MINUTES OF 321ST MEETING OF REGISTRATION BOARD HELD ON 20-22ND SEPTEMBER, 2022

==*=*=*

321st meeting of Registration Board was held on 20-22nd September, 2022 in the Committee Room, Drug Regulatory Authority of Pakistan, G-9/4, Islamabad. The meeting was chaired by Dr. Obaidullah, Chairman Registration Board DRAP. The meeting started with recitation of the Holy Verses.

The Board decided to co-opt Dr. Shabnum Firdous, Secretary / Registrar, Pakistan Veterinary Medical Council, as member under Rule 24 (6) of the Drugs (Licensing, Registering & Advertising) Rules, 1976 of the Drugs Act, 1976, in order to facilitate the Registration Board regrading opinion on the applications for registration of veterinary products.

Following members attended the meeting:

1.	Ch. Zeeshan Nazir Bajar, Additional Director (BE&R/PE&R), DRAP.	Member/ Secretary
2.	Lt.Gen.(R) Prof. Dr. Karamat A. Karamat (HI-M.SI-M), Former Surgeon General Pakistan.	Member
3.	Maj. Gen. (R) Dr. Tahir Mukhtar Sayed, Inspector General (Hospitals), Fauji Foundation, Rawalpindi	Member
4.	Dr. Qurban Ali, Ex-Director General, National Veterinary Laboratories, Islamabad	Member
5.	Dr. Noor us Saba, Director, Biological Evaluation & Research Division, DRAP	Member
6.	Dr. Muhammad Akram, Animal Husbandry Commissioner, M/o NFS&R	Co-opted Member
7.	Dr. Ali Ahmad Agha, Director, DTL, Quetta	Member
8.	Muhammad Hafeez ur Rehman, DTL, Rawalpindi	Member
9.	Mr. Muhammad Aslam, Deputy Draftsman-I, Ministry of law & Justice, Islamabad.	Member
10.	Mr. Ghulam Mujtaba, Deputy Director, Representative of IPO	
11.	Dr. Imran Khan, Director, DTL, Peshawar	Member
12.	Mr. Akhtar Abbas Khan, Representative of QA&LT Division	Member
13.	Mr. Abdullah, Representative of Division of MD&MD	Member
14.	Dr. Shabnum Firdous, Secretary / Registrar, Pakistan Veterinary Medical Council	Co-opted Member

Mr. Nadeem Alamgir (Pharma Bureau), Hafiz Muhammad Azeem, Mr. Hamid Raza & Mr. Jalal-ud-Din (PPMA) and Mr. Ziaulhaq & Mr. Amir (PCDA) attended the meeting as observers.

Director, BE&R was assisted by respective Additional Director and Assistant Directors for presentation of the agenda.

Item No. I: Confirmation of Minutes of 320th meetings of Registration Board.

320th meeting of Registration Board was held on 20-22nd September, 2022. The draft minutes of Registration Board were circulated among the members of Board on 16th September, 2022 for perusal/approval/comments (if any) within five days. All members agreed the draft minutes on 21st September, 2022 during 321st meeting of Registration Board.

Accordingly, fair minutes were processed to Chairman, Registration Board for perusal/approval. After approval from Chairman Registration Board, fair minutes of 320th meeting of Registration Board were circulated among concerned divisions/sections for implementation of decisions.

Decision: Registration Board confirmed the minutes of 320th meeting of Registration Board.

Item No. II Division of Pharmaceutical Evaluation & Registration

Pharmaceutical Evaluation Cell (PEC)

Sr. No	Name of Evaluator	Title
1.	Mr. Farooq Aslam	Evaluator PEC-I
2.	Mr. Ammar Ashraf Awan	Evaluator PEC-II
3.	Mr. Muhammad Haseeb Tariq	Evaluator PEC-III
4.	Mst.Farzana Raja	Evaluator PEC-IV
5.	Mst. Iqra Aftab	Evaluator PEC-V
6.	Mr. Muhammad Umar Latif	Evaluator PEC-VI
7.	Dr. Sidra Khalid	Evaluator PEC-VII
8.	Dr. Hanif Ullah	Evaluator PEC-IX
9.	Dr. Farhadullah	Evaluator PEC-XI
10.	Mr. Shahid Nawaz	Evaluator PEC-XIII
11.	Mr. Ahsan Hafiz	Evaluator PEC-XIV
12.	Mst. Saima	Evaluator PEC-XV
13.	Mr. Akbar Ali	Evaluator PEC-XVI
14.	Mr. Zia Ullah	Evaluator PEC-XVII
15.	Mr. Muneeb Ahmed Cheema	Evaluator PEC-XVIII
16.	Mr. Sarfraz Nawaz	Evaluator PE&R

1.	Name, address of Applicant / Marketing Authorization Holder	M/s News Pharma Plot 42, Sundar Industrial Estate Lahore
	Name, address of Manufacturing site.	M/s News Pharma Plot 42, Sundar Industrial Estate Lahore
	Details of Drug Manufacturer License	DML No.: Address: M/s News Pharma Plot 42, Sundar Industrial Estate Lahore Validity: 18/02/2018 valid till 5 year
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 6138 dated: 7 March 2022
	Details of fee submitted	PKR 30,000/-: dated 02-03-2022
	The proposed proprietary name / brand name	Newsfen 100 mg / 5 mL Suspension
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5 mL contains: Ibuprofen .... 100 mg
	Pharmaceutical form of applied drug	Clear sweet strawberry flavored homogeneous oral suspension filled in amber glass bottle sealed with aluminium cap and packed in printed unit cartons.
	Pharmacotherapeutic Group of (API)	NSAID
	Reference to Finished product specifications	BP
	Proposed Pack size	1 ×60 mL, 1 x 90 mL, 1x120 mL, 1x 400 mL
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ibuprofen 100 mg / 5 mL suspension by M/s Pinewood healthcare UK (MHRA Approved)
	For generic drugs (me-too status)	Brufen Suspension by Abbott Laboratories Reg. No. 004595
	GMP status of the Finished product manufacturer	New additional section of Oral Liquid Syrup approved on: 12-11-2021
	Name and address of API manufacturer.	Zenith Chemical Industries (Pvt.) Limited. Moaza Dhondhay, Jia Bagga, Raiwind Road Lahore
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability

		studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ibuprofen is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity F & related substances (impurities A J, N), unspecified & total impurities), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(ZIBU11-001ZIBU11-002, ZIBU11-003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Brufen 100 mg/5 mL Susp. By M/s Abbott Laboratories by performing quality tests (Identification, Assay, Uniformity of dosage unit and determination of 4 - Isobutyl acetophenone (Ibuprofen impurity E). CDP – Not applicable
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	Zenith Chemical Industries (Pvt.) Limited. Moaza Dhondhay, Jia Bagga, Raiwind Road Lahore
API Lot No.	ZIBU21-029
Description of Pack (Container closure system)	Clear sweet strawberry flavored homogeneous oral suspension filled in amber glass bottle sealed with aluminium cap and packed in printed unit carton
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	T-01	T-02	T-03
Batch Size	100 Bottles	100 Bottles	100 Bottles
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	08-09-2021	08-09-2021	08-09-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 141/2019-DRAP (AD 813875-228) dated 22-05-2019 issued by DRAP
3.	Documents for the procurement of API with approval from DRAP (in case of import).	NA
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit Trail submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

analytical procedure of drug substance from drug substance manufacturer is missing

S. No	Sections	Observations/Deficiencies/ Short-comings	Response
1.	2.3.R.1.1	method mentioned in BMR's is not same mentioned in section 3.2.P.2.3 and 3.2.P.3.5. Clarification is required.	Critical parameters were only mentioned in BMR both 3.2.P.2.3 and 3.2.P.3.5 have been revised and attached
2.		Batch size 100 bottles mentioned while in stability sheets and COA's 45 bottles mentioned.	The actual batch size was 45 bottles, 100 was mentioned by mistake
3.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance is required.	Submitted
4.	3.2.S.4.3	In B.P and as per your method Assay is carried out by titration method while Verification studies are conducted by HPLC. Clarification is required.	Verification studies are conducted by titration method is provided
5.	3.2.P.2.5	Preservative effectiveness studies to be performed as per recommendations of pharmacopoeia) shall be provided	Provided
6.	3.2.P.4.4	The copies of complete analysis of at least two batches shall be provided.	Complete analysis of at least two batches is provided

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

2.	Name, address of Applicant / Marketing Authorization Holder	M/s News Pharma Plot 42, Sundar Industrial Estate Lahore

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. F.326/2019-addl.Dir (QA&LT-I) issued by Govt of Pakistan ministry of Health valid till 10/02/2022.
3.	Documents for the procurement of API with approval from DRAP (in case of Import).	Omeprazole pallets are locally procured from vision pharma Islamabad
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with Chromatograms, raw data sheets, COAs and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted 21 CFR evidence and audit trail reports of product testing.
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Remarks OF Evaluator:

S. No	Observations/Deficiencies/ Short-comings	Reply
1.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. F.326/2019-addl.Dir (QA&LT-I) issued by Govt of Pakistan ministry of Health valid till 10/02/2022 is provided
2.	Provide evidence of purchase including commercial invoice of the drug substance.	Invoice document #302848 from M/S vision pharma is provided
3.	Provide copy of BMR of the stability batches	Provided
4.	Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.	COA of reference standard which is actually used in the analysis of drug substance in section is provided
5.	Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia**.**	Pharmaceutical Equivalence have been established against the brand leader that is Risek 20 mg Capsule by Getz Pharma (# C04005) by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Risk 20 mg capsule by Getz Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range. All the results are provided which concludes that the developed formulation of omeprazole 20 mg capsule have comparable product quality and performance profile with that of comparator product

6.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Compliance Record of HPLC software 21CFR & audit trail is provided
7.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature & humidity monitoring of stability chambers is provided

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of CDP and pharmaceutical equivalence studies, performed against the innovator's drug product i.e., Losec capsule 20mg.**

	Name, address of Manufacturing site.	M/s MedAsia Pharmaceutical (Pvt) Ltd. Plot #7 Nowshera industrial estate Risalpur KPK Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	GMP certificate issued on 8/12/2021
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 13-01-2022 which specifies Oral Dry powder suspension (general) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No: 12605 24/ May/2022
	Details of fee submitted	PKR 30,000/-: 25/04/2022 (#7178762428)
	The proposed proprietary name / brand name	**Antra 40mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Omeprazole as Enteric Coated Pellets…40mg
	Pharmaceutical form of applied drug	Dark Blue color cap and light blue color body containing off white color Enteric Coated pellets
	Pharmacotherapeutic Group of (API)	PPI (Proton pump Inhibitor)
	Reference to Finished product specifications	USP
	Proposed Pack size	2×7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole capsule is USFDA Approved

	For generic drugs (me-too status)	Getz Pharma (Risk 40 mg Capsule)
	GMP status of the Finished product manufacturer	New license granted on 11/11/2021 Tablet General, Capsule General& General Dry Suspension section approved.
	Name and address of API manufacturer.	M/S Vision pharmaceuticals Plot No22,23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Omeprazole Capsule is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (OMP073, OMP074, OMP075)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Risek 40 mg Capsule by Getz Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Risk 40 mg Capsule Getz Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range..

	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Seroxat Tablets 20mg** by **GlaxoSmithKline Pharmaceutical S.A** by performing quality tests (Identification, Assay, Dissolution). CDP has been performed against the same brand that is **Seroxat Tablets 20mg** by **GlaxoSmithKline Pharmaceutical S.A** in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Huahai Pharmaceutical Co., Ltd. Xunqiao, Linhai 317024, Zhejiang, China		
API Lot No.	5301-20-013		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	10000 Tablets	10000 Tablets	10000 Tablets
Manufacturing Date	09-2020	09-2020	09-2020

Date of Initiation	10-2020	10-2020	10-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Applicable as it is non-inspection product
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. ZJ20180073 issued by CFDA valid till 25/06/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	ADC Invoice No: HH20201310, 11-June-2020 is submitted wherein the permission to import API (Paroxetine Hydrochloride) for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of Evaluator:		

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product Erli Plus XR Tablet 5/1000mg, 10/1000mg, 12.5/1000mg & 25/1000mg (Empagliflozin + Metformin HCl XR) which was conducted on 05th December, 2019 and were presented in 293rd meeting of Registration Board held on 6th -8th Jan, 2020. According to the report following points were confirmed. • Firm has 21 CFR compliant HPLC software. • Firm has audit trail reports available. • Firm possesses stability chambers with digital data loggers.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Ertugliflozin- LPGA:** Copy of COA of Ertugliflozin L-pyroglutamic acid eq to Ertugliflozin (L-Pyroglutamic acid) (Batch# ETG20190101)) from M/s Shangai Pharma

		Group Changzhou Kony Pharmaceutical Co., Ltd., Daixi Street, Louyang Town, Wujin District, Changzhou, Jiangsu 213105, China is submitted. Copy of COA from M/s PharmEvo (private) Limited is submitted. **Sitagliptin Phosphate:** Copy of COA of Sitagliptin Phosphate (Batch# 1827-0001-19049) from Zhejiang Yontai Pharmaceutical co. ltd-Donghai 4th Avenue, Zhejiang Provincial Chemical and Medical Raw Material Base Linhai Zone, Linhai City, Zhejiang Province is submitted. Copy of COA (Batch# 1827-0001-19049) from M/s PharmEvo (private) Limited is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Provided
4.	Stability study data of API from API manufacturer	**Ertugliflozin:** Provided (The firm has submitted accelerated & real time stability studies for 3 batches (ETG20161201, ETG20161202, ETG20170101) at Real time: 30°C ± 2°C / 65% ± 5%RH and Accelerated: 40°C ± 2°C / 75% ± 5%RH) **Sitagliptin:** Provided (The firm has submitted accelerated & real time stability studies for 3 batches (1827-0001-18001, 1827-0001-18002, 1827-0001-18003) at Real time: 30°C ± 2°C / 65% ± 5%RH and Accelerated: 40°C ± 2°C / 75% ± 5%RH)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Ertugliflozin:** Copy of GMP certificate (certificate No.JS20180935) issued to Shanghai pharma group Changzhou by CFDA. It is valid until 26/11/2023 **Sitagliptin:** cGMP certificate # ZJ20170014 issued by china food and drug administration to the manufacturer (Zheijiang Youngtai pharmaceuticals co ltd) and its valid till **3rd May 2022**
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Ertugliflozin** The firm has submitted copy of invoice for the purchase (1.2 kg) attested by Assistant Director DRAP, dated 7-1-2020 **Sitagliptin:** The firm has submitted copy of invoice for the purchase (500 kg) attested by Assistant Director DRAP, but commercial invoice was attested provided by Hangzhou biobounce technology co LTD
7.	Protocols followed for conduction of stability study	Yes
8.	Method used for analysis of FPP	Yes
9.	Drug-excipients compatibility studies (where applicable)	Drug-excipients compatibility studies were not performed as the firm has used the same excipients as of innovator.

<table>
<tr><td>10.</td><td>Complete batch manufacturing record of three stability batches.</td><td>The firm has submitted copy of Trial batch manufacturing record. REMARKS OF EVALUATOR [VII]

S No	Deficiency	Response
1.	Need valid GMP issued by the province as the current GMP certificate issued by Zheijang medical Centre for economic development is valid till 30-06-2021	Copy of DML# 20120015 issued by NMPA valid upto 31-05-2027 has been submitted.
2.	The GMP, quality control department analysis report and COA is from Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd. Jiangsu China. And on many documents including commercial invoice name is mentioned as Shanghai Pansopharma technology Co., Ltd. Jiangsu China. Provide the relationship.	The Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd. Jiangsu China is the manufacturer which might be confirmed by the submitted GMP whereas shanghai Pansopharm technology co Ltd is an exporter of Ertugliflozin. Declaration letter is provided.

3.	Commercial invoice of sitagliptin wasn't attested and provided by Hangzhou biobounce technology Co LTD not zheijang youngtai pharma. Clarification is needed	Commercial invoice of sitagliptin was attested and provided by Hangzhou biobounce technology Co LTD which is the exporter of sitagliptin. zheijang youngtai pharma co Ltd is the manufacturer of sitagliptin
4.	Reference of previous approval of applications with stability study data of the firm is needed	Submitted
5.	Certificate of analysis of API from both drug substance and drug product manufacturer	Certificate of analysis of API from both drug substance and drug product manufacturer were provided
6.	Record of comparative dissolution data is needed	Submitted

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Manufacturer of API	**Ertugliflozin:**

	M/s Shangai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd., Daixi Street, Louyang Town, Wujin District, Changzhou, Jiangsu 213105, China. **Metformin HCl:** Smruthi Organics Limited, A-27, MIDC Chincholi, Tal-Mohol, Solapur 413255 Maharashtra State, India.		
API Lot No.	**Ertugliflozin L-Pyroglutamic Acid**: LPGA: ETG20190101 **Metformin:** MET-559/19		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0,1,2,3,4,6 months Real Time: 0,3,6 months		
Batch No.	**19PD-3010-05-T**	**19PD-3011-06-T**	**19PD-3012-07-T**
Batch Size	2500 Tablet	2500 Tablet	2500 Tablet
Manufacturing Date	16-2019	11-2019	11-2019
Date of Initiation	12-2019	12-2019	12-2019
No. of Batches	03		
Date of Submission	22-12-2020 (Dy. No.34038)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product Erli Plus XR Tablet 5/1000mg, 10/1000mg, 12.5/1000mg & 25/1000mg (Empagliflozin + Metformin HCl XR) which was conducted on 05th December, 2019 and were presented in 293rd meeting of Registration Board held on 6th -8th Jan, 2020. According to the report following points were confirmed. • Firm has 21 CFR compliant HPLC software. • Firm has audit trail reports available. • Firm possesses stability chambers with digital data loggers.

2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Ertugliflozin- LPGA:** Copy of COA of Ertugliflozin L-pyroglutamic acid eq to Ertugliflozin (L-Pyroglutamic acid) (Batch# ETG20190101)) from M/s Shangai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd., Daixi Street, Louyang Town, Wujin District, Changzhou, Jiangsu 213105, China is submitted. Copy of COA from M/s PharmEvo (private) Limited is submitted. **Metformin HCl:** Copy of COA (Batch# MET-559/19) from Smruthi Organics Limited A-27, MIDC Chincholi, Tal- Mohol, Solapur 413255 Maharashtra State, India is submitted. Copy of COA (Batch# 1835) from M/s PharmEvo (private) Limited is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Provided
4.	Stability study data of API from API manufacturer	The firm has submitted accelerated & real time stability studies for 3 batches at Real time: 30°C ± 2°C / 65% ± 5% RH and Accelerated: 40°C ± 2°C / 75% ± 5%RH)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Ertugliflozin-** LPGA: Copy of GMP (# JS20180935) for M/s Shangai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd., China issued by China Food and Drug Administration of the People's Republic of China is submitted, valid up to 26-11-2023. **Metformin:** of Drug manufacturing license (License no. NEW-WHO-GMP/CERT/PD/86368/2019/11/30111) for Smruthi Organics Limited A-27, MIDC Chincholi, Tal-Mohol, Solapur 413255 Maharashtra State, India is submitted, valid up to 13-Nov-2022
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Ertugliflozin** the firm has submitted copy of invoice for the purchase (1.2 kg) attested by Assistant Director DRAP, dated 7-1-2020 **Metformin:** Firm has submitted copy of commercial invoice specifying import of 3000 Kg metformin dated 27-11-2018. The invoice is signed by AD (I&E) DRAP Lahore.
7.	Protocols followed for conduction of stability study	Yes
8.	Method used for analysis of FPP	Yes
9.	Drug-excipients compatibility studies (where applicable)	Drug-excipients compatibility studies were not performed as the firm has used the same excipients as of innovator.

<table>
<tr>
<td>10.</td>
<td>Complete batch manufacturing record of three stability batches.</td>
<td>The firm has submitted copy of Trial batch manufacturing record. Details are as under:
<table>
<tr><th>Batch no.</th><th>Batch Size</th><th>Mfg. Started</th></tr>
<tr><td>19PD-3010-05-T</td><td>2500</td><td>11-2019</td></tr>
<tr><td>19PD-3011-06-T</td><td>2500</td><td>11-2019</td></tr>
<tr><td>19PD-3012-07-T</td><td>2500</td><td>11-2019</td></tr>
</table>
</td>
</tr>
<tr>
<td>11.</td>
<td>Record of comparative dissolution data (where applicable)</td>
<td>Firm has submitted Comparative dissolution study of their product with Innovator’s Brand “Segluromet” The details are as follows:
<table>
<tr><th>Feature</th><th>Reference Product</th><th>Product of PharmEvo</th></tr>
<tr><td>Brand Name</td><td>Segluromet Tablet 2.5mg/1000 mg</td><td>Erlin-M Tablet 7.5/500mg</td></tr>
<tr><td>Batch No.</td><td>T042906</td><td>19PD-3041-02-T</td></tr>
</table>
Comparative dissolution studies have been performed in following mediums:
1. pH 1.2 HCl buffer
2. pH 4.5 Acetate buffer
3. pH 6.8 Phosphate buffer
Firm submit letter and clarify that our products Ertugliflozin L-pyroglutamic acid eq to Ertugliflozin + Metformin HCl Tablets 2.5mg + 500mg, 2.5mg + 1000mg, 7.5mg + 500mg & 7.5mg + 1000mg are dose proportional in accordance with EMA Guidelines on the Investigation of Bioequivalence (extract attached) which states that:
- The pharmaceutical products are manufactured by the same manufacturing process.
- The Qualitative composition of the different strengths is the same.
- The composition of strengths are Quantitatively proportional i.e., amount of all the excipients in the
tablet range is similar to each other with respect to tablet weight except filler for which the active substance is adjusted.
In view of the above, we have benchmarked Segluromet Tablet 2.5mg + 1000mg as reference product for all the strengths.
</td>
</tr>
</table>

<table>
<tr><td>12.</td><td>Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td><td>The firm has submitted photocopy of Batch Manufacturing Record of three stability batches such as.

REMARKS OF EVALUATOR [VII]

S No	Deficiency	Response
1.	The GMP, quality control department analysis report is from Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd. Jiangsu China. And on man documents including commercial invoice name is mentioned as Shanghai Pansopharma technology Co., Ltd. Jiangsu China. Provide the relationship.	The Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd. Jiangsu China is the manufacturer which might be confirmed by the submitted GMP whereas shanghai pansopharm technology co Ltd is an exporter of ertigluphlozin. Declaration letter is provided.
2.	Reference of previous approval of applications with stability study data of the firm is needed	Provided
3.	Certificate of analysis of API from both drug substance and drug product manufacturer	Certificate of analysis of API from both drug substance and drug product manufacturer were provided
4.	Record of comparative dissolution data is needed	Firm submit letter and clarify that our products Ertugliflozin L-pyroglutamic acid eq to Ertugliflozin + Metformin HCl Tablets 2.5mg + 500mg, 2.5mg + 1000mg, 7.5mg + 500mg & 7.5mg + 1000mg are dose proportional in accordance with EMA Guidelines on the Investigation of Bioequivalence (extract attached) which states that: - The pharmaceutical products are manufactured by the same manufacturing process. - The Qualitative composition of the different strengths is the same. - The composition of strengths is Quantitatively proportional i.e., amount of all the excipients in the tablet range is similar to each other with respect to tablet

		weight except filler for which the active substance is adjusted.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of CDP and pharmaceutical equivalence studies, performed against the innovator's product.**

Remarks of Evaluator:
Details of DPI device:
Model no.: BDD07
Manufacturer: M/s ShangHai HuaRui Aerosol Co., Ltd. No.222, Yuanchun Road, Pudong New Area, Shanghai, China
Shelf life: 3 years

S #	Section	Query	Reply
1.	3.2.S.4	Control of drug substance	Submitted
2.	(2.3.S.4.3)	Provide summarized tabulated results of verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer	Summarized tabulated results of verification studies including specificity, accuracy and Repeatability (method precision) is submitted
3.	(3.2.S.4.4)	Provide results of analysis of relevant	Results of analysis of relevant batch(es) of Drug Substance

		batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture	performed by Drug Product Manufacturer along with COA's has been submitted.
4.	" (3.2.S.4)	Submitted specifications does not include test for "Particle size distribution since, reference product literature states that "The particle size distribution is crucial to achieving the required delivered dose and lung deposition characteristics	Submitted specifications include test for "Particle size distribution" (copy of relevant section is provided
5.	(3.2.P.2.2.1).	The reference products referred by you, is an inspiratory flow-driven, multidose powder inhaler containing metered doses, wherein inhaler is made of different plastic materials, while the applied formulation is primarily pre-dispensed in unit dose hard capsules. Justification shall be submitted for pharmaceutical equivalence of the applied product against the reference product with respect to change in primary container closure system, compatibility of applied formulation with the hard gelatin capsule & method of administration	Innovator has directly filled Active Pharmaceutical Ingredients and Excipients in a blister foil, however we have used capsule as a container of Dry Powder Inhaler products therefore practically it is not possible to fill such a minute quantity of Lactose (as in case of innovator) during encapsulation. Furthermore, Pharmaceutical Equivalence has also been done which exhibit similar result as that of innovator product. Pharmaceutical equivalence including Deliver Dose Uniformity by DUSA & Aerodynamic Particle Size Distribution by Cascade Impaction has been conducted with the Innovator Product (Symbicort Turbo haler); results are similar as that of innovator product. As far as the primary container closure system is concern, we would like bring it in your kind information that HPMC Capsule Shell which is inert in nature; has been used in our formulation. Hence there is no impact of capsule shells on the formulation.
6.	(3.2.P.3.3).	Clarification shall be submitted regarding how the required micronized particle size of the formulation blend has been achieved using Multi-dimensional mixer	Multi-dimensional mixer is used to blend formulation rather than reducing or controlling the particle. Since all the excipients and API used in the formulation is micronized particle size i.e. DPI grade (COA's enclosed for your reference) therefore there is no need of further reduction in particle size at our end.

7.		Evidence of availability of requisite manufacturing & analytical equipment as decided by Registration Board in its 290th meeting at the time of manufacturing of trial batches, shall be submitted.	Evidence of manufacturing & analytical equipment's We have submitted the Installation Qualification and Operational Qualification Protocol and report as the evidence of manufacturing & analytical equipment's.

Decision: Approved with Innovator's specifications.

6.	(3.2.P.3.3).	Clarification shall be submitted regarding how the required micronized particle size of the formulation blend has been achieved using Multi-dimensional mixer	Multi-dimensional mixer is used to blend formulation rather than reducing or controlling the particle. Since all the excipients and API used in the formulation is micronized particle size i.e. DPI grade (COA's enclosed for your reference) therefore there is no need of further reduction in particle size at our end.
7.		Evidence of availability of requisite manufacturing & analytical equipment as decided by Registration Board in its 290th meeting at the time of manufacturing of trial batches, shall be submitted.	Evidence of manufacturing & analytical equipment's We have submitted the Installation Qualification and Operational Qualification Protocol and report as the evidence of manufacturing & analytical equipment's.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm will use DPI device Model no.: BDD07 of Manufacturer: M/s ShangHai HuaRui Aerosol Co., Ltd. No.222, Yuanchun Road, Pudong New Area, Shanghai, China**

15.	Name, address of Applicant / Marketing Authorization Holder	M/s PharmEvo Private Limited., Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi

Remarks of Evaluator:

The applied formulation is approved in USFDA is supplied as a disposable purple plastic inhaler containing a foil blister strip with 60 blisters. The inhaler is packaged in a plastic-coated, moisture-protective foil
Firm provides the details of DPI device purchased by shangai Huarui aerosol co. Ltd Shangai china.

Details of DPI device:
Model no.: BDD07
Manufacturer: M/s ShangHai HuaRui Aerosol Co., Ltd. No.222, Yuanchun Road, Pudong New Area, Shanghai, China
Shelf life: 3 years

S #	Query	Reponses
1.	Clarification regarding intended manufacturing area, since applied formulation contains Fluticasone, which is a steroid	We have established a segregated facility for the manufacturing of Dry Powder Inhalers (DPI) Capsules. Layout of the said facility has been approved and section approval has also been granted by DRAP on 29th

		April, 2022 (copy enclosed for your ready reference). We would like to bring it in your kind information that below are the measures will be taken in order to control cross-contamination during the manufacturing of subject products: 1. Dedicated change parts are available for the encapsulation of that will ensure and minimize the risk cross contamination during filling process. 2. Dedicated change parts along with auto feeder is installed and available for the blistering of that will further ensure the control of cross contamination during blistering and primary packaging process. 3. Separate gowning procedure will be followed. 4. New HEPA filter will be employed. 5. Specialized dedicated dispensing booth. 6. PRE/POST cleaning validation studies on approved protocol for steroidal formulations has been done so as to make sure the prevention of cross contamination. We also would like to bring to your kind attention that DRAP has already approved the manufacturing of all DPI's (Steroidal) in General DPI section in its 294th & 297th meeting minutes (copy of relevant pages are enclosed for your ready reference).
2.	Evidence of availability of requisite manufacturing & analytical equipment's as decided by Registration also Evidence of equipment's for performing the test of "Uniformity of Delivered Dose" and "Aerodynamic Particle Size Distribution" as per Pharmacopoeia	We have submitted the Installation Qualification and Operational Qualification Protocol and Report as the evidence of manufacturing & analytical equipment's as per Pharmacopoeia.
3.	In reference products referred by you, formulation is pre-dispensed in a foil blistered strips, whereas applied formulation is primarily pre-dispensed in hard capsules. Justification shall be submitted for change in primary container closure system with respect to compatibility of applied formulation with the hard gelatine capsules.	Pharmaceutical equivalence including Deliver Dose Uniformity by DUSA & Aerodynamic Particle Size Distribution by Cascade Impaction has been conducted with the Innovator Product (Seretide Diskus); results are similar as that of innovator product. 2. As far as the primary container closure system is concern, we would like bring it in your kind information that HPMC Capsule Shell which is inert in nature; has been used in our formulation. Hence

		there is no impact of capsule shells on the formulation. We also would like to bring your kind attention that DRAP has already approved Salmeterol + Fluticasone propionate in HPMC capsules in its 275th DRB meeting for M/s Macter International Ltd., Karachi with the brand name of Salmicort DPI Capsule and in 291st DRB meeting for M/s Getz (Pvt.) Ltd., Karachi with the brand name of Saltra DPI Capsule (extract attached).
4.	Details of reference product batch # import details Mfg. date etc against which pharmaceutical equivalence was established	Pharmaceutical equivalence report enclosed which comprises the detail of reference product i.e. Seretide Diskus, including batch number, manufacturing date, expiry date etc.
5.	Under standardized in vitro test conditions, ADVAIR DISKUS delivers 465mcg of fluticasone propionate and 45mcg of salmeterol base per blister from ADVAIR DISKUS when tested at a flow rate of 60L/min. for 2 seconds while you have not submitted any label claim for delivered dose	Label claim for deliver dose have been submitted with initial registration dossier however we are again submit the copy of relevant section for your reference.
6.	Clarification shall be submitted regarding how the required micronized particle size of the formulation blend has been achieved using Multi-dimensional mixer	Multi-dimensional mixer is used to blend formulation rather than reducing or controlling the particle. Since all the excipients and API used in the formulation is micronized particle size i.e. DPI grade (COA's attached) therefore there is no need of further reduction in particle size at our end.
7.	Provide summarized tabulated results of verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer (2.3.S.4.3)	Summarized tabulated results of verification studies including specificity, accuracy and repeatability (method precision) is already submitted with initial registration dossier, however we are again submit the copy of relevant section for your reference.
8.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture (3.2.S.4.4)	Results of analysis of relevant batch(es) of Drug Substance performed by Drug Product Manufacturer along with COA's has been submitted with initial registration dossier, however we are again submit the COA's for your reference.
9.	Submitted specifications does not include details of test for "Particle size distribution since reference product literature states that "The particle size distribution is crucial to achieving the required delivered dose and lung deposition characteristics (3.2.S.4)	Submitted specifications include test for "Particle size distribution" (copy of relevant section is enclosed for your ready reference).

10.	Provide summarized tabulated results of verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer (2.3.S.4.3)	Summarized tabulated results of verification studies including specificity, accuracy and repeatability (method precision) is already submitted with initial registration dossier, however we are again submit the copy of relevant in Annexure-7 for your further proceeding.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	Clarification regarding intended manufacturing area, since applied formulation contains Fluticasone, which is a steroid	We have established a segregated facility for the manufacturing of Dry Powder Inhalers (DPI) Capsules. Layout of the said facility has been approved and section approval has also been granted by DRAP on 29th April, 2022 (copy enclosed for your ready reference). We would like to bring it in your kind information that below are the measures will be taken in order to control cross-contamination during the manufacturing of subject products: 1. Dedicated change parts are available for the encapsulation of that will ensure and minimize the risk cross contamination during filling process. 2. Dedicated change parts along with auto feeder is installed and available for the blistering of that will further ensure the control of cross contamination during blistering and primary packaging process. 3. Separate gowning procedure will be followed. 4. New HEPA filter will be employed. 5. Specialized dedicated dispensing booth. 6. PRE/POST cleaning validation studies on approved protocol for steroidal formulations has been done so as to make sure the prevention of cross contamination. We also would like to bring to your kind attention that DRAP has already approved the manufacturing of all DPI's (Steroidal) in General DPI section in its 294th & 297th meeting minutes (copy of relevant pages are enclosed for your ready reference).
2.	Evidence of availability of requisite manufacturing & analytical equipment's as decided by Registration also Evidence of equipment's for performing the test of "Uniformity of Delivered Dose" and "Aerodynamic Particle Size Distribution" as per Pharmacopoeia	We have submitted the Installation Qualification and Operational Qualification Protocol and Report as the evidence of manufacturing & analytical equipment's as per Pharmacopoeia.
3.	In reference products referred by you, formulation is pre-dispensed in a foil blistered strips, whereas applied formulation is primarily pre-dispensed in hard capsules. Justification shall be submitted for change in primary container closure system with respect to	Pharmaceutical equivalence including Deliver Dose Uniformity by DUSA & Aerodynamic Particle Size Distribution by Cascade Impaction has been conducted with the Innovator Product (Seretide

	compatibility of applied formulation with the hard gelatine capsules.	Diskus); results are similar as that of innovator product. 2. As far as the primary container closure system is concern, we would like bring it in your kind information that HPMC Capsule Shell which is inert in nature; has been used in our formulation. Hence there is no impact of capsule shells on the formulation. We also would like to bring your kind attention that DRAP has already approved Salmeterol + Fluticasone propionate in HPMC capsules in its 275th DRB meeting for M/s Macter International Ltd., Karachi with the brand name of Salmicort DPI Capsule and in 291st DRB meeting for M/s Getz (Pvt.) Ltd., Karachi with the brand name of Saltra DPI Capsule (extract attached).
4.	Details of reference product batch # import details Mfg. date etc against which pharmaceutical equivalence was established	Pharmaceutical equivalence report enclosed which comprises the detail of reference product i.e. Seretide Diskus, including batch number, manufacturing date, expiry date etc.
5.	Under standardized in vitro test conditions, ADVAIR DISKUS delivers 465mcg of fluticasone propionate and 45mcg of salmeterol base per blister from ADVAIR DISKUS when tested at a flow rate of 60L/min. for 2 seconds while you have not submitted any label claim for delivered dose	Label claim for deliver dose have been submitted with initial registration dossier however we are again submit the copy of relevant section for your reference.
6.	Clarification shall be submitted regarding how the required micronized particle size of the formulation blend has been achieved using Multi-dimensional mixer	Multi-dimensional mixer is used to blend formulation rather than reducing or controlling the particle. Since all the excipients and API used in the formulation is micronized particle size i.e. DPI grade (COA's attached) therefore there is no need of further reduction in particle size at our end.
7.	Provide summarized tabulated results of verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer (2.3.S.4.3)	Summarized tabulated results of verification studies including specificity, accuracy and repeatability (method precision) is already submitted with initial registration dossier, however we are again submit the copy of relevant section for your reference.
8.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture (3.2.S.4.4)	Results of analysis of relevant batch(es) of Drug Substance performed by Drug Product Manufacturer along with COA's has been submitted with initial registration dossier, however we are

		again submit the COA's for your reference.
9.	Submitted specifications does not include details of test for "Particle size distribution since reference product literature states that "The particle size distribution is crucial to achieving the required delivered dose and lung deposition characteristics (3.2.S.4)	Submitted specifications include test for "Particle size distribution" (copy of relevant section is enclosed for your ready reference).

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm will use DPI device Model no.: BDD07 of Manufacturer: M/s ShangHai HuaRui Aerosol Co., Ltd. No.222, Yuanchun Road, Pudong New Area, Shanghai, China**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate # 20031928 of M/s. Vital Laboratories (Pvt) Ltd. Plant II, Plot No. 1710, GIDC Estate, Phase III, Vapi – 396 195 Gujrat India valid upto 16-03-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice # HHM/2021/00256) attested by AD DRAP
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator [VII]:

Sr. No.	Section #.	Deficiencies	Reply
1.	***3.2.P.2***	How much overage is added in the formulation? Justify the percentage of overage added in the formulation	30% overage is added
2.	***3.2.P.8***	Justify the selection of limit of assay test as "90 – 150 %" while the official limit of vitamin preparations is 120%.	For the case of Vitamin preparations normally and most of the cases followed Compendial limits are 90-130%. In our nivitex inj 500mcg we have added 30% of overage in the batch formula. Unit contains 30% of overage of API, So considering the addition of 30% of overage, assay limits are set as 90-150%.

			We have now revised the specs and make it more stringent after complete stability data and market feedback, so the revised limits are now set as 90-130%.
3.	***3.2.P.8***	Justify how UV method was adopted for the testing of drug product, since the testing method of drug substance manufacturer for assay of mecobalamin was based on HPLC	M/s Bio-labs have the registration of our product Mine injection as per manufacture specification and UV-VIS Spectrophotometer method is DRAP approved method. Since stability data is proved at old batches of 2018 so the applied method is UV-VIS Spectrophotometer which has been updated now. Validation of the applied testing method has been provided in terms of all the parameters as per validation guidelines.
4.	***3.2.P.8***	Justify the effective date on stability data sheet is 01-01-2020 but the stability starts at 29-08-2018	Effective data on stability data sheet is 01-01-2020 because old data has been provided on the new formats. Formats for interpretations of stability results are new and revised with old stability data for presentation.
5.	***3.2.P.8***	Justify the results of assay as all the batches just showed minor decrease in assay results less than which is usually observed in vitamin preparations. Scientific justification / clarification is required in this regard.	Results of assay showed normal decrease in assay results, which is well within the trend as of vitamins preparation. In the stability data provided, assay results decrease gradually e.g. in batch number A-431 assay results decreases from 122…62% to 109-93% (stability sheet for real time analysis provided), in batch number A-433 assay results decreased from 121.21% to 107-23% and in batch number A-456 results decreased from 121.2% to 106-83%.

Decision of 316: Deferred for the following
Justify how UV method was adopted for the testing of drug product, since the testing method of drug substance manufacturer for assay of mecobalamin was based on HPLC
Justification for the results of assay
Justification of the percentage of overage added in the formulation

Remarks of evaluator PEC VII

S. No.	Deficiency in 316th Meeting	Documents Attached
1.	Deferred for: • Justification of applying UV Spectrophotometric method for the assay test of drug product, since the testing method of drug substance manufacturer for assay of mecobalamin was based on HPLC.	Bio-Labs has registration of mecobalamine injection as per manufacturer specifications. Since stability data has been provided of old batches so applied testing method along with method validation was submitted. However, the testing method of the mecobalamine injection has been updated to HPLC. The method validation of the new method is attached herewith. Both the methods (UV-spectrophotometric and HPLC) are validated in all aspects of ICH guidelines.
	• Justification for declining trend of assay results.	As the mecobalamin is light sensitive product and gradually degrades with the time, due to this reason there is declining trend in the analysis of assay. In order to achieve patient compliance and provision of complete dose, overage has been added so that the contents of API remain within claim limit during product shelf life.
	• Justification of the percentage of overage added in the formulation.	As the mecobalamine is light sensitive product and gradually degrades with the time, due to this reason there is declining trend in the analysis of assay. In order to achieve patient compliance and provision of complete dose, overage has been added so that the contents of API remain within claim limit during product shelf life.

Decision: Registration Board noted the fact that the %age overage used in the applied formulation was above the general permissible limits of overage hence the Board deferred the case for submission of new 6 month stability studies data of drug product at accelerated and long term conditions of Zone IVA, with revised formulation excluding overage, drug product specifications and drug product analytical procedure based upon HPLC Assay method.

Date of Initiation	25-07-2019	27-07-2019	27-07-2019
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted copy of Last inspection Report conducted on 24/01/2018.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SC20160032 issued by CFDA valid till 17/11/2021.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of AD Attested invoice No F 1919090 vide No.5354/2019/DRAP-AD-CD(I&E) dated 16/04/2019 is submitted wherein the permission to import Vitamin D3 API is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator [VII]:

S. No	Sections	Observations/ Short-comings	Remarks
1.	**1.3.4**	Valid Drug Manufacturing License (DML) of manufacturer/Applicant shall be submitted as submitted DML was not valid.	Copy of valid DML is submitted
2.	**2.3.R.1.1**	Provide copy of Batch manufacturing record (BMR) for all the batches of the drug product for which stability study data is provide in module 3 section 3.2.P.8.3.	Copies of Executed/Trial batches & Commercial batch BMR were attracted in 3.2.R. However, Copies of BMR of all the batches of the drug product for which stability study data are provided in 2.3.R.1.1.
3.	**3.2.P.8**	Stability: on commercial Invoice the quantity mentioned was Vit D3 40MIU but the prepare strength is 300,000IU	As per COA,40MIU is the potency of vitamin D3 i.e 40,000,000 IU/gm , as per label claim of the applied strength the quantity of vitamin d3 with this potency is calculated which is equivalent to vitamin d3 300,000IU (7.5 mg). COA and calculation is attached.
4.	**3.2.P.1**	The composition contains BHA and Crodamol oil but in the reference product Xarenel 300,000IU/ml solution for injection. The excipient use is refined olive oil for injectable use.	Compatibility of crodamol oil and BHA were performed against Vitamin d3 Active, no interference was observed during the compatibility Analysis
5.	**3.2.P.1**	Description and composition of the drug product Details of Overage not provide in the formulation	Overage was reflecting in the amount of API /unit, however composition with overage details is attached.
6.	**3.2.S.7.3**	Justification of the stability of the drug substance at 25˚C±2˚C/ 60%RH±5%RH. In case where the real time stability data of the drug substance is conducted at 25˚C±2˚C/60%RH±5%RH,	Revised Stability Data of new batches is provided

		The firm shall submit the record of data logger for the storage condition throughout the transportation.	
7.	**3.2.S.4.1**	Specification assay limit is mentioned as 97-103% but in USP the limit is from 90-120%.	According to **USP 42 NF 37** Acceptance criteria limit for Cholecalciferol material is 97-103%.Copy of USP monograph is provided for reference.
8.	**3.2.P.1**	In composition no Overage is mentioned in this section.	Overage was reflecting in the amount of API /unit, however composition with overage details is provided.
9.	**2.3.P.3.2**	In 2.3.P.3.2 batch formula it is mentioned that after 6 month of accelerated and real time stability studies product is stable so overage will be omitted during commercial validation batches but in the assay, there is a steady decrease in assay limit. Justification is needed about this statement.	Vitamins generally have tendency to degrade. As vitamin D3 is photolytic, thermally unstable and have oxidative nature but at the same time it is a fat-soluble vitamin and more stable with Crodamol Oil, because of this property product show no significant change in assay as defined in guideline.
10.	**3.2.A and 3.2R**	Appendices and regional information is missing.	Appendices and regional information as per approved checklist of 296th DRB is attached.
11.	**3.2.P.8**	Justify the result of Assay as all the batches just showed minor decrease in assay results less than which is usually observed in vitamin preparations. Scientific Justification/clarification is required in this regard.	Vitamins generally have tendency to degrade. As vitamin D3 is photolytic, thermally unstable and have oxidative nature but at the same time it is a fat-soluble vitamin and more stable with Crodamol Oil, because of this property product show no significant change in assay as defined in guideline.
12.	**3.2.P.2.1.1**	As As per relevant guidelines & structure of Form 5F, Comparative assay Pharmaceutical equivalence has to be performed at the time formulation development, while according to your submitted data, it has been performed after commencing stability studies. Justification shall be submitted.	Owing to the prevailed condition of covid throughout the world We had performed PE after formulation development due to unavailability of the Innovator pack. So, as per the need of hour or to overcome this challenge we deviated from the chronological flow. However, we confirm that this deviation will not be repeated.

Decision of 316:

Deferred for the following

The applied product's monograph is present in BP but the specification and methods applied are not according to BP monograph.

Remarks of evaluator VII

In BP monograph method given for assay analysis is by UV spectroscopy while invid-3 was tested by more stringent HPLC method. As a matter of fact, HPLC method exhibited the advantage of high precision and high recovery and high sensitivity

Decision of 321st meeting: Deferred for comparative analysis of drug product specification proposed by the applicant and those recommended by BP monograph of Vitamin D3 injection.

22.	Name, address of Applicant / Marketing Authorization Holder	M/s Valor Pharmaceuticals, 124/A Industrial Triangle, Kahuta Road Islamabad.

Remarks of Evaluator [VII]:

S No	Section #.	Deficiencies	Replies
1.	1.6.5	Valid Drug Manufacturing License issued by the relevant regulatory authority of country of origin is needed	Drug Manufacturing License # 000496 Valid till 3-2022 issued by the DRAP to valor pharma is provided
2.	***3.2.P***	In Pharmaceutical equivalence submit date of analysis, the comparison of the developed formulation was made by using local product viracure of Atco when innovators product by Novartis is available in Pakistan.	As Famvir of Novartis was not available immediately at time of comparative equivalence studies so therefore Viracure of Atco was used. In both the samples and reference products showed more than 85% dissolution are with in first 15 minutes so results are satisfactory
3.	3.2.P.4.5	Regarding query that Excipients of Human or Animal Origin shall be addressed for the use of "Magnesium stearate" in the applied formulation For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. the firm provided the certificate from "Peter geven" that this magnesium stearate is from plant source	The firm provided the certificate showing that the magnesium stearate is of plant origin.
4.		Composition is different from reference product of USFDA	In innovators formulation sodium lauryl sulphate is not included
5.	***2.3.P.4***	Control of excipients is missing	Provided
6.	***3.2.P.3.4***	Tests and acceptance criteria should be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing	Provided

		process, to ensure that the process is controlled	
7.	3.2.P.5.4	In the specifications of coated tablets for batch T-008 is mentioned as USP but the tablet is not available in monograph	It was a typographical error which is corrected to innovators specification
8.	***3.2.P.6***	COA of primary / secondary reference standard including source and lot number shall be provided	Provided
9.	***3.2.P.8***	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is provided
10.	***3.2.P.8***	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers is provided

Decision of 316:

Deferred for the following

Submission of Comparative dissolution profile (CDP)

For the Clarification of difference in composition from the reference product and submission of compatibility study of excipients since the reference product doesn't contains sodium lauryl sulphate.

Remarks of evaluator:

Justification of Sodium Lauryl Sulphate (SlS) In Valofam 250mg Tablets Formulation

During product development we encountered a problem in the dissolution rate of VALOFAM 250MG TABLETS (Famciclovir), as Famciclovir base is used in the formulation, which has low solubility profile, therefore sodium lauryl sulphate 0.85% has been used in the master formulation to enhance the dissolution profile.

2. The allowable limit for SLS in tablet formulation is 0.5% - 2.5% w/w.
3. So therefore SLS was used according standard formulation protocols.
4. The documentary evidence of Hand book of Pharmaceutical excipients regarding SLS has been attached.
5. Excipients compatibility studies of **VALOFAM** (Famciclovir) 250mg Tablets, has been performed and submitted.

Submission of Comparative dissolution profile (CDP)

Submitted

Decision of 321st meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Approval status of product in Reference Regulatory Authorities.	Could not be confirmed
	Me-too status	Could not be confirmed
	GMP status	The firm has been issued GMP certificate on the basis of inspection dated 19.01.2019
	Remarks of the Evaluator	• Had applied for lotion, but the composition in master formula are API in oily base. Justify • The firm submitted Derma-Smoothe/FS® fluocinolone acetonide Topical Oil, 0.01% approved in USFDA as reference product. • The case was evaluated before notifications 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021, without considering the changes for fee as per the said notifications.
	Deferred for following: • **Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.** • **Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board.**	
359.	Name and address of manufacturer/ Applicant	M/s Shrooq Pharmaceuticals Pvt Ltd. 21-km Ferozpur Road, Lahore, Pakistan
	Brand Name + Dosage Form + Strength	Mebewin MR Capsule
	Composition	Each extended release capsule contains: Mebeverine HCl (pellets)……200mg

	Diary No. Date of R & I & fee	Dy. No. 14950; 07.03.2019 PKR. 20,000/-; 07.03.2019
	Pharmacological Group	Synthetic anticholinergics, esters with tertiary amino group
	Type of Form	Form 5
	Finished product Specification	The firm has claimed manufacturer's specifications.
	Pack size & Demanded Price	as per SRO
	Approval status of product in Reference Regulatory Authorities.	COLOFAC® MR 200mg Capsules. **MHRA** approved
	Me-too status	Mebrest-200 Capsule. Reg. No. 80547
	GMP status	The firm has been issued GMP certificate on the basis of inspection dated 19.01.2019
	Remarks of the Evaluator	• The firm revised Mebeverine as HCl to Mebeverine HCl in the dossier. • The source of pellets is Vision Pharmaceuticals, Islamabad. • The case was evaluated before notifications 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021, without considering the changes for fee as per the said notifications.
	Decision: Approved with Innovator's specifications. Registration letter will be issued after submission of fee of Rs. 30,000/- for correction/pre-approval change in the specifications as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021. • **Firm will also submit latest GMP certificate/last inspection report conducted within last three years.**	
360.	Name and address of manufacturer/ Applicant	M/s Shrooq Pharmaceuticals Pvt Ltd. 21-km Ferozpur Road, Lahore, Pakistan
	Brand Name + Dosage Form + Strength	Hepa-Zerm Sachet
	Composition	Each Sachet contains: L-Ornithine-L-Asperate……..…3g
	Diary No. Date of R & I & fee	Dy. No. 14954; 07.03.2019 PKR. 20,000/-; 07.03.2019
	Pharmacological Group	Liver therapy mentioned as ornithine oxoglurate salt
	Type of Form	Form 5
	Finished product Specification	The firm has claimed manufacturer's specifications
	Pack size & Demanded Price	5's; as per SRO
	Approval status of product in Reference Regulatory Authorities.	Hepa-Merz Sachet containing ornithine aspartate (granules for solution). **AGES** approved
	Me-too status	Lolar Sachet. Reg. No. 76499
	GMP status	The firm has been issued GMP certificate on the basis of inspection dated 19.01.2019
	Remarks of the Evaluator	• The firm applied for powder for solution. The reference product is granules for solution. The firm revised the manufacturing outlines to granules. The case was evaluated before notifications 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021, without considering the changes for fee as per the said notifications.
	Decision: Approved with Innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7500/- for correction/pre-approval change in the specifications as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021. • **Firm will also submit latest GMP certificate/last inspection report conducted within last three years.**	
361.	Name and address of manufacturer / Applicant	M/s Iqra Pharmaceuticals. Plot No. 02, Street No. S-9, National Industrial Zone, Rawat, Islamabad, Pakistan
	Brand Name + Dosage Form + Strength	Opidol 100mg/2ml Injection
	Composition	Each 2ml ampule contains: Tramadol hydrochloride……..…100mg

	Diary No. Date of R & I & Fee	Dy No. 15610: 07.03.2019 Rs. 20,000/-: 07.03.2019
	Pharmacological Group	Other opioids
	Type of Form	Form-5
	Finished Product Specification	The firm has claimed in-house specifications
	Pack Size & Demanded Price	2mlx10's;, 2mlx30's; as per SRO
	Approval Status of product in Reference Regulatory Authorities	Tramadol 50mg/ml Solution for Injection or Infusion (2ml). MHRA approved
	Me-too Status	Welmadol Injection (2ml). Reg. No. 52629 (deos not show ampule or vial)
	GMP Status	The firm was inspected on 22.06.2020 with the following conclusion: In light of above the firm can be rated as complying GMP standards as per Schedule B-II of Drugs (LR&A) Rules, 1976. However, cGMP is a continual process of improvement for which the above stated points of improvement have been agreed upon by the management.
	Remarks of the Evaluator	•
	Pervious decision	The Board in its 289th meeting deferred the case for consideration on its turn as neither Narcotic or Psychotropic as per INCB
	Evaluation by PEC	The case was evaluated before notifications 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021, without considering the changes for fee as per the said notifications.
	Decision: Approved with Innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7500/- for correction/pre-approval change in the specifications as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021. • **Firm will also submit latest GMP certificate/last inspection report conducted within last three years.**	
362.	Name and address of manufacturer / Applicant	M/s Iqra Pharmaceuticals. Plot No. 02, Street No. S-9, National Industrial Zone, Rawat, Islamabad, Pakistan
	Brand Name + Dosage Form + Strength	Nilbo 10mg/ml Injection
	Composition	Each ml contains: Nalbuphine hydrochloride……..….10mg
	Diary No. Date of R & I & Fee	Dy No. 15609: 07.03.2019 Rs. 20,000/-: 07.03.2019
	Pharmacological Group	Morphinan derivatives
	Type of Form	Form-5
	Finished Product Specification	The firm has claimed manufacture's specifications.
	Pack Size & Demanded Price	2x5 ampule PVC contour cellular package 1 contour cellular in a carton box.
	Approval Status of product in Reference Regulatory Authorities	NUBAIN (Nalbuphine Hydrochloride) Injection, 10 mg/mL (1ml ampule). Health Canada approved
	Me-too Status	Nalburax Injection. Reg. No. 28830 (deos not show ampule or vial)
	GMP Status	The firm was inspected on 22.06.2020 with the following conclusion: In light of above the firm can be rated as complying GMP standards as per Schedule B-II of Drugs (LR&A) Rules, 1976. However, cGMP is a continual process of improvement for which the above stated points of improvement have been agreed upon by the management.
	Remarks of the Evaluator	• Clarification is required about the pack size.

	Pervious decision	The Board in its 289th meeting deferred the case for consideration on its turn as neither Narcotic or Psychotropic as per INCB
	Evaluation by PEC	The case was evaluated before notifications 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021, without considering the changes for fee as per the said notifications.
	Decision: Approved with Innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7500/- for correction/pre-approval change in the specifications as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021. • **Firm will also submit latest GMP certificate/last inspection report conducted within last three years.**	

Case no. 02 Registration applications for local manufacturing of (veterinary) drugs

a. New Cases

363.	Name and address of manufacturer / Applicant	M/s Selmore Pharmaceuticals Pvt Ltd. 36-Km, Multan Road Lahore.
	Brand Name +Dosage Form + Strength	Oxy LA 30% Injection IM
	Composition	Each ml Contains: Oxytetracycline HCl Eq. To Oxytetracycline……..300mg
	Diary No. Date of R& I & fee	Dy. No. 12778 dated 06.03.2019 Rs. 20,000/- dated 06.03.2019
	Pharmacological Group	Tetracyclines
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed in-house specifications.
	Pack size & Demanded Price	100ml; decontrolled.
	Reference / Me-too status	Alamycin LA 300 mg/ml (as dihydrate) Solution for Injection (100ml, 250ml, 500ml amber color glass). HRPE approved.
	GMP status	The firm was inspected on 05-03-2018,17-08-2018 & 16-10-2018, where renewal of DML was recommended.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated. • The reference product contains Magnesium Oxide, Dimethylacetamide, Sodium formaldehyde Sulphoxylate, Water for Injections
		• Revised the pharmacological group to Tetracyclines. • The mentioned excipients were not as per the reference product. Revised them. • As per the reference product mentioned above, the firm was asked to revise "Oxytetracycline HCl Eq. To Oxytetracycline…300mg" to "Oxytetracycline …300mg" The firm revised it to tetracycline and adjusted its weight in master formula. The firm submitted the reference (Reg. No. 52310) with label claim of Each ml contains Oxytetracycline as HCl…300mg • Lidocaine HCl is an API, which is not present in the reference product. The firm added it in the excipients. Removed it. • Submitted Rs. 30000 (challan-20699544116).
	Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021	

364.	Name and address of manufacturer / Applicant	M/s Selmore Pharmaceuticals Pvt Ltd. 36-Km, Multan Road Lahore.
	Brand Name +Dosage Form + Strength	Oxy LA 30% Injection IM
	Composition	Each ml Contains: Oxytetracycline HCl Eq. To Oxytetracycline……..…300mg
	Diary No. Date of R& I & fee	Dy. No. 12777 dated 06.03.2019 Rs. 20,000/- dated 06.03.2019
	Pharmacological Group	Tetracyclines
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed in-house specifications.
	Pack size & Demanded Price	50ml; decontrolled.
	Reference / Me-too status	Alamycin LA 300 mg/ml (as dihydrate) Solution for Injection (100ml, 250ml, 500ml amber color glass). HRPE approved.
	GMP status	The firm was inspected on 05-03-2018,17-08-2018 & 16-10-2018, where renewal of DML was recommended.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated. • The reference product contains Magnesium Oxide, Dimethylacetamide, Sodium formaldehyde Sulphoxylate, Water for Injections.
		• Revised the pharmacological group to Tetracyclines. • The mentioned excipients are not as per the reference product. Revised them. • As per the reference product mentioned above, the firm was asked to revise "Oxytetracycline HCl Eq. To Oxytetracycline…300mg" to "Oxytetracycline …300mg" The firm revised it to tetracycline and adjusted its weight in master formula. The firm submitted the reference (Reg. No. 88833) with label claim of Each ml contains Oxytetracycline as Hcl…300mg (50ml) • Lidocaine HCl is an API, which is not present in the reference product. The firm added it in the excipients. Removed it. • Submitted Rs. 30000 (challan-54144206459)
	Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021	
365.	Name and address of manufacturer / Applicant	M/s Selmore Pharmaceuticals Pvt Ltd. 36-Km, Multan Road Lahore.
	Brand Name +Dosage Form + Strength	Vital 4 Solution
	Composition	Each 1000ml Contains: Vitamin A……..…30,000,000 IU Vitamin D3……..…1,000,000 IU Vitamin E……..…5,000mg Vitamin K3……6,000mg
	Diary No. Date of R& I & fee	Dy. No. 12782 dated 06.03.2019 Rs. 20,000/- dated 06.03.2019
	Pharmacological Group	Multivitamins
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed in-house specifications.
	Pack size & Demanded Price	500ml, 1000ml, 5000ml; decontrolled.
	Reference / Me-too status	Adekbar Oral Liquid. Reg. No. 73950

	GMP status	The firm was inspected on 05-03-2018,17-08-2018 & 16-10-2018, where renewal of DML was recommended.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Justify the capacity of one-liter water to accommodate Vitamin A…30,000,000 IU, Vitamin D3…1,000,000 IU, Vitamin E…5,000mg and Vitamin K3…6,000mg. the firm submitted the quantity to be Vitamin A…17.64g, Vitamin D3…25mg, Vitamin E…5,000mg and Vitamin K3…6,000mg • You have applied for solution. Justify the solubility of water insoluble vitamins in water. The firm submitted that these are emulsified with tween-80. • The quantity of APIs in master formula are not in line with the label claim. The firm revised the master formula accordingly. • Submitted Rs. (challan-70559611534)
	Decision: Deferred for following; • **Justification of applied strength of formulation considering the solubility of each drug substance in terms of mg/ml.** • **Justification for the proposing formulation of water insoluble vitamins in water.**	

Case no. 06 Registration applications of drugs submitted on Form 5F
a. Deferred cases

366.	Name, address of Applicant / Marketing Authorization Holder	M/s Cure Laboratories (Pvt.) Ltd. Plot # 11-12, Street # NS-2, National Industrial Estate, Rawat, Islamabad.
	Name, address of Manufacturing site.	M/s Cure Laboratories (Pvt.) Ltd. Plot # 11-12, Street # NS-2, National Industrial Estate, Rawat, Islamabad.
	Status of the applicant	☒Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 29080 Dated: 01/09/2021
	Details of fee submitted	PKR 30,000/- Dated: 05/07/2021
	The proposed proprietary name / brand name	CURAW 100MG SR CAPSULES
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule Contains: Diclofenac sodium (as enteric coated pellets 32%)……100mg
	Pharmaceutical form of applied drug	Oral Capsules
	Pharmacotherapeutic Group of (API)	NSAIDS (Non-Steroidal Anti-Inflammatory Drugs)
	Reference to Finished product specifications	BP
	Proposed Pack size	1x10's & 1x20's
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	DICLOMAX RETARD® (Diclofenac Sodium) 100mg Capsules MHRA APPROVED. Manufacturers: Almac Pharma Services Limited Almac House 20, Seagoe Industrial Estate, Craigavon, BT63, 5QD, UK Mipharm SpA Via Bernardo Quaranta, 12 20141-Milan, Italy.
	For generic drugs (me-too status)	Visodic SR 100mg Capsules Vision Pharmaceuticals (Pvt.) Ltd. (Reg.# 078171)
	GMP status of the Finished product manufacturer	Two additional sections granted by Licensing Division by Letter No. F-1-13/2017-Lic. Dated: 08th October 2020.
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot # 22-23, Industrial Triangle, Kahutta Road, Islamabad, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its Validation/verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Diclofenac Sodium is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Stability Batches: (DE-322, DE-325, DE-329)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures as per BP and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Visodic 100mg SR Capsules by Vision Pharmaceuticals (Pvt.) Ltd. by performing quality tests (Description, Identification, Avg. Weight, Dissolution, and Assay, as per BP Monograph). CDP is with the Same Brand Visodic 100mg SR

		Capsules by Vision Pharmaceuticals (Pvt.) Ltd. at three pH Acid (1.2), Acetate Buffer (4.5) & Phosphate Buffer (6.8). and also the similarity factor (f2) is calculated
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot # 22-23, Industrial Triangle, Kahutta Road, Islamabad, Pakistan.		
API Lot No.	DE703ER		
Description of Pack (Container closure system)	White to off white colored, spherical, sustained release pellets filled in Natural/ Natural capsule shells of Size# 1.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 12 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9,12 (Months)		
Batch No.	C-013	C-014	C-015
Batch Size	720 Capsules	720 Capsules	720 Capsules
Manufacturing Date	03-2020	03-2020	03-2020
Date of Initiation	30-03-2020	30-03-2020	30-03-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Seven Products are approved in 307th Meeting of Registration Board with stability Data. Loxiten 20mg Capsules, Loxiten 30mg Capsules, Loxiten 60mg Capsules, Omexa 20mg Capsules, Omexa 40mg Capsules, Lansasure 15mg Capusles and Lansasure 30mg Capsules.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Vision Pharmaceuticals (Pvt.) Ltd. Semi Basic (000816) has a GMP Certificate No. 3-26/2019-Adl.Dir.(QA & LT-I) Dated: 25th February 2019. Valid Till: 10th February 2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The Material is locally purchased from Vision Pharmaceuticals (Pvt.) Ltd. Islamabad, Pakistan.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

	Shortcomings	**Reply of the firm**
2.3.P.1	• You have claimed in-house specifications and have mentioned BP specifications in the stability	This was a typo mistake. It should be BP specifications. Correction is attached

	summary sheets. Justification is required. • You have mentioned the quantity per tablet. Justification is required. • The quantity of pellets per unit has been mentioned as 319mg. against 312.5mg. Justification is required. • You have not adjusted the potency of the pellets in the BMR. Justification is required.	This was a typo mistake. It should be BP specifications. Correction is attached The firm submitted that the calculation was based on 3% water content with potency adjustment. However, the water content in the COA of the firm is 4.1%.
	The dissolution testing method for pellets is not clear and not legible. Clarification is required.	The firm submitted the dissolution testing method of the pellets manufacturer, which does not contain acid resistance test as mentioned in the earlier submitted method.
3.2.S.4.3	• The drug product manufacturer shall submit their method validation protocol for the drug substance in section 3.2.S.4.3. • The specificity in the absence of impurity(es) shall be justified. • The drug substance (pellets) contains excipients. The ICH Q2 guidelines states that": "*Several methods for determining accuracy are available:* *a) application of the analytical procedure to synthetic mixtures of the drug product components to which known quantities of the drug substance to be analysed have been added;* *b) in cases where it is impossible to obtain samples of all drug product components, it may be acceptable either to add known quantities of the analyte to the drug product or to compare the results obtained from a second, well characterized procedure, the accuracy of which is stated and/or defined.*" • Justify the samples for accuracy (recovery) studies in the light of the above statement. The drug product manufacturer shall also clarify the term "placebo of diclofenac sodium capsules" used. • Moreover, the ICH Q2 guidelines states that "*the range of an analytical procedure is the interval between the upper and lower concentration (amounts) of analyte in the sample (including these concentrations) for which it has been demonstrated that the analytical procedure has a suitable level of precision, accuracy and linearity*". You have used different extremes for the precision, accuracy	Not submitted. It is true that specificity in the absence of impurities could not be justified. Mistakenly written as placebo, what I have done is crushed the pellets and added a known amount of API. Protocol/method of spiking is missing. The firm could not justify the same.

	and linearity parameters. Justification is required. • The ICH Q2 guidelines states "*the robustness of an analytical procedure is a measure of its capacity to remain unaffected by small, but deliberate variations in method parameters and provides an indication of its reliability during normal usage*". Such variations include: - influence of variations of pH in a mobile phase; - influence of variations in mobile phase composition; - different columns (different lots and/or suppliers); - temperature; - flow rate; - change in wavelength of the detector You have tested six samples (each) of filtered and centrifuged solutions. Justification is required. • Typical variations to be studied for intermediate precision include days, analysts, equipment, etc. The use of an experimental design (matrix) is encouraged. The firm has submitted data of two analysts without considering other variations. Justification is required.	The firm used UV method, but did not test the effect of change of wavelength. Variation of equipment could not be followed as only single UV spectrophotometer is available.
3.2.S.4.5	Justifications of specifications for dissolution test for the drug substance shall be submitted.	We have claimed in-house specs and followed the method of pellets manufacturer.
3.2.P.2.2.1	• Submit the proof of procurement of the innovator product, i.e., Visodic 100mg capsules for CDP studies, and approval status of the product. • You have performed CDP on 06 capsules justification is required. • The acid retain test in dissolution test shall be clarified. • The WHO annexure 7 specifies that "For extended-release FPPs the time-points should be set to cover the entire duration of expected release, e.g. in addition to earlier time-points: samples at 1, 2, 3, 5 and 8 hours should be collected for a 12-hour release. You have conducted CDP for 2 h in phosphate buffer. Justification is required. • You have not mentioned the potency of the working standard in the calculation formula of percent drug release. • Submit the calculated similarity factor and all calculation thereof.	No data is available because it is a local purchase. We will be careful next time. The release at acid stage is almost negligible. we have used timepoint as adopted by pellets manufacturer. 100% potency was mentioned. Consider it as typo mistake. Not submitted.

