MINUTES OF 320th MEETING OF REGISTRATION BOARD HELD ON 29th-31st AUGUST, 2022

==*=*=*

320th meeting of Registration Board was held on 29th, 30th & 31st September, 2022 in the Committee Room, Drug Regulatory Authority of Pakistan, G-9/4, Islamabad. The meeting was chaired by Dr. Obaidullah, Chairman Registration Board DRAP. The meeting started with recitation of the Holy Verses.

Dr. Obaidullah, Chairman Registration Board apprised the Board regarding appointment of newly appointed Secretary Registration Board Ch. Zeeshan Nazir Bajar, after the recent promotions within DRAP. All the Board members welcomed newly appointed Secretary Registration Board and hoped that their presence in Registration Board will help in efficient working of the Board. The Board also acknowledged the services of Ex-Secretary, Registration Board Mr. Abdullah and appreciated his commendable efforts for efficiently conducting the proceedings of Board.

Following members attended the meeting:

1.	Ch. Zeeshan Nazir Bajar, Additional Director (BE&R/PE&R), DRAP.	Member/ Secretary
2.	Lt.Gen.(R) Prof. Dr. Karamat A. Karamat (HI-M.SI-M), Former Surgeon General Pakistan.	Member
3.	Maj. Gen. (R) Dr. Tahir Mukhtar Sayed, Inspector General (Hospitals), Fauji Foundation, Rawalpindi	Member
4.	Dr. Qurban Ali, Ex-Director General, National Veterinary Laboratories, Islamabad	Member
5.	Ms. Aisha Irfan, Additional Director, Biological Evaluation & Research Division, DRAP	Member
6.	Mr. Iftikhar A. Choudhary, Hospital Pharmacist, Lahore	Member
7.	Mr. Muhammad Aslam, Deputy Draftsman-I, Ministry of law & Justice, Islamabad.	Member
8.	Mr. Ijaz Alvi, Director, DTL, Rawalpindi	Member
9.	Dr. Imran Khan, Director, DTL, Peshawar	Member
10.	Mr. Akhtar Abbas Khan, Representative of QA&LT Division	Member

Mr. Nadeem Alamgir (Pharma Bureau), Mr. Ali Raza & Mr. Jalal (PPMA) and Mr. Ziaulhaq (PCDA) attended the meeting as observers.

Director, BE&R was assisted by respective Add. Director and Assistant Directors for presentation of the agenda.

Item No. I: Confirmation of Minutes of 319th meetings of Registration Board.

319th meeting of Registration Board was held on 11th August, 2022. The draft minutes of Registration Board were circulated among the members of Board on 25th August, 2022 with the request for perusal/approval/comments (if any) by 26th August, 2022 at 10:00am. All members agreed the draft minutes.

Accordingly, fair minutes were processed to Chairman, Registration Board for perusal/approval. After approval from Chairman Registration Board, fair minutes of 319th meeting of Registration Board were circulated among concerned divisions/sections for implementation.

Decision: Registration Board confirmed the minutes of 319th meeting.

Item No. II Division of Pharmaceutical Evaluation & Registration

Pharmaceutical Evaluation Cell (PEC)

Sr. No	Name of Evaluator	Title
1.	Mr. Farooq Aslam	Evaluator PEC-I
2.	Mr. Ammar Ashraf Awan	Evaluator PEC-II
3.	Mr. Muhammad Haseeb Tariq	Evaluator PEC-III
4.	Mst.Farzana Raja	Evaluator PEC-IV
5.	Mst. Iqra Aftab	Evaluator PEC-V
6.	Mr. Muhammad Umar Latif	Evaluator PEC-VI
7.	Dr. Sidra Khalid	Evaluator PEC-VII
8.	Dr. Hanif Ullah	Evaluator PEC-IX
9.	Dr. Farhadullah	Evaluator PEC-XI
10.	Mr. Shahid Nawaz	Evaluator PEC-XIII
11.	Mr. Ahsan Hafiz	Evaluator PEC-XIV
12.	Mst. Saima	Evaluator PEC-XV
13.	Mr. Akbar Ali	Evaluator PEC-XVI
14.	Mr. Zia Ullah	Evaluator PEC-XVII
15.	Mr. Muneeb Ahmed Cheema	Evaluator PEC-XVIII
16.	Mr. Sarfraz Nawaz	Evaluator PE&R

Case No. 1: Applications submitted on Form 5 / 5-D requiring submission of stability data

It is submitted that various applications were received on Form 5 / 5-D which requires submission of stability study data for further processing. The list of such applications is available on official website of DRAP at https://www.dra.gov.pk/e-services/applications-for-pharmaceutical-drugs/. The stability study data for these applications is not yet submitted.

Decision: Registration Board deliberated the matter in detail and observed that these applications are pending for submission of stability data/product development data by the applicants since many years. Keeping in view the pendency, the Board deliberated the matter in detail and also took opinion of PPMA and then decided that the firms shall initiate the product development and stability studies of submitted applications and intimate to Pharmaceutical Evaluation Cell (PEC) regarding procuremne of raw material, initiation of product development and initiation of stability studies, by 31st December 2022. For all those applications for which Pharmaceutical Evaluation Cell will not receive any intimation regarding initiation of product development and stability studies, will be placed before the Board for decision.

Case No. 2: Review of Reference status of Cephradine for Injection:

Registration Board in its various meetings deferred the cases of Cephradine for Injection due to discontinued status of the said product by USFDA and non-availability of evidence of approval in other reference regulatory authorities.

Recently, the firm M/s GSK, Pakistan has submitted that they have contacted US FDA to seek confirmation on the reason of discontinuation of Cephradine (Velosef) Injections in US. They were advised to refer "US Federal Register" for the reason of discontinuation, wherein it has been declared that "*Cephradine (Velosef) Injections were discontinued by the manufacturer itself based on marketing reasons and that's why the dispensing of stocks was also allowed to continue till depletion of inventories or expiry of the stocks."*

The claim of the firm has been verified from Federal Register- The daily Journal of United States Government which notified that the Food and Drug Administration (FDA) has withdrawn the approval of new drug applications (NDAs) and abbreviated new drug applications (ANDAs) listed in table below. The notification is elaborated as below:

"The holders of the applications listed in the table have informed FDA that these drug products are no longer marketed and have requested that FDA withdraw approval of the applications under the process described in § 314.150(c) (21 CFR 314.150(c)). The applicants have also, by their requests, waived their opportunity for a hearing. Withdrawal of approval of an application or abbreviated application under § 314.150(c) is without prejudice to refiling."

NDA No./ANDA No.	Drug	Applicant	Withdrawal date
NDA/50-501	Velosef Injection.	Bristol-Myers Squibb Co., P.O. Box 4000, Princeton, NJ 08543-6837.	April, 29, 2002
ANDA/061975	Cephradine Powder for Injection	Bristol-Myers Squibb Co., P.O. Box 4000, Princeton, NJ 08543.	September 7, 2018.

"Therefore, approval of the applications listed in the table, and all amendments and supplements thereto, is hereby withdrawn as of September 7, 2018. Introduction or delivery for introduction into interstate commerce of products without approved new drug applications violates section 301(a) and (d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 331(a) and (d)). Drug products that are listed in the table that are in inventory on September 7, 2018 may continue to be dispensed until the inventories have been depleted or the drug products have reached their expiration dates or otherwise become violative, whichever occurs first."

Hence it is evident from the above cited reference that the formulation of Cephradine injection had been discontinued only due to marketing reasons and no issues related to safety & efficacy have been reported by US FDA, because had there been any safety or efficacy issue, US FDA would have not allowed the dispensing of available stocks till the expiry or depletion of the inventory.

It is also pertinent to mention that other dosage forms of Cephradine i.e., Capsule & dry powder suspension are also available as of today in several reference regulatory authorities.

Following are the official website links for regulatory authorities:

Sr. No.	Website links	Regulatory authorities	Comments
1	https://cekbpom.pom.go.id//home/produk/pnkk3s5dhi2trjufaigklkt0qr/all/row/10/page/0/order/4/DESC/search/5/cefradine.	**Indonesian Food and Drug Supervisory Agency**	Confirms the registration of Cephradine 1gm/vial.
2	https://www.drugoffice.gov.hk/eps/do/en/consumer/search_drug_database2.html	**Pharmacy & Poisons Board of Hong Kong.**	Confirms the registration of Cephradine for Inj 500mg.
3	http://dgdagov.info/index.php/registered-products/allopathic	**Bangladesh Govt. - DGDA**	Confirms the registration of Cephradine 250mg/vial, 500mg/vial, 1gm/vial.
4	https://www.federalregister.gov/documents/2018/08/08/2018-16985/fougera-pharmaceuticals-inc-et-al-withdrawal-of-approval-of-27-abbreviated-new-drug-applications.	**Federal Register of US Govt.**	Confirms that Cephradine discontinued based on marketing reasons only. Hence allowed to dispense till the inventory deplete or stocks expired.
5	https://www.fda.gov/safety/recalls-market-withdrawals-safety-alerts.	**FDA Safety Alerts**	The non-availability of cephradine in said register confirms that there is no safety issue for market withdrawals.

Decision: Registration Board deliberated the matter in detail and acknowlwdged the fact that the "Cephradien injection" has not been withdrawan from US market due to safety & efficacy reasons as evident from the above cited notice published in US Federal Register. Hence, Registration Board decided to consider pending registration applications in the light of aforementioned position.

Case no. 03 Borrowing of APIs for performing Product Development, R&D & stability Testing:

DRAP Authority in its 133rd and 134th meeting considered the request of PPMA regarding borrowing of APIs for performing Product Development, R&D & stability Testing. The Authority in its 134th meeting decided as under:

The Authority reviewed its earlier decision taken in its 133rd meeting and decided as follows:

"The Authority deliberated that for product development / stability studies, the manufacturer need to purchase drug substance from a reliable source, however, in extraordinary circumstances beyond the control of manufacturer, the Authority acceded to the request of Pakistan Pharmaceutical Manufacturers Association (PPMA) to allow borrowing, except controlled drugs,

the requisite quantity of drug substance for product development / stability studies only to fulfill pre-requisite for submission of Form 5-F (CTD) from a licensed manufacturer having legitimate purchase evidence. However, all requirements of quality and traceability would be applicable in such cases and will be the responsibility of the borrower of the material. Further, the products so manufactured in NO case shall be allowed for commercial sale."

Decision: Registration Board considered decision of Authority and requested for guidance regarding processing of cases for borrowing of drug susbtances/materials for product development / stability studies of drug products on following points:

- **a.** Parameters to determine "extraordinary circumstances beyond the control of manufacturer".
- **b.** Whether borrowing will be permisable from manufacturer having registration of the products (containing same material) or will also be permisable for materials imported for experimental/ product development purposes by another manufacturer.
- **c.** Status of material after commercial import by registration holder (borrower).

On the basis of above cited decision of Board, instant case was referred for seeking guidance from the Authority. Subsequently Authority in its 140th meeting held on 28-29th June, 2022 has decided as under:

"The Authority, keeping in view of practical difficulties in implementation as highlighted by the Registration Board, reviewed its earlier decision taken in its 134th meeting held on 29th April, 2022, as under:

"The Authority deliberated that for product development / stability studies, the manufacturer need to purchase drug substance from a reliable source. Therefore, the Authority acceded to the request of Pakistan Pharmaceutical Manufacturers Association (PPMA) to allow borrowing the requisite quantity of drug substance, except controlled drugs, for product development / stability studies only to fulfill pre-requisite for submission of registration dossier from a licensed manufacturer having legitimate purchase evidence. However, all requirements of quality and traceability would be applicable in such cases and will also be the responsibility of the borrower of the material. Further, the products so manufactured in NO case shall be allowed for commercial sale."

Discussion & Decision:

Registration Board adopted the above cited decision of Authority and considered following cases:

1.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s. SAMI Pharmaceuticals (Pvt.) Ltd. F-95, Off Hub River Road, S.I.T.E. Karachi.**
	Name, address of Manufacturing site.	M/s Sami Pharmaceuticals (Pvt) Ltd. F-95, Off Hub River Road, S.I.T.E. Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 19160 dated :08-07-2021

	The proposed proprietary name / brand name	**Mevulak MR 200mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Modified release Mebeverine HCl Pellets Equivalent to Mebeverine HCl ……. 200mg (Innovator's Specifications)
	Pharmaceutical form of applied drug	Modified Release Capsule
	Pharmacotherapeutic Group of (API)	Synthetic anticholinergics ATC Code: A03AA04
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	10's, 20's, & 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Colofac® MR. Modified release capsule by M/s MHRA Approved.
	For generic drugs (me-too status)	Mebever MR 200mg Capsule by M/s Getz Pharma,Registration No. 050747
	GMP status of the Finished product manufacturer	GMP Certificate issued date 11-08-2020 on the basis of inspection conducted on 28-08-2019
	Name and address of API manufacturer.	M/s RA Chem Pharma Limited (FDF) Plot No: A-19/C, A-23A 7 A-23B, Road No0 18, IDA Nancharam, Nancharm Village , Uppal Manda, Medchal- malkajgiri district, Hyderabad, Telegana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies of Drug substance	Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 months Batches:(MBPJ16007,MBPJ16008,MBPJ16009,)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls,

		impurities, individual impurity and total impurity, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Competitor that is Mebever MR® 200mg Tablets by M/s Getz Pharma by performing quality tests (Appearance, average weight, Assay, Dissolution, impurity profiling, Microbiological limit test). CDP has been performed against the same brand that is A Mebever MR® 200mg Tablets by M/s Getz Pharma in Acid media (pH 1.2-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, accuracy, precision (including intermediate precision, Repeatability), Robustness, specificity

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Reference of our last onsite panel inspection for instant dosage form conducted during last two years i.e. DELANZO DR (Dexlansoprazole) 30mg & 60mg Capsules which was presented in 281th meeting of the registration board & hence approved & registered by registration board

		Date of inspection: 02nd April, 2018.The inspection report confirms following points • The HPLC software is 21CFR Compliant • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML for M/s RA Chem Pharma Limited (FDF) (License No# 23/RR/AP/2007/F/R/CC, Dt:07/07/2013) issued by Drug Control Administration Government of Telegana, valid upto 26-10-2025 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Detail of Loan material from S.J & G Fazul Elahie (Pvt.) Karachi along with the Copy of form 3, form 7 & commercial invoice (Invoice# RATG/19-20/812 02-03- 2020 with received quantity i.e. 250 kg) for the purchase Mebeverine HCl SR Pellets by RA CHEM PHARMA LIMITED (FDF Division) with attestation of DRAP dated: 13 -02- 2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator(II):

Fee submitted PKR 120,000/-: Deposit slip #12835367, Dated: 20-01-2022

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.P.8	Clarify why you take loan of Pellets from S.J & G Fazul Elahie (Pvt.) Karachi instead of purchase from direct pellets maufacturer	Mebeverine HCL pellets of good quality could be sourced from good Indian manufacturers at reasonable rates. In order to conduct Stability Studies, we requested few manufacturers to supply required quantity of Mebeverine Hcl SR pellets to which they agreed. Unfortunately no Courier company was willing to lift sample quantity from India for delivery to us; copies of emails exchanged with them are annexed herewith.

			M/s S.J. & G Fazul Ellahie Pvt. Ltd. Karachi fortunately had sufficient stock of imported Mebeverine Hcl pellets and were willing to provide required quantity on loan. We accordingly obtained required quantity on loan from them.

Decision of 316th meeting: Deferred for further deliberation regarding regarding use of drug substance pellets by M/s Sami Pharmaceuticals (Pvt.) Ltd, for the manufacturing of stability batches, which had been procured and imported by M/s S.J. & G Fazul Ellahie Pvt. Ltd. Karachi.

Firm's response: Firm has submitted as under:

- Import of all material from India was banned vide SRO. 927 (I)/2019. dated 09-08-2019 issued by Ministry of Commerce & Textile however it was effectively operational only after Oct 2019 when DRAP Legal Affairs Division, vide its letter dated 17-10-2019 , requested Ministry of Commerce to issue the following clarification: ***(Annex A)***

  The words "therapeutic products" and "therapeutic good" carry the same meaning

- Due to this reason, all courier companies and postal authorities were not accepting any type of post and mail including letter, parcels and documents; copies of emails exchanged with FedEx, TCS(*UPS*) are annexed herewith ***(Annex B)***

- We contacted many leading USFDA, MHRA and EDQM Certified manufacturers of APIs and Pellets in India from whom we were procuring the material since last 10 years for obtaining samples but due to COVID surge in India, no courier service was accepting samples for delivery to Pakistan ***(Annex C)***

- Having been left with no other option, the material was received on "Loan" against an Understanding; as stated on Memo attached; from an established manufacturer viz., **M/s. S.J. &G. Fazul Ellahie (Pvt.) Ltd. Karachi** who had legally imported these Pellets from the same source viz., RA Chem Pharma Ltd**. It was assured to them that on obtaining drug registration, we will import commercial quantities from the same source and then return the material received on loan** ***(Annex D)***
- We have learnt that the DRAP Authpority has now allowed to take the material on loan as per following criteria:

  Material can be procured from one manufacturer to another for R&D purpose and commercial consignment then shall be obtained from the same source i.e. API supplier

Hence, in the light of above, it is earnestly requested to consider our case for favorable decision.

Moreover, firm has submitted memorandum of understanding between M/s Sami Pharma. & M/s S.J&G Fazul Ellahe regarding loan and return of the said drug substance. Firm has also submitted regarding use of the borrowed material for R&D purpose only.

Decision: Deferred till decision of Authority on borrowing of APIs for performing Product Development, R&D & stability Testing.

Decision of 320th meeting: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

2.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Nabiqasim Industries Pvt Ltd. 17/24, Korangi Industrial Area, Karachi, Pakistan**

Remarks of Evaluator(II):

Section	Observation	Firm's response
2.3	Table for literature references for the drug substance & drug product has not been submitted.	Submitted.
2.3. S.1.2	Submitted molar mass is not correct.	Corrected molar mass has now been submitted.
2.3. S.3.2	List of impurities is as per the USP monograph for Lidocaine HCl, whereas API manufacturer has declared the API of BP grade.	List of impurities as per BP monograph has now been submitted.
2.3. S.4.2	This section declares that "Lidocaine hydrochloride is tested as per the test procedures described in the US	Firm has submitted that the drug substance manufacturer has declared

	Pharmacopoeia", whereas section 2.3.S.4.1 declares the API of BP standard.	the drug substance of standard quality as per both USP & BP monograph.
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	Submitted for the titration method as per BP monograph
3.2.S.4.4	Submit analytical record for the batch analysis of drug substance performed by the M/s Nabiqasim.	Firm has submitted analytical record for the analysis of drug substance according to which analysis has been performed as per BP monograph by way of potentiometric titration.
3.2.P.1	Clarification shall be submitted regarding label claim whether it is in term of "%age w/w" or "%age w/v".	Frim has submitted that the label claim is as per innovator i.e., %age w/v"
3.2.P.2.1.2	Quantities of preservatives used in formulation shall be justified for per unit dose with reference to the relevant guidelines/standards.	Firm has referred to the literature from Hand book of pharmaceutical excipients and reference limits from FDA IID database.
3.2.P.5.1	Test for content of antimicrobial preservative & efficacy of preservative, as recommended by ICH Q1 (R2) guidelines & USP chapter <51>, has not been included in the finished product specifications. You are advised to submit justification in this regard.	Firm has submitted that preservative efficacy test, preservative content test, initial testing and 01-month stability testing and has submitted reports now. Firm has also submitted revised specifications and finished drug product analytical procedure including the test for Methyl paraben & Propyl paraben.
3.2.P.8	• Submitted commercial invoice attested by AD DRAP I&E Karachi has been isuued in the name of M/s Surge Laborartories (Pvt.) Ltd. Justification shall be submitted in this regard. • Test for content of antimicrobial preservative & efficacy of preservative, as recommended by ICH Q1 (R2) guidelines, has not been performed during stability studies. You are advised to submit justification in this regard. • A white paper titled "Support for Title 21 CFR Part 11 ….." has been submitted from "Agilent open Lab" under the heading of "Compliance record of HPLC software 21 CFR & audit trail report on product testing", whereas submitted chromatograms establish that the analysis has been performed on Schimadzu HPLC.	• With reference to the subjected query, we would like to inform you that "M/s Surge Laboratories (Pvt.) Ltd" is the sister company of "M/s Nabiqasim Industries (Pvt.) Ltd." • Commercial invoice of Lidocaine HCl attested by AD DRAP issued in the name of M/s Surge Laboratories (Pvt.) Ltd because material is imported by Surge Laboratories (Pvt.) Limited. • Lidocaine HCl supplier to "Nabiqasim Industries (Pvt.) Ltd." is its sister company "Surge Laboratories (Pvt.) Ltd". • Moreover, testing of API and stability batches conducted by M/s Nabiqasim Industries (Pvt.) Ltd. and reports are enclosed for ready reference. • Firm has submitted that preservative efficacy test, preservative content test, initial testing and 01-month stability testing and has submitted reports now. Firm has also submitted revised specifications and finished drug product analytical

		procedure including the test for Methyl paraben & Propyl paraben. • Firm has now submitted Audit trail reports.
• You are advised to submit scientific rationale for claiming USP specifications for finished drug product while the Drug substance used is of BP specifications. • Clarification shall be submitted that in which section applied product will be manufactured along with the evidence of approval of required manufacturing facility/section for applied product, from the Licensing Division of DRAP.		• We would like to inform that as per dosage form definition in USP chapter (1151). Jelly can also be covered in the definition of Gels and can be manufactured in Semi solid (Gel) manufacturing area. • Nabiqasim has dedicated semi solid manufacturing area for cream, ointment and gel manufacturing. Nabiqasim has also registered gel dosage form i.e. Chlorhexidine Gluconate Gel for which product specific inspection has been conducted on 27.10.2020. Report of this inspection is attached for your ready reference. • The Panel has report as follows against the query of required manufacturing facility for manufacturing and filling of gels: "Firm has well equipped area for manufacturing of ointment, creams and gels. Along with creams and ointments one gel preparation (Acnicot Gel, Reg. No. 080660) is already manufactured in this area. Firm has already applied to the licensing division for the inclusion of gel in their layout vide letter No. NQIL/DRAP/06-20/027, dated 10-06-2020."

Decision of 316th meeting: Registration Board deferred the case for further deliberation regarding use of drug substance by M/s Nabiqasim Industries (Pvt.) Ltd., for the manufacturing of stability batches, which had been procured and imported by M/s Surge Laboratories (Pvt.) Ltd.

Firm's response: We in this regard, would like to clarify that since M/s. Surge Laboratories (Pvt) Ltd., Sheikhupura is our associated company which is under the control of common management. As M/s. Surge Laboratories is importing API "Lidocaine HCl USP" for the manufacturing of their registered drug "Lidoject 2% Injection" Reg # 057348. In order to save time, we had taken a loan of 15Kgs "Lidocaine HCl USP" from M/s. Surge Laboratories to conduct stability for our applied drug "Lidogel Gel 2%". Firm has submitted following documents.

- Mutual agreement between M/s Nabiqasim and M/s. Surge Laboratories.

Undertaking.

Decision: Deferred till decision of Authority on borrowing of APIs for performing Product Development, R&D & stability Testing.

Decision of 320th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

3.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore**
	Name, address of Manufacturing site.	M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	GMP certificate issued on 17-07-2020
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 24-06-2019 which specifies Ophthalmic general section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 398 dated 05-01-2022
	Details of fee submitted	Rs.30,000/- dated 06-12-2021
	The proposed proprietary name / brand name	**Dorzil Eye drop**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains 22.26 mg of Dorzolamide hydrochloride equivalent to 20 mg Dorzolamide.
	Pharmaceutical form of applied drug	Eye Drops, Solution
	Pharmacotherapeutic Group of (API)	Dorzolamide: Carbonic anhydrase inhibitors ATC Code: S01EC03
	Reference to Finished product specifications	BP specification
	Proposed Pack size	1 x 5 ml
	Proposed unit price	--
	The status in reference regulatory authorities	USFDA Trusopt 20 mg/ml Eye drops, solution Santen pharmaceuticals Co., Ltd Japan
	For generic drugs (me-too status)	Trusopt Ophthalmic Drops 2% 5ml by OBS Pharma (Pvt) Karachi Ltd, Pakistan Regd. No. 021100 Pack size: 5 ml
	Name and address of API manufacturer.	**Dorzolamide** Dorzolamide from Neuland Laboratories Limited, Unit-1 Sy. No: 347, 473, 474, 490 / 2 Veerabhadraswamy temple road, Bonthapalli Village, Gummadidala Mandal, Sangareddy District - 502 313 Telangana, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties,

		solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	**Dorzolamide** Long-term stability studies were performed at a storage temperature of 30°C±2°C/65%±5% RH for 60 months. Accelerated stability studies were performed at a temperature of 40±2°C/75%±5% RH for 6 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies against the reference product of "Trusopt sterile ophthalmic Solution" by Santen pharmaceuticals Co., Ltd. Imported by OBS pharma
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions.

STABILITY STUDY DATA	
Manufacturer of APIs	**Dorzolamide** Dorzolamide from Neuland Laboratories Limited, Unit-1 Sy. No: 347, 473, 474, 490 / 2 Veerabhadraswamy temple road, Bonthapalli Village, Gummadidala Mandal, Sangareddy District - 502 313 Telangana, India
API Lot No.	DZ10420013 (Dorzolamide)
Description of Pack (Container closure system)	Low density polyethylene bottle with insert-cap assembly, HDPE screw- cap over a LDPE nozzle with tamper–evident LDPE dustcover sealing the bottle cap.
Stability Storage Condition	Real time: 30^{o}C ± 2^{o}C / 35% HR ±5%

		Accelerated: 40°C ± 2°C / NMT 25% HR		
Time Period		Real time: 3 months Accelerated: 3 months

Manufacturing Date		07/2021	07/2021	07/2021
DOCUMENTS / DATA PROVIDED BY THE APPLICANT				
#	**Documents To Be Provided**	**Status**		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dorzolamide** Copy of GMP certificate in the name of Neuland Laboratories Limited, Unit-1 Sy. No: 347, 473, 474, 490 / 2 Veerabhadraswamy temple road, Bonthapalli Village, Gummadidala Mandal, Sangareddy District - 502 313 Telangana, India, valid upto 28-06-2022 issued by Drug Control Administration, Government of Telangana, India.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD I&E DRAP, Lahore, has been submitted. **Batch No.** / **Quantity Imported** / **Date of approval by DRAP** DZ10420013 (Dorzolamide) / 1 kg / 08-06-2021 The commercial invoice is in the name of M/s Pacific Pharmaceuticals Ltd., 30th KM, Multan Road, Lahore.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with batch manufacturing record and analytical record.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports on product testing.		
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)		
Remarks of Evaluator (II):				
Section#	**Observations**	**Firm's response**		
1.5.6	Drug product specifications have been referred to as Innovator's specifications	Firm has now claimed European Pharmacopoeia Specifications		

	whereas Pharmacopoeial monographs are available for applied product.	
Dorzolamide HCl		
3.2. S.4.1	• Drug substance manufacturer has declared drug substance as of Ph. Eur grade for related substances whereas the submitted Assay test is declared as per USP pharmacopoeia. • The analytical method for Assay submitted by drug product manufacturer is different form that proposed by the drug substance manufacturer. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	• In BP/Ph. Eur there is potentiometric titration for API assay determination while in USP there is use of HPLC for Assay determination, which is better technique and equipment than the technique adopted by drug substance manufacturer. • Copies of analytical procedure submitted from drug product manufacturer.
3.2.P.5.1	• Submitted drug product specifications does not include test of "Preservative Effectiveness testing".	Microbial report for Preservative testing has been submitted now.
3.2. P.6	COA of primary / secondary reference standard including source and lot number shall be provided.	Submitted
3.2. P.8	Following shall be submitted: • Stability studies till 3rd month time point has been submitted only. • Analytical record i.e., HPLC chromatograms, raw data sheets & COAs shall be submitted for complete stability studies till 6th month time point.	• Firm has submitted 6 months stability data along woith analytical record.
2.3.R.1.1	• As per submitted BMRs terminal sterilization has not been performed. Justification shall be submitted in this regard. • The proposed batch size shall be justified against the minimum handling	• No terminal sterilization has been performed, for which firm has submitted that aseptic area manufacturing tank under LAF and aseptic blowing, filling/sealing multiple function cartage assembling 0.65µm+0.45µm+0.22µm in manufacturing for filtration of solution and 0.22 in filling BFS machine which already mention in BMR so our product is sterile by filtration and aseptic process.

	capacity of the formulation tank.	

Decision of 316th meeting: Registration Board deferred the case for further deliberation regarding use of drug substance by M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore, for the manufacturing of stability batches, which had been procured and imported by M/s Pacific Pharmaceuticals Ltd., 30th KM, Multan Road, Lahore.

Firm's response:

We Pacific Pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) have borrowed drug substance material used in the following products (Dorzil Eye drops, Glucozole-T Eye Drops, Pacilact-D IV Infusion 500ml, Pacilact-D IV Infusion 1000ml) for stability and validation purpose only from Pacific Pharmaceuticals Ltd. 30th Km Multan Road, Lahore (DML 000295).

The justification for the borrowing was based on the fact that commercial department dealing with procurement was common for both plants operating from the address 30th Km Multan Road, Lahore. However, we have already started using dedicated procurement for IV plant. We assure that all of our future procurement will be made by Pacific Pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) separately and dedicatedly.

Decision: Deferred till decision of Authority on borrowing of APIs for performing Product Development, R&D & stability Testing.

Decision of 320th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

3.2. P.8	Following shall be submitted:	

	• Complete batch manufacturing record of stability trial batches. • Documents for the procurement of API with approval from DRAP (in case of import). • Record of Digital data logger for temperature & humidity monitoring of stability chambers • Submitted analytical record reflect that chromatographic conditions for the Assay analysis of Dorzolamide have not been performed as per recommendations of USP monograph, since the gradient run time as per monograph is of 30 minutes while the firm has run HPLC chromatogram, for about 12 minutes only.	• BMR for three trial batches have been submitted • No terminal sterilization has been performed, for which firm has submitted that aseptic area manufacturing tank under LAF and aseptic blowing, filling/sealing multiple function cartage assembling 0.65µm+0.45µm+0.22µm in manufacturing for filtration of solution and 0.22 in filling BFS machine which already mention in BMR so our product is sterile by filtration and aseptic process. • Firm has applied "Solution preparation tank" of 100 litres for the manufacturing of 5 litre batch size stating that design capacity of active manufacturing tank ranges from 5 litres to 100 litres so, 5 litres batch can be easily processed. • Submitted HPLC chromatograms reflect that the chromatographic conditions for the Assay test have not been complied as per USP monograph in terms of the run time for which firm has replied that although the injection run time is 30minute but the peaks separation of Dorzolamide is about 12 minutes. In the chromatograms sample run time is about 20minute but there is no any further peak found. So, it Is not big issue, in future will follow up to 30minutes.

Firm has submitted fee of Rs. 30,000/- for revision of stability data as per following details:
Rs. 7,500/- vide deposit slip#5349893974 dated 01-03-2022
Rs. 22500/- vide deposit slip#92601467 dated 09-03-2022

Decision of 316th meeting: Registration Board deferred the case for further deliberation regarding use of drug substance by M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore, for the manufacturing of stability batches, which had been procured and imported by M/s Pacific Pharmaceuticals Ltd., 30th KM, Multan Road, Lahore.

Firm's response:

We Pacific Pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) have borrowed drug substance material used in the following products (Dorzil Eye drops, Glucozole-T Eye Drops, Pacilact-D IV Infusion 500ml, Pacilact-D IV Infusion 1000ml) for stability and validation purpose only from Pacific Pharmaceuticals Ltd. 30th Km Multan Road, Lahore (DML 000295).

The justification for the borrowing was based on the fact that commercial department dealing with procurement was common for both plants operating from the address 30th Km Multan Road, Lahore.

However, we have already started using dedicated procurement for IV plant. We assure that all of our future procurement will be made by Pacific Pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) separately and dedicatedly.

Decision: Deferred till decision of Authority on borrowing of APIs for performing Product Development, R&D & stability Testing.

Decision of 320th meeting: Approved with USP specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Details of Documents submitted

1.	Reference of previous approval of applications with stability study data of the firm (if any)	--
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (Certificate# HE20190013) in the name of M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China valid upto 02-02-2024 issued by HEBEI Dug Administration.

		Sodium Chloride: Firm has submitted copy of GMP certificate in the name of M/s Dominion Salt Ltd., 89, totara street, Mount Maunganui, NewZeland valid upto 29-03-2021 issued by Ministry of Health, Newzeland. **Calcium Chloride Dihydrate:** Firm has submitted GMP certificate (Certificate# HE20180030) issued by Hebei food & Drug administration valid till 22-04-2023. **Potassium Chloride:** Firm has submitted GMP certificate (Certificate# HE20180030) issued by Hebei food & Drug administration valid till 22-04-2023. **Sodium Lactate:** Firm has submitted Eudra GMP certificate (Certificate# ***NCF-II/1817/001/CAT***) is valid till April 2021. **Dextrose anhydrous:** Firm has submitted copy of GMP certificate (Certificate# HE20190013) in the name of M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China valid upto 02-02-2024 issued by HEBEI Dug Admiistration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Lactate:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore, **M/s Pacific Pharmaceuticals Ltd., 30 Km, Multan Road, Lahore** dated 21-10-2019 specifying the quantity of 800Kgs of Sodium lactate (60%). **Calcium Chloride Dihydrate:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore dated 21-10-2019, **M/s Pacific Pharmaceuticals Ltd., Ravi lane, Plot No., 384, Sundar industrial Estate, Raiwind Road, Lahore** specifying the quantity of 1MTS. **Potassium Chloride:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore dated 21-10-2019, **M/s Pacific Pharmaceuticals Ltd., Ravi lane, Plot No., 384, Sundar industrial Estate, Raiwind Road, Lahore** specifying the quantity of 1MTS. **Dextrose anhydrous:** Firm has submitted copy of commercial invoice (Invoice#. 20ST27003) attested by AD DRAP I&E Lahore, dated 03-10-2019, in the name of **M/s Pacific Pharmaceuticals Ltd., 30 Km, Multan Road, Lahore** specifying the quantity of 5000Kgs of Dextrose anhydrous (Batch# 201906001) from M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Sr. No.	Section #.	Deficiencies	Firm's response
		Calcium Chloride	
1.	***3.2. S.2.1***	• Address of drug substance manufacturer mentioned in this section is different from that mentioned on the COA from drug substance manufacturer.	• It was a typographic error, the said section has been revised.
2.	***3.2.S.4. 4***	• The drug substance COA from drug substance manufacturer declare it of BP grade, whereas COA from drug product manufacturer declare it as of USP grade.	• It was a typographic error, we have rectified the error. Our COA is also as BP grade.
		Sodium Lactate	
3.	***3.2.S.4***	• The Assay limits in the COA of drug substance manufacturer is 59% -61%, whereas the Assay limits in the COA of drug product manufacturer is 95.0% - 110.0%. • The Assay results in the COA of drug substance manufacturer is 60.1%, whereas the Assay limits in the COA of drug product manufacturer is 101.28%.	According to USP monograph, Sodium Lactate Solution is an aqueous solution containing not less than 50.0 percent, by weight, of monosodium lactate. It contains not less than 98.0 percent and not more than 102.0 percent of labeled amount of $C_3H_5NaO_3$.We have overlooked the COA of drug substance. This was typographical error from supplier we have intimated the supplier and will provide you correct COA later. However, Assay limits in the COA of drug product manufacturer is 101.28% according to specifications.
4.	***1.5.2 & 3.2. P.1***	• The reference product contains Dextrose monohydrate = 5gm/100ml, while firm has applied for Dextrose anhydrous = 4.3gm/100ml. • You are advised to justify the variation in formulation from reference product or else submit revised composition as per reference product along with relevant fee as per Notification No. F.7-11f2012-B&A/DRAP dated 07th May, 2021.	• According to Martindale Anhydrous glucose 900 mg is equivalent to about 1 g of glucose monohydrate. 50g/litre of glucose monohydrate is (equivalent to about 45 g/litre of anhydrous glucose).
5.	***3.2. P.5.2***	• Evidence of availability of atomic absorption spectrophotometer and flame photometry, as required by	Firm has submitted calibration certificate for atomic absorption spectrophotometer.

		the USP monograph of applied product, shall be submitted	List of equipment including Flame photometer has been submitted.
6.	***3.2. P.3.3***	• You are advised to submit justification for applying sterilization conditions other than the standard conditions for terminal sterilization by moist heat i.e., temperature 121oC & Time > 15 min.	• We have followed Sterilization process by super-heated water showering at 109ºC for 85 minutes. • 121ºC & Time ≥ 15 min, this temperature is used for machine sterilization before running product
7.	• The date of manufacturing of three stability batches i.e., RN0111O, RN0211O, RN0311O, as per submitted BMR is 15/10/2019,16/10/2019 & 17/10/2019 respectively, whereas commercial invoice submitted for Potassium chloride & Calcium chloride is attested by AD DRAP I&E Lahore dated 21-10-2019. • Justify the quantities of Dextrose anhydrous dispensed for batch manufacturing considering the proposed label claim OF Dextrose anhydrous 4.3gm/100ml. • Justify the dispensed quantity of Sodium Lactate dispensed for batch manufacturing considering the Assay percentage of drug substance declared in the submitted COA from Pacific Pharma. • Submit analytical record for the analysis of Potassium, Sodium & Calcium for the stability studies. • Submit reconciliation record for the imported quantity of 1 MTS each of Potassium chloride & Sodium chloride.		• We have purchased the material from Medipak Limited for sample. Attested invoice by AD DRAP I&E Lahore dated 21-10-2019 was after manufacturing of RN0111O, RN0211O, RN0311O batches. This material was imported for commercial manufacturing of other products which is not used in these batches. The Correct invoice is attached. • The quantity of dextrose anhydrous dispensed for batch manufacturing considering the proposed label claim of Dextrose anhydrous is 4.5g/100ml. (As per submitted BMR Dextrose anhydrous has been dispensed as per 5gm/100ml which is not as per reference product.) • We have used sodium lactate (as sodium lactate solution (60% w/v) as label claim. (Dispensed quantity is not as per the percentage purity of sodium lactate determined by the Pacific pharma) • We have purchased the material from Medipak Limited for sample. Attested invoice by AD DRAP I&E Lahore dated 21-10-2019 was after manufacturing of RN0111O, RN0211O, RN0311O batches. This material was imported for commercial manufacturing of other products which is not used in these batches.

Decision of 307th meeting: Registration Board deferred the case for submission of following:
• Revised label claim for Dextrose monohydrate as per the innovator's product, along with submission of relevant fee.
• Legal provision of utilizing Drug substances purchased from another DML holder i.e., M/s Medipak Limited.

Firm's response: Firm has submitted new stability studies data on 28-10-2021, along with correction in label claim of Dextrose monohydrate. Fee for the submission of new stability data has not been submitted. Details of new stability data are as under:

Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions duration of Stability studies)	Real time: 30°C ± 2°C / 35% ± 5%RH Accelerated: 40°C ± 2°C / NMT 25% RH
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical equivalence studies against the reference product of 5% DEXTROSE in LACTATED RINGER'S INJECTION of M/s B Braun.
Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions.

Remarks of Evaluator(II):

Decision of 316th meeting: Registration Board deferred the case for further deliberation regarding use of drug substance by M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore, for the manufacturing of stability batches, which had been procured and imported by M/s Pacific Pharmaceuticals Ltd., 30th KM, Multan Road, Lahore.

Firm's response:

We Pacific pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) have borrowed drug substance material used in the following products (Dorzil Eye drops, Glucozole-T Eye Drops, Pacilact-D IV Infusion 500ml, Pacilact-D IV Infusion 1000ml) for stability and validation purpose only from Pacific Pharmaceuticals Ltd. 30th Km Multan Road, Lahore (DML 000295).

The justification for the borrowing was based on the fact that commercial department dealing with procurement was common for both plants operating from the address 30th Km Multan Road, Lahore.

However, we have already started using dedicated procurement for IV plant. We assure that all of our future procurement will be made by Pacific pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) separately and dedicatedly.

Decision: Deferred till decision of Authority on borrowing of APIs for performing Product Development, R&D & stability Testing.

Decision of 320th meeting: Approved. Registration Board further decided that registration letter will be issued after submission of full fee that is Rs. 30,000/- as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Details of Documents submitted				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	--		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (Certificate# HE20190013) in the name of M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China valid upto 02-02-2024 issued by HEBEI Dug Administration.		
		Sodium Chloride: Firm has submitted copy of GMP certificate in the name of M/s Dominion Salt Ltd., 89, totara street, Mount Maunganui, NewZeland valid upto 29-03-2021		

		issued by Ministry of Health, Newzeland. **Calcium Chloride Dihydrate:** Firm has submitted GMP certificate (Certificate# HE20180030) issued by Hebei food & Drug administration valid till 22-04-2023. **Potassium Chloride:** Firm has submitted GMP certificate (Certificate# HE20180030) issued by Hebei food & Drug administration valid till 22-04-2023. **Sodium Lactate:** Firm has submitted Eudra GMP certificate (Certificate# ***NCF-II/1817/001/CAT***) is valid till April 2021. **Dextrose anhydrous:** Firm has submitted copy of GMP certificate (Certificate# HE20190013) in the name of M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China valid upto 02-02-2024 issued by HEBEI Dug Admiistration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Lactate:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore, **M/s Pacific Pharmaceuticals Ltd., 30 Km, Multan Road, Lahore** dated 21-10-2019 specifying the quantity of 800Kgs of Sodium lactate (60%). **Calcium Chloride Dihydrate:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore dated 21-10-2019, **M/s Pacific Pharmaceuticals Ltd., Ravi lane, Plot No., 384, Sundar industrial Estate, Raiwind Road, Lahore** specifying the quantity of 1MTS. **Potassium Chloride:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore dated 21-10-2019, **M/s Pacific Pharmaceuticals Ltd., Ravi lane, Plot No., 384, Sundar industrial Estate, Raiwind Road, Lahore** specifying the quantity of 1MTS. **Dextrose anhydrous:** Firm has submitted copy of commercial invoice (Invoice#. 20ST27003) attested by AD DRAP I&E Lahore, dated 03-10-2019, in the name of **M/s Pacific Pharmaceuticals Ltd., 30 Km, Multan Road, Lahore** specifying the quantity of 5000Kgs of Dextrose anhydrous (Batch# 201906001) from M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China.
4.	Data of stability batches will be supported by attested respective documents like chromatograms,	Submitted

	Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Sr. No.	Section #.	Deficiencies	Firm's response
		Calcium Chloride	
1.	***3.2. S.2.1***	• Address of drug substance manufacturer mentioned in this section is different from that mentioned on the COA from drug substance manufacturer.	• It was a typographic error, the said section has been revised.
2.	***3.2.S.4 .4***	• The drug substance COA from drug substance manufacturer declare it of BP grade, whereas COA from drug product manufacturer declare it as of USP grade.	• It was a typographic error, we have rectified the error. Our COA is also as BP grade.
		Sodium Lactate	
3.	***3.2.S.4***	• The Assay limits in the COA of drug substance manufacturer is 59% - 61%, whereas the Assay limits in the COA of drug product manufacturer is 95.0% - 110.0%.gmail • The Assay results in the COA of drug substance manufacturer is 60.1%, whereas the Assay limits in the COA of drug product manufacturer is 101.28%.	According to USP monograph, Sodium Lactate Solution is an aqueous solution containing not less than 50.0 percent, by weight, of monosodium lactate. It contains not less than 98.0 percent and not more than 102.0 percent of labeled amount of $C_3H_5NaO_3$.We have overlooked the COA of drug substance. This was typographical error from supplier we have intimated the supplier and will provide you correct COA later. However, Assay limits in the COA of drug product manufacturer is 101.28% according to specifications.
4.	***1.5.2 & 3.2. P.1***	• The reference product contains Dextrose monohydrate = 5gm/100ml, while firm has applied for Dextrose anhydrous = 4.3gm/100ml. • You are advised to justify the variation in formulation from reference product or else submit revised composition as per reference product along with relevant fee as per Notification No. F.7-11f2012-B&A/DRAP dated 07th May, 2021.	• According to Martindale Anhydrous glucose 900 mg is equivalent to about 1 g of glucose monohydrate. 50g/litre of glucose monohydrate is (equivalent to about 45 g/litre of anhydrous glucose).

5.	***3.2. P.5.2***	• Evidence of availability of atomic absorption spectrophotometer and flame photometry, as required by the USP monograph of applied product, shall be submitted	Firm has submitted calibration certificate for atomic absorption spectrophotometer. List of equipment including Flame photometer has been submitted.
6.	***3.2. P.3.3***	• You are advised to submit justification for applying sterilization conditions other than the standard conditions for terminal sterilization by moist heat i.e., temperature 121oC & Time ≥ 15 min.	• We have followed Sterilization process by super-heated water showering at 109ºC for 85 minutes. • 121ºC & Time ≥ 15 min, this temperature is used for machine sterilization before running product
7.	• The date of manufacturing of three stability batches i.e., RN0111O, RN0211O, RN0311O, as per submitted BMR is 15/10/2019,16/10/2019 & 17/10/2019 respectively, whereas commercial invoice submitted for Potassium chloride & Calcium chloride is attested by AD DRAP I&E Lahore dated 21-10-2019. • Justify the quantities of Dextrose anhydrous dispensed for batch manufacturing considering the proposed label claim OF Dextrose anhydrous 4.3gm/100ml. • Justify the dispensed quantity of Sodium Lactate dispensed for batch manufacturing considering the Assay percentage of drug substance declared in the submitted COA from Pacific Pharma. • Submit analytical record for the analysis of Potassium, Sodium & Calcium for the stability studies. • Submit reconciliation record for the imported quantity of 1 MTS each of Potassium chloride & Sodium chloride.	• We have purchased the material from Medipak Limited for sample. Attested invoice by AD DRAP I&E Lahore dated 21-10-2019 was after manufacturing of RN0111O, RN0211O, RN0311O batches. This material was imported for commercial manufacturing of other products which is not used in these batches. The Correct invoice is attached. • The quantity of dextrose anhydrous dispensed for batch manufacturing considering the proposed label claim of Dextrose anhydrous is 4.5g/100ml. (As per submitted BMR Dextrose anhydrous has been dispensed as per 5gm/100ml which is not as per reference product.) • We have used sodium lactate (as sodium lactate solution (60% w/v) as label claim. (Dispensed quantity is not as per the percentage purity of sodium lactate determined by the Pacific pharma) • We have purchased the material from Medipak Limited for sample. Attested invoice by AD DRAP I&E Lahore dated 21-10-2019 was after manufacturing of RN0111O, RN0211O, RN0311O batches. This material was imported for commercial manufacturing of other products which is not used in these batches.

Decision of 307th meeting: Registration Board deferred the case for submission of following:

• Revised label claim for Dextrose monohydrate as per the innovator's product, along with submission of relevant fee.

• Legal provision of utilizing Drug substances purchased from another DML holder i.e., M/s Medipak Limited.

Firm's response: Firm has submitted new stability studies data on 28-10-2021, along with correction in label claim of Dextrose monohydrate. Fee for the submission of new stability data has not been submitted. Details of new stability data are as under:

Name, address of Applicant / Marketing Authorization Holder	M/s Pacific Pharmaceuticals Ltd. Ravi lane, Plot No., 384,Sundar industrial Estate, Raiwind Road, Lahore
Name, address of Manufacturing site.	M/s Pacific Pharmaceuticals Ltd. Ravi lane, Plot No., 384,Sundar industrial Estate, Raiwind Road, Lahore
Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
GMP status of the firm	GMP certificate issued on 17-07-2020
Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 24-06-2019 which specifies Large volume parental section.
Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
Dy. No. and date of submission	Dy. No.29421 dated 28-10-2021
Details of fee submitted	Rs. 30,000 vide deposit slip# 3015188420
The proposed proprietary name / brand name	**Pacilact-D IV Infusion 1000ml**
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml Contains: Sodium Chloride……0.60g Potassium Chloride…….0.03g Calcium Chloride Dihydrate…….0.02g Sodium Lactate …… 0.31gram Dextrose Monohydrate Eq. to Anhydrous Dextrose…….5g
Pharmaceutical form of applied drug	Intravenous Infusion
Pharmacotherapeutic Group of (API)	Electrolyte
Reference to Finished product specifications	USP
Proposed Pack size	1000ml
Proposed unit price	As per SRO
The status in reference regulatory authorities	Approved by US FDA
For generic drugs (me-too status)	Lactated Ringer's and 5% Dextrose Injection of M/s Medipak Limited
Name and address of API manufacturer.	**Sodium Chloride:** Dominion Salt Limited, 89 Totara Street, Mount Maunganui, New Zealand. **Calcium Chloride Dihydrate:** Hebei Huachen Pharmaceuticals. Ltd. **Potassium Chloride:** Hebei Huachen Pharmaceuticals Ltd., Economic Devleopment zone. Hebei, China **Sodium Lactate:** Corbion Purac Bioquimica SA, BarcelonaSpain

	Dextrose: M/s CSPC Shengxue Glucose Co., Ltd, No.48 Shengxue Road, Luancheng District, China-051430 Shijiazhuang City, Hebei Province.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions duration of Stability studies)	Real time: 30°C ± 2°C / 35% ± 5%RH Accelerated: 40°C ± 2°C / NMT 25% RH
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical equivalence studies against the reference product of 5% DEXTROSE in LACTATED RINGER'S INJECTION of M/s B Braun.
Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions.

#	**Documents To Be Provided**	**Status**		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	PACILACT-RL 1000 ml IV INFUSION approve in 297 DRB		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** Firm has submitted copy of GMP certificate in the name of M/s Dominion Salt Ltd., 89, totara street, Mount Maunganui, NewZeland valid upto 29-03-2021 issued by Ministry of Health, Newzeland. **Calcium Chloride Dihydrate:** Firm has submitted GMP certificate (Certificate# HE20180030) issued by Hebei food & Drug administration valid till 22-04-2023. **Potassium Chloride:** Firm has submitted GMP certificate (Certificate# HE20180030) issued by Hebei food & Drug administration valid till 22-04-2023. **Sodium Lactate:** Firm has submitted Eudra GMP certificate (Certificate# ***NCF-II/1817/001/CAT***) is valid till April 2021. **Dextrose anhydrous:** Firm has submitted copy of GMP certificate (Certificate# HE20190013) in the name of M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China valid upto 02-02-2024 issued by HEBEI Dug Admiistration.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Lactate:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore, **M/s Pacific Pharmaceuticals Ltd., 30 Km, Multan Road, Lahore** dated 07-07-2020 specifying the quantity of 800Kgs of Sodium lactate (60%). **Calcium Chloride Dihydrate:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore dated 09-09-2020, **M/s Pacific Pharmaceuticals Ltd., Ravi lane, Plot No., 384, Sundar industrial Estate, Raiwind Road, Lahore** specifying the quantity of 1 MTS. **Potassium Chloride:** Firm has submitted copy of invoice attested by AD DRAP I&E Lahore dated 09-09-2020, **M/s Pacific Pharmaceuticals Ltd., Ravi lane, Plot No., 384, Sundar industrial Estate, Raiwind Road, Lahore** specifying the quantity of 1 MTS. **Dextrose anhydrous:** Firm has submitted copy of commercial invoice (Invoice#. 20ST27003) attested by AD DRAP I&E Lahore,		

		dated 03-10- 2019, in the name of **M/s Pacific Pharmaceuticals Ltd., 30 Km, Multan Road, Lahore** specifying the quantity of 5000Kgs of Dextrose anhydrous (Batch# 201906001) from M/s CSPC SHENGXUE Glucose Co., Ltd., No. 48 Shengxue Road, Luancheng District, Shijiazhuang City, Hebei province, China.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data pf stability batches along with batch manufacturing record and analytical record.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not applicable
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Decision of 316th meeting: Registration Board deferred the case for further deliberation regarding use of drug substance by M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore, for the manufacturing of stability batches, which had been procured and imported by M/s Pacific Pharmaceuticals Ltd., 30th KM, Multan Road, Lahore.

Firm's response:

We Pacific pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) have borrowed drug substance material used in the following products (Dorzil Eye drops, Glucozole-T Eye Drops, Pacilact-D IV Infusion 500ml, Pacilact-D IV Infusion 1000ml) for stability and validation purpose only from Pacific Pharmaceuticals Ltd. 30th Km Multan Road, Lahore (DML 000295).

The justification for the borrowing was based on the fact that commercial department dealing with procurement was common for both plants operating from the address 30th Km Multan Road, Lahore.

However, we have already started using dedicated procurement for IV plant. We assure that all of our future procurement will be made by Pacific pharmaceuticals Ltd. Ravi Lane Plot No. 384, Sundar Industrial Estate, Raiwind Lahore (DML 000902) separately and dedicatedly.

Decision: Deferred till decision of Authority on borrowing of APIs for performing Product Development, R&D & stability Testing.

Decision of 320th meeting: Approved. Approved. Registration Board further decided that registration letter will be issued after submission of full fee that is Rs. 30,000/- as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Agenda of Evaluator PEC-I

Case No. I: Registration applications of Local Manufacturing submitted on Form 5F (New Section/New License)

Deferred Cases:

M/s Jaskan Pharmaceuticals (Pvt) Ltd., 50-Sundar Industrial Estate, Lahore was granted additional section "Injectable vial (General)" vide letter No.F.1-16/2006-Lic(Vol-I) dated 12th March, 2021.

Sr. No.	No. of molecules	No. of product
1	02	02

7.	Name, address of Applicant / Marketing Authorization Holder	M/s Jaskan Pharmaceuticals (Pvt.) Ltd., 50-Sundar Industrial Estate, Lahore.
	Name, address of Manufacturing site.	M/s Jaskan Pharmaceuticals (Pvt.) Ltd., 50-Sundar Industrial Estate, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26351 dated 22/09/2021
	Details of fee submitted	PKR 30,000/-: dated 16/09/2021
	The proposed proprietary name / brand name	Moxica 400mg Infusion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Eacxh vial contains: Moxifloxacin as HCl……400mg
	Pharmaceutical form of applied drug	Solution for Infusion
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	In-house
	Proposed Pack size	1's (250ml)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Avelox 400mg/250mL infusion MHRA Approved.
	For generic drugs (me-too status)	Mofest 400mg/250mL Infusion by M/s Sami Pharmaceuticals Pvt. Ltd. Reg. No. 53227
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 10/2021-DRAP(FID-797667-1346) dated 18/02/2021 issued on the basis of inspection conducted on 26/10/2020.

	Name and address of API manufacturer.	M/s Vital Laboratories Pvt. Ltd. Plant No. II, plot No. 1710 & A1/2208, GIDC estate, Phase III, Vapi-396195 Gujrat, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months for 3 batches (MOXPB112001, MOXPB112002, MOXPB112003) Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months of 02 batches (MOXPB001, MOXPB001)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence studies have been conducted against Mofest Infusion 400mg/250mL Batch 041G By M/s Sami Pharmaceuticals.
	Analytical method validation/verification of product	

STABILITY STUDY DATA

Manufacturer of API	M/s Vital Laboratories Pvt. Ltd. Plant No. II, plot No. 1710 & A1/2208, GIDC estate, Phase III, Vapi-396195 Gujrat, India.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted against this point.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of drug manufacturing license number License Retention/Vital/2019/63520 valid till 2024 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Invoice No. HHM/2021/00377 (Diary No. 1447/2021/DRAP) dated 26/01/2021 is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of digital data logger.

Remarks OF Evaluator:

Observations	Response
Please provide analytical method used by drug product manufacturer for the routine analysis of drug substance.	The firm has submitted method of analysis for drug substance used for routine analysis as per USP.
Submit analytical method verification studies including specificity, accuracy and precision performed by drug product manufacturer for drug substance.	Analytical method verification studies for drug substance including specificity, precision and accuracy is submitted.
Since the excipients used in the applied formulation are different from the excipients used in manufacturing of reference product,	Not submitted.

therefore, provide compatibility studies of excipients with the drug substance.	
The stability summary sheets for drug substance are from M/s Vital Health Care Pvt. Ltd. (VAPI) Plot No. 1416-18 & 1507, GIDC Phase III, Vapi 396195 Gujrat, India while the address of manufacturer of drug substance as mentioned on DML and Form 5F is different, please clarify.	The firm could not clarify the difference of the address of drug substance manufacturer mentioned in license, form 5F and stability summary sheets.
Clarification is required since pharmaceutical equivalence is established against Mofest 400mg/250mL infusion by M/s Sami Pharmaceuticals while the studies should be carried out against the reference/innovator's product.	The firm has submitted pharmaceutical equivalence data against another product Avelox Infusion 400mg/250mL (B: BXJE602) by M/s Bayer AG Pharmacutical pvt ltd.
Please provide detailed calculations for quantity to be dispensed per vial considering the actual potency of Moxifloxacin HCl since "loss on drying" has not been considered.	The firm has stated that without considering LOD factor, the assay results are well in limits. The firm has further stated that in future they would consider this factor.
The stability data is submitted till 3rd month time point, please provide stability studies till 6th month time point.	The firm has submitted the stability studies till 6th month's time point.
Provide documents confirming import of the drug substance used in the manufacturing of trial batches.	Invoice No. HHM/2021/00377 dated 15/01/2021 (Diary No. 1447/2021/DRAP dated 26/01/2021) is submitted.

