	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator product 2SUM (Cefoperazone Sodium + Sulbactam Sodium) 1g Injection of M/s. Healthtek Pvt. Ltd. Karachi, performing quality tests (Identification, Assay, constituted solution, BET & sterility test).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	Qilu Antibiotic Pharmaceutical Co. Ltd. China
API Lot No.	2001FJ81NH
Description of Pack (Container closure system)	One clear glass vial 15ml with LDPE ampoule of WFI along with leaflet in unit carton.
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TRI003-01	TRI003-02	TRI003-03
Batch Size (Scientifically rational batch size)	Not mentioned	Not mentioned	Not mentioned
Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	26-01-2022	26-01-2022	26-01-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted the requisite document.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Form-6 grant permission for license to import from M/s. Qilu Antibiotics Pharmaceuticals Co. Ltd., China vide Dy. No. 11160/2021 DRAP Dated: 27-12-2021. Invoice attested vide Dy.no. 11160/2021 DRAP dated: 27-12-2021in which shipper was M/s. Shandong Luoxin Pharmaceuticals, China.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Raw data sheets and chromatograms attached.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr.no.	Section	Shortcomings/Observations
1.	3.2. S.4.1	Acceptance criteria of assay mentioned in specification of drug was not in accordance with JP monograph. Assay limit mentioned in COA and specification of drug substance by both drug substance manufacturer and drug product manufacturer was Cefoperazone on anhydrous basis ≥43.5% and sulbactam on anhydrous basis ≥44.5%. / Assay acceptance criteria in accordance with JP monograph is "It contains not less than 90.0% and not more than 110.0% of the labeled potency of cefoperazone (C25H27N9O8S2: 645.67), and not less than 95.0% and not more than 110.0% of the labeled potency of sulbactam (C8H11NO5S: 233.24)".
2.	3.2. S.4.3	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.
3.	3.2. S.5	Firm has not submitted the COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
4.	3.2. S.7	Firm has submitted only 6 months long term stability data of all three batches of drug substance.
5.	3.2P.2.1(a)(b)	Firm has not provided any details related to weight of powder filled per vial keeping in view the sodium content of both active substances.

<table>
<tr><td>6.</td><td>3.2.P.2.1(C)</td><td>Firm has not provided any details regarding the type of diluent, its composition, quantity or volume, specifications (as applicable) in which drug product has to be reconstitute before administration.</td></tr>
<tr><td>7.</td><td>3.2. P.2.2.1</td><td>Firm has submitted the pharmaceutical equivalence report in which the acceptance criteria of all the quality test was not in accordance with JP monograph:
<table>
<tr><td>Acceptance criteria in pharmaceutical equivalence report</td><td>Acceptance criteria in JP monograph</td></tr>
<tr><td>pH (6.0-8.8)</td><td>pH (4.5-6.5)</td></tr>
<tr><td>Assay (90%-110%)</td><td>Assay (It contains not less than 90.0 and not more than 110.0% of the labeled potency of cefoperazone (C25H27N9O8S2: 645.67), and not less than 95.0% and not more than 110.0% of the labeled potency of sulbactam (C8H11NO5S: 233.24).)</td></tr>
<tr><td>Bacterial Endotoxin Test (NMT 0.2 USP Endotoxin unit per mg)</td><td>Bacterial Endotoxin Test (Less than 0.060 EU/mg (potency).)</td></tr>
</table>
Further firm has not performed water content test and clarity and color of solution test which are also included in JP monograph.</td></tr>
<tr><td>8.</td><td>3.2. P.5.2</td><td>Firm has not submitted the analytical procedure used for testing of drug product.</td></tr>
<tr><td>9.</td><td>3.2.P.5.3</td><td>Analytical method verification report reflects that the assay has performed on UV method while the JP monograph recommends the HPLC method for assay of drug product.</td></tr>
<tr><td>10.</td><td>3.2.P.6</td><td>Firm has not submitted the COA of primary / secondary reference standard including source and lot number used for testing of drug product.</td></tr>
<tr><td>11.</td><td>3.2.P.8</td><td>Firm has not submitted following documents to support the stability data of drug product:
Reference of previous approval of applications with stability study data of the firm (if any)
Documents for the procurement of API with approval from DRAP (in case of import).
Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.</td></tr>
<tr><td>12.</td><td></td><td>Firm has not submitted the copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.</td></tr>
</table>

Decision: Deferred for submission of following:

- **Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.**
- **Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.**
- **COA of primary / secondary reference standard including source and lot number used for testing of drug substance.**
- **Submit long term stability data of drug substance till the claimed shelf life.**

- **Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.**
- **Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.**
- **Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.**
- **Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.**
- **COA of primary / secondary reference standard including source and lot number used for testing of drug product.**
- **Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.**
- **Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.**
- **Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.**
- **Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SD20191025 issued by CFDA valid till 10/12/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Letter No. 11160/2021/DRAP Dated: 27-07-2021 B/L No. 176-6445-291 dated: 31-07-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Shortcomings communicated to the Firm:

- You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not availab in USP, but present in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provi scientific justification in this regard.
- Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May-2 sodium, when the monograph has not been present in USP.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies th "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substan /Active Pharmaceutical Ingredient by both Drug substance manufacturer."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states th "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performe by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall b submitted". Further justify how the analysis of drug substance was conducted without performing verification studi of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability da of 3 months has submitted despite the batch had been manufactured in 2017.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provi information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulato status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used f reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strengt
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting Registration Board, which states that "The selection and optimization of the manufacturing process described 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development sha be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of asept processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Boar which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should b performed as per the instructions provided in individual label of the drug product*"

- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, whi
  manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen fr
  water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodiu
  hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection
  evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both active
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module
  and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. Howeve
  monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactur
  on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured
  sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with t
  acceptance criteria mentioned on COA of drug substance by drug substance manufacturer i.e. 4.5-6.5 and NMT 3.0%
  Elevation of pH and water content of drug product without any further processing of formulation needs to be justi
  with the pharmacopeial reference and innovator product.
- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference a
  innovator product.
- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data she
  represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptan
  limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug produc
  Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of the
  batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical repo
  / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time a
  accelerated).

In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Remarks of the Evaluator:

In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which dru
substance was imported from a new source and accordingly data of trial batches of drug product manufactured from ne
source of drug substance has submitted. Newly submitted dossier has again evaluated and presented before the Board f
its consideration.

China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.
12.		Firm has not submitted the copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Decision: Deferred for submission of following:

- **Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.**
- **Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.**
- **COA of primary / secondary reference standard including source and lot number used for testing of drug substance.**
- **Submit long term stability data of drug substance till the claimed shelf life.**
- **Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.**
- **Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.**
- **Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.**
- **Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.**
- **COA of primary / secondary reference standard including source and lot number used for testing of drug product.**
- **Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.**
- **Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.**
- **Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.**
- **Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

507.	Name, address of Applicant / Marketing Authorization Holder	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Dist Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.11609 dated 13/05/2022
	Details of fee submitted	PKR 30,000/-: dated 01/11/2021

	The proposed proprietary name / brand name	Citi-Pime Injection 1gm
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder of Cefepime HCL with L- Arginine Eq. Cefepime 1g
	Pharmaceutical form of applied drug	Intra-venous / Intra-muscular Injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Maxipime Injection 1g by M/s Hospira Inc. USA, USFDA Approved.
	For generic drugs (me-too status)	Zepime Injection 1g by Global Pharmaceuticals, Reg. N 046016
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Kopran Research Laboratories Ltd India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD templat Summarized information related to nomenclatur structure, general properties, solubilities, physical forn manufacturers, description of manufacturing process ar controls, impurities, specifications, analytical procedur and its verification, batch analysis and justification specification, reference standard, container closure syste and stability studies of drug substance and drug product submitted.
	Module III (Drug Substance)	Official monograph of Cefepime HCL with L- Arginine present in USP. The firm has submitted detail nomenclature, structure, general properties, solubilitie physical form, manufacturers, description of manufacturir process and controls, tests for impurity D, G & relate substances (impurity A & unspecified), specification analytical procedures and its verification, batch analys and justification of specification, reference standar container closure system and stability studies of dru substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CEIV/B1203011, CEIV/B120301 CEIV/B1203013)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, descriptio of manufacturing process and controls, impuritie specifications, analytical procedure (including dissolutio testing at acidic and buffer medium) and its verificatio studies, batch analysis and justification of specificatio reference standard, container closure system and stabili studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established again the comparator brand that is Zepime Injection 1g by Glob Pharmaceuticals Pakistan performing quality tes (Identification, Assay, Constituted Solution, Uniformity dosage form).