	• The buffer has pH value of 7.2 in the CDP method, while it 6.8 in the results, Justification is required.	It is typo mistake consider it as 6.8
3.2.P.3.3	• The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. • A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified.	Not submitted. Not submitted
3.2.P.3.4	Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled.	Not submitted
3.2.P.4.2	Copies of analytical procedures of non-compendial excipient shall be submitted.	We did not use any excipient. The firm did not consider gelatin capsule as excipient.
3.2.P.4.3	Validation information for the analytical procedures for in-house standard excipients shall be submitted	In-house standard excipients were used.
3.2.P.4.4	Justification of specifications of the gelatin capsules is required.	The firm submitted the justification for specification as in-house.
3.2.P.4.5	For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE.	No animal or human origin excipients were used, the firm did not confirm the source of gelatin.
3.2.P.5.2	• The formula of assay and dissolution in terms of dilutions is not in line with the testing method. Clarification is required. • Water content test has not been performed. • The method for weight variation test has not been included in the testing method of the drug product. • The method for dissolution test has not been included in the testing method of the drug product	The firm did not justify the same. This is an un-official test. This is an un-official test We performed the testing as per BP specifications, which allows to adopt any suitable method. The dissolution test was performed as per pellets manufacturer specification.
3.2.P.5.6	• Justifications of specifications for dissolution test shall be submitted.	We performed the testing as per BP specifications, which allows to adopt any suitable method. The dissolution test was performed as per pellets manufacturer specification.
3.2.P.8	• Moreover, some values have been mentioned in the calculations, which are not clear w.r.t. the calculation formula. Clarification is required.	The firm again submitted the calculation, which could not be understood. It is pertinent to mention that the firm has used 900ml of dissolution medium, which is depicted in the calculation.

	• The potency of the working standard is 99.4%. Justify the 100% potency of the reference standard (having water content) used in the analyses. • You have not performed the impurity testing. You shall provide a discussion and justification for incomplete analyses of the drug product.	Not justified. We were unable to arrange the impurity standards. We requested the pellets manufacturer to arrange the same, who told they are working impurities and once it is complete they will provide all the data and standards.
	Submit audit trail report and record of digital data loggers	The firm submitted the record of temperature and humidity but did not submit audit trail report.
	The dissolution testing method has not been validated.	

S. No	Explanation / background	Previous decision (M-316): The case was deferred for:	Reply submitted
I.	The quantity of pellets per unit has been mentioned as 319mg. against 312.5mg. and potency of the pellets not adjusted in the BMR. Upon justification, the firm submitted that the calculation was based on 3% water content with potency adjustment. However, the water content in the COA of the firm is 4.1%.	Clarification of water content in the COA of the drug substance.	Initially we have performed Water Content Test on Karl Fisher at that time Karl Fisher was not performing well due to some technical error. Then we have sent the Karl Fisher for repairing to the supplier. When we received Karl Fisher after repairing we again performed Water Content test on 24-03-2020 before dispensing of Trial Batches for potency adjustment and we have adjusted potency of active material on the basis of this report. The copy of report is attached.
		Submission of calculation sheets.	Submitted
II.		Submission of audit trail record.	We have BP Monograph (Diclofenac Sodium Prolonged Release Capsules) for Testing of Curaw (Diclofenac Sodium) 100mg SR Capsules. The method for Assay and Dissolution mentioned in BP Monograph is on UV Spectrophotometer (BP Monograph attached). Therefore, there is no audit trail option

			available on our UV Spectrophotometer.
III.		Validation studies of dissolution testing method	Submitted with the same diffeicnecy as mentioned for assay validation.
IV.	The potency of the working standard used in all calculations is 99.4%. The firm was previously asked to justify the 100% potency of the reference standard (having water content) used in the analyses. Moreover, in a query related to dissolution method (as adopted from pellets manufacturer) for not mentioning the potency factor, the firm submitted for dissolution data 100% potency was mentioned. Consider it as typo mistake.	Justification of 100% potency of the working standard against 99.4% (having water content).	We have standardized the working standard supplied by the API Manufacturer internally and adjusted the potency of working standard as 100%.
V.	The water content test for drug product is not mentioned in the BP specification; however, it is a part of the pellet testing. Therefore, the firm was asked for this test for the capsules.	Justification for not performing the Water content test	We have applied BP monograph for the finished product (Curaw) analysis and the BP monograph does not show any water content test for the finished product. That's why we haven't performed water content test.
VI.	Method was not submitted previously	The method for weight variation test.	Submitted
VII.	The specificity in the absence of impurity(es) shall be justified. The firm previously submitted that It is true that specificity in the absence of impurities could not be justified.	Justification for specificity in the absence of impurities.	We are unable to arrange Impurity Standards form API Supplier. We have intimated Vision Pharmaceuticals to provide us impurity standards but they didn't provide the standards. Therefore, we have performed specificity without any impurity standards. We are requesting you to kindly consider this time we will be careful in future.
VIII.	The firm has used gelatin capsules	Certificate, confirming that the excipient(s) are free from BSE and TSE.	The capsule shell manufacturer did not provide the same. We will submit it before manufacturing of commercial batches,
IX.	The firm has used gelatin capsules	Halal certificate for gelatin.	Submitted
X.		Submission of details and proof of procurement of the	We are unable to arrange innovator product for Curaw

		innovator product for CDP studies.	100mg SR Capsules therefore we have performed CDP and Pharmaceutical Equivalence with Local Brand in Pakistan i.e. Visodic 100mg Capsules Manufactured by Vision Pharmaceuticals Islamabad. This product (Visodic 100mg Capsules) Registration # 078171, and is being manufactured by Vision Pharmaceuticals (Pvt.) Ltd. Model town Humak Islamabad. No procurement data available because it is a local purchase.
XI.	The firm did not submit clear calculations for CDP and the submitted data depicts that they did not perform CDP studies as per the ICH guidelines. They have tested the capsules separately at: i. pH 1.2 for 1 h; ii. pH 4.5 for 2 h and 8 h, and iii. pH 6.8 for 2 h and 8 h, and has applied formula for similarity factor on the combined data.		

Decision. Approved. Registration letter will be issued after submission of CDP results with the innovator drug product.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 01: Routine Registration applications of Human Drugs on Form 5F (Local)

367.	Name, address of Applicant / Marketing Authorization Holder	The Searle Company Limited., F-319, S.I.T.E., Karachi, Pakistan.
	Name, address of Manufacturing site.	The Searle Company Limited., F-319, S.I.T.E., Karachi, Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23846 dated 31/08/2021
	Details of fee submitted	PKR 75,000/-: dated 03/08/2021
	The proposed proprietary name / brand name	Bacetam 25mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Brivaracetam…….……25 mg
	Pharmaceutical form of applied drug	Tablets
	Pharmacotherapeutic Group of (API)	Anti-Epileptic
	Reference to Finished product specifications	**In house**
	Proposed Pack size	As per DPC
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	BRIVIACT (10mg, 25mg, 50mg, 75mg, 100mg) tablets USFDA Approved
	For generic drugs (me-too status)	Brivatam 25mg tablet by M/s CCL Pharmaceuticals (Reg#109738)
	GMP status of the Finished product manufacturer	The firm has submitted GMP certificate issued on 13th august 2020 based on inspection conducted on 11th July 2019
	Name and address of API manufacturer.	Chengda Pharmaceuticals Co., Ltd., No. 36, Huanghe Road, Huimin Subdistrict, Jiashan, Zhejiang, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related

		substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: ***Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months*** Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (NP1713-1907002, NP1713-1908003, NP1713-1909004)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product BRIVIACT 25mg Tablet of M/s UCB Pharma Ltd., 208 bath road, Slough, Berkshire, SL13WE, United Kingdom by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is BRIVIACT 25mg Tablet in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The CDP of Bacetam 25mg Tablet and BRIVIACT 25mg Tablet Show Equivalence. The % release of API in 15 minutes in all three mediums is more than 85%. Hence the drug product is categorized as very rapidly dissolving drug and there is no need to calculate F2 value.
	Analytical method validation/verification of product	Firm have submitted method validation studies including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Chengda Pharmaceuticals Co., Ltd., No. 36, Huanghe Road, Huimin Subdistrict, Jiashan, Zhejiang, China.		
API Lot No.	NP1713-1908003		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	20PD-205	20PD-206	20PD-207
Batch Size	2500 Tablets	2500 Tablets	2500 Tablets
Manufacturing Date	Aug-2020	Aug-2020	Aug-2020
Date of Initiation	Sep-2020	Sep-2020	Sep-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Tapendol tablets 50mg, Tapendol tablets 75mg and Tapendol tablets 100mg. Inspection date: 11th March, 2019 The report shows that: The HPLC software is 21 CFR compliant. The firm has software for monitoring of stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. 388b/17 issued by National Pharmaceutical Regulatory Agency, Ministry of Health Malaysia issued on 17/Oct/2017 based on inspection conducted on 18-20 July 2017. ***(Validity three years)*** Firm has also submitted copy of DML No#Zhe20100526 of M/s Chengda Pharmaceuticals Co., Ltd., issued by Zhejiang Provincial Drug Administration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 i.e. License to import Raw material for manufacturing Trial Examination, test or Analysis for 2.5kg of drug substance Brivaracetam attested by AD (I&E) DRAP Karachi
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted compliance Record of HPLC software 21CFR & audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4	Submit latest GMP inspection report conducted with in last three years	The firm has submitted latest GMP inspection report. The firm was inspected on 07-05-2020 and conclusion of inspection was: Based on the area visited, documents/SOPs and system reviewed, commitment of the firm for continuous improvement and people met, it is concluded that the firm is operating at a Good level of GMP compliance.
1.6.5	Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	The firm have submitted written confirmation for active substance exported to EU to M/s Chengda Pharmaceuticals Co., Ltd., No. 36, Huanghe Road, Huimin Subdistrict, Jiashan, Zhejiang, China for Active substance Brivaracetam issued by Zhejiang Food and Drug Administration China confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices.
3.2.S.4.2	The ratio of mobile phase used for assay of drug substance by drug product manufacturer (Mobile phase A; Phosphate Buffer 95: Acetonitrile	The firm submitted that we have used the same method as provided and used by the drug substance manufacturer but the way of writing is tabular form and mistakenly marked as gradient

	05 and mobile phase B; ACN) is different than that used by drug substance manufacturer (Phosphate Buffer 80: Acetonitrile 20), clarify? Furthermore, the drug substance manufacturer has followed isocratic elution while drug product manufacturer has followed gradient elution, clarify? •	elution instead of isocratic elution. ***However, the ratio of mobile phase is different from the drug substance manufacturer.***
3.2.P.6	Submit readable copy of COA of primary / secondary reference standard including source and lot number shall be provided.	The firm have submitted certificate of analysis of reference standard from M/s Chengda Pharmaceuticals Co., Ltd., China.
3.2.P.8	• Stability study at initial time point is not submitted • Submit Raw data sheets & analytical record for both assay & dissolution test containing detail of sample preparation, standard preparation and calculation formula for various performance parameters. • COA of API batch no. NP1713-1908003 is provided in batch analysis while in stability study batch no. NP1713-1908005 of API is mentioned, clarify which API was used in stability study • Submit readable copy of commercial invoice	• The firm have submitted stability study at initial time point • The firm have submitted submit Raw data sheets for both assay & dissolution test containing detail of sample preparation, standard preparation and calculation formula for various performance parameters. • The firm submitted that we have imported and used only one batch of API Brivaracetam having Batch No. NP1713-1908003 in the manufacturing of stability batches. It was a typographical error in stability protocol. • Firm has submitted readable copy of Commercial Invoice No: C05S05ZEP191224 Date: JAN 22, 2020 for 2.5kg of drug substance Brivaracetam attested by AD (I&E) DRAP Karachi on 28-02-2020

Time	Mobile phase A (%)	Mobile phase B (%)
0	80	20
15	80	20

Decision: Approved with innovators specifications.

- **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Inspection date: 11th March, 2019 The report shows that: The HPLC software is 21 CFR compliant. The firm has software for monitoring of stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. 388b/17 issued by National Pharmaceutical Regulatory Agency, Ministry of Health Malaysia issued on 17/Oct/2017 based on inspection conducted on 18-20 July 2017. ***(Validity three years)*** Firm has also submitted copy of DML No#Zhe20100526 of M/s Chengda Pharmaceuticals Co., Ltd., issued by Zhejiang Provincial Drug Administration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 i.e. License to import Raw material for manufacturing Trial Examination, test or Analysis for 2.5kg of drug substance Brivaracetam attested by AD (I&E) DRAP Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted compliance Record of HPLC software 21CFR & audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)
Remarks of Evaluator [XI]:		
Decision: Approved with innovators specifications.		

• **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Details of fee submitted	PKR 75,000/-: dated 03/08/2021
	The proposed proprietary name / brand name	Bacetam 100mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Brivaracetam…….……100 mg
	Pharmaceutical form of applied drug	Tablets
	Pharmacotherapeutic Group of (API)	Anti-Epileptic
	Reference to Finished product specifications	**In house**
	Proposed Pack size	As per DPC
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	BRIVIACT (10mg, 25mg, 50mg, 75mg, 100mg) tablets USFDA Approved
	For generic drugs (me-too status)	Brivatam 100mg tablet by M/s CCL Pharmaceuticals (Reg#109741)
	GMP status of the Finished product manufacturer	The firm has submitted GMP certificate issued on 13th august 2020 based on inspection conducted on 11th July 2019
	Name and address of API manufacturer.	Chengda Pharmaceuticals Co., Ltd., No. 36, Huanghe Road, Huimin Subdistrict, Jiashan, Zhejiang, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing

		process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: ***Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months*** Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (NP1713-1907002, NP1713-1908003, NP1713-1909004)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product BRIVIACT 100mg Tablet of M/s UCB Pharma Ltd., 208 bath road, Slough, Berkshire, SL13WE, United Kingdom by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is BRIVIACT 100mg Tablet in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The CDP of Bacetam 100mg Tablet and BRIVIACT 100mg Tablet Show Equivalence. The % release of API in 15 minutes in all three mediums is more than 85%. Hence the drug product is categorized as very rapidly dissolving drug and there is no need to calculate F2 value.
	Analytical method validation/verification of product	Firm have submitted method validation studies including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Chengda Pharmaceuticals Co., Ltd., No. 36, Huanghe Road, Huimin Subdistrict, Jiashan, Zhejiang, China.		
API Lot No.	NP1713-1908003

Date of Initiation	Sep-2020	Sep-2020	Sep-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Tapendol tablets 50mg, Tapendol tablets 75mg and Tapendol tablets 100mg. Inspection date: 11th March, 2019 The report shows that: The HPLC software is 21 CFR compliant. The firm has software for monitoring of stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. 388b/17 issued by National Pharmaceutical Regulatory Agency, Ministry of Health Malaysia issued on 17/Oct/2017 based on inspection conducted on 18-20 July 2017. ***(Validity three years)*** Firm has also submitted copy of DML No#Zhe20100526 of M/s Chengda Pharmaceuticals Co., Ltd., issued by Zhejiang Provincial Drug Administration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 i.e. License to import Raw material for manufacturing Trial Examination, test or Analysis for 2.5kg of drug substance Brivaracetam attested by AD (I&E) DRAP Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted compliance Record of HPLC software 21CFR & audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4	Submit latest GMP inspection report conducted with in last three years	The firm has submitted latest GMP inspection report. The firm was inspected on 07-05-2020 and conclusion of inspection was: Based on the area visited, documents/SOPs and system reviewed, commitment of the firm for continuous improvement and people met, it is concluded that the firm is operating at a Good level of GMP compliance.
1.6.5	Submit valid Good Manufacturing Practice (GMP) certificate / Drug Manufacturing License of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	The firm have submitted written confirmation for active substance exported to EU to M/s Chengda Pharmaceuticals Co., Ltd., No. 36, Huanghe Road, Huimin Subdistrict, Jiashan, Zhejiang, China for Active substance Brivaracetam issued by Zhejiang Food and Drug Administration China confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices.
3.2.S.4.2	The ratio of mobile phase used for assay of drug substance by drug product manufacturer (Mobile phase A; Phosphate Buffer 95: Acetonitrile	The firm submitted that we have used the same method as provided and used by the drug substance manufacturer but the way of writing is tabular form and mistakenly marked as gradient

<table>
<tr><td></td><td>05 and mobile phase B; ACN) is different than that used by drug substance manufacturer (Phosphate Buffer 80: Acetonitrile 20), clarify? Furthermore, the drug substance manufacturer has followed isocratic elution while drug product manufacturer has followed gradient elution, clarify?
<table><tr><td>Time</td><td>Mobile phase A (%)</td><td>Mobile phase B (%)</td></tr><tr><td>0</td><td>80</td><td>20</td></tr><tr><td>15</td><td>80</td><td>20</td></tr></table></td><td>elution instead of isocratic elution. However, the ratio of mobile phase is different from the drug substance manufacturer.</td></tr>
<tr><td>3.2.P.6</td><td>Submit readable copy of COA of primary / secondary reference standard including source and lot number shall be provided.</td><td>The firm have submitted certificate of analysis of reference standard from M/s Chengda Pharmaceuticals Co., Ltd., China.</td></tr>
<tr><td>3.2.P.8</td><td>• Stability study at initial time point is not submitted
• Submit Raw data sheets & analytical record for both assay & dissolution test containing detail of sample preparation, standard preparation and calculation formula for various performance parameters.
• COA of API batch no. NP1713-1908003 is provided in batch analysis while in stability study batch no. NP1713-1908005 of API is mentioned, clarify which API was used in stability study
• Submit readable copy of commercial invoice</td><td>• The firm have submitted stability study at initial time point
• The firm have submitted Raw data sheets for both assay & dissolution test containing detail of sample preparation, standard preparation and calculation formula for various performance parameters.
• The firm submitted that we have imported and used only one batch of API Brivaracetam having Batch No. NP1713-1908003 in the manufacturing of stability batches. It was a typographical error in stability protocol.
• Firm has submitted readable copy of Commercial Invoice No: C05S05ZEP191224 Date: JAN 22, 2020 for 2.5kg of drug substance Brivaracetam attested by AD (I&E) DRAP Karachi on 28-02-2020</td></tr>
</table>

Decision: Approved with innovators specifications.

- **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**Monticel Sachet 4mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sachet contains: Montelukast (as Sodium)……4mg
	Pharmaceutical form of applied drug	Powder for Oral use
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonist
	Reference to Finished product specifications	BP specification
	Proposed Pack size	14's and 28's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Singulair (4mg) oral granules USFDA Approved
	For generic drugs (me-too status)	Myteka 4mg Sachet by M/s Hilton Pharma (Reg#039695)
	GMP status of the Finished product manufacturer	Firm has submitted GMP certificate issued on 06-07-2020, based on inspection conducted on 09-06-2020
	Name and address of API manufacturer.	Zhejiang Tianyu Pharmaceutical Co., Ltd., No.15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China 317016
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of API as per zone IV-A conditions Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (11001-161001, 11001-161002, 11001-161003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence and comparative dissolution study against the comparator product i.e. Myteka Sachet 4mg by M/s Hilton Pharma. Pharmaceutical Equivalence have been conducted by performing quality tests (Assay, Dissolution and Uniformity of dosage form). Results of CDP studies have been submitted against the same brand in Pharmacopoeial Media (0.5% SLS) only. Release of both the test and reference product is more than 85% in hence no calculation of f2 factor is required.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product including specificity, accuracy, and precision.

STABILITY STUDY DATA

Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	15-04-2021	20-04-2021	20-04-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate of M/s Zhejiang Tianyu Pharmaceutical Co., Ltd., issued by China Food and Drug Administration valid till 14-03-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice No#TYI21009 dated 29-12-2020 for import of 60kg of Montelukast Sodium attested by AD (I&E) DRAP Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports on product testing

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time)

Remarks of Evaluator [XI]:

Section	Observations	Response
3.2.S.4	• Drug substance manufacturer has stated USP specifications while drug product manufacturer has stated USP/BP specifications, clarify? • Analytical procedure of drug substance by drug substance manufacturer shall be submitted • You have mentioned the use of Montelukast sodium working standard in analytical procedure during preparation of standard solution while pharmacopeia states the use of montelukast dicyclohexylamine reference standard, clarify?	• Analytical method and specifications of montelukast sodium in both pharmacopeia (BP/USP) are same, therefore both standards are mentioned on COA. Evidence is submitted. • Firm has submitted analytical procedure of drug substance by provided drug substance manufacturer • ***The firm submitted that montelukast sodium is readily available as raw material and used as working standard in routine testing after standardization against montelukast dicyclohexylamine (reference standard).***
3.2.S.5	Reference standard is montelukast dicyclohexylamine while working standard is montelukast sodium, clarify?	***Montelukast sodium (working standard) is used in routine testing, which is standardized against montelukast dicyclohexylamine (reference standard).***
3.2.P.2.1	• Clarification is required since the innovator product contain magnesium stearate in addition to other excipients while the applied product does not contain magnesium stearate. • Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product? • The results of comparative dissolution profile conducted in three BCS media across the physiological pH range along with calculation of similarity factor f2 shall be submitted and discussed	• The firm submitted that magnesium stearate is routinely used as lubricant in oral solid dosage form to improve flow characteristics of the product. ***The drug product is fine granular powder having satisfactory flow characteristics without the use of magnesium stearate. Moreover, addition of magnesium stearate causes haziness in solution prepared after reconstitution as observed in product development phase. That is why, the said excipient was not used.*** • Firm submitted that Pharmaceutical equivalence of the applied product has been performed against comparator product as per DRAP's guidance document (FAQs about form 5F) dated 28-01-21. • The firm submitted that comparative dissolution profile has been conducted in three BCS media (pH 1.2, 4.5 &6.8) and already submitted pharmacopeial method (0.5% SLS) & already submitted. ***Montelukast sodium did not show any response in the stated BCS media across physiological range (pH 1.2, 4.5 & 6.8) therefore it was not applicable to calculate similarity factor in those media (firm has submitted a few chromatograms for evidence). However, in pharmacopeial method both products showed more than 85% dissolution, therefore no calculation was required.***
3.2.P.3.2	The reference formulation states granules for oral suspension for applied formulation. Clarification is required in manufacturing process and process control whether granules will be prepared in-house or otherwise.	The firm submitted that the applied formulation is free flowing granular powder and is completely soluble after reconstitution for use. API is geometrically mixed with other excipients.

3.2.P.5	• You have mentioned the use of Montelukast sodium working standard in analytical procedure during preparation of standard solution while pharmacopeia states the use of montelukast dicyclohexylamine reference standard, clarify?	***The firm submitted that montelukast sodium is readily available as raw material and used as working standard in routine testing after standardization against montelukast dicyclohexylamine (reference standard).***
3.2.P.6	Reference standard is montelukast dicyclohexylamine while working standard is montelukast sodium, clarify?	***Montelukast sodium (working standard) is used in routine testing, which is standardized against montelukast dicyclohexylamine (reference standard).***
3.2.P.8	• Submit 6th month stability study data at both real time and accelerated conditions • Submit readable copy of commercial invoice • Compliance Record of HPLC software 21CFR shall be submitted • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)	• Firm has submitted 6th month stability study data at both real time and accelerated conditions • Firm has submitted readable copy of commercial invoice • The firm has submitted Compliance Record of HPLC software 21CFR • Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)

Decision: Deferred for Scientific justification for use of Montelukast sodium as reference standard in analytical procedures instead of Montelukast dicyclohexylamine specified by BP monograph.

Section	Observations	Response
1.3.4	Submit latest GMP inspection report conducted with in last three years	The firm has submitted latest GMP inspection report. The firm was inspected on 07-05-2020 and conclusion of inspection was: Based on the area visited, documents/SOPs and system reviewed, commitment of the firm for continuous improvement and people met, it is concluded that the firm is operating at a Good level of GMP compliance.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 31-07-2019 based on inspection conducted on 11-02-2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice #502094 dated 19-02-2019 for 1.2kg of Dexlansoprazole DDR Pellets 22.5% batch # DLP420 from Vision Pharmaceuticals Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of one batch only along with chromatograms, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time.

Remarks of Evaluator [XI]:

Section	Observations	Response
	• Submit valid DML as the submitted DML has been expired on 24-11-2021 • Submit latest GMP inspection report conducted with in last three years • Submit valid GMP certificate of drug substance manufacturer	• The firm have submitted valid copy of DML issued in name of M/s Magns Pharmaceuticals on 06/06/2022 • The firm have submitted GMP certificate issued on 13-04-2022 based on inspection conducted on 11-03-2022. • The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted Batch Manufacturing Record (BMR) for all the batches (T-003, T-004, T-005) of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>. ***Two more batches, Batch T-004 and T-005 was manufactured on 12/10/2021 and 15/10/2021 respectively while batch T-003 was manufactured on23/06/2019. The details of these two batches are incorporated in above table.***
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• ***Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is not submitted.*** • ***Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) is not submitted.***

3.2.P.2.2.1	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product. • Comparative dissolution profile against the innovator product shall be submitted	• ***No clarification is submitted. However pharmaceutical equivalence is again submitted. Test like content uniformity, loss on drying and identification are not performed.*** • ***The firm submitted that we have performed comparative study for assay and dissolution hence Comparative dissolution profile is not required***
3.2.P.4	• Justify the use of gelatine capsule shell in dexlansoprazole capsule since innovator product has specified hypromellose capsule shells. • For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. • Halal certificate for gelatin shall be provided	• The firm submitted that hard gelatine capsules are easily available and having same dissolving time and behaviour and other competitors are also using gelatine capsule shell. • ***No clarification submitted*** • The firm have submitted Halal certificate for gelatin shall
3.2.P.5	• You have mentioned innovator specifications under section 1.5.6 while you have followed manufacturer specifications for applied product, justify? • The tests of content uniformity and loss on drying were not included in the submitted specifications as recommended by literature of innovator product, justify? • Results of specificity test in method validation is not submitted • The copies of complete analysis of at least two batches shall be provided while you have provided batch analysis of only one batch, justify?	• The firm submitted that we have followed innovator's specifications. • ***The firm submitted that content uniformity test is recommended for dosage form which have API 25mg or less than 25mg in all pharmacopeia reference, so we have not performed.*** • ***Results of specificity test in method validation is not submitted*** • Firm have submitted copies of complete analysis of two batches
3.2.P.8	• Submit latest inspection report for exemption conducted by the panel for authenticity of stability data (PSI) • Submit Raw data sheets & analytical record of stability studies containing calculation formula for both assay & dissolution test • Justify why you have submitted stability study data of only one batch while it is required to submit stability study data of three batches as per zone IV-A conditions • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)	• ***Inspection report for exemption conducted by the panel for authenticity of stability data (PSI) is not submitted*** • ***Firm has not submitted stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.*** • ***Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is not submitted***

Decision: Deferred for following:

- **Submission of Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer**
- **Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)**
- **Submission of Comparative dissolution profile against the innovator product**
- **Submission of results of specificity test in method validation studies of drug product**

• **Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.** • **Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)**

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	Submit valid GMP certificate of drug substance manufacturer	The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing	• The firm have submitted Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /

	of the Drug substance / Active Pharmaceutical ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Active Pharmaceutical ingredient by Drug Product manufacturer according to USP monograph. ***However, the number and limits of tests and analytical procedure are different from the drug substance manufacturer as monograph for clarithromycin EC Taste Mask Pellets are not available in USP.*** • Firm have submitted Analytical Method Verification studies including accuracy and repeatability (method precision) performed by the Drug Product manufacturer. ***However, results of specificity is not submitted.***
3.2.P.2	• Justification is required why Antimicrobial Preservatives were included in composition of applied product although no antimicrobial preservative is included in composition of innovator product • Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph (uniformity of dosage unit, deliverable volume, loss on drying)	• ***The firm submitted that we have used these three preservatives (Sodium benzoate, Methyl parabene sodium, Propyl parabene sodium) in very small quantity to get their synergistic preservative effect. They further sated that they may omit parabens from formulation for commercial batches.*** • The firm submitted that comparative study along with uniformity of dosage unit, deliverable volume and loss on drying has been performed and submitted
3.2.P.4	No data / document is submitted in this section	Relevant data / document is submitted in this section
3.2.P.5	• Justification is required why specification does not include complete testing as recommended by USP monograph (uniformity of dosage unit, deliverable volume, loss on drying)	• The firm submitted that complete testing as recommended by USP monograph (uniformity of dosage unit, deliverable volume, loss on drying) has been done
3.2.P.6	No data / document is submitted in this section	COA's of Drug substance has been submitted instead of primary / secondary reference standard
3.2.P.8	• Preservative content and efficacy test not performed during stability study, clarify? • In use stability study of reconstitution suspension shall be submitted • Submit documents for the procurement of API • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	• Preservative content and efficacy test has been performed and submitted • In use stability study of reconstitution suspension has been performed and submitted. However, the limits of pH test are not within recommended limit range after 14 days. (Limit 4---5.4……result 3.81) • The firm has submitted copy of invoice #602776 dated 02-03-2020 for 10kg of Clarithromycin Taste Masked Micro Pellets 27.5% batch # CTM0645 from Vision Pharmaceuticals Islamabad. • The firm submitted that EZ Chrom software is 21 CFR compliant and submit audit trail reports on product testing

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued upon submission of following:**

	a. Specification, Analytical procedure & Analytical record for drug substance analysis by Jaskan Pharmaceuticals (Pvt.) Ltd., Plot No. 50 Sunder Industrial Estate Lahore along with for the drug substance analysis. **b. Performance of specificity parameter for analytical method verification studies of drug substance shall be submitted.** **c. Results of specificity test in analytical method verification studies for drug substance.** **d. Submission of In use stability study of 14 days for reconstituted suspension**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature,

		structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (AJ2A7004, AJ2A7005, AJ2A7006)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product that is Dexilant 30mg Capsule by Takeda Pharmaceuticals America, Inc by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Source of Pellets: Alphamed Formulations Pvt., Limited., Survey No.225, Sampanbole Village, Shamirpet Mandal, Medchal Malkajgiri District Telangana - 500 101, India		
API Lot No.	AJ4A0003/B, RD-0050-023, RD-0050-024		
Description of Pack (Container closure system)	Alu-alu Blisters, packed in printed carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0,3,6,9,12,18,24 (Months)		
Batch No.	AU231B	AU232B	AU233B
Batch Size	22500 caps	22500 caps	22500 caps
Manufacturing Date	12-2020	12-2020	12-2020
Date of Initiation	12-2020	12-2020	12-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of Rofl 500mcg tablet on the basis of which Registration Board in its 277th meeting dated 27-29 December, 2017 decided to approve registration of Rofl 500mcg tablet.

		Inspection date: 10-10-2017 The report shows that: The HPLC software is 21 CFR compliant. Adequate monitoring and control are available for stability chambers
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP issued by Drug Control Administration, Government of Telangana India valid till 29/08/2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted two copies of invoice confirming the import of 6kg and 9kg dexlansoprazole dual delayed release pellets respectively attested by AD (I&E) DRAP Karachi. Invoice # and date, supplier and receiver details are not clearly readable
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator [XI]:

Section	Observations	Response
	Submit latest GMP inspection report conducted with in last three years	The firm has submitted cGMP certificate issued on 24-12-2020 base on inspection conducted on 06th November 2020
1.5.2	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit shall be clearly mentioned indicating the type and concentration of pellets	The have submitted label claim as under: Each capsule contains: Dexlansoprazole Dual Delayed Release Pellets 22.5% w/w eq. to Dexlansoprazole: 30mg
3.2.S.4	• Justification is required for not including the test for Percentage of enantiomer in specification by drug substance manufacturer and drug product manufacturer although stated by the innovator product? (drug is racemic mixture) • Justify the dissolution specification set by the drug substance manufacturer (0.1N HCl, Buffer pH 6 and Buffer pH 7.4) since they are different from the innovator dissolution specifications (0.1N HCl, pH 5.5 and pH 6.75). • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Enantiomer is the process related impurity of pure API manufacturing of Dexlansoprazole and well controlled in drug substance specification by both drug substance manufacturer of Dexlansoprazole (M/s. Enal Drugs Private Limited) and drug product (bulk) manufacturer of Dexlansoprazole pellets 22.5% (M/s. Alphamed Formulations Private Limited) as per requirement of innovator specification. One typical batch comparative results from both drug substance manufacturer and drug product manufacturer has been submitted. • The firm submitted that Dissolution specification set by the drug substance manufacturer are adopted from FDA website of Dissolution. • Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by drug product manufacturer for drug substance is attached.
3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis	Firm has submitted results of analysis of relevant batches of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from

	(CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. (batch number of both supplier and manufacturer are different)	drug substance/ Active Pharmaceutical Ingredient manufacturer
3.2.P.2	The applied product is 30mg capsule while the submitted CDP is for 60mg caps, clarify	The firm have submitted Comparative dissolution profile of Dexlansoprazole 30mg DR Capsules conducted against innovator product Dexilant capsule 30mg, in 0.1N HCl, Phosphate Buffer pH 5.5 and Phosphate buffer of pH 7.0 with SLS. The results of f2 factor are in acceptable range.
3.2.P.4	• Justify the use of gelatine capsule shell in dexlansoprazole capsule since innovator product has specified hypromellose capsule shells.	We have performed compatibility studies of Dexlansoprazole pellets 22.5% with hard gelatine capsule shells and found compatible for Dexlansoprazole pellets.
3.2.P.5	• Justify the dissolution specification set by the drug product manufacturer (0.1N HCl, Buffer pH 5.5 and Buffer pH 7) since they are different from the innovator dissolution specifications (0.1N HCl, pH 5.5 and pH 6.75). • The tests of loss on drying was not included in the submitted specifications as recommended by literature of innovator product.	• The firm submitted that Dissolution specification set by the drug product manufacturer are harmonized with the Dissolution Methods on FDA website which is "Acid stage: 0.1N Hydrochloric acid, Buffer stage: pH 7.0 Phosphate Buffer with 5mM Sodium Lauryl Sulphate". Besides, for dual delayed release effect determination, with reference to DRB 278th Meeting as advised to M/s. Weatherfolds Pharmaceuticals, Hattar, we have included pH 5.5 buffer stage dissolution. Furthermore, the specifications has also validated through comparative dissolution profile studies as per requirement of innovator's specification and found both products pharmaceutical equivalent. • The firm submitted that We are including the test of water content in the specifications as recommended by literature of innovator product. Proposed specifications are submitted
3.2P.8	• The results of batch analysis and stability data reflect that tests of content uniformity have not been performed throughout stability studies. Justify your stability study data without performance of this tests. • Submit readable copy of both the commercial invoice for evidence of purchase of pellets	• The stability specification has been established in-line with ICH Q 1A – 1F. Stability studies should include testing of those attributes of the drug product that are susceptible to change during storage and are likely to influence quality, safety, and/or efficacy. The testing should cover, as appropriate, the physical, chemical, biological, and microbiological attributes. Furthermore, Uniformity of dosage units (content uniformity) is an in-process control test and it is well controlled during release of drug product. Q1F Stability Guideline WHO 2018 is being submitted • The firm has submitted two copies of invoice No# GE2020/177 dated 30-11-202 and invoice No#GS2020/8 dated 17-06-2020 confirming the import of 6kg and 9kg dexlansoprazole dual delayed release pellets 22.5% w/w respectively attested by AD (I&E) DRAP Karachi.

Decision: Approved with innovators specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

• **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**		
376.	Name, address of Applicant / Marketing Authorization Holder	M/s Atco Laboratories Ltd, B-18, S.I.T.E, Karachi.
	Name, address of Manufacturing site.	M/s Atco Laboratories Ltd, B-18, S.I.T.E, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	The proposed proprietary name / brand name	Dexlansoprazole DR Capsule 60mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Dexlansoprazole MS 60mg (as enteric coated pellets)
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	Proton pump inhibitors
	Reference to Finished product specifications	In house
	Proposed Pack size	7s, 10s, 14s, 20s, 28s & 30s.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	DEXILANT (30mg, 60mg) delayed-release capsules USFDA Approved
	For generic drugs (me-too status)	Delanzo DR Capsule 60mg by M/s SAMI Pharmaceuticals (Reg# 089146)
	GMP status of the Finished product manufacturer	The firm was inspected on 28-02-2017 for renewal of DML and conclusion of inspection was: Keeping in view good facilities provided for manufacturing and quality control of pharmaceutical products registered in the name of firm being produced at site the overall good maintenance of plant and the required documentation and standards operating procedures were also found to be in place, the panel recommended the grant of renewal of Drug Manufacturing License No. 000188 (Formulation) of the firm.
	Name and address of API manufacturer.	**Source of Pellets:** Alphamed Formulations Pvt., Limited Survey No.225, Sampanbole Village, Shamirpet Mandal, Medchal Malkajgiri District Telangana - 500 101, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities,

		specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (AJ2A7004, AJ2A7005, AJ2A7006)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product that is Dexilant 60mg Capsule by Takeda Pharmaceuticals America, Inc by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Dexilant 60mg Capsule by Takeda Pharmaceuticals America, Inc in Acid media (pH 1.0-1.2), Phosphate Buffer (pH 5.5) & Phosphate Buffer (pH 7 with SLS). The values for f2 is in the acceptable range
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of Rofl 500mcg tablet on the

		basis of which Registration Board in its 277th meeting dated 27-29 December, 2017 decided to approve registration of Rofl 500mcg tablet. Inspection date: 10-10-2017 The report shows that: The HPLC software is 21 CFR compliant. Adequate monitoring and control are available for stability chambers
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP issued by Drug Control Administration, Government of Telangana India valid till 29/08/2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted two copies of invoice confirming the import of 6kg and 9kg dexlansoprazole dual delayed release pellets respectively attested by AD (I&E) DRAP Karachi. Invoice # and date, supplier and receiver details are not clearly readable
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator XI:

Section	Observations	Response
	• Submit latest GMP inspection report conducted with in last three years	The firm has submitted cGMP certificate issued on 24-12-2020 base on inspection conducted on 06th November 2020
1.5.2	• Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit shall be clearly mentioned indicating the type and concentration of pellets	The have submitted label claim as under: Each capsule contains: Dexlansoprazole Dual Delayed Release Pellets 22.5% w/w eq. to Dexlansoprazole: 60mg
3.2.S.4	• Justification is required for not including the test for Percentage of enantiomer in specification by drug substance manufacturer and drug product manufacturer although stated by the innovator product? (drug is racemic mixture) • Justify the dissolution specification set by the drug substance manufacturer (0.1N HCl, Buffer pH 6 and Buffer pH 7.4) since they are different from the innovator dissolution specifications (0.1N HCl, pH 5.5 and pH 6.75). • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Enantiomer is the process related impurity of pure API manufacturing of Dexlansoprazole and well controlled in drug substance specification by both drug substance manufacturer of Dexlansoprazole (M/s. Enal Drugs Private Limited) and drug product (bulk) manufacturer of Dexlansoprazole pellets 22.5% (M/s. Alphamed Formulations Private Limited) as per requirement of innovator specification. One typical batch comparative results from both drug substance manufacturer and drug product manufacturer has been submitted. • The firm submitted that Dissolution specification set by the drug substance manufacturer are adopted from FDA website of Dissolution. • Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by drug product manufacturer for drug substance is submitted.
3.2.S.4.4	• Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product	Firm has submitted results of analysis of relevant batches of Drug Substance performed by Drug Product manufacturer used during product

	manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	development and stability studies, along with Certificate of Analysis (CoA) of the same batch from drug substance/ Active Pharmaceutical Ingredient manufacturer
3.2.P.2	• As per WHO guideline surfactants should be avoided in comparative dissolution testing while you have used surfactant in CDP, clarify?	The firm submitted Surfactant should be avoided in comparative dissolution testing as the use of surfactants results in loss of discriminatory power of dissolution method. In this case, drug is not released in uniform pattern without surfactant due to solubility issue of Dexlansoprazole while release profile is the mandatory for comparative dissolution testing. Furthermore, the use of surfactant did not disturbed the release profile and the Active Pharmaceutical Ingredient releases gradually from the dual delayed release pellets and the discriminatory power of dissolution method is not loss as these pellets are dual delayed release, designed to release till large intestine in vivo. Results of Comparative dissolution profile of Dexlansoprazole pellets without surfactant in pH 7.0 buffer medium is submitted for reference.
3.2.P.4	• Justify the use of gelatine capsule shell in dexlansoprazole capsule since innovator product has specified hypromellose capsule shells.	We have performed compatibility studies of Dexlansoprazole pellets 22.5% with hard gelatine capsule shells and found compatible for Dexlansoprazole pellets.
3.2.P.5	• Justify the dissolution specification set by the drug product manufacturer (0.1N HCl, Buffer pH 5.5 and Buffer pH 7) since they are different from the innovator dissolution specifications (pH 5.5 and pH 6.75). • The tests of loss on drying was not included in the submitted specifications as recommended by literature of innovator product.	• The firm submitted that Dissolution specification set by the drug product manufacturer are harmonized with the Dissolution Methods on FDA website which is "Acid stage: 0.1N Hydrochloric acid, Buffer stage: pH 7.0 Phosphate Buffer with 5mM Sodium Lauryl Sulphate". Besides, for dual delayed release effect determination, with reference to DRB 278th Meeting as advised to M/s. Weatherfolds Pharmaceuticals, Hattar, we have included pH 5.5 buffer stage dissolution. Furthermore, the specifications has also validated through comparative dissolution profile studies as per requirement of innovator's specification and found both products pharmaceutical equivalent. • The firm submitted that We are including the test of water content in the specifications as recommended by literature of innovator product. Proposed specifications are submitted
3.2P.8	• The results of batch analysis and stability data reflect that tests of content uniformity have not been performed throughout stability studies. Justify your stability study data without performance of this test. • Submit readable copy of both the commercial invoice for evidence of purchase of pellets • The quantity of imported drug substance as per submitted invoice is 15kg and three batches of 30mg dexlansoprazole capsule each of 22500 caps and 60mg	• The stability specification has been established in-line with ICH Q 1A – 1F. Stability studies should include testing of those attributes of the drug product that are susceptible to change during storage and are likely to influence quality, safety, and/or efficacy. The testing should cover, as appropriate, the physical, chemical, biological, and microbiological attributes. Furthermore, Uniformity of dosage units (content uniformity) is an in-process control test and it is well controlled during release of drug product. Q1F Stability Guideline WHO 2018 is being submitted • The firm has submitted two copies of invoice No# GE2020/177 dated 30-11-202 and invoice

	dexlansoprazole capsule each of 11200 caps were manufactured from it. Justification is required as how the imported drug substance was sufficient enough to manufacture three batches of each strength.	No#GS2020/8 dated 17-06-2020 confirming the import of 6kg and 9kg dexlansoprazole dual delayed release pellets 22.5% w/w respectively attested by AD (I&E) DRAP Karachi. • The firm submitted that initially, during development stage, we have also received 6Kg pellets received from two lots of pellets (3Kg from each lot) for development and trial purpose as FOC. The total quantity received is 21Kg while approx. 18Kg pellets has been consumed in preparation of three batches of 30mg Dexlansoprazole capsules each of 22500 caps and three batches of 60mg Dexlansoprazole capsules each of 11200 caps

Decision: Approved with innovators specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**

Case No. 02: Registration applications of New Section of human drugs

a. M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha (New Sections).

The Central Licensing Board in its 276th meeting held on 3rd September, 2020 has considered and approved the following additional section of M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha. under Drug Manufacturing License No. 000609 (Formulation) vide approval letter No. F. 1-37/2003-Lic (Vol-I) dated 29th September 2020.

S No.	Section
1.	Capsule (General) Section (New)
2.	Sachet (General) Section (New)

Following applications have been submitted for registration by the firm.

377.	Name, address of Applicant / Marketing Authorization Holder	M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha.
	Name, address of Manufacturing site.	M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3134 dated 01-02-2022
	Details of fee submitted	PKR 30,000/-: dated 16-12-2021
	The proposed proprietary name / brand name	Diclomax SR 100 mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains:

		Diclofenac Sodium SR Pellets 32% eq. to Diclofenac Sodium……..100 mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	NSAID (Non-steroidal anti-inflammatory drugs)
	Reference to Finished product specifications	BP specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Rhumalgan XL 100mg modified-release capsules, MHRA Approved.
	For generic drugs (me-too status)	Phlogin-100 capsule by M/s Brookes Pharmaceuticals (Reg#009129)
	GMP status of the Finished product manufacturer	New sections
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals, Plot No.22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Long-term stability studies were performed at a storage temperature of 30°C±2°C/65%±5% RH for 36 months. Accelerated stability studies were performed at a temperature of 40±2°C/75%±5% RH for 6 months. Batches: (DE062ER, DE230ER, DE160ER)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Phlogen SR 100mg Capsule by M/s Brooks Pharmaceuticals by performing quality tests (Identification,-Assay, Dissolution). CDP has been performed against the same brand Phlogen SR 100mg Capsule by M/s Brooks Pharmaceuticals in Acid media 0.1N HCl (pH 1.2),

		acetate buffer (pH 4.5) & phosphate Buffer (pH 6.8). The values are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have been submitted including linearity, specificity, accuracy, precision.

Date of Initiation	25-01-2021	25-01-2021	25-01-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm submitted that Quaper Pvt. Ltd is a new license facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm submitted copy of GMP certificate No.F.3-26/2019-Addl. Dir. (QA &LT-I) dated 31st July 2019 of M/s Vision Pharmaceuticals valid up to 10/02/2022
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice for 2kg of Diclofenac Sodium SR pellets 32% from Vision Pharmaceuticals (Pvt.) Ltd
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm have submitted data of stability batches along with respective documents like Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not required as Assay and dissolution performed on UV
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm have submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
	• Submit valid GMP certificate of drug substance manufacturer i.e. Vision Pharma	Firm has submitted copy of application and fee deposit slip submitted to DRAP for issuance of new GMP certificate to Vision Pharma
1.5.15-1.5.20	• Commitments not submitted as per the CTD guidance document	Firm has submitted commitments as per the CTD guidance document
3.2.S.4.	• Copies of the analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical	Firm has submitted copies of the analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is required.

	Ingredient by Drug substance manufacturer is required.	
3.2.P.2.2.1	• Justification is required since pharmaceutical equivalence and CDP studies have not been conducted against the innovator product.	Due to non-availability of innovator product in the market, available brand of well reputed company was used for pharmaceutical equivalence and CDP studies.
3.2.P.4.5	• For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. • Halal certificate for gelatin shall be provided	The firm have submitted statement regarding TSE/BSE/GMO from M/s Multicaps capsule for quality product Karachi. It is certified that we manufacturer Empty Hard capsules from halal gelatin. It is derived form the bovine bones of halal animals. We hereby declare that our product is free from Transmissible Spongiform Encephalopathy (TSE), Bovine Spongiform Encephalophathy and also free from Genetically Modified Organism (GMO).
3.2.P.5	• Justification shall be submitted for applying UV spectrum for identification of the diclofenac sustained released capsule while BP specifies identification of diclofenac sodium prolonged release capsule by IR method. • Justification shall be submitted for selecting Q NLT 70% in buffer pH 7.2 after 8 hr?	• Copy of IR spectrum for identification of diclofenac sodium as per BP specification is submitted • ***Limit for Q NLT 70% in buffer pH 7.2 after 8 hr is selected as per drug substance manufacturer specifications***
3.2.P.8	• You have mentioned the batch size 1600caps in batch T1/21 in stability summary sheet while 2000caps in two other batches, clarify as the batch size should be same for all batches manufactured?	The firm submitted that there was a typographical error. In actual the batch size for all three stability batches was 2000 capsule. The firm have submitted corrected summary sheet

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

b. M/s Invictus Pharmaceuticals Plot No. 21 & 26, Street No. NS-2, RCCI, Industrial Estate, Rawat".

The Central Licensing Board in its 273rd meeting held on 15th January, 2020 has considered and approved the following three (03) sections of "M/s Invictus Pharmaceuticals Plot No. 21 & 26, Street No. NS-2, RCCI, Industrial Estate, Rawat" under Drug Manufacturing License No. 000892 (Formulation) vide approval letter No. F. 1-37/2016-Lic (Vol-I) dated 18th February 2020.

S No.	Section
1.	Dry Powder Injection Section (Cephalosporine)
2.	Dry Powder for suspension Section (Cephalosporine))
3.	Capsule Section (Cephalosporine)

Following applications have been submitted for registration by the firm.

378.	Name, address of Applicant / Marketing Authorization Holder	Invictus Pharmaceuticals., NS2, Rawalpindi, Rawat Industrial Estate, Islamabad, Rawalpindi, Islamabad Capital Territory
	Name, address of Manufacturing site.	Invictus Pharmaceuticals., NS2, Rawalpindi, Rawat Industrial Estate, Islamabad, Rawalpindi, Islamabad Capital Territory
	Status of the applicant	☒ Manufacturer

		☐ Importer ☐Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23341 dated 26-08-2021
	Details of fee submitted	PKR 30,000/-: dated 26-07-2021
	The proposed proprietary name / brand name	Cef-Vic 400mg capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Cefixime as Trihydrate…….400mg
	Pharmaceutical form of applied drug	White to off white powder filled in Size "0" Shell and packed in Alu-Alu pack of 5's.
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	Innovator specifications
	Proposed Pack size	Alu/Alu of Pack size of 5's.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime 400mg Capsule by M/s Alkem Labs Ltd USFDA approved
	For generic drugs (me-too status)	Cebosh 400mg Capsule by M/s Bosch Pharmaceuticals (Reg# 027160)
	GMP status of the Finished product manufacturer	New section
	Name and address of API manufacturer.	Pharmagen Limited., Kot Nabi Bukshwala, 34 Km Ferozepur Road, Lahore. Tel: +92 (042) 5935261-68 Fax: +92 (042) 5935269 E-mail: pblbd@hotmail.com Web: www.pharmagen.com.pk
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{O} \pm 2^{O}$ C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2^{O} C / 65% ± 5% RH for 36 months.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence and comparative dissolution profile against the product Cefspan Capsule 400mg by M/s Barrett Hodgson (Pvt) Ltd
	Analytical method validation/verification of product	Not submitted

STABILITY STUDY DATA

Manufacturer of API manufacturer	Pharmagen Limited., Kot Nabi Bukshwala, 34 Km Ferozepur Road, Lahore. Tel: +92 (042) 5935261-68 Fax: +92 (042) 5935269 E-mail: pblbd@hotmail.com Web: www.pharmagen.com.pk		
API Lot No.	00243/078/2020		
Description of Pack (Container closure system)	The granular dry powder for capsule will be filled in a Size "0" Empty Hard Gelatin Shell and blistered in Alu/Alu of Pack size of 5's.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18 & 24 (Months)		
Batch No.	Tc-001	Tc-002	Tc-003
Batch Size	2500	2500	2500
Manufacturing Date	05-20	05-20	05-20
Date of Initiation	13-05-20	13-05-20	13-05-20
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s Pharmagen Limited issued on 11.01.2019 based on inspection conducted on 08.01.2019

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not Applicable
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC [XI]:

Section	Observations	Response
1.3.3	Specify the status of applicant as you have submitted that applicant "Is involved in none of the above (contract giver)" in module 1 of form 5F	The firm have submitted revised form 5-F and specified the status of applicant as "manufacturer"
1.3.1.-1.3.2	The address mentioned in submitted application is different from the address mentioned on DML, clarify?	The firm have submitted revised form 5-F and corrected the address as per DML
1.5.6	In Form 5F you have mentioned innovator's specifications for the product under section 1.5.6. while the monograph of applied product is available in JP, clarify?	***The firm have revised the specifications to JP specifications***
2.3.	Submit module 2 as per WHO QOS-PD template without referring to any annexure of Module III.	Firm have submitted module 2 as per WHO QOS-PD template
3.2.S.4.1.	As per the drug substance specifications of the drug substance manufacturer i.e. M/s Pharmagen Limited, the firm submitted that material complies BP, USP and in-house specifications, justification is required as how the drug substance follow all the specifications	The firm have submitted certificate of analysis of drug substance in which the drug substance follows USP specifications
3.2.S.4.1. -3.2.S.4.2	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Drug substance specification and analytical procedure of Invictus Pharmaceuticals is provided. ***However, the analytical procedure does not contain procedure for identification test (IR), pH, water content and specific rotation as recommended by USP and contain only procedure for assay test.***
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer drug substance(s) shall be submitted.	***No reply submitted***
3.2.S.4.4	The Batch No. mentioned in batch analysis by drug substance manufacturer is 00243/078/2020 while the Batch No. mentioned in batch analysis by drug product manufacturer 00243/264/2020, clarify?	The firm submitted that batch No. of the drug substance cefixime used is 00243/078/2020 and submitted COA of drug substance from drug substance manufacturer and drug product manufacturer. The firm further stated that compacted cefixime is used in formulation of

<table>
<tr><td></td><td>Furthermore, COA submitted by the drug substance manufacturer and drug product manufacturer shows that micronized cefixime was used in formulation of cefixime capsule, clarify?</td><td>cefixime capsule as depicted in COA. However, COA of same batch number of API was submitted for micronized form of cefixime previously.</td></tr>
<tr><td>3.2.P.1</td><td>• The composition of applied product is not as per innovator’s product, clarify
<table>
<tr><td>Applied product</td><td>SUPRAX 400mg capsules</td></tr>
<tr><td>Cefixime trihydrate</td><td>Cefixime trihydrate</td></tr>
<tr><td>Colloidal silicon dioxide</td><td>Colloidal silicon dioxide</td></tr>
<tr><td></td><td>Crospovidone</td></tr>
<tr><td>Microcrystalline cellulose 102</td><td>Low Substituted Hydroxy Propyl Cellulose,</td></tr>
<tr><td>Magnesium Stearate,</td><td>Magnesium Stearate,</td></tr>
<tr><td>EHG Capsule shell ‘0’ size</td><td>Mannitol</td></tr>
<tr><td></td><td></td></tr>
</table>
• Quantity of cefixime per unit dose shall be justified with equivalency factor for cefixime trihydrate.
• You have mentioned the use of overages in your formulation to compensate the potency of the product during process loss, justify?</td><td>• The response is submitted in subsection 3.2.P.2.1.1
• Quantity of cefixime per unit dose and per batch have been explained and justified based upon the salt factor calculation and assay results. The justification is submitted.
• Firm has used the theoretical factor for adjustment of water content while dispensing, instead of the actual results of “water content test” reported in the drug substance analysis.
• The firm submitted that we have used no overages in our formulation</td></tr>
<tr><td>3.2.P.2.2.1</td><td>• Firm has performed pharmaceutical equivalence against the product Cefspan Capsule 400mg by M/s Barrett Hodgson (Pvt) Ltd. Justification is required as comparator product fails the dissolution test, then how product is pharmaceutical equivalent. (Limit NLT 80%, test result 69.82%.)
• Time point for CDP conducted is 30, 45, 60min. 15 min time point is not considered being necessary as per WHO guidelines.</td><td>• Firm has again submitted pharmaceutical equivalence of applied product against the product Cefspan Capsule 400mg by M/s Barrett Hodgson (Pvt) Ltd and the results of tests are within range.
• No reply submitted</td></tr>
<tr><td>3.2.P.2.1.1</td><td>Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product.</td><td>The firm have submitted that applied formulation contains colloidal silicon dioxide, magnesium stearate and microcrystalline cellulose as per reference formulation. The stability studies of the product show that all the test, physical appearance dissolution and assay are within limits and there are no changes developed during stability.</td></tr>
<tr><td>3.2.P.5.2</td><td>• Provide signed copy of analytical methods used for applied product
• Justification for proposed analytical procedure is required as the official monograph is available in JP</td><td>• The firm submitted that product complies JP specifications and analytical method and JP monograph is submitted. However, JP monograph for applied product was not</td></tr>
</table>

	• The firm have proposed UV spectrophotometric method for assay of drug product while the JP monograph recommends HPLC for assay analysis	***submitted and analytical was submitted only for assay test and dissolution test.*** • The firm submitted that there was a typographical mistake we have use the submitted method and HPLC chromatograms are attached. ***However, no chromatograms were submitted***
3.2.P.5.4	• In finished product specifications under section 3.2.P.5.1 you have applied in house specifications while in Batch Analyses you confirmed that product complies with USP specifications, clarify?	The firm submitted that product complies JP specifications and stated that JP monograph is attached. ***However, no JP monograph was submitted***
3.2.P.6	• The working standard used during analysis states that it should be used before July 2020 while 3rd month stability study performed in august 2020 and 6th month stability study performed at November 2020 using the same working standard • The firm have provided COA of primary reference standard for drug substance analysis and COA of working standard. However, the standardization of working standard is performed with other Reference Standards, the COA of which is not provided	• The firm have submitted valid COA of working standard. • The firm have submitted COA of primary reference standard and standardization of working standard has been performed against the same primary reference standard.
3.2.P.8	• Submit Raw data sheets, COA & analytical record for both assay & dissolution test containing detail of sample preparation, standard preparation for various performance parameters. • The date of initiation mentioned in stability study is 13.05.2020 while the date of manufacturing mentioned in BMR is 18.05.2021. Clarify how stability study started before the manufacturing of batch.	• Firm have submitted Raw data sheets, including actual details of sample solution preparation & standard preparation, weight of standard & calculation formula applied for assay test only. ***Raw data sheets and COA for dissolution test containing detail of sample preparation, standard preparation for various performance parameters is not submitted.*** • The firm submitted that there was a typographic mistake. The initiation date is 18-05-2021 as mentioned in BMR

Decision: Deferred for following:

- **Submission of analytical procedures & analytical record for testing of the Drug substance by Drug Product manufacturer as per USP monograph.**
- **Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) for drug substance performed by the Drug Product manufacturer**
- **Justification how same batch of drug substance (Batch No. 00243/078/2020) is used both as compacted and micronized.**
- **Submission of CDP as per WHO guidelines against innovator product**
- **Revision of specification as approved by Registration Board in its 313th meeting and notified vide letter No. F.14-I/2022-PEC dated 14th March 2022.**
- **Performance of batch analysis as per the monograph approved by Registration Board in its 313th meeting and notified vide letter No. F.14-I/2022-PEC dated 14th March 2022.**

c. M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore

The Central Licensing Board in its 285th meeting held on 17th & 18th March, 2022 has considered and approved the grant of following sections of **M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore** under Drug Manufacturing License No. 000779 (Formulation) vide approval letter No. F. 1-11/2009-Lic (Vol-I) dated 10th May, 2022.

S No.	Section

1.	Tablet Section II (General) **New**
2.	Dry Powder Suspension Section. **New**
3.	Dry Powder Sachet Section (General). **New**

Following applications have been submitted for registration by the firm.

379.	Name, address of Applicant / Marketing Authorization Holder	M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore
	Name, address of Manufacturing site.	M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17860 dated 20/06/2022
	Details of fee submitted	PKR 30,000/-: dated 10/06/2022 (slip No#392967182013)
	The proposed proprietary name / brand name	Azipos 200mg /5ml Dry Powder Suspension
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Azithromycin as dihydrate……..200mg
	Pharmaceutical form of applied drug	Dry Powder suspension (Azithromycin dihydrate 35% Taste masked micropellets)
	Pharmacotherapeutic Group of (API)	Macrolides
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	15ml, 25ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zithromax for oral suspension 200mg/5ml USFDA Approved
	For generic drugs (me-too status)	Azomax 200mg Oral Suspension by M/s Sandoz (Pakistan) Ltd (Reg#022201)
	GMP status of the Finished product manufacturer	New section granted on 17th & 18th March, 2022 and letter issued on 10th May, 2022
	Name and address of API manufacturer.	Vision Pharmaceuticals (Pvt.) Ltd. Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad Pakistan. Tel : + 92-51-4493587-90 Fax : + 92-51-4493591
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (AZI 112, AZI 111, AZI 115)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed Pharmaceutical Equivalence of their product Azipos 200mg dry powder suspension against the Azomax dry powder suspension 200mg/5ml by M/s Novartis Pharma and found that both products are equivalent to each other.
	Analytical method validation/verification of product	Firm has submitted method verification report for the applied product

STABILITY STUDY DATA			
Manufacturer of API	Vision Pharmaceuticals (Pvt.) Ltd. Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad Pakistan. Tel : + 92-51-4493587-90 Fax : + 92-51-4493591		
API Lot No.	AZI 154		
Description of Pack (Container closure system)	Amber colored glass bottle with Aluminium P.P caps printed with company logo		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	AZ-02	AZ-03	AZ-04
Batch Size	100 bottles	100 bottles	100 bottles
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	27-11-2021	27-11-2021	27-11-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of their product on the basis of which Registration Board in its 289th meeting held on 14-16th May, 2019 decided to approve registration of Delanso 30mg capsule and Delanso 60mg capsule. Inspection date: 02nd May, 2019 The report shows that:

		• The firm have quaternary gradient HPLC (Shimadzu; Model; LC20AT); with time and date locked but it is not 21 CFR compliant. • Power backup by UPS and 200kv generator was available. Digital data logger was not installed for continuous monitoring and control of stability chambers. Storage conditions were being recorded thrice daily manually.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of all three batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
	Firm has stated that they have R&D section as date of manufacturing of batches is November 2021 and grant of additional section is March 2022	
1.4.1	You have stated that the submitted application is for registration of New Drug Product while the applied product is Generic drug product, clarify?	The firm submitted that we have applied for generic drug product but typographic error it was highlighted as new drug molecule
1.6.5	Submit valid GMP certificate of drug substance manufacturer	The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022. The firm further submitted that vision pharma has already submitted request for cGMP inspection on 22-12-2021 along with requisite fee.
3.2.S.4	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Firm has submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance

3.2.P.5	• Time for dissolution test is not specified in submitted specifications of applied product • The limits of pH test (8.5-11) in submitted specification is different from that recommended by USP (9-11) • The calculation formula used for assay calculation is different from that recommended by USP clarify? • The injection volume mentioned in chromatographic conditions of assay (applied 20ul and USP 50ul) and dissolution test (applied 20ul and USP 100ul) in submitted analytical procedure is different from that recommended by USP. • The calculation formula used for dissolution is different from that recommended by USP clarify?	• The firm have revised specification and mentioned time for dissolution test in specifications. • The firm submitted that acceptance criteria of pH for multiple unit containers is 8.5-11 as per USP. • The firm submitted that We used convention equation for the calculation of Assay now we have updated our testing method as per USP. It's notable that the results are same by applying both calculations. • The firm submitted that Sample and standard were analyzed under same chromatographic conditions (including the same injection volume) and found that the results were closely comparable. • USP <621> states that injection volume can be adjusted as it is consistent with acceptable precision (evidence submitted herewith). • It is remarkable that we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification, Linearity, Accuracy and Recovery. Results of above said validation parameters complied with the Relative Standard Deviation limits. • The firm submitted that We used convention equation for the calculation of Dissolution now we have updated our testing method as per USP. It's notable that the result are same by applying both calculations
3.2.P.8	• Tests for antimicrobial preservative content and efficacy of preservative as recommended by ICH Q1 (R2) guidelines and USP chapter <51> should be performed for finished product • In use stability study of reconstitution suspension shall be submitted • Submit documents for the procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	• The firm have submitted Tests for antimicrobial preservative content and efficacy of preservative for only one batch. • Firm have submitted protocol for in use stability study of reconstitution suspension. However, firm have not submitted result of in use stability study of reconstitution suspension • The firm has submitted copy of invoice No# 60008 dated 29-10-2021 from vision pharmaceutical confirming the purchase of 550gm azithromycin Diydrate T.M Micropellets 35% batch No#AZI154 in name of Titlis Pharma • We have performed the stability study of Azipos 200mg/5ml Dry powder suspension on our HPLC (QC-HPLC-001) SHIMAZDZU Model No. LC-20 AT, which is not 21CFR Compliant. • However, it is certified that **date and time of this HPLC (QC-HPLC-001) is locked and data alteration/editing is strictly restricted**. Moreover this HPLC

		(QC-HPLC-001) has access control and only two authorized QC analysts have authorization to access and operate this HPLC (QC-HPLC-001). • Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is submitted

Decision: Approved.

