf). For elaboration on the value of **"Q"** FDA in its draft guidance for industry on dissolution testing of immediate release solid oral dosage forms under "setting dissolution specifications" have recommended "for highly soluble and rapidly dissolving drug products (BCS classes 1 and 3), a single-point dissolution test specification of NLT 85% (Q=80%) in 60 minutes or less is sufficient as a routine quality control test for batch-to-batch uniformity" (Ref: https://www.fda.gov/downloads/drugs/guidances/ucm070237.pdf)	As per the details of the reference shared the exact recommendations from FDA is "Your proposal for a dissolution acceptance criterion of Q= at 15 minutes for the 200 mg tablets is not acceptable. Based on the provided data, a dissolution acceptance criterion of Q= at 15 minutes is appropriate. Nevertheless, it must be recognized that some batches may require Stage 2 and, occasionally, Stage 3 testing. Revise you dissolution acceptance criterion for the 200 mg tablets from Q= at 15 minutes to Q at 15 minutes, and submit a revised specifications table for the drug product." Firm has submitted a reference of EDQM http://www.edqm.eu/en/Helpdesk-1683.html?rubrique=801 which specifies that in most of the cases Q can be 75% and overall dissolution limit can be 80% (Q+5). Since the reference product is FDA approved and upon approval the firm will be granted "innovator's specification" therefore the guidelines of FDA should be implemented for this product.

Decision of previous meetings of Registration Board:

Registration Board after thorough discussion decided to reject the stability data on the basis of following reasons:

- Adaptation of dissolution specification NLT 80% of the labeled amount in 45 minutes, while the FDA approved reference product Aptiom tablets have used dissolution specifications NLT 85% in 15 minutes.
- Results of dissolution below 85% in 45 minutes at various time intervals.
- Registration Board further directed the firm to repeat the stability studies as per the recommendations laid down in 278th meeting and finished product specifications as per the approved reference / innovator product. (**M-284)**

Registration Board deferred the above cases of Carlep Tablets 200mg, 400mg and 800mg forfurther deliberation. (**M-286)**

Registration Board after thorough discussion decided to defer the applications of Carlep Tablets 200mg, 400mg and 800mg on the basis of following reasons:

- Adaptation of dissolution specification NLT 80% of the labeled amount in 45 minutes, while theFDA approved reference product Aptiom tablets have used dissolution specifications NLT 85% in45 minutes.
- Results of dissolution below 85% in 45 minutes at various time intervals.(**M-287)**

Firm's Reply:

- Firm has referred tofollowing literature:

i. CDER review of reference product approved by USFDA which declares that BCS class of drug Eslicarbazepine Acetate is not established while Eslicarbazepine Acetate has very low aqueous solubility.

ii. Following text from Section 6.1 (Immediate release dosage forms) of USP chapter <1092> (The Dissolution Procedure; Development and Validation)
"Although release and stability data are collected during dosage form development, it is common to record the entire dissolution profile or the amount of drug dissolved at specified intervals, such as 10, 20, 30, 40, 50, and 60 min or 15, 30, 45, and 60 min. At registration, dissolution for an immediate-release tablet usually becomes a single-point test. The acceptance criterion and test time are established by evaluating the dissolution profile data. The acceptance criterion for a dissolution test is a function of Q, which Is expressed as a percentage of label claim of drug dissolved at a specified time. Typical Q values are in the range of 75%-80% dissolved. Q values in excess of 80% are not generally used because allowance needs to be made for assay and content uniformity ranges."

iii. Following text of a review article titled as "Pharmacokinetics & Drug interactions of Eslicarbazepine acetate":
"Therefore, Eslicarbazepine Acetate is a highly permeable-poorly soluble (BCS class II), drug, whereas Eslicarbazepine is a highly soluble-highly permeable (BCS class I) drug.

- Moreover firm has submitted as under:

a. Practically we performed BCS class identification tests, material does not belong to BCS Class I.
b. Due to low solubility of drug dissolution limit Not less than 80% and as per USP General Chapter, <1092> Q-values in the range of 75% to 80%.

Firm has submitted that they have performed dissolution as per FDA dissolution method and the time point is 45 minutes that was published on 27-8-2015 while the reference stated by PEC was published in 2013, so we followed the later one. On the other hand if any product doesn't include in pharmacopoeia then we generally follow USP<1092>, the acceptance criteria for a dissolution is a function of Q which is expressed as a percentage of labeled of drug dissolved a specific time Q value in range of 75% to 80%.

Decision: Registration Board after thorough discussion decided to reject the application "Carelp Tablet 200mg" on the basis of following reasons:

- **Adaptation of dissolution specification NLT 80% of the labeled amount in 45 minutes, while the FDA approved reference product Aptiom tablets have used dissolution specifications NLT 85% in 15 minutes.**
- **Results of dissolution below 85% in 15 minutes at various time intervals.**

REMARKS OF EVALUATOR

.

Shortcoming communicated	**Response by the firm**
Justify the partial mode of testing i.e. without dissolution and assay at 1st and 3rd months in real time stability study data of all the three batches.	Firm has submitted that they have performed stability studies as per guidelines of Registration Board. The guidelines of Registration Board in 251st meeting specify weekly testing intervals while firm has used monthly testing intervals and claimed that they are following guidelines of Registration Board.
Justify the specifications of dissolution (i.e. NLT 80% of the labeled amount in 45 minutes) submitted under finished product specification, since FDA in its draft guidance for industry on dissolution testing of immediate release solid oral dosage forms under "setting dissolution specifications" have recommended "for highly soluble and rapidly dissolving drug products (BCS classes 1 and 3), a single-point dissolution test specification of NLT 85% (Q=80%) in 60 minutes or less is sufficient as a routine quality control test for batch-to-batch uniformity" (Ref: https://www.fda.gov/downloads/drugs/guidances/ucm070237.pdf).	Firm has submitted a reference of EDQM http://www.edqm.eu/en/Helpdesk-1683.html?rubrique=801 which specifies that in most of the cases Q can be 75% and overall dissolution limit can be 80% (Q+5). Since the reference product is FDA approved and upon approval the firm will be granted "innovator's specification" therefore the guidelines of FDA should be implemented for this product.

Decision of previous meetings of Registration Board:

Registration Board after thorough discussion decided to reject the stability data on the basis of following reasons:

- Adaptation of dissolution specification NLT 80% of the labeled amount in 45 minutes, while the FDA approved reference product Aptiom tablets have used dissolution specifications NLT 85% in 15 minutes.
- Results of dissolution below 85% in 45 minutes at various time intervals.
- Registration Board further directed the firm to repeat the stability studies as per the recommendations laid down in 278th meeting and finished product specifications as per the approved reference / innovator product. (**M-284)**

Registration Board deferred the above cases of Carlep Tablets 200mg, 400mg and 800mg forfurther deliberation. (**M-286)**

Registration Board after thorough discussion decided to defer the applications of Carlep Tablets 200mg, 400mg and 800mg on the basis of following reasons:

- Adaptation of dissolution specification NLT 80% of the labeled amount in 45 minutes, while the FDA approved reference product Aptiom tablets have used dissolution specifications NLT 85% in45 minutes.
- Results of dissolution below 85% in 45 minutes at various time intervals. (**M-287)**

Firm's Reply:

- Firm has referred tofollowing literature:

vii. CDER review of reference product approved by USFDA which declares that BCS class of drug Eslicarbazepine Acetate is not established while Eslicarbazepine Acetate has very low aqueous solubility.

viii. Following text from Section 6.1 (Immediate release dosage forms) of USP chapter <1092> (The Dissolution Procedure; Development and Validation)
"Although release and stability data are collected during dosage form development, it is common to record the entire dissolution profile or the amount of drug dissolved at specified intervals, such as 10, 20, 30, 40, 50, and 60 min or 15, 30, 45, and 60 min. At registration, dissolution for an immediate-release tablet usually becomes a single-point test. The acceptance criterion and test time are established by evaluating the dissolution profile data. The acceptance criterion for a dissolution test is a function of Q, which Is expressed as a percentage of label claim of drug dissolved at a specified time. Typical Q values are in the range of 75%-80% dissolved. Q values in excess of 80% are not generally used because allowance needs to be made for assay and content uniformity ranges."

ix. Following text of a review article titled as "Pharmacokinetics & Drug interactions of Eslicarbazepine acetate":
"Therefore, Eslicarbazepine Acetate is a highly permeable-poorly soluble (BCS class II), drug, whereas Eslicarbazepine is a highly soluble-highly permeable (BCS class I) drug.

- Moreover firm has submitted as under:
  e. Practically we performed BCS class identification tests, material does not belong to BCS Class I.
  f. Due to low solubility of drug dissolution limit Not less than 80% and as per USP General Chapter, <1092> Q-values in the range of 75% to 80%.

Firm has submitted that they have performed dissolution as per FDA dissolution method and the time point is 45 minutes that was published on 27-8-2015 while the reference stated by PEC was published in 2013, so we followed the later one. On the other hand if any product doesn't include in pharmacopoeia then we generally follow USP<1092>, the acceptance criteria for a dissolution is a function of Q which is expressed as a percentage of labeled of drug dissolved a specific time Q value in range of 75% to 80%.

Decision: Registration Board after thorough discussion decided to reject the application "Carelp Tablet 800mg" on the basis of following reasons:

- **Adaptation of dissolution specification NLT 80% of the labeled amount in 45 minutes, while the FDA approved reference product Aptiom tablets have used dissolution specifications NLT 85% in 45 minutes.**
- **Results of dissolution below 85% in 45 minutes at various time intervals.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	COA of API	**Brinzolamide:** Yes
		Brimonidine tartrate: Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	**Brinzolamide:** Firm has submitted copy of GMP certificate issued by AIFA, Italy issued on 15-02-2017
		Brimonidine tartrate: Firm has submitted copy of GMP certificate issued by DCA, Govt. of Telangana, India
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	**Brinzolamide:** Firm has submitted ADC attested invoice dated 31-5-2017 confirming import of 20gm API along with import of 200mg working standard.
		Brimonidine tartrate: Firm has submitted ADC attested invoice dated 20-6-2017 confirming import of 0.1Kg API.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	No
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules,	Yes

	1978.	

REMARKS OF EVALUATOR

Shortcoming communicated	Response by the firm
The stability data sheets of batch 001, 002 and 003 for 6th months accelerated conditions was signed and approved on 15-02-2018 and 16-2-2018 respectively, while the report of sterility test for the same was signed on 28-02-2018. Justify the development and approval of stability data sheets before the results of sterility test.	Firm has submitted that stability sheets were mainly developed for chemical analysis of product, separate stability sheets were filled with sterility completion. Column for sterility will be left blank till completion of sterility and that will fill after completion of sterility. Now we are putting initial with date on product analysis sheet.
Justify the shifting of retention time of brimonidine from 4.054 at 6th month testing to 5.27 at 3rd month testing and brinzolamide from 7.07 at 6th month testing to 6.01 at 3rd month testing and 5.34 at 1st month testing interval.	Firm has submitted that finished product analytical method is not available in any pharmacopoeia it is in-house method. Analytical method was on development stage and now it is fully developed. With the passage of time column efficiency is affected and retention time depends on column efficiency. On every testing frequency standard peak is comparable to sample peak. Minor difference in retention time may appear due to column efficiency.
Justify the formulation containing brimonidine as tartrate 2mg, since the USFDA approved reference product contains brimonidine tartrate 2mg.	Firm has submitted that they have applied for the same formulation i.e. Brimonidine tartrate 2mg. Firm has submitted revised form 5-D. **The initially submitted form 5-D and master formulation contains brimonidine as tartrate 2mg.**
Justify the finished product specification without benzalkonium chloride assay, osmolality, redispersibility and viscosity since all these tests are included in the specifications of the USFDA approved reference product i.e. Simbrinza ophthalmic suspension.	Firm has submitted that USP has not specified test for preservatives in any ophthalmic formulation. Similarly the standard limits for viscosity and redispersibility are not available therefore we will develop our own limits on commercial batches.
Justify the manufacturing of batches of ophthalmic suspension in August 2017, while the Eye / Ear & Nasal drop (General) section was approved by Central licensing Board vide letter No. F.2-12/2010-Lic (Vol-I) dated 11th April 2018.	Firm has submitted that these stability batches were manufactured in R&D solution filling machine under laminar. Before commercial manufacturing pilot batches will be manufactured and will be kept on stability.

Shortcomings after reply:

Shortcoming communicated	Response by the firm
Justify the initiation and completion of stability studies without analytical method validation, since ICH guidelines Q1A(R2): Stability testing of new drug substances and products specify that "*Analytical procedures should be fully validated and stability indicating*".	Firm has submitted analytical method validation data to justify the initiation of stability studies. The data provided by the firm is of January 2018, while the stability studies were initiated in August 2017.
The initially submitted master formulation dated 19-4-2018 contains brimonidine (as tartrate) 2mg, while in the reply you have mentioned that "we have the same formulation and have submitted Form 5-D with correction". Justification is required since the developed formulation on which stability studies are conducted contains brimonidine (as tartrate) 2mg. Further in case of revision of formulation fee needs to be submitted.	Firm has submitted Form 5-D, composition and manufacturing method of correct formulation. The newly submitted formulation contains different formulation as compared to initially applied formulation.
As per ICH guidelines Q6A Specifications: Test Procedures and Acceptance Criteria for New Drug Substances and New Drug Products: Chemical	Firm has once again submitted that USP has not specified test for preservatives in any ophthalmic formulation. Similarly the standard limits for

Substances and Q1A(R2): Stability testing of new drug substances and products, the testing should cover preservative content and the acceptance criteria should remain part of the specification. Further the guidelines specify, for relatively viscous solutions or suspensions, it may be appropriate to include rheological properties (viscosity/specific gravity) in the specification. Justification is required since these tests are not performed at any testing interval.	viscosity and redispersibility are not available therefore we will develop our own limits on commercial batches. Since after approval this product will be given "Innovator's specification" therefore this product should have been tested for all the tests specified by the innovator product.

- Further firm has used LDPE bottles for eye drops which is a semi permeable container. As per ICH guidelines for drug products packaged in semi-permeable containers the testing conditions are:

Study	Storage conditions
Long Term	30°C ± 2°C/35% RH ± 5% RH
Accelerated	40°C ± 2°C/not more than (NMT) 25% RH

Aqueous-based products packaged in semi-permeable containers should be evaluated for potential water loss in addition to physical, chemical, biological, and microbiological stability.

Decision of 284th meeting of RB:

Registration Board after thorough discussion decided to **reject** the stability data on the basis of following reasons:

- Manufacturing of batches of applied formulation i.e. ophthalmic suspension before the approval of relevant section i.e. Eye / Ear & Nasal drops (General) by Licensing Division, DRAP.

Registration Board further directed the firm to repeat the stability studies as per the recommendations laid down in 278th meeting.

Firm has submitted fresh application for the same product on Form 5-D dated 7th December 2018 along with fee PKR 50,000/- dated 7th December 2018. Firm has submitted same stability study data which was previously rejected.

Decision of 287th meeting of Registration:

Deferred for the opinion of Licensing Division upon following:

"Manufacturing of batches of applied formulation i.e. Cream before the approval of relevant section i.e. Eye / Ear & Nasal drops (General) by Licensing Division, DRAP

Evaluation by PEC:

Firm has submitted that "In lieu of the decision (3-4th January 2019, 287th meeting of registration board) made by the Drug Regulatory Authority of Pakistan (DRAP) on Hudson Pharma's application for registration of Combison and Brinzoson Eye Drops, Hudson Pharma would like to place a humble request for a stability audit. The registration section rejected the stability studies on the aforementioned drugs based on the reason that the stability testing was conducted before the approval of relevant section, i.e. Eye / Ear & Nasal drops. However, we could not find the requirement of relevant section approval prior to stability studies approval in any written DRAP regulations. The Copies of our earlier applications along with supporting documents and Board Decision is annexed herewith for your ready reference and convenience.

Being aggrieved by and dissatisfied with the subject decision, we hereby submit the following grounds for review and reconsideration of the Hon'ble Board member:-

DRAP Laws:-

As far as the DRAP Act and Rules are concerned, we have gone through the relevant provisions and found following relevant to our case:

a. Rule 21 of The Drug (Licensing, Registering and Labelling)Rules, 1976

For the sake of convenience, Rule 21 is reproduced as under:-

21. Licence to manufacture drugs for experimental purposes: (1) If a person intending to manufacture a drug for experimental purposes does not hold a licence to manufacture drugs, he shall before commencing such manufacture, apply in Form 3 for the grant or renewal of a licence to the Central Licensing Board addressed to its Secretary.

As we studied Rule 21 of The Drug Rules 1976, we could not find a requirement for section approval even for the manufacture of drugs for experimental purposes in Form 3.

b. Rule 7 / Form 6 of The Drugs (Import & Export) Rules, 1976

Therefore, the only available option we had was to apply under Rule 7 of The Drugs (Import & Export) Rules, 1976. To obtain Form 6 for import of the APIs for Clinical Trail Examination, Test or Analysis.

Here again, there is no requirement of the Section Approval as per law and it only requires a valid Drug Manufacturing License, which was provided and accordingly the license for import of APIs were allowed for the subject purpose.

International Laws and Practices:

In addition to the above, we also conducted a comprehensive research to know about the international pharma industry practices all over the world. The regulatory requirements for the filing of generic drug applications in the USA and EU envisage that stability testing requirements precede the requirements for section approval. According to the USFDA, the ANDA (Abbreviated New Drug Application) flowchart (Fig 1) depicts that preapproval inspection (in DRAP terminology this would equate to a visit for section approval) is assessed only after chemistry, micro and labelling review is approved. Based on the data that we have studied so far, we can establish that among the major regulatory bodies across the globe, stability studies are done prior to receiving section approval. In fact, in the US and EU, there are large Contract Research Organizations (CROs) that provide outsourcing services for chemistry, biological and stability testing of drugs. Furthermore, in most instances in the EU and US, the stability testing and chemistry review is done at the CRO's facilities which implies that the manufacturing facility or section where the commercial product is manufactured will be different than where the stability testing was conducted.

The explosive proliferation of CRO's and contract manufacturing organizations (CMO's) in China and India is clear evidence that developing market regulators prioritize an efficient approval pathway that encourages innovation and enable new treatments to quickly become available to address the unmet needs of their respective local populations. The new drug approval process that is followed by all large regulatory bodies across the globe has a major advantage of allowing the manufacturer to invest in a facility or section after passing stability studies, biological analysis, chemical analysis, and labelling approval. The main advantage is that it de-risks capital expenditures for drug manufacturers allowing for greater investment and innovation.

Therefore, in light of the data that we have gathered, we wish to extend our invitation to visit of our manufacturing facility at the date and time of your convenience to ensure that the stability results, manufacturing section, and overall facility standards meet your requirements for Combison and Brinzoson"

Decision: Registration Board decided to seek comments of Legal Affairs and Licensing Divisions for following clarification:

- **Can manufacturing of trial batches of a product be carried out in a facility which is not yet approved or licensed by Central Licensing Board?**

b. VERIFICATION OF STABILITY STUDY DATA:

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability / Local Availability GMP Inspection Report Date & Remarks

#	Documents To Be Provided	Status
1.	COA of API	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted GMP certificate of M/s Alembic Pharmaceuticals Ltd. Vadodara Gujrat issued by Food and Drug control administration Gujrat state India on 06-09-2018
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Firm has submitted copy of ADC attested invoice dated 12-01-2017 confirming import of 1.5kg Ticagrelor from M/s Alembic Pharmaceuticals Ltd
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

As per FDA chemistry review, four polymorphic forms of ticagrelor have been identified, out of which one form was used in all preclinical and clinical studies since it does not convert to any other form on storage. Verification of the exact polymorphic form of ticagrelor is required.

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Ticor (Ticagrelor) 60mg & 90mg Tablets by M/s The Searle Company Limited, Karachi.

Reference No: F.13-11/2017-PEC (Pt) dated 23rd January, 2019.
Investigation Date and Time: 11th March, 2019. (Forenoon)
Investigation Site: Factory premises of M/s The Searle Company Limited, Karachi.

Background:

Chairman Registration Board considered the applications of M/s. The Searle Company Limited, Karachi for registration of Ticor (Ticagrelor) 60mg & 90mgTabletsand constituted a three-member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct

inspection of the firm and to submit report for further consideration.

"Verification of polymorphic form of Ticagrelor as the FDA chemistry review mentions four polymorphic forms and only one form is not converted into other form on storage"

Composition of Panel:

1. Dr. Rafeeq Alam, Meritorious Professor, Department of Pharmacology, University of Karachi, Karachi, Member Registration Board.
2. Mr. Aslam Shah, Member Registration Board.
3. Dr. Affan Ali Qureshi, Assistant Director, CDL, DRAP, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Details of Investigation:

Q.#	QUESTION	OBSERVATION BY PANEL
1.	Do you have documents confirming the import of Ticagrelor API including approval from DRAP?	The firm has imported Ticagrelor raw material 1.5 Kg from M/s Alembic Pharmaceutical Limited, and got approval from DRAP, Karachi.
2.	What was the rationale behind selecting the particular manufacturer of API?	The firm has implemented proper vendor evaluation system. The rationale for the selection of this manufacturer was availability of GMP certificate from relevant authority, availability of DMF, working standard, stability studies of API.
3.	Do you have documents confirming the import of Ticagrelor reference standard and impurity standards?	The firm has imported working standard along with API consignment. However, impurities testing is done on the basis of RRT.
4.	Do you have certificate of Analysis of the API, reference standards and impurity standards?	The firm has certificates of analysis for API, and working standards provided by Alembic Pharmaceuticals Limited.
5.	Do you have GMP certificate of API manufacturer issued by regulatory authority of country of origin?	GMP certificate of API manufacturer issued by Food and Drug Control Administration, Gujrat State, India.
6.	Do you use API manufacturer method of testing for testing API?	The firm has used API manufacturer's method of analysis for API testing.
7.	Do you have stability studies reports on APIs?	The firm has long term (3 years) and accelerated study (6 month) reports for Ticagrelor provided by Alembic Pharmaceutical Limited.
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing is as per SIM as Impurity profile has been reported in stability study report of Ticagrelor provided by M/S Alembic Pharmaceutical Limited.
9.	Do you have method for quantifying the impurities in the API?	The firm had API manufacturer method for quantification of impurities in the API and the firm had quantified the impurities on the basis of RRT and impurities are under procurement for further confirmation.
10.	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has 0.208 Kg of API Ticagrelor.

11.	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipients i.e. hydroxyl propyl cellolose, Mannitol, Di basic calcium phosphate, sodium starch glycolate, Magnesium stearate.
12.	Do you have documents confirming the import of the used excipients?	The firm has necessary documents confirming the import of the used excipients.
13.	Do you have test reports and other records on the excipients used?	The firm has necessary test reports and other record for the excipients used.
14.	Do you have written and authorized protocols for the development of Ticagrelor Tablets Range?	The firm has written and authorized protocols for the development of Ticagrelor Tablets 90mg & 60mg.
15.	Have you performed Drug-excipient compatibility studies?	The firm has used same excipient as used by the innovator (Brilinta / Brilique of AstraZeneca), therefore, compatibility studies were not performed.
16.	Have you performed comparative dissolution studies?	The firm has performed comparative dissolution studies on Ticagrelor Tablets 90mg against Brilique Tablets 90mg having lot no. TERR and Ticagrelor Tablet 60 mg against Brilinta Tablets 60mg having lot no. KAGN, manufactured by AstraZeneca with comparable results.
17.	Do you have product development (R&D) section.	The firm has dedicated product development (R&D) section with requisite manufacturing & analysis facilities.
18.	Do you have necessary equipment available in product development section for development of Ticagrelor Tablets Range?	The firm has necessary equipment available in product development section for development of the Ticagrelor tablets.
19.	Are the equipment in product development section qualified?	The equipment in product development section are qualified.
20.	Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?	The firm has proper maintenance / calibration / re-qualification program for the equipment used in PD section.
21.	Do you have qualified staff in product development section with proper knowledge and training in product development?	The firm had qualified staff comprising of 24 members in R&D department.
22.	Have you manufactured three stability batches for the stability studies of Ticagrelor Tablets Range required?	The firm has manufactured three stability batches of each strength forstability studies; 1. Ticagrelor Tablets 90mg Batch numbers are 17PD-305, 17PD-306&18PD-010having batch size 2500 tablets each. 2. Ticagrelor Tablets 60mg Batch numbers are 18PD-017, 18PD-018 & 18PD-019 having batch size 2500 tablets each.
23.	Do you have any criteria for fixing the batch size of stability batches?	The firm had informed that their criteria for fixing batch size is based on number of samples required for stability studies for all testing frequencies.
24.	Do you have complete record of production of stability batches?	The firm has complete record of production of stability batches.
25.	Do you have protocols for stability testing of stability batches?	The firm has detailed protocols for stability testing of stability batches.
26.	Do you have developed and validated the method for testing of stability batches?	The firm has developed and validated the method of testing for finished product.
27.	Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?	Not applicable
28.	Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of Ticagrelor Tablets Range and the finished drug?	The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of Ticagrelor Tablets 90mg & 60mg API and the finished drug.

29.	Do your method of analysis stability indicating?	The firm used stability indicating method for the quantification of any impurities and degradation products in the tablets kept on stability testing.
30.	Do your HPLC software 21CFR Compliant?	The HPLC software is 21CFR Compliant as per record available with the firm. The firm has Water's Alliance 2695 with Empower 3 software.
31.	Can you show Audit trail reports on Ticagrelor Tablets Range testing?	Audit trail on the testing reports is available.
32.	Do you have some remaining quantities of degradation products and stability batches?	The firm has remaining quantities of stability batches only.
33.	Do you have stability batches kept on stability testing?	The firm has completed accelerated stability testing on three stability batchesof each strength. Currently 12th month real time stability testing has been completed with satisfactory results.
34.	Do you have valid calibration status for the equipment used in Ticagrelor Tablets Range production and analysis?	The firm has valid calibration status for the equipment used in Ticagrelor Tablet Range for production and analysis.
35.	Do proper and continuous monitoring and control are available for stability chamber?	Firm has software for monitoring of stability chambers.
36.	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Related manufacturing area, equipment, personnel and utilities were GMP compliant.
37.	Any Other query raised by PER Division: Verification of polymorphic form of Ticagrelor as the FDA chemistry review mentions four polymorphic forms and only one form is not converted into other form on storage	The firm has procured polymorphic form II, the same has been confirmed by comparing the XRD results of manufacturer and a patent available WO2013/079589 A1, The API manufacturer has provided declaration of polymorphic form II and they have also obtained market authorization from USFDA conditionally with expiration of patent, which also shows the polymorphic form II is accepted by USFDA.

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Ticor 60mg & 90mg Tablets (Ticagrelor) is verifiable to satisfactory level.
2. The related manufacturing area, equipments, personnel and utilities are compliant and are suited for the manufacturing of Ticor 60mg & 90mg Tablets.

Recommendations:

1. The firm may kindly be granted necessary registration of Ticor 60mg & 90mg tablets.
2. Since Ticagrelor falls in BCS Class IV (Low solubility and low permeability), therefore requires Bioequivalence Studies. Therefore, post-registration bioequivalence studies are also recommended.

Note: The firm has submitted written commitment vide letter No. NIL dated 11th March, 2019 for bioequivalence studies on Ticor tablets

Decision: Registration Board decided to approve registration of "Ticor (Ticagrelor) 60mg & Ticor (Ticagrelor)90mg Tablets with Innovator's specifications by M/s The Searle Company Limited, Karachi. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

Observations	Reply by the firm
Justify the submitted specification of dissolution test under the "finished product specification" specify the limit as NLT 75% (Q+5%), while as per "Guidance for Industry, Dissolution testing of Immediate Release Solid Oral Dosage Forms" issued by USFDA, a single-point dissolution test specification of NLT 85% (Q=80%) in 60 minutes or less is sufficient as a routine quality control test for batch-to-batch uniformity."	The firm has replied that "we have not found any specific guidelines in this regard so we adopted this value i.e. NLT 75% (Q+5%) at 30 minutes. We can change our specification limits to NLT 80% on your suggestion. Firm has further stated that DRAP has already approved same combination with 80% dissolution for some companies.
GMP certificate of the API manufacturer issued by concerned regulatory authority of China, since the submitted copy of GMP certificate is issued by district regulatory authority, while as per Drug Administration Law of the People's Republic of China, Chapter-I General Provisions; Article 5 as discussed in 274th meeting of Registration Board "The drug regulatory department of the people's government at or above the provincial level shall organize inspections of drug manufacturers in accordance with the Good Manufacturing Practice for Pharmaceutical Products (GMP) and the measures and schedule for implementing the GMP formulated by the drug regulatory department under the State Council, and issue a certificate to the manufacturer that complies with the GMP"	Firm has submitted that the supplier of sofosbuvir i.e. M/s Suli Pharmaceutical Technology Jiangyin Co Ltd is our DRAP approved source in case of "Cure-C Tablet". That's why we have used the same source in this product as well. Firm in its later reply submitted that their API was manufactured by Jiangsu Yongda instead of Suli Pharma which is only a supplier in this case. The response of the firm was sent to AD (I&E) Islamabad office for verification of the stance of the firm. AD (I&E) office vide their letter No. F.4-15/2018-I&E/QA&LT dated 15th November 2018 submitted the copies of Form 3, Form 5 and Form 7. Form 5 (License to Import drugs) confirm that the material is manufactured by Suli Pharma China, While Form 3 and Form 7 confirms that the manufacturer is Jiangsu Yongda Pharma, China.

Report on Inspection of Authenticity / Genuineness of data submitted for registration of Velcure Plus (Velpatasvir…..100 mg + Sofosbuvir……400 mg) Tablets by M/s. Global Pharmaceuticals (Pvt.) Ltd., Plot No. 204-205, Industrial Estate Triangle, Kahuta Road, Model Town, Islamabad.