	Analytical method validation/verification of product	Method verification studies have submitted includin linearity, range, accuracy, precision, specificity.	
STABILITY STUDY DATA			
Manufacturer of API		M/s Kopran Research Laboratories Ltd India	
API Lot No.		CFM-2104004	
Description of Pack (Container closure system)		One clear glass vial 15ml with LDPE ampoule of WFI or 1% Lidocain along with leaflet in unit carton.	
Stability Storage Condition		Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH	
Time Period		Real time: 6 months Accelerated: 6 months	
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)	
Batch No.		TC006-001	TC006-002 TC006-003
Batch Size (Scientifically rational batch size)		Not mentioned	Not mentioned Not mentione
Manufacturing Date		09-2021	09-2021 09-2021
Date of Initiation		02-2023	02-2023 02-2023
No. of Batches		03	
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted the requisite document.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Form-6 grant permission for license to import from MA Kopran Research laboratories,India vide Dy. No. 617 Dated: 16-04-2021. Invoice attested vide Dy.no. 6017/2021 DRAP dated: 2 04-2021in which exporter was M/s. Kopran Researc laboratories, India	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Raw data sheets and chromatograms attached.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted	

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	3.2.S.4.1 3.2. S.4.2	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm has not submitted the specifications and analytical procedure of drug substance by drug product manufacturer.
2.	3.2. S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.

		specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"	
3.	3.2. S.7	Submit complete long-term stability data of all three batches of drug substance, since only the complete data of batch no. CEIV/B1203011 has been submitted in section 3.2. S.7.	Firm has not submitted the long-term stability data of batch no. CEIV/B1203013.
4.	3.2. P.2.6	Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"	Firm has not submitted the reply in response of this query.
5.	3.2. P.3.1	Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.	Firm has submitted the amended document in which cefepime HCl with L-arginine is mentioned as the only active ingredient. However, the information regarding the quantity of dry powder filled per vial has not been given. Further, the flow chart of manufacturing process submitted in the reply of section 3.2.P.3.3 is of ceftriaxone.
6.	3.2.P.5.2	Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm again submit the copy of monograph of USP in section 3.2.P.5.2 and in section 3.2.P.4.2 submit the analytical procedure of cefotaxime injection.
7.	3.2.P.5.3	Analytical method of drug product verified in section	Firm has not given the reply in response of this query.

		3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.	
8.	3.2.P.5.4	Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product	firm has submitted batch analysis report of three trail batches TRA-001, TRA-002, TRA-003 which were not the batch numbers of trial batches used for stability studies as evident from the submitted stability data sheets. Further, the test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test was not been included in batch analysis report nor given any justification. Furthermore, the firm submitted the same batch analysis report for cefepime 500mg injection and cefepime 1gm injection.
9.	3.2.P.6	Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.	Firm has submitted the reply in response of this query.
10.	3.2.P.8	Submit the stability data sheet of cefepime injection, since the submitted sheets are of ceftriaxone.	Firm stated that rectified and corrected stability data sheets are submitted.
11.	3.2.P.8	According to the document submitted in section 3.2. P.8 batch no. Cef-P-004, Cef-P-005and Cef-P-006 has been manufactured on 09-2021, while the dossier submitted in R&I of DRAP on 13th May,2022i.e. after 8 months of manufacturing of trial batches, clarification is required how you have submitted the stability data of real time study till 24month.	Firm stated that rectified and corrected stability data sheets are submitted. However, the firm submitted the raw data sheets of batch no. TC006-01, TC006-02, TC006-03.
12.		1. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. 2. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Firm has only submitted the chromatograms and 21 CFR audit trail report of instant product. Remaining documents has not been provided by the firm.

		3. Provide Reference of previous approval of applications with stability study data of the firm (if any) 4. Documents for the procurement of API with approval from DRAP (in case of import). 5. Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. 6. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). 7. In-use stability studies of reconstituted injection is required along with proposed in-use storage statement and in-use shelf-life. 8. Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	

Decision: Deferred for submission of following:

- **Specifications as well as analytical method of the drug substance from the drug product manufacturer section 3.2.S.4.1 and 3.2. S.4.2.**
- **Analytical method verification report of drug substance performed by drug product manufacturer.**
- **Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-te period.**
- **Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.**
- **Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.**
- **Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.**
- **Analytical method verification report of assay testing of drug product,in compliance of USP monograph Cefepime Injection.**
- **Clarification regarding the trial batches which were actually manufactured for the stability study of applie product.**
- **Batch analysis report of all three trial batches, in which all the quality test should be included that a specify in USP monograph of Cefepime injection.**
- **Provide details that which lot number of drug substance has been used in manufacturing of each batch drug product. Also provide documents confirming evidence of import of each lot of drug substance used manufacturing of these batches of drug product.**
- **Provide data of stability batches properly arranged and supported by respective documents includi analytical report / COA, raw data sheet and respective chromatograms separately for each time point.**
- **Documents for the procurement of API with approval from DRAP (in case of import).**
- **Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stabili studies data is provided in Module 3 section 3.2. P.8.3.**

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	3.2.S.4.1 3.2. S.4.2	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm has not submitted the specifications and analytical procedure of drug substance by drug product manufacturer.
2.	3.2. S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.
3.	3.2. S.7	Submit complete long-term stability data of all three batches of drug substance, since only the complete data of batch no. CEIV/B1203011 has been submitted in section 3.2. S.7.	Firm has not submitted the long-term stability data of batch no. CEIV/B1203013.
4.	3.2. P.2.6	Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"	Firm has not submitted the reply in response of this query.
5.	3.2. P.3.1	Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is	Firm has submitted the amended document in which cefepime HCl with L-arginine is mentioned as the only active ingredient. However, the information regarding the quantity of dry powder filled per vial has not been given. Further, the flow chart of manufacturing process submitted in the reply of section 3.2.P.3.3 is of ceftriaxone.

		required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.	
6.	3.2.P.5.2	Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm again submit the copy of monograph of USP in section 3.2.P.5.2 and in section 3.2.P.4.2 submit the analytical procedure of cefotaxime injection.
7.	3.2.P.5.3	Analytical method of drug product verified in section 3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.	Firm has not given the reply in response of this query.
8.	3.2.P.5.4	Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product	firm has submitted batch analysis report of three trail batches TRA-001, TRA-002, TRA-003 which were not the batch numbers of trial batches used for stability studies as evident from the submitted correct stability data sheets. Further, the test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test was not been included in batch analysis report nor given any justification. Furthermore, the firm submitted the same batch analysis report for cefepime 500mg injection and cefepime 1gm injection.
9.	3.2.P.6	Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.	Firm has not submitted the reply in response of this query.
10.	3.2.P.8	Submit the stability data sheet of cefepime injection, since the submitted sheets are of ceftriaxone.	Firm submitted the rectified and corrected stability data sheets.
11.	3.2.P.8	According to the document submitted in section 3.2. P.8 batch no. Cef-P-004, Cef-P-005and Cef-P-006 has been manufactured on 09-2021, while the dossier submitted in R&I of DRAP on 13th May,2022i.e. after 8 months of manufacturing of trial batches, clarification is required how you have submitted the stability data of real time study till 24month.	Firm stated that rectified and corrected stability data sheets are submitted and the corrected stability trial batches were of batch no. TC007-01, TC007-02, TC007-03.
12.		1. Provide details that which lot number of drug substance has been used in manufacturing of each	Firm has only submitted the chromatograms and 21 CFR audit trail report of instant product. Remaining documents has not been provided by the firm.

		batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. 2. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. 3. Provide Reference of previous approval of applications with stability study data of the firm (if any) 4. Documents for the procurement of API with approval from DRAP (in case of import). 5. Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. 6. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). 7. In-use stability studies of reconstituted injection is required along with proposed in-use storage statement and in-use shelf-life. 8. Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	