- **Registration letter will be issued after submission of Tests for antimicrobial preservative content and efficacy of preservative as recommended by USP chapter <51> for finished product as well as In use stability study of reconstitution suspension**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

380.	Name, address of Applicant / Marketing Authorization Holder	M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore

	Dy. No. and date of submission	Dy. No. 11089 dated 07/05/2022
	Details of fee submitted	PKR 30,000/-: dated 10/02/2022 (slip No#56031211)
	The proposed proprietary name / brand name	Dapatit 5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Tablet contains: Dapagliflozin as propanediol monohydrate …….5mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	sodium-glucose co-transporter 2 (SGLT2) inhibitors
	Reference to Finished product specifications	Manufacturer's specification
	Proposed Pack size	2×7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	FARXIGA (5mg, 10mg) film coated tablets USFDA Approved

	For generic drugs (me-too status)	Dapa 5mg Tablet by M/s Hilton Pharma (Reg#089367)
	GMP status of the Finished product manufacturer	New section granted on 17th & 18th March, 2022 and letter issued on 10th May, 2022
	Name and address of API manufacturer.	M/s Fuxin Long Rui Pharmaceuticals CO., Ltd, Fluoride Industrial Park, Fumeng county (Yi Ma Tu), Fuxin city, Liaoning Province- 123000, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (160108, 160124, 160220)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Dapa 5mg Tablet of M/s Hilton Pharma by performing quality tests (disintegration, weight variation, Assay, Dissolution, of dosage form). CDP has been performed against the same brand that is Dapa 5mg Tablet of M/s Hilton Pharma in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Fuxin Long Rui Pharmaceuticals CO., Ltd, Fluoride Industrial Park, Fumeng county(Yi Ma Tu), Fuxin city, Liaoning Province- 123000, China		
API Lot No.	L-DG-20210418-D01-DG06-01		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2×7's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	DP-01	DP-02	DP-03

Section	Observations	Response
	Firm has stated that they have R&D section as date of manufacturing of batches is September 2021 and grant of additional section is March 2022	
3.2.S.4	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Firm has submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance
3.2.P.2	• You have not performed CDP and pharmaceutical equivalence against the innovator brand justify? • Justification is required as your formulation contains Ac-Di-Sol (croscarmellose) while innovator product does not contain this excipient?	• The firm submitted that innovator product is not registered in Pakistan therefore, Comparative dissolution profile of Dapatit 5mg Tablet was performed against the reference product Dapa 5mg Tablet manufactured by Hilton Pharma (Pvt) Limited which is available in the market. • The firm further stated that the data of comparative dissolution profile report for Dapatit 5mg tablet is remarkable and the product is highly soluble and dissolves more than 80% within 15minutes in all three media (0.1 N HCl pH 1.2, Acetate buffer pH 4.5 and Phosphate buffer pH 6.8) at all sampling points. The results show that dissolution profile of test and reference products are almost similar. • Moreover, f2 values comply with the acceptance criteria. • The firm submitted that Formulation of Dapatit 5mg Tablet is as similar as the formulation of innovator product except AC-Di-Sol (croscarmellose) in its composition. • The firm submitted that AC-Di-Sol is an inert excipient, has compatibility with other excipients and active pharmaceutical ingredient of Dapatit 5mg tablet. Its safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. • As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that the said excipient enhances disintegration, dissolution and performance of the tablet which is very clearly depicted from the comparative dissolution profile studies of Dapatit 5mg Tablet.
3.2.P.5	• Justify the dissolution studies at 75 rpm, 0.1N HCl (900ml) and 45 min since the innovator product review documents specifies 60 rpm, acetate buffer pH 4.5 (1000ml) and 15 min for dissolution studies.	• The firm submitted that Initially we performed dissolution by using following parameters: Media: 0.1N HCl (900ml), RPM: 75, Apparatus: II (Paddle), Time 45 min. • Stability batches were analyzed at 0, 3, & 6 months on in house testing but after reviewing the FDA drug approval /literature review **(FDA reviewing document**, we revised our testing method as follows: **Media: Acetate buffer (pH 4.5) 1000ml** **RPM: 60** **Apparatus: II (Paddle)** **Time 15 min.**

		We develop the following protocol for stability studies **1. To manufacture 3 new batches (Batch numbers: DP-07, DP-08 and DP-09) for performance of accelerated and long run stability testing as per innovator's specifications / dissolution parameters.** • We have analyzed these batches as per innovator's specifications / dissolution parameters; and "0", 3rd month testing has been completed and results are complying with innovator specification which are submitted **2. To perform one-month stress testing at 60℃ ± 2℃ / 75% ± 5% RH on samples of ongoing stability studies as per innovator's specifications / dissolution parameters.** • We have drawn samples from our ongoing stability studies and kept them on stress conditions for one month (from 12th July -2022 to 12th August-2022); and analyzed that results are complying with innovator specification. The Reports and chromatogram are being submitted **3. To perform the ongoing/long run stability studies of 9th month and other time intervals as per innovator's specifications / dissolution parameters.** • We have performed 9th month stability studies as per innovator's specifications / dissolution parameters and analyzed that results are complying with innovator specification. Reports and chromatogram are submitted • Moreover, we have performed 9th month stability study as per Titlis specifications and conclude that results are comparable. Results on both conditions are found similar and no impact observed in the results due to change in dissolution parameters. (Reports and chromatogram are submitted
3.2.P.8	• Submit documents for the procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	• The firm has submitted copy of form 6 No#12099/2021-DRAP dated 12-08-2021 from Fuxin Long Rui Pharmaceutical Co., Ltd., for the import of 0.16kg of Dapagliflozin propanediol Monohydrate attested by AD (I&E) DRAP Lahore. • We have performed the stability study of Dapatit 5mg Tablet on our HPLC (QC-HPLC-001) SHIMAZDZU Model No. LC-20 AT, which is not 21CFR Compliant. • However, it is certified that **date and time of this HPLC (QC-HPLC-001) is locked and data alteration/editing is strictly restricted**. Moreover, this HPLC (QC-HPLC-001) has access control and only two authorized QC

		analysts have authorization to access and operate this HPLC (QC-HPLC-001). • Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is submitted

Decision: Approved with innovators specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (160108, 160124, 160220)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Dapa 10mg Tablet of M/s Hilton Pharma by performing quality tests (disintegration, weight variation, Assay, Dissolution, of dosage form). CDP has been performed against the same brand that is Dapa 10mg Tablet of M/s Hilton Pharma in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, range, accuracy, precision, specificity.

Section	Observations	Response
1.5.15 – 1.5.20	Commitments not submitted	Firm has submitted commitments as per form 5-F
1.6.5	Submit valid GMP certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	***GMP certificate is not submitted***
2.3.R.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which

<table>
<tr><td></td><td>data is provided in Module 3 section 3.2.P.8.3></td><td>stability studies data is provided in Module 3 section 3.2.P.8.3></td></tr>
<tr><td>3.2.S.4.1. - 3.2.S.4.2</td><td>• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is required.
• Submit signed analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug product manufacturer is required.
• Justify the declared potency of drug substance on COA as it is given on dried basis while in pharmacopeia it is given on anhydrous basis?</td><td>• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is not submitted
• Firm have submitted analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug product manufacturer.
• The firm submitted that potency of API has been calculated on anhydrous basis, whereas the term “on dried basis” was inadvertently mentioned considering it a broader term</td></tr>
<tr><td>3.2.S.4.3</td><td>Analytical Method Verification studies of drug substance(s) for specificity study by the Drug Product manufacturer shall be submitted.</td><td>No reply submitted</td></tr>
<tr><td>3.2.S.4.4</td><td>Batch number of submitted batch analysis by drug product manufacturer (201507019) is different from the batch number submitted by drug substance manufacturer given in batch analysis (210507019)</td><td>The firm have again submitted same COA of drug substance provided by drug substance manufacturer and drug product manufacturer having different batch number and no clarification is provided.</td></tr>
<tr><td>3.2.S.5</td><td>COA of primary standard including source and lot number is submitted. Clarify whether the same reference standard is used by the drug substance manufacturer or drug product manufacturer?</td><td>Firm has submitted COA of primary reference standard and stated that the same is used by drug product manufacturer.</td></tr>
<tr><td>3.2.P.2.1.1</td><td>Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product.
<table><tr><td>Applied product</td><td>ZITHROMAX for oral suspension USFDA</td></tr><tr><td>Azithromycin as dihydrate</td><td>Azithromycin as dihydrate</td></tr><tr><td>Sucrose (Extra Fine)</td><td>Sucrose</td></tr><tr><td>Mannitol</td><td>Hydroxypropyl cellulose</td></tr><tr><td>Xanthan gum</td><td>Xanthan gum</td></tr><tr><td>Trisodium phosphate anhydrous</td><td>Sodium phosphate, tribasic, anhydrous</td></tr></table></td><td>• The excipients used in the applied formulation are complying with current pharmacopeial monograph. These excipients are pharmaceutically inert substance and we have used these excipients below the IIG limit of FDA orange book as well as we have done extensive analysis of the product after formulation and found satisfactory result of the assay.
• Also, we have done stability study during development stage and found satisfactory result of the product. So, we can conclude that these excipients are not incompatible with API.</td></tr>
</table>

	Colloidal anhydrous silica (Aerosil 200)	FD&C Red #40; spray dried artificial cherry, creme de vanilla, and banana flavors	
	Sodium benzoate		
	Tutti Frutti powder (PDF 245)		
3.2.P.2.2.1	• In Description of formulation development, you have submitted manufacturing outline. In manufacturing outline, you have mentioned Sodium hydroxy methyl benzoate and sodium propyl hydroxy benzoate, Saccharine sodium, citric acid monohydrate, glycerin, maltitol sodium, strawberry flavor which are not part of applied formulation, clarify? • Furthermore, you have submitted manufacturing outline for liquid suspension while the applied product is dry suspension, clarify?		The firm have submitted corrected composition table and manufacturing outline.
3.2.P.3.2	In batch formula the amount of azithromycin is mentioned without considering the hydrated form clarify?		The firm have submitted revised batch formula and stated that dihydrate will be adjusted by actual potency (on as is basis) given by QC.
3.2.P.5.1	The USP monograph for azithromycin suspension has given the test for dissolution while you have not mentioned the dissolution test in specification, clarify?		The firm submitted that they followed USP-37 monograph of azithromycin oral suspension which did not include dissolution test. The firm further submitted that now they have included dissolution test in specifications and had also performed it on recent time point of long-term stability studies. The firm have submitted revised specifications.
3.2.P.5.2	Submit detailed signed analytical procedures used for testing the drug product shall be provided.		Firm have submitted analytical procedures used for testing of drug product
3.2.P.5.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.		Firm have submitted Analytical Method Verification studies. ***However, results of repeatability (method precision) is not submitted***
3.2.P.5.4	You have not performed dissolution test as per USP monograph of the applied product, clarify?		Reply submitted as above in section 3.2.P.5.1
3.2.P.8	• The results of assay of Batch #01, Batch #02, Batch #03 mentioned in COA of accelerated and real time stability study is different from the assay result given in raw data sheet • Two different method used for sample preparation mentioned in submitted raw data sheet of Batch #T01, clarify?		• The firm submitted that there had been an erroneous drafting error in stability sheets, corrected stability summary sheets are submitted again. ***Further it is submitted that dissolution test results at initial time point, 3rd month time point and 6th month time point of real time and accelerated stability study were given***

	• The results of stability study data of all the three batches at real time and accelerated conditions given in raw data sheet and chromatogram reflects the same value for all the three batches, clarify?	***in stability summary sheets which were neither included in specifications and not performed previously.*** • ***No clarification is submitted*** • ***No clarification is submitted. The submitted raw data sheets reflect that same standard peak area value has been applied for the calculation of Assay results at all time points of stability studies for all three batches.***
	• Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not submitted • Submit documents for the procurement of API with approval from DRAP (in case of import). • Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• ***No document/details are submitted*** • ***No document/details are submitted*** • ***No document/details are submitted***

Decision: Deferred for following:

- **Submission of valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.**
- **Submission of Copies of the Drug substance specifications and analytical procedures used for testing of the Drug substance by Drug substance manufacturer.**
- **Submission of results of specificity test in Analytical Method Verification studies of drug substance performed by the Drug Product manufacturer.**
- **Clarification since Batch number of drug substance mentioned in batch analysis by drug product manufacturer (201507019) is different from the batch number mentioned by drug substance manufacturer given in batch analysis (210507019)**
- **Submission of results of repeatability (method precision) test in method verification studies for drug product**
- **Clarification since results of dissolution test were included at initial time point, 3rd month time point and 6th month time point of real time and accelerated stability study in stability summary sheets which were neither included in specifications and not performed previously.**
- **Clarification for considering same standard peak area value for the calculation of Assay results at all-time points of stability studies for all three batches.**
- **Submission of documents for the procurement of API with approval from DRAP (in case of import).**
- **Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (ON130001, ON130002, ON130003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed Pharmaceutical Equivalence studies against the Zofran injection by M/s GSK
	Analytical method validation/verification of product	Method verification studies have submitted.

STABILITY STUDY DATA			
Manufacturer of API	M/s Anugraha Chemicals No D-47 to D-50, C-62 and C-63, KSS DC, Industrial Estate, Doddaballapur, Banglore, Karnataka, India		
API Lot No.	AOND-18006		
Description of Pack (Container closure system)	Colorless liquid filled in ***2ml / 5cc clear glass vial*** labeled and packed in standard unit carton (1 x 1'c) and leaflet.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	T1/21	T2/21	T3/21
Batch Size	2000 ampoules	2000 ampoules	2000 ampoules
Manufacturing Date	01-2021	01-2021	01-2021
Date of Initiation	01-2021	01-2021	01-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC systems are not 21 CFR compliant
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The report of temperature and humidity log is attached (only real time)
Remarks of Evaluator [XI]:		

Section	Observations	Response
1.5.15 – 1.5.20	Commitments not submitted	Firm has submitted commitments as per form 5-F
1.6.5	Submit valid GMP certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	***GMP certificate is not submitted***
2.3.R.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.4.1. - 3.2.S.4.2	Submit signed analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer.	Firm have submitted analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer. ***However, analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug substance manufacturer is not submitted.***
3.2.S.4.3	Clarify whether the Analytical Method Verification studies of drug substance have been performed by drugs substance manufacturer or drug product manufacturer	***No clarification is submitted***
3.2.S.6	Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component and other information on the container closure system(s) (e.g. suitability studies) may be submitted.	***No details submitted***
3.2.S.7	The submitted stability study is performed by M/s CTX Lifesciences while the manufacturer of drug substance is Anugraha Chemicals, clarification is required?	***No clarification is submitted***
3.2.P.1	You have not performed the tests of identification, bacterial endotoxin test and particulate matter in pharmaceutical equivalence, justify?	***No justification is submitted***
3.2.p.3.3.	Submit the flowchart of manufacturing outline since the submitted manufacturing outline is not clearly visible.	***No reply submitted***
3.2.P.5.1	• You have not mentioned the tests of identification, bacterial endotoxin test and particulate matter, justify? • Revise your specifications in line with USP specifications along with submission of applicable fee	***No justification is submitted***
3.2.P.5.3	Analytical Method Verification studies of drug product is same as that of drug substance. Clarification is required	***No clarification is submitted***
3.2.P.7	Specify the container closure system of your product including details	***No details are submitted***

	whether ampoule or vial, filled volume and type of glass, since both ampoule and vials and different volumes have been mentioned in different sections	
3.2.P.8.3	• The stability batches have been manufactured on 01-2021 while the stability chromatograms are acquired in 2019, justify? • COA of 3rd month stability study data not submitted? • The ph values given in stability data sheet and raw data sheet is different at all time point? • COA and raw data sheet at 6th month time point is not submitted	• ***No justification is submitted*** • ***COA of 3rd month stability study data not submitted*** • ***No clarification is submitted*** • Firm has submitted raw data sheet at 6th month time point. ***However, COA at 6th month time point is still not submitted***
	• Audit trail reports on product testing is not submitted • Submit documents for the procurement of API with approval from DRAP (in case of import). • Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated)	***No document/record is submitted***
	• In submitted reply the BMR shows that batch size is 1500 ampoule, while raw data sheet shows 2000 ampoule	

Decision: Deferred for following:

- **Submission of valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.**
- **Submission of Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer**
- **Clarification is required since the submitted stability study is performed by M/s CTX Lifesciences while the manufacturer of drug substance is Anugraha Chemicals.**
- **Justification for not including the tests of identification, bacterial endotoxin test and particulate matter in product specifications.**
- **Clarification for submission of same Analytical Method Verification studies for drug product as that of drug substance.**
- **Specify the container closure system of your product including details whether ampoule or vial, filled volume and type of glass, since both ampoule and vials and different volumes have been mentioned in different sections**
- **Justification since the stability batches have been manufactured on 01-2021 while the stability chromatograms are acquired in 2019.**
- **Clarification since the pH values given in stability data sheet and raw data sheet is different at all-time point.**
- **Submission of COA and raw data sheet at 6th month time point.**
- **Submission of documents for the procurement of API with approval from DRAP (in case of import).**
- **Submit record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Submit valid GMP certificate of the Drug Substance manufacturer	• The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	• Firm have submitted Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3
3.2.S.4.	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer is required." • Drug substance manufacturer have claimed USP specifications while monograph for lansoprazole enteric coated pellets are not available in USP., clarification is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Firm have submitted Copies of analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer. ***However, Copies of the Drug substance specifications by Drug Product manufacturer is not submitted.*** • The firm submitted that API manufacturer claimed and followed USP specifications because Lansoprazole pellets are delayed release and ready to fill in capsule. • Firm have submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance
3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	• Firm have submitted results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.
3.2.P.2	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including	• ***No justification submitted*** • Fir submitted that study conducted we me-too product due to unavailability of innovator product

	the tests recommended by USP monograph (uniformity of dosage units, loss on drying). • Justification is required since pharmaceutical equivalence and CDP studies have not been conducted against the innovator product. • A minimum of three time-points should be included for CDP, the time-points for both reference (comparator) and test product being the same as per WHO guidelines while you have performed at only one time points i.e. 15 min, justification is required	• The firm has submitted CDP considering multiple time points for both reference (comparator) and test product. CDP has been performed against the same brand that is Caralans 30mg capsule by Caraway Pharmaceuticals in Acid media (pH 1.0-1.2), acetate buffer (pH 5.5) & Phosphate Buffer (pH 6.8).
3.2.P.5	• Justification is required since the submitted specification does not include tests for uniformity of dosage units and loss on drying as recommended by USP. • Justification shall be submitted as the concentration and method of sample and standard solution preparation in assay test is different than that recommended by USP. • Justification is required since drug product manufacturer have proposed 20µl injection volume in chromatographic conditions in assay test instead of 10µl as recommended by USP. • Results of Analytical method verification studies of drug product performed by drug product manufacturer including specificity, repeatability (method precision) and accuracy shall be submitted	• The firm has submitted revised specifications and included tests for uniformity of dosage units and loss on drying as recommended by USP. • The firm have submitted revised method of sample and standard solution preparation in assay test having same concentration of both standard and sample solution. • The firm submitted that writing of 20µl injection volume instead of 10µl injection volume in chromatographic conditions in assay was a human error/typing mistake • Firm have submitted results of Analytical method verification studies of drug product performed by drug product manufacturer including specificity, repeatability (method precision) and accuracy.
3.2.P.8	• Justification is required as 6th month stability study is performed at 04-05-2022 while trial batches are manufactured at 12-2021 before due time (01 month before) of all batches as depicted from raw data sheet and chromatograms at real time and accelerated conditions • COA of the stability batches throughout the stability study is not submitted • Test of uniformity of dosage unit has not been performed at the time of batch release, justify? • Submit documents for the procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	• The firm submitted that 6th month stability study was conducted as realized the provided study was 5th month. The firm has submitted stability study at 6th month time point • ***COA of the stability batches throughout the stability study is not submitted*** • The firm submitted that content uniformity was conducted at the time of batch release but not mentioned in COA of the product. The firm requested to consider the COA of the product submitted now. ***However, the firm have not submitted COA of the product*** • Firm have not submitted documents for the procurement of API • Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is not submitted • Compliance record of HPLC software 21CFR & audit trail reports on product testing is not submitted.

Decision: Deferred for following:

- **Submission of Copies of the Drug substance specifications by Drug product manufacturer**
- **Submission of justification as the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph i.e., uniformity of dosage units, loss on drying.**
- **Submission of COA of the stability batches throughout the stability study**
- **Submission of record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification,

		batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 06 months 06 months real time stability of two batches ICZ1464, ICZ1465 is submitted while three months real time stability study of one batch ICZ1466 is submitted. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Only 03 months accelerated stability study data of batch ICZ1466 is submitted. Batches: (ICZ1464, ICZ1465, ICZ1466)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand POLAC 100mg capsule by SAMI Pharmaceuticals by performing quality tests (Assay). CDP has been performed against the same POLAC 100mg capsule by SAMI Pharmaceuticals in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8) and in Acid media (0.1N HCl with 0.25% w/v SLS).
	Analytical method validation/verification of product	Not submitted.

STABILITY STUDY DATA			
Manufacturer of API	Vision Pharmaceuticals (Pvt.) Ltd. Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad Pakistan. Tel : + 92-51-4493587-90 Fax : + 92-51-4493591		
API Lot No.	ICZ1498		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003

Batch Size	2500 capsules	2500 capsules	2500 capsules
Manufacturing Date	12-2021	12-2021	12-2021
Date of Initiation	13-12-2021	13-12-2021	13-12-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of M/s Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	No document submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm have submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• The applied product contains immediate release pellets while you have applied enteric coated pellets, clarify	• The firm submitted that itraconazole pellets are immediate release while enteric coated pellets was written by mistake and now rectified. The firm submitted revise label as: Each Capsule contains: Itraconazole 22.0% IR pellets equivalent to Itraconazole ……100mg
1.5.5	• You have stated that itraconazole belongs to PPI. Indicate correct Pharmacological class of the API (drug substance) with proper reference.	• The firm have revised Pharmacological class of the API (drug substance) as Antifungal agent
1.6.5	• Submit valid GMP certificate of the Drug Substance manufacturer	• The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	• Firm have submitted Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3
3.2.S.4	• Copies of the Drug substance specifications and analytical	• Firm have submitted Copies of analytical procedures used for routine

	procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer is required." • Drug substance manufacturer have claimed USP specifications while monograph for Itraconazole IR coated pellets are not available in USP., clarification is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Results of dissolution studies given in batch analysis in only 0.1N HCl without SLS, while drug substance manufacturer uses 0.25% w/v SLS in 0.1N HCl., clarification is required	testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer. ***However, Copies of the Drug substance specifications by Drug Product manufacturer is not submitted.*** • The firm submitted that API manufacturer claimed and followed USP specifications because Itraconazole pellets are ready to fill in capsule. • Firm have submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance • ***No clarification is submitted***
3.2.S.7	• Stability study data of drug substance till proposed shelf life shall be submitted	• No reply submitted
3.2.P.2	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph (uniformity of dosage units, dissolution, identification). • A minimum of three time-points should be included for CDP, the time-points for both reference (comparator) and test product being the same as per WHO guidelines while you have performed at only one time points i.e. 15 min, justification is required • As per WHO guideline surfactants should be avoided in comparative dissolution testing while you have used surfactant in CDP, clarify? • Justification is required since pharmaceutical equivalence and CDP studies have not been conducted against the innovator product. • Similarity factor (F2) of the resulting comparative dissolution profiles should be calculated • The brand name of Comparator product mentioned in pharmaceutical equivalence and CDP studies is Polac 100mg capsule while the brand name of product as per available database is rolac 100mg capsule, clarification is required	• ***No justification submitted*** • Fir submitted that study conducted we me-too product due to unavailability of innovator product • The firm has submitted CDP considering multiple time points for both reference (comparator) and test product. CDP has been performed against the POLAC 100mg capsule by SAMI Pharmaceuticals in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8) • ***No justification is submitted*** • Similarity factor (F2) of the resulting comparative dissolution profiles is not provided • ***No clarification is submitted***
3.2.P.5	• Detailed analytical procedures used for testing of the drug product shall be provided.	• Firm has submitted analytical procedures used for testing of the drug product

	• Results of Analytical method verification studies of drug product performed by drug product manufacturer including specificity, repeatability (method precision) and accuracy shall be submitted	• Firm have submitted results of Analytical method verification studies of drug product performed by drug product manufacturer including specificity, repeatability (method precision) and accuracy.
3.2.P.8	• Manufacturing date of pellets as per submitted COA of drug substance manufacturer is 22-12-2021 and release date as per COA is 10-01-2022 while manufacturing of applied product is 12-2021. Justification is required • COA of the stability batches throughout the stability study is not submitted • Test of uniformity of dosage unit has not been performed at the time of batch release, justify? • Submit documents for the procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	• The firm submitted that COA of drug substance was not of the material received and was replaced but unfortunately submitted with the dossier. • ***COA of the stability batches throughout the stability study is not submitted*** • ***No justification is submitted*** • ***Firm has not submitted documents for the procurement of API*** • ***Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is not submitted*** • ***Compliance record of HPLC software 21CFR & audit trail reports on product testing is not submitted.***

Decision: Deferred for following:

- **Submission of Copies of the Drug substance specifications by Drug product manufacturer**
- **Submission of clarification since results of dissolution studies for drug substance (pellets) given in batch analysis in only 0.1N HCl without SLS, while drug substance manufacturer uses 0.25% w/v SLS in 0.1N HCl.**
- **Submission of Stability study data of drug substance till proposed shelf life as the submitted stability data is till 06th months.**
- **Submission of justification as the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph.**
- **Submission of justification for using surfactant in CDP studies which is not recommended as per WHO guideline.**
- **Submission of COA of the stability batches throughout the stability study**
- **Submission of justification for not performing test of uniformity of dosage unit at the time of batch release.**
- **Submission of record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)**

Case No. 04: New cases for registration of Human Drugs on Form 5F (Import)

386.	Name, address of Applicant / Importer	M/s AMGOMED., Office # 4, First Floor Ghausia Plaza, Jinnah Avenue Blue area Islamabad Pakistan

	Name of exporting country	Indonesia
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	Firm has submitted legalized CoPP Certificate No. RG.01.05.32.321.05.21.2804 dated 13-05-2021 issued by BADAN PENGAWAS OBAT DAN MAKANAN. (National Agency of drug and Food Control) Indonesia for FONDRONIC (ZOLEDRONIC ACID) Concentrate for Solution for Infusion; 1 vial /5 mL; The COPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 2 years. **The name of importing country on CoPP is mentioned as Pakistan.**
	Details of letter of authorization / sole agency agreement	Firm has submitted original letter of Authorization dated 28th April, 2021 from M/s PT Fonko International Pharmaceuticals Indonesia. The firm M/s PT Fonko International Pharmaceuticals Indonesia appoint and authorizes M/s Glorious Dexa Singapore PTE. LTD 80 Robin son Road#17-20, Singapore 068898 an exclusive marketer and distributor of Fonko to appoint M/s AMGOMED., Office # 4, First Floor Ghausia Plaza, Jinnah Avenue Blue area Islamabad Pakistan as distributor of product Fondronic Concentrate for solution for infusion (Zoledronic Acid 4mg/5ml) in Pakistan and to submit application of drug registration in Drug Regulatory Authority of Pakistan. M/s PT Fonko International Pharmaceuticals Indonesia is the manufacturer and product license holder of the product in Indonesia.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 26800: dated 28 -09 -2021
	Details of fee submitted	PKR 150,000/-: 16-09-2021 (Slip#71027968991)

	The proposed proprietary name / brand name	FONDRONIC 4mg/5ml Concentrate for Solution for Infusion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5mL contains: Zoledronic acid monohydrate equivalent to zoledronic acid…….4 mg
	Pharmaceutical form of applied drug	Concentrate for Solution for Infusion
	Pharmacotherapeutic Group of (API)	Bisphosphonates WHO ATC code: M05BA
	Reference to Finished product specifications	Not provided
	Proposed Pack size	1 vial x 5ml
	Proposed unit price	AS PER SRO
	The status in reference regulatory authorities	Zoledronic acid Fresenius Kabi 4 mg/5 ml concentrate for solution for infusion by M/s Fresenius Kabi Australia Pvt Ltd MHRA Approved ZOMETA (4mg/5ml) solution for injection USFDA Approved
	For generic drugs (me-too status)	Macdronic Injection 4mg/5ml by M/s Macter International (Reg# 079757)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Hetero Labs Limited., S. No. 10, I.D.A., Gaddapotharam Village, Jinnaram Mandal, Sangareddy District-502319, Telangana, India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25 ºC ± 2ºC / 60 ± 5% RH for 60 months while accelerated stability study is conducted at 40 ºC ± 2ºC / 75 ± 5% RH for 06 months. Batch No# (ZL0030410, ZL0040410, ZL0010215)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted comparative quantitative composition of applied product along with reference product. Firm has also submitted results of pharmaceutical equivalence against the product Zoledronic acid 4mg/5ml injection manufactured by M/s Hetero Labs Ltd and reference product which is Zometa injection 4 mg/5 mL, manufactured by Novartis Pharma Stein AG, Switzerland.
	Analytical method validation/verification of product	***Firm has submitted analytical method verification studies instead of analytical method validation for the applied product by performing test for specificity, accuracy, precision and solution stability***
	Container closure system of the drug product	The final container closure system used for Zoledronic acid concentrate for solution for infusion 4 mg/5 mL is 5 mL round clear cyclic olefin polymer (COP) plastic vial with 20 mm neck covered by 20 mm grey chlorobutyl fluorotec rubber stopper and sealed by aluminium and 20 mm red flip off.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40○C ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 75% ± 5% RH. The real time stability study data is till 36 months for 3 batches.

Batch No.	**Mfg. date**	**Initiation date**
K-10462-00-F-PSC-1	Dec 2015	Dec 2015
K-10462-00-F-PSC-2	February 2016	April 2016
D0004	February 2017	February 2017

Remarks of Evaluator [XI]:

Section	**Observations**	**Response**
1.3.4	Submit copy of Valid Drug Sale License	The firm have submitted valid copy of drug sale license. The details are given below. **License No:** DSL-002-ICT/2013 **Address:** M/s Amgomed office No.4, 1st floor, Ghousia Plaza, Main Jinnah Avenue Blue area Islamabad **Address of Godown:** Office No. 5, First floor Rose-I plaza, I-8 Markaz Islamabad. **Validity:** 30-01-2022 **Renewed upto:** 30-01-2024 **Status:** Drug Sale License by way of Whole Sale
1.5.6	Mention the reference specifications of the finished product	Firm has submitted that Finished product specification is not listed in any compendium, therefore finished product specification was developed in house based on general chapter of European Pharmacopeia and hetero Labs Limited quality documents. The specification of finished product from Hetero Labs Limited is submitted
1.5.15-1.5.20	Commitments must be submitted by applicant (marketing authorization Holder) instead of manufacturer	Firm has submitted commitments as per the guidance document

1.6.5	Submit valid GMP certificate of drug substance manufacturer	Firm has submitted Drug License No. 25/MD/AP/97/B/R dated 23/11/2021 valid upto 21/11/2024 of M/s Hetero Labs Limited., S. No. 10, I.D.A., Gaddapotharam Village, Jinnaram Mandal, Sangareddy District-502319, Telangana, India
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Specifications and analytical procedure from PT Fonko International Pharmaceutical is submitted • The drug product manufacturer has submitted method verification studies for drug substance.
3.2.P.5	Results of Analytical method validation of drug product performed by drug product manufacturer including linearity, range and robustness shall be submitted	We hereby declare that this product is a technology transfer from Hetero Labs Limited and we adopted the same analytical procedure from them. We performed verification (based on USP 43<1226> Verification of Compendial Procedures) to validate the process in our laboratory. Hereby we would like to inform you: • For the assay procedure; intermediate precision, linearity, range and robustness tests were not performed as part of method verification as the same as are available in the method validation document (tech transfer document protocol no. AD6/AMV/P/12-046 and report document no. AD6/AMV/R/12-046. • For the related compounds procedure; accuracy, intermediate precision, limit of detection, linearity, range and robustness tests were not performed as part of method verification as the same as are available in the method validation document (tech transfer document protocol no. AD6/AMV/P/12-039 and report document no. AD6/AMV/R/12-039.

Decision: Approved with innovators specifications and as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

- **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

387.	Name, address of Applicant / Importer	M/s AMB HK ENTERPRISES (PVT) LTD., 2nd Floor, Plaza 60, Commercial, Block-K, Phase 1 DHA Lahore

	The proposed proprietary name / brand name	**ZITHROBAR INJECTION 500mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Active ingredient Name; Azithromycin Strength; 500mg
	Pharmaceutical form of applied drug	Powder for injection (Lyophillized)
	Pharmacotherapeutic Group of (API)	Antibacterials for systemic use, Macrolides
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	Rs 215/-

	The status in reference regulatory authorities	ZITHROMAX 500mg for injection USFDA Approved.
	For generic drugs (me-too status)	Azineu 500mg Injection by M/s Neutro Pharma (Reg# 097656)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Zhejiang Goubang Pharmaceutical Co., Ltd., No.6, Weiwu Road, Hangzhou Gulf Shangyu Economic & Technological Development Zone, Zhejiang China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30 ºC ± 2ºC / 75 ± 5% RH for 24 months while accelerated stability study is conducted at 40 ºC ± 2ºC / 75 ± 5% RH for 06 months. Batch No# (103-180306-11, 103-180307-11, 103-180308-11)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence against the innovator product Zithromax 500mg Inj by performing quality test (pH, Water Content, Bacterial Endotoxin, Sterility, Visible particle, Assay).
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Injection Vial made of Middle Borosilicate Glass tubing (10ml) with brominated rubber stopper and caps made of aluminium-polypropylene combinations
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at

		40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. ***The real time stability study data is submitted for 18 months only.***

Batch No.	Mfg. date	Batch size
1905051	05.05.2019	5000 vials
1905091	09.05.2019	5000 vials
1905131	13.05.2019	5000 vials

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.3	The submitted CoPP confirms that the product strength is not in market of exporting country, clarify?	The firm submitted clarification from Director Quality Department, Hainan Brilliant Pharmaceutical Co., Ltd and stated that the azithromycin for injection 0.5g has been marketed in China (Exporting Country). The person responsible for the application of CoPP misunderstood he exporting country was referring to Pakistan thus ticked wrong column in CoPP.
1.5.2	Strength of Active ingredient shall be stated clearly. In case API is in the form of salt / hydrate, specify the equivalent strength of the base e.g., AAA sodium 50 mg (equivalent to AAA) etc.	The firm have submitted the label claim as: Each vial contains: Azithromycin as dihydrate…….500mg
1.5.15-1.5.20	Commitments must be submitted by applicant (marketing authorization Holder) instead of manufacturer	The firm has submitted commitments as per guidance document
1.6.5	Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required	The firm has submitted GMP certificate No. ZJ20190170 in the name of M/s Zhejiang Goubang Pharmaceutical Co., Ltd., No.6, Weiwu Road, Hangzhou Gulf Shangyu Economic & Technological Development Zone, Zhejiang China valid upto 29/11/2024
3.2.S.4	• Copies of the analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer and drug product manufacturer is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Copies of the analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer and drug product manufacturer is submitted. • Analytical Method Verification studies including specificity, linearity range, precision, accuracy, solution stability and robustness performed by the Drug Product manufacturer for drug substance(s) is submitted.
3.2.P.5	• You have applied for USP specifications. However, the limits for assay test given in specifications is not according to USP monograph, clarify? ***Release specifications; (103%-113%)*** ***Shelf life specifications; (101%-115%)*** ***Monograph: (90%-110%)*** • Test for uniformity of dosage units is not included in specifications recommended by USP • The chromatographic conditions of the analytical method are different from the USP monograph (mobile phase, injection volume, lambda,	The firm submitted that specification applied for azithromycin for injection 0.5g is in-house specification rather than USP, so there is difference in specification, test items and chromatographic conditions compared to USP.

3.2.P.8	• Submit stability study data of drug product till the claimed shelf life	The firm have submitted stability study data of three batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH for 24 months

Decision: Deferred for following points:

- **clarification for not complying USP specifications of finished drug product as USP specifications are more stringent to in-house specifications.**
- **Whether manufacturing has been done via lyophilization or dry powder filling and relevant manufacturing facility there of.**

388.	Name, address of Applicant / Importer	M/s AMB HK ENTERPRISES (PVT) LTD., 2nd Floor, Plaza 60, Commercial, Block-K, Phase 1 DHA Lahore

	Name of exporting country	China
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original legalized CoPP certificate (No. 201910005) issued by Yiyuan Market Supervision Administration of P.R China for vitamin C Injection 500mg/5ml. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP is valid till 23-10-2021.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of Registration & Distribution agreement dated 29-08-2019 from M/s Reyoung Pharmaceutical Co., Ltd. The letter species that the manufacturer appoints **M/s AMB HK ENTERPRISES Pvt Ltd, Lahore** to register and develop pharmaceutical market of their products in Pakistan. The authorization letter remains valid for 05 years from the date of product registration certificate. The letter issued for vitamin C injection 500mg/5ml in addition to 08 other product.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging

		☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 26417: 23-09-2021
	Details of fee submitted	PKR 150,000/-: 26-05-2021 (Slip#1272535835)
	The proposed proprietary name / brand name	VITA-C INJECTION 500mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Ascorbic Acid 10.0% w/v.
	Pharmaceutical form of applied drug	Solution for Injection
	Pharmacotherapeutic Group of (API)	Ascorbic acid (vitamin C), plain ATC Code: A11GA
	Reference to Finished product specifications	BP
	Proposed Pack size	5ml type I glass ampoule; 10 ampoules/tray,10trays/boxes*12boxes/carton
	Proposed unit price	PKR 21.35/unit
	The status in reference regulatory authorities	Ascorbic Acid Injection BPC 500mg/5ml MHRA Approved.
	For generic drugs (me-too status)	Ascorbic Acid Injection 500mg by M/s Enam Ellahie Karachi (Reg# '004784)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	CSPC Weisheng Pharmaceutical (Shijiazhuang) Co., Ltd., No. 236 Huanghe Street High-tech Industrial Development Zone, Shijiazhuang City, Hebei Province, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30 ºC ± 2ºC / 65 ± 5% RH for 36 months while accelerated stability study is conducted at 40 ºC ± 2ºC / 75 ± 5% RH for 06 months. Batch No# (1150452001, 1150452002, 1150452003)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study of drug product.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence against the reference product acido Ascorbico labesfal injection 500mg by performing quality test (identification, Acidity, Oxalic acid, Bacterial Endotoxin, Sterility, Visible particle, content of ascorbic acid).
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	USP type-I glass ampoule (5ml)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 75% ± 5% RH. The real time stability study data is submitted for 36 months only.

Batch No.	Mfg. date	Date of initiation
173212044	03-2017	03-2017
173212045	03-2017	03-2017
173212046	03-2017	03-2017

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.3	Submit valid CoPP certificate for the applied product	Firm has submitted original legalized CoPP certificate (No. 2021120004) issued by Yiyuan Market Supervision Administration of P.R China for vitamin C Injection 500mg/5ml. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP is valid till 06-12-2023.
1.5.2	Strength of Active ingredient shall be stated clearly. In case API is in the form of salt / hydrate, specify the equivalent strength of the base e.g., AAA sodium 50 mg (equivalent to AAA) etc.	Each 5ml ampoule contains: Ascorbic acid …….500mg
1.5.15-1.5.20	Commitments must be submitted by applicant (marketing authorization Holder) instead of manufacturer	Firm has submitted commitments as per guidance document
1.6.5	• The drug substance manufacturer as per section 3.2.S.2 is CSPC Weisheng Pharmaceutical (Shijiazhuang) Co., Ltd., No. 236 Huanghe Street High-tech Industrial Development Zone, Shijiazhuang City, Hebei Province, China while you have written Reyoung Pharmaceutical Co., Ltd., No.1 Ruiyang Road, Yiyuan County, Shandong Province, China in this section, clarify? • Submit GMP certificate of drug substance manufacturer	• The firm submitted that drug substance manufacturer is CSPC Weisheng Pharmaceutical (Shijiazhuang) Co., Ltd., No. 236 Huanghe Street High-tech Industrial Development Zone, Shijiazhuang City, Hebei Province, China and it was a mistake at their end by writing wrong name of manufacturer • The firm has submitted copy of GMP certificate No. HE20150023 in the name of M/s CSPC Weisheng Pharmaceutical (Shijiazhuang) Co., Ltd., No. 236 Huanghe Street High-tech Industrial Development Zone, Shijiazhuang, China valid upto 14/02/2020
3.2.S.4	• The specifications and analytical procedure of the drug substance provided is according to Chinese pharmacopeia while the product is available in BP. Justify that specification of drug substance are	• The firm submitted that specifications of drug substance provided according to Chinese pharmacopeia is from API manufacturer, the finished product manufacturer test the API according to BP. Now the finished product

	equivalent to BP specifications (the number and limits of tests are within range of BP.) • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	manufacturer have supplemented the standards for raw material • Firm have submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer. • The firm submitted that vitamin C produced by CSPC WEISHENG is tested in strict accordance with Chinese Pharmacopoeia, ***there is not need to verify the analytical method.***
3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided	The firm stated that the primary reference standard is from EDQM and government sector, hence no COA is submitted.
3.2.P.2.1.1	• Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to reference product. • Applied product: Ascorbic acid, Sodium bicarbonate, Sodium metabisulfite, cysteine HCl, Disodium edetate, water for injection • Reference product: Ascorbic Acid, Sodium Bicarbonate, Sodium Metabisulphite Hydrochloric acid Water for injections • Details of reference / comparator product including batch numbers, manufacturing & expiry date in pharmaceutical equivalence are required to be provided • Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product?	• Firm have submitted Compatibility studies of the Drug Substance(s) with excipients and observe the colour change and change in ph during the study • Firm have provided details of reference / comparator product including batch numbers, expiry date in pharmaceutical equivalence • The firm submitted that at that time innovator product has been delisted

Decision: Deferred for submission of following documents:

- **Pharmaceutical equivalence against innovator drug ptoduct.**
- **Verification studies of analytical method of drug substance by drug product manufacturer.**

Remarks of Evaluator [XI]:

Section	**Observations**	**Response**
1.4.1	Applicant needs to clarify whether the applied product (drug product) is intended for sale in domestic market or both for	The firm have submitted that applied product is intended both for domestic and export sale

	domestic and export market. There is no column for overseas sale	
1.5.2	Strength of Active ingredient shall be stated clearly. In case API is in the form of salt / hydrate, specify the equivalent strength of the base e.g., AAA sodium 50 mg (equivalent to AAA) etc.	Each vial contains: Oxaliplatin …….50mg
1.5.5	Indicate Pharmacological class of the API (drug substance) with proper reference. Also, state the WHO ATC code for each distinct therapeutic indication.	Firm have indicated Pharmacological class of the API (drug substance). Third generation platinum anticancer drug ATC Code; L01XA03
1.5.15-1.5.20	Commitments must be submitted by applicant (marketing authorization Holder) instead of manufacturer	Firm have submitted commitment as per guidance document
1.6.5	• The drug substance manufacturer as per section 3.2.S.2 is Kunming Guiyan Pharmaceutical Co., Ltd., Room 706, Integrated Business Building in Jinding Science & technology zone, 690#, Xuefu Road, Kuming, Yunnan, China, 650033 while you have written JARI Pharmaceutical Co., Ltd., 18 Zhenhua Road, Lianyungang City, Jiangsu P.R China, 222006 China in this section, clarify? • Submit GMP certificate of drug substance manufacturer	• The firm submitted that drug substance manufacturer is Kunming Guiyan Pharmaceutical Co., Ltd., Room 706, Integrated Business Building in Jinding Science & technology zone, 690#, Xuefu Road, Kuming, Yunnan, China, 650033 and it was a mistake at their end by writing wrong name of manufacturer • The firm has submitted copy of GMP certificate No. YN20170040 in the name of M/s Kunming Guiyan Pharmaceutical Co., Ltd., Inside Kunming Precious Metals Research Institute, No. 988, Keji Road, High-tech Development Zone, Kunming City China valid upto 24/12/202
3.2.S.4	• Test for content of platinum is not included in specifications although recommended by USP • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both drug substance manufacturer and Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Test results of Batch analysis are submitted as per USP specifications. However, the specifications of applied product are given according to EP, clarify?	• We refer to EP, content of platinum is not included in EP specifications • Firm have submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient Drug Product manufacturer. ***Copies of Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is not submitted*** • ***Analytical Method Verification studies is not submitted as per requirement*** • The firm submitted batch analysis of drug substance as per EP.
3.2.S.8	Justify why stability study data of different batches of drug substance conducted at accelerated and real time conditions is submitted.	Firm have submitted long term stability study data at 25 ºC ± 2ºC / 60 ± 5% RH for 36 months of same batches for which stability study data at accelerated conditions is submitted. Batch No# (L20090107, L20090108, L20090109)
3.2.P.2	• Reference product has used lactose monohydrate while you have use lactose	• The firm submitted that through conversion lactose content is consistent with reference product

	in composition of applied product, clarify? • Submit Pharmaceutical equivalence of the applied product against the innovator product	• ***The firm submitted pharmaceutical equivalence of applied product with product of Jiangsu Hengrui Pharmaceutical Co., Ltd***
3.2.P.5	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug product shall be submitted.	Firm have submitted Analytical Method Verification studies including specificity, and repeatability (method precision). ***However, results of accuracy test is still not submitted***
The firm has applied for Chinese pharmacopeia specifications while the monograph for the applied product is available in USP and the limits of tests of applied product are in line with USP specifications.		

Decision: Deferred for following:

- **Submission of Pharmaceutical equivalence studies against the innovator product.**
- **Submission of Copies of Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer.**
- **Submission of Analytical Method Verification studies for drug substance**
- **Submission of results of accuracy test in method verification studies for drug product**

Case No. 06: Deferred cases:

a. Deferred cases of Human Drugs on form 5

393.	Name and address of manufacture / Applicant	M/s M.S. Enterprises Ltd., 3.5km Raiwind Kot Radha kishan Road, kasur
	Brand Name + Dosage Form and Strength	Pakcip 200mg/100ml Infusion

	Composition	Each ml Contains: Ciprofloxacin……...2mg
	Dairy No. date of R &I fee	Form-5 Dy.No 16542 dated 04-05-2018 Rs.20,000/- Dated 03-05-2018 *Duplicate Dossier, R&I Verified*
	Pharmacological Group	Fluoroquinolones
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	100ml; As per SRO
	Approval status of product in Reference Regulatory Authorities	Ciprofloxacin 2mg/ml solution for infusion (MHRA approved)
	Me-too-status	Riget 200Mg/100ml Infusion by Saydon Pharmaceutical Industries (Pvt) Ltd (Reg#36936)
	GMP Status	The firm was inspected on 22.01.2020 and conclusion of inspection was: Keeping in view the observations and after going through the documentation and overall operations, the panel was of the opinion that the firm M/s M.S. Enterprises Ltd., Lahore was GMP compliant on the day of inspection
	Previous Remark of Evaluator [XI]	• The firm submitted copy of fee challan No. 0776351 dated 03.05.2018 submitted for the applied product. • The firm have revised the label claim and mentioned the correct salt form of ciprofloxacin along with submission of Rs. 5000/- on deposit slip No#2103609 dated 04.05.2021. The revised label claim is as under: Each 100ml Vial Contains: Ciprofloxacin Lactate 254mg eq. to Ciprofloxacin …200mg • Clarification is required as in manufacturing outline filling in polypropylene bags is mentioned while in type of container PE 100ml bottle is mentioned
	Previous Decision (307-DRB)	• Deferred for clarification for type of primary packaging container of the applied formulation
	Evaluation by PEC	• The firm submitted that solution is filtered close to filling point of the machine. After filtration the solution is filled into Low Density Polyethylene (LDPE) 100ml Plastic Bottles and then these bottles are packed in PE (polyethylene) bags. However, the reference formulation is packed in PVC bag contained in a polypropylene/polyester aluminium/polyester pouch.
	Decision: Deferred for deliberation regarding formulation and salt form of ciprofloxacin.

397.	Name and address of manufacture / Applicant	M/s Hudson Pharma Private Limited. Site-Plot No. D-93, North Western Industrial Zone, Port Qasim Authority, Pakistan
	Brand Name+Dosage Form+Strength	Recuro UD Eye Drops (solution)
	Composition	Each ml Contains: Carboxymethylcellulose Sodium…..…5mg Glycerin……10mg Polysorbate 80……...5mg
	Dairy No. date of R &I fee	Form-5 Dy.No 10357 dated 05-03-2019 Rs.20,000/- 05-03-2019
	Pharmacological Group	Lubricating and moisturizing comfort solution
	Type of form	Form 5
	Finished product specifications	Manufacturer's specifications
	Pack size and Demand Price	0.4ml (30's ampoules), 0.4ml (60's ampoules); As per SRO
	Approval status of product in Reference Regulatory Authorities	
	Me-too-status	
	GMP Status	Firm was inspected on 03-04-2019 and conclusion of inspection was: Overall cGMP is found at acceptable level and the management is committed for continual improvement and has assured further cGMP compliance.
	Previous Remark of Evaluator [XI]	• The firm provided evidence of RRA. Refresh Optive Advanced Lubricant Eye Drops OTC product by M/s Allergan Inc, (Daily Med) • The firm provided evidence of me-too. Recuro Drops 0.5% by M/s Hudson Pharma (Reg#091123). However, the provided me-too is not as per applied product (contain only carboxymethyl cellulose 5mg).
	Previous Decision (307-DRB)	• Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.
	Evaluation by PEC	• The firm again provided evidence of same me-too. Recuro Drops 0.5% by M/s Hudson Pharma (Reg#091123). However, the provided me-too is not as per applied product (contain only carboxymethyl cellulose 5mg). • The firm itself revised the formulation and revised the label claim along with submission of Rs 30000/- on deposit SlipNo.991599286662. The revised label claim is as under: Each ml Contains: Carboxymethylcellulose Sodium…..…5mg Evidence of RRA: Celluvisc 0.5 %w/v eye drops solution (Ireland approved) Pack size: 30's (0.4ml LDPE container), 60's (0.4ml LDPE container) • The same molecule is already registered with the firm

		• The firm submitted revised master formulation of already applied product containing all three APIs.
	Previous Decision (313-DRB)	• Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm OR submission of stability study data as per the guidelines approved in 293rd meeting of Registration Board.
	Evaluation by PEC	• The firm submitted that they have already registered RECURO (Carboxymethylcellulose) Eye Drops 5mg in multi-dose container of 15ml with the registration No. 091123. • The firm further stated that they want the same composition in unit dose container of 0.4mlx30's, but mistakenly we had added two of its excipients (glycerin & polysorbate) in composition of registration application. For the same we have submitted the fee of standardization of formulation as per international reference and locally available product and requested to accept the clarification.
	Previous Decision (316-DRB)	• Deferred for clarification regarding manufacturing of applied product in the proposed manufacturing facility "Plastic ampoules (BFS) section.
	Evaluation by PEC	• The firm submitted that our product is a unit dose formulation of 0.4ml that is available in plastic ampoules as per the innovator product " Celluvisc 0.5% w/v eye drops solution". • The firm further submitted that we have Rommelag 360M filling machine (BFS) which has the capacity to fill the volume from 0.1ml to 40ml, and the firm also submitted latest GMP report for evidence. • It is to submit that carboxy methyl cellulose sodium 0.5% eye drops is a stability molecule
	Decision:Registration Board deliberated the matter in detail and observed that the applied formulation is already registered in Pakistan in 15ml fill volume as multi-dose (LDPE) container and instant application is with same formulation and container closure system and thus stability study is not required being a generic product applied on Form 5. Therefore, the Board decided to approve the product with innovator's Specifications.	
398.	Name and address of manufacture / Applicant	M/s Wilson's Pharmaceuticals., 387-388, I-9, Industrial Area, Islamabad
	Brand Name + Dosage Form+ Strength	Wilsonide Plus Dry Powder Inhaler 400/12 mcg capsule
	Composition	Each DPI Capsule Contains: Budesonide……400mcg Formoterol fumarate dihydrate…….12mcg
	Dairy No. date of R &I fee	Form-5 Dy.No 6952 dated 19-02-2019 Rs.20,000/- 19-2-2019
	Pharmacological Group	Glucocorticosteroid/Selective β2 adrenoceptor agonist
	Type of form	Form 5
	Finished product specifications	Manufacturer's specifications
	Pack size and Demand Price	10's, 20's, 30's; As per SRO
	Approval status of product in Reference Regulatory Authorities	Symbicort Turbohaler 400 micrograms / 12 micrograms / inhalation, inhalation powder (MHRA approved)
	Me-too-status	Formiget DPI Capsule 400mcg+12mcg by Getz Pharma (Reg#098828)
	GMP Status	The firm was inspected on 24-01-2018 and conclusion of inspection was: "Overall the firm was found to be operating at a very good level of CGMP Compliance at the time of inspection."

	Remark of the Evaluator [XI]	
	Remarks	**Response by the firm**
	• As per 290th decision of Registration board, provide evidence of separate manufacturing facility/section for manufacturing of DPIs including specialized mixing facility to ensure the required particle size of the formulation blend.	The firm submitted approved layout plan for manufacturing of DPI and panel constituted letter for onsite inspection but have no approved section/manufacturing facility at present. Moreover the firm submitted a list of equipments that will be used in manufacturing including eqipments for DPI mixing and DPI filling.
	• As per 290th decision of Registration board, provide evidence of equipments for performing the test of "Uniformity of Delivered Dose" and "Aerodynamic Particle Size Distribution" as per Pharmacopoeia.	The firm informed that equipments for performing the test of "Uniformity of Delivered Dose" and "Aerodynamic Particle Size Distribution" have been procured and are available for testing.
	• The reference formulation have mentioned the hydrated form (dihydrate) of Formoterol fumarate in the label claim while you have not mentioned the hydrated form. Revise the label claim as per reference formulation mentioning the hydrated form along with submission of applicable fee.	The firm have revised the label claim mentioning the hydrated form of Formoterol fumarate in the label claim
	• Submission of stability studies data of three batches as per Requirements of Registration Board decision of 293rd meeting.	The firm have submitted commitment for performing the stability study as per Requirements of Registration Board decision of 293rd meeting.
	Previous Decision (296-DRB)	Deferred for confirmation of required manufacturing facility "Dry Powder inhaler" section with manufacturing and testing equiments for applied formulation.
	Evaluation by PEC	• The firm have submitted letter No. F. 1-19/92-Lic (Pt-I) dated 15th September 2021 issued by secretary Central Licensing Board confirming the presence of Dry Powder Inhaler Capsule (Steroidal) section • Moreover, the firm submitted a list of equipments that will be used in manufacturing and testing for applied formulation. • Stability studies data of three batches as per Requirements of Registration Board decision of 293rd meeting is not submitted.
	Decision: Deferred for Submission of Stability study data as per guidelines approved in 293rd meeting of Registration Board.

	Pack size and Demand Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Vancomycin 500mg Powder for Solution for Infusion MHRA approved
	Me-too-status	Vancozon 500mg Injection by M/s Horizon Healthcare (Reg#099987)
	GMP Status	The firm M/s Paramount Pharmaceuticals was inspected on 08-02-2019 and conclusion of inspection was: During review of approval of above mentioned sections/manufacturing facilities, it was assessed that following two sections needs regularization from Licensing Division: 1- Cream/Ointment 2- Tablet (General) The firm has applied for the regularization of same in Licensing Division. Keeping in view the observations noticed during inspection as narrated above, the panel is of the opinion that the firm may be allowed to start manufacturing in the light of GMP guidelines. The panel further recommended granting the GMP certificate for export purpose. Certificate of GMP Issued to M/s Bio Labs Pvt on 25-05-2019.
	Previous Remark of the Evaluator [XI]	• The firm have submitted differential fee Rs. 55000/- on deposit slip No# 55914109 for contract manufacturing. • Form 5 is submitted by the applicant i.e. M/s Paramount Pharmaceuticals duly signed by the applicant • The firm submitted list of 08 approved sections of applicant. i.e. M/s Paramount Pharmaceuticals • The firm submitted list of 11 products registered/approved on contract manufacturing in name of applicant. i.e. M/s Paramount Pharmaceuticals • The firm submitted list of 14 products applied for contract manufacturing by the applicant.

		• The firm submitted copy of contract manufacturing agreement between M/s Paramount Pharmaceuticals and M/s Bio Labs Pvt Ltd
	Previous Decision (316-DRB)	• Deferred for confirmation of method of manufacturing of applied formulation as well as of innovator, whether by lyophilization or otherwise.
	Evaluation by PEC	• Firm has submitted revised form 5 and revised manufacturing method and stated that the product is manufactured by lyophilization.
	Decision: Approved. • **Firm shall submit fee of Rs.7,500/- for correction/pre-approval change in the method of manufacture, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Submission of GMP audit report for both M/s Paramount Pharmaceuticals and M/s Bio Labs Pvt Ltd from QA&LT Division, valid within last three years** • **Registration Board in its 293rd meeting held on 06-08th January 2020 allowed contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Plot No.145 Industrial Triangle, Kahuta Road, Islamabad for** **following sections:** **Dry Suspension (Cephalosporin)** **Capsule (Cephalosporin)** **Dry vial injectable (Cephalosporin)** **lyophilized vial injectable (General)**	

404.	Name and address of manufacture / Applicant	M/s Aulton Pharmaceuticals., Plot No. 84/1, Block A, Phase V, Industrial Estate, Hattar, K.P.K
	Brand Name + Dosage Form and Strength	Aultopride 50mg Tablet
	Composition	Each Film Coated Tablet Contains: Itopride…….50mg
	Dairy No. date of R &I fee	Form-5 Dy.No 24088 dated 11-07-2018 Rs.20,000/- Dated 11-07-2018
	Pharmacological Group	Propulsive
	Type of form	Form 5
	Finished product specifications	JP
	Pack size and Demand Price	1x10's, 1x30's; As per SRO
	Approval status of product in Reference Regulatory Authorities	Ganaton 50mg film coated tablet (PMDA) Japan Approved
	Me-too-status	Itonext 50mg Tablet by M/s Next Pharmaceutical Products (Reg#095612)
	GMP Status	The firm was inspected on 27-06-2019 and conclusion of inspection was: As per observations made during inspection, the manufacturing, quality control and environmental facilities, provided the qualified staff employed, the documentation maintained, implementation of the SOP's the GMP compliance status of the firm M/s Aulton Pharma is found to be satisfactory.
	Previous Remark of the Evaluator [XI]	• The firm have claimed for JP specifications and the official monograph is not available in any pharmacopeia • The firm have not mentioned the salt form of itopride in the label claim. Revise the label claim as per reference formulation mentioning the salt form of itopride along with submission of applicable fee. • The firm did not submit 1st page of form 5 • The firm submitted revised master formulation and removed methylene chloride from formulation
	Previous Decision (307-DRB)	Deferred for following: • Revision of the label claim mentioning the salt form of itopride as per reference formulation along with submission of applicable fee.

		• Submission of 1st page of form 5 as per prescribed format
	Evaluation by PEC	• The firm have revised the label claim and mentioned the salt form of itopride as per reference formulation along with submission of Rs. 7500/- on deposit slip#52202875778. The revised label claim is as under: Each Film Coated Tablet Contains: Itopride hydrochloride…….50mg • Firm have submitted 1st page of form 5 as per prescribed format
	Decision: Approved with innovator's specifications and following label claim: **Each Film Coated Tablet Contains:** **Itopride hydrochloride…….50mg** **Firm shall submit the fee of Rs. 22,500/- for correction/pre-approval change in composition (correction/change of salt form of the drug substance), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**	
405.	Name and address of manufacture / Applicant	M/s Aulton Pharmaceuticals., Plot No. 84/1, Block A, Phase V, Industrial Estate, Hattar, K.P.K

	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	3mlx5's; As per SRO
	Approval status of product in Reference Regulatory Authorities	Econac 75mg/3ml Solution for Injection MHRA Approved
	Me-too-status	Difisal 75mg/3ml Injection by M/s Iqra Pharmaceuticals (Reg# 097721)
	GMP Status	The firm was inspected on 27-06-2019 and conclusion of inspection was: As per observations made during inspection, the manufacturing, quality control and environmental facilities, provided the qualified staff employed, the documentation maintained, implementation of the SOP's the GMP compliance status of the firm M/s Aulton Pharma is found to be satisfactory.
	Previous Remark of the Evaluator [XI]	• The firm have claimed for USP specifications and the official monograph is not available in any pharmacopeia. • The applied label claim is not as per reference formulation. Revise the label claim as per reference formulation along with submission of applicable fee. • Provide evidence of required manufacturing facility/section approval letter
	Previous Decision (307-DRB)	Deferred for following: • Revision of the label claim as per reference formulation along with submission of applicable fee. • Evidence of required manufacturing facility / section from Licensing Division.
	Evaluation by PEC	• The firm have revised the label claim and mentioned the per reference formulation along with submission of Rs. 7500/- on deposit slip#77164606773. The revised label claim is as under: Each 3ml ampoule contains: Diclofenac sodium……75mg • The firm have submitted cGMP certificate issued on 04-06-2021 based on inspection conducted on 11-12-2020 showing presence of Liquid Injectable general section.
	Decision: Approved with innovator's specifications and following label claim:	

	Each 3ml ampoule contains: **Diclofenac sodium……75mg**	

406.	Name and address of manufacture / Applicant	M/s Hi-Med Pharmaceuticals., 208C Sunder Industrial Estate, Lahore, Pakistan
	Brand Name + Dosage Form and Strength	Medonac 75mg Tablet
	Composition	Each enteric coated tablet contains: Diclofenac sodium……..75mg
	Dairy No. date of R &I fee	Form-5 Dy.No 9946 dated 04-03-2019 Rs.20,000/- Dated 28-02-2019
	Pharmacological Group	NSAIDS
	Type of form	Form-5
	Finished product specifications	USP
	Pack size and Demand Price	2x10's; As per SRO
	Approval status of product in Reference Regulatory Authorities	VOLTAREN (25mg, 50mg, 75mg) Delayed Release/ enteric-coated tablets USFDA Approved Discontinued **Federal Register determination that product was not discontinued or withdrawn for safety or efficacy reasons**
	Me-too-status	Torelief 75mg Tablet by M/s Maple Pharmaceuticals (Reg.# 058203)
	GMP Status	The firm M/s Himed Pharma was inspected on 7.04.2018, wherein grant of DML was recommended for 4 sections.
	Previous Remark of the Evaluator [XI]	• Revise the 1st page of form 5 as per approved format • Undertaking at the end of form 5 is not signed by the technical persons. • All the details of form 5 submitted are of the wimits pharmaceuticals, clarify?
	Previous Decision (296-DRB)	Deferred for clarification regarding submission of details of M/s Wimits pharmaceuticals while applied product is for Hi-Med Pharmaceuticals
	Evaluation by PEC	• Firm have submitted revised form 5 as per prescribed format and undertaking at the end of form 5 signed by technical persons. • The firm submitted that writing wrong name of company was a typographical error and submitted revised documents.
	Decision: Approved.	

b. Deferred case of Priority Registration of Fludrocortisone tablets

The Drug Regulatory Authority of Pakistan in its 91st meeting held on 4th September 2020, exercising its power under Rule 26 of Drugs (LRA) Rules amended vide SRO 713(I)/2018 dated 8th June, 2018, allowed to submit registration applications on Form 5 / Form 5-A / Form 5-D instead of Form 5F, for Registration of Fludrocortisone tablets in light of approvals granted by the reference regulatory authorities and with the following additional conditions:

i. The applicants can submit their applications till 30-09-2020 and these applications will be considered out of queue.
ii. Registration Board may consider grant of registration and submission of data of product development and 6 months accelerated and 6 months real time stability studies data before sale of product along with other data as may be required.