Inspection Date and Time: 08th (Morning) and 27th February 2019 (Afternoon)
Inspection Site: M/s. Global Pharmaceuticals (Pvt.) Ltd., Plot No. 204-205, Industrial Estate Triangle, Kahuta Road, Model Town, Islamabad.

Background:
M/s. Global Pharmaceuticals (Pvt.) Ltd., Plot No. 204-205, Industrial Estate Triangle, Kahuta Road, Model Town, Islamabad applied for registration of Velcure Plus (Velpatasvir…..100 mg + Sofosbuvir……400 mg) Tablets with following composition:

Velcure Plus Tablets
Each film coated tablet contains:-
Sofosbuvir……..400 mg
Velpatasvir copovidone eq. to Velpatasvir……...100 mg

Chairman Registration Board constituted following three member panel for on-site investigation to confirm the genuineness/authenticity of submitted stability data and associated documents, import of API, quality, specification, test analysis, facilities etc. Panel was requested to conduct inspection of the firm to verify the submitted data by the firm and to submit a report on approved format for further consideration of case by the Registration Board.

Composition of Panel:
1. Additional Director, QA & LT, DRAP, Islamabad.
2. Area FID, Islamabad.
3. Mr. Arsalan Tariq, Assistant Director, QA & LT, DRAP, Islamabad.

Scope of Inspection:
On-site investigation to confirm the genuineness/authenticity of submitted stability data and associated documents, import of API, quality, specification, test analysis, facilities.

Tools for Inspection:
The Inspection was conducted by using a structured questionnaire approved by DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of findings/verification inspection are summarized as under:

Detail of Inspection:

Q. No.	Question	Observation by panel
1.	Do you have documents confirming the import of API including approval from DRAP?	**Sofosbuvir** Invoice Number: **17SLZY023** ADC attestation date: **19.06.2017** Exporter: M/s Suli Pharmaceuticals Technology Jiangyin Co. LTD. No.2 Runhua Raod Harbour Economic Development District, Jiangyin Jiangsu Province, China 214444. Manufacturer: M/s Jiangsu Yongda Pharmaceutical Co. Ltd. No.05 Guangqu Road, New North Area, Changzhou, Jiangsu, China, 213001. Batch No. SLZY059 Manufacturing Date: 29.04.2017 Retest Date: 28.04.2018 Quantity: 100 kg (The quantity was already in use in manufacturing of commercial batches of registered product Cure-C (Sofosbuvir) 400 mg Tablet). **Velpatasvir Copovidone** Invoice Number: **CY117070** ADC attestation date: **21-04-2017** Exporter: M/s Changzhou Pharmaceutical Factory., 518 Laodong, East road, Changzhou Jiangsu Province, China Manufacturer: M/s Nantong Chanyoo Pharmatect Co. Ltd. China No. 2, Tonghai Si Road, Yangkou Chemical Industrial Park, Rudong Coastal

<table>
<tr><td></td><td></td><td>Economic Development Zone, Nantong, Jiangsu Province 226407, P.R. China
Batch No. 201703002
Mfg. Date: 16-03-2017
Exp. Date: 15-03-2018
Quantity: 01kg</td></tr>
<tr><td>2.</td><td>What was the rationale behind selecting the particular manufacturer of API?</td><td>Sofosbuvir
The firm has submitted that M/s Jiangsu Yongda Pharmaceutical Co. Ltd. is their regular supplier and has Valid GMP; Client List of API manufacture contains International and Local clients, Stability Data (Accelerated and Real Time).
Velpatasvir Copovidone
The firm has submitted a comparison sheet showing different parameters to compare among 3 different sources API. M/S Nantong was selected on the basis of Valid GMP, good impurity profile, previous history of Antiviral manufacturing and good Client List of API manufacture contains International and Local client. The firm has already used the “Daclatasvir” from the same suppliers.
The selection of vendor was discussed in detail in the light of GMP guidelines and firm was advised to devise an S.O.P for the purpose. There should be a detailed report/study for such prequalification studies.</td></tr>
<tr><td>3.</td><td>Do you have documents confirming the import of Sofosbuvir and velpatasvir copovidone reference standard and impurity standards?</td><td>The firm imported following reference standards:
Sofosbuvir:
<table>
<tr><th>Name of product</th><th>Source</th><th>Batch No.</th><th>Quantity</th><th>Invoice No.</th><th>Mfg. date</th><th>Exp. date</th></tr>
<tr><td>Impurity Standard SFBA-1</td><td>M/s Suli Pharmaceutical Technology via Nimbus Chemtech</td><td>SLZY059B-1701001</td><td>1 gm</td><td>-</td><td>24.05.17</td><td>24.05.18</td></tr>
</table>
The firm has developed tertiary working standard of Sofosbuvir from secondary standards B.No.WS59-141001-Form6 provided by the Manufacturer/source for Sofosbuvir.
Velpatasvir Copovidone:
Firm has imported Working Standard and impurities as per details below:
<table>
<tr><th>Name of product</th><th>Source</th><th>Batch No.</th><th>Quantity</th><th>Invoice No.</th><th>Mfg. date</th><th>Exp. date</th></tr>
<tr><td>Velpatasvir Working Standard</td><td>M/s Nantong Chanyoo Pharmatect Co. Ltd. China via Changzhou Pharmaceutical, Factory, China.</td><td>WS2016100 01</td><td>1 gm</td><td>CY117070A</td><td>15.10.16</td><td>14.1017</td></tr>
<tr><td>Dihydrogen of VLP</td><td>As above</td><td>WVLP0161101</td><td>100 mg</td><td>As above</td><td>10.11.16</td><td>09.1117</td></tr>
<tr><td>VLP-10</td><td>As above</td><td>WVLP04161201</td><td>100 mg</td><td>As above</td><td>05.12.16</td><td>04.1217</td></tr>

<tr><td>4.</td><td>Do you have certificate of Analysis of the API, reference standards and impurity standards?</td><td>The firm has submitted COAs of following drugs (APIs)/materials of source as mentioned below:
Sofosbuvir
✓ Sofosubuvir (API) B.No.SLZY059-Form6-17060101
✓ Sofosubuvir reference standard B.No.WS59-141001-Form6
✓ Impurity Standard SFBA-1 from the Source/Manufacturer (Batch No. SLZY059B-1701001).
Velpatasvir Copovidone
✓ Velpatasvir Copovidone (API)
✓ Velpatasvir Working Standard from the Source/Manufacturer
✓ Impurity Standard Dihydrogen of VLP
✓ Impurity Standard VLP-10
✓ Impurity Standard VLP-11
✓ Impurity Standard VLP-C</td></tr>
<tr><td>5.</td><td>Do you have GMP certificate of API manufacturer issued by regulatory authority of country of origin?</td><td>Sofosbuvir
The firm has submitted copy of GMP certificate No: JS20150406 in the name of Manufacturer that is “M/s Jiangsu Yongda Pharmaceutical Co. Ltd. No.05 Gangqu Road, chunjiang town, New North Area, Changzhou, Jiangsu, China,” of <u>Sofosbuvir</u> by the Certifying Authority of “Jiangsu Food & Drugs Administration, China.”
Issued on: 30-03-2015
Valid upto: 29-03-2020
<u>Velpatasvir Copovidone</u>
The firm has submitted copy of GMP certificate No: 2017006 in the name of Manufacturer that is “M/s Nantong Chanyoo Pharmatech Co. Ltd. No. 2, Tonghai Si Road, Yangkou Chemical Industrial Park, Rudong Coastal Econimic Development Zone, Nantong, Jiangsu Province 226407, P.R. China for source of <u>Velpatasvir Copovidone</u> by the Certifying Authority of “Nantong Food & Drugs Administration (China)”
Issued on: 08-09-2017
Valid upto: 07-09-2020</td></tr>
<tr><td>6.</td><td>Do you use API manufacturer method of testing for testing API?</td><td>The firm has used method of testing for testing API Sofosbuvir & Velpatasvir Copovidone provided from their respective manufacturers.</td></tr>
</table>

<table>
<tr><td>7.</td><td>Do you have stability studies reports on API?</td><td>Sofosbuvir:
Firm has submitted data of accelerated stability studies data of three batches SLZY059-150102-Form 6 (Mfg.: 08th Feb, 2015), SLZY059-150401-Form 6 (Mfg: 04th Apr, 2015), & SLZY059-150501-Form 6 (Mfg:01st June, 2015), up to 6 months and for real time data up to 36 month, conducted by the API manufacturer “M/s Suli Pharmaceuticals Technology Jiangyin Co. LTD. No.2 Runhua Raod Harbour Economic Development District, Jiangyin Jiangsu Province, China 214444 for API namely Sofosbuvir .The data submitted by the API manufacturers lies within the limits for the assay, water & impurities.
<u>Velpatasvir Copovidone:</u>
Firm has submitted data of three batches 201611001 (Mfg.: 07th Nov, 2016), 201611002 (Mfg.: 15th Nov, 2016), & 201611003 (Mfg.: 23rd Nov, 2016), for accelerated stability studies up to 6 months and for real time data up to 24 month, conducted by the API manufacturer “M/s Nantong Chanyoo Pharmatech Co. Ltd. China No. 2, Tonghai Si Road, Yangkou Chemical Industrial Park, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, P.R. China for API namely <u>Velpatasvir Copovidone.</u>The data submitted by the API manufacturers lies within the limits for the Assay water & impurities.</td></tr>
<tr><td>8.</td><td>If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?</td><td>The firm has submitted the stability testing studies of the API the determination of impurities, degradation products (as per definition of SIM).</td></tr>
<tr><td>9.</td><td>Do you have method for quantifying the impurities in the API?</td><td>The firm stated that they have used the vendor provided methods for quantifying the impurities in the API Sofosubvir and velpatasvir.</td></tr>
<tr><td>10.</td><td>Do you have some remaining quantities of the API, its reference standard and impurities standards?</td><td>The firm has submitted remaining quantities of the API, reference standard and impurities standards as per details below:
<table>
<tr><th>S#</th><th>Entity Name</th><th>Batch No.</th><th>Received amount (approx.)</th><th>Consumption Details</th><th>Consumed amount (approx.)</th><th>Remaining amount (approx.)</th></tr>
<tr><td rowspan="2">1</td><td rowspan="2">Velpatasvir copovidone</td><td rowspan="2">201703002</td><td rowspan="2">1kg</td><td>Raw material Testing

</table></td></tr>
<tr><td>11.</td><td>Have you used pharmaceutical grade excipients?</td><td>The firm has used pharmaceutical grade excipients as indicated from the COAs submitted by firm.</td></tr>
</table>

<table>
<tr><td>12.</td><td>Do you have documents confirming the import of the used excipients?</td><td>The firm purchased the excipients used in the applied formulation from local suppliers as per details below:
<table>
<tr><th>S.No</th><th>ITEM NAME</th><th>PHARMACOLGOCAL NATURE</th></tr>
<tr><td>1</td><td>Avicel 102</td><td>Excipient</td></tr>
<tr><td>2</td><td>Crosscarmellose Sodium</td><td>Excipient</td></tr>
<tr><td>3</td><td>Magnesium Stearate</td><td>Excipient</td></tr>
<tr><td>4</td><td>Tabcoat white</td><td>Excipient</td></tr>
<tr><td>5</td><td>Tabcoat orange</td><td>Excipient</td></tr>
</table></td></tr>
<tr><td>13.</td><td>Do you have test reports and other records on the excipients used?</td><td>The firm has performed tests on above mentioned excipients and hence has test reports and other records on the excipients used.</td></tr>
<tr><td>14.</td><td>Do you have written and authorized protocols for the development of Velcure Plus tablets 400/100mg (<u>Velpatasvir + Sofosbuvir)</u>?</td><td>The firm has written and authorized protocols for the development of Velcure Plus Tablet. But submitted documented was not in accordance with ICH Q-8 which actually pertains to Pharmaceutical Development. The firm was advised to improve the submitted protocol in the light of said document.</td></tr>
<tr><td>15.</td><td>Have you performed Drug-excipients compatibility studies?</td><td>The firm has not performed Drug-Excipients compatibility studies as their formulation (API & Excipients) is similar/comparable to that of the EPCLUSA Tablet approved by EMA.</td></tr>
<tr><td>16.</td><td>Have you performed comparative dissolution studies?</td><td>The firm has performed comparative dissolution studies against the EPCLUSA Tablet (B# YPPGD1) approved by EMA. However, the studies seem improvement for example the firm has used 6 units for both test and reference products instead of 12 as recommended in USFDA Guidance for Industry: Dissolution testing of immediate release solid oral dosage form.</td></tr>
<tr><td>17.</td><td>Do you have product development (R&D) section</td><td>The firm possesses an approved Research & Development (R&D) and Validation Department for product development studies.</td></tr>
<tr><td>18.</td><td>Do you have necessary equipment available in product development section for development of Velcure Plus tablets?</td><td>The firm has following necessary equipment in R & D section though for the development of Velcure Plus Tablet.

<tr><td>22.</td><td>Have you manufactured three stability batches for the stability studies of Velcue Plus tablets?</td><td>The firm has manufactured following three stability batches for the stability studies of Velcure Plus Tablet:
<table>
<tr><th>S. No.</th><th>Stability Batchs</th><th>Batch Sizes</th></tr>
<tr><td>a.</td><td>T-035Q</td><td>1500 tablets</td></tr>
<tr><td>b.</td><td>T-036Q</td><td>1500 tablets</td></tr>
<tr><td>c.</td><td>T-037Q</td><td>1500 tablets</td></tr>
</table></td></tr>
<tr><td>23.</td><td>Do you have any criteria for fixing the batch size of stability batches?</td><td>The firm has set the criteria for fixing the batch size of stability batches as/& derived the quantity sufficient for the studies both in accelerated and real time studies to cover all testing time points as per details below:
<table>
<tr><th>S#</th><th>Batch Sizes</th><th>Tablets for real time studies</th><th>Tablets for accelerated studies</th><th>Total packs per batch required</th></tr>
<tr><td>a</td><td>1500 tablets</td><td>448 Tablets
OR
16 Packs</td><td>336 Tablets
OR
12 Packs</td><td>784 Tablets
OR
28 Packs</td></tr>
</table>
Batch size = 1500 Tablets, Pack Size 28’S</td></tr>
<tr><td>24.</td><td>Do you have complete record of production of stability batches?</td><td>The firm has complete record of production of stability batches. Starting from Raw Material manufacturing order sheet assuring the traceability of manufacturing and analysis of all the three stability batches.</td></tr>
<tr><td>25.</td><td>Do you have protocols for stability testing of stability batches?</td><td>The firm has controlled protocol for testing of stability batches of applied formulation at 30 $C^{o}\pm$ 2 C^{o} & 65 % RH $\pm$ 5 % with them for real time studies and at 40 $C^{o}\pm$ 2 C^{o} & 75 % RH $\pm$ 5 % for accelerated studies.</td></tr>
<tr><td>26.</td><td>Do you have developed and validated the method for testing of stability batches?</td><td>The firm has used Pharmacopoeial (B.P) method for testing of finished drug in their stability studies. The firm has also submitted a report verifying the validation studies of the analytical method covering following parameters of validation:
i. Specificity
ii. Precision
a. Repeatability
b. Intermediate Precision
iii. Accuracy
iv. Linearity
v. Robustness
vi. System Suitability
vii. Limit of Quantification/Detection
viii. Range
Remarks: The firm has started initial testing of samples placed on stability on 04.08.2017 while the validation of testing method performed on 17.07.2017.</td></tr>
</table>

<table>
<tr><td>27.</td><td>Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?</td><td>The firm has not conducted method transfer studies. According to the firm since their analytical method is developed by them hence no method transfer studies are required.</td></tr>
<tr><td>28.</td><td>Do you have documents confirming the qualifications of equipment /instruments being used in the test and analysis of APIs and the finished drug</td><td>The firm showed documents confirming the qualification of equipment / instruments being used in the test and analysis of APIs and the finished drug.</td></tr>
<tr><td>29.</td><td>Do your method of analysis stability indicating?</td><td>The firm’s method of testing is stability indicating for stability testing of their finished product, the data sheet submitted by firm verifies the testing of impurity on samples kept on stability studies. The firm has conducted impurity testing at one time at 6th month time point it was discussed to conduct the impurity testing at initial and end time point (i.e., at 0 and 6) to get an exact verification of impurity profiling/level.</td></tr>
<tr><td>30.</td><td>Do your HPLC software is 21CFR compliant?</td><td>Firm has 1 HPLC dedicated for R&D testing at the time of studies conducted (now they have 2) and is 21 CFR II compliant. This HPLC system is used for stability studies of Velcure Plus Tablet. The HPLC used for the stability studies is 21-CFR compliant. However, the record from logbooks, analytical test reports was randomly found verifiable onsite. A complete trail of such testing was available and verifiable.</td></tr>
<tr><td>31.</td><td>Can you show Audit Trail reports on Velcure Plus tablets testing?</td><td>A complete trail of such testing was found available and verifiable from log books, analytical test reports and software of HPLC as well.</td></tr>
<tr><td>32.</td><td>Do you have some remaining quantities of degradation products and stability batches?</td><td>The firm has remaining quantities of stability batches as per following details:
<table>
<tr><th>S#</th><th>Batch No.</th><th>Total Packs</th><th>Samples for accelerated studies</th><th>Samples for Real Time studies</th><th>Remaining Packs</th></tr>

<tr><td>33.</td><td>Do you have stability batches kept on stability testing?</td><td>The firm has completed the accelerated stability testing on the three stability batches of Velcure Plus Tablet. Also the firm has completed the real time stability testing up to 18 months on all three batches.</td></tr>
<tr><td>34.</td><td>Do you have valid calibration status for the equipments used in production in analysis?</td><td>The firm has valid calibration status for the equipment used in Velcure Plus Tablet production and analysis as per record available during onsite visit.</td></tr>
<tr><td>35.</td><td>Do proper and continuous monitoring and control are available for stability chamber?</td><td>Continuous power supply and monitoring with back up from generator and UPS are available for stability chamber to address the problem of interrupted power supply or load shedding. Portable digital data loggers are available for continuous monitoring of temperature and humidity conditions of stability chamber. The firm submitted date-wise data for every next hour of temperature and humidity conditions of stability chambers used for accelerated and real time studies.</td></tr>
<tr><td>36.</td><td>Do related manufacturing</td><td>The related manufacturing area, equipment, personnel and utilities are rated</td></tr>
</table>

	area, equipment, personnel and utilities be rated as GMP compliant?	as GMP compliant.

Conclusions & Recommendations:

1. On the basis of risk based approach the genuineness / authenticity of stability data submitted by the firm for registration of Velcure Plus tablets is verifiable to a satisfactory level.

2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and suitable for the manufacturing of Velcure Plus tablets, therefore, the panel recommends the registration of Velcure Plus tablets in the name of the manufacturer.

Decision: Registration Board decided to approve registration of "Velcure Plus Tablets" with Innovator's specifications by M/s Global Pharmaceuticals (Pvt) Ltd., Plot # 204-205, Industrial Triangle Kahuta Road, Islamabad. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability / Local Availability GMP Inspection Report Date & Remarks
478.	M/s. TITLIS Pharma 528-A Sundar Industrial Estate, Lahore	Delanso Capsule 30mg Each capsule contains: Enteric coated pellets of Dexlansoprazole …30 mg (Proton pump inhibitor)	Form 5-D Dy. No. 196 15-09-2014 PKR 50,000/- 10's: As per brand leader	DEXILANT 30mg Delayed release Capsule USFDA approved
		Delanso Capsule 60mg Each capsule contains: Enteric coated pellets of Dexlansoprazole …60 mg (Proton pump inhibitor)	Form 5-D Dy. No. 201 15-09-2014 PKR 50,000/- 10's: As per brand leader	DEXILANT 60mg Delayed release Capsule USFDA approved

Remarks of Evaluator:

M/s Titlis Pharma had initially submitted stability data for above applied formulations by using pellets from M/s. Lee Pharma Ltd. India, but in 276th meeting of Registration Board the representative of M/s. Titlis Pharma, Lahore, appeared and apprised the Board that the pellets used in stability batches do not possess dual delayed release profile so they will perform and submit new stability studies with different source of pellets. Hence Board acceded with request of M/s Titlis Pharma and directed to submit new stability data using pellets of dual delayed release profile as per reference product.

Now recently firm had submitted new stability data by using pellets from M/s Vision Pharmaceuticals, Islamabad, which was evaluated and proceeded for the onsite inspection.

Report on Inspection of Authenticity / Genuineness of data submitted for registration of Delanso Capsules 30mg & Delanso capsules 60mg by M/s Titlis Pharmaceuticals Lahore.

Inspection Date and Time: 02nd May, 2019
Inspection Site: M/s. Titlis Pharma, 528-A, Sunder Industrial Estate, Lahore.

Composition of Panel:

1. Mr. Shafiq-ur-Rehman (Director DTL, Lahore)
2. Miss Ufaq Tanveer Butt (FID, DRAP, Lahore)
3. Miss Maham Misbah. (Assistant Director, DRAP, Lahore)

Product: DELANSO 30mg & 60mg Capsules
Firm: M/s Titlis Pharmaceuticals Lahore

Q.#	QUESTION	OBSERVATION BY PANEL
1.	Do you have documents confirming the import API including approval from DRAP?	The firm has not imported the API. Rather, the firm has procured 1 kg Dexlansoprazole DDR pellets locally from M/s Vision Pharmaceuticals, Islamabad, having Batch number DLP240T vide Invoice No.VP0001 dated May 03, 2018.
2.	What was the rationale behind selecting the particular manufacturer of API?	Previously, firm had conducted stability studies using pellets from another source (M/s. Lee Pharma India). During personal hearing, M/s Titlis Pharma had apprised the Drug Registration Board in its 276th meeting that the pellets used in stability batches did not possess dual delayed release profile. The board had directed M/s Titlis Pharma to submit new stability data using pellets of dual delayed release profile as per reference product (Dexilant capsules of M/s Takeda Pharma). Selection of the manufacturer is also based upon its GMP,ISO 9001: 2015, 17025, 14001, PNAC Certification and already Approved DRAP source. Eight companies have obtained registration approval with source Vision Pharmaceuticals Islamabad.
3.	Do you have documents confirming the import of API reference standard and impurity standards?	No reference standard and impurity standards were available. But the Firm had procured working standard of API from Vision Pharmaceuticals Islamabad.
4.	Do you have certificate of Analysis of the API, reference standards and impurity standards?	The Firm had certificate of analysis of API and Working standard of API.
5.	Do you have GMP certificate of APIs manufacturer issued by regulatory authority of country of origin?	Yes, The Firm had cGMP Certificate of API's manufacturer (M/s Vision Pharmaceuticals, Islamabad) issued by Drug Regulatory Authority of Pakistan.
6.	Do you use APIs manufacturer method of testing for testing APIs?	Yes, The Firm is using manufacturer method for testing of Dexlanoprazole DDR pellets.
7.	Do you have stability studies reports on API?	Yes, Thefirm has six month accelerated and 36 months real time stability studies report of API.
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	Yes, The stability testing has been performed as per SIM method and degradation products have been quantified. Degradation Products are Sulphones & Sulphides. Total Impurity: NMT 2% (Total Impurity Identified 1.06%)
9.	Do you have method for quantifying the impurities in the API?	Yes, The Firm had the method for quantifying the impurities in the API by normalization method.
10.	Do you have some remaining quantities of the API, its reference standard and impurities standards?	Yes, The Firm had remaining quantities of API and working standard of API.
11.	Have you used pharmaceutical grade excipients?	Not Applicable; Only encapsulation of ready to fill pellets is being performed.
12.	Do you have documents confirming the import of the used excipient?	Not Applicable; Only encapsulation of ready to fill pellets has been performed.
13.	Do you have test reports and other records on the excipients used?	Not Applicable; Only encapsulation of ready to fill pellets has been performed.
14.	Do you have written and authorized protocols for the development of Dexlansoprazole DDR 30mg Capsules?	Yes, The Firm had written and authorized protocols for the development of DELANSO (Dexlansoprazole) Capsules 30mg and 60mg.
15.	Have you performed Drug-excipients compatibility studies?	Not Applicable; Only encapsulation of ready to fill pellets has been performed.
16.	Have you performed comparative dissolution	Yes, The Firm had performed comparative dissolution

<table>
<tr><td></td><td>studies?</td><td>studies with DEXILANT Capsules 30mg and 60mg manufactured by M/s Tekeda Pharmaceuticals Limited (Japan). However, the firm used six vessel dissolution apparatus (Type II, Model of DS-2013 and Make by Curio Pakistan).
The firm was advised to purchase twelve vessel dissolution apparatus for performing comparative dissolution studies.
The firm was testing Dual Delay Release Profile by testing the dissolution of the pellets at pH 5.5 and at pH 7</td></tr>
<tr><td>17.</td><td>Do you have product development (R&D) section</td><td>Yes, The firm had product development (R&D) section for product development,manufacturing& testing facilities for trial batches.</td></tr>
<tr><td>18.</td><td>Do you have necessary equipment available in product development section for development of Dexlansoprazole DDR 30mg Capsules?</td><td>The firm used automatic capsule filling machine of production area (Model: NJP 800) for manufacturing of trial batches. Dedsuster was built in the machine. The Capsule Polisher (Model HJP-C- Model 150) was available for capsule polishing. Firm was advised to purchase metal detector.</td></tr>
<tr><td>19.</td><td>Are the equipments in product development section qualified?</td><td>Yes, All the equipments used in production &testing of Delanso 30mg are qualified.</td></tr>
<tr><td>20.</td><td>Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?</td><td>Yes, The firm had proper maintenance & calibration Plan for the equipment used in Product Development. (Plan Attached)</td></tr>
<tr><td>21.</td><td>Do you have qualified staff in product development section with proper knowledge and training in product development?</td><td>Yes, The firm had qualified staff with suitable knowledge and training in product development. (Organogram Attached)</td></tr>
<tr><td>22.</td><td>Have you manufactured three stability batches for the stability studies of Dexlansoprazole DDR 30mg capsules as required?</td><td>The firm have manufactured three stability batches for the stability studies with following details:
<table>
<tr><th>Batch #</th><th>Mfg date</th><th>Batch size</th></tr>
<tr><td colspan="3">Delanso 30mg Capsules</td></tr>
<tr><td>T-050</td><td>MAY – 2018</td><td>500 Capsules</td></tr>

<table>
<tr><th>Batch #</th><th>Mfg date</th><th>Batch size</th></tr>
<tr><td colspan="3">Delanso 60mg Capsules</td></tr>
<tr><td>T-053</td><td>MAY – 2018</td><td>500 Capsules</td></tr>
<tr><td>T-054</td><td>MAY – 2018</td><td>500 Capsules</td></tr>
<tr><td>T-055</td><td>MAY – 2018</td><td>500 Capsules</td></tr>
</table>
The capsules are packed in blisters Alu/Alu foil with pack size of 2×7's.</td></tr>
<tr><td>23.</td><td>Do you have any criteria for fixing the batch size of stability batches?</td><td>The criteria for fixing the batch size of stability batches are based upon the number of Capsules per testing and testing frequencies.</td></tr>
<tr><td>24.</td><td>Do you have complete record of production of stability batches?</td><td>Yes, The firm had complete record of production of stability batches.</td></tr>
<tr><td>25.</td><td>Do you have protocols for stability testing of stability batches?</td><td>Yes, The firm had protocols for stability testing of stability batches.</td></tr>
<tr><td>26.</td><td>Do you have developed and validated the method for testing of stability batches?</td><td>The firm had validated method for the testing of Delanso 30mg and 60mg Capsules.</td></tr>
<tr><td>27.</td><td>Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?</td><td>The firm is using manufacturer method of testing, and has validated the method of testing.</td></tr>
</table>

<table>
<tr><td>28.</td><td>Do you have documents confirming the qualification of equipments / instruments being used in the test and analysis of API and the finished drug?</td><td>Yes, The firm had documents confirming the qualification of equipment / instruments being used in the test and analysis of API and the finished drug.</td></tr>
<tr><td>29.</td><td>Does your method of analysis stability indicating?</td><td>Yes, The method of analysis is stability Indicating for testing of finished products.</td></tr>
<tr><td>30.</td><td>Do your HPLC software 21CFR Compliant?</td><td>The firm have quaternary gradient HPLC (Shimadzu; Model: LC20AT); with time and date locked but it is not 21CFR Compliant.</td></tr>
<tr><td>31.</td><td>Can you show Audit trail reports?</td><td>Yes, The firm had shown the Audit trail reports.</td></tr>
<tr><td>32.</td><td>Do you have some remaining quantities of degradation products and stability batches?</td><td>Yes, The firm had remaining quantities of stability batches placed in stability chamber for ongoing stability studies. Remaining Quantities as follows:
<table>
<tr><th>Batch #</th><th>Retaining Samples</th><th>For ongoing stability Studies</th></tr>
<tr><td colspan="3">Delanso 30mg Capsules</td></tr>
<tr><td>T-050</td><td>84 Capsules</td><td>133 Capsules</td></tr>
<tr><td>T-051</td><td>70 Capsules</td><td>133 Capsules</td></tr>
<tr><td>T-052</td><td>84 Capsules</td><td>133 Capsules</td></tr>
</table>
<table>
<tr><th>Batch #</th><th>Retaining Samples</th><th>For ongoing stability Studies</th></tr>
<tr><td colspan="3">Delanso 60mg Capsules</td></tr>
<tr><td>T-053</td><td>84 Capsules</td><td>133 Capsules</td></tr>
<tr><td>T-054</td><td>84 Capsules</td><td>133 Capsules</td></tr>
<tr><td>T-055</td><td>70 Capsules</td><td>133 Capsules</td></tr>
</table></td></tr>
<tr><td>33.</td><td>Do you have stability batches kept on stability testing?</td><td>Yes, The firm had completed the accelerated stability studies and kept all the three laboratory scale batches of Delanso 30mg and 60mg capsules for long term stability studies.
There were two Stability Chambers with following details:
<u>Stability Chamber No 1 ; for Long Run Studies</u>
Make: Galvano Scientific
Capacity: 400 Liters
Temperature: 30 +- 2C & 65 % RH
<u>Stability Chamber No 2 ; for Accelerated Studies</u>
Make: Dawn Analytical
Capacity: 400 Liters
Temperature: 40 +- 2C & 75 % RH</td></tr>
<tr><td>34.</td><td>Do you have valid calibration status for the equipments used in Dexlansoprazole DDR 30mg Capsules production and analysis?</td><td>Yes, The firm had valid calibration status for the equipment used in Delanso 30mg and 60mg Capsules production and analysis.</td></tr>
<tr><td>35.</td><td>Do proper and continuous monitoring and control are available for stability chamber?</td><td>Power backup by UPS & 200kv Generator was available. Digital data logger was not installed for continuous monitoring and control of stability chambers. Storage conditions were being recorded thrice daily manually.</td></tr>
<tr><td>36.</td><td>Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?</td><td>Yes, The related manufacturing area, equipment, personnel and utilities are GMP compliant (GMP Certificate No.138/2018–DRAP (AD-709919-530) Valid till 11-07-2019.</td></tr>
</table>

Conclusion:-

On the basis of risk-bassed approach, the genuiniess/authenticity of stability data submitted for registration of Delanso 30mg capsules (Dexlansoprazole 30mg) and Delanso 60mg capsules (Dexlansoprazole 60mg) is verifiable to satisfactory level and it seems that M/s Titlis Pharma had performed stability studies.