Decision: Deferred for submission of following:

- **Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.**
- **Analytical method verification report of drug substance performed by drug product manufacturer.**
- **Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re test period.**
- **Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.**
- **Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.**
- **Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.**
- **Analytical method verification report of assay testing of drug product,in compliance of USP monograph of Cefepime Injection.**

- **Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.**
- **Batch analysis report of all three trial batches, in which all the quality test should be included that are specify in USP monograph of Cefepime injection.**
- **Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.**
- **Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point**
- **Documents for the procurement of API with approval from DRAP (in case of import).**
- **Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.**

Batch Size (Scientifically rational batch size)	Not mentioned	Not mentioned	Not mentione
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	08-2023	08-2023	08-2023
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	1.5.7	• In section 1.5.7, you have claimed USP specification for drug product while in section 3.2.P.5.2 JP monograph for cefixime capsule has been attached which revealed that product is comply with JP specification. Clarify, how 200mg potency capsule comply dissolution acceptance criteria of JP monograph, since it is applicable for 50mg and 100mg. • Revised the specification of drug product along with requisite fee as per the monograph of cefixime capsule approved by DRAP dated 22nd March,2022 copy of monograph available on DRAP official website.	Firm replied that We have to revised the specification of drug product as approved by DRAP, but firm has not submitted the fee for change of specification.
2.	3.2.S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted."	Firm submitted the reply in which it is stated that "As mentioned in section 4.2 the analytical methods applied in course of release testing of Cefixime are based on the monograph of Cefixime of USP 42. These methods are followed without any deviation".
3.	3.2. S.4.4	Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product	Firm submitted the COA of three batches of API.

		development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture, since the submitted COA of three batches of API are of different batches than that used in the manufacturing of stability batches.	
4.	3.2.S.5	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2. S.5.	Firm has submitted the requisite information.
5.	3.2.S.7	The manufacturing date of API batches was feb,2016 while the approval of cefixime API was granted on 24th July, 2018 by DRAP as evident from the submitted approval letter. Clarify the manufacturing of cefixime API prior grant of approval from DRAP.	In the reply Firm submitted the stability data of different batches of drug substance which were manufactured in October,2018 and having batch no. (CFM1602001, CFM1602002, CFM1602003)
6.	3.2.P.2.2.1	Conclusion of comparative dissolution profile of cefixime capsule specified the f2 values of paracetamol and caffeine, clarification is required in this regard.	Firm in their reply stated that "it was typographic error and rectified," but not submitted the correct CDP report.
7.	3.2.P.5.1	• Scientific justification is required for using different assay method from that specified in JP monograph with reference to the chromatographic condition and preparation of standard and sample solutions. • According to JP monograph the assay limit should be not less than 90.0% and not more than 105.0% of the labelled potency of cefixime, justify, for keeping the wider acceptance criteria for assay of drug product than JP specifications i.e. 90% to 110%.	Firm replied that they have now switches over to the monograph of cefixime capsule approved by DRAP. However, the specifications of drug product given in the reply was not comply with the said monograph of cefixime capsule
8.	3.2.P.5.2	Firm again submitted the copy of monograph of JP instead of submitting the analytical procedure in accordance with DRAP approved monograph of cefixime capsule.	
9.	3.2.P.5.3	Analytical method validation report submitted in the reply was also not complying the claim pharmacopeial reference of drug product i.e. DRAP's approved monograph of cefixime capsule.	
10.	3.2.P.5.4	Firm submitted the batch analysis report which evident that the specifications of quality test were not in accordance claimed pharmacopeial. Further the results of dissolution test were also included in batch analysis report.	
11.	3.2.P.8	Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance	Firm has not submitted the requisite information.

		used in manufacturing of these batches of drug product.	
12.	3.2P.8	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Firm submitted the supportive documents of different stability batches of drug product. Stability summary data sheets were of batch no. (TRA-001,TRA-002,TRA-003),while supportive documents (chromatogram, raw data sheets& COA) were of TRC-001,TRC-002,TRC-003.
13.	3.2.p.8	• Documents for the procurement of API with approval from DRAP (in case of import). • Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted these documents.

Decision: Deferred for submission of following:

- **Fee of Rs. 7,500 for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021**
- **Analytical method verification report of drug substance performed by drug product manufacturer.**
- **Revised CDP report of drug product, performed against the innovator product.**
- **Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2 according the monograph approved by DRAP.**
- **Analytical method validation report of assay testing of drug product.**
- **Batch analysis report of all three trial batches of drug, in which all the quality test should be included that a the part of approved monograph of cefixime capsule.**
- **Clarification regarding the trial batches which were actually manufactured for the stability study of applie product and provide the supporting document of same batches.**
- **Details that which lot number of drug substance has been used in manufacturing of each batch of drug produc Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing these batches of drug product.**
- **Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies da is provided in Module 3 section 3.2. P.8.3.**
- **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority country of origin.**

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	3.2.S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted."	Firm submitted the reply in which it is stated that "As mentioned in section 1.4.2 the analytical methods applied in course of release testing of Cefixime are based on the monograph of Cefixime of USP 42. These methods are followed without any deviation".

2.	3.2. S.4.4	Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture, since the submitted COA of three batches of API are of different batches than that used in the manufacturing of stability batches.	Firm submitted the COA of three batches of API.
3.	3.2.S.5	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2. S.5.	Firm has submitted the requisite information.
4.	3.2.S.7	The manufacturing date of API batches was feb,2016 while the approval of cefixime API was granted on 24th July, 2018 by DRAP as evident from the submitted approval letter. Clarify the manufacturing of cefixime API prior grant of approval from DRAP.	In the reply Firm submitted the stability data of different batches of drug substance which were manufactured in October,2018 and having batch no. (CFM1602001, CFM1602002, CFM1602003)
5.	3.2. P.3.1	The bottle fill weight mentioned in section 3.2.P.3.1 is 1266mg while the objective weight per bottle mentioned in process validation report is 6.56mg. Justification is required in this regard.	Firm clarified that 1266mg of suspension powder filled per bottle.
6.	3.2. P.5.1	Justify why weight variation test, test of uniformity of dosage unit and deliverable volume were not included in the specification of drug product.	Firm submitted the specification of drug product in which again not including the weight variation test, test of uniformity of dosage unit and deliverable volume test neither submitted justification.
7.	3.2. P.5.2	Provide complete analytical procedure used for routine testing of drug product, submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm has submitted the copy of USP monograph of cefixime drug substance in section 3.2.P.5.2 instead detailed analytical procedure of cefixime suspension in compliance of USP monograph of cefixime for oral suspension.
8.	3.2. P.5.3	Following observations have been found in the analytical method verification report, clarification is required in this regard: 1. Assay method which has been verified is not in line with USP monograph, justify how the drug product comply with USP specification. 2. How the verification report of cefixime capsule be applied on cefixime suspension, since the	Firm did not submit any reply in response of this query.

		submitted analytical method verification report is of cefixime capsule.	
9.	3.2.P.5.4	Batch analysis report in section 3.2. P.5.4. reflect that filled weight was 65.6 mg ±5% while the COA of drug product on page 263 specified that average weight should be 17.5g±2.5%, justification is required in this regard.	Firm submitted the batch analysis report of three trail batches in which the weight of filled powder varied between 211mg to 213mg, while the average filled weight of powder per bottle in accordance with data given in section 3.2.P.3.1.should be 1266mg.
10.	3.2.P.8	• Clarification is required either the dissolution testing is included in the specification of drug product, since the result of dissolution testing was included in the stability data sheets of all three trial batches. • Justify for changing the assay limits in the long-term stability data of drug product.	Firm has not submitted any clarification/justification regarding these queries and submitted the new stability data sheet along with supportive documents of trail batches (TRS-004, TRS-005, TRS-006).
11.	3.2.P.8	• Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. • Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm submitted the requisite documents.
12.	3.2.P.8	• Documents for the procurement of API with approval from DRAP (in case of import). • Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted these documents.