407.	Name and address of manufacture / Applicant	M/s Pharmix Laboratories Pvt Ltd., 21 Km, Ferozepur Road, Lahore
	Brand Name+Dosage Form+Strength	Flocort 0.1mg Tablet
	Composition	Each Tablet Contains: Fludrocortisone Acetate……0.1mg
	Dairy No. date of R &I fee	Form-5D Dy.No 25619 dated 30-09-2020 Rs.50,000/- 30-09-2020
	Pharmacological Group	Mineralocorticoid
	Type of form	Form 5D
	Finished product specifications	USP
	Pack size and Demand Price	As per SRO

	Approval status of product in Reference Regulatory Authorities	Fludrocortisone Acetate 0.1mg Tablets MHRA Approved
	Me-too-status	
	GMP Status	The firm was inspected on 13.09.2019 with the following recommendations: The panel of inspector recommends the renewal of M/s Pharmix Laboratories Pvt Ltd. Located at 21 Km, Ferozepur Road, Lahore bearing DML No. 000397 subject to verification of all approved sections by the licensing division, DRAP, Islamabad.
	Previous Remark of the Evaluator [XI]	• The firm have mentioned only generic name of product and does not mentioned the dosage form, strength and brand name of drug on fee challan • ***The firm submitted letter No. F. 1-28/93-Lic issued by secretary central licensing board dated 30-06-2020 confirming the presence of tablet hormonal section and not tablet steroidal section***
	Previous Decision (297-DRB)	• Deferred for evidence of approval of required manufacturing facility for the applied product.
	Evaluation by PEC	• The firm have submitted a letter stating that they are having Steroidal Hormonal section (***on section approval it is mentioned Hormonal section as in 2008 there was no classification***) and having steroidal hormone products like methyl testosterone tablets Registration No#064653 under manufacturing so as we are having approved Steroidal Hormone section, and requested to approve the applied product.
	Decision: Deferred for evidence of approval of required manufacturing facility / section from Licensing Division.	

c. Deferred cases of Human Drugs on form 5F (Import)

408.	Name, address of Applicant / Importer	M/s Biocare Pharmaceutica. Address: 807 Shadman-1, Lahore

	The proposed proprietary name / brand name	AZTAM, AZOM, AZENOT
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains mixture of Aztreonam and Arginine equivalent to Aztreonam 1.0g
	Pharmaceutical form of applied drug	Sterile powder for injection white or off-white powder or loose cake in 10ml tubular vial, sealed with rubber stopper and aluminium-plastic combination cap.
	Pharmacotherapeutic Group of (API)	Anti-infectives for systemic use-Monobactams ATC code: J01DF01
	Reference to Finished product specifications	USP 39 ***&CP (Chinese Pharmacopeia)***
	Proposed Pack size	1's
	Proposed unit price	Rs 800/- single dose vial

	The status in reference regulatory authorities	Azactam (Aztreonam for injection) 1 gm by M/s Bristol Myers Squibb Co., (USFDA Approved).
	For generic drugs (me-too status)	Azactam (Aztreonam) 1 gm Injection of Squibb (Karachi) (Reg # 009002)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Fuan Pharmaceutical Group Chongqing Bosen Pharmaceutical Co., Ltd; Address: No.1, Huanan Yi Road, Changshou, Chongqing, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The accelerated study is complete for 3 batches at 40±2°C/75±5%RH (Batch No. Az(Ar)150101V, Az(Ar)150102V, *Az(Ar)150103V).* The real time stability data is conducted at 30±2°C/65±5%RH (Batch No. Az(Ar)150101V, Az(Ar)150102V, *Az(Ar)190101).* The stability study data of two batches is performed till 36 months while stability of one batch (No# Az(Ar)190101) is performed upto 18th months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Comparative Specifications of Test performed with Reference Product Azactam (Aztreonam) 1 gm of Bristol Myers Squibb.
	Analytical method validation/verification of product	Firm has submitted analytical method validation/verification studies for the applied product.
	Container closure system of the drug product	Low Borosilicate tubular vial, sealed with Halogenated butyl rubber stopper, covered by aluminium-plastic combination cap for antibiotic bottle
	Stability study data of drug product, shelf life and storage conditions	• Firm has submitted stability study data of 3 batches of Aztreonam for Injection 1.0g vial. The firm has submitted accelerated stability study data at 40°C ± 2°C / 75% ± 5% RH for 6 months and real time stability study data at 30 °C ±2 °C / 65 % ± 5%RH for 24 months. •

Batch No.	Mfg. Date	Initiation date
20181201	Dec.12, 2018	Dec.12, 2018
20190101	Jan.4, 2019	Jan.4, 2019
20190102	Jan.4, 2019	Jan.4, 2019

Evaluation by PEC [XI]:

Section	Observations	Response
1.3	Provided form 5F is from the manufacturer / Marketing authorization holder side while it should be from the applicant holding the Drug sale license.	New Form 5F duly signed/stamped by Drug Sale License holder Biocare Pharmaceutica is submitted
1.3.4	Provide valid legalized GMP certifcate from the manufacturer as the name and adress of manufacturer in the submitted GMP is different from the one verified from China CFDA website	**Title as per Online Link:** Hainan Hua*ng*lon*g* Pharmaceutical Co., Ltd. **Address:** *No. 8, Sanheng Road, Yaogu*, National High-tech Industrial Development Zone, Haikou, Hainan Province **Title as per submitted GMP:** Hainan Hualon Pharmaceutical Co., Ltd **Address:** *No. 8, Three Cross Road, Medicine Valley*, National Hi-Tech Industrial Development Zone, Haikou, Hainan Province The firm submitted that they have two manufacturing site; 1. Pharmacy Valley Three Cross Road No.8, Haikou National Hi- Tech Industrial Development Zone, Hainan Province 2. Guilinyang Economic Development Area, Haikou Hainan (for tablets). Aztreonam for injection is in 1st manufacturing address.
1.5.6	In Form 5F you have mentioned both USP 39 &CP (Chinese Pharmacopeia) reference for the product under section 1.5.6. specify a particular specification for applied product.	***Manufacturer/In-house quality specifications referenced USP39 and Chinese Pharmacopoeia parameters/limits*** Referencing USP and Chinese Pharmacopoeia, we established our enterprise quality specifications. Our enterprise quality specifications are stringent in which limits or parameters comply with both USP and Chinese Pharmacopoeia reference standard. For the critical items, our enterprise specifications are equivalent to, or even stricter than USP. For example, pH, sterile, water, related substances are equivalent to USP., while bacterial endotoxins and assay are stricter than USP. Below reference is given for DRAP reference.

Comparison of Aztreonam API Quality specifications

Items		ChP2020	USP43	Enterprise quality specification (Mixture of Aztreonam and arginine)
Tests	pH	2.2-2.8	4.7-6.9	4.7-6.9
	Residue on ignition	Not more than 0.1%	Not more than 0.1%	Not more than 0.1%
	Related substances	Single impurity:≤1.5% Sum: ≤3.5%	Open-ring aztreonam and open-ring desulfated aztreonam: ≤1.0%; Aztreonam E-isomer: ≤ 0.5%; Aztreonam ethyl ester: ≤ 1.5%; Any individual unspecified impurity: ≤0.1%; Total impurities: ≤3.0%;	Single impurity:≤1.5% Sum: ≤3.0%
	Sterile	Sterile	Sterile	Sterile
	Water	Not more than 2.0%	Not more than 2.0%	Not more than 1.5%
	Bacterial endotoxins	Less than 0.17EU per 1mg.	Less than 0.17EU per 1mg.	Less than 0.1EU per 1mg.
	Heavy metals	Not more than 10ppm	Not more than 30ppm	Not more than 10ppm
Assay		It contains NLT 93.0% and NMT 103.0% of aztreonam ($C_{13}H_{17}N_5O_8S_2$), calculated on the anhydrous basis.	It contains NLT 92.0% and NMT 105.0% of C13H17N5O8S2, calculated on the anhydrous and solvent-free basis.	It contains NLT 95.0% and NMT 103.0% of aztreonam ($C_{13}H_{17}N_5O_8S_2$), calculated on the anhydrous and arginine-free basis.

*Green is equivalent; Red is stricter.

Comparison of Aztreonam for injection Quality specifications

Items		Enterprise quality specification	ChP2020	USP43
Tests	pH	4.5-7.5	4.5-7.5	4.5-7.5
	Sterile	Sterile	Sterile	Sterile
	Water	Not exceed 2.0%	Not exceed 2.0%	Not exceed 2.0%
	Related substances	Single impurity:≤1.5% Sum: ≤5.0%	Single impurity:≤1.5% Sum: ≤5.0%	/ (Remarks: It has been reflected in the quality standard of API)
	Bacterial endotoxins	Less than 0.15EU per 1mg.	Less than 0.17EU per 1mg.	Less than 0.17EU per 1mg.
Assay		It contains not less than 91.0% and not more than 103.0% of aztreonam ($C_{13}H_{17}N_5O_8S_2$), calculated on the anhydrous and arginine-free basis.	It contains not less than 91.0% and not more than 103.0% of aztreonam ($C_{13}H_{17}N_5O_8S_2$), calculated on the anhydrous and arginine-free basis.	It contains NLT 90.0% and NMT 105.0% of aztreonam ($C_{13}H_{17}N_5O_8S_2$), calculated on the anhydrous and arginine-free basis.
		Each container contains not less than 90.0% and not more than 115.0% of aztreonam ($C_{13}H_{17}N_5O_8S_2$), calculated on basis of the average weight of contents.	Each container contains not less than 90.0% and not more than 115.0% of aztreonam ($C_{13}H_{17}N_5O_8S_2$), calculated on basis of the average weight of contents.	Each container contains NLT 90.0% and NMT 120.0% of the labeled amount of aztreonam ($C_{13}H_{17}N_5O_8S_2$).

*Green is equivalent; Red is stricter.

	Submit valid and original product specific sole agency agreement/ letter of authorization for applied product	Valid notarized product specific Soles agency agreement duly signed/stamped by both Biocare Pharmaceutica & manufacturer Hainan Hualon Pharmaceutical Co., Ltd is submitted.
1.5.15-1.5.19	Commitments must be submitted by applicant (marketing authorization Holder) instead of manufacturer	Commitments is submitted by applicant (marketing authorization Holder)

3.2.S.4.2.2	Chromatographic conditions e.g. mobile phase is not same as mentioned in USP monograph of aztreonam for injection, clarify?	We have separately tested the same batch of aztreonam under chromatographic conditions of Chinese pharmacopoeia and USP. The study shows that, under the chromatographic conditions of Chinese pharmacopoeia, the peak shape of each compound is better than that of USP, and the number of impurities detected and the resolution of each compound are better than those under the USP test methods. Therefore, our mobile phase adopts the chromatographic conditions of Chinese pharmacopoeia.
3.2.S.7.3	Long term stability data of drug substance batch No. Az(Ar)190101 is performed upto 18th months only	The dossier was submitted in the year 2020 and the batch No. Az(Ar)190101 was manufactured in in the year 2019, so we could only submitted 18th months data then and did not submit complete 36th months stability data. Now we submit 24th months stability data No. Az(Ar)190101 and complete 36th months stability data of ***Az(Ar)150103V.***
3.2.S.7.3	Stability study data of one different batch of drug substance is performed at real time and accelerated conditions	At that time, the batch number of three batches of long term stability data which were provided to us by the API manufacturer were Az(Ar)150101V，Az(Ar)150102V，***Az(Ar)190101). We directly quoted these three batches of long-term stability data without careful consideration.*** To reply this point, we asked the API manufacturer to provide us the complete data of ***Az(Ar)150103V.*** The long-term stability data of same batch is submitted
3.2.P.1	Quantity of arginine is not mentioned in composition?	We use mixture of aztreonam and arginine (premixed by API manufacturer). The quantity of aztreonam: arginine is 1:0.78, which is same as the originator (Bristol-Myer Squibb Company USA). So, in one vial there are 1.0g aztreonam and 0.78g arginine
3.2.P.1	Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug.	The firm submitted that their product Aztreonam Sterile powder for injection will be supplied to Biocare Pharmaceutica in a pack that only contain Aztreonam Vial without any diluent. ***We are not providing any diluent. Our pack only contains Aztreonam Vial.***
3.2.P.5.2	Chromatographic conditions e.g. mobile phase is not same as mentioned in USP monograph of aztreonam for injection, clarify?	We have separately tested the same batch of aztreonam under chromatographic conditions of Chinese pharmacopoeia and USP. The study shows that, under the chromatographic conditions of Chinese pharmacopoeia, the peak shape of each compound is better than that of USP, and the number of impurities detected and the resolution of each compound are better than those under the USP test methods. Therefore, our mobile phase adopts the chromatographic conditions of Chinese pharmacopoeia. Note that the chromatographic conditions of the injection and its API is the same because the injection is produced by simply filling the API into the bottle without adding any other excipients.

Previous Decision (316-DRB):	Deferred for clarification as the name and address mentioned on submitted GMP is different from the name and address verified from online weblink of the "NMPA" of China.
Evaluation by PEC	The firm submitted that name and address of the manufacturer in weblink of NMPA of China to those submitted in GMP is same upon verification. Difference in address in English version of NMPA weblink might be due to translation error or confusion might be due to shorter version of address given on GMP certificate. In Chinese version of NMPA website, address mention in GMP certificate and on NMPA weblink is same. There is no difference in address. Hence, it is confirmed from our end after verification, name and address mentioned on submitted GMP is same as the name and address given on weblink of NMPA
Decision: Approved with USP specifications and as per Policy for inspection of Manufacturer abroad and verification of local storage facility. • **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	Pack size and Demand Price	1x14's; As per SRO
	Approval status of product in Reference Regulatory Authorities	ACTOS (15mg, 30mg, 45mg) tablets USFDA approved
	Me-too-status	Glzone 30mg Tablet by M/s Innvotek Pharmaceuticals, (Reg#099251)
	GMP Status	GMP certificate issued on 25.11.2020 based on inspection conducted on 23.11.2020
	Previous Remark of Evaluator [XI]	• The firm have removed coating composition from master formulation, however the firm did not submit revised manufacturing outline. Furthermore, firm have not adjusted the weight of pioglitazone in master formulation without considering the salt factor
	Previous Decision (316-DRB)	• Deferred for adjustment of the weight of pioglitazone in master formulation without considering the salt factor and revision of manufacturing outline as per innovator product. • Furthermore, firm shall submit fee of Rs. 7,500 for correction/pre-approval change in Form-5 (correction/pre-approval change in master formulation & manufacturing method), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
	Evaluation by PEC	• The firm have adjusted the weight of pioglitazone in master formulation after considering the salt factor and submitted revised manufacturing outline along with submission of Rs. 7500/- on deposit slip #36322906059.
	Decision: Approved. Firm shall submit the fee of Rs. 22,500/- for correction/pre-approval change in composition (correction/change of salt factor and adjustment of weight in master formulation), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	

Registration applications of locally manufactured New License / New Section on form 5F.

Firm has submitted copy of Acknowledgment of receipt of application for grant of additional section under DML No. 000465 (Formulations) to M/s Well Care Pharmaceuticals (Pvt.) Ltd., dated 24-11-2021 from Secretary Central Licensing Board. The letter specifies that CLB in its 283rd meeting held on 28-10-2021 has approved the grant of following additional section to M/s Well Care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha: 1. Capsule (General) New.		
410.	Name, address of Applicant / Marketing Authorization Holder	M/s Well care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha.
	Name, address of Manufacturing site.	M/s Well care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 12631: dated 24-03-2022.
	Details of fee submitted	PKR 30,000/-: dated 21/02/2022.
	The proposed proprietary name / brand name	Tzole 20mg Capsule.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Omeprazole (as enteric coated pellets) …….. 20mg
	Pharmaceutical form of applied drug	Oral capsule
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor.
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	14's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Omeprazole 20mg delayed release capsule, USFDA Approved.
	For generic drugs (me-too status)	Helezol 20mg Capsule, Focus & Rulz, Reg. No. 027104.
	GMP status of the Finished product manufacturer	Not submitted.
	Evidence of section approval.	Capsule (general) - New section approved vide No.F.1-12/97-Lic (Vol-II) dated 24-11-2021.
	Name and address of API manufacturer.	Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification

		of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months. Batches: (OEC-8.5-001, OEC-8.5-002 & OEC-8.5-003)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for quality tests (Description, identification, Average weight, dissolution & assay) for their product against Omega 20mg Capsule. Firm has submitted CDP against the same brand i.e. Omega 20mg Capsule manufactured by the Ferozesons. However, no strength, Batch number, manufacturing date, Expiry date etc. are mentioned.
	Analytical method validation/verification of product	Not submitted.

STABILITY STUDY DATA	
Manufacturer of API	Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore.
API Lot No.	OEC-08-040.
Description of Pack (Container closure system)	14 capsules are packed in Alu-Alu plain in packing box.
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5% RH Accelerated: 40˚C ± 2˚C / 75% ± 5% RH
Time Period	Real time: 06 months Accelerated: 06 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.		T1/21	T2/21	T3/21
Batch Size		4100 capsules	4100 capsules	4100 capsules
Manufacturing Date		10-2021	10-2021	10-2021

No. of Batches		03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No.43/2022-DRAP (AD-00196339815-153) dated 07-04-2022 on the basis of inspection conducted on 30-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. 0571 dated 01-10-2021 of pharma zone chemical (Pvt.) Limited with buyer's name of Well care pharmaceuticals mentioning 1kg quantity of each 8.5% Omeprazole pellets & 22.5% pellets of Omeprazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Submission by the firm.
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted. • GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Copy of DML is submitted which is not in readable form. One page of inspection report is submitted conducted on 10-09-2021 signed by only one member out the three panel members wherein following is recommended; "Panel recommended resumption of production and grant of new capsule section. Detailed report was prepared on prescribed format and copy was handed over to the firm for record and reference."
2.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised table for literature references has been submitted by the firm.***
3.	3.2.S.1.3	General properties, solubilities and physical form related data for the drug substance shall be submitted.	Submitted.
4.	3.2.S.4.1	• Finished product manufacturer has submitted Specification as per USP	Firm has submitted that omeprazole pellets specification is manufacturer specifications

		for drug substance while there is no monograph for the pellets in the USP.	and pharmacopoeial specifications were typographical error. ***No revised specifications are provided/submitted by the firm.***
5.	3.2.S.4.2	Analytical procedures submitted by the drug product manufacturer are completely different from drug substance manufacturer. Clarification is required.	Firm has submitted that drug substance analytical procedure is manufacturer specifications because Omeprazole EC pellets is not available in any pharmacopoeia. ***However, new* analytical procedure *for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.***
6.	3.2.S.4.3	Verification studies of the drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
7.	.2.S.4.5.	Justification of specifications has declared USP specification. Clarification is required.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error.
8.	3.2.S.5	COA of the reference standard used shall be submitted.	Firm has submitted COA for the working standard for omeprazole. ***However, the drug substance source as per submitted dossier is M/s Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore while the submitted COA is for M/s Vision Pharmaceuticals, Islamabad.***
9.	3.2.P.2	• Justification shall be submitted regarding dissolution and assay of the applied formulation in the pharmaceutical equivalence studies. As the medium of the dissolution and time are not in accordance with the monograph. • Justification shall be submitted for not performing CDP against the innovator product. • Justify the condition of dissolution used in comparative dissolution studies. • Justification shall be submitted for carrying dissolution studies up to 30 minutes time point only in 0.1N HCl in Comparative Dissolution studies.	Firm has submitted that test is performed according to the monograph but this time is typographical mistake. Firm has submitted new CDP results of the applied formulation with Risek 20mg capsules in three mediums and the f2 values are in acceptable range. ***However, submitted results are for Tzole 40mg capsule instead of 20mg & at acidic medium pH 1.2, results for only 45 minutes time points are submitted instead of 2 hours. Furthermore, pH of the medium is not mentioned with the submitted results.*** Firm has submitted that dissolution studies are performed according to monograph; we have 5 sampling intervals in 0.1 N HCl and phosphate buffer pH 4.5 and phosphate buffer pH 6.5. Firm has submitted that it is a typographic error while the dissolution in 0.1 N HCl is performing 120minutes. ***Initially submitted results have shown more than 10% release in 30 minutes while actually there should be NMT 10% in initial 2 hours.*** ***No details of the comparator product are submitted.***

		• No data for the comparator product for CDP has been submitted.	
10.	3.2.P.3.2	Justification shall be submitted for use of Omeprazole powder in the master formulation.	Firm has submitted that they have used Omeprazole 8.5% Ec pellets in the formulation. Omeprazole powder was typographical error.
11.	3.2.P.5.1	• Specification provided for the drug product has not mentioned dissolution at acidic stage. • Dissolution test shall be specified whether test I or any of the other test is followed by the drug product manufacturer or otherwise.	***No reply/justification is submitted against this point.*** ***No reply/justification is submitted against this point.***
12.	3.2.P.5.2	Analytical procedures for the drug product are completely different from the official monograph. Clarification is required.	Firm has submitted that all stability studies performed according to USP monograph. ***However, the conditions for dissolution test and conditions for assay test applied by the drug product manufacturer are completely different from that of the USP monograph. Standard solution, test soltion, wavelength applied & injection volume etc. all are different from USP.***
13.	3.2.P.5.2	Analytical method validation/verification of product shall be submitted.	Submitted.
14.	3.2.P.5.4	• Specification of dissolution test in the batch analysis are without time for buffer stage and without percentage for acid stage. • Batch analysis has only buffer stage dissolution results.	Firm has submitted that all limits are mentioned in analytical procedures but mistakenly not mentioned in batch analysis. ***No reply submitted against this point.***
15.	3.2.P.8.1	• Stability summary and conclusion has manufacturing date of Jan-2022 with batch No. of RLE-001, RLE-002 & RLE-003 while the stability data sheets have mentioned manufacturing date of 10-2021 with batch No. of T1/21, T2/21 & T3/21. Clarification is required.	Firm has submitted that manufacturing date of their batches is October, 2021 but the January 2021 is testing interval date.
16.	3.2.P.8.3	• Stability data sheets have no dissolution at acidic stage. Clarification is required. • Justification shall be submitted regarding the run time, injection volume and wavelength used for the assay of finished product as the applied run time, injection volume and wavelength are different from that of the official monograph.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** Firm has submitted that testing of the product is performed as per USP. The run time is about 10 minutes and injection volume are 20µl and flow rate is 1ml/min. column used is 4.6 mm x 15cm; 5µm packing L1 and detector is 302nm. ***However, in the submitted chromatograms the conditions are different from that mentioned in the official pharmacopoeia. Official monograph has mentioned wavelength of 305nm while firm has applied 302nm.***

		• Stability data sheets have mentioned weight of capsule as 295 while the raw data has mentioned 235mg. Clarification is required. • Dates in the submitted chromatograms have been over written by hand. Clarification shall be submitted.	Firm has submitted that stability raw data sheets have two different weights one is content weight of pellets and second weight is gross weight with capsule shell. ***No reply submitted against this point.***
17.	3.2.P.8.3	Justification shall be submitted regarding the retention time of the omeprazole in the provided chromatograms as two different retention time are mentioned for the same omeprazole.	Firm has submitted that during stability studies they have used two different companies HPLC column in which one of that have minimum 5000 number of theoretical plates and other have less than 5000 plates due to which retention time have some difference. ***Submitted chromatograph have shown two different retention times for the omeprazole i.e. 5minutes and 10 minutes.***
18.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used. • Justification shall be submitted for the stability of both drug substance and finished product that the values at both accelerated and real time are exactly similar at same time points.	Only one-page Esomeprazole capsule 06 standard injection is provided. ***Not complete.*** Submitted. Only specifications of HPLC are provided while 21 CFR compliant certificate is not provided. Raw data sheets for dissolution and assay tests are not provided by the firm. Firm has submitted that they have performed only drug product stability studies accelerated and real time in different intervals but we take print out at same time after completion of stability studies. ***Real time and accelerated stability studies of both the drug substance and drug product of all three batches have exact similar values.***
19.		• Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Tzole 20mg capsule.	Firm has submitted that they purchased Omeprazole 8.5% and 22% each 1kg for three trial batches. Total material use in trial batches for testing. ***Executed BMR's have shown that in Tzole 20 mg capsules 8.5% of pellets have been used. Stability data sheets have three different batches each with 4100 capsules batch size.*** ***In this regard total number of capsules manufactured are;*** ***5600 x 3 = 12,300*** ***Each 20mg capsule will have 235mg of Omeprazole EC pellets.*** ***12300 x 235 = 2,890,500 mg of pellets*** ***2.89 kg pellets are required to fill the three trial batches while firm has purchased only 1kg.***

Decision: Registration Board decided to deferr the case for onsite verification and authenticity of the submitted stability data due to following observtaions:

- **Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.**
- **Submitted COA of working standard is from M/s Vision Pharmaceuticals whereas drug substance has been procured from M/s Pharmazone Chemicals.**
- **Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours.**
- **The analytical method for dissolution test and for assay test applied by the drug product manufacturer are completely different in terms of run time, injection volume, wavelength, standard solution preparation etc.., from that of the USP monograph as also evident from the submitted HPLC chromatograms.**
- **Submitted HPLC chromatograms reflect two different retention time for 20mg and 40 mg Omeprazole EC pellets. i.e. 5minutes and 10 minutes.**
- **Quantity of Omeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size.**
- **Both accelerated and real time stability data sheets are having exactly similar values at same time points.**
- **Drug product Batch analysis has only buffer stage dissolution results.**
- **Stability data sheets have mentioned weight of capsule as 295 while the raw data has mentioned 235mg. Clarification is required.**
- **Dates in the submitted chromatograms have been over written by hand.**
- **Raw data sheets for dissolution and assay tests are not provided by the firm.**
- **Stability data sheets have mentioned weight of capsule as 295 while the raw data has mentioned 235mg.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No.43/2022-DRAP (AD-00196339815-153) dated 07-04-2022 on the basis of inspection conducted on 30-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. 0571 dated 01-10-2021 of pharma zone chemical (Pvt.) Limited with buyer's name of Well care pharmaceuticals mentioning 1kg quantity of each 8.5% Omeprazole pellets & 22.5% pellets of Omeprazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Submission by the firm.
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted. • GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Copy of DML is submitted which is not in readable form. One page of inspection report is submitted conducted on 10-09-2021 signed by only one member out the three panel members wherein following is recommended; "Panel recommended resumption of production and grant of new capsule section. Detailed report was prepared on prescribed

			format and copy was handed over to the firm for record and reference."
2.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised table for literature references has been submitted by the firm.***
3.	3.2.S.1.3	General properties, solubilities and physical form related data for the drug substance shall be submitted.	Submitted.
4.	3.2.S.4.1	• Finished product manufacturer has submitted Specification as per USP for drug substance while there is no monograph for the omeprazole pellets in the USP.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised specifications are provided/submitted by the firm.***
5.	3.2.S.4.2	Analytical procedures submitted by the drug product manufacturer are different from drug substance manufacturer. Clarification is required.	Firm has submitted that drug substance analytical procedure is manufacturer specifications because Omeprazole EC pellets is not available in any pharmacopoeia. ***However, new* analytical procedure *for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.***
6.	3.2.S.4.3	Verification studies of the drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
7.	.2.S.4.5.	Justification of specifications has declared USP specification. Clarification is required.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error.
8.	3.2.S.5	COA of the reference standard used shall be submitted.	Firm has submitted COA for the working standard for omeprazole. ***However, the drug substance source as per submitted dossier is M/s Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore while the submitted COA is for M/s Vision Pharmaceuticals, Islamabad.***
9.	3.2.P.2	• Pharmaceutical equivalence studies are performed with Risek 40mg by Getz pharma while the results are given for Omega 40mg by Ferozsons laboratories. Clarification is required. • Justification shall be submitted for not performing CDP against the innovator product. • Justification shall be submitted regarding dissolution and assay of the applied formulation in the pharmaceutical equivalence studies. As the medium of the dissolution and time are not in accordance with the monograph.	Firm has submitted that it was typographic error and pharmaceutical equivalence studies are performed with Risek. ***No reply submitted.*** Firm has submitted that test is performed according to the monograph but this time is typographical mistake. Firm has submitted that dissolution studies are performed according to monograph; we have 5 sampling intervals in 0.1 N HCl and

		• Justify the condition of dissolution used in comparative dissolution studies. • Justification shall be submitted for carrying dissolution studies up to 30 minutes time point only in 0.1N HCl in Comparative Dissolution studies.	phosphate buffer pH 4.5 and phosphate buffer pH 6.5. Firm has submitted that it is a typographic error while the dissolution in 0.1 N HCl is performing 120minutes.
10.	3.2.P.5.2	• Analytical procedures for the drug product are different from the official monograph. Clarification is required. • Assay in the official monograph is through HPLC while applicant has mentioned UV spectroscopy in its analytical procedures. Clarification shall be submitted.	***No reply/justification submitted.*** ***No reply/justification submitted.***
11.	3.2.P.5.2	Analytical method validation/verification of product shall be submitted.	
12.	3.2.P.5.4	• Specification of dissolution test in the batch analysis are without time for buffer stage and without percentage for acid stage. • Batch analysis has only buffer stage dissolution results.	***No reply/justification submitted.*** ***No reply/justification submitted.***
13.	3.2.P.8.3	• Stability data sheets have no dissolution at acidic stage. Clarification is required. • Weight/10 capsule in the stability data sheets is 268mg ± 10%. Clarification shall be submitted in this regard. • Raw data sheets for stability has mentioned label claim of 20mg. clarification shall be submitted. • Justification shall be submitted regarding the run time for the assay of finished product as the applied run time is different from that of the official monograph. • Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Rezole 40mg capsule.	***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.***
14.	3.2.P.8.3	Justification shall be submitted regarding the retention time of the omeprazole in the provided chromatograms as two different retention time are mentioned for the same omeprazole.	***No reply/justification submitted.***
15.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	***No reply/justification submitted.*** ***No reply/justification submitted.***

		• Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used. • Justification shall be submitted for the stability of both drug substance and finished product that the values at both accelerated and real time are exactly similar at same time points.	***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.***

Decision: Registration Board decided to deferr the case for onsite verification and authenticity of the submitted stability data due to following observtaions:

- **Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.**
- **Submitted COA of working standard is from M/s Vision Pharmaceuticals whereas drug substance has been procured from M/s Pharmazone Chemicals.**
- **Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours.**
- **Assay in the official monograph is through HPLC while applicant has mentioned UV spectroscopy in its analytical procedures.**
- **The analytical method for dissolution test and for assay test applied by the drug product manufacturer are completely different in terms of run time, injection volume, wavelength, standard solution preparation etc.., from that of the USP monograph as also evident from the submitted HPLC chromatograms.**
- **Submitted HPLC chromatograms reflect two different retention time for 20mg and 40 mg Omeprazole capsule.**
- **Quantity of Omeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size.**
- **Drug product Batch analysis has only buffer stage dissolution results.**
- **Dates in the submitted chromatograms have been over written by hand.**
- **Raw data sheets for dissolution and assay tests are not provided by the firm.**
- **Stability data sheets have no dissolution at acidic stage. Clarification is required.**
- **Raw data sheets for stability has mentioned label claim of 20mg.**
- **In performance of Assay test the applied run time is different from that of the official monograph.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No.43/2022-DRAP (AD-00196339815-153) dated 07-04-2022 on the basis of inspection conducted on 30-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. 0571 dated 01-10-2021 of pharma zone chemical (Pvt.) Limited with buyer's name of Well care pharmaceuticals mentioning 1kg quantity of each

		8.5% Omeprazole pellets & 22.5% pellets of Esomeprazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Submission by the firm.
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted. • GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Copy of DML is submitted which is not in readable form. One page of inspection report is submitted conducted on 10-09-2021 signed by only one member out the three panel members wherein following is recommended; "Panel recommended resumption of production and grant of new capsule section. Detailed report was prepared on prescribed format and copy was handed over to the firm for record and reference."
2.	1.5.15 – 1.5.19	All the commitments submitted are unsigned. Signed commitments shall be submitted.	Signed commitments are submitted by the firm.
3.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted.	Firm has submitted that esomeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised table for literature references has been submitted by the firm.***
4.	3.2.S.4.1	Finished product manufacturer has submitted Specification as per USP for drug substance while there is no monograph for the pellets in the USP. Clarification is required.	Firm has submitted that it was typographical error while the specifications of the Esomeprazole pellets are manufacturer specifications. ***However, new specifications for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.***
5.	3.2.S.4.2	• Analytical procedure for drug substance provided by the finished product manufacturer is completely different from that of drug substance manufacturer. Clarification shall be submitted. • Drug substance has mentioned assay by HPLC while finished product manufacturer has mentioned UV spectroscopy. Clarification shall be submitted. • Justify the preparation of standard solution and sample solution in dissolution test of analytical	Firm has submitted that drug substance analytical procedure is manufacturer specifications. ***However, new* analytical procedure *for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.*** Firm has submitted that manufacturer have two testing methods one that on HPLC & other on UV and we have used HPLC method of testing for the drug substance testing. Firm has submitted that manufacturer has used omeprazole working standard against Esomeprazole test in assay and dissolution but

		procedure with respect to the drug substance manufacturer.	we have used esomeprazole working standard for the testing of Esomeprazole EC pellets. ***Completly different from manufacturer of drug substance.***
6.	3.2.S.4.3	Verification studies of the drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.5.	Justification of specifications for the drug substance shall be submitted.	Submitted.
8.	3.2.S.5	COA of the reference standard used shall be submitted.	Submitted.
9.	3.2.P.2	• Standard Operating procedure for product design and development is for syrup and suspension dosage form. • Justification shall be submitted for not performing CDP against the innovator product. • Justify the condition of dissolution used in comparative dissolution studies. • Justify the analytical procedure for CDP as it has mentioned Phosphate buffer of pH7.3, pH 11. • Justify the results of CDP at acid stage as more than 10% of the drug is released in 30 minutes.	***No reply submitted.*** Firm has submitted new CDP results of the applied formulation with Nexum 20mg capsules in three mediums and the f2 values are in acceptable range. ***However, at acidic medium pH 1.2, results for only 45 minutes time points are submitted instead of 2 hours.*** ***Furthermore, submitted CDP results for Esowell 20mg capsules are having 100% similar results and values as that of submitted results for Esocare 40mg.*** ***No justification is submitted against this point. pH 7.3 and pH 11 are used in the method.*** ***No justification is submitted against this point.*** ***No justification is submitted against this point.***
10.	3.2.P.5.1	• Specification provided for the drug product has not mentioned dissolution at acidic stage. • Dissolution test shall be specified whether test I or any of the other test is followed by the drug product manufacturer or otherwise.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** ***No justification is submitted against this point.***
11.	3.2.P.5.2	• Calculation formula for assay test of the finished product is different from USP. Clarification is required. • Standard solution in dissolution test is different from USP. Clarification is required.	***No justification is submitted against this point.*** The manufacturer is using Omeprazole working standard against Esomeprazole test in assay and dissolution but we have used Esomeprazole working standard for the testing of Esomeprazole EC pellets. ***Official monograph has mentioned Omeprazole RS for preparation of standard***

			solution in the assay of Esomeprazole delayed release capsule.
12.	3.2.P.5.2	Analytical method validation/verification of product shall be submitted.	Submitted.
13.	3.2.P.5.4	• Specification of dissolution test in the batch analysis are without time for buffer stage and without percentage for acid stage. • Batch analysis has only buffer stage dissolution results.	Firm has submitted that all limits are mentioned in analytical procedures but mistakenly not mentioned in batch analysis. Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.***
14.	3.2.P.8.3	• Stability data sheets have no dissolution at acidic stage. Clarification is required. • Stability raw data sheets provided for EW1 & EW2 have two different weight for the sample. Clarification shall be submitted. • Justification shall be submitted regarding the run time and injection volume used for the assay of finished product as the applied conditions are different from that of the official monograph.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** Firm has submitted that stability raw data sheets of EC1 & EC2 have two different weights one is content weight of pellets and second weight is gross weight with capsule shell. Firm has submitted that testing of the product is performed as per USP. The run time is about 10 minutes and injection volume are 20µl and flow rate is 1ml/min. column used is 4.6 mm x 15cm; 5µmpacking L1 and detector is 302nm. ***Conditions are different from official monograph.***
15.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used. • Justification shall be submitted for the stability of finished product that the values at both accelerated and real time are exactly similar at same time points.	Only one-page Esomeprazole capsule 06 standard injection is provided. ***Not complete.*** Submitted. Only specifications of HPLC are provided while 21 CFR compliant certificate is not provided. ***Raw data sheets for dissolution and assay tests are not provided by the firm.*** ***No reply is submitted against this point.***

16.		Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Esowell 20mg capsule.	Firm has submitted that they purchased Esomeprazole 8.5% and 22% each 1kg for three trial batches. Total material use in trial batches for testing. ***However, firm has not provided any document for purchase of 8.5% Esomeprazole EC pellets.*** ***Executed BMR's have shown that in Esowell 20 mg capsules 22.5% of pellets have been used. Stability data sheets have three different batches each with 5600 capsules batch size.*** ***In this regard total number of capsules manufactured are;*** ***5600 x 3 = 16800*** ***Each 20mg capsule will have 88.8 mg of Esomeprazole EC pellets.*** ***16800 x 88.8 = 1,491,840 mg of pellets*** ***1.49 kg pellets are required to fill the three trial batches while firm has purchased only 1kg.***
17.		Justification shall be submitted regarding the chromatograms provided for Esowell 20mg and Esocare 40 mg capsules as chromatograms for both the products have same time and exact values in respect of everything.	Firm has submitted that the chromatograph of Esowell 20mg and Esocare 40mg are print on same date but the test is performed in different dates. ***Chromatographs of both the 20mg and 40mg Esomeprazole are complete copies in respect of time, Areas of the sample and standards, retentions time etc.***

Decision: Registration Board decided to defer the case for onsite verification and authenticity of the submitted stability data due to following observtaions:

- **Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.**
- **Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours.**
- **The results of CDP at acid stage of different samples were more than 10% of the drug is released in 30 minutes.**
- **Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the dissolution test of Esomeprazole delayed release capsule.**
- **Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the assay test of Esomeprazole delayed release capsule.**
- **Verification of chromatographic conditions used in the dissolution and assay test of the Esomeprazole delayed release capsule from chromatograms in the HPLC software with reference to official monograph.**
- **Quantity of Esomeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size.**
- **Both accelerated and real time stability data sheets are having exactly similar values at same time points.**
- **The chromatograms for both Esomeprazole 20mg and 40mg capsules have same time and exact values in respect of everything.**

14.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used.	Only one-page Esomeprazole capsule 06 standard injection is provided. ***Not complete.*** Submitted. Only specifications of HPLC are provided while 21 CFR compliant certificate is not provided. ***Raw data sheets for dissolution and assay tests are not provided by the firm.***
15.		Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Esocare 40mg capsule.	Firm has submitted that they purchased Esomeprazole 8.5% and 22% each 1kg for three trial batches. Total material use in trial batches for testing. ***However, firm has provided the documents for 22.5% esomeprazole only for 1kg quantity. Executed BMR's have shown that in Esocare 40 mg capsules 22.5% of pellets have been used. Stability data sheets have three different batches each with 5600 capsules batch size.***

			In this regard total number of capsules manufactured are; ***5600 x 3 = 16800*** ***Each 40mg capsule will have 177.7mg of Esomeprazole EC pellets.*** ***16800 x 177.7 = 2,985,360 mg of pellets*** ***2.9 kg pellets are required to fill the three trial batches while firm has purchased only 1kg.***
16.		Justification shall be submitted regarding the chromatograms provided for Esowell 20mg and Esocare 40 mg capsules as chromatograms for both the products have same time and exact values in respect of everything.	Firm has submitted that the chromatograph of Esowell 20mg and Esocare 40mg are print on same date but the test is performed in different dates. ***Chromatographs of both the 20mg and 40mg Esomeprazole are complete copies in respect of time, Areas of the sample and standards, retentions time etc.***

Decision: Registration Board decided to defer the case for onsite verification and authenticity of the submitted stability data due to following observtaions:

- **Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.**
- **Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours.**
- **The results of CDP at acid stage of different samples were more than 10% of the drug is released in 30 minutes.**
- **Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the dissolution test of Esomeprazole delayed release capsule.**
- **Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the assay test of Esomeprazole delayed release capsule.**
- **Verification of chromatographic conditions used in the dissolution and assay test of the Esomeprazole delayed release capsule from chromatograms in the HPLC software with reference to official monograph.**
- **Quantity of Esomeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size.**
- **Both accelerated and real time stability data sheets are having exactly similar values at same time points.**

The chromatograms for both Esomeprazole 20mg and 40mg capsules have same time and exact values in respect of everything.

On the recommendations of panel of experts, the CLB in its 273rd meeting held on 15th January, 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following four sections:

i. Tablet Section (General)
ii. Capsule Section (General)
iii. Sachet Section (General)
iv. Dry powder injection section (pre-lyophilized) vial

414.	Name, address of Applicant / Marketing Authorization Holder	Variant Pharmaceuticals (Pvt.) Ltd., Plot # 5 M-2, Pharmazone, 26Km Lahore-Sharaqpur road, Sheikhupura, Sheikhupura.

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13056: dated 28-05-2022.
	Details of fee submitted	PKR 30,000/-: dated 13/05/2022.
	The proposed proprietary name / brand name	Levosulpiride 25mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains Levosulpiride …….. 25mg
	Pharmaceutical form of applied drug	Tablet.
	Pharmacotherapeutic Group of (API)	Antipsychotic.
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Levosulpiride 25mg tablet, AIFA ITALY Approved.
	For generic drugs (me-too status)	Syconor Tablet 25mg, Opal Laboratories, Reg. No. 096116.
	GMP status of the Finished product manufacturer	New license granted on 13/02/2020. General Tablet, General Capsule, General Sachet and General dry powder injectable (pre-lyophilized) Vial.
	Evidence of section approval.	Tablet general section is approved vide letter No. F.1-1/2016/Lic. Dataed 24-02-2020.
	Name and address of API manufacturer.	Alcon Biosciences Private Limited, A-1/2104, phase III, GIDC, Vapi, Gujarat –396 195 India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Official monograph of Levosulpiride is not present in USP/BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 48 months.

		Batches:(ALC/LSP/180304, ALC/LSP/180305, ALC/LSP/180306).
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is LEVOPRAID 25 mg Tablets by M/s Pacific Pharma (Pvt.) Ltd., B. No. AQ2309Q by performing quality tests (description, Assay, Dissolution). CDP has been performed against the same brand that is LEVOPRAID 25 mg Tablets by M/s Pacific Pharma (Pvt.) Ltd., in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of GMP certificate No. S-GMP/20102297 in the name of Alcon Biosciences Private Limited, A-1/2104, phase III, GIDC, Vapi, Gujarat –396 195 India issued by the Food & Drug Control Administration Gandhinagar, Gujarat State, India valid till 21-10-2022.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Invoice No. ALC/20210215 wherein quantity of 1.1kg of Levosulpiride for test/analysis is imported by the firm. The invoice is signed and stamped by the Assistant Director I&E, DRAP, Lahore dated 28-07-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	3.2.S.4.1	Specifications of the drug substance by the finished product manufacturer shall be submitted.	***Firm has submitted specification for drug product instead of Drug substance.***
2.	3.2.S.4.2	Analytical procedures for the dug substance by the finished product manufacturer shall be submitted.	Submitted. ***However, the assay method in the analytical procedure submitted by the drug product manufacturer is by UV method and HPLC method while the drug substance has mentioned potentiometric method for the assay of the drug substance.***
3.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
4.	3.2.S.4.4	Analytical record for the drug substance shall be submitted.	Firm has submitted analytical record for the drug substance. Submitted analytical has shown hand written date of 16-08-2021 while the firm has also submitted new COA with release date of 16-08-2021. However, in the initially submitted dossier, COA with release date of 24-05-2021 was submitted. Furthermore, submitted chromatograms of the drug substance in the analytical record submitted by the firm has also shown processing date of 22-05-2021.
5.	3.2.S.4.5	Justification of specifications for the drug substance shall be submitted.	***Justifications of specification submitted by the firm has assay value of 98.5% - 101% while the drug substance manufacturer has assay limits of 99% - 101%.***
6.	3.2.P.2.2	• Justification shall be submitted for not carrying the CDP against the innovator's brand.	Firm has submitted that according to WHO technical report series, No. 902,2002, if the innovator product is not available in the local market you can use the market leader product. They further submitted that in their case Levopraid 25mg tablets manufactured by Pacific pharmaceuticals under the license from Ravizza pharmaceutici S.p.A. Milan, Italy is considered appropriate for pharmaceutical equivalence studies as this

		• Calculation of F2 for CDP shall be submitted.	product is currently widely used within our local market and repute of company and the product is also satisfactory. Firm has submitted complete calculations of F2 value for all the three mediums used in CDP.
7.	3.2.P.8	Documents for the procurement of API with approval from DRAP mentioning the batch number of the drug substance shall be submitted.	Firm has submitted commercial invoice No. AB/I/00001/21-22 dated 02-04-2021 mentioning 05kg of Levosulpiride, batch No. LSP/N/21/001, manufacturing date Feb, 2021 attested by Assistant Director I&E, DRAP, Lahore dated 12-04-2021. ***However, the API lot used in the formulation development studies has batch number of 31L01Z2122-001.***

Decision: Registration Board decided to defer the case for verification or submission of the following points:

- **COA of the drug substance initially submitted was having release date of 24-05-2021 while the substance clearance (invoice) is signed and stamped by the Assistant Director I&E, DRAP, Lahore dated 28-07-2021.**
- **Furthermore, submitted chromatograms of the drug substance in the analytical record submitted by the firm has also shown processing date of 22-05-2021. Justification shall be submitted.**
- **API lot used in the formulation development studies has batch number of 31L01Z2122-001, while firm has submitted commercial invoice No. AB/I/00001/21-22 dated 02-04-2021 mentioning 05kg of Levosulpiride, batch No. LSP/N/21/001, manufacturing date Feb, 2021.**

	Name and address of API manufacturer.	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co. Ltd., Fluoride Industrial Park, Fumeng Country (Yi Ma Tu), Fuxin City, Liaoning Province, China. GMP certificate issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone valid till 23-08-2023. **Metformin HCl:** Aarti drugs Limited (Unit-II), Plot No. 211 & 213, Road No. 2 G.I.D.C., Sarigam City Dist. Valsad, Gujrat State, India. GMP certificate No. 20031933 issued by Food & Drugs Control Administration Gandhinagar, Gujrat State India valid till 19-03-2023.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per template provided in 293 DRB meeting. Firm has submitted summarized information related to general information, nomenclature, structure, general properties, solubilities, physical description, manufacturer, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of critical steps and intermediate, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical

		procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted data for facilities, equipments and regional information.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to general information, nomenclature, structure, general properties, solubilities, physical description, manufacturer, Characterization, impurities, Specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug Substance)	Stability study conditions: **Empagliflozin:** Real time: 30°C ± 2°C / 65%RH ± 5% RH for 24 months. Accelerated: 40°C ± 2°C / 75% RH ± 5 %RH for 6 months. Batches: (20160606, 20161017, 20161219) **Metformin HCl:** Real time: 30°C ± 2°C / 75% RH ± 5% RH for 24 months. Accelerated: 40°C ± 2°C / 75% RH ± 5 %RH for 6 months. Batches: (MEF/1510145, MEF/1510146, MEF/1510147)
	Module-III (Drug Product):	Firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of critical steps and intermediate, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the Innovator product Synjardy 5mg/850mg tablet, Batch No. 902007, Mfg. date Feb-19, Exp. Date Jan-22 manufactured by Boehringer Ingelheim Limited by performing quality tests (Appearance, Identification, disintegration time, water content, Assay & Dissolution). CDP has been performed against the same brand that is Synjardy 5mg/850mg tablet in Acid media (pH 1.2), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are in the acceptable range.
	Analytical method validation /verification of product	Analytical method validation for drug substance (Empagliflozin & Metformin HCl) performed by drug product manufacturer also submitted including following parameters: Linearity & Range, Accuracy, Precision, Specificity. Method validation studies for finished product have submitted including following parameters: Linearity & range, Accuracy, Precision, Specificity, Detection limit, Quantitation limit, Robustness, Stability indicating.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred last onsite panel inspection for instant dosage form conducted during last two years BAXIB (Apixaban) 2.5mg & 5mg Tablets on 5th January, 2021 by following panel: 1. Prof. Dr. Rafeeq Alam Khan, Dean, Faculty of Pharmacy, Zia Uddin University, Karachi. (Member Registration Board). 2. Dr. Saif-Ur-Rehman Khattak, Director / FGA, CDL, DRAP, Karachi.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 23-08-2023. **Metformin HCl:** The firm has submitted copy of GMP certificate No. 20031933 for M/s Aarti Drugs limited, India 20031933 issued by Food & Drugs Control Administration Gandhinagar, Gujrat State India The certificate is valid till 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has provided attested commercial invoice No. HN200424-L dated 21-05-2020 wherein they imported 0.4Kg Empagliflozin from M/s Fuxin Long Rui Pharmaceutical Co. Ltd., Fluoride Industrial Park, Fumeng Country (Yi Ma Tu), Fuxin City, Liaoning Province, China. ADC signed Form 6, & invoice is available. Form 3 and form 7 also available. **Metformin HCl:** Firm has provided attested commercial invoice No. EXP/3151/19-20 dated March 07, 2020 wherein they imported 1000Kg API Metformin HCl from M/s. Aarti drugs limited India. Form 3 and form 7 also available.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section No.	Observation	Response by the firm
1.	1.6.5	Valid GMP certificate of drug substance manufacturer for Empagliflozin issued by the concerned regulatory authority shall be submitted.	The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 23-08-2023.
2.	3.2.S.2.2	Manufacturing process has not mentioned metformin HCl incorporation into the final product. Clarification is required.	Firm has submitted revised manufacturing process wherein they have incorporated the step of metformin HCl in the final product. *However, no fee is submitted by the firm for changes in the manufacturing outline.*
3.	3.2.S.4.2	Assay test of metformin HCl of the drug substance manufacturer is by potentiometry while the finished product manufacturer has applied HPLC method. Clarification is required.	Firm submitted that previously USP-42 described the potentiometric titration method for metformin HCl and the same method was used for analysis. Afterword's potentiometric method was switched to HPLC method, whereas HPLC method derived from the method present in JP (Metformin HCl Tablets) with slight modification. HPLC method is more reliable authenticated then potentiometry method. The HPLC assay method for drug substance validated as per ICH guidelines.
4.	3.2.S.4.4	Batch analysis of the drug substance (Metformin HCL) has mentioned in house specifications for the assay test. Clarification is required.	Assay of drug substance Metformin HCl is switched to potentiometric method to HPLC method. Hence in-house specification is mentioned.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Valsad, Gujrat State, India. GMP certificate No. 20031933 issued by Food & Drugs Control Administration Gandhinagar, Gujrat State India valid till 19-03-2023.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per template provided in 293 DRB meeting. Firm has submitted summarized information related to general information, nomenclature, structure, general properties, solubilities, physical description, manufacturer, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of critical steps and intermediate, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted data for facilities, equipments and regional information.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to general information, nomenclature, structure, general

		properties, solubilities, physical description, manufacturer, Characterization, impurities, Specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug Substance)	Stability study conditions: **Empagliflozin:** Real time: 30°C ± 2°C / 65%RH ± 5% RH for 24 months. Accelerated: 40°C ± 2°C / 75% RH ± 5 %RH for 6 months. Batches: (20160606, 20161017, 20161219) **Metformin HCl:** Real time: 30°C ± 2°C / 75% RH ± 5% RH for 24 months. Accelerated: 40°C ± 2°C / 75% RH ± 5 %RH for 6 months. Batches: (MEF/1510145, MEF/1510146, MEF/1510147)
	Module-III (Drug Product):	Firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of critical steps and intermediate, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the Innovator product Synjardy 12.5mg/850mg tablet, Batch No. 003442, Mfg. date Feb-19, Exp. Date Jan-22 manufactured by Boehringer Ingelheim Limited by performing quality tests (Appearance, Identification, disintegration time, water content, Assay & Dissolution). CDP has been performed against the same brand that is Synjardy 5mg/850mg tablet in Acid media (pH 1.2), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are in the acceptable range.
	Analytical method validation /verification of product	Analytical method validation for drug substance (Empagliflozin & Metformin HCl) performed by drug product manufacturer also submitted including following parameters: Linearity & Range, Accuracy, Precision, Specificity. Method validation studies for finished product have submitted including following parameters: Linearity & range, Accuracy, Precision, Specificity, Detection limit, Quantitation limit, Robustness, Stability indicating.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Empator 10mg Tablets which was conducted on

		6th August 2019 and was presented in 291st meeting of Registration Board held on 02nd – 4th September 2019. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software. • The firm has audit trail reports available. The firm possesses stability chambers with digital data loggers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sitagliptin:** Copy of GMP certificate for Lianyungang Jari Pharmaceuticals Co., Ltd issued by Lianyungang Drug Administration & Valid up to 11-April-2024 is submitted. **Metformin HCl:** Copy of GMP Certificate for IPCA Laboratories Limited (Certificate: New-WHO-GMP/CERT/AD/67318/2018/11/24741) dated 31-08-2018 valid till 27-08-2021 issued by Food and Drug Administration, M.S. Bandra-kurla Complex, Bandra (E), Mumbai-400051 Maharashtra, India is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sitagliptin phosphate monohydrate** Firm has submitted commercial invoice No. 20YX2025B dated 16-07-2020 for Sitagliptin Phosphate Monohydrate B. No. 20200602 attested by the Assistant Director, DRAP, Karachi. Firm has also provided commercial invoice No. 20YX2015B dated 20-04-2020 for Sitagliptin Phosphate Monohydrate B. No. 20200401 attested by the Assistant Director, DRAP, Karachi. **Metformin HCl:** Firm has provided commercial invoice No. MEG1920/1631259 dated 03-07-2019 for metformin HCl B. No. 19370ML2ARMI attested by the Assistant Director, DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section number	Observation.	Response by the firm.
1.	**1.3.4**	Valid copy of DML of the applicant shall be submitted. Valid GMP certificate/inspection report conducted within last three years shall be submitted.	Firm has submitted valid copy of DML w.e.f. 09-02-2021. Firm has also submitted GMP inspection report 20-10-2021 wherein it is concluded that the firm is considered to be operating at good level of compliance with cGMP guidelines.
2.	**1.6.5**	Valid GMP certificate of the API manufacturer of metformin HCl, issued	Firm has submitted Copy of GMP Certificate for IPCA Laboratories Limited

		by the relevant regulatory authority shall be submitted.	(Certificate No.: New-WHO-GMP/CERT/AD/104179/2021/11/37725) dated 28-10-2021 valid till 27-10-2024 issued by Food and Drug Administration, M.S. Bandra-kurla Complex, Bandra (E), Mumbai-400051 Maharashtra, India.
3.	**2.3**	• Table for literature references for the drug substance i.e. Metformin HCl does not declare the status in Japanese pharmacopoeia. • The submitted BMR does not reflect performance of dissolution for Metformin HCl before proceeding for seal & active coating step. Justification shall be submitted for proceeding further without establishing the Dissolution profile of Metformin HCl.	• Firm has provided revised table for literature references for the drug substance i.e. Metformin HCl wherein they declare the status in Japanese pharmacopoeia. The dissolution testing was performed at final stage and results were well within specified limits. Since the trial were satisfactory at core stage, a decision was made on risk basis to perform the dissolution testing at final stage after multiple coating to better evaluate the impact on all stability batches. Satisfactory initial and stability results are also evident on Metformin HCl dissolution performance.
4.	**3.2.S.4.2**	• Analytical procedure submitted by the drug substance manufacturer for the Assay test of Metformin HCl is different from that adopted by the drug product manufacturer. Clarification is required. • USP monograph of Metformin HCl mentions use of 25-cm column in the Assay test, while the applicant has declared use of 250cm column for the same. Justification is required.	• Firm has submitted that Manufacturer has adopted the test method Assay by Titration based on USP old version that was official at the time of manufacturing **(Lot No. 20212 ML2ARMI/Mfg. Date: Feb.2020)** and also the assay limits were set accordingly. The API lot was tested at Martin Dow in December 2020 and method adopted Assay by HPLC along with revised limits according to updated versions of USP monograph (Official as of November 2020). • Firm has submitted that it is a typo error. The actual column used is 250 instead of 25.
5.	**3.2.S.4.4**	Assay limits for Metformin HCl provided by the drug product manufacturer is different from that declared by the drug substance manufacturer.	Firm has submitted that Manufacturer has adopted the test method Assay by Titration based on USP old version that was official at the time of manufacturing **(Lot No. 20212 ML2ARMI/Mfg. Date: Feb.2020)** and also the assay limits were set accordingly. The API lot was tested at Martin Dow in December 2020 and method adopted Assay by HPLC along with revised limits according to updated versions of USP monograph (Official as of November 2020).
6.	**3.2.P.8.3**	• ADC attested invoices from DRAP for metformin HCl B. No. 20212ML2ARMI used in stability studies and product development shall be submitted.	• Firm has provided commercial invoice dated 09-12-2020 mentioning Metformin HCl B. No. 20212ML2ARMI attested by Assistant Director I&E, DRAP, Karachi.

		• Date of manufacturing of B # NPD-T-1392-L is 12-03-2021 while the analysis date is 02-04-2021. Justification for this delay shall be submitted.	• Batch was manufactured on 12/03/2021 and was processed after each stage satisfactory testing result to finished product with final coat. The finished product was received by 17/03/2021 in the lab for final testing and after satisfactory test results of 02 other batches which was received in 31-03-2021, stability initiated along with the other two batches on 02/04/2021.
		• Submitted CDP results are for capsules formulation instead of tablets. Clarify.	• Firm has submitted that it was typo error.
7.		• Justification of 50% extra amount of Sitagliptin in master formulation (which is required to be based on study/scientific rationale) for which firm has stated that it was taken to compensate the loss during coating.	• The 50% excess quantity mentioned in the BPR is for the clarity of the reviewer and the document itself. Excess quantity was added in coating material i.e., Propyl gallate, Polyethylene Glycol 6000, Hydroxyprop.Methylcell.2910/6CP, Kaolin along with it is the **API Sitagliptin Phosphate Monohydrate** to compensate for the process loss faced while Coating operation is being carried out, as it is an API coated tablet. As it's a universal truth, losses are observed/experienced during coating and thus extra quantities are added as a recompense. These extra quantities do not become part of the final film coated product, as is evident in the **Assay** results of **Sitagliptin** which are well within limits as per label claim.
		• Actual quantity of water used for the preparation of Active coating solution does not equate to the 50% extra than that mentioned for each tablet.	• Firm has submitted that the actual water quantity mentioned in the PBR is a typographical error while the calculation is correct as of 50% excess quantity to match with rest of the formulation.
		• The submitted product development record does not reflect performance of Uniformity of dosage units' test by way of Assay for Sitagliptin before proceeding for final film coating step. Justification shall be submitted for proceeding further without establishing the content of Sitagliptin.	• The uniformity of content for sitagliptin was performed at final stage as per procedure and results were found well within specified limits. The assay (Sitagliptin) was performed on API coat stage before proceeding the next final stage of film coating while it was decided to perform the uniformity of dosage units (Sitagliptin) on finished stage on risk basis and later results were found satisfactory.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	• **Regsitartion Board directed the firm to include performance of dissolution profile for commercial batches at in-process stage of Metformin HCl extended release core prior to proceeding for Active coating of other drug substance.**

No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Empator 10mg Tablets which was conducted on 6th August 2019 and was presented in 291st meeting of Registration Board held on 02nd – 4th September 2019. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software. • The firm has audit trail reports available. The firm possesses stability chambers with digital data loggers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sitagliptin:** Copy of GMP certificate for Lianyungang Jari Pharmaceuticals Co., Ltd issued by Lianyungang Drug Administration & Valid up to 11-April-2024 is submitted. **Metformin HCl:** Copy of GMP Certificate for IPCA Laboratories Limited (Certificate: New-WHO-GMP/CERT/AD/67318/2018/11/24741) dated 31-08-2018 valid till 27-08-2021 issued by Food and Drug Administration, M.S. Bandra-kurla Complex, Bandra (E), Mumbai-400051 Maharashtra, India is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sitagliptin phosphate monohydrate** Firm has submitted commercial invoice No. 20YX2025B dated 16-07-2020 for Sitagliptin Phosphate Monohydrate B. No. 20200602 attested by the Assistant Director, DRAP, Karachi. **Metformin HCl:** Firm has provided commercial invoice No. MEG1920/1631259 dated 03-07-2019 for metformin HCl B. No. 19370ML2ARMI attested by the Assistant Director, DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section number	Observation.	Response by the firm.
1.	**1.3.4**	• Valid copy of DML of the applicant shall be submitted. • Valid GMP certificate/inspection report conducted within last three years shall be submitted.	• Firm has submitted valid copy of DML w.e.f. 09-02-2021. • Firm has also submitted GMP inspection report 20-10-2021 wherein it is concluded that the firm is considered to be operating at good level of compliance with cGMP guidelines.
2.	**1.6.5**	Valid GMP certificate of the API manufacturer of metformin HCl, issued by the relevant regulatory authority shall be submitted.	Firm has submitted Copy of GMP Certificate for IPCA Laboratories Limited (Certificate No.: New-WHO-GMP/CERT/AD/104179/2021/11/37725) dated 28-10-2021 valid till 27-10-2024 issued by Food and Drug Administration, M.S. Bandra-kurla Complex, Bandra (E), Mumbai-400051 Maharashtra, India.
3.	**2.3**	• Table for literature references for the drug substance i.e. Metformin HCl does not declare the status in Japanese pharmacopoeia. • The submitted BMR does not reflect performance of dissolution for Metformin HCl before proceeding for seal & active coating step. Justification shall be submitted for proceeding further without establishing the Dissolution profile of Metformin HCl.	• Firm has provided revised table for literature references for the drug substance i.e. Metformin HCl wherein they declare the status in Japanese pharmacopoeia. The dissolution testing was performed at final stage and results were well within specified limits. Since the trial were satisfactory at core stage, a decision was made on risk basis to perform the dissolution testing at final stage after multiple coating to better evaluate the impact on all stability batches. Satisfactory initial and stability results are also evident on Metformin HCl dissolution performance.
4.	**3.2.S.4.2**	• Analytical procedure submitted by the drug substance manufacturer for the Assay test of Metformin HCl is different from that adopted by the drug product manufacturer. Clarification is required. • USP monograph of Metformin HCl mentions use of 25-cm column in the Assay test, while the applicant has declared use of 250cm column for the same. Justification is required.	• Firm has submitted that Manufacturer has adopted the test method Assay by Titration based on USP old version that was official at the time of manufacturing **(Lot No. 20212 ML2ARMI/Mfg. Date: Feb.2020)** and also the assay limits were set accordingly. The API lot was tested at Martin Dow in December 2020 and method adopted Assay by HPLC along with revised limits according to updated versions of USP monograph (Official as of November 2020). • Firm has submitted that it is a typo error. The actual column used is 250 instead of 25.
5.	**3.2.S.4.4**	Assay limits for Metformin HCl provided by the drug product manufacturer is different from that declared by the drug substance manufacturer.	Firm has submitted that Manufacturer has adopted the test method Assay by Titration based on USP old version that was official at the time of manufacturing **(Lot No. 20212 ML2ARMI/Mfg. Date: Feb.2020)** and also the assay limits were set accordingly. The API lot was tested at Martin Dow in December 2020 and method adopted Assay by HPLC along with revised limits according

			to updated versions of USP monograph (Official as of November 2020).
6.	**3.2.P.8.3**	• Date of manufacturing of B # NPD-T-1366-L is 22-02-2021 while the analysis date is 16-03-2021. Justification for this delay shall be submitted.	• Batch was manufactured on 22/02/2021 and was processed after each stage satisfactory testing result to finished product with final coat. The finished product was received by 25/02/2021 in the lab for final testing and after satisfactory test results of 02 other batches which manufactured in march, 2021, stability initiated along with the other two batches on 16/03/2021.
		• Submitted CDP results are for capsules formulation instead of instead of tablets. Clarify.	• Firm has submitted that it was typo error.
7.		• Justification of 50% extra amount of Sitagliptin in master formulation (which is required to be based on study/scientific rationale) for which firm has stated that it was taken to compensate the loss during coating.	• The 50% excess quantity mentioned in the BPR is for the clarity of the reviewer and the document itself. Excess quantity was added in coating material i.e., Propyl gallate, Polyethylene Glycol 6000, Hydroxyprop.Methylcell.2910/6CP, Kaolin along with it is the **API Sitagliptin Phosphate Monohydrate** to compensate for the process loss faced while Coating operation is being carried out, as it is an API coated tablet. As it's a universal truth, losses are observed/experienced during coating and thus extra quantities are added as a recompense. These extra quantities do not become part of the final film coated product, as is evident in the **Assay** results of **Sitagliptin** which are well within limits as per label claim.
		• Actual quantity of water used for the preparation of Active coating solution does not equate to the 50% extra than that mentioned for each tablet.	• Firm has submitted that the actual water quantity mentioned in the PBR is a typographical error while the calculation is correct as of 50% excess quantity to match with rest of the formulation.
		• The submitted product development record does not reflect performance of Uniformity of dosage units test by way of Assay for Sitagliptin before proceeding for final film coating step. Justification shall be submitted for proceeding further without establishing the content of Sitagliptin.	• The uniformity of content for sitagliptin was performed at final stage as per procedure and results were found well within specified limits. The assay (Sitagliptin) was performed on API coat stage before proceeding the next final stage of film coating while it was decided to perform the uniformity of dosage units (Sitagliptin) on finished stage on risk basis and later results were found satisfactory.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

• **Regsitartion board directed the firm to include performance of dissolution profile for commercial batches at in-process stage of Metformin HCl extended release core prior to proceeding for Active coating of other drug substance.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

7.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Xetine 10mg tablets which was conducted on 03-03-2020 and was presented in 294th meeting of Registration Board held on 09th April, 2020. Registration Board decided to approve registration of Xetine Tablets 10mg and Xetine Tablets 20mg with innovator's specification
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Metformin hydrochloride.** Abhilasha Pharma Pvt. Limited 1408, 1409, GID, EST. Anklishwar, 393002, Gujrat state India. GMP Certificate No: 19081546 valid up to 25/08/2022 issued by Food & Drugs Control Administration of Gujarat State, India. **Empagliflozin:** Kaifeng Pharmaceutical (Group) Company Limited. China. Address: No.1, Yunan Street, Kaifeng, Henan Province, China.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice of: **Empagliflozin:** Firm has submitted copy of clearance certificate for Empagliflozin B. No. HF180721 attested by Assistant Director I&E, DRAP, Islamabad. Firm has also submitted copy of commercial Invoice No: CIN20180726G02 dated Jul. 26, 2018, with 1kg quantity of Empagliflozin B.