Decision of 316th meeting:

Deferred for clarification of variation in the address of drug substance manufacturer as mentioned in Drug Manufacturing License, Form 5F and stability summary sheets of the drug substance.

Submission by the firm:

The firm has stated that M/s Vital Laboratories Pvt. Ltd., India (Previously known as Vital Health Care Pvt. Ltd., has 3 manufacturing plants. Earlier, DML of plant II was submitted erroneously. Their latest DML of plant I is submitted, which has same address as on stability summary sheets of the drug substance.

- Plant I: Plot No. 1416 to 1421 & 1507 /1 & 2, 1601, GIDC Phase III Vapi 396195 Gujrat India.
- Plant II: Plot No. 1710 & A1/2208, GIDC Estate, Phase III, Vapi 396195 Gujarat India.
- Plant III: Plot No. 1302/3, GIDC Estate, Phase III, Vapi 396195 Gujarat India.

The firm has stated that the API used for product development is from plant I. Copy of Retention of License (No. G/28/1117) is submitted. The license is valid till20/02/2027.

Decision: Approved with innovator's specifications. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

New Cases:

M/s Jaskan Pharmaceuticals (pvt) Ltd. was granted New Section "Injectable (vial) General Section" vide letter No. F.1-16/2006-Lic (Vol-I) dated 12/03/2021 title of which was corrected

in 283rd meeting of Licensing Board as "Injectable (Vial) (General) (LVP) Section" vide even letter No. dated 18/111/2021.

Injectable (Vial) (General) (LVP) Section:

The firm has applied for:

Sr. No.	No. of Molecules	No. of products

8.	Name, address of Applicant / Marketing Authorization Holder	M/s Jaskan Pharmaceutical Private Limited Plot No 50 Sunder Industrial Estate Lahore
	Name, address of Manufacturing site.	M/s Jaskan Pharmaceutical Private Limited Plot No 50 Sunder Industrial Estate Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 10949 dated 30/04/2022
	Details of fee submitted	PKR 30,000/-: dated 03-04-2022
	The proposed proprietary name / brand name	Tramak Infusion 1000mg /100ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100 ml Vial contains: Paracetamol ……. 1000mg
	Pharmaceutical form of applied drug	Liquid for Infusion
	Pharmacotherapeutic Group of (API)	Analgesic; antipyretic.
	Reference to Finished product specifications	Manufacturer's specs
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	Provas I.V Infusion 1000 mg M/s Sami Pharmaceuticals Pvt Ltd. Karachi Pakistan, Reg. No. 053223
	GMP status of the Finished product manufacturer	Certifictae No.10/2021-DRAP (FID-797667-1346) issued by DRAP valid till 25/10/2022.
	Name and address of API manufacturer.	Pharmagen Limited Kot Nabi Bukshwala, 34 Km Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing

		process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (Lab Experiment/001/2016, Lab Experiment/002/2016, Lab Experiment/003/2016)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established Provas I.V Infusion 1000mg Infusion by M/S Sami Pharmaceuticals Pvt Ltd. Karachi Pakistan, Reg. No. 053223 by performing quality tests. The results of all the tests of both products fall within the specifications and are comparable.
	Analytical method validation/verification of product	Firm has submitted reports of verification studies of analytical method for the drug substance. Firm has also submitted reports of validation of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited Kot Nabi Bukshwala, 34 Km Ferozepur Road, Lahore.
API Lot No.	00510911-01/002/2021
Description of Pack	Colorless glass vial (Type II) with aluminium foil seal and a transparent white rubber stopper as closure.

(Container closure system)			
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6, (Months)		
Batch No.	LC 01	LC 02	LC 03
Batch Size	100 vials	100 vials	100 vials
Manufacturing Date	09-08-2021	09-08-2021	09-08-2021
Date of Initiation	11-08-2021	11-08-2021	11-08-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted against this point
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML certificate No. 000325 and GMP Certificate No. 06-2019-DRAP(AD/607409-530, both issued by DRAP.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice specifying Local Procurement of Paracetamol Invoice No 2129 dated 10-02-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted the compliance record of HPLC 21CFR software audit trail report for the applied product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

The drug substance is manufactured according to B.P but the data submitted by the finished product manufacturer shows that USP method is used for routine analysis of Paracetamol drug substance. However, the method used for analysis of finished product is In-House.

Sr. No	Observations	Response by the firm
1	As per available literature, the manufacturer of the reference product has included the test for Osmolality in the finished product specifications while you have not performed any such test, please clarify.	The firm has submitted the results of osmolality test. The test was performed on 16/07/2022.

2	Cysteine Hydrochloride is used as an anti-oxidant in the reference product but you have not used any excipient having a role as anti-oxidant, please clarify.	The firm has provided reference of another product "Paracetamol Panpharma 10mg/ml solution for infusion" approved in France where no anti-oxidant is used in the formulation. http://agence-prd.ansm.sante.fr/php/ecodex/frames.php?specid=63069892&typedoc=R&ref=R0378034.htm (Accessed on 25/07/2022)
3	Clarification is required since the performance of pharmaceutical equivalence is performed against Provas infusion by M/s Sami Pharma but not against the reference / innovator's product.	"The innovator's product is not available in Pakistan"
4	Please provide detail of calculations for potency adjustment considering the purity of drug substance as per COA.	The firm has provided complete calculations.
5	Justify the stability studies without the performance of Bacterial Endotoxin and Sterility testing.	The firm has submitted revised stability summary sheets containing the results of sterility testing and Bacterial endotoxin test without any clarification regarding previously submitted sheets without these tests.

Decision: Approved with innovator's specifications. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7.500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

M/s Jaskan Pharmaceuticals (Pvt) Ltd., 50-Sundar Industrial Estate, Lahore was granted additional section "DRY POWDER FOR INJECTION (CEPHALOSPORIN)" vide letter No.F.1-16/2006-Lic(Vol-I) dated 12th March, 2021.

DRY POWDER FOR INJECTION (CEPHALOSPORIN):

After consideration of 02 more applications, the total number of considered molecules/product will be:

Sr. No.	No. of molecules	No. of product

	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH The firm has submitted stability data of cholecalciferol in different container closure with the following details

		• Packed under vacuum in glass ampoule (36months real time and 6 months accelerated) B: CHL0408020, CHL0408021, CHL0408022 • Packed in LDPE bag under vacuum (36months real time and 6 months accelerated) B: CHL0411028, CHL0411029, CHL0411030 • Packed in aluminium bottle under inert gas (36months real time and 6 months accelerated) B: CHL040802, CHL0408021, CHL0408022
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Indrop D Injection M/s Neutro Pharmaceutical Pvt Ltd Pakistan. B. No. HP933, by performing quality tests.
	Analytical method validation/verification of product	Method validation studies are submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Sichuan Yuxin Pharmaceutical Co. Ltd No 51 West Section Of Changjiang Road Shifang Economic Development Zone (Southern District) Sichuan China.		
API Lot No.	VD3210701		
Description of Pack (Container closure system)	Clear glass USP type 1 in unit carton (1×1's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6, (Months)		
Batch No.	DK 01	DK 02	DK 03
Batch Size	100 Ampoule	100 Ampoule	100 Ampoule
Manufacturing Date	14-09-2021	14-09-2021	14-09-2021
Date of Initiation	16-09-2021	16-09-2021	16-09-2021

No. of Batches	03	
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML No. 20160429 valid till 1/10/2025 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of AD attested invoice No. XS21804581 dated 21/08/2021 dy. No. 3571/2021-DRAP dated 09/09/2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Observations	Response
1	Please submit the Compliance Record of HPLC software 21CFR & audit trail reports on product testing	"We are using EZ chrome light software for our testing which is in 21CFR compliance". The firm has submitted the audit trail report.
2	Provide analytical method validation/verifications studies including specificity, precision and accuracy for Drug substance along with the method of analysis used for routine analysis of drug substance.	Analytical verification studies for drug substance from drug product manufacturer are submitted including specificity, accuracy and precision.
3	The submitted stability data for the applied product is till 3rd month time point, please submit stability data till 6 months. Moreover, justification is required is require for not performing the tests for sterility and bacterial endotoxins in stability studies.	The applicant has submitted stability data at 6th month time for all the 03 batches for accelerated and real time stability studies. The tests for sterility and BET are included at 6th month time point testing.
4	Provide documents confirming the import/procurement of drug substance used for the development of applied product.	Copy of ADC attested invoice No. XS21804581 dated 21/08/2021 dy. No. 3571/2021-DRAP dated 09/09/2021.
5	Provide complete calculations for potency adjustment.	Calculations for potency adjustment is submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot has been granted with Drug Manufacturing License vide letter No. F.1-5/2017-Lic dated 17/09/2021.

Dry Powder Injectable Section (Cephalosporin):

The firm has applied for 01 molecule and 07 product in Dry Powder Injectable Section (Cephalosporin).

13.	Name, address of Applicant / Marketing Authorization Holder	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.
	Name, address of Manufacturing site.	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000944) by way of formulation dated 14-09-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML dated 17-09-2021 which specifies Dry powder injectable (Cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17593: 16/06/2022
	Details of fee submitted	PKR 30,000/-: 13/05/2022
	The proposed proprietary name / brand name	QXON 250mg Injection IM
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……250mg
	Pharmaceutical form of applied drug	Sterile white to off white / yellowish crystalline powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)

	For generic drugs (me-too status)	Rocephin injection by Roche.
	Name and address of API manufacturer.	Pharmagen Ltd. Kot Nabi Buksh Wala 34-Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted compatibility studies of the drug product along with the recommended diluent i.e. 1% lignocaine hydrochloride injection.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests defined in USP for their product against the comparator i.e. Oxidil 250mg Injection of M/s Sami Pharmaceuticals.

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Qadir Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying purchase of 10Kg Ceftriaxone sodium (sterile) dated 28-09-2021 lot number 00421/039/2021 from Pharmagen Limited.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications from both API manufacturer as well as Qadir Pharmaceuticals.
2.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".	Firm has submitted report of verification studies of the analytical method of drug substance performed by Qadir Pharmaceuticals.
3.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Firm has submitted COA of working standard from Pharmagen Limited.
4.	Justify why pharmaceutical equivalence is not conducted against the innovator product for 250mg Injection	Firm has submitted that since the reference product is not available in market therefore we have used comparator product for pharmaceutical equivalence studies.
5.	USP monograph specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria for assay test, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Firm has submitted that we have performed both these tests as per USP but at different stages. As our drug product is constituted solution therefore we have used the test of constituted solution (sample solution 2) at finished product stage. The other test specified in USP (Sample solution 1) was performed at drug substance stage before filling in the drug product.
6.	Justify how a single validation studies are used for all strengths of ceftriaxone injection since USP monograph specifies different analytical method for each strength.	Firm has submitted that we have performed verification studies for all strengths and route of administration. Firm has submitted verification studies for each product.
7.	Provide documents for the procurement of relevant lot(s) of API used in the manufacturing of 3 batches of drug product for which stability studies data is submitted in section 3.2.P.8.3.	API is locally procured from M/s Pharmagen.

Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The other test specified in USP (Sample solution 1) was performed at drug substance stage before filling in the drug product.
5.	Justify how a single validation studies are used for all strengths of ceftriaxone injection since USP monograph specifies different analytical method for each strength.	Firm has submitted that we have performed verification studies for all strengths and route of administration. Firm has submitted verification studies for each product.
6.	Provide documents for the procurement of relevant lot(s) of API used in the manufacturing of 3 batches of drug product for which stability studies data is submitted in section 3.2.P.8.3.	API is locally procured from M/s Pharmagen.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

16.	Name, address of Applicant / Mar keting Authorization Holder	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000944) by way of formulation dated 14-09-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML dated 17-09-2021 which specifies Dry powder injectable (Cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17592: 16/06/2022
	Details of fee submitted	PKR 30,000/-: 13/05/2022
	The proposed proprietary name / brand name	QXON 250mg Injection IV
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……250mg
	Pharmaceutical form of applied drug	Sterile white to off white / yellowish crystalline powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Rocephin injection by Roche.
	Name and address of API manufacturer.	Pharmagen Ltd. Kot Nabi Buksh Wala 34-Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months. The real

		time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted compatibility studies of the drug product along with the recommended diluent i.e. water for injection.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests defined in USP for their product against the comparator i.e. Oxidil 250mg Injection of M/s Sami Pharma.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

Date of Initiation	30-10-2021	30-10-2021	30-10-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Qadir Pharmaceutical is a new License facility hence no such inspection has been conducted

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 10Kg Ceftriaxone sodium (sterile) dated 19-02-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications from both API manufacturer as well as Qadir Pharmaceuticals.
2.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".	Firm has submitted report of verification studies of the analytical method of drug substance performed by Qadir Pharmaceuticals.
3.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Firm has submitted COA of working standard from Pharmagen Limited.
4.	Justify why pharmaceutical equivalence is not conducted against the innovator product for 250mg Injection	Firm has submitted that since the reference product is not available in market therefore we have used comparator product for pharmaceutical equivalence studies.

5.	USP monograph specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria for assay test, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Firm has submitted that we have performed both these tests as per USP but at different stages. As our drug product is constituted solution therefore we have used the test of constituted solution (sample solution 2) at finished product stage. The other test specified in USP (Sample solution 1) was performed at drug substance stage before filling in the drug product.
6.	Justify how a single validation studies are used for all strengths of ceftriaxone injection since USP monograph specifies different analytical method for each strength.	Firm has submitted that we have performed verification studies for all strengths and route of administration. Firm has submitted verification studies for each product.
7.	Provide documents for the procurement of relevant lot(s) of API used in the manufacturing of 3 batches of drug product for which stability studies data is submitted in section 3.2.P.8.3.	API is locally procured from M/s Pharmagen.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Qadir Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 10Kg Ceftriaxone sodium (sterile) dated 19-02-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications from both API manufacturer as well as Qadir Pharmaceuticals.
2.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document	Firm has submitted report of verification studies of the analytical

	approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".	method of drug substance performed by Qadir Pharmaceuticals.
3.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Firm has submitted COA of working standard from Pharmagen Limited.
4.	USP monograph specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria for assay test, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Firm has submitted that we have performed both these tests as per USP but at different stages. As our drug product is constituted solution therefore we have used the test of constituted solution (sample solution 2) at finished product stage. The other test specified in USP (Sample solution 1) was performed at drug substance stage before filling in the drug product.
5.	Justify how a single validation studies are used for all strengths of ceftriaxone injection since USP monograph specifies different analytical method for each strength.	Firm has submitted that we have performed verification studies for all strengths and route of administration. Firm has submitted verification studies for each product.
6.	Provide documents for the procurement of relevant lot(s) of API used in the manufacturing of 3 batches of drug product for which stability studies data is submitted in section 3.2.P.8.3.	API is locally procured from M/s Pharmagen.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

New Section

M/s Ferozsons Laboratories Ltd, Amangarh Nowshera was granted additional Tablet General section vide letter no.F.3-14/2004-Lic(Pt) dated 09/04/2020.

The firm has applied for 04 products and 02 molecules.

20.	Name, address of Applicant / Marketing Authorization Holder	M/s Ferozsons Laboratories Limited P.O Ferozsons, Amangarh, Nowshera, Khyber Pakhtunkhwa-Pakistan
	Name, address of Manufacturing site.	M/s Ferozsons Laboratories Limited P.O Ferozsons, Amangarh, Nowshera, Khyber Pakhtunkhwa-Pakistan
	Status of the applicant	☑ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☑ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☑ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 18581 dated 27/06/2022
	Details of fee submitted	PKR 30,000/- dated 10/05/2022
	The proposed proprietary name / brand name	Vonesta 10mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Vonoprazan as fumarate……10mg
	Pharmaceutical form of applied drug	Round, Film coatedTablet
	Pharmacotherapeutic Group of (API)	PPIs
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	10's, 14's, 20's, 28's, 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Takecab Tablets (10mg+20mg) approved by PMDA
	For generic drugs (me-too status)	Vonozan 10mg by Getz Pharma
	GMP status of the Finished product manufacturer	GMP certificate No. F.11-6/2019-DRAP -06 granted on 29-01-2019 valid upto 25-01-2022. Tablet section (General) approved vide letter No.F.3-14\2004-Lic Dated: 08-04-2015 is submitted
	Name and address of API manufacturer.	M/s Ami Life Sciences Private Limited, Block No. 82/B, ECP road, At & Post: Karakhadi 391450 Taluka Padra, District Vadodara Gujarat, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity (I, II, III, IV, V, VI) individual

		impurities, specifications, analytical procedures for assay of drug substance and content of Fumaric Acid along with the verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance is submitted
	Stability studies	Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months of 3 batches Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months of 3 batches Batches: (VPF/RD/31800819, VPF/RD/31810819, VPD/RD/31820819)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure for active and related substances and relevant verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	The applicant has established pharmaceutical equivalence against Takecab Tablet 10mg (B: 517929) manufactured by M/s Takeda Pharamceuticals, PMDA Japan. Comparative dissolution profile against the innovator's product (Takecab 10mg, B:571929) in all the 03 media (0.1N HCl, acetate Buffer, Phosphate Buffer) is submitted. F2 values are more than 50.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Remarks by PEC-I:		
Sr. No.	**Observations**	**Response**
1	As per the unit formula the final quantity of Vonoprazan fumarate to be dispensed is 13.563mg, please justify considering the assay value 98.2% (as is basis).	The firm has submitted revised calculations for potency adjustment. The amount of API to be dispensed is 13.605mg while 13.563mg was dispensed without considering w.c (water content). The difference is 0.31%.
2	Please justify the selection of dissolution parameters that is dissolution medium, dissolution apparatus, rpm etc.	The firm has stated that dissolution data is not available in any reference regulatory authority nor the drug product is pharmacopoeial, however following justification is provided. • 6.8 Phopshate Buffer (Medium), The durg substance is found to be highly soluble in all physiological pH ranges. • USP type II apparatus (as per USP <1092> • 50rpm-lowest rpm for paddle apparatus • 900mL volume • 15mins sampling time-on the basis of CDP
Decision: The Board was apprised that the calculations for potency adjustment are not appropriate. The Board discussed the matter in detail and decided to approve the case with the directions that the applicant will adopt the correct calculations for potency adjustment for commercial manufacturing.		

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	For generic drugs (me-too status)	Zilero 5mg tablet by M/s Pharmevo Reg. No. 105255
	GMP status of the Finished product manufacturer	GMP certificate No. F.11-6/2019-DRAP -06 granted on 29-01-2019 valid upto 25-01-2022. Tablet section (General) approved vide letter No.F.3-14\2004-Lic Dated: 08-04-2015 is submitted
	Name and address of API manufacturer.	M/s Jiangxi Synergy Pharmaceutical Co., Ltd., Jiangxi Fengxin Industrial Park, Fengxin 330700, Jiangxi Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities and residual solvents, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	It is classified as BCS class II drug. No official monograph is available. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures for assay of drug substance and content of Fumaric Acid along with the verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance is submitted
	Stability studies	Real time: 30°C ± 2°C / 75% ± 5%RH for 36 months of 3 batches

		Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months of 3 batches Batches: (20180201Y, 20180202Y, 20180203Y)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure for active and related substances and relevant verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Comparative dissolution profile is submitted against the innovator's product Eliquis 5mg tablet by M/s Bristol Mayors Squib, USFDA Approved in all the 03 media that is 0.1N HCl, Acetate Buffer and Phosphate Buffer. (B:ABB6690). Pharmaceutical equivalence is established against the innovator's product (Eliquis 5mg Tablet) by performing all the quality tests B:ABB6690.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Jiangxi Synergy Pharmaceutical Co., Ltd., Jiangxi Fengxin Industrial Park, Fengxin 330700, Jiangxi Province, China.		
API Lot No.	10200301Y		
Description of Pack (Container closure system)	Alu-Pvdc blister, Packed in outer (secondary) cardbox.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	ADTab-004	ADTab-005	ADTab-006
Batch Size	1500 tablets	1500 tablets	1500 tablets
Manufacturing Date	03/21	03/21	03/21
Date of Initiation	05/04/2021	05/04/2021	05/04/2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empagen tablet 10mg Approved in 294th meeting of RB Inspection date: 25/10/20219 Asp per report, the HPLC system is 21CFR compliant.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP Pharmaceutical Production License No. GAN20160125 is submitted which is valid till 26/11/2025 issued by provincial Medical Products Administration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of attested invoice is submitted (Dy. No. 5160 dated 30/12/2020, DRAP Peshawar).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	submitted
Remarks by PEC-I:		
Sr. No.	**Observations**	**Response**
1	Please provide the reference for adaptation of dissolution specifications including paddle speed (75rpm).	The firm has provided reference from USFDA dissolution data base and provided the following weblink. https://www.accessdata.fda.gov/scripts/cder/dissolution/dsp_SearchResults.cfm
2	Provide justification of all the specifications in the relevant section (3.2.P.5.6).	The firm has provided justification for specification for drug product is submitted.
3	Calculations for potency adjustment.	The difference in the calculation fir potency adjustment is 0.596%.
Decision: The Board was apprised that the calculations for potency adjustment are not appropriate. The Board discussed the matter in detail and decided to approve the case with the directions that the applicant will adopt the correct calculations for potency adjustment for commercial manufacturing. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

Case No. II: Cases of local manufacturing submitted on Form 5F

24.	Name, address of Applicant / Marketing Authorization Holder	M/s Horizon Healthcare Pvt., Ltd., Plot # 33, Sundar Industrial Estate Lahore.
	Name, address of Manufacturing site.	M/s Horizon Healthcare Pvt., Ltd., Plot # 33, Sundar Industrial Estate Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

2.	Submitted data of analytical method validation studies for Empagliflozin drug substance does not contain the test	The Firm has provided the details of specificity testing for analytical method validation studies for Empagliflozin drug	

	for Specificity parameter performed by drug product manufacturer. Please provide the required data. Moreover, clarification is required regarding the criteria / basis of naming the dilutions (as 60%, 80%, 100% 160% etc) for performing the accuracy and linearity tests.	substance performed by drug product manufacturer.
3.	USP-43 describes the HPLC assay method for analysis of Metformin HCl but you have performed the required studies for drug substance including analytical method validation / verification studies using titration method, please clarify.	"we have tested Metformin as per USP 42 where assay is given by titration method. Accordingly, we have performed validation of the method". The firm has not performed the analysis as per USP 43 (HPLC method) for estimation of Metformin.
4.	The detail of capsule filling machine is provided in 3.2.P.3 while detail regarding tablet manufacturing facility is required.	Revised manufacturing process is submitted.
5.	As per submitted dossier, the manufacturing method is not in detail, it provides a very brief details of different steps involved in the manufacturing of the applied product. Please provide detailed manufacturing method with the detail of each step including wet granulation.	The firm has provided the manufacturing method.
6.	Justify the dissolution that is 80% in 30 minutes while as per the available literature the innovator has specified 20 minutes for achieving the required dissolution limit.	"After reviewing the dissolution release trend in CDP report it is evident that more than 80% drug is released in 20 minutes so we are revising our current acceptance specification limit to NLT 80% in 20 minutes instead of 30minute". The firm has submitted the revised specifications without performing the dissolution test according to new specs on any of the batch.
7.	Justification regarding the performance of specificity parameter of method validation studies for drug product is required where the test is performed without spiking by taking the blank solution as reference.	"ICH Q2R1, specificity is the ability to assess unequivocally the analyte in the presence of components which may be expected to be present. Typically these might include impurities, degradants, matrix etc". "We have rub placebo containing matrix and there is no interference observed in analytical method validation of product".
8.	The submitted stability data is till 3rd month time point while the required data should be till 6th month time point, please submit the remaining data.	The firm has submitted stability data till 6th month time point.
9.	Please provide documents confirming the import of drug substances (Empagliflozin and Metformin) (e.g. invoice) along with the relevant COAs	Copy of ADC attested invoice No. ZY20052001G/W dated 20/05/2020 dy. No. 7093/2020-DRAP dated 09/06/2020 is submitted for Empagliflozin.

	from drug substance manufacturers as well as from the finished product manufacturer.	Copy of invoice no. EXP/3236/20-21 dated 05/03/2021 dy. No 4485/2021-DRAP dated 26/03/2021 for Metformin is submitted.
10.	Provide detail of container-closure of the applied product since container-closure is described very briefly and little information is presented in the submitted dossier.	Alu-Alu blister, each containing white colored, oval shaped film coated tablets having break line on one side and the other side is plain. 10's, 20's, 30's, 14's, 28's.
Decision: Approved with innovator's specifications. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **For commercial manufacturing, the manufacturer will perform analytical testing for Metformin as per USP 43.**

Remarks of Evaluator-I:			

Sr. No.	Observations	Response
1	The specifications of Drug Substance do not include particle size determination test while the innovator has performed the said test for drug substance, please clarify.	"We have just based the particle size estimation on sieve analysis at vendor sample whose result is attached".
2	Since the drug product does not contain any antimicrobial preservative as well as it does not possess inherent anti-microbial activity nor any such data which supports the microbial inhibitory property of the drug product is provided with the submitted dossier, therefore, as per ICH guidelines (Q6A) microbial limits' acceptance criteria and testing should have been performed. As per available literature of the innovator's product (Edarbi tablet), the manufacturer has established the microbial limits and performed the microbial testing on the commercial batches.	"R&D batches are no true replica of commercial batches as these batches are not sometime manufactured in strict environmental conditions, so the microbial testing results of these R&D batches will not be the actual picture of manufacturing controls conditions that is why we omit this test". "In general practices we are performing the microbial testing on commercial batches. In this case we will also adopt this practice.
3	In section 3.2.P.5.6, please provide justification for the specifications of the applied product.	The firm has submitted justification for the specifications in section 3.2.P.5.6.
4	The submitted stability data is till 3rd month time point, please provide 6 month stability data.	Submitted.
5	Provide documents (invoice) for the procurement of API with approval from DRAP (in case of import).	ADC attested invoice No. EXP/20-21/0539 dated 16/01/2021 Dy. No. 405 dated 28/01/2021.
6	Provide GMP certificate of drug substance manufacturer is required along with the last inspection report/GMP certificate of finished product manufacturer.	Copy of GMP certificate no. 22043267 valid till 17/04/2025 is submitted.
7	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is required while you have submitted the compliance assessment report.	Submitted.

Decision: Approved. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/-for revision of specifications and differential fee of Rs. 45,000/- since the applied product is new drug as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	Ibrance film coated tablet 75mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Palbociclib…….75mg
	Pharmaceutical form of applied drug	Immediate release film coated tablet
	Pharmacotherapeutic Group of (API)	Anti-neoplastic /Protein kinase Inhibitor
	Reference to Finished product specifications	Innovator's specs
	Proposed Pack size	Pack of 21 tablets
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ibrance tablet (75mg, 100mg, 125mg), USFDA Approved.
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and product.

	Name, address of drug substance manufacturer	M/s Pfizer Ireland Pharmaceuticals, Ringaskiddy API plant Ribgaskiddy County Cork, Ireland.
	Module-III Drug Substance:	The drug substance belongs to BCS class II drugs. Crystalline anhydrous form a is the most thermodynamically stable form used in the manufacturing. Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• Real time stability studies have been conducted at 25^{o}C±2 and 60%RH±5% for 36 months of 3 batches • Accelerated stability study is conducted at 40^{o}C±2 and 75%RH±5% for 6 months of 3 batches Batches: E010014100, E010014102, GR06107
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	N/A
	Analytical method validation/verification of product	Analytical validations studies for drug substance as well as for drug product are submitted.
	Container closure system of the drug product	Polyvinylchloride / Oriented Polyamide / Aluminium foil / Polyvinylchloride (PVC/OPA/Al/PVC/Al) blister with aluminium foil lidding card containing 7 tablets. Each pack contains 3 blisters.
	Stability study data of drug product, shelf life and storage conditions	• Real time stability studies have been conducted at 30oC±2 and 75%RH±5% for 24 months of 03 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 03 batches

		• Batches: H000013329 S83543, H000013329 S83544, H000013329 S83545 • Shelf life: 2 years
Evaluation by PEC-I: **Indications:** Palbociclib is a kinase inhibitor indicated for the treatment of adult patients with hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative advanced or metastatic breast cancer in combination with: • an aromatase inhibitor as initial endocrine-based therapy in postmenopausal women or in men; or • fulvestrant in patients with disease progression following endocrine therapy		
Sr. No.	**Observations**	**Response**
1	As per the submitted dossier, the manufacturer of Drug Substance is M/s Pfizer Ireland Pharmaceuticals while the provided stability data is from another manufacturer, please clarify.	*"M/s Pfizer limited, Sandwich, UK is a Pfizer R&D site and was sed to manufacture the DSregistration stability batches. An additional Supportive batch was manufactured at Pfizer Inc USA which is another Pfizer R&D site".* The firm has submitted Stability data of 03 batches manufactured at M/s Pfizer Ireland Pharmaceuticals with the following details; • Real time stability studies have been conducted at 25oC±2 and 60%RH±5% for 36 motnhs of 03 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 03 batches Batches: J11579, J14939, J14940
2	Provide stability study data (Real Time & Accelerated) according to the conditions of zone IV-A of 03 batches till claimed shelf life.	• Real time stability studies have been conducted at 30oC±2 and 75%RH±5% for 24 months of 03 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 03 batches Batches: H000013329 S83543, H000013329 S83544, H000013329 S83545
Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information

		related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and product.
	Name, address of drug substance manufacturer	M/s Pfizer Ireland Pharmaceuticals, Ringaskiddy API plant Ribgaskiddy County Cork, Ireland.
	Module-III Drug Substance:	The drug substance belongs to BCS class II drugs. Crystalline anhydrous form a is the most thermodynamically stable form used in the manufacturing. Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• Real time stability studies have been conducted at 25^{o}C±2 and 60%RH±5% for 36 months of 3 batches • Accelerated stability study is conducted at 40^{o}C±2 and 75%RH±5% for 6 months of 3 batches Batches: E010014100, E010014102, GR06107
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	N/A
	Analytical method validation/verification of product	Analytical validations studies for drug substance as well as for drug product are submitted.
	Container closure system of the drug product	Polyvinylchloride / Oriented Polyamide / Aluminium foil / Polyvinylchloride (PVC/OPA/Al/PVC/Al) blister with aluminium

		foil lidding card containing 7 tablets. Each pack contains 3 blisters.
	Stability study data of drug product, shelf life and storage conditions	• Real time stability studies have been conducted at 30oC±2 and 75%RH±5% for 24 months of 03 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 03 batches • Batches: H000013330 S80563, H000013330 S80564, H000013330 S80565 • Shelf life: 2 years

Evaluation by PEC-I:

Indications:

Palbociclib is a kinase inhibitor indicated for the treatment of adult patients with hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative advanced or metastatic breast cancer in combination with:

• an aromatase inhibitor as initial endocrine-based therapy in postmenopausal women or in men; or

• fulvestrant in patients with disease progression following endocrine therapy

Sr. No.	Observations	Response
1	As per the submitted dossier, the manufacturer of Drug Substance is M/s Pfizer Ireland Pharmaceuticals while the provided stability data is from another manufacturer, please clarify.	*"M/s Pfizer limited, Sandwich, UK is a Pfizer R&D site and was sed to manufacture the DSregistration stability batches. An additional Supportive batch was manufactured at Pfizer Inc USA which is another Pfizer R&D site".* The firm has submitted Stability data of 03 batches manufactured at M/s Pfizer Ireland Pharmaceuticals with the following details; • Real time stability studies have been conducted at 25oC±2 and 60%RH±5% for 36 motnhs of 03 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 03 batches Batches: J11579, J14939, J14940
2	Provide stability study data (Real Time & Accelerated) according to the conditions of zone IV-A of 03 batches till claimed shelf life.	• Real time stability studies have been conducted at 30oC±2 and 75%RH±5% for 24 months of 03 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 03 batches Batches: H000013330 S80563, H000013330 S80564, H000013330 S80565

Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

2nd letter 26th November, 2021

S.No	Section	Shortcomings Communicated	Reply
	1.3.3.	Importer shall provide Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate issued by relevant regulatory authority in the country of origin and name of exporting country.	COPP from United states submitted
	3.2.S.7	In Drug substance if accelerated stability studies terminated after 2months due to the result of 2-chloroethanol was out of specification for two of three batches, then how finished product was manufactured.	According to IC Q1A 2.1.7.2. Drug substances intended for storage in a refrigerator: "If significant change occurs between 3 and 6 months' testing at the accelerated storage condition, the proposed re-test period should be based on the real time data available at the long term storage condition. If significant change occurs within the first 3 months' testing at the accelerated storage condition, a discussion should be provided to address the effect of short term excursions outside the label storage condition, e.g., during shipping or handling. This discussion can be supported, if appropriate, by further testing on a single batch of the drug substance for a period shorter than 3 months but with more frequent testing than usual It is considered unnecessary to continue to test a drug substance through 6 months when a significant change has occurred within the first 3 months." More over the short term Excursion stability data for drug substance could address the effect of short term excursion outside the label storage condition (between 2oC –and 8 oC) during the finished product was manufactured. The short term excursion stability study was conducted at 25°C ± 2°C/60% RH ± 5% RH for three batches of drug substance, and the testing results

			obtained up to 30 days for drug substance meet the acceptance criteria in the specification and show no significant changes during the storage, which could support short term excursion during shipping or handling
	3.2.P.2 P.2.2.1	Submit details of RLD including brand name, manufacturer etc.	BiCNU (carmustine for injection) under NDA 017422 held by Emcure Pharmaceuticals Ltd. Was approved by FDA

Decision of 316th meeting: Deferred for following:

• Justification regarding submitted COPP, since country of origin of applied product is China, whereas submitted COPP has been issued by the United States Food And Drug Administration.

• Scientific rationale for formulating drug product with a drug substance having accelerated stability studies of only two months.

Submission by the firm:

The firm has stated that:

1. The applied product is approved by USFDA and marketed in USA, therefore, the CoPP issued by USFDA is submitted along with the dossier. Moreover, due to commercial reasons the applied product is not marketed in china.

2.

- The limit for 2-chloroethylamine (Impurity) is included in the release and stability specifications of the finished product and could confirm that the results of the content of the impurity is within the specified limit.
- Moreover, As per ICH Q1A2.1.7.2. the drug substance intended for storage in refrigerator, if significant change occurs within first 3 months then a discussion should be provided to address the effect of short term excursions outside the labelled storage conditions e.g. during shipping or handling. This discussion can be supported, if appropriate, by further testing on a single batch of the drug substance for a period less than 3 months with more frequent testing than usual. It is unnecessary to continue to test a drug substance through 6 months when a significant change occurs.

  "Significant change for a drug substance is defined as failure to meet it specification". (2.1.7)
- The short term excursion stability data for drug substance could address the affect of short term excursions outside the label storage condition during finished product manufacturing.
- The short term excursion stability data is provided in 3.2.S.7.3 in DMF, which could support short term excursion during shipping. The temperature of the drug substance is controlled between 2-8^{o}C during the transportation to the finished product manufacturing site. During the manufacturing of finished product, the temperature is the controlled parameter during compounding, lyophilization and complete stoppering as well as the holding periods are also controlled as the critical parameters.

Indications:

Carmstine is a nitrosourea indicated as palliative therapy as a single agent or in established combination therapy with other approved chemotherapeutic agents in the following:

• Brain tumors glioblastoma, brainstem glioma, medulloblastoma, astrocytoma, ependymoma, and metastatic brain tumors

• Multiple myeloma-in combination with prednisone

• Relapsed or refractory Hodgkin's lymphoma in combination with other approved drugs

• Relapsed or refractory Non-Hodgkin's lymphomas in combination with other approved drugs

Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

	The proposed proprietary name / brand name	CALFOLINATE for Injection 100mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains : Folinic Acid as calcium folinate pentahydrate.....100mg
	Pharmaceutical form of applied drug	Off-white to yellow loose cake or powder (lyophilized) for solution for IV/IM injection
	Pharmacotherapeutic Group of (API)	Detoxifying agents for antineoplastic treatment
	Reference to Finished product specifications	Chinese Pharmacopeia
	Proposed Pack size	1's
	Proposed unit price	As per DRAP's pricing policy
	The status in reference regulatory authorities	Leucovorin Calcium 100mg base/vial by M/s Teva Pharms USA, USFDA Approved.
	For generic drugs (me-too status)	CALFONATE INJECTION 100MG by M/s GHAZALI BROTHERS, Reg. No. 70936
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and Drug Product.
	Name, address of drug substance manufacturer	M/s Zhejiang Davi Pharmaceutical Co., Ltd. No.818 Xinzhu Road, Economic Development Area, Huzhou City, Zhejiang Province 313000, The People's Republic of China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• Real time stability studies have been conducted at 25oC±2 and 60%RH±5% for 24 months of 3 batches • Accelerated stability study is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: CAN161201, CAN161202, CAN161203

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Injection vials made of low borosilicate glass tubing, bromobutyl rubber stopper for sterile powder for injection and aluminum-plastics combination caps for injection vials
	Stability study data of drug product, shelf life and storage conditions	• Real time stability studies have been conducted at 25oC±2 and 60%RH±5% for 36 months of 3 batches • Accelerated stability study is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: 514082033, 514082043, 514082053

Evaluation by PEC:

Calcium folinate equivalent to Folinic acid 100mg is the actual quantity of base used in the formulation while in section 2.3.P.3.2 under batch formula, Calcium Folinate (calculates as folic acid) and in section 3.2.P.3.2 under Batch Formula is written. Since Folic Acid and Folinic Acid are two different chemical compounds therefore you are required to rectify the mistake and submit the information under relevant sections.	**Shandong Luoxin Response:** We apologize for the mistakes of the names shown in batch formula. The mistakes have been rectified following your comments, please find the revised Section 2.3.P.3.2 and 3.2.P.3.2 in Attachment 1 and 2. The name claimed in the label and carton is also revised following your comments. The firm has submitted relevant sections with correct label claims and batch formulas.
The submitted real time stability studies for drug product are conducted at 25^{o}C±2 and 60%RH±5% while real time stability studies of 03 batches till claimed shelf life according to the conditions of Zone IV-A (30^{o}C±2 and 65%RH±5%) are required.	The firm has submitted stability data of 03 batches with the following details; • Real time stability studies have been conducted at 30oC±2 and 65%RH±5% for 24 months of 3 batches • Accelerated stability study is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: 518042042, 518102041, 518102042
Pharmaceutical equivalence of the applied product should be established by performing all the quality tests against the innovator's product and should be presented in the relevant sections.	Pharmaceutical equivalence is submitted against Leucovorin Calcium by M/s Westward-Hikma, USA by performing all the quality tests. (Batch: 1909A01).
The official monograph for C (Leucovorin Calcium) is present in USP while the testing of the applied product is done according to In-	The firm has submitted a comparison of specifications of Chinese Pharmacopoeia and

House standard/Chinese Pharmacopoeia, please justify scientifically by comparing the specifications & methods described in USP with the methods & specifications of In-House standard since the methods of analyses used are different.	USP. Limits are same in both monographs but the method used are different. USP describes the tests of 7 impurities for separately while Chinese pharmacopoeia does not describe individual impurities but it gives total impurity limit NMT 2.5% which is similar to USP. Moreover, the limit for unspecified impurity in USP is 0.5% while according to C.P. is 1%.
The test for specificity parameter of validation/verification of analytical method is performed by performing the tests on the sample solution against placebo solution, please refer the guideline for the procedure adopted while the specificity test is performed by spiking with appropriate level of impurities or exposing the drug product sample to relevant stress conditions as recommended by USP.	"The difference of excipient and brand of reagents used in the testing were taken into account during the verification of analytical procedure, the specificity was verified by comparing the interference on the sample solution against placebo".

Decision of 313rd meeting: The Board deferred the case for;

- Submission of impurity profiling according to USP for the applied product.
- Submission of Drug-excipient compatibility studies.
- Confirmation of the area where the applied product would be manufactured.

Firm's response: Firm has submitted following:

- The firm has submitted revised specifications for the applied product according to USP and submitted comparison of specifications of USP and In-house specs. Moreover, the firm has submitted COAs of 03 batches which have been tested against USP specification along with the results of tests of all the impurities. The results of impurities are in the limits as specified by USP.
  Batches: CAN200105, CAN200102, CAN200101
- The applicant has submitted drug-excipient compatibility studies. The tests have been performed by preparing binary and tertiary solutions and placing the solution under different conditions including high temperature that is 60°C/high humidity strong light irradiation etc for 10 days.
- Firm has submitted copy of GMP certificate (Certificate no. SD20191021) valid till 10-12-2024, issued by Shandong Food & Drug Administration in name of M/s Shandong Luoxin Pharmaceutical Group Stock Co., Ltd., wherein Scope of inspection has been declared as "Lyophilized Powder for injection."

Decision: Approved with USP specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee that is 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, compatibility studies of excipients with drug substance manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures for the product along with the impurities, validation of analytical procedures, detail of impurities and the validation studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	The firm has submitted analytical method verification studies including specificity, linearity and accuracy for drug product, drug substance and impurities as well.
	Container closure system of the drug product	250mL amber colored type III glass bottle sealed by an aluminium screw cap with a low density polyethylene liner.

	Stability study data of drug product, shelf life and storage conditions	• Real time stability studies have been conducted at 30oC±2 and65%RH±5% for 36 months of 3 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: (090301, 090302, 090303)

Evaluation by PEC:

- The applicant holds the registration of "Isofurane Inhalant" 100ml bottle with registration no. 045727 from the same manufacturer that is M/s Lunan Better Pharmaceutical Co., Ltd., China.
- As per the submitted CoPP the applied product is not available for free sale in the exporting country.

Observations	Response
Submission of valid copy of drug sale license is required.	The firm has submitted valid copy of DSL with the following details. License No: 01-374-0177-028459D Address: Adcare Pharma, House No. D-145, 5th road, Satelite town Rawalpindi. Godown: House No. D-145, 5th road, satellite town, Rawalpindi. Validity: 24/03/2022 Status: Drug License by way of Wholesale
Submit filled, signed and stamped Form 5F with the relevant details which should be provided along with., since the submitted Form 5F does not contain any information regarding the registration application.	The firm has submitted form 5F with the relevant documents.
Product specific sole agency agreement between the product license holder and the applicant is required.	
Since you are already granted the registration for Isoflurane 100ml bottle, therefore the application for 250ml bottle shall be submitted, please submit revised form 5F along with the applicable fee.	The firm has stated that they have been granted the registration of 100mL sevoflurane and now they are applying for 250mL. The firm has submitted relevant documents for 250mL sevoflurane.
The submitted data is for 100mL bottle while the registration for 100mL bottle is already granted by the Board. Therefore, you are required to provide the relevant data.	Submitted.
Provide evidence of approval of the applied formulation by reference regulatory authorities (with same filled volume/strength) which were adopted by Registration Board in its 275th meeting.	Sevoflurane 100% Inhalation Vapour, liquid (250mL type III amber colored glass bottle), MHRA Approved.
Pharmaceutical equivalence data is not submitted.	

Decision of 316the meeting:

- Submission of Free sale certificate in the country of origin i.e., China for the applied product in fill volume of 250ml, issued by relevant regulatory authority or else Free sale certificate in any of the reference regulatory authorities of the applied product from the

same finished drug product manufacturer i.e., M/s Lunan Better Pharamceutical Co., Ltd., No. 243, Yingueshan road, Linyi city, Shandong province, China.

- Submission of Pharmaceutical equivalence studies against the innovator product.

Submission by the firm:

- Initially the firm had applied for two filled volumes of Sevoflurane for Inhalation that is 100mL and 250mL and submitted relevant data. Upon communication the firm requested to consider 250mL bottle for registration against the submitted application. 250mL was not available for free sale in china as per submitted CoPP. The firm then requested to considered 100mL glass bottle.
- The case was deferred in 316th meeting for submission of free sale certificate/CoPP and pharmaceutical equivalence.
- The firm has now submitted original, legalized and valid CoPP for 100mL filled volume with the following detail;
  Certificate No.; Shandong20200105(5)
  Free Sale: YES
  Facilities and operations conform to WHO-GMP
  Manufacturer / Product License Holder: M/s Lunan Better Pharmaceutical Co. Ltd., No. 243 Yiqueshan road, Linyi city, Shandong province, China.
- Pharmaceutical equivalence is established against Ultane (B:1114338) approved by USFDA by performing all the quality tests.
- Pack size and Price: 1's & 9600/-.

Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that the applicant will submit full fee that is Rs. 150,000/- before issuance of registration letter for change of filled volume.

		• Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: (A035176, A035177, A035178)
Evaluation by PEC-I:		
Observations		**Response**
Official monograph for Carboplatin drug substance is present in USP/BP while the testing is done according to in-house standard, please clarify.		No response is submitted against this observation.
Analytical method verification studies performed by drug product manufacturer for drug substance along with the complete method for routine analysis is required.		Analytical verification studies performed by drug product manufacturer are submitted according to In-House specifications.
Stability study data including accelerated and real time for 03 batches is required till shelf life/retest period for the drug substance should be submitted.		No response is submitted against this observations.
Since the official monograph for Carboplatin injection is present in B.P while the applied product is developed according to In-House standards. Provide scientific justification and comparison of BP and In-House specifications or provide complete analysis of all parameters for applied product as described in B.P along with the submission analytical method verification studies including accuracy, specificity and precision.		The has not provided a comparison of In-House and B.P specifications and no clarification is submitted as well regarding the In-House specifications.
Decision: The Board deferred the case for submission of; • **Clarification since the official monograph of the Carboplatin drug substance present in USP/BP while the testing is done according to in-house standard** • **Submission of Stability study data including accelerated and real time for 03 batches is required till shelf life/retest period for the drug substance.** • **Since the official monograph for Carboplatin injection is present in B.P while the applied product is developed according to In-House standards. Provide scientific justification and comparison of BP and In-House specifications or provide complete analysis of all parameters for applied product as described in B.P along with the submission analytical method verification studies including accuracy, specificity and precision**.

	Details of fee submitted	Rs. 100,000/- dated 21-08-2019
	The proposed proprietary name / brand name	LUTEINA 100mg vaginal tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vaginal tablet contains: Progesterone…..100mg
	Pharmaceutical form of applied drug	Round, biconvex, white to off-white in colour, Vaginal Tablet
	Pharmacotherapeutic Group of (API)	Hormone
	Reference to Finished product specifications	In-house
	Proposed Pack size	30 tablets per pack
	Proposed unit price	Rs. 1536/- Per Pack
	The status in reference regulatory authorities	Lutigest 100 mg vaginal tablets by M/s Ferring Pharmaceuticals, MHRA Approved. Lutinus 100mg Vaginal Tablets by M/s Ferring Ireland Limites, HPRA Ireland Approved
	For generic drugs (me-too status)	Could not be confirmed
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information

		related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and product.
	Name, address of drug substance manufacturer	M/s Zhejiang Shenzhou Pharmaceutical Co., Ltd. 14 Chuancheng Nan Road China-317300 Xinaju, Zhejiang Province
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	CEP certificate is provided and the firm has stated that the re-test period for the drug substance is 36 months when stored in double PE bags placed in carton drums.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has submitted pharameutical equivalence data against Endometrin Tablet 100mg by M/s QPharma Ab, Sweden by performing all the quality tests (VK292A).
	Analytical method validation/verification of product	The firm has submitted relevant data including analytical method validation for the drug product including the impurities
	Container closure system of the drug product	Blisters of PVC/PVDC 90 g/m^2 pharmaceutical white foil and aluminium lidding foil, primary packaging carton box containing blister nad leaflet as secondary packaging.
	Stability study data of drug product, shelf life and storage conditions	• 12 months data of 3 batches at 30 ± 2^0C, 75±5%RH • 6 months at 40^0C±75%RH of 03 batches.
Evaluation by PEC-I: • Firm Submitted CEP (**Certification** of suitability of European Pharmacopoeia monographs) for Progesterone Micronised, non-micronised API which is verified by EDQM website dated 27-12-2019 link attached:		

https://extranet.edqm.eu/4DLink1/4DCGI/Query_CEP?vSelectName=1&Case_TSE=none&vContains=1&vContainsDate=1&vtsubName=Progesterone&vtsubDateBegin=&vtsubDateBtwBegin=&vtsubDateBtwEnd=&SWTP=1&OK=Search

- Vaginal tablets are solid, single-dose preparations. They generally conform to the definitions of uncoated or film-coated tablets given in the monograph (British Pharmacopoeia).
- Disintegration (2.9.2)
  Unless intended for prolonged local action, they comply with the test (special method for vaginal tablets). Examine the state of the tablets after 30 min, unless otherwise justified and authorised. Disintegration test along with the dissolution test (≥80% in 30mins) is included in the final specifications (release and shelf life) of the drug product.
- Moreover, the pharmaceutical equivalence studies have been performed in Dow University of Health sciences at Bioanalytical Lab-IBBPS, Old TLA building 1st floor, DUHS-OJHA Campus Karachi. The applicant has stated that the pharmaceutical equivalence is not a regulatory requirement in exporting country that is why the studies have not been performed.

Decision of 313th meeting:
Since pharmaceutical equivalence and comparative dissolution are performed by Dow University of Health Sciences at Bioanalytical Lab-IBBPS, Old TLA Building 1st Floor, DUHS-OJHA Campus Karachi. The Board after deliberation deferred the case for clarification from the legal division regarding the status of the submitted data of Pharmaceutical equivalence and comparative dissolution profile.

Submission by the firm:

- The firm has submitted comparative dissolution profile of the applied product against Progesterone Vaginal Tablets 100mg (Lutinus tablet) by Ferring GmbH Wittland 11 D-24109 Kiel Germany (Batch No. YL314A) in all the 03 media that is 0.1N HCl, Acetate Buffer and Phosphate Buffer (document No. RDP-PP-RT/020 dated 25/05/2022). The study is performed by the manufacturer of the applied product.
- Moreover, the firm has submitted the results of Pharmaceutical Equivalence studies performed by the manufacturer of the applied product against Lutinus tablet 100mg (B: YL314A).(Even Document No., attachment 10).

Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Decision of 292nd meeting:

Deferred due to following:

i. Importable from India as per IPO
ii. Provided photocopy of CoPP legalized not original.
iii. Submissionof relevant informationagainst section 3.2.P.5.5 (Characterization of Impurities.)

Submission by the firm:

- Original legalized CoPP (certificate No. 5375/2019 issued for Vepridone 25mg) valid till 13/11/2021 issued by Food and Drugs Administration Punjab, India.
  The applied product is present for free sale in the market of exporting country.
  The facilities and operations conform to WHO-GMP.
  Product License holder and Manufacturer: M/s Kwality Pharmaeucticals Limited, Village Nag Kalan, Majitha road, Amritsar, Punjab, India.
- Original legalized CoPP (certificate No. 5374/2019 issued for Vepridone 37.5mg) valid till 13/11/2021 issued by Food and Drugs Administration Punjab, India.
  The applied product is present for free sale in the market of exporting country.
  The facilities and operations conform to WHO-GMP.

Product License holder and Manufacturer: M/s Kwality Pharmaeucticals Limited, Village Nag Kalan, Majitha road, Amritsar, Punjab, India.

- The firm has submitted relevant details regarding characterization of impurities.

Decision of 308th meeting:

The Board decided to refer the case to DRAP's Authority in light of its decision regarding importability from India.

Evaluation by PEC:

The case was placed in 136th meeting of the Authority for deciding whether the applied product is importable form India or otherwise. The authority has decided as follows:

"The Authority after due deliberation noted that as Risperidone 25mg & 37.5mg Extended Release Microsphere Injection having HS code 3004.4900, is importable from India under Import Policy Order-2016, so Registration Board may take its decision keeping in view the safety, efficacy and quality of the applied product".

Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

		Firm has submitted three batches long term stability data 3 batches 36 months at 30±2^{0}C,75%RH and 6 months at 40^{0}C±75%RH for three batches for applied strengths separately.

Decision of 292nd meeting:

Deferred due to following:

iv. Importable from India as per IPO
v. Provided photocopy of CoPP legalized not original.
vi. Submissionof relevant informationagainst section 3.2.P.5.5 (Characterization of Impurities.)

Submission by the firm:

- Original legalized CoPP (certificate No. 5375/2019 issued for Vepridone 25mg) valid till 13/11/2021 issued by Food and Drugs Administration Punjab, India.
  The applied product is present for free sale in the market of exporting country.
  The facilities and operations conform to WHO-GMP.
  Product License holder and Manufacturer: M/s Kwality Pharmaeucticals Limited, Village Nag Kalan, Majitha road, Amritsar, Punjab, India.
- Original legalized CoPP (certificate No. 5374/2019 issued for Vepridone 37.5mg) valid till 13/11/2021 issued by Food and Drugs Administration Punjab, India.
  The applied product is present for free sale in the market of exporting country.
  The facilities and operations conform to WHO-GMP.
  Product License holder and Manufacturer: M/s Kwality Pharmaeucticals Limited, Village Nag Kalan, Majitha road, Amritsar, Punjab, India.
- The firm has submitted relevant details regarding characterization of impurities.

Decision of 308th meeting:

The Board decided to refer the case to DRAP's Authority in light of its decision regarding importability from India.

Evaluation by PEC:

The case was placed in 136th meeting of the Authority for deciding whether the applied product is importable form India or otherwise. The authority has decided as follows:

"The Authority after due deliberation noted that as Risperidone 25mg & 37.5mg Extended Release Microsphere Injection having HS code 3004.4900, is importable from India under Import Policy Order-2016, so Registration Board may take its decision keeping in view the safety, efficacy and quality of the applied product".

Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,50/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Case No. III: Import (Veterinary)
New Cases:

42.	**Name and address of Applicant**	M/s Atzan Pharmaceuticals, commercial area aziz Bhatti town Sargodha
	Detail of Drug Sale License	DSL No. 0011000 0001644 valid up 14-Apr-2020
	Name and address of manufacturer	M/s Vietnam Sakan Technology Development & Investment Joint Stock Company, Lot D1-D4 Dong Tho Industrial Complex, Yen Phong District, BAC Ninh Province, Vietnam.
	Marketing authorization holder	M/s Vietnam Sakan Technology Development & Investment Joint Stock Company, Lot D1-D4 Dong Tho Industrial Complex, Yen Phong District, BAC Ninh Province, Vietnam.
	Name of exporting country	Vietnam
	Type of Form	Form 5-A
	Diary No. & Date of R& I	Dy. No 23395 Dated 07-12-2017
	Fee including differential fee	Rs. 100,000/- Dated 07-12-2017

	Brand Name +Dosage Form + Strength	Cefquin 2.5 LA suspension for injection
	Composition	Each ml of suspension contains; Cefquinome as sulfate……..25mg
	Finished Product Specification	In-House
	Pharmacological Group	Antiobiotic
	Shelf life	24 months
	Demanded Price	Decontrolled.
	Pack size	1's (type I glass vial)
	Me-too status	COBACTAN 2.5% SUSPENSION FOR INJECTION (50mL), Reg. No. 078219
	Stability studies	Firm has submitted long term (24 months) at 30°C 65±5%RH & accelerated (06 months) stability data at 40°C, 75±5% RH for three batches.
	Detail of certificates attached	➢ Original Legalized Free Sale Certificate issued by Ministry of Agriculture and Rural Development, Department of Animal Health Vietnam (certificate no. 494/2017/QLT-CFS) dated 26/06/2017 is submitted. ➢ Copy of GMP certificate (No.23/22/GCN-GMP) dated 25/07/2022 issued by Ministry of Agriculture and Rural Development. The certificate is valid for 05 years. **As per copy of GMP certificate the manufacturer has production lines of Beta-Lactam in the form suspension for Injection.** ➢ Copy of authorization letter is submitted through which M/s Atzan Pharmaceuticals is appointed as agent for different products including the applied product.

Remarks of the Evaluator:

Observations	Response
Since registration of injections is granted with 01filled volume but you have applied for 03, therefore, select 01 filled volume of the applied product along with the stability study data conducted under the conditions of zone IV-A of 03 batches of relevant filled volume, please. Moreover, provide me-too status of the applied product in same filled volume as selected.	The firm has requested for 50mL filled volume. Me too: COBACTAN 2.5% SUSPENSION FOR INJECTION (50mL), Reg. No. 078219
Submit valid copy of drug sale license.	The firm has submitted receipt for renewal of DSL. Ref No. 384-11940097-2022 Add: 13-E, Commercial area, Aziz Bhatti Town, District Sargodha.
Detail of primary packaging material is required.	Type I glass vial, 50mL.