Related manufacturing area, equipment, personnel and utilities are also rated as GMP compliant to satisfactory level.
Decision: Registration Board decided to approve registration of "Delanso 30mg capsules (Dexlansoprazole 30mg) and Delanso 60mg capsules (Dexlansoprazole 60mg)" with Innovator's specifications by M/s Titlis Pharma. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr.#	Documents To Be Provided	Status
1.	COA of API.	Yes

2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Jiangsu Yongan Pharmaceutical Co. Ltd., China issued by CFDA, China. The certificate is valid till 03-03-2021.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Firm has submitted ADC attested invoice confirming import of 1 Kg Apixaban from M/s Jiangsu Yongan Pharmaceutical Co. Ltd., China dated 28-12-2017 for Batch No. 20171127
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product for Arcox (Etoricoxib) Tablets 90mg & 120mg on 17th September, 2018 and was presented in 286th meeting of Registration Board held on 14 – 16th November, 2018. Registration approved the case and the inspection report confirmed following points • The HPLC software is 21CFR Compliant as per recordavailable with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for • Stability chamber. Chambers are controlled and monitoredthrough software having alarm system for alerts as well.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted ADC attested invoice confirming import of 1 Kg Apixaban from M/s Jiangsu Yongan Pharmaceutical Co. Ltd., China dated 28-12-2017 for Batch No. 20171127
3.	Documents for the procurement of reference standard and impurity standards.	The firm has submitted that they have procured reference standards from the API manufacturer in September 2017 through courier. Firm has also submitted copy of invoice. Documents for procurement of impurity standards is not submitted.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Jiangsu Yongan Pharmaceutical Co. Ltd., China issued by CFDA, China. The certificate is valid till 03-03-2021. The certificate has been verified from SFDA website.
5.	Mechanism for Vendor pre-qualification	Firm has submitted copy of vendor evaluation report of Apixaban.

6.	Certificate of analysis of the API, reference standards and impurity standards	Firm has submitted copy of COA of API and reference standard.
7.	Documents for the procurement of excipients used in product development?	The firm has submitted documents for procurement of excipients used in the formulation of applied product.
8.	List of qualified staff involved in product development with relevant experience.	The firm has submitted List of qualified staff involved in R&D department.
	Production Data	
9.	Authorized Protocols/SOP for the development & stability testing of trial batches.	The firm has submitted copy of product design and development SOP's.
10.	Complete batch manufacturing record of three stability batches.	The firm has submitted copy of Batch Manufacturing Records of all the three Batches
11.	Record of remaining quantities of stability batches.	Firm has provided following remaining quantities for each batch: 429DS02 : 540 Tablets 429DS03 : 540 Tablets 429DS04 : 540 Tablets
	QA / QC DATA	
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted copies of data logger record for stability chambers with real time and accelerated stability testing
13.	Method used for analysis of API along with COA.	The firm has submitted copy of Raw Material Specifications, Raw Material Testing Procedures along with COA.
14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	The firm has submitted copy of Finished Product Testing Procedure and specification.
15.	Reports of stability studies of API from manufacturer.	The firm has submitted stability study data of 3 batches of API as per the conditions of Zone IV-A.
16.	Analysis reports for excipients used.	Firm has submitted analysis reports for all excipients used in applied product development
17.	Drug-excipients compatibility studies.	The firm has submitted that they have used same excipients in their formulation as that of reference product except film coating material. Therefore they have not performed drug-excipient compatibility studies.
18.	Record of comparative dissolution data.	The firm has performed comparative dissolution study with reference product but only at 6.8pH phosphate buffer with 0.05% SLS while the FDA recommended method is to test the product in three media including pH 1.2, pH 4.5 and pH 6.8 buffers
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports for the applied product has been submitted by the firm.

Remarks of the evaluator:

Shortcoming	Response by the firm
The firm has performed comparative dissolution study with reference product but only at 6.8pH phosphate buffer with 0.05% SLS while the FDA recommended method is to test the product in three media including pH 1.2, pH 4.5 and pH 6.8 buffers	Firm has responded that as per assessment report of EMA and USFDA, apixaban belongs to BCS class-III with no reported concerns pertaining to solubility, and that its solubility is not affected by changes in pH. The firm has submitted that it is evident that conducting dissolution study in other pH medium would not have yielded useful scientific information on release of apixaban. Hence we have performed dissolution profile study only in QC release medium.

Decision: Registration Board decided to approve registration of "Apixo Tablets 2.5mg (Apixaban 2.5mg)

with Innovator's specifications by M/s Getz Pharma Pvt. Ltd29-30, Sector 27, Korangi Industrial Area, Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted copies of data logger record for stability chambers with real time and accelerated stability testing
13.	Method used for analysis of API along with COA.	The firm has submitted copy of Raw Material Specifications, Raw Material Testing Procedures along with COA.
14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	The firm has submitted copy of Finished Product Testing Procedure and specification.
15.	Reports of stability studies of API from manufacturer.	The firm has submitted stability study data of 3 batches of API as per the conditions of Zone IV-A.
16.	Analysis reports for excipients used.	Firm has submitted analysis reports for all excipients used in applied product development
17.	Drug-excipients compatibility studies.	The firm has submitted that they have used same excipients in their formulation as that of reference product except film coating material. Therefore they have not performed drug-excipient compatibility studies.
18.	Record of comparative dissolution data.	The firm has performed comparative dissolution study with reference product but only at 6.8pH phosphate buffer with 0.05% SLS while the FDA recommended method is to test the product in three media including pH 1.2, pH 4.5 and pH 6.8 buffers
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports for the applied product has been submitted by the firm.

Remarks of the evaluator:

Shortcoming	Response by the firm
The firm has performed comparative dissolution study with reference product but only at 6.8pH phosphate buffer with 0.05% SLS while the FDA recommended method is to test the product in three media including pH 1.2, pH 4.5 and pH 6.8 buffers	Firm has responded that as per assessment report of EMA and USFDA, apixaban belongs to BCS class-III with no reported concerns pertaining to solubility, and that its solubility is not affected by changes in pH. The firm has submitted that it is evident that conducting dissolution study in other pH medium would not have yielded useful scientific information on release of apixaban. Hence we have performed dissolution profile study only in QC release medium.

Decision: Registration Board decided to approve registration of "Apixo Tablets 5mg (Apixaban5mg) with Innovator's specifications by M/s Getz Pharma Pvt. Ltd29-30, Sector 27, Korangi Industrial Area, Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr.#	Documents To Be Provided	Status
1.	COA of API.	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Precise Chemipharma Pvt. Ltd, C-384, T.T.C. Industrial Area, MIDC Village, Pawane, Navi, Mumbai, India issued by Food and Drug Administration Mahrashtra state which is valid upto 10-10-2018
3.	Protocols followed for conduction of stability study and details of tests.	Yes

4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Firm has submitted ADC attested invoice dated 05-06-2017 confirming import of 1.2 kg Tapentadol hydrochloride, Lot No. 6009122016 from M/s Precise Chemipharma Pvt. Ltd, C-384, T.T.C. Industrial Area, MIDC Village, Pawane, Navi, Mumbai, India.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product TENFAMIDE Tablets 25mg on 17th July, 2018 and was presented in 284th meeting of Registration Board. Registration approved the case and the inspection report confirmed following points • The HPLC software is 21CFR Compliant as per recordavailable with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for Stability chamber.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted ADC attested invoice dated 05-06-2017 confirming import of 1.2 kg Tapentadol hydrochloride, Lot No. 6009122016 from M/s Precise Chemipharma Pvt. Ltd, C-384, T.T.C. Industrial Area, MIDC Village, Pawane, Navi, Mumbai, India.
3.	Documents for the procurement of reference standard and impurity standards.	The firm has submitted undertaking letter from precise chemipharma that working standard is along with shipment of sample.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Precise Chemipharma Pvt. Ltd, C-384, T.T.C. Industrial Area, MIDC Village, Pawane, Navi, Mumbai, India issued by Food and Drug Administration Mahrashtra state which is valid upto 10-10-2018
5.	Mechanism for Vendor pre-qualification	Firm has submitted vendor evaluation form filled by Precise Chemipharma Pvt. Ltd.
6.	Certificate of analysis of the API, reference standards and impurity standards	Firm has submitted copy of COA of API and reference standard.
7.	Documents for the procurement of excipients used in product development?	The firm has submitted documents for procurement of excipients used in the formulation of applied product.
8.	List of qualified staff involved in product development with relevant experience.	The firm has submitted List of qualified staff involved in R&D department.
	Production Data	
9.	Authorized Protocols/SOP for the development	The firm has submitted copy of product development

	& stability testing of trial batches.	protocols.
10.	Complete batch manufacturing record of three stability batches.	The firm has submitted copy of Batch Manufacturing Records of all the three Batches. The quantity of tablets finally packed are: 001T18: 483 Tablets 002T18: 488 Tablets 003T18: 483 Tablets
11.	Record of remaining quantities of stability batches.	Firm has provided following remaining quantities for each batch: 001T18: 213 Tablets 002T18: 178 Tablets 003T18: 213 Tablets
	QA / QC DATA	
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted copies of data logger record for stability chambers with real time and accelerated stability testing
13.	Method used for analysis of API along with COA.	The firm has submitted copy of Raw Material Specifications, Raw Material Testing Procedures along with COA.
14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	The firm has submitted copy of Finished Product Testing Procedure and specification.
15.	Reports of stability studies of API from manufacturer.	The firm has submitted stability study data of 3 batches of API as per the conditions of Zone IV-A.
16.	Analysis reports for excipients used.	Firm has submitted analysis reports for all excipients used in applied product development
17.	Drug-excipients compatibility studies.	
18.	Record of comparative dissolution data.	The firm has performed comparative dissolution study with reference product at 4.5 pH and 6.8pH, further the dissolution test at 10, 20, 30, 45 and 60 min is also performed.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports for the applied product has been submitted by the firm.

Remarks of the evaluator:

Shortcoming	Response by the firm
Justify the dissolution specification of NLT 80% in 60 minutes, since tapentadol is an immediate release dosage form and the FDA biopharmaceutics review of the reference product suggests dissolution specification as NLT 80-85% in 30 minutes.	Firm has replied that the dissolution specification results of their product Nutadol 75mg tablet at 30 minutes complies with FDA limits defined in biopharmaceutics review. The firm has stated that the specification of their commercial product will be NLT 80-85% in 30 minutes.

Decision: Registration Board decided to approve registration of "Nutadol Tablets 75mg (Tapentadol 75mg)" with Innovator's specifications by M/s Crystolite PharmaceuticalsRawalpindi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Case No. 02: Registration Applications of Newly Granted DML or New Section (Human)

a. New DML

M/s Norwich Pharmaceuticals, Islamabad

CLB in its 267th meeting has granted New license with following 3 sections. The details of products applied for each section is provided below:

Section	No. of molecules applied	No. of products applied
Capsule section (Cephalosporin)	05	10
Dry powder injection (Cephalosporin)		
Dry powder suspension (Cephalosporin)		

The letter was issued on 8th January 2019.

Capsule (Cephalosporin) 10 Products/ 05 Molecules		
791.	Name and address of manufacturer / Applicant	M/s Norwich Pharmaceuticals, Plot No. 220, Industrial Triangle, Kahuta Road, Islamabad, Pakistan
	Brand Name +Dosage Form + Strength	Ceficlor 250mg Capsule
	Composition	Each Capsule Contains: Cefaclor Monohydrate Eq. to Cefaclor…250mg
	Diary No. Date of R& I & fee	Dy.No 3384 dated 24-01-2019 Rs.20,000/- 24-01-2019
	Pharmacological Group	Cephalosporins
	Type of Form	Form 5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Cefaclor Capsules 250mg (Cefaclor monohydrate Ph Eur Eq. to 250mg of Cefaclor) by Strides Pharma UK Ltd. Approved by MHRA
	Me-too status (with strength and dosage form)	Resclor 250 mg Capsules by M/s Genome Pharmaceuticals
	GMP status	New license
	Remarks of the Evaluator	
	Decision: Approved	
792.	Name and address of manufacturer / Applicant	M/s Norwich Pharmaceuticals, Plot No. 220, Industrial Triangle, Kahuta Road, Islamabad, Pakistan
	Brand Name +Dosage Form + Strength	Ceficlor 500mg Capsule
	Composition	Each Capsule Contains: Cefaclor Monohydrate Eq. to Cefaclor…500mg
	Diary No. Date of R& I & fee	Dy.No 3385 dated 24-01-2019 Rs.20,000/- Dated 24-01-2019
	Pharmacological Group	Cephalosporins

	Remarks of the Evaluator.	Short coming communicated	Reply of firm
		Address on form 5-A and address on Drug sale License is change	This is to certify that Muller & Phipps Pakistan (Pvt) Ltd, has registred office at Uzma court, Main Clifton Road, P.o Box 3880 karachi- 75600 Pakistan and our central warehouse is located at plot No 208 & 208/1, Sector -23, Korangi Industrial area Karachi, Where the products are recived, stored and transferred to other M&P establishment all over the Pakistan.
		Stability study data for real time is not for 3 batches.	2 batches (WA1519 and WA1523) were put on stability at 30°C in order to gather more information about the product As this temperature was used for stability solely as a back-up (at that time), not all batches were put on stability at 30°C
		Accelerated stability study is performed at 40°C ± 2°C / NMT 25%RH in glass container . Please clarify.	Accelerated studies were performed with the original primary packaging material, which is glass container = see ICH Topic Q 1 A (R2) 2.2.4 Container-closure system: "Stability testing should be conducted on the dosage form packaged in the primary container-closure

			systems proposed for marketing(including , as appropriate, any secondary packaging and container label). Any available studies carried out on the FPP outside its immediate container or in other packaging materials can form a useful part of the stress testing of the dosage form or can be considered as supporting information, respectively. ” As glass container are impermeable containers, the relative humidity is not relevant according to ICH Topic Q 1 A (R2) 2.2.7.2 FPPs packaged in impermeable containers: “Sensitivity to moisture or potential for solvent loss is not a concern for FPPs packaged in impermeable containers that provide a permanent barrier to passage of moisture or solvent. Thus stability studies for products stored in impermeable containers can be conducted under any controlled or ambient RH condition.”
		In case of long term stability the result at 30°C of non esterified fatty acid at 24 month is out of specification. So clarify .	The registred and relevant labelled conditions for SMOFlipid 20% is up to 25°C. As it is known that SMOFlipid 20% is not stable for 24 month at 30°C , Fresenius Kabi has reduced the shelflife to 18 months in countries with a labelled storage condition of up to 30°C In future allongoing stabilities for SMOFlipid 20% at 30°C will be only tested and reported up to 18 months.
	Decision: Registration board Deferred the case for following reason: • **Submission of stability data of 3rd batch as provided data is of only 2 batches.** • **Accelerated stability study conducted at at 40°C ± 2°C /75±5%RH as per zone-IV A requirement.**		

Case No. 04: Registration Applications of Drugs for which Stability Study Data is Submitted.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr.	Documents To Be Provided	Status
1.	COA of API	Copy of COA M/s Pharmagen Ltd Pakistan is submitted.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP Certificate Ref. No. 06/2019- DRAP (AD/607409-530) Dated: 11-01-2019 issued by DRAP is submitted.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Local source (not valid)
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

Initially submitted incomplete data of one batch that is SOF-TF-06 containing methylene chloride as excipient. Now they submitted three new trial batches with revise formulation without methylene chloride .

Decision: Registration Board deferred for updated report on GMP compliance. Incase of satisfactory report, panel shall be constituted for onsite verification of stability study.

REMARKS OF EVALUATOR

- Commercial Invoice of API was attested by ADC Karachi on 10-10-2017 while all the 3 batches are produced in june 2017 and stability starts on 15-06-2017 .
- **Firm reply:**
- **"**Kindly note that the request for the issuance of form6/Clearnce certificate was submitted to DRAP- Karachi in letter dated 29th May 2017 along with required document.

We further investigated the concern from your office and were informed by the respective personnel of the concern department of Indus Pharma that during the evalution of our application by Drap- Karachi, we were informed by the Pakistan customs that our consignment of Dexlansoprazole DDR pellets 23% - 2.5 Kg for the testing and trial/Developmental Batches, had been released via the Green channel by the customs on 3rd June 2017,

based on the submissionof soft copies of the essential documents on the computerized system weboc (web based one custom) of the Pakistan customs. We had the consignment cleared accordingly and was used for testing and development of trial batches in June 2017 and put on stability accordingly

As our application was al;ready filled in DRAP – Karachi, We received the Form-6 along with ADC/Ad attested commercial invoice on 10th October 2017"

- Certificate of analysis of API by manufacturer submitted is for different batch No than batch No mentioned on commercial invoice

Firm reply:

Kindly note that the batch No in certificate of analysis is a typographical error. The correct batch No is MKPPLR-DEF-17001 as mentioned in commercial invoice instead of MKPPLR-DLF-17001

Decision: The Registration Board decided to constitute the following panel for onsite investigation to confirm genuineness/ authenticity of stability data and associated documents, import of API, quality, specification, test analysis, facilities etc.

Prof. Dr. Rafeeq Alam Khan, Member Registration Board.

- Dr. Saif ur Rehman Khattak, Director/FGA, CDL, Karachi.
- Mr. Sajjad Abbasi, FID, Karachi.

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Exilant 60mg (Dexlansoprazole) Capsules by M/s. Indus Pharma (Pvt.), Korangi Industrial Area, Karachi.

Reference No: F.13-11/2017-PEC (PT) dated 17th January, 2019.
Investigation Date and Time: 14th March, 2019 (Morning).
Investigation Site: Factory premises of M/s. Indus Pharma (Pvt.) Limited, Korangi Industrial Area, Karachi.

Background:

Chairman Registration Board considered the applications of M/s. Indus Pharma, Plots No. 26, 27, 63-67, Sector 27, Korangi Industrial Area, Karachi for registration of Exilant 60mg (Dexlansoprazole) Capsules and constituted a three-member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Rafeeq Alam Khan, Meritorious Professor, Department of Pharmacology, University of Karachi, Karachi, Member Registration Board, Islamabad.
2. Dr. Saif ur Rehman Khattak, Director, CDL, DRAP, Karachi.
3. Dr. Sajjad Abbasi, Area FID, DRAP Office, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Sr. No.	Question	Observation bypanel
1.	Doyouhavedocumentsconfirmingthe import ofDexlansoprazole API including approvalfromDRAP?	Thefirmhasimported2.5kgDexlansoprazole pelletsfromM/sMurli Krishna,Indiainvoice number: MKPPL/RG/011 dated 24/05/2017.Approval fromDRAP Office,Karachi was obtained on 10/10/2017 i.e. after a period of 4 months.
2.	Whatwastherationalebehindselecting the particularmanufacturerofAPI?	There is proper vendor evaluation process being implementedincludingPostalAuditchecklist,Testingof the APIand GMP approvalbycompetentauthority along with the DMF.

3.	Do you have documents confirming the import of Dexlansoprazole reference standard and impurity standard?	The firm has document confirming the imported Dexlansoprazole pellets(API), working standard of the API and 2 major impurities from the manufacturer of the API.
4.	Do you have certificate of Analysis of the API, reference standard of the API and impurity standard?	The firm has certificate of analysis for the API, working standard of the API and 2 major impurities standards.
5.	Do youhave GMP certificate of API manufacturers issued by regulatory authoritiesofcountryoforigin?	The firm has valid GMP certificate of the API manufacturer issued by the concerned provincial Regulatory Authority of the country of origin.
6.	Do you use API manufacture rmethod of testing for testing API?	The firm has used API manufacturer method for testing API.
7.	Doyouhavestabilitystudiesreporton API?	The firmhasstabilitystudies reports on the API.
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing has been performed as per SIM method and degradation products have been quantified.
9.	Do you have method for quantifying the impurities in the API?	The firm has HPLC method for quantifying the impurities in the API.
10.	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has remaining quantities of the API, and working standard of API only.
11.	Have you used pharmaceutical grade excipients?	No excipients used, Only HMPC based capsule shells as used by the innovator. (Dexilant capsule manufactured by Takeda Pharma)
12.	Do you have documents confirming the import of the used excipients?	The firm has necessary documents confirming the import of the used excipient.
13.	Do you have test reports and other records on the excipients used?	The firm has test reports and other records on the excipient used.
14.	Do you have written and authorized protocols for the development of Dexlansoprazole capsules?	The firm has written and authorized protocols for the development of Exilant Capsules 60mg (Dexlansoprazole).
15.	Have you performed Drug-excipient compatibilitystudies?	Same excipients were used as of innovator.
16.	Have you performed comparative dissolution studies?	The firm has performed comparative dissolution studies on their capsules against the innovator product Dexilant Capsules 60mg batch no/lot no. A25777, Manufactured By: Takeda Pharma, USA). The firm's product has comparable dissolution profile with that of the innovator product.
17.	Doyouhaveproductdevelopment(R&D) section?	The firm does not have dedicated product development section.They have equipment's for manufacturing lab scale batches. Some of these equipments are used while shifting them to the commercial manufacturing area, whereas, some equipments of commercial scale manufacturing are being used for product development. Dedicated area for product development is under renovation. New small-scale equipment for R%D have arrived at the facility and will be commissioned after renovation work is completed.
18.	Do you have necessary equipment available in product development section for development of Dexlansoprazole capsules?	As above.
19.	Are the equipment in product development section qualified?	The available equipment for productdevelopment section are qualified.
20.	Do you have proper maintenance calibration/re-qualification program for the equipment used in PD section?	The firm has propermaintenance/calibration with re-Qualification program for the equipment used for product development.

21.	Do you have qualifiedstaffinproduct development section with proper knowledge and training in product development?	The firm has a team of 05 technical persons (04 Pharmacist &1 MSC Chemistry) for product development. These personnel have proper knowledge and trainining product development.
22.	Have you manufactured three stability batches for the stability studies of Dexlansoprazole capsules as required?	The firm has manufactured three stability batches of Exilant Capsules 60mg capsules having batch # P-1/DEX, P-2/DEX and P-3/ DEXeach of 2500 capsules batch size.The capsulesare packed in Alu Alu blisters of pack size 2x7s.
23.	Do you have any criteria for fixing the batch size of stability batches?	The criteria for fixing the batch size of stability batches is the quantity of capsules required per testing frequency and the number of testing frequencies.
24.	Do you have complete record of production of stability batches?	The firm has complete record of production of stability batches. All the Log Books are properly maintained.
25.	Do you have protocols for stability testing of stability batches?	The firm has detailed protocols for stability testing of stability batches.
26.	Do you have developed and validated the method fortesting of stability batches?	The method is based upon the API method of API manufacturer. The firm has fully validated the method for testing of their finished product.
27.	Doyouhavemethodtransferstudiesin casewhenthemethodoftestingbeing usedbyyourfirmisgivenbyanyother lab?	The firmhasperformed complete validation studies.
28.	Do you have documents confirming the qualification of equipments/instruments being used in the test and analysis of Dexlansoprazole API and the finished drug?	The firm has proper documents confirming the qualificationofequipment/instrumentsbeingusedinthe testandanalysis ofthe APIand the finished drug.
29.	Do your method of analysis stability indicating?	The firm has performed forced degradation (FD) study on their product Exilant Capsules 60mg capsules for the conformance of stability indicating nature of their method for testing the finished product during stability studies.
30.	Do your HPLC software 21CFR Compliant?	1. Yes, HPLC software is 21 CFR Part 11 compliant where all user levels are properly defined. 2. No user or main user can delete, edit or manipulate data from software. 3. All actions are recorded in audit trails. 4. Created strict policies on windows and disable options like "Delete, Copy, Paste and rename" of any file from user level. Furthermore, the following improvements are being made in order to strengthen it further. 1. A new HPLC of "Agilent Infinity series" has been installed in Quality Control Laboratory & two more are under procurement and will be commissioned by the mid of 2019. 2. Chromatography Data System (CDS) Software is also being procured for Compliance and Data Security. With the ever-evolving emphasis on data security, data integrity, and compliance, it is of vital importance that the software provides comprehensive preventive and detection technical controls. This will enable us to meet the latest regulatory requirements and ensure the highest levels of data quality.
31.	Can you showAudit trail reports on Dexlansoprazoletesting?	Audittrailonthetestingreports is available.

32.	Do you have some remaining quantities of degradation products and stability batches?	The firm has remaining quantities of stability batches only.
33.	Do you have stability batches kept on stability testing?	The firm has three stability batches kept on realtime stability testing. 18months studies have been completed on these batches with satisfactory results.
34.	Do you have valid calibration status for the equipments used in Dexlansoprazole capsules production and analysis?	The firm has valid calibration status for the equipment used in Exilant Capsules 60mg production and analysis.
35.	Do proper and continuous monitoring and control are available for stability chamber?	Adequatemonitoringandcontrolareavailableforstability chambers including data loggers and centralized controllingsoftware.
36.	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Related manufacturing area, equipment, personnel and utilities are in compliance.

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Exilant 60mg (Dexlansoprazole) Capsules is verifiable to satisfactory level .
2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and well suited For the manufacturing of Exilant 60mg (Dexlansoprazole) Capsules.

Recommendations:

1. Since Exilant 60mg Capsules are modified release (delayed release) capsules therefore, post registration Bioequivalence studies should be conducted on the product before marketing.
2. Firm must developed specific identification test for dexlansoprazole in the pallets and the finished product .
3. The firm may kindly be granted necessary registration of Exilant 60mg (Dexlansoprazole) Capsules.

Note: The firm has submitted written undertaking for post registration bioequivalence studies on the capsules (copy enclosed

Decision: Deferred for following reason:

- **Commercial Invoice of API was attested by DRAP Karachi on 10-10-2017 while all the 3 batches are produced in june 2017 and stability starts on 15-06-2017 .**
- **Recommendation by panel that "Firm must developed specific identification test for dexlansoprazole in the pellets and the finished product"**

c. Exemption from onsite verification of stability data

	Remarks of Evaluator:	

Decision: Registration Board decided to approve registration of "Voreta Tablets 10 mg (Empagliflozin)" with Innovator's specifications by M /s. Scotmann Pharmaceuticals, 5D, I-10/3, Industrial Area, Islamabad. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability / Local Availability GMP Inspection Report Date
806.	M /s. Scotmann Pharmaceuticals, 5D, I-10/3, Industrial Area, Islamabad	Voreta Tablets 25 mg Each Film Coated tablet contains: Empagliflozin….25mg Anti-DiabeticDrug, Sodium-Glucose Co-Transporter2 (SGLT2) Inhibitor. (Manufacturer's Specification)	Form 5 Dairy No.4416 Dated: 31-01-2019 Rs.20,000/- dated 31-01-2019 1x10's, 1x14's, 2x7's, 4x7's, 3x10's, 30's, 2x10's; As per SRO	Jardiance Tablets 25 mg by Boehringer Ingelheim Pharmaceuticals, USFDA GMP Inspection conducted on 10-10-2018 & 17-10-2018 concluded that the panel unanimously recommended for the grant of cGMP certificate.