		No. HF180721 attested by Assistant Director I&E, DRAP, Islamabad. **Metformin HCl:** Not submitted.
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section No.	Observation	Response by the firm
1.	1.2	Table content from module 1 to module 5.	Firm has submitted table of contents from Module 1 to 5.
2.	1.3	• Valid copy of DML of the applicant shall be submitted. • Latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be provided.	Firm has submitte dcopy of GMP certificate eissued on basis of inspection conducted on 12-8-2022.
3.	1.6.5	• Section 1.6.5 has mentioned different drug substance manufacturers while module has mentioned some other manufacturers for the drug substances. Clarification is required. • GMP certificate for Empagliflozin drug substance manufacturer shall be submitted.	Firm has corrected section 1.6.5 wherein they have mentioned Kaifeng Pharmaceutical (Group) Company Limited, No.1, Yunan Street, Kaifeng, Henan Province, China and Abhilasha Pharma Pvt. Limited 1408, 1409, GID, EST. Anklishwar, 393002, Gujrat state India as the name & address of the drug substance manufacturers. Firm has submitted copy of GMP certificate no. HA20190069 valid upto 28-9-2024 issued in the name of M/s Kaifeng Pharmaceutical group Co., Ltd, China by NMPA of China.
4.	2.3	Table for literature references for the drug substance i.e. Metformin HCl does not declare the status other than BP. Clarification shall be submitted.	Firm has submitted revised table for literature references for the drug substance i.e. Metformin HCl wherein they have added USP, Ph. Eur and Japanese pharmacopoeias in in the literature.
5.	3.2.P.2.2.1	Pharmaceutical equivalence has mentioned pack size of 3 x 10's. clarification is required.	Firm has submitted that their proposed packaging at the time of launch would be an Alu-Alu having pack sizes of 2 x 7's, 2 x 10's & 3 x 10's. that's why the pack size was mentioned as 3 x 10's in the pharmaceutical equivalence data.
6.	3.2.P.8.3.	ADC attested invoices of the drug substance Metformin HCl used during product development and stability studies shall be submitted.	Firm has submitted Export Invoice No. Exp 013/2019-20 dated 05-06-2019 mentioning Metformin HCl, B. No. MET065/19 with quantity of 300kg attested by Assistant Director I & E, DRAP, Islamabad dated 01-07-19.

Decision: Approved.

	• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	Details of fee submitted	PKR 75,000/-: dated 20-09-2021.
	The proposed proprietary name / brand name	Coldenol Sinus Severe Caplets (day).
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Caplet contains; Paracetamol …… 325mg Phenylephrine HCl …… 5mg Guaifenesin …… 200mg
	Pharmaceutical form of applied drug	Oral tablet.
	Pharmacotherapeutic Group of (API)	Paracetamol, combinations excl. Psycholeptics. (N02BE51)
	Reference to Finished product specifications	Manufacturer specifications.
	Proposed Pack size	10's, 20's & 30's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Tylenol Sinus Severe (day), USFDA is provided by the firm. However, the same could not be found in USFDA data. Daily med has the same product as OTC product with the following disclaimer: *Most OTC drugs are not reviewed and approved by FDA, however they may be marketed if they comply with applicable regulations and policies. FDA has not evaluated whether this product complies.*
	For generic drugs (me-too status)	Could not be confirmed.
	GMP status of the Finished product manufacturer	Inspection report of 24-01-2018. Not valid.
	Evidence of section approval.	Tablet (general) section approved vide No. F. 1-19/92-Lic (P1) dated 27-07-2015.
	Name and address of API manufacturer.	<u>Paracetamol:</u> Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi.

		Guaifenesin: Zhejiang Haizhou Pharmaceutical Co., Ltd., linhai Industrial Zone, Linhai Zhejiang China. Phenylephrine Hydrochloride. M/s Shenzhen Oriental Pharmaceutical Co., Ltd., No. 43, Dakeng Road, Tongle village, Longgang District, Shenzhen China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, analytical procedures and its validation, batch analyses and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Paracetamol (USP/BP), Guaifenesin (USP) and Phenylephrine HCl (USP/BP) is present respectively. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests impurities B,C,D, Individual Impurity I & any unspecified for Paracetamol, Impurities A,B,C and D for Guaifenesin and Impurities A,C,D,E and unspecified impurity for Phenylephrine HCl, specifications, analytical procedures and its validation, batch analyses and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of the following drug substances as per Zone IV-a for both accelerated as well as real time conditions: Paracetamol: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 12 months. (Batch No. 18GN60001, 18GN60002, and 18GN60003) Guaifenesin: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months. (Batch No. 08GF04156, 08GF04157, and 08GF04158) Phenylephrine hydrochloride. Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months. (Batch No. PEH-160404, PEH-160405, and PEH-160406)
	Module-III (Drug Product):	The firm has submitted detail of description, composition, pharmaceutical development, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against Tylenol Sinus Severe Caplets DAY by performing quality tests (Assay, Dissolution, Disintegration Time test).

		CDP has been performed against the same product that is Tylenol Sinus Severe Caplets DAY, Lot No. 485556 made in Italy, distributed by M/s Johnson & Johnson Consumer Inc., Mc Neil Consumer Healthcare Division USA in 0.1 N HCl, Acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have been submitted including: system suitability, accuracy, and precision.

STABILITY STUDY DATA

Manufacturer of API	Paracetamol: Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi. Guaifenesin: Zhejiang Haizhou Pharmaceutical Co., Ltd., Linhai Industrial Zone, Linhai Zhejiang China. Phenylephrine Hydrochloride. M/s Shenzhen Oriental Pharmaceutical Co., Ltd., No. 43, Dakeng Road, Tongle village, Longgang District, Shenzhen China.		
API Lot No.	Paracetamol (Batch No.19GN60209, Batch No.19GN60213) Guaifenesin (Batch No.18GF03204) Phenylephrine HCl (Batch No.PEH-180101Y1)		
Description of Pack (Container closure system)	Alu-Alu blister packed in card box unit carton of 10's, 20's & 30's.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Manufacturing Date	17-12-2019	23-12-2019	23-12-2019
Date of Initiation	01-01-2020	01-01-2020	01-01-2020
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has submitted Reference of previous approval of applications with stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificates of: Paracetamol: Copy of GMP certificate No. 83/2020-DRAP(K) of M/s Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi issued by DRAP Karachi valid till 18/06/2022. Guaifenesin: Copy of GMP certificate No. ZJ20180122 of Zhejiang Haizhou Pharmaceutical Co., Ltd., Linhai Industrial Zone, Linhai city Zhejiang China issued by China food & Drug Administration valid until 09-25-2023.

		Phenylephrine Hydrochloride. Not provided.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• **Paracetamol** Copy of commercial invoice No. PRT/2019/0191 dated 18/03/2019 is submitted. Copy of commercial invoice No. PRT/2019/0197 dated 25/03/2019 is submitted. • **Guaifenesin** Copy of clearance certificate attested by AD (I&E) DRAP, Islamabad dated 16/07/2018 along with commercial invoice No.130128 dated 22/06/2018 with quantity of 0.75Kg is submitted. • **Phenylephrine HCl** Copy of clearance certificate attested by AD (I&E) DRAP, Islamabad dated 10/05/2018 along with commercial invoice No. SZ-1803039 dated 12/04/2018 with quantity of 308.25 Gram is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section No.	Observation	Response by the firm
1.	1.3	Valid copy of DML and latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be provided.	Firm has not provided any renewal of DML. Firm has submitted GMP inspection report dated 24-01-2018. ***Provided GMP inspection report is not within last three years.***
2.	1.5.9	Evidence of approval of applied formulation in reference regulatory authorities as decided by the registration board shall be submitted as the provided reference could not be confirmed.	Tylenol Sinus Severe (day), USFDA is provided by the firm. However, the same could not be found in USFDA data. Daily med has the same product as OTC product with the following disclaimer: *Most OTC drugs are not reviewed and approved by FDA, however they may be marketed if they comply with applicable regulations and policies. FDA has not evaluated whether this product complies.*
3.	1.6.5	• Address of the API manufacturer for guaifenesin provided in section 1.6.5 is different from that of mentioned in GMP certificate. Clarification is required. • Valid GMP certificate of the drug substance manufacturer (phenylephrine HCL) issued by	• Firm has submitted that due to typographical error, the address of the drug substance manufacturer mentioned in section 1.6.5 was written wrong. *Firm has submitted a document "Announcement of the state drug administration on matters concerning the implementation of the Drug Administration*

		the concerned / relevant regulatory authority shall be submitted.	*Law of the People's Republic of China" wherein under the heading of drug GMP & GSP management requirements following is stated.* *'starting from December 1, 2019 the pharmaceutical GMP and GSP certifications will be cancelled, GMP and GSP certificates will no longer be accepted and pharmaceutical GMP and GSP certificates will no longer be issued. Where current regulation require on-site inspection, on-site inspection shall be continued after December 1, 2019 and the company shall be notified of the on-site inspection results. '*
4.	3.2.S.4.2	<u>Guaifenesin:</u> • Analytical method used for drug substance (guaifenesin) by the drug substance manufacturer shall be submitted. • Analytical method provided by the drug product manufacturer for drug substance (guaifenesin) has mentioned 40g/ml while the pharmacopoeia has mentioned 40mcg/ml in Identification test. Clarification is required. <u>Phenylephrine HCL:</u> • Analytical method used for drug substance (phenylephrine HCL) by drug substance manufacturer shall be submitted.	Submitted. Firm has submitted that due typographic error 40g/ml was written instead of 40mcg/ml. However, finished product manufacturer has followed USP method for drug substance. Submitted.
5.	3.2.S.4.3	Verification studies of all the three drug substances performed by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.4	Batch analysis of paracetamol from Wilson pharma has not mentioned whether USP specifications or BP. Clarification is required.	Firm has submitted COA's wherein it is mentioned that the samples complies with both USP and BP.
7.	3.2.S.7.3	Both real time and accelerated stability study data for phenylephrine HCl from drug substance manufacturer shall be submitted.	Firm has submitted real time and accelerated stability study data for Phenylephrine HCl.
8.	3.2.P.2.	Qualitative composition of the applied formulation is different from reference product. Clarification is required.	• Firm has submitted that they used PVP K30 instead of HPC as binder in their formulation as both the materials are safely used in pharmaceutical industry for granulation purpose can be used interchangeably because of their excellent binding profiles, as mentioned in the hand book of pharmaceutical excipients. • Triacetin is used as plasticizer in the formulation and is used in the film coating to add plasticity to the film. Our film coating yields excellent film without use of plasticizer, so we didn't add triacetin in the formulation.

			• Carnauba wax is used to polish the caplet which is not necessarily required in our formulation. • Sucralose is not added in the formulation as it is used as sweetener and our formulation is neither chewable nor dispersible.
9.	3.2.P.2.2.1	Average weight of 10 tablets in pharmaceutical equivalence is 776.7gm. clarification is required.	Firm submitted that due to typographic error average weight of 10 tablets was mentioned 776.7 gm rather than 7.767gm.
10.	3.2.P.3.2	Batch formula has mentioned innovator's specification for paracetamol. clarification is required.	Firm has submitted new batch formula wherein USP specification is mentioned against paracetamol.
11.		Clearance certificate for Guaifenesin provided by the firm has mentioned 750Gm (0.75 Kg) quantity. While the firm has manufactured three trial batches of 1500 tablets each. With this respect only 900gm is required for the manufacturing of the said three trial batches. Clarification is required.	Firm has submitted that drug substance B. No. 18GF03204, quantity 750Gm was used in the manufacturing of trial 01, 02 trial batches. While B. No. 18GF03204 750gm & B. No. 18GF09667, 03 Kg respectively were used in the manufacturing of trial 03. We had submitted the clearance certificate of one batch 18GF03204 at the time of registration application submission, whereas the clearance certificate of the second batch was unintentionally overlooked. They also submitted the clearance certificate of the second batch (B. No. 18GF09667). ***However, there is no record of the second batch in the submitted application nor any verification studies of the said batch.*** ***Stability data sheets in the initial dossier has also mentioned batch No. 18GF03204 for all the three trial batches.***
12.	2.3.R	Dispensing of active materials without potency adjustment for Guaifenesin and Phenylephrine HCl. Justification is required.	Firm has submitted that potency was not adjusted for trial manufacturing batches (pilot scale) due to small batch size (1500 caplets) the adjustment amount was very low and does not affect the quality, efficacy and safety of the drug product. It is pertinent to mention here, that the finished drug product release limit is 90% - 110%. They also undertake that they will adjust the potency of drug substance at commercial batch for said drug product.
13.			Firm has submitted fee of 7500/- vide slip No. 67888642 dated 23-05-2022.

Decision: Deferred for further deliberation regarding regulatory stataus of applied formulation in reference regulatory authorities adopted by Regsitration Board in its 275th meeting.

422.	Name, address of Applicant / Marketing Authorization Holder	M/s Shaigan Pharmaceuticals Pvt. Ltd., 14 Km Adyala Road Post office Dahgal, Rawalpindi.
	Name, address of Manufacturing site.	M/s Shaigan Pharmaceuticals Pvt. Ltd., 14 Km Adyala Road Post office Dahgal, Rawalpindi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 25528 dated 14-09-2021.
	Details of fee submitted	PKR 30,000/-: dated 31-08-2021.
	The proposed proprietary name / brand name	Admit XR 50mg/500mg Tablet.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Sitagliptin as Phosphate Monohydrate ……. 50mg Metformin HCl (as extended release) …….. 500mg
	Pharmaceutical form of applied drug	Oral tablet.
	Pharmacotherapeutic Group of (API)	Combinations of oral blood glucose lowering drugs.
	Reference to Finished product specifications	Innovator's specifications.
	Proposed Pack size	14's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	JANUMET® XR 50/500 (sitagliptin and metformin hydrochloride extended release) tablets, USFDA approved.
	For generic drugs (me-too status)	Inosita Plus XR Tab 50/500 Tablet, PharmEvo (Pvt) Ltd., Reg. No. 090993.
	GMP status of the Finished product manufacturer	GMP certificate issued 28-08-2020 on the basis of inspection conducted on 25-09-2019.
	Evidence of section approval.	Tablet (general) section approved vide letter No. F. 1-18/92-Lic (Vol-II) dated 30-10-2019.
	Name and address of API manufacturer.	**Sitagliptin phosphate monohydrate:** Changzhou Pharmaceutical Factory, No. 518, East Laodong Road, Changzhou city China. Validity 12-11-2023. **Metformin HCl:** Smruthi Organics Limited, A-27, MIDC Chincholi, Tal-Mohol Solapur, Maharashtra State of India. Validity 13-11-2023.
	Module-II (Quality Overall Summary)	Firm has submitted QOS details as per WHO QOS PD template.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of of both drug substances.
	Stability studies (Drug substance.)	Stability study conditions: **Sitagliptin Phosphate Monohydrate.** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches: (20160301, 20160302, 20160303) **Metformin HCl.** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months

		Batches: (DMFH-026/10, DMFH-027/10, DMFH-028/10)
	Module-III (Drug Product):	The firm has submitted detail of manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the Innovator product that is Janumet XR 50/500mg tablet 50mg+500mg, Lot No. S022563 by Merck Sharp & Dohme USA by performing quality tests (Identification, Average weight of tablets, Impurities, Assay, Dissolution, total aerobic microbial count). CDP has been performed against the same brand that is Janumet XR 50/500mg tablet 50mg+500mg, Lot No. S022563 by Merck Sharp & Dohme USA in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method Validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	**Sitagliptin phosphate monohydrate:** Changzhou Pharmaceutical Factory, No. 518, East Laodong Road, Changzhou city China. REQUEST OF EXEMPTION FROM ON SITE INSPECTION
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their last inspection report for Emdagan 10mg & 20mg Tablets conducted on 06-01-2021, approved in 289th meeting of Registration Board. Following are details of few points; • The HPLC software is 21CFR Compliant. • Audit trail reports were available and physically checked by the inspection team. • Firm has adequate monitoring and controls for stability chambers. • Software is installed for continuous monitoring of chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sitagliptin Phosphate monohydrate:** Copy of GMP certificate No. Js20180928 Changzhou Pharmaceutical Factory, No. 518, East Laodong Road, Changzhou city China issued by the Jiangsu Drug Administration china is provided. Validity 12-11-2023 **Metformin HCl:** Copy of GMP Certificate for Smruthi Organics Limited, A-27, MIDC Chincholi, Tal-Mohol Solapur, Maharashtra State of India (Certificate: New-WHO-GMP/CERT/PD/86368/2019/11/30111) dated 14-11-2019 valid till 13-11-2023 issued by Food and Drug Administration, M.S. Bandra-kurla Complex, Bandra (E), Mumbai-400051 Maharashtra, India is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sitagliptin phosphate monohydrate** Firm has submitted commercial invoice No. 20YX2043B dated 11-09-2020 for Sitagliptin Phosphate Monohydrate B. No. 20200805 with quantity of 28kg x 12 drums (300kg) attested by the Assistant Director, DRAP, Islamabad. **Metformin HCl:** Firm has provided invoice No. E-185 dated 27-02-2020 for metformin HCl B. No. BMET-009/20 with quantity of 2000 kg attested by the Assistant Director, DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section number	Observation.	Response by the firm.
1.	2.3	• The submitted BMR does not reflect performance of dissolution for Metformin HCl before proceeding for active coating step. Justification shall be submitted for proceeding	Firm has submitted that Metformin HCl dissolution was performed on lab scale trial (B. No. LS-001) and also submitted data of lab scale trial wherein they have performed dissolution for Metformin HCl before proceeding for active coating step.

		further without establishing the Dissolution profile of Metformin HCl. • Table for literature references for the drug substance i.e. Metformin HCl does not declare the status in Japanese pharmacopoeia. Also, volume/most recent editions are not mentioned in the table for literature references.	Firm has submitted new table for literature references wherein they have added the status of Metformin HCl in Japanese pharmacopoeia. Volume/most recent editions are also mentioned in the new table for literature references. No fee has been submitted.
2.	2.3.R.1	• Justify the dispensed quantity of Sitagliptin against the actual potency declared in the COA of API.	As 64.25mg sitagliptin phosphate monohydrate is equal to 50mg of sitagliptin as free base. sitagliptin phosphate monohydrate is used in 20% excess amount to compensate process loss and is applied via film coating process. i.e. 64.25mg + 20% (77.1mg/tablet) is dispensed to achieve 100% assay of sitagliptin phosphate monohydrate.
3.	3.2.S.4.1	• Submitted COA for Metformin HCl of the finished product manufacturer does not reflects any specification and Batch number. Clarification is required. • Loss on drying test for metformin HCl by the finished product manufacturer has mentioned limits of NMT 0.5% at 80C while BP has mentioned maximum of 0.5% at 105C. Temperature conditions are not in accordance with the pharmacopoeial monograph. Clarification is required. • For specifications of drug substance Metformin HCl innovator's specifications are mentioned while monograph is available in USP. Clarification is required. • Specifications of Metformin HCl has assay limits of 98.5% - 101.0% while USP has mentioned 98% - 102%. Clarify	Firm has submitted new COA for Metformin HCL with BP specifications. Firm has submitted that it was typographical error and submitted new COA for Metformin HCL with temperature conditions in accordance with the pharmacopoeial monograph. i.e. NMT 0.5% at 105C. Firm has submitted that it was typographical error and the drug substance manufacturer followed BP specifications. Firm has submitted that specifications of Metformin HCl are as per BP monograph where assay limits of 98.5% - 101.0%.
4.	3.2.S.4.4	• Provide results of analysis of relevant batch(es) of Sitagliptin phosphate monohydrate performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture. • Provide results of analysis of relevant batch(es) of Metformin HCl performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture.	Firm has submitted COA for Sitagliptin phosphate monohydrate along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture. Firm has submitted COA for Metformin HCl along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture.

5.	3.2.P.1	Justification of 20% extra amount of Sitagliptin in master formulation (which is required to be based on study/scientific rationale) for which firm has stated that it was taken to compensate the loss during coating.	Firm has submitted that in lab scale trial to optimize the application of sitagliptin phosphate monohydrate to obtain 100% of drug, 20% excess quantity was added to compensate the loss during active coating of sitagliptin. For this purpose, 30% excess drug solution is prepared i.e. (64.25mg + 30% excessive drug = 83.525mg/tablet. This solution was applied in different stages. Summary is given below; • At first stage with 100% sitagliptin solution the assay results were 83.49%. • At second stage with 110% sitagliptin solution the assay results were 92.94%. • At first stage with 120% sitagliptin solution the assay results were 102.39%.
6.	3.2.P.2.3	Innovator product has polymeric coating over the active coating while there is no such polymeric coating of the applied formulation, clarification is required.	Firm has submitted that ingredients of their formulation are qualitatively same with reference product. Active drug sitagliptin is coated with soluble polymer carried by film coating with Opadry.
7.	3.2.P.8	• Only 03-month stability data is submitted. Stability study data both real time and accelerated for six months shall be submitted. • Protocol has mentioned API lot number for Empagliflozin instead on sitagliptin. Clarify. • Reference of previous approval of applications with stability study data of the firm shall be submitted.	Firm has submitted 06 month stability data for all the trial batches for both real time and accelerated conditions. Firm has submitted that it was due to typographic error. They also submitted new/corrected protocol. Submitted.
8.	3.2.P.8.3	Raw data sheets for assay test & dissolution test of the finished product shall be submitted.	Firm has submitted raw data sheets.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Regsitartion board directed the firm to include performance of dissolution profile for commercial batches at in-process stage of Metformin HCl extended release core prior to proceeding for Active coating of other drug substance.**
- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	The proposed proprietary name / brand name	Admit XR 100mg/1000mg Tablet.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Sitagliptin as Phosphate Monohydrate ……. 100mg Metformin HCl (as extended release) ……..1000mg
	Pharmaceutical form of applied drug	Oral tablet.
	Pharmacotherapeutic Group of (API)	Combinations of oral blood glucose lowering drugs.
	Reference to Finished product specifications	Innovator's specifications.
	Proposed Pack size	14's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	JANUMET® XR 100/1000 (sitagliptin and metformin hydrochloride extended release) tablets, USFDA approved.
	For generic drugs (me-too status)	Inosita Plus XR Tab 100/1000 Tablet, PharmEvo (Pvt) Ltd., Reg. No. 090992.
	GMP status of the Finished product manufacturer	GMP certificate issued 28-08-2020 on the basis of inspection conducted on 25-09-2019.
	Evidence of section approval.	Tablet (general) section approved vide letter No. F. 1-18/92-Lic (Vol-II) dated 30-10-2019.
	Name and address of API manufacturer.	**Sitagliptin phosphate monohydrate:** Changzhou Pharmaceutical Factory, No. 518, East Laodong Road, Changzhou city China. Validity 12-11-2023. **Metformin HCl:** Smruthi Organics Limited, A-27, MIDC Chincholi, Tal-Mohol Solapur, Maharashtra State of India. Validity 13-11-2023.
	Module-II (Quality Overall Summary)	Firm has submitted QOS details as per WHO QOS PD template.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of of both drug substances.
	Stability studies (Drug substance.)	Stability study conditions: **Sitagliptin Phosphate Monohydrate.** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches: (20160301, 20160302, 20160303) **Metformin HCl.** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (DMFH-026/10, DMFH-027/10, DMFH-028/10)

	Module-III (Drug Product):	The firm has submitted detail of manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the Innovator product that is Janumet XR 100/1000mg tablet, Lot No. S028886 by Merck Sharp & Dohme USA by performing quality tests (Identification, Average weight of tablets, Impurities, Assay, Dissolution, total aerobic microbial count). CDP has been performed against the same brand that is Janumet XR 100/1000mg tablet, Lot No. S028886 by Merck Sharp & Dohme USA in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method Validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	**Sitagliptin phosphate monohydrate:** Changzhou Pharmaceutical Factory, No. 518, East Laodong Road, Changzhou city China. Validity 12-11-2023. **Metformin HCl:** Smruthi Organics Limited, A-27, MIDC Chincholi, Tal-Mohol Solapur, Maharashtra State of India. Validity 13-11-2022.		
API Lot No.	Sitagliptin phosphate monohydrate; B#20200805 Metformin HCl: BMET-009/20		
Description of Pack (Container closure system)	Alu-Alu blister of 2 x 7's light blue color oblong biconvex, plain, film coated tablets.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 03 months Accelerated: 03 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	3000 tablets	3000 tablets	3000 tablets
Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	20-04-2021	25-04-2021	25-04-2021
No. of Batches	03		
REQUEST OF EXEMPTION FROM ON SITE INSPECTION			
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.			
Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their last inspection report for Emdagan 10mg & 20mg Tablets conducted on 06-01-2021, approved in 289th meeting of Registration Board. Following are details of few points; • The HPLC software is 21CFR Compliant. • Audit trail reports were available and physically checked by the inspection team. • Firm has adequate monitoring and controls for stability chambers. • Software is installed for continuous monitoring of chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sitagliptin Phosphate monohydrate:** Copy of GMP certificate No. Js20180928 Changzhou Pharmaceutical Factory, No. 518, East Laodong Road, Changzhou city China issued by the Jiangsu Drug Administration china is provided. Validity 12-11-2023 **Metformin HCl:** Copy of GMP Certificate for Smruthi Organics Limited, A-27, MIDC Chincholi, Tal-Mohol Solapur, Maharashtra State of India (Certificate: New-WHO-GMP/CERT/PD/86368/2019/11/30111) dated 14-11-2019 valid till 13-11-2023 issued by Food and Drug Administration, M.S. Bandra-kurla Complex, Bandra (E), Mumbai-400051 Maharashtra, India is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sitagliptin phosphate monohydrate** Firm has submitted commercial invoice No. 20YX2043B dated 11-09-2020 for Sitagliptin Phosphate Monohydrate B. No. 20200805 with quantity of 28kg x 12 drums (300kg) attested by the Assistant Director, DRAP, Islamabad. **Metformin HCl:** Firm has provided invoice No. E-185 dated 27-02-2020 for metformin HCl B. No. BMET-009/20 with quantity of 2000 kg attested by the Assistant Director, DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section number	Observation.	Response by the firm.
1.	2.3	• The submitted BMR does not reflect performance of dissolution for Metformin HCl before proceeding for active coating step. Justification shall be submitted for proceeding further without establishing the	Firm has submitted that Metformin HCl dissolution was performed on lab scale trial (B. No. LS-001) and also submitted data of lab scale trial wherein they have performed dissolution for Metformin HCl before proceeding for active coating step.

		Dissolution profile of Metformin HCl. • Table for literature references for the drug substance i.e. Metformin HCl does not declare the status in Japanese pharmacopoeia. Also, volume/most recent editions are not mentioned in the table for literature references.	Firm has submitted new table for literature references wherein they have added the status of Metformin HCl in Japanese pharmacopoeia. Volume/most recent editions are also mentioned in the new table for literature references. ***No fee has been submitted.***
2.	2.3.R.1	• Justify the dispensed quantity of Sitagliptin against the actual potency declared in the COA of API.	As 128.5mg sitagliptin phosphate monohydrate is equal to 100mg of sitagliptin as free base. sitagliptin phosphate monohydrate is used in 20% excess amount to compensate process loss and is applied via film coating process. i.e. 128.5mg + 20% (154.2mg/tablet) is dispensed to achieve 100% assay of sitagliptin phosphate monohydrate.
3.	3.2.S.4.1	• Submitted COA for Metformin HCl of the finished product manufacturer does not reflects any specification and Batch number. Clarification is required. • Loss on drying test for metformin HCl by the finished product manufacturer has mentioned limits of NMT 0.5% at 80C while BP has mentioned maximum of 0.5% at 105C. Temperature conditions are not in accordance with the pharmacopoeial monograph. Clarification is required. • For specifications of drug substance Metformin HCl innovator's specifications are mentioned while monograph is available in USP. Clarification is required. • Specifications of Metformin HCl has assay limits of 98.5% - 101.0% while USP has mentioned 98% - 102%. Clarify	Firm has submitted new COA for Metformin HCL with BP specifications. Firm has submitted that it was typographical error and submitted new COA for Metformin HCL with temperature conditions in accordance with the pharmacopoeial monograph. i.e. NMT 0.5% at 105C. Firm has submitted that it was typographical error and the drug substance manufacturer followed BP specifications. Firm has submitted that specifications of Metformin HCl are as per BP monograph where assay limits of 98.5% - 101.0%.
4.	3.2.S.4.4	• Provide results of analysis of relevant batch(es) of Sitagliptin phosphate monohydrate performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture. • Provide results of analysis of relevant batch(es) of Metformin HCl performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture.	Firm has submitted COA for Sitagliptin phosphate monohydrate along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture. Firm has submitted COA for Metformin HCl along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture.

5.	3.2.P.1	Justification of 20% extra amount of Sitagliptin in master formulation (which is required to be based on study/scientific rationale) for which firm has stated that it was taken to compensate the loss during coating.	Firm has submitted that in lab scale trial to optimize the application of sitagliptin phosphate monohydrate to obtain 100% of drug, 20% excess quantity was added to compensate the loss during active coating of sitagliptin. For this purpose, 30% excess drug solution is prepared i.e. (128.5mg + 30% excessive drug = 167.05mg/tablet. This solution was applied in different stages. Summary is given below; • At first stage with 100% sitagliptin solution the assay results were 83.43%. • At second stage with 110% sitagliptin solution the assay results were 92.56%. At first stage with 120% sitagliptin solution the assay results were 101.01%.
6.	3.2.P.2.3	Innovator product has polymeric coating over the active coating while there is no such polymeric coating of the applied formulation, clarification is required	Firm has submitted that ingredients of their formulation are qualitatively same with reference product. Active drug sitagliptin is coated with soluble polymer carried by film coating with Opadry.
7.	3.2.P.8	• Only 03 months stability data is submitted. Stability study data both real time and accelerated for six months shall be submitted. • Reference of previous approval of applications with stability study data of the firm shall be submitted.	Firm has submitted 06 months stability data for all the trial batches for both real time and accelerated conditions. Submitted.
8.	3.2.P.8.3	Raw data sheets for assay test & dissolution test of the finished product shall be submitted.	Firm has submitted raw data sheets.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Regsitartion board directed the firm to include performance of dissolution profile for commercial batches at in-process stage of Metformin HCl extended release core prior to proceeding for Active coating of other drug substance.**
- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Promig plus tablets 375mg/20mg which was conducted on 1st, 13th & 14th March 2019 and was presented in 289th meeting of Registration Board held on 14-16th May, 2019. According to the report following points were confirmed.

		• The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. The firm possesses stability chambers with digital data loggers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. CQ20190051 of drug substance manufacturer issued by Chongqing Drug Administration, China valid till 11/04/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. KSDS202008232 dated 11-09-2020 attested by the Assistant Director I&E, DRAP, Islamabad dated 01-10-2020. Details are also mentioned on the invoice with quantity of 05Kg with B. No. Rp200501.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section Number	Observations	Response of the firm.
1.	1.3.4	GMP certificate/inspection report conducted within last three years shall be submitted.	Firm has submitted GMP certificate No. F. 3-16/2018-Addl. Dir. (QA&LT)-1 dated 04-01-2022 on the basis of inspection conducted on 03-01-2022.
2.	1.6.5	This section has mentioned Dapagliflozin instead of Rebamipide. Also, section 2.3.S is for Dapagliflozin. Clarification is required.	Firm has submitted that it was due to typographic error and they now submitted corrected document with Rebamipide heading.
3.	3.2.S.4.2	• In analytical procedures for drug substance limits for loss on drying test, limits for chloride test, limits for residue on ignition test, upper limits in assay test are not provided by finished product manufacturer. Clarification is required. • Assay test of the drug substance provided by both the drug substance manufacturer and finished product manufacturer is different from that of the official monograph. Clarification is required. • In method verification protocol provided by the finished product manufacturer, the formula used for assay calculation has no weight of sample. Clarification is required.	Firm has provided revised SAP wherein they have added the limits for the mentioned tests. Firm has submitted that they have performed the assay test both on JP and manufacturer's specs. In JP specs assay is performed by titration while manufacturer used HPLC method for assay. We cross verified the titration result against HPLC method. But we missed to submit the titration result. They also provided the results of titrimetric assay. Firm submitted that due to typographical mistake weight of sample is missed in formula but in result they have consider the weight of sample. Also provided revised protocol.

4.	3.2.S.4.5	Inhouse specifications are mentioned for drug substance while the official monograph of the drug substance is available in JP. Clarify.	Firm has submitted that the specifications are as JP specs. They also provided justification of specifications.
5.	3.2.S.7.3	• Long term stability data of the drug substance has 65% ± 10% RH condition. Clarification is required. • Also, one batch long term condition is 60% ± 10% RH. Clarification is required. • Accelerated stability data sheets for drug substance is mentioned 98%-102% limits for the assay test while the monograph has mentioned 99% - 101%. Clarification is required.	Firm has submitted revised stability of the drug substance with 30°C ± 2°C / 65% ± 5%RH for real time and 40°C ± 2°C / 75% ± 5%RH for accelerated condition. New data sheets of the stability studies have the assay limit of 99% - 101%. ***Only the stability conditions and assay limits have been changed while the data remains the same as previous.***
6.	3.2.P.2	Comparative study protocol has mentioned assay limits of 90%-110% for finished drug product while the monograph has mentioned 95%-105%. Clarification is required.	Firm has submitted that this change in limit came across due to typographical mistake in comparative study protocol. They also provided revised document.
7.	3.2.P.2.3	Critical quality attributes are for soglumet tablets.	Firm has submitted that CQA's mentioned are correct for glucosta tablets. However, due to typographic error heading was for Soglumet tablets.
8.	3.2.P.5.1	This section has mentioned innovator's specifications. Clarification is required.	Firm has submitted that specifications of FPP are as per JP specs.
9.	3.2 P.5.2	• Sample preparation method for dissolution test shall be submitted. • Identify the Q value in dissolution limits. • Clarification regarding dilution factor used in sample preparation in dissolution test is required.	Submitted. The term Q is used to describe the cumulative percent of drug dissolved with respect to label claim at the selected time point of the dissolution test. A Q value of 80% is generally recommended, except when a justification with adequate data are provided to support a lower Q value (e.g., clinical or bioavailability/bioequivalence data). Q values above 80% are not generally used. In case of this product JP just provide the limit i-e NLT 75.0% after 60 minutes. Firm has submitted that it is second dilution of the sample to make the final concentration of sample solution as 22mcg/ml.
10.	3.2.P.8.2	Stability study protocol has mentioned assay limits of 90%-110% and dissolution limits of NLT 80% in 30minutes which are in contradiction to the official monograph. Clarification is required.	Firm has submitted that this change in limit came across due to typographical mistake in stability study protocol. They submitted revised document for the same.
11.	3.2.P.8.3	• Stability study data sheet has mentioned 30-03-2021 as date of initiation of stability study data while the data has shown initial testing on 10-03-2021. Clarify. • Only three-month stability data is submitted. Stability study data of six months shall be submitted.	Initial testing is start on 10-03-2022 and testing end on 11-03-2022. Gap between Initial testing and initiation stability occur due to non-availability of machine for blistering, so gap occur in Initial testing data and initiation stability data. Firm has submitted 06 months stability data for all the three batches.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	Evidence of section approval.	Tablet section as per GMP certificate.
	Name and address of API manufacturer.	Name: Jiangsu Yongan Pharmaceutical Co., Limited. Address: 18, Provincial Highway, 237 Huaian, Economic Development Zone, Jiangsu, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification,

		batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (130401, 130402, 130501)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Farxiga Tablet 5mg manufactured by AstraZeneca pharmaceutical (B# RF812, Mfg. date 11-2019, Exp. Date 10-2022) by performing quality tests (Identification, weight variation, Disintegration time & Assay.). Comparative Dissolution Profile has also been performed against the same brand that is Farxiga Tablet 5mg manufactured by AstraZeneca pharmaceutical (B# RF812, Mfg. date 11-2019, Exp. Date 10-2022) in 3 medias i.e; 0.1N HCl, Acetate Buffer pH4.5 & Phosphate Buffer pH 6.8.The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD/PR20-010/T2/S1	RD/PR20-010/T2/S2	RD/PR20-010/T2/S3

Batch Size	2000 tablets	2000 tablets	2000 tablets
Manufacturing Date	09-2020	09-2020	09-2020
Date of Initiation	30-09-2020	30-09-2020	30-09-2020
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted copy of Last inspection Report conducted on 24/01/2018 (Daclatasvir). The board granted the approval in 278th meeting held on 29-31 Jan 2018 of **Dasvir Tablet 60mg and 90mg**.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. JS2020921 issued by Jiangsu drug administration valid till 20/09/2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. ZY20061201G/W Dated 16/06/2020 for Dapagliflozin propanediol monohydrate attested by Assistant Director (I&E) DRAP, Lahore bearing batch number 7100-202006001.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section No.	Observation	Response by the firm
1.	1.3	• Valid copy of DML of drug product manufacturer shall be submitted. • Latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be submitted.	Copy of valid DML w.e.f. 08-04-2021 is submitted. Copy of DML renewal inspection report is submitted by the firm wherein the panel recommends the renewal of DML to M/s Novamed Pharmaceuticals.
2.	1.5.4	Different pack sizes are mentioned in different parts of the application. 1.5.4 (14's, 28's) Covering letter has mentioned 4 different pack sizes. Clarification is required.	All the marketed pack sizes are applied to meet the market requirement on more economical values.
3.	2.3.R.2	Justify the dispensed quantity drug substance i.e. Dapagliflozin against the label claim.	Firm has submitted that quantity of dapagliflozin is calculated with respect to label claim & salt for a batch of 2000 tablets. Label claim = 5mg Factor = 1.23 6.15mg/ tablet 6.15 x 2000 = 0.013kg

			Executed BMR's have shown 6.5mg/tablet quantity while they are claiming 6.15mg/tablets.
4.	3.2.S.4.2.	• Proposed chromatographic conditions i.e. mobile phase and diluent are different between the analytical method proposed by the drug substance manufacturer and drug product manufacturer for the assay test of dapagliflozin. Clarification is required.	Firm has submitted that we brought some changes in the method for our feasibility but to ensure repeatability results we have validated the changed method as per international guidelines using USP/ICH.
5.	3.2.S.4.3	• Accuracy parameter of the verification studies of drug substance provided by the drug product manufacturer is for some other molecule than applied molecule. Clarification is required.	Firm has submitted that there was typo error in the report which has been amended.
6.	3.2.S.4.4	Provide results of analysis of relevant batch(es) of Dapagliflozin propanediol monohydrate performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacture.	Firm has provided COA for the drug substance. ***COA of the drug substance provided by the drug product manufacturer has different manufacturing date, Expiry date from that of the drug substance manufacturer.*** ***Furthermore, the manufacturing date of the drug substance is June 2021 while the drug product manufacturer has conducted analysis on 17-08-2020.***
7.	3.2.P.1	• Colloidal silicon dioxide is mentioned as active ingredient in the composition. Clarification is required. • Qualitative composition of the applied formulation is different from innovator product. Reference product does not contain SLS while the applied formulation has SLS as inactive. Clarification is required.	Firm has submitted that colloidal silicon dioxide is erroneously mentioned as active. It is used as glidant in manufacturing of dapagliflozin. Firm has submitted that SLS is excipient and the chemical combability studies are carried out for all excipients used in the formulation, where no interference is observed. Also, the satisfactory stability studies show that all excipients are chemically compatible.
8.	3.2.P.2.2.1	• Raw data sheets of content uniformity test in pharmaceutical equivalence has pyridoxine HCl. Clarification is required. • Dissolution test has not been performed in the pharmaceutical equivalence. Clarification is required. • Manufacturing date and expiry date of the same batch of innovator product are different. Clarification is required.	Firm has submitted new sheets for content uniformity wherein dapagliflozin is mentioned. Firm has submitted that CDP was performed against the innovator product and pharmaceutical equivalence was established through CDP and rest of the parameters are covered under pharmaceutical equivalence. Firm has submitted revised sheets for manufacturing and expiry dates of the innovator product.
9.	3.2.P.3.5	This section has mentioned specifications for pyridoxine & doxylamine. Clarification is required.	Firm has submitted revised process validation protocol for dapagliflozin.
10.	3.2.P.5.1	• Justify dissolution limits i.e., NLT 80% (Q) in 45 minutes in 0.1N HCL, medium volume (500ml) & Speed (50rpm) since innovator product (Farxiga) specifies NLT (Q) in 15 min	Firm has submitted that as per FDA's dissolution guidelines 2018their dissolution conditions are well complied with the conditions mentioned in the guidance document for paddle

		in acetate buffer 4.5 pH with medium volume of 1000ml & speed of 60 rpm. Clarification is required. • Accuracy parameter of the validation report/studies for drug product provided by the drug product manufacturer is for some other molecule than applied molecule. Clarification is required.	apparatus. They further submitted that their current dissolution limit is 30 minutes instead of 45 minutes. They further submitted that after reviewing the dissolution release trend in CDP report it is evident that more than 80% drug is released in 15 minutes so we are revising our current acceptance specification limit to NLT 80% in 15 minutes instead of 30 minutes. ***Drug product specifications has mentioned 45 minutes for dissolutions of the drug product.*** ***Furthermore, not only the time limit but also the dissolution medium, medium volume and paddle speed all are different from the innovator product.*** Firm has submitted revised analytical method validation report wherein they have mentioned dapagliflozin.
11.	3.2 P.8	Reference of previous approval of applications with stability study data of the firm shall be submitted.	The firm has submitted copy of inspection Report conducted on 22/01/2018 for Dasvir 60mg and Dasvir 90mg (Daclatasvir).
12.	3.2.P.8.1	Submit stability data sheets as per approved format by the Registration Board with inclusion of API lot number.	Firm has submitted new stability sheets for the stability data wherein they have included API lot No. in the new sheets. ***However, the API lot No. mentioned in the new data sheets and API lot No. in COA, import document are different from each other.***

Decision: Registration Board decided to defer the case for the following points:

- **Justify the dispensed quantity drug substance i.e. Dapagliflozin against the label claim as Label claim is 5mg and after factor calculation (1.23) each tablet will have 6.15mg of Dapagliflozin while the Executed BMR's have shown 6.5mg/tablet quantity for Dapagliflozin.**
- **Justify dissolution limits i.e., NLT 80% (Q) in 45 minutes in 0.1N HCL, medium volume (500ml) & Speed (50rpm) since innovator product (Farxiga) specifies NLT (Q) in 15 min in acetate buffer 4.5 pH with medium volume of 1000ml & speed of 60 rpm.**
- **Justification shall be submitted regarding the API lot No. mentioned in the new stability data sheets and API lot No. in COA, import document are different from each other.**
- **Justification regarding the COA of the drug substance provided by the drug product manufacturer shall be submitted as it has different manufacturing date, Expiry date from that of the drug substance manufacturer. Furthermore, the manufacturing date of the drug substance is June 2021 while the drug product manufacturer has conducted analysis on 17-08-2020.**

	The proposed proprietary name / brand name	Dapaflo 10mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Dapagliflozin Propanediol Monohydrate Eq. to Dapagliflozin …… 10mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Sodium-glucose co-transporter 2 (SGLT2) inhibitors.
	Reference to Finished product specifications	In-House
	Proposed Pack size	14's, 28's.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	FARXIGA® 10mg (dapagliflozin) film coated tablets, USFDA approved.
	For generic drugs (me-too status)	Xiga 10mg tablets, CCL Pharmaceuticals, Reg. No. 090505.
	GMP status of the Finished product manufacturer	License granted on 08/04/2006 and renewed on 08/04/2021 General tablet section approved and GMP certificate on 31/08/2021.
	Evidence of section approval.	Tablet section as per GMP certificate.
	Name and address of API manufacturer.	Name: Jiangsu Yongan Pharmaceutical Co., Limited. Address: 18, Provincial Highway, 237 Huaian, Economic Development Zone, Jiangsu, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions:

		Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (130401, 130402, 130501)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Farxiga Tablet 10mg manufactured by AstraZeneca pharmaceutical (B# RB164, by performing quality tests (Identification, weight variation, Disintegration time, content uniformity & Assay). Comparative Dissolution Profile has also been performed against the same brand that is Farxiga Tablet 10mg manufactured by AstraZeneca pharmaceutical (B# RB194, Mfg. date 06-2019, Exp. Date 05-2021) in 3 medias i.e; 0.1N HCl, Acetate Buffer pH4.5 & Phosphate Buffer pH 6.8.The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section No.	Observation	Response by the firm
1.	1.3	• Valid copy of DML of drug product manufacturer shall be submitted. • Latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be submitted.	Copy of valid DML w.e.f. 08-04-2021 is submitted. Copy of DML renewal inspection report is submitted by the firm wherein the panel recommends the renewal of DML to M/s Novamed Pharmaceuticals.
2.	1.5.4	Different pack sizes are mentioned in different parts of the application. 1.5.4 (14's, 28's) Covering letter has mentioned 4 different pack sizes. Clarification is required.	Firm has submitted that all the marketed pack sizes are applied to meet the market requirement on more economical values.
3.	2.3.R.2	Justify the dispensed quantity drug substance i.e. Dapagliflozin against the label claim.	Firm has submitted that quantity of dapagliflozin is calculated with respect to label claim & salt for a batch of 2000 tablets. Label claim = 10mg Factor = 1.23 12.3mg/ tablet 12.3 x 2000 = 0.024kg ***Executed BMR's have shown 13.05 mg/tablet quantity while they are claiming 12.3mg/tablets.***
4.	3.2.S.4.2.	Proposed chromatographic conditions i.e. mobile phase and diluent along with concentration of sample and standard solution are different between the analytical method proposed by the drug substance manufacturer and drug product manufacturer for the assay test of dapagliflozin. Clarification is required.	Firm has submitted that we brought some changes in the method for our feasibility but to ensure repeatability results we have validated the changed method as per international guidelines using USP/ICH.
5.	3.2.S.4.4	Provide results of analysis of relevant batch(es) of Dapagliflozin propanediol monohydrate performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of	Firm has provided COA for the drug substance. ***COA of the drug substance provided by the drug product manufacturer has different manufacturing date, Expiry***

		Analysis (CoA) of the same batch from Drug Substance manufacture.	***date from that of the drug substance manufacturer.*** ***Furthermore, the manufacturing date of the drug substance is June 2021 while the drug product manufacturer has conducted analysis on 17-08-2020.***
6.	3.2.P.1	• Colloidal silicon dioxide is mentioned as active ingredient in the composition. Clarification is required. • Qualitative composition of the applied formulation is different from innovator product. Reference product does not contain SLS while the applied formulation has SLS as inactive. Clarification is required.	Firm has submitted that colloidal silicon dioxide is erroneously mentioned as active. It is used as glidant in manufacturing of dapagliflozin. Firm has submitted that SLS is excipient and the chemical combability studies are carried out for all excipients used in the formulation, where no interference is observed. Also, the satisfactory stability studies show that all excipients are chemically compatible.
7.	3.2.P.2.2.1	• Raw data sheets of content uniformity test in pharmaceutical equivalence has pyridoxine HCl. Clarification is required. • Dissolution test has not been performed in the pharmaceutical equivalence. Clarification is required.	Firm has submitted new sheets for content uniformity wherein dapagliflozin is mentioned. Firm has submitted that CDP was performed against the innovator product and pharmaceutical equivalence was established through CDP and rest of the parameters are covered under pharmaceutical equivalence.
8.	3.2.P.5.1	• Justify dissolution limits i.e., NLT 80% (Q) in 30 minutes in 0.1N HCL, medium volume (500ml) & Speed (50rpm) since innovator product (Farxiga) specifies NLT (Q) in 15 min in acetate buffer 4.5 pH with medium volume of 1000ml & speed of 60 rpm. Clarification is required.	Firm has submitted that as per FDA's dissolution guidelines 2018their dissolution conditions are well complied with the conditions mentioned in the guidance document for paddle apparatus. They further submitted that their current dissolution limit is 30 minutes instead of 45 minutes. They further submitted that after reviewing the dissolution release trend in CDP report it is evident that more than 80% drug is released in 15 minutes so we are revising our current acceptance specification limit to NLT 80% in 15 minutes instead of 30 minutes. ***Drug product specifications has mentioned 45 minutes for dissolutions of the drug product.*** ***Furthermore, not only the time limit but also the dissolution medium, medium volume and paddle speed all are different from the innovator product.***
9.	3.2 P.8	• Reference of previous approval of applications with stability study data of the firm shall be submitted. • COA of drug substance i.e. Dapagliflozin propanediol monohydrate, B# 7100-202006001 shall be submitted.	The firm has submitted copy of inspection Report conducted on 22/01/2018 for Dasvir 60mg and Dasvir 90mg (Daclatasvir). Submitted.

10.	3.2.P.8.1	Submit stability data sheets as per approved format by the Registration Board with inclusion of API lot number.	Firm has submitted new stability sheets for the stability data wherein they have included API lot No. in the new sheets. ***However, the API lot No. mentioned in the new data sheets and API lot No. in COA, import document are different from each other.***

Decision: Registration Board decided to defer the case for the following points:

- **Justify the dispensed quantity drug substance i.e. Dapagliflozin against the label claim as Label claim is 10mg and after factor calculation (1.23) each tablet will have 12.3mg of Dapagliflozin while the Executed BMR's have shown 13.05 mg/tablet quantity for Dapagliflozin.**
- **Justify dissolution limits i.e., NLT 80% (Q) in 45 minutes in 0.1N HCL, medium volume (500ml) & Speed (50rpm) since innovator product (Farxiga) specifies NLT (Q) in 15 min in acetate buffer 4.5 pH with medium volume of 1000ml & speed of 60 rpm.**
- **Justification shall be submitted regarding the API lot No. mentioned in the new stability data sheets and API lot No. in COA, import document are different from each other.**
- **Justification regarding the COA of the drug substance provided by the drug product manufacturer shall be submitted as it has different manufacturing date, Expiry date from that of the drug substance manufacturer. Furthermore, the manufacturing date of the drug substance is June 2021 while the drug product manufacturer has conducted analysis on 17-08-2020.**

Registration applications of Imported products on Form 5 F.

427.	Name, address of Applicant / Importer	M/s AGP Limited, B-23-C, S.I.T.E., Karachi.
	Details of Drug Sale License of importer	License No: 1126. Address: B-23-C, S.I.T.E., Karachi-75700, Pakistan Address of Godown: AGP Limited, B-23-C, S.I.T.E., Karachi. Validity: 21-09-2021. Status: License to sell, stock & exhibit for sale, distribute and sell drugs by way of wholesale by of manufacturer, importer or indenter.
	Name and address of marketing authorization holder (abroad)	Mylan Laboratories Limited, Plot No. H-12 & H-13, MIDC, Waluj, Aurangabad 431136, Maharashtra state, India.
	Name, address of manufacturer(s)	M/s Mylan Laboratories Limited, Plot no. H-12 & H-13, MIDC, Waluj, Aurangabad -431136, Maharashtra state, India
	Name of exporting country	India.
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted copy of CoPP certificate (No. COPP/CERT/AD/90474/2020/11/31606/159456) dated 11-Apr-2020 issued by Food and Drug Administration Maharashtra State Mumbai, India for DOVPRELA-200mg (Pretomanid Tablets 200mg). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP was valid till 17-Dec-2021. **GMP:** Copy of GMP certificate No. NEW-WHO-GMP/CERT/AD/72573/2018/11/26257 in the name of M/s Mylan Laboratories Limited, Plot no. H-12 & H-13, MIDC, Waluj, Aurangabad -431136, Maharashtra state, India issued by Food and Drug Administration, M.S.

		Bandra-Kurla complex Bandra (E), Mumbai Maharashtra India valid till 17-12-2021 is submitted by the applicant. Firm has also submitted notarized copy of GMP Certificate No. 18368 in the name of M/s Mylan Laboratories Limited, Plot No. H-12 & H-13, MIDC, Waluj Industrial Estate, Aurangabad, India issued by HPRA Ireland on the basis of inspection conducted on 17-11-2017 valid for three years. **WHO Prequalification:** The product is WHO prequalified (Reference Number: TB386 (a).
	Details of letter of authorization / sole agency agreement	**Letter of Authorization:** Firm has submitted original, legalized & product specific letter of Authorization from Mylan Laboratories Limited, having its corporate office at House No. 8-2-293/82/J-III, Plot No. 564/A/22, Road No. 92, Jubilee Hills, Hyderabad, India. The letter specifies that the manufacturer appoints M/s AGP Limited, B-23-C, S.I.T.E., Karachi to register their products in Pakistan. The authorization letter is valid till 16-Apr-2023.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Dy. No. and date of submission	Dy. No. 26352: 22-09-2021.
	Details of fee submitted	PKR 50,000/-: 09-07-2020.
	The proposed proprietary name / brand name	Dovprela 200mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Pretomanid …….200mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Nitroimidazooxazine Antimycobacterial drug (As per dossier). J04 Antimycobacterials. (As per ATC code) Limited Population: Pretomanid Tablet is an Antimycobacterials indicated, as part of a combination regimen with bedaquiline and linezolid for the treatment of adults with pulmonary extensively drug resistant (XDR), treatment-intolerant or nonresponsive multidrug-resistant (MDR) tuberculosis (TB). Approval of this indication is based on limited clinical safety and efficacy data. This drug is indicated for use in a limited and specific population of patients.

	Reference to Finished product specifications	In house
	Proposed Pack size	HDPE Bottle (26 Tablets)
	Proposed unit price	No information provided.
	The status in reference regulatory authorities	Pretomanid Tablet 200mg, USFDA Approved.
	For generic drugs (me-too status)	N/A.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Mylan Laboratories Limited (Unit-9), Plot No. 5, Road No.12, J.N. Pharma City, Tadi Village Parawada Mandal, Visakhapatnam, Andhra Pradesh, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated for 06 months as well as real time conditions for 24 months. The real time stability data is conducted at 25^{o}C ± 2^{o}C, RH 60% ± 5% and accelerated stability data is conducted at 40^{o}C ± 2^{o}C, RH 75% ± 5%. (Batch No. 27083789, 27083790 & 27083791)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted complete data of formulation development process. Dovprela 200mg Tablet (Pretomanid) is Innovator Product, therefore, firm has submitted detailed Module 4 and Module 5.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE bottle pack
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40^{o}C ±2^{o}C / 75% ± 5% RH for 6 months (Batch No. 2014678, 2014679 & 2014680).

		The real time stability study data is conducted at 30ºC ±2ºC / 75% ± 5% RH for 24 months (Batch No. 2014678, 2014679 & 2014680).

Evaluation by PEC:

S. No.	Section	Observation	Remarks by the evaluator
1.	1.1	Fee of 75,000/- shall be submitted.	Firm has submitted differential fee of 25000/- vide slip No. 8216477734 dated 15-07-2022.
2.	1.3.2	Valid copy of GMP of the finished product manufacturer.	Notarized and legalized GMP certificate No. NEW-WHO-GMP/CERT/AD/106169/2022/11/38759 in the name of M/s Mylan Laboratories Limited, Plot no. H-12 & H-13, MIDC, Waluj, Aurangabad -431136, Maharashtra state, India issued by Food and Drug Administration, M.S. Bandra-Kurla complex Bandra (E), Mumbai Maharashtra India valid till 11-01-2025 is submitted by the applicant.
3.	1.3.4	Valid copy of DSL of the applicant shall be submitted.	Firm has submitted new copy of DSL valid till 21-09-2023.
4.	3.2.S.7.3	Real time stability data of drug substance is conducted at 25ºC ± 2ºC, RH 60% ± 5% justification is required.	Firm has submitted new stability studies of the drug substance for the same batches at 30ºC ± 2ºC, RH 75% ± 5%.
5.		Valid & legalized copy of CoPP shall be submitted.	Firm has submitted valid legalized & notarized CoPP No. COPP/CERT/AD/110377/2022/11/39211/190611 for Dovprela 200mg tablets. The submitted copy of CoPP valid till 11-01-2025.
6.		Packing provided by the applicant has manufacturing address other than the specified in GMP and other document.	Firm has submitted that Dovprela is a WHO prequalified product and is manufactured in two plants by principal manufacturer and the data/specification are common for both plants. The product is imported from Maylan Aurangabad plant which is WHO approved plant for this product. The document provided for the packing/container closure system is made by Maylan Nashik plant but these are also applicable for maylan Aurangabad plant. These documents are also stamped by QA of Maylan Aurangabad plant.

Decision: Registration Board approved the product subject to compliance of current Import Policy for Finished Drugs with innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

	Details of fee submitted	PKR 100,000/-: 04/02/2021.
	Proposed proprietary name / brand name	PACSITA 500 mg tablets.
	Strength/concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Capecitabine ……...…….. 500 mg
	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Antineoplastic agents. (ATC code: L01BC06)
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	1 x 10's
	Proposed unit price	As per PRC
	The status in reference regulatory authorities	XELODA (capecitabine) film coated tablets 500mg, USFDA approved.
	For generic drugs (me-too status)	Relicitabine Tablets 500mg by M/s Helix Pharma, Reg. No. 088875.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Name, address of drug substance manufacturer	M/s Divi's Laboratories Limited, Unit-2, Chippada (V), Annavaram Post Bheemunipatnam (M) Visakhapatnam District Andhra Pradesh, India.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 03 batches for drug substance at accelerated conditions i.e. 40 ± 2° C / 75 ± 5% RH for 06 months as well as real time stability data at 30 ± 2° C/65 ± 5%RH for 60 months. Batch No. (2-WS3O001, 2-WS-3O002 & 2-WS-3O003)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence with reference product i.e. Xeloda 500mg by Hoffman La Rosch Inc. USA, B. No. X3148XI by performing the following quality test; Description, Average weight of the tablets, Disintegration time, Water by KF, impurities and Assay. Firm has also submitted CDP results against the same reference product i.e. Xeloda 500mg by Hoffman La Rosch Inc. USA, B. No. X3993XI in three different mediums i.e. pH 1.2 in 0.1 N HCl, pH 4.5 Acetate buffer & pH 6.8 Phosphate buffer (USP-II (Paddle), 500ml & 75 RPM) and similarity factor is comparable.
	Analytical method validation/verification of product	Firm has submitted Assay Method Validation Protocols along with Reports of Capecitabine Tablets 500mg Finished product as well as for Active substance. USP analytical test methods were developed to determine the identification (By HPLC), Assay (By HPLC), Related substance (By HPLC), R-Enantiomer content (by HPLC), and color absorbance (By UV) in drug product and methods have been validated as per the ICH.
	Container closure system of the drug product	PVC/PVDC – Aluminum foil blister pack
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 06 months. The real time stability study data is conducted at 30°C ±2°C /75% ± 5% RH. The real time stability study data of 03 batches is for 24months. Batch No. (CB5016001-B, CB5016002-B & CB5016003-B) Batch size: 60,000 Tablets each. Mfg. Date: 09 - 2016 Stability initiation date: 14-10-2016

Evaluation by PEC:

Section	Observation	Response submitted by the firm.
1.1	Differential fee of 50,000/- shall be submitted.	Firm has submitted a differential fee of 50000/- vide slip No. 65206501965 dated 27-07-2022.
	• Notarized copy of the agreement shall be submitted.	Firm has submitted colored copy of the agreement and further submitted that original notarized agreement is submitted in the dossier of Brotoma injection 3.5mg.
	• CoPP confirming the status of the product in exporting country that the product is actually not on the market for sale. Clarification is required.	Firm has referred to the decision of registration Board in its 256th meeting stating as under: ""if an imported drug is not on free sale in its respective country of origin / manufacture, such product will be registered in Pakistan if the product manufactured in the applied facility is approved by any of the regulatory authorities from USFDA, EMA, PMDA Japan, Australia TGA, Health Canada, Switzerland or any of regulatory authority of former erstwhile Westren Europe (United Kingdom, Germany, France, Switzerland, Netherlands, Austria, Belgium, Denmark, Finland, Sweden, Italy, Ireland, Luxemburg, Norway, Scotland and Spain) or three stringent regulatory bodies of former erstwhile Eastren Europe. However, references countries regarding availability of drug / molecule / formulation shall remain the same as specified in 249th meeting of Registration Board." In this context firm has referred to the following product approved by US FDA: "Capecitabine 500mg tablet (Application no. A210604) of M/s Eugia pharma Specialties Ltd.," verified form following web links of official websites of US FDA: https://www.accessdata.fda.gov/scripts/cder/ob/search_product.cfm https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=56441153-a1e5-4fdc-96d6-f21baa6b5fbe The manufacturing site of above cited product has also been verified as M/s EUGIA Pharma Specialities Limited, Sy.No.550, 551 & 552, Kolthur Village, Shameerpet Mandal, Medchal-Malkajgiri District, Medchal, Telangana 500101, India (IND), from the following web link of US FDA: https://www.accessdata.fda.gov/scripts/cder/drls/getdrls.cfm
	• Valid GMP certificate of the finished product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate dated 26-11-2021 for M/s Eugia Pharma Specialties Limited, Survey No. 550, 551 & 552, Kolthur Village, Shamirpet Mandal, Medchal-Malkajgiri, District Telangana, 500101, India issued by Drugs Control Administration, Government of Telangana, India. Certificate has mentioned that manufacturer conforms to the requirement for Good Manufacturing Practices in the manufacturing and quality control for 17 products for export in the international market.