Decision: The Board discussed that B-Lactam preparations include Penecillins as well as Cephalosporins and submitted copy of GMP certificate does not clarify that the production lines of manufacturer are for Penecillins or Cephalosporins. Keeing in view, the Board decided to defer the case for further clarification of availability of manufacturing failcity for the applied product.

Deferred cases:

	Composition	Each ml contaions: Colistin sulfate……..5,000,000 IU
	Finished Product Specification	In house
	Pharmacological Group	Antibiotic
	Shelf life	2 years
	Pack size & Demanded Price	100ml, 1litre, 5litre, price decontrolled
	Me-too status	
	Stability studies	24 moths real time and 06 months accelerated of 3 batches as per ZONE IV-A.
	Detail of certificates attached	Original legalized free sale certificate issued on 06/07/2018, the product is freely sold in exporting country and the manufacturer conforms to WHO-GMP as per the certificate.
	Remarks of the Evaluator.	Clarification is required since the submitted documents (free sale certificate and stability study data) along with the dossier show that the applied product contains Colistin Sulfate (in terms of international units IUs) while the calculation of IU's is based upon the activity of base only. Submit drug product specification data in the light of decision of Registration Board in its 267th meeting. Provide evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.
	Decision: Deferred for the following: • Clarification is required since the submitted documents (free sale certificate and stability study data) along with the dossier show that the applied product contains Colistin Sulfate (in terms of international units IUs) while the calculation of IU's is based upon the activity of base only. • Submit drug product specification data in the light of decision of Registration Board in its 267th meeting. • Provide evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm. **Submission by the firm:** • The firm has stated that the applied product will be imported from Spain and is approved by the Spanish authority (CimaVet). The approval status of the applied product is verified from available online data base of Spanish Authority. The composition of the applied product is:	

	2. QUALITATIVE AND QUANTITATIVE COMPOSITION Each ml contains: **Active substance:** colistin sulfate 5,000,000 IU file:///C:/Users/farooq.aslam/Downloads/FT_3204%20ESP%20(2).pdf (Accessed on 22/07/2022 at 12:40pm). • As per the document No. EMEA/MRL/016/95-Final (Summary Report for colistin) issued by Committee for Veterinary Medical Products, Colistin Base has been assigned a potency of 1000ug base activity per mg (30,000 IU/mg) and theoretical potency of Colistin Sulphate is 800ug per mg (24,000IU/mg). https://www.ema.europa.eu/en/documents/mrl-report/colistin-summary-report-1-committee-veterinary-medicinal-products_en.pdf (accessed on 22/07/2022 at 1:10pm). • The firm has stated that the formulation is not present in any pharmacopoeia therefore Innovator's specifications may be granted. Initially the firm had applied for In-House specifications. • Me-too status: COLISTIN WATER SOLUBLE POWDER Reg. No. 071022 by M/s Biogen Pharma.
Decision: Approved with innovator's specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility. Registration Board further decided that registration letter will be issued after submission of applicable fee of Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	

Case No IV: Registration application submitted on form 5
Deferred Cases of Form 5 Local Manufacturing:
Covid cases:

Sr. No.	Name of applicant/manufacturer	Brand name	Composition	Dy.No. / Date / Fee	Last Inspection report	Remarks
44.	M/s Biorex Pharmaceuticasl plot No. 251-A, Industrial Triangle Kahuta Road, Islamabad.	Bioquine 200mg tablet	Each Film Coated Tablet contains: Hydroxychloroquine sulfate ……200mg Pack size and price: As per SRO	Dy. No.7617 dated 15/04/2020 Rs. 20,000/- Form 5		Last inspection report is older than 3 years. The firm has applied for uncoated tablet in contrast to innovator's product.

Decision of 295th meeting:
Deferred for the following:
 Submission of evidence of approval of applied formulation as "uncoated tablets" in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting or else the formulation may be revised in accordance with reference product along with submission of requisite fee.
 Referred the case to QA & LT Division to conduct GMP inspection of the firm on priority.
Submission by the firm:
The firm has:
- Revised the formulation from uncoated tablet to film coated tablet and submitted fee of Rs. 7500/- vide challan number 6594010172 dated 24/05/2022.

• Last inspection report dated 28/09/2021, 21/10/2021, 09/12/2021 is submitted. The panel recommended for the renewal of DML for Tablet (General) section, Capsule (General), Capsule (Ceph), Dry Suspension (Ceph), Dry Powder Injection (Ceph) and for additional sections Syrup (General), Dry Suspension (General), Liquid Injectable (Ampoule), Liquid Injectable (Vial), Creams/Ointments (Topical General), Lotions/Gels (Topical General).
Decision: Registration Board approved the registration of the applied product. Conditions regarding validity of registration and data requirement will be same as decided by the Board in its general decision recorded in its 295th meeting.

	Brand Name +Dosage Form + Strength	Doxetal 80mg/2ml Injection
	Diary No. Date of R& I & fee	Dy. No 5589 dated 07-02-2019 Rs.20,000/-
	Composition	Each injection vial contains: Docetaxel……80mg
	Pharmacological Group	plant alkaloids and other natural products
	Type of Form	Form-5
	Finished Product Specification	USP
	Pack Size & Demanded Price	Asper SRO
	Approval Status of Product in Reference Regulatory Authorities	Approved in TGA Australia (DOCETAXEL AN docetaxel 80mg/2mL concentrated solution for injection vial with diluent vial)
	Me-too Status	Plustaxano Anhidro 80mg/2ml Concentrate Solution for Infusion of M/s. Ghani brothers Reg. no. 044885 (registered in import)
	GMP Status	GMP inspection conducted on 19.09.2018 concluded satisfactory level of GMP compliance.
	Remarks of the Evaluator.	Terminal sterilization not mentioned • Packaging material not mentioned submit separate application for diluent
	Previous Decision of Registration Board (M-296)	Deferred for the following: • Submit justification on scientific grounds for not performing terminal sterilization of applied formulation. • Mention type of primary packaging material of applied formulation whether it is type I, II, or III glass container. • Status of Diluent whether it is combo pack or otherwise.
	Response of the Firm	• Firm informed that revised method of manufacturing has been submitted with terminal sterilization process. • Primary packaging material is Glass vial Type-I • Firm stated that they have already given registration of higher strength of same formulation in 275th meeting of Registration Board in which the approval has been granted with 9ml diluent. So, firm has demanded for combo pack with diluent.
	Decision of 316th meeting:	

	Deferred for clarification regarding availability of diluent whether, it will be procured or it will be self-manufactured. In case of self-manufacturing of diluent by M/s Rotex Pharma Pvt Ltd., firm shall submit manufacturing process along with detail of manufacturing area in which the diluent will be manufactured. **Submission by the firm:** • The firm has stated that the diluent will be self-manufactured in Liquid vial (SVP) Oncology section. The approval of the section was granted vide letter No. F.1-53/2003-Lic(Vol-I) dated 13/06/2017. • Copy of GMP certificate No. F.3-55/2020-Addl.Dir.(QA&LT-1) issued n the basis of inspection conducted on 12/08/2020. • The firm has submitted complete method of manufacturing for manufacturing of the diluent. • The firm has the registration of another strength of Docetaxel Injection 120mg/6mL along with the diluent 9mL (Reg. No. 092154) approved in 275th meeting. • The composition of diluent is as per the product approved by TGA Australia. **Label claim:** Each vial (2mL) contains: Docetaxel……..80mg **Composition of diluent:** Each vial (6.5mL) contains: Ethanol absolute……0.845mL Water for injection….6.5mL (q.s)	
	Decision: The Board deliberated that the applied product is in combo pack and the diluent will be manufactured by the manufacturer, therefore the Board approved the case and decided that the applicant will submit full fee that is Rs. 30,000/- for revision of composition of diluent as per reference product before issuance of registration letter.

	Composition	Each Tablet Contains: Fexofenadine HCL…180mg
	Pharmacological Group	NSADI
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack Size & Demanded Price	1x 10's, 20's As per SRO
	Approval Status of Product in Reference Regulatory Authorities	Fexofenadine hydrochloride tablets by Mylan (USFDA Approved) Approved as Film coated tablet
	Me-too Status	Fenadex 180mg tablet of M/s Global Pharmaceuticals (Reg. #031139)

	GMP Status	3-3-2017 Panel recommends the renewal of DML.
	Remarks of the Evaluator.	Internationally approved product is film coated tablet.
	Decision of 287th meeting: Deferred for revision of formulation as per reference product along with submission of requisite fee for change of formulation. Submission by the firm: • The firm has revised the formulation from uncoated to film coated tablet and submitted Rs. 7500/- vide challan number 37219921503 dated 21/07/2022. • Copy of GMP certificate No.F.11-12/2022-DRAP-39 issued on the basis of inspection conducted on 03/02/2022.	
	Decision: Approved.	
58.	Name and address of manufacturer / Applicant	M/s Fedro Pharmaceuticals Lab Pvt Limited. 149-Industrial Estate, Hayatabad, Peshawar
	Brand Name +Dosage Form + Strength	Fexofed 180mg Tablets
	Diary No. Date of R& I & fee	Dy.No 26060 dated 27-12-2017 Rs. 20,000 Dated 27-12-2017
	Composition	Each Tablet Contains: Fexofenadine HCL…120mg
	Pharmacological Group	NSADI
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack Size & Demanded Price	1x 10's, 20's As per SRO
	Approval Status of Product in Reference Regulatory Authorities	Fexofenadine hydrochloride tablets by (MHRA Approved)
	Me-too Status	Epodin 120mg Tablet M/s Epoch Pharmaceutical,
	GMP Status	3-3-2017 Panel recommends the renewal of DML.
	Remarks of the Evaluator.	Internationally approved product is film coated tablet.
	Decision of 287th meeting: Deferred for revision of formulation as per reference product along with submission of requisite fee for change of formulation. Submission by the firm: • The firm has revised the formulation from uncoated to film coated tablet and submitted Rs. 7500/- vide challan number 52136851387 dated 21/07/2022. • Copy of GMP certificate No.F.11-12/2022-DRAP-39 issued on the basis of inspection conducted on 03/02/2022.	
	Decision: Approved.	
59.	Name and address of manufacturer / Applicant	M/s Fedro Pharmaceutical labs. (Pvt) Ltd., 149-Industrial Estate, Hayatabad, Peshawar
	Brand Name +Dosage Form + Strength	FE-ZOLE 2.5mg Tablet
	Diary No. Date of R& I & fee	17901, 15-05-2018, 20,000/-, 11-05-2018
	Composition	Each film coated tablet contains: Letrozole…….2.5mg
	Pharmacological Group	Aromatase inhibitor
	Type of Form	Form 5
	Finished Product Specification	In-House
	Pack Size & Demanded Price	10's; As per SRO
	Approval Status of Product in Reference Regulatory Authorities	FEMARA 2.5 mg Tablet by M/s Novartis Pharma **(**USFDA approved)

	Me-too Status	Aromek 2.5mg Tablet by M/s Glaxy Pharmaceuticals (Reg#052258)
	GMP Status	Panel inspection dated 03-03-2017 recommends for renewal of DML.
	Remarks of the Evaluator.	
	Decision of 285th meeting: Registration Board referred the case to QA & LT Division to conduct GMP inspection of Firm on priority. Submission by the firm: The firm has submitted copy of GMP Certificate No. F.11-12/2022-DRAP-39 issued on 28/04/2022 valid till 03/02/2022.	
	Decision: Registration Board approved registration of product with USP specifications in general manufacturing areas with condition that manufacturer shall provide safety and protective measures for workers and personnel which remain in direct contact or are involved in close handling of these drugs. Furthermore, the registration letter will be issued after submission of fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	
60.	Name and address of manufacturer / Applicant	M/s Akson Pharmaceuticals Private limited, Plot # 9-B/1&2, old Industrial Estate, Sector D1,Mirpur, Azad Kashmir.
	Brand Name +Dosage Form + Strength	Sulosin 0.2mg capsule
	Diary No. Date of R& I & fee	Dy. No. 41634 dated 07/12/2018 Fee Rs. 20,000/-
	Composition	Each capsule contains: Tamsulosin HCl (pellets SR 0.2%)……..0.2mg Pellets Source of pellets: M/s Vision Pharma
	Pharmacological Group	Alph adrenergic antagonist
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack Size & Demanded Price	10's, 30's, 50's, price as per SRO
	Approval Status of Product in Reference Regulatory Authorities	Could not be confirmed
	Me-too Status	Harnal 0.2mg Capsules by M/s Hilton Pharma, Reg No. 45084
	GMP Status	Last inspection report dated 16/06/2017 and 25/07/2017, the panel recommended the renewal of license by the way of formulation.
	Remarks of the Evaluator.	The firm has revised the formulation from Enteric Coated pellets to Sustained Released pellets as per the reference product with submission of fee Rs. 5000/- vide challan number 1983152 dated 30/03/2020.
	Decision of 295th meeting: Deferred for submission of remaining fee. Submission by the firm: The firm has submitted Rs. 15,000/- fee for revision of formulation vide challan No. 94421040 dated 23/12/2021. Last inspection report dated 22/02/2019 concludes "Keeping in view the above stated facts based upon the areas visited, records reviewed and people met, it may be concluded that the management has rectified almost all the observations from previous inspection and as of today the firm's facility is suitable to carry out manufacturing and testing of pharmaceuticals. As , the GMP is a continual process of improvement, hence updating the procedures shall always	

	remain a task, the management is advised to develop a forward thinking progressive environment, adapting the recent trends".	
	Decision: Approved. Registration Board further decided that registration letter will be issued after submission of differential fee that is Rs. 15,000/- for revision of formulation as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	

Routine Cases (Veterinary):

61.	Name and address of manufacturer / Applicant	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Super Dox 80 Powder
	Diary No. Date of R& I & fee	Dy.No 1161: 09-01-2019 Rs. 20,000/-: 04-01-2019
	Composition	Each 1000gram contains: Doxycycline as hyclate…800g
	Pharmacological Group	Antibiotic
	Type of Form	Form 5
	Finished Product Specification	Innovator's
	Pack Size & Demanded Price	As per SRO
	Me-too Status	Could not be confirmed
	GMP Status	Inspection report: 18 & 23.04.2019 concludes that: Based on the areas inspected, the people met and the documents reviewed, and considering the findings of the inspection M/s Bio Labs Pvt Ltd was considered to be operating at a reasonably acceptable compliance with GMP as of today as per the Drugs Act, 1976 and Drap, Act, 2012 and rules framed there under.
	Remarks of the Evaluator[ix]	□ Form 5 has been signed by the quality control manager. □ Provide proof of me-too product (name and registration number) having same strength and salt form already approved by DRAP.
	Previous decision	The board in its 295th meeting deferred the case for confirmation of me-too product.
	Evaluation by PEC	□ Reply dated 02.08.2021: □ The firm submitted signed Form 5. □ The firm provided the following me too: Doxyral 80% water soluble powder Reg. No. 082504 □ The firm has not adjusted the weight of API in master formula as per salt factor.
	Decision of 312th meeting: Deferred for adjustment of the weight of API in master formula as per salt factor along with submission of applicable fee. **Submission by the firm:** The firm has adjusted the weight of API in accordance with the salt factor and has submitted the revised master formula along with the fee of Rs. 30,000/- vide challan number 3243123802 dated 14/06/2022.	
	Decision: Approved.	
62.	Name and address of manufacturer / Applicant	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Bio-Cosul 50 WSP
	Diary No. Date of R& I & fee	Dy. No 5561: 08-05-2019 Rs. 20,000/-: 08-05-2019

	Composition	Each Gram Powder Contains: Colistin sulphate…50 MIU
	Pharmacological Group	cationic polypeptide antibiotic
	Type of Form	Form 5
	Finished Product Specification	Innovator's
	Pack Size & Demanded Price	As per SRO
	Me-too Status	Could not be confirmed
	GMP Status	Inspection report: 18 & 23.04.2019 concludes that: Based on the areas inspected, the people met and the documents reviewed, and considering the findings of the inspection M/s Bio Labs Pvt Ltd was considered to be operating at a reasonably acceptable compliance with GMP as of today as per the Drugs Act, 1976 and Drap, Act, 2012 and rules framed there under.
	Remarks of the Evaluator[ix]	□ Form 5 has been signed by the quality control manager. □ Provide proof of me-too product (name and registration number) having same strength and salt form already approved by DRAP.
	Previous decision	The board in its 295th meeting deferred the case for confirmation of me-too product.
	Evaluation by PEC	□ Reply dated 04.08.2021: □ The firm submitted signed Form 5. □ Now, the firm has claimed in-house specifications without submission of details. □ The firm provided the following me too: COLISTIN WATER SOLUBLE POWDER Reg. No. 071022 with the label claim: EACH 100GM CONTAINS:- COLISTIN SULPHATE..5,000,000 IU, which is not in line with the applied product.
	Decision of 312th meeting: Deferred for confirmation of generic status. Submission by the firm: The firm has revised the label claim in-lined with the me-too product. Each 100gm Contains: Colistin Sulphate…….5,000,000 IU.	
	Decision: Approved. Registration Board further decided that registration letter will be issued after submission of full fee that is Rs. 30,000/- for revision of formulation according to me-too product as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	

Agenda of Evaluator PEC-II

Case no. 01 New Registration applications on Form 5F (Human)

New Cases (Human)

63.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s English Pharmaceuticals Industries. Link Kattar Bund Road, Thokar Niaz Baig, Multan Road, Lahore**

	Name, address of Manufacturing site.	M/s English Pharmaceuticals Industries. Link Kattar Bund Road, Thokar Niaz Baig, Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 26927 dated 29-09-2021
	Details of fee submitted	Rs.30,000/- dated 17-09-2021
	The proposed proprietary name / brand name	**Coliate 4.5MIU Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Colistimethate sodium …….. 4.5MIU
	Pharmaceutical form of applied drug	Dry powder injection
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by MHRA of UK
	For generic drugs (me-too status)	Colicraft 2MIU Lypholized powder for solution for injection Reg.# 094751
	GMP status of the Finished product manufacturer	GMP certificate issued on the basis of inspection conducted on 17& 18-01-2019
	Evidence of manufacturing facility.	GMP certificate issued on the basis of inspection conducted on 17& 18-01-2019, declares availability of Dry powder injectable section.
	Name and address of API manufacturer.	M/s Hebei Shengxue Dacheng Pharmaceutical Co., Ltd., China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of

		manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Colixiin Injection of Pharmis Biofarmaceutica, Lda.
	Analytical method validation/verification of product	--

Frequency	Accelerated: 0,3,6 (Months) Real Time: 0,3,6 (Months)	
Batch No.	Trial-005	Trial-006
Batch Size	2700 packs	2700 packs
Manufacturing Date	06-2020	06-2020
No. of Batches	03	

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No.HE20190058 issued by NMPA China valid till 14/08/2024.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of commercial invoice no. TM20181106 attested by AD DRAP I&E Lahore dated 19-11-2018 for the import of 8Kg Colistimethate sodium.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.1	Submitted covering letter & fee slip mentins the strength as 4MIU whereas the dossier reflects 4.5MIU strength. Clarifcation shall be submittein this regard.	Firm has submitted an "Afffidavit" stating that "Ms English Pharmaceutical do hereby undertake that we have submitted fee challan# 6195143544 dated 17th Spetember 2021, for Coliate 4.5MIU injection bu due to typographical mistake we have written 4MIu instead of 4.5MIU in fee challan & covering letter of said product, we undertake that we will not use dthis fee challan in any other product further.
3.2.S.4.4	Submitted COA of drug substance from M/s English Pharma declares Assay limit in terms of %age instead of mcg/mg or IU/mg. Clarification shall be submitted in this regard	Firm has submitted revise COA of drug substance declaring Assay results both in terms of mcg/mg & %age.
3.2.S.4.5	Clarification shall be submitted whether drug specifications are as per BP or USP monograph.	Specifications by drug substance manufacturer & drug product manufacturer are as per USP monograph as confirmed by the COA and test methods.
3.2.P.1	Provide information including type of diluent, its composition, quantity or volume, which is to be provided along with the applied drug.	2 ml sterile water for injection filled in glass ampoule is accompanying reconstitution diluent.
3.2.P.2.6	Compatibility studies for the dry powder for injections shall be submitted as per the instructions provided in individual label of the drug product.	Firm has submitted results of compatibility study with 2ml sterile water for uinjection with performance of tests of Clarity of solution, pH & Assay.
3.2.P.5.2	• Analytical method has been submitted for Coliate 1MIU injection instead of the applied strength of 4.5 MIU injection. • Clarification shall be submitted regarding incubation time for the performance of Assay test.	• As idenitifed by your good office,there was a typo error in the method drafting , and test method of 4.5MIU injection is now submitted. Incubation time for assay performance is 24 hours or until

		growth is apparent at 32°C to 35 °C.
3.2.P.8	Submitted raw data sheets are not readable. Submit readable copies of the raw data sheets of the stability studies.	Firm has submitted new set of prints for the raw data sheets.

Decision of 320th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. EMPOLI (Empagliflozin) 10mg & 25mg Tablets which was presented in 290th meeting of the registration board & hence approved & registered by registration board Date of inspection: 13th June 2019. The inspection report confirms following points • The HPLC software is 21CFR Compliant. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. HE20180054 issued by Hebei CHINA FOOD AND DRUG ADMINISTRATION valid till 08/07/2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice# 1708ZP03 dated 19th October 2017 with received quantity i.e. 5000 kgs) for the purchase of Paracetamol from M/s Hebei Jiheng Shenzhou Pharmaceutical Co., Ltd. China with attestation of DRAP dated 01-11-2017
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[II]:

- Regarding justification of specifications of drug product, firm has submitted as under:
  "The dissolution parameters and testing procedure is as per USP Pharmacopeia but as the Paracetamol is rapidly dissolving drug and falls in BCS Class I, we stringent the dissolution specifications from 30 minutes to 10 minutes
  The selection of specified time for Dissolution is based on the BCS classification of API, as the drug is independent over physiological pH range (i-e from 1.2 to 6.8) and ·as per USP General chapter <1092>, the dissolution of rapidly dissolving product is achieved within 15 minutes therefore we established our dissolution time within 10minutes."

- Firm has submitted following comparison between the applied formulation and conventional paracetamol tablet already available in market:

Parameters	**PROVAS Novo 500mg Tablet**	**Paracetamol 500mg Tablet**
Dosage Form	Tablet	Tablet
Dosage Design	Immediate release film coated tablet	Immediate release uncoated tablet
Route of Administration	Oral	Oral
Dosage Strength	500mg	500mg
Pharmacokinetics	The special technology allows **PROVAS Novo 500mg Tablet** to begin dissolving in 5 minutes and start to relieve pain within 15 minutes	Paracetamol is readily absorbed from the gastrointestinal tract with peak plasma concentrations occurring about 30 minutes to 2 hours after ingestion
Patient's Acceptance & Compliance	• Capsular shape makes it easy to swallow • Bitter taste of Paracetamol is masked through film coating • Quick & Effective Pain Relief Stomach Friendly	• Round shape makes it difficult to swallow • Bitter Taste Delayed Pain Relief
Technology Used	**PROVAS Novo 500mg Tablet** is a Paracetamol formulation that contains an advance technology to rapid the onset of action	**Paracetamol 500mg Tablet** formulated using a conventional wet granulation process
Key Features	• It has unique delivery system as **PROVAS Novo 500mg Tablet** is a Paracetamol formulation that contains a rapid dispersion and dissolution technology which breakdown Paracetamol tablets in the stomach so that the drug is absorbed fast and pain relief can start within 15 minutes after ingestion • The technology contains three main ingredients viz.: ○ **Alginic Acid** draws fluid from the stomach into the tablet causing it to swell and break apart ○ **Calcium Carbonate** works together with Alginic Acid to boost disintegration of the tablet	Onset of action is slow, as peak plasma concentrations occurring about 30 minutes to 2 hours after ingestion

	○ **Crospovidone** acts as a super-disintegrant due to its ability to dissolve well in water • The absorption of Paracetamol occurs in the small intestine and as such is dependent on the rate of emptying of stomach contents into the small intestine and is therefore not associated with gastric irritation. The technology used in **PROVAS Novo 500 mg** Tablet increases gastric emptying time of the drug. • **PROVAS Novo 500mg Tablet** with this advance technology disperses up to five times faster than standard paracetamol tablets Suitable for all such patients requiring low sodium content in their diet	

Section#	Observations	Firm's response
3.2.P.5.1	• Limits for disintegration test i.e., NMT 30 minutes are inconsistent with the limits of dissolution test i.e., NLT 80% (Q) in 10 minutes.	We set disintegration specification according to USP general monograph for Disintegration <701> which specifies NMT 30minutes for film coated tablets. Our product is fast dissoving with a dissolution specs of NLT 80% (Q) in 10 minutes and disintegration time of our product is also found within 01 minute which co relates with dissolution. We have revised the specification of DT from NMT 30 minmutes to NMT 10 minutes.
3.2.P.6	• Submitted COA of working standard declares the "Valid till" date as January 2021, whereas trial batches have been manufactured and analyzed subsequent to this date. • Submitted COA of working standard is of BP grade, whereas drug product specifications have been claimed as per USP monograph.	Firm has submitted new COA of working standard, which had been standardized in January 2021 having validity date as of Jan, 2022. Firm has submitted that the working standard complies with both & USP monograph of Paracetamol, since both the monographs are harmonized.

Decision: The Board was apprised that the firm has applied for two products with the similar formulation that is Paracetamol, film coated tablet with slight difference in method of manufacturing and qualitative composition. The Board after due deliberation decided to defer the case for clarification whether an applicant can apply for registration of more than two products having same composition or otherwise.

Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. EMPOLI (Empagliflozin) 10mg & 25mg Tablets which was presented in 290th meeting of the registration board & hence approved & registered by registration board Date of inspection: 13th June 2019. The inspection report confirms following points • The HPLC software is 21CFR Compliant. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Paracetamol** Copy of GMP certificate (HE20180054) issued to M/s HEBEI JIHENG (Group) Pharmaceutical Co. Ltd. China issued by China Food & Drug Control Administration, valid till 08-07-2023 is submitted **Caffeine** Copy of GMP certificate (SD20190851) issued to M/s. Shandong Xinhua Pharmaceutical Co. Ltd. China issued by China Food & Drug Control Administration, valid till 23-01-2024 is submitted **Phenylephrine HCl** Written confirmation for active substances exported to EU, (Confirmation no. GD190014) issued to M/s. Shenzhen Oriental Pharmaceutical Co. Ltd. China, valid till 11-09-2022 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of following invoices specifying: **Paracetamol** 5000kgs of Paracetamol (invoice # 1708ZP03) attested by AD (I&E), Karachi dated 1-11-2017 is submitted **Caffeine** Detail of loan material (250g of Caffeine Anhydrous, Batch # 191101463) from M/s Semos Pharmaceuticals (Pvt.) Ltd. along with copy of Form-7 of the lot supplied by M/s Shandong Xinhua Pharmaceutical Co. Ltd. under their invoice no. XH191409 dated 07-11-2019 Copy of commercial invoice no. XH19140,9 in the name of M/s Semos, for caffeine anhydrous (batch# 191101463), has also been submitted, attested b AD DRAP I&E Karachi dated 01-01-2020.

		<u>Phenylephrine HCl</u> 1kg of Phenylephrine HCl (Batch # PEH-200303) (invoice # SZ-2003021) attested by AD (I&E), Karachi dated 16-04-2020 is submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[II]:

- Regarding difference in the stability batches of Caffeine for accelerated and long-term conditions, firm has submitted following declaration from M/s Shandong Xinhua:
  "We did 3 batch stability at 30/75 conditions in 2013; since accelerated was already done in 2009 there was no need to repeat accelerated stability in 2013."

- Regarding difference in the stability batches of Phenylephrine HCl, for accelerated and long-term conditions, firm has submitted following declaration from M/s Shenzhen Oriental:
  "While the batch of long-term stability data for Zone-Iva is not consistent with the accelerated batch, it is because the Zone IV test started from 2017, which is also the first time 3 batches, not involving the process and other any changes, no need to do accelerated tests again."

Section#	Observations	Firm's response
3.2.S.5	COA of primary/working standard, used by M/s Sami Pharma, for the analysis of Caffeine, shall be submitted.	Submitted
1.6.5	Valid GMP certificate for the manufacturer of Phenylephrine HCl shall be submitted instead of written confirmation for active substances exported to EU.	Firm has submitted copy of Drug Manufacturing License (GD20160118) valid upto 23-12-2025, issued by NMPA China,
3.2.P.5.1	MHRA Public assessment report of the refence product recommends dissolution specifications as "Not less than 85% released in 15 minutes", whereas firm has submitted dissolution specifications as "Not less than 85% in 30 minutes". Justification shall be submitted in this regard.	We have developed our product against the reference product Sudafed Sinus Max Strength Capsules. Comparative Dissolution profile (CDP) of PROVAS Sinus Capsule 500mg/25mg/6.1mg Capsule with reference product Sudafed Sinus Max Strength Capsules, shows satisfactory comparable dissolution profile, and product releases more than 85% within 15 minutes

		in all 3 physiological mediums, data already submitted. Initially we have found the MHRA Public Assessment Report of Grippostad day cold and flu relief capsules (Paracetamol 300mg, Phenylephrine hydrochloride 5mg and caffeine 25mg) which does not mentioned the specifications of dissolution test but not found MHRA Public Assessment Report on Max Strength Sinus Relief Capsules (Paracetamol 500mg, Phenylephrine hydrochloride 6.1mg and caffeine 25mg). On query we searched again and found the MHRA Public Assessment Report on Max Strength Sinus Relief Capsules, and that is archived, mentioning the dissolution test 'Not less than 85% released in 15 minutes". But not mentioned the dissolution medium and other dissolution test parameters. We have performed the dissolution test of our product PROVAS Sinu Capsule 500mg/25mg/6.1mg Capsule at 15 minutes and 30 minutes on same lab scale batches (which 6month data was submitted) after 18months at long term stability conditions i.e. 30°C/75% RH and results are attached (*Annex 3)* Based on attached data, our product complies the criteria of NLT 85 % in 15 minutes, therefore we revised the specification of dissolution test 'Not less than 85% released in 15 minutes". Revised Specification and testing method are attached for ready reference, and same specifications will be use for the commercial batches. Hope this will clarify and justify the query
3.2.P.5.6	Justification shall be provided for the selection of dissolution parameters, i.e., medium, apparatus & time.	The development of specification and test method of Paracetamol 500mg + Caffeine 25mg + Phenylephrine HCl 6.1mg capsule is based on general chapters of USP & BP and FDA guideline. Dissolution: Paracetamol, Caffeine & Phenylephrine HCl have solubility over the range in aqueous conditions. Since it is non – pharmacopeia product and no data is published regarding dissolution medium, and other parameters in various sites including FDA dissolution data base till now, therefore, in-house method has been developed having following parameters Apparatus: USP Type I (Basket)

		<table><tr><td>Volume</td><td>900ml</td></tr><tr><td>Dissolution Medium</td><td>Water</td></tr><tr><td>Speed (RPM)</td><td>100</td></tr><tr><td>Time</td><td>30 minutes</td></tr></table> **Basis of Selection of Dissolution Parameters:** Paracetamol, Caffeine & Phenylephrine HCl have solubility over a broad pH range in aqueous conditions as evident from the submitted CDP record (results above 85% within 15 minutes) hence it was inferred that solubility of all 3 APIs were not affected by change in pH and therefore water was selected as dissolution medium Whereas, the speed, time and volume is concerned, we follow the USP general chapter<1092> Dissolution procedure: Development and Validation which states that: **<u>For Speed:</u>** ***For immediate-release capsule or tablet formulations, Apparatus 1 (baskets) at 50–100 rpm or Apparatus 2 (paddles) at 50 or 75 rpm are commonly used***. **<u>For Volume:</u>** ***For compendial Apparatus 1 (basket) and Apparatus 2 (paddle), the volume of the dissolution medium can vary from 500 to 1000 mL.*** **<u>For Time:</u>** ***For immediate-release dosage forms, the duration of the dissolution procedure is typically 15 –60 mins*** On the above basis, we have selected the dissolution parameters viz Speed, time, Medium and apparatus for release and stability of finished product
3.2.P.6	• Submitted COA of working standard declares the "Valid till" date as January 2021, whereas trial batches have been and analysed subsequent to this date. • Submitted COA of working standard is of BP grade, whereas drug product specifications have been claimed as per USP monograph.	• Firm has submitted new COA of working standard, which had been standardized in January 2021 having validity date as of Jan, 2022. • Firm has submitted that the working standard complies with both & USP monograph of Paracetamol, since both the monographs are harmonized.

Decision of 320th meeting: Registration Board while considering the decision of 140th meeting of Authority regarding Borrowing of APIs for performing Product Development, R&D & stability Testing, decided to approved the product with Innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Furthermore, the Board decided that the firm shall perform dissolution testing as per USFDA method for all commercial batches.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Estine (Ebastine) Tablets 10mg & 20mg on 6th May, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Drug Manufacturing License no. Su 20160324 issued by Jiangsu Drug Administration (Huai'an Inspection Branch) valid till 06-12-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD I&E DRAP, Karachi, has been submitted. **Batch No.** | **Invoice No.** | **Quantity Imported** | **Date of approval by DRAP** 2019118 | JXCAVIR-200207 | 25kg | 04-03-2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with batch manufacturing record, analytical record and attested documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

	stability chambers (real time and accelerated)	

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.5.6	The section mentions "Not applicable" against pharmacopoeia reference for applied product, whereas BP monograph is available for applied product.	This is to inform you that product registration application of Rivaxo Tablets 2.5mg was submitted on Sep 23, 2021 (receipted copy attached). However, official monograph of Rivaroxaban Tablets has been incorporated in British pharmacopeia 2022 edition. • At the time of dossier submission, official monograph of Rivaroxaban Tablets was not available. Therefore, "Not Applicable" is mentioned against pharmacopeia reference for applied product.
3.2.S.4.1	Submitted specifications and analytical procedure are not as per BP monograph of Rivaroxaban. Test of Enantiomeric purity is not included in the specifications.	This is to inform you that product registration application of Rivaxo Tablets 2.5mg was submitted on Sep 23, 2021 (receipted copy attached). However, official monograph of Rivaroxaban API has been incorporated in British pharmacopeia 2022 edition. At the time of dossier submission, official monograph of Rivaroxaban API was not available. Therefore, submitted specification and analytical procedure are not as per BP monograph of Rivaroxaban and we have adopted specification and testing procedure as provided by API manufacturer. • Firm has submitted updated specification of Rivaroxaban API with the inclusion of test of enantiomer.
3.2.P.2.2.1	Pharmaceutical equivalence & CDP studies have not been conducted against the innovator product.	• This is to inform you that at the time of product development stage, innovator product was not available. However, we have performed Pharmaceutical Equivalence & Comparative Dissolution Profile studies against Xcept 2.5mg Tablets manufactured by M/s PharmEvo (Pvt.) Ltd
3.2.P.5.1	Submitted specifications declare reference as in-house, whereas BP monograph is available for applied product. Submitted specifications and analytical procedure is not as per BP monograph.	This is to inform you that product registration application of Rivaxo Tablets 2.5mg was submitted on Sep 23, 2021 (receipted copy attached). However, official monograph of Rivaroxaban Tablets has been incorporated in British pharmacopeia 2022 edition.

<table>
<tr><td></td><td></td><td>• At the time of dossier submission, official monograph of Rivaroxaban Tablets was not available. Therefore, submitted specifications and analytical procedure declare reference as in-house.</td></tr>
<tr><td>3.2.P.8.3</td><td>• Submitted stability studies have not been conducted as per specification and analytical procedure of BP monograph for Rivaroxaban tablets.</td><td>This is to inform you that we have manufactured 03 batches of Rivaxo Tablets 2.5mg for stability studies as follows:
<table>
<tr><td>Batch No.</td><td>534DS06</td><td>534DS07</td><td>534DS08</td></tr>
<tr><td>Batch Size</td><td>9000 Tablets</td><td>9000 Tablets</td><td>9000 Tablets</td></tr>
<tr><td>Mfg. Date</td><td>17-06-2020</td><td>26-06-2020</td><td>26-06-2020</td></tr>
</table>
06 months accelerated and real time stability studies were completed in Jan-2021 and the dossier was submitted in Sep-2021.

At the time of dossier submission, official monograph of Rivaroxaban Tablets was not available. Therefore, submitted stability studies have been conducted as per In-House specification and analytical procedure.</td></tr>
</table>

Decision of 320th meeting: Approved with BP specifications.

- **The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of CDP and pharmaceutical equivalence studies, performed against the innovator's product i..e, Xarelto tablet 2.5mg.**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to Psi report of Valanza tablet conducte don 30th May 2019, wherein following points have been reported: l
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Brimonidine Tartrate**: Copy of EUdra GMP certificate No. sukls1705/2019 valid upto 13-02-2022. **Brinzolamide:** Copy of EUdra GMP certificate No.NCF-II/1924/001/CAT valid upto 28-01-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Brimonidine Tartrate**: Copy of commercial invoice#: TWE-SCH I/04-20 attested by AD DRAP I&E dated 03-02-2021 **Brinzolamide:** Copy of commercial invoice#: TWE/SCH.01.20 attested by AD DRAP I&E dated 03-02-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Section#	Observation	Firm's response
1.6.5	Valid GMP certificate of API manufacturers shall be submitted.	Firm has submitted following: **Brimonidine Tartrate**: Copy of EUdra GMP certificate No. sukls260434/2021 valid upto Nov, 2024. **Brinzolamide:** Copy of GMP certificate No.NCF-II/2121/001/CAT valid upto May, 2024.
3.2.S.4.4	The COA of Brinzolamide from M/s Schazoo declares testing as per BP monograph, whereas drug substance manufacturer has claimed USP specifications.	Firm has submitted that COA of Brinzolamide from M/S Schazoo declares testing on USP rather BP. All tests were performed as per Brinzolamide USP monograph. Method of Analysis and Specification subrnitted were also on USP. The symbol (✓) indicates the new source rather BP. However, COA of Brinzolamide highlighting USP claim is attached for your kind reference.
3.2.S.5	COAs of primary/working standard, applied by the M/s Schazoo, for drug substance analysis shall be submitted.	Submitted.
3.2.P.3.3	• EMA assessment report of innovator product recommends aseptic ball milling of Brinzolamide as well as bulk sterilization of Brinzolamide solution, whereas both the steps have not been included in the submitted manufacturing method. • Submitted manufacturing method neither mentions terminal sterilisation of the filled bottles nor sterile filtration of the final bulk suspension. Justification shall be submitted regarding how the sterility of the finished product will be ensured.	• The technique of aseptic ball milling has been used by the innovator, however, to ensure the particle size of Brinzolamide within range, we have used pre-sized material which is controlled by the drug substance manufacturer. Moreover, to ensure the sterilization of Brinzolamide during manufacturing and finished product, gamma sterilization from Pakistan Radiation Services Lahore and micro-filtration techniques are used. • Moreover, to ensure the sterilization of Brinzolamide during manufacturing and finished product, gamma sterilization from Pa□istan Radiation Services Lahore and micro-filtration techniques are used.
3.2.P.5.1	Submitted drug product specifications does not include tests of boric acid identification, boric acid assay, particle size, as recommended by the literature of innovator product.	Boric acid has been as preservative in the formulation. The contents of boric acid were controlled by performing preservative effectiveness studies throughout stability studies.
3.2.P.5.2	Submitted analytical method determines Brinzolamide &	Firm has submitted that individual chromatograph of Brinzolamide and

	Brimonidine Tartrate simultaneously. Clarification shall be submitted regarding the identification of peak for each drug substance.	Brimonidine, Blank, Excipient only and Product were submitted in Specificity (Analytical Method Validation File-Specificity). Now chromatograph with individual peaks of Brinzolamide & Brimonidine, Blank, Excipient only and product is attached for your kind reference.
3.2.P.5.3	Peak purity parameter has not been assessed in the performance of specificity parameter.	Firm has submitted chromatogram for peak purity parameter.
3.2.P.5.6	Justification of specifications shall be provided.	Firm has submitted that a detailed comparative study of Brinza Eye Drops and Simbrinza Eye Drops were performed. A comparative analysis report was attached in PS. Tests were performed according to the testing data provided by the innovator in literature and USP Chapter 771.
3.2.P.8	• Stability studies have not been conducted at temperature & humidity conditions recommended for the semi-permeable container closure system. • Test of particle size has not been performed during stability studies.	• • Firm hassubmitted that hat Stability study conducted according to ICH Quality Guidelines. Water loss determination data has been submitted along with SOP for Water Loss Determinationin stability study. • Firm has submitted that first of all particle size is controlled at the level of drug substance and secondly at drug product stage it is controlled under pressure of finished product by carefully examining the product for coagulation and agglomeration throughout stability.

Decision of 320th meeting: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that the firm shall revise product specifications for inclusion of test of "Boric Acid Assay"and shall perform the said assay on commercial batches and shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.**

Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	**Empagliflozin:** Stability study conditions: Real time: 30°C ± 2°C, RH: 65% ± 5% for 24 months Accelerated: 40°C ± 2°C, RH: 75% ± 5% for 6 months

		Batches: (20160606, 20161017, 20161219)
		Metformin HCl: Stability study conditions: Real time: 30°C ± 2°C, RH: 65% ± 5% for 48 months Accelerated: 40°C ± 2°C, RH: 75% ± 5% for 6 months Batches: (MEF/1410027, MEF/1410028, MEF/1410029)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	The Firm has performed pharmaceutical equivalence and comparative dissolution profile of their developed formulation Soglu-Met 5mg/850mg Tablet (B # ST21A009) with innovator product Synjardy 5mg/850mg Tablet (B #902007) of M/s Boehringer Ingelheim Pharma. in pH 1.2, acetate buffer pH 4.5 and phosphate buffer pH 6.8. The results of CDP showed that release profile of both test and comparator products were comparable. **The values for f2 factor are in the acceptable range.**
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	**Empagliflozin:** FUXIN LONG RUI PHARMACEUTICALCo.,Ltd. Fluoride industrial park, Fuxin city, Liaoning province, 123000, China. **Metformin HCl:** AARTI DRUGS LIMITED Plot No. 211 - 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat. INDIA.396155		
API Lot No.	Empagliflozin: E-20190920-D02-E06-01 Metformin HCL: MEF/10030953		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×14's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	ST21A009	ST21A010	ST21A011
Batch Size	3000 tab	3000 tab	3000 tab
Manufacturing Date	01-2021	01-2021	01-2021

Date of Initiation	28-01-2021	28-01-2021	28-01-2021
No. of Batches	03		
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: The HPLC software is 21 CFR compliant. The firm has provided data loggers with stability chambers.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Empagliflozin: The firm has submitted GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Fuxin Food and Drug Administration. The certificate is valid till 23-08-2023 Metformin HCl: The firm has submitted GMP certificate for AARTI Drugs limited issued by food & drug Control Administration. The certificate is valid till 19-03-2023	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Empagliflozin: The firm has submitted attested copy of invoice for the import of empagliflozin (1.5 Kg, Invoice # HN19120501-H) dated 05-12-2019 and attested copy of ADC (I&E) DRAP, Islamabad dated 10-01-2020 Metformin HCL: The firm has submitted attested copy of invoice for the import of Metformin Hcl (1000 Kg, Invoice # EXP/302/20-21) dated 15-5-2020. And attested ADC (I&E) DRAP, Islamabad dated 05-08-2020.	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail reports have been submitted for HPLC analysis of stability studies.	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.	
Remarks of Evaluator:			
Decision of 320th meeting: Approved with Innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**			

• **Registration Board further advised the firm to follow the relevant guidelines for preparation, standardization and usage of standard for testing of drug substance and product.**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: The HPLC software is 21 CFR compliant. The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Empagliflozin: The firm has submitted GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Fuxin Food and Drug Administration. The certificate is valid till 23-08-2023 Metformin HCl: The firm has submitted GMP certificate for AARTI Drugs limited issued by food & drug Control Administration. The certificate is valid till 19-03-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Empagliflozin: The firm has submitted attested copy of invoice for the import of empagliflozin (1.5 Kg, Invoice # HN19120501-H) dated 05-12-2019 and attested copy of ADC (I&E) DRAP, Islamabad dated 10-01-2020 Metformin HCL: The firm has submitted attested copy of invoice for the import of Metformin Hcl (1000 Kg, Invoice # EXP/302/20-21) dated 15-5-2020. And attested ADC (I&E) DRAP, Islamabad dated 05-08-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail reports have been submitted for HPLC analysis of stability studies.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr.#	Section#	Observation	Firm's response
1.	**3.2.S.4.2**	Drug substance analytical procedure of Metformin HCl is not as per the latest monograph of USP for Metformin HCl.	Revised analytialprocedure has benesubmitted as per latest monograph of USP for Metformin HCl
2.	**3.2.S.4.3**	Analytical method verification studies shall be submitted from M/s Global Pharmaceuticals for Metformin HCl for the analytical method fo latest monograph of USP.	Analytical method verification studies have been submitted from M/s Global Pharmaceuticals for Metformin HCl as per latest monograph of USP.
3.	**3.2.P.5.1**	• Submitted drug product specifcations does not include test of content uniformity for Empagliflozin. • The USFDA review documents of innovator product i.e., Synjardy declares the dissolution specifications as "NLT Q in 20 minutes", while you have applied dissolution limits of NLT Q in 30minutes. Justification shall be submitted in this regard.	• Firm has submitted as under: "We have performed ontent uniformity at finished dosage form but do not include this in the stability study report. Now firm has submitted analytical record for the content uniformity testing a finished stage and at 15 month time point." • Empagliflozin & metformin HCl are bCS class III drugs (rapidly dissolving drugs) and for rapidly dissolving drugs FDA guideline "Guidance for industry:- Dissolution testing and Acceptance criteria for immediate release solid oral dosage form drug products containing high solubility drug substances menton the dissolution specification NLT 80% after 30 mminutes. We performed and submitted the dissolution testing data with time point i.e., 05,10,15,20& 30 minutes at initial "Finshed stage" and at 6th month time point."
4.	**3.2.P.6**	Date of re-standardization has been declared as 24-01-2021 for the working standard of Empagliflozin, whereas stability study analysis has also been	Firm has submitted re-standardization record for the working standard of Empagliflozin.

		performed subsequent to this date.	

Decision of 320th meeting: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further advised the firm to follow the relevant guidelines for preparation, standardization and usage of standard for testing of drug substance and product.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Ertugliflozin-LPGA & Sitagliptin are not present in any Pharmacopoeia and the firm has followed manufacturer's specification. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	**Ertugliflozin-LPGA:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real

		time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months Batches: (D84-161201, D84-161202, D84-170101) **Sitagliptin:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH. Batches: For Accelerated studies (M-20190127-D01-M06-06, M-20190316-D02-M06-07, M-20190127-D01-M06-08) For Real time studies (M-20190127-D01-M06-01, M-20181222-D06-M06-08, M-20181222-D06-M06-09)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	CDP studies against the reference product of Steglujan tablets, in three dissolution mediums has been submitted with acceptable level of f2 results (f2 ≥ 50).
	Analytical method validation/verification of product	Firm has submitted analytical method validation data

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Yes

Remarks of Evaluator[II]:

Sr.#	Section#	Observation	Firm's response
1.	1.6.5	Valid GMP certificate of the manufacturer of Ertugliflozin L-PGA shall be submitted.	Submitted from Changzhou Pharmaceutical Profession Association wghich is not relevant regulatory authority.
		Ertugliflozin L-Pyroglutamic acid	
2.	3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Pro duct manufacturer is required. • Submitted specifications and analytical procedure by drug substance manufacturer describes the test for content of "Ertugliflozin L-pyroglutamic acid, whereas the Innovator's product literature recommends test of "Ertugliflozin potency" in the drug substance specifications. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product	• Submitted. • As per the manufacturer: Ertugliflozin potency = Ertugliflozin LPGA Assay - LPGA content. So, they have shown only two test results of them on the COA, instead of all three, because the third outcome can be calculated out. • Analytical method verification report has been submitted. *As per submitted analytical record various chromatograms have been analysed with retention time of 20 minutes whereas analytical procedure recommends gradient run time of 45 minutes.* • Submitted. • Firm has submitted Revised CoA with Ertugliflozin content is submitted.

		manufacturer shall be submitted. • Analytical record i.e., Raw data sheet, FTIR spectrum, chromatograms etc., shall be submitted for the analysis of 'Ertugliflozin L-pyroglutamic Acid' performed by M/s High-Q Pharmaceuticals. • COA from drug substance manufacturer does not declare the "Ertugliflozin potency" as recommended by the innovator product. • COA from of drug substance from drug product manufacturer does not include test of L-Pyroglutamic acid content.	• Revised CoA of material with test of L-pyroglutamic acid content is submitted. The test for L-PGA was performed after the submission, considering that theoretical factor calculated using molecular weights can serve the purpose for small size trial batches. This test has now been performed on the retention sample of API and included in the specification for routine testing of API for commercial batches of the product
3.	3.2. S.5	• COA of reference standard of L-Pyroglutamic acid shall be submitted. • Submitted COAs of reference standard of Ertugliflozin L-PGA does not mention any manufacturing date, validity date & batch no. • Submitted COA of reference standard does not declare the content of L-pyroglutamic acid.	• CoA of Reference standard of L-pyroglutamic acid is submitted. • Updated CoA of Reference standard with L-pyroglutamic acid content is attached. Batch number: B34-191001 Mfg Date: Oct 26, 2019 Retest Date: Oct 25, 2021
4.	3.2. S.7	Justification shall be submitted for not performing test of L-PGA content throughout the stability studies.	Firm has submitted declaration from drug substance manufacturer: On the stability data of Ertugliflozin L-PGA, L-PGA content is only shown in month 0 and month 24, because L-PGA is very stable, and doesn't degrade within 3-4 years, so we tested it every two years in the stability studies initially. If customer insist to have L-PGA content data in each column, then we'll add the test results from next stability batch.
Sitagliptin phosphate monohydrate			
5.	3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity,	Firm has submitted specifications, analytical procedure, analytical method verification report, analytical record for Drug substance analysis and COAs.

		accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. • Analytical record i.e., Raw data sheet, FTIR spectrum, chromatograms etc., shall be submitted performed by M/s High-Q Pharmaceuticals. • Provide Certificate of Analysis (CoA) of relevant batch(es) of Drug Substance performed by Drug substance manufacturer used during product development and stability studies.	
6.	3.2.S.5	• Submitted COA of working standard declares the expire date as 24-07-2018, whereas the drug substance analysis has been performed subsequent to this date.	Revised COA of working standard has been submitted with expiry date of 14-02-2023.
7.	3.2.S.7	• Long term stability studies have been submitted for 6 months only.	Long term stability data as per Zone IVa conditions has been submitted for 24 months.
8.	3.2.P.1	• Excipients used in the proposed formulation are different form that used by the Innovator. Justification shall be submitted in this regard. • Clarification shall be submitted regarding composition of "Quick tab" used in the formulation.	• Firm has referred to drug excipient compatibility study as justification. • Quick Tab is a pre-mix used as Binder, filler and disintegrant.
9.	3.2.P.3.5	Sampling plan of compression stage, presented in the submitted process validation protocol, does not include test of content uniformity. Justification shall be submitted in this regard.	Revised Process validation protocol submitted.
10.	3.2. P.5.1	• Drug substance specifications have been submitted instead of the drug product specifications. • Dissolution parameters of apparatus (paddle instead of basket), dissolution medium (v/0.1N HCl instead of pH 4.5acetate buffer) & dissolution volume (1000ml instead of 900ml), proposed in analytical procedure, are different from that recommended by the US FDA in the innovator's product	• Firm has submitted drug product specifications. • There was a typo error; the actual paddle speed is 50 rpm as mentioned in Comparative Dissolution Profile documents (Biowaiver Studies Protocol), already submitted. The testing was done following that procedure. • The medium (0.1N HCI pH 1.2) was selected as both ertugliflozin and sitagliptin

		literature review. Justifications shall be submitted in this regard. • You have applied Paddle speed = 100 rpm in dissolution parameters. You are advised to justify the speed of paddle apparatus with reference to USP general chapter <1092> (The Dissolution Procedure; Development and Validation). • Submitted analytical procedure does not include test of content uniformity.	meet the requirements of BCS Class I drug due to high solubility across physiological pH range and high permeability. Ertugliflozin / sitagliptin tablets display rapid in vitro dissolution characteristics over the pH range of 1.2 — 6.8. • The control methods of Ertagsa 5mg/100 mg & Ertagsa 15 mg/100 mg have been corrected to show Paddle speed as 50 rpm and Dissolution volume as 500 ml. The analysis of commercial batches shall be carried out according to the revised methods for Ertagsa 5mg/100mg & 10mg/10mg Tablets. The actual testing of trial batches were carried out with 1000 ml dissolution volume instead of 500 ml but since both the APIs are high solubility and the Tablets have low disintegration time, therefore, it can be assumed that dissolution results would not be significantly impacted. • Dissolution medium and volume in revised drug product method is still not as per US FDA.
11.	3.2. P.5.4	Test of content uniformity by way of Assay has not been performed during batch analysis.	Firm ha submitted performance on the retention samples of all the three trial batches for content uniformity. The CoAs along with related chromatograms and work sheets
12.	3.2. P.6	• Dates of standardization of working standard of Sitagliptin & Ertugliflozin are April & August 2020, whereas the product analysis has also been performed prior to these dates. Clarification shall be submitted regarding reference standards applied for the analysis of product samples, performed prior to the date of standardization of working standards. • Submitted COA of working standard of Ertugliflozin-LPGA does not declare the content of LPGA and also the potency in	Sitagliptin USP, batch no. M-20191228-D07-M06-04, was received with expiry date as 14/02/2023. Same was standardized on 16/03/2020 against USP Reference Standard (Lot # R07630) and declared as working standard since the results were comparable with the RS. The re-standardization date given was 15/03/2021. Same lot was again tested on 27/07/2020 due to malfunctioning of the refrigerator, in which reference and working standards are stored, and since no change in potency and water contents observed therefore its re-standardization date revised accordingly as 26/07/2021 with no

		terms of Ertugliflozin has not been determined.	change in potency. In the documents submitted, the revised CoA was attached, by mistake. Ertugliflozin, batch no. D-84-191001, was received on 29/10/2019. Same was standardized on 17/01/2020 against Working Standard (B34-191001) supplied by the manufacturer. This lot was also qualified as Working Standard with re-standardization date as 16/01/2021. Same lot was again tested on 17/08/2020 due to consumption of entire quantity of working standard retained. A fresh sample was taken from the available material of batch no. D-84-191001 and standardized with re-standardization date as 16/08/2021 with no change in potency. In the documents submitted, the revised CoA was attached, by mistake. • Reviewed COA of working standard has been submitted.
13.	3.2. P.8	• Submitted commercial invoice for Sitagliptin phosphate monohydrate does not reveal the name of manufacturer, hence Form 3 & 7 shall be submitted. • Justification shall be submitted for applying the theoretical factor of LPGA, instead of applying the actual potency of Ertugliflozin in working standard.	• Firm has submitted Form 3 & Form 7 for the imported batch of Sitaglitpin form M/s Fuxin Long Rui., China. • Theoretical factor was used as the actual contents of L-pyroglutamic acid were not determined at that time. The API has been retested (on 15/02/2022) in order to determine the potencies of Ertugliflozin L-PGA, Ertugliflozin and L-PGA separately to see the impact on quantity of Ertuglifolzin L-PGA used in trial batches. The difference between the theoretical and actual L-PGA contents as declared in the CoA from the supplier, is not that much that could significantly impact the quantity of Ertugliflozin L-PGA dispensed for small size trial batches. In commercial batches the quantity of Ertugliflozin L-PGA per batch shall be calculated on the basis of actual %age of L-PGA content in the API

14.		• You are advised to justify the quantity of "Ertugliflozin-LPGA" dispensed for formulation of each trial, with reference to the %age content of "Ertugliflozin" in the drug substance of "Ertugliflozin-LPGA".	According to the data of potency determined in COA of Ertugliflozin-LPGA, the difference between quantity dispensed and the actual quantity that should have been dispensed, is nominal, however in commercial batches the quantity of Ertugliflozin L-PGA per batch shall be calculated on the basis of actual %age of L-PGA content in the API in order to achieve the desired label claim of Ertugliflozin.

Decision: Registration Board deliberated that the selected dissolution parameters for the applied products including apparatus, dissolution medium, volume etc are different from the parameters described in the literature review of the product approved by US FDA. Therefore, the Board decided to defer the applications for Ertagsa 15/100 mg Tablet & Ertagsa 5/100 mg Tablet for submission of of stability studies data of two batches of each strength at accelerated and long term conditions for initial and 1 month time point, wherein dissolution tests shall be performed as per the dissolution paarmeters recommended by US FDA in the literature review of innovator drug product i.e, Steglujan tablet.