STABILITY STUDY DATA

Drug	Voreta Tablets 25 mg		
Name of Manufacturer	M/s. Scotmann Pharmaceuticals, 5D, I-10/3, Industrial Area, Islamabad.		
Manufacturer of API	**Empagliflozin:** M/s Zhejiang Huahai Pharmaceutical Co. Ltd., China		
API Lot No.	D5284-17-004		
Description of Pack (Container closure system)	Alu Alu Blister Pack		
Stability Storage Condition	Accelerated: 40°C ± 2°C/75%±5% RH Real Time: 30°C ± 2°C/65%±5% RH		
Time Period	Accelerated: 06 months Real Time: 06 months		
Frequency	Accelerated:0,1,2,3,4,6 (months) Real Time: 0, 3,6, (months)		
Batch No.	B# T-01	B# T-02	B# T-03
Batch Size	1200 Tablets	1200 Tablets	1200 Tablets
Manufacturing Date	02/2018	02/2018	02/2018
Date of Initiation	11/2/2018	11/2/2018	11/2/2018
No. of Batches	03		
Date of Submission	30-01-2019 (4214)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents To Be Provided**	**Status**
1.	COA of API.	Copy of COA (Batch#D5284-17-004) from M/S Zhejiang Huahai pharmaceuticals CO; Ltd China is submitted.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP Certificate (certificate No.ZJ20140072) issued by China Food & Drug Administration China. It is valid until 25/09/2019.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Copy of Form 6 (License to Import drug for clinical trial examination, test or analysis) issued by ADC DRAP (Islamabad) dated 14-07-2017, for the import of Empagliflozin from M/s Zhejiang Huahai Pharmaceuticals CO; Ltd and Copy of Commercial Invoice (invoice No. HH20171596, dated: 17-07-2017) attested by ADC DRAP (Islamabad) dated 27-07-2017 is also submitted
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product Dascot Tablets 30mg and 60 mg and Velscot 400mg/100mg tablets which was conducted on 26th January, 2018 and was presented in 278th meeting of Registration Board held on 29-31st January, 2018. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Copy of Form 6 (License to Import drug for clinical trial examination, test or analysis) issued by ADC Drap (Islamabad) dated 14-07-2017, for the import of Empagliflozin from M/s Zhejiang Huahai Pharmaceuticals CO; Ltd China and Copy of Commercial Invoice (invoice No. HH20171596) attested by ADC Drap (Islamabad) dated 27-07-2017 are submitted.
		Metformin HCl: Copy of Export invoice (Invoice No. Exp009)) issued by ADC DRAP (Islamabad) dated 06-09-2017, for the import of Metformin HCl from M/s Abhilasha Pharma Pvt. Ltd India.
3.	Documents for the procurement of reference standard and impurity standards.	The firm has submitted photocopy of Invoices for the procurement of reference standard and impurity standards.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted GMP from M/S Zhejiang Huahai pharmaceuticals CO; Ltd China is submitted. Issued by China Food & Drug Administration China. It is valid until 25/09/2019.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API.	**Empagliflozin:** Copy of COA (Batch#D5284-17) from M/S Zhejiang Huahai pharmaceuticals CO; Ltd China is submitted.

		Metformin hydrochloride: Copy of COA (Batch# MET123/17) from M/s Abhilasha Pharma Pvt. Ltd India is submitted.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	**Empagliflozin:** Copy of GMP Certificate (certificate No.ZJ20140072) issued by China Food & Drug Administration China. It is valid until 25/09/2019.
		Metformin hydrochloride: Copy of GMP certificate (Certificate No. 1706138) issued by Food & Drugs Control Administration, Gandhinagar, Gujarat state, India for M/s Abhilasha Pharma Pvt. Ltd India. It is valid upto 01-06-2019.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	**Empagliflozin:** Copy of Form 6 (License to Import drug for clinical trial examination, test or analysis) issued by ADC DRAP (Islamabad) dated 14-07-2017, for the import of Empagliflozin from M/s Zhejiang Huahai Pharmaceuticals CO; Ltd and Copy of Commercial Invoice (invoice No. HH20171596) attested by ADC DRAP (Islamabad) dated 27-07-2017 is also submitted.
		Metformin HCl: Copy of Export invoice (Invoice No. Exp009)) issued by ADC DRAP (Islamabad) dated 06-09-2017, for the import of Metformin HCl from M/s Abhilasha Pharma Pvt. Ltd India
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product Dascot Tablets 30mg and 60 mg and Velscot 400mg/100mg tablets which was conducted on 26th January, 2018 and was presented in 278th meeting of Registration Board held on 29-31st January, 2018. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.

<table>
<tr><td rowspan="2">2.</td><td rowspan="2">Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Empagliflozin: Copy of Form 6 (License to Import drug for clinical trial examination, test or analysis) issued by ADC Drap (Islamabad) dated 14-07-2017, for the import of Empagliflozin from M/s Zhejiang Huahai Pharmaceuticals CO; Ltd China and Copy of Commercial Invoice (invoice No. HH20171596) attested by ADC Drap (Islamabad) dated 27-07-2017 are submitted.</td></tr>
<tr><td>Metformin HCl: Copy of Export invoice (Invoice No. Exp009)) issued by ADC DRAP (Islamabad) dated 06-09-2017, for the import of Metformin HCl from M/s Abhilasha Pharma Pvt. Ltd India.</td></tr>

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr.#	**Documents To Be Provided**	**Status**
1.	COA of API.	Copy of COA (Batch#13000-171203-02-1) from M/S Zhejiang Tianyu Pharmaceuticals Co., Ltd. China is submitted.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin	Copy of GMP (certificate no. MI-2016-CE-06202-1) has been submitted for M/s. Zhejiang Tianyu Pharmaceuticals Co., Ltd. China approved by TGA, Austraila .Valid till 15-03-2021
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Copy of Form 6 License to Import drug for clinical trial examination, test or analysis) issued by ADC (Karachi) dated 12-02-2018, for the import of Silodosin API from M/s. Zhejiang Tianyu Pharmaceuticals Co., Ltd. China; has been submitted. Copy of Commercial invoice No. TYI18106 attested by ADC (Karachi) dated 12-02-2018 has been submitted
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes
REMARKS OF EVALUATORS		
The firm has provided 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Lab Scale Batches.		
REQUEST OF EXEMPTION ROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:		
Administration portion		
1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred last onsite panel inspection for instant dosage form conducted during last two years- DELANZO DR (Dexlansoprazole) 30mg & 60mg Capsules on 02nd April, 2018, by following panel: 1. Prof. Dr. Ghulam Sarwar, Dean, Faculty of Pharmacy, Jinnah University for Woman, 5-C, St-1, Nazimabad, Karachi 2. Dr. Saif-Ur-Rehman Khattak, Director / FGA, CDL, DRAP, Karachi. 3. Dr. Mehwish Tanveer, Assistant Director, DRAP Office, Karachi. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers

17.	Drug-excipients compatibility studies.	The firm has submitted Compatibility study report (dated 13-06-2018) along with raw data sheets and relevant chromatograms.
18.	Record of comparative dissolution data	Firm has submitted Comparative Dissolution Profile protocol & reports. The details of reference product & Sample product are as follows: **Feature** / **Reference Product** / **Product of M/s SAMI** Brand Name / Ibuprofen Infusion / Ibuprofen Infusion Batch No. / 18301406 / LAB-01 Exp. Date / June - 2020 / -
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports for complete stability studies analysis of three batches.
Remarks of Evaluator:		
• Justify the quantity of API i.e. 402.857/vial used in the formulation as the label claim is 400mg/100ml.		The quantity of API as per label claim is 400mg/100ml whereas the calculated quantity of API is 402.857mg/100ml which is according to its potency. However, the quantity of API per 100ml will remain same as of label claim.

Decision: Registration Board decided to approve registration of "IBURO 400mg/100ml Infusion (Ibuprofen)" with Innovator's specifications by M/s Sami Pharmaceuticals (Pvt.) Limited. F-95 S.I.T.E. Karachi. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Copy of Commercial invoice No. 442831 dated 05-09-2017 attested by ADC (Karachi) dated 09-10-2017 has been submitted.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATORS

The firm has provided 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Lab Scale Batches.

REQUEST OF EXEMPTION ROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:

Administration portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	• Firm has referred last onsite panel inspection for instant dosage form conducted during last two years IBURO *(Ibuprofen)* 800mg/8ml Injection on 28th January, 2019 by following panel: 1. Dr. Rafeeq Alam Khan, Meritorious Professor, Member Registration Board

<table>
<tr><td></td><td></td><td>2. Mr. Aslam Shah, Member Registration Board.
3. Mr. Affan Ali Qureshi, Assistant Director (CDL), DRAP, Karachi.</td></tr>
<tr><td>2.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Copy of Form 6 License to Import drug for clinical trial examination, test or analysis) issued by ADC (Karachi) dated 09-10-2017, for the import of Ibuprofen from M/s. SI Group, Inc., 725 Cannon Bridge Road, Orangeburg, South Carolina (SC) 29115, United States (USA)
Copy of Commercial invoice No. 442831 dated 05-09-2017 attested by ADC (Karachi) dated 09-10-2017 has been submitted .</td></tr>
<tr><td>3.</td><td>Documents for the procurement of reference standard and impurity standards.</td><td>Firm has submitted pro forma of Working /reference standard from EDQM.</td></tr>

</table>

11.	Record of remaining quantities of stability batches.	The firm has submitted reconciliation sheet mentioning remaining quantity of three trial batches. The detail is as under:

Trial no.	Total no. of tablets for stability	Used quantities	Remaining quantities
Trial # 01	1190 Tab (60 packs * 20's)	320 Tab (16 packs * 20's)	880 Tab (44 packs * 20's)
Trial # 02	1170 Tab (58 packs * 20's)	300 Tab (15 packs * 20's)	860 Tab (43 packs *20's)
Trial # 03	1160 Tab (58 packs * 20's)	300 Tab (15 packs * 20's)	860 Tab (43 packs *20's)

QA / QC DATA		
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted photocopies of data logger record for chambers used in Real Time & Accelerated stability studies of applied product from 01-05-2018 to 13-02- 2019.
13.	Method used for analysis of API along with COA.	The firm has submitted photocopies of following: Raw Material Test/Analysis Procedures & Raw Material Specifications Of Deflazacort (in house) .
14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	The firm has submitted photocopies of following: FPP Test/Analysis Method & FPP Specifications (In-house) for Deflazot Tablets 6mg.
15.	Reports of stability studies of API from manufacturer.	The firm has submitted photocopy of 06 Months Accelerated and 36 Months Real Time Stability Study Data of 03 Batches of Deflazacort from M/s Anuh Pharma Ltd, India according to zone IVA conditions.
16.	Analysis reports for excipients used.	The firm has submitted copy of Analytical reports of excipients used.
17.	Drug-excipients compatibility studies.	The firm has used the excipients of innovator.
18.	Record of comparative dissolution data.	Exemption Claimed as the reference product is not available in Pakistan.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of Deflazacort from 28-03-2018 to 7-02-2019 was submitted by the firm.

Remarks of Evaluator:

- Record of comparative dissolution datanot provided according to firmExemption Claimed as the reference product is not available in Pakistan.

Sr. #	Deficiencies/Shortcomings	Reply by Firm
1.	In T# 01final mixing of powder was done on (12-03-2018) and compression was done on 25-04-2018 .Justify.	In Trial # 01 final mixing of granules was done on 12-03-2018, and in process analysis carried out on 28-03-2018, then trial was compressed into two steps. Initially small amount of granules were compressed on 31-03-2018. After its analysis on 23-04-2018 (compressed tablets) the remaining granules were compressed on 25-04-2018. Granules were stored/kept in sealed bag and well closed container during the process Evidence weight variation sheet (attached)
2.	In all 3 batches approval for blistering was 23-04-2018 while compression done on 25- 04-2018. Justify.	The Initial compression of the batches was done on 31-03-2018 after which the compressed tablet were analysed on 23-04-2018 and approval for the blistering for initially compressed tablets was given. However, the remaining granules were compressed

		on 23-04-2018 and the process of blistering was carried out on 30-04-2018. In this way the trial got compressed in two steps. The whole trial was not initially compressed due to limited quantity of API and once the initially compressed tablets were passed the remaining trial got compressed.
3.	In all 3 batches compression was done on 25-04-2018 while some analytical test were performed on 31-03-2018 as per submitted batch manufacturing record. Justify	As the compression of tablets done in two steps, the analytical tests like D.Time, Friability etc., for initially compressed tablet was carried out on 31-03-2018 on the date of initial compression and remaining granules were compressed on 25-04-2018 as evident from weight variation sheet.
4.	In T# 02 & T# 03 final mixing of powder was done on (23-03-2018) and compression done on 25-04-2018 .Justify	In T# 02 and T# 03 final mixing of granules was done on 28-03-2018. Initially some granules were compressed on 31-03-2018 and once passed through analysis on23-04-2018 the remaining trial got compressed on 25-04-2018as evident from weight variation sheet.
5.	In T# 01, 3rd month for Real time stability assay chromatograms not matching raw data sheets. Justify	Typographical error in raw data sheet. Corrected raw data sheets attached.
6.	In Batch No T # 02, 6th month for Real time stability dissolution chromatograms not matching raw data sheets. Justify.	Typographical error in raw data sheet. Corrected raw data sheets attached.

Decision: Registration Board deferred for onsite verification of stability studies.

815.	Name and address of manufacturer / Applicant	M/s Werrick pharmaceuticals, 216-217, I-10/3, Industrial Area, Islamabad.
	Brand Name +Dosage Form + Strength	Deflazot Tablets 18mg
	Composition	Each Compressed tablets contains: Deflazacort 18mg
	Diary No. Date of R& I & fee	Dy. No.16555 dated : 07-03-2019 Rs.50000/- 07-03-2019
	Pharmacological Group	Corticosteroids
	Type of Form	Form – 5 D
	Finished product Specifications	Manufacturer's Specifications
	Pack size & Demanded Price	10's, 20's, 30's, ; As per SRO
	Approval status of product in Reference Regulatory Authorities	Approved in US-FDA (EMFLAZA Tablet 18mg)
	Me-too status (with strength and dosage form)	Nil
	GMP status	GMP Inspection conducted on 09-11-2018 with conclusive remarks that firm is operating at satisfactory level of GMP compliance.

17.	Drug-excipients compatibility studies.	The firm has used the excipients of innovator.
18.	Record of comparative dissolution data.	Exemption Claimed as the reference product is not available in Pakistan.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of Deflazacort from 28-03-2018 to 7-02-2019 was submitted by the firm.

Remarks of Evaluator:

- Record of comparative dissolution datanot provided according to firmExemption Claimed as the reference product is not available in Pakistan.

Sr.#	Deficiencies/Shortcomings	Reply by Firm
1.	In all 3 batches final mixing of powder was done on (31-03-2018) and compression done on 25-04-2018 .Justify..	In all three batches final mixing of granules was done on 31-03-2018, and in process analysis carried out on 03-04-2018, then trial was compressed into two steps. Initially small amount of granules were compressed on 21-04-2018. After its analysis on 23-04-2018 (compressed tablets) the remaining granules were compressed on 25-04-2018. Granules were stored/kept in sealed bag and well closed container during the process Evidence weight variation sheet (attached)
2.	In all 3 batches compression was done on 25-04-2018 while some analytical test were performed on 21-04-2018 as per submitted batch manufacturing record. Justify	As the compression of tablets done in two steps, the analytical tests like D.Time, Friability etc., for initially compressed tablet was carried out on 21-04-2018 on the date of initial compression and remaining granules were compressed on 25-04-2018 as evident from weight variation sheet
3.	In all 3 batches approval for blistering was 24-04-2018 while compression done on 25-04-2018. Justify	The Initial compression of the batches was done on 21-04-2018 after which the compressed tablet were analysed on 24-04-2018 and approval for the blistering for initially compressed tablets was given. However, the remaining granules were compressed on 25-04-2018 and the process of blistering was carried out on 30-04-2018. In this way the trial got compressed in two steps. The whole trial was not initially compressed due to limited quantity of API and once the initially compressed tablets were passed the remaining trial got compressed.

Decision: Registration Board deferred for onsite verification of stability studies.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API.	Copy of COA (batch # APL/191/1-17) from M/s Anuh Pharma Ltd. India
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP certificate (certificate No.6080699) issued by Food & Drugs Administration Konkan Division, Maharashtra State. It is valid until 21/03/2019.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	The firm has submitted copy of commercial invoice No; EXP/276/2018 dated 20-12-2017 (Deflazacort) attested by ADC, DRAP, Islamabad dated; 18-01-2018

6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

The firm has submitted 26 Weeks Accelerated and 38 Weeks Real Time Stability Data for 03 Batches.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "Cell-Tab 400mg (Sofosbuvir) Tablets", which was presented Initially in 256th subsequently in 269th&finally in 276th meeting of Registration board. Registration Board decided to approve registration of above stated drug product of M/s. Werrick Pharmaceuticals. According to the report following points were confirmed. • The firm has 21CFR compliant HPLC software. • The firm has audit trail reports available.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice No; EXP/276/2018 dated 20-12-2017 (Deflazacort) attested by ADC, DRAP, Islamabad dated; 18-01-2018.
3.	Documents for the procurement of reference standard and impurity standards.	The firm has submitted copies of COA for following working standard :
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	The firm has submitted copy of GMP certificate declaring following information: Certificate No.6080699 Issued to: M/s Anuh Pharma Ltd, India. Issued by: Food & Drug Administration, Konkan Division, Maharashtra State. Validity: Valid Till 21-03-2019.
5.	Mechanism for Vendor pre-qualification	The firm has submitted SOP for Evaluation of Vendors.
6.	Certificate of analysis of the API, reference standards and impurity standards	Applicant has submitted following COAs: • Copy of COA of API (batch # APL/191/1-17) from M/s Anuh Pharma Ltd. India has been submitted. • Copy of COA of reference standard of Deflazacort (batch # APL/150/G-17) has been submitted.
7.	Documents for the procurement of excipients used in product development?	The firm has submitted photocopy of Commercial invoices/COAs of all the excipients used in the formulation of applied product. • Commercial invoice dated 26-09-17 for Corn Starch. • Commercial invoice dated 10-11-17 for Lactose. • Commercial invoice dated 25-09-17 for Aerosil. • Commercial invoice dated 03-11-16 for Magnesium Stearate
8.	List of qualified staff involved in product development with relevant experience.	The firm has submitted List of qualified staff involved in R&D department.

STABILITY STUDY DATA SUBMITTED INITIALLY

Drug	Artril tablets 49mg/51mg		
Name of Manufacturer	M/s Ferozsons Laboratories Limited, Nowshera, KPK		
Manufacturer of API	M/s Nantong ChanyooPharmatech Co. Ltd. China.		
API Lot No.	201706001		
Description of Pack (Container closure system)	Alu/Alu film blister pack		
Stability Storage Condition	Accelerated: 40°C ± 2°C & 75±5%RH Real Time: 30°C ± 2°C & 75±5%RH		
Time Period	Accelerated: (6-months) Real Time: (6-months)		
Frequency	Accelerated: 0,1,2,3,4,6 months Real Time: 0,3,6 months		
Batch No.	SV tab-001	SV tab-002	SV tab-003
Batch Size	2500 Tablets	2500 Tablets	2500 Tablets
Manufacturing Date	December-2017	December-2017	December-2017
Date of Initiation	December-2017	December-2017	December-2017
No. of Batches	3		
Date of Submission	20-08-2018		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT INITIALLY

Sr. No.	Documents To Be Provided	Status
1.	COA of API	Copy of COA from Nantong ChanyooPharmatech Co. Ltd. China. is submitted.

2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	GMP certificate issued from Nantong Chemical and Medical Industry is valid until 5-12-2019.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	**Yes**
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

PREVIOUS REMARKS OF EVALUATOR[1]

-

DECISION 275TH RB MEETING

Registration Board deliberated that it has been decided that onsite inspection for verification of data will be exempted as decided in instant meeting.

Now the firm has requested for Exemption from On-site Investigation of their submitted stability data vide Letter dated 19-10-2018 and provided the following documents in conjunction with the checklist approved by the Registration Board in its 276th Meeting:

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	• Registration Board approved "Invicta (Sofosbuvir 400mg + Velpatasvir 100mg)" Tablets in its 281st Meeting. • Dates of Inspection: o 16th March 2018.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has attested form-6 that permits the import of 2kg of Sacubitril + Valsartan from M/s Nantong ChanyooPharmatech Co. China.
3.	Documents for the procurement of reference standard and impurity standards.	• The firm has provided Invoice No. CY117235 Dated 26 Jun 2017 of importing Working standard and Impurity standard.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	GMP certificate issued from Nantong chemical and Medical Industry association and is valid until 5-12-2019.
5.	Mechanism for Vendor pre-qualification	Firm has given procedure for Induction of New Vendor for evaluation of vendors.
6.	Certificate of analysis of the API, reference standards and impurity standards	Photocopy of COA of Batch No. 201706001 by Nantong ChanyooPharmatechCo.Ltd is submitted. **Working standards**: Photocopy of COA of Batch No. WS201610001 is submitted. **Impurity Standard**: Photocopy of COA of impurity standards are submitted.
7.	Documents for the procurement of excipients used in product development?	The firm has submitted photocopy of Commercial Invoice from **M/s JRS Pharma, Germany dated 3-07-2017** for purchase Alufoil-bag. The firm has submitted photocopy of Commercial Invoice

Case No. 01 Registration Applications for Local Manufacturing of (Human) Drugs.

a. New cases

839.	Name and address of Manufacturer / Applicant	M/s Winthrox Laboratories (Pvt.) Ltd, K-219-A, SITE, Super Highway, Phase-II Karachi, Pakistan.
	Brand Name + Dosage Form + Strength	Pozwin tablet 15/2mg
	Composition	Each tablet contains: Pioglitazone (as hydrochloride)…15mg Glimepiride….2mg
	Diary No. Date of R&I & fee	DyNo.3788; 30-01-2018; Rs. 20,000/-
	Pharmacological Group	Anti-Diabetic
	Type of Form	Form-5
	Finished Product Specification	Manufacturers Specifications
	Pack Size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Approved in US-FDA

	Me-too status	Glio-P Tablet of Macter International (Pvt) Ltd, Karachi
	GMP status	Certificate of cGMP is issued to the firm based on inspection conducted on 16-08-2018 & is valid for a period of one year.
	Remarks of Evaluator	Applied formulation is film coated tablet which is different from Reference product i.e. uncoated tablet. Submit Form 5, Master formulation & manufacturing method either in line with reference product along with required fee or evidence of reference product as film coated tablet. • *In response to above query firm has submitted revised Form 5 with change in composition & fee challan of Rs. 5000/- dated 12-03-2019for change in formulation.*
	Decision: Approved with USP specifications.	
840.	Name and address of Manufacturer / Applicant	M/s Winthrox Laboratories (Pvt.) Ltd, K-219-A, SITE, Super Highway, Phase-II Karachi, Pakistan.
	Brand Name + Dosage Form + Strength	Winralex Oral Drops10mg/ml
	Composition	Each ml contains: Escitalopram (as oxalate)…10mg
	Diary No. Date of R&I & fee	DyNo.3778; 30-01-2018; Rs. 20,000/-
	Pharmacological Group	Anti-Depressant
	Type of Form	Form-5
	Finished Product Specification	Manufacturers Specifications
	Pack Size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Approved in MHRA(not verifiable)
	Me-too status	Depsit 10mg/ml Oral Drops of Genix Pharma Karachi
	GMP status	As recorded for above application
	Remarks of Evaluator	Reference product is approved as Escitalopram (as oxalate) 1 mg/ml drops, which is different form applied formulation i.e. Escitalopram (as oxalate) 10mg/ml. Submit form 5, master formulation, manufacturing method either in-line with reference product or evidence of approval of applied formulation.
	Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by Registration Board in its 275th meeting.	
841.	Name and address of manufacturer / Applicant	WINTHROX LABORATORIES (PVT.) LTD. K-219-A, SITE, Superhighway, Phase-II Karachi, Pakistan.
	Brand Name +Dosage Form + Strength	Erinoc Tablets 50mg
	Composition:	Each sugar Coated Tablets contains: Eperisone hydrochloride……. 50mg
	Diary No. Date of R& I & fee:	Dy No. 3780; 30-01-18: Rs. 20,000
	Pharmacological Group	Muscle Relaxant
	Type of Form	Form-5
	Finished Product Specification	Manufacturer's Specification
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Approved in AIFA(Italy) Expose 50mg film coated tablets by ALFASIGMA S.P.A.
	Me-too status	Eperinal Tablets 50mg of Global Pharmaceuticals
	GMP status	As recorded for above application
	Remarks of the Evaluator	Reference product is Eperisone hydrochloride 50mg film coated tablet but you have applied with sugar coating, Submit form, master formulation, manufacturing method either in-line with reference product along with requisite fee or evidence of approval of applied formulation with sugar coating. • *In response to above query Firm has submitted evidence of applied drug product in AIFA which is also of Film coated tablet.*
	Decision: Approved with innovator's specification.	

842.	Name and address of manufacturer / Applicant	WINTHROX LABORATORIES (PVT.) LTD. K-219-A, SITE, Superhighway, Phase-II Karachi, Pakistan.
	Brand Name +Dosage Form + Strength	COXWIN 60mg Tablets
	Composition:	Each Film Coated Tablets contains: Etoricoxib …….. 60mg
	Diary No. Date of R& I & fee Diary No:	Dy No. 3781; 30-01-18: Rs. 20,000
	Pharmacological Group	Anti-inflammatory And Anti-rheumatic Products, Non-Steroids
	Type of Form	Form-5
	Finished Product Specification	Manufacturers Specification
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Approved in MHRA
	Me-too status	Starcox 60 mg tab by Getz Pharma
	GMP status	As recorded for above application
	Remarks of the Evaluator.	Monograph for test/analysis of applied formulation is not present in available USP & B.P.
	Decision: Approved with innovator's specification.	
843.	Name and address of manufacturer / Applicant	WINTHROX LABORATORIES (PVT.) LTD. K-219-A, SITE, Superhighway, Phase-II Karachi, Pakistan.
	Brand Name +Dosage Form + Strength	POZWIN TABLETS
	Composition:	Each film coated tablet contains:- Glimepiride…… 2mg Pioglitazone as hydrochloride….. 30mg
	Diary No. Date of R& I & fee Diary No:	Dy. No. 3789; 30-01-18: Rs. 20,000
	Pharmacological Group	Combination of blood glucose lowering drugs
	Type of Form	Form-5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Duetact tablet by Takeda (USFDA Approved)
	Me-too status	Piozer G by Hilton
	GMP status	As recorded for above application
	Remarks of the Evaluator.	Applied formulation is film coated tablet which is different from Reference product i.e. uncoated tablet. Submit Form 5, Master formulation & manufacturing method either in line with reference product along with required fee or evidence of reference product as film coated tablet. • *In response to above query firm has submitted revised Form 5 with change in composition & fee challan of Rs. 5000/- dated 12-03-2019for change in formulation.*
	Decision: Approved with USP specifications.	
844.	Name and address of manufacturer / Applicant	WINTHROX LABORATORIES (PVT.) LTD. K-219-A, SITE, Superhighway, Phase-II Karachi, Pakistan.
	Brand Name +Dosage Form + Strength	Tifany Syrup 1mg/5ml
	Composition:	Each 5ml contains: Ketotifen (as hydrogen fumarate) …1mg
	Diary No. Date of R& I & fee Diary No:	Dy No. 3779; 30-01-18: Rs. 20,000
	Pharmacological Group	Anti-histamine
	Type of Form	Form-5
	Finished Product Specification	Manufacturers Specification
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Zaditen 1 mg / 5 ml oral solution by M/s SIGMA TAU, ANSM approved (as provided by the firm)

	Me-too status	Zatofen 1mg/5ml Syrup by M/s Novartis
	GMP status	As recorded for above application
	Remarks of the Evaluator.	Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting as provided evidence is different from the applied formulation, in the sense that it Ketotifen (as fumarate) not as Ketotifen (as hydrogen fumarate).
	Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by Registration Board in its 275th meeting

Composition	Each 100ml contains: Oxytetracycline…. 20g
Target Species	--------
Finished Product Specification	Manufacturer's Specifications
Pharmacological Group	Antibiotic
Shelf life	24months
Demanded Price	De-Controlled
Pack size	100ml
International availability	Could not be confirmed
Me-too status	Eloxy 20% L.A Injection of Eros Pharmaceutical (Pvt) Ltd., Karachi.
Detail of certificates attached	**LEGALIZED CERTIFICATE OF FREE SALES:** Certificate No. No Number Certified by: Shandong Animal Husbandry & Veterinary Bureau. Issued date: 27/09/2017 Free sale in exporting country: Confirms the free sale of the product in exporting country. GMP: **Legalized copy of Letter of authorization** Huzaifa International & Shandong Soocom Animal remedy Co., Ltd. For following products: Oxytetracycline Injection 20 % (Oxydong-20) Enrofloxacin Oral Solution 20% (Enrodong-20) Oxytetracycline Injection 5 % (Oxydong-5) Validity:

Remarks of the Evaluator.

Sr.#	Remarks of the Evaluator.	Reply of the Firm.
1	In case of finished product label, the Urdu version of Name of drug, dosage & instructions as per requirement of (Drugs labeling and prescribing rules) 1986 is required while you have not submitted the Urdu version of dosage.	Applicant has submitted Urdu version of Name of drug, dosage & instructions.
2	Submit evidence of Shandong Animal Husbandry & Veterinary Bureau as a concerned regulatory body of M/s. Shandong Soocom Animal Remedy.	-------
3	Submit stability studies both accelerated & real time of three batches of applied drug product conducted in accordance with zone IV-A conditions.	Stability of three batches of applied drug product both accelerated & real time conducted in accordance with zone IV-A condition for 24 months is submitted by the firm. (Data is same to that of 25°C ±2°C, RH

			65%±5%)
	4	Justification/Clarification on scientific basis for not carrying out endotoxin test of applied formulation.	According to international pharmacopoeia endotoxin test is only required to be performed for intravenous injections or powders for injections. Our applied drug product is oil based injection which is injection intramuscularly or subcutaneously, therefore endotoxin test does not require to be performed. **However applied drug product is water based injection as per data submitted in dossier.*
	6	Mention the type of primary packaging material weather it is type I, Type II, Or Type III glass container.	Type I glass Container.
	7	Submit copy of valid DSL of the applicant.	Copy of DSL submitted by the firm having following information on it. **Address:** Commercial Area, Aziz Bhatti Town, District Sargodha **Validity:** 20/11/2019 **Status:** Licence to sell as a "Distributer"
	Decision: Deferred for submission of complete original record of stability studies data both accelerated & real time for three batches supported by attested respective documents like chromatograms, laboratory reports, and raw data data sheets confirming conduction of stability studies of applied formulation as per zone IVa conditions.