Decision: Deferred for submission of following:

- **Fee of Rs. 7,500 for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021**
- **Analytical method verification report of drug substance performed by drug product manufacturer.**
- **Revised CDP report of drug product, performed against the innovator product.**
- **Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2 according the USP monograph.**
- **Analytical method verification report of assay testing of drug product according to the USP monograph cefixime suspension.**
- **Clarification regarding the disparity observed in the bottle fill weight both in section 3.2. P.3.1. and 3.2. P.5.4.**

• **Clarification regarding the trial batches which were actually manufactured for the stability study of applic product and provide the supporting document of same trial batches.** • **Details that which lot number of drug substance has been used in manufacturing of each batch of drug produc Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing these batches of drug product.** • **Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies da is provided in Module 3 section 3.2. P.8.3.** **Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority country of origin.**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	AMLODIPINE BESLYLATE: Copy of GMP certificate No. 18101065 FDA INDIA issued by FDA INDIA valid till 18-10-202 VALSARTAN: Copy of GMP certificate No. GD20160649 FDA CHINA issued by FDA CHINA valid till 13-11-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.4111/2020/DRAP-AD-CD(I&E) dated 18/03/2020 is submitted wherei the permission to import different APIs includin AMLODIPINE BESYLATE & VALSARTAN for the purpose of test/analysis and stability studies is granted. • Invoice # CPL/BD/SAM/003/20-21 AD date 09 10-2020 FOR AMLODIPINE • Invoice # RD2020060101-1 AD date 23-07-202 FOR VALSARTAN
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

<table>
<tr><th>S.no.</th><th>Sections</th><th>Observations/Deficiencies/ Short-comings</th><th>Reply of the Firm</th></tr>
<tr><td>1.</td><td>3.2. S.4</td><td>• Provide detailed analytical procedures for the testing of both drug substance by drug product manufacturer.
• Provide analytical Method validation studies of drug substance amlodipine performed by the drug product manufacturer.</td><td>Firm has submitted analytical procedures used for testing of both drug substances along with analytical method verification reports.</td></tr>
<tr><td>2.</td><td>3.2. P.1</td><td>• Justify the choice of excipients in your formulation, since the excipients used are different from that of the innovator / reference product. Further justify how the formulation was developed without performing drug-excipient compatibility studies.</td><td>Firm has submitted the results of 6month real time stability data of drug product under the head of compatibility analysis sheet.</td></tr>
<tr><td>3.</td><td>3.2. P.2.2</td><td>Specify details including batch number and manufacturing date of the reference / comparator product against which pharmaceutical equivalence is performed.</td><td>Firm has submitted following details:
<table>
<tr><th>Brand name</th><th>Batch no.</th><th>Mfg Date</th><th>Exp Date</th><th>Manufacturer</th></tr>
<tr><td>Exforge (Reg.no.047571)</td><td>BYA65</td><td>04-2021</td><td>03-2024</td><td>Novartis Pakistan</td></tr>
</table></td></tr>
<tr><td>4.</td><td>3.2.P.2.2</td><td>Justify, the below 80% (Q) release of valsartan of test product in pH 6.8 medium with reference to the acceptance criteria of USP monograph.</td><td>Firm submitted the copy of monograph of USP instead of justification and claimed that they follow Test 2 of monograph for dissolution testing of drug product, in which the acceptance criteria is again NLT 80%(Q) of the labelled claim of valsartan.</td></tr>
<tr><td>5.</td><td>3.2.P.2.2</td><td>Submit complete dissolution profile data in line with the decision of 293rd meeting of Registration Board.</td><td>Firm has submitted the complete data of comparative dissolution profile in accordance with the decision of 293rd meeting of Registration Board.</td></tr>
<tr><td>6.</td><td>3.2. P.5</td><td>• Justify why content uniformity test is not included in the finished product specification, further justify why content uniformity test was not performed during the stability studies.</td><td>Firm submitted the raw data sheet of content uniformity test, which has been performed while stability studies of drug product.</td></tr>
</table>

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed she life and on accelerated studies for six months as per the commitment submitted in the registration application**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in th registration application.**

Cases of Apremilast tablets:

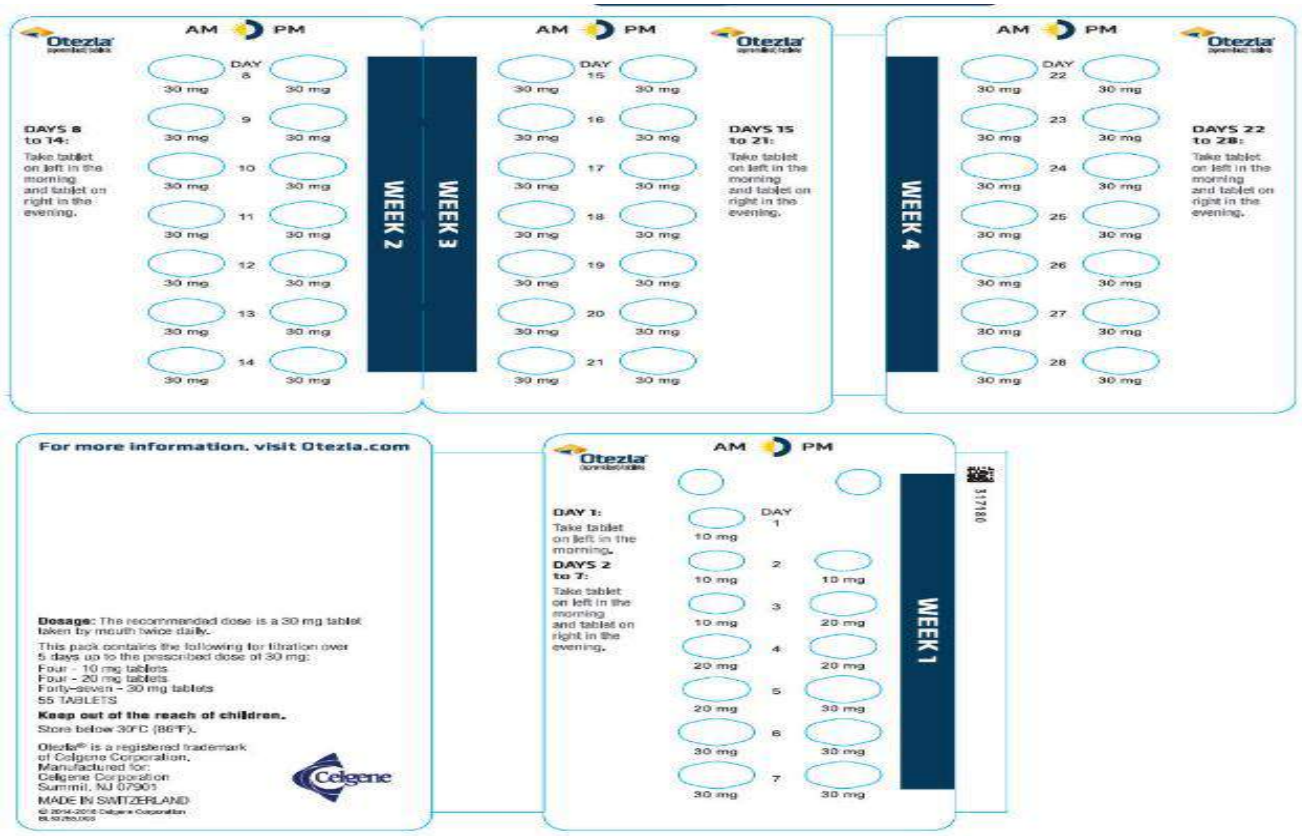
In compliance of decision of Authority taken in its 140th meeting, regarding the out of que consideration of registration applications of apremilast tablet, following are the cases of apremilast presented before the Board for its consideration please.

Discussion: Registration Board made thorough deliberations upon the presentations, dosage regimen and pack sizes of the innovator product. The innovator product i.e. Otezla tablet in USFDA recommended the initial dosage titration of OTEZLA from Day 1 to Day 5 is shown in the following table. Following the 5-day titration, the recommended maintenance dosage is 30 mg twice daily taken orally starting on Day 6. This titration is intended to reduce the gastrointestinal symptoms associated with initial therapy.