77.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Islam Pharmaceuticals 7KM Pasrur Road Sialkot**
	Name, address of Manufacturing site.	M/s Islam Pharmaceuticals 7KM Pasrur Road Sialkot
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F.1-19/2014-Lic. from Secretary CLB for issuance of DML, declaring availability of "tablet general section".
	Dy. No. and date of submission	Dy. No 23837 dated 31-08-2021
	Details of fee submitted	Rs.30,000/- dated 04-08-2021
	The proposed proprietary name / brand name	**Celezib 200mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Celecoxib ……200mg
	Pharmaceutical form of applied drug	Clear and colorless solution filled in clear glass ampoules with red and blue ACF rings and blue color OPC mark
	Pharmacotherapeutic Group of (API)	Non-steroidal Anti inflammatory (NSAID)

	Reference to Finished product specifications	BP
	Proposed Pack size	20's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Celecoxib 200 mg capsules, hard by M/s Macleods Pharma UK Limited, approved by MHRA of UK.
	For generic drugs (me-too status)	Celbex 200mg capsule by M/s Getz Pharma (Pvt) Limited Reg. No. 028693
	GMP status of the Finished product manufacturer	New DML was granted after inspection vide letter No. F. 1-19/2014-Lic (Vol-1) Dated: 29-08-2018, including Capsule general section
	Name and address of API manufacturer.	M/s AARTI DRUGS LIMITED, Plot No. E-21/22, M.I.D.C, Tarapur, Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5% RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 months Batches:(KM-1102215, KM-1102315, KM-1102415)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Comparative dissolution profile has been established against the Clebrex capsule of M/s Pfizer in three buffer mediums i.e., ph1.2, pH 4.5 & ph 6.8 with acceptable results.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Manufacturing Date	12-2021	01-2021	01-2021
Date of Initiation	02-2021	02-2021	02-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document. (New Section)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.14850/2020/DRAP-AD-VIII (I&E) dated 16/10/2020 is submitted wherein the permission to import different APIs including for the purpose of test/analysis and stability studies is granted. • AirWay Bill No. 176-26046624 Dated: 21/12/2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	• HPLC system digital log has been submitted excluding for the intial time point analysis.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.6.5	Valid GMP certificate issued by the relevant regulatory authority shall be	Submitted GMP certificate is of another site of AARTI drugs ltd (PLOT NO. W-60(B)W-61(B)W-

	submitted for the drug substance manufacturer.	62(B)W-71(B)W-72(B)W-73(B),MIDC, Tarapur Thane, India), instead of the site (Plot No. E-21/22, M.I.D.C, Tarapur, Maharashtra, India) from which drug substance has been imported.
3.2.S.4.2	• Submitted drug substance analytical method from M/s Islam pharma does not include details of system suitability parameters in Assay test.	Revised analytical method containing details of system suitability parameters has been submitted.
3.2.S.4.3	• Drug substance analytical method from M/s Aarti Drugs, declare retention time of Celecoxib at about 27 minutes, whereas the Analytical method verification report submitted from M/s Islam Pharma declares the retention time as about 16 minutes. Clarifications hall be submitted in this regard.	USP method for celecoxib do not mentions/declare the retention time of celecoxib, the retention time may vary depending on HPLC system, column condition and source of chemicals.
3.2. S.4.4	• The COA of drug substance manufacturer declares compliance with USP, whereas COA of drug product manufacturer declares the compliance with BP monograph. Clarification shall be submitted in this regard. • Analytical record for the drug substance analysis performed by M/s Islam Pharma shall be submitted.	• As monograph for celecoxib API is available in both USP and BP but drug product is only available in BP, so we M/s Islam pharma chosen the BP method and specifications. Method of analysis and specification for celecoxib API are same in both USP and BP monographs. • Analytical record for the drug substance analysis has been submitted.
3.2.S.6	Drug substance is of USP standard whereas reference standard of BP grade has been submitted.	As the drug substance is available in both USP and BP and have same specifications and analytical procedure. Drug product is available only in BP so we chosen BP standard and used it for analysis.
3.2.P.2.2.1	Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted.	• Firm has submitted Pharmaceutical equivalence report against the celebrex capsule of M/s Pfizer, wherein instead of dissolution test of batch relase, CDP study reusulst have been submitted. Submitted chromatograms declares file created date i.e., 18-02-2021 which is subsequent to the acquired date mentioned on each chromatogram i.e., 21-01-2021.

3.2.P.3.5	Submitted process validation protocol does not include sampling plan.	Process validation protocol including sampling plan has been submitted.
3.2.P.5.3	Submitted analytical method verification studies include details of "Montisim tablet."	In method verification report, under section C (Method precision), by a typographic mistake "montisim tablet" was written which is corrected
3.2.P.8.3	• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Raw data sheets for complete stability studies shall be submitted. • Submitted analytical record does not reflect the performance of system suitability test during Assay analysis as recommended by BP monograph of Celcoxib capsules. • Stability studies data for 6th month time point shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	• Firm has submitted copy of commercial invoice# SAMP/1002//20-21-23/10/2020 frrom M/s AARTI drugs ltd., in the name of islam Pharma for the 2.5 Kg of Celecoxib. The submitted invoice is not attested by DRAP I&E office. • Firm has also submitted copy of Air WayBill. • 6th month data of stability studies has been submitted. • Firm has performed system suitability test by establishing the RSD of standard replicates, while BP monograph recommends performance of system suitability with the help of impurity standards. • Record of digital data logger has been submitted.

Decision of 320th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.1	Differential fee of Rs. 10,000/- shall be submitted as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Differential fee of Rs. 10,000/- has been paid vide deposit slip# 94806947378 dated 20-06-2022
1.6.5	Valid GMP certificate issued by the relevant regulatory authority shall be submitted for the drug substance manufacturer.	Firm has submitted a document for " Written confirmation for active substances exported to EU' instead of GMP certificate, Zheijiang Food & Drug Administration.
3.2.S.4.2	Submit drug substance analytical record performed by M/s Islam pharma.	• Submitted • Firm has submitted Dissolution test performance in continuation to

		Pharmaceutical equivalence studies.
3.2.P.2.2.1	• In Pharmaceutical equivalence studies dissolution test has not been performed as per the USP monograph of Clarithromycin tablets. • In Pharmaceutical equivalence studies submitted chromatograms of initial time point analysis declares file created date i.e., 18-02-2021 which is earlier to the acquired date mentioned on each chromatogram.	• Laptop attached to the HPLC stopped working due to some fault and its hard disc was corrupted in Feb-2021 due to which new laptop was installed with HPLC. Previous data was recovered and transferred on 18-02-2021 to new laptop. • A new set of chromatograms print out for DRAP submission was taken after above incident so the chromatograms are showing file created date as 18-02-2021 (which is date if saved data transfer to new laptop) after the acquired date 29-12-2020.
3.2.P.3.2	• Justify the proposed quantity of Clarithromycin of 514.668mg per tablet in the batch formula against the label claim of 500mg per tablet. • A batch formula for proposed commercial batch size shall be provided	• Firm has justified proposed quantity against the actual potency of drug substance determined on as is basis. • Commerical batch formula is submitted.
3.2.P.3.5	Submitted process validation protocol does not include sampling plan.	Revised process valiation protocol has been submitted.
3.2.P.8.3	➢ Submitted chromatograms of initial time point analysis declares file created date i.e., 18-02-2021 which is earlier to the acquired date mentioned on each chromatogram. Clarification shall be submitted in this regard. ➢ Justification shall be submitted for calculating dissolution results based upon one value for standard peak area. ➢ Following shall be submitted: ➢ Compliance Record of HPLC software 21CFR & audit trail reports on product testing ➢ Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	• Laptop attached to the HPLC stopped working due to some fault and its hard disc was corrupted in Feb-2021 due to which new laptop was installed with HPLC. Previous data was recovered and transferred on 18-02-2021 to new laptop. • A new set of chromatograms print out for DRAP submission was taken after above incident so the chromatograms are showing file created date as 18-02-2021 (which is date if saved data transfer to new laptop) after the acquired date. • All of three batches on stability studies were tested on same day at each time point so only one standard solution for dissolution was injected and calculations were made against same one standard value.

			• HPLC system digital log has been submitted excluding for the intial time point analysis. • Record of Digital data logger for temperature and humidity monitoring of stability chamber is submitted. • Firm has submitted copy of commercialinvice which is not attested by DRAP I&E office.

Decision: Deferred for following:

- **Submission of valid GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority.**
- **Onsight verification for the claim of the firm regarding disparity between date of acquisition & date of file creation in the submitted chromatograms.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate Nantong Chemical & Medical Industry Association has been submitted valid upto 05-05-2022.
3	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.5.6	The said section declares Pharmacopoeial reference as In-Hose, whereas BP monograph is available for applied product.	Since the BP monograph of the Rivaroxaban was not available at the time of Product Development So the specification and analytical method follows In-House standard as per FDA guideline and same method has been validated. Both the Raw material and Product is Included in recent volume of BP
1.6.5	Valid GMP certificate issued by the relevant regulatory authority shall be submitted for the drug substance manufacturer.	GMPcertificate from nanytong chemical & medical Industry Association valid till 21-02-2026 has been submitted.
3.2.S.4.1	• The specifications and analytical procedure submitted from drug substance manufacturer is of In-house standard whereas BP monograph is available for applied formulation. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / by Drug Product manufacturer is required.	• Since the BP monograph of the Rivaroxaban was not available at the time of Product Development So the specification and analytical method follows In-House standard FDA guideline and same method has been validated Analytical method validation studies were performed for In-House method as the BP Monograph was not available for applied formulation till its development and submission.
3.2.S.4.3	Analytical method verification studies shall be submitted for BP monograph of Rivaroxaban, performed by M/s Novamed.	Analytical method validation studies were performed for In-House method as the BP Monograph was not available for applied formulation till its development and submission
3.2.S.5	COA of primary / secondary reference standard, applied by M/s Novamed for drug substance analysis, including source and lot number shall be provided.	COA of working standard submitted.
3.2.P.2.2.1	Dissolution test has not been performed in Pharmaceutical equivalence studies.	Comparative dissolution profile against the Innovator Xeralto was performed and Pharmaceutical equivalence was established Through CDP and rest of the testing parameters are covered under PE testing
3.2.P.5.1	• Drug product specifications and analytical procedures have been referred as In-house , where as BP	• BP Since the BP monograph of the Rivaroxaban was not available at the time of Product

	monograph is available fro "Rivaroxaban tablets". • BP monograph of Rivaroxaban tablets specify limits of Assay test as 95.0% - 105.0%, whereas firm has applied limits of 90.0% - 110.0%. Justification shall be submitted in this regard. • Test of content uniformity has not been included in the drug product specifications.	Development So the specification and analytical method follows In-House standard FDA guideline and same method has been validated. Both the Raw material and Product is Included in recent volume of BP. • Since the BP monograph of the Rivaroxaban was not available at the time of Product Development So the specification and analytical method follows In-House standard FDA guideline and assay limit was set as 90-110% and same method has been validated. • The Content uniformity has been performed and results are submitted.
3.2.P.5.2	• Submitted analytical procedure for Assay & Dissolution test is not as per the BP monograph of Rivaroxaban tablet. • Limits for dissolution test mentioned in analytical procedure (NLT 80% (Q) in 45 minutes)) is not as per the BP monograph (NLT 80% (Q) in 30 minutes)).	• Since the BP monograph of the Rivaroxaban was not available at the time of Product Development So the specification and analytical method & Dissolution follows In-House standard based on FDA guideline and same method has been validated. • The limits for dissolution is as per In-house Standard since the BP monograph was not available at the time of its development and submission.
3.2.P.5.3	Analytical method verification studies shall be submitted for BP monograph of Rivaroxaban tablet, performed by M/s Novamed.	Analytical method validation studies were performed for In-House method as the BP Monograph was not available for applied formulation till its development and submission.
3.2.P.5.4	• Submitted batch analysis record does not include test of content uniformity. • Submitted batch analysis record reflects performance of Dissolution test with specifications different from BP monograph.	• The Content uniformity has been performed and results are submitted. • The dissolution test is performed as per In-house standard based on FDA guideline as the BP method is not available at the time of its development.
3.2.P.8.3	• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	Copy of commercial invoice# CY20121 attested by AD DRAP I&E Lahore dated 30-07-2020fo

	• Stability studies have not been conducted according to the BP monograph of Rivaroxaban Tablet. Justification shall be submitted in this regard.	rimport of 1 Kg of Rivaroxaban ha sbeen submitted. Since the BP monograph of the Rivaroxaban was not available at the time of Product Development So the specification follows In-House standard based on FDA guideline and stability studies performed accordingly.

Decision of 320th meeting: Registration Board approved Rivamed Tablet 20 mg, Rivamed 15mg Tablet, Rivamed 10mg Tablet & Rivamed 2.5mg Tablet with BP specifications.

- **The firm shall submit fee of Rs. 7500/- for each strength for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(ZSAP171104,ZSAP171105,ZSAP171106)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Eliquis Tablet 2.5mg** by performing quality tests (Identification, Assay, Dissolution, pH). **CDP** was applicable and has been submitted.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity, robustness and Limit of Quantification.

STABILITY STUDY DATA	
Manufacturer of API	**Name**: Changzhou Pharmaceuticals Factory **Address**: 518 Laodong East Road,Changzhou,Jianngsu Province, China.
API Lot No.	AP191204

Description of Pack (Container closure system)	Alu-PVC blisters, each containing 10 Green colored, round shape, biconvex, film coated tablets, Plain on both sides One side of blister is printed with labeling specification. After primary packing blister is packed in specific hard card unit carton along with Patient information leaflet		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	**RD/PR20-001/T1/S1**	**RD/PR20-001/T1/S2**	**RD/PR20-001/T1/S3**
Batch Size	5000 tablets	5000 tablets	5000 tablets
Manufacturing Date	08-2020	08-2020	08-2020
Date of Initiation	24-08-2020	24-08-2020	24-08-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted copy of Last inspection Report conducted on 24/01/2018 (Daclatasvir), 06/03/2017 (Sofosbuvir)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by CFDA, People's republic of china Changzhou Jiangsu valid till 21/10/2021
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.6139/2020/DRAP-AD-CD(I&E) dated 15/05/2020 is submitted wherein the permission to import API Apixaban for the purpose of test/analysis and stability studies is granted. AD I&E (Lahore) Attested invoice CYI20200 Dated.28/05/2020 is also submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.6.5	Valid GP certificate issued by relevant regulatory authority shall be submitted, for drug substance manufacturer.	Firm has submitted GMP certificate valid upto 15-11-2024, issud by the Jiangsu Changzhou Drug Administration, which is not a state

		or provincial level regulatory authority.
3.2.P.2.2.1	Dissolution test has not been performed in Pharmaceutical Equivalences studies. Clarification shall be submitted for declaring dissolution results above 85% in CDP studies, without using surfactant i.e., SLS in dissolution medium.	• CDP againt the Innovator was performed and Pharmaceutical equivalence was established through CDP and rest of the testing parameters are covered under PE testing. • Surfactant SLS is mistakenly not mentioned n CDP reports while it is used in dissolution medium, which is evident from testing method.
3.2.P.5.1	• Innovator product approved by US FDA has recommended dissolution limits of NLT Q in 30minutes whereas firm has proposed dissolution time of 45 minutes. • Test of content uniformity has not been included in finished drug product specifications.	• Firm has referred to the EM Aassesment report for Apixaban tablet wherein resulst of 80% dissolved in 45 minutes have been mentioned for the coparative profile of refernec eand test product, whereas observation was made regarding dissolution test limits recommended for batch release by US FDA for innovator product. • Firm has submitted results for the performance of content uniformity test.

Decision of 320th meeting: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

85.	Name, address of Applicant / Marketing Authorization Holder	**M/s Novamed Pharmaceuticals(Pvt.)Ltd Lahore**

Manufacturing Date	05-2020	05-2020	05-2020
Date of Initiation	16-05-2020	16-05-2020	16-05-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. **IBRUO** (Ibuprofen) 800mg/8ml injection which was presented in 289th meeting of the registration board & hence approved & registered by registration board Date of inspection: 28th January 2019 The inspection report confirms following points • The HPLC software is 21CFR Compliant • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled

		and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate no. JS20191012 of M/s Jiangsu Hengrui Medicine Co., Ltd.is valid until 27/02/2024 issued by Jiangsu Drug Administration, China Food and Drug Administration
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice#19QN265 dated 14-2-2020 with received quantity of 4gm) for the purchase of Dexmedetomidine HCl from M/s Jiangsu Hengrui Medicine Co., Ltd. with attestation of DRAP dated 27-02-2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.P.2.2.1	Pharmaceutical equivalence studies have not been performed against Innovator.	• As innovator product is not available in Pakistan, therefore, we tried to arrange the innovator product from outside the Pakistan, however since this product is only used in Hospitals/Institutions before and/or during surgical and other procedures and therefore not available at Pharmacy level; we conducted, comparative analysis with the comparator product •As per the DRAP's "Frequently Asked Questions" uploaded on its official website, it has been permitted by the Authority that in case of non-availability of the innovator pack, comparative analysis can be performed with the brand leader/generic product (Reference document attached) •It is further submitted that as per WHO technical report Series No. 902, 2002: "If the innovator product is not available on the local market, pharmaceutical companies should obtain from the market a product that is the best representative innotao rproduct fro

		mth epoint of view of its quality, safety & efficacy." Hence, due to non-availability of the innovator pack in the local market, we conducted the comparative analysis with comparator product .i.e. PRECIDEX (Dexmedetomidine) 100mcg/ml Injection (Reg. No. 088249} being manufactured by M/s. Brookes Pharma, Karachi
3.2.P.5.2	Exact Limits of Endotoxin test shall be mentioned instead of referring to the general USP chapter	Firm has submitted revised test method with numerical limits of Endotoxin test.
3.2.P.5.4	Submitted COA does not include performance of test of "Fill volume".	Firm has submitted revised COA indicating the extractable volume with declaration that we have performed this test however was not mentioned in the COA since it's an in-process test.

Decision of 320th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Evaluation by PEC:

- The applied formulation to be manufactured by M/s Gray's Pharmaceuticals, Rawat have already been granted approval vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022. The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	Trophin Injection 1 gm IV/IM later approved as Trophin Injection 1 gm IV
Batch No. of drug product	124, 125, 126
Case No.	3
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.
- **Firm has applied for both IV/IM injection however the data of contract manufacturer i.e. M/s Gray's Pharmaceuticals already considered and approved in 316th meeting was for 1gm IV Injection.**

Decision of 320th meeting: Approved with IV route of administration.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after on-site inspection of capacity assessment of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad, for the manufacturing & Quality control facility.**

	For generic drugs (me-too status)	Topcef Injection of Ceftriaxone Sodium by Pride Pharmaceuticals 025876
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 5-5-17, valid upto 4-5-18.
	Name and address of API manufacturer.	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40 ^{O} ± 2 ^{O} C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2 ^{O} C / 65% ± 5% RH for 36 months. (Batch No. 60155GJ81H-C, 60156GJ81H-C, 6015GJ81H-C)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence against the product Oxidil 250mg Injection IV.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China.		
API Lot No.	0151NJ81HE		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18 & 24 (Months)		
Batch No.	103	115	120
Batch Size	5,000 packs	5,000 packs	5,000 packs
Manufacturing Date	10-2019	05-2020	06-2020
Date of Initiation	09-10-2019	05-05-2020	04-06-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China. issued by State food and drug administration china, valid Up to 5-6-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice#JTRF210117-MQ)

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied formulation to be manufactured by M/s Gray's Pharmaceuticals, Rawat have already been granted approval vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022. The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	Trophin injection 250mg IV
Batch No. of drug product	103, 115, 120
Case No.	7
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision of 320th meeting: Approved with IV route of administration.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after on-site inspection of capacity assessment of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad, for the manufacturing & Quality control facility.**

89.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Quaper Pharmaceuticals Plant 26-A Small Industrial Esatte Lahore Road Sargodha**
	Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 26-06-2021 is submitted.
	GMP status of the firm	**Nicholas pharma:** Firm has submitted copy of GMP certificate dated 25-02-2020 issued on the basis of inspection dated 28-01-2020
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML No 000886 of M/s Nicholas Pharma Islamabad dated 29-08-2018 specifying dry powder injection (carbapenem) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 27303 dated 04-10-2021
	Details of fee submitted	Rs.30,000/- dated 27-09-2021
	The proposed proprietary name / brand name	**Q-NEM 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……500mg (blended with sodium carbonate)
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem500mg Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate of M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India. (Certificate# DC/A-I/WHO-GMP/2022/440) issued by Drug Control Organization Government of Rajastan valid upto 26-02-2023 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted following: • Copy of Form 5 (License to Import) dated 30-04-2019 • Commercial invoice (invoice# RALIE/19-20/003) Dated: 12-04-2019 cleared by DRAP Islamabad office dated 30-04-2019 specifying import of 20Kg Meropenem Sterile for Injection(Batch# MRPS/062/18).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have performed stability testing as per USP specifications. We have also verified the USP method. The analysis was performed using HPLC system which is 21 CFR compliant. The certificate of compliance is also submitted by the firm.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Nicholas Pharmaceuticals have already been approved by Registration Board in its 307th and 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Jinnah Pharmaceutical (Pvt) Ltd. 13-Km, Lahore Road Multan
Manufacturer firm	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Brand Name	MEROCIN 500mg Injection
Batch No. of drug product	P5001 (8,600 vials), P5002 (8,600vials), P5003 (10,630 vials)
Case No.	608
Registration Board meeting	316th meeting of Registration Board held on (15-18 March, 2022)

-

Decision of 320th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4.2	• Drug substance analytical procedure applied by drug substance manufacturer shall be submitted. • Limits for the Content of Iron declared in the analytical procedure for Assay is not as per those submitted in drug substance specifications.	• Firm has submitted analytical procedure from drug substance manufacturer. • Revised analytical procedure has been submitted wherein limit for Assay test has been declared in term of 5age of iron.
3.2.S.4.3	Analytical method verification studies for the Assay test procedure of drug substance shall be submitted form M/s English Pharmaceuticals.	Submitted.
3.2.P.3.5	Submitted process validation protocol does not identifies Mixing stage as critical process parameter.	Firm has submitted revised process validation protocol including mixing stage as critical process parameter.
3.2.P.5.3	Analytical method validation studies for the Assay test of Iron content shall be submitted.	Firm has submitted analytical method validation studies for the titration method of Assay for drug product.
3.2.P.8	• Digital data logger record for accelerated stability chamber shall be submitted. • Dispensed quantity of Ferric carboxymaltose, during batch manufacturing shall be justified against the label claim of Iron.	Submitted. Firm has justified dispensed quantity of ferric carboxymaltose considering the %age Assay results calculated on "as is basis."

Decision of 320th meeting: Approved with Innovator's specifications and change of brand name.

	For generic drugs (me-too status)	Covam Tablets by M/s Getz Pharma
	GMP status of the Finished product manufacturer	New GMP granted on 07/10/2021 Tablet section (General & Psycotropic) approved.
	Name and address of API manufacturer.	**Amlodipine:** Amsal Chem Private Limited, A-1/401/2/3, GIDC Industrial Estate Ankleshwar - 393 002, District Bharuch, Gujarat, India **Valsartan:** Zhejiang Tianyu Pharmaceutical Co., Ltd. No.15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China. P.C.:317016
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its

		verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: **Amlodipine:** Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (13002/APL,13003/APL& 13004/APL) **Valsartan:** Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (201207301, 201207302& 201207303)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the relevant strength of **Covam Tablet** by M/s Getz Pharma by performing quality tests (Identification, Assay, Dissolution) CDP has been performed against the same brand that is **Covam Tablet** by Getz Pharma in Acid media (0.1N HCl), Acetate buffer of pH 4.5 & Phosphate Buffer (pH 6.8). The f2 value was in acceptable range.
	Analytical method validation/verification of product	Method verification studies have been submitted including justification of system suitability, specificity, linearity, accuracy, precision-repeatability.

Remarks of Evaluator[II]:

Section#	Observation	Firm's response
1.6.5	Name of manufacturing site of M/s Amsal Chem, mentioned in section 1.6.5 & 3.2.S.2.1 is different form that declared on GMP certificate.	The mentioned address in section 1.6.5 & 3.2.S.1 is of administrative office. Howver, name of manufacturer is same as mentioned on GMP certificate i.e., M/s Amsal Che, Pvt. Ltd, Mumbai, India, A-1,401,402,403 G.I.D.C industrial Estate, Ankleshwar-393002, District, Bharuch, Gujarat, India.
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	Submitted.
3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture.	Submitted.
3.2.S.5	Submit COAs of working standard used for the batch release for drug substance used in the formulation of stability batches of drug product.	Firm has submitted COA of working standard of both drug substances from relevant manufacturer.
3.2.P.2.2.1	Justification shall be submitted for not performing Comparative dissolution & Pharmaceutical equivalence studies against the innovator product.	Firm has submitted that due to unavailability of innovator sample in Pakistan, CDP was conducted against Covam tablets of M/s Getz Pharma.
3.2.P.8.3	Submitted commercial invoices for the import of drug substances are of subsequent dates from the date of manufacturing of stability batches.	Firm has now submitted following: • Amlodipine: Copy of Purchase Invoice No. AE/227/17-18 attested by AD DRAP I&E dated 21/12/2017 for batch# 17019/AB • Valsartan: Copy of Purchase invoice No. TYI18026 attested by AD DRAP I&E dated 30/01/2018.

- Comparative dissolution & Pharmaceutical equivalence studies have been performed on the recent batches manufactured by M/s Genix, instead of the stability batches.

Decision of 320th meeting: Registration Board approved Danforge-A Tablets 10mg/160mg, Danforge-A Tablets 5mg/160mg & Danforge-A Tablets 5mg/80mg.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued upon submission of Pharmaceutical equivalence & CDP studies for each strength against the innovator drug product.**

95.	**Name, address of Applicant / Marketing Authorization Holder**	**Asian Continental (Pvt) Ltd., D/32 SITE Super Highway Karachi.**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated extended-release tablet contains: Empagliflozin …….. 25mg Linagliptin …… 25 mg (as immediate release coating) Metformin HCl …… 1000mg (as extended release core)
	Pharmaceutical form of applied drug	Film-coated extended-release tablet
	Pharmacotherapeutic Group of (API)	**Empagliflozin:** sodium-glucose co-transporter 2 (SGLT2) inhibitors **Linagliptin:** dipeptidyl peptidase-4 (DPP-4) inhibitors **Metformin HCl:** antihyperglycemic drug
	Reference to Finished product specifications	Innovator
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy® XR Tablets by M/s Boehringer Ingelheim, FDA Approved.
	For generic drugs (me-too status)	Not Available
	Evidence of manufacturing facility	GMP certificate granted on basis of inspection conducted on 18.06.2020 endorses tablet general section.
	GMP status of the Finished product manufacturer	GMP certificate granted on basis of inspection conducted on 18.06.2020.

	Name and address of API manufacturer.	**Linagliptin:** **M/s Lee Pharma Limited, India** HuaiNan ShunLong Pharmaceutical CO, LTD. No. 9 Yongxing Road, Econonmic and Technological Development Development Zone, Huainan City, Anhui Province China. **Empagliflozin:** HuaiNan ShunLong Pharmaceutical CO, LTD. No. 9 Yongxing Road, Econonmic and Technological Development Development Zone, Huainan City, Anhui Province China. **Metformin Hydrochloride:** Shandong Keyuan Pharmaceutical Co., Ltd. Keyuan Street, Shandong shanghe Economic Zone, Jinan city, Shandong Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies of Drug substance	**Empagliflozin:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months **Linagliptin:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months **Metformin HCl:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Trijardy XR Tablets 25/25/1000mg approved by US-FDA. CDP has been performed against the same brand that is Trijardy XR Tablets 12.5/2.5/1000mg approved by US-FDA in Acid media (pH 1.2) , Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8)		
	Analytical method validation/verification of product	Method validation studies have submitted including, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.

Documents submitted along with stability data

<table>
<tr><td>1.</td><td>Reference of previous approval of applications with stability study data of the firm (if any)</td><td>Firm has referred to onsite inspection report of their product:

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin) & Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June , 2021.
Registration Board decided to approve registration of

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin) &Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) by M/s. Horizon Healthcare (Pvt) Ltd. Lahore. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Following two observations were reported in the report:
i. The HPLC software is 21 CFR compliant.
ii. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available.
iii. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.</td></tr>
<tr><td>2.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>• Firm had provided valid GMP (No. AH20180451) & DML (No. 20160342) Certificate of M/s HuaiNan ShunLong Pharmaceutical CO, LTD.
Issued by China Food & Drug Administration
DML Valid upto: 31-12-2025
GMP Valid upto: 07-04-2023
• Firm had provided valid GMP(No. SD 20170595) & DML (No. LU202000453) Certificate of M/s Shandong Keyuan Pharmaceutical Co., Ltd.
Issued by China Food & Drug Administration
DML Valid upto: 30-07-2025
GMP Valid upto: 14-08-2022</td></tr>
<tr><td>3.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Copy of commercial invoice attested by AD I&E DRAP, Lahore, has been submitted.
Empagliflozin:

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail reports have been submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Digital data logger record has been submitted for temperature & humidity conditions of both accelerated and long-term stability chambers.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4	Copies of the Drug substance specifications used for routine testing of the Drug substance by Drug Product manufacturer is required.	Firm has submitted drug substance specifications adopted by M/s Horizon.
3.2.P.5.3	Specificity studies shall be submitted for the Analysis method of Metformin in Dissolution test, wherein it could be established that the UV absorbance results for Metformin HCl are not interfered with the presence of other two Drug substances in the sample aliquot.	Firm has submitted UV spectra for the performance of Specificity parameter for dissolution test revealing that absorbance of Linagliptin and empagliflozin has not been interfered
3.2.P.6	• Submitted COA of working standard of Metformin HCl declares retest date as May 2021, whereas stability studies have also been performed subsequent to this date. • Submitted COA of working standard of Empagliflozin declares retest date as March 2021, whereas stability studies have also been performed subsequent to this date.	Firm has submitted COA of working standards of Metformin HCl & Empagliflozin with retest date as of May 2023 & March 2023 respectively.
• Submit details of excess Active coating solution used to achieve desired content of Empagliflozin & Linagliptin.		Firm has submitted that we use excess active coating solution due to process loss process loss details of which have been submitted.

Decision of 320th meeting: Registration Board approved Elmet XR 25/25/1000 mg Tablet, Elmet XR 10/5/1000 mg Tablet & Elmet XR 12.5/2.5/1000 mg Tablet with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Justification shall be submitted in this regard. • Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches shall be submitted shall be submitted. • Submitted BMRs have not been filled completely.	d are still subsequent to the date of of two batches. i.e. L-131 & L-138 turing date of 03-2018, whereas oice is of 08-2019. oice is for "Tigecycline lyophilized". ubmitted that provided data is of atches. ets submitted. ity study sheets have been submitted. • BMR was written with standard batch formula and now it been revised with potency adjustment as per potency of drug substance. • Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas asper submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis. • Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage. • Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.

Decision of 316th meeting: Deferred for following:

- **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.
- Evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained.
- Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.

- Specifications of fill weight/vial shall be submitted.
- Peak integration is not proper, since it does not coincide with the base line.
- Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.
- Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.
- Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.
- Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.
- Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection"

Firm's reply:

Observation	**Firm's Reply**
• **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.	Firm has submitted analytical procedure, wherein mobile phase composition is different from that proposed by the drug substance manufcaturer.
Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.	Fimr has submitted specification sof of auto sampler assembled with HPLC of Perkin Almer 200LC, wherein operating conditions for "Ambient temperature" are mentioned as 10- 30^{o}C.
Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.	The stability data has been done as per recommended storage conditions. There was typographic error in the data.
Specifications of fill weight/vial shall be submitted.	The product is in lyophilized form. For this 2 ml solution per vial was filled and then lyophilized. *It is pertinent to mention that vials are filled with 2 ml solution at an intermediate stage, whereas final dosage form of the applied product is in the powder form hence fill weight specifications are necessary to establish uniformity of dosage.*
Peak integration is not proper, since it does not coincide with the base line.	Firm has submitted chromatograms again with justification that the attenuation is increased which results in the proper coinciding of baseline.
• Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date	No reply submitted.

of 03-2018, whereas submitted invoice is of 08-2019.	
• Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.	The bulk and raw material of tigecycline is also available in lyophilized/sterilized form. The raw material was then formulated into solution form which is then filled and lyophilized.
• Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.	Firm has declared it as a typographic error, and has submitted revised COA of drug substance wherein Assay value has been declared as 99% on anhydrous basis, which still does not justify the dispensed amount on basis of "as is potency", since water content has been declared as 1.3%.
Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage	The solution is filled in the vials. The volume variation/checklist is attached.
• Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.	The solution is filled in glass beaker (5Ltr) whose minimum handling capacity is 500ml.
Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection".	Firm has submitted revised COAs of drug product for complete stability studies, wherein test of "Particular matter" has now been included.

Decision of 320th meeting: Deferred for following:

- **Submission of commercial invoices attested by AD DRAP I&E, for the procurement of drug substance used to manufacture drug product batches. i.e. L-131 & L-138.**
- **Specifications for the fill weight/vial shall be submitted.**
- **Evidence of performance of sterility testing at the time of batch release shall be submitted.**
- **Scientific justification shall be submitted for using glass beaker (5Ltr) for the compounding the commercial scale batches.**
- **Verification of the claim of the firm regarding submitted HPLC chromatograms that "attenuation is increased which results in the proper coinciding of baseline."**

- Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.
- Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection"

Firm's reply:

Observation	Firm's Reply
• **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.	Firm has submitted analytical procedure; wherein mobile phase composition is different from that proposed by the drug substance manufacturer.
Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.	Fimr has submitted specification sof of auto sampler assembled with HPLC of Perkin Almer 200LC, wherein operating conditions for "Ambient temperature" are mentioned as 10- 30^{o}C.
Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.	The stability data has been done as per recommended storage conditions. There was typographic error in the data.
Specifications of fill weight/vial shall be submitted.	The product is in lyophilized form. For this 2 ml solution per vial was filled and then lyophilized. *It is pertinent to mention that vials are filled with 2 ml solution at an intermediate stage, whereas final dosage form of the applied product is in the powder form hence fill weight specifications are necessary to establish uniformity of dosage.*
Peak integration is not proper, since it does not coincide with the base line.	Firm has submitted chromatograms again with justification that the attenuation is increased which results in the proper coinciding of baseline.
• Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.	No reply submitted.
• Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.	The bulk and raw material of tigecycline is also available in lyophilized/sterilized form. The raw material was then formulated into solution from which is then filled and lyophilized.
• Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.	Firm has declared it as a typographic error, and has submitted revised COA of drug substance wherein Assay value has been declared as 99% on anhydrous basis, which still does not justify the dispensed amount on basis of "as is potency", since water content has been declared as 1.3%.

Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage	The solution is filled in the vials. The volume variation/checklist is attached.
• Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.	The solution is filled in glass beaker (5Ltr) whose minimum handling capacity is 500ml.
Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection".	Firm has submitted revised COAs of drug product for complete stability studies, wherein test of "Particular matter" has now been included.

Decision of 320th meeting: Deferred for following:

- **Submission of commercial invoices attested by AD DRAP I&E, for the procurement of drug substance used to manufacture drug product batches. i.e. L-131 & L-138.**
- **Specifications for the fill weight/vial shall be submitted.**
- **Evidence of performance of sterility testing at the time of batch release shall be submitted.**
- **Scientific justification shall be submitted for using glass beaker (5Ltr) for the compounding the commercial scale batches.**
- **Verification of the claim of the firm regarding submitted HPLC chromatograms that "attenuation is increased which results in the proper coinciding of baseline."**

Batch Size	1000 Vials	1000 Vials	700 vials
Manufacturing Date	01-2018	01-2018	08-2019
Date of Initiation	20-03-18	12-03-18	01-10-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. CQ20180031) issued by Chongqing food and drug administration valid upto 09-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Licenses to Import Drug substance Tigecycline issued by AD I&E DRAP, Islamabad dated 05-08-2019 & 02-04-2020.
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw	Submitted

	data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section#	Observations	Firm's response
3.2. S.4	• Acceptance limits for test of pH submitted in the drug substance specifications is not as per the USP monograph for "Tigecycline". • The details of coloumn temperature, mobile phase preparation, system suitability solution mentioned in the Assay test method by Drug substance manufacturer is not as per the USP monograph for "Tigecycline". • Submitted COA from M/s Bio-labs reflect that tests of Bacterial Endotoxin & sterility have not been performed. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. • Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.	• Firm has submitted revised documents submitted without justifying the deviations observed in previously submitted data. • Temperature for autosampler not reflected in analytical method. • Firm has submitted Bioburden test report from M/s Bio Lab for another batch than that submitted earlier. • Drug substance specifications and analytical procedure has been submitted from M/s Bio-Labs, but these documents are not formal and does not bear any document no., issue date or effective date. • Analytical method verification studies have been submitted from M/s Bio-Labs. • COA from API manufacturer has been submitted, which declares the product name as "Tigecycline lyophilized", whereas COA of M/s Bio-Lab declares it as "Tigecycline" only. • No Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.
3.2.S.5	• COA of primary / secondary reference standard including source and lot number shall be provided.	COA of working standard has been submitted from M/s Fuan Pharmaceutical, China.

3.2. S.7	• The USP monograph for "Tigecycline" recommends storage condition as at refrigerated temperature, whereas stability studies data has been submitted as per room temperature conditions. • Specifications for pH & specific optical rotation applied in stability studies is different from that submitted in section 3.2.S.4.4.	Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as reuired for a refrigerated item, while the analytical values for all the tests are same as presented earlier.
3.2.P.1	• Inclusion of lactose monohydrate in the composition shall be justified since innovator product approved by US FDA & EMA is formulated without use of any excipient.	MHRA approved reference given.
3.2.P.2.1	• Compatibility studies of the Drug Substance(s) with Lactose shall be provided since innovator product approved by US FDA & EMA is formulated without use of any excipient.	MHRA approved reference given.
3.2. P.5	• Specifications of fill weight/vial shall be submitted. • Specifications does not include test of "Particulate matter". • Evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained. • Precision parameter has not been performed in the analytical method verification studies. • COAs of relevant batches for which stability studies data has been submitted, shall be provided.	: given ; of fill weight/vial shall be submitted. availability of Auto sampler in HPLC, C temperature conditions could be ion is not proper, since it does not the base line. re not formal and does not bear any , issue date or effective date. Submitted COAs does no tinclude test of particulate matter as recommended by the USP monograph of "Tiogecycline for injection"
3.2.P.6	• Submitted working standard COA reflect date of analysis as 14-12-2019, whereas stability batches have been analysed prior to this date.	COA of working standard submitted with date of analysis as 25-12-2017, wherein the reference standard (lot# F0M325) used for its standardization was valid upto 30-09-2017.
3.2. P.8	• Firm has submitted copy of Licenses to Import Drug substance Tigecycline issued by AD I&E DRAP, Islamabad dated 05-08-2019 & 02-04-2020, whereas stability batches have been manufactured prior to these dates. • Clarification shall be submitted whether submitted stability studies data is of trial batches or commercial batches. • Raw data sheets for stability studies, reflecting the details of Standard weight, Sample dilution preparation, Potency of Reference standard and Calculation formula applied for the Assay test shall be submitted.	ɛd are still subsequent to the date of ʒ of two batches. i.e. L-131 & L-138 turing date of 03-2018, whereas oice is of 08-2019. oice is for "Tigecycline lyophilized". ubmitted that provided data is of atches. ɛts submitted. ity study sheets have been submitted.

	• As per submitted stability studies data, test of particulate matter has not been performed, justification shall be submitted in this regard. • Dates of testing written in the stability summary sheets for different time points, does not relate with the relevant duration in months. • As per submitted BMRs potency adjustment has not been done for the Drug substance, based upon the actual Assay results. • As per submitted BMRs, lactose monohydrate has been used in the formulation, whereas innovator product has been formulated without use of any excipient. Justification shall be submitted in this regard. • Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches shall be submitted shall be submitted. • Submitted BMRs have not been filled completely.	• BMR was written with standard batch formula and now it sbeen revised with potency adjustment as per potency of drug substance. • Revised BMR mentions the dispensed quantity of APi on the basis of 99% potency, whereas asper submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis. • Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage. Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.

Decision of 316th meeting: Deferred for following:

- **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.
- Evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained.
- Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.
- Specifications of fill weight/vial shall be submitted.
- Peak integration is not proper, since it does not coincide with the base line.
- Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.
- Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.
- Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.
- Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.
- Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection"

Firm's reply:

Observation	Firm's Reply
• **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.	Firm has submitted analytical procedure; wherein mobile phase composition is different from that proposed by the drug substance manufacturer.
Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.	Firm has submitted specifications of auto sampler assembled with HPLC of Perkin Almer 200LC, wherein operating conditions for "Ambient temperature" are mentioned as 10- 30^{o}C.
Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.	The stability data has been done as per recommended storage conditions. There was typographic error in the data.
Specifications of fill weight/vial shall be submitted.	The product is in lyophilized form. For this 2 ml solution per vial was filled and then lyophilized. *It is pertinent to mention that vials are filled with 2 ml solution at an intermediate stage, whereas final dosage form of the applied product is in the powder form hence fill weight specifications are necessary to establish uniformity of dosage.*
Peak integration is not proper, since it does not coincide with the base line.	Firm has submitted chromatograms again with justification that the attenuation is increased which results in the proper coinciding of baseline.
• Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.	No reply submitted.
• Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.	The bulk and raw material of tigecycline is also available in lyophilized/sterilized form. The raw material was then formulated into solution from which is then filled and lyophilized.
• Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.	Firm has declared it as a typographic error, and has submitted revised COA of drug substance wherein Assay value has been declared as 99% on anhydrous basis, which still does not justify the dispensed amount on basis of "as is potency", since water content has been declared as 1.3%.

Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage	The solution is filled in the vials. The volume variation/checklist is attached.
• Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.	The solution is filled in glass beaker (5Ltr) whose minimum handling capacity is 500ml.
Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection".	Firm has submitted revised COAs of drug product for complete stability studies, wherein test of "Particular matter" has now been included.

Decision of 320th meeting: Deferred for following:

- Submission of commercial invoices attested by AD DRAP I&E, for the procurement of drug substance used to manufacture drug product batches. i.e. L-131 & L-138.
- Specifications for the fill weight/vial shall be submitted.
- Evidence of performance of sterility testing at the time of batch release shall be submitted.
- Scientific justification shall be submitted for using glass beaker (5Ltr) for the compounding the commercial scale batches as lyophilization is performed after filling the solution in vials.
- Verification of the claim of the firm regarding submitted HPLC chromatograms that "attenuation is increased which results in the proper coinciding of baseline."

Case no. 02 Registration applications of newly granted DML or New section (Human)

New DML

102.	Name, address of Applicant / Marketing Authorization Holder	M/s Carer Pharmaceuticals plot No. 27 main RCCI road Rawat Industrial estate Islamabad Pakistan.

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP)

		☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 4969 dated 22-02-2022
	Details of fee submitted	Rs.30,000/- dated 19-01-2022
	The proposed proprietary name / brand name	**Clarithromycin 250mg/5ml Dry Powder suspension.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Clarithromycin ……. 250mg
	Pharmaceutical form of applied drug	White to off white Powder filled in 60ml Amber Glass Bottle.
	Pharmacotherapeutic Group of (API)	Macrolide (Antibiotics)
	Reference to Finished product specifications	USP
	Proposed Pack size	60ml Dry Powder suspension.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved.
	For generic drugs (me-too status)	Klaricid 250mg suspension by M/s ABBOTT Laboratories, Reg. No. 076148
	GMP status of the Finished product manufacturer	New license granted on 07/06/2021 Tablet, Capsule, Dry powder and ampoules (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	M/S Vision Pharmaceuticals Plot No: 22-23, Kahuta Industrial Triangle, Kahuta Rd, Islamabad,
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions:

		Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (CTM0510, CTM0511, CTM0513)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Klaricid Dry Powder by ABBOTT Laboratories.
	Analytical method validation/verification of product	Method verification studies have been submitted.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Submitted.
3.2.S.4.4	• Submitted COA of Clarithromycin pellets form M/s Carer Pharma does not mention the batch# of drug substance. • Manufacturing date mentioned on the COAs of drug substance from M/s Vision pharma & M/s Carer pharma are different. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance.	Firm has submitted revised COA of batch# CTM 0681, wherein date of manufacturing has been corrected as per COA from M/s Vision Pharmaceuticals.

3.2.P.3.2	Justify the proposed quantity of Clarithromycin per 5 ml in the submitted batch formula.	Firm has justified the proposed quantity on basis of %age content fof the Clarithromycin taste masked pellets used in the formulation.
3.2.P.5.2	Detailed analytical procedures used for testing the drug product shall be provided instead of submitting the USP monograph print.	Firm has submitted drug product testing method adopted by M/s Carer Pharma based upon the USP monograph.
3.2.P.5.3	Performance of precision parameter shall be submitted in the analytical method verification studies.	Submitted.
3.2.P.8	• Copy of commercial invoice for procurement of pellets from M/s Vision shall be submitted.	Firm has submitted copy of commercial invoice# 801551 from M/s Vision pharma for procurement of 25 Kg Clarithromycin taste masked pellets.

Decision: Registration Baord approved Clarithromycin 125mg Dry Powder & Clarithromycin 250mg/5ml Dry Powder suspension.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

Section	**Observation**	**Firm's response**

3.2. S.4.1	• Drug substance specifications submitted by M/s Jupiter Pharma declare specification's reference as USP 43, whereas limits for Assay test & Related substances are not as per the USP monograph of "Ceftriaxone sodium". • Reference for specifications of Assay test must be clarified by Drug substance manufacturer, whether it is USP or BP, since both limits could not be applied.	• Firm has referred to the USP monograph of ceftriaxone sodium for Drug substance specifications and has submitted revised specifications & analutical procedure accordingly.	
3.2.S.4.3	• Chromatographic conditions applied for the analytical method validation is not as per those recommended by USP monograph for "Ceftriaxone sodium". • Details of the performance of specificity parameter have not been submitted	Firm has submitted revised analytical method verification report as per USP monograph.	
3.2.S.5	Firm has submitted COA of working standard from M/s Pharmagen for "Ceftriaxone sodium" which declares the "use before date" as 19-11-2016, whereas the stability batches have been manufactured and analysed in 2020.	Firm has submitted COA of working standard from M/s Pharmagen valid till January 2021.	
3.2.P.1	• Equivalency factor of the Ceftriaxone sodium shall be defined for Ceftriaxone. • Reconstitution diluent has been submitted as 5ml Water for Injection, which is not as recommended by the reference product.	• Firm has justified the proposed quantity per vial with reference to the equivalency factor for sodium salt. • Firm has submitted that it was a typographic error and in commercialpacks same diluent will be provided as recommended by reference product i.e., 10ml WFI.	
3.2.P.3.5	• Submitted process validation protocol does not identify Critical process parameters and critical Quality attributes. • Acceptable limits given in the sampling plan are different from that declared in section 3.2. P.5.1	• Firm has submitted revised process validation protocol.	
3.2. P.5.1	• A signed copy of Drug product specifications and analytical procedure, used for the batch release and stability studies of applied product, shall be submitted.	• Submitted.	
3.2.P.8	• Submit raw data sheets reflecting the details of Standard weight, Sample weight, Dilution	• Frim has submitted raw data sheets along with relevant chormatograms for stabiltiy	

	preparation, Potency of Reference standard and Calculation formula applied for the Assay test. • Chromatograms for the complete analysis of stability studies of each batch have not been submitted. • Submitted BMR does not declare the target fill weight/vial, calculated on the basis of the established potency of drug substance. • Submitted BMRs reflect the same batch no. against the entry for "Previous product" & "Clearance granted for", in the Line clearance sheet of filling step.	studies. • Frim has submitted revised BMRs decalring target fill weight & correction of Line clearance details.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

Section	Observation	Firm's response
3.2. S.4.1	• Drug substance specifications submitted by M/s Jupiter Pharma declare specification's reference as USP 43, whereas limits for Assay test & Related substances are not as per the USP monograph of "Ceftriaxone sodium". • Reference for specifications of Assay test must be clarified by Drug substance manufacturer, whether it is USP or BP, since both limits could not be applied.	• Firm has referred to the USP monograph of ceftriaxone sodium for Drug substance specifications and has submitted revised specifications & analutical procedure accordingly.
3.2.S.4.3	• Chromatographic conditions applied for the analytical method validation is not as per those recommended by USP monograph for "Ceftriaxone sodium". • Details of the performance of specificity parameter have not been submitted	• Firm has submitted revised analytical method verification report as per USP monograph.
3.2.S.4.4	• Submitted COA of drug substance from M/s Jupiter does not declare the results for the tests of "Sterility" & "Bacterial Endotoxin". • Limits for the test of "Description/Appearance" is different between the COA of M/s Pharmagen & M/s Jupiter. • Submit analytical record i.e., Chromatograms, FTIR spectrum and raw data sheets for the drug substance analysis performed by M/s Jupiter pharma	• Firm has submitted revised COA wherein limts for description have been corrected, test of BET & Sterility has been included along with result for Assay test has as per the USP specifications. • Submitted.
3.2.S.5	Relevant information has not been submitted.	Firm has submitted COA of working standard from M/s Pharmagen for "Ceftriaxone sodium" which declares the "use before date" as 19-11-2016, whereas the stability batches have been manufactured and analysed in 2020.
3.2. P.1	• Equivalency factor of the Ceftriaxone sodium shall be defined for Ceftriaxone.	• Firm has justified the proposed quantity per vial with reference to the equivalency factor for sodium salt.
3.2. P.3.5	• Submitted process validation protocol does not identify Critical process parameters and critical Quality attributes. • Acceptable limits given in the sampling plan are different from that declared in section 3.2. P.5.1	• Firm has submitted revised process validation protocol.
3.2. P.5.1	• A signed copy of Drug product specifications and analytical procedure,	• Firm has submitted copy of Drug product specifications &

	used for the batch release and stability studies of applied product, shall be submitted. • Submitted specification does not include test of "Constituted solution". • Submitted specifications mention only one Assay limit of 90- 115%, whereas USP monograph of "Ceftriaxone for injection" mandates two Assay limits.	analytical procedure as per USP monograph.
3.2. P.5.3	• The concentration of standard solution mentioned in the analytical procedure is not as per the USP monograph of "Ceftriaxone for injection". • Parameter of specificity test mentions the use of placebo. You are advised to clarify the composition of placebo.	• Firm has submitted revised analytical method verification report as per USP monograph.
3.2.P.8	• Submitted stability studies report reflect that Assay test has been performed for reconstituted injection only, whereas USP monograph of "Ceftriaxone for injection" also requires performance of another Assay test with acceptance limit of "Ceftriaxone for Injection contains an amount of Ceftriaxone Sodium equivalent to NLT 776 µg/mg of Ceftriaxone." Justification shall be submitted in this regard. • Submit raw data sheets reflecting the details of Standard weight, Sample weight, Dilution preparation, Potency of Reference standard and Calculation formula applied for the Assay test. • Chromatograms for the complete analysis of stability studies of each batch have not been submitted. • Reports of the microbiological testing for the tests of "Sterility" and "Bacterial Endotoxin" have not been submitted. • Submitted BMR does not declare the target fill weight/vial, calculated on the basis of the established potency of drug substance..	• We have just filled the raw material in glass vials. Before filling the raw material is completely teste. And during stability studies all the test paarmeters were found within acceptable limits. • Reports of the microbiological testing for the tests of "Sterility" and "Bacterial Endotoxin" have been submitted. • Firm has submitted raw data sheets along with relevant chormatograms for stabiltiy studies. • Firm has submitted revised BMRs decalring target fill weight.

Decision: Approved.

	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	El-cef Injection 500mg IM of M/s Linear Pharmaceuticals.
	Name and address of API manufacturer.	M/s Pharmagen Ltd., Ferozpur Road, Lahore
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general

		properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies against the reference product of "Rocephin Injection 500mg" has been submitted.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long-term conditions.

Remarks of Evaluator:

Section	Observation	Firm's response
3.2.S.4.1	• Drug substance specifications submitted by M/s Jupiter Pharma declare specification's reference as USP 43, whereas limits for Assay test & Related substances are not as per the USP monograph of "Ceftriaxone sodium". • Reference for specifications of Assay test must be clarified by Drug substance manufacturer, whether it is USP or BP, since both limits could not be applied.	• Firm has referred to the USP monograph of ceftriaxone sodium for Drug substance specifications and has submitted revised specifications & analutical procedure accordingly.
3.2.S.4.3	• Chromatographic conditions applied for the analytical method validation is not as per those recommended by USP monograph for "Ceftriaxone sodium". • Details of the performance of specificity parameter have not been submitted	Firm has submitted revised analytical method verification report as per USP monograph.
3.2.S.4.4	• Submitted COA of drug substance from M/s Jupiter does not declare the results for the tests of "Sterility" & "Bacterial Endotoxin". • Limits for the test of "Description/Appearance" is different between the COA of M/s Pharmagen & M/s Jupiter.	• Firm has submitted revised COA wherein limits for description have been corrected, test of BET & Sterility has been included along with result for Assay test has as per the USP specifications. • Submitted.

	• Submit analytical record i.e., Chromatograms, FTIR spectrum and raw data sheets for the drug substance analysis performed by M/s Jupiter pharma	
3.2.P.1	Equivalency factor of the Ceftriaxone sodium shall be defined for Ceftriaxone.	• Firm has justified the proposed quantity per vial with reference to the equivalency factor for sodium salt. • Firm has submitted that it was a typographic error and in commercialpacks same diluent will be provided as recommended by reference product i.e., 10ml WFI.
3.2.P.3.5	• Submitted process validation protocol does not identify Critical process parameters and critical Quality attributes. • Acceptable limits given in the sampling plan are different from that declared in section 3.2. P.5.1	Firm has submitted revised process validation protocol.
3.2. P.5.1	• A signed copy of Drug product specifications and analytical procedure, used for the batch release and stability studies of applied product, shall be submitted. • Submitted specification does not include test of "Constituted solution". • Submitted specifications mention only one Assay limit of 90- 115%, whereas USP monograph of "Ceftriaxone for injection" mandates two Assay limits.	Revised drug product specification sand analytical procedure has been submitted as per USP momnograph.
3.2. P.5.3	• The concentration of standard solution mentioned in the analytical procedure is not as per the USP monograph of "Ceftriaxone for injection". • Parameter of specificity test mentions the use of placebo. You are advised to clarify the composition of placebo.	Firm has submitted revised analytical method verification report as per USP monograph.
3.2. P.5.4	• Batch size mentioned on submitted COAs is different from that declared in BMRs.	Firm has declared it typographical error and has submitted revised COAs.
3.2.P.8	• Submitted stability studies report reflect that Assay test has been performed for reconstituted injection only, whereas USP monograph of "Ceftriaxone for injection" also requires performance of another Assay test with acceptance limit of	• We have just filled the raw material in glass vials. Before filling the raw material is completely teste. And during stability studies all the test paarmeters were found within acceptable limits. • Reports of the microbiological testing for the tests of "Sterility" and

		"Ceftriaxone for Injection contains an amount of Ceftriaxone Sodium equivalent to NLT 776 µg/mg of Ceftriaxone." Justification shall be submitted in this regard. • Chromatograms for the 6th month time point of stability studies of batch no. 20D07 has not been submitted. • Submit raw data sheets reflecting the details of Standard weight, Sample weight, Dilution preparation, Potency of Reference standard and Calculation formula applied for the Assay test. • Chromatograms for the complete analysis of stability studies of batch# 20D08 have not been submitted. • Chromatograms for the complete analysis of stability studies of batch# 20D09 have not been submitted. • Repots of the microbiological testing for the tests of "Sterility" and "Bacterial Endotoxin" have not been submitted. • Submitted BMR does not declare the target fill weight/vial, calculated on the basis of the established potency of drug substance.	"Bacterial Endotoxin" have been submitted. • Frim has submitted raw data sheets along with relevant chormatograms for stabiltiy studies. • Frim has submitted revised BMRs decalring target fill weight.
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

Section	Observation	Firm's response
3.2. S.4.3	• Details of the performance of specificity parameter have not been submitted	Performance of specificty parameter has been submitted.
3.2. S.4.4	• Limits for the test of "Description/Appearance" & Assay are different between the COA of M/s Pharmagen & M/s Jupiter. • Submit analytical record i.e., Chromatograms, FTIR spectrum and raw data sheets for the drug substance analysis performed by M/s Jupiter pharma	Firm has submitted revised COA along with analytical record.
3.2. S.5	Relevant information has not been submitted.	COA of USP reference standard of cefixime has been submitted.
3.2.P.2.5	• Quantities of preservatives used in formulation shall be justified for per unit dose with reference to the relevant guidelines/standards. • Preservative effectiveness studies to be performed as per recommendations of pharmacopoeia shall be provided	• Firm has referred to literature from hand book of pharmaceutical excipients as rationale for the quantities of preservative used. • Microbial enumeration report has been submitted for preservative effectiveness studies.
3.2. P.5.1	• A signed copy of Drug product specifications and analytical procedure, used for the batch release and stability studies of applied product, shall be submitted. • Test for content of antimicrobial	Firm has submitted revised drug product analytical procedure including test of preservative effectiveness.

	preservative & efficacy of preservative, as recommended by ICH Q1 (R2) guidelines & USP chapter <51>, has not been included in the finished product specifications. You are advised to submit justification in this regard.	
3.2. P.5.6	• This section refers to JP specifications, whereas section 3.2.P.5.1 declares finished product specifications of USP standard.	Firm has declared it a typographic error and has referred to USP monograph as drug product specifications.
3.2. P.6	• COA of primary / secondary reference standard including source and lot number shall be provided.	COA of USP reference standard of cefixime has been submitted for Lot# G01139
3.2. P.8	• Chromatograms for the 6th month time point of stability studies have not been submitted. • Submitted Chromatograms are not readable, hence a clear readable copy of chromatograms shall be submitted. • Test for content of antimicrobial preservative & efficacy of preservative, as recommended by ICH Q1 (R2) guidelines, has not been performed during stability studies. You are advised to submit justification in this regard. • Summary of additional stability studies i.e., in-use studies re-constituted product, along with proposed in-use storage statement and in-use shelf-life shall be provided. • Justify the quantity of API dispensed for each trial batch, considering the declared potency and equivalency factor of API.	• Firm has submitted analytical record including raw data sheets and chromatograms for 6th moth time point also. • Firm has justified the dispensed quantity of cefixime against the theoretical factor for hydrate form. • Firm ha submitted 14 days- in-use stability study report for the reconstituted suspension.