		The certificate is valid till 25-11-2024.
1.5.22	Good pharmacovigilance procedure is for Helix pharma	Firm has submitted new document of Hakimsons (Pvt.) Limited.
3.2.S.4.3	Drug substance verification studies performed by finished product manufacturer shall be submitted.	Firm has submitted verification studies of the drug substance performed by the drug product manufacturer.
3.2.P.2.2	In CDP results at 4.5 pH Acetate buffer, the value of F2 is less than 50 at 50 RPM. Clarification shall be submitted.	Firm has submitted that from the dissolution profile it can be seen that the test product dissolution profile is having high %RSD at initial time points i.e. more than 10% even up to 20-minute time point and thereby statistical calculation of f2 value is not feasible or applicable. Since the observed dissolution % RSD is high for the dissolution when tested at agitation speed of 50 RPM for paddle (USP apparatus II), it was decided to generate the dissolution profile at the agitation speed of 75 RPM to reduce the %RSD. Hence the dissolution profile of Capecitabine tablets USP 500mg was generated at 75 RPM in pH 4.5 acetate buffer and %RSD is found satisfactory and low level for test product dissolution profile and the calculated statistical f2 value is adequate (more than 50). Hence it can be concluded that the generic product dissolution profile in pH 4.5 acetate buffer is comparable to the reference drug product.

Decision: Registration Board approved the product subject to compliance of current Import Policy for Finished Drugs.

429.	Name, address of Applicant / Importer	M/s Al Habib Pharmaceuticals, Plot No. 81-B Block B, S.M.C.H.S, Karachi.

	Proposed Pack size	1's.
	Proposed unit price	As per Policy.

	The status in reference regulatory authorities	ALIMTA (pemetrexed for injection) 500mg, USFDA Approved.
	For generic drugs (me-too status)	Almita 500mg injection, Eli Lilly Pakistan, Reg. No. 043068.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Shandong Boyuan Pharmaceutical Co. Ltd., Qinjiang Street, Jibai Economic Development Zone, Jinan City, Shandong Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated for 06 months as well as real time conditions for 24 months. The real time stability data is conducted at 5 ^{o}C ± 3^{o}C, and accelerated stability data is conducted at 25^{o}C ± 2^{o}C, RH 60% ± 5%. (Batch No. 1001KL61C, 1002KL61C & 1003KL61C)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established against reference product i.e. Almita by ELI LILLY by performing the following tests; Appearance, pH, Reconstituted solution, water content (Karl Fischer), bacterial endotoxin, related substances, particulate matter and Assay.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type I colourless glass vial with Bromo butyl elastomeric stopper and aluminium seal.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40^{o}C ±2^{o}C / 75% ± 5% RH for 6 months (Batch No. 27001, 27002 & 27003). The real time stability study data is conducted at 30^{o}C ±2^{o}C / 75% ± 5% RH for 24 months (Batch No. 27001, 27002 & 27003).

Evaluation by PEC:

S. No.	Section	Observation	Remarks by the evaluator
1.	1.3.4	Valid copy of Drug Sale License of the applicant shall be submitted.	Attested copy of Drug Sale License No. 0230 18-05-2022 in the name of Al Habib Pharmaceuticals 81-B Block B, S.M.C.H.S, Karachi is submitted by the firm.
2.		• Valid and notarized GMP certificate of the finished product manufacturer shall be submitted. • Valid and notarized copy of CoPP shall be submitted.	Firm has submitted copy of GMP certificate issued on 03-04-2022 valid for one year. Firm has also provided copy of CoPP dated 13-10-2021 for the product i.e. Pemetrexed (disodium hemi pentahydrate) 500mg valid for one year. Firm further submitted that the CoPP that we submitted with the dossier was having validity till October, 2021 and as it gets expired during its period in R&I that's why as per rule it will be considered as valid as we received R&I attested letter on 1st September, 2021. ***Neither GMP certificate nor CoPP is notarized and countersigned by the embassy of Pakistan.***
3.	1.3.8	Site master file and credentials of the manufacturer shall be submitted.	Submitted.
4.	3.2.S	Drug substance document has mentioned Heptahydrate while the label claim has mentioned Hemi penta hydrate. Clarification is required.	Firm has submitted new DMF for Pemetrexed disodium hemi penta hydrate.
5.	3.2.S.4.1	• Water content mentioned in the specifications of the drug substance is 8.2% - 10.2% while the monograph has mentioned 19.55 to 22.1%. Clarification is required. • Assay content is 97.5% to 102% in monograph while specifications has mentioned 98-102. Clarification is required.	Firm has submitted new DMF for Pemetrexed disodium hemi penta hydrate wherein the specification of the drug substance mentioned are E.P/USP. Firm has submitted that although the limits are different from official monograph but the values are within the limit of the official monograph.
6.	3.2.S.4.2	Also, the acetate buffer condition in the assay test are different from the monograph.	New DMF has the same conditions as mentioned in USP.
7.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial by the finished product manufacturer shall be submitted.	Analytical Method Verification studies performed by the IMA laboratories are submitted.
8.	3.2.S.4.4	• Batch analysis of the drug substance is for Qilu pharmaceutical Co., Ltd. Justification is required. • COA of primary / secondary reference standard including source and lot number shall be provided.	Firm has submitted COA for the drug substance from Shandong Boyuan Pharmaceutical Co., Ltd. Firm has also submitted COA of the primary / secondary reference standard.

9.	3.2.P.5.1	• In section 1.5 firm has claimed Ph. Eur. specifications for the finished drug product. Provided evidence of official monograph of the European pharmacopoeia for the applied formulation. • Justification shall be submitted for finished product specifications as general considerations of USP references for injections and ICH guidelines are followed while the official monograph is available in USP.	Firm has submitted that it was typographic error and the finished dosage form is having USP specifications. Firm has submitted that the dossier was prepared in 2018 and at that time the official monograph was pending and become part of official USP in 2020 that's why the specifications were developed via general chapter. They further submitted that the same specifications are part of the official monograph of pemetrexed. That's why the same is followed.
10.	3.2.P.8	Assay limits in the real time stability of B. No. 27003 at third month time point is out of specifications. Clarification is required.	Firm has submitted that it may be typo or misprinting error. They also submitted rectified/new stability data sheets.

Decision: Registration Board approved the product subject to compliance of current Import Policy for Finished Drugs with innovator's specifications.

- **Registration letter will be issued after submission of valid, notarized & legalized CoPP certificate and valid, notarized & legalized GMP certificate for the finished product manufacturer.**
- **Firm will also submit fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contain; 75.5gm of Iohexol equivalent to 35gm of Iodine (350mg Iodine/ml)
	Pharmaceutical form of applied drug	Injection.
	Pharmacotherapeutic Group of (API)	X-RAY CONTRAST MEDIA, IODINATED ATC code: V08A.
	Reference to Finished product specifications	Ch. P specifications.
	Proposed Pack size	100ml glass infusion bottle, 10 bottles/box.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	OMNIPAQUE 350 mg iodine/mL (755 mg of Iohexol/mL), USFDA approved.
	For generic drugs (me-too status)	Kopaq 350mg/ml IV solution for injection, Punjab Medical Services, Reg. No. 097360.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

		The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacturer, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Name, address of drug substance manufacturer	M/s Zhejiang Starry Pharmaceutical Co. Ltd., No. 1 Starry Road of Xianju Modern Industrial Centralization Zone Xianju, Zhejiang, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at accelerated condition for 06 months as well as real time conditions for 24 months. The real time stability data is conducted at 25°C ± 2°C, RH 60% ± 5% and accelerated stability data is conducted at 40°C ± 2°C, RH 75% ± 5%. (Batch No. C006-0802003, C006-0802004 & C006-0802005)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols`, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence data of their products against Omnipaque of GE Healthcare, B. No. 12909988 by performing the following tests; Appearance, Identification, pH, related compounds, insoluble particulate matter, Bacterial endotoxin, sterility, and Assay.
	Analytical method validation/verification of product	Submitted.
	Container closure system of the drug product	Neutral borosilicate glass bottle and chlorinated butyl rubber stopper.
	Stability study data of drug product, shelf life and storage conditions	• 24 months real time stability data at 30°C ± 2°C / 65% ± 5% RH of 03 batches (A1810251, A1810271 & A1810291). • 06 month accelerated stability data 40°C ± 2°C / 75% ± 5% RH of 03 batches (A1810251, A1810271 & A1810291).

Evaluation by PEC:

	GMP status of the Applicant.	GMP certificate issued on 08-10-2020 on the basis of inspection conduct 01-10-2019.
	GMP status of the Finished product manufacturer	GMP certificate issued on 21-05-2019 on the basis of inspection conduct 23-4-2019, valid up to 22-04-2022.
	Evidence of section approval of the Finished product manufacturer.	Liquid ampoule (from GMP certificate.) Ampoule general vide letter No. F. 1-12/89-Lic (Vol-II) dated 23-07-2012.
	Name and address of API manufacturer.	M/s. Saurav Chemicals Limited 370 Industrial Area, Phase II Panchkula, Haryana, 134109 – India. Manufacturing site address: M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40 O ± 2 O C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30OC ± 2 O C / 65% ± 5% RH for 60 months. (Batch No. KTM06130016, KTM06130017 & KTM06130018)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence against the product Toradol Ampoule 30mg, B. No. C2436, Mfg. date 01, 2020 by Barrett Hodgson by performing quality tests (Description, Identification, pH, Assay, Sterility, Bacterial endotoxin.)
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s. Saurav Chemicals Limited 370 Industrial Area, Phase II Panchkula, Haryana, 134109 – India. Manufacturing site address: M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India		
API Lot No.	KM-0100918, KTM-180015 & KTM180015.		
Description of Pack (Container closure system)	Glass ampoule		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18 & 24 (Months)		
Batch No.	A-439	A-596	A-611
Batch Size	46,200 Ampoules	16,000 Ampoules	33,000 Ampoules
Manufacturing Date	05-2018	03-2019	03-2019
Date of Initiation	25-06-2018	22-04-2019	20-05-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s. Saurav Chemicals Limited, Bhagwanpura, Derabassi – Barwala Road, Mohali District Punjab India Valid till 25-06-2023.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice# SCL2018/18-19 dated 29-01-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Section Number	Observations	Firm's Response
1	1.4.3	Total number of approved registered products on contract basis could not be confirmed. Complete details of products registered on contract basis shall be submitted.	Applicant has 07 approved sections and applicant has also submitted that they no product is registered on contract manufacturing.
2	1.5.6	Official monograph is available in USP. Firm has claimed innovator's specifications in "1.5.6" section of form 5F.	Firm has provided new Form 5F wherein they have revised their specifications from innovator's specifications to USP specifications without submission of applicable fee.
3	1.6.5	Valid GMP certificate of API manufacturer issued by regulatory body of country shall be submitted.	Valid GMP certificate of API manufacturer is provided. Valid till 25-06-2023.
4	3.2. S.4	• Results of analysis of relevant batch(es) of drug substance performed by drug product manufacturer used during product development and stability studies along with COA of the same batch from drug substance/Active Pharmaceutical ingredient manufacturer. • Detailed analytical procedure for the drug substance by the drug product manufacturer shall be provided. • Analytical method verification studies including specificity, accuracy and repeatability (method precision) for drug substance performed by the drug product manufacturer shall be submitted.	Batch No. A-439 has been manufactured by API lot No. KM-0100918 while COA has only been submitted for API Lot No. KTM-180015 Submitted. Firm has submitted analytical method verification studies but chromatograms for finished product has been submitted.
5	3.2. P.8.3	ADC attested invoices of the drug substance used during product development and stability studies shall be submitted.	ADC attested invoice for API Lot No. KM-0100918 used in Batch No. A-439 has not been provided by the firm.
6	3.2. P.2.3	Justification of not performing terminal sterilization of the drug product.	Firm has submitted that we cannot perform terminal sterilization of ketorolac injection because it is heat sensitive product. Melting point of the API mentioned in DMF is 165-170 ºC.

7	3.2. P.5.2	Detailed analytical procedure for the drug product by the drug product manufacturer shall be provided.	Submitted.
8	3.2. P.5.3	In process validation protocol 30.45mg of ketorolac tromethamine is used. Justification is required whether overage or potency adjustment.	Firm has submitted that it is potency adjustment. The potency as per COA of drug substance on as is basis is 98.5%. On the basis of as is potency the quantity of powder to be dispensed is calculated as 30.45mg {(100/98.5) x 30 = 30.45}
9	3.2. P.8.3	Submit raw data sheets for stability studies, reflecting the details of Standard weight, Sample dilution preparation, Potency of Reference standard and Calculation formula applied for the Assay test.	Submitted.

Decision of 313th meeting of the Registration Board: Deferred for following;

- Submission of documents/commercial invoice for the procurement of API Lot No. KM-0100918 with approval from DRAP.
- Submission of scientific justification for not performing terminal sterilization of the drug product.
- Submission of 7500/- fee for revision of finished product specifications as per notification No. F. 7-11/2021-B&A/DRAP dated 13-07-2021.

Submission by the firm;

Sr. No.	Reason for deferment.	Submission/Justification by the firm.
1.	Submission of documents/commercial invoice for the procurement of API Lot No. KM-0100918 with approval from DRAP.	Firm has submitted clearance certificate attested by AD - I&E, DRAP, Islamabad dated 27-04-2018 for the ketorolac tromethamine B# KM-0100918.
2.	Submission of scientific justification for not performing terminal sterilization of the drug product.	Firm has submitted that we were not performing terminal sterilization earlier but now we started terminal sterilization. They have also attached review document.
3.	Submission of 7500/- fee for revision of finished product specifications as per notification No. F. 7-11/2021-B&A/DRAP dated 13-07-2021.	Firm has submitted fee of 7500/- vide slip No. 31868295920 dated 06-01-2022 for revision of specifications.

Decision of 316th meeting of the Registration Board: Deferred for scientific rationale of performing terminal sterilization, with reference to the innovator product.

Submission by the firm;

Firm has submitted a document with title of "ketorolac tromethamine injection- Google patents" wherein they have provided details of a product of a Chinese pharmaceutical i.e. Tianjin Chase Sun Pharmaceutical Co. Ltd. The document discloses a prescription of ketorolac tromethamine injection and preparation method. The invention can not only effectively solve the problem that the existing ketorolac tromethamine injection containing ethanol causes irritation while being injected and improve the safety of the drugs and compliance of the drugs but also completely avoid the white points caused by the traditional technology after sterilization treatment, and thus the ketorolac tromethamine injection is good in stability, high in safety, reliable in quality and significant in efficacy.

The document has also shown that the said injection is terminally sterilized.

Remarks of the Evaluator [XIII]

In actives mentioned in the formulation of the above said document has no Ethyl alcohol, while the applied formulation has followed the innovator product which contain ethyl alcohol as solvent which makes the difference between the two formulations.

Furthermore, the document provided by the firm is not from RRA.

Decision: Registration Board deferred the case for further deliberation regarding the sterilization method of the applied formulation whether by way of terminal sterilization or otherwise.

DRAP Authority in its 129th meeting held on 17-02-2022 decided as follows:

The Authority appreciated the efforts of PE&R Division for effective and phase wise implementation of CTD and after detailed deliberations approved the out of queue consideration of registration applications of New Chemical Entities on CTD format (Form 5F).

Accordingly, the following application is evaluated and placed before the Registration Board for consideration.

432.	Name, address of Applicant / Importer	Biocare Pharmaceutica, 807-Shadman 1, Lahore-Pakistan.

	Pharmaceutical form of applied drug	(Parecoxib Sodium) 40 Mg (IM/IV) freez-dried Powder for Solution for Injection.

	Pharmacotherapeutic Group of (API)	Anti-inflammatory and Antirheumatic products, Non-steroids (Coxibs). ATC code: M01AH04. ***For the short-term treatment of postoperative pain in adults.***
	Reference to Finished product specifications	In House specifications.
	Proposed Pack size	10 vials/carton, 50 cartons/box.
	Proposed unit price	PKR 500/vial.
	The status in reference regulatory authorities	DYNASTAT Injection contains 40 mg parecoxib (as 42.36 mg parecoxib sodium), TGA approved.
	For generic drugs (me-too status)	Could not be confirmed.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacturer, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Name, address of drug substance manufacturer	M/s Zhejiang Haisen Pharmaceutical Co. Ltd., Xiangtan Village, Liushi Street, Dongyang, City Zhejiang Province, China. Validity 24-09-2025.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 36 months real time stability data at 30°± 2°C / 65% RH ± 5% RH of 03 batches (5316110201, 5316110202, 5316120201). • 06 month accelerated stability data 40°C ± 2°C / 75% RH ± 5% RH of 03 batches (5316110201, 5316110202, 5316120201).
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established against reference product i.e. Dynastat 40mg powder for solution for injection, Batch No. R42343 with Exp. Date of 04/2019

		manufactured by the Pfizer Limited by performing the following tests; Appearance, Identification, pH, Clarity of solution, related compounds, water content, weight variation, particulate matter, sterility, bacterial endotoxin, visible particulates and Assay.
	Analytical method validation/verification of product	Submitted.
	Container closure system of the drug product	5ml type I clear glass tubular injection vial with brominated butyl rubber stopper sealed with a blue flip-off cap on the aluminum seal.
	Stability study data of drug product, shelf life and storage conditions	• 12 months real time stability data at 30°C ± 2°C / 65% ± 5% RH of 03 batches (42001403, 42001404, 42001407). • 06 month accelerated stability data 40°C ± 2°C / 75% ± 5% RH of 03 batches (42001403, 42001404, 42001407). Finished product manufacturer has also submitted a commitment letter wherein they commit/confirm that complete full 24 month till shelf life Zone IVA stability study under 30°C ± 2°C / 65% ± 5% RH condition for their product Parecoxib 40mg powder for injection. They further submitted that they will update 15, 18 & 24-month time point stability data under Zone IVA conditions accordingly as soon as it is completed & tested.

Evaluation by PEC:

Sr. No.	Observations	Reply by the firm.
1	Notarized agreement shall be submitted.	Firm has again submitted copy of agreement.
2	Valid copy of DSL as the DSL is valid up to 17-04-2022.	Firm has provided provisional receipt of "Application for change in drug sale license 352-98572912-2022" with reference No. 352-98572912-2022 of M/s Biocare Pharmaceutica, 807 Shadman-1, District Lahore.
3	Valid CoPP shall be submitted. 19-01-2022.	Firm has submitted copy of CoPP (certificate No. JS20220091) issued by Jiangsu Drug Administration, China on 04-03-2022. The document also confirms that the applied product strength is actually on the market in exporting country. Valid up to 03-03-2023. ***Not notarized and countersigned by the embassy of Pakistan.***
4	Complete shelf life stability data of the applied formulation shall be submitted.	Firm has submitted 24-month real time stability data at 30°C ± 2°C / 65% ± 5% RH of three batches (42001403, 42001404, 42001407) for the applied formulation and results are within the limits.

Decision of 317th meeting of Registration Board:
Registration Board after thorough deliberation decided to deferred the case for further incorporations of complete details including approval status of the of the new chemical entity in reference regulatory authorities, indications, warnings etc.

Submission by the firm;

- **Firm has submitted valid, notarized and embassy of Pakistan countersigned CoPP valid till 03-03-2023.**
- **Firm has further submitted that the applied formulation is approved in the following reference regulatory authorities;**

a. Dynastat 40 mg powder for solution for injection of M/s Pfizer Limited Ramsgate Road Sandwich Kent CT13 9NJ United Kingdom, MHRA approved.

Indication; For the short-term treatment of postoperative pain in adults.

Special warnings and precautions for use;

Dynastat has been studied in dental, orthopaedic, gynaecologic (principally hysterectomy) and coronary artery bypass graft surgery. There is limited experience in other types of surgery, for example gastrointestinal or urological surgery.

Modes of administration other than IV or IM (e.g. intra-articular, intrathecal) have not been studied and should not be used.

Because of the possibility for increased adverse reactions at higher doses of parecoxib, other COX-2 inhibitors and NSAIDs, patients treated with parecoxib should be reviewed following dose increase and, in the absence of an increase in efficacy, other therapeutic options should be considered (see section 4.2). There is limited clinical experience with Dynastat treatment beyond three days.

If, during treatment, patients deteriorate in any of the organ system functions described below, appropriate measures should be taken and discontinuation of parecoxib therapy should be considered.

Cardiovascular; COX-2 inhibitors have been associated with increased risk of cardiovascular and thrombotic adverse events when taken long term. The exact magnitude of the risk associated with a single dose has not been determined, nor has the exact duration of therapy associated with increased risk. Patients with significant risk factors for cardiovascular events (e.g. hypertension, hyperlipidaemia, diabetes mellitus, smoking) should only be treated with parecoxib after careful consideration (see section 5.1). Appropriate measures should be taken and discontinuation of parecoxib therapy should be considered if there is clinical evidence of deterioration in the condition of specific clinical symptoms in these patients. Dynastat has not been studied in cardiovascular revascularization procedures other than coronary artery bypass graft (CABG) procedures. Studies in types of surgery other than CABG procedures included patients with American Society of Anaesthesiology (ASA) Physical Status Class I-III only.

Acetylsalicyclic acid and other NSAIDs; COX-2 inhibitors are not a substitute for acetylsalicylic acid for prophylaxis of cardiovascular thrombo-embolic diseases because of their lack of antiplatelet effects. Therefore, antiplatelet therapies should not be discontinued (see section 5.1). Caution should be exercised when coadministering Dynastat with warfarin and other oral anticoagulants (see section 4.5). The concomitant use of parecoxib with other non- acetylsalicylic acid NSAIDs should be avoided. Dynastat may mask fever and other signs of inflammation (see section 5.1). In isolated cases, an aggravation of soft tissue infections has been described in connection with the use of NSAIDs and in nonclinical studies with Dynastat (see section 5.3). Caution should be exercised with respect to monitoring the incision for signs of infection in surgical patients receiving Dynastat.

Gastrointestinal; Upper gastrointestinal (GI) complications (perforations, ulcers or bleedings [PUBs]), some of them resulting in fatal outcome, have occurred in patients treated with parecoxib. Caution is advised in the treatment of patients most at risk of developing a gastrointestinal complication with NSAIDs; the elderly, or patients with a prior history of gastrointestinal disease, such as ulceration and GI bleeding, or patients using acetylsalicylic acid concomitantly. The NSAIDs class is also associated with increased GI complications when coadministered with glucocorticoids, selective serotonin reuptake inhibitors, other antiplatelet drugs, other NSAIDs or patients ingesting alcohol. There is further increase in the risk of gastrointestinal adverse effects (gastrointestinal ulceration or other gastrointestinal complications), when parecoxib is taken concomitantly with acetylsalicylic acid (even at low doses).

Skin reactions; Serious skin reactions, including erythema multiforme, exfoliative dermatitis and Stevens-Johnson syndrome (some of them fatal) have been reported through post-marketing surveillance in patients receiving parecoxib. Additionally, fatal reports of toxic epidermal necrolysis have been reported through postmarketing surveillance in patients receiving valdecoxib (the active metabolite of parecoxib) and cannot be ruled out for parecoxib (see section 4.8). DRESS syndrome may occur with parecoxib exposure based on other serious skin reactions reported with celecoxib and valdecoxib exposure. Patients appear to be at highest risk for these reactions early in the course of therapy; the onset of the reaction occurring in the majority of cases within the first month of treatment. Appropriate measures should be taken by physicians to monitor for any serious skin reactions with therapy, e.g. additional patient consultations. Patients should be advised to immediately report any emergent skin condition to their physician. Parecoxib should be discontinued at the first appearance of skin rash, mucosal lesions, or any other sign of hypersensitivity. Serious skin reactions are known to occur with NSAIDs including COX-2 selective inhibitors as well as other medicinal products. However, the reported rate of serious skin events appears to be greater for valdecoxib (the active metabolite of parecoxib) as compared to other COX-2 selective inhibitors. Patients with a history of sulfonamide allergy may be at greater risk of skin reactions (see section 4.3). Patients without a history of sulfonamide allergy may also be at risk for serious skin reactions.

Hypersensitivity; Hypersensitivity reactions (anaphylaxis and angioedema) have been reported in post-marketing experience with valdecoxib and parecoxib (see section 4.8). Some of these reactions have occurred in patients with a history of allergictype reactions to sulfonamides (see section 4.3). Parecoxib should be discontinued at the first sign of hypersensitivity. Cases of severe hypotension shortly following parecoxib administration have been reported in postmarketing experience with parecoxib. Some of these

cases have occurred without other signs of anaphylaxis. The physician should be prepared to treat severe hypotension.

Fluid retention, oedema, renal; As with other medicinal products known to inhibit prostaglandin synthesis, fluid retention and oedema have been observed in some patients taking parecoxib. Therefore, parecoxib should be used with caution in patients with compromised cardiac function, preexisting oedema, or other conditions predisposing to, or worsened by, fluid retention including those taking diuretic treatment or otherwise at risk of hypovolemia. If there is clinical evidence of deterioration in the condition of these patients, appropriate measures including discontinuation of parecoxib should be taken. Acute renal failure has been reported through post-marketing surveillance in patients receiving parecoxib (see section 4.8). Since prostaglandin synthesis inhibition may result in deterioration of renal function and fluid retention, caution should be observed when administering Dynastat in patients with impaired renal function (see section 4.2) or hypertension, or in patients with compromised cardiac or hepatic function or other conditions predisposing to fluid retention. Caution should be used when initiating treatment with Dynastat in patients with dehydration. In this case, it is advisable to rehydrate patients first and then start therapy with Dynastat.

Hypertension; As with all NSAIDs, parecoxib can lead to the onset of new hypertension or worsening of pre-existing hypertension, either of which may contribute to the increased incidence of cardiovascular events. Parecoxib should be used with caution in patients with hypertension. Blood pressure should be monitored closely during the initiation of therapy with parecoxib and throughout the course of therapy. If blood pressure rises significantly, alternative treatment should be considered.

Hepatic impairment; Dynastat should be used with caution in patients with moderate hepatic impairment (Child-Pugh score 7-9).

Use with oral anticoagulants; The concomitant use of NSAIDs with oral anticoagulants increases the risk of bleeding. Oral anticoagulants include warfarin/coumarin-type and novel oral anticoagulants (e.g. apixaban, dabigatran, and rivaroxaban).

Sodium content; This medicine contains less than 1 mmol sodium (23 mg) per ml, that is to say essentially 'sodium-free'.

Contraindications;

Hypersensitivity to the active substance or to any of the excipients.

History of previous serious allergic drug reaction of any type, especially cutaneous reactions such as Stevens-Johnson syndrome, drug reaction with eosinophilia and systemic symptoms syndrome (DRESS syndrome), toxic epidermal necrolysis, erythema multiforme or patients with known hypersensitivity to sulfonamides.

Active peptic ulceration or gastrointestinal (GI) bleeding.

Patients who have experienced bronchospasm, acute rhinitis, nasal polyps, angioneurotic oedema, urticaria or other allergic-type reactions after taking acetylsalicylic acid or nonsteroidal anti-inflammatory drugs (NSAIDs) including COX-2 inhibitors.

The third trimester of pregnancy and breast-feeding.

Severe hepatic impairment (serum albumin < 25g/l or child-pugh score is ≥ 10).

Inflammatory bowel disease.

Congestive heart failure (NYHA II-IV).

Treatment of post-operative pain following coronary artery bypass graft (CABG) surgery.

Established ischaemic heart disease, peripheral arterial disease and/or cerebrovascular disease.

b. Dynastat 40 mg powder for solution for injection of M/s Pfizer Europe MA EEIG Boulevard de la Plaine 17 1050 Bruxelles Belgium, EMA approved.

c. DYNASTAT parecoxib (as sodium) 40mg powder for injection vial, Pfizer Australia Pty Ltd., TGA Australia approved.

Decision: Registration Board approved the product subject to compliance of current Import Policy for Finished Drugs with innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Registration applications of Veterinary drugs on Form 5.

433.	Name and address of manufacturer/ Applicant	M/s Nawan Laboratories (Pvt.) Ltd., plots No. 136, sector 15, Korangi Industrial Area Karachi (Dry powder sachet section (General) veterinary).
	Brand Name + Dosage Form + Strength	Easy Digest powder.
	Composition	Each 1000gm contains: Propionic Acid Calcium ……..250gm

		Propionic Acid Sodium ……400gm Acetanilide ……150gm Magnesium Oxide ……125gm Iron II Sulphate ……..0.400mg Zinc Sulphate ……0.100mg Magnesium Sulphate ……...0.200mg Copper Sulphate ……..0.450mg Cobalt Sulphate ……0.400mg Sodium Molybdate ……0.100mg Sodium Chloride ……20gm
	Diary No. Date of R & I & fee	Dy. No 11444 dated 05-03-2019; Rs.20,000/- dated 04-03-2019.
	Pharmacological Group	Appetizing and digestive tonic powder.
	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications.
	Pack size & Demanded Price	100gm sachet & decontrolled.
	Approval status of product in Reference Regulatory Authorities	N/A.
	Me-too status	Alvegest powder, Star Laboratories, Reg. No. 008029.
	GMP status	Firm has submitted routine GMP inspection report dated 25-01-2022 wherein it is concluded that keeping in view the attitude of the management towards continuous improvements and current observations their overall GMP compliance is rated as good.
	Remarks of the Evaluator	• Firm was asked to revise their label claim as per their demanded pack size. They revised their label claim as follows; Each 100-gm powder contains; Propionic Acid Calcium ……..25gm Propionic Acid Sodium ……40gm Acetanilide ……15gm Magnesium Oxide ……12.5gm Iron II Sulphate ……0.040mg Zinc Sulphate ……0.010mg Magnesium Sulphate ……0.020mg Copper Sulphate ……...0.045mg Cobalt Sulphate ……0.040mg Sodium Molybdate ……0.010mg Sodium Chloride ……2gm • Firm has submitted me too details as Alvegest powder manufactured by Star Laboratories, Reg. No. 008029. • ***However, the composition of the applied formulation is different from the already approved formulation.***
	Decision: Deferred for submission evidence of already approved formulation by the Registration Board with brand name, Registration number & manufacturer name. As the composition of the applied formulation is different from submitted me too in concentration of Iron II Sulphate, Zinc, Magnesium Sulphate, Copper Sulphate, Cobalt Sulphate and Sodium Molybdate.	

Registration applications of deferred Veterinary drugs on Form 5.

434.	Name and address of manufacturer/ Applicant	M/s Attabak Pharmaceutical Industries, 5-C Industrial Area, I- 10/3 Islamabad
	Brand Name + Dosage Form + Strength	TRICLOSOLE Bolus
	Composition	Each Bolus contains Triclabendazole ……900mg Levamisole ……90mg
	Diary No. Date of R & I & fee	Dy. No. 13832, Dated: 24/05/2021, Rs. 30,000/-
	Pharmacological Group	Anthelmintic

	Type of Form	Form-5
	Finished product Specification	As Per Innovator's Specification
	Pack size & Demanded Price	4 x5'S, 10 x5'S & 20 x5'S
	Me-too status	Tribazole Plus Bolus 900mg/90mg (R# 074039) Selemore pharmaceuticals Pvt Ltd
	GMP status	Panel inspection conducted on 08-02-2021 for renewal of DML & grant of Additional Sections. Panel recommended grant of Additional Sections.
	Remarks of the Evaluator	
	Previous decision **(M-312)**	Deferred for correction of the salt form of Levamisole in label claim along with submission of applicable fee.
	Evaluation by PEC	Firm has submitted that: *Our applied composition is already as per me-too applied.'* However, As per Product Information Database of Veterinary Medicines Directorate, MHRA Levamisole is approved as Levamisole hydrochloride for oral dosage form.
	Previous decision **(M-316)**	Deferred for correction of the salt form of Levamisole in label claim along with submission of applicable fee.
	Submission by the firm.	Firm has submitted their revised formulation as per decision of 316 meeting of the Registration Board with submission of fee of 7500/- vide slip No. 71086384236 dated 22-06-2022. **Revised label claim is as under;** **Each Bolus contains** **Triclabendazole ……900mg** **Levamisole Hydrochloride……90mg**
	Remarks of the Evaluator [XIII]	However, firm has not revised the label claim as per Product Information Database of Veterinary Medicines Directorate, MHRA where Levamisole is approved as Levamisole hydrochloride while the firm has applied Levamisole hydrochloride. Furthermore, for change of salt form full fee shall be submitted.
	Decision: Approved with innovator's specifications. • **Registration Board further decided that registration letter will be issued upon submission of revised label claim as per innovator product declaring the salt form of Levamisole as Levamisole HCl, submission of full fee for correction/pre-approval change in salt form of drug substance, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**	

Registration applications of deferred Human drugs on Form 5.

435.	Name and address of manufacturer/ Applicant	M/s Fedro Pharmaceuticals Lab Pvt. Ltd, 149-Industrial Estate, Hayatabad, Peshawar.
	Brand Name + Dosage Form + Strength	Keyfed tablet 1mg
	Composition	Each film- coated tablet contains: Ketotifen as Fumarate……1mg
	Diary No. Date of R & I & fee	Dy.No.27229; 08-08-2018; Rs.20,000 (08-08-2018)
	Pharmacological Group	Anti- histamine
	Type of Form	Form- 5
	Finished product Specification	Manufacturers
	Pack size & Demanded Price	20's, 30's & as per SRO
	Approval status of product in Reference Regulatory Authorities	MHRA Approved as uncoated
	Me-too status	Asthanil 1mg Tab of M/s Siza Lahore (Reg. # 011751)
	GMP status	Last GMP inspection was conducted on 30-01-2019 and the report concludes:

		The firm rectified majority of observations noted in the previous inspection and the management is committed to further improve their cGMP compliance. The firm may be considered operating in satisfactory level of cGMP compliance.
	Remarks of the Evaluator	• Initially, film- coated tablet was applied while it is approved in Italy (AIFA) as uncoated. • Firm has revised its master formulation according to the reference and has submitted Rs. 5000/- for change of formulation. • The applied formulation is non- pharmacopoeial. • General tablet section is available in the firm as mentioned in the submitted GMP certificate. • Applied salt is not complete because Ketotifen as "Hydrogen" fumarate is approved in MHRA. Firm did not correct the salt in reply.
	Decision of 293rd meeting of Registration Board.	Deferred for revision of formulation as per reference product along with submission of requisite fee.
	Submission by the firm.	Firm has submitted that in response to letter No. F.1-1/2017/PEC-DRAP (AD PEC XIII), they have already submitted 5000/- fee while their product is still pending.
	Remarks of the Evaluator XIII	• Firm has neither submitted revised label claim as per reference product nor any fee for revision of label claim against the decision of 293rd meeting of Registration Board. • Latest GMP certificate/inspection report conducted within last three years shall be submitted.
	Decision: Approved with innovator's specifications as per following label claim: "Each tablet contains: Ketotifen as Fumarate …… 1mg" • **Registration letter will be issued after submission of differential fee of Rs. 2,500 for correction/pre-approval change in dosage from film coated to uncoated tablet, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Firm will also submit latest GMP certificate/last inspection report conducted within last three years.**	
436.	Name and address of manufacturer/ Applicant	M/s Scilife Pharma Pvt Ltd., Plot # FD-57/58-A2, Korangi Creek Industrial Park, Karachi. (Contract giver) M/s Vision Pharmaceuticals, Plot # 22,23, Industrial Triangle, Kahuta Road, Islamabad. (contract acceptor) (Large volume & small volume parenteral.)
	Brand Name + Dosage Form + Strength	Orpic 200mg/100ml IV Infusion.
	Composition	Each 100ml Contains: Ciprofloxacin Lactate eq. to Ciprofloxacin …200mg
	Diary No. Date of R & I & fee	Dy. No 16170 dated 07-03-2019; Rs.50,000/- dated 07-03-2019.
	Pharmacological Group	Quinolone Antibacterial.
	Type of Form	Form-5.
	Finished product Specification	BP Specifications.
	Pack size & Demanded Price	1 x 100ml & as per SRO.
	Approval status of product in Reference Regulatory Authorities	Ciprofloxacin 2 mg/ml (As lactate) solution for infusion, MHRA approved.
	Me-too status	Otsuflox IV Infusion 100ml, Otsuka Pakistan, Reg. No. 086880.
	GMP status	Vision Pharma: GMP certificate issued on 31-07-2019 on the basis of inspection conducted on 11-02-2019. Scilife pharma:

		GMP certificate issued on 17-06-2021 on the basis of inspection conducted on 01-03-2021.
	Remarks of the Evaluator	• Packaging material of the applied formulation is LDPE and is different from the reference product which is PVC bag contained in a polypropylene/polyester aluminum/polyester pouch. • Master formula has ciprofloxacin lactate and lactic acid while BP monograph states that ciprofloxacin infusion is a sterile solution prepared by the interaction of ciprofloxacin and lactic acid. • M/s Scilife Pharma has 06 approved sections vide letter No. F. 2-4/2011-Lic (Vol-I) dated 18-06-2021. • M/s Scilife Pharma has also submitted that they have 09 approved products on contract basis.
	Decision of 312th meeting of Registration Board.	Deferred for following: • Packaging material of the applied formulation is LDPE and is different from the reference product which is PVC bag contained in a polypropylene/polyester aluminium/polyester pouch. • Master formula has ciprofloxacin lactate and lactic acid while BP monograph states that ciprofloxacin infusion is a sterile solution prepared by the interaction of ciprofloxacin and lactic acid. Master formulation needs revision along with submission of application of applicable fee.
	Submission by the firm.	• Firm has submitted that according to innovator manufactured by Hospira UK Ltd., ciprofloxacin solution for infusion supplied in transparent infusion bags (PVC or Polyolefin). We are mentioning LDPE, which belongs to polyolefin. Furthermore, we also performed the stability of product in LDPE which shows that the product is compatible with LDPE container. • Firm has also submitted that we have manufactured our product according the innovator product while lactic acid 50% is mentioned in list of excipients. Lactic acid is added as an acidifying agent to improve the solubility of API. Thus, there will be no revision in formulation.
	Remarks of the Evaluator [XIII]	• BP monograph states that ciprofloxacin infusion is a sterile solution prepared by the interaction of ciprofloxacin and lactic acid.
	Decision: Deferred for following points: • **Revision of formulation as per BP monograph along with submission of full fee.** • **Details regarding formulation and salt form of ciprofloxacin along with current status of the commercial product manufactured by M/s vision pharmaceuticals.**	
437.	Name and address of manufacturer/ Applicant	M/s Scilife Pharma Pvt Ltd., Plot # FD-57/58-A2, Korangi Creek Industrial Park, Karachi. (Contract giver) M/s Vision Pharmaceuticals, Plot # 22,23, Industrial Triangle, Kahuta Road, Islamabad. (contract acceptor) (Large volume & small volume parenteral.)
	Brand Name + Dosage Form + Strength	Scimox 400mg/250ml IV Infusion.

	Composition	Each 250ml Contains: Moxifloxacin HCL eq. to Moxifloxacin ……400mg
	Diary No. Date of R & I & fee	Dy. No 16169 dated 07-03-2019; Rs.50,000/- dated 07-03-2019.
	Pharmacological Group	Quinolone Antibacterial.
	Type of Form	Form-5.
	Finished product Specification	Manufacturer's specifications.
	Pack size & Demanded Price	1 x 250ml & as per SRO.
	Approval status of product in Reference Regulatory Authorities	Avelox 400 mg/250 ml solution for infusion, MHRA approved.
	Me-too status	Zeker 400mg/250ml Infusion, ISIS Pharmaceutical, Reg. No. 092704.
	GMP status	Vision Pharma: GMP certificate issued on 31-07-2019 on the basis of inspection conducted on 11-02-2019. Scilife pharma: GMP certificate issued on 17-06-2021 on the basis of inspection conducted on 01-03-2021.
	Remarks of the Evaluator	• Packaging material of the applied formulation is LDPE and is different from the reference product which is PVC bag contained in a polypropylene/polyester aluminum/polyester pouch. • M/s Scilife Pharma has 06 approved sections vide letter No. F. 2-4/2011-Lic (Vol-I) dated 18-06-2021. • M/s Scilife Pharma has also submitted that they have 09 approved products on contract basis.
	Decision of 312th meeting of Registration Board.	Deferred for following: • Packaging material of the applied formulation is LDPE and is different from the reference product which is PVC bag contained in a polypropylene/polyester aluminium/polyester pouch.
	Submission by the firm.	• Firm has submitted that according to innovator Avelox 400mg/250ml solution for infusion, Moxifloxacin solution for infusion supplied in polyolefin bags. We are mentioning LDPE, which belongs to class polyolefin. Furthermore, we also performed the stability of product in LDPE which shows that the product is compatible with LDPE container.
	Remarks of the Evaluator [XIII]	
	Decision: Approved with innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	
438.	Name and address of manufacturer/ Applicant	M/s Semos Pharmaceuticals (Pvt.) Ltd., Plot No. 11, Sector 12-A, North Karachi, Krachi-75850,
	Brand Name + Dosage Form + Strength	Mefalgic 50mg/5ml Suspension
	Composition	Each 5ml contains: Mefenamic Acid ……50mg
	Diary No. Date of R & I & fee	Dy. No 5328 dated 07-02-2019 Rs.20,000/-06-02-2019
	Pharmacological Group	Anti-inflammatory and Antirheumatic Products, Non-Steroids
	Type of Form	Form-5
	Finished product Specification	Manufacturer's Specification
	Pack size & Demanded Price	60ml, 450ml: As per SSRO

	Approval status of product in Reference Regulatory Authorities	Could not be confirmed
	Me-too status	Constel 50mg/5ml suspension
	GMP status	Dated:04-07-2018 Conclusion: Based on above observations their current GMP compliance level is rated as GOOD.
	Remarks of the Evaluator PEC	• Mention type of primary packaging material • Approval status of product in reference regulatory authorities?
	Decision of 296th meeting of Registration Board. :	Deferred for the following: • Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting. • Mention type of primary packaging material for applied formulation.
	Submission by the firm.	Firm has submitted PIL of mefenamic acid 50mg/5ml suspension approved by Netherland. However, the same could not be confirmed. Firm has also submitted the art work of applied formulation instead of primary packaging material.
	Remarks of Evaluator PEC-XIII.	• Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting. • Mention type of primary packaging material for applied formulation.
	Decision of 307th meeting of Registration Board. :	Deferred for following: • Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting. • Mention type of primary packaging material for applied formulation.
	Submission by the firm.	Firm has submitted an evidence for the applied formulation approved in MHRA. Mefenamic Acid 50 mg/5 ml Suspension, Marketing Authorization holder is Chemidex Pharma Limited and marketing Authorization number is PL 17736/0146.
	Remarks of Evaluator PEC XIII.	• Type of primary packaging material for applied formulation could not be confirmed. • Latest GMP status of the firm could not be confirmed.
	Decision: Approved with innovator's specifications. • **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Firm will also submit details of primary packaging material and current GMP status of the manufacturing site.**	
439.	Name and address of manufacturer/ Applicant	M/s Hi-Med Pharmaceuticals, (Pvt.) Ltd., 208-C Sunder Industrial Estate (P.I.E), Raiwind Road, Lahore (Tablet general).
	Brand Name + Dosage Form + Strength	Medigex 100mg Tablet.
	Composition	Each Film Coated Tablet Contains: Sertraline HCl……..100mg

	Previous decision(s)	Registration Board referred the case to QA & LT to update GMP status of the firm on priority (M-248).
	Evaluation by PEC	The firm has submitted copy of GMP certificate issued based on inspection conducted on 02-07-2021. The submitted me-too reference is of different strength as under: EACH 100ML CONTAINS: - SELENIUM (AS SODIUM SELENITE) B.P. VET. 0.050GM. VITAMIN-E B.P./USP 7.00M. VITAMIN B-12 B.P/USP 0.010GM. VITAMIN B-1 B.P/USP 2.00M. ADENOSINE 5-MONOPHOSPHATE B.P/USP 0.500GM..
	Decision: Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.	
454.	Name and address of manufacturer / Applicant	M/s Izfaar Pharmaceutical Industries, 542-A, Sundar Industrial Estate, Lahore
	Brand Name +Dosage Form + Strength	FLORO-FAR INJECTION
	Composition	Each ml contains: Florfenicol……400mg
	Diary No. Date of R& I & fee	14256, 17-04-2018, 20,000/-, 16-04-2018
	Pharmacological Group	Broad spectrum antibiotic
	Type of Form	Form-5
	Finished product Specification	In-house specification
	Pack size & Demanded Price	50 ml; Decontrolled
	Me-too status	Not submitted
	GMP status	The firm has submitted copy of GMP certificate issued based on inspection conducted on 02-07-2021
	Previous remarks of the Evaluator.	The me-too reference of applied formulation could not be verified from available database.
	Previous decision(s)	Registration Board referred the case to QA & LT to update GMP status of the firm on priority (M-248).
	Evaluation by PEC	The firm has submitted copy of GMP certificate issued based on inspection conducted on 02-07-2021. The firm has revised the composition as below: Each ml contains: Florfenicol……300mg Me-too: Neflox Injection of M/s Selmore Pharma (Reg # 049648)
	Decision: Approved with innovator's specifications and with following label claim: **Each ml contains:** **Florfenicol……300mg**	

	• **Registration Board further decided that registration letter will be issued after submission of 30,000/- fee for revision of formulation as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**	
455.	Name and address of manufacturer / Applicant	M/s Izfaar Pharmaceutical Industries, 542-A, Sundar Industrial Estate, Lahore
	Brand Name +Dosage Form + Strength	NITRO-FAR INJECTION
	Composition	Each ml contains: Nitroxynil……340mg
	Diary No. Date of R& I & fee	14255, 17-04-2018, 20,000/-, 16-04-2018
	Pharmacological Group	Broad Spectrum Antibiotic
	Type of Form	Form-5
	Finished product Specification	In-house
	Pack size & Demanded Price	50ml; Decontrolled
	Me-too status	TROXY-34% INJECTION of M/s Selmore Pharma (Reg#034597)
	GMP status	The firm has submitted copy of GMP certificate issued based on inspection conducted on 02-07-2021.
	Previous remarks of the Evaluator.	Latest GMP inspection report which should have been conducted within period of 3 years is required to be submitted.
	Previous decision(s)	Registration Board referred the case to QA & LT to update GMP status of the firm on priority (M-248).
	Evaluation by PEC	The firm has submitted copy of GMP certificate issued based on inspection conducted on 02-07-2021.
	Decision: Approved with innovator's specifications. • **Registration Board further decided that registration letter will be issued after submission of 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**	
456.	Name and address of manufacturer / Applicant	M/s Mallard Pharmaceutical (Pvt) Ltd, 23 Km, Lahore Road, Multan.
	Brand Name +Dosage Form + Strength	Renotone Plus oral Powder
	Composition	Each 1000gm contains: Hexamine……...…480gm Sodium Acid Phosphate…….160gm Ascorbic acid……...30gm Trihydroxyethyl Rutin…..….3gm
	Diary No. Date of R& I & fee	18-01-2011 vide diary No. 381 Rs.8,000 & 30-07-2013 vide diary No. 937 Rs.12000
	Pharmacological Group	Anti-Infective
	Type of Form	Form-5
	Finished product Specification	In-house specifications
	Pack size & Demanded Price	Decontrolled/ 100gm, 250gm, 500gm, 1000gm &2.5 Kg.
	Me-too status	Exitone Oral Powder of M/s A & K Pharma (Reg#033289)
	GMP status	The firm is granted GMP certificate based on inspection conducted on 13-08-2020.
	Previous remarks of the Evaluator.	
	Previous decision(s)	Deferred for following (M-265) Complete product specifications Last GMP inspection report conducted within one year Clarification regarding availability of potentiometer as claimed by applicant for analysis of API.
	Evaluation by PEC	The firm has claimed manufacturer's specifications. The firm is granted GMP certificate based on inspection conducted on 13-08-2020.
	Decision: Referred to Expert Working Group on Veterinary Drugs for review of applied formulation for the intended role as "Anti-infective".	
457.	Name and address of manufacturer / Applicant	M/s Mallard Pharmaceutical (Pvt) Ltd, 23 Km, Lahore Road, Multan.
	Brand Name +Dosage Form + Strength	Delta Mall Solution 2.5%

	Composition	Each ml contains: Deltamethrin…….. 2.5% w/v
	Diary No. Date of R& I & fee	04-06-2012, Rs.8000/-, 30-07-2013, Rs. 12000 /-
	Pharmacological Group	Disinfectant

	Finished product Specification	Not mentioned
	Pack size & Demanded Price	Decontrolled/ 100ml, 250ml, 500ml, 1000ml & 2.5 L
	Me-too status	I-Dmeth Solution of International Pharma Labs (Reg#052388)
	GMP status	The firm is granted GMP certificate based on inspection conducted on 13-08-2020.
	Previous remarks of the Evaluator.	
	Previous decision(s)	Deferred for reference of finished product specification (M-265).
	Evaluation by PEC	The firm has claimed BP specifications for finished product.
	Decision: Approved with BP specifications. • **Registration Board further decided that registration letter will be issued after submission of 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**	

Case No.02: Registration applications of drugs for which stability study data is submitted

a. Verification of stability study data

458.	Name and address of manufacturer / Applicant	M/s Hudson Pharma (pvt.) Ltd., D-93, North Western industrial Zone, Port Qasim, Karachi
	Brand Name +Dosage Form + Strength	LULISON CREAM 1%
	Composition	Each gm contains: Luliconazole……..…10mg
	Diary No. Date of R& I & fee	Dy No. 3791, 30-01-2018, Rs. 50,000/-,17-01-2018
	Pharmacological Group	Antifungal agent
	Type of Form	Form-5D
	Finished product Specification	Manufacturer's specifications
	Pack size & Demanded Price	10gm; As per SRO
	Approval status of product in Reference Regulatory Authorities	LUZU Cream of Medicis **(USFDA approved)**
	Me-too status	Not available
	GMP status	Routine GMP inspection conducted on 11-12-2017 concluded that the overall cGMP compliance of the firm with respect to building, facilities and procedures demonstrated at the time of inspection found at acceptable level.

STABILITY STUDY DATA	
Drug	LULISON CREAM 1%
Name of Manufacturer	M/s Hudson Pharma (pvt.) Ltd., D-93, North Western industrial Zone, Port Qasim, Karachi
Manufacturer of API	M/s Viwit Pharmaceutical Co., Ltd. 88 Weizhi Road, Tengzhou Biopharma Park, Shandong, China
API Lot No.	333001-201705001
Description of Pack (Container closure system)	Plastic tubes
Stability Storage Condition	Accelerated: 40˚C ± 2˚C/75%±5% RH Real Time: 30˚C ± 2˚C/65%±5% RH

Time Period	Accelerated: 06 (months) Real Time: 06 (months)		
Frequency	Accelerated: 0,1,3,6 (Months) Real Time: 0,1,3,6 (Months)		
Batch No.	LCS04	LCS05	LCS06
Batch Size	200 tubes	200 tubes	200 tubes
Manufacturing Date	11-09-2017	13-09-2017	28-10-2017
Date of Initiation	13-09-2017	18-09-2017	31-10-2017
No. of Batches	03		
Date of Submission	29340 (03-09-2018)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	COA of API.	Copy of COA from M/s Viwit Pharmaceutical Co., Ltd., Shandong, China is submitted.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	Copy of GMP certificate for M/s Viwit Pharmaceutical Co., Ltd., Shandong, China issued by Tengzhou Food and Drug Administration of People's Republic of China. It is valid until 24-09-2017.
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	The firm has submitted copy of commercial invoice attested by ADC, DRAP, Karachi dated 19-06-2017.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

- The firm has submitted 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Batches.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board in its 278th Meeting:
Date of submission: 03-09-2018 vide diary no. 29340

Administrative Portion

1.	Reference of last onsite panel inspection for instant dosage form conducted during last two years.	Registration Board decided to approve the registration of "Acneson Gel 5% (Dapsone)" by M/s Hudson Pharma (Pvt.) Ltd., D-93, North Western Industrial Zone, Port Qasim-Karachi. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Date of Inspection: 10-05-2018. • The HPLC software is 21 CFR compliant

<table>
<tr><td></td><td></td><td>• Audit trail reports on testing of finished product are available.</td></tr>
<tr><td>2.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>The firm has submitted copy of commercial invoice attested by ADC, DRAP, Karachi dated 19-06-2017.</td></tr>
<tr><td>3.</td><td>Documents for the procurement of reference standard & impurity standards.</td><td>The firm has not submitted copy of invoice of working standard.</td></tr>
<tr><td>4.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by regulatory authority of country of origin.</td><td>Copy of GMP certificate for M/s Viwit Pharmaceutical Co., Ltd., Shandong, China issued by Tengzhou Food and Drug Administration of People’s Republic of China. It is valid until 24-09-2017.</td></tr>
<tr><td>5.</td><td>Mechanism for Vendor pre-qualification</td><td>The firm has submitted SOP for Evaluation of Vendors.</td></tr>
<tr><td>6.</td><td>Certificate of analysis of the API, reference standards and impurity standards</td><td>• Copy of COA of API submitted.
• Copy of COA of working standard has been submitted
• Copy of COA of impurity standard has not been submitted.</td></tr>

</table></td></tr>
<tr><td colspan="3">QA / QC DATA</td></tr>
<tr><td>12.</td><td>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)</td><td>Firm has submitted photocopies of digital data logger record of Accelerated stability chamber and real time chamber from 01-08-2017 to 28-02-2018.</td></tr>
<tr><td>13.</td><td>Method used for analysis of API along with COA.</td><td>The firm has submitted photocopy of Raw Material Specifications, Raw Material Testing Procedures along with COA for Luliconazole.</td></tr>
</table>

14.	Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)	The firm has submitted photocopy of Finished Product Testing Procedure for Luliconazole Cream 1% along with Stability Study Reports.
15.	Reports of stability studies of API from manufacturer.	The firm has submitted reports of real time stability studies (25°C ± 2°C/65 ± 5% RH) for 6 months and accelerated stability studies (40°C ± 2°C/75 ± 5% RH) for 36 months of Luliconazole.
16.	Analysis reports for excipients used.	The firm has submitted photocopy of Analytical reports of excipients used.
17.	Drug-excipients compatibility studies.	Not submitted
18.	Record of comparative dissolution data.	The firm has performed comparative dissolution studies with Lulimac Cream manufactured by M/s. Optimus Pharma Pvt. Limited, Solan India with Batch No.OA7012B. The firm's product results are comparable to that of the comparator product.
19.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of Luliconazole Cream 1% from 13-09-2017 to 19-07-2018 has been submitted.

The firm has initiated stability studies on 13-09-2017 whereas firm was granted section approval letter for Cream/Ointment/Gel section from licensing on 21-02-2018.
Finished product specifications do not mention dissolution test for applied formulation. Similarly, comparative Dissolution Profile does not dissolution conditions under which dissolution was performed.
Decision: Registration Board after thorough discussion decided to reject the stability data on the basis of following reasons (M-287):
"Manufacturing of batches of applied formulation i.e. Cream before the approval of relevant section i.e. Cream/Ointment/ Gel section by Licensing Division, DRAP.

Evaluation by PEC: The firm has submitted that we have re-manufactured 03 stability batches and kept them on accelerated and ambient stability which is enclosed herewith.

REMARKS OF EVALUATOR

- The firm has submitted 06 Months Accelerated and 06 Months Real Time Stability Data for 03 Batches.

Report on Investigation of Authenticity / Genuineness of data submitted for registration of LULISON CREAM 1% (Luliconazole), Pack Size 1x10g by M/S. Hudson Pharma (Pvt) Ltd., D-93, North Western Industrial Zone, Post Qasim, Karachi.

Reference No: F.1-2/2020-PEC dated 29th March, 2021.
Investigation Date and Time: 05th January, 2022 (Morning).
Investigation Site: Factory premises of M/S. Hudson Pharma (Pvt) Ltd., Port Qasim Industrial Zone, Karachi.

Background:
Chairman Registration Board considered the applications of M/S. Hudson Pharma (Pvt) Ltd., Port Qasim, Karachi for registration of LULISON CREAM 1% (Luliconazole) 10mg and constituted a two member panel to investigate the authenticity / genuineness of data (import of raw material and stability data). Panel was advised to conduct inspection of the firm and to submit report for further consideration.

Composition of Panel:
1. Dr. Saif-ur-Rehman Khattak, Director/ FGA, CDL, Karachi.
2. Mr. Awais Ahmad, Assistant Director, CDL, DRAP, Karachi.

Scope of investigation:
Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:
The investigation was conducted by using a structured questionnaire of DRAP. For objective evidence physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases were also audited. The details of investigation may be summarized as under:

Sr.#	Question	Observation

<table>
<tr><td>1.</td><td>Do you have documents confirming the import of Luliconazole API including approval from DRAP?</td><td>Luliconazole imported from Optrix laboratories Pvt Ltd, India with proper approval from DRAP Karachi with following details.
<table>
<tr><td>Batch No.</td><td>Date of Import</td><td>Invoice No.</td><td>Quantity Imported</td></tr>
<tr><td>OT-LCZ/04/17/002</td><td>27/10/2017</td><td>035</td><td>150 g</td></tr>
</table>
As per PEC observation the firm to adjust the pH again manufactured 3 new batches of Lulison cream for which they procured API Luliconazole from same source, Optrix laboratories Pvt Ltd, India, with following details:
<table>
<tr><td>Batch No.</td><td>Date of Import</td><td>Invoice No.</td><td>Quantity Imported</td></tr>
<tr><td>1/OT-LCZ/S2/013/21</td><td>29/07/21</td><td>SS-02482</td><td>110 g</td></tr>
</table></td></tr>
<tr><td>2.</td><td>What was the rationale behind selecting the particular manufacturer of API?</td><td>The rationale for selection of API manufacturer is the vendor qualification criteria as per SOP # QA/GN/OP/023 that contains GMP Certificate, DMF, SMF, API, Impurity standards etc.</td></tr>
<tr><td>3.</td><td>Do you have documents confirming the import of Luliconazole reference standard and impurity standards?</td><td>The firm has imported Luliconazole working standard and impurity standards from Optrix laboratories India.</td></tr>
<tr><td>4.</td><td>Do you have a certificate of Analysis of the API, reference standards and impurity standards?</td><td>The firm has COA for the API, working standards and impurity standards.</td></tr>
<tr><td>5.</td><td>Do you have any approval of API or GMP certificate of API manufacturer issued by regulatory authority of country of origin?</td><td>The firm has a copy of GMP certificate of Optrix Laboratories Pvt Ltd India issued by regulatory authority of India valid upto 02/06/2025.</td></tr>
<tr><td>6.</td><td>Do you use API manufacturer methods of testing?</td><td>The firm has used an in-house method for testing of Luliconazole based on API manufacturer method of testing.</td></tr>
<tr><td>7.</td><td>Do you have stability studies reports on API?</td><td>The firm has real time & accelerated stability study reports of Luliconazole conducted by the API manufacturer.</td></tr>
<tr><td>8.</td><td>If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?</td><td>The stability testing has been performed as per SIM method.</td></tr>
<tr><td>9.</td><td>Do you have a method for quantifying the impurities in the API?</td><td>The firm has a method for quantifying the impurities in the API based on manufacturer specification.</td></tr>
<tr><td>10.</td><td>Do you have some remaining quantities of the API, its reference standard and impurities standards?</td><td>The firm has some remaining quantity of API, impurities and reference standard procured for the new batches.</td></tr>
</table>

<table>
<tr><td>11.</td><td>Have you used pharmaceutical grade excipients?</td><td>The firm has used the following pharma grade excipients.
Benzyl alcohol from Sigma Aldrich, USA.
Butylated Hydroxy toluene from Hangzhou Zhongbao Import & Export Corp Ltd, China.
Cetostearyl alcohol from Emery, Malaysia.
Isopropyl myristate from KLK Oleo, Malaysia.
Caprylic Capric Triglyceride from KLK Oleo, Malaysia.
Methylparaben from UENO Fine Chemicals, Japan.
Polysorbate 60 (tween 60) from Croda, India.
Propylene glycol from Merck, Germany.
Sorbitan monostearate (Span 60) from Croda, India.</td></tr>
<tr><td>12.</td><td>Do you have documents confirming the import of the used excipients?</td><td>All the excipients have been locally purchased, with proper invoice and COAs.</td></tr>
<tr><td>13.</td><td>Do you have test reports and other records on the excipients used?</td><td>The firm has test reports & other records on the excipients used.</td></tr>
<tr><td>14.</td><td>Do you have written and authorized protocols for the development of Lulison cream 1%?</td><td>The firm has written & authorized protocols for the development of Lulison 1% cream.</td></tr>
<tr><td>15.</td><td>Have you performed Drug-excipients compatibility studies?</td><td>Since the firm has used the same excipient as used by innovator (Luzu 1% Cream), therefore compatibility studies are not needed.</td></tr>
<tr><td>16.</td><td>Have you performed comparative studies?</td><td>The firm has not performed comparative studies, with innovator product.</td></tr>
<tr><td>17.</td><td>Do you have a product development (R&D) section?</td><td>The firm has a product development section.</td></tr>
<tr><td>18.</td><td>Do you have necessary equipment available in the product development section for development of Lulison cream 1%?</td><td>The firm has necessary equipment is PD section for manufacturing while for QC routine QC equipment are used.</td></tr>
<tr><td>19.</td><td>Are the equipment in the product development section qualified?</td><td>All the equipment are qualified.</td></tr>
<tr><td>20.</td><td>Do you have a proper maintenance / calibration / re-qualification program for the equipment used in the PD section?</td><td>There is a proper maintenance & calibration / re-qualification program for the equipment used in the PD section.</td></tr>
<tr><td>21.</td><td>Do you have qualified staff in the product development section with proper knowledge and training in product development?</td><td>The firm has 2 Pharmacists assisted by the staff of manufacturing & QC, in product development.</td></tr>
<tr><td>22.</td><td>Have you manufactured three stability batches for the stability studies of Lulison cream 1% as required?</td><td>The firm has manufactured three stability batches for the stability study of Lulison cream(pH:3-4.5), with details as below:
<table>
<tr><td>Batch No.</td><td>Mfg. Date</td><td>Batch Size</td></tr>
<tr><td>LCS07</td><td>09-04-2019</td><td>200 tubes each of 10g</td></tr>
<tr><td>LCS08</td><td>15-04-2019</td><td>200 tubes each of 10g</td></tr>
<tr><td>LCS09</td><td>16-04-2019</td><td>200 tubes each of 10g</td></tr>
</table>
</td></tr>
</table>

<table>
<tr><td></td><td></td><td>The firm has further manufactured three stability batches for the stability study of Lulison cream (pH:5-7) as per PEC recommendations with details as below:
<table>
<tr><td>Batch No.</td><td>Mfg. Date</td><td>Batch Size</td></tr>
<tr><td>SB-LUL-CR-01</td><td>07-09-2021</td><td>250 tubes each of 10g</td></tr>
<tr><td>SB-LUL-CR-02</td><td>20-09-2021</td><td>250 tubes each of 10g</td></tr>
<tr><td>SB-LUL-CR-03</td><td>25-09-2021</td><td>250 tubes each of 10g</td></tr>
</table></td></tr>
<tr><td>23.</td><td>Do you have any criteria for fixing the batch size of stability batches?</td><td>The firm has manufactured stability batches based on number of tests & frequency of testing.</td></tr>
<tr><td>24.</td><td>Do you have a complete record of production of stability batches?</td><td>The firm has a complete record of production of stability batches.</td></tr>
<tr><td>25.</td><td>Do you have protocols for stability testing of stability batches?</td><td>The firm has developed protocol for stability testing of stability batches (Doc#QC/GN/OP/015).</td></tr>
<tr><td>26.</td><td>Do you have developed and validated the method for testing of stability batches?</td><td>The firm has developed & validated methods for testing of stability batches of Lulison 1% cream.</td></tr>
<tr><td>27.</td><td>Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?</td><td>N/A</td></tr>
<tr><td>28.</td><td>Do you have documents confirming the qualification of equipments / instruments being used in the test and analysis of Luliconazole and the finished drug?</td><td>The firm has proper documents confirming the qualification of equipment/instruments being used in the test & analysis of Luliconazole & the finished product (Lulison 1% Cream).</td></tr>
<tr><td>29.</td><td>Does your method of analysis stability indicating?</td><td>The firm has performed analytical method validation on their product forced degradation studies from basis for the method to be stability indicating.</td></tr>
<tr><td>30.</td><td>Does your HPLC software is 21CFR compliant?</td><td>The firm has HPLC software is 21CFR compliant.</td></tr>
<tr><td>31.</td><td>Can you show Audit Trail reports on Luliconazole testing?</td><td>Audit trail reports on testing of API and finished product is available.</td></tr>
<tr><td>32.</td><td>Do you have some remaining quantities of degradation products and stability batches?</td><td>Impurities studies are available.</td></tr>
<tr><td>33.</td><td>Do you have stability batches kept on stability testing?</td><td>The three new batches manufactured in July 2021 have been kept for stability testing. Currently three months studies are complete with satisfactory results.</td></tr>
<tr><td>34.</td><td>Do you have valid calibration status for the equipments used in Lulison cream 1% production & analysis?</td><td>The firm has valid calibration status for the equipment used in the production & analysis of lulison cream 1%.</td></tr>
<tr><td>35.</td><td>Do proper and continuous monitoring and control are available for the stability chamber?</td><td>Adequate monitoring & controls are available for stability chambers. Chambers are controlled & monitored through data loggers.</td></tr>
</table>

36.	Do related manufacturing area, equipments, personnel and utilities be rated as GMP compliant?	Related manufacturing area, equipment, personnel & utilities are GMP compliant.
37.	Queries of PEC: Results of pH of applied formulation in the light of innovator product (LUZU 1% w/w cream) having pH accepting criteria ranging from 5.0 to 7.0. Performance of test of viscosity and homogeneity for evaluation of topical formulation.	Firm has shown studies on two different formulations manufactured at pH specs as 3.0 to 4.5 and 5.0 to 7.0. respectively. Six months studies conducted at real time and accelerated conditions on three batches of the first formulation have been already submitted to Islamabad. Three batches of the second formulation having pH specs 5.0 to 7.0 have been kept on real time and accelerated condition. Currently three months studies are complete which are being evaluated by the panel. The studies with both the formulation demonstrate that the product is stable within a pH range of 3.0 to 7.0. The firm has also submitted their safety testing on both formulations for acute dermal irritant test. The results of the test show that no sign of irritation / inflammation were found during the observation period of (optimized test conditions). (Copy of Reports Attached). Firm has also performed viscosity testing on the manufactured batches from PCSIR. The results are within the range i.e. 20,000 to 40,000 (common ranges for cream formulation). (Copy of Report Attached).