Dosage titration schedule in innovator brand:

Day 1	Day 2		Day 3		Day 4		Day 5		Day 6 & thereafter	
AM	AM	PM	AM	PM	AM	PM	AM	PM	AM	PM
10mg	10mg	10mg	10mg	20mg	20mg	20mg	20mg	30mg	30mg	30mg

The requirement of co-blistering manufacturing facility was also discussed for presentation of tablet in similar display panel as of innovator product, one of the presentation of supply pack of innovator brand is as under:



According to the available literature of innovator brand, the titration pack is supplied in two different display panels i.e. 2-week starter pack or 28days starter pack, further separate packaging configuration of only 30mg tablet is also available for regular use.

Decision: Registration Board deliberated the matter in detail and decided as under:

i. **Approved to grant the registration of Apremilast Tablet 10mg, 20mg and 30mg with Innovator's Specifications. Furthermore, in order to standardize the drug as per dosage regimen of the innovator's drug product as approved by reference regulatory authorities, the Board decided that the manufacturers may adopt any of the following presentation for starter pack:**

   a. **Presentation / Pack size as per the Innovator's drug product i.e., Otezla Tablet approved by USFDA.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per template provided in 293DRB meeting minutes. Firm has summarized information related to nomenclature, structure, general properties, isomerism, polymorphism, solubilities, physical form, manufacturers, description of manufacturing process and controls, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted data for facilities, equipments and regional information.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, isomerism, polymorphism, manufacturers, description of manufacturing process and controls, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5% RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: D3350116001 (82160888). D3350116002 (82161041). D3350116003 (82161086).
	Module-III (Drug Product):	Firm has submitted information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of critical steps and intermediate, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation

		of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is OTEZLA tablet 10mg, 20mg & 30mg by Celgene Corporation, USA by performing quality tests including Identification, water content, Assay, Dissolution, Disintegration. CDP has been performed against the same brand that is OTEZLA tablet by Celgene Corporation, USA in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity, Detection limit, Quantitation limit, robustness, stability indicating.

Administrative Portion

13.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred last onsite panel inspection for instant dosage form conducted during last two years BAXIB (Apixaban) 2.5mg & 5mg Tablets on 5th January, 2021 by following panel: 1. Prof. Dr. Rafeeq Alam Khan, Dean, Faculty of Pharmacy, Zia Uddin University, Karachi. (Member Registration Board).

		2. Dr. Saif-ur-Rehman Khattak, Director / FGA, CDL, DRAP, Karachi.
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate for M/s Glenmark life sciences, India The certificate is valid till 24th January 2023.
15.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has imported 0.2Kg API consignment Glenmark life sciences, India, bearing invoice number F2000000116 dated July 28, 2018. ADC signed Form 6 & invoice is available. Form 3 and form 7 also available.
16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
18.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr.no.	Section	Observations/shortcomings	Reply of the firm
1.	3.2.S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s)"	Firm submitted the analytical verification report of drug substance
2.	3.2. P.2.2.1	It is evident from the comparative dissolution profile data that an expired batch of innovator brand has been used in all three strengths for comparison. The expiry date of Otezla tablet batch no.H02248A was Nov-20 and date of analysis mentioned on CDP report is 17/03/2021.Clarification is required in this regard	Firm submitted the reply in which it is stated that "Initially, they have been submitted CDP as per updated USFDA guideline with the specification of NLT 80(Q) in 45 minutes, these studies were conducted in sep-2020 at that time innovator sample was within the expiry. Later on,01 March 2021, they have received query from the DRAP on dissolution and in response of query, they again performed CDP in March 2021 with the outdated Innovator samples, because they cannot wait to procure the innovator samples from USA immediately, since it is time taking activity. Hence, on truthful ground realities they have been seen there is no significant change in results have been observed with the same samples, therefore they used similar innovator

			sample for CDP to fulfill the requirements of DRAP.
3.	3.2. P.5.1	Justify for setting the acceptance criteria of dissolution test other than adapted by innovator/reference product. The review report of innovator brand approved in USFDA revealed that the recommended dissolution criteria should be NLT (Q) in 30 minutes, while the dissolution criteria adapted for applied product was NLT 80%(Q) in 45 minutes.	

4.	3.2.P.7	The applied starter pack presentation mentioned in section 3.2.P.7 was consist of 4 Alu-Alu blisters of (30mg) each of 14 film coated tablet along with one Alu-Alu blister (10mg) of 4 film coated tablets as well as one Alu-Alu blister (20mg) of 4 film coated tablets packed in a unit carton. While as per the innovator brand the starter, pack is for 2 weeks which consist of 13-tablet blister titration pack containing:(4) 10-mg, (4) 20-mg, and (5) 30-mg tablets with an additional (14) 30mg tablets. Justify the rationality of your starter pack presentation with reference to the innovator.	Firm in the reply stated that "Review Report has considered as a Bench Mark "2-week starter pack", however, this is NOT FOR SALE, mentioned on innovator pack, the actual innovator commercial pack size 28 days. In 28 days, pack, innovator has presented in one blister 04-tablets 10mg,04-tablets 20mg and 05-tablets 30mg, and rest of other 3 strips are 14's x3, (30mg). Likewise, the same technology we don't have to keep simultaneously 10mg,20mg and 30mg in one strip. Nevertheless, we adapted same theme as innovator, accommodate, one Alu-Alu blister (10mg) of 4 film coated tablets as well as one Alu-Alu blister 20mg of 4 film coated tablets along with (30mg) 04 Alu-Alu blister in one-unit carton to make it symmetrical. The innovator and our pack only one difference innovator providing forty-seven tablets of 30mg, while we are providing fifty-six tablets. Presentation of display panel of 28 days starter pack of innovator Brand:  While the Applied pack presentation: 32-days starter Pack 04-Tablet Blister (10mg) 04-Tablets Blister 20mg With an additional (14's x4 = 56)30mg Tablets.

Decision: Approved registration of starter pack (1 pack only) with innovator's specifications as per details mentioned in above decision.

- **Registration letter will be issued after submission of revised limit of dissolution test in line with innovator product along with performance data of dissolution in compliance of new adapted dissolution limits. Further, Firm shall submit the fee of Rs. 7,500 for revision of specifications per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **The Board further decided that registration letter for apremilast 30mg (already approved) will be issued after approval of starter pack.**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Reference to Finished product specifications	Innovator's specification

	Proposed Pack size	Combo Pack Contains: 10MG (4's), 20MG (4's), 30MG (4x14's) 56 Tablets
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Otezla Tablet by M/s Amgen Inc, USFDA Approved.
	For generic drugs (me-too status)	NA
	GMP status of the Finished product manufacturer	Firm has provided the inspection report for renewal of DML conducted on 12-11-2018 & 02-01-2019
	Name and address of API manufacturer.	Apremist 10mg & 20mg Tablets Glenmark Life Sciences Limited Address: Plot No. A-80, MIDC, Kurkumbh, Tal-Daund, Dist. Pune - 413 802, India. Apremist 30mg Tablets Kaifeng Pharmaceutical (Group) Co., Ltd. No.1 Yunan Street, Kaifeng City, Henan Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Glenmark Life Sciences Limited Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (83151223, 83151300, 83151315) Kaifeng Pharmaceutical (Group) Co., Ltd. Stability study conditions:

		Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (HF140718, HF140610, HF140526)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Data for establishing Pharmaceutical equivalence by performing all the quality tests and comparative dissolution profile has been submitted against the comparator product "Otezla 10mg, 20mg & 30mg combo pack Tablet by Amgen Batch number H02495A
	Analytical method validation/verification of product	Protocols along with the complete data of validation studies are submitted.