Decision: Registration Baord approved M-Xime 100mg/5ml Dry Suspension & M-Xime Plus 200mg/5ml Dry Suspension.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Dy. No. and date of submission	Dy. No. 33998 : 29-12-2021
	Details of fee submitted	PKR 30,000/-: 06-12-2021,
	The proposed proprietary name / brand name	**DEXIRANT 30mg Capsules**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Dexlansoprazole (as dual delayed release pellets)……30mg
	Pharmaceutical form of applied drug	Capsules
	Pharmacotherapeutic Group of (API)	Proton pump inhibitor
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	DEXILANT 30mg Capsule of M/s **TAKEDA PHARMS USA** (USFDA approved)
	For generic drugs (me-too status)	Razodex 30 mg Capsule of M/s GETZ Pharma (Reg # 086976)
	GMP status of the Finished product manufacturer	New license granted on 13/02/2020 General Tablet, General Capsule, General Sachet and General dry powder injectable (pre-lyophilized)
	Name and address of API manufacturer.	M/s Vision pharmaceuticals (pvt) Ltd., Plot no. 22-23, Industrial Triangle, Kahuta Road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing

		process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 6 months accelerated and 36 months real time data of 3 batches of API. Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months of 3 batches Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months of 3 batches
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence of test formulation with comparator product DEXILANT 30mg Capsule (B # 511014) of M/s Takeda GmbH, Germany by performing all the quality tests including dissolution in 3 different media (pH 1.2, 5.5 and 7). The results of the tests of both products were found to be within the specifications and are comparable.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method for the drug substance. Firm has submitted report of validation of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad.		
API Lot No.	**DLP755**		
Description of Pack (Container closure system)	30's blisters packed in unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	VT-001	VT-002	VT-003
Batch Size	1000 caps	1000 caps	1000 caps
Manufacturing Date	05-2021	05-2021	05-2020

Date of Initiation	13-05-2021	14-05-2021	15-05-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any response.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate for M/s Vision pharma pvt Ltd, Lahore issued by DRAP Lahore. It is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the purchase of esomeprazole sodium sterile powder (2kg, Batch # DLP755) from M/s vision pharma vide invoice # 703069 dated 19-04-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Observation	Response by the firm
Submission of analytical method verification studies for drug substance performed by drug product manufacturer is required.	Submitted from M/s Variant pharmaceuticals.
Analytical method for routine analysis of drug substance used by the drug product manufacturer is required to be submitted.	Submitted.
Please submit documents confirming the procurement of drug substance for manufacturing of the applied product.	Firm has submitted copy of commetcial invoice for procurement of 2 Kg of Dexlansoprazole DDR pellets 22.5% from /s Vision pharmaceuticals.
In method validation studies for drug product, the exact amount of contents of capsule have not been mention equivalent to 60mg or 30mg dexlansoprazole, please submit complete method for analytical method validation studies including the exact amount of contents of capsule (pellets)taken for preparation of dilutions.	Firm has submitted concentration in terms of mg/ml for performance of each parameter of method validation.
Justification of specification for Dexlasoprazole capsule 30/60mg has not been provided in submitted dossier. However, justification of specification for another dosage form is presented in the	Firm has submitted drug product specification for both 30mg & 60 mg capsule.

dossier, clarify or otherwise submit the required data.	
Please provide complete calculations for potency adjustment of 30/60mg capsule.	Firm has submitted details for weight of pellets per capsule calculated on basis of "As is potency" of Dexlansoprazole pellets.
Since similar batch numbers have been assigned to stability batches of 30mg and 60mg capsules, therefore, the internal SOP/ procedure for assigning the batch numbers is required with the clarification of the same.	Firm has submitted SOP for issuance of BMR".

Decision: Registration Board approved DEXIRANT 30mg Capsules & DEXIRANT 60mg Capsules.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 04 Registration applications of import cases

a. New cases

Priority Registration Applications

Drug Regulatory Authority of Pakistan in its 129th meeting held on 17th February, 2022 discussed the case regarding **"Priority Consideration of Applications for Registration Submitted After Cancellation of Their Renewal of Registration" vide Agenda Item No.V:.** Wherein, the Authority decided as under;

"The Authority acceded to the request of firms for out-of-queue submission and consideration of registration dossiers on CTD Format (5F) in regard to cancelled products due to late submission of renewals."

Accordingly, M/s Graton Pharma., Suit No.501 and 502 fifth floor plot No. 42C/2lane 8 bukhari commercial DHA phase 6, Karachi-75500, Pakistan. has requested for priority consideration of their following products due to invalid registration status of previously registered product:

114.	Name, address of Applicant / Importer	M/s Graton Pharma., Suit No.501 and 502 fifth floor plot No. 42C/2lane 8 bukhari commercial DHA phase 6, Karachi-75500, Pakistan.
	Details of Drug Sale License of importer	**License No: 160** **Address:** Office No.501 and 502 fifth floor plot No. 42C/2lane 8 Bukhari commercial DHA phase 6, Karachi-75500, Pakistan. **Address of Godown:** -- **Validity:** 21-10-2023. **Status:** License to sell, stock and exhibit for sale, distribute and sell drugs by way of whole sale.
	Name and address of marketing authorization holder (abroad)	Beijing Beilu Pharmaceutical Co., Ltd. No. 3 Shuiyuan West Road, Miyun District, Beijing China
	Name, address of manufacturer(s)	Beijing Beilu Pharmaceutical Co., Ltd. Miyun Industrial Development Area., Beijing.
	Name of exporting country	China
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted copy of legalized CoPP certificate (No. Beijing20210129) ***issued by Beijing Municipal Medical Products Administration No. 70 Zaolinqian Street, Xicheng District Bejing*** for Iohexol 50ml: 17.5g (I) Injection. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspections. The name of importing country on CoPP is mentioned as Pakistan. Copy of GMP certificate no. BJ20180345 valid upto 08-08-2023 has been submitted for Beijing Beilu Pharmaceutical Co., Ltd. Miyun Industrial Development Area., Beijing.
	Details of letter of authorization / sole agency agreement	Firm has submitted original product specific authority letter from Beijing Beilu Pharmaceutical Co., Ltd. Address 7th Floor, Block Maples International office, No. 32 Xizhimen North Street, Haidian District, Beijing City, PR. China in the name of M/s Graton Pharma., Suit No.501 and 502 fifth floor plot No. 42C/2lane 8 bukhari commercial DHA phase 6, Karachi-75500, Pakistan. for following products Iohexol Injection 100ml:35g(I) Iohexol Injection 50ml:17.5g(I) Iohexol Injection 50ml:16g(I) This letter of appointment is valid upto 30-04-2026 unless revoked earlier.
	Status of the applicant	☐ Manufacturer ☒ Importer

		☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 808, Date of submission: 13-05-2022
	Details of fee submitted	PKR 75,000/- vide Deposit Slip No:709132227594
	The proposed proprietary name / brand name	MONOPAQUE 50ml injection (Iohexol Injection (50ml: 17.5g (I))
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains 755 mg of Iohexol equivalent to 350mg of Iodine.
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Medical Imaging drug
	Reference to Finished product specifications	USP
	Proposed Pack size	50ml
	Proposed unit price	***As per SRO***
	The status in reference regulatory authorities	OMNIPAQUE 350 mg iodine/ml (755 mg of iohexol/mL), (50ml=17.5g I), Solution for injection USFDA Approved by M/s Healthcare United States
	For generic drugs (me-too status)	IOBRIX-350 INJECTION 50ml by M/s Hoffmann Human Health Pak Ltd (Reg#032137)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Zhejiang Hichi Pharmaceutical Co., Ltd., Binhai Road, Damaiyu Economic Development Zone, Yuhuan County, Zhejiang China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls of material, control of critical

		steps and intermediates, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturers, manufacturing process and control of critical steps validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, characterization of impurities, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	Pharmaceutical equivalence performed against reference product having strength 100ml:35g Iohexol injection
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the test of related substances in the applied product since titration method is applied for Assay test.
	Container closure system of the drug product	Medium Borosilicate glass type-I infusion bottles, halogenated butyl rubber stopper (chlorinated) for injections, and aluminum plastic combined caps for infusion bottles
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of 2 batches (190907 and 190908) is for 18 months only while the stability study data for 3rd batch (190909) is for 36 months. Batch No. / Mfg. Date 190907 / 10-09-2019 190908 / 10-09-2019 190909 / 11-09-2019

Remarks of Evaluator [XI]:

Section	Observations	Response
1.1	• The applied drug product is a generic drug product and you have submitted fee 75000/- only. Submit differential fee for the applied product	• Firm has submitted differential fee of Rs. 75,000/- vide deposit slip# 12552911.

	• Address of the Product license holder/exporter on authority letter and CoPP are different from each other. Clarification is required.	• Firm has submitted declaration that our manufacturing License address is now described as "No.3 Shuiyuan West Road, Miyun District, Beijing", which refers to the same place that described in the address written in the GMP certificate which is "Miyun Industrial Development Area, Beijing".
1.4.1	• All the information related to type of application mentioned in section 1.4 shall be submitted.	Submitted.
1.5.2	• Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit. Strength of Active ingredient shall be stated clearly. In case API is in the form of salt, specify the equivalent strength of the base e.g., AAA sodium 50 mg (equivalent to AAA) etc.	Submitted.
1.5.10	• You have mentioned the dosage form of applied drug as both injection and oral while the reference product is not available in applied strength in oral dosage form, clarify?	Applied product is Injection dosage form.
3.2.S.4.1-3.2.S.4.3	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Submitted
3.2.P.2.2.1	• Pharmaceutical equivalence of the applied drug with reference product in 100ml volume is submitted, while the volume of applied product is 50ml, clarify?	• The iohexol 50 ml and iohexol 100 ml, the two specifications have the same concentrations, only the filling quantity is different.
3.2.P.7	• The innovator product is packed in +PLUSPAK™ (polymer bottle) while you have packed the product in medium borosilicate glass infusion bottles, halogenated butyl rubber stopper (chlorinated) for injections, and aluminum plastic combined caps for infusion bottles clarify?	• Various types of glass used for pharmaceutical packaging as per USP Type I - borosilicate glass our manufacturer packaging is up to mark with USP specification. Study results for the test of leachable have been submitted.

3.2.P.8	• The real time stability study data of Finished Pharmaceutical Product of 2 batches (190907 and 190908) is for 18 months only while the stability study data for 3rd batch (190909) is for 36 months. Submit complete real time stability data till shelf life as per zone IV-A • Moreover, it must be justified that the stability data of 36 months could be performed for batch# R190909 which was manufactured on 11-09-2019 for which 36 months has not been passed yet.	• Firm has submitted data stability reports of accelerated (6months) & long term (36 months) stability studies as per Zone-IV a condition of three new batches i.e., 1506038, 1511019 & T1712008 manufactured in 23-06-2015, 04-11-2015 & 04-12-2017 respectively.

Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

115.	Name, address of Applicant / Importer	M/s Graton Pharma., Suit No.501 and 502 fifth floor plot No. 42C/2lane 8 bukhari commercial DHA phase 6, Karachi-75500, Pakistan.

	Name, address of drug substance manufacturer	Zhejiang Starry Pharmaceutical Co., Ltd., No. 1 Sitaili, Modern Industrial Cluster Area, Xianju County Zhejiang Province, China Zhejiang Hichi Pharmaceutical Co., Ltd., Binhai Road, Damaiyu Economic Development Zone, Yuhuan County, Zhejiang China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls of material, control of critical steps and intermediates, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions of Drug substance by Zhejiang Hichi Pharmaceutical Co., Ltd: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months (Batches: C0042010003, C0042011001, C0042011002) Stability study conditions of Drug substance by Zhejiang Starry Pharmaceutical Co., Ltd: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months (Batches: R190904, R190905, R190906)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturers, manufacturing process and control of critical steps validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, characterization of impurities, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence of applied product manufactured from both API sources performed against reference product having strength 100ml:35g Iohexol injection
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the test of related substances in the applied product since titration method is applied for Assay test.

	Container closure system of the drug product	Medium borosilicate glass infusion bottles, halogenated butyl rubber stopper (chlorinated) for injections, and aluminum plastic combined caps for infusion bottles
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. Batches manufactured from API of Zhejiang Haichang Pharmaceutical Co., Ltd Batch No. / Mfg. Date R190907 / 10-09-2019 R190908 / 10-09-2019 R190909 / 11-09-2019 Batches manufactured from API of Zhejiang Stellite Pharmaceutical Co., Ltd Batch No. / Mfg. Date R190904 / 08-09-2019 R190905 / 09-09-2019 R190906 / 09-09-2019

Remarks of Evaluator [XI]:

Section	Observations	Response
1.1	• The applied drug product is a generic drug product and you have submitted fee 75000/- only. Submit differential fee for the applied product	• Firm has submitted differential fee of Rs. 75,000/- vide deposit slip# 0827443559
	• Address of the Product license holder/exporter on authority letter and CoPP are different from each other. Clarification is required.	• Firm has submitted declaration that our manufacturing License address is now described as "No.3 Shuiyuan West Road, Miyun District, Beijing", which refers to the same place that described in the address written in the GMP certificate which is "Miyun Industrial Development Area, Beijing".
1.4.1	• All the information related to type of application mentioned in section 1.4 shall be submitted.	Submitted
1.5.10	• You have mentioned the dosage form of applied drug as both injection and oral while the reference product is not available in applied strength in oral dosage form, clarify?	Dosage form is injection

3.2.S.4.1-3.2.S.4.3	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Submitted
3.2.P.7	• The innovator product is packed in +PLUSPAK™ (polymer bottle) while you have packed the product in medium borosilicate glass infusion bottles, halogenated butyl rubber stopper (chlorinated) for injections, and aluminum plastic combined caps for infusion bottles clarify?	• Various types of glass used for pharmaceutical packaging as per USP Type I - borosilicate glass our manufacturer packaging is up to mark with USP specification. Study results for the test of leachable have been submitted.
3.2.P.8	• The submitted long term stability data of Finished Pharmaceutical Product manufactured from API source of Zhejiang Haichang Pharmaceutical Co., Ltd is of different duration for various batches briefed below. Batch# R190907, …. 6 Months Batch# R190908…..18 Months Batch#R190909……36 Months Clarification is required. • Moreover, it must be justified that the stability data of 36 months could be performed for batch# R190909 which was manufactured on 11-09-2019 for which 36 months has not been passed yet. • The long-term stability data of Finished Pharmaceutical Product manufactured from API source of Zhejiang Stellite Pharmaceutical Co., Ltd has been submitted upto 6 months only. Details of batches: R190904……6 months R190905……6 months R190906……6 months Clarification is required.	Firm has submitted revised data for stability summary, wherein manufacturing dates of previously submitted stability batches has been corrected as 09-2018 along with submission of stability reports of accelerated (6months) & long term (36 months) stability studies as per Zone-IV a condition.
Decision: Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility.		

b. Routine applications of Import submitted on Form 5F

116.	**Name, address of Applicant / Importer**	**M/s Seatle Private Limited, 45-KM Multan Road, Lahore.**
	Details of Drug Sale License of importer	**License No:** 05-351-0073-029396P **Address:** Seatle Private Limited, 45-KM Multan Road, Lahore. **Address of Godown:** NA **Validity:** 19-03-2022 (Renewal applied) **Status:** License to sell drugs in a Pharmacy **Renewal:** yes
	Name and address of marketing authorization holder (abroad)	LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona - Spain.
	Name, address of manufacturer(s)	**Drug product manufacturer:** LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain. **Water for injection 10ml:** Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France
	Name of exporting country	Spain
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No. 2020/01561) dated 20/06/2020 issued by Spanish Agency for Medicines and Health Products, Spain for Fratazid 1g powder and 10ml solvent for solution for injection (IV). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. Submitted COPP does not reflect any detail regarding manufacturer of the accompanying diluent i.e., 10ml WFI. **GMP:** Firm has submitted Legalized "Manufacturing authorization certificate no. 2279E" dated 26-11-2018, issued to LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain., wherein manufacturing facility for sterile products of B-lactam antibiotics" is confirmed. Firm has submitted Legalized "Manufacturing authorization certificate no. M 19/112" dated 13-06-2019, issued to Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France, wherein manufacturing facility for sterile products of Small Volume Parenteral" is confirmed.

		Copy of GMP certificate no. NCF/2024/001/CAT hs also been submitted for LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain valid upto 20-06-2020. Copy of Eudra GMP certificate no. 2020/HPF/FR/081 for Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France, valid upto 13-02-2023.
	Details of letter of authorization / sole agency agreement	Firm has submitted original legalized sole agency agreement. The agreement specifies that the manufacturer appoints M/s Seatle Private Ltd. to register their products in Pakistan as sole importer. A manufacturing agreement has also been submitted wherein M/s LDP-LABORATORIOS TORLAN, S.A. has declared Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France as manufacturer of the diluents i.e., Lidocaine HCl 1% ampoule & WFI ampoules for Ceftriaxone formulations to be imported by M/s Seatle.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No 17398 dated 22-06-2021
	Details of fee submitted	For Ceftriaxone: PKR 100,000/-: 18-8-2020 For WFI: PKR 100,000/-: 15-06-2020
	The proposed proprietary name / brand name	**FRATAZID INJECTION 1g IV**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial of powder contains: Ceftriaxone (as Sodium) …….. 1g Each Ampoule contains: Sterile Water for Injection ……10ml

	Pharmaceutical form of applied drug	Powder and solvent for solution for Injection
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	Drug product: USP Diluent WFI: European Pharmacopoeia
	Proposed Pack size	1's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Rocephin Injection 1g **(USFDA** Approved).
	For generic drugs (me-too status)	Oxidil of SAMI Pharma Pvt. Ltd. (Reg # 022422)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Qilu Antibiotics Pharmaceutical Co., Ltd. No. 849 Dongjia Town, Licheng District, Jinan, Shandong Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25^{o}C ± 2^{o}C and 60% RH The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence studies have been submitted against the Rocephin 1gm Injection.

	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type II glass vial for Powder Type I glass ampoule for WFI
	Stability study data of drug product, shelf life and storage conditions	**Drug product:** Firm has submitted stability study data of 3 batches of drug powder vial. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of all 3 batches is completed till 36 months. **Diluent WFI:** Firm has submitted stability study data of 3 batches of 10ml WFI. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of all 3 batches is completed till 60 months.

Evaluation by PEC:

Section#	Observations	Firm's response
1.3.4	Copy of valid Drug Sale License (DSL) issued by relevant licensing authority shall be submitted. Sole agency agreement / letter of authorization between applicant and	Firm has submitted copy of DSL valid till 19-03-2022 along with receipt of renewal application. Copy of sole agency agreement from M/s LDP-Laboratorios TORLAN,

	marketing authorization holder shall be submitted.	S.A., Ctra Barcelona, Spain in the name of M.s Seatle Provate Ltd., Lahore, Pakistan has been submitted.
1.5.6	The said section declares Pharmacopoeial reference as European Pharmacopoeia specifications, monograph of applied product is not available in European Pharmacopoeia.	Firm has revise specifications to USP , without submission of fee.
2.3	Table for literature references for the drug substance & drug product has not been submitted.	Submitted.
2.3.P.5.1	Assay limits are not as per the Pharmacopoeial monograph.	Revised Specification and Analytical Procedure as per USP is submitted
2.3.R.1.1	Submitted BMR declare the calculation of drug substance fill weight per vial on the basis of "Assay of anhydrous active substance" instead of "Assay of as is active substance"	Firm has submitted revised BMRs.
3.2.S.4.2	• Copy of drug substance specifications and analytical procedure applied by Drug product manufacturer shall be submitted. • The USP monograph of Ceftriaxone sodium, recommends the potency of Ceftriaxone in USP Ceftriaxone Sodium RS (µg/mg) for the calculation of Assay, whereas submitted drug substance analytical procedure applies the potency of Ceftriaxone sodium in %age.	• Revised Specification and Analytical Procedure applied by Drug Product Manufacturer as per USP is submitted
3.2.S.4.3	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	• AMV report is submitted form Drug product manufacturer.
3.2.S.4.4	• The specifications for Assay test mentioned in the batch analysis certificate from drug product manufacturer are different from that submitted in section 3.2.S.4.1. • The drug substance COA from the M/s Qilu Pharma is as per USP monograph whereas COA from M/s LDP Laboratories Torlan S.A. is as per the BP monograph. Justification shall be submitted in this regard.	• Revised COA, according to USP monograph and section 3.2.S.4.1 from Drug Product Manufacturer is submitted

3.2.P.2	• A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed. • Compatibility studies for the applied product shall be performed as per the instructions provided in individual label of the drug product.	• Submitted. • Compatibility study has been submitted for 1gm injection only with water for injection.
3.2. P.5.1	• Submitted drug product specifications does not include Assay limit for the content of dry powder injection i.e., an amount of Ceftriaxone Sodium equivalent to NLT 776 µg/mg of ceftriaxone • Test of crystallinity ha sot been included the drug product specifications.	• Revised Specifications according to USP including the test for crystallinity, are submitted.
3.2.P.5.2	• Sample preparation procedure mentioned in analytical method, does not include sample preparation for "Sample solution 2", as defined in the USP monograph of "Ceftriaxone for injection."	• Firm has submitted revised analytical procedure as per USP monograph
3.2.P.5.4	• Submitted COAs of drug product does not include Assay test for sample solution 2 as recommended by USP monograph of "Ceftriaxone for injection".	• Firm has submitted COA of recent batch of the drug product manufactured in May, 2022 wherein Assay analysis has been performed as per USP monograph.
3.2.P.6	• COA of primary / secondary reference standard including source and lot number shall be provided.	• Submitted.
3.2.P.8	• Submitted stability data does not reflect the performance of Assay test for sample solution 2 as recommended by USP monograph of "Ceftriaxone for injection". • Data of stability batches shall be supported by respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	• Please note that the Sample Preparation Method mentioned in Analytical Method does not include sample preparation for "Sample Solution 2" and only the preparation of Sample Solution 1"is included. However, we will include both the preparation of Sample Solution 1 and Sample Solution 2 by revising the specifications and analytical procedures

		according to the USP Monograph. • Submitted.

Decision: Registration Board deferred the applications of FRATAZID INJECTION 1g IV & FRATAZID INJECTION 500g IM for submission of CoPP with details of the composition and manufacturer of accompanying diluent.

	Details of fee submitted	Rs.50,000/- dated 01-02-2021
	The proposed proprietary name / brand name	**Hernix 40mg tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Neratinib Maleate equivalent to Neratinib ……. 40mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	In house
	Proposed Pack size	180's in HDPE bottle
	Proposed unit price	As per current pricing policy of DRAP
	The status in reference regulatory authorities	Nerlynx 40mg (Pierre Fabre Medicament , France)
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance..
	Name, address of drug substance manufacturer	Beijing Mesochem Technology Co., Ltd. Floor 23, Building 9, Lippo Plaza Economic and Technological Development Zone Beijing
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25±2ºC, 60%±5%RH. The stability study data is till 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical

		development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Nerlynx 40mg (Pierre Fabre Medicament, France) has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months.

Remarks of Evaluator[II]:

Section #.	Deficiencies	Firm's response
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studiesjasm, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture	• Drug product manufacturer has submitted, specifications, analytical procedure, analytical method verification studies & COAs for drug substance.
3.2.P.1	• Qualitative composition of applied product is not same as that of the innovator product.	• The excipients used complies with current pharmacopoeial monographs. These excipients are pharmaceutically inert substance and we have used these excipients below the IIG limit of FDA database as well as we have done extensive analysis of the product afer

		formulation and found satisfactory result of assay, dissolution results & impurity profile. Also w have done stability study during developmeht stage and found satisfactory result of the product. So we can conclude that these excipients are not incompatible with the API.
3.2.P.2	Compatibility studies of the Drug Substance(s) with excipients shall be submitted, since the qualitative composition of the formulation is not similar to innovator / reference product.	• The excipients used complies with current pharmacopoeial monographs. These excipients are pharmaceutically inert substance and we have used these excipients below the IIG limit of FDA database as well as we have done extensive analysis of the product afer formulation and found satisfactory result of assay, dissolution results & impurity profile. Also w have done stability study during developmeht stage and found satisfactory result of the product. So we can conclude that these excipients are not incompatible with the API.
3.2.P.5.1	• US FDA review document of the Innovator product i.e., Nerlynx, specifies the dissolution limit as "NLT Q in 30 minutes", whereas submitted specifications declare the dissolution limits as "NLT 75% in 45 minutes". Justify the variation in time point of dissolution. • Submitted specifications does not include test of content uniformity by way of Assay.	• The dissolution time for hernix tablet ha sbeen slected 45 minutes as perthe british Pharmacopeoia guidline, reference chapter monographof the BP in the dissolution tests for tablets & capsules, Appendix XII B1. I nthe reference chapter it I smentioned that , "Unless otherwise indicated in th emongraph, withdraw samples at 45 minutes". Hence, we have selected 45 minutes as a sungle time point.
3.2.P.5.4	• Test of content uniformity by way of Assay has not been performed at the time of batch release.	• Firm has submitted revised finished product specifications including test of content uniformity and committed to provide COA from next commercial batches as per revised specifications.
3.2.P.8	• Following shall be submitted:	• Submitted.

	i. Analytical record for stability studies including raw data sheets, chromatograms etc. ii. Complete batch manufacturing record.	

Decision: Deferred for following:

- **Scientific jusytification for difference in dissolution limits in terms of %age released and time point from that recommended by the US FDA for innovator product along with comparison of disintegration & release profile of the applied product & innovator product.**

	The status in reference regulatory authorities	TAD **(AIFA** Approved) complies EU Pharmacopoeia.
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Biomedica Foscama Industria Chimico-Farmaceutica S.P.A (Italy)
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API for accelerated at 40°C ±2°C / 75% ± 5% RH for 6 months as well as Long term testing which is conducted at 25°C ± 2°C / 65% ± 5% RH. The stability study data is till 36 months at ≤ 25°C.
	Module-III Drug Product:	Firm has submitted data of drug product and solvent (WFI) separately, including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not applicable being the innovator product
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	API: Type III glass vials with chlorobutyl stoppers Aluminium oversealed Solvent: Type-I glass ampoules
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The Long-term stability study data is conducted at 25°C ±2°C / 65% ± 5% RH for 36 months. Now the firm has submitted 18 months long term stability studies data as per Zone IVb conditions, detailed as under: **Batch# / Initial date / Duration** 201007 / 07-2020 / 18 months 201008 / 07-2020 / 18 months 201009 / 07-2020 / 18 months Firm has claimed 36 months shelf life on basis of above submitted data.
	Details of diluent:	**Composition:** Water for injection **Container closure:** 4ml Type I glass ampoule. **Manufacturer:** BIOMEDICA FOSCAMA Industria Chimico-Farmaceutica, S.p.A. Via Morolense n.87, 03013 Ferentino (FR) Italy. **Stability data:** Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The Long-term stability study data at 30°C ±2°C / 75% ± 5% RH has been submitted for 9 months only.

Evaluation by PEC^{II}:
Clinical profile of the applied product is as under:

- **Therapeutic indications:**

Prophylaxis of neuropathy following chemotherapy treatment with cisplatin or analogue.

- **Pharmacotherapy category:**

Antidotes, ATC code: V03AB32

- **Dosage:**

The generally recommended daily dose of TAD in patients receiving cisplatin or analogue chemotherapy is 1.5 g / m2 (corresponding to 2.5 g) administered slowly intravenously.

- **Contraindications:**

Hypersensitivity to the active ingredient.

- **Pharmaceutical description:**
  The drug substance is lyophilised in bulk form and then the bulk lyophilised powder is filled in glass vials.

Section#	Observation	Firm's response
1.5.2	Strength per unit is mentioned as Glutathione powder 600mg instead of Glutathione sodium.	Firm has corrected label claim without submission of fee.
1.5.6	Pharmacopoeial reference for applied product is stated as European Pharmacopeia, whereas European monograph is not available for applied product.	Firm has submitted statement from M/s Biomedica Foscama that the TAD 600mg/4ml powder and solvent for infusion state that the product is contained in packaging in compliance with European Pharmacopoeia.
3.2.P.2.6	Compatibility studies shall be performed with the diluent specified in individual label of the drug product.	Firm has submitted stability study of 8hours after reconstitutiton at 25$\pm$2^{o}C.
Diluent		
3.2.P.3.1	Details of the manufacturer of diluent shall be submitted.	
3.2.P.8.3	Long term stability studies data of diluent shall be submitted as per Zone Iva conditions till claimed shelf life i.e., 60 months.	Firm has submitted long term stability studies data of three batches as per Zone IVa for 18 months.

Decision: Deferred for regulatory status of applied formulation in other reference regulatory authorities alongwith its indications, precautions, contra indications etc.

	For generic drugs (me-too status)	--
	Module-II (Quality Overall Summary)	Firm has submitted summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Carbogen Amcis B.V. Nieuweweg 2A, Veenendaal, 3901BE, Netherlands
	Module-III Drug Substance:	Firm has submitted Certificate of Suitability (R1-CEP 1998-059 - Rev 08) issued by EDQM on 07-01-2022.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturers, manufacturing process and control of critical steps validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, characterization of impurities, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Amber glass-type III
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40^{o}C ±2^{o}C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30^{o}C ±2^{o}C / 65% ± 5% RH for 36 months

Evaluation by PEC:
Initially the application was submitted from M/s Sitech Pharmaceuticals Pvt Ltd. dated 04-03-2021, while subsequently M/s Angelini Pharmaceuticals (Pvt) Ltd. has submitted the new Form 5F of same product to be imported from the same principal along with the documents detailed below:

Name, address of Applicant / Importer	M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon City Barki Road, Lahore, Pakistan
Details of Drug Sale License of importer	License No: 05-352-0068-047191D Address: 44 Commercial Imperial Block, Paragon City, Barki Road, Lahore, Pakistan Address of Godown: Same as above Validity: 16 November 2023 Status: License to sell drugs as distributor
Dy. No. and date of submission	Dy.No 31443 dated 15-11-2021
Details of fee submitted	Rs.75,000/- dated 22-10-2021
Details of Letter of Withdrawal from M/s Sitech	Firm has submitted copy of letter from M/s Sitech Pharmaceutical Pvt. Ltd., dated 11-10-2021 stating that "We SiTech Pharmaceuticals (Pvt.) Ltd withdrew from our application of registration of Dedrogyl 10ml oral drops in favor of Angelini Pharmaceuticals (Pvt} Ltd."
Details of NOC from M/s Sitech	Firm has submitted copy of letter from M/s Sitech Pharmaceutical Pvt. Ltd., dated 06-05-2021 stating that "We have submitted our application for registration of drug Dedrogyl 10ml oral drops (Calcifediol l5mg/l00ml) to DRAP Pharma Evaluation Cell on February 24, 2021. Now the exporter and our principal M/s Medexport Italia Rome, Italy has requested to withdraw the application, and instead will be resubmitted by their new distributor/importer M/s. Angelini Pharmaceuticals (Pvt) Ltd. having office at 44 Commercial Imperial Block, Paragon City, Barki Road Lahore. This decision is with our mutual understanding and consent. We have no objection for this and DRAP may process the registration application of drug Dedrogyl 10ml oral drops (Calcifediol 15mg/100ml) submitted by new distributor. We would be grateful, if you please consider & process application of above product submitted by M/s. Angelini Pharmaceuticals (Pvt) Ltd."
Details of letter of authorization / sole agency agreement from Exporter	Letter of authorization issued by Laboratorio Farmeceutico SIT Specialita Igienico terapeuti S.r.l Italy in name of M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon City Barki Road, Lahore, Pakistan for the import of marketing of Dedrogyl 15mg/100mml oral

	soulton drops in Pakistan, being exported from M/s Medexport italia. An authorization letter from M/s Med Export Italia has also been submitted stating as under: "We hereby confirm that our previous authorization to M/s SiTech Pharmaceuticals (Pvt) Ltd. located at SF - 07, 4th Floor, Shahnaz Arcade 158, Shaheed-e-Millat Road, BYJCHS, Karachi Pakistan is no longer valid and now M/s Angelini Pharmaceuticals (Pvt} Ltd. having office at 44 Commercial Imperial Block, Paragon City, Barki Road, Lahore, Pakistan is authorized to import, distribute, market and also handle regulatory matters of this product in the territory of Pakistan."

The letter of authorizations has been issued form the drug product manufacturer i.e., Laboratorio Farmaceutico S.I.T S.r.l Via Cavour 70, 27035 Mede (PV), Italy and Exporter i.e., M/s Medexport Italia Via Alcide De Gasperi 35, 00165 Rome (RM), Italy while submitted COPP mentions Market Authorization holder as Derma Pharma S.A.R.L. 25, Rue la Boetie, 75008 Paris – France.

Decision: Registration Board decided as follows:

a. Acceded the request of M/s Sitech Pharmaceutical Pvt. Ltd. for withdrawal of their submitted application of Dedrogyl 10 ml oral drops dated 04-03-2021 vide Dy. No 7174 and declared it as disposed off.

b. Deferred the application of M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon City Barki Road, Lahore, Pakistan for submission of complete dossier of applied product.

Case no. 05 Registration applications of drugs for which stability study data is submitted

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided following documents as per checklist approved by the Registration Board in its 293rd Meeting:

Sr.#	Data requirement	Firm's submission
1.	Reference of previous approval of applications with stability study data of the firm.	Firm has referred to onsite inspection report of their product "Velbuvir 400/100mg Tablet", which was presented in 292nd meeting of Registration Board. Date of inspection: 23-05-2019 According to the report, following points were confirmed: a) Firm has HPLC software 21CFR compliant. b) Audit teai lreports were available. c) Firm's stability chambers were calibrated and equipped with digital data loggers and alarms.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Submitted as per following details: **Canagliflozin hemihydrate:** RD-CLF (hemihydrate)-201705051 **Metformin HCl:** 6417ML2RMI
3.	Method used for analysis of API along with COA.	Analytical method for both APIs have been submitted from relevant API manufacturers as well as from M/s Wilshire Laboratories.
4.	Stability study data of API from API manufacturer	**Canagliflozin hemihydrate:** Firm has submitted both accelerated (40°C ± 2°C & 75± 5%RH) stability studies & long term (30°C ± 2°C & 65%± 5%RH) stability studies reports of three batches. **Metformin HCl:**

<table>
<tr><td></td><td></td><td>Firm has submitted both accelerated (40°C ± 2°C & 75±5%RH) stability studies (6 months) & long term (30°C ± 2°C & 65%±5%RH) stability studies (60 months) reports of three batches.</td></tr>
<tr><td>5.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>Canagliflozin hemihydrate: Manufacturing License (No. Su 20160512) for M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si road, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province, China issued by Jiangsu Food & Drug Administration valid upto 2-12-2025.
Metformin HCl: Copy of GMP certificate (Certificate#. NEW-WHO-GMP/CERT/AD/104179/2021/11/37725) issued by FDA Maharshtra for M/s Ipca Laboratories Ltd., H-4, MIDC, Waluj, Aurangabad, 431136, Mahrashtra, India valid upto 27-10-2024.</td></tr>
<tr><td>6.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>• Canagliflozin hemihydrate: Copy of commercial invoice (Invoice# CYI18153) dated 20-02-2017 has been submitted. (Quantity: 6 Kg)
Copy of Goods declaration has also been submitted.
Metformin HCl: Copy of commercial invoice (Invoice# 21/1212016) attested by AD DRAP I&E dated 02/01/2017. (Quantity: 2000 Kg)</td></tr>
<tr><td>7.</td><td>Authorized Protocols/SOP for the development & stability testing of trial batches.</td><td>Firm has submitted SOP for new product development & stability protocol.</td></tr>
<tr><td>8.</td><td>Method used for analysis of FPP</td><td>Drug product analytical method has been submitted.</td></tr>
<tr><td>9.</td><td>Drug-excipients compatibility studies (where applicable)</td><td>Firm has referred to the formulation of innovator product for establishing drug-excipient compatibility.</td></tr>
<tr><td>10.</td><td>Complete batch manufacturing record of three stability batches.</td><td>Firm has provided Batch Manufacturing Record for all the three batches of both strengths.</td></tr>
<tr><td>11.</td><td>Record of comparative dissolution data (where applicable)</td><td>Comparative dissolution studies have been submitted in three physiological buffers i.e., pH 1.2, pH 4.5 & pH 6.8 against the innovator product of Invoka Met, with acceptable values of f_2.
<table>
<tr><th></th><th>Trial Product</th><th>Innovator product</th></tr>

</td></tr>
</table>

12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for both accelerated & long-term stability studies, including chromatograms, raw data sheets etc..
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail reports have not been submitted instead a document titled "Declaration of Software Quality" from Agilent technologies has been submitted.
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	--

Remarks of Evaluator^{II}:

Sr.#	Observation	Firm's response
1.	Method of dilution preparation for Assay test mentioned in "SOP for New Product Development" is different from that mentioned in "Analytical Test method for Kanlif-M 50/1000 tablets (Document# WS-QC-TM-K-08)".	Revised SOP for product development has been submitted as per the product test method.
2.	Dissolution limits of time of innovator are 20 minutes for metformin while applicant has proposed 30 minutes and 45 minutes for Canagliflozin instead of 30 minutes.	Firm has referred to the 293rd meeting of registration Board while cuggestinig that the appliedproduct falls in the category of immediate relase drugs and now has revised their specifications of dissolution as per innovator's literature.
3.	Complete raw data sheets (including information of sample & standard weights, dilution factors, calculation formulas etc.) for the whole stability studies shall be submitted.	Submitted.
5.	GMP certificate for Metformin HCl has been submitted of M/s Ipca laboratories, Madhya Paradesh, whreas API has been imported form M.s IPCA Labs Aurangabad.	Copy of GMP certificate (Certificate#. NEW-WHO-GMP/CERT/AD/104179/2021/11/37725) issued by FDA Maharshtra for M/s Ipca Laboratories Ltd., H-4, MIDC, Waluj, Aurangabad, 431136, Mahrashtra, India valid upto 27-10-2024.
7.	Submitted batch manufacturing records include dispensing sheets only.	Complet BMRs including details of compression, coating & packaging have been submitted for all three stability batches of both strengths.
8.	Audit trial reports have not been submitted instead a document titled "Declaration of Software Quality" from Agilent technologies has been submitted.	Digital Sytem activity log report has been submitted for the duration of stability studies.
9.	Digital data logger for temperature and humidity monitoring of stability chambers has not been submitted instead manual record of stability chambers has been submitted for both accelerated and long term conditions.	Submitted.

Decision: Registration Board approved Kanlif-M Tablet 50/500mg & Kanlif-M Tablet 50/1000mg with Innovator's specifications.

- **Manufacturer shall submit fee of Rs. 7500/- for each strength for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Furthermore, the Board diretced the firm to adopt dissolution specifications as per innovator for commercial batches.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	COA of API	Yes
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Dexlansoprazole 22.5% DDR pellets: Copy of GMP certificate issued to M/s Vision Pharmaceuticals, Islamabad by DRAP, valid till 10.02.2022.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	NA
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

On-site inspection Report

Name of Manufacturer	M/s Winlet Pharmaceuticals.
Physical Address	30km Lahore Sargodha Road.
Drug Manufacturing License No. and validity	000874 by way of formulation Valid till 20-02-2023.
Date of Inspection.	14-06-2021
Purpose of Inspection	Verification of Authenticity of Stability Data for Purpose of Registration of Drugs with reference to DRAP's letter No. F.1-2/2020-PEC dated 16-03-2021 .
Name of Inspector	1. Mr. Muzammil Waheed. (Director DTL, Faisalabad) 2. Ms. Maham Misbah Assistant Director, DRAP, Lahore.
Name of firm Representatives	1. Mr. Khawaja Shahid Iqbal (CEO) 2. Ms. Misbah Khawaja (Director) 3. Dr. Qamar Soni (Director) 4. Mr. Gulfam Soni (Director) 5. Mr. Kaleem ullah (Production Incharge) 6. Mr. Aslam Hayat (Quality Control Manger)

Sr. No	Question	Observations
1	Whether the firm has documents confirming import of API?	Not Applicable. Firm had locally purchased Dexlansoprazol 22. 5pc DDR pellets from M/s. Vision Pharmaceuticals. (Batc No. DLP519 Manufacturing date 09-19 Expiry date 08-22)
2	What was the rationale behind selecting the particular manufacturer of API?	The rationale behind selecting the manufacturer was the cGM status of M/s Vision Pharmaceuticals, as informed by th management of the firm.
3	Whether documents confirm the import of API reference standard and impurity standards?	Not applicable. Firm had purchased secondary workin standard of API and impurity standards from princip manufacturer.
4	Whether the firm has certificate of Analysis of the API, reference standards and impurity standards from exporter?	Firm had certificates of analysis for the API, working standar and impurity standards.
5	Whether the firm has any approval of API or GMP certificate of API manufacturer issued by regulatory authority of country of origin?	Firm had valid cGMP compliance certificate of M/s Visio Pharmaceuticals issued by DRAP.
6	Whether firm use API manufacturer method of testing?	Yes.
7	Whether firm has stability studies reports on API?	Yes.
8	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	Degradation products had not been quantified.
9	Whether firm has method for quantifying the impurities in the API?	Yes, provided by the vendor.
10	Whether firm has some remaining quantities of the API, its reference standard and impurities standards?	Firm had remaining quantities of API.
11	Whether firm has used pharmaceutical grade excipients?	No excipients used in the process. Firm is only filling the pelle in capsules.
12	Whether firm has documents confirming the import of the used excipients?	Not applicable.
13	Whether firm has test reports and other records on the excipients used?	Not applicable.
14	Whether firm has written and authorized protocols for the development of capsules?	Firm had written protocols for product development. Howeve the protocols required improvement.

15	Whether firm has performed Drug-excipient compatibility studies?	Not applicable.
16	Whether firm has performed comparative dissolution studies?	Firm had not procured innovator's product. Comparative dissolution studies had been performed against Razodex capsules (Getz Pharma)
17	Whether firm has product development (R&D) section?	No. Capsules were filled with pellets using semi-automatic capsule filling machine installed in the commercial production area.
18	Whether firm has necessary equipment available in product development section for development of finished product?	Firm was advised to obtain capsule polishing machine.
19	Are the equipment in product development section qualified?	Equipment of commercial production was used. Installation and Operational qualification had been done for the equipment, as per documents shown to the panel. Performance qualification had not been done.
20	Whether firm has proper maintenance / calibration / re-qualification program for the equipment used in PD section?	Available for major equipment used in product development.
21	Whether firm has qualified staff in product development section with proper knowledge and training in product development?	No. Separate staff for product development was not available.
22	Whether firm has manufactured three stability batches for the stability studies of finished product tablets as required?	Firm had manufactured three stability batches each for the stability studies of finished products Dexlansoprazole 30mg and Dexlansoprazole 60mg. BMRs were shown to the panel. The firm was advised to improve its BMRs.
23	What was the criteria for fixing the batch size of stability batches?	As stated by the firm's management, criteria for fixing batch size of stability batches was the available quantity of API and DRAP guidelines for stability testing.
24	Whether firm has complete record of production of stability batches?	Firm had BMRs of all relevant stability batches.
25	Whether firm has protocols for stability testing of stability batches?	Yes. However, the conformance to protocols required improvement.
26	Whether firm has developed and validated the method for testing of stability batches?	Firm had used the testing method of vendor of pellets. Validation report was shown to the panel.
27	Whether firm has method transfer studies in case when the method of testing being used by your firm is given by any other lab?	No method transfer protocol was followed.
28	Whether firm has documents confirming the qualification of equipments / instruments being	Firm was advised to get testing equipment calibrated from authorized body, without calibration the test results are not acceptable. Further the firm was advised to attach printers with all weighing balances, pH meter and conductivity meter for

	used in the test and analysis of API and the finished drug?	traceability and also advised to conduct daily verification of weighing balances.
29	Whether firm has stability indicating method of analysis?	No.
30	Whether firm has HPLC software 21CFR compliant?	No. (amendments made in the data could not be detected without CFR 21 compliant software). Data used in the stability studies is highly unreliable
31	Whether firm could show you Audit Trail reports ?	Yes, however, time and date could be changed in the HPLC software.
32	Whether firm has some remaining quantities of degradation products and stability batches?	Firm had remaining quantities of stability batches. Degradation products had not been isolated.
33	Whether firm has commitment batches kept on stability testing?	Yes.
34	Whether firm has valid calibration status for the equipment used in production and analysis?	Firm was advised to get testing equipment calibrated from authorized body, further advised to attach printers with all weighing balances, pH meter and conductivity meter and also advised to conduct daily verification of weighing balances.
35	Do proper and continuous monitoring and control are available for stability chamber?	Firm was advised to install proper alarm system in the stability chambers in order to monitor and control excursions. Excursions were seen in the log of data of stability chambers (both real time and accelerated study chambers)
36	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Management of the firm was given several advices related to cGMP. It was advised to: Maintain proper ledgers of packing materials, improve the BMRs and make them more comprehensive, maintain record of deviations, improve testing protocols and SOPs, develop and maintain analyst logbooks for raw data, procure traceable working and impurity standards, impart training of analysts, develop a fully functional QA department, conduct complete testing of primary packing materials, conduct supplier evaluation of vendors of primary packaging materials, procure traceable dead weights for verification of balances, use PDA detector instead of SD-UVA detector.

Remarks:-

With reference to DRAP, Islamabad letter No. F.1-2/2020-PEC dated 16-03-2021 the inspection of M/s Winlet Pharmaceuticals, 30km Lahore-Sargodha Road was conducted by the panel with the remarks that authenticity of the stability data could not be verified without equipment qualification, method transfer protocols and CFR compliant Software. Submitted for further necessary action, please.

Decision of 316th meeting: Registration Board deferred the case for submission of clarification form the firm upon following observations reported by Inspection panel:

- No method transfer protocol was followed for the drug product analytical method.
- Performance qualification had not been done for the manufacturing equipments used in trial batch manufacturing.
- Firm was advised to get testing equipment calibrated from authorized body, without calibration the test results are not acceptable.
- Amendments made in the data could not be detected without CFR 21 compliant software). Data used in the stability studies is highly unreliable
- Authenticity of the stability data could not be verified without equipment qualification, method transfer protocols and CFR compliant Software.

Firm's response:

Observations	Firm's response
No method transfer protocol was followed for the drug product analytical method.	We have already opted comparative analytical testing method for studies of Dexlansorpzole DDR Pellets provided by Manufacturer (Vision Pharma), because the same batch sample was tested in our laboratory as previously tested in manufacturer lab, and the test results of both lab are comparable to satisfactory level (Assay, dissolution & CDP etc). Now we have documented this method transfer studies protocol for commercial scale production of Winzole 30mg & 6mg capsules.
Performance qualification had not been done for the manufacturing equipments used in trial batch manufacturing.	The manufacturing equipments (i.e capsules filling machine, blister machine which are used in trial batch manufacturing are qualified) and the Performance qualification is done and available for all manufacturing equipments and updated it for commercial scale production of Winzole 30mg & 6mg capsules.
Firm was advised to get testing equipment calibrated from authorized body, without calibration the test results are not acceptable.	All the major equipments are now calibrated from authorized bodies and the standard using for calibration are National Institute of Standards and Technology (NIST) traceable.
Amendments made in the data could not be detected without CFR 21 compliant software). Data used in the stability studies is highly unreliable	The HPLC performance of the stability studies was evident from the chromatographic record in the system and was also traceable from the respective equipment log book. Now the HPLC binary gradient system with 21 CFR compliance software has also been installed and now in working condition.
Authenticity of the stability data could not be verified without equipment qualification, method transfer protocols and CFR compliant Software.	It is humbly submitted that the authenticity of the stability data is traceable through the available records in the HPLC system, equipment utility log books, lab note books & other records available at the plant. For the stability studies data (submitted for evaluation) of Winzole 30mg & 60mg capsules, all the data, calculations, are available with date in equipments/machine log books , lab note books and the panel inspection team had checked this data for authenticity in detail. It is also humbly submitted that we have done the qualification of equipments and the record is hereby submitted for ready reference.

Decision of 320th meeting: Registration Board approved Winzole Capsule 30mg & Winzole Capsule 60mg
with Innovator's specifications.

- **Manufacturer shall submit fee of Rs. 7500/- for each strength for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

127.	**Name and address of manufacturer / Applicant**	**M/s Pharmevo Private Limited., Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi**
	Brand Name +Dosage Form + Strength	**IRMAX 100+5MG TABLET**
	Composition	Each film coated tablet contains: Irbesartan…….100mg Amlodipine ...5mg
	Diary No. Date of R& I & fee	Dy. No 1660 dated 29-Aug-2013, Rs.50,000/-
	Pharmacological Group	Antidiabetic
	Type of Form	Form-5D
	Finished product Specifications	Manufacturer's specifications
	Pack size & Demanded Price	7's, 10's, 14's, 20's, 28's, 30's & As per PRC
	Approval status of product in Reference Regulatory Authorities	AIMIX Approved by JAPAN
	Me-too status (with strength and dosage form)	Not Applicable
	GMP status	GMP inspection dated 23-02-2018 showed that the firm was considered to be operating at an acceptable level of compliance with GMP standards
	Remarks of the Evaluator :	
	Previous decision: The application was initially presented in 260th meeting of Registration Board wherein case was deferred for proof of approval status of same formulation in reference countries and Pakistan. Subsequently firm referred to the Aimix tablet approved by PMDA of Japan and submitted stability studies data against which following observations were communicated to firm: • Valid GMP certificate of M/s Prudence Pharma Chem., Gujarat, India shall be submitted. • Content Uniformity test has not been performed for Amlodipine. Justification shall be submitted. • Justification/Clarification needed as in contrary to Japanese Pharmacopoeia monograph for applied formulation firm has submitted different specifications and parameters for the Assay & Dissolution test. • Firm had submitted revised stability studies data along with documents as per exemption checklist, detailed as below:

	monitoring of stability chambers (real time and accelerated)	

Remarks by Evaluator[ii]

Firm has not submitted comparative dissolution data for both strengths while referring to the batch release data performed as per JP monograph.

Decision of 317th meeting: Registration Board deferred the applications of IRMAX 100+5mg tablet & IRMAX 100+10mg tablet for submission of Comparative Dissolution Profile data against the relevant strength of Innovator drug product.

Firm's response: Firm ha ssubmitted CDP studies gainst the innovator product of Iluamix tablets manufactured by M/s Sawai Pharmaceutical Co., Ltd., Japan, in three dissolution medium of Physiological pH 1.2, 4.5 & 6.8, with acceptable results for similarity factor f2.

Decision: Registration Board approved Irmax 100+5mg tablet & Irmax 100+10mg tablet with Innovator's specifications.

- **Manufacturer shall submit fee of Rs. 7500/- for each strength for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided following documents dated 23-02-2021, as per checklist approved by the Registration Board in its 293rd Meeting:

Sr.#	Data requirement	Firm's submission
1.	Reference of previous approval of applications with stability study data of the firm.	Firm has referred to onsite inspection report of their product **"HILVEL 400mg + 100mg** (Sofosbuvir +Velpatasvir)", which was conducted on 14th December, 2017 and was presented in 277th meeting of Registration Board held on 27-29th December, 2017. Registration Board decided to approve registration of "HILVEL 400mg / 100mg (Sofosbuvir + Velpatasvir" by M/s. Hilton Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Following two observations were reported in the report: i. The HPLC software is 21 CFR compliant. ii. Audit trail on the testing reports of Hilvel Tablets 400mg+100mg is available. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Submitted.
3.	Method used for analysis of API along with COA.	Analytical method for APIs has been submitted from API manufacturer as well as from M/s Highnoon Labs..
4.	Stability study data of API from API manufacturer	Firm has submitted both accelerated (40°C ± 2°C & 75±5%RH) stability studies & long term (25°C ± 2°C & 60%±5%RH) stability studies reports of three batches for 6 & 24 months respectively.
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate eissued by Jiangsu Changzhou Drug Administration has been submitted valid upto 20-02-2023
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice# CYI19476) attested by AD I&E DRAP, Karachi dated 06-02-2020 has been submitted. (Quantity: 1.5 Kg.)

7.	Authorized Protocols/SOP for the development & stability testing of trial batches.	Firm has submitted SOP for new product development & stability protocol.
8.	Method used for analysis of FPP	Drug product analytical method has been submitted.
9.	Drug-excipients compatibility studies (where applicable)	Firm has referred to the formulation of innovator product for establishing drug-excipient compatibility.
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the three batches of both strengths.
11.	Record of comparative dissolution data (where applicable)	Comparative dissolution studies have been submitted in three physiological buffers i.e., pH 1.2, pH 4.5 & pH 6.8 against the Modton Tablet of M.s Nabiqasim Industries with acceptable values of f_2.
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for both accelerated & long-term stability studies, including chromatograms, raw data sheets etc..
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail reports have been submitted.
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

	Trial Product	**Compoarator product**
Name	Agohil tablet 10mg	Modton tablet 25mg
Batch #	AGO-418204-5	MAB002

Remarks of Evaluator[II]:

Sr.#	**Observation**	**Firm's response**
1.	Stability studies of drug substance shall be submitted as per Zone-IVa conditions.	Firm has submitted long term stability studies of three batches from drug substance manufacturer till 24 months as per Zone IVa.
2.	Sample and standard concentration applied for Assay test of drug substance by M/s Hilton is different from that recommended in the analytical method from the drug substance manufacturer for the Assay of Agomelatine.	Assay of Agomelatine has been carried out as per concentration of drug substance manufacturer. Calculation sheet with raw data & revised specification of APl testing are submitted.
3.	Results for CDP studies in pH 6.8 buffer have not been submitted.	Firm has submitted CDP studies in pH 6.8 buffer against the Modton tablet of M/s Nabiqasim with acceptable value of f2 factor.
4.	Justification shall be submitted for not performing CDP studies against the innovator product.	Innovator product is not available in the market. Therefore, generic comparator product Modton Tablets 25mg is being used for CDP studies. This generic product has already been registered from DRAP, registration number 085661

5.	Firm shall submit fee of Rs. 7,500 for pre-approval change in product specifications from that initially submitted in Form 5D dossier, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm has submitted fee of Rs. 75,00/- vide deposit slip# 24339917.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 06 Registration applications for local manufacturing of (Human) drugs on Form 5
Deferred cases

130.	Name and address of manufacturer / Applicant	M/s GT Pharma Pvt Ltd,23km, Raiwind Road, Lahore contract manufacturing from M/s Medisave Pharmaceuticals, Plot 578-579, Sundar Industrial Estate, Lahore, Pakistan

	GMP status	The firm is granted GMP certificate based on inspection conducted on 13-08-2020.
	Remarks of the Evaluator.	The R&I receipt has been verified from the Incharge R&I against the diary no. mentioned above.
	Decision: Approved with Innovcator's specifications.	