Conclusions:

1. On the basis of risk-based approach the genuineness / authenticity of stability data submitted by the firm for registration of Lulison 1% Cream Pack Size 1x10g are verifiable to satisfactory level.
2. The related manufacturing area, equipment, personnel and utilities are GMP compliant and suited for the manufacturing of Lulison 1% Cream Pack Size 1x10g.

Recommendations:

The panel recommends registration of Lulison 1% Cream (Luliconazole).

Decision: Deferred for submission of following:

DOCUMENTS/DATA ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. SX20180229 issued by CFDA valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.0090/2021/DRAP-CPS/1330 CD(I&E) dated 16/04/2021 wherein the permission to import different APIs like ceftriaxone sodium for the purpose of test/analysis and stability studies is granted. AHPAO505150 dated 04-05-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted that our current HPLC system is not 21 CFR compliant, we will try to upgrade our system as soon as possible.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Observations communicated	Response by the firm
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.	Copies of drug substance specifications and analytical procedures were provided by drug substance manufacturer. However, copies of drug substance specifications and analytical procedures were not provided by drug product manufacturer.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The submitted analytical method verification studies were performed by drug substance manufacturer. Method verification studies were not performed by drug product manufacturer.
3.	The tests for crystallinity and particulate matter are not performed by drug product manufacturer.	Not submitted.

<table>
<tr><td></td><td>The assay limit specified by drug substance manufacturer (>84.0%) is different from that specified by drug product manufacturer (NLT 79%). Justification is required.</td><td>Assay limit as specified by drug substance manufacturer > 84% is according to CP 2010 as provided by Sinopharm.
While QC department of Alpenglow has followed USP 43 which specifies assay limit = NLT 79%.</td></tr>
<tr><td>4.</td><td>Provide COA of reference standard which is actually used in the analysis of drug substance.</td><td>Instead of providing CoA from drug substance manufacturer, the firm has provided CoA of working standard of FPP manufacturer.</td></tr>
<tr><td>5.</td><td>Submit master formulation including theoretical fill weight per vial.</td><td>The firm has provided theoretical fill weight of ceftriaxone sodium per vial.</td></tr>
<tr><td>6.</td><td>Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.</td><td>Not submitted.</td></tr>
<tr><td>7.</td><td>Justify your process validation protocols without any process for optimization of sterilization process and sealing of vials etc.</td><td>Not submitted.</td></tr>
<tr><td>8.</td><td>Specifications of the drug product does not include tests as recommended by USP including test for constituted solution, crystallinity and complete assay test.</td><td>Not submitted.</td></tr>
<tr><td>9.</td><td>Provide detailed testing method for the applied drug product instead of submitting copy of USP monograph.</td><td>The firm has provided testing method of ceftriaxone sodium raw material. The chromatographic conditions are different from USP.

</table></td></tr>
<tr><td>10.</td><td>Provide standard and sample preparation method used in analytical method verification studies.</td><td>Not submitted.</td></tr>
<tr><td>11.</td><td>Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions. Test method for Empazin 25mg Tablet is provided in analytical method verification studies.</td><td>Not submitted</td></tr>
<tr><td>12.</td><td>Justification of method of specificity test in analytical method verification studies shall be submitted. Clarification is required.
Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by</td><td>The firm has submitted analytical method verification studies of drug product including specificity, accuracy and precision.</td></tr>
</table>

	the Drug Product manufacturer shall be submitted. The peak area of standard solution concentration in analytical method verification studies is approximately 6472293 while the peak area of the standard solution of same concentration in stability studies is 436282 approximately. Clarify the difference in peak areas.	Not submitted.
13.	Provide COA of reference standard actually used in the analysis of drug product.	The firm has submitted COA of working standard from drug product manufacturer.
14.	• In-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided. • The tests for water contents, constituted solution etc are not performed during stability studies since these tests are required to make assessment of the stability profile. • Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing. Reference of previous approval of applications with stability study data of the firm (if any).	Not submitted Not provided The firm has submitted that our current HPLC system is not 21 CFR compliant, we will try to upgrade our system as soon as possible.
15.	• Pharmaceutical equivalence of the developed formulation and the innovator / reference / comparator product including the results of all the quality tests shall be submitted.	The firm has submitted pharmaceutical equivalence data against Rocephin 250mg IV injection (batch # 4121z015) by performing quality tests.

Decision: Deferred for following:

Sr. No.	Decision of 316th meeting of RB	Response by the firm
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification studies for testing of ceftriaxone sodium as per USP recommendations.
2.	Performance of tests of crystallinity and particulate matter by drug product manufacturer.	The tests were performed as per USP monograph. The crystallinity test was performed however, particulate matter test was performed for product.
3.	Justify the difference in assay limit specified by drug substance manufacturer (>84.0%) and drug product manufacturer (NLT 79%).	The drug substance manufacturer follows USP as well as Chinese pharmacopoeia monograph for ceftriaxone sodium, so claims the assay limit > 84%. While being the drug product manufacturer we have followed the USP monograph for ceftriaxone and USP specifies the limit of NLT 79.5%.
4.	Justify the chromatographic conditions in the submitted analytical procedures which are different from USP monograph.	The chromatographic conditions specified in analytical procedure are as per older version of USP 29. We have updated the specifications according to the latest version of USP. The product was tested in accordance with updated conditions and the results were found satisfactory and within limits.

5.	Submit master formulation including details of potency adjustment as per assay results on certificate of analysis.	The firm has submitted master formulation with calculations of fill weight as per assay result on certificate of analysis.
6.	Justification of submission of pharmaceutical equivalence data with Rocephin 250mg IV Injection since the formulation in the same strength is not available.	The firm has submitted pharmaceutical equivalence study with comparator product Oxidil 250mg injection (Batch # 002H) of Sami Pharma by performing tests of Identification, pH, Clarify of solution and assay.
7.	Performance of compatibility studies for the dry powder for injections as per the instructions provided in individual label of the drug product.	Sterile water for injection is the recommended diluent for intravenous injection of ceftriaxone sodium prior to administration. The results of compatibility and reconstitution studies are provided.
8.	Provide standard and sample preparation method used in analytical method verification studies.	The firm has provided methods for standard and sample preparation used in method verification studies of drug product.
9.	Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions.	The firm has specified the concentrations of 80% (0.24mg/ml), 100% (0.30mg/ml) and 120% (0.36mg/ml) used in accuracy studies. Moreover, details of blank solution, placebo and sample solution were provided specificity study.
10.	Analytical method verification reports of drug product performed by drug product manufacturer.	The firm has submitted method verification studies of drug product as per the USP recommendation.
11.	Clarify the difference in peak area for standard solution concentration in analytical method verification studies which is approximately 6472293 while the peak area of the standard solution of same concentration in stability studies is 436282 approximately.	The reason for area difference was that in verification studies the injection volume was different. The change in injection volume was a deviation to USP method, so the method was re-verified using standard USP method without any deviation. The area obtained was approximately same as that in stability studies.
12.	Provide COA of reference standard actually used in the analysis of drug product.	COA of USP primary reference standard with lot no: H0J296 has been provided.
13.	Provide in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.	The product is recommended to be used instantly after reconstitution, however if stored in refrigerator the product can be used in 24 h. So 24 h in-use stability study was performed.
14.	Performance of tests for water contents, constituted solution etc during stability studies since these tests are required to make assessment of the stability profile.	The firm has submitted that the constituted solution was checked at every point of stability study since the assay is performed after reconstituting the injection. After reconstitution and before assay, the injection was checked for particulate matter or other foreign matter. The revised stability summary sheets were provided.
15.	Evidence of procurement of API with approval from DRAP.	The firm has submitted copy of invoice specifying import of Ceftriaxone sodium 50Kg (Batch # Q012102085) attested by Assistant Director (I & E), Peshawar dated 16-04-2021.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deferred for following:

Sr. No.	Decision of 316th meeting of RB	Response by the firm
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification studies for testing of ceftriaxone sodium as per USP recommendations.
2.	Performance of tests of crystallinity and particulate matter by drug product manufacturer.	The tests were performed as per USP monograph. The crystallinity test was performed however, particulate matter test was performed for product.
3.	Justify the difference in assay limit specified by drug substance manufacturer (>84.0%) and drug product manufacturer (NLT 79%).	The drug substance manufacturer follows USP as well as Chinese pharmacopoeia monograph for ceftriaxone sodium, so claims the assay limit > 84%. While being the drug product manufacturer we have followed the USP monograph for ceftriaxone and USP specifies the limit of NLT 79.5%.
4.	Justify the chromatographic conditions in the submitted analytical procedures which are different from USP monograph.	The chromatographic conditions specified in analytical procedure are as per older version of USP 29. We have updated the specifications according to the latest version of USP. The product was tested in accordance with updated conditions and the results were found satisfactory and within limits.
5.	Submit master formulation including details of potency adjustment as per assay results on certificate of analysis.	The firm has submitted master formulation with calculations of fill weight as per assay result on certificate of analysis.
6.	Justification of submission of pharmaceutical equivalence data with Rocephin 250mg IV Injection since the formulation in the same strength is not available.	The firm has submitted pharmaceutical equivalence study with comparator product Oxidil 250mg injection (Batch # 002H) of Sami Pharma by performing tests of Identification, pH, Clarify of solution and assay.
7.	Performance of compatibility studies for the dry powder for injections as per the instructions provided in individual label of the drug product.	Sterile lignocaine for injection is the recommended diluent for intravenous injection of ceftriaxone sodium prior to administration. The results of compatibility and reconstitution studies are provided.
8.	Provide standard and sample preparation method used in analytical method verification studies.	The firm has provided methods for standard and sample preparation used in method verification studies of drug product.
9.	Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions.	The firm has specified the concentrations of 80% (0.24mg/ml), 100% (0.30mg/ml) and 120% (0.36mg/ml) used in accuracy studies. Moreover, details of blank solution, placebo and

		sample solution were provided specificity study.
10.	Analytical method verification reports of drug product performed by drug product manufacturer.	The firm has submitted method verification studies of drug product as per the USP recommendation.
11.	Clarify the difference in peak area for standard solution concentration in analytical method verification studies which is approximately 6472293 while the peak area of the standard solution of same concentration in stability studies is 436282 approximately.	The reason for area difference was that in verification studies the injection volume was different. The change in injection volume was a deviation to USP method, so the method was re-verified using standard USP method without any deviation. The area obtained was approximately same as that in stability studies.
12.	Provide COA of reference standard actually used in the analysis of drug product.	COA of USP primary reference standard with lot no: H0J296 has been provided.
13.	Provide in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.	The product is recommended to be used instantly after reconstitution, however if stored in refrigerator the product can be used in 24 h. So 24 h in-use stability study was performed.
14.	Performance of tests for water contents, constituted solution etc during stability studies since these tests are required to make assessment of the stability profile.	The firm has submitted that the constituted solution was checked at every point of stability study since the assay is performed after reconstituting the injection. After reconstitution and before assay the injection was checked for particulate matter or other foreign matter. The revised stability summary sheets were provided.
15.	Evidence of procurement of API with approval from DRAP.	The firm has submitted copy of invoice specifying import of Ceftriaxone sodium 50Kg (Batch # Q012102085) attested by Assistant Director (I & E), Peshawar dated 16-04-2021.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

461.	Name, address of Applicant / Marketing Authorization Holder	M/s Alpenglow Pharmaceuticals Plot # A/7, Export Processing Zone Risalpur, District Nowshera (KP) Pakistan
	Name, address of Manufacturing site.	M/s Alpenglow Pharmaceuticals Plot # A/7, Export Processing Zone Risalpur, District Nowshera (KP) Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.5234 Dated 24-02-2022
	Details of fee submitted	PKR 30,000/-: Dated 20-10-2021
	The proposed proprietary name / brand name	CIAXON 500mg IM Injection

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone as Sodium……..500 mg
	Pharmaceutical form of applied drug	Dry Powder for Injection
	Pharmacotherapeutic Group of (API)	Anti-bacterials for systemic use, Third-generation cephalosporins.
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Rocephin 500mg IM Injection USFDA Approved.
	For generic drugs (me-too status)	AVENTRIAX 500mg IM injection
	GMP status of the Finished product manufacturer	New license granted on 22-09-2020.
	Name and address of API manufacturer.	M/s Sinopharm Weiqida Pharmaceutical Co., Ltd. Address: First Medical Zone, Economic & Technological Development Zone, Datong, Shanxi, China.
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of ceftriaxone sodium is present in USP. The firm has submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (011302001, 011302002, 011302003)
	Module-III (Drug Product):	The firm has submitted details of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product Aventrix 500mg IM Injection by Sanofi Aventis Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Decision: Deferred for following:

Sr. No.	Decision of 316th meeting of RB	Response by the firm
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification studies for testing of ceftriaxone sodium as per USP recommendations.
2.	Performance of tests of crystallinity and particulate matter by drug product manufacturer.	The tests were performed as per USP monograph. The crystallinity test was performed however, particulate matter test was performed for product.
3.	Justify the difference in assay limit specified by drug substance manufacturer (>84.0%) and drug product manufacturer (NLT 79%).	The drug substance manufacturer follows USP as well as Chinese pharmacopoeia monograph for ceftriaxone sodium, so claims the assay limit > 84%. While being the drug product manufacturer we have followed the USP monograph for ceftriaxone and USP specifies the limit of NLT 79.5%.
4.	Justify the chromatographic conditions in the submitted analytical procedures which are different from USP monograph.	The chromatographic conditions specified in analytical procedure are as per older version of USP 29. We have updated the specifications according to the latest version of USP. The product was tested in accordance with updated conditions and the results were found satisfactory and within limits.
5.	Submit master formulation including details of potency adjustment as per assay results on certificate of analysis.	The firm has submitted master formulation with calculations of fill weight as per assay result on certificate of analysis.
6.	Performance of compatibility studies for the dry powder for injections as per the instructions provided in individual label of the drug product.	Sterile water for injection is the recommended diluent for intravenous injection of ceftriaxone sodium prior to administration. The results of compatibility and reconstitution studies are provided.
7.	Provide standard and sample preparation method used in analytical method verification studies.	The firm has provided methods for standard and sample preparation used in method verification studies of drug product.
8.	Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions.	The firm has specified the concentrations of 80% (0.24mg/ml), 100% (0.30mg/ml) and 120% (0.36mg/ml) used in accuracy studies. Moreover, details of blank solution, placebo and sample solution were provided in specificity study.
9.	Analytical method verification reports of drug product performed by drug product manufacturer.	The firm has submitted method verification studies of drug product as per the USP recommendation.
10.	Clarify the difference in peak area for standard solution concentration in analytical method verification studies which is approximately 6472293 while the peak area of the standard	The reason for area difference was that in verification studies the injection volume was different. The change in injection volume was a deviation to USP method, so the method was re-

	solution of same concentration in stability studies is 436282 approximately.	verified using standard USP method without any deviation. The area obtained was approximately same as that in stability studies.
11.	Provide COA of reference standard actually used in the analysis of drug product.	COA of USP primary reference standard with lot no: H0J296 has been provided.
12.	Provide in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.	The product is recommended to be used instantly after reconstitution, however if stored in refrigerator the product can be used in 24 h. So 24 h in-use stability study was performed.
13.	Performance of tests for water contents, constituted solution etc during stability studies since these tests are required to make assessment of the stability profile.	The firm has submitted that the constituted solution was checked at every point of stability study since the assay is performed after reconstituting the injection. After reconstitution and before assay the injection was checked for particulate matter or other foreign matter. The revised stability summary sheets were provided.
14.	Evidence of procurement of API with approval from DRAP.	The firm has submitted copy of invoice specifying import of Ceftriaxone sodium 50Kg (Batch # Q012102085) attested by Assistant Director (I & E), Peshawar dated 16-04-2021.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer will submit results of pharmaceutical equivalence against the innovator's product before issuance of Registration Letter.**

DOCUMENTS/DATA ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SX20180229 issued by CFDA valid till 05/06/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.0090/2021/DRAP-CPS/1330 CD(I&E) dated 16/04/2021 is submitted wherein the permission to import different APIs ceftriaxone as sodium for the purpose of test/analysis and stability studies is granted. AHPAO505150 dated 04/05/2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted that our current HPLC system is not 21 CFR compliant, we will try to upgrade our system as soon as possible.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Observations communicated	Response by the firm
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.	Copies of drug substance specifications and analytical procedures were provided by drug substance manufacturer.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The submitted analytical method verification studies were performed by drug substance manufacturer. Method verification studies were not performed by drug product manufacturer.

3.	The tests for crystallinity and particulate matter are not performed by drug product manufacturer. The assay limit specified by drug substance manufacturer (>84.0%) is different from that specified by drug product manufacturer (NLT 79%). Justification is required.	Not submitted. Assay limit as specified by drug substance manufacturer > 84% is according to CP 2010 as provided by Sinopharm. While QC department of Alpenglow has followed USP 43 which specifies assay limit = NLT 79%.
4.	Provide COA of reference standard which is actually used in the analysis of drug substance.	Instead of providing CoA from drug substance manufacturer, the firm has provided CoA of working standard of FPP manufacturer.
5.	Submit master formulation including theoretical fill weight per vial.	The firm has provided theoretical fill weight of ceftriaxone sodium per vial.
6.	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.	Not submitted
7.	Justify your process validation protocols without any process for optimization of sterilization process and sealing of vials etc.	Not submitted
8.	Specifications of the drug product does not include tests as recommended by USP including test for constituted solution, crystallinity and complete assay test.	Not submitted
9.	Provide detailed testing method for the applied drug product instead of submitting copy of USP monograph.	The firm has provided detailed testing method for the applied drug product.
10.	Provide standard and sample preparation method used in analytical method verification studies.	Not submitted.
11.	Specify the details of the accuracy and specificity test including the details of concertation of 80%, 100% and 120% solutions. Test method for Empazin 25mg Tablet is provided in analytical method verification studies.	Not submitted
12.	Justification of method of specificity test in analytical method verification studies shall be submitted. Clarification is required. Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. The peak area of standard solution concentration in analytical method verification studies is approximately 6472293 while the peak area of the standard solution of same concentration in stability studies is 436282 approximately. Clarify the difference in peak areas.	The firm has submitted analytical method verification studies of drug product including specificity, accuracy and precision. Not submitted.
13.	Provide COA of reference standard actually used in the analysis of drug product.	The firm has submitted COA of working standard from drug product manufacturer.
14.	• In-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided. • The tests for water contents, constituted solution etc are not performed	Not submitted Not provided

	during stability studies since these tests are required to make assessment of the stability profile. • Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing. Reference of previous approval of applications with stability study data of the firm (if any).	The firm has submitted that our current HPLC system is not 21 CFR compliant, we will try to upgrade our system as soon as possible.
15.	• Pharmaceutical equivalence of the developed formulation and the innovator / reference / comparator product including the results of all the quality tests shall be submitted.	The firm has submitted pharmaceutical equivalence data against Rocephin 1g IM injection (batch # 6121z015) by performing quality tests.

Deferred for submission of following

Sr. No.	Decision of 316th meeting of RB	Response by the firm
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification studies for testing of ceftriaxone sodium as per USP recommendations.
2.	Performance of tests of crystallinity and particulate matter by drug product manufacturer.	The tests were performed as per USP monograph. The crystallinity test was performed however, particulate matter test was performed for product.
3.	Justify the difference in assay limit specified by drug substance manufacturer (>84.0%) and drug product manufacturer (NLT 79%).	The drug substance manufacturer follows USP as well as Chinese pharmacopoeia monograph for ceftriaxone sodium, so claims the assay limit > 84%. While being the drug product manufacturer we have followed the USP monograph for ceftriaxone and USP specifies the limit of NLT 79.5%.
4.	Justify the chromatographic conditions in the submitted analytical procedures which are different from USP monograph.	The chromatographic conditions specified in analytical procedure are as per older version of USP 29. We have updated the specifications according to the latest version of USP. The product was tested in accordance with updated conditions and the results were found satisfactory and within limits.
5.	Submit master formulation including details of potency adjustment as per assay results on certificate of analysis.	The firm has submitted master formulation with calculations of fill weight as per assay result on certificate of analysis.
6.	Performance of compatibility studies for the dry powder for injections as per the instructions provided in individual label of the drug product.	Sterile lignocaine for injection is the recommended diluent for IM injection of ceftriaxone sodium prior to administration. The results of compatibility and reconstitution studies are provided.
7.	Provide standard and sample preparation method used in analytical method verification studies.	The firm has provided methods for standard and sample preparation used in method verification studies of drug product.
8.	Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions.	The firm has specified the concentrations of 80% (0.24mg/ml), 100% (0.30mg/ml) and 120% (0.36mg/ml) used in accuracy studies. Moreover, details of blank solution, placebo and sample solution were provided specificity study.

9.	Analytical method verification reports of drug product performed by drug product manufacturer.	The firm has submitted method verification studies of drug product as per the USP recommendation.
10.	Clarify the difference in peak area for standard solution concentration in analytical method verification studies which is approximately 6472293 while the peak area of the standard solution of same concentration in stability studies is 436282 approximately.	The reason for area difference was that in verification studies the injection volume was different. The change in injection volume was a deviation to USP method, so the method was re-verified using standard USP method without any deviation. The area obtained was approximately same as that in stability studies.
11.	Provide COA of reference standard actually used in the analysis of drug product.	COA of USP primary reference standard with lot no: H0J296 has been provided.
12.	Provide in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.	The product is recommended to be used instantly after reconstitution, however if stored in refrigerator the product can be used in 24 h. So 24 h in-use stability study was performed.
13.	Performance of tests for water contents, constituted solution etc during stability studies since these tests are required to make assessment of the stability profile.	The firm has submitted that the constituted solution was checked at every point of stability study since the assay is performed after reconstituting the injection. After reconstitution and before assay the injection was checked for particulate matter or other foreign matter. The revised stability summary sheets were provided.
14.	Evidence of procurement of API with approval from DRAP.	The firm has submitted copy of invoice specifying import of Ceftriaxone sodium 50Kg (Batch # Q012102085) attested by Assistant Director (I & E), Peshawar dated 16-04-2021.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deferred for submission of following:

Sr. No.	Decision of 316th meeting of RB	Response by the firm
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification studies for testing of ceftriaxone sodium as per USP recommendations.
2.	Performance of tests of crystallinity and particulate matter by drug product manufacturer.	The tests were performed as per USP monograph. The crystallinity test was performed however, particulate matter test was performed for product.
3.	Justify the difference in assay limit specified by drug substance manufacturer (>84.0%) and drug product manufacturer (NLT 79%).	The drug substance manufacturer follows USP as well as Chinese pharmacopoeia monograph for ceftriaxone sodium, so claims the assay limit > 84%. While being the drug product manufacturer we have followed the USP monograph for ceftriaxone and USP specifies the limit of NLT 79.5%.
4.	Justify the chromatographic conditions in the submitted analytical procedures which are different from USP monograph.	The chromatographic conditions specified in analytical procedure are as per older version of USP 29. We have updated the specifications according to the latest version of USP. The product was tested in accordance with updated conditions and the results were found satisfactory and within limits.
5.	Submit master formulation including details of potency adjustment as per assay results on certificate of analysis.	The firm has submitted master formulation with calculations of fill weight as per assay result on certificate of analysis.
6.	Performance of compatibility studies for the dry powder for injections as per the instructions provided in individual label of the drug product.	Sterile water for injection is the recommended diluent for intravenous injection of ceftriaxone sodium prior to administration. The results of compatibility and reconstitution studies are provided.
7.	Provide standard and sample preparation method used in analytical method verification studies.	The firm has provided methods for standard and sample preparation used in method verification studies of drug product.
8.	Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions.	The firm has specified the concentrations of 80% (0.24mg/ml), 100% (0.30mg/ml) and 120% (0.36mg/ml) used in accuracy studies. Moreover, details of blank solution, placebo and sample solution were provided specificity study.

9.	Analytical method verification reports of drug product performed by drug product manufacturer.	The firm has submitted method verification studies of drug product as per the USP recommendation.
10.	Clarify the difference in peak area for standard solution concentration in analytical method verification studies which is approximately 6472293 while the peak area of the standard solution of same concentration in stability studies is 436282 approximately.	The reason for area difference was that in verification studies the injection volume was different. The change in injection volume was a deviation to USP method, so the method was re-verified using standard USP method without any deviation. The area obtained was approximately same as that in stability studies.
11.	Provide COA of reference standard actually used in the analysis of drug product.	COA of USP primary reference standard with lot no: H0J296 has been provided.
12.	Provide in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.	The product is recommended to be used instantly after reconstitution, however if stored in refrigerator the product can be used in 24 h. So 24 h in-use stability study was performed.
13.	Performance of tests for water contents, constituted solution etc during stability studies since these tests are required to make assessment of the stability profile.	The firm has submitted that the constituted solution was checked at every point of stability study since the assay is performed after reconstituting the injection. After reconstitution and before assay, the injection was checked for particulate matter or other foreign matter. The revised stability summary sheets were provided.
14.	Evidence of procurement of API with approval from DRAP.	The firm has submitted copy of invoice specifying import of Ceftriaxone sodium 50Kg (Batch # Q012102085) attested by Assistant Director (I & E), Peshawar dated 16-04-2021.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer will submit results of pharmaceutical equivalence against the innovator's product before issuance of Registration Letter.**

Deferred cases (New License):

The Central Licensing Board in its 271st meeting held on 12th September, 2019 has considered and approved the grant of Drug Manufacturing License to M/s Himark Laboratories Pvt Ltd. Plot 37-A, Sundar Industrial Estate, Lahore by way of Formulation vide approval letter No. F. 1-67/2005-Lic dated 29th Sep, 2019 with following (06) sections.

Name of Section	**Considered till 313th RB meeting**		**Freshly applied**	
	No of molecules	**No of products**	**No of molecules**	**No of products**
Tablet (General & General Antibiotic) Section	2	5	2	2
Capsule (General & General Antibiotic) Section	4	9	1	2
Dry Powder Suspension (General & General Antibiotic) Section	3	5	1	1
Sachet (General) Section	-	-	1	1
Oral Liquid Syrup Section	2	3	2	3
Cream/Ointment (General) Section	-	-	-	-

465.	Name, address of Applicant / Marketing Authorization Holder	M/s Himark Laboratories Private Limited, Plot 37-A, Sunder Industrial Estate Lahore.

	Name, address of Manufacturing site.	M/s Himark Laboratories Private Limited, Plot 37-A, Sunder Industrial Estate Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.30582; Dated: 08-11-2021
	Details of fee submitted	PKR 20,000/-: Dated 31-12-2020 PKR 10,000/- Duplicate challan date not mentioned
	GMP status of the Finished product manufacturer	New license granted on 26/09/2019 Capsule (General & General Antibiotic) section approved.
	The proposed proprietary name / brand name	Dicmark 50 mg DR capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Diclofenac sodium (as Diclofenac sodium EC Pellets 24%)……50 mg
	Pharmaceutical form of applied drug	Hard Gelatin capsule
	Pharmacotherapeutic Group of (API)	NSAID
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	2 ×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Deflamat 50 mg – Kapseln, Astellas Pharma GmbH Linzer Straße 221/E02 1140 Vienna Austria, AGES (Austria) Approved.
	For generic drugs (me-too status)	Phlogin 50 mg cap (Enteric coated pellets) by M/s Brookes Pharma, Reg. No. 009128
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd., Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad-
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, Identification, water determination, Assay and tests for total impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches:(DE-161, DE-469, DE-597)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Phlogin 50 mg capsule** by **Brookes Pharma** by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Vision Pharmaceuticals (Pvt.) Ltd., Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad- Pakistan		
API Lot No.	DE706		
Description of Pack (Container closure system)	Alu-PVC blister packed in unit carton (2 x 10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-49	T-50	T-51
Batch Size	1500 capsules	1500 capsules	1500 capsules
Manufacturing Date	03-2020	03-2020	03-2020
Date of Initiation	16-03-2020	16-03-2020	16-03-2020
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
466.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
467.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad. It is valid till 10-02-2022.
468.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the purchase of Diclofenac sodium EC pellets 24 % (Batch # DE706, 1Kg) dated 11-03-2020.
469.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Data of stability batches have been submitted by UV method alongwith respective documents like COA, summary data sheets.

470.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted that testing of Dicmark 50mg DR capsule has been performed on UV spectrophotometer.
471.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) has been submitted.

Sr. No.	Observations	Response by the firm
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by both Drug substance & Drug Product.	The firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.
2.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. However, relevant chromatograms of tested parameters were not provided.
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	The firm has provided results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during stability studies, along with certificate of analysis (CoA) of the same batch.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests of the developed formulation and the innovator product shall be submitted and discussed.	The firm has submitted pharmaceutical equivalence data of developed formulation (batch # T-49) against comparator brand Phlogin DR 50mg Capsule (Batch # 09519) of M/s Brookes pharma. Reference of WHO technical report series No. 902, 2002 has been given to justify the selection of market brand leader if innovator is not available.
5.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided.	The firm has provided details of applicant and comparator product.
6.	Justification is required for performing assay testing by UV method instead of HPLC method.	Dicmark 50mg DR Capsule is a non-compendial product. We have performed method validation on UV spectrophotometer, hence we performed assay testing by UV method.
7.	Justification is required for setting dissolution limit in phosphate buffer stage as NLT 70% in 45 min which is different from that mentioned in Stability study protocol i.e., NLT 80% in 45 min.	The firm has submitted that 70% in 45min is a typographic mistake. Actual limit is NLT 80% in 45 min in phosphate buffer in Dissolution test as written in stability protocol.
8.	Analytical method verification of drug product includes performance of test of Detection limit and Quantitation limit by HPLC method. Clarification is required.	The firm has submitted revised reports of performance of test of Detection limit and Quantitation limit by UV method.
9.	Documents for the procurement of the API including purchase invoice from M/s M/s Vision Pharmaceuticals (Pvt.) Ltd.	The firm has submitted copy of invoice for the purchase of Diclofenac sodium EC pellets 24 % (Batch # DE706, 1Kg) dated 11-03-2020.
10.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted that testing of Dicmark 50mg DR capsule has been performed on UV spectrophotometer.

11.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) has been submitted.

Deferred for submission of following:

Sr. No.	Decision of 316th meeting of RB	Response by the firm
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method validation reports of drug substance by performing precision, linearity, accuracy and specificity parameters.
2.	Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.	Dicmark 50mg DR Capsule is a non-pharmacopoeial product. The UV method for assay testing was adopted because BP adopts UV method for Diclofenac sodium prolonged release capsule and moreover manufacturer of API (i.e. Vision Pharma) also uses UV method for assay testing.
3.	Performance of pharmaceutical equivalence and CDP studies with innovator/reference product.	The firm has submitted pharmaceutical equivalence data of developed formulation (batch # T-49) against comparator brand Phlogin DR 50mg Capsule (Batch # 09519) of M/s Brookes pharma. Reference of WHO technical report series No. 902, 2002 has been given to justify the selection of market brand leader if innovator is not available.
4.	Analytical method verification reports of drug product performed by drug product manufacturer.	Analytical method validation reports of drug product have been provided by performing precision, linearity, accuracy and specificity parameters.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Sr. No.	**Observations**	**Response by the firm**
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by both Drug substance & Drug Product.	The firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.
2.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification parameter of drug substance performed by drug product manufacturer. However, the specificity results were not presented. The relevant chromatograms of tested parameter were not provided.
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	The firm has provided results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during stability studies, along with certificate of analysis (CoA) of the same batch.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests of the developed formulation and the innovator product shall be submitted and discussed.	The firm has performed pharmaceutical equivalence studies with comparator product. The details are below:
5.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided.	Applicant batch no.: Lorak 5 mg /5ml Oral solution = T-31 Comparator batch no.: Lorel 5mg /5ml oral solution of M/s StandPharma = 004G
6.	Submit date of analysis of pharmaceutical equivalence and comparative dissolution profile alongwith chromatograms / spectra.	The firm has stated date of analysis 12-02-2020, however relevant chromatograms / spectra were not provided.

7.	Control of excipients is missing.	The firm has submitted that excipients used in the formulation are of pharmacopoeial grade and we are using BP specifications.
8.	Justification of method of specificity test in analytical method verification studies shall be submitted. Clarification is required.	The firm has not submitted results for specificity test.
9.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug product shall be submitted.	The firm has not submitted analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) for drug product.
10.	The submitted chromatograms in stability studies (3.2.P.8) do not differentiate between real time or accelerated stability studies time points of different batches.	The firm has not submitted chromatograms of all time points of real time and accelerated stability studies.
11.	Submit copies of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of BMRs for three batches.
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated.

Deferred for submission of following:

Sr. No.	**Decision of 316th meeting of RB**	**Response by the firm**
4.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification reports of drug substance by performing precision, linearity, accuracy, specificity and system suitability studies.
5.	HPLC chromatograms of all time points of real time and accelerated stability studies.	The firm has submitted HPLC chromatograms of real time and accelerated stability studies for 0, 3 and 6-month time point.
6.	Analytical method verification reports of drug product performed by drug product manufacturer.	The firm has submitted analytical method verification reports of drug substance by performing precision, linearity, accuracy, specificity and system suitability studies.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Manufacturing Date	08-2020	08-2020	08-2020
Date of Initiation	26-08-2020	26-08-2020	26-08-2020
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate (Certificate # 20190888) for M/s Shouguang Fukang Pharmaceutical Co. Ltd. issued by China Food and Drug Administration valid till 12-03-2024.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD (I&E) dated 26-12-2019 wherein the permission to import different APIs Trimethoprim & Sulfamethoxazole for the purpose of test/analysis and stability studies is granted. Invoice for the purchase of materials is not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith raw data sheets, COA, summary data sheets. Relevant UV scans were not provided.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The testing of applied product is performed on UV spectrophotometer and audit trail reports not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

The firm has claimed BP specifications however, the product is also present in USP monograph.

Sr. No.	Observations	Response by the firm
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by both Drug substance & Drug Product.	The firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.
2.	Submit evidence of equipments required for potentiometric titration and electrometric titration required for analysis of trimethoprim and sulfamethoxazole, respectively.	The firm has not provided evidence of availability of potentiometer.
3.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification parameter of drug substance performed by drug product manufacturer. However, the specificity results were not presented. The relevant chromatograms of tested parameters were not provided.
4.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from drug substance manufacturer.	The firm has provided results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during stability studies, along with certificate of analysis (CoA) of the same batch.
5.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided.	Applicant batch no.: Hitran Paediatric suspension = T-88 Comparator batch no.: Septran paediatric Suspension = KR5B
6.	Discussion of microbiological attributes of the Drug Product (e.g. preservative effectiveness studies to be performed as per recommendations of pharmacopoeia) shall be provided.	The firm has not submitted preservative effectiveness studies as recommended by Pharmacopoeia.
7.	Control of excipients is missing.	The firm has submitted that excipients used in the formulation are of pharmacopoeial grade and we are using BP specifications and analytical methods for all tests except Flavor Banana & Flavor Vanilla for which analytical procedures are attached.
8.	Justification of method of specificity test in analytical method verification studies shall be submitted. Clarification is required.	The firm has not submitted results for specificity test.

9.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug product shall be submitted.	The firm has not submitted analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) for drug product.
10.	Provide raw data sheets wherein details of sample solution preparation and standard solution and calculation formula for the assay test shall be mentioned	The firm has submitted raw data sheets for the assay test.
11.	Submitted DHL invoice is for M/s Scilife Pharma (Pvt.) Ltd. Clarification is required.	The firm has submitted that M/s Scilife Pharma (pvt.) Ltd was written mistakenly by DHL. The materials were directly delivered to our plant.
12.	Supportive documents like chromatograms / spectra are not submitted. Clarification is required.	The testing of Hitran Pediatric Suspension has been performed on UV-Spectrophotometer. However, relevant UV scans have not been submitted.
13.	Submit copies of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of BMRs for three batches.
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated.

Deferred for submission of following:

Sr. No.	**Decision of 316th meeting of RB**	**Response by the firm**
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification reports for both sulphamethoxazole and trimethoprim by performing precision, linearity, accuracy, specificity.
2.	Preservative effectiveness studies performed as per recommendations of pharmacopoeia.	The firm has submitted performance of microbiological attributes of the drug product.
3.	Evidence of availability potentiometer including purchase invoice and IQ, OQ, PQ of the equipment.	Copy of invoice for the purchase of potentiometric titrator (Model # HI901) is attached. The firm has submitted installation qualification and operational qualification of potentiometer.
4.	Analytical method verification reports of drug product performed by drug product manufacturer.	The firm has submitted analytical method verification reports of drug product by performing precision, linearity, accuracy, specificity.
5.	Relevant UV spectra for assay testing as recommended by the BP monograph of applied formulation.	Our UV-spectrophotometer (Insmark 300/2) was not software base due to which prints cannot be taken. Now we have purchased new software of UV-spectrophotometer with print option. Now the firm has submitted UV spectra of dissolution testing of stability batches.
6.	Evidence of procurement of drug substance with approval from DRAP.	The firm has submitted copy of invoice specifying import of Sulphamethoxazole (2.0Kg) and Trimethoprim (0.5 Kg) attested by Assistant Director (I & E) dated 03-08-2020.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Batch Size	100 Sachet	100 Sachet	100 Sachet
Manufacturing Date	10-2020	10-2020	10-2020
Date of Initiation	22-10-2020	22-10-2020	22-10-2020
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. 1/151-2 Drug-1-2019/7839 issued by Food and Drug Administration Haryana Panchkula (India) valid till 22-10-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No. 17133/2019/DRAP-AD-CD(I&E) dated 26-12-2019 is submitted wherein the permission to import different API Strontium Ranelate for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Sr. No.	Observations	Response by the firm
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by both Drug substance & Drug Product.	The firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.
2.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification parameter of drug substance performed by drug product manufacturer. However, the specificity results were not presented. The relevant chromatograms of tested parameter were not provided.

3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	The firm has submitted analytical method verification parameter of drug substance performed by drug product manufacturer. However, the specificity results were not presented. The relevant chromatograms of tested parameters were not provided.
4.	The reference formulation states granules for oral suspension for applied formulation. Clarification is required in manufacturing process and process control whether granules will be prepared in-house or otherwise.	Granules are prepared in-house by sieving the materials from appropriate mesh.
5.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests of the developed formulation and the innovator product shall be submitted and discussed.	The firm has submitted pharmaceutical equivalence with comparator product Osstium Sachet of M/s Atco Labs.
6.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided.	Applicant batch no.: Oestolos 2g Sachet = T-100 Comparator batch no.: Osstium Sachet = UJ006FM1
7.	Control of excipients is missing.	The firm has submitted that excipients used in the formulation are of pharmacopoeial grade and we are using BP specifications
8.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug product shall be submitted.	The firm has not submitted analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) for drug product.
9.	Provide raw data sheets wherein details of sample solution preparation and standard solution and calculation formula for the assay test shall be mentioned	The firm has submitted raw data sheets for the assay test.
10.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	The firm has not submitted invoice for the procurement of drug substance.
11.	Justification is required for submission of single chromatogram as test result of each batch at different time intervals.	The firm has not submitted chromatograms for real time and accelerated stability studies at different time intervals. Instead, single chromatogram for each test interval is submitted.

Deferred for submission of following:

Sr. No.	**Decision of 316th meeting of RB**	**Response by the firm**
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification reports of strontium ranelate by performing precision, linearity, accuracy, specificity and system suitability studies.
2.	HPLC chromatograms of all time points of real time and accelerated stability studies.	The firm has submitted HPLC chromatograms of real time and accelerated stability studies for 0, 3 and 6-month time point.
3.	Analytical method verification reports of drug product performed by drug product manufacturer.	Analytical method verification reports of strontium ranelate by performing precision, linearity, accuracy, and specificity have been submitted.
4.	Evidence of procurement of drug substance with approval from DRAP.	The firm has submitted copy of letter No. 17133/2019/DRAP-AD-CD(I&E) dated 26-12-2019 is submitted wherein the permission to

		import different API Strontium Ranelate for the purpose of test/analysis and stability studies is granted. The firm submitted that material was directly received at the plant. Import invoice is attached specifying import of Strontium ranelate 0.70 Kg (batch # STRHB200003).
Decision: Deferred for submission of documents confirming import of API i.e, Goods declaration/ Airway bill/Courier receipt etc.		
477.	Name, address of Applicant / Marketing Authorization Holder	M/s Himark Laboratories Private Limited, Plot 37-A, Sunder Industrial Estate Lahore.
	Name, address of Manufacturing site.	M/s Himark Laboratories Private Limited, Plot 37-A, Sunder Industrial Estate Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	GMP status of the Finished product manufacturer	New license granted on 26-09-2019. Tablet (General & General Antibiotic) section approved.
	Dy. No. and date of submission	Dy. No. 24085 Dated: 01-09-2021
	Details of fee submitted	PKR 30,000/-: Dated 21/06/2021
	The proposed proprietary name / brand name	Trox 10 mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Cetirizine Dihydrochloride…….. 10 mg
	Pharmaceutical form of applied drug	White to off white round shaped without any score film coated tablet
	Pharmacotherapeutic Group of (API)	Anti-histamine
	Reference to Finished product specifications	BP specifications
	Proposed Pack size	1 × 10’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zirtek Allergy Relief 10 mg film-coated tablets by M/s UCB Pharma, MHRA Approved.
	For generic drugs (me-too status)	Avec 10mg Tablet by M/s Platinum Pharma, (Reg # 025506)
	Name and address of API manufacturer.	M/s Supriya Life sciences Ltd., Mumbai, INDIA. A-5/2, Lote Parshuram Industrial Area, M.I.D.C Taluka – Khed, District – Ratnagiri, Maharashtra, India 415 722.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure

		system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5% RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5% RH for 6 months Batches: (SLL/CTR/0309047, SLL/CTR/0309048, SLL/CTR/0309047).
	Module-III (Drug Product):	The firm has submitted details of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against that is **Zyrtec 10 mg Tab** by GSK Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is **Zyrtec 10 mg Tab** by GSK Pharma in acidic media (pH 1.2) & phosphate buffer (pH 4.5 & 6.8). The values for f_2 are in the acceptable range.
	Analytical method validation/verification of product	Analytical method verification reports have not been submitted including linearity, accuracy, precision, specificity.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/67649/2018/11/25185 issued by Food and Drug Administration India valid till 04-10-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 wherein the permission to import different APIs Cetirizine Dihydrochloride for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Sr. No.	**Observations**	**Response by the firm**
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by both Drug substance & Drug Product.	The firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.
2.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification parameter of drug substance performed by drug product manufacturer. However, the specificity results were not presented. The relevant chromatograms of tested parameter were not provided.
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	The firm has submitted analytical method verification parameter of drug substance performed by drug product manufacturer. However, the specificity results were not presented. The relevant chromatograms of tested parameters were not provided.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests of the developed formulation and the innovator product shall be submitted and discussed.	The firm has submitted pharmaceutical equivalence with comparator product Osstium Sachet of M/s Atco Labs.
5.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided.	Applicant batch no.: Trox 10mg Tab = T-94 Comparator batch no.: Zyrtec 10mg Tab = 354 E
6.	Control of excipients is missing.	The firm has submitted that excipients used in the formulation are of pharmacopoeial grade and we are using BP specifications

7.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug product shall be submitted.	The firm has not submitted analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) for drug product.
8.	Provide raw data sheets wherein details of sample solution preparation and standard solution and calculation formula for the assay test shall be mentioned.	The firm has submitted raw data sheets for the assay test.
9.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	Not submitted.
10.	UV spectra of dissolution data are required to be provided.	Not submitted.
11.	Justification is required for submission of single chromatogram as test result for each batch at different time intervals.	The submitted chromatograms do not differentiate between real time or accelerated stability studies time points of different batches.

Deferred for submission of following:

Sr. No.	**Decision of 316th meeting of RB**	**Response by the firm**
1.	Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted analytical method verification reports of drug substance by performing precision, linearity, accuracy, specificity and system suitability studies.
2.	HPLC chromatograms of all time points of real time and accelerated stability studies.	The firm has submitted HPLC chromatograms of real time and accelerated stability studies for 0, 3 and 6-month time point.
3.	UV spectra of dissolution testing, as recommended by the BP monograph of applied formulation, at all time points of stability study data.	Our UV-spectrophotometer (Insmark 300/2) was not software base due to which prints cannot be taken. Now we have purchased new software of UV-spectrophotometer with print option. Now the firm has submitted UV spectra of dissolution testing of stability batches.
4.	Analytical method verification reports of drug product performed by drug product manufacturer.	Analytical method verification reports of drug product have been provided by performing precision, linearity, accuracy, specificity and system suitability studies.
5.	Evidence of procurement of drug substance with approval from DRAP.	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 wherein the permission to import different APIs Cetirizine Dihydrochloride for the purpose of test/analysis and stability studies is granted. The firm submitted that material was directly received at the plant. Import invoice is attached specifying import of Cetirizine dihydrochloride 0.07 Kg (batch # CTZ/083/20-21).

Decision: Deferred for submission of documents confirming import of API i.e, Goods declaration/ Airway bill/Courier receipt etc.

.

Case no. 05: Registration applications of locally manufacturing drugs (human) submitted on Form 5F format (New Section):

On the recommendations of panel of experts, the CLB in its 274th meeting held on 07th April, 2020 has considered and approved the grant of following six (06) additional sections/facilities of your firm M/s Ferozsons Laboratories Ltd, Amangarh, Nowshera, KPK

Ground Floor

1. Tablet Section (General)
2. Ointment / Cream / Gel Section (General)
3. Bottle filling area for Tablets and Capsules
4. Raw Material Store

478.	Name, address of Applicant / Marketing Authorization Holder	M/S Ferozsons Laboratories Limited, PO Ferozsons, Nowshera - Pakistan.
	Name, address of Manufacturing site.	M/S Ferozsons Laboratories Limited, PO Ferozsons, Nowshera - Pakistan.
	Status of the applicant	☑ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☑ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☑ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 10871 Dated: 29-04-2022
	Details of fee submitted	PKR 30,000/-: Dated: 07-04-2022
	The proposed proprietary name / brand name	Acylex 5% Cream
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each gram contains: Acyclovir……...50mg
	Pharmaceutical form of applied drug	Cream
	Pharmacotherapeutic Group of (API)	Antiviral for topical use (ATC code: J05AB01)
	Reference to Finished product specifications	B.P. Specifications
	Proposed Pack size	5gm and 10gm tube
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zovirex 5% cream by M/s GlaxoSmithkline Approved by USFDA
	For generic drugs (me-too status)	Zovirex 5% cream by M/s GlaxoSmithkline Pakistan Reg.No 010333
	GMP status of the Finished product manufacturer	Firm has submitted copy of GMP certificate valid till 10-08-2023. Ointment/Cream (General) section approved.
	Name and address of API manufacturer.	Name: M/s Zhejiang Zhebei Pharmaceutical Co., Ltd-China Address. No.66 Guo Shantou, Xinshi Town, Deqing County, Zhejiang., China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Official monograph of Acyclovir is present in B.P. Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (20120901M, 0120902M, 0120903M)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence.	The Firm has performed pharmaceutical equivalence of their developed formulation Acylex 5% cream (B # AVCream-001) with innovator product Zovirex 5% Cream (B # U389) of M/s GlaxoSmithkline. Quality tests of both products including description, identification, pH, viscosity, Uniformity of container, assay and related substances were performed and compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Zhebei Pharmaceutical Co., Ltd-China Address; No.66 Guo Shantou, Xinshi Town, Deqing County, Zhejiang., China
API Lot No.	A200802
Description of Pack (Container closure system)	Aluminum tube

Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	AVCream-001	AVCream-002	AVCream-003
Batch Size	600 tubes	600 tubes	600 tubes
Manufacturing Date	03-2021	03-2021	03-2021
Date of Initiation	30-03-2021	30-03-2021	30-03-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of already conducted inspection dated 26-07-2019 for registration application of Hexigard Gel 4% approved in 291st meeting of RB.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of DML of M/s Zhejiang Zhebei Pharmaceutical Co., Ltd.-China issued by Zhejiang province FDA valid till 06-01-2026.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice No.20200824001 specifying import of Acyclovir (1200Kg) dated 28-08-2020 duly attested by Assistant Director DRAP (I&E), Peshawar dated 23-09-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail on testing reports of product submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Clarify why you have tested a USP grade drug substance by applying BP monograph.	The firm has submitted declaration from drug substance manufacturer showing that our Acyclovir (Batch NO.: A200802) meets the requirement of both USP and BP.
2.	You have mentioned test of particle size which is not included in BP monograph.	We have performed particle size test as per our internal specifications to control the API.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 06: Registration applications of locally manufacturing drugs (human) submitted on Form 5 F format

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Onsite inspection report of Getz Pharma product Emclide (Empagliflozin & Linagliptin) Tablets 10mg + 5mg was discussed and approved in 316th RB Meeting held on March 15-18, 2022. The inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. The firm have number of HPLC with Empower 3 and DB software having following features: ✓ Have Audit trail ✓ Have backup system ✓ Have Data traceability ✓ Have Data achieving system ✓ Have data integrity ✓ Have Data security ✓ System Security Policy • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are in compliance.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate (No. 21102987) for M/s Cadila Pharmaceuticals ltd, India issued by Food and Drug control administration, Gujarat State, India. It is valid till 20-10-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD (I&E) DRAP, Karachi, has been submitted.

Batch No.	Invoice No.	Quantity Imported	Date of approval by DRAP
20ADL008	3202040716	50.0 Kg	31-12-2020
20ADL005	3202140013	150.0 Kg	02-02-2021

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with batch manufacturing record, analytical record and attested documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm

<table>
<tr><td>1.</td><td>Analytical method verification studies of drug substance including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer in both module 2 and module 3 shall be submitted.</td><td>The firm has submitted analytical method verification studies from drug product manufacturer by performing system suitability studies, linearity, specificity and precision. We have used 100% API without any placebo in analytical method verification studies, therefore requirement for accuracy is not applicable. No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any).	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Isoconazole nitrate:** The firm has submitted copy of GMP certificate of M/s Gufic Biosciences Ltd, India issued by Food and Drug Administration, Gujarat State, India valid till 06-08-2022. **Diflucortolone valerate:** The firm has submitted copy of GMP certificate of M/s Farmabios S.p.A, Italy issued by AIFA, Italy valid till 19-09-2022.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Isoconazole nitrate:** The firm has submitted copy of invoice specifying import of 0.25Kgs of isoconazole nitrate cleared by Assistant Director (I & E), Lahore dated 12-02-2021. **Diflucortolone valerate:** The firm has submitted copy of invoice specifying import of 20gm of Diflucortolone valerate cleared by Assistant Director (I & E), Lahore dated 18-02-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:

Sr. No.	Observations	Response by the applicant
1.	Submit valid copy of GMP certificate of the drug substance manufacturer (Isoconazole nitrate) issued by relevant regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s Gufic Biosciences Ltd, India issued by Food and Drug Administration, Gujarat State, India valid till 06-08-2022.
2.	The reference literature shows that inactive ingredients for Travocort 0.1 + 1% w/w Cream include Paraffin, white soft Paraffin, liquid Cetostearyl alcohol, Polysorbate 60, Sorbitan stearate, Disodium edetate dihydrate Water, purified. Justify why you have added span 80 (as non-ionic surfactant), propylene glycol (as humectant) and chlorocresol (as preservative) and not adding sorbitan stearate.	All the inactive ingredients used in the drug product are not novel and routinely used in development of topical drug products. Moreover, compatibility studies were performed and submitted. Spans (Sorbitan stearate & Sorbitan Oleate) are functionally non-ionic surfactants having similar HLB values (4.3 & 4.7 respectively). Due to availability of span 80, it was used instead of span 60. Propylene glycol facilitates in application of drug product by improving moistness and preventing dryness when applied. Chlorocresol was added to help control bio-burden in drug product during shelf life which are inherently added during processing of non-sterile drug product.
3.	Justify why pharmaceutical equivalence study was not performed against innovator product.	Pharmaceutical equivalence study has been performed and submitted against innovator product i.e., Travocort Cream by Bayer.
4.	Performance tests of viscosity and homogeneity were not included in specifications required for evaluation of topical formulation.	Viscosity and homogeneity are not considered performance test for topical dosage form. Moreover, viscosity is formulation dependent parameter and can vary from manufacturer to manufacturer based on availability of difference measuring techniques and instruments and there is no specific limit defined for it in pharmacopoeia. Hence it was not included in the specification. Homogeneity was done through visual inspection as part of physical description of the drug product.
5.	Submit stability study results of initial time point alongwith raw data sheets, COA and summary sheets.	The firm has submitted stability study results of initial time point alongwith raw data sheets, COA.

6.	Submit stability study data of 6-month time point alongwith chromatograms, raw data sheets, COA and summary sheets.	The firm has submitted stability study data of 6-month time point alongwith chromatograms, raw data sheets, COA and summary sheets.
7.	Clarify the submitted chromatograms dated 05-04-2021 pertains to which study.	The chromatograms dated 05-04-2021 are pertaining to initial testing of stability batch trial (T-003 & T-004) respectively.

Decision: Approved with innovator's specifications.

- **Registration Board further decided that registration letter will be issued upon submission of "Preservative effectiveness studies" at the next time point of long-term stability studies. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall be submit fee of 7500/- fee revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

	Stability studies	Stability study conditions: Real time: 30°C±2°C/65% ± 5%RH for 24 months Batches: (EPC-22-WB-001, EPC-22-WB-002, EPC-22-WB-003) Accelerated: 40°C±2°C/75%± 5%RH for 6 months Batches: (EPC-001P, EPC-002P, EPC-003P)
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product **Nexium 10 mg** (Batch # RDWT) by AstraZeneca UK Limited by performing quality tests of description, pH, Assay and Microbial limits.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s. Surge Laboratories Pvt. Ltd. 10th KM Faisalabad Road Bikhi, District Sheikhupura.
API Lot No.	EPC-22-WB-119
Description of Pack (Container closure system)	28's Alu Triplex Sachet

Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	E001DS01	E001DS02	E001DS03
Batch Size	1.5Kg	1.5Kg	1.5Kg
Manufacturing Date	12-2019	12-2019	12-2019
Date of Initiation	11-12-2019	11-12-2019	11-12-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any).	Panel Inspection Reports for Tablets Section & Gel Sections was approved in DRB 297th meeting and we got Registration of Solbovir Tablets (Sofosbuvir 400mg) Reg. No.108620, Navosept Gel (Chlorhexidine Gel) Reg. No.107734 while our Capsule Section was approved in 316th Meeting and we got registration of Dexloprot 30mg & 60mg Capsules (Dexlansoprazole) Reg. No. 112582 & 112583).
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 170/2019-DRAP (AD-823175-158) issued by Add. Director DRAP, Lahore dated 04-07-2019 valid till 03-07-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice no 19090324-SG dated 26- Sept-2019 – Locally purchased from M/s. Surge, Sheikhupura.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail reports on product testing were not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) submitted.

Remarks of Evaluator:

Sr. No.	Observations	Response by the applicant
1.	Submit copy of latest inspection report or GMP certificate of finished drug product manufacturer.	The firm has submitted copy of GMP certificate based on inspection conducted on 19-09-2020.
2.	Justify the quantity of ready-to-fill pellets used in master formulation keeping in view label claim and potency of pellets	It is stated that each 4.444mg of Esomeprazole magnesium pellets 22.5% contains 1mg of Esomeprazole magnesium. Each 10mg Sachet contains 45.866mg (round off 46.00) of Esomeprazole magnesium pellets (22.5% w/w), calculated as below: 10/22.5 × 100 × 1.032 = 45.866mg
3.	As per WHO recommendations when delayed release products (e.g. Enteric coated) are being compared, the recommended conditions are acid medium (pH 1.2 for 2 hours) and buffer pH 6.8	As per the WHO recommendations to conduct dissolution of delayed release products (e.g. enteric coated) in acid media (pH 1.2 for 2 hours) and buffer pH6.8 medium. We have conducted additional studies in pH 4.5 acetate buffer for

	medium. Justify your CDP studies in three media.	assurance of our product dissolution profile similarity with innovator product in all three media covering the physiological range i.e pH 1.2 Hydrochloric acid, pH 4.5 buffer and pH 6.8 buffer.
4.	Specify the batch size in terms of number of packs prepared instead of providing quantity used to prepare stability batches.	The firm has stated that batch size in terms of packs is 17 packs of 28's. While batch size in terms of bulk weight is 1.50 Kg and in unit quantity 500 sachets.
5.	Reference of previous approval of applications with stability data of the firm (if any).	Panel Inspection Reports for Tablets Section & Gel Sections was approved in DRB 297th meeting and we got Registration of Solbovir Tablets (Sofosbuvir 400mg) Reg. No.108620, Navosept Gel (Chlorhexidine Gel) Reg. No.107734 while our Capsule Section was approved in 316th Meeting and we got registration of Dexloprot 30mg & 60mg Capsules (Dexlansoprazole) Reg. No. 112582 & 112583).
6.	Submit compliance record of HPLC software 21 CFR & audit trail reports on product testing.	Compliance record of HPLC software 21CFR and audit trail reports on product testing.
7.	Submit record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Data of logger record for temperature and humidity monitoring of stability chambers (real time and accelerated) has been submitted.
8.	Submit purchase invoice specifying purchase of Esomeprazole delayed release pellets for stability batches.	The firm has submitted purchase invoice of Esomeprazole pellets 22.5% (batch No: EPC-22-WB-119) from M/s Surge laboratories (Pvt) Ltd, Lahore.
9.		

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

483.	Name, address of Applicant / Marketing Authorization Holder	M/s Scotmann Pharmaceuticals, 5-D, I-10/3, Industrial Area, Islamabad, Pakistan

Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to onsite inspection report of their product DASCOT 30mg & 60mg Tablet which was conducted on 26-01-2018, and was presented in 278th meeting of Registration Board. Following was reported in the report: • The HPLC software is 21CFR Compliant. • Audit trail reports were available and physically checked. The firm has data loggers for recording of temperature and humidity.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. sukls72897/2019 issued by Ministerstvo spravedlnosti CR Ministry of Justice of the Czech Republic. Issue & Valid Upto Dt: 15-07-2019 – 15-07-2022.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice specifying import of 0.15 kg of sodium hyaluronate attested by Assistant Director (I & E) dated 08-11-2020.	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail reports on product testing.	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) was submitted.	
Remarks of Evaluator:			

Sr. No.	Observations	Response by the Firm
1.	Submit valid copy of GMP certificate of the drug substance manufacturer issued by relevant regulatory authority of country of origin.	Copy of GMP certificate (No. sukls72897/2019) issued by Ministerstvo spravedlnosti CR Ministry of Justice of the Czech Republic has been submitted. Issue & Valid Upto Dt: 15-07-2019 – 15-07-2022.
2.	Confirmation of manufacturing facility / section for the applied formulation.	
3.	Copies of the drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.	The firm has submitted copies of the Drug substance specifications and analytical procedures for drug substance by drug product manufacturer.
4.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification protocol and report of the test method for determination of sodium hyaluronate by performing specificity, linearity, accuracy and precision.
5.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of batch manufacturing record of stability batches of drug product.
6.		