Remarks of the Evaluator.	• Quantity of excipients mentioned in product formula attached alongside the COPP is different from that mentioned in SmPC & under Heading of composition on Form 5A. Clarify/Justify. • Justification on scientific basis for addition of 2 % overage of enrofloxacin in master formulation. • Long term stability data of API is for Neomycin Sulphate instead of Enrofloxacin. • In Finished Product Specifications under microbial contamination test, limits of microbial count are not mentioned. Mention the limits of microbial count.
Previous Decision	Registration Board in its 287th meeting deferred the case for the following: • Quantity of excipients mentioned in product formula attached alongside the COPP is different from that mentioned in SmPC & under Heading of composition on Form 5A. Clarify/Justify. • Justification on scientific basis for addition of 2 % overage of enrofloxacin in master formulation. • Long term stability data of API is for Neomycin Sulphate instead of Enrofloxacin. • In Finished Product Specifications under microbial contamination test, limits of microbial count are not mentioned. Mention the limits of microbial count.

Evaluation by PEC:

Sr. No.	Registration Board in its 287th meeting deferred the case for the following reason:	Response of the firm
1	• Quantity of excipients mentioned in product formula attached alongside the COPP is different from that mentioned in SmPC & under Heading of composition on Form 5A. Clarify/Justify.	The firm has submitted a clarification letter from M/s. Range Pharmaceuticals addressed to DRAP wherein it is stated that in the COPP, the amount of active ingredient, enrofloxacin, is expressed per ml (200mg/ml) whilst the excipients are expressed per litre (L). Whereas both the active ingredient & excipients mentioned in the SmPC & composition provided under form 5A were expressed per ml. The COPP unit description is due to the way the product content is recorded in our Registration filling with our Regulatory Body. However, we confirm that the attached COPP, SmPc, & Composition provided under heading of

			composition on form 5A are equivalent, which are as follow: Each ml of Quinosol 20% solution contains: Active substance: Enrofloxacin… 200mg Excipients: Potassium hydroxide… 32mg Propylene glycol…200mg Sodiumthiosulfite…1.25gm Benzyl alcohol… 0.01ml Purified water… 0.05ml
	2	Justification on scientific basis for addition of 2 % overage of enrofloxacin in master formulation.	The additional 2% overage of enrofloxacin in master formulation is added to compensate the processing or handling loss during production.
	3	Long term stability data of API is for Neomycin Sulphate instead of Enrofloxacin.	Long term stability data of API (Enrofloxacin.) is submitted.
	4	In Finished Product Specifications under microbial contamination test, limits of microbial count are not mentioned. Mention the limits of microbial count.	Firm has submitted that microbial contamination test limits were established according to BP 2012 (Appendix XVID, Microbiological Quality of Non-sterile Pharmaceutical Preparations & Substance for Pharmaceutical use.)
	Decision: Approved with innovator's specification.		
936.	Name and address of Applicant	M/s Vet line international Flat # 55/5, first floor, main shadman market, Lahore.	
	Detail of Drug Sale License	Address: Vet line international Flat # 55/5, first floor, main shadman market, Lahore. Validity: 11/02/2019 Status: Licence to sell as a "Distributer"

Inspection Report

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Apixa 2.5mg & 5mg (Apixaban) Tablets by M/s. Pharmatec Pakistan (Private) Ltd., S.I.T.E, Karachi.

Reference No: F.13-11/2017-PEC (Pt) dated 23rd January, 2019.
Investigation Date and Time: 30th April, 2019 (Morning).

Investigation Site: Factory premises of M/S. Pharmatec Pakistan (Private) Ltd., D-86/A, S.I.T.E, Karachi.

Background:

Chairman Registration Board considered the applications of M/S. Pharmatec Pakistan (Private) Ltd., D-86/A, S.I.T.E, Karachi for registration of Apixa 2.5mg & 5mg (Apixaban) Tablets and constituted a three-member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Ghulam Sarwar, Dean, Faculty of Pharmacy, Jinnah University for Women, Karachi. (Member Registration Board) Islamabad.
2. Dr. Saif ur Rehman Khattak, Director, CDL, DRAP, Karachi.
3. Mr. Abdul Waheed, Assistant Director, CDL, DRAP, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

APIXA 2.5MG AND 5MG TABLETS

Sr.#	Question	Observation bypanel
1.	Doyouhavedocumentsconfirmingthe import of Apixaban API including approvalfromDRAP?	Thefirmhasimported 0.2 kg Apixaban API (Lot No. 20170204V) fromM/S. Jiangxi Synergy Pharmaceutical Co., Ltd., China. Approval fromDRAP Office,Karachi was obtained on August, 2017.
2.	Whatwastherationalebehind selecting the particularmanufacturer ofAPI?	There is proper vendor evaluation process being implementedincluding auditchecklist,Testingof the APIand GMP approvalbycompetentauthority along with the DMF.
3.	Doyouhavedocumentsconfirmingthe importof Apixaban reference standard and impuritystandard?	The firm has document confirming the import of Apixaban (API), working standardoftheAPIand 8 major impuritiesfromthe manufacturerofthe API.
4.	Do you have certificate of Analysis of the API,referencestandardoftheAPIand impuritystandard?	ThefirmhascertificateofanalysisfortheAPI,working standardofthe API and 8 impurities standards.
5.	Do youhaveGMPcertificateofAPI manufacturers issued by regulatory authoritiesofcountryoforigin?	The firm has valid GMP certificate of the API manufacturer issued by the concerned provincial Regulatory Authority of thecountryoforigin.
6.	DoyouuseAPImanufacturermethodof testingfortestingAPI?	Thefirmhasused API manufacturer methodfor testing API.
7.	Doyouhavestabilitystudiesreporton API?	The firmhasstabilitystudies reports on the API.
8.	Ifyes,whetherthestabilitytestinghas beenperformedasperSIM methodand degradation products have been quantified?	The stabilitytestinghasbeen performed as per SIM method and major degradationproducts (02) have been quantified.
9.	Doyouhavemethodforquantifyingthe impuritiesinthe API?	The firmhasmethodforquantifying the impurities in the API.
10.	Doyouhavesomeremainingquantitiesof the API, its reference standard and impuritiesstandards?	ThefirmhasremainingquantitiesoftheAPI, working standard of API and 08 impurity standards.
11.	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipients including Avicell PH 102, Povidone, Talc, Magnesium Stearate, Opadry.

12.	Doyouhavedocumentsconfirmingthe importoftheusedexcipients?	The firm has documents confirming the import of all excipients used.
13.	Doyouhavetestreportsandotherrecords on theexcipients used?	The firmhastest reports and other records on the excipient used.
14.	Do you have written and authorized protocols for thedevelopmentof Apixa Tablets?	The firmhas written and authorized protocols for the developmentof Apixa 2.5mg and 5mg Tablets.
15.	Have you performed Drug-excipient compatibilitystudies?	Drug excipients compatibility testing has not been performed as formulations are same as that of innovator tablets.
16.	Have you performed comparative dissolution studies?	The firm has performed comparative dissolution studies of 2.5mg and 5mg Apixa tablets against innovator tablets (Eliquis 2.5mg and 5mg tablets manufactured by BMS, USA) and their tablets have shown comparable dissolution profiles to that of the innovator tablets.
17.	Doyouhaveproductdevelopmentsection?	The firm has product development section with equipment for manufacturing of tablet dosage form. The analytical part has been performed in routine QC Lab. The R&D section needs improvements in terms of segregation of operations and HVAC system.
18.	Do you have necessary equipment availableinproduct developmentsection fordevelopmentof Apixa Tablets?	As above.
19.	Arethe equipment in product developmentsection qualified?	The available equipment in product development section are qualified.
20.	Do you have proper maintenance calibration / re-qualificationprogramfor the equipmentusedin PD section?	The firm has proper maintenance/ calibration withre-qualificationprogramfor the equipment used for product development.
21.	Do you have qualified staff in product development section with proper knowledge and training in product development?	The firm has a team of 04 technicalpersons (03 Pharmacist & 1 Chemist) for product development. These personnel have proper knowledge and training in product development.
22.	Have you manufactured three stability batches for the stability studies of Apixa tablets asrequired?	The firm has manufactured three stability batches of: 1. Apixa Tablets 2.5mg havingbatch # 17PD066APIT01(A), 17PD066APIT01(A) and 17PD092APIT04 (A) eachof5000 tablets batchsize. 2. Apixa Tablets 5mg havingbatch # 17PD067APIT01(A), 17PD067APIT01(B) and 17PD083APIT02 (A) eachof5000 tablets batchsize. The tablets are packed in Alu/PVC blisters ofpacksize 14's and 10's for 5mg & 2.5mg strengths respectively.
23.	Doyouhaveanycriteriaforfixingthe batchsize ofstabilitybatches?	The criteria for fixing the batch size of stability batches is the equipment size (Maximum 5kg) of tablets and the number of tablets required for whole stability testing.
24.	Do you have complete record of production ofstabilitybatches?	The firm hascompleterecordofproductionofstability batches. Allthe LogBooks are properly maintained.
25.	Do you have protocols for stability testing of stability batches?	The firm has detailed protocols for stability testing of stability batches.
26.	Do you have developed and validated the method for testing of stability batches?	The firm has used the API related substance method for testing of their stability batches. The stability indicating nature of the method has been supported by forced degradation studies. Spiking studies also have been performed recently. The method is also completely validated.
27.	Doyouhavemethodtransferstudiesin casewhenthemethodoftestingbeing usedbyyourfirmisgivenbyanyother lab?	The firm has performed complete validation studies.

28.	Doyouhavedocumentsconfirmingthe qualificationofequipments/instruments being used in the test and analysis of Apixaban APIand the finished drug?	The firm has proper documents confirming the qualificationofequipment/instrumentsbeingusedinthe testandanalysis ofthe APIand the finished drug.
29.	Do your method of analysis stability indicating?	The firm's method of analysis is stability indicating.
30.	Do your HPLC software 21CFR Compliant?	The HPLC software is 21CFR Compliant as per record available with the firm and as evidenced by the practices.
31.	Can you show Audit trail reports on Apixaban testing?	Audittrailonthetestingreports is available.
32.	Do you have some remaining quantitiesof degradation products and stability batches?	Thefirmhasremainingquantitiesof two degradation products (major degradation products) and stability batches.
33.	Do you have stability batches kept on stabilitytesting?	The firm has completed accelerated stability testing on the three stability batches of both strengths. The real time stability testing is in progress on all the three stability batches. Degradation products quantification has been made on 12 months studies, however, testing has been performed throughout as per SIM method.
34.	Doyouhavevalidcalibrationstatus for the equipment's used in Apixa Tablets production andanalysis?	Thefirmhasvalidcalibrationstatusfortheequipmentused in Apixa 2.5mg and 5mg Tablets production and analysis.
35.	Do proper and continuous monitoring and control are available for stability chamber?	Continuous power supply and monitoring are available for stability chambers.
36.	Do related manufacturing area, equipment, personnel and utilities berated as GMP compliant?	The related manufacturing area, equipment, personnel and utilities are rated as GMP compliant.

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Apixa 2.5mg and 5mg (Apixaban) Tablets is verifiable to satisfactory level.
2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and suited for the manufacturing of Apixa 2.5mg and 5mg (Apixaban) Tablets.

Recommendations:

1. Apixa 2.5mg and 5mg (Apixaban) Tablets are recommended for registration in the name of the firm.
2. The API falls in BCS Class III (Highly soluble and Poorly permeable) and has problematic bioavailability and the reference product (EMA Assessment Report on Eliquis Tablet) has shown significant variation (20%-30%) within participants, therefore, the panel recommends post-registration bioequivalence studies and post-marketing safety studies on Apixa tablets also.

Decision: Registration Board decided to approve registration of "Apixa 2.5mg and 5mg (Apixaban) Tablets by M/S. Pharmatec Pakistan (Private) Ltd. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

940.	Name and address of manufacturer / Applicant	M/s Getz Pharma (Pvt.) Ltd. 29-30/27, Korangi Industrial Area, Karachi.
	Brand Name +Dosage Form + Strength	EstineTablets 10mg
	Composition	Each Oro-dispersible tablet contains: Ebastine…10mg
	Diary No. Date of R& I & fee	Dy.No. 4910; 06-06-17: Rs. 20,000 & Rs. 30,000
	Pharmacological Group	H1 receptor antagonist
	Type of Form	Form 5D
	Finished product Specifications	Manufacturer's specifications
	Pack size & Demanded Price	10's: Rs. 250.00/-
	Approval status of product in Reference Regulatory Authorities	Approved in ANSM
	Me-too status (with strength and	N/A

	dosage form)	
	GMP status	Based on the area inspected, the people met and the documents reviewed, the considering the findings of the inspection, including the observations listed in the inspection report, M/s Getz Pharma, Karachi was considered to be operating at an acceptable level of compliance with GMP guidelines as of today.

Inspection Report

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Estine (Ebastine) 10mg & 20mg Oro-dispersible Tablets by M/s Getz Pharma Pvt. Limited, 29-30/27, Korangi Industrial Area , Karachi.

Reference No: F.13-11/2017-PEC (Vol.I) dated 25th April, 2019.
Investigation Date and Time: 6th May, 2019. (Forenoon)
Investigation Site: Factory premises of M/s Getz Pharma Pvt. Limited, 29-30/27, Korangi Industrial Area, Karachi.

Background:

Chairman Registration Board considered the applications of M/s Getz Pharma Pvt. Limited, 29-30/27, Korangi Industrial Area, Karachi for registration of Estine (Ebastine) 10mg & 20mg Oro-dispersible Tablets and constituted a three member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Rafeeq Alam Khan, Meritorious Professor, Dean Faculty of Pharmacy, Ziauddin University. (Member Registration Board)
2. Dr. Kirshan Das, Assistant Director, DRAP, Karachi
3. Dr. Affan Ali Qureshi, Assistant Director, CDL, DRAP, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Details of Investigation:
Estine (Ebastine) Tablets 10mg & 20mg, Oro-dispersible Tablets

Q. No.	Question	Observation by panel
1	Do you have documents confirming the import of Ebastine API including approval from DRAP?	The firm has imported "Ebastine API" from M/s Bal Pharma Ltd, India and has approval from DRAP for import vide License No.1657/17-DRAP (K) dated 21.06.2017.
2	What was the rationale behind selecting the particular manufacturer of API?	There is proper vendor evaluation process being implemented by the firm and the rationale behind vendor selection is controlled through Postal Audit checklist / Physical Site Inspection and availability of valid GMP approval by competent authority. Further, M/s Bal Pharma Ltd, India has Certificate of Suitability (CEP) for Ebastine API issued by European Directorate for the Quality of Medicines & HealthCare (EDQM).
3	Do you have documents confirming the import of Ebastine reference standard and	Firm has imported Ebastine working standard from M/s Bal Pharma Ltd, India vide invoice No. SAM-010 dated

	impurity standards?	14.06.2017. For impurity testing, firm has used Relative Retention Time (RRT) for location and calculation of impurities as provided by Ph. Eur.
4	Do you have certificate of Analysis of the API, reference standards and impurity standards?	The firm has certificate of analysis for API and working standard.
5	Do you have GMP certificate of API manufacturer issued by regulatory authority of country of origin?	Firm has provided copy of valid GMP certificate of M/s Bal Pharma Ltd, India valid till 04-02-2020.
6	Do you use API manufacturer method of testing for testing API?	The firm has used method of testing adopted from European Pharmacopeia (Ph. Eur) monograph for Ebastine API and the same has been verified as per USP chapter 1226 (verification of compendial procedure)
7	Do you have stability studies reports on API?	The firm has 5 years real time stability study data provided by API manufacturer.
8	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing has been performed as per SIM method and degradation products have been quantified.
9	Do you have method for quantifying the impurities in the API?	Yes, the firm has method for quantifying the impurities in the API adopted from European Pharmacopeia (Ph. Eur) monograph for Ebastine API.
10	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has some remaining quantities of the API and working standard.
11	Have you used pharmaceutical grade excipients?	The firm have used pharmaceutical grade excipients which include Microcrystalline Cellulose (Avicel PH-101), Mannitol, Poloxamer 188, Povidone K-30, Hypromellose, Carboxymethylcellulose Calcium, Colloidal Anhydrous Silica, Croscarmellose Sodium, Crospovidone, Aspartame, Trusil Powder Orange Flavour and Magnesium Stearate.
12	Do you have documents confirming the import of the used excipients?	The firm has necessary documents confirming the import of the used excipients.
13	Do you have test reports and other records on the excipients used?	The firm has test reports and other records on the excipients used.
14	Do you have written and authorized protocols for the development of Ebastine tablets?	The firm has written and authorized protocols for the development of Ebastine Oro-dispersible Tablets 10mg & 20mg.
15	Have you performed Drug-excipient compatibility studies?	The firm has performed Drug-excipient compatibility studies and concluded that the excipients used in the proposed formulation of Ebastine Oro-dispersible Tablets 10mg & 20mg are compatible with the API.
16	Have you performed comparative dissolution studies?	The firm has used dissolution criteria as per Japanese Pharmacopoeia monograph for Ebastine Oro-dispersible Tablets and the product complies. Further, this product is orally dispersible which disintegrates very rapidly. The release is more than 85% within 15 minutes, therefore, F2 waiver is applicable.
17	Do you have product development (R&D) section	The firm has dedicated product development (R&D) section with requisite manufacturing and analysis facilities.
18	Do you have necessary equipment available in product development section for development of Ebastine tablets?	The firm has necessary equipment available in product development section for development ofEbastine Oro-dispersible Tablets 10mg & 20mg.
19	Are the equipment in product development section qualified?	The available equipment in product development section are qualified.

<table>
<tr><td>20</td><td>Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?</td><td>The firm has proper maintenance / calibration with re-qualification program for the equipment used in PD section.</td></tr>
<tr><td>21</td><td>Do you have qualified staff in product development section with proper knowledge and training in product development?</td><td>The firm has qualified staff in product development section with proper knowledge and training in product development. There are 50 Scientists (Pharmacist & Chemist) working only in R&D Section.</td></tr>
<tr><td>22</td><td>Have you manufactured three stability batches for the stability studies of Ebastine tablets as required?</td><td>The firm has manufactured three stability batches of Ebastine Oro-dispersible Tablets 10mg & 20mg. Packed in Alu-Alu blisters:
<table>

<tr><td>30</td><td>Do your HPLC software 21CFR Compliant?</td><td>The HPLC software is 21CFR Compliant as per record</td></tr>
</table>

		available with the firm. The firm have WATER's HPLC with Empower 3 software having following features: • Have Audit trail • Have backup system • Have Data traceability • Have Data achieving system • Have data integrity • Have Data security System Security Policy
31	Can you show Audit trail reports on Ebastine testing?	Audit trail on the testing reports is available.
32	Do you have some remaining quantities of degradation products and stability batches?	The firm has remaining quantities of stability batches.
33	Do you have stability batches kept on stability testing?	The firm has three stability batches kept on real time stability testing. 12 months real time stability data is available.
34	Do you have valid calibration status for the equipments used in Ebastine tablets production and analysis?	The firm has valid calibration status for the equipment used in production and analysis of Ebastine Oro-dispersible Tablets 10mg & 20mg.
35	Do proper and continuous monitoring and control are available for stability chamber?	Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
36	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Related manufacturing area, equipment, personnel and utilities are in compliance.

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Estine (Ebastine) 10mg & 20mg Oro-dispersible Tablets is verifiable to satisfactory level.
2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and well suited for the manufacturing of Estine 10mg & 20mg Oro-dispersible Tablets.

Recommendations:

The firm may kindly be granted necessary registration of Estine 10mg & 20mg Oro-dispersible tablets.

Decision: Registration Board decided to approve registration of "Ebastine tablets 10 mg by M/s Getz Pharma (Pvt) Ltd., Karachi, with the change in brand name. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Queries & Response of the firm		
Sr. No.	**Queries**	**Response of firm & its Evaluation by PEC**
1.	Submit Approval of API/DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin as only Copy of DML has been submitted by the firm.	The applicant has submitted the following documents: ***GMP Certificate****:* ***Issued to:*** *M/s Spansules Formulations, India.* ***Issued on****: 05-09-2018* ***Issued by:*** *Drug Control Administration, Telangana, India.* ***Validity:*** *One year from the date of Issue.*
2.	API & working standards were purchased from M/s Spansules Formulations & Impurity standard from Everest organics limited is used, Clarify/Justify.	In response to this query applicant has submitted a statement by M/s Spansules Formulations which is stated below: *With reference to our supply of Dexlansoperazole DDR pellets to our customer M/s Dyson Research Laboratories (Pvt) for their trial & stability studies, we confirm that we are pellets manufacturer & we purchase API Powder for pellets manufacturing from Indian manufacturer M/s Everest Organic Ltd.* *Hence our customer purchased impurities directly from Everest Organics Ltd. On our recommendation.*
3.	You have submitted COA for Dexlansoperazole DDR pellets 17.0% w/w in which the manufacturer of API did not performed impurity profiling of pellets. Clarify/Justify.	In response to this query applicant has submitted a statement by M/s Spansules Formulations which is stated below: *With reference to our supply of Dexlansoperazole DDR pellets to our customer M/s Dyson Research Laboratories (Pvt) for their trial & stability studies, we confirm that we are pellets manufacturer in india & pellets are ready to fill product made with the mixing with several inactives so impurity profile cannot be tested in biproduct. Since we have conducted stability studies of pellets of Dexlansoprazole, impurities profile was not required.*
4.	Batch numbers of trial batches for applied drug product i.e. Dexal Capsule 30mg is T01, T02, T03 which is same to that of Dexal Capsule	The Applicant has submitted its clarification: We are using "T"-series for our trial batches only, in which numerical figures represents n = number of trials

	60mg i.e. T01, T02, T03. Justify/Clarify how the firm has distinguished between trial batches of two strength of applied drug product.	conducted (i.e. n= 1, 2, 3, 4, 5….). Furthermore, products can be identified against their strengths as Dexal capsule 30mg & 60mg respectively & labelling for trail packs done accordingly to distinguish between same products having different strengths.
5.	Dissolution test at first month studies of all three trial batches of Dexal capsule 30mg & Dexal capsule 60mg is not performed, Clarify.	The applicant has submitted the following justification: *Dissolution test for trial batches T01, T02, T03,was not performed for Ist month only, while all other tests including Assay were performed & were with Specified limits. So you are requested to consider our stability data for other months for evaluation. Since the dissolution results of 0, 3 & 6 months (as per ICH guidelines) comply with specifications; product anyhow is stable as per reports of stability.* However, dissolution test at 3rd month in real Time Stability studies has been carried out for only one trail batch for Dexal capsule 30mg & 60mg.

Inspection Report M/s Dyson research laboratories 28 km, Ferozepur Road Lahore, applied for registration of Dexal Capsule 30mg& Dexal Capsule 30mg with following composition:

Dexal Capsule 30mg
Each capsule contains:
Dexlansoprazole…30mg, &

Dexal Capsule 60mg
Each capsule contains:
Dexlansoprazole…60mg,

Chairman Registration Board constituted a three member panel for on-site investigation to confirm the genuineness/authenticity of submitted stability data and associated documents, import of API, quality, specification, test analysis, facilities etc. Panel was requested to conduct inspection of the firm to verify the submitted data by the firm and to submit a report on approved format for further consideration of case by the Registration Board along with the clarification of following point.
Why the dissolution test at 3rd month of Real Time stability studies has not been carried out for two stability batches for Dexal capsule 30mg (batch no. T02, T03) and Dexal capsule 30mg (batch no. T02, T03).

Composition of Panel:

1. Director, DTL, Lahore
2. Area FID, Lahore.
3. Mst. Haleema Sharif, Assistant Director, PEC, DRAP, Islamabad.

Scope of Inspection:

On-site investigation to confirm the genuineness/authenticity of submitted stability data and associated documents, import of API, quality, specification, test analysis, facilities

Tools for Inspection:

The Inspection was conducted by using a structured questionnaire approved by DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of inspection is summarized as under:

Detail of Inspection:

Q. No.	Question	Observation by panel

1.	Do you have documents confirming the import of API including approval from DRAP?	**Dexlansoperazole pellets 17% w/w:** Copy of commercial invoice stating following information is submitted by the firm. **ADC attestation date:**03-02-2017 **Exporter/manufacturer:** M/s Spansules Formulations, India. Batch No. DLT/SF/0010117 Quantity: 3.983 Kgs
2.	What was the rationale behind selecting the particular manufacturer of API?	Supplier was qualified based on pre-shipment samples, GMP certification, regulatory and documents compliant.
3.	Do you have documents confirming the import of reference standard and impurity standards?	The firm imported Dexlansoerazole working standards from Everest Laboratories (Manufacturer of Dexlansoprazole API) through Indentor Neon Pharmaceuticals. The firm has submitted Invoices for purchase & Air way Bill for influx of Impurity Standards for both impurities: Sulphide, Sulphone. Invoice #: Exp/091/17-18 **Sulphide;** Batch # Sulphide/WS-01/17 Mfg: 10/17 Quantity: 100mg **Sulphone;** Batch # Sulphone/WS-01/17 Mfg: 10/17 Quantity: 100mg
4.	Do you have certificate of Analysis of the API, reference standards and impurity standards?	The firm has submitted COAs of following APIs as obtained from source mentioned below: Dexlansoperazole pellets
5.	Do you have GMP certificate of API manufacturer issued by regulatory authority of country of origin?	The applicant has submitted the following documents: **GMP Certificate:** **Issued to**: M/s Spansules Formulations, India. **Issued on**: 05-09-2018 **Issued by**: Drug Control Administration, Telangana, India. **Validity**: One year from the date of Issue.
6.	Do you use API manufacturer's method of testing for testing API?	The firm stated that they have used API testing method of source that is M/s Spansules Formulations, India.
7.	Do you have stability studies reports on API?	Yes
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	Yes the stability testing has been performed as per SIM method and degradation products have been quantified
9.	Do you have method for quantifying the impurities in the API?	The firm has method for calculating/quantify known impurities in API.
10.	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has some remaining quantities of the API, reference standard and impurities standards (sulphone & shulphide Impurity standards).
11.	Have you used pharmaceutical grade excipients?	No excipients have been used in the manufacturing of applied formulation

<table>
<tr><td>12.</td><td>Do you have documents confirming the import of the used excipients?</td><td>Firm has used ready to fill (semi-finished) dexlansoperazole pellets for fabrication of applied formulation; No excipients have been used in the manufacturing of applied formulation.</td></tr>
<tr><td>13.</td><td>Do you have test reports and other records on the excipients used?</td><td>Firm has used ready to fill (semi-finished) dexlansoperazole pellets for fabrication of applied formulation; No excipients have been used in the manufacturing of applied formulation.</td></tr>
<tr><td>14.</td><td>Do you have written and authorized protocols for the development of Dexal 30mg & 60mg Capsule?</td><td>The firm has written and authorized protocols for the development of Dexal 30mg & 60mg Capsule.</td></tr>
<tr><td>15.</td><td>Have you performed Drug-excipients compatibility studies?</td><td>N/A (Since firm is refilling pellets in capsules)</td></tr>
<tr><td>16.</td><td>Have you performed comparative dissolution studies?</td><td>The firm has not performed comparative dissolution studies at three pH values that are 1.2, 4.5 and 6.8. Instead, they have performed comparative studies with the Innovator Product Dexilant capsule 30mg.
Batch #: 1503372
Mfg date: 12-2019
Exp date: 11-2019</td></tr>
<tr><td>17.</td><td>Do you have product development (R&D) section</td><td>Yes, the firm has product development (R&D) section.</td></tr>
<tr><td>18.</td><td>Do you have necessary equipment available in product development section for development of Dexal 30mg & 60mg Capsule?</td><td>Yes, the firm has necessary equipment in R & D section though filling for the development of for Dexal 60 mg Capsule has been carried in General Production Capsule Section of the firm having commercial scale Capsule filling machine.</td></tr>
<tr><td>19.</td><td>Are the equipment in product development section qualified?</td><td>The equipment used in production and analysis of trial batches are qualified.</td></tr>
<tr><td>20.</td><td>Do you have proper maintenance/calibration/re-qualification program for the equipment used in PD section?</td><td>The firm has Internal & External calibration program for the equipment used in production and QC.</td></tr>
<tr><td>21.</td><td>Do you have qualified staff in product development section with proper knowledge and training in product development?</td><td>Yes , the firm has qualified staff in product development section with proper knowledge and training in product development</td></tr>
<tr><td>22.</td><td>Have you manufactured three stability batches for the stability studies of Dexal 30mg & 60mg Capsule as required?</td><td>The firm has manufactured following three stability batches for the stability studies of Dexal 30mg & 60mg Capsule
<table>
<tr><th>S. No.</th><th>Stability Batches</th><th>Batch Sizes</th></tr>
<tr><td>a.</td><td>T-01</td><td>2,200</td></tr>
<tr><td>b.</td><td>T-02</td><td>2,200</td></tr>
<tr><td>c.</td><td>T-03</td><td>2,200</td></tr>
</table></td></tr>
<tr><td>23.</td><td>Do you have any criteria for fixing the batch size of stability batches?</td><td>The criteria for fixing batch size depend on the quantity required for stability testing.</td></tr>
<tr><td>24.</td><td>Do you have complete record of production of stability batches?</td><td>The firm has complete record of production of stability batches.</td></tr>
<tr><td>25.</td><td>Do you have protocols for stability testing of stability batches?</td><td>The firm has controlled protocol of testing of stability batches of applied formulation at 30 $C^{o}\pm$ 2 C^{o} & 65 % RH $\pm$ 5 % with them for real time studies and at 40 $C^{o}\pm$ 2 C^{o} & 75 % RH $\pm$ 5 % for accelerated studies.</td></tr>
<tr><td>26.</td><td>Do you have developed and validated the method for testing of stability batches?</td><td>The firm has adopted a Supplier method for testing of finished product which has been used in the stability</td></tr>
</table>

		studies. The firm has also submitted a report verifying the validation studies of the analytical method covering following parameters of validation: i. Specificity ii. Linearity iii. Precision iv. Ruggedness
27.	Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?	The firm has not conducted method transfer studies. According to the firm they have developed their method of testing in their own laboratory hence no need of such method transfer studies.
28.	Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of APIs and the finished drug	The firm showed documents confirming the qualification of equipment / instruments being used in the test and analysis of APIs and the finished drug.
29.	Do your method of analysis stability indicating?	The firm method of testing is stability indicating which has been used in stability studies of their finished product. The firm has conducted impurity testing one time at 6 month time point.
30.	Do your HPLC software is 21CFR compliant?	Firm has 1 HPLC dedicated for R&D testing at the time of studies conducted and it is 21 CFR compliant. This HPLC system is used for stability studies of Dexal 30mg & 60mg Capsule. The HPLC used for the stability studies is 21-CFR compliant. However, the record from logbooks, analytical test reports was randomly found verifiable onsite. A complete trail of such testing was found available and verifiable.
31.	Can you show Audit Trail reports on Dexal 30mg & 60mg Capsule testing?	A complete trail of such testing was found available and verifiable from and software of HPLC.
32.	Do you have some remaining quantities of degradation products and stability batches?	The firm has remaining quantities of stability batches.
33.	Do you have stability batches kept on stability testing?	The firm has completed the accelerated stability testing on the three stability batches of Dexal 30mg & 60mg Capsule. Also the firm has stability batches kept on stability testing for the real time stability testing up to 12 months on all three batches of Dexal 30mg & 60mg Capsule.
34.	Do you have valid calibration status for the equipments used in production and analysis?	The firm has valid calibration status for the equipments used in production and analysis of Dexal 30mg & 60mg Capsule as per record available during onsite visit.
35.	Do proper and continuous monitoring and control are available for stability chamber?	Continuous power supply and monitoring with back up from generator and UPS are available for stability chamber to address the problem of interrupted power supply or load shedding. Digital data loggers are available for continuous monitoring of temperature and humidity conditions of stability chamber.
36.	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	The related manufacturing area, equipment, personnel and utilities are rated as GMP compliant.
37.	"Dissolution test at 3rd month of Real Time stability studies has not been carried out for two stability batches for Dexal capsule 30mg (batch no. T02, T03) and Dexal capsule 30mg (batch no. T02, T03)."	1. Dissolution testing of batch No. T02 & T03 of both strengths 30 mg & 60 mg for real time study at 3rd month was missed unintentionally by confusion. 2. Testing of dissolution of batch No. T01 for both strengths 30 mg & 60 mg may be considered instead

		because the skipped batches have the same granules filled in capsules and maintained at real time study condition. 3. All other tests for T02 & T03 were performed on 3rd month, & were within limits. 4. We have submitted 9 months study of real time stability where T02 & T03 complied all the specifications, through 9 months period. 5. In the light of point 4, batch No T02 & T03 Complied dissolution specs at 6th & 9th months so though unintentional skipping of test at 3rd month was done but product is showing valid stability results. Company humbly request to consider all other testing at all time points a valid stability of products & grant please registration accordingly.