Agenda of Evaluator PEC-III

Case No. 01 Registration applications of cases of PINSTECH

DRAP Authority in its **133rd meeting** held on April 13, 2022 while considering the request of PINSTECH for exemption of Form 5F for radiopharmaceuticals decided as under:

I. The Authority decided to grant 06 months relaxation under SRO 713(1)/2018 from Form 5-F (CTD) for following radiopharmaceuticals as CTD is not applicable for radiopharmaceuticals:
   a. DISIDA (Hepatobiliary Agent in Diagnosis of Hepatocellular Carcinoma)
   b. DMSA (Renal Static Imaging Agent: When radiolabeled with Technelium-99m)
   c. PINTHERA (Radiolabeled Somatostatin Receptor analogue for treatment of neuroendocrine Tumors).
   d. HYNIC-TATE (For diagnosis of Neuroendocrine Tumors).
   e. [131 I-MIBG]iobenguane 1131 (Treatment-resistant neuroblastoma (NB), unresectable or metastatic pheochromocytoma (PC) and paraganglioma (PG).

DRAP Authority further in its **134th meeting** held on 29-04-2022 further Advised PE&R Division to process applications of radiopharmaceuticals of M/s PINSTECH on priority / out of queue, wherein relaxation in the Form 5-F was granted by the Authority.

Accordingly, the following applications have been received and evaluated and presented before the Board for consideration.

169.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN DISIDA (Freeze dried powder for reconstitution)
	Composition	N-(2,6 Diisopropyl- phenyl carbamoyl methyl iminodiacetic acid)…… 20mg Stannous (II) Chloride Dihydrate……0.24mg
	Diary No. Date of R& I & fee	Dy. No 17772: 17-06-2022 PKR. 75,000/-: 17-06-2022
	Pharmacological Group	Hepatobiliary agent in diagnosis of hepatocellular carcinoma
	Type of Form	Form 5D

	Finished Product Specification	Not submitted
	Pack size & demanded price	Rs. 900 / Vial, 5's
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia** (HEPATOLITE kit for production of Technetium(99mTc) disofenin powder for injection multidose vial) Powder for Injection (White crystalline plug)
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of innovator's product	Indicated as an adjunct in the diagnosis of hepatobiliary disease
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years. • Provide reference of finished product specification whether pharmacopoeial, in-house or as per innovator's product. Submit copy of official monograph in case of pharmacopoeial specifications. • Revise your label claim as per the innovator's drug product as per follows, since you have mentioned chemical name of Disofenin in the label claim. Each vial contains: Disofenin……. 20 mg Stannous chloride dihydrate……. 0.24 mg
	Decision: Registration Board decided to approve the product with following label claim: **Each vial contains:** **Disofenin……. 20 mg** **Stannous chloride dihydrate……. 0.24 mg** **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Finished product specification along with applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Revised form 5D along with relvant annexures for the revised label claim.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
170.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN DMSA (Freeze dried powder for reconstitution)
	Composition	Meso-2,3-dimercaptosuccinic acid…. 1 mg Stannous chloride dehydrate…….0.4 mg Ascorbic acid……0.7 mg Inositol……50.0 mg
	Diary No. Date of R& I & fee	Dy. No 17771: 17-06-2022 PKR. 75,000/-: 17-06-2022
	Pharmacological Group	Renal static imaging agent
	Type of Form	Form 5D
	Finished Product Specification	Not submitted
	Pack size & demanded price	Rs. 800 / Vial, 5's
	Approval status of product in Reference Regulatory Authorities.	**TGA Australia**

		(RADPHARM DMSA kit for the production of Technetium (99mTc) succimer powder for injection multidose vial) Lyophilised white powder
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of innovator's product	Used as a static renal imaging pharmaceutical and is particularly suited for evaluation of renal cortex, deliniation of renal space occupying lesions, determination of intrarenal function, distribution and identification of ectopic renal sites.
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years. • Provide reference of finished product specification whether pharmacopoeial, in-house or as per innovator's product. Submit copy of official monograph in case of pharmacopoeial specifications. • Revise your label claim as per the innovator's drug product as per follows: Each vial contains: Succimer…… 1 mg
	Decision: Registration Board decided to approve the product with following label claim: **Each vial contains:** **Succimer…… 1 mg** **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Finished product specification** • **Revised form 5D along with relvant annexures for the revised formulation along with the submission of applicable fee that is 75,000/- for pre-registration variation for change in composition of the applied product as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
171.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	Iodine-131 Meta-iodobenzylguanidine (Iobenguane I-131) Injectable solution
	Composition	Iobenguane I 131…….. 555 MBq/mL (15 mCi/mL)
	Diary No. Date of R& I & fee	Dy. No 17768: 17-06-2022 PKR. 75,000/-: 17-06-2022
	Pharmacological Group	Neuroectodermal agent in diagnosis of pheochromocytoma
	Type of Form	Form 5D
	Finished Product Specification	Not submitted
	Pack size & demanded price	Rs. 900 / Vial
	Approval status of product in Reference Regulatory Authorities.	**USFDA** AZEDRA (iobenguane I 131) 555 MBq/mL (15 mCi/mL) injection (sterile, clear, colorless to pale yellow injectable solution)
	Me-too status	NA

	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of innovator's product	Radioactive therapeutic agent indicated for the treatment of adult and pediatric patients 12 years and older with iobenguane scan positive, unresectable, locally advanced or metastatic pheochromocytoma or paraganglioma who require systemic anticancer therapy
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years. • Provide reference of finished product specification whether pharmacopoeial, in-house or as per innovator's product. Submit copy of official monograph in case of pharmacopoeial specifications. • Revise your label claim as per the innovator's drug product as per follows: Each vial contains: Iobenguane I 131…….. 555 MBq/mL (15 mCi/mL)
	Decision: Registration Board decided to approve the product with following label claim: **Each vial contains:** **Iobenguane I 131…….. 555 MBq/mL (15 mCi/mL)** **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Finished product specification** • **Revised form 5D along with relvant annexures for the revised formulation along with the submission of applicable fee that is 75,000/- for pre-registration variation for change in composition of the applied product as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
172.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.

	Composition	DOTA-Tyr3-Octreotate, Somatostatin analogue conjugated with metal chelating moiety 1,4,7,10-tetraazacylododecane-1,4,7,10-tetraacetic acid (DOTA)….260ug per vial Lu-177….200mCi
	Diary No. Date of R& I & fee	Dy. No 17770: 17-06-2022 PKR. 75,000/-: 17-06-2022
	Pharmacological Group	Radiolabelled somatostatin receptor analogue for treatment of neuroendocrine tumours.
	Type of Form	Form 5D
	Finished Product Specification	Not submitted
	Pack size & demanded price	Rs. 150,000/ Vial
	Approval status of product in Reference Regulatory Authorities.	**USFDA** (LUTATHERA) Sterile, clear, colorless to slightly yellow solution for intravenous use
	Me-too status	NA

	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.
	Clinical indications of innovator's product	Radiolabelled somatostatin analog indicated for the treatment of somatostatin receptor-positive gastroenteropancreatic neuroendocrine tumours (GEP-NETs), including foregut, midgut, and hindgut neuroendocrine tumours in adults
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years. • Provide reference of finished product specification whether pharmacopoeial, in-house or as per innovator's product. Submit copy of official monograph in case of pharmacopoeial specifications. • Revise the applied dosage form from lyophilized powder to injectable solution as per the innovator's drug product along with submission of full fee of registration for pre-registration variation as per SRO No. F.7-11/2012-B&A/DRAP dated 7th May 2021. • Revise your label claim as per the innovator's drug product as per follows: Each vial contains: Lutetium Lu 177 dotatate……370 MBq/mL (10 mCi/mL)
	Decision: Registration Board decided to approve the product with following label claim: **Each vial contains:** **Lutetium Lu 177 dotatate……370 MBq/mL (10 mCi/mL)** **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Finished product specification** • **Revised form 5D along with relvant annexures for the revised formulation along with the submission of applicable fee that is 75,000/- for pre-registration variation for change in composition of the applied product as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	
173.	Name and address of manufacturer / Applicant	M/s Pakistan Institute of Nuclear Science & Technology, Nilore Islamabad.
	Brand Name +Dosage Form + Strength	PINSCAN (HYNIC-TATAE)
	Composition	HYNIC-[D-Phe1, Tyr3-octreotide] TFA salt 16 mcg EDDA (Ethylenediamine-N,N'-diacetic acid)10 mg
	Diary No. Date of R& I & fee	Dy. No 17769: 17-06-2022 PKR. 75,000/-: 17-06-2022
	Pharmacological Group	Somatostatin receptor analogue for treatment of neuroendocrine tumours.
	Type of Form	Form 5D
	Finished Product Specification	Not submitted
	Pack size & demanded price	Rs. 15,000/ Vial
	Approval status of product in Reference Regulatory Authorities.	**MHRA UK** TEKTROTYD 16 micrograms kit for radiopharmaceutical preparation

		(White or almost white lyophilisates)
	Me-too status	NA
	GMP status	Inspection report of the firm dated 17-05-2017 wherein the panel recommended renewal of DML was presented by the firm.444444443q
	Clinical indications of innovator's product	This medicinal product is for diagnostic use only. 99mTc-EDDA/HYNIC-TOC specifically binds to somatostatin receptors. After radiolabelling with sodium pertechnetate (99mTc) solution, the solution of 99mTcEDDA/HYNIC-TOC obtained is indicated in adult patients with gastro-enteropancreatic neuroendocrine tumours (GEP-NET) for localizing primary tumours and their metastases
	Remarks of the Evaluator[3].	• GMP inspection report conducted within a period of last three years. • Provide reference of finished product specification whether pharmacopoeial, in-house or as per innovator's product. Submit copy of official monograph in case of pharmacopoeial specifications. • Revise the applied formulation from a single vial containing both drug substance to two different vials each containing one drug substance as per the innovator's drug product along with submission of full fee of registration for pre-registration variation as per SRO No. F.7-11/2012-B&A/DRAP dated 7th May 2021. • Revise your label claim as per the innovator's drug product as per follows: Vial I contains: HYNIC-[D-Phe1, Tyr3-octreotide] TFA salt…16 µg Vial II contains: EDDA (Ethylenediamine-N,N'-diacetic acid)…10 mg
	Decision: Registration Board decided to approve the product with following label claim: **Vial I contains:** **HYNIC-[D-Phe1, Tyr3-octreotide] TFA salt……..16 µg** **Vial II contains:** **EDDA (Ethylenediamine-N,N'-diacetic acid)…….10 mg** **Firm will submit following documents and the Board Authorized its Chairman for issuance of registration letter.** • **Finished product specification** • **Revised form 5D along with relvant annexures for the revised formulation along with the submission of applicable fee that is 75,000/- for pre-registration variation for change in composition of the applied product as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Updated GMP certificate / inspection report of the firm conducted within a period of last three years.**	

Case No. 02 Registration applications of New section / New License

Case No. 02: M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi

M/s Biogen Pharmaceuticals, Rawalpindi has been granted new license (DML No. 000911) by way of formulation by Licensing division DRAP dated 13-02-2020. Now the firm has submitted following applications as per the details mentioned in the table below:

Name of Section	Considered till 317th RB meeting		Freshly applied	
	No of molecules	No of products	No of molecules	No of products
Dry Vial section (Cephalosporin)	03	12	-	-
Dry suspension section (Cephalosporin)	01	02	-	-
Capsule section (Cephalosporin)	02	02	-	-
Ampoule Section SVP (General)	05	07	-	-
Capsule section (General)	02	04	01	01
Dry Vial section (General)	03	04	-	-
Soft gel capsule general section	02	03	-	-
Hydrocortisone injection (steroid)	01	03	-	-
Sachet section (General)	01	01	-	-
Dry Vial section (Carbapenem)	02	03	-	-
Cream section (general)	02	02	-	-
Ointment section (General)	01	01	-	-
Lotion section (General)	01	01	-	-
Infusion Section (General)	-	-	02	02

Infusion Section (General): 02 Molecules / 02 Products

174.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Infusion section (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 1896: 20-01-2022
	Details of fee submitted	PKR 30,000/-: 04-01-2022
	The proposed proprietary name / brand name	**LINZOGEN 600mg/300ml Solution for Infusion**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial of 300ml Contains: Linezolid…..…600mg
	Pharmaceutical form of applied drug	Clear colorless liquid filled in glass vials
	Pharmacotherapeutic Group of (API)	Antibacterials for systemic use
	Reference to Finished product specifications	Innovators specs
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zyvox IV **(USFDA** Approved)
	For generic drugs (me-too status)	Nezkil Infusion by Continental pharma
	Name and address of API manufacturer.	Optrix Laboratories Pvt Ltd. Survey No. 145/A & 147, Ramalingampally (V), Bommalaramaram (M), Yadadri-Bhuvanagiri District Telangana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard

		or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Nezkil infusion of S.J & G Fazal Elahi.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Optrix Laboratories Pvt Ltd. Survey No. 145/A & 147, Ramalingampally (V), Bommalaramaram (M), Yadadri-Bhuvanagiri District Telangana India.		
API Lot No.	OT-LIU/06/2008		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	LZN001	LZN002	LZN003
Batch Size	500 Vials	500 Vials	500 Vials
Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	15-05-2021	15-05-2021	15-05-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 68951/TS/2021) issued by Drugs control administration, Government of Telangana dated 20-09-2021. The GMP certificate is valid till 19-09-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 15-04-2020 specifying purchase of 3Kg Linezolid. Firm has submitted copy of DHL invoice number 00206995 dated 29-04-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC system are not 21 CFR compliant.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Specify the exact section in which the applied drug will be manufactured, along with particulars of that section including manufacturing facility whether SVP or LVP and packaging facility whether glass vials or LDPE infusions.	Firm has submitted that they will manufacture the applied product in Infusion section (General). This section has the facility to fill glass vials from 100ml to 300ml.
2.	Submit drug substance specifications in section 3.2.S.4.1 and secion 3.2.S.4.2 from both drug substance manufacturer as well as drug product manufacturer.	Firm has submitted specifications of drug substance from both API manufacturer as well as Biogen Life Sciences.
3.	Submit data of verification of analytical procedure of drug substance	Firm has submitted report of verification studies of analytical procedure of drug substance.
4.	Submit COA of relevant batch of drug substance from API manufacturer as well as drug product manufacturer in section 3.2.S.4.4.	Firm has submitted COA of relevant batch from API manufacturer as well as Biogen Life Sciences.
5.	Justify why the qualitative composition of your formulation is different from that of innovator's product. Provide drug-excipient compatibility studies.	Firm has submitted that their actual composition which is also specified in BMR is as per the innovator's product.
6.	Justify why the pharmaceutical equivalence studies were conducted against the comparator product instead of using innovator / reference product.	Firm has submitted that Nezkil infusion is the commonly used comparator product in Pakistan and they have also performed studies against that product.
7.	Justify why the product is not subjected to terminal sterilization, since this method is recommended by the innovator product.	Firm has submitted copy of BMR which shows terminal sterilization of the product at 121°C for 30 minutes.
8.	You have mentioned innovator's specifications in module-1 and in-house specifications in module-3. Allign your drug product specifications along with submission of requisite fee.	Firm has submitted relevant page of module 1 which now specifies innovator's product. However, the firm has not submitted **fee** for change in specifications in module 1.
9.	Your pH limit is from 4.6 to 5.0, while you have passed the batch number LZN001 having pH value 7.76. Justification is required in this regard.	It was a typo error the actual pH value was 4.76
10.	The container closure system of the innovator is "flexible plastic infusion bags in a foil laminate overwrap" while your prduct is packed in glass vial. Justify how your container	Firm has submitted that their container closure system is glass vial which is exactly simiar to that of comparator product.

	closure system can prevent the product from exposure to the light.	
11.	Submit clear copy of commercial invoice and evidence of import since the submitted invoice is not properly readable. Furthermore, also submit evidence of import of this material.	Firm has submitted copy of commercial invoice dated 15-04-2020 specifying purchase of 3Kg Linezolid. Firm has submitted copy of DHL invoice number 00206995 dated 29-04-2020.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of applicable fee for pre-registration revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

175.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi**

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Specify the exact section in which the applied drug will be manufactured, along with particulars of that section including manufacturing facility whether SVP or LVP and packaging	Firm has submitted that they will manufacture the applied product in Infusion section (General). This section has the facility to fill glass vials from 100ml to 300ml.

	facility whether glass vials or LDPE infusions.	
2.	You have submitted label claim "Each vial contains moxifloxacin hydrochloride 400mg/250ml" while the label claim of innovator product is "Each vial of 250ml Contains Moxifloxacin (as hydrochloride) 400mg". Revise your label claim along with submission of fee for revision of label claim.	Firm has submitted revised label claim as follows: Each vial of 250ml Contains: Moxifloxacin (as hydrochloride)……400mg
3.	Submit data of verification of analytical procedure of drug substance	Firm has submitted verification studies of analytical procedure of drug substance.
4.	Submit stability study data of drug substance till claimed shelf life as per zone IV-A conditions, since the submitted stability study data is till 1 year only.	Firm has submitted stability study data as per zone IV-A conditions where the real time data is till 24 months.
5.	Justify why the pharmaceutical equivalence studies were conducted against the comparator product instead of using innovator / reference product.	Due to easy access of comparator product in the market we have used it to perform comparative studies.
6.	Justify why the product is not subjected to terminal sterilization, since this method is recommended by the innovator product.	Firm has submitted copy of BMR which shows terminal sterilization of the product at 121°C for 30 minutes.
7.	You have mentioned innovator's specifications in module-1 and in-house specifications in module-3. Allign your drug product specifications along with submission of requisite fee.	Firm has submitted relevant page of module 1 which now specifies innovator's product. However, the firm has not submitted **fee** for change in specifications in module 1.
8.	The container closure system of the innovator is "Polyolefine bags with polypropylene port sealed in aluminium foil overwrap" while your prduct is packed in glass vial. Justify how your container closure system can prevent the product from exposure to the light.	Firm has submitted that their container closure system is glass vial which is exactly simiar to that of comparator product.
9.	Submit clear copy of commercial invoice and evidence of import since the submitted invoice is not properly readable.	Firm has submitted copy of commercial invoice dated 08-03-2021 specifying purchase of 2.5Kg Moxifloxacin. Firm has also submitted copy of DHL invoice number 270400305DTD.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of pharmaceutical equivalence along with the innovator drug product.**

• **Registration Board further decided that registration letter will be issued after submission of applicable fee for pre-registration revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 19-03-2020 specifying purchase of 2Kg Tamsulosin HCL SR pellets.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC system are not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit label claim in line with the innovator product along with submission of fee for revision of label claim.	Firm has submitted following label claim without submission of fee: Each capsule Contains: Tamsulosin hydrochloride (as sustained release pellets)……0.4mg
2.	Submit drug substance specifications in section 3.2.S.4.1 and secion 3.2.S.4.2 from both drug substance manufacturer as well as drug product manufacturer.	Firm has submitted drug substance specifications from both API manufacturer as well as drug product manufacturer.
3.	Submit data of verification of analytical procedure of drug substance	Firm has submitted verification studies of the analytical procedure of drug substance.

4.	Justify why the pharmaceutical equivalence and comparative dissolution profile studies were conducted against the comparator product instead of using innovator / reference product.	Due to easy access of comparator product in the market we have used it to perform comparative studies.
5.	The submitted HPLC chromatograms are not properly readable, resubmit clearly readable copies of the raw data.	Firm has again submitted analytical record with clear readable prints.
6.	Submit batch manufacturing record of three stability batches.	Firm has submitted copy of Batch Manufacturing Record of three stability batches.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of pharmaceutical equivalence and Comparator Dissolution Profile (CDP) along with the reference / comparator drug product.**
- **Registration Board further decided that registration letter will be issued after submission of applicable fee for pre-registration revision of label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Case No. 02: M/s Nagarsons Pharmaceuticals, Islamabad

Firm has submitted copy of Acknowledgment of receipt of application for grant of DML by way of formulation to M/s Nagarsons Pharmaceuticals dated 19-02-2021 from Secretary Central Licensing Board. The letter specifies that CLB in its 278th meeting held on 10th and 11th December 2020 has approved the grant of DML in the name of M/s Nagarsons Pharmaceuticals for following sections:

1. Tablet (General)
2. Tablet (Psychotropic)
3. Capsule (General)
4. Cream /ointment/Lotion/Gel

Now the firm has submitted following applications as per the details mentioned in the table below:

Name of Section	Previously considered		Newly applied		Total	
	No of molecules	No of products	No of molecules	No of products	No of molecules	No of products
Tablet (General)	02	03	02	04	04	07
Tablet (Psychotropic)	-	-	-	-	-	-
Capsule (General)	06	10	-	-	-	-
Cream /ointment/Lotion/Gel	-	-	-	-	-	-

Tablet (General) section: 02 Molecules / 04 Products

177.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Nagarsons Pharmaceuticals. Plot No. 34, St. No. NS-2, National Industrial Zone, Rawat, Islamabad**
	Name, address of Manufacturing site.	M/s Nagarsons Pharmaceuticals. Plot No. 34, St. No. NS-2, National Industrial Zone, Rawat, Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of DML number 000927 issued dated 04-06-2021 with effect from 19-02-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML by way of formulation to M/s Nagarsons Pharmaceuticals dated 07-06-2021 for following sections: 1. Tablet (General) 2. Tablet (Psychotropic) 3. Capsule (General) 4. Cream /ointment/Lotion/Gel
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 10877: 29-04-2022
	Details of fee submitted	PKR 30,000/-: 11-04-2022
	The proposed proprietary name / brand name	**TERBINAG 125mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Terbinafine (as hydrochloride)……125mg
	Pharmaceutical form of applied drug	white colored round uncoated tablet
	Pharmacotherapeutic Group of (API)	Antifungals for systemic use
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	(**MHRA** Approved)
	For generic drugs (me-too status)	Lamisil Tablet 125mg of M/s Novartis (Reg # 013208)
	Name and address of API manufacturer.	M/s Saptagir Laboratories Pvt Lt. Sy No. Parts of 27, 46 & 50 to 56, Ananthasagar (Vill) Chegunta (Mandal), Medak (Dist), Telangana India.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests defined in USP for their product against the reference product i.e. Lamisil tablet of M/s Novartis Pakistan. Firm has submitted results of CDP in three dissolution medium for their product against the reference product i.e. Lamisil tablet of M/s Novartis Pakistan.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Nagarsons Pharmaceutical is a new license facility hence no such inspection has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Drug Manufacturing License of Hebei Guolong Pharmaceutical Co. Ltd. (No. JI20150058) issued by Hebei Provincial Drug Administration dated 22-07-2020. The certificate is valid till 21-07-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying purchase of 10Kg Azithromycin dihydrate cleared dated 24-08-2021. The invoice is cleared by AD (I&E).
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with UV spectra,

	chromatograms, Raw data sheets, COA, summary data sheets etc.	raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC systems are not 21 CFR compliant
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications and analytical method from both API manufacturer as well as Nagarsons Pharma.
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	Firm has submitted report of verification studies of the analytical method of drug substance.
3.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product.	Firm has submitted COA of relevant batch of drug substance from API manufacturer as well as Nagarsons Pharma.
4.	Justify why pharmaceutical equivalence and CDP studies are performed against zetamax capsule of Pfizer instead of using the innovator's product.	We use Zetamax Capsule by Pfizer because the innovator product is not available in the market in Pakistan.
5.	Provide raw data sheets for the calculation of results of dissolution test throughout the stability studies.	Firm has submitted raw data sheets for the calculation of results of dissolution test throughout the stability studies using HPLC method.
6.	Submit analytical record for azithromycin capsule since the submitted record contains HPLC chromatograms of azithromycin tablet as well.	Firm has submitted that mistakenly at one time point the data of azithromycin tablet was attached instead of azithromycin capsule. Firm has now submitted analytical record for azithromycin capsule.
7.	Submit Batch Manufacturing Record of three stability batches.	Firm has submitted copy of Batch Manufacturing Record of three stability batches.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Details of fee submitted	PKR 30,000/-: 21-02-2022
	The proposed proprietary name / brand name	**AZONAG 250mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Azithromycin (as dihydrate)……250mg
	Pharmaceutical form of applied drug	White to off white film coated tablet
	Pharmacotherapeutic Group of (API)	Macrolides
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	(**USFDA** Approved)
	For generic drugs (me-too status)	Orzit Tablet 250mg of M/s Martin Dow (Reg # 057294)
	Name and address of API manufacturer.	M/s Hebei Guolong Pharmaceutical Co. Ltd No. 9 Xingye Street, Shijiazhuang Economic and Technological Development Zone, Hebei Province China.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests defined in USP for their product against the reference product i.e. Zetamax 250mg Tablet of M/s Pfizer Pakistan. Firm has submitted results of CDP in three dissolution medium for their product against the reference product i.e. Zetamax 250mg Tablet of M/s Pfizer Pakistan.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Nagarsons Pharmaceutical is a new license facility hence no such inspection has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Drug Manufacturing License of Hebei Guolong Pharmaceutical Co. Ltd. (No. JI20150058) issued by Hebei Provincial Drug Administration dated 22-07-2020. The certificate is valid till 21-07-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying purchase of 10Kg Azithromycin dihydrate cleared dated 24-08-2021. The invoice is cleared by AD (I&E).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with UV spectra, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC systems are not 21 CFR compliant
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm

1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications and analytical method from both API manufacturer as well as Nagarsons Pharma.
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	Firm has submitted report of verification studies of the analytical method of drug substance.
3.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product.	Firm has submitted COA of relevant batch of drug substance from API manufacturer as well as Nagarsons Pharma.
4.	Justify why pharmaceutical equivalence and CDP studies are performed against zetamax tablet of Pfizer instead of using the innovator's product.	We use Zetamax tablet by Pfizer because the innovator product is not available in the market in Pakistan.
5.	Provide raw data sheets for the calculation of results of dissolution test throughout the stability studies.	Firm has submitted raw data sheets for the calculation of results of dissolution test throughout the stability studies using HPLC method.
6.	Provide evidence of column oven which is required to maintain temperature of 50°	Firm has not submitted evidence of HPLC along with column oven.
7.	Submit Batch Manufacturing Record of three stability batches.	Firm has submitted copy of Batch Manufacturing Record of three stability batches.

Decision: Deferred for submission of evidence of HPLC system along with column oven which is required to maintain temperature of 50° for assay testing of drug product as per USP monograph.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Empator 10mg Tablets" which was presented in 291st meeting of Registration Board wherein the Board decided to approve registration of this product Date of inspection: 6th August, 2019. According to inspection report, following points were confirmed. • The firm has 21CFR compliant HPLC software. • The firm has audit trail reports available.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Indacaterol acetate:** Firm has submitteded copy of GMP certificate (No. 91716/2020/11/31377) of M/s Melody Healthcare Pvt. Ltd.Plot No. J-73, M.I.D.C, Tarapur, Boisar, Dist. Palghar 401506, Thane- Zone4. Maharashtra State, India issued by Food & Drugs Administration (Maharashtra State). The Certificate is valid till 19-03-2023.

		Glycopyrronium: Firm has submitted copy of GMP certificate (No. NCF-II/&1917/001/CAT) of M/s INKE, S.A. C/Argent, 08755 CASTELLBISBAL Spain issued by Competent Regional Authority. Directorate of Regulation, Planning and Sanitary Resources. Health Department. Generalitat of Catalunya. The certificate is present at Eudra GMP database and was issued on the basis of inspection dated 08-04-2019. The certificate is valid till 08-04-2023. **Mometasone Furoate:** Firm has submitted copy of GMP certificate (No. 92338/2020/11/32133) of M/s Aarti Industries Limited Plot No E-50, MIDC, Tarapur, Taluka & District-Palghar, 401506 Maharashtra State, India issued by FDA Mahrashtra. The certificate is valid till 09-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Indacaterol acetate: ICA/08/21:** Firm has submitted copy of commercial invoice cleared dated 30-08-2021 specifying import of 40g Indacaterol acetate. The commercial invoice is attested by AD (I&E) DRAP. **Glycopyrronium: P-21M:** Firm has submitted copy of commercial invoice cleared dated 27-07-2021 specifying import of 0.008Kg Glycopyrronium. The commercial invoice is attested by AD (I&E) DRAP. **Mometasone Furoate: MF-20016(JM-01)-001:** Firm has submitted copy of commercial invoice cleared dated 14-07-2021 specifying import of 0.040Kg mometasone furoate. The commercial invoice is attested by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Details of fee submitted	Rs. 75,000/-: 07-03-2022
The proposed proprietary name / brand name	**BRIAR 100mg/5ml suspension**
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension contains: Cefixime (as trihydrate)……100mg
Pharmaceutical form of applied drug	Amber colored glass bottle containing white to off white powder for reconstitution volume 30ml (after reconstitution)
Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
Reference to Finished product specifications	USP specs
Proposed Pack size	30ml bottle
Proposed unit price	As per SRO
The status in reference regulatory authorities	**(USFDA** Approved)
For generic drugs (me-too status)	Tripsan 100mg/5ml dry suspension by Seraph Pharmaceuticals

Name and address of API manufacturer.	Saakh Pharma (Pvt) Ltd. C-7/1, North Western Industrial Zone Port Qasim Karachi.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated and real time conditions. The real time stability data is conducted as per zone IV-A conditions till 12 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted process validation report
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has performed comparative analysis of their developed formulation against the comparator product i.e. "Cefspan Dry powder for suspension 100mg/5ml". Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator product. The analysis of all quality tests were performed according to USP monograph. The results depicts that the developed formulation is comparable to the comparator product. The firm has also performed compatibility studies of the product with diluent i.e. purified (boiled and cooled water). Firm has performed testing of assay pH and other parameters for 7 days at room temperature and 14 days at 2 – 8 ^{o}C and the results after reconstitution were within the acceptable range specified by the firm.
Analytical method validation/verification of product	Firm has submitted report of validation of analytical method for the drug product.

	Firm has submitted report of verification studies of analytical method for the drug substance.		
STABILITY STUDY DATA			
Manufacturer of API	Saakh Pharma (Pvt) Ltd. C-7/1, North Western Industrial Zone Port Qasim Karachi.		
API Lot No.	17CF10172		
Description of Pack (Container closure system)	1's bottle of powder for suspension packed in unit carton		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	002	003
Batch Size	10,000 bottles	10,000 bottles	10,000 bottles
Manufacturing Date	01-2018	01-2018	03-2018
Date of Initiation	18-01-2018	19-01-2018	26-03-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to following product specific inspection reports • Dexpro (Dexlansoprazole) 30 and 60mg Capsule. PSI was conducted on 11-09-2018 and the product was approved in 285th meeting of Registration Board. • Neovel 800mg Tablet. Its PSI was conducted on 14-12-2018 and the product was approved in 288th meeting of Registration Board. • Serbica 20mg Capsule. Its PSI was conducted on 29-10-2018 and the product was approved in 290th meeting of Registration Board. Firm has further submitted that their product Neogene 2g Injection was approved in 293th meeting of Registration Board. That product was applied by AGP and contract manufactured by Seraph and was submitted on Form 5F (CTD) along with complete data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML of M/s Saakh Pharma is submitted by the firm. Copy of GMP certificate of M/s Saakh Pharma dated 15-01-2018 issued on the basis of inspection dated 16-10-2017 is submitted by the firm. The certificate is issued by Additional Director DRAP Karachi.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice dated 12-01-2018 specifying purchase of 50Kg cefixime from Saakh Pharma (Pvt) Ltd.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that since the stability study of this product was initiated 2 years ago, at that time our HPLC (Schimadzu) was not 21 CFR compliant. However now we have 21 CFR compliant (Perkin Elmer) HPLC system. We undertake that in future we will use 21 CFR compliant HPLC system for stability testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted that their stability chambers are supplied with uninterrupted power supply and have digital data logger for monitoring temperature and humidity. The digital data logger have been verified by the panel during our onsite inspection as well.

Evaluation by PEC:

- The applied product to be manufactured by M/s Seraph Pharmaceuticals Plot # 210, Industrial Triangle Kahuta Road Islamabad have already been approved by Registration Board in its 297th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 297th meeting are as follows:

Applicant firm	M/s Moringa Pharmaceuticals 35-A, Sunder Industrial Estate, Lahore.
Manufacturer firm	M/s Seraph Pharmaceuticals Plot # 210, Industrial Triangle Kahuta Road Islamabad.
Brand Name	Saf-Xime 100mg/5ml Dry suspension
Batch No. of drug product	001, 002, 003
Case No.	279
BR Meeting	297

Decision: Approved.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

184.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Akson Pharmaceuticals Pvt Ltd. Plot no.9-B/1 & 2, Sector D-1, Old industrial Estate Mirpur Azad Kashmir**
	Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
	Status of the applicant	☐ Manufacturer

		☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 26-06-2021 is submitted.
	GMP status of the firm	**Nicholas pharma:** Firm has submitted copy of GMP certificate dated 25-02-2020 issued on the basis of inspection dated 28-01-2020
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML No 000886 of M/s Nicholas Pharma Islamabad dated 29-08-2018 specifying dry powder injection (carbapenem) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 25215: 10-09-2021
	Details of fee submitted	PKR 75,000/-: 05-07-2021
	The proposed proprietary name / brand name	**MERNEM 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……500mg (blended with sodium carbonate)
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis

		and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem500mg Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate of M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India. (Certificate# DC/A-I/WHO-GMP/2022/440) issued by Drug Control Organization Government of Rajastan valid upto 26-02-2023 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted following: • Copy of Form 5 (License to Import) dated 30-04-2019 • Commercial invoice (invoice# RALIE/19-20/003) Dated: 12-04-2019 cleared by DRAP Islamabad office dated 30-04-2019 specifying import of 20Kg Meropenem Sterile for Injection(Batch# MRPS/062/18).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have performed stability testing as per USP specifications. We have also verified the USP method. The analysis was performed using HPLC system which is 21 CFR compliant. The certificate of compliance is also submitted by the firm.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Nicholas Pharmaceuticals have already been approved by Registration Board in its 307th and 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Jinnah Pharmaceutical (Pvt) Ltd. 13-Km, Lahore Road Multan
Manufacturer firm	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Brand Name	MEROCIN 500mg Injection
Batch No. of drug product	Noopem Injection 001, Noopem Injection 002, Jeronum Injection 001
Case No.	820
Registration Board meeting	316th meeting of Registration Board
Capacity assessmnet	The capacity assessment was carried on 18-05-2021 and 28-05-2021. Available manufacturing Capacity (Cephalosporin Injection) = 66.78% Available manufacturing Capacity (Carbapenem Injection) = 97.23% Available capacity (HPLC) = 59.61% Available Sterility testing capacity = 77.66% The Board in its 307th meeting decided to allow contract manufacturing from M/s Nicholas Phamrmaceuticals and advised the firm to upgrade their QC and microbiological lab includin gaddition of atleast 2 HPLC systems. The firm vide its letter Dy. No. 5367 dated 08-03-2022 submitted the evidence of purchase of 02 new HPLC systems. The firm also submitted evidence of purchase of atomic absorption spectrophotometer for testing of sodium content vide letter Dy.No. 6363 dated 08-03-2022.

Decision: Approved.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have performed stability testing as per USP specifications. We have also verified the USP method. The analysis was performed using HPLC system which is 21 CFR compliant. The certificate of compliance is also submitted by the firm.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Nicholas Pharmaceuticals have already been approved by Registration Board in its 307th and 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Jinnah Pharmaceutical (Pvt) Ltd. 13-Km, Lahore Road Multan
Manufacturer firm	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Brand Name	MEROCIN 500mg Injection
Batch No. of drug product	Noopem Injection 001, Noopem Injection 002, Jeronum Injection 001
Case No.	820
Registration Board meeting	316th meeting of Registration Board
Capacity assessmnet	The capacity assessment was carried on 18-05-2021 and 28-05-2021. Available manufacturing Capacity (Cephalosporin Injection) = 66.78% Available manufacturing Capacity (Carbapenem Injection) = 97.23% Available capacity (HPLC) = 59.61%

•		Available Sterility testing capacity = 77.66% The Board in its 307th meeting decided to allow contract manufacturing from M/s Nicholas Phamrmaceuticals and advised the firm to upgrade their QC and microbiological lab includin gaddition of atleast 2 HPLC systems. The firm vide its letter Dy. No. 5367 dated 08-03-2022 submitted the evidence of purchase of 02 new HPLC systems. The firm also submitted evidence of purchase of atomic absorption spectrophotometer for testing of sodium content vide letter Dy.No. 6363 dated 08-03-2022.

Decision: Approved.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

187.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Ameer & Adnan Pharmaceutical Pvt Ltd.** **Plot No.47, Sundar Industrial Estate, Lahore**
	Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 26-06-2021 is submitted.
	GMP status of the firm	**Nicholas pharma:** Firm has submitted copy of GMP certificate dated 25-02-2020 issued on the basis of inspection dated 28-01-2020
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML No 000886 of M/s Nicholas Pharma Islamabad dated 29-08-2018 specifying dry powder injection (carbapenem) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23055: 24-08-2021
	Details of fee submitted	PKR 75,000/-: 13-07-2021
	The proposed proprietary name / brand name	**MERNEM 1g Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……1g

		(blended with sodium carbonate)
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch

		analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem 1g Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.		
API Lot No.	MRPS/062/18		
Description of Pack (Container closure system)	Glass vial

Date of Initiation	30-06-2019	30-09-2019	26-09-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate of M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India. (Certificate# DC/A-I/WHO-GMP/2022/440) issued by Drug Control Organization Government of Rajastan valid upto 26-02-2023 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted following: • Copy of Form 5 (License to Import) dated 30-04-2019 • Commercial invoice (invoice# RALIE/19-20/003) Dated: 12-04-2019 cleared by DRAP Islamabad office dated 30-04-2019 specifying import of 20Kg Meropenem Sterile for Injection(Batch# MRPS/062/18).

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have performed stability testing as per USP specifications. We have also verified the USP method. The analysis was performed using HPLC system which is 21 CFR compliant. The certificate of compliance is also submitted by the firm.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Nicholas Pharmaceuticals have already been approved by Registration Board in its 307th and 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Jinnah Pharmaceutical (Pvt) Ltd. 13-Km, Lahore Road Multan
Manufacturer firm	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Brand Name	MEROCIN 1g Injection

		and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem500mg Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.		
API Lot No.	MRPS/062/18		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Noopem Injection 001	Noopem Injection 001	Noopem Injection 001
Batch Size	7,000 Vials	7,000 Vials	7,000 Vials
Manufacturing Date	06-2019	06-2019	06-2019
Date of Initiation	28-06-2019	28-06-2019	28-06-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate of M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India. (Certificate# DC/A-I/WHO-GMP/2022/440) issued by Drug Control Organization Government of Rajastan valid upto 26-02-2023 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted following: • Copy of Form 5 (License to Import) dated 30-04-2019 • Commercial invoice (invoice# RALIE/19-20/003) Dated: 12-04-2019 cleared by DRAP Islamabad office dated 30-04-2019 specifying import of 20Kg Meropenem Sterile for Injection(Batch# MRPS/062/18).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have performed stability testing as per USP specifications. We have also verified the USP method. The analysis was performed using HPLC system which is 21 CFR compliant. The certificate of compliance is also submitted by the firm.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Nicholas Pharmaceuticals have already been approved by Registration Board in its 307th and 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Jinnah Pharmaceutical (Pvt) Ltd. 13-Km, Lahore Road Multan
Manufacturer firm	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Brand Name	MEROCIN 500mg Injection
Batch No. of drug product	Noopem Injection 001, Noopem Injection 002, Jeronum Injection 001
Case No.	820
Registration Board meeting	316th meeting of Registration Board

•	Capacity assessmnet	The capacity assessment was carried on 18-05-2021 and 28-05-2021. Available manufacturing Capacity (Cephalosporin Injection) = 66.78% Available manufacturing Capacity (Carbapenem Injection) = 97.23% Available capacity (HPLC) = 59.61% Available Sterility testing capacity = 77.66% The Board in its 307th meeting decided to allow contract manufacturing from M/s Nicholas Phamrmaceuticals and advised the firm to upgrade their QC and microbiological lab includin gaddition of atleast 2 HPLC systems. The firm vide its letter Dy. No. 5367 dated 08-03-2022 submitted the evidence of purchase of 02 new HPLC systems. The firm also submitted evidence of purchase of atomic absorption spectrophotometer for testing of sodium content vide letter Dy.No. 6363 dated 08-03-2022.

Decision: Approved.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

191.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Aulton Pharmaceuticals. Plot No. 84/1, Block A, Phase V, Industrial Estate, Hattar**
	Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 29-06-2021 is submitted.
	GMP status of the firm	**Nicholas pharma:** Firm has submitted copy of GMP certificate dated 25-02-2020 issued on the basis of inspection dated 28-01-2020
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML No 000886 of M/s Nicholas Pharma Islamabad dated 29-08-2018 specifying dry powder injection (carbapenem) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23707: 30-08-2021

	Details of fee submitted	PKR 75,000/-: 29-06-2021
	The proposed proprietary name / brand name	**AROPEN 1g Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……1g (blended with sodium carbonate)
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem 1g Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

Capacity assessmnet	The capacity assessment was carried on 18-05-2021 and 28-05-2021. Available manufacturing Capacity (Cephalosporin Injection) = 66.78% Available manufacturing Capacity (Carbapenem Injection) = 97.23% Available capacity (HPLC) = 59.61% Available Sterility testing capacity = 77.66% The Board in its 307th meeting decided to allow contract manufacturing from M/s Nicholas Phamrmaceuticals and advised the firm to upgrade their QC and microbiological lab includin gaddition of atleast 2 HPLC systems. The firm vide its letter Dy. No. 5367 dated 08-03-2022 submitted the evidence of purchase of 02 new HPLC systems. The firm also submitted evidence of purchase of atomic absorption spectrophotometer for testing of sodium content vide letter Dy.No. 6363 dated 08-03-2022.

-

Decision: Approved.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

194.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Linta Pharmaceuticals (Pvt) Ltd. Plot # 3, Street S-5, National Industrial Zone, Rawat Islamabad.**
	Name, address of Manufacturing site.	M/s Rotex Pharma (Pvt) Ltd, Plot # 206 & 207, Industrial Triangle Kahuta Road Islamabad.

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Original agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 14-07-2020 is submitted.
	GMP status of the firm	**Linta Pharmaceuticals:** The firm was inspected on 10-07-2019 and conclusion of inspection was: Keeping in view the above it may be concluded that M/s Linta Pharmaceuticals is operating at acceptable level of GMP standard. **Rotex pharma:** GMP certificate issued on the basis of inspection dated 12-08-2020
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000651 of M/s Rotex Pharma Islamabad dated 13-06-2017 specifying dry powder injection (carbapenem) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 4079: 04-02-2021
	Details of fee submitted	PKR 50,000/-: 15-07-2020
	The proposed proprietary name / brand name	**PENAM 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……500mg (blended with sodium carbonate)
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials with dark blue flip off seal.
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem 500mg Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
STABILITY STUDY DATA		
Manufacturer of API	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The status of applicant mentioned in section 1.3.3 of module 1 is "manufacturer" while the application is for contract manufacturing from Rotex Pharma. Clarification is required in this regard.
- Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.
- Provide details regarding total number of sections and number of products already registered and applied on contract manufacturing of M/s Linta Pharmaceuticals.
- Submit quality overall summary (QOS) in module 2 as per WHO QOS-PD template or as per the template approved by Registration Board in its 296th meeting and also published in CTD guidance document. The submitted QOS contains extracts from module 3 instead of providing summary of the data as per the requirements of QOS.

- Provide data in section 3.2.S.3.1 as per the guidance document approved by Registration Board which specifies that "Discussion on the potential for isomerism and identification of stereochemistry, studies performed to identify potential polymorphic forms and particle size distribution of the Drug substance shall be submitted, where these parameters may impact the quality, safety or efficacy of the drug product."
- Section 3.2.S.4.1 contains specifications for meropenem trihydrate sterile, sodium carbonate sterile and meropenem for injection. Clarification is required that which particular specifications was used for the testing of drug substance.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Justify the acceptance criteria of assay "NLT 78% as meropenem on dried basis", and also provide scientific justification how it is in line with the USP monograph.
- Specify the relative retention time in terms of quantitative values for the identification of drug substance, since the statement "the retention time of meropenem peak of the sample solution correspond to that of the standard solution obtained in assay" is not scientifically justified without having a relative retention time limit.
- As per the assay method of drug substance, the sample solution is nominally 0.1mg/ml of meropenem in mobile phase. While as per USP monograph the sample solution preparation method is entirely different which involves initial reconstitution with water prior to dilution with mobile phase. Justify how the tests performed by your method can be considered acceptable under the USP monograph.
- Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.
- Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".
- Provide COA of reference standard / working standard used in the testing of drug substance.
- Justify how 710mg of meropenem as trihydrate blended with sodium carbonate contains 500mg of meropenem.
- Submit information in section 3.2.P.1 c) Description of accompanying reconstitution diluent(s) as per the guidance document approved by Registration Board which specifies that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Submit information in section 3.2.P.2 as per the guidance document approved by Registration Board which specifies that "A brief information on the pharmaceutical development shall be included. This information specify the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed".
- Submit data in section 3.2.P.2.1.1 as per the guidance document approved by Registration Board which specifies that "Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or

solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product".

- Provide details including batch number, expiry date of the innovator product along with pharmaceutical equivalence was performed.
- You have submitted that 20ml reconstituted volume is available with Meronem 500mg Injection of Pfizer Pakistan, however the meropenem 500mg injection of innovator as well as reference product is reconstituted using 10ml diluent. Clarification is required in this regard.
- Submit data in section 3.2.P.2.6 as per the guidance document approved by Registration Board which specifies that "Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product".
- Specify the volume of the vial of the drug product, since 30ml vial was mentioned in section 3.2.P.2 while 20ml vial is mentioned in section 3.2.P.3.
- Specify the colour of seal, since blue colour is mentioned in section 3.2.P.2 while green colour is mentioned in section 3.2.P.3.
- Provide detailed method of sample solution preparation for assay testing of the drug product in section 3.2.P.5.2 specifying the exact volume of water in which reconstitution is carried out.
- Justify why the formula for calculation of assay results of meropenem submitted in section 3.2.P.5.2 is different from that specified in USP monograph.
- Justify why the test of contents of sodium is not included in the specifications of the drug product as per the USP monograph.
- Justify how the 3 batches were released without determining the contents of sodium.
- Submit COA of reference standard / working standard used for the testing of the stability batches in section 3.2.P.6.
- Submit data in section 3.2.P.8.1 as per the guidance document approved by Registration Board which specifies that "Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided".
- Justify why the test of identification, contents of sodium, constituted solution, loss on drying is not performed during the stability studies.
- Justify why test of bacterial endotoxin and sterility was not performed at 6 month time point at accelerated stability studies.
- Justify why only 3 chromatographs of the standard solution was run while USP General chapter <621> recommends that five replicates of standard solution should be used for system suitability studies.
- Submit raw data sheets to support the calculation of results of assay throughout the stability studies.
- Provide analytical record including certificate of analysis at each time point, HPLC chromatograms, raw data sheets using page separators to segregate the data of each time point and each batch, since the submitted data is mixed up and submitted without any sequence.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.

- Compliance Record of HPLC software 21CFR & audit trail reports on product testing
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

- Submit Batch Manufacturing record (BMR) of the three batches for which stability study data is submitted.

Response by the firm:
Firm vide its letter dated 19-08-2021 submitted that they request to change the contract manufacturer to M/s Nicholas Pharmaceuticals, Islamabad. Firm has submitted following documents:

- Complete fee for change of contract manufacturer 75,000/- vide slip number 265253322.
- Complete data in module 1, 2 and 3. The evaluation of the data is placed below

Name, address of Applicant / Marketing Authorization Holder	**M/s Linta Pharmaceuticals (Pvt) Ltd. Plot # 3, Street S-5, National Industrial Zone, Rawat Islamabad.**
Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 25-01-2022 is submitted.
GMP status of the firm	**Nicholas pharma:** Firm has submitted copy of GMP certificate dated 25-02-2020 issued on the basis of inspection dated 28-01-2020
Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML No 000886 of M/s Nicholas Pharma Islamabad dated 29-08-2018 specifying dry powder injection (carbapenem) section.
Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
Dy. No. and date of submission	Dy. No. 23504: 19-08-2022
Details of fee submitted	PKR 75,000/-: 19-08-2022
Proposed proprietary name/brand name	**PENAM 500mg Injection**
Strength/concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……500mg (blended with sodium carbonate)
Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials
Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
Reference to Finished product specifications	USP
Proposed Pack size	1's
Proposed unit price	As per SRO

Status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem500mg Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA	
Manufacturer of API	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate of M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India. (Certificate# DC/A-I/WHO-GMP/2020/214) issued by Drug Control Organization Government of Rajastan valid upto 26-02-2022 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted following: • Copy of Form 5 (License to Import) dated 30-04-2019 • Commercial invoice (invoice# RALIE/19-20/003) Dated: 12-04-2019 cleared by DRAP Islamabad office dated 30-04-2019 specifying import of 20Kg Meropenem Sterile for Injection(Batch# MRPS/062/18).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have performed stability testing as per USP specifications. We have also verified the USP method. The analysis was performed using HPLC system which is 21 CFR compliant. The certificate of compliance is as also submitted by the firm.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Nicholas Pharmaceuticals have already been approved by Registration Board in its 307th and 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Jinnah Pharmaceutical (Pvt) Ltd. 13-Km, Lahore Road Multan
Manufacturer firm	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Brand Name	MEROCIN 500mg Injection
Batch No. of drug product	Noopem Injection 001, Noopem Injection 002, Jeronum Injection 001
Case No.	820
Registration Board meeting	316th meeting of Registration Board
Capacity assessmnet	The capacity assessment was carried on 18-05-2021 and 28-05-2021. Available manufacturing Capacity (Cephalosporin Injection) = 66.78% Available manufacturing Capacity (Carbapenem Injection) = 97.23% Available capacity (HPLC) = 59.61% Available Sterility testing capacity = 77.66% The Board in its 307th meeting decided to allow contract manufacturing from M/s Nicholas Phamrmaceuticals and advised the firm to upgrade their QC and microbiological lab includin gaddition of atleast 2 HPLC systems. The firm vide its letter Dy. No. 5367 dated 08-03-2022 submitted the evidence of purchase of 02 new HPLC systems. The firm also submitted evidence of purchase of atomic absorption spectrophotometer for testing of sodium content vide letter Dy.No. 6363 dated 08-03-2022.

Decision: Approved.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Evaluation by PEC:

- The status of applicant mentioned in section 1.3.3 of module 1 is "manufacturer" while the application is for contract manufacturing from Rotex Pharma. Clarification is required in this regard.
- Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.
- Provide details regarding total number of sections and number of products already registered and applied on contract manufacturing of M/s Linta Pharmaceuticals.
- Submit quality overall summary (QOS) in module 2 as per WHO QOS-PD template or as per the template approved by Registration Board in its 296th meeting and also published in CTD guidance document. The submitted QOS contains extracts from module 3 instead of providing summary of the data as per the requirements of QOS.
- Provide data in section 3.2.S.3.1 as per the guidance document approved by Registration Board which specifies that "Discussion on the potential for isomerism and identification of stereochemistry, studies performed to identify potential polymorphic forms and particle size distribution of the Drug substance shall be submitted, where these parameters may impact the quality, safety or efficacy of the drug product."
- Section 3.2.S.4.1 contains specifications for meropenem trihydrate sterile, sodium carbonate sterile and meropenem for injection. Clarification is required that which particular specifications was used for the testing of drug substance.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical

procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."

- Justify the acceptance criteria of assay "NLT 78% as meropenem on dried basis", and also provide scientific justification how it is in line with the USP monograph.
- Specify the relative retention time in terms of quantitative values for the identification of drug substance, since the statement "the retention time of meropenem peak of the sample solution correspond to that of the standard solution obtained in assay" is not scientifically justified without having a relative retention time limit.
- As per the assay method of drug substance, the sample solution is nominally 0.1mg/ml of meropenem in mobile phase. While as per USP monograph the sample solution preparation method is entirely different which involves initial reconstitution with water prior to dilution with mobile phase. Justify how the tests performed by your method can be considered acceptable under the USP monograph.
- Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.
- Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".
- Provide COA of reference standard / working standard used in the testing of drug substance.
- Justify how 1420mg of meropenem as trihydrate blended with sodium carbonate contains 1000mg of meropenem.
- Submit information in section 3.2.P.1 c) Description of accompanying reconstitution diluent(s) as per the guidance document approved by Registration Board which specifies that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Submit information in section 3.2.P.2 as per the guidance document approved by Registration Board which specifies that "A brief information on the pharmaceutical development shall be included. This information specify the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed".
- Submit data in section 3.2.P.2.1.1 as per the guidance document approved by Registration Board which specifies that "Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product".
- Provide details including batch number, expiry date of the innovator product along with pharmaceutical equivalence was performed.
- You have submitted that 30ml reconstituted volume is available with Meronem 1g Injection of Pfizer Pakistan, however the meropenem 1g injection of innovator as well as reference product is reconstituted using 20ml diluent. Clarification is required in this regard.
- Submit data in section 3.2.P.2.6 as per the guidance document approved by Registration Board which specifies that "Compatibility studies for the dry powder for injections and

dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product".

- Specify the volume of the vial of the drug product, since 50ml vial was mentioned in section 3.2.P.2 while 30ml vial is mentioned in section 3.2.P.3.
- Specify the colour of seal, since blue colour is mentioned in section 3.2.P.2 while green colour is mentioned in section 3.2.P.3.
- Provide detailed method of sample solution preparation for assay testing of the drug product in section 3.2.P.5.2 specifying the exact volume of water in which reconstitution is carried out.
- Justify why the formula for calculation of assay results of meropenem submitted in section 3.2.P.5.2 is different from that specified in USP monograph.
- Justify why the test of contents of sodium is not included in the specifications of the drug product as per the USP monograph.
- Justify how the 3 batches were released without determining the contents of sodium.
- Submit COA of reference standard / working standard used for the testing of the stability batches in section 3.2.P.6.
- Submit data in section 3.2.P.8.1 as per the guidance document approved by Registration Board which specifies that "Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided".
- Justify why the test of identification, contents of sodium, constituted solution, loss on drying is not performed during the stability studies.
- Justify why test of bacterial endotoxin and sterility was not performed at 6 month time point at accelerated stability studies.
- Justify why only 3 chromatographs of the standard solution was run while USP General chapter <621> recommends that five replicates of standard solution should be used for system suitability studies.
- Submit raw data sheets to support the calculation of results of assay throughout the stability studies.
- Provide analytical record including certificate of analysis at each time point, HPLC chromatograms, raw data sheets using page separators to segregate the data of each time point and each batch, since the submitted data is mixed up and submitted without any sequence.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing
    - Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)
- Submit Batch Manufacturing record (BMR) of the three batches for which stability study data is submitted.