STABILITY STUDY DATA			
Manufacturer of API	Apremist 10mg & 20mg Tablets Glenmark Life Sciences Limited Address: Plot No. A-80, MIDC, Kurkumbh, Tal-Daund, Dist. Pune - 413 802, India. Apremist 30mg Tablets Kaifeng Pharmaceutical (Group) Co., Ltd. No.1 Yunan Street, Kaifeng City, Henan Province, China		
API Lot No.	Glenmark Life Sciences Limited: 82190049 Kaifeng Pharmaceutical (Group) Co., Ltd.: HF151025 & HF151118		
Description of Pack (Container closure system)	Alu/Alu foil blister of 10mg (4's) tablets, are packed along with Alu/Alu foil blister of 20mg (4's) tablets, Alu/Alu foil blisters of 30mg (4x14's) tablets with patient information leaflet into card board outer carton.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Apremist 10mg & 20mg Tablets Real time: 6 months Accelerated: 6 months Apremist 30mg Tablets Real time: 24 months Accelerated: 6 months		
Frequency	Apremist 10mg & 20mg Tablets Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months) Apremist 30mg Tablets Accelerated: 0,1,2,3,4,6,8,12,16,20,24 (Weeks) Real Time: 0,1,2,3,4,6,8,12,16,20,24,36,48 (Weeks), 18,24 (months)

No. of Batches	03 batches for each strength		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred last onsite panel inspection for Dapazin-M 5/1000 mg Tablet Each film coated tablet contains: Dapagliflozin Propanediol Monohydrate Eq. to Dapagliflozin 5mg & Metformin HCl 1000mg which was approved in 307th meeting of Registration Board
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Glenmark Life Sciences Limited Copy of DML certificate No. MH/102855 issued by Food & Drugs Administration (Maharashtra State) valid till 31/12/2023. Copy of GMP certificate No. 6104231issued by Food & Drugs Administration (Maharashtra State) valid till 24/01/2023. Kaifeng Pharmaceutical (Group) Co., Ltd.

		Copy of DML certificate No. 20150031 issued by FDA valid till 31/12/2025. Copy of GMP certificate No. HA20190069 issued CFDA valid till 28/09/2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Glenmark Life Sciences Limited Firm has submitted copy of invoice (invoice# F32200000700) cleared by DRAP Islamabad office dated 28-09-2021 specifying import of Desloratadine. Firm has submitted undertaking that firm has purchased commercial quantity of Desloratadine from manufacturer Glenmark Life Sciences Limited. Along with Desloratadine supplier has send free of cost sample of Apremilast and Apremilast working standard. Firm has applied ADC of only Desloratadine dated 28 Sep 2021 Kaifeng Pharmaceutical (Group) Co., Ltd. Firm has submitted copy of invoices (No.CIN20151117D01 & CIN20151210D01) cleared by DRAP Islamabad office dated 22-12-2015 specifying import Of 40gm Apremilast & 20gm Apremilast respectively
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.No.	Deficiencies/Shortcomings	Reply of the Firm
1.	Drug Substance Manufacturer (M/s. Glenmark Life Sciences, India)	
	a) Submit the evidence of availability of HPLC equipped with quaternary gradient pumps, variable wavelength UV detector with data recorder and integrator software by the drug product manufacturer, since the said equipment has been used as evident from the analytical method verification report of drug substance from drug product manufacturer.	Firm has submitted revised analytical procedure in which HPLC equipped with binary gradient pump has been used.
	b) Justification is required for not performing the enantiomeric purity test while analysing the quality of drug substance by drug product manufacturer. Since, it is the critical test for apremilast because the active substance exhibits stereoisomerism due to presence of a single chiral centre, with the (S)-enantiomer being pharmacologically active.	Firm has submitted the procedure of enantiomeric purity test along with revised batch analysis report.
2.	c) According to the assay procedure submitted in section 3.2.S.4.2 by drug product manufacturer, the run	Firm has submitted revised analytical procedure and following chromatographic conditions has been mentioned:

	time should be 15minutes, injection volume should keep at 10µl and the apremilast elutes at retention time of about 7 minutes. While the chromatogram of verification report from drug product manufacturer revealed that the run time was 20min, injection volume kept at 20µl and the main peak elute at 14.319 minutes. Clarification is required in this regard.	Flow rate: 1.0ml/min Detection wavelength: UV 220nm Injection volume :20µl Retention time and total run time has not been mentioned in the revised procedure.
3.	Drug Substance Manufacturer (M/s. Kaifeng Pharmaceutical Group, China)	
	a) Justify of using different assay method for analysis of drug substance from that given by drug substance manufacturer.	Firm has submitted revised analytical procedure without any justification.
	b) Analytical method verification of drug substances performed by drug product manufacturer, imports from two different sources exhibit same results, justify.	Firm has submitted revised analytical method verification report for both drug substance which are import from two different sources.
	c) Justification is required for not performing the enantiomeric purity test while analysing the quality by drug product manufacturer. Since, it is the critical test for apremilast because the active substance exhibits stereoisomerism due to presence of a single chiral centre, with the (S)-enantiomer being pharmacologically active	Firm in their reply stated that "we have not performed enantiomeric purity test because we have not purchased impurity standards along with the raw material.
	Drug Product	
4.	Justify the performance of comparative dissolution profile of using UV method while the procedure of dissolution testing specified in section 3.2.P.5.2 stated that the dissolution test should be performed on HPLC.	Firm has submitted revised analytical procedure in which the method for performance of dissolution test both on HPLC and UV has been included.
5.	Scientific justification required that, how an active substance classified as having low solubility and low permeability according to Biopharmaceutical Classification System (i.e. BCS Class 4) release more than 85% within 20 minutes in all the three BCS medium as evident from the submitted CDP report of three strengths.	Firm in their reply stated that "we have done CDP of our all three strengths with innovator product at three different pH. The release pattern of our product is comparable with innovator as mentioned in CDP report. The drug products show similar behavior in three different pH mediums.
6.	Justify the performance of validation of assay procedure of using UV method since the analytical procedure given in section 3.2.P.5.2 mentioned that the assay be performed on HPLC.	Firm in their reply stated that "we have used HPLC method for the performance of validation of assay procedure instead of UV method. The word absorbance of peak was mistakenly written on the report, revised report has submitted.
7.	Justify for setting the acceptance criteria of dissolution test other than adapted by innovator/reference product. The review report of innovator brand approved in USFDA revealed	Firm revised the dissolution acceptance criteria in accordance with innovator product i.e. NLT 80% (Q) in 30 minutes.

<table>
<tr><td></td><td>that the recommended dissolution criteria should be NLT (Q) in 30 minutes, while the dissolution criteria adapted for applied product was NLT 80%(Q) in 45 minutes.
Specify the acceptance criteria of dissolution test in term of Q value and with the time point at which NLT 80% should be achieved, since the specification given in section 3.2.P.5.1 and batch analysis report in section 3.2.P.5.4 did not mentioned the time point.</td><td>Further the dissolution results of stability study were also within limits of revised acceptance criteria.
 <u>RECOMMENDATION</u>: From the perspective of Biopharmaceutics, the NDA 205437 for apremilast tablets is recommended for approval with a Post Marketing Commitment
The following dissolution method and acceptance criterion are acceptable on an interim basis for release and stability testing.
• USP Apparatus II, 0.3% SLS in 25 mM Sodium Phosphate Buffer, pH 6.8, 900 mL, 75 rpm
• Q= [redacted] at 30 minutes
It is recommended that the above interim dissolution method/acceptance criterion and the Post Marketing Commitment be included in the NDA's action Letter</td></tr>
<tr><td>8.</td><td>The applied starter pack presentation mentioned in section 3.2.P.7 consist of 4 Alu-Alu blisters of (30mg) each of 14 film coated tablet along with one Alu-Alu blister (10mg) of 4 film coated tablets as well as one Alu-Alu blister (20mg) of 4 film coated tablets packed in a unit carton. While as per the innovator brand the starter, pack is for 2 weeks which consist of 13-tablet blister titration pack containing:(4) 10-mg, (4) 20-mg, and (5) 30-mg tablets with an additional (14) 30mg tablets. Justify the rationality of your starter pack presentation with reference to the innovator.</td><td>Firm in their reply stated that we have applied pack size 10mg (4's),20mg (4's),30mg (4x14's) the reason for applying this pack size is because our individual product apremist 30mg is already registered with pack size (4x14's) i.e. 56 tablets and the pricing done by DRAP is also for the same pack size. Therefore just because of the pricing done by DRAP we have decided to provide product in market with pricing of 56 tablets of 30mg strength along with free of cost 4 tablets of 10mg and free of cost 4 tablets of 20mg.</td></tr>
<tr><td>9.</td><td>Justify the quantity of apremilast used for the development of trial batches with reference to its potency adjustment and water content calculation, since the submitted BMR of all three strength did not mentioned the calculation of dispensing amount of active ingredient per unit.</td><td>Firm submitted the calculation in which factor 1.000300 for calculation.</td></tr>
<tr><td>10.</td><td>Weight of tablet of all three strengths of innovator brand increase with empirical ratio as per the review report of USFDA, while the weight of tablet of all three applied strength varies irrespective of their increase quantity of active ingredient.</td><td>Firm replied that "we have followed innovator product qualitatively and not by quantitatively".