Conclusion & Recommendations

The firm was also advised to keep record of raw data of the stability testing.

On the basis of risk based approach the genuineness / authenticity of stability data submitted by the firm for registration of Dexal Capsule 30mg & Dexal Capsule 60mg is verifiable to a satisfactory level. The related manufacturing area, equipment, personnel and utilities are GMP compliant and suitable for the manufacturing of Dexal Capsule 30mg & Dexal Capsule 60mg, therefore, the panel recommends the registration of above stated product in the name of the manufacturerM/s Dyson research laboratories 28 km, Ferozepur Road Lahore.

Decision: Registration Board decided to approve registration of "Dexal Capsule 30mg & Dexal Capsule 60mg (Dexlansoprazole) by M/S. Dyson research laboratories, Lahore. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

b. EXEMPTION FROM ONSITE VERIFICATION OF STABILITY DATA

943.	Name and address of manufacturer / Applicant	M/s Highnoon Laboratories, 17.5 Km, Multan Road, Lahore.
	Brand Name +Dosage Form + Strength	Apiban 2.5mg tablet
	Composition	Each film coated tablet contains: Apixaban …… 2.5mg
	Diary No. Date of R& I & fee	Dy. No. 97; 01-08-2016; Rs.20,000/- (01-08-2016)
	Pharmacological Group	Antithrombotic agents
	Type of Form	Form 5
	Finished product Specification	USP
	Pack size & Demanded Price	10's, 14's,20's, 30's
	Approval status of product in Reference Regulatory Authorities.	Approved by USFDA
	Me-too status	Not available
	GMP status	GMP certificate based upon evaluation conducted on 6-7-2017
	Remarks of the Evaluator	• Firm has submitted Form 5-D (dated 20-12-2017) alongwith differential fee of Rs. 30,000/- • Stability data as per directions of 251st meeting of Registration Board shall be submitted.
	Previous Decision	Registration Board in its 277th meeting deferred the case for submission of stability studies data as per directions of 251st meeting of Registration Board.
	Evaluation by PEC	Now the firm has submitted stability studies of the applied formulation.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API	Applicant has submitted Photocopy of COA of Apixaban having following information on it. **For API Apixaban:** **Batch No**: 1704002291 **Manufacturer:**M/s Alembic Pharmaceuticals Limited, India.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted following: **Copy of GMP certificate for Apixaban Manufacturer:** Issued To: M/s. Alembic Pharmaceuticals, India. Issued By: Food & Drug Administration, Gandhinagar, Gujrat State, India. Issued On: 02 August, 2016 Valid up till: 01-08-2018.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Applicant has submitted ADC attested invoice stating following information on it: **For Apixaban:** **Invoice #:** 90046555 (dated: 20-09-2017) **Manufacturer of API**: M/s. Alembic Pharmaceuticals Ltd., India, Survey No. 842, 843, Vill. Karakhadi, Tal.Padra, Dist. Vadodara-391450, Gujarat, India. **Quantity of API**: 1kg **Lot No.** 1704002291 **Cleared on/Attested on**: 16-01-18
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes

7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

Data for exemption from On-site investigation of submitted stability data
Apixaban 2.5mg Tablets

Administrative Portion

01	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has quoted the onsite panel inspection for Nebvax (Nebivolo + Valsartan) 5/80mg Tablet, Daplozmet 5/850mg Tablet & Daplozmet 5/1000mg Tablet conducted on 1st January, 2019 & presented in 288th RB meeting as a reference inspection for instant dosage form. 1. Is your HPLC software 21CFR compliant? — Audit trail was active on all HPLC systems used in the method validation and stability study. Individual user log in and IDs were available. 2. Is proper and continuous monitoring and control available for stability chamber? — Yes, monitoring and control was available for the stability chambers provided. Firm was advised to install alarm system in stability chamber and perform challenge test.
02	Documents for the procurement of API with approval from DRAP (in case of import).	Applicant has submitted ADC attested invoice stating following information on it: **For Apixaban:** **Invoice #:** 90046555 (dated: 20-09-2017) **Manufacturer of API**: M/s. Alembic Pharmaceuticals Ltd., India, Survey No. 842, 843, Vill. Karakhadi, Tal.Padra, Dist. Vadodara-391450, Gujarat, India. **Quantity of API**: 1kg **Lot No.** 1704002291 **Cleared on/Attested on**: 16-01-18
03	Documents for the procurement of reference standard and impurity standards.	.
04	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted following: **Copy of GMP certificate for Apixaban Manufacturer:** Issued To: M/s. Alembic Pharmaceuticals, India. Issued By: Food & Drug Administration, Gandhinagar, Gujrat State, India. Issued On: 02 August, 2016 Valid up till: 01-08-2018.
05	Mechanism for Vendor pre-qualification.	Firm has submitted Vendor Qualification Flow Chart.
06	Certificate of analysis of the API, reference standards and impurity standards.	**For API Apixaban:** Photocopy of COA of Batch No. 1704002291 issued by M/s Alembic Pharmaceuticals Limited, India is submitted. **Working standards:** The firm has submitted the copy of COA of working Standards (Apixaban) Batch No. WS/APN/001, Quantity 0.2gm, provided by the API Manufacturer - M/s Alembic Pharmaceuticals Limited, India is submitted.
07	Documents for the procurement of excipients used in product development?	Firm has submitted documents for procurement of excipients used in product development.

Evaluation by PEC:

Sr. No.	Deficiencies	Justification
1.	Documents for the procurement of reference standard and impurity standards are not submitted, clarify/Justify	The related substances in API % FPP are evaluated by the validated method the related substance is calculated by relative retention time which does not require impurity standard. For identification of the known impurities (Impurity A, Impurity B, Impurity C, Impurity D) the relative retention time (i.e. with reference to Apixaban: Impurity A= about 2.19; Impurity B= about 0.45; Impurity C= about 1.26; Impurity D= about 2.82; Apixaban= about 1.00) is used. The API Manufacturer testing procedure and highnoon method of testing for finished product are attached for reference A-1.
2.	Batch size for each of three trials is 3800 tablets as per you reconciliation sheet; out of which 400 tablets are blistered, 350 tablets were kept on stability. Justify/clarify that 350 tablets are sufficient for test/ analysis of each of the trials at all time points up till proposed shelf life. Moreover, where the remaining tablets which were not blistered were kept?	Total Tablets required for Dissolution=6 Disintegration=6 Assay/Purity=30 Total Tablets=42 Total Intervals (Real Time Stability)=6 Total Intervals (Accelerated Stability)=2 Total Intervals=8 Total Tablets Required=8*42=336 So total 350 tablets are placed in stability and the no of required tablets for testing are 336 and remaining quantities of the tablets are with the product Development Department.
3.	Analytical method used for test/analysis of applied drug product is in house or supplier, Clarify.	The method is in-house and is validated. The analytical method validation report was submitted in file no.1, Annex 13. However a copy of report is enclosed.
4.	Submit stability data of API by its manufacturer, as it is not submitted.	The stability data is enclosed.
5.	Time intervals for sampling in CDP are 10, 20, 30, & 45 minutes, which are different from that recommended by guidelines, clarify/justify.	As per item 10.3.3 of WHO Technical Report series No.992, 2015, Annes & Multisource (generic) pharmaceutical products; guidelines on registration requiremets to establish interchangeability. "10.3.3 Disssolution profile comparison for biowavers based on dose-proportionality of formulation As for biowaivers based on BCS, a model independent mathematical approach (e.g. F2 test) can used for comparing the dissolution profiles fo two products. The dissolution of the two products

		(reference strength and additional strength) should be measured under the same test condition. The dissolution sampling times for both reference strength and additional strength profiles should be the same for example. • Fro immediate release products 5,10,15,20,30,45 and 60 minutes. • For 12 hour extended release products 1,2,4,6,8 and 12 hours • For 24 hour extended release products 1,2,4,6,8,16 and 24 hours.
6.	Evidence of purchase of reference product eliquis for CDP.	Receipt for Eliquis purchase (enclosed)
7.	Submit chromatograms for 3rd month accelerated stability studies for all three trial batches.	The chromatograms are attached in Annexure 16 of already submitted file NO.2. However copies of chromatogram for 3rd month accelerated stability studies for all three trial batches are attached for your reference.
8.	According to information on chromatograms: In initial studies of batch 18101, Assay is performed on 29th May, 2018 & dissolution on 2nd June 2018, clarify/justify before further processing of the case.	Due to overload of work the testing of batch was planned in parts according to the availability of the equipment. Therefore after performing assay testing on 29th of May, 2018 dissolution testing was planned on 2nd June 2018.

Decision: Registration Board decided to defer the case for confirmation of audit trail of HPLC analysis For stability studies of all three trial batches of applied product & clarification as all three trials of both stregths of Apiban tablet 2.5mg & 5mg have same audit trial in terms of date & time at all time intervals for all injections of sample & standard, by Area FID and respective evaluator, PEC.

944.	Name and address of manufacturer / Applicant	M/s Highnoon Laboratories, 17.5 Km, Multan Road, Lahore.
	Brand Name +Dosage Form + Strength	Apiban 5mg tablet
	Composition	Each film coated tablet contains: Apixaban …… 5mg
	Diary No. Date of R& I & fee	Dy. No. 96; 01-08-2016; Rs.20,000/- (01-08-2016)
	Pharmacological Group	Antithrombotic agents
	Type of Form	Form 5
	Finished product Specification	USP
	Pack size & Demanded Price	10's, 14's,20's, 30's
	Approval status of product in Reference Regulatory Authorities.	Approved by USFDA
	Me-too status	Not available
	GMP status	GMP certificate based upon evaluation conducted on 06-07-2017.
	Remarks of the Evaluator	• Firm has submitted Form 5-D (dated 20-12-2017) alongwith differential fee of Rs. 30,000/- • Stability data as per directions of 251st meeting of Registration Board shall be submitted.
	Previous Decision	Registration Board in its 277th meeting deferred the case for submission of stability studies data as per directions of 251st meeting of Registration Board.
	Evaluation by PEC	Now the firm has submitted stability studies of the applied formulation.

Date of Submission			

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API	Applicant has submitted Photocopy of COA of Apixaban having following information on it. **For API Apixaban:** **Batch No**: 1704002291 **Manufacturer:**M/s Alembic Pharmaceuticals Limited, India.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted following: **Copy of GMP certificate for Apixaban Manufacturer:** Issued To: M/s. Alembic Pharmaceuticals, India. Issued By: Food & Drug Administration, Gandhinagar, Gujrat State, India. Issued On: 02 August, 2016 Valid up till: 01-08-2018.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Applicant has submitted ADC attested invoice stating following information on it: **For Apixaban:** **Invoice #:** 90046555 (dated: 20-09-2017) **Manufacturer of API**: M/s. Alembic Pharmaceuticals Ltd., India, Survey No. 842, 843, Vill. Karakhadi, Tal.Padra, Dist. Vadodara-391450, Gujarat, India. **Quantity of API**: 1kg **Lot No.** 1704002291 **Cleared on/Attested on**: 16-01-18
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till	Yes

	assigned shelf life of the product.	
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

Data for exemption from On-site investigation of submitted stability data
Apixaban 5mg Tablets

Administrative Portion

01	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has quoted the onsite panel inspection for Nebvax (Nebivolo + Valsartan) 5/80mg Tablet, Daplozmet 5/850mg Tablet & Daplozmet 5/1000mg Tablet conducted on 1st January, 2019 & presented in 288th RB meeting as a reference inspection for instant dosage form. 1. Is your HPLC software 21CFR compliant? — Audit trail was active on all HPLC systems used in the method validation and stability study. Individual user log in and IDs were available. 2. Is proper and continuous monitoring and control available for stability chamber? — Yes, monitoring and control was available for the stability chambers provided. Firm was advised to install alarm system in stability chamber and perform challenge test.
02	Documents for the procurement of API with approval from DRAP (in case of import).	Applicant has submitted ADC attested invoice stating following information on it: **For Apixaban:** **Invoice #:** 90046555 (dated: 20-09-2017) **Manufacturer of API**: M/s. Alembic Pharmaceuticals Ltd., India, Survey No. 842, 843, Vill. Karakhadi, Tal.Padra, Dist. Vadodara-391450, Gujarat, India. **Quantity of API**: 1kg **Lot No.** 1704002291 **Cleared on/Attested on**: 16-01-18
03	Documents for the procurement of reference standard and impurity standards.	
04	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted following: **Copy of GMP certificate for Apixaban Manufacturer:** Issued To: M/s. Alembic Pharmaceuticals, India. Issued By: Food & Drug Administration, Gandhinagar, Gujrat State, India. Issued On: 02 August, 2016 Valid up till: 01-08-2018.
05	Mechanism for Vendor pre-qualification.	Firm has submitted Vendor Qualification Flow Chart.
06	Certificate of analysis of the API, reference standards and impurity standards.	**For API Apixaban:** Photocopy of COA of Batch No. 1704002291 issued by M/s Alembic Pharmaceuticals Limited, India is submitted. **Working standards:** The firm has submitted the copy of COA of working Standards (Apixaban) Batch No. WS/APN/001, Quantity 0.2gm, provided by the API Manufacturer – M/s Alembic Pharmaceuticals Limited, India is submitted.
07	Documents for the procurement of excipients used in product	Firm has submitted documents for procurement of excipients used in product development.

Evaluation by PEC:

Sr. No.	Deficiencies	Justification
1.	Submit Valid copy of GMP certificate of API Manufacturer issued by concerned regulatory authority of country of origin, as it is not valid now.	The GMP certificate for Apixaban (1809992) issued to alembic pharmaceutical Ltd, Valid up to 05-9-2021 is attached.
2.	Batch size for each of three trials is 7600 tablets as per your reconciliation sheet; out of which 400 tablets are blistered, 364 tablets were kept on stability. Justify/clarify that 364 tablets are sufficient for test/ analysis of each of the trials at all time points up till proposed shelf life. Moreover, where the remaining tablets which were not blistered were kept?	Total Tablets required for Dissolution=6 Disintegration=6 Assay/Purity=30 Total Tablets=42 Total Intervals (Real Time Stability)=6 Total Intervals (Accelerated Stability)=2 Total Intervals=8 Total Tablets Required=8*42=336 So total 364 tablets are placed in stability and the no of required tablets for testing are 336 and remaining quantities of the tablets are with the Product Development Department.
3.	Documents for the procurement of following excipients; macrogol 600, lactose anhydrous, polysorbate 80, titanium dioxide, iron oxide yellow, colloidal silicon dioxide are not submitted.	All the above excipients are procured from local vendors and their COAs are submitted in Annex 12 of already submitted file 1. The copies of COAs for your reference are enclosed.
4.	Submitted stability data of API by its Manufacturer, as it is not submitted.	The stability data is enclosed.
5.	Trial RD-18092 , RD-18093 & RD-18094 is prepared on 2nd May 2018 & assay testing is carried out on 29th May 2018 & dissolution on 2nd June 2018 as per information on chromatograms, Clarify/Justify,	Due to overload of work the testing of batch was planned in parts according to the availability of the equipment. Therefore after performing assay testing on 29th of May, 2018 dissolution testing was planned on 2nd June 2018.
6.	Chromatograms for Trial RD-18092 & RD-18093 at initial studies are not of applied drug product instead they are of some other formulation & contain a different batch number, Clarify/Justify before further processing of case.	The batch numbers mentioned on sample chromatograms are as per batch numbers were mentioned collectiverly because same standard is used against multiple samples analysed on same day. As products development has developed different formulations other thatn those formulation submitted, so batch numbers of those trials (formulation) were also mentioned on standards.
7.	Chromatogram for blank solution for trial 18093 at 6th month Accelerated Stability Studies shows some upward & downward peaks. Clarify/Justify	Based on your query we reviewed chromatogram of blank. As the diluents may have very minor residues therefore for the ease of review its scale is normalized at 1 mAU along Y axis whereas in sample chromatogram due the very high concentration of solute its scale is normalized at 80

		mAU along y-axis. So the baseline looks like that due to low scale)1/80th of the scale used for sample.) For understanding thechromatogram of blank solution normalized at 80 mAU is attached check A-4.
8.	Baseline for reference standards is not stable. Clarify/Justify.	Based on your we reviewed all datat and we found that in the chromatogram of reference solution of related substances, there is low concentration , its scale is normalized at 10mAU along Y axis whereas in sample chromatogram due to very high concentration its scale is noramlized at 1700mAU along y-axis. So the baseline looks like that at low scale. For understanding the chromatogram of reference solution narmalized at 1700mau is attached.
9.	Date & time for both strengths of Apixaban 2.5mg & 5mg tablet are same as per chromatograms & Audit trail. Justify/Clarify.	As the manufacturing of both strengths of Apixaban2.Smg &5mg are same as well as testing procedure is also same so we planned their analysis at same date and time

Decision: Registration Board decided to defer the case for confirmation of audit trail of HPLC analysis. For stability studies of all three trial batches of applied product & clarification about how it is possible for all three trials of both stregths of Apiban tablet 2.5mg & 5mg to have same audit trial in terms of date & time at all time intervals for all injections of sample & standard, by Area FID and respective evaluator, PEC.

945.	Name and address of manufacturer / Applicant	Genix Pharma (Pvt.) Ltd, Karachi
	Brand Name +Dosage Form + Strength	Empag M 12.5mg + 1000mg Tablets
	Composition	Each Extended Release Film Coated Tablet Contains: - Empagliflozin ……12.5mg Metformin hydrochloride…1000mg
	Diary No. Date of R& I & fee	Dy No.34140; 15-10-2018: 50,000/- ; 09-10-18
	Pharmacological Group	Anyti-diabetic
	Type of Form	Form-5
	Finished product Specification	Manufacturer's Specifications
	Pack size & Demanded Price	10's, 14's, 20's, 28's, 30's As per SRO
	Approval status of product in Reference Regulatory Authorities.	Approved in US-FDA (Synjardy XR Tablet)
	Me-too status	N/A
	GMP status	In the light of inspected areas, facilities status of equipment and hygiene and sanitation of area and equipment, control procedures and documentations, internal and external inspection and audit reports safety of the workers, stability protocols and data, product development, recalls and complaints handling & other CGMP issues, M/s Genix Pharma Pvt. Ltd Karachi was considered at an satisfactory level of compliance with CGMP GUIDLINES as of today. The management was also suggested to further strengthen stability and analytical sections

</table></td></tr>
</table>

		5mg/1000mg | 5mg +1000mg Batch No | 605012 | 18SB-097-01 Expiry Date | 12-2020 | 04-2020 Comparative dissolution studies have been performed in following mediums: i. pH 0.1N HCl buffer ii. pH 4.5 Acetate buffer iii. pH 6.8 Phosphate buffer In pH 0.1 N HCl buffer similarity factory is 87.083 In pH 4.5 Acetate buffer similarity factory is 84.201 In pH 6.8 Phosphate buffer similarity factory is 83.539
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports of stability studies of applied formulation

Remarks of Evaluator :

Sr.#	Deficiencies	Justification
1.	You are acquiring Metformin Hcl from M/s Wanbury, a pharmaceutical unit located in Maharashtra state of India as per commercial invoice, but submitted GMP certificate is of another site of same manufacturer located in Andhra-Pardesh. Submit GMP certificate of desired site.	M/s Wanbury, Head office located in Maharashtra state while manufacturing unit located in Andhra-Pardesh. This address is also mentioned on commercial invoice, COA and GMP. Reference attached (Annexure point no. 1)
2.	You have procured four lots of Metformin Hcl as per invoice; also submit the record about which lot is used in the manufacturing of trial batches.	The batch number MT00600118 is used. COAs and BMRs are attached for reference. Annexure point No.2
3.	COA for one lot of Metformin Hcl is submitted, but you have procured four lots, as per submitted commercial invoice, clarify/justify	Genix Pharma is also manufacturing other combination products like Metformin Hcl and Sitagliptin Phosphate Tablets Range. That's why Metformin Hcl is used from commercial material.
4.	How would you have come to know about batch number of Empagliflozin, one of the APIs of applied drug product, as it is not mentioned on commercial invoice. Clarify/Justify.	The clarification letter from supplier with purchase invoice is attached as reference (Annexure Point no 4)
5.	What analytical method you are using for test/ Analysis of applied drug product either in-house or supplier.	The in-house validated method is used for analysis of finished product (Annexure Point no 5)
6.	Evidence of procurement of reference product Synjardy XR?	Purchase invoice attached (Annexure Point no 6)
7.	Submit Raw data sheets for dissolution and assay testing along with chromatograms at every time points because raw data sheet submit separately which are difficult to understand.	Complete dissolution and assay testing along with chromatograms are attached in file (Annexure Point no 7)
8.	In dissolution testing, Empagliflozin is quantified by HPLC & Metformin Hcl is quantified by UV method as per your FPP Specification. Justify.	Empagliflozin cannot be detectable due to its lowest concentration with respect to metformin Hcl. That's why dissolution is conducted on HPLC while Metformin Hcl can be detected without any interference. Dissolution of Metformin Hcl extended release tablets are also given in USP by Spectroscopy method.
9.	Submit spectrums for dissolution testing of metformin Hcl, if you have quantified it on UV.	UV data of Metformin Hcl is attached in separate file (Annexure Point no 7)
10.	In dissolution testing, Empagliflozin is quantified by	The dissolution of Empagliflozin was conducted

	HPLC & Metformin Hcl is quantified by UV Spectrophotometric Method as per your FPP Specification, but all chromatog-Uiorams for dissolution testing shows peaks for both APIs. Clarify/Justify.	as per assay method that's why tablets contained to APIs showing its absorbance Metformin Hcl and Empagliflozin.
11.	Date acquired 29th of June 2018 on chromatograms for run of sample of content uniformity test at initial studies of trial no 18SB-112-01CU03 of applied drug product is not verifiable from the submitted audit trial reports some others chromatograms are not verifiable form submitted audit trial reports. Clarify/Justify	Audit Trial reports of content uniformity are attached (Annexure Point no 11)
12.	Details of equipment used for applying layer of Empagliflozin over Metformin Hcl Extended release core, is required to be submitted	(Attached in Annexure Point no 12)

Decision: Deferred for clarification regarding compensation of manufacturing loss during coating of API(Empagliflozin) over extended release core(Metformin hydrochloride) as there is no any overage mentioned in master formulation to compensate for manufacturing/process loss of API during coating.

946.	Name and address of manufacturer / Applicant	M/s Werrick pharmaceuticals, 216-217, I-10/3, Industrial Area, Islamabad.
	Brand Name +Dosage Form + Strength	Betanorm Plus Tablets 5/80mg
	Composition	Each film coated tablet contains: Nebivolol as hydrochloride…5mg Valsratan…….80 mg
	Diary No. Date of R& I & fee	Dy.No. dated 09-03-2017 Rs.20, 000/- for Form 5 Dated 09-03- 2017 Dy. No_____ dated 03-04-2017 differential fee of Rs.30,000/- for Form 5D Dated 03-04- 2017

DOCUMENTS / DATA PROVIDED BY THE APPLICANT INITIALLY

Sr. No.	Documents To Be Provided	Status
1	COA of API.	Firm has submitted the following: **Nebivolol as hydrochloride:** Copy of COA: Batch #: 17NV016 Manufacturer: M/s Cadila Pharmaceuticals Ltd, India. **Valsartan:** Copy of COA: Batch #:10240-170702) Manufacturer: M/s Zhejiang Tianyu Pharmaceuticals Co, Ltd, China.
2	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted the following: **Nebivolol as hydrochloride:** Copy of GMP certificate: Certificate No.180686 Issued by: India Food & Drugs Control Administration, India. Validity: until 20/12/2018 **Valsartan:**Copy of GMP certificate: Certificate No. Zj20130111 Issued by: China Food & Drugs Administration, china. Validity: until 09/12/2018
3	Protocols followed for conduction of stability study and details of tests.	Yes
4	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5	Documents confirming import of API etc.	Firm has submitted the following: **Nebivolol as hydrochloride:** Copy of commercial invoice: Dated: 31-07-2017 **Valsartan:** Copy of commercial invoice: Dated: 17-08-2017 attested by ADC, DRAP,Islamabad
6	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data /documents.	Yes

7	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8	Commitment to follow Drug Specification Rules, 1978.	Yes
	Data for EXEMPTION FROM ON SITE INSPECTION	
	The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting: Date of submission: 28-11-2018 vide diary No. 28-11-18.	
	Administrative Portion	
1	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "Cell-Tab 400mg (Sofosbuvir) Tablets", which was presented Initially in 256th subsequently in 269th &finally in 276th meeting of Registration board. Registration Board decided to approve registration of above stated drug product of M/s. Werrick Pharmaceuticals. According to the report following points were confirmed. ● The firm has 21CFR compliant HPLC software. ● The firm has audit trail reports available.
2	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted the following: **For Nebivolol hydrochloride:** Copy of commercial invoice: Dated: 31st of July, 2017. Attested on: 31st of August, 2017. Attested By: ADC, DRAP Islamabad. Quantity of API: 5kgs Nebivolol hydrochloride. Batch #: 17NV016 **For Valsartan:** Copy of commercial invoice: Dated: 11th of August 2017. Attested on: 06th of August, 2017. Attested By: ADC, DRAP Islamabad. Quantity of API: 500kgs. Batch #: 10240-170701/10240-170702.
3	Documents for the procurement of reference standard and impurity standards.	The firm has submitted copies of COA for following working standard & impurity Standards: **For working standard:** Nebivolol hydrochloride : 100.5 % Valsartan: 99.7% **For Impurity standard:** Valsartan Related compound A: 99.9% Valsartan Related compound B: 98.3 % Valsartan Related compound C: 99 %
4	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	The firm has submitted copy of GMP certificates declaring following information: **For Nebivolol as hydrochloride:** Certificate No.180686 Issued to: M/s Cadila Pharmaceutical Ltd, 294, G.I.D.C Estate, Ankleshwar-393 002, District- Bharuch. India. Issued by: Food & Drug Control Administration, Gujarat State, India. Validity: Valid Till 20-12-2018. **For Valsartan:** Certificate No. ZJ 20130111 Issued to: M/s Zhejiang Tianyu Pharmaceutical Co., Ltd, China.

19	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of Nebivolol HCl & Valsartan from 27-11-2017 to 13-09-2018 was submitted by the firm.