Response by the firm:
Firm vide its letter dated 19-08-2021 submitted that they request to change the contract manufacturer to M/s Nicholas Pharmaceuticals, Islamabad. Firm has submitted following documents:

• Complete fee for change of contract manufacturer 75,000/- vide slip number 265253322. • Complete data in module 1, 2 and 3. The evaluation of the data is placed below	
Name, address of Applicant / Marketing Authorization Holder	**M/s Linta Pharmaceuticals (Pvt) Ltd. Plot # 3, Street S-5, National Industrial Zone, Rawat Islamabad.**
Name, address of Manufacturing site.	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 25-01-2022 is submitted.
GMP status of the firm	**Nicholas pharma:** Firm has submitted copy of GMP certificate dated 25-02-2020 issued on the basis of inspection dated 28-01-2020
Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML No 000886 of M/s Nicholas Pharma Islamabad dated 29-08-2018 specifying dry powder injection (carbapenem) section.
Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
Dy. No. and date of submission	Dy. No. 23503: 19-08-2022
Details of fee submitted	PKR 75,000/-: 19-08-2022
Proposed proprietary name/brand name	**PENAM 1g Injection**
Strength/concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……1g (blended with sodium carbonate)
Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials
Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
Reference to Finished product specifications	USP
Proposed Pack size	1's
Proposed unit price	As per SRO
Status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities,

	physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem 1g Injection of Pfizer Pakistan Ltd manufactured by ACS Dobfar Italy.
Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India.		
API Lot No.	MRPS/062/18		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Noopem Injection 001	Noopem Injection 002	Jeronum Injection 001
Batch Size	10500 Vials	13000 Vials	5500 Vials

Manufacturing Date	06-2019	09-2019	09-2019
Date of Initiation	30-06-2019	30-09-2019	26-09-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate of M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area bhiwadi District Alwar Rajasthan, India. (Certificate# DC/A-I/WHO-GMP/2020/214) issued by Drug Control Organization Government of Rajastan valid upto 26-02-2022 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted following: • Copy of Form 5 (License to Import) dated 30-04-2019 • Commercial invoice (invoice# RALIE/19-20/003) Dated: 12-04-2019 cleared by DRAP Islamabad office dated 30-04-2019 specifying import of 20Kg Meropenem Sterile for Injection (Batch# MRPS/062/18).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have performed stability testing as per USP specifications. We have also verified the USP method. The analysis was performed using HPLC system which is 21 CFR compliant. The certificate of compliance is as also submitted by the firm.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Nicholas Pharmaceuticals have already been approved by Registration Board in its 307th and 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Jinnah Pharmaceutical (Pvt) Ltd. 13-Km, Lahore Road Multan
Manufacturer firm	M/s Nicholas Pharmaceuticals, plot # 34, St # SS-02 National industrial Zone Rawat Islamabad
Brand Name	MEROCIN 1g Injection
Batch No. of drug product	Noopem Injection 001, Noopem Injection 002, Jeronum Injection 001

	Case No.	821
	Registration Board meeting	316th meeting of Registration Board
	Capacity assessment	The capacity assessment was carried on 18-05-2021 and 28-05-2021. Available manufacturing Capacity (Cephalosporin Injection) = 66.78% Available manufacturing Capacity (Carbapenem Injection) = 97.23% Available capacity (HPLC) = 59.61% Available Sterility testing capacity = 77.66% The Board in its 307th meeting decided to allow contract manufacturing from M/s Nicholas Phamrmaceuticals and advised the firm to upgrade their QC and microbiological lab includin gaddition of atleast 2 HPLC systems. The firm vide its letter Dy. No. 5367 dated 08-03-2022 submitted the evidence of purchase of 02 new HPLC systems. The firm also submitted evidence of purchase of atomic absorption spectrophotometer for testing of sodium content vide letter Dy.No. 6363 dated 08-03-2022.
Decision: Approved. **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

196.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Horizon Healthcare (Pvt) Ltd. Plot No. 33, Sundar Industrial Estate, Lahore.**
	Name, address of Manufacturing site.	M/s English Pharmaceutical Industries Link Kattar Bund Road, Thokar Niaz Baig, Multan Road, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 28-05-2021.
	GMP status of the firm	**English Pharmaceutical:** GMP certificate issued based on inspection dated 06-01-2018
	Evidence of approval of manufacturing facility	Firm (M/s English Pharmaceuticals) has submitted copy of renewal of DML letter dated 09-03-2015 specifying Dry powder injectable vial (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Dy. No. and date of submission	Dy. No 23530 dated 27-08-2021
	Details of fee submitted	Rs. 75,000/- Dated 02-07-2021
	The proposed proprietary name / brand name	**COLIZONE 1MIU Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Colistimethate sodium …… 1MIU
	Pharmacotherapeutic Group of (API)	Antibiotic
	Pharmaceutical form of applied drug	Powder for solution for injection
	Reference to Finished product specifications	USP
	Proposed Pack size	1x1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Colistimethate Sodium 1 Million I.U. Powder for Solution for Injection **MHRA** Approved
	For generic drugs (me-too status)	Colitec 1MIU Injection by Rotex Pharma (Reg # 092316)
	Name and address of API manufacturer.	M/s Hebei Shengxue Dacheng Pharmaceutical Co Ltd. No. 50 Shengxue Road Launcheng District Shijiazhuang Hebei Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability data of 3 batches of API at accelerated and real time conditions**.**
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control,

		process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Colixin Injection of Pharmis Biofamaceutica
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No Product Specific Inspection has been conducted since it is a new license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20190927) issued by China Food and Drug Administration dated 04-01-2019. The certificate is valid till 03-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 22-04-2021 specifying import of 160Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of three trial batches manufactured using drug substance manufactured by M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India. Later the firm submitted 6 months stability study data of three commercial batches along with complete module 2 and module 3.

- Firm has not submitted fee for change of drug substance manufacturer and of change of stability study batches.
- The specifications of the firm are not as per USP since it does not contain test for sodium contents. Firm has not performed the test for sodium content at batch release or even during the stability studies.

Decision: Approved.

- **The Board further decided that the registration letter will be after submission of revised drug product specification as per USP including test for sodium content along with submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility M/s Bio-Next Pharmaceuticals, Rawat.**

198.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Gray's Pharmaceuticals Plot No. 2, Street # N-3, National Industrial Zone Rawat Islamabad.**

Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature,

		structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 1g injection of Pfizer Limited.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

Manufacturing Date	05-2021	05-2021	05-2021

Date of Initiation	24-05-2021	25-05-2021	26-05-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No Product Specific Inspection has been conducted since it is a new license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20190927) issued by China Food and Drug Administration dated 04-01-2019. The certificate is valid till 03-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 22-04-2021 specifying import of 160Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of three trial batches manufactured using drug substance manufactured by M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India. Later the firm submitted 6 months stability study data of three commercial batches along with complete module 2 and module 3.

- Firm has not submitted fee for change of drug substance manufacturer and of change of stability study batches.
- The specifications of the firm are not as per USP since it does not contain test for sodium contents. Firm has not performed the test for sodium content at batch release or even during the stability studies.

Decision: Approved.

- **The Board further decided that the registration letter will be after submission of revised drug product specification as per USP including test for sodium content along with submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility M/s Bio-Next Pharmaceuticals, Rawat.**

199.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Islam Pharmaceuticals, 7-km Pasrur Road Sialkot.**
	Name, address of Manufacturing site.	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/80-2Drug1-2019/3739 issued by Food and Drugs Administration Haryana dated 21-05-2019. The certificate is valid till 2 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 23-10-2017 specifying import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/0990917. The commercial invoice is attested by AD (I&E) DRAP field office. Firm has submitted copy of commercial invoice cleared dated 03-11-2017 specifying

		import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/1031017. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm was informed that
Registration Board in its 316th meeting considered the case of meroepem injection manufactured by Global Pharmaceuticals, Islamabad wherein the Board decided as under:
Registration Board considered the case and noted the fact that the firm has not complied the decision of 313th meeting, wherein Board "advised the manufacturer to perform product development studies keeping in view the innovator product and product testing and stability studies by complying USP monograph and
submit data upon completion of 6 months stability studies", rather firm has submitted stability data of batches manufactured prior to the decision of 313th meeting. Hence Board decided to defer the application for submission of product development & stability studies in compliance with the Innovator product literature and USP monograph. Board also directed the firm to submit relevant sections of Form 5F against the new product development & stability studies data along with submission of full fee of Rs. 75,000/-

Response by the firm:
Now the firm has submitted following data of three newly manufactured batches. Firm has also changed the source of drug substance to CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China. **Firm has not submitted any fee for change of source as well as submission of stability study data of new batches**.

Firm has also submitted following documents along with stability study data:
1. Specifications and analytical procedure of drug substance
2. Verification studies of the analytical procedure of drug substance
3. Specifications and analytical procedure of drug product
4. Verification studies of the analytical procedure of drug product
5. Pharmaceutical equivalence studies against Merrem 500mg Injection of Astra Zaneca
5. Process validation report of three commercial batches
6. CoA of working standard
7. Executed BMR of three batches

The details of the newly submitted data is as under:

Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20180065) issued by China Food and Drugs Administration dated 17-08-2018. The certificate is valid till 16-08-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 13-09-2021 specifying import of 200Kg Meropenem for Batch No. 682107002 and 682107003. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Firm has changed the source of drug substance to CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological

	Development Zone, Hebei Province PR. China. Firm has not submitted any fee for change of source as well as submission of stability study data of new batches.	
Decision: Approved. • **Registration Board further decided that registration letter will be issued after submission of applicable fee that is 75,000/- for change of source as well as submission of stability study data of new batches as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.**		
202.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Reliance Pharma. Plot No 8, Street No. S-8, Industrial Estate, Rawat, Islamabad**
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 25-02-2019 is submitted.
	GMP status of the firm	**Global pharmaceuticals:** Firm has submitted copy of GMP certificate dated 04-01-2022 issued on the basis of inspection dated 03-01-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000417 of M/s Global Pharmaceuticals Islamabad dated 18-12-2017 specifying reallocation of dry powder injection (carbapenem) section is place of withdrawn Biotech section (BSF)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 18622: 02-07-2021
	Details of fee submitted	PKR 50,000/-: 27-04-2021 + PKR 50,000/-: 28-06-2021
	The proposed proprietary name / brand name	**RELEM 1g Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……1g

	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials with brown color flip off seal along with 20ml WFI ampoule.
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures,

		validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Merrem 500mg Injection manufactured by Boehringer Ingelheim.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/80-2Drug1-2019/3739 issued by Food and Drugs Administration Haryana dated 21-05-2019. The certificate is valid till 2 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 25-09-2017 specifying

		import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/MPM/01860817. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm was informed that
Registration Board in its 316th meeting considered the case of meroepem injection manufactured by Global Pharmaceuticals, Islamabad wherein the Board decided as under:
Registration Board considered the case and noted the fact that the firm has not complied the decision of 313th meeting, wherein Board "advised the manufacturer to perform product development studies keeping in view the innovator product and product testing and stability studies by complying USP monograph and
submit data upon completion of 6 months stability studies", rather firm has submitted stability data of batches manufactured prior to the decision of 313th meeting. Hence Board decided to defer the application for submission of product development & stability studies in compliance with the Innovator product literature and USP monograph. Board also directed the firm to submit relevant sections of Form 5F against the new product development & stability studies data along with submission of full fee of Rs. 75,000/-

Response by the firm:
Now the firm has submitted following data of three newly manufactured batches. Firm has also changed the source of drug substance to CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China. **Firm has not submitted any fee for change of source as well as submission of stability study data of new batches**.

Firm has also submitted following documents along with stability study data:
1. Specifications and analytical procedure of drug substance
2. Verification studies of the analytical procedure of drug substance
3. Specifications and analytical procedure of drug product
4. Verification studies of the analytical procedure of drug product
5. Pharmaceutical equivalence studies against Merrem 500mg Injection of Astra Zaneca
5. Process validation report of three commercial batches
6. CoA of working standard
7. Executed BMR of three batches

The details of the newly submitted data is as under:

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 23-10-2017 specifying import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/0990917. The commercial invoice is attested by AD (I&E) DRAP field office. Firm has submitted copy of commercial invoice cleared dated 03-11-2017 specifying

		import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/1031017. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The firm was communicated the following decision of 312th meeting of Registration Board.
The product development and stability study data of the contract manufacturer was considered by Registration Board in its 312nd meeting and observed that the contract manufacturer has not performed complete product development studies, the specifications adopted by the manufacturer throughout stability studies were not according to USP and that the stability batches have also expired. Accordingly, the Board deferred for following submissions:

- Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug Product manufacturer.
- Scientific justification for using flow rate of 1.0ml/min for assay testing of your commercial batches since USP recommends flow rate to be 1.5ml/min,
- Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.
- Scientific justification for having analytical method of drug product without specifying that "*sample should be hold for 1-2 hours at 25± 1°C before testing*" which is recommended in USP monograph.
- Scientific justification for releasing the commercial batch of drug product and during its stability studies even after having the value of tailing factor above 1.5, since USP monograph specifies tailing factor NMT 1.5 in the system suitability requirements.
- Scientific justification for using different HPLC equipment and software for the standard solution and the sample solution analysis.
- Scientific justification for HPLC testing of your commercial batches using UV detector at 220nm while the USP recommends that testing be performed at 300nm.
- Scientific justification for using reference / working standard having a potency of 73.91% for the analysis of commercial batches.
- Scientific justification for having a master formulation containing 707mg of meropenem trihydrate blended with sodium carbonate which is equivalent to 500mg meropenem.
- Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.
- Scientific justification why complete tests as mentioned in USP monograph were not performed in pharmaceutical equivalence studies.
- Scientific justification for not performing compatibility studies of the drug product with the recommended diluent.
- Scientific justification for not performing the test of sodium content and loss on drying for the analysis of commercial batches of the drug product.

- Scientific justification for using an entirely different formula for calculation of assay results of commercial batches from that specified in USP monograph.
- Scientific justification for not performing test of content of sodium, completeness and clarity of solution, loss on drying and sterility test during the stability studies of the product.
- Scientific justification for the results of assay test of meropenem for the batch No. 17L078 which show upward trend (i.e. increase in assay values with time) throughout the stability studies (both accelerated and real time) keeping in view the fact that the testing method was not exactly as per USP monograph, the reference standard meropenem (trihydrate) for injection was used instead of meropenem (base), the contents of sodium, as well as sodium carbonate was not determined at any time point during stability studies and loss on drying is also not performed during the stability studies.
- Scientific justification how three batches have been manufactured using 5Kg containers while each batch required 5.4Kg drug substance.
- Evidence of purchase of atomic absorption spectrophotometer including commercial invoice and Installation Qualification (IQ) and Operational Qualification (OQ) of atomic absorption.
- Submission of fee for pre-registration changes in the drug product specifications.

Keeping in view the above, the Board decided that the submitted stability study data is not acceptable and directed the manufacturer to either perform complete product development and stability studies or submit the aforementioned data as per USP specifications and submit data accordingly.

Response by the firm:

Now the firm has submitted following data of three newly manufactured batches. Firm has also changed the source of drug substance to CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China. **Firm has not submitted any fee for change of source as well as submission of stability study data of new batches**.

Firm has also submitted following documents along with stability study data:

1. Specifications and analytical procedure of drug substance
2. Verification studies of the analytical procedure of drug substance
3. Specifications and analytical procedure of drug product
4. Verification studies of the analytical procedure of drug product
5. Pharmaceutical equivalence studies against Merrem 500mg Injection of Astra Zaneca
5. Process validation report of three commercial batches
6. CoA of working standard
7. Executed BMR of three batches

The details of the newly submitted data is as under:

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000417 of M/s Global Pharmaceuticals Islamabad dated 18-12-2017 specifying reallocation of dry powder injection (carbapenem) section is place of withdrawn Biotech section (BSF)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7462: 08-03-2021
	Details of fee submitted	PKR 50,000/-: 07-01-2021
	The proposed proprietary name / brand name	**MERONAG 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……500mg
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials with sea green color flip off seal along with 10ml WFI ampoule.
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP

	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their

		product against Merrem 500mg Injection manufactured by Boehringer Ingelheim.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/80-2Drug1-2019/3739 issued by Food and Drugs Administration Haryana dated 21-05-2019. The certificate is valid till 2 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 23-10-2017 specifying import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/0990917. The commercial invoice is attested by AD (I&E) DRAP field office. Firm has submitted copy of commercial invoice cleared dated 03-11-2017 specifying

		import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/1031017. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The firm was communicated the following decision of 312th meeting of Registration Board.

The product development and stability study data of the contract manufacturer was considered by Registration Board in its 312nd meeting and observed that the contract manufacturer has not performed complete product development studies, the specifications adopted by the manufacturer throughout stability studies were not according to USP and that the stability batches have also expired. Accordingly, the Board deferred for following submissions:

- Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug Product manufacturer.
- Scientific justification for using flow rate of 1.0ml/min for assay testing of your commercial batches since USP recommends flow rate to be 1.5ml/min,
- Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.
- Scientific justification for having analytical method of drug product without specifying that "*sample should be hold for 1-2 hours at 25± 1°C before testing*" which is recommended in USP monograph.
- Scientific justification for releasing the commercial batch of drug product and during its stability studies even after having the value of tailing factor above 1.5, since USP monograph specifies tailing factor NMT 1.5 in the system suitability requirements.
- Scientific justification for using different HPLC equipment and software for the standard solution and the sample solution analysis.
- Scientific justification for HPLC testing of your commercial batches using UV detector at 220nm while the USP recommends that testing be performed at 300nm.
- Scientific justification for using reference / working standard having a potency of 73.91% for the analysis of commercial batches.
- Scientific justification for having a master formulation containing 707mg of meropenem trihydrate blended with sodium carbonate which is equivalent to 500mg meropenem.
- Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.
- Scientific justification why complete tests as mentioned in USP monograph were not performed in pharmaceutical equivalence studies.
- Scientific justification for not performing compatibility studies of the drug product with the recommended diluent.
- Scientific justification for not performing the test of sodium content and loss on drying for the analysis of commercial batches of the drug product.

- Scientific justification for using an entirely different formula for calculation of assay results of commercial batches from that specified in USP monograph.
- Scientific justification for not performing test of content of sodium, completeness and clarity of solution, loss on drying and sterility test during the stability studies of the product.
- Scientific justification for the results of assay test of meropenem for the batch No. 17L078 which show upward trend (i.e. increase in assay values with time) throughout the stability studies (both accelerated and real time) keeping in view the fact that the testing method was not exactly as per USP monograph, the reference standard meropenem (trihydrate) for injection was used instead of meropenem (base), the contents of sodium, as well as sodium carbonate was not determined at any time point during stability studies and loss on drying is also not performed during the stability studies.
- Scientific justification how three batches have been manufactured using 5Kg containers while each batch required 5.4Kg drug substance.
- Evidence of purchase of atomic absorption spectrophotometer including commercial invoice and Installation Qualification (IQ) and Operational Qualification (OQ) of atomic absorption.
- Submission of fee for pre-registration changes in the drug product specifications.

Keeping in view the above, the Board decided that the submitted stability study data is not acceptable and directed the manufacturer to either perform complete product development and stability studies or submit the aforementioned data as per USP specifications and submit data accordingly.

Response by the firm:

Now the firm has submitted following data of three newly manufactured batches. Firm has also changed the source of drug substance to CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China. **Firm has not submitted any fee for change of source as well as submission of stability study data of new batches**.

Firm has also submitted following documents along with stability study data:

1. Specifications and analytical procedure of drug substance
2. Verification studies of the analytical procedure of drug substance
3. Specifications and analytical procedure of drug product
4. Verification studies of the analytical procedure of drug product
5. Pharmaceutical equivalence studies against Merrem 500mg Injection of Astra Zaneca
5. Process validation report of three commercial batches
6. CoA of working standard
7. Executed BMR of three batches

The details of the newly submitted data is as under:

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone sodium eq. to Ceftriaxone 250mg
	Pharmaceutical form of applied drug	Almost white to off white colored powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved
	For generic drugs (me-too status)	Topcef Injection of Ceftriaxone Sodium by Pride Pharmaceuticals 025876
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 5-5-17, valid upto 4-5-18.
	Name and address of API manufacturer.	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{O} \pm 2^{O}$ C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2^{O} C / 65% ± 5% RH for 36 months. (Batch No. 60155GJ81H-C, 60156GJ81H-C, 6015GJ81H-C)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence against the product Oxidil 250mg Injection IM.

	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Evaluation by PEC:				
• The applied formulation to be manufactured by M/s Gray's Pharmaceuticals, Rawat have already been granted approval vide letter No.F.316-RB/2022 (PR-II) dated 26th May				

2022. The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	Trophin injection 250mg IM
Batch No. of drug product	124, 125, 126
Case No.	6
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision: Approved.

- **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**

207.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Alliance Pharmaceutical Pvt Ltd. 112 A, Hayatabad Industrial Estate, Peshawar**

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26132: dated 21-9-2021
	Details of fee submitted	PKR 75,000/-: dated 29-06-2021
	The proposed proprietary name / brand name	ROCEXON 500mg IM Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone sodium eq. to Ceftriaxone 500mg
	Pharmaceutical form of applied drug	Almost white to off white colored powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved
	For generic drugs (me-too status)	Topcef 500mg Injection of M/s. Pride Pharmaceuticals 025878

	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 5-5-17, valid upto 4-5-18.
	Name and address of API manufacturer.	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{O} \pm 2^{O}$ C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2^{O} C / 65% ± 5% RH for 36 months (Batch No. 60155GJ81H-C, 60156GJ81H-C, 6015GJ81H-C))

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence against the product Rocephin Pharmaceuticals 500mg IM.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China. issued by State food and drug administration china, valid Up to 5-6-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice#JTRF210117-MQ)

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied formulation to be manufactured by M/s Gray's Pharmaceuticals, Rawat have already been granted approval vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022. The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	Trophin Injection 500mg IM
Batch No. of drug product	109, 114, 119
Case No.	4
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision: Approved.

- **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**

Batch No. of drug product	124, 125, 126
Case No.	3
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.
- **Firm has applied for both IV/IM injection however the data of contract manufacturer i.e. M/s Gray's Pharmaceuticals already considered and approved in 316th meeting was for 1gm IV Injection.**

Decision: Approved as IV Injection.
Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.

214.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Iceberg Pharmaceuticals Pvt Ltd. Plot # 144, Nowshera Indsutrial Estate, Risalpur**
	Name, address of Manufacturing site.	M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26124: dated 21-9-2021
	Details of fee submitted	PKR 75,000/-: dated 30-06-2021
	The proposed proprietary name / brand name	CEFTIME 500mg IV/IM Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Cefotaxime sodium eq. to Cefotaxime… 500mg
	Pharmaceutical form of applied drug	Almost white to off white colored powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA approved
	For generic drugs (me-too status)	Cefotaxime 500mg Injection of M/s. Friends Pharma
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 5-5-17, valid upto 4-5-18.
	Name and address of API manufacturer.	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or

		materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40 ^{O} ± 2 ^{O} C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2 ^{O} C / 65% ± 5% RH for 36 months. Batch numbers: (3079GL81F, 3078GL81F, 3080GL81F)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence against the product Claforan Injection 500mg.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China.
API Lot No.	0089L81F
Description of Pack (Container closure system)	Glass vial
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 24 months Accelerated: 6 months

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18 & 24 (Months)

Date of Initiation	27-02-2021	27-02-2021	27-02-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China. issued by State food and drug administration china, valid Up to 5-6-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice#JTRF210117-MQ)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied formulation to be manufactured by M/s Gray's Pharmaceuticals, Rawat have already been granted approval vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022. The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	Onexin Injection 500mg
Batch No. of drug product	TDI001, TDI002, TDI003
Case No.	12

Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision: Approved.

- **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**

Case No.	14
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision: Approved with JP Specifications.

- **Registration Board decided that registration letter will be issued after submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**

218.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Alliance Pharmaceutical Pvt Ltd. 112 A, Hayatabad Industrial Estate, Peshawar**
	Name, address of Manufacturing site.	M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26131: dated 21-9-2021
	Details of fee submitted	PKR 75,000/-: dated 29-6-2021
	The proposed proprietary name / brand name	CEPTAM 2g IV/IM Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Cefoperazone (as Sodium)……..1g Sulbactam (as sodium)……1g
	Pharmaceutical form of applied drug	Almost white to off white colored powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	Innovator
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Firm has provided reference from EMA website where this combination is registered as Sulperazone 1 & 2 gm Injection by Pfizer in following countries: • Poland • Slovakia • Lithuania • Czech Republic • Italy • Bulgaria
	For generic drugs (me-too status)	Adzone 1g Injection of M/s. Farm Aid group
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 5-5-17, valid upto 4-5-18.
	Name and address of API manufacturer.	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{O} \pm 2^{O}$ C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2^{O} C / 65% ± 5% RH for 36 months (9001HK81NG; 9002HK81NG; 9003HK81NG)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence against the Firm has performed pharmaceutical equivalence against the product Sulzone Injection2 g.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy & recovery, method precision,

		specificity bearing document number GP/QC-SAP-052 effective date 5-6-2018.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan City China. issued by State food and drug administration china, valid Up to 5-6-2023.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice#JTRF210117-MQ)		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.		
Evaluation by PEC:				
• The applied formulation to be manufactured by M/s Gray's Pharmaceuticals, Rawat have already been granted approval vide letter No.F.316-RB/2022 (PR-II) dated 26th May				

2022. The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	Kerazon Plus Injection 2g
Batch No. of drug product	TDI001, TDI002, TDI003
Case No.	15
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision: Approved with JP Specifications.

- **Registration Board decided that registration letter will be issued after submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**

219.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Iceberg Pharmaceuticals Pvt Ltd. Plot # 144, Nowshera Indsutrial Estate, Risalpur**

The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	AKSOXIME 200mg/5ml Dry Suspension
Batch No. of drug product	T-004, T-005, T-006
Case No.	10
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus

authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.

- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision: Approved.

- **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**

222.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Leama Chemi Pharma Pvt Ltd. 37-A, Hayatabad Industrial Estate, Peshawar**
	Name, address of Manufacturing site.	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
	Status of the applicant	☐Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26932 dated 29/09/2021
	Details of fee submitted	PKR 75,000/-: dated 13/07/2021
	The proposed proprietary name / brand name	LEXIME 400mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Cefixime as trihydrate……. 400 mg
	Pharmaceutical form of applied drug	Hard Gelatin Capsule
	Pharmacotherapeutic Group of (API)	Anti-Biotic (Cephalosporin)
	Reference to Finished product specifications	JP
	Proposed Pack size	1×5's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Suprex 400mg Capsule by M/s Lupin Pharma, USFDA Approved.
	For generic drugs (me-too status)	Cefspan 400mg capsule by M/s Barrett Hodgson, Reg. No. 013860
	GMP status of the Finished product manufacturer	New license granted on 22/06/2016

		(Cephalosporin Antibiotic) section approved.
	Name and address of API manufacturer.	M/s Citi Pharma (Pvt.) Ltd. 3 Kilometer, Head Balloki Road, Phool Nagar, Kasur -55050 Punjab, Pakistan. Tel: +92 49 4510192, 510189 Fax: +92 49 4510191 Website: www.citipharma.com Email ID: info@citipharma.com
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefixime is present in JP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (CFM1602001, CFM1602002, CFM1602003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is

		Cefspan 400mg capsule by M/s Barrett Hodgson, CDP has been performed against the same brand that is Cefspan 400mg capsule by M/s Barrett Hodgson, in A , Acetate Buffer (pH 4.5) , Phosphate Buffer (pH 6.8) & Kcl Buffer (pH 1.2). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
Brand Name	Endopime 1g powder for solution for injection or infusion
Batch No. of drug product	T-037, T-038, T-039
Case No.	2
Registration Board meeting	316th meeting of Registration Board

- The case was discussed in 316th meeting wherein Registration Board deliberated that as case pertains to contract manufacturing of already registered drug products thus authorized its Chairman for approval of contract manufacturing permission after rectification of identified shortcomings and product specific inspection.
- After 316th meeting of Registration Board the case was considered in light of rectifications of identified shortcomings (as identified in minutes of 316th meeting) and product inspection report, and accordingly after approval by Chairman Registration Board, letter for approval for the grant of contract manufacturing permission vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022 was issued to M/s Akson Pharmaceuticals was issued wherein the contract manufacturer was M/s Gray's Pharmaceuticals, Rawat.

Decision: Approved. • **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**		
226.	Name, address of Applicant / Marketing Authorization Holder	Alliance Pharmaceutical Pvt Ltd. 112 A, Hayatabad Industrial Estate, Peshawar
	Name, address of Manufacturing site.	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan
	Status of the applicant	☐Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26946 dated 29.09.2021
	Details of fee submitted	PKR 75000/-: dated 29.06.2021
	The proposed proprietary name / brand name	**EPIME 1gm IV/IM Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial Contains: Cefepime (as hydrochloride)……1g (with L-arginine)
	Pharmaceutical form of applied drug	Powder For Solution For Injection Or Infusion
	Pharmacotherapeutic Group of (API)	Anti-Biotic (Cephalosporin)
	Reference to Finished product specifications	USP
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Renapime 1g Powder for solution for injection/infusion Manufacturer: Renascience Pharma Ltd (MHRA approved)
	For generic drugs (me-too status)	Maxipime 1g Injection by M/s Novartis
	GMP status of the Finished product manufacturer	Tablet (General), Capsule (General), Dry Suspension (Ceph), Capsule (Ceph), Dry powder injection (Ceph), cream & Ointment and ampule section approved.
	Name and address of API manufacturer.	M/s Qilu Antibiotics Pharmaceutical Co., Ltd. No.849 Dongjia Town, Licheng District, Jinan, Shandong Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and

		controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefepime HCl is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (T-037, T-038, T-039)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Maxipime 1g Injection by M/s Novartis
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Qilu Antibiotics Pharmaceutical Co., Ltd. No.849 Dongjia Town, Licheng District, Jinan, Shandong Province, China
API Lot No.	0022CJ66DB
Description of Pack (Container closure system)	USP type III glass vial. Packed in a unit carton with leaflet
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 2, 4, 6 (Months)

	Real Time: 0, 3, 6 (Months)		
Batch No.	T-037	T-038	T-039

Manufacturing Date	03-2021	03-2021	03-2021
Date of Initiation	04-03-2021	04-03-2021	05-03-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SD20160497 issued by China Food and Drug Administration valid till 25/08/2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Commercial invoice and ADC clearance of the same batch of API as used in the stability studies.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

- The applied formulation to be manufactured by M/s Gray's Pharmaceuticals, Rawat have already been granted approval vide letter No.F.316-RB/2022 (PR-II) dated 26th May 2022. The case of the applied formulation of M/s Gray's Pharmaceuticals, Rawat was considered by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 316th meeting are as follows:

Applicant firm	M/s Akson Pharmaceuticals, Plot No.9-B/ 1& 2, Old, Industrial Estate New Mirpur City, Azad Jammu and Kashmir
Manufacturer firm	M/s Gray's Pharmaceuticals, Plot #2, Street # N-3, National Industrial Zone, Rawat-Pakistan

Decision: Approved.

- **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad.**

227.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Alliance Pharmaceutical Pvt Ltd. 112 A, Hayatabad Industrial Estate, Peshawar**
	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies Lyophilized vial (General) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies Lyophilized vial (General) section. Firm has also submitted copy of letter for grant of additional section dated 23-07-2012 specifying Lyophilized vial (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 25416: 13-09-2021
	Details of fee submitted	PKR 50,000/-: 07-04-2021
	The proposed proprietary name / brand name	**ALLOZOLE Injection 40mg**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Esomeprazole (as sodium)……40mg
	Pharmaceutical form of applied drug	Almost white coloured lyophilized hygroscopic powder contained in glass vial
	Pharmacotherapeutic Group of (API)	PPI
	Reference to Finished product specifications	In house
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Nexium IV Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Nexum injection by Getz Pharma
	Name and address of API manufacturer.	Sterile India Pvt Ltd. Plot No. 100, Sec-56 Phase-4, Kundli Sonipat (Haryana) India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch

		analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Nexum 40mg Injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has refered to their previous inspection conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet which was considered by the Board in its 296th meeting and the product was approved based on the inspection report. Following points were noted during the inspection: • All the stability study of EMPAGLIF (10mg & 25mg) Tablets has been conduct on Shimadzu HPLC (Model SPD-20) operated via LABSOLUTION software version 6.5 (complying FDA 21 CFR part 11) • Audit trail reports for Testing of Empaglif 10mg & 25mg Tablets are available. • Proper and continuous monitoring record for stability chamber is available, along with 5KV backup generator with ATS.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/80-2Drug1-2019/3739 issued by Food and Drugs Administration Haryana dated 21-05-2019. The certificate is valid till 2 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 5Kg Esomeprazole sodium sterile powder dated 02-12-2019. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has not submitted audit trail reports for the product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Manufacturer has changed specifications of the drug product without submission of fee.
- The applied product to be manufactured by M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabadhave already been approved by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Gray's Pharmaceuticals. Plot No. 2, Street No. N-3, RCCI Rawat Rawalpindi.
Manufacturer firm	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabad
Brand Name	ESOMEP Injection 40mg
Batch No. of drug product	L-315, L-287, L-283
Case No.	787
Registration Board meeting	316th meeting of Registration Board

Decision: Approved.

- **Firm shall submit differential fee of Rs. 25,000/- for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.**
- **Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
228.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Swiss Pharmaceuticals Pvt Ltd A/159, SITE-II Super Highway Karachi.**
	Name, address of Manufacturing site.	M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 29-05-2020 is submitted.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Vision Pharmaceuticals dated 25-03-2022 based on inspection dated 11-02-2019. As per the certificate, it was valid till 09-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML of M/s Vision Pharmaceuticals DML No 000517 dated 07-06-2021 specifying sterile dry powder injectable vial (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate dated 31-07-2019 of M/s Vision Pharmaceuticals (DML No. 000806 semi basic) issued based on inspection dated 11-02-2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted inventory transfer note from SAP of the firm dated 08-10-2020 for the same batch.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The application of the firm for contract manufacturing from M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad was not submitted as per the guidance document approved by Registration Board. The submitted application was in variation to the guidance document for various modules, sections and sub sections majorly including complete module 1, section 3.2.S.4.1, 3.2.S.4.2, 3.2.S.4.3, 3.2.S.4.4, 3.2.S.5, 3.2.P.2.2.1, 3.2.P.2.6, 3.2.P.3.5, 3.2.P.5.1, 3.2.P.5.2, 3.2.P.5.3, 3.2.P.5.4, 3.2.P.6 and 3.2.P.8. Furthermore, it is also pertinent to mention that the drug product manufacturer has submitted COA of drug substance which is released on 26-02-2018 and provided batch release certificates of 3 batches of drug product released on 09-2017 instead of submitting data of same batches as per the guidance document. Therefore, the firm was advised to resubmit the application compiled in the light of the guidance document approved by Registration Board so that further evaluation of your application could be carried out.

In response, the firm has changed drug product specifications from in house to BP without submission of fee. Firm has also changed the drug substanbce source from Everest Organics Limited Aroor Village Sadasivapet Mandal Sangareddy District Aroor (V), Sadasivpet(M), Sangareddy District Telangana India to M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.

The response was also evaluated, and the found deficient for various points. The following points were communicated to the firm.

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit label claim of the applied product in line with innovator product / reference product along with submission of requisite fee.	Firm has submitted following label claim without submission of fee. Each vial Contains: Pantoprazole (as sodium)……40mg
2.	In your initial submission, you have mentioned in house specifications for the drug product, while in the later submission you have mentioned BP specifications. Justification is required in this regard along with evidence when you have changed the specifications of your already registered product.	In our previous submission the testing for 3 batches was done on UV, but parallel we change our Standard Analytical Procedure and shift our testing method to HPLC. Firm has submitted Revised testing method which was signed and issued on 31-12-2021. This method contains HPLC test for assay of drug product, however, for bulk stage the assay method was based on UV. **As per Documents, firm has changed assay to HPLC method on 31-12-2021 while the stability data was initiated on October 2020. Furthermore, firm could not provide any evidence of intimation to DRAP regarding revision of the specifications of their already registered product from in house to BP specs.**
3.	In your initial application you have specified that the source of drug substance is Everest Organics Limited Aroor Village Sadasivapet Mandal Sangareddy District Aroor (V), Sadasivpet(M), Sangareddy District Telangana India, while in new submission you have changed the source to M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad. Justification is required in this regard along with submission of requisite fee.	As we have two DMLs one for finished drugs and secod for semi basic dosage forms. The lyophilized pantoprazole is always procured from M/s Vision Pharmaceuticals but the powder pantoprazole for lyophilization is procured from Everest organics limited.
4.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient	Firm has submitted standard testing method of pantoprazole sodium sesquihydrate drug substance from Vision Pharmaceuticals dated 29-12-2021. **The submitted document does not specify whether it is of semi basic DML or of DML issued by way of formulation. Moreover the specifications are issued on**

	by both Drug substance & Drug Product manufacturer is required."	**December 2021 while stability batches were manufactured in October 2020.**
5.	Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".	Firm has submitted verification studies dated 05-09-2020 based on HPLC method, **while as per the submitted specifications of the drug substance, the assay method is based on potentiometric titration.**
6.	The COA of drug substance manufacturer specifies that the material was released on 31-09-2020 while the drug product manufacturer has sampled the product on 02-09-2020 and released on 16-09-2020. Justification is required in this regard.	Firm submitted that it was a typo error. Firm has submitted another copy of COA of the same batch. In the newly submitted COA from Vision Pharmaceuticals (Semi-Basic DML) the batch was released on 31-08-2020 as per In-house specification and assay on UV method. While as per the raw material analysis report from Vision Pharmaceuticals (Formulation DML), the batch was released on 16-09-2020 as per Innovator's specification and assay on UV method. **The drug substance specifications, BP monograph and submitted COA are contradictory.**
7.	Justify the use of 10ml water for injection as diluent since the innovator product recommends that the product should be reconstituted with 10ml 0.9% sodium chloride solution.	Firm has submitted that they are using 10ml of 0.9% sodium chloride solution as diluent. **However previously the firm has specified water for injection as the diluent.**
8.	Submit results of compatibility studies in section 3.2.P.2.6.	Firm has not submitted compatabiity study report instead only submitted a batch release report.
9.	The analytical method and specifications of the drug product has been generated and signed on 31-12-2021 with a dsscription "this is a new document on this subject" while the stability batches were manufactured in September 2020. Justify how the submitted specifications could be considered applicable for testing of these batches.	The provided analytical method and specifications of drug product has been submitted is the updated one, replacing the old version. **As per Documents, firm has changed assay to HPLC method on 31-12-2021 while the stability data was initiated on October 2020. Furthermore, firm could not provide any evidence of intimation to DRAP regarding revision of the specifications of their already registered product from in house to BP specs.**
10.	Analytical method alidation studies of the drug product were developed in 2017 wherein the specifications and analytical method of BP 2020 were claimed. Justify how validation	**Firm has once again submitted same old verification studies of 2017 in which the assay method was different from that specified in the latest specifications of the firm as well as BP monograph.**

	of analytical method of 2020 can be performed in 2017.	
11.	Justify how three batches of drug product with BP specs were released on 05-10-2020 while the drug specifications are different from that specified in BP monograph and are exactly same as that submitted in initial application as in-house specifications.	**It was a typo error, updated range was according to BP.**
12.	Submit evidence of procurement of the drug substance.	Firm has submitted inventory transfer note from SAP of the firm dated 08-10-2020 for the same batch. **However, the document does not specify any quantity. Moreover, the document for transfer of inventory is of 08-10-2020, while as per the raw material analysis report from Vision Pharmaceuticals (Formulation DML), the batch was released on 16-09-2020.**
13.	Justify how the manufacturing of commercial batches were carried out from 17-09-2020 while the drug substance used in those batches was released on 31-09-2020.	The drug substance was released on 07-09-2020. However as per invoice the material was transferred o 08-10-2020, and as per raw material analysis report the material was released on 16-09-2020.

Decision: Deferred for following:

- **Submission of applicable fee for revision of source of drug substance, revision of specifications and label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Scientific justification how a revised HPLC method dated 31-12-2021 can represent the results of the stability studies which were initiated in October 2020.**
- **Approval of DRAP for change in specifications of the registered product for which stability data is submitted.**
- **Scientific justification for performing verification studies of analytical method of drug substance dated 05-09-2020 based on HPLC method, while as per the submitted specifications of the drug substance, the assay method is based on potentiometric titration.**
- **Scientific justification for having drug substance specifications which are different from the specifications of drug substance manufacturer as well as BP monograph.**
- **Clarification about the use of 10ml water for injection as diluent for the applied product since the innovator product recommends different diluent.**
- **Verification studies of the analytical method of drug product.**
- **Evidence of procurement of the drug substance.**
- **Scientific justification for manufacturing and testing commercial batches of a registered drug product on non-pharmacopoeial specifications while BP monograph was already available for the drug product.**

229.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi.**
	Name, address of Manufacturing site.	M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer

		☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 02-08-2021 is submitted.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Vision Pharmaceuticals dated 25-03-2022 based on inspection dated 11-02-2019. As per the certificate, it was valid till 09-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML of M/s Vision Pharmaceuticals DML No 000517 dated 07-06-2021. Firm has also submitted copy of letter dated 09-12-2021 which specifies that CLB in its 283rd meeting held on 28th October 2021 also approved renewal of DML for Liquid Injectable (LVP) General Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23864: 31-08-2021
	Details of fee submitted	PKR 75,000/-: 06-08-2021
	The proposed proprietary name / brand name	**JYTHON 600mg/300ml Infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial of 300ml Contains: Linezolid…..…600mg
	Pharmaceutical form of applied drug	Liquid infusion
	Pharmacotherapeutic Group of (API)	Antibacterials for systemic use
	Reference to Finished product specifications	In-house specs
	Proposed Pack size	1’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zyvox IV **(USFDA** Approved)
	For generic drugs (me-too status)	Nezkil Infusion by Continental pharma
	Name and address of API manufacturer.	Optrix Laboratories Pvt Ltd. Survey No. 145/A & 147, Ramalingampally (V), Bommalaramaram (M), Yadadri-Bhuvanagiri District Telangana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form,

		manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Nezkil infusion of Continental Pharma.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Optrix Laboratories Pvt Ltd. Survey No. 145/A & 147, Ramalingampally (V), Bommalaramaram (M), Yadadri-Bhuvanagiri District Telangana India.
API Lot No.	OP-LID/10/17/107
Description of Pack (Container closure system)	Glass vials
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	1217901	1217902	1217904
Batch Size	1000 Vials	1000 Vials	1000 Vials
Manufacturing Date	12-2017	12-2017	12-2017
Date of Initiation	27-12-2017	29-12-2017	29-12-2017
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 68951/TS/2021) issued by Drugs control administration, Government of Telangana dated 20-09-2021. The GMP certificate is valid till 19-09-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 08-11-2017 specifying import of 50Kg Linezolid. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC system are not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Justify the manufacturing of 300ml glass vial (linezolid 600mg/300ml Infusion), while your approved manufacturing facility is "Liquid Injectable Vial SVP (General) section".	Firm has also submitted copy of letter dated 09-12-2021 which specifies that CLB in its 283rd meeting held on 28th October 2021 also approved renewal of DML for Liquid Injectable (LVP) General Section.
2.	The drug substance manufacturer has specified HPLC test for assay of drug substance while the drug product manufacturer has specified UV method for assay of drug substance. Justify how drug product	The drug substance testing was done by UV method at that time, but currently we are using HPLC method for both API and product.

	manufacturer can adopt different test for assay method from that recommended by the drug substance manufacturer.	
3.	Submit COA of relevant batch of API used in the manufacturing of batches for which stability study data is submitted in section 3.2.P.8.3 from both drug substance manufacturer as well as drug product manufacturer in section 3.2.S.4.4, since you have submitted COA of batch number OP-LID/10/17/107 (Mfg date: 09-2017), while as per the submitted import documents the lot number of the API is OP-LID/07/18/077 (Mfg date: 05-2018) and the three stability batches are manufactured in 12-2017.	Firm has submitted ADC attested commercial invoice for lot number OP-LID/10/17/107.
4.	Innovator drug product is using sodium hydroxide and/or hydrochloric acid for ataining the pH within a narrow range of 4.4-5.2 while your master formulation does not specify the use of any such ingredient. Justification is required in this regard.	For pH adjustment we had mentioned HCL and sodium hydroxide in BMR. As our formulation is stable and upon manufacturing the pH comes in limit as defined, and we do not require HCl or Sodium hydroxide for pH adjustment.
5.	Justify why the pharmaceutical equivalence studies were conducted against the comparator product instead of using innovator / reference product. Further justify why pharmaceutical equivalence does not include all quality tests.	Pharmaceutical equivalence study was done against Nezkil of continental pharma as mentioned in DRAP 293rd meeting we can use Reference or comparator product for comparison and comparator product is among brand leaders in Pakistan.
6.	The pH of the product mentioned in section 3.2.P.2.6 is 6.12 with a range of 5.0 to 7.0 which is contrary to the limit defined in your speifications. Justification is required in this regard.	It was a typo error. Actual pH range is 4.4 to 5.5 and our results fall in it.
7.	Justify why terminal sterilization is not performed for the said product although being the method of choice for sterilization.	Firm has submitted that they have performed terminal sterilization and have also submitted copy of BMR.
8.	Justify why the test for filled volume is not specified in the specifications of the drug product although this test is recommended in general monograph of official pharmacopoeia.	Filled volume test reports are now provided by the firm.
9.	Justify the pH of the drug product from 4.4 to 5.5 since the pH range recommended by the innovator's product is 4.4-5.2.	Linezolid infusion batches kept on stability have pH almost in the range of 4.4 to 4.8, and this is in limit of 4.4 to 5.2, However we will revise the pH limit as according to innovator specs and will revise the testing SOP.

10.	Justify the analytical method for assay testing of the drug product which is based on UV method since the innovator's product as well as the drug substance manufacturer specify HPLC method for assay test.	Firm has submitted revised analytical procedures of the drug product dated 13-09-2021. As per the method, buk product is tested by UV method while filled vial are tested using HPLC method. **The revised method is signed on 13-09-2021 while the stability studies were initiated on December 2017.**
11.	The container closure system of the innovator is "flexible plastic infusion bags in a foil laminate overwrap" while your prduct is packed in glass vial. Justify how your container closure system can prevent the product from exposure to the light.	Stability is done in glass vial and it is stable. Also our glass vials are wrapped in laminated foil.
12.	Justify why the test of pH is not performed during stability studies.	pH is not included in stability summary sheets, however all testing is performed and mentioned in analysis certificates. pH results added in stability summary sheet.

Decision: Deferred for following:

- **Scientific justification for revised analytical procedures of the drug product dated 13-09-2021 in which buk product is tested by UV method while filled vial are tested using HPLC method.**
- **Scientific justification how a revised method dated 13-09-2021 can represent the results of the stability studies which were initiated in December 2017.**

230.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A, Sundar Industrial Estate, Raiwind Road Lahore.**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 29-03-2021.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 19-04-2019 based on the inspection dated 01-04-2019. The GMP certificate specifies Dry powder suspension (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 13-06-2016 specifying Dry powder suspension (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

Date of Initiation	22-03-2018	19-03-2018	19-04-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous PSI has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 09-02-2018 specifying purchase of 25Kg Cefixime (micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, HPLC chromatograms, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications from API manufacturer as well as Cunningham pharmaceuticals dated February 2021. **The specifications of Cunningham pharma are different from API manufacturer as well as BP monograph. Further the API specs are of February 2021 while stability testing was initiated in March 2018.**
2.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board and in line with ICH guidelines specifying the exact concentration of each solution and the detailed procedure for each test.	Firm has submitted verification studies of analytical method of drug substance. The analytical method mentioned in verification studies is different from the analytical procedure submitted in section 3.2.S.4.2. Furthermore the method specifies HPLC technique while the calculation method specifies UV absorbance values.
3.	Submit COA of reference standard actually used in the analysis of drug substance and drug product.	Firm has submitted COA of working standard from Pharmagen Limited.
4.	Submit stability study data of the drug substance (cefixime trihydrate in micronized form) from the drug substance manufacturer as per zone IV-A conditions.	Firm has again submitted the same stability data without clarification whether the cefixime was compacted or micronized.
5.	Provide complete master formulation for each bottle in section 3.2.P.1.	Firm has submitted master formulation per bottle.
6.	Provide details of reconstitution solvent / diluent along with its exact volume which is to be used for reconstitution of the drug product.	Water for injection 20ml is the diluent for reconstitution.

7.	Justify why the pharmaceutical equivalence studies are not performed against the innovator / reference product.	No response submitted by the firm, firm has again submitted the same pharmaceutical equivalence report. **Firm has not performed preservative effectiveness studies.**
8.	Justify why comparative dissolution profile / drug release studies are not performed for your product since USFDA has recommended such studies for cefixime suspension.	Firm has submitted that test for CDP is not mentioned in USP monograph.
9.	Submit data of compatibility of the drug product along with reconstitution solvent in section 3.2.P.2.6.	Firm has submitted results of compatibility studies.
10.	Justify why the test for deliverable volume is not added in drug product specification as recommended in USP monograph. Revise your product specifications in line with USP monograph along with submission of fee for revision of specifications.	Firm has submitted revised specifications in which test of deliverable volume is also added. Firm has not submitted any fee for change of specifications.
11.	Provide details about the standard solution preparation instead of just using the general statement "0.2mg/ml of USP cefixime RS in solution C" as mentioned in USP monograph.	Firm has submitted revised specifications in which detailed method of standard solution preparation is mentioned.
12.	Submit exact details of the assay preparation since the words "*Reconstitute sample as directed n the labelling"* should not be used in the method adopted by a firm. Instead provide details about the exact diluent along with volume in which reconstitution is to be carried out.	Firm has submitted revised specifications in which detailed method of sample solution preparation is mentioned.
13.	Justify the alternate method for assay testing of the drug product which is based on UV analysis.	Firm has submitted that UV method is only for final mix stage in order to save time during the process.
14.	The concentration of standard solution is 0.2mg/ml while your linearity studies are conducted between 0.008mg/ml to 0.02mg/ml in which does not include the concentration of standard solution. Justify your results.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
15.	The repeatability, reproducibility and accuracy studies are reported without specifying the exact concentration of each solution which is tested. Provide results of your verification studies in the light of ICH guidelines.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
16.	Justify how same verification studies are used for the analytical method of cefixime capsule, and suspension as well.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
17.	For Batch No. 180012, the results of batch analysis (performed on 19-02-2018) was 109.86% while the results in	It was a typographical error.

	initial stability studies at accelerated (performed on 22-03-2018) was 102.65% while the results in initial stability studies at real time (performed on 22-03-2018) was 104.71%. Justify how such significant difference in assay value exists and further justify how the results of initial stability is different for accelerated and real time studies.	
18.	For Batch No. 180013, the results of batch analysis (performed on 22-02-2018) was 104.71% while the results in initial stability studies at accelerated (performed on 19-03-2018) was 101.23% while the results in initial stability studies at real time (performed on 19-03-2018) was 104.62%. Justify how such significant difference in assay value exists and further justify how the results of initial stability is different for accelerated and real time studies.	It was a typographical error.
19.	Specify the date of initiation of stability studies for the batch number 180015.	19-04-2018

Decision: Deferred for following:

- **Scientific justification for having different specifications of the drug substance from that of API manufacturer as well as BP monograph.**
- **Scientific justification how a revised method of February 2021 can represent the results of the stability studies which were initiated in March 2018.**
- **Scientific justification for performing verification studies of the analytical method of drug substance using a different analytical method from that specified in section 3.2.S.4.2.**
- **Submission of stability study data of three batches of cefixime trihydrate (micronized) from the API manufacturer as per zone IV-A conditions.**
- **Submission of pharmaceutical equivalence and Comparative Dissolution Profile (CDP) against the innovator's product.**
- **Submission of preservative effectiveness studies.**
- **Submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Scientific justification how the results of at zero month time point can be different for accelerated and real time conditions.**

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cebosh dry suspension of Bosch pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.		
API Lot No.	00243/342/2017		
Description of Pack (Container closure system)	Amber color glass bottle		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	180011	180016	180048
Batch Size	5,000 bottles	5,000 bottles	5,000 bottles
Manufacturing Date	02-2018	04-2018	08-2018
Date of Initiation	19-03-2018	~~22-03-2018~~	~~22-03-2018~~

No. of Batches	03

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous PSI has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 09-02-2018 specifying purchase of 25Kg Cefixime (micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, HPLC chromatograms, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications from API manufacturer as well as Cunningham pharmaceuticals dated February 2021. **The specifications of Cunningham pharma are different from API manufacturer as well as BP monograph. Further the API specs are of February 2021 while stability testing was initiated in March 2018.**
2.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board and in line with ICH guidelines specifying the exact concentration of each solution and the detailed procedure for each test.	Firm has submitted verification studies of analytical method of drug substance. The analytical method mentioned in verification studies is different from the analytical procedure submitted in section 3.2.S.4.2. Furthermore the method specifies HPLC technique while the calculation method specifies UV absorbance values.
3.	Submit COA of reference standard actually used in the analysis of drug substance and drug product.	Firm has submitted COA of working standard from Pharmagen Limited.

4.	Submit stability study data of the drug substance (cefixime trihydrate in micronized form) from the drug substance manufacturer as per zone IV-A conditions.	Firm has again submitted the same stability data without clarification whether the cefixime was compacted or micronized.
5.	Provide complete master formulation for each bottle in section 3.2.P.1.	Firm has submitted master formulation per bottle.
6.	Provide details of reconstitution solvent / diluent along with its exact volume which is to be used for reconstitution of the drug product.	Water for injection 20ml is the diluent for reconstitution.
7.	Justify why the pharmaceutical equivalence studies are not performed against the innovator / reference product.	As innovator product is not available in Pakistan therefore we performed testing against Cebosh suspension. **Firm has not performed preservative effectiveness studies.**
8.	Justify why comparative dissolution profile / drug release studies are not performed for your product since USFDA has recommended such studies for cefixime suspension.	Firm has submitted that test for CDP is not mentioned in USP monograph.
9.	Submit data of compatibility of the drug product along with reconstitution solvent in section 3.2.P.2.6.	Firm has submitted results of compatibility studies.
10.	Justify why the test for deliverable volume is not added in drug product specification as recommended in USP monograph. Revise your product specifications in line with USP monograph along with submission of fee for revision of specifications.	Firm has submitted revised specifications in which test of deliverable volume is also added. Firm has not submitted any fee for change of specifications.
11.	Provide details about the standard solution preparation instead of just using the general statement "0.2mg/ml of USP cefixime RS in solution C" as mentioned in USP monograph.	Firm has submitted revised specifications in which detailed method of standard solution preparation is mentioned.
12.	Submit exact details of the assay preparation since the words "*Reconstitute sample as directed n the labelling"* should not be used in the method adopted by a firm. Instead provide details about the exact diluent along with volume in which reconstitution is to be carried out.	Firm has submitted revised specifications in which detailed method of sample solution preparation is mentioned.
13.	Justify the alternate method for assay testing of the drug product which is based on UV analysis.	Firm has submitted that UV method is only for final mix stage in order to save time during the process.
14.	The concentration of standard solution is 0.2mg/ml while your linearity studies are conducted between 0.008mg/ml to 0.02mg/ml in which does not include the concentration of standard solution. Justify your results.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
15.	The repeatability, reproducibility and accuracy studies are reported without	Method verification of finished product has been revised as per ICH guidelines.

	specifying the exact concentration of each solution which is tested. Provide results of your verification studies in the light of ICH guidelines.	**Firm has not justified previous verification studies.**
16.	Justify how same verification studies are used for the analytical method of cefixime capsule, and suspension as well.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
17.	Justify how the results of initial stability is different for accelerated and real time studies.	Results of initial stability study are not different from accelerated and real time time studies. However, it was a typographical error. Results of Batch 180016 and Batch 180048 after correction are attached.
18.	Justify why the results of real time stability studies for batch 180016 and 180048 are exactly same.	It was a typographical error. Results of Batch 180016 and Batch 180048 after correction are attached.

Decision: Deferred for following:

- **Scientific justification for having different specifications of the drug substance from that of API manufacturer as well as BP monograph.**
- **Scientific justification how a revised method of February 2021 can represent the results of the stability studies which were initiated in March 2018.**
- **Scientific justification for performing verification studies of the analytical method of drug substance using a different analytical method from that specified in section 3.2.S.4.2.**
- **Submission of stability study data of three batches of cefixime trihydrate (micronized) from the API manufacturer as per zone IV-A conditions.**
- **Submission of pharmaceutical equivalence and Comparative dissolution profile (CDP) against the innovator's product.**
- **Submission of preservative effectiveness studies.**
- **Submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Scientific justification how the results of initial stability can be different for accelerated and real time conditions.**

232.	**Name, address of Applicant / Mar keting Authorization Holder**	**M/s Islam Pharmaceuticals. 7 km, Pasrur Road, Sialkot**
	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 15-06-2019.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies dry powder injection (cephalosporin) section.

	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies dry powder injection (cephalosporin) section. Firm has also submitted copy of letter for grant of additional section dated 27-02-2011 specifying dry powder injection (cephalosporin).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17789: 25-06-2021
	Details of fee submitted	PKR 50,000/-: 15-03-2021
	The proposed proprietary name / brand name	**TYRONE 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Cefotaxime (as sodium)……500mg
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefotaxime sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Claforan injection by Sanofi Aventis
	Name and address of API manufacturer.	Qilu Antibiotics Pharmaceutical Co. Ltd. 849 Dongjia Town, Licheng District Jinan City PR China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications,

		analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Claforan 500mg Injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Qilu Antibiotics Pharmaceutical Co. Ltd. 849 Dongjia Town, Licheng District Jinan City PR China.		
API Lot No.	0046L81F		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	VP-01712	VP-1511	VP-1626
Batch Size	16,000 vials	4000 vials	3100 vials
Manufacturing Date	10-2018	03-2018	07-2018
Date of Initiation	05-11-2018	07-05-2018	06-08-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has refered to their previous inspection conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet which was considered by the Board in its 296th meeting and the product was approved based on the inspection report. Following points were noted during the inspection: • All the stability study of EMPAGLIF (10mg & 25mg) Tablets has been conduct on Shimadzu HPLC (Model SPD-20) operated via LABSOLUTION software version 6.5 (complying FDA 21 CFR part 11) • Audit trail reports for Testing of Empaglif 10mg & 25mg Tablets are available. Proper and continuous monitoring record for stability chamber is available, along with 5KV backup generator with ATS.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SD20170590) issued by CFDA China dated 31-07-2017. The GMP certificate is valid till 30-07-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted drug substance data of Qilu Antibiotics Pharmaceutical Co. Ltd. China, later on the firm revised API source to Nectar life sciences. Firm has not submitted any justification or fee for revision of source of API.