Decision: Deferred for following submissions:

- **Confirmation of required manufacturing facility / section from Licensing Division.**
- **Evidence of approval of applied formulation either as pharmaceutical drug product or medical device in reference regulatory authorities/agencies which were adopted by the Registration Board.**
- **Clarification of source of drug substance whether Biological or synthetic.**

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3 & 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Protole 20mg Capsule			
Batch No.	21A152	20K220	20K218
Batch Size	50,000 Packs	50,000 Packs	50,000 Packs
Manufacturing Date	01-2021	10-2020	10-2020
Date of Initiation	16-01-2021	06-11-2020	25-10-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted Copy of GMP certificate No.F.3/262019-Addl.Dir. (QA&L-I) issued on 31st July 2019, based on evaluation conducted on 10th February 2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not Applicable as API Manufacturer is Local
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail reports on product testing.
6.	Record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:

Sr. No.	Observations	Response by the applicant
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that *"Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well*	The firm has submitted method verification data for assay of Omeprazole 8.5% pellets by using HPLC with UV detector. The test method was validated for specificity, linearity, precision, accuracy range, system suitability and robustness.

	as non-compendial drug substance(s) shall be submitted".	
2.	Justify why pharmaceutical equivalence and CDP studies were not performed against innovator product (Losec 20mg Capsule).	Innovator product Losec 20mg Capsule was not commercially available in Pakistan. Therefore, pharmaceutical equivalence and CDP were preformed with locally available brand leader Risek capsule of Getz as per DRAP guidelines.
3.	As per WHO recommendations, when delayed-release products (e.g. enteric coated) are being compared, the recommended conditions are acid medium (pH 1.2) for 2 hours and buffer pH 6.8 medium. Justify your CDP studies in three media.	CDP was performed in 0.1 N HCl for 2 hours followed by buffer pH 6.8. CDP in another buffer pH 4.5 was also performed for separate set of capsules in order to get additional dissolution profile of drug product.
4.	Justify/Clarify the development of commercial scale batches before registration of applied product.	We have submitted the commercial batches data of our export registered product "Prozole 20mg Capsule" Registration # 002575-EX, registered in 2010 for our local registration of Protole 20mg capsule.
5.	Submit purchase invoice specifying purchase of omeprazole delayed release pellets for stability batches.	The firm has submitted invoices of omeprazole delayed release pellets 8.5% from M/s Vision Pharmaceuticals for following batches: OMP561 OMP564 OMP571

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer shall perform pharmaceutical equivalence and Comparative Dissolution Profile (CDP) against the innovator's product i.e. Losec 20mg Capsule before issuance of Registration Letter.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of previous approval of application "Rofl 500mg tablet" Approved in DRB 277 held on 27-29 December 2017.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s Kaifeng pharmaceutical (Group) issued by CFDA valid till 25-06-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice specifying import of 0.8 Kgs of Tofacitinib citrate (batch # HF201230) attested by Assistant Director (I & E), Karachi dated 28-09-2024.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Last GMP inspection report conducted within 3 years is required to be submitted.	The firm has submitted copy of inspection report conducted on 05-04-2022 wherein the panel recommended the grant of renewal of Drug manufacturing license of the firm as well as regularization of sections as per layout plan.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Analytical method verification studies including specificity, accuracy, and repeatability performed by drug product manufacturer for drug substance Tofacitinib citrate has been submitted.
3.	Submit stability study data of 6-month time point alongwith chromatograms, raw data sheets, COA and summary sheets.	The firm has submitted stability study data of 06-month time point alongwith chromatograms, raw data sheets, COA and summary sheets.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Date of Initiation	19-03-2021	19-03-2021	19-03-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of previous approval of application "Rofl 500mg tablet" Approved in DRB 277 held on 27-29 December 2017.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s Qilu Antibiotics (Linyi) Pharmaceutical Co. Ltd, China issued by CFDA valid till 25-06-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice specifying import of 0.75 Kg of Exemestane (batch # 0020P71A) attested by Assistant Director (I & E), Karachi dated 22-01-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Last GMP inspection report conducted within 3 years is required to be submitted.	The firm has submitted copy of inspection report conducted on 05-04-2022 wherein the panel recommended the grant of renewal of Drug manufacturing license of the firm as well as regularization of sections as per layout plan.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Analytical method verification studies including specificity, accuracy, and repeatability performed by drug product manufacturer for the assay method of drug substance Exemestane has been submitted.
3.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug	Copies of Batch manufacturing record of all the batch drug product have been provided.

	product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
4.	Justify performance of comparative dissolution study in three media in the presence of sodium lauryl sulphate	As per NDA 20-753 Assessment report (Clinical pharmacology and Biopharmaceutics review) of Aromasin 25mg Tablet, Exemestane is poorly soluble in all aqueous media simulating gastrointestinal fluids such that sink conditions cannot be reached even at ___ minutes (Hidden in innovator's assessment report) from the 25mg Tablet in water, simulated gastric fluid pH 1.2 and phosphate buffer 6.8. The sponsor then investigated the possibility of enhancing the solubility of Exemestane in aqueous media by addition of sodium lauryl sulphate. *However, the referred literature is for selection of dissolution method and specification.*
5.	The submitted copy of GMP certificate of API manufacturer is from Qilu Antibiotics (Linyi) Pharmaceutical Co. Ltd, China while COA is from M/s Shandong Anhong Pharmaceutical Co., Ltd. China.	Shandong Qilu Pharmaceutical Group has changed their name from Qilu Antibiotics Pharmaceutical Co., Ltd to Shandong Anhong pharmaceutical Co., Ltd effective from February 1, 2020. According to previous CFDA regulation, the original GMP certificates are still in valid and there is no need to be revised. Change approval / change notification with original GMP certificate have been attached.
6.	Submit stability study data of 6-smonth time point alongwith chromatograms, raw data sheets, COA and summary sheets.	The firm has submitted stability study data of 06-month time point alongwith chromatograms, raw data sheets, COA and summary sheets.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Batch Size	10,000 Tablets	10,000 Tablets	10,000 Tablets
Manufacturing Date	04-2020	04-2020	04-2020
Date of Initiation	04-2020	05-2020	06-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted registration letter of Glucovance Tablet 1000mg/5mg.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**M/s Prudence Pharmachem:** The firm has submitted copy of retention of license to manufacture for sale of drugs. License in Form-25, No No G/25/1656 has been retained from 08-04-2020 to 07-04-2025. **M/s Zhuhai Rundu:** Copy of GMP certificate for M/s Zhuhai Rundu Pharmaceutical Co. Ltd., China issued by China Food and Drug Administration has been submitted. It is valid till 10-04-2024. **M/s Changzhou Pharmaceutical:** GMP Certificate No JS20180848 issued by CFDA valid till 09-07-2023.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Amlodipine besylate:** The firm has submitted copy of invoice specifying import of Amlodipine besylate (Batch#AMB/082/04/19, 300Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 09-07-2019. **Valsartan:** The firm has submitted copy of invoice specifying import of Valsartan (Batch#67819100605, 150Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 26-02-2020. **Hydrochlorothiazide:** The firm has submitted copy of invoice specifying import of Hydrochlorothiazide (EH180407, 15Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 02-04-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith chromatograms, Raw data sheets and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted audit trail record for dissolution and assay testing of drug product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No	Observations communicated	Response by the firm
1.	The label claim of applied formulation does not define the equivalency of salt form of amlodipine besylate. Corrrection / clarification is required.	The firm has corrected the label claim of amlodipine besylate in applied formulation.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted method verification study of testing method of Lodopin VHCT Tablet by performing parameters like precision, linearity and accuracy.
3.	The reference literature shows that inactive ingredients for all strengths of the tablets include microcrystalline cellulose; crospovidone; colloidal anhydrous silica; magnesium stearate; hypromellose, macrogol 4000 and talc. Justify your formulation development in line with innovator product without addition of Hypromellose, macrogol 4000 and talc.	The firm replied that some of the excipients are not being used in the formulation like, Hypromellose, Macrogol 4000 & Talc. The mentioned excipients are used for coating purpose only. Therefore, we have used the ready-made film coating materials to make the film process simpler, easier to automate and enhances the elegance and glossy appearance of the coated tablets.
4.	Clarify the use of nomenclature process performance qualification protocol instead of adopting process validation protocol.	The firm has submitted process validation protocol of Lodopin VHCT Tablets.
5.	Justify why accuracy parameter was not studied in analytical method validation study for assay testing of drug product. Moreover, results of analytical method validation studies are required to be tabulated properly for Module 3.	The firm has submitted analytical method validation studies of testing method of Lodopin VHCT Tablet by performing linearity, accuracy precision.
6.	In this section, only summary of batch analysis release results of two batches has been submitted. Provide complete analysis details of two batches for which stability study has been conducted.	Complete analysis details of three batches has been submitted.

7.	The results of batch analysis and stability data reflect that test of uniformity of dosage unit has not been performed.	The firm has submitted performance of content uniformity test by individual assay of 10 tablets of Lodopin VHCT tablets for each amlodipine as besylate, valsartan and hydrochlorothiazide by HPLC.
8.	Justify the manufacturing of stability batches on 05-2019 since amlodipine besylate and Valsartan are cleared on 07-2019 and 02-2020, respectively as per the documents for import of drug substances submitted.	Valsartan: The firm has submitted that M/s. Martin Dow Marker Limited & M/s. Martin Dow limited perform function under the umbrella of Martin Dow group (same management). *So, when we were developing formulation of Lodopin VHCT in May 2019 at Martin Dow Marker limited, 7-Jail road Quetta, we procured Valsartan from M/s Martin Dow Limited, Karachi only for development purpose (ADC invoice) attached for reference.* Here, we undertake that in future for commercialization of above product we will procure Valsartan from same source. The firm has submitted copy of invoice for the purchase of Valsartan (90Kg) attested by AD (I&E), Karachi dated 19-07-2016. Amlodipine: *We, M/s Martin Dow Marker limited apologize for mistakenly putting the wrong invoice in the dossier, the correct invoice is attached to this file.* The firm has submitted copy of invoice for the purchase of Amlodipine besylate (100Kg) attested by AD (I&E), Quetta dated 26-03-2019.
9.	Provide copy of Batch Manufacturing Record (BMR) for the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of BMR of the stability batches for the drug product. *However, manufacturing date on BMR was 04-2020 while initially submitted stability data showed manufacturing date of 05-2019.* The firm again submitted that there is some typo error in BMR, so we will provide revised BMR accordingly.
10.	Submit updated copy of GMP certificate of drug substance manufacturer of Valsartan.	The firm has submitted copy of GMP certificate for M/s Zhuhai Rundu Pharmaceutical Co. Ltd., China issued by China Food and Drug Administration. It is valid till 10-04-2024.
11.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of 7500/- fee for revision of label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2×7's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Lodopin-VHCT 10mg+160mg+12.5mg Tablet			
Batch No.	NPD-T-657-P	NPD-T-631-L	NPD-T-656-P
Batch Size	10,000 Tablets	10,000 Tablets	10,000 Tablets
Manufacturing Date	04-2020	04-2020	04-2020

Date of Initiation	04-2020	05-2020	04-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted registration letter of Glucovance Tablet 1000mg/5mg.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**M/s Prudence Pharmachem:** The firm has submitted copy of retention of license to manufacture for sale of drugs. License in Form-25, No No G/25/1656 has been retained from 08-04-2020 to 07-04-2025. **M/s Zhuhai Rundu:** Copy of GMP certificate for M/s Zhuhai Rundu Pharmaceutical Co. Ltd., China issued by China Food and Drug Administration has been submitted. It is valid till 10-04-2024. **M/s Changzhou Pharmaceutical:** GMP Certificate No JS20180848 issued by CFDA valid till 09-07-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Amlodipine besylate:** The firm has submitted copy of invoice specifying import of Amlodipine besylate (Batch#AMB/082/04/19, 300Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 09-07-2019. **Valsartan:** The firm has submitted copy of invoice specifying import of Valsartan (Batch#67819100605, 150Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 26-02-2020. **Hydrochlorothiazide:** The firm has submitted copy of invoice specifying import of Hydrochlorothiazide (EH180407, 15Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 02-04-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith chromatograms, Raw data sheets and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted audit trail record for dissolution and assay testing of drug product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No	Observations communicated	Response by the firm
1.	The label claim of applied formulation does not define the equivalency of salt form of amlodipine besylate. Corrrection / clarification is required.	The firm has corrected the label claim of amlodipine besylate in applied formulation.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted method verification study of testing method of Lodopin VHCT Tablet by performing parameters like precision, linearity and accuracy.
3.	The reference literature shows that inactive ingredients for all strengths of the tablets include microcrystalline cellulose; crospovidone; colloidal anhydrous silica; magnesium stearate; hypromellose, macrogol 4000 and talc. Justify your formulation development in line with innovator product	The firm replied that some of the excipients are not being used in the formulation like, Hypromellose, Macrogol 4000 & Talc. The mentioned excipients are used for coating purpose only. Therefore, we have used the ready-made film coating materials to make the film process simpler, easier to automate

	without addition of Hypromellose, macrogol 4000 and talc.	and enhances the elegance and glossy appearance of the coated tablets.
4.	Clarify the use of nomenclature process performance qualification protocol instead of adopting process validation protocol.	The firm has submitted process validation protocol of Lodopin VHCT Tablets.
5.	Justify why accuracy parameter was not studied in analytical method validation study for assay testing of drug product. Moreover, results of analytical method validation studies are required to be tabulated properly for Module 3.	The firm has submitted analytical method validation studies of testing method of Lodopin VHCT Tablet by performing linearity, accuracy precision.
6.	In this section, only summary of batch analysis release results of two batches has been submitted. Provide complete analysis details of two batches for which stability study has been conducted.	Complete analysis details of three batches has been submitted.
7.	The results of batch analysis and stability data reflect that test of uniformity of dosage unit has not been performed.	The firm has submitted performance of content uniformity test by individual assay of 10 tablets of Lodopin VHCT tablets for each amlodipine as besylate, valsartan and hydrochlorothiazide by HPLC.
8.	Justify the manufacturing of stability batches on 05-2019 since amlodipine besylate and Valsartan are cleared on 07-2019 and 02-2020, respectively as per the documents for import of drug substances submitted.	<u>Valsartan:</u> The firm has submitted that M/s. Martin Dow Marker Limited & M/s. Martin Dow limited perform function under the umbrella of Martin Dow group (same management). *So, when we were developing formulation of Lodopin VHCT in May 2019 at Martin Dow Marker limited, 7-Jail road Quetta, we procured Valsartan from M/s Martin Dow Limited, Karachi only for development purpose (ADC invoice) attached for reference.* Here, we undertake that in future for commercialization of above product we will procure Valsartan from same source. The firm has submitted copy of invoice for the purchase of Valsartan (90Kg) attested by AD (I&E), Karachi dated 19-07-2016. <u>Amlodipine:</u> *We, M/s Martin Dow Marker limited apologize for mistakenly putting the wrong invoice in the dossier, the correct invoice is attached to this file.* The firm has submitted copy of invoice for the purchase of Amlodipine besylate (100Kg) attested by AD (I&E), Quetta dated 26-03-2019.
9.	Provide copy of Batch Manufacturing Record (BMR) for the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of BMR of the stability batches for the drug product. *However, manufacturing date on BMR was 04-2020 while initially submitted stability data showed manufacturing date of 05-2019.* The firm again submitted that there is some typo error in BMR, so we will provide revised BMR accordingly.
10.	Submit updated copy of GMP certificate of drug substance manufacturer of Valsartan.	The firm has submitted copy of GMP certificate for M/s Zhuhai Rundu Pharmaceutical Co. Ltd., China issued by China Food and Drug Administration. It is valid till 10-04-2024.
11.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers.

Decision: Approved.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Registration Board further decided that registration letter will be issued after submission of 7500/- fee for revision of label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

		(EH180407, 15Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 02-04-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith chromatograms, Raw data sheets and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted audit trail record for dissolution and assay testing of drug product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No	Observations communicated	Response by the firm
1.	The label claim of applied formulation does not define the equivalency of salt form of amlodipine besylate. Corrrection / clarification is required.	The firm has corrected the label claim of amlodipine besylate in applied formulation.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted method verification study of testing method of Lodopin VHCT Tablet by performing parameters like precision, linearity and accuracy.
3.	The reference literature shows that inactive ingredients for all strengths of the tablets include microcrystalline cellulose; crospovidone; colloidal anhydrous silica; magnesium stearate; hypromellose, macrogol 4000 and talc. Justify your formulation development in line with innovator product without addition of Hypromellose, macrogol 4000 and talc.	The firm replied that some of the excipients are not being used in the formulation like, Hypromellose, Macrogol 4000 & Talc. The mentioned excipients are used for coating purpose only. Therefore, we have used the ready-made film coating materials to make the film process simpler, easier to automate and enhances the elegance and glossy appearance of the coated tablets.
4.	Clarify the use of nomenclature process performance qualification protocol instead of adopting process validation protocol.	The firm has submitted process validation protocol of Lodopin VHCT Tablets.
5.	Justify why accuracy parameter was not studied in analytical method validation study for assay testing of drug product. Moreover, results of analytical method validation studies are required to be tabulated properly for Module 3.	The firm has submitted analytical method validation studies of testing method of Lodopin VHCT Tablet by performing linearity, accuracy precision.
6.	In this section, only summary of batch analysis release results of two batches has been submitted. Provide complete analysis details of two batches for which stability study has been conducted.	Complete analysis details of three batches has been submitted.
7.	The results of batch analysis and stability data reflect that test of uniformity of dosage unit has not been performed.	The firm has submitted performance of content uniformity test by individual assay of 10 tablets of Lodopin VHCT tablets for each amlodipine as besylate, valsartan and hydrochlorothiazide by HPLC.
8.	Justify the manufacturing of stability batches on 05-2019 since amlodipine besylate and Valsartan are cleared on 07-2019 and 02-2020,	Valsartan: The firm has submitted that M/s. Martin Dow Marker Limited & M/s. Martin Dow limited perform function under the umbrella of Martin Dow group

	respectively as per the documents for import of drug substances submitted.	(same management). *So, when we were developing formulation of Lodopin VHCT in May 2019 at Martin Dow Marker limited, 7-Jail road Quetta, we procured Valsartan from M/s Martin Dow Limited, Karachi only for development purpose (ADC invoice) attached for reference.* Here, we undertake that in future for commercialization of above product we will procure Valsartan from same source. The firm has submitted copy of invoice for the purchase of Valsartan (90Kg) attested by AD (I&E), Karachi dated 19-07-2016. <u>Amlodipine:</u> *We, M/s Martin Dow Marker limited apologize for mistakenly putting the wrong invoice in the dossier, the correct invoice is attached to this file.* The firm has submitted copy of invoice for the purchase of Amlodipine besylate (100Kg) attested by AD (I&E), Quetta dated 26-03-2019.
9.	Provide copy of Batch Manufacturing Record (BMR) for the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of BMR of the stability batches for the drug product. *However, manufacturing date on BMR was 04-2020 while initially submitted stability data showed manufacturing date of 05-2019.* The firm again submitted that there is some typo error in BMR, so we will provide revised BMR accordingly.
10.	Submit updated copy of GMP certificate of drug substance manufacturer of Valsartan.	The firm has submitted copy of GMP certificate for M/s Zhuhai Rundu Pharmaceutical Co. Ltd., China issued by China Food and Drug Administration. It is valid till 10-04-2024.
11.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of 7500/- fee for revision of label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

	For generic drugs (me-too status)	Exforge HCT 5/160/25 mg tablet by M/s Novartis (Pakistan) Limited, DRAP Approved.
	GMP status of the Finished product manufacturer	Certificate No:015/2021-DRAP (Q)/K issued on 10th September 2021 Tablet (General & Psychotropic), Capsule (General), Oral Liquid Syrup (General), Sterile Liquid Injection/Ampoule, Ointment/Cream, Dry Powder Sachet (General), Dry Powder Suspension (General) section approved.
	Name and address of API manufacturer.	**Amlodipine:** M/s Prudence Pharma chem, Plot No. 7407, Behind lakya lab, GIDC Ind. Estate, Ankleshwar -393 002 Dist. Bharuch, Gujarat, INDIA. **Valsartan:** M/s Zhuhai Rundu Pharmaceutical Co., Ltd. No. 6, North Airport Road, Sanazao Town, Jinwan District, Zhuhai City, Guangdong province, 519041, P.R. of China. **Hydrochlorothiazide:** M/s Changzhou Pharma, No.518 Laodong East Road, Changzhou, Jiangsu Province, P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions:

		Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: **Real Time**: NPD-T-654-P, NPD-T-630-L, NPD-T-655-P **Accelerated Time:** NPD-T-654-P, NPD-T-630-L, NPD-T-655-P
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Exforge HCT 5/160/25 mg tablet by M/s Novartis Farmaceutica S.A., Barcelona Spain** by performing quality tests (Identification, Assay, Dissolution). CDP has been performed against the same brand that is **Exforge HCT 5/160/25 mg tablet by M/s Novartis Farmaceutica S.A., Barcelona Spain** in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	**Amlodipine:** M/s Prudence Pharmachem, Gujarat (India) **Valsartan:** M/s Zhuhai Rundu Pharmaceutical Co. Ltd. China **Hydrochlorothiazide:** M/s Changzhou Pharmaceutical, China		
API Lot No.	**Amlodipine:** AMB/081/07/19 & AMB/082/07/19 **Valsartan:** 67819100605 **Hydrochlorothiazide:** EH180407		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2×7's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	NPD-T-654-P	NPD-T-630-L	NPD-T-655-P
Batch Size	10,000 Tablets	10,000 Tablets	10,000 Tablets
Manufacturing Date	04-2020	04-2020	04-2020
Date of Initiation	04-2020	04-2020	04-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted registration letter of Glucovance Tablet 1000mg/5mg.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**M/s Prudence Pharmachem:** The firm has submitted copy of retention of license to manufacture for sale of drugs. License in Form-25, No No G/25/1656 has been retained from 08-04-2020 to 07-04-2025. **M/s Zhuhai Rundu:** Copy of GMP certificate for M/s Zhuhai Rundu Pharmaceutical Co. Ltd., China issued by China Food and Drug Administration has been submitted. It is valid till 10-04-2024. **M/s Changzhou Pharmaceutical:** GMP Certificate No JS20180848 issued by CFDA valid till 09-07-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Amlodipine besylate:** The firm has submitted copy of invoice specifying import of Amlodipine besylate (Batch#AMB/082/04/19, 300Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 09-07-2019. **Valsartan:** The firm has submitted copy of invoice specifying import of Valsartan (Batch#67819100605, 150Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 26-02-2020. **Hydrochlorothiazide:** The firm has submitted copy of invoice specifying import of Hydrochlorothiazide (EH180407, 15Kg) attested by Assistant Director (I &E) DRAP, Quetta dated 02-04-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith chromatograms, Raw data sheets and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted audit trail record for dissolution and assay testing of drug product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No	Observations communicated	Response by the firm
1.	The label claim of applied formulation does not define the equivalency of salt form of amlodipine besylate. Corrrection / clarification is required.	The firm has corrected the label claim of amlodipine besylate in applied formulation.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted method verification study of testing method of Lodopin VHCT Tablet by performing parameters like precision, linearity and accuracy.
3.	The reference literature shows that inactive ingredients for all strengths of the tablets include microcrystalline cellulose; crospovidone; colloidal anhydrous silica; magnesium stearate; hypromellose, macrogol 4000 and talc. Justify your formulation development in line with innovator product without addition of Hypromellose, macrogol 4000 and talc.	The firm replied that some of the excipients are not being used in the formulation like, Hypromellose, Macrogol 4000 & Talc. The mentioned excipients are used for coating purpose only. Therefore, we have used the ready-made film coating materials to make the film process simpler, easier to automate and enhances the elegance and glossy appearance of the coated tablets.
4.	Clarify the use of nomenclature process performance qualification protocol instead of adopting process validation protocol.	The firm has submitted process validation protocol of Lodopin VHCT Tablets.

5.	Justify why accuracy parameter was not studied in analytical method validation study for assay testing of drug product. Moreover, results of analytical method validation studies are required to be tabulated properly for Module 3.	The firm has submitted analytical method validation studies of testing method of Lodopin VHCT Tablet by performing linearity, accuracy precision.
6.	In this section, only summary of batch analysis release results of two batches has been submitted. Provide complete analysis details of two batches for which stability study has been conducted.	Complete analysis details of three batches has been submitted.
7.	The results of batch analysis and stability data reflect that test of uniformity of dosage unit has not been performed.	The firm has submitted performance of content uniformity test by individual assay of 10 tablets of Lodopin VHCT tablets for each amlodipine as besylate, valsartan and hydrochlorothiazide by HPLC.
8.	Justify the manufacturing of stability batches on 05-2019 since amlodipine besylate and Valsartan are cleared on 07-2019 and 02-2020, respectively as per the documents for import of drug substances submitted.	Valsartan: The firm has submitted that M/s. Martin Dow Marker Limited & M/s. Martin Dow limited perform function under the umbrella of Martin Dow group (same management). *So, when we were developing formulation of Lodopin VHCT in May 2019 at Martin Dow Marker limited, 7-Jail road Quetta, we procured Valsartan from M/s Martin Dow Limited, Karachi only for development purpose (ADC invoice) attached for reference.* Here, we undertake that in future for commercialization of above product we will procure Valsartan from same source. The firm has submitted copy of invoice for the purchase of Valsartan (90Kg) attested by AD (I&E), Karachi dated 19-07-2016. Amlodipine: *We, M/s Martin Dow Marker limited apologize for mistakenly putting the wrong invoice in the dossier, the correct invoice is attached to this file.* The firm has submitted copy of invoice for the purchase of Amlodipine besylate (100Kg) attested by AD (I&E), Quetta dated 26-03-2019.
9.	Provide copy of Batch Manufacturing Record (BMR) for the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of BMR of the stability batches for the drug product. *However, manufacturing date on BMR was 04-2020 while initially submitted stability data showed manufacturing date of 05-2019.* The firm again submitted that there is some typo error in BMR, so we will provide revised BMR accordingly.
10.	Submit updated copy of GMP certificate of drug substance manufacturer of Valsartan.	The firm has submitted copy of GMP certificate for M/s Zhuhai Rundu Pharmaceutical Co. Ltd., China issued by China Food and Drug Administration. It is valid till 10-04-2024.
11.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Batch Size	50 bottles	50 bottles	50 bottles
Manufacturing Date	08-2019	08-2019	08-2019
Date of Initiation	09-09-2019	09-09-2019	09-09-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s. Avesta Pharma Pvt. Ltd, Maharashtra state, India issued by Food and Drug Administration, Maharashtra state, India. It is valid upto 15-09-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance record of HPLC software from Waters Corporation. Audit trail on testing of product has been submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. #	Observations communicated	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification report for Assay by GPC (HPLC). The parameters include specificity and system suitability, linearity, precision and accuracy parameters from drug substance manufacturer. Analytical method verification was also performed by drug product manufacturer.
2.	Evidence of approval of formulation in applied pack size i.e., 578g shall be required since bottle of three pack sizes mentioned in chemistry and biopharmaceutics review are 119g, 238g and 527g and unit dose foil pouch of 17g.	The firm has submitted evidence of approval of formulation in applied pack size. Unit dose compliance is achieved via measuring cap of the jar, which is engraved with the unit dose of 17g from inside.
3.	Scientific justification is required for not performing assay testing by HPLC method till 6-month time point in all batches and adopting HPLC method from 6 month onward.	Initially, we had performed stability studies at interval of 1,2,3,4 in spectrophotometric method. After purchasing RI Detector and column L 25 (Waters, Ultrahydrogel 120, 7.8 × 300 mm part No. WaT011520 Lot 002D190651). We had validated the method in HPLC. So 6th month interval and onward testing were conducted in HPLC.
4.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copy of batch manufacturing records for all the batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted compliance record of HPLC software from Waters Corporation.
6.	Documents for the procurement of drug substance with approval from DRAP is required.	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.

Decision: Deferred for following submissions:

- **Confirmation of required facility where manufacturing and packaging in Jar can be carried out.**
- **Clarification how the applied product is similar in terms of packaging material, unit dose and total dose per pack in comparison with the innovator's product.**
- **Evidence of HPLC system along with RI detector which is used for product testing.**

Manufacturing Date	09-2019	09-2019	09-2019
Date of Initiation	09-09-2019	09-09-2019	09-09-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s. Avesta Pharma Pvt. Ltd, Maharashtra state, India issued by Food and Drug Administration, Maharashtra state, India. It is valid upto 15-09-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance record of HPLC software from Waters Corporation. Audit trail on testing of product has been submitted.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. #	Observations communicated	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification report for Assay by GPC (HPLC). The parameters include specificity and system suitability, linearity, precision and accuracy parameters from drug substance manufacturer. Analytical method verification was also performed by drug product manufacturer.
2.	Evidence of approval of formulation in applied pack size i.e., 578g shall be required since bottle of three pack sizes mentioned in chemistry and biopharmaceutics review are 119g, 238g and 527g and unit dose foil pouch of 17g.	The firm has submitted evidence of approval of formulation in applied pack size. Unit dose compliance is achieved via measuring cap of the jar, which is engraved with the unit dose of 17g from inside.
3.	Scientific justification is required for not performing assay testing by HPLC method till 6-month time point in all batches and adopting HPLC method from 6 month onward.	Initially, we had performed stability studies at interval of 1,2,3,4 in spectrophotometric method. After purchasing RI Detector and column L 25 (Waters, Ultrahydrogel 120, 7.8 × 300 mm part No. WaT011520 Lot 002D190651). We had validated the method in HPLC. So 6th month interval and onward testing were conducted in HPLC.
4.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copy of batch manufacturing records for all the batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted compliance record of HPLC software from Waters Corporation.
6.	Documents for the procurement of drug substance with approval from DRAP is required.	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.

Decision: Deferred for following submissions:

- **Confirmation of required facility where manufacturing and packaging in Jar can be carried out.**
- **Clarification how the applied product is similar in terms of packaging material, unit dose and total dose per pack in comparison with the innovator's product.**
- **Evidence of HPLC system along with RI detector which is used for product testing.**

494.	Name, address of Applicant / Marketing Authorization Holder	M/s Genix Pharma Private Limited., 44-45B Korangi creek road Karachi.
	Name, address of Manufacturing site.	M/s Genix Pharma Private Limited., 44-45B Korangi creek road Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Dy. No. and date of submission	Dy. No. 23536 Dated 27/08/2021
	Details of fee submitted	PKR 50,000/-: Dated 18-01-2021 PKR 25,000/- Dated: 26-07-2021
	The proposed proprietary name / brand name	Movcol Jar Powder for Solution 119g
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each dose contains: Polyethylene glycol……..17g
	Pharmaceutical form of applied drug	White to off white color powder filled in HDPE bottle.
	Pharmacotherapeutic Group of (API)	Osmotic Laxative
	Reference to Finished product specifications	Innovator Specification
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Miralax Powder 119g by M/s Bayer, USFDA Approved.
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	New license granted on 07/10/2021 Sachet section (General) approved.
	Name and address of API manufacturer.	AVESTA PHARMA PVT. LTD. Shivam chambers, 106/108, First Floor, S.V. Road, Goregaon west, Mumbai – 400 062 Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Polyethylene glycol is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (AP0912002, AP0912003 & AP0912004)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Miralax 119g Jar by …

		Bayer by performing quality tests (Appearance, Identification, Filling weight, Moisture content & Assay). CDP is N/A
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

	The proposed proprietary name / brand name	NU-ORS Sachet (Orange Flavor)
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sachet Contains: Sodium chloride……...2.60gm

		Potassium chloride……..….1.50gm Tri-sodium citrate dihydrate…....2.90gm Dextrose anhydrous……..13.50gm
	Pharmaceutical form of applied drug	Granule to be reconstituted for oral administration
	Pharmacotherapeutic Group of (API)	Oral Rehydration Salts
	Reference to Finished product specifications	BP specifications
	Proposed Pack size	1 x 20's Sachets
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	WHO Approved.
	For generic drugs (me-too status)	OEM Orange Flavour, Indus Pharma Karachi (Reg # 067312)
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 01-04-2019. The firm has provided sachet section.
	Name and address of API manufacturer.	**Sodium Chloride:** M/s Dominion salt Ltd., Totara street, Mount Maunganui, New Zealand. **Potassium Chloride:** M/s K+S KALI GmbH Germany, Am Kaliwerk 6, 36119 Neuhof, Germany **Trisodium Citrate:** M/s. Weifang Ensign Industry Co., Ltd. No. 1567, Changsheng Street, Changle, Weifang, shandong province, China. **Dextrose Anhydrous:** M/s Xiwang pharmaceutical., No. 237, Tongfu Road, Handian Town, Zouping Country, Binzhou city, Shandong Province, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance is submitted. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Official monograph of oral rehydration salts is present in BP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substances.

	Stability studies	**Sodium chloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months. **Potassium chloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months. **Trisodium citrate dihydrate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months. **Glucose anhydrous:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III (Drug Product):	The firm has submitted details of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product OEM (ORS) orange flavour (Batch # OR-4043) by M/s Indus Pharma, Karachi by performing quality tests (Description, LOD, Average weight and Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, accuracy, precision and specificity.

STABILITY STUDY DATA

Manufacturer of API	**Sodium Chloride:** M/s Dominion salt Ltd., Totara street, Mount Maunganui, New Zealand. **Potassium Chloride:** M/s K+S KALI GmbH Germany, Am Kaliwerk 6, 36119 Neuhof, Germany **Tri Sodium Citrate:** M/s. No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** The firm has submitted copy of GMP certificate (No. TT60-565-16-3) of M/s Dominion Salt Limited, New Zealand issued by Ministry of health, New Zealand. The certificate is valid till 29-07-2021. **Potassium Chloride:** The firm has submitted copy of GMP certificate of M/s K+S Kali GmbH issued by Regierungsprasidium, Darmstadt Germany. The certificate is valid till 06-03-2021. **Tri Sodium Citrate:** The firm has submitted document of verification of compliance certificate of M/s Weifang Ensign Industry Co., Ltd., China issued by SGS-CSTC Standards Technical services Co. ltd. The certificate is valid till 28-06-2024. **Dextrose Anhydrous:** Firm has submitted copy of GMP certificate (No. SD2020170644) of M/s Xiwang Pharmaceutical Co., ltd. China issued by China Food and Drug Administration. The certificate is valid till 11-01-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Chloride:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium chloride dated 17-09-2019. **Potassium Chloride:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of potassium chloride dated 17-09-2019. **Tri Sodium Citrate:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium citrate dated 17-09-2019. **Dextrose Anhydrous:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of Dextrose anhydrous dated 17-09-2019.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	Observations	Response by the Firm
1.	Copy of GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	The firm has submitted request for renewal of GMP certificate to Director General (E & M), Lahore.
2.	Submit data of verification of analytical procedure of each drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted."*	The firm has submitted analytical method verification studies for each drug substance.
3.	Submit evidence of availability of atomic emission spectroscopy / flame photometer which is required in the testing of the drug product as per BP monograph.	The firm has submitted copy of invoice for the purchase of Flame photometer (Model: PFP7) from Western Analytical services dated 06-11-2019 (Invoice # 01119/097).
4.	Submit evidence of purchase / import documents of each drug substance.	**Sodium Chloride:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium chloride dated 17-09-2019. **Potassium Chloride:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of potassium chloride dated 17-09-2019. **Tri Sodium Citrate:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium citrate dated 17-09-2019. **Dextrose Anhydrous:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of Dextrose anhydrous dated 17-09-2019.

Decision: Registration Board referred the case to QA & LT division seeking opinion regarding use of API imported by the indentor not having valid DML.

DOCUMENTS / DATA REQUIRED ALONGWITH APPLICATION

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/74238/2018/11/24897 issued by Food and Drug Administration, Maharashtra State, India valid till 10-09-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice # 67533/2020 dated 27-01-2020 with received quantity of 5Kg) for the purchase of Colistimethate sodium for Injection. The invoice is cleared by Assistant director (I & E), DRAP, Islamabad.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N.A.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Observations communicated	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the drug product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted Bioassay test method validation protocol and reports for the determination of colistimethate sodium by performing accuracy, precision, Linearity, range, ruggedness and specificity parameters.
2.	Valid copy of GMP certificate of drug substance manufacturer issued by country of origin.	
3.	COA of primary / secondary reference standard including source and lot number shall be provided.	The firm has submitted certificate of analysis showing working standard calibration report.
4.	Submit master formulation including theoretical fill weight per vial.	The firm has submitted master formulation showing quantity of fill weight per vial.
5.	Justify why pharmaceutical equivalence studies do not include all the tests as recommended by USP. Instead the test for microbiological has been performed only.	Firm has submitted revised pharmaceutical equivalence against reference product Colistimethate Sodium 2MIU Injection (Lot No. 3056579) of M/s Xellia Pharmaceuticals by performing identification, pH, uniformity of dosage unit, particulate matter, Biological assay, sterility and Endotoxin.
6.	Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized Colistimethate for Injection from M/s Mac-Chem Products (India) Pvt. Ltd.	The firm has submitted that the bulk and raw material of colistimethate sodium was available in lyophilized powder form. The raw material is then formulated into solution which is filled and lyophilized.
7.	Provide detailed method of analysis of the drug product instead of providing copy of USP monograph.	The firm has submitted method of analysis of the drug product.
8.	Provide detailed protocols how validation of analytical procedures of the drug product was carried out and further justify how the recovered concentration (mg/ml) was calculated in accuracy and recovery.	The firm has submitted Bioassay test method validation protocol and reports for the determination of colistimethate sodium. Accuracy is determined by standard addition method, previously analyzed sample with concentration of 0.2mg/ml were spiked with 50, 100, and 150% API and the mixtures were analyzed by the proposed method.
9.	Provide COA of reference standard actually used in the analysis of drug product.	The firm has submitted copy of USP primary reference standard with lot no. H3J047.
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of batch manufacturing records for all the batches of drug product for which stability studies data is provided.

Decision: Deferred for following submissions:

- **Valid GMP certificate or DML of drug substance manufacturer issued by relevant regulatory authority of the country of origin since submitted GMP certificate was valid till 10-9-2021.**

• **Scientific justification for using prelyophilized drug substance for formulation of the finished drug product by way of lyophilization.**		
497.	Name, address of Applicant / Marketing Authorization Holder	M/s SAMI Pharmaceuticals (Pvt.) Ltd. F-95, Off Hub River Road, S.I.T.E. Karachi.
	Name, address of Manufacturing site.	M/s SAMI Pharmaceuticals (Pvt.) Ltd. F-95, Off Hub River Road, S.I.T.E. Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 28-08-2020
	Dy. No. and Date of submission	Dy. No. 23869 Dated 31-08-2021
	Details of fee submitted	PKR 50,000/-: Dated 01-04-2021 Balance fee: PKR 25,000/-: Dated 31-07-2021
	The proposed proprietary name / brand name	**BALOXA 10mg Sachet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sachet contains: Baloxavir Marboxil…….……10mg
	Pharmaceutical form of applied drug	White to pale yellow white granules
	Pharmacotherapeutic Group of (API)	Anti-viral ATC Code: J05AX25
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Xofluza granules 2% Sachet by M/s. Shionogi & Co Ltd, Japan (PMDA Approved)
	For generic drugs (me-too status)	Not applicable
	Name and address of API manufacturer.	M/s Fujian Jinshan Zhundian Pharmaceutical Co.,Ltd. Jintang Industry zone, Shaown city, Fujian Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C±2˚C/65%± 5%RH for 24 months Accelerated: 40˚C±2˚C/75%±5%RH for 6 months Batches: (180801, 180802, 180803)
	Module-III (Drug Product):	The firm has submitted details of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of the drug product.
	Pharmaceutical equivalence and comparative dissolution profile	It may please be noted that despite of our contacting M/s Genetech and Shionagi, we could not obtain required number of sachets for conducting comparative dissolution profile and Pharmaceutical equivalence. Since Xofluza 2% granules are neither available in the local market, nor could be procured from abroad nor is mentioned in any pharmacopeia, we have considered and ensured the quality parameters which give us the confidence that in-vitro parameter of our product is comparable with the innovator. Formulation of our product is qualitatively similar to innovator product.
	Analytical method validation/validation of product	Method validation studies have been submitted including linearity, accuracy, precision (repeatability and intermediate), robustness and specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Fujian Jinshan Zhundian Pharmaceutical Co. Ltd., Address: Jintang Industry Zone, Shaowu City, Fujian Province, China

No. of Batches	03		

DOCUMENTS / DATA REQUIRED ALONGWITH APPLICATION		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "RECADA (Racecadotril) 10mg & 30mg Sachet" which was presented in 290th meeting of

		Registration Board wherein the Board decided to approve registration of this product. Date of inspection: 10th May, 2019 According to inspection report, following points were confirmed: • The firm has 21CFR compliant HPLC software. • The firm has audit trail reports available. • Adequate monitoring and control are available for stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. FJ20160009 issued by Food and Drug Administration of China valid till 22-02-2021. As per Chinese Government website no more GMP certificates are being issued after December 2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice#WIS200028 dated March 18, 2020 with received quantity of 300gm) for the purchase of Baloxavir marboxil from M/s Fujian Jinshan Zhundian Pharmaceutical Co. Ltd., Jintand Industry zone, Shaown city, Fujian Province, China with attestation of DRAP dated 31st March 2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Observations communicated	Response by the firm
1.	Valid copy of DML / GMP certificate of API manufacturer issued by concerned regulatory authority shall be submitted.	As per the current law of People's Republic of China of the administration of the drug, the GMP and GSP certificates of medicine have been cancelled and will no longer be issued from December 1 2019. This notice can be verified on their website online link is below: http://english.nmpa.gov.cn/2019-11/29/c_456284.htm
2.	Elaborate the manufacturing process and method by which Baloxavir granules have been prepared in Section 3.2.P.2.	The chosen method of preparation is dry mixing. The manufacturing steps comprises of well-known processes like dispensing, sieving, blending, sieving, blending, filling and packaging. The process is considered to be the standard manufacturing process. In processes, controls are adequate for these types of manufacturing processes.
3.	Justify the product development studies without performing pharmaceutical equivalence and CDP studies with innovator/ reference product.	The reference product is not available in Japan. We have tried to arrange it from the country of origin but unfortunately not succeeded. Please also note that our formulation is similar to the innovator in the following, 1. API: Same as that of Reference listed drug.

		2. Dosage form: Same as that of Reference listed drug. 3. Indication: Same as that of Reference listed drug. 4. Excipients: Same as that of Reference listed drug. 5. Label claim: Same as that of Reference listed drug. However, for assay, dissolution and other chemical / microbiological attributes, we have tested the product according to the general guidelines of FDA and USP and complied. In 295th DRB meeting of DRAP Registration Board, same case of M/s. PharmEvo (pvt.) Limited was discussed and approved by Drug Registration Board. The product named Treow (Trelagliptin) 50mg Tablet and Treow (Trelagliptin) 100mg Tablet in which the firm did not perform comparative dissolution profile against innovator because they were unable to arrange the innovator packs from Japan without Japanese prescription which is only available in Japan.
4.	Justification is required for adopting the two time point study for dissolution test. Moreover, provide the basis for selection of dissolution test conditions.	The firm replied that we have adopted the two time point dissolution test from 293rd meeting minutes of DRAP *"Guidance document for Setting Dissolution Specifications of Immediate Release Solid Oral Dosage Form"* and from FDA guideline *"Guidance for Industry Dissolution Testing of Immediate Release Solid Oral Dosage Forms"* which states that *"For slowly dissolving or poorly water soluble drugs (BCS class 2), a two-point dissolution specification, one at 15 minutes to include a dissolution range (a dissolution window) and the other at a later point (30, 45, or 60 minutes) to ensure 85% dissolution, is recommended to characterize the quality of the product".*

Decision: Deferred for following submissions:

- **Valid GMP certificate or DML of drug substance manufacturer issued by relevant regulatory authority of the country of origin since submitted GMP certificate was valid till 22-02-2021.**
- **Pharmaceutical equivalence and Comparative Dissolution Profile (CDP) against the innovator's product.**

	The proposed proprietary name / brand name	Movcol Jar 238g
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each dose contains: Polyethylene glycol 3350…….17g
	Pharmaceutical form of applied drug	White to off white color powder filled in HDPE bottle.
	Pharmacotherapeutic Group of (API)	Osmotic laxative
	Reference to Finished product specifications	Manufacturer's specifications
	Proposed Pack size	1's
	Proposed unit price	As per PRC
	The status in reference regulatory authorities	Miralax for oral solution of M/s Bayer Healthcare LLC (USFDA Approved, over the counter)
	For generic drugs (me-too status)	Not available
	Name and address of API manufacturer.	M/s Avesta Pharma Pvt Ltd., Shivam chambers, 106/108, First Floor, S.V. Road, Goregaon west, Mumbai – 400 062 Maharashtra India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of Movcol 238g Jar (B#19SB-143-01) of M/s Genix pharma with Miralax 238g Jar (B # 0C20PU) of M/s Bayer. Quality tests of both products including description, identification, filled weight, moisture content and assay were compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of applied product.

No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s. Avesta Pharma PVT LTD, Maharashtra state, India

		issued by Food and Drug Administration, Maharashtra state, India. It is valid upto 15-09-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted compliance record of HPLC software from Waters Corporation. Audit trail of testing of product has not been submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Sr. No.	Observations communicated	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification report for Assay by GPC (HPLC). The parameters include specificity and system suitability, linearity, precision and accuracy parameters from drug substance manufacturer. Analytical method verification was also performed by drug product manufacturer.
2.	Evidence of approval of formulation in applied pack size i.e., 578g shall be required since bottle of three pack sizes mentioned in chemistry and biopharmaceutics review are 119g, 238g and 527g and unit dose foil pouch of 17g.	The firm has submitted evidence of approval of formulation in applied pack size. Unit dose compliance is achieved via measuring cap of the jar, which is engraved with the unit dose of 17g from inside.
3.	Scientific justification is required for not performing assay testing by HPLC method till 6-month time point in all batches and adopting HPLC method from 6 month onward.	Initially, we had performed stability studies at interval of 1,2,3,4 in spectrophotometric method. After purchasing RI Detector and column L 25. (Waters, Ultrahydrogel 120, 7.8 × 300 mm part No. WaT011520 Lot 002D190651). We had validated the method in HPLC. So 6th month interval and onward testing were conducted in HPLC.
4.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copy of batch manufacturing records for all the batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted compliance record of HPLC software from Waters Corporation.
6.	Documents for the procurement of drug substance with approval from DRAP is required.	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.

Registration Board deferred the case for following (M-313):

Sr.#	Decision of 316th meeting	Response by the firm
1.	Scientific justification of using Jar container closure system instead of using foil pouch as per reference product i.e., Miralax of M/s	The firm has submitted that we have used same container closure system as per reference product Miralax by M/s Bayer. It is available in jar in which

	Bayer for achieving unit dose dispensing of applied product.	unit dose compliance is achieved via measuring cap of the jar, engraved with the unit dose of 17g from inside.
2.	Evidence of availability of drug product in applied container closure system in reference regulatory authorities.	Miralax jar is also available in applied pack size of 238g jar in the same container closure system.

Decision: Deferred for following submissions:

- **Confirmation of required facility where manufacturing and packaging in Jar can be carried out.**
- **Clarification how the applied product is similar in terms of packaging material, unit dose and total dose per pack in comparison with the innovator's product.**
- **Evidence of HPLC system along with RI detector which is used for product testing.**

	which stability studies data is provided in Module 3 section 3.2.P.8.3.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted compliance record of HPLC software from Waters Corporation.
6.	Documents for the procurement of drug substance with approval from DRAP is required.	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.

Deferred for following submission:

Sr.#	Decision of 316th meeting	Response by the firm
1.	Scientific justification of using Jar container closure system instead of using foil pouch as per reference product i.e., Miralax of M/s Bayer for achieving unit dose dispensing of applied product.	The firm has submitted that we have used same container closure system as per reference product Miralax by M/s Bayer. It is available in jar in which unit dose compliance is achieved via measuring cap of the jar, engraved with the unit dose of 17g from inside.
2.	Evidence of availability of drug product in applied container closure system in reference regulatory authorities.	Miralax jar is also available in applied pack size of 578g jar in the same container closure system.

Decision: Deferred for following submissions:

- **Confirmation of required facility where manufacturing and packaging in Jar can be carried out.**
- **Clarification how the applied product is similar in terms of packaging material, unit dose and total dose per pack in comparison with the innovator's product.**
- **Evidence of HPLC system along with RI detector which is used for product testing.**

500.	Name, address of Applicant / Marketing Authorization Holder	M/s Vision Pharmaceuticals (Pvt.) Ltd., Plot # 22-23, Industrial triangle, kahuta road, Islamabad-44000.
	Name, address of Manufacturing site.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot # 22-23, Industrial triangle, kahuta road, Islamabad-44000.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	GMP status of the Finished product manufacturer	New license granted on 25/02/2019 The firm has provided Liquid Ampoule General section.
	Dy. No. and date of submission	Dy. No. 17243: Dated 02-06-2021
	Details of fee submitted	PKR 30,000/-: Dated 28-05-2021
	The proposed proprietary name / brand name	Vision DS Injection 600mg/2ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 2ml contains: Lincomycin as hydrochloride…….600mg
	Pharmaceutical form of applied drug	Clear to slightly yellow colour liquid injection
	Pharmacotherapeutic Group of (API)	Antibiotics
	Reference to Finished product specifications	USP specifications

	Proposed Pack size	10's, 50's & 100's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LINCOMYCIN SXP 600mg/2ml solution for injection ampoule by M/s Southem XP IP Pty Ltd, (TGA Approved).
	For generic drugs (me-too status)	Olinc 600mg/2ml Injection by M/s Bosch Karachi, Reg. No. 025416
	Name and address of API manufacturer.	M/s Topfond Pharmaceutical Co., Ltd., No.2, Guangming Road, Zhumadian City, 463000, Henan P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65%±5%RH for 48 months Accelerated: 40°C ± 2°C /75%±5%RH for 6 months Batches: (081101, 081102, 081103)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	The firm has submitted comparative assay data of trial formulation (Batch # NPD 213 T-01) against the comparator product Lincocin Injection (Batch # C151) by Sanofi – Aventis Pakistan Ltd. Karachi by performing quality tests (Physical appearance, Assay, pH, Liquid Particle Count).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Topfond Pharmaceutical Co., Ltd., No.2, Guangming Road, Zhumadian City, 463000, Henan P.R. China.
API Lot No.	1907025
Description of Pack	2 ml ampoule,

(Container closure system)	Type II glass		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)

Batch Size	1587 Amp	1587 Amp	1587 Amp
Manufacturing Date	09-20	09-20	09-20
Date of Initiation	22-09-2020	22-09-2020	22-09-2020
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to onsite inspection report of their product Calador 400mg/100ml Infusion which was conducted on 24-08-2021 and was presented in 312th meeting of Registration Board held on 14-16th September, 2021. According to the report following points were confirmed. •The firm has 21 CFR compliant HPLC software •The firm has audit trail reports available. The firm possesses stability chambers with digital data loggers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. HA20160021 issued by CFDA valid till 17-10-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial Invoice to import Lincomycin HCl (Invoice # XX17026) dated Jul-28-2017 attested by AD (I & E) DRAP Islamabad dated 20-09-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator:

Sr.#	Observations communicated	Response by the firm
1.	Copies of the drug substance specification and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer.	Copies of the drug substance specification and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer are attached.
2.	Submitted drug substance specifications are as per Indian Pharmacopoeia while monograph of drug substance is available in USP.	As we have used material by Topfond pharmaceutical Co. Ltd which is as per USP monograph. We have revised documents and complete DMF & QOS is attached here. Initially the firm had provided DMF from Henan Xinxiang Huaxing Pharmaceutical factory. However, the limits provided by FPP

		manufacturer for pH, specific optical rotation, water contents and assay are different from API manufacturer.
3.	Analytical method verification reports of parameters like specificity, accuracy & repeatability (method precision) performed by the drug product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Analytical method verification reports of parameters like specificity, accuracy & repeatability (method precision) performed by the drug product manufacturer are attached.
4.	Submitted certificate of analysis is from Topfond pharmaceutical Co. Ltd while drug substance manufacturer is M/s Henan Xinxiang Huaxing Pharmaceutical Factory.	API used for manufacturing & testing is by Topfond pharmaceutical Co. Ltd. accidently DMF of Henan Xinxiang Huaxing Pharmaceutical factory is provided in dossier.
5.	Reference standard was not from drug substance manufacturer.	Not submitted.
6.	Details of batch numbering of reference product and test formulation used for Pharmaceutical equivalence are required. Pharmaceutical equivalence should contain results of all the quality tests mentioned in official pharmacopoeia of the developed formulation and the reference product.	The firm has submitted comparative assay profile protocol as well as report of trial formulation with comparator product Linocin Injection 600mg/2ml. However, pharmaceutical equivalence results containing all the tests have not been submitted.
7.	In section 3.2.P.2.4, type II glass vial has been chosen as container closure system while in manufacturing process development glass ampoule has been mentioned	It is a typing error, container closure used is Glass ampoule
8.	Justification/Clarification is required regarding target fill weight of Lincomycin hydrochloride as 1031.0kg in batch formula for preparing 1587 ampoules.	It is error occurred during typing, the actual quantity dispensed is 1.031kg instead of 1031.0kg. As per trial card, the quantity dispensed is 1.119 Kg.
9.	Justification shall be submitted for not performing terminal sterilization in applied injection. Moreover, step of aseptic filling process has also not been mentioned.	The firm has submitted that we performed the autoclave on all trials. Highlighted trial card is also attached.
10.	Justify the weight taken for Lincomycin hydrochloride in different sets of accuracy parameter in analytical method validation studies. Moreover, basis for setting 100% theoretical contents are required to be clarified.	As per USP, standard concentration is 1.2 mg per ml, so we have prepared the sample also as 2ml containing 600mg of Lincomycin so we pipette 2 ml and transfer to 50ml volumetric flask. In second dilution, we transfer 5ml from it to another 50ml volumetric flask, making final concentration of 1.2mg / ml. For other concentration spiking was done as per protocol.
11.	Chromatograms of Lincomycin injection samples contain two principle peaks. Clarification is required for these two peaks	Chromatograms of Lincomycin injection samples contain two principle peaks. As this finished product only containing API (Lincomycin HCl) and excipient (Benzyl Alcohol) Peak at 16.443 minutes is of LINCOMYCIN and peak on 11.396 minutes is of BENZYL ALCOHOL. Secondly, 210nm of wavelength is used for analysis.

Deferred for following:

Sr.#	Decision of 316th meeting	Response by the firm
1.	Clarification of dispensed quantity of Lincomycin hydrochloride for manufacturing of 1587 ampoules of each trial batch since the quantity mentioned on master formulation is different from trial card.	The firm has submitted that the difference is just due to rounding off during calculation. For 3.3 L, the ampoules prepared should be 1571. While calculation, we take 3.33 L for which ampoules will be 1587.

		• Calculation of API per ampoule. 3.3 Liters = 3300ml. 3300ml x 300mg = 990000mg (600mg is present in 2ml so for 1 ml 300mg as mentioned above.) By converting mg to Kg. 990000mg / 1000 = 990 grams 990grams / 1000 = 0.99 Kg So, 0.99 x 100/88.51 = 1.1185 Kg By calculating for 2.1ml per ampoule the calculation is as below. 3300/2.1 = 1571 Ampoules Per Ampoule 600mg x 2.1/2 = 630mg 630 mg 100/88.51 = 711.78mg So, for 1571 Ampoules we will require API as 1571 Ampoules x 711.78mg = 1.1182 By rounding 1.1182 it becomes 1.119 Kg
2.	Provide COA of primary / secondary reference standard including source and lot number.	The firm has submitted copy of COA of working standard from drug substance manufacturer (M/s Topfond Pharmaceutical Co. Ltd) with lot number of 19070024.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further directed the firm to dispense the drug substance for commercial batch manufcaturing on the basis of actual potency of drug substance determined durinig drug substance analysis.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate (Certificate # HA20190077) of M/s Henan Dongtai Pharmaceutical Co., Ltd. China issued by He Nan Province Drug administration, China. It is valid till 05-11-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted compliance record of HPLC software and audit trail record of product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr.#	Observations communicated	Response by the firm
1.	Copies of the drug substance specifications and analytical procedures used for routine testing of the drug substance / active pharmaceutical ingredient by both drug substance & drug Product manufacturer. Moreover, analytical procedure for assay testing has not been provided.	The firm has submitted that drug substance specifications are part of analytical procedure. The firm has submitted copies of analytical procedure from both drug substance and drug product manufacturer.
2.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification protocol and reports for assay method by titration method. The verification study does not include accuracy and specificity parameters.
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by drug Product manufacturer used during product development and stability studies, along with certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	The firm has submitted certificate of analysis of drug substance from both drug substance and drug product manufacturer.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed.	The firm has provided comparative dissolution profile studies with Anti-flam Tablet 50mg. The performance of pharmaceutical equivalence studies with innovator product was not provided.

5.	Submit acceptance criteria for release and shelf life specifications.	The firm has submitted that release limit and shelf life specifications comply USP monograph. Both the limits are exactly the same.
6.	Justify method verification studies without performance of specificity studies. Moreover, relevant chromatograms for each studied parameter are required.	The firm has submitted performance of linearity and precision studies.
7.	Reference of previous approval of applications with stability study data of the firm (if any).	No approvals have been granted so far with stability studies, however, we have 21 CFR compliant HPLC alongwith audit trail enabled. Further our stability chambers are also attached with UPS and 24-h monitoring record.
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate (Certificate # HA20190077) of M/s Henan Dongtai Pharmaceutical Co., Ltd. China issued by HeNan Province Drug administration, China. It is valid till 05-11-2024.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.

Deferred for submission of following:

Sr.#	**Decision of 316th meeting**	**Response by the firm**
1.	Submission of complete analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.	The firm has submitted results of accuracy and specificity parameters alonwith relevant chromatograms.
2.	Justification for adopting same acceptance criteria for release and shelf life specifications.	The firm has not submitted any justification for adopting same acceptance criteria for release and shelf life specifications.
3.	Performance of pharmaceutical equivalence and CDP studies with innovator/reference product.	The firm has submitted comparative dissolution studies Peflam 50mg Tablet (B#PF001) with comparator product Caflam 50mg tablet (B#PK3R) in three media pH 1.2, acetate buffer pH 4.5 and phosphate buffer pH 6.8. The performance of pharmaceutical equivalence studies was not provided.
4.	Analytical method verification protocol and reports of drug product as per requirements of section 3.2.P.5.3 of Form-5F.	The firm has submitted analytical method verification protocol and reports of drug product by performing system suitability, specificity, linearity, precision and accuracy parameters.
5.	Evidence of procurement of API with approval from DRAP.	The firm has submitted copy of invoice specifying import of Diclofenac potassium 1000 Kgs attested by Assistant Director (I & E), lahore dated 02-10-2019.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further deciced that registration letter will be issued upon subsmission of Pharmaceutical equivalence studies against the innovator product.**

	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Semi-basic Plant (DML # 000806). Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities,

		specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of the developed formulation Rapid 40mg Injection (B#2005707) and comparator product Risek Injection 40mg (B # 789P06) of M/s GETZ Pharma. Quality tests of both products including physical appearance, solubility, water content, pH and assay were compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification report from M/s Vision Pharmaceuticals Pvt, Ltd. Islamabad.
2.	Certificate of analysis of both drug substance manufacturer and drug product manufacturer are required.	The firm has submitted COAs of 3 batches of omeprazole lyophilized powder. The firm stated that we have a combined QC of both Formulation (000517) and Semi-Basic (000806) facility having same equipment and analysts for both facilities.
3.	Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed.	The firm has performed pharmaceutical equivalence of the developed formulation Rapid 40mg Injection (B#2005707) and Risek 40mg Injection (B # 789P06) manufactured by M/s GETZ Pharma. Quality tests of both products including physical appearance, solubility, water content, pH and assay were compared.
4.	Scientific justification is required for performing assay testing by UV method instead of HPLC method.	As the stability studies of the Bulk lyophilized material is performed by the Bulk manufacturer in the same QC lab with the same instrument (on HPLC) so just for verification purpose we performed the stability of the said product by UV. The firm has not submitted stability study data performed by HPLC alongwith raw data sheets, chromatograms and summary data sheets.
5.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copy of batch manufacturing record of 3 batches for which stability studies were carried out.
6.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Stability testing is performed by UV spectrophotometry therefore audit trail is not required.
7.	Documents for the procurement of drug substance with approval from DRAP is required.	We have procured omeprazole sodium lyophilized ready to fill powder our own Semi-basic facility.

8.	Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.	The firm has not submitted the details of reconstitution diluents with which dilution was carried.
9.	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.	Compatibility studies were not provided with required diluents.

Evaluation by PEC:

Sr. No.	Decision of 313th meeting of RB	Response by the firm
1.	Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.	• As we have the facility for semi basic preparation & we are lyophilizing the omeprazole and conduct the testing on HPLC. • In Omeprazole 40 mg Injection (commercial batch) we are filling the same lyophilized powder tested in our quality control laboratory. • We performed the final month Stability testing on HPLC. Testing for 36th month is attached in Annexure I.
2.	Submission of results of in-use stability studies of the drug product to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.	Testing after reconstitution shows satisfactory results **Reconstituted Diluent** / **Storage Condition** / **In-Use Shelf Life** NaCl 0.9% solution: 2 – 8 ºC: 24 Hours; 25 ºC: 12 Hours Testing Reports with brief summary of results are attached in Annexure II.
3.	Submission of compatibility studies for the dry powder for injections to be performed as per the instructions provided in individual label of the drug product.	Omeprazole Dry Powder for Injection in reconstituted with 10ml of NaCl 0.9% solution and shows satisfactory results after 8 hours under storage condition 2 – 8 ºC. Testing Reports are attached in Annexure III
4.	Capacity assessment of manufacturing and testing facility of M/s Vision Pharmaceuticals Pvt. Ltd.	Capacity Assessment of manufacturing and testing facility of M/s Vision Pharma has been carried out.

Decision: RegistrationBoard noted the fact that firm had initially submitted stability studies data by UV spectrophotometric method ofor Assay test, while HPLC method was adopted for the 36th month time point of long term stability studies hence Registration Board deferred the case for submission of batch release data of recently manufactured commercial batches by M/s Visio npharmaceuticals wherein assay testing shall be performed using HPLC method.

	GMP status of the firm	**M/s Carer pharmaceutical Industries:** The firm is granted new license on 18/03/2021.

		M/s Vision Pharmaceuticals: The firm is granted GMP certificate based on inspection conducted on 23-04-2019.
	Evidence of approval of manufacturing facility	**M/s Vision Pharmaceuticals:** The firm has provided sterile Dry powder injection vials (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13450: 19-05-2021
	Details of fee submitted	PKR 50,000/-: 12-02-2021
	The proposed proprietary name / brand name	Desan 40mg IV Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Omeprazole sodium eq. to Omeprazole (as lyophilized powder) …….40mg
	Pharmaceutical form of applied drug	Lyophilized Powder for injection
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole 40mg powder for solution for infusion of M/s Sandoz Novartis (MHRA approved)
	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Semi-basic Plant (DML # 000806). Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of the developed formulation Rapid 40mg Injection (B#2005707) and Risek 40mg Injection (B # 789P06) manufactured by M/s GETZ Pharma. Quality tests of both products including physical appearance, solubility, water content, pH and assay were compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

7.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SD20191025 issued by CFDA valid till 10/12/2024.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Letter No. 11160/2021/DRAP Dated: 27-07-2021 B/L No. 176-6445-291 dated: 31-07-2021

10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Shortcomings communicated to the Firm:

- You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not availab in USP, but present in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provi scientific justification in this regard.
- Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May- sodium, when the monograph has not been present in USP.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies th "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substan /Active Pharmaceutical Ingredient by both Drug substance manufacturers."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states th "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) perform by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall submitted". Further justify how the analysis of drug substance was conducted without performing verification studi of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability da of 3 months has submitted despite the batch had been manufactured in 2017.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provi information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulato status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used f reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strengt
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting Registration Board, which states that "The selection and optimization of the manufacturing process described 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development sha be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of asept processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Boar which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, whi manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen fr water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodiu hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both active
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. Howeve monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactur on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with t acceptance criteria mentioned on COA of drug substance by drug substance manufacturer i.e. 4.5-6.5 and NMT 3.0 Elevation of pH and water content of drug product without any further processing of formulation needs to be justi with the pharmacopeial reference and innovator product.

- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference an innovator product.
- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data she represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptanc limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug produc Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of the batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical repo / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time an accelerated).

In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Remarks of the Evaluator:

In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which dru substance was imported from a new source and accordingly data of trial batches of drug product manufactured from ne source of drug substance has submitted. Newly submitted dossier has again evaluated and presented before the Board f its consideration.

	Name, address of Applicant / Marketing Authorization Holder	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22143 dated 11/04/2022
	Details of fee submitted	PKR 7,500/-: dated 02/08/2022
	The proposed proprietary name / brand name	Cef-Sulb Injection IV/IM
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder Cefoperazone sodium JP equivalent to Cefoperazone…….500mg Sterile Powder Sulbactam sodium JP equivalent to Sulbactam…….500mg
	Pharmaceutical form of applied drug	Dry powder for injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	JP Specifications
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Sulperazone Injection 1gm by M/s Pfizer Ltd. USA, USFDA Approved.

	For generic drugs (me-too status)	Toxirid Injection 1gm by Global Pharmaceuticals, Reg. No. 042552
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Qilu Antibiotics Pharmaceutical Co. Ltd. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of cefoperazone sodium /sulbactam sodium Injection is present in JP pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (2003FJ81NH, 2002FJ81NH, 2001FJ81NH)