Remarks Of Evaluator:

Sr. No.	Query	Response by the form
1	Submit valid GMP Certificates of Both API Manufacturers, as these are not valid now.	When we submitted Registration file , GMP certificate of the manufacturer were valid then. Now we are again submitting valid GMP certificates.
2	Submit documents for the procurement of excipients Color Red # 40 & HPMC; used in manufacturing of trial batches.	documents for the procurement of excipients; Color Red # 40 & HPMC; used in manufacturing of trial batches are submitted now.
3	Sodium starch glycolate is not an excipient of innovator & you have not performed drug excipient compatibilities studies, How would you justify the compatibility of this excipient with drug.	Sodium Starch glycolate is widely used in oral pharmaceuticals as a disintegrant in capsule & tablet formulations. It is commonly used in tablet prepared by either direct compression or wet granulation process. Although the effectiveness of many disintegrants is effected by the presence of hydrophobic excipients such as lubricants, the disintegrant efficiency of sodium stach glycolate is unimpaired. Ref: Hand book of Pharmaceutical Excipients, sixth edition.

Decision: Registration Board decided to approve registration of "Betanorm Plus Tablets 5/80mg (Nebivolol as hydrochloride & Valsartan) by M/s Werrick pharmaceuticals, Islamabad. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

8.	Commitment to follow Drug Specification Rules, 1978.	Yes

Data for exemption from on-site investigation of submitted stability data.

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product Saffaldi Tablet 400mg (Sofosbuvir), which was conducted on 8th January, 2018 and was presented in 279th meeting of Registration Board held on 28th of February -2nd of March, 2018. Following two observations were reported in the report: i. The HPLC software is 21CFR Compliant. ii. Adequate monitoring and control are available for stability chambers. Data Loggers are also placed in stability chambers for monitoring.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Applicant has submitted ADC attested invoice stating following information on it: **For Sofosbuvir:** Manufacturer of API: M/s Ruyuan HEC Pharm Co Ltd. China. Exporter of API: M/s. WIS Pharmatech, China. Quantity of API: 5Kg. Cleared on/Attested on: 15-01-2017. **For Velpatasvir Co-Povidone solid dispersion:** Manufacturer of API: M/s Ruyuan HEC Pharm Co Ltd. China. Exporter of API: M/s. WIS Pharmatech, China. Quantity of API: 5Kg. Cleared on/Attested on: 06-04-2017.
3.	Documents for the procurement of reference standard and impurity standards.	
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Firm has submitted following: Copy of GMP certificate for Sofosbuvir & Velpatasvir Co-Povidone Dispersion. Issued To: M/s Ruyuan HEC Pharm Co Ltd. China. Issued By: Shaoguan Food and Drug Administration China. Issued On: 19.12.2018. Valid up till: 18-12-2019.
5.	Mechanism for Vendor pre-qualification	Firm has submitted copy of SOPs for vendor qualification.
6.	Certificate of analysis of the API, reference standards and impurity standards.	Firm has submitted following documents: COA of both APIs from M/s. Ruyuan HEC. Qualification report reference standard. Qualification report of Sofosbuvir impurity Standards A, B, C, D, F.
7.	Documents for the procurement of excipients used in product development?	Firm has submitted documents for procurement of excipients.
8.	List of qualified staff involved in product development with relevant experience.	Firm has provided list of technical staff of product development with relevant experience.

Production Data		
9.	Authorized Protocols/SOP for the development & stability testing of trial batches.	Firm has submitted authorized general protocols/SOPs for the development & testing of trial batches.
10	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the three batches.
11	Record of remaining quantities of stability batches.	Firm has provided following remaining quantities for each batch T-002: 252 Tablets T-003: 430 Tablets T-004: 430 Tablets
QA/QC DATA		
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers.
13.	Method used for analysis of API along with COA.	Firm has submitted COA and method of analysis of API.
14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	Firm has submitted method of analysis of FPP and complete record of testing of stability batches along with chromatograms
15.	Reports of stability studies of API from manufacturer.	Firm has submitted both accelerated (40°C ± 2°C & 75±5%RH) stability studies & long term (30°C ± 2°C & 65±5%RH) stability studies reports of three batches.
16.	Analysis reports for excipients used.	Firm has submitted analysis reports for all excipients used.
17.	Drug-excipients compatibility studies.	Firm has submitted drug excipient compatibility studies by mixing both API with all excipients and then determination of % content by HPLC.
18.	Record of comparative dissolution data.	Firm has submitted data of comparative dissolution profile at pH 1.2, 4.5 and 6.8.and calculated values of f2 which were within accepted range
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trial reports for HPLC analysis for all the three batches.

Evaluation by PEC:

S.#	Query	Response by the firm
1.	Submit documents for the procurement of reference standard and impurity standard as in this section your have submitted commercial invoices for the import of API.	Chromatographic purity by HPLC (%age Area) documents are attached herewith. Therefore no impurity standard required in such case.
2.	COAs of reference standard and impurity standards have not been submitted.	COA of reference standard submitted
3.	Submit record of digital datat logger of stability chamber for accelerated stability studies.	Documents are submitted.
4.	Submit procedure for drug-excipient compatibilities studies.	Required stability data according to Zone IV-A manufacturer has not provided the data due to current Crisis between both the countries; we are continuously having follow up regarding this matter.
5.	Evidence of procurement of reference drug procedure for CDP.	Applicant has submitted something else

6.	For six month stability studies of Trial T003 all chromatograms for Velpatasvir have two peaks in them. Justify / clarify.	Single peak are visible, Documents are attached herewith
7.	For 3rd month stability studies of trial T002 peaks on chromatograms for both APIs are not visible. Clarify / justify.	PDA detector used in that case of two peaks.

Decision: Registration Board decided to approve registration of "SAFPAVIR Tablets 400mg/100mg (Sofobuvir & Velpatasvir) by M/s Saffron Pharmaceuticals (Pvt.) LTD, Faisalabad. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

948.	Name and address of manufacturer / Applicant	M/s Wilson's Pharmaceuticals, 387-388, Industrial Area, Islamabad.
	Brand Name +Dosage Form + Strength	CO-O Tablets 2.5mg
	Composition	Each film coated tablet contains: Apixaban……..2.5mg
	Diary No. Date of R& I & fee	Dy No. ; 06-12-2018: 20,000/- ; 07-12-18
	Pharmacological Group	Factor XA Inhibitor
	Type of Form	Form-5
	Finished product Specification	Manufacturer's Specifications
	Pack size & Demanded Price	10's, 20's, 30's ; As per SRO
	Approval status of product in Reference Regulatory Authorities.	Approved in US-FDA Eliquis
	Me-too status	Apixa Tablets CCL Pharmaceuticals
	GMP status	GMP Inspection conducted on 24-01-2018 with conclusive remarks that firm is operating at satisfactory level of GMP compliance.

STABILITY STUDY DATA

Drug	CO-O Tablets 2.5mg		
Name of Manufacturer	M/s Wilson's Pharmaceuticals, 387-388, Industrial Area, Islamabad.		
Manufacturer of API	M/s Glenmark Pharmaceuticals, Ltd, GIDC Industrial Estate, Ankleshwar-393002, Gujarat State, India		
API Lot No.	Lot #: 801704823 , Quantity; 100g		
Description of Pack (Container closure system)	Alu /PVC Blister Pack in Unit carton		
Stability Storage Condition	Accelerated:40°C ± 2°C/75%±5% RH Real Time: 30°C ± 2°C/65%±5% RH		
Time Period	Accelerated: 6 (Months) Real Time: 6 (Months)		
Frequency	Accelerated: 0,1,2,3,4,6 (Months) Real Time: 0,3,6,9,12,18,24 (Months)		
Batch No.	Trial #01/Trial 01A	Trial #02	Trial #03
Batch Size	1500 tablets	1500 tablets	1500 tablets
Manufacturing Date	03-2018	03-2018	03-2018
Date of Initiation	18-03-2018	19-03-2018	20-03-2018
No. of Batches	03		
Date of Submission	(06-12-2018)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API.	Copy of COA (batch #801704823) from M/s Glenmark

		Pharmaceuticals, Ltd, Plot no 3109, GIDC Industrial Estate, Ankleshwar- 393002, and Gujarat State, India is submitted.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP certificate (certificate No. G/25/1629) issued by Food & Drugs Control Administration, India. It is valid until 30-04-2020.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	The firm has submitted copy of commercial invoice for 100gm dated 29-09-2017 attested by ADC, DRAP, Islamabad
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

-The firm has submitted 6months Accelerated and Real Time Stability Data for 03 Batches.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided following documents as per checklist approved by the Registration Board in its 278th Meeting:
Date of submission: 27-02-2018 vide diary No. 8825.

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "Saferon (Sofosbuvir 400mg) Tablets", which was conducted on 19th April, 2017 and was presented in 278th meeting of Registration board. Registration Board decided to approve registration of Saferon (Sofosbuvir 400mg) Tablets" by M/s. Wilson Pharmaceuticals Islamabad. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice dated 29-09-2017 attested by ADC, DRAP, Islamabad.
3.	Documents for the procurement of reference standard and impurity standards.	The firm has submitted copy of invoice declaring following information: For Working Standard & Impurities A, B, C, D, E. Invoice Number : 2006007417 Dated: 05-12-2017
4.	Approval of API/ DML/GMP certificate of API manufacturer issued	The firm has submitted copy of GMP certificate declaring following information:

<table>
<tr><td></td><td>by regulatory authority of country of origin.</td><td>Certificate No. G/25/1629
Issued to: M/s Glenmark Pharmaceuticals, Ltd, Plot No. 3109, GIDC Industrial Estate, Ankleshwar- 393002, Gujarat State, India

</table>

	batches (i.e. chromatograms, lab reports, raw data sheets etc.)	for CO-O Tablets 2.5 mg.
15.	Reports of stability studies of API from manufacturer.	The firm has submitted photocopy of 06 Months Accelerated and 36 Months Real Time Stability Study Data of 03 Batches of Apixaban from M/s Glenmark Pharmaceuticals, Ltd, India.
16.	Analysis reports for excipients used.	The firm has submitted copy of Analytical reports of excipients used.
17.	Drug-excipients compatibility studies.	Excipients of applied drug product are similar to that of innovator product (Eliquis).
18.	Record of comparative dissolution data.	The firm has submitted comparative dissolution studies in three media including (0.1 N HCl) pH 1.2, (Acetate Buffer) pH 4.5 and (Sodium Phosphate Buffer) pH 6.8 buffers with Eliquis Tablets 5mg manufactured by Pfizer Ortakoy with Batch No.171731108.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports of stability Studies of applied formulation.

Remarks of Evaluator:

S. NO.	Query	Response by the firm.
1	In procedure for dissolution testing it is mentioned that measure the other absorbance on UV spectrometer at 277±5nm. Clarify / justify	Submitted spectra of dissolution test show absorbance by peak pick calculation. A spectrophotometer records the degree of absorption by a sample at different wavelength and the resulting plot of absorbance (A) versus (λ) is known as a spectrum. By peak pick calculation spectrophotometer give absorbance at λ max (wavelength at which there is a maximum absorbance). That is why there is ± difference from actual wavelength is observed. Now spectra of next two intervals (9^{th} month & 12 Month) with point pick calculation of absorbance at single & fix wavelength of Apixaban are attached. All result of dissolution test are within limit.
2	Result of dissolution testing is calculated without considering the potency of standard as the potency of working standard is 99%. Clarify / justify	On certificate of analysis of working standard, assay limit is 98-102% while potency of working standard is 99.1% as per COA,that complies with assay limit. If we are getting such assay result of working standard like 99% or 101% we can consider it analytical deviation and can round it to 100% for routine application or can use potency as 100%. If assay results of working standard are not within limit then it is very necessary to confirm the things with high degree of investigation.
3	Why the content uniformity test is not performed by the firm, Clarify / justify.	Content uniformity test had been performed but was not submitted as it is not a stability indicating parameter. Content uniformity data, attached as Now.
4	Submit how much quantity of working standards and impurities are imported airway bill/any other evidence for the import of the same.	Working standard & all impurities are supplied by supplier, free of cost and on our demand non commercial invoice & COAs of working standard and all impurities is provided by supplier, attached now.
5	Submit invoice for purchase of SLS and lactose (Tablettose)	We are submitting it Now.
6	Submit evidence of purchase of reference product/innovator product.	Firm has submitted photocopy of pictures of outer packing of reference pro reference product/innovator product.
7	Chromatograms of method validation studies are verifiable from submitted audit trail data. Justify / clarify	We are submitting it Now.

Decision: Registration Board deferred the case & advised the firm to mention that one wavelength (ƛ max wavelength at which there is a maximum absorbance) at which dissolution testing has to be performed & submit the results of dissolution testing for next time interval by taking reading on that wavelength(ƛ max).

No. of Batches	03		
Date of Submission	24-1-2018 (Dy. No. 3164)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents To Be Provided**	**Status**
1.	COA of API	Yes
2. 0	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	**Ebastine:** Copy of GMP certificate issued Bal Pharmaceuticals limited, unit II, 61-B Bommasandra industrial area Bangalore. Karnataka India. Dated 5 April 2018
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	**Ebastine:** Copy of commercial invoice has been submitted issued by ADC, Karachi DRAP.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

Sr.#	Deficiency/Observation	Response
i.	On COA unit II is mentioned clarification is required wethere GMP provided is of same plant or not?	The Firm claimed that the GMP certificate provided is of the same unit as mentioned on COS of AP. Declaration by Bal Pharma India states that the complete address of unit II I,e, 61-B Bommasandra industrial area Bangalore 560 099, India is in line with address mentioned in GMP certificate.
i.	Stability data of API from manufacturer is needed	Provided
i.	Clarification is required regarding the time gap of almost 2 months between manufacturing and stability study as manufacturing date is 21-1-2018 and stability study starting date is 21-3-2108	This is to inform that every new entry 3 batches are manufactured. Therefore for the maximum utility of equipment, chemical reagents and analyst lean process approach is being used in Getz pharma where we performed initial testing of all 3 batches of same product simultaneously. Since the 3rd batch of estine 20 mg was manufacture on 8-3-2018 therefore we complete the analysis of all the 3 batches on 20-3-2018 and charge them on stability on 21-3-2018

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Estine (Ebastine) 10mg & 20mg Oro-dispersible Tablets by M/s Getz Pharma Pvt. Limited, 29-30/27, Korangi Industrial Area , Karachi.

Reference No: F.13-11/2017-PEC (Vol.I) dated 25th April, 2019.
Investigation Date and Time: 6th May, 2019. (Forenoon)
Investigation Site: Factory premises of M/s Getz Pharma Pvt. Limited, 29-30/27, Korangi Industrial Area, Karachi.

Background:

Chairman Registration Board considered the applications of M/s Getz Pharma Pvt. Limited, 29-30/27, Korangi Industrial Area, Karachi for registration of Estine (Ebastine) 10mg & 20mg Oro-dispersible Tablets and

constituted a three member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Rafeeq Alam Khan, Meritorious Professor, Dean Faculty of Pharmacy, Ziauddin University. (Member Registration Board)
2. Dr. Kirshan Das, Assistant Director, DRAP, Karachi
3. Dr. Affan Ali Qureshi, Assistant Director, CDL, DRAP, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Details of Investigation:
Estine (Ebastine) Tablets 10mg & 20mg, Oro-dispersible Tablets

Q.#	Question	Observation by panel
1	Do you have documents confirming the import of Ebastine API including approval from DRAP?	The firm has imported "Ebastine API" from M/s Bal Pharma Ltd, India and has approval from DRAP for import vide License No.1657/17-DRAP (K) dated 21.06.2017.
2	What was the rationale behind selecting the particular manufacturer of API?	There is proper vendor evaluation process being implemented by the firm and the rationale behind vendor selection is controlled through Postal Audit checklist / Physical Site Inspection and availability of valid GMP approval by competent authority. Further, M/s Bal Pharma Ltd, India has Certificate of Suitability (CEP) for Ebastine API issued by European Directorate for the Quality of Medicines & HealthCare (EDQM).
3	Do you have documents confirming the import of Ebastine reference standard and impurity standards?	Firm has imported Ebastine working standard from M/s Bal Pharma Ltd, India vide invoice No. SAM-010 dated 14.06.2017. For impurity testing, firm has used Relative Retention Time (RRT) for location and calculation of impurities as provided by Ph. Eur.
4	Do you have certificate of Analysis of the API, reference standards and impurity standards?	The firm has certificate of analysis for API and working standard.
5	Do you have GMP certificate of API manufacturer issued by regulatory authority of country of origin?	Firm has provided copy of valid GMP certificate of M/s Bal Pharma Ltd, India valid till 04-02-2020.
6	Do you use API manufacturer method of testing for testing API?	The firm has used method of testing adopted from European Pharmacopeia (Ph. Eur) monograph for Ebastine API and the same has been verified as per USP chapter 1226 (verification of compendial procedure)
7	Do you have stability studies reports on API?	The firm has 5 years real time stability study data provided by API manufacturer.
8	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing has been performed as per SIM method and degradation products have been quantified.
9	Do you have method for quantifying the impurities in the API?	Yes, the firm has method for quantifying the impurities in the API adopted from European Pharmacopeia (Ph. Eur)

<table>
<tr><td></td><td></td><td>monograph for Ebastine API.</td></tr>
<tr><td>10</td><td>Do you have some remaining quantities of the API, its reference standard and impurities standards?</td><td>The firm has some remaining quantities of the API and working standard.</td></tr>
<tr><td>11</td><td>Have you used pharmaceutical grade excipients?</td><td>The firm have used pharmaceutical grade excipients which include Microcrystalline Cellulose (Avicel PH-101), Mannitol, Poloxamer 188, Povidone K-30, Hypromellose, Carboxymethylcellulose Calcium, Colloidal Anhydrous Silica, Croscarmellose Sodium, Crospovidone, Aspartame, Trusil Powder Orange Flavour and Magnesium Stearate.</td></tr>
<tr><td>12</td><td>Do you have documents confirming the import of the used excipients?</td><td>The firm has necessary documents confirming the import of the used excipients.</td></tr>
<tr><td>13</td><td>Do you have test reports and other records on the excipients used?</td><td>The firm has test reports and other records on the excipients used.</td></tr>
<tr><td>14</td><td>Do you have written and authorized protocols for the development of Ebastine tablets?</td><td>The firm has written and authorized protocols for the development of Ebastine Oro-dispersible Tablets 10mg & 20mg.</td></tr>
<tr><td>15</td><td>Have you performed Drug-excipient compatibility studies?</td><td>The firm has performed Drug-excipient compatibility studies and concluded that the excipients used in the proposed formulation of Ebastine Oro-dispersible Tablets 10mg & 20mg are compatible with the API.</td></tr>
<tr><td>16</td><td>Have you performed comparative dissolution studies?</td><td>The firm has used dissolution criteria as per Japanese Pharmacopoeia monograph for Ebastine Oro-dispersible Tablets and the product complies. Further, this product is orally dispersible which disintegrates very rapidly. The release is more than 85% within 15 minutes, therefore, F2 waiver is applicable.</td></tr>
<tr><td>17</td><td>Do you have product development (R&D) section</td><td>The firm has dedicated product development (R&D) section with requisite manufacturing and analysis facilities.</td></tr>
<tr><td>18</td><td>Do you have necessary equipment available in product development section for development of Ebastine tablets?</td><td>The firm has necessary equipment available in product development section for development ofEbastine Oro-dispersible Tablets 10mg & 20mg.</td></tr>
<tr><td>19</td><td>Are the equipment in product development section qualified?</td><td>The available equipment in product development section are qualified.</td></tr>
<tr><td>20</td><td>Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?</td><td>The firm has proper maintenance / calibration with re-qualification program for the equipment used in PD section.</td></tr>
<tr><td>21</td><td>Do you have qualified staff in product development section with proper knowledge and training in product development?</td><td>The firm has qualified staff in product development section with proper knowledge and training in product development. There are 50 Scientists (Pharmacist & Chemist) working only in R&D Section.</td></tr>
<tr><td>22</td><td>Have you manufactured three stability batches for the stability studies of Ebastine tablets as required?</td><td>The firm has manufactured three stability batches of Ebastine Oro-dispersible Tablets 10mg & 20mg. Packed in Alu-Alu blisters:
<table>

<tr><td>27</td><td>Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?</td><td>The firm has developed and validated method of testing for finished product and complete Method Validation Report is available. Therefore, method transfer is not applicable.</td></tr>
<tr><td>28</td><td>Do you have documents confirming the qualification of equipments / instruments being used in the test and analysis of Ebastine API and the finished drug?</td><td>The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of Ebastine API and the finished drug.</td></tr>
<tr><td>29</td><td>Do your method of analysis stability indicating?</td><td>The firm has performed forced degradation (FD) study on their product Ebastine Oro-dispersible Tablets 10mg & 20mg for the conformance of its stability indicating nature.</td></tr>
<tr><td>30</td><td>Do your HPLC software 21CFR Compliant?</td><td>The HPLC software is 21CFR Compliant as per record available with the firm. The firm have WATER's HPLC with Empower 3 software having following features:
Have Audit trail
Have backup system
Have Data traceability
Have Data achieving system
Have data integrity
Have Data security
System Security Policy</td></tr>
<tr><td>31</td><td>Can you show Audit trail reports on Ebastine testing?</td><td>Audit trail on the testing reports is available.</td></tr>
<tr><td>32</td><td>Do you have some remaining quantities of degradation products and stability batches?</td><td>The firm has remaining quantities of stability batches.</td></tr>
<tr><td>33</td><td>Do you have stability batches kept on stability testing?</td><td>The firm has three stability batches kept on real time stability testing. 12 months real time stability data is available.</td></tr>
<tr><td>34</td><td>Do you have valid calibration status for the equipments used in Ebastine tablets production and analysis?</td><td>The firm has valid calibration status for the equipment used in production and analysis of Ebastine Oro-dispersible Tablets 10mg & 20mg.</td></tr>
<tr><td>35</td><td>Do proper and continuous monitoring and</td><td>Adequate monitoring and control are available for</td></tr>
</table>

	control are available for stability chamber?	stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
36	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Related manufacturing area, equipment, personnel and utilities are in compliance.

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Estine (Ebastine) 10mg & 20mg Oro-dispersible Tablets is verifiable to satisfactory level.
2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and well suited for the manufacturing of Estine 10mg & 20mg Oro-dispersible Tablets.

Recommendations:

The firm may kindly be granted necessary registration of Estine 10mg & 20mg Oro-dispersible tablets

Decision: Registration Board decided to approve registration of "Ebastine tablets 20 mg by M/s Getz Pharma (Pvt) Ltd., Karachi, with the change in brand name. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP certificate issued to M/s Ningxia Qiyuan pharmaceuticals co. Ltd. No. 1 Street, wangyuan industrial area, Yinchuan Ningxia China Issued by Ningxia food and drug administration
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	**Azithromycin:**Copy of commercial invoice has been submitted, manufacturer is M/s Ningxia Qiyuan pharmaceuticals co. Ltd. No. 1 Street, wangyuan industrial area, Yinchuan Ningxia China Issued by ADC Karachi DRAP quantity issued of azithromycin is 75 kg
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

- The firm has provided 06 Months Accelerated and 6 Months Real Time Stability Data for 03 Batches.

Sr.#	Deficiency/Observation	Response by Pharma.
i.	On submitted GMP certificate of supplier of API (azithromycin), issuing Drug regulatory authority is not clear.	Issuing authority is Ningxia food and drug administration
ii.	Clarification is required, regarding variation in run time of chromatograms in assay and dissolution analysis.	Firm responded that, Due to change of HPLC system (as we have 4 HPLC). Run time also depend upon source of organic solvents in mobile solvents in mobile phase. We use ACN/MeOH of merck and sigma. Sometime run time shifts due to weak signal strength of D2 lamp and also efficiently of column may effect run time. Also USP states in most of its methods, "Make adjustments if necessary". Secondly if to reduced tailing factors and peak adjustment, we change mobile

		phase 4 to 5% (USP allowed 20%) the retention time shift. Moreover the run time within the span of analysis is not varying and the runtime of standard and sample during analyses is same as per requirement.
iii.	Detailed method of testing including assay, pH and sterility etc. is not provided along with the stability protocols and specifications	Submitted
iv.	Clarification is required, since the pack size and packaging material of container	Submitted

Report on Investigation of Authenticity / Genuineness of data submitted for registration of Zithrosan 1% Eye Drops (Azithromycin as dehydrate) by M/s. Sante (Pvt). Ltd., 245/2-Z, Block-6, PECHS, Karachi.

Reference No: F.13-11/2017-PEC(Pt) dated 18th January, 2019.
Investigation Date and Time: 14th March, 2019 (Morning).
Investigation Site: Factory premises of M/s. Sante (Pvt). Ltd., Karachi.

Background:

Chairman Registration Board considered the applications of M/s Sante (Pvt). Ltd., Karachi for registration of Zithrosan 1% Eye Drops (Azithromycin as dehydrate) and constituted a three-member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:

1. Dr. Saif ur Rehman Khattak, Director, CDL, DRAP, Karachi.
2. Dr. Rafeeq Alam Khan, Meritorious Professor, Department of Pharmacology, University of Karachi, Karachi, Member Registration Board, Islamabad.
3. Dr. Sidra Yasmeen, Assistant Director, DRAP Office, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Sr. No.	Question	Observation by panel
1	Do you have documents confirming the import of API?	The firm has used 34.26g quantities for manufacturing of three stability batches (1 litre each) of Zithrosan 1% eye drops, from 75 kg API (Azithromycin Dihydrate - tablet grade) imported for production of their registered product, Azithromycin tablets vide invoice No. 201610103 dated 25th October, 2016 from M/S. Ningxia Qiyuan Pharmaceutical Co. Ltd., China. The firm has got proper approval from DRAP,

Sr. No.	Question	Observation by panel
		Office, Karachi.
2	What was the rationale behind selecting the particular manufacturer of API?	No ophthalmic grade API has been imported by the firm for manufacturing of stability batches of Zithrosan 1% eye drops, however, the API primarily imported for tablet manufacturing has been selected as per approved vendor certification program.
3	Do you have documents confirming the import of the API, reference standard of the API and impurity standards of the API?	The firm has documents confirming the import of API and working standard of the API. No impurity standard has been imported by the firm irrespective of the fact that the API has a number of known specified impurities like Azithromycin-N-oxide, N-dimethyl Azithromycin, Azithromycin A, P etc.
4	Do you have certificate of Analysis of the API, reference standards and impurity standard?	The firm has certificates of analysis for the API and working standard of the API.
5	Do you have any approval of API or GMP certificate of API manufacturer issued by regulatory authority of country of origin?	The firm has GMP certificate of API manufacturer issued by the concerned regulatory authority of country of origin (China).
6	Do you use API manufacturer method of testing?	The firm has used In-house method for testing of the API.
7	Do you have stability studies reports on API?	The firm has stability studies reports on API conducted by the API manufacturer.
8	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing has been performed as per SIM method and degradation product have been quantified.
9	Do you have method for quantifying the impurities in the API?	The firm has method for quantifying the impurities in the API.
10	Do you have some remaining quantities of the API, its reference standard and impurities standards?	The firm has some remaining quantities of the API and working standard of the API only.
11	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipients. The excipients include: Mannitol, Citric Acid (Anhydrous), Sodium Citrate (Dihydrate), Poloxamer 407, Benzalkonium Chloride, CMC, Sodium Chloride, EDTA &Sodium Hydroxide Pellets.
12	Do you have documents confirming the import of the used excipients?	The firm has documents confirming the import of some excipients; however, major excipients have been purchased locally.
13	Do you have test reports and other records on the excipients used?	The firm has test reports and other records on the excipients used.
14	Do you have written and authorized protocols for the development of Zithrosan 1% Eye Drops?	The firm has written and authorized protocols for the development of Zithrosan 1% Eye Drops (Azithromycin). However, the protocol has not been used completely.
15	Have you performed Drug-excipient compatibility studies?	The firm has not performed Drug-excipients compatibility studies irrespective of the fact that the formulation of Zithrosan 1% Eye Drops is different from the innovator product (Azasite 1% Solution, by M/s. Inspire Pharmacueticals, USA).
16	Have you performed comparative studies?	The firm has not performed comparative studies with the innovator product. The innovator product is even not procured by the firm.
17	Do you have product development (R&D) section?	The firm has an R&D Lab provided with some equipment.
18	Do you have necessary equipment available in product development section for development	As Above.