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.	Firm has submitted fee 25,000 vide slip number 44849567547 dated 21-02-2022.
2.	You have submitted Innovator's specification in module 1 while the product monograph is available in USP, revise the specifications along with submission of requisite fee.	Innovator's specs was written mistakenly in Form 5-F. Rest of the dossier is of USP specs. **Firm has not submitted any fee for correction in Specs**

3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has not submitted any justification.
4.	Justify how you have used drug substance to manufacture cefotaxime injection with USP specifications in which the drug substance is being tested using different mobile phase as that recommended in USP.	Firm has not submitted any justification.
5.	Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.	**Run time 9 min against USP which say 56 mins**
6.	Justify how the drug product manufacturer i.e. M/s Bio labs released drug substance (lot No. 0046L81F) on 08-03-2021 without the test for sterility and bacterial endotoxin, since all of these tests are mentioned in drug substance specifications as well as in the COA of drug substance manufacturer.	Sterility and bacterial endotoxin was performed at the material testing time but mistakenly not mentioned in COA. Now we are submitting COA of lot number which was actually used in drug product.
7.	Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture, since the submitted COA of API are of 2021 while the drug product batches were manufactured in 2018.	We didn't cross check and submit same batches COA earlier. Now are providing relevant batches COAs **The new COA are from different source**
8.	The acceptance criteria for assay test in the drug substance specifications (3.2.S.4.1) is 96 – 102% while the acceptance criteria in COA is 91.6 – 96.4%.	Firm has not submitted any justification.

<table>
<tr><td>9.</td><td>Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.</td><td>Firm has submitted their own in house generated COA for working standard taken from commercial lot.</td></tr>
<tr><td>10.</td><td>Submit master formulation including theoretical fill weight per vial in section 3.2.P.1.</td><td>Firm has submitted theoretical fill weight per vial</td></tr>
<tr><td>11.</td><td>Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the innovator product as per USP specifications. Justify how only pH and assay test can demonstrate pharmaceutical equivalence.</td><td>Firm has not submitted any justification.</td></tr>
<tr><td>12.</td><td>Justify your process validation protocols and report without any process for optimization of sterilization process and sealing of vials etc.</td><td>Firm has not submitted any justification.</td></tr>
<tr><td>13.</td><td>Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain complete tests as recommended by USP.</td><td>Firm has not submitted any justification.</td></tr>
<tr><td>14.</td><td>Provide detailed testing method for the applied drug product instead of submitting copy of USP monograph.</td><td>Still not complete, formula is diff</td></tr>
<tr><td>15.</td><td>Specify the exact details of the accuracy and recovery test including the details of exact concertation of 50%, 100% and 150% solutions.</td><td>Firm has submitted concentrations for each percentage used in accuracy studies.</td></tr>
<tr><td>16.</td><td>Justify the verification studies in which the chromatogram run is till 10 minutes since the gradient HPLC testing till 56 minutes is recommended in USP monograph.</td><td>We have followed USP criteria and on this criteria peak arises at about 5.2 minutes. So the routine adjusted around 10 minutes to safe the time upto 56 minutes.
USP recommends the mobile phase as under:
<table>
<tr><td>Time</td><td>Solution A (%)</td><td>Solution B (%)</td></tr>
<tr><td>0</td><td>100</td><td>0</td></tr>
<tr><td>7</td><td>100</td><td>0</td></tr>
<tr><td>9</td><td>80</td><td>20</td></tr>
<tr><td>16</td><td>80</td><td>20</td></tr>
<tr><td>46</td><td>0</td><td>100</td></tr>
<tr><td>51</td><td>0</td><td>100</td></tr>
<tr><td>56</td><td>100</td><td>0</td></tr>
</table></td></tr>
<tr><td>17.</td><td>Submit the results of verification studies of analytical method of drug product in the light of ICH guidelines, since the submitted studies are not exactly as per ICH guidelines.</td><td>Firm has again submitted verification studies results.</td></tr>
<tr><td>18.</td><td>Justify how three commercial batches were released for commercial use without performing complete tests as specified in USP monograph.</td><td>Complete testing was performed as per USP monograph although COA that provided does not include all performed test parameter. Now COA is revised according to specifications</td></tr>
</table>

19.	Provide COA of reference standard actually used in the analysis of drug product in section 3.2.P.6.	Firm has submitted their own in house generated COA for working standard taken from commercial lot.
20.	Justify why the stability study data of three different batches is submitted from those for which batch analysis is provided in section 3.2.P.5.4.	We didn't cross check and submit same batches COA earlier. Now are providing relevant batches COAs
21.	Specify the exact API lot number and source of API used in the manufacturing of each batch of drug product.	Drug substance B#CFT101029217N COA is attached **The drug substance manufacturer is changed.**
22.	Justify the difference in batch size ranging from 3100 vials to 16000 vials.	**Firm has not submitted any justification.**
23.	Justify why in-use stability study is not performed.	**Firm has not submitted any justification.**
24.	Justify why the test for water contents, constituted solution etc is not performed during stability studies since these tests are very critical and are required to make assessment of the stability profile and shelf life.	Test for water content and constituted solution is performed at stability testing. test was missing in report.
25.	Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch.	**The submitted stability data is performed using analytical method which is not as per USP monograph.**
26.	Justify how assay testing was conducted using only 3 analysis of standard solution.	By considering this deficiency, it is noted that 3 standards are performed in assay. The reason by using 3 standard are considering with the USP monograph 621 which states that RSD will be with in range i.e; NMT 2%.
27.	How you have performed assay testing throughout the stability studies in which the chromatogram run is till 10 minutes since the gradient HPLC testing till 56 minutes is recommended in USP monograph.	We have followed USP criteria and on this criteria peak arises at about 5.2 minutes. So the routine adjusted around 10 minutes to safe the time upto 56 minutes.

Decision: Deferred for following:

- **Submission of applicable fee for revision of source of drug substance and revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Submission of copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer.**
- **Scientific justification for having drug substance specification which is different from USP monograph in terms of mobile phase.**
- **Scientific justification for verification studies of analytical procedure of drug substance in which the HPLC run time is 9 minutes while USP monograph recommends run time for 56 minutes.**
- **Submission of results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.**
- **Scientific justification for having acceptance criteria for assay test in the drug substance specifications (3.2.S.4.1) is 96 – 102% while the acceptance criteria in COA is 91.6 – 96.4%.**

- **Scientific justification why the pharmaceutical equivalence study does not include complete testing of the drug product and the innovator product as per USP specifications.**
- **Scientific justification for process validation protocols and report without any process for optimization of sterilization process and sealing of vials etc.**
- **Scientific justification why the specifications of the drug product (section 3.2.P.5.1) does not contain complete tests as recommended by USP. Further justify why the calculation formula for assay testing is different from that recommended in USP.**
- **Scientific justification for verification studies of the drug product in which HPLC run time is for 10 minutes while USP recommends run time for 56 minutes.**
- **Scientific justification for having batch size of commercial product ranging from 3100 vials to 16000 vials.**
- **Scientific justification why in-use stability study of the drug product is not performed.**
- **Scientific justification for testing commercial batches of registered product using the analytical procedure which is different from USP monograph in terms of mobile phase, run time and calculation formula.**

233.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Valor Pharmaceuticals. 124/A Industrial Triangle, Kahuta Road Islamabad.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 10Kg Ceftriaxone sodium (sterile) dated 19-02-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm was asked to submit the following:

- Submit valid contract manufacturing agreement between the contract giver and contract acceptor.
- Submit product development and stability study data of commercial batches manufactured by the drug product manufacturer, since the submitted data are of trial batches.

Response by the firm:
The firm submitted its response (Dy No. 6985) dated 14-03-2022 submitted the following data:

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China.		
API Lot No.	Q012105004		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	21H015	21H019	21H037
Batch Size	10,000 vials	10,000 vials	10,000 vials
Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	16-08-2021	24-08-2021	29-08-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SX20180229) issued by CFDA China dated 06-06-2018. The GMP certificate is valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 28-06-2021 specifying import of 150Kg Ceftriaxone sodium (sterile). The invoice was cleared by AD (I&E).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Firm has changed the source of drug substance from Pharmagen limited to Sinopharm Weiqida.
- Firm has submitted copy of BMR of commercial batches.
- Firm has not submitted fee for change of API source and stability study data.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of applicable fee for change of source of drug substance as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

234.	**Name, address of Applicant / Mar keting Authorization Holder**	**M/s Valor Pharmaceuticals. 124/A Industrial Triangle, Kahuta Road Islamabad.**
	Name, address of Manufacturing site.	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry Vial section (Cephalosporin).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 16106: 10-06-2021
	Details of fee submitted	PKR 75,000/-: 31-05-2021
	The proposed proprietary name / brand name	**ROVITROX 500mg Injection IM**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……500mg
	Pharmaceutical form of applied drug	Sterile white to off white / yellowish crystalline powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1’s
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Rocephin injection by Roche.
	Name and address of API manufacturer.	Pharmagen Ltd. Kot Nabi Buksh Wala 34-Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted compatibility studies of the drug product along with the recommended diluent i.e. 1% lignocaine hydrochloride injection.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests defined in USP for their product against the comparator i.e. Rocephin 500mg Injection of M/s Roche Pakistan.

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SX20180229) issued by CFDA China dated 06-06-2018. The GMP certificate is valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 28-06-2021 specifying import of 150Kg Ceftriaxone sodium (sterile). The invoice was cleared by AD (I&E).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:		
• Firm has changed the source of drug substance from Pharmagen limited to Sinopharm Weiqida. • Firm has submitted copy of BMR of commercial batches. • Firm has not submitted fee for change of API source and stability study data.		
Decision: Deferred for clarification for performing pharmaceutical equivalence studies against Rocephin Injection 2g since this product is not registered in Pakistan.		
237.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Capsule section (Cephalosporin).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 8315: 15-03-2021
	Details of fee submitted	PKR 20,000/-: 09-03-2021
	The proposed proprietary name / brand name	**GEN-ONE 250mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule Contains: Cephradine as monohydrate……250mg
	Pharmaceutical form of applied drug	White to yellowish powder filled in purple/purple hard gelatin capsule
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cephradine capsule **(MHRA** Approved)
	For generic drugs (me-too status)	Velosef capsule by GSK
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information

		related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Velosef capsule. Firm has submitted results of CDP for their product against Velosef capsule. Firm has tested CDP in three dissolution medium and the results of f2 factor are within the acceptable limit.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 07-04-2020 specifying purchase of 5Kg Cephradine (compacted).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	The method of analysis of the drug substance of Pharmagen Limited submitted in section 3.2.S.4.2 is different from BP as well as USP monograph. Justification is required in this regard.	Firm has submitted method of analysis of the drug substance of Pharmagen Limited submitted in section 3.2.S.4.2 as per USP monograph.
2.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Firm has submitted specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.
3.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board	Firm has submitted verification studies of analytical method of drug substance in section 3.2.S.4.3.

4.	Submit COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.	Firm has submitted COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.
5.	Justify how the batch No 0023/163/2019 was tested by Biogen Pharma and declared pass without testing the cephalexin contents. Further justify how the assay limit used by drug product manufacturer is different from BP as well as of drug substance manufacturer.	Firm has submitted COA of the batch number 00204/164/2020 which was actually used for the manufacturing of three batches. The newly submitted COA contains cephalexin contents test.
6.	Justify the submission of reference standard or material in section 3.2.S.5 in which USP reference standard is used against a drug substance which complies BP specifications.	Firm has submitted copy of COA of working standard from API manufacturer based on USP standard.
7.	Submit COA of cephalexin reference standard which is also required in the analysis of drug substance.	Firm has submitted COA of cephalexin reference standard.
8.	Justify the selection of excipients in the master formulation, since your qualitative composition is different from that of reference product.	Firm has submitted that the formulation was as per the reference product.
9.	Justify why drug-excipient compatibility studies is not performed while the formulation is qualitatively different from that of reference product.	Firm has submitted that the formulation was as per the reference product.
10.	Specify the details regarding Batch number, manufacturing date and expiry date of the product against which pharmaceutical equivalence and CDP is not performed.	Velosef 250mg Capsule by GSK (Batch number UD2P)
11.	Submit evidence of procurement of drug substance from Pharmagen Limited.	Firm has submitted copy of commercial invoice dated 07-04-2020 specifying purchase of 5Kg Cephradine (compacted).

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit fee for change of title of the firm from Biogen Pharmaceuticals to Biogen Life Sciences.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization, Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of trial batches for the contract manufacturing. As per the decision of 312nd meeting of Registration Board the firm was asked to submit product development and stability study data of commercial batches manufactured by M/s Bio-Next Pharmaceuticals.

Firm has submitted tability study data of commercial batches but the batches were manufactured using drug substance from Shenzhen Haibin Pharmaceuticals. Firm has submitted following documents:

- Audit trail report
- Process validation report dated 21-05-2021.
- Stability study data of the following batches

21E001	21E002	21E005
14598 vials	14598 vials	14598 vials
05-2021	05-2021	05-2021
07-05-2021	08-05-2021	21-05-2021

However, the firm has not provided complete data of new drug substance and drug product required as per the CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of complete data of drug substance as well as drug product in module-2 and module-3 as per the Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.
- Submission of fee of Rs. 75,000 for revision in stability data as well as change of source of drug substance, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Fresh Submission by the firm

Name and address of API manufacturer.	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 500mg injection of Pfizer Limited.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No Product Specific Inspection has been conducted since it is a new license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20190927) issued by China Food and Drug Administration dated 04-01-2019. The certificate is valid till 03-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 22-04-2021 specifying import of 160Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of three trial batches manufactured using drug substance manufactured by M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India. Later the firm submitted 6 months stability study data of three commercial batches along with complete module 2 and module 3. Firm has submitted fee 75,000/- (Slip number 506116296955) dated 09-06-2022 for change of drug substance manufacturer and of change of stability study batches.

- **The specifications of the firm are not as per USP since it does not contain test for sodium contents. Firm has not performed the test for sodium content at batch release or even during the stability studies**.

Decision: Approved.

- **The Board decided that the registration letter will be issued after revision of drug product specification as per USP including test for sodium content along with submission of applicable fee that is 75,000/- for revision of specifications and change of source of drug substance as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

• **The Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility Capacity assessment of M/s Bio-Next Pharmaceuticals, Rawat.**		
240.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Benson Pharmaceuticals Plot # 3 Main Road National Industrial Zone RCCI Rawat Rawalpindi.**
	Name, address of Manufacturing site.	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Contract manufacturing agreement dated 12-12-2020 is submitted
	GMP status of the firm	Firm has been granted new DML by way of formulation dated 06-11-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of Section approval letter dated 06-11-2019 specifying Dry Vial Injection section (Carbapenem).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7460: 08-03-2021
	Details of fee submitted	PKR 50,000/-: 01-03-2021
	The proposed proprietary name / brand name	**MEROBEN 1g Injection IV**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate)……..1g (Blended with sodium carbonate)
	Pharmaceutical form of applied drug	Glass vial filled with almost white powder along with 20ml ampoule of WFI further packed in unit carton.
	Pharmacotherapeutic Group of (API)	Carbapenem
	Reference to Finished product specifications	USP
	Proposed Pack size	1’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Meronem Injection by ICI Pakistan Ltd.
	Name and address of API manufacturer.	Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 1g injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of trial batches for the contract manufacturing. As per the decision of 312nd meeting of Registration Board the firm was asked to submit product development and stability study data of commercial batches manufactured by M/s Bio-Next Pharmaceuticals.

Firm has submitted tability study data of commercial batches but the batches were manufactured using drug substance from Shenzhen Haibin Pharmaceuticals. Firm has submitted following documents:

- Audit trail report
- Process validation report dated 26-05-2021.
- Stability study data of the following batches

21E008	21E009	21E010
10948 vials	10948 vials	10948 vials
05-2021	05-2021	05-2021
24-05-2021	25-05-2021	26-05-2021

However, the firm has not provided complete data of new drug substance and drug product required as per the CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of complete data of drug substance as well as drug product in module-2 and module-3 as per the Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.
- Submission of fee of Rs. 75,000 for revision in stability data as well as change of source of drug substance, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Fresh submission by the firm:

Name and address of API manufacturer.	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.

Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 1g injection of Pfizer Limited.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

	Dy. No. and date of submission	Dy. No. 7215: 04-03-2021
	Details of fee submitted	PKR 50,000/-: 24-02-2021
	The proposed proprietary name / brand name	**MEROFACT 1g Injection IV**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate)……..1g (Blended with sodium carbonate)
	Pharmaceutical form of applied drug	Glass vial filled with almost white powder along with 20ml ampoule of WFI further packed in unit carton.
	Pharmacotherapeutic Group of (API)	Carbapenem
	Reference to Finished product specifications	USP
	Proposed Pack size	1’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Meronem Injection by ICI Pakistan Ltd.
	Name and address of API manufacturer.	Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing

		process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{o}C ± 2^{o}C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 1g injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

STABILITY STUDY DATA

Manufacturer of API	Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India.

Manufacturing Date	01-2020	01-2020	01-2020
Date of Initiation	07-01-2020	07-01-2020	07-01-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of trial batches for the contract manufacturing. As per the decision of 312nd meeting of Registration Board the firm was asked to submit product development and stability study data of commercial batches manufactured by M/s Bio-Next Pharmaceuticals.

Firm has submitted tability study data of commercial batches but the batches were manufactured using drug substance from Shenzhen Haibin Pharmaceuticals. Firm has submitted following documents:

- Audit trail report

- Process validation report dated 26-05-2021.
- Stability study data of the following batches

21E008	21E009	21E010
10948 vials	10948 vials	10948 vials
05-2021	05-2021	05-2021
24-05-2021	25-05-2021	26-05-2021

However, the firm has not provided complete data of new drug substance and drug product required as per the CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of complete data of drug substance as well as drug product in module-2 and module-3 as per the Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.
- Submission of fee of Rs. 75,000 for revision in stability data as well as change of source of drug substance, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Fresh submission by the firm:

Name and address of API manufacturer.	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product,

	specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 1g injection of Pfizer Limited.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

Date of Initiation	07-01-2020	07-01-2020	07-01-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of trial batches for the contract manufacturing. As per the decision of 312nd meeting of Registration Board the firm was asked to submit product development and stability study data of commercial batches manufactured by M/s Bio-Next Pharmaceuticals.

Firm has submitted tability study data of commercial batches but the batches were manufactured using drug substance from Shenzhen Haibin Pharmaceuticals. Firm has submitted following documents:

- Audit trail report
- Process validation report dated 26-05-2021.
- Stability study data of the following batches

21E008	21E009	21E010

10948 vials	10948 vials	10948 vials
05-2021	05-2021	05-2021
24-05-2021	25-05-2021	26-05-2021

However, the firm has not provided complete data of new drug substance and drug product required as per the CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of complete data of drug substance as well as drug product in module-2 and module-3 as per the Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.
- Submission of fee of Rs. 75,000 for revision in stability data as well as change of source of drug substance, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Fresh submission by the firm:

Name and address of API manufacturer.	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 1g injection of Pfizer Limited.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

STABILITY STUDY DATA

Manufacturer of API	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No Product Specific Inspection has been conducted since it is a new license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20190927) issued by China Food and Drug Administration dated 04-01-2019. The certificate is valid till 03-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 22-04-2021 specifying import of 160Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of three trial batches manufactured using drug substance manufactured by M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India. Later the firm submitted 6 months stability study data of three commercial batches along with complete module 2 and module 3.

- **Firm has not submitted differential fee and fee for change of drug substance manufacturer and of change of stability study batches.**
- **The specifications of the firm are not as per USP since it does not contain test for sodium contents. Firm has not performed the test for sodium content at batch release or even during the stability studies**.

Decision: Approved.

- **The Board decided that the registration letter will be issued after revision of drug product specification as per USP including test for sodium content along with submission of applicable fee that is 75,000/- for revision of specifications and change of source of drug substance as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **The Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility Capacity assessment of M/s Bio-Next Pharmaceuticals, Rawat.**

245.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Alliance Pharmaceutical Pvt Ltd. 112 A, Hayatabad Industrial Estate, Peshawar**

Fresh submission by the firm:

Name and address of API manufacturer.	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{o}C ± 2^{o}C / 65% ± 5% RH for 36 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 1g injection of Pfizer Limited.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

STABILITY STUDY DATA			
Manufacturer of API	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China.		
API Lot No.	8MT2103173

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	No Product Specific Inspection has been conducted since it is a new license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20190927) issued by China Food and Drug Administration dated 04-01-2019. The certificate is valid till 03-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 22-04-2021 specifying import of 160Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of three trial batches manufactured using drug substance manufactured by M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India. Later the firm submitted 6 months stability study data of three commercial batches along with complete module 2 and module 3. Firm has submitted fee 75,000/- (slip number 774298015996) dated 20-07-2022 for change of drug substance manufacturer and of change of stability study batches.

• **The specifications of the firm are not as per USP since it does not contain test for sodium contents. Firm has not performed the test for sodium content at batch release or even during the stability studies**.		
Decision: Approved. • **The Board decided that the registration letter will be issued after revision of drug product specification as per USP including test for sodium content along with submission of applicable fee that is 75,000/- for revision of specifications and change of source of drug substance as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **The Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility Capacity assessment of M/s Bio-Next Pharmaceuticals, Rawat.**		
247.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Focus & Rulz Pharmaceuticals Pvt Ltd. 44-Industrial Triangle Kahuta Road, Islamabad**

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

	stability chambers (real time and accelerated)	

Evaluation by PEC:

Firm has initially submitted stability study data of trial batches for the contract manufacturing. As per the decision of 312nd meeting of Registration Board the firm was asked to submit product development and stability study data of commercial batches manufactured by M/s Bio-Next Pharmaceuticals.

Firm has submitted tability study data of commercial batches but the batches were manufactured using drug substance from Shenzhen Haibin Pharmaceuticals. Firm has submitted following documents:

- Audit trail report
- Process validation report dated 21-05-2021.
- Stability study data of the following batches

21E001	21E002	21E005
14598 vials	14598 vials	14598 vials
05-2021	05-2021	05-2021
07-05-2021	08-05-2021	21-05-2021

However, the firm has not provided complete data of new drug substance and drug product required as per the CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of complete data of drug substance as well as drug product in module-2 and module-3 as per the Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.
- Submission of fee of Rs. 75,000 for revision in stability data as well as change of source of drug substance, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Fresh Submission by the firm

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No Product Specific Inspection has been conducted since it is a new license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20190927) issued by China Food and Drug Administration dated 04-01-2019. The certificate is valid till 03-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 22-04-2021 specifying import of 160Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has initially submitted stability study data of three trial batches manufactured using drug substance manufactured by M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India. Later the firm submitted 6 months stability study data of three commercial batches along with complete module 2 and module 3.

• **Firm has not submitted differential fee and fee for change of drug substance manufacturer and of change of stability study batches.** • **The specifications of the firm are not as per USP since it does not contain test for sodium contents. Firm has not performed the test for sodium content at batch release or even during the stability studies**.		
Decision: Approved. • **The Board decided that the registration letter will be issued after revision of drug product specification as per USP including test for sodium content along with submission of applicable fee that is 75,000/- for revision of specifications and change of source of drug substance as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **The Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility Capacity assessment of M/s Bio-Next Pharmaceuticals, Rawat.**		
249.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Variant Pharmaceuticals Pvt Ltd. Plot No. 5, M2-Pharma Zone Lahore, Sharikpur Road, Sheikhupura**
	Name, address of Manufacturing site.	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 10-11-2020.
	GMP status of the firm	Firm has been granted new DML by way of formulation dated 06-11-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of Section approval letter dated 06-11-2019 specifying Dry Vial Injection section (Carbapenem).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17793: 25-06-2021
	Details of fee submitted	PKR 50,000/-: 09-04-2021
	The proposed proprietary name / brand name	**VARINUM 500mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate)……..500mg (Blended with sodium carbonate)
	Pharmaceutical form of applied drug	Glass vial filled with almost white powder along with 10ml ampoule of WFI further packed in unit carton.
	Pharmacotherapeutic Group of (API)	Carbapenem

	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Meronem Injection by ICI Pakistan Ltd.
	Name and address of API manufacturer.	Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{o}C ± 2^{o}C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their

		product against the comparator i.e. Meronem 500mg injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization, Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.

Firm has initially submitted stability study data of trial batches for the contract manufacturing. As per the decision of 312nd meeting of Registration Board the firm was asked to submit product development and stability study data of commercial batches manufactured by M/s Bio-Next Pharmaceuticals.

Firm has submitted tability study data of commercial batches but the batches were manufactured using drug substance from Shenzhen Haibin Pharmaceuticals. Firm has submitted following documents:

- Audit trail report
- Process validation report dated 21-05-2021.
- Stability study data of the following batches

21E001	21E002	21E005
14598 vials	14598 vials	14598 vials
05-2021	05-2021	05-2021
07-05-2021	08-05-2021	21-05-2021

However, the firm has not provided complete data of new drug substance and drug product required as per the CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of differential fee Rs. 25,000/- for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP on 25th June 2021.
- Submission of complete data of drug substance as well as drug product in module-2 and module-3 as per the Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.
- Submission of fee of Rs. 75,000 for revision in stability data as well as change of source of drug substance, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Fresh Submission by the firm

Name and address of API manufacturer.	Shenzhen Haibin Pharmaceutical Co., Ltd. No. 2003, Shenyan Road, Yantian District, Shenzhen City, Guangdong Province, P.R China
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and

	its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months. The real time stability data is conducted at $30^{o}C \pm 2^{o}C$ / 65% ± 5% RH for 36 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 500mg injection of Pfizer Limited.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

- **The Board decided that the registration letter will be issued after revision of drug product specification as per USP including test for sodium content along with submission of applicable fee that is 75,000/- for revision of specifications and change of source of drug substance as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **The Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility Capacity assessment of M/s Bio-Next Pharmaceuticals, Rawat.**

251.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Swiss Pharmaceuticals (Pvt) Ltd. A/159, SITE, Super Highway Karachi.**
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 29-05-2020 is submitted.
	GMP status of the firm	**Swiss Pharmaceuticals:** 18-10-2018: GMP compliance level is rated as GOOD." **Global pharmaceuticals:** Firm has submitted copy of GMP certificate dated 04-01-2022 issued on the basis of inspection dated 03-01-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000417 of M/s Global Pharmaceuticals Islamabad dated 18-12-2017 specifying reallocation of dry powder injection (carbapenem) section is place of withdrawn Biotech section (BSF)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale

		☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2478: 21-01-2021
	Details of fee submitted	PKR 50,000/-: 11-12-2020
	Proposed proprietary name/brand name	**MEPEN 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……500mg
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials with sea green color flip off seal along with 10ml WFI ampoule.
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	Status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process

		control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Merrem 500mg Injection of Pfizer.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.		
API Lot No.	S1/BMPM/0990917 S1/BMPM/1031017		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	17L078	17L079	17M319
Batch Size	7692 vials	7692 vials	7692 vials
Manufacturing Date	11-2017	11-2017	11-2017
Date of Initiation	04-12-2017	05-12-2017	29-12-2017
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/80-2Drug1-2019/3739 issued by Food and Drugs Administration Haryana dated 21-05-2019. The certificate is valid till 2 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 23-10-2017 specifying import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/0990917. The commercial invoice is attested by AD (I&E) DRAP field office. Firm has

		submitted copy of commercial invoice cleared dated 03-11-2017 specifying import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/BMPM/1031017. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Provide name and address of the applicant i.e. M/s Swiss Pharmaceuticals (Pvt) Ltd as per the address mentioned on Drug Manufacturing License (DML) along with submission of requisite fee (if applicable), since the address mentioned on section 1.3.1 is different from that mentioned in the DML.	Firm has revised the address of applicant on Form 5F without submission of any fee.
Provide correct label claim as per the innovator / reference product in section 1.5.2 along with submission of requisite fee, since the submitted label claim is incomplete and it does not specify the sodium carbonate component.	Firm has submitted revised label claim as per the reference product without submission of fee.
Provide copies of IR spectra of the drug substance in section 3.2.S.3.1 as per the guidance document approved by Registration Board which specifies that "Drug substance /Active Pharmaceutical Ingredients that are described in an officially recognized pharmacopoeia it is generally sufficient to provide copies of the IR spectrum.	Firm has submitted copies of IR spectra of drug substance from the API manufacturer.
Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance manufacturer's specification and testing method separately for meropenem trihydrate, sodium carbonate and meropenem for injection without specifying the exact specifications of their drug substance. Further specifications and method of analysis from drug product manufacturer is not submitted.
Justify why the test of content of sodium is not included in the specifications of drug substance.	Firm has revised the specifications and added test of sodium. The specifications have been revised without submission of fee.
Justify the acceptance criteria of assay "NLT 78% as meropenem on dried basis", since this is not in line with the USP monograph.	Meropenem for injection is a combination of meropenem with sodium carbonate so after subtraction of sodium carbonate and water contents the limit is NLT 78%.

Justify the flow rate of 1.0ml/min for the assay test of drug substance, since USP recommends flow rate to be 1.5ml/min.	Firm has revised the specifications and changed the flow rate to 1.5ml/min. The specifications have been revised without submission of fee.
Provide complete method of standard and sample preparation in assay test of drug substance. Just mentioning the final concentration without specifying the initial quantity of material taken and the dilution steps is not permitted by any guidelines.	Firm has submitted revised specification and testing method. As per revised testing method the sample preparation method is totally different from that specified in USP monograph.
As per the assay method of drug substance, the sample solution is nominally 0.1mg/ml of meropenem in mobile phase. While as per USP monograph the sample solution preparation method is entirely different which involves initial reconstitution with water prior to dilution with mobile phase. Justify how the tests performed by your method can be considered acceptable under the USP monograph.	Firm has submitted revised specification and testing method. As per revised testing method the sample preparation method is totally different from that specified in USP monograph. Firm took meropenem sample equivalent to 50mg in 50ml volumetric flask and make up the volume with mobile phase.
The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph.	Firm has now mentioned this statement in their testing method.
Justify the submission of batch analysis of 3 batches of drug substance instead of providing the report of validation studies of the analytical method in section 3.2.S.4.3. Further justify how the drug substance testing was carried out without performing verification studies of the analytical method of drug substance as recommended by USP monograph.	Method verification for the product is performed and we use same testing method for the drug substance. Since it is ready to fill powder so for this reason we did not perform method validation of API.
Justify why the test of sodium carbonate content and sodium content is not performed for the batch of drug substance S1/BMPM/0990917 (testing performed on 31-10-2017) and batch number S1/BMPM/1031017 (testing performed on 16-11-2017).	Initially in 2017 we do not hve atomic absorption so we consider this value from manufacturer COA, now we purchased atomic absorption which is used for the determination of sodium content.
Justify how the results of assay of drug substance on dried basis is obtained, since this method (formula) is not mentioned in your analytical method nor specified in USP.	Firm has submitted that testing method has been revised and all required formulas are incorporated.
USP specifies tailing factor NMT 1.5 in the system suitability requirements, while the tailing factor values obtained in your chromatograms of drug substance show results greater than 1.5. Justify how the test was performed without complying the system suitability requirements as per USP monograph.	Testing method is revised as per current USP and revised testing method followed now and tailing factor value reviewed during the checking of testing results and testing report. Firm has not justified the previous analysis in which tailing factor was above 1.5.
The standard solution and the sample solution analysis for drug substance testing was performed using different HPLC equipment and software. Justify how the analysis could be considered	We run standard solution and sample solution both, whenever we perform the testing of any API or finished product on same HPLC, which makes the achieved results reliable and we check the system

reliable if the standard solution are run in different equipment.	suitability parameters in all routine testing to comply the requirement. Firm has not provided any scientific justification.
Justify the HPLC testing of sample solution using detector 220nm while the USP recommends that testing be performed at 300nm.	Testing method is revised as per current USP and revised testing method provided. Firm has not provided any justification for testing of stability batches for which testing was conducted at 200nm. All these batches are now expired as well.
As per the raw data sheets, the value of potency of meropenem in meropenem reference standard is 73.91%. Justify how this reference standard was used in the testing of drug substance which is very low purity and contents.	The potency is based on as is basis which is used for the testing of drug substance.
Provide COA of reference standard / working standard used in the testing of drug substance.	Firm has submitted certificate of USP reference standard. However, the testing method of the firm specifies that meropenem working standard is used.
Justify how 707mg of meropenem as trihydrate blended with sodium carbonate contains 500mg of meropenem.	The calculation provided by the firm does not incorporate the sodium carbonate contents.
Provide details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.	Not submitted
Justify why complete tests as mentioned in USP are not performed in pharmaceutical equivalence.	Not submitted
Provide data in section 3.2.P.2.6 as per the guidance document approved by Registration Board which specifies that "Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product."	Not submitted
Justify why the test of content of sodium and loss on drying is not mentioned in the specifications of the drug product provided in section 3.2.P.5.1.	Testing method revised as per current USP and revised testing method provided and implemented for onward testing.
Justify the sample solution preparation method under the assay test of drug product is different from that mentioned in USP monograph.	Testing method revised as per current USP and revised testing method provided and implemented for onward testing.
Justify why the calculation formula of assay content of drug product is different from that specified in USP monograph.	Testing method revised as per current USP and revised testing method provided and implemented for onward testing.
Justify the submission of COA of commercial batch (S1/BMPM/0990917 and S1/BMPM/1031017) in section 3.2.P.6 as the reference standard.	Firm has submitted certificate of USP reference standard. However, the testing method of the firm specifies that meropenem working standard is used.
Justify how meropenem (trihydrate) for injection is used as reference standard since the USP recommends that meropenem (base) should be used as reference standard for assay test of meropenem for injection.	We used meropenem (trihydrate) as working standard after standardizing it against USP reference standard.

Submit data in section 3.2.P.8 as per the guidance document approved by Registration Board which specifies that "Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided".	Firm has only provided a statement of shelf life after reconstitution. No data has been submitted. The reference product specify the shelf life after reconstitution as 3 hours at room temperature while the firm has claimed 12 hours even without any data.
Justify why the test of content of sodium, completeness and clarity of solution, loss on drying and sterility test is not included in the stability studies of the product.	Testing parameters are not completely followed in stability studies only assay and pH test is performed.
The results of assay test of meropenem for the batch No. 17L078 show upward trend (i.e. increase in assay values with time) throughout the stability studies (both accelerated and real time). Provide scientific justification for this upward trend keeping in view the fact that the testing method was not exactly as per USP monograph, the reference standard meropenem (trihydrate) for injection was used instead of meropenem (base), the contents of sodium, as well as sodium carbonate was not determined at any time point during stability studies and loss on drying is also not performed during the stability studies.	This increase in assay may be due to the API content vial used for assay testing has filled weight of higher limit. Firm has not provided any scientific justification
You have imported 20Kg meropenem for injection in the packing of 5Kg aluminium container. Justify how the batches of 5.4Kg were developed using the same container.	Firm submitted that they have imported 20 Kg (5kg container x 4) while in each batch 5.4 Kg was used. Firm has not submitted any justification from where that extra 0.4Kg was added in each batch.
Provide Batch Manufacturing Record (BMR) for all the three stability batches.	Firm has submitted copy of BMR of the three stability batches.

Decision of 312th meeting of Registration Board:

Registration Board delibrated the case in detail and observed that the contract manufacturer has not performed complete product development studies, the specifications adopted by the manufacturer throughout stability studies were not according to USP and that the stability batches have also expired. Accordingly, the Board deferred for following submissions:

- Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug Product manufacturer.
- Scientific justification for using flow rate of 1.0ml/min for assay testing of your commercial batches since USP recommends flow rate to be 1.5ml/min,
- Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.
- Scientific justification for having analytical method of drug product without specifying that "*sample should be hold for 1-2 hours at 25± 1°C before testing*" which is recommended in USP monograph.
- Scientific justification for releasing the commercial batch of drug product and during its stability studies even after having the value of tailing factor above 1.5, since USP monograph specifies tailing factor NMT 1.5 in the system suitability requirements.
- Scientific justification for using different HPLC equipment and software for the standard solution and the sample solution analysis.
- Scientific justification for HPLC testing of your commercial batches using UV detector at 220nm while the USP recommends that testing be performed at 300nm.

- Scientific justification for using reference / working standard having a potency of 73.91% for the analysis of commercial batches.
- Scientific justification for having a master formulation containing 707mg of meropenem trihydrate blended with sodium carbonate which is equivalent to 500mg meropenem.
- Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.
- Scientific justification why complete tests as mentioned in USP monograph were not performed in pharmaceutical equivalence studies.
- Scientific justification for not performing compatability studies of the drug product with the recommended diluent.
- Scientific justification for not performing the test of sodium content and loss on drying for the analysis of commercial batches of the drug product.
- Scientific justification for using an entirely different formula for calculation of assay resultsof commercial batches from that specified in USP monograph.
- Scientific justification for not performing test of content of sodium, completeness and clarity of solution, loss on drying and sterility test during the stability studies of the product.
- Scientific justification for the results of assay test of meropenem for the batch No. 17L078 which show upward trend (i.e. increase in assay values with time) throughout the stability studies (both accelerated and real time) keeping in view the fact that the testing method was not exactly as per USP monograph, the reference standard meropenem (trihydrate) for injection was used instead of meropenem (base), the contents of sodium, as well as sodium carbonate was not determined at any time point during stability studies and loss on drying is also not performed during the stability studies.
- Scientific justification how three batches have been manufactured using 5Kg containers while each batch required 5.4Kg drug substance.
- Evidence of purchase of atomic absorption spectrophotometer including commercial invoice and Installation Qualification (IQ) and Operational Qualification (OQ) of atomic absorption.
- Submission of fee for pre-registration changes in the drug product specifcations.

Keeping in view the above, the Board decided that the submitted stability study data is not acceptable and directed the manufacturer to either perform complete product development and stability studies or submit the aforementioned data as per USP specifications and submit data accordingly. The Board further directed the manufacturer to comply USP Specifications for already registered drug products.

Response by the firm:

Reason for deferment	**Response by the firm**
Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug Product manufacturer.	Specifications and Analytical Procedure of Drug Substance by API manufacturer is provided.
Scientific justification for using flow rate of 1.0ml/min for assay testing of your commercial batches since USP recommends flow rate to be 1.5ml/min,	As mentioned in USP monograph of Meropenem for Injection edition 2018 and 2019, retention time should be between 6 to 8 minutes. We were following same criteria regarding flow rate i.e. 1.5ml but due to typographic error flow rate of 1.0ml was mentioned in test method which has been corrected now.
Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.	Sample solution preparation was performed as USP monograph but step of reconstitution with water was not previously part of sample solution preparation. Said step has been incorporated in revised test method. Copy of revised test method is also provided.
Scientific justification for having analytical method of drug product without specifying that "sample should be hold for 1-2 hours at 25±	Due to typographic error these details of hold time after sample preparation was missed in finished product testing method. Testing method has been revised as per current USP monograph

1°C before testing" which is recommended in USP monograph.	
Scientific justification for releasing the commercial batch of drug product and during its stability studies even after having the value of tailing factor above 1.5, since USP monograph specifies tailing factor NMT 1.5 in the system suitability requirements.	We have checked all chromatograms of raw material testing as well as stability testing but found no peak tailing greater than 1.5. Particular details regarding tailing factor was not previously mentioned in the testing method, which is now incorporated in revised testing method of both drug substance and drug product. Copy of revised test method is also provided.
Scientific justification for using different HPLC equipment and software for the standard solution and the sample solution analysis.	We use to run standard solution and sample solution both (whenever we perform the testing of any API or Finished product) on same HPLC system, as it makes results more reliable and also verifies system suitability parameters in all-routine testing. We have tested assay and impurities on two separate systems having different softwares, may be this was confusion factor while data review.
Scientific justification for HPLC testing of your commercial batches using UV detector at 220nm while the USP recommends that testing be performed at 300nm.	We have followed USP monograph for testing of assay of drug substance as well as impurities. USP monograph specifies 300nm for assay testing of drug substance while 220nm for impurities testing in drug substance.
Scientific justification for using reference / working standard having a potency of 73.91% for the analysis of commercial batches.	The potency is on as is basis of Meropenem for injection, which has been standardized against the primary standard (Meropenem base) and is used as working standard in routine testing.
Scientific justification for having a master formulation containing 707mg of meropenem trihydrate blended with sodium carbonate which is equivalent to 500mg meropenem.	Below is the calculation of fill weight if Meropenem 500mg: As per attached COA, Average water content = 10.5% Average sodium bicarbonate content = 18.5% By adding both contents, 10.5 + 18.5 = 29% By subtracting both contents, 100% - 29% = 71% For Merem 500mg = $\frac{500 \times 100}{71}$ = 704.22mg/vial
Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.	Firm has provided details for meropenem 1gm injection
Scientific justification why complete tests as mentioned in USP monograph were not performed in pharmaceutical equivalence studies.	All tests that are mentioned in USP could not perform during pharmaceutical equivalence due to limited quantity of innovator sample. Therefore, we have included only all major test while performing pharmaceutical equivalence.
Scientific justification for not performing compatibility studies of the drug product with the recommended diluent.	Compatibility studies of Merem were performed but it was not made part of dossier during submission. Detailed compatibility studies of Merem against its innovator i.e. Merrem was performed with all its recommended diluents. Study results are also provided.

Scientific justification for not performing the test of sodium content and loss on drying for the analysis of commercial batches of the drug product.	In 2017, we did not have Atomic Absorption there test of content of sodium is not part of specifications of product. Moreover we have now revised specification and LOD and content of sodium has been incorporated in revised specifications.
Scientific justification for using an entirely different formula for calculation of assay results of commercial batches from that specified in USP monograph.	Formula of content of drug product is elaborated with context to standard and sample preparation procedure which has now been updated as per USP format. Copy of revised test method and USP monograph is also provided.
Scientific justification for not performing test of content of sodium, completeness and clarity of solution, loss on drying and sterility test during the stability studies of the product.	Testing parameters like sodium contents, loss on drying has not performed because they can be monitored indirectly. The justifications given as below: • Sodium is the part of Sodium carbonate which in this mixture of meropenem for injection acts as a buffer and controls the pH of the mixture. A pH drift will depict the change in buffer contents, as Sodium being metal does not degrade in ordinary conditions. • Loss on drying has a direct impact on the active ingredient stability/degradation. Assay determination depicts the impact cause by this parameter. • In physical check of stability samples we use to perform this test after reconstitution with prescribed amount of water but this test was not separately mentioned in stability data. As for as sterility is concerned it was not part of stability testing. We have revised our stability protocols and included all critical Quality attributes in stability testing and implemented for onward stability testing.
Scientific justification for the results of assay test of meropenem for the batch No. 17L078 which show upward trend (i.e. increase in assay values with time) throughout the stability studies (both accelerated and real time) keeping in view the fact that the testing method was not exactly as per USP monograph, the reference standard meropenem (trihydrate) for injection was used instead of meropenem (base), the contents of sodium, as well as sodium carbonate was not determined at any time point during stability studies and loss on drying is also not performed during the stability studies.	Assay results of initial time point of 17L078 batch are significantly low than all remaining samples tested during whole stability. This is because of low filled weight vial of finished product tested at zero time point. As far as results of all other time points are concerned there is a little difference between assays results i.e. hardly one to two percent. Therefore, speculation regarding deviation from USP monograph is completely ruled out as same method has been applied while testing other stability batches and no such trend has been seen there.
Scientific justification how three batches have been manufactured using 5Kg containers while each batch required 5.4Kg drug substance.	During interpretation of data from BMR while preparation of dossier 5.4kg has been mistakenly considered batch size by regulatory person. Actual batch size as stated in BMR is 5.0kg. Moreover meropenem as ready to fill powder is imported in container of 5.0kg.

Evidence of purchase of atomic absorption spectrophotometer including commercial invoice and Installation Qualification (IQ) and Operational Qualification (OQ) of atomic absorption.	Field Service Report dated 25-10-2019 is provided from Rays Technologies. In report it is mentioned that IQ, OQ and PQ of the instrument is perfomed and the instrument is handed over to user in working condition. However no details of the equipment / instrument is provide.
Submission of fee for pre-registration changes in the drug product specifications.	Firm has submitted fee 7500/- dated 05-11-2021 for change in specifications
Keeping in view the above, the Board decided that the submitted stability study data is not acceptable and directed the manufacturer to either perform complete product development and stability studies or submit the aforementioned data as per USP specifications and submit data accordingly. The Board further directed the manufacturer to comply USP Specifications for already registered drug products.	Firm has not submitted product development and stability study data of new batches in which the development and testing is carried out as per USP specifications from initial time point.

Decision of 313rd meeting of Registration Board:

Registration Board deliberated that the commercial batches manufactured by the manufacturer i.e. Global Pharmaceuticals was not developed and tested as per the USP monograph. Keeping in view the USP monograph, public assessment report of the innovator product and the data submitted by the firm, the Board decided to defer the case and advised the manufacturer to perform product development studies keeping in view the innovator product and product testing and stability studies by complying USP monograph and submit data upon completion of 6 months stability studies.

Submission by the firm:

The firm on 13-01-2022 submitted new response against the decision of 312nd meeting of Registration Board instead of complying the decision of 313rd meeting of Registration Board.

In the new submission, the firm has changed the source of drug substance from M/s Sterile India Pvt Ltd. India to M/s Shenzhen Haibin Pharmaceutical Co. Ltd China. Furthermore, the firm has submitted stability data of following new batches:

Batch No.	Batch size	Mfg date	Stability initiation date
21A057	7072 Vials	01-2021	23-01-2021
21D216	7072 Vials	04-2021	06-05-2021
21E156	7072 vials	05-2021	01-06-2021

Firm has submitted data which shows that the product testing has been conducted as per revised specs and calculation formula however firm has revised their specifications after 312nd meeting which was conducted on 14-16 Septeber 2021 and the revised specifications were considered by the Board in its 313rd meeting held on 16-18 November 2021.

Decision of 316th meeting of Registration Board:

Deferred for submission of complete data of drug substance as well as drug product as per revised specifications in module-2 and module-3 as per the Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Response by the firm:

Now the firm has submitted following data of three newly manufactured batches. Firm has also changed the source of drug substance to CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China. **Firm has not submitted any fee for change of source as well as submission of stability study data of new batches**.

Firm has also submitted module 2 and module 3 along with stability study data, the details of which are as under:			
STABILITY STUDY DATA			
Manufacturer of API	M/s CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China.		
API Lot No.	682107003		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	22A169	22A363	22A364
Batch Size	7418 vials	7418 vials	7418 vials
Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	25-01-2022	25-01-2022	25-01-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20180065) issued by China Food and Drugs Administration dated 17-08-2018. The certificate is valid till 16-08-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 13-09-2021 specifying import of 200Kg Meropenem for Batch No. 682107002 and 682107003. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Firm has changed the source of drug substance to CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China. **Firm has not submitted any fee for change of source as well as submission of stability study data of new batches**.
- GMP certificate / insepection report of the contract manufacturer is not available within last three years.

Decision: Approved.

- **Registration Board decided that registration letter will be issued after submission of applicable fee 75,000/ for change of source as well as submission of stability study data of new batches as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.**

252.	Name, address of Applicant / Marketing Authorization Holder	M/s Swiss Pharmaceuticals (Pvt) Ltd. A/159, SITE, Super Highway Karachi.
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 29-05-2020 is submitted.
	GMP status of the firm	**Swiss Pharmaceuticals:** 18-10-2018: GMP compliance level is rated as GOOD." **Global pharmaceuticals:** Firm has submitted copy of GMP certificate dated 04-01-2022 issued on the basis of inspection dated 03-01-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000417 of M/s Global Pharmaceuticals Islamabad dated 18-12-2017 specifying reallocation of dry powder injection (carbapenem) section is place of withdrawn Biotech section (BSF)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2479: 21-01-2021
	Details of fee submitted	PKR 50,000/-: 11-12-2020
	Proposed proprietary name / brand name	MEPEN 1g Injection

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……1g
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials with brown color flip off seal along with 20ml WFI ampoule.
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	Status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Merrem 500mg Injection of Pfizer.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India.		
API Lot No.	S1/MPM/01860817		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	17K282	17K283	17K238
Batch Size	3533 vials	3533 vials	3533 vials
Manufacturing Date	10-2017	10-2017	10-2017
Date of Initiation	20-10-2017	25-10-2017	19-10-2017
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/80-2Drug1-2019/3739 issued by Food and Drugs Administration Haryana dated 21-05-2019. The certificate is valid till 2 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 25-09-2017 specifying import of 20Kg (4x5Kg) Meropenem for injection for Batch No. S1/MPM/01860817. Commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time & accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Provide name and address of the applicant i.e. M/s Swiss Pharmaceuticals (Pvt) Ltd as per the address mentioned on Drug Manufacturing License (DML) along with submission of requisite fee (if applicable), since the address mentioned on section 1.3.1 is different from that mentioned in the DML.	Firm has revised the address of applicant on Form 5F without submission of any fee.
Provide correct label claim as per the innovator / reference product in section 1.5.2 along with submission of requisite fee, since the submitted label claim is incomplete and it does not specify the sodium carbonate component.	Firm has submitted revised label claim as per the reference product without submission of fee.
Provide copies of IR spectra of the drug substance in section 3.2.S.3.1 as per the guidance document approved by Registration Board which specifies that "Drug substance /Active Pharmaceutical Ingredients that are described in an officially recognized pharmacopoeia it is generally sufficient to provide copies of the IR spectrum.	Firm has submitted copies of IR spectra of drug substance from the API manufacturer.
Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance manufacturer's specification and testing method separately for meropenem trihydrate, sodium carbonate and meropenem for injection without specifying the exact specifications of their drug substance. Further specifications and method of analysis from drug product manufacturer is not submitted.
Justify why the test of content of sodium is not included in the specifications of drug substance.	Firm has revised the specifications and added test of sodium. The specifications have been revised without submission of fee.
Justify the acceptance criteria of assay "NLT 78% as meropenem on dried basis", since this is not in line with the USP monograph.	Meropenem for injection is a combination of meropenem with sodium carbonate so after substraction of sodium carbonate and water contents the limit is NLT 78%.
Justify the flow rate of 1.0ml/min for the assay test of drug substance, since USP recommends flow rate to be 1.5ml/min.	Firm has revised the specifications and changed the flow rate to 1.5ml/min. The specifications have been revised without submission of fee.
Provide complete method of standard and sample preparation in assay test of drug substance. Just mentioning the final concentration without specifying the initial quantity of material taken and the dilution steps is not permitted by any guidelines.	Firm has submitted revised specification and testing method. As per revised testing method the sample preparation method is totally different from that specified in USP monograph.

As per the assay method of drug substance, the sample solution is nominally 0.1mg/ml of meropenem in mobile phase. While as per USP monograph the sample solution preparation method is entirely different which involves initial reconstitution with water prior to dilution with mobile phase. Justify how the tests performed by your method can be considered acceptable under the USP monograph.	Firm has submitted revised specification and testing method. As per revised testing method the sample preparation method is totally different from that specified in USP monograph. Firm took meropenem sample equivalent to 50mg in 50ml volumetric flask and make up the volume with mobile phase.
The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph.	Firm has now mentioned this statement in their testing method.
Justify the submission of batch analysis of 3 batches of drug substance instead of providing the report of validation studies of the analytical method in section 3.2.S.4.3. Further justify how the drug substance testing was carried out without performing verification studies of the analytical method of drug substance as recommended by USP monograph.	Method verification for the product is performed and we use same testing method for the drug substance. Since it is ready to fill powder so for this reason we did not perform method validation of API.
Justify how the results of assay of drug substance on dried basis is obtained, since this method (formula) is not mentioned in your analytical method nor specified in USP.	Firm has submitted that testing method has been revised and all required formulas are incorporated.
USP specifies tailing factor NMT 1.5 in the system suitability requirements, while the tailing factor values obtained in your chromatograms of drug substance show results greater than 1.5. Justify how the test was performed without complying the system suitability requirements as per USP monograph.	Testing method is revised as per current USP and revised testing method followed now and tailing factor value reviewed during the checking of testing results and testing report. Firm has not justified the previous analysis in which tailing factor was above 1.5
The standard solution and the sample solution analysis for drug substance testing was performed using different HPLC equipment and software. Justify how the analysis could be considered reliable if the standard solution are run in different equipment.	We run standard solution and sample solution both, whenever we perform the testing of any API or finished product on same HPLC, which makes the achieved results reliable and we check the system suitability parameters in all routine testing to comply the requirement. Firm has not provided any scientific justification.
Justify the HPLC testing of sample solution using detector 220nm while the USP recommends that testing be performed at 300nm.	Testing method is revised as per current USP and revised testing method provided. Firm has not provided any justification for the testing of stability batches for which testing was conducted at 200nm. All these batches are now expired as well.
As per the raw data sheets, the value of potency of meropenem in meropenem reference standard is 73.91%. Justify how this reference standard was used in the testing of drug substance which is very low purity and contents.	The potency is based on as is basis which is used for the testing of drug substance.
Provide COA of reference standard / working standard used in the testing of drug substance.	Firm has submitted certificate of USP reference standard.

	However, the testing method of the firm specifies that meropenem working standard is used.
Justify how 1413mg of meropenem as trihydrate blended with sodium carbonate contains 1g of meropenem.	The calculation provided by the firm does not incorporate the sodium carbonate contents.
Provide details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.	Not submitted
Justify why complete tests as mentioned in USP are not performed in pharmaceutical equivalence.	Not submitted
Provide data in section 3.2.P.2.6 as per the guidance document approved by Registration Board which specifies that "Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product."	Not submitted
Justify why the test of content of sodium and loss on drying is not mentioned in the specifications of the drug product provided in section 3.2.P.5.1.	Testing method revised as per current USP and revised testing method provided and implemented for onward testing.
Justify the sample solution preparation method under the assay test of drug product is different from that mentioned in USP monograph.	Testing method revised as per current USP and revised testing method provided and implemented for onward testing.
Justify why the calculation formula of assay content of drug product is different from that specified in USP monograph.	Testing method revised as per current USP and revised testing method provided and implemented for onward testing.
Justify the submission of COA of commercial batch (S1/BMPM/0990917 and S1/BMPM/1031017) in section 3.2.P.6 as the reference standard.	Firm has submitted certificate of USP reference standard. However, the testing method of the firm specifies that meropenem working standard is used.
Justify how meropenem (trihydrate) for injection is used as reference standard since the USP recommends that meropenem (base) should be used as reference standard for assay test of meropenem for injection.	We used meropenem (trihydrate) as working standard after standardizing it against USP reference standard.
Submit data in section 3.2.P.8 as per the guidance document approved by Registration Board which specifies that "Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided".	Firm has only provided a statement of shelf life after reconstitution. No data has been submitted. The reference product specify the shelf life after reconstitution as 3 hours at room temperature while the firm has claimed 12 hours even without any data.
Justify why the test of content of sodium, completeness and clarity of solution, loss on drying and sterility test is not included in the stability studies of the product.	Testing parameters are not completely followed in stability studies only assay and pH test is performed.
Provide Batch Manufacturing Record (BMR) for all the three stability batches.	Firm has submitted copy of BMR of the three stability batches.
Decision of 312nd meeting of Registration Board:	

Registration Board delibrated the case in detail and observed that the contract manufacturer has not performed complete product development studies, the specifications adopted by the manufacturer throughout stability studies were not according to USP and that the stability batches have also expired. Accordingly, the Board deferred for following submissions:

- Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug Product manufacturer.
- Scientific justification for using flow rate of 1.0ml/min for assay testing of your commercial batches since USP recommends flow rate to be 1.5ml/min,
- Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.
- Scientific justification for having analytical method of drug product without specifying that "*sample should be hold for 1-2 hours at 25± 1°C before testing*" which is recommended in USP monograph.
- Scientific justification for releasing the commercial batch of drug product and during its stability studies even after having the value of tailing factor above 1.5, since USP monograph specifies tailing factor NMT 1.5 in the system suitability requirements.
- Scientific justification for using different HPLC equipment and software for the standard solution and the sample solution analysis.
- Scientific justification for HPLC testing of your commercial batches using UV detector at 220nm while the USP recommends that testing be performed at 300nm.
- Scientific justification for using reference / working standard having a potency of 73.91% for the analysis of commercial batches.
- Scientific justification for having a master formulation containing 707mg of meropenem trihydrate blended with sodium carbonate which is equivalent to 500mg meropenem.
- Provision of details including batch number, expiry date and name of manufacturer of the innovator product along with pharmaceutical equivalence was performed.
- Scientific justification why complete tests as mentioned in USP monograph were not performed in pharmaceutical equivalence studies.
- Scientific justification for not performing compatability studies of the drug product with the recommended diluent.
- Scientific justification for not performing the test of sodium content and loss on drying for the analysis of commercial batches of the drug product.
- Scientific justification for using an entirely different formula for calculation of assay resultsof commercial batches from that specified in USP monograph.
- Scientific justification for not performing test of content of sodium, completeness and clarity of solution, loss on drying and sterility test during the stability studies of the product.