In innovator product weight of tablet increase with the empirical ration i.e.
<table><tr><td>10mg</td><td>20mg</td><td>30mg</td></tr><tr><td>104.00</td><td>208.00</td><td>312.00</td></tr></table></td></tr>
<tr><td>11.</td><td>Scientific justification is required regarding the variation of retention time of apremilast observed in the chromatograms of all three strengths, it varies from 11 minutes till 22 minutes, justify it with system suitability report.</td><td>Firm in their reply stated that "we have submitted data of 6months of apremist 10mg &20mg and 2 years for apremist 30mg ,so the test performed in different time period may influenced by the conditions that is change in lots of chemical used, mobile phase preparations, analyst and column conditions.</td></tr>
<tr><td>12.</td><td colspan="2">Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
Firm submitted the following information:
<table><tr><td>Lot No.</td><td>Batch of Drug Product</td></tr></table></td></tr>
</table>

	Apremist 10mg tablet	
	82190049 from Glenmark Life Sciences Ltd.	004T21 004T22 004T23
	Apremist 20mg tablet	
	82190049 from Glenmark Life Sciences Ltd.	007T21 008T21 009T21
	Apremist 30mg tablet	
	HF151118 from Kaifing Pharmaceuticals Co. Ltd.	007T16
	HF151025 from Kaifing Pharmaceuticals Co. Ltd.	011T16
	HF151025 from Kaifing Pharmaceuticals Co. Ltd.	012T16
13.	Justify, how the batch no. H02248A of innovator product otezla tablet that was manufactured in 2021 according to the expiry date of 05-2023 could be available for the performance of Comparative dissolution testing back in the year 2018, since as per the submitted CDP report of apremist 30mg Tablet analysis has been done in 2018. Firm replied that we are again submitting the CDP report of Apremist 30mg tablet in which expiry date of innovator product is mentioned as Nov.2020. Otezla 30mg Tablet Batch no. H02248A Exp date : Nov-2020	

Decision: Approved registration of starter pack (1 pack only) with innovator's specifications as per details mentioned in above decision

- **Registration letter will be issued after submission of revised and scientifically rationale CDP report by keeping in view the BCS classification of active ingredient.**
- **Firm shall submit the fee of Rs. 7,500 for revision of specifications per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The Board further decided that registration letter for apremilast 30mg (already approved) will be issued after approval of starter pack.**

Cases of Diclofenac Potassium:

In compliance of decision of Authority taken in its 140th meeting, regarding the out of que consideration of registration applications of diclofenac potassium and famotidine, following are the registration applications of diclofenac potassium received in DRAP were evaluated out of que and shortcoming letters have communicated to the firms but reply has not received yet, cases presented before the Board for its consideration please.

516.	Name, address of Applicant / Marketing Authorization Holder	M/s Quaper Pvt. Ltd.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	For Diclofenac Potassium Copy of GMP certificate No.NEW-WHO-GMP/CERT/KD/84387/2019/11/29412 issued by Food & Drug administration Maharashtra state India.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted	

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm informed that their HPLC system has not in compliant with 21CFR SOFTWARE.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.No.	Deficiencies/ Short-comings	Reply of the Firm
1.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s)"	Firm submitted the analytical method verification report of drug substance performed by drug product manufacturer.
2.	Justification is required for not including the microbial enumeration test, test for specified microorganism and pH determination test while analysis of trial batches of drug product, since these tests are the part of USP monograph of diclofenac potassium for oral solution.	Firm in their reply stated that: "Microbial & Ph determination tests as specified in USP monograph for diclofenac potassium for oral solution were performed during stability studies of all three trial batches but erroneously it could not be submitted with dossier. We are submitting the microbial test report.
3.	Justify for not performing the test for determination of pH while stability study of trail batches of drug product.	Firm in their reply stated that "pH determination test as specified in USP monograph for diclofenac potassium for oral solution were performed during stability studies of all three trial batches but erroneously it could not be submitted with dossier in the stability summary sheet. Correct summary report are submitted.

Decision: Approved with USP specifications.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator brand that is Diclorep 50 mg tablet by M/s. Sami Pharmaceuticals by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand in Acid media 0.1N HCl (pH 1.2), Buffer (pH 4.5) & Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	Name of API: Diclofenac Potassium M/s. Henan Dongtai Pharm Co. Ltd. East Changhong Road,Tangyin Henan,China		
API Lot No.	Diclofenac Potassium Batch No. 20200329,20200330,20200331		
Description of Pack (Container closure system)	Detran-P Tablets are packed in Alu-PVC packing.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trial-001	Trial-002	Trial-003
Batch Size	8000 Tablets	8000 Tablets	8000 Tablets
Manufacturing Date	05-2021	05-2021	05-2021
Date of Initiation	01-06-2021	01-06-2021	01-06-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	For Diclofenac Potassium Copy of GMP certificate No. HA20170001 issued by China Food and Drug Administration
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.No.	Deficiencies/ Short-comings	Reply of the Firm

1.	Provide compatibility studies of the drug Substance(s) with excipients as the qualitative composition of the formulation is not similar to innovator / reference product in section 3.2. P.2.1.1.	Firm submitted the summary report of compatibility testing study in which it was stated that FTIR spectral and HPLC analysis showed that there is no appearance or disappearance of any characteristic peaks of pure drug Diclofenac Potassium and in the physical mixture of all other excipients which confirms the absence of chemical interaction between drug substance and excipient.
2.	As per the USP monograph of diclofenac potassium tablet the recommended dissolution medium should be Simulated intestinal fluid (without enzyme), while the dissolution medium of drug product mentioned in section 3.2. P.5.2 was buffer solution pH 6.8. Justify for not complying the USP monograph in terms of selection of dissolution medium.	Firm in their reply stated that in analytical testing method the word simulated intestinal fluid was missing due to typographical error. Correct copy of analytical procedure has resubmitted. Further, the firm stated, we have used exactly same composition of dissolution medium as specified in USP (Intestinal Fluid, simulated) as evident from the submitted analytical procedure. However, USP monograph do not specify the composition of dissolution medium. Reference literature revealed that the pH of simulated intestinal fluid is between 6.50-6.60 (25 °C, after dilution)
3.	According to the dissolution data of stability batches of drug product more than 95% drug release within 60 minutes, then justify the setting of broader acceptance criteria for dissolution testing i.e. NLT 75% within 60 minutes. Further, the acceptance criteria of dissolution recommended by USP is in term of Q value, justify for not adapting the acceptance limit with the Q value.	Firm rectify the acceptance limit of dissolution test in terms of Q value and revised the criteria to "NLT 75% (Q) of the labeled amount dissolved in 60 minutes." Further, the firm did not give any justification of setting of broader acceptance criteria for dissolution testing i.e. NLT 75% within 60 minutes, despite of achieving 95% drug release within 60 minutes.