Sr. No.	Question	Observation by panel
	of Eye Drops?	
19	Are the equipment in product development section qualified?	The available equipment in product development section are qualified.
20	Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?	The firm has SOP for the maintenance/calibration/requalification of equipment used on PD section.
21	Do you have qualified staff in product development section with proper knowledge and training in product development?	The firm has 02 qualified staff (pharmacists) in manufacturing part whereas 04 personnel (03 chemists and 01 pharmacists) in analytical part of the product development.
22	Have you manufactured three stability batches for the stability studies of Zithrosan 1% Eye Drops as required?	The firm has manufactured three stability batches for accelerated and real time stability studies of Zithrosan 1% Eye Drops with batch No. 06T, 07T & 08T each of 1Litre quantity. Tablet grade material has been used with 5% overage for manufacturing of eye drops. Literature survey of Azasite 1% ophthalmic solution (innovator product) clearly indicate that the eye drops are in solution form without any overage whereas the firm's product is in suspension form with 5% overage. Moreover, the development protocol of the firm shows that filteration be used for sterilization of the final product however, the filteration process for ophthalmic suspension is inappropriate process. The firm actually has not sterilized the suspension besides the fact that they have conducted the sterility testing in the stability testing program.
23	What were the criteria for fixing the batch size of stability batches?	The criteria for fixing the batch size of stability batches is the number of test and their frequencies.
24	Do you have complete record of production of stability batches?	The firm has complete record of production of stability batches. Necessary log books of equipment used have been available with the firm.
25	Do you have protocols for stability testing of stability batches?	The firm has protocol for stability testing of stability batches.
26	Do you have developed and validated the method for testing of stability batches?	The firm has developed and validated the method for testing stability batches. However, the method is an isocratic method being validated without the use of impurity standards and forced degradation studies hence the method is non-stability indicating and not validated properly as per guidelines.
27	Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?	Not applicable at this stage.
28	Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of API and the finished drug?	The firm has documents confirming the qualification of equipment / instruments being used in the test and analysis of API and finished drug.
29	Do your method of analysis stability indicating?	The method of analysis is not stability indicating. The accelerated stability studies report (Batch # 08T) show the assay results as under: 100.14% (0 month), 107.78% (3 months) and 114.55% (6 months). Hence there is significant change within three months time. The real time stability reports on all three trial batches (06T, 07T and 08T) show that the assay results have crossed the

Sr. No.	Question	Observation by panel
		specifications (90.0 % to 110.0%) at 12 months i.e. Batch # 06T (118.81%), 07T (118.94%) and 08T (119.53%) respectively. The firm container closure system is LDPE bottle with HDPE caps however, no water loss studies have been conducted by the firm as required for LDPE containers.
30	Do your HPLC software is 21CFR compliant?	The HPLC software is 21CFR Compliant as per record available with the firm.
31	Can you show Audit Trail reports on API and finish product testing ?	The firm showed the audit trail reports on API and finish product testing.
32	Do you have some remaining quantities of degradation products and stability batches?	The firm has some remaining quantities of stability batches only.
33	Do you have stability batches kept on real time stability testing?	The firm has completed the accelerated and real time stability testing. The results of study do not conform to the designed specifications.
34	Do you have valid calibration status for the equipment used in the production and analysis of API and Eye Drops?	The firm has valid calibration status for the equipment used in Zithrosan 1% Eye Drops production and analysis.
35	Do proper and continuous monitoring and control are available for stability chamber?	Continuous power supply and monitoring are available for stability chambers, however currently there is no pack of Azithrosan 1% Eye Drops available in the chambers as the study has already been completed.
36	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	The related manufacturing area, equipment, personnel and utilities be rated as GMP compliant.

Conclusions:

1. The firm has used 34.26g quantities for manufacturing of three stability batches (1 litre each) of Zithrosan 1% eye drops, from 75 kg API (Azithromycin Dihydrate - tablet grade) imported for production of their registered product, Azithromycin tablets vide invoice No. 201610103 dated 25th October, 2016 from M/S. Ningxia Qiyuan Pharmaceutical Co. Ltd., China.

2. The firm has not performed comparative studies with the innovator product. The innovator product is even not procured by the firm.

3. The firm has manufactured three stability batches for accelerated and real time stability studies of Zithrosan 1% Eye Drops with batch No. 06T, 07T & 08T each of 1Litre quantity. Tablet grade material has been used with 5% overage for manufacturing of eye drops. Literature survey of Azasite 1% ophthalmic solution (innovator product) clearly indicate that the eye drops are in solution form without any overage whereas the firm's product is in suspension form with 5% overage. Moreover, the development protocol of the firm shows that filteration be used for sterilization of the final product however, the filteration process for ophthalmic suspension is inappropriate process. The firm actually has not sterilized the suspension besides the fact that they have conducted the sterility testing in the stability testing program.

4. The firm has developed and validated the method for testing stability batches. However, the method is an isocratic method being validated without the use of impurity standards and forced degradation studies hence the method is non-stability indicating and not validated properly as per guidelines.

5. The method of analysis is not stability indicating. The accelerated stability studies report (Batch # 08T) show the assay results as under:

100.14% (0 month), 107.78% (3 months) and 114.55% (6 months). Hence there is significant change within three months time. The real time stability reports on all three trial batches (06T, 07T and 08T) show that the assay results have crossed the specifications (90.0 % to 110.0%) at 12 months i.e. Batch # 06T (118.81%), 07T (118.94%) and 08T (119.53%) respectively. The firm container closure system is LDPE bottle with HDPE caps however, no water loss studies have been conducted by the firm as required for LDPE containers.

6. The firm has completed the accelerated and real time stability testing. The results of study do not conform to the designed specifications.

Recommendations:

1. Keeping in view the above facts the genuineness / authenticity of stability data submitted by the firm for registration of Zithrosan 1% Eye Drops (Azithromycin as dehydrate) is not verifiable.

2. Since significant change has been found within 03 months in accelerated stability studies, although using non-stability indicated method which clearly indicate that the product is unstable and extrapolated value of degradation will be outside the product specifications (Assay limit 90% - 110%) even using non-stability indicating method.

3. The real time stability studies have also shown out of specification results at 12 months with further increase at 18 months.

4. The firm must re-design / conduct their studies with proper ultra-fine grade API, properly developed formulation and testing program including comparative studies using authentic reference standards of API, impurities and innovator product with stability indicating method under the guidance of proper product development staff.

Decision: **Registration Board deliberated that applied product is me too / generic drug product and thus its product development data is required before sale of drug as done in all other cases. After thorough deliberation, the Board decided to approve the registration of Zithrosan 1% Eye Drops (Azithromycin as dihydrate) based on availability of other generics of applied drug Product. As panel has identified shortcomings thus firm shall repeat product development and registration letter shall be issued after submission of data.**

b. Exemption from onsite verification of stability data

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API	Copy of COA from M/s Nantong Chanyoo Pharmatech Co, Ltd – China is submitted
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP Certificate issued on December 06, 2016 by Nantong Chemical & Medical Industry Association, People's Republic of China is submitted valid till Dec 2019
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Copy of Form 6 issued by ADC Peshawar DRAP along with Form 3, Form 7, packing list, commercial invoice and goods declaration has been submitted. Import quantity: 2 kg **Batch #:** 201706001 **Working standard:** **Batch #:** WS201610001 **Impurities:** Provided **Address of Exporter**: M/s Changzhou Pharmaceutical Factory, 518 Laodong East Road, Changzhou, Jiangsu Province, China **Address of Consignee**: M/s Ferozsons Laboratories Limited. P.O Ferozsons Amangarh, Nowshera, KPK-Pakistan
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR		
Dissolution: Sacubitril/Valsartan: Tablet II (Paddle) 50, Phosphate Buffer, pH 6.8[degassed], 900,10, 15, 20, 30 and 45		
Data for exemption from On-site investigation of submitted stability data		
Administrative Portion		
1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "INVICTA TABLETS" (Sofosbuvir 400mg and Velpatasvir 100mg), which was conducted on 16-March 2018 and was presented in 281st meeting of Registration board. Registration Board decided to approve registration of "INVICTA TABLETS" by M/s. Ferozsons Laboratories Limited. According to the report following points were confirmed • HPLC is 21 CFR compliant • Audit trails of the test reports were available. • Related manufacturing area equipment's personals and utilities were found GMP compliant.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted photocopies of ADC (Peshawar) attested Form 6 dated 01/06/2017, Commercial Invoice for 2kg via Invoice # CY117235 dated: 26/06/2017 lot No. 201706001 from M/s. Changzhou Pharmaceutical Factory, 518 Laodong East Road, Changzhou, Jiangsu Province, China vide proper approval from DRAP Office, Peshawar.
3.	Documents for the procurement of reference standard and impurity standards.	The reference and impurity standards were received free of cost with API i.e. Sacubitril + Valsartan trisodium hemipentahydrate.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP Certificate issued on December 06, 2016 by Nantong Chemical & Medical Industry Association, People's Republic of China is submitted
5.	Mechanism for Vendor pre-qualification	Firm has submitted SOP "Procedure for induction of new vendor"
6.	Certificate of analysis of the API, reference standards and impurity standards	• **API** Photocopy of COA of Batch No. 201706001 issued by M/s Nantong Chanyoo Pharmatech Co, Ltd – China is submitted. • **Reference standards and impurity standards:** The firm has submitted the copy of COA's of Working Standard and Impurity standards of API provided by the API Manufacturer M/s Nantong Chanyoo Pharmatech Co, Ltd - China
7.	Documents for the procurement of excipients used in product development?	Firm has submitted documents for procurement of excipients used in product development.
8.	List of qualified staff involved in product development with relevant experience.	Firm has submitted list of 10 qualified persons
Production Data		
9.	Authorized Protocols/SOP for the development & stability testing of trial batches.	The firm has submitted copy of SOP with the title 'Protocol For Development of generic product Artril Tablets (Sacubitril 24mg/Valsartan 26mg) '. **Effective date 18-11-2017.**
10.	Complete batch manufacturing record of three stability batches.	Firm has provided complete batch manufacturing record of all the three batches **ARTRIL Tablets 24mg/26mg**

Evaluation by PEC:

Sr.#	Deficiency/Observation	Response by Pharma.
i.	• On commercial invoice M/S Changzhou pharmaceutical is mentioned while COA and GMP provided is of M/S Nantong Jiangsu china. Clarification needed.	It is to clarify that as per provided invoice M/s Changzhou Pharmaceutical Factory – China is a Beneficiary's name and Manufacturer name is Nantong Chanyoo Pharmatech Co, Ltd – China Moreover STATEMENT that Nantong Chanyoo Pharmatech Co, Ltd –China is wholly owned subsidiary of M/s Changzhou Pharmaceutical Factory – China is also provided
ii.	Stability of API is on 25°C ± 2°C & 60±5%RH	Stability studies report of API as per condition of Zone IV-A is submitted
iii.	Extra peak on some chromatograms I.e. SVT-004-603.icd, SVT-004-602.icd	The extra peaks in some chromatograms are of solvent Solvent pH 1.2 is used as media to conduct comparative dissolution profile Chromatograms showing only solvent pH 1.2 peaks obtain are also provided.
iv.	Comparative dissolution raw data sheets	Provided
v.	The initiation date is 6/2018 but the date on chromatograms are of 2017. (sample: QC NO.R-8937 &**2017**09011) Clarification is needed	The chromatograms are not of 2017. Whereas the sample: QC NO.R-8937 & 201709011 is sample identification number and not the date. Moreover each and every chromatogram has its own date at which analysis was conducted. Chromatograms with highlighted dates are provided

Decision: Registration Board decided to approve registration of "ARTRIL Tablets 24mg/26mg (Sacubitril….24mg & Valsartan…..26mg) by M/s Ferozsons Laboratories Limited, Nowshera, KPK-Pakistan, with the change in brand name. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

992.	M/s Ferozsons Laboratories Limited P.O Ferozsons, Amangarh, Nowshera, KPK-Pakistan	ARTRIL Tablets 97mg/103mg Each film coated tablet contains Sacubitril….97mg (Neprilysin inhibitor) Valsartan…..103mg (Angiotensin II Receptor Antagonists) As Sacubitril + Valsartan trisodium hemipentahydrate Firm has claimed Mfg. Specs.	Form-5 Dy. No: 3450 Dated.25/01/2019 Rs.20,000/- (Challan #0788890) As per SRO	USFDA. ENTRESTO by M/s Novartis Not applicable The firm was granted GMP certificate based on inspection conducted on dated 10-01-2018.

STABILITY STUDY DATA			
Drug	ARTRIL Tablets 97mg/103mg		
Name of Manufacturer	M/s Ferozsons Laboratories Limited		
Manufacturer of API	M/s Nantong Chanyoo Pharmatech Co, Ltd – China No.2 Tonghai Si Road, Yangkou Chemical Industrial Park, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, P.R.China		
API Lot No.	201706001		
Description of Pack (Container closure system)	Alu/Alu blister packed in unit carton (1x14's)		
Stability Storage Condition	Real time : 30°C ± 2°C / 75% ± 5% RH Accelerated: 40°C ± 2°C / 75% ± 5% RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 4, 6 (month) Real Time: 0, 3,6 (month)		
Batch No.	SVTab-007	SVTab-008	SVTab-009
Batch Size	950 tablets	950 tablets	950 tablets
Manufacturing Date	05-2018	05-2018	05-2018
Date of Initiation	29-05- 2018	29-05- 2018	29-05- 2018
No. of Batches	03		
Date of Submission	01-2-2019 (Dy. No.4656)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents To Be Provided**	**Status**
1.	COA of API	Copy of COA from M/s Nantong Chanyoo Pharmatech Co, Ltd – China is submitted
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP Certificate issued on December 06, 2016 by Nantong Chemical & Medical Industry Association, People's Republic of China is submitted.
3.	Protocols followed for conduction of stability study	Yes

	and details of tests.	
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Copy of Form 6 issued by ADC Peshawar DRAP along with Form 3, Form 7, packing list, commercial invoice and goods declaration has been submitted. Import quantity: 2 kg **Batch #:** 201706001 **Working standard:** **Batch #:** WS201610001 **Impurities:** Provided **Address of Exporter**: M/s Changzhou Pharmaceutical Factory, 518 Laodong East Road, Changzhou, Jiangsu Province, China **Address of Consignee**: M/s Ferozsons Laboratories Limited. P.O Ferozsons Amangarh, Nowshera, KPK-Pakistan
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR		
Data for exemption from On-site investigation of submitted stability data		
Administrative Portion		
1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "INVICTA TABLETS" (Sofosbuvir 400mg and Velpatasvir 100mg), which was conducted on 16-March 2018 and was presented in 281st meeting of Registration board. Registration Board decided to approve registration of "INVICTA TABLETS" by M/s. Ferozsons Laboratories Limited. According to the report following points were confirmed • HPLC is 21 CFR compliant • Audit trails of the test reports were available. • Related manufacturing area equipment's personals and utilities were found GMP compliant.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted photocopies of ADC (Peshawar) attested Form 6 dated 01/06/2017, Commercial Invoice for 2kg via Invoice # CY117235 dated: 26/06/2017 lot No. 201706001 from M/s. Changzhou Pharmaceutical Factory, 518 Laodong East Road, Changzhou, Jiangsu Province, China vide proper approval from DRAP Office, Peshawar.
3.	Documents for the procurement of reference standard and impurity standards.	The reference and impurity standards were received free of cost with API i.e. Sacubitril + Valsartan trisodium hemipentahydrate. Copy of packing list and commercial invoice provided
4.	Approval of API/ DML/GMP certificate of API manufacturer	Copy of GMP Certificate issued on December 06, 2016 by Nantong Chemical & Medical Industry Association, People's Republic of China

Evaluation by PEC:

Sr.#	Deficiency/Observation	Response by Pharma.
i.	• On commercial invoice M/S Changzhou pharmaceutical is mentioned while COA and GMP provided is of M/S Nantong Jiangsu china. Clarification needed.	It is to clarify that as per provided invoice M/s Changzhou Pharmaceutical Factory – China is a Beneficiary’s name and Manufacturer name is Nantong Chanyoo Pharmatech Co, Ltd – China Moreover STATEMENT that Nantong Chanyoo Pharmatech Co, Ltd –China is wholly owned subsidiary of M/s Changzhou Pharmaceutical Factory – China is also provided
i.	Stability of API is on 25°C ± 2°C & 60±5%RH	Stability studies report of API as per condition of Zone IV-A is submitted
i.	Extra peak on some chromatograms I.e. SVT-004-603.icd, SVT-004-602.icd	The extra peaks in some chromatograms are of solvent Solvent pH 1.2 is used as media to conduct comparative dissolution profile Chromatograms showing only solvent pH 1.2 peaks obtain are also provided.
’.	Comparative dissolution raw data sheets	Provided

v.	The initiation date is 6/2018 but the date on chromatograms are of 2017. (sample: QC NO.R-8937 &**2017**09011) Clarification is needed	The chromatograms are not of 2017. Whereas the sample: QC NO.R-8937 & 201709011 is sample identification number and not the date. Moreover each and every chromatogram has its own date at which analysis was conducted. Chromatograms with highlighted dates are provided.

Decision: Registration Board decided to approve registration of "ARTRIL Tablets 97mg/103mg (Sacubitril….97mg & Valsartan…..103mg) by M/s Ferozsons Laboratories Limited, Nowshera, KPK-Pakistan, with the change in brand name. Manufacturer will place first three production batches of the product on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Evaluation by PEC:

Sr.#	Deficiency/Observation	Response by Pharma.
i.	The formula used to calculate the assay and dissolution is not correct. Clarification is required for this regard.	Firm claims that, As already mentioned in method of analysis the concentration of sample & standard used in the assay and dissolution is same. So, that's why the peak area of standard and sample was considered to calculate the percentage of assay and dissolution Formula Peak area of sample %age = ---------- x 100 Peak area of standard USP Reference is provided
i.	Clarification is required, regarding inverted peaks in assay and dissolution analysis (Dissolution: e.g. Sample ID: B No. SSTAB-005) Assay (Sample ID: B No. SSTAB-005.103.lcd)	Firm responded that these inverted peaks or extra peaks are of pure solvent peak used in the analysis method provided. Moreover, the analytical method validation study. In which the specificity is clarifying the solvent peaks
i.	Clarification is required, regarding variation in run time of chromatograms in assay and dissolution analysis. (Dissolution is on 5.5 min in chromatograms in volume 2/6) and 7 minutes in chromatograms in volume 6/6)	Firm reply that, "The difference of run time in dissolution profile study is due to different media used and during study possibility of some extra peaks may be elute. Due to this reason, run time increased to make sure the elution of these extra peaks if any. That's why the run time increases up to one min more in the comparative dissolution profile study. As this is only the study of our product dissolution behavior in different media with innovator product".
'.	Why baseline is not stable in comparative dissolution chromatograms (e.g. in case of dissolution pH 4.5). Justify	The comparative dissolution study is conducted in different pH media as recommended by the USP. The column behaves differently in different medias as a general rule. In case of Acetate buffer media pH 4.5 the base line is stable and some peaks of the media are observed as a normal consequence. This is followed by the distinct peak of the active Solifenacin succinate which is reproducible in all the runs. Therefore there is no observed deviation.

Decision:Deferred for consideration of case on its turn, as applied formulation is a Me Too product, for which submission of stability studies are not required at present.

4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Copy of Form 6 issued by ADC Peshawar DRAP along with copy of DRAP acknowledgement regarding intimation of receiving of **Solifenacin succinate** 150gm along with working standard 250mg and impurities standards 5x10mg from **M/s Jubilant Generics Limited - India** **API Batch #:** 7SLF317008 **Working standard Batch #:** SLF/R0019/045 **Impurities:** Provided **Address of Manufacturer**: M/s Jubilant Generics Limited – India Plot # 18, 56, 57 and 58, KIADB Industrial Area, Nanjangud, Mysore, Karnataka 571302,

		India **Address of Consignee**: M/s Ferozsons Laboratories Limited. P.O Ferozsons Amangarh, Nowshera, KPK-Pakistan
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

Data for exemption from On-site investigation of submitted stability data

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Firm has referred to onsite inspection report of their product "INVICTA TABLETS" (Sofosbuvir 400mg and Velpatasvir 100mg), which was conducted on 16-March 2018 and was presented in 281st meeting of Registration board. Registration Board decided to approve registration of "INVICTA TABLETS" by M/s. Ferozsons Laboratories Limited. According to the report following points were confirmed • HPLC is 21 CFR compliant • Audit trails of the test reports were available. • Related manufacturing area equipment's personals and utilities were found GMP compliant.
2.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted Copy of Form 6 # 00425/2017-DRAP(P)/1550 dated: 01-06-2017 issued by ADC Peshawar DRAP along with copy of DRAP acknowledgement dated: 06-10-2017, regarding intimation of receiving of **Solifenacin succinate** 150gm along with working standard 250mg and impurities standards 5x10mg from **M/s Jubilant Generics Limited – India**
3.	Documents for the procurement of reference standard and impurity standards.	The reference and impurity standards were received free of cost with API i.e. Solifenacin succinate. Copy of DRAP acknowledgement regarding intimation of receiving of **Solifenacin succinate** 150gm along with working standard 250mg and impurities standards 5x10mg from **M/s Jubilant Generics Limited – India** is attached.
4.	Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP Certificate issued on April 23, 2018 by Office of the Drugs Controller For the State of Karnataka, Palace Road, Bangalore-560 001-India is submitted
5.	Mechanism for Vendor pre-qualification	Firm has submitted SOP "Procedure for induction of new vendor"
6.	Certificate of analysis of the API, reference standards and impurity standards	• **API** Photocopy of COA of Batch No. 7SLF317008 issued by Jubilant Generics Limited – India is submitted. • **Reference standards and impurity standards:** The firm has submitted the copy of COA's of Working Standard and Impurity standards of API provided by the API Manufacturer M/s Jubilant Generics Limited – India.

16.	Analysis reports for excipients used.	The firm has submitted copy of Manufacturer's COA's and Firm analysis reports for the excipients used in the applied formulation.
17.	Drug-excipients compatibility studies.	The firm has not submitted Drug-excipients compatibility studies and has referred to the Innovator Product (VESICARE Tablets).
18.	Record of comparative dissolution data.	Firm has submitted comparative dissolution profile with the reference product Vesicare Tablets manufactured by Astellas Pharma US, Inc.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted compliance record of HPLC software 21 CFR & audit trail reports

Feature	**Reference Product**	**Product of Ferozsons Laboratories Limited**
Brand name	Vesicare Tablets 10mg	Solyxa Tablets 10mg
Batch No.	E1700232	SSTab-001
Mfg. date	Exp. 02-2020	04-2018

Evaluation by PEC:

Sr.#	**Deficiency/Observation**	**Response by Pharma.**
i.	The formula used to calculate the assay and dissolution is not correct. Clarification is required for this regard.	Firm claims that, As already mentioned in method of analysis the concentration of sample & standard used in the assay and dissolution is same. So, that's why the peak area of standard and sample was considered to calculate the percentage of assay and dissolution Formula Peak area of sample %age = ---------- x 100 Peak area of standard USP Reference is provided
i.	Clarification is required, regarding inverted peaks in assay and dissolution analysis (Dissolution: e.g. Sample ID: B No. SSTAB-005) Assay (Sample ID: B No. SSTAB-005.103.lcd)	Firm responded that these inverted peaks or extra peaks are of pure solvent peak used in the analysis method provided. Moreover, the analytical method validation study. In which the specificity is clarifying the solvent peaks
i.	Clarification is required, regarding variation in run time of chromatograms in assay and dissolution analysis. (Dissolution is on 5.5 min in chromatograms in volume 2/6) and 7 minutes in chromatograms in volume 6/6)	Firm reply that, "The difference of run time in dissolution profile study is due to different media used and during study possibility of some extra peaks may be elute. Due to this reason, run time increased to make sure the elution of these extra peaks if any. That's why the run time increases up to one min more in the comparative dissolution profile study. As this is only the study of our product dissolution behavior in different media with innovator product".
'.	Why baseline is not stable in comparative dissolution chromatograms (e.g. in case of dissolution pH 4.5). Justify	The comparative dissolution study is conducted in different pH media as recommended by the USP. The column behaves differently in different medias as a general rule. In case of Acetate buffer media pH 4.5 the base line is stable and some peaks of the media are observed as a normal consequence. This is followed by the distinct peak of the active Solifenacin succinate which is reproducible in all the runs. Therefore there is no observed deviation.

Decision: Deferred for consideration of case on its turn, as applied formulation is a Me Too product, for which submission of stability studies are not required at present.

18.	Record of comparative dissolution data.	Firm has submitted comparative dissolution profile with the reference product Epclusa™ 400mg/100mg Tablet, Patheon Inc. Mississauga, ON L5N 7K9 Canada.

FEATURE	REFERENCE PRODUCT	PRODUCT OF HIGHNOON
BRAND NAME	Epclusa™ 400/100mg Tablet	Sofosbuvir–Velpatasvir 400/100mg Tablets
BATCH NO.	YPPGD3	RD-18124
MFG. / EXPIRY DATE	Mfg. Date: 07-2017 Exp. Date: 07-2020	Mfg. Date: 06-2018 Exp. Date: 06-2020

Test was performed at:

i. 1.2N Hydrochloric Acid Solution
ii. pH 4.5 Acetate buffer solution.
iii. pH 7.4 phosphate buffer solution.

19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted compliance record of HPLC software 21 CFR & audit trail reports.

Evaluation by PEC:

S #	Short comings	Response of Firm
..	COA of impurity standards are required	The related substance in API and FPP are evaluated by the validated method provided by API manufacturer (Optimus drug pvt Ltd). In this method the related substance (RP isomers) are calculated by area normalization method which does not required impurity standard. For identification of known impurity (RP isomer) the relative retention time of the impurity are used. The relative retention time of impurity is about 0.95 with reference to sofosbuvir retention time.
2.	Valid GMP certificate is required as Photocopy of GMP Certificate Sofosbuvir: (# 11980/A3/2016) issued to Optimus Drugs Pvt Ltd, was valid up to 1-2019.	Valid GMP certificate of Sofosbuvir: (# 2021/A3/2018) issued to Optimus Drugs Pvt Ltd, valid up to 21-5-2020 is provided.
3.	Valid GMP certificate is required as Photocopy of GMP Certificate Velpatasvir: (#8340/A3/2017) issued by Optrix Laboratories Pvt Ltd, was valid up to 7-2018.	Valid GMP certificate of Velpatasvir: (#5109/A3/2018) issued to Optimus Drugs Pvt Ltd, valid up to 4-9-2020 is provided.
4.	The innovators finish product testing including tests for microbial contents. Justify the exemption of these tests	The microbiological testing is not performed on trial batches the first three commercial validation batches will be subject to microbiology testing and subsequently every 5th commercial batch of solid dosage form will be tested
5.	Stability studies reports on conditions of Zone IV-A for API conducted by API manufacturer is required.	**For API:** The firm has submitted copy Long Term 03 Months (25°C ± 2°C & 60±5%RH) stability study reports of 03 batches On **query** they submitted that according to WHO technical report series Regarding real time stability study storage conditions for long term stability study is 25°C ± 2°C / 60% ± 5% RH or 30°C ± 2°C / 65% ± 5% RH "which is determined by the climatic condition under which API is intended to be stored". ICH guideline also supported that statement that "*therefore the climatic conditions for long term stability study can be selected based on the intended storage conditions of the*

		API. Manufacturer recommended the storage of valpatesvir API at 25°C ± 2°C / 60% ± 5% RH and at highnoon the raw material store is maintained at 25°C ± 2°C / 60% ± 5% RH therefore we request you to accept the stability at 25°C ± 2°C / 60% ± 5% RH

Decision: Registration Board decided to defer the case for submission of complete stability studies for three batches of API either as per zone IV-A conditions as only copy of Long Term 03 Months (25°C ± 2°C & 60±5%RH) stability study reports of 03 batches are submitted OR Justification on scientific basis that whether an API with stability studies at (250C ±20C & 60 ±5% RH.) be used to prepare a FPP which has to be stored at zone IV-A conditions.

		Packs), out of which 01 pack are remaining **Accelerated** and 07 Packs remaining **Real Time.** • **RD-18024: Batch Size : 3,000 Tablets** 19 Packs placed on stability (Accelerated: 05 Packs, Real Time : 14 Packs), out of which 01 pack are remaining **Accelerated** and 07 Packs remaining **Real Time.**
QA/QC DATA		
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring control for the complete stability period.
13.	Method used for analysis of API along with COA.	Firm has provided the method used for analysis of API along with its certificate of analysis
14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	Firm has provided method used for analysis of FPP and complete record of testing of stability batches including chromatograms, lab reports and raw data sheets are submitted with 06 months Accelerated stability data and 09 months Real Time Stability Data.
15.	Reports of stability studies of API from manufacturer.	**SACUBITRIL:** The firm has submitted copy of **Accelerated 06 Months** (40°C ± 2°C & 75±5%RH), **Long Term 12 Months** (25°C ± 2°C & 60±5%RH) **and Intermediate 12 Months** (30°C ± 2°C & 75±5%RH) & stability study reports of 03 batches of Sacubitril/Valsartan from M/s Zhuhai Rundu Pharmaceutical Co., Ltd., China
16.	Analysis reports for excipients used.	The firm has submitted copy of COAs for the excipients used in the applied formulation.
17.	Drug-excipients compatibility studies.	The firm has submitted Drug-excipients compatibility studies
18.	Record of comparative dissolution data.	Firm has submitted comparative dissolution profile with the reference product Entresto 50mg Tablet, Novertis Pharma, Switzerland.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted compliance record of HPLC software 21 CFR & audit trail reports.

FEATURE	REFERENCE PRODUCT	PRODUCT OF HIGHNOON
BRAND NAME	Entresto 50mg Tabs	Sacuva 50mg Tabs
BATCH NO.	TN690	RD-18024
MFG. / EXPIRY DATE	Mfg. Date: 12-2017 Exp. Date: 11-2019	Mfg. Date: 01-2018 Exp. Date: 01-2020

Evaluation by PEC:

- The firm has submitted copy of generalized SOP with the title 'Product Design & Development'.Provide complete stability protocols along with detail protocols of dissolution method and assay methods.
- Why on stability 24.3 and 25.7 is mentioned but reference is of 24 ad 26
- In protocol batch number is mentioned as 18024 but in protocol its 8005?
- Impurity standard details?
- Reference of last onsite panel inspection for instant dosage form conducted during last two years

S #	Short comings	Response of Firm
..	Provide complete stability protocols along with detail protocols of trail batches and testing methods e.g. dissolution method and assay methods.	The stability and report have been submitted
..	COA and import documents of	The related substance in API and FPP are evaluated by the

	impurity standards are required	validated method provided by API manufacturer Zuhai Rundu pharmaceuticals co Ltd. In this method the related substance are calculated by *area normalization method* which does not required impurity standard. For identification of impurity the relative retention time of the impurity are used. The relative retention time of impurity B is about 0.7 and impurity C is about 5 with reference to valsartan retention time (6 min)
3.	Some of the excipient are different from innovator e.g. innovators is using copovidone which is not used in applied product. Clarification is needed.	Firm replied that they are also using Co-povidone by the name of Kollidone VA 64