Decision: Approved with USP specifications.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

518.	Name, address of Applicant / Marketing Authorization Holder	M/s. Batala Pharmaceuticals 23/B, Small Industrial Estate No.2 Gujranwala
	Name, address of Manufacturing site.	M/s. Batala Pharmaceuticals 23/B, Small Industrial Estate No.2 Gujranwala
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.1162 dated 18-01-2022
	Details of fee submitted	PKR 30,000/-: dated 15-12-2021

	The proposed proprietary name / brand name	Beflam 50mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sugar-coated tablet contains: Diclofenac Potassium……50 mg
	Pharmaceutical form of applied drug	Oral tablet
	Pharmacotherapeutic Group of (API)	Non-steroidal anti-inflammatory Drug (NSAID)
	Reference to Finished product specifications	USP Specs
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved.
	For generic drugs (me-too status)	Ariflam Tablet of M/s. Aries Pharmaceuticals (Reg.no.054526)
	GMP status of the Finished product manufacturer	Copy of GMP certificate not attached.
	Name and address of API manufacturer.	M/S Aarti Drugs Limited (G-60). Plot No. G-60, Midc, Tarapur, Boisar Tal. Palghar, Dist:Thane.Maharashtra. India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Monograph of Diclofenac Potassium exist in USP pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Diclofenac Potassium Batches: (DFK/10070024, DFK/10070025, DFK/10070026)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator brand that is Caflam 50mg tablet by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form).

		CDP has been performed against the same brand in Acid media 0.1N HCl (pH 1.2), Buffer (pH 4.5) & Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Remarks OF Evaluator:

S.No.	Deficiencies/ Short-comings	Reply of the Firm
1.	Submit specifications as well as analytical method of drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm submitted the specification and analytical procedure of drug substance in accordance with USP.

2.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s)"	Firm submitted the verification report of drug product instead of drug substance as evident from the sample preparation of submitted report.
3.	Composition of drug product given in section 3.2.P.1 mentioned chloroform in the sugar-coating material, please elaborate the role of chloroform in the applied composition and provide scientific rational of its usage, along with the international literature reference.	Firm in their reply stated that "it was clerical mistake we are using IPA 70% as an organic solvent instead of chloroform for dissolving waxes.
4.	Provide compatibility studies of the drug Substance(s) with excipients as the qualitative composition of the formulation is not similar to innovator / reference product in section 3.2. P.2.1.1.	Firm in their reply stated that we have done placebo analysis in method verification in section 3.2.S.4.3,which did not show any interference of excipients with drug substance.
5.	Provide results of all quality test specify in the USP monograph of diclofenac potassium tablet to establish the pharmaceutical equivalence between reference and test product since the results are not mentioned.	Firm submitted the pharmaceutical equivalence report with caflam 50mg Tablet of M/s. Novartis with the result of assay, dissolution and disintegration.
6.	Justify how your product is comparable to reference product when the similarity factor f2 was below 50 as evident from the submitted CDP report of drug product.	Firm submitted the revised CDP report without any justification.
7.	BMR of drug product revealed the source of active ingredient was China, while, as per the S-part of CTD dossier, source of drug substance was AARTI Drug Limited, India, clarification is required in this regard.	Firm in their reply stated that it was mistakenly written China in BMR, correct copy of BMR has submitted.
8.	Scientific justification is required for using completely different method for assay of drug product then specified in USP monograph. Similarly, the analytical procedure verified in section 3.2.P.5.3 was also not in accordance with the method of assay recommended by USP monograph of diclofenac potassium tablet.	Firm submitted the reply that it was a clerical mistake that was submitted in section 3.2.P.5.3.Further, they stated that "we have performed all test during stability study in accordance with USP monograph. But, firm did not submit any documented evidence neither submitted the correct procedure. Further, the raw data sheet of stability data submitted in the reply again revealed that the assay procedure was not in accordance with USP in terms of chromatographic condition and the calculations.
9.	In section 1.5.6 you have specified that the pharmacopoeial reference of drug product was USP while in section 3.2.P.5 it is mentioned that the product complies inhouse specification, clarification is required either drug product complies pharmacopoeial reference or the in-house specification.	Firm stated that their drug product comply USP specification and they rectified the information in section 3.2.P.5.
10.	Provide detailed composition and preparation method of simulated intestinal fluid that is the recommended dissolution medium of diclofenac potassium tablet.	Firm submitted the dissolution medium details according to which pH 6.8 buffer medium has been prepared under the head of simulated intestinal fluid.

11.	Clarify the acceptance criteria of dissolution in term of time point at which NLT 75% should be achieved, as the time point has not mentioned on stability data sheet. Further set the acceptance criteria of dissolution in term of Q, since the USP monograph specify the limit with Q value i.e. NLT 75% (Q) of the labeled amount of diclofenac potassium dissolved.	Firm submitted the document which concluded that value of Q is 75% at time T 30 minutes. Firm neither correct the specification in section 3.2 P.5.1 nor in stability summary sheet.
12.	• Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Provide Reference of previous approval of applications with stability study data of the firm (if any) • Documents for the procurement of API with approval from DRAP (in case of import). • Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm submitted the COA of API of batch no. DFK/11010013 along with documented evidence of procurement of API. Further, firm submitted the audit trail report and digital data logger record.

Decision: Approved. Firm shall submit following before issuance of registration letter:

- **Analytical method verification report of drug substance performed by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.**
- **Submission of revised method for assay testing of drug product in accordance with USP monograph of "Diclofenac potassium tablet" and accordingly performance of assay in compliance with USP on next time point of stability.**
- **Submission of revised dissolution limits in terms of %age released and time point from that recommended by the US FDA for innovator product and in compliance of USP monograph. Further, performance of dissolution testing in line with revised specification on next time point.**
- **Firm shall submit the fee of Rs. 7,500 for revision of specifications per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Cases of Form 5-F

519.	Name, address of Applicant / Marketing Authorization Holder	M/s SAMI Pharmaceuticals (Pvt) Ltd. F-95, Off Hub River Road, S.I.T.E. Karachi.

Date of Initiation	03-4-2020	03-4-2020	03-4-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Reference of our last onsite panel inspection for instant dosage form conducted during last three years LAGITA Double Action Suspension (Sodium Alginate + Sodium Bicarbonate + Calcium Carbonate) 500mg + 213mg + 325mg on 30th January 2020 The inspection report confirms following points The HPLC software is 21CFR Compliant 1. Audit trail on the testing reports is available. 2. Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. 3. Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 5884/E1/2018 issued by DRUGS CONTROL ADMINISTRATION Government of Telangana valid till 27/03/2022
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice# AEX/085/2019-20 dated 27th November 2019

		with received quantity i.e. 400gm) for the purchase of Bilastine from M/s Virupaksha Organics Ltd. India with attestation of DRAP dated 03-12-2019
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

Sr.no.	Shortcomings/Deficiencies	Response of the Firm
1.	Provide Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin since the submitted GMP certificate was valid till 2021.	Firm has submitted the copy of GMP certificate of drug substance manufacturer i.e. M/s. Virupaksha Organic Limited, Telangana state which is valid up till 29/01/2022.
2.	Justification is required for not performing the powder x-ray diffraction test by drug product manufacturer to confirm the polymorphic state of drug substance, since the bilastine has three different polymorphic forms. Further, the test has been included in the COA of the drug substance manufacturer.	Since, the testing facility of P-XRD is not available in Pakistan therefore we rely on drug substance manufacturer COA.
3.	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted preservative effectiveness studies of drug product.
4.	Justification is required for not performing compatibility studies of excipient with active ingredient, since the solubilizing agent of innovator is betadex and you have using β-Cyclodextrin sulfobutylether, sodium salt as a solubilizer.	Firm submitted the API- Excipient compatibility study report of bilastine oral solution.
5.	Provide data of pharmaceutical equivalence against the innovator product to justify your formulation development as per the requirement of section 3.2. P.2.2.1.	Firm submitted the reply that the reference product is not available in Pakistan, they have tried to arrange it from the country of origin but unfortunately not succeeded.

Decision: Deferred for submission of pharmaceutical equivalence report against the innovator drug product.

	Name, address of manufacturer(s)	M/s BEACON Pharmaceuticals Limited Plant address: Kathali, Bhaluka, Mymensingh Bangladesh Office address: 9/B/2, Toynbee Circular Road, Motijheel Dhaka, Bangladesh
	Name of exporting country	Bangladesh
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP: Original legalized COPP (Certificate# DA/6-110/2016/3300 issued on 01-06-2020 by Government of the people's republic of Bangladesh, Ministry of Health & Family welfare, Directorate General of Drug Administration, Oushad Bhaban, Mohkhali Dhaka-1212, Bangladesh. GMP: Firm has submitted Legalized GMP certificate (Certificate No. DA/6-110/06/10002) issued by M/s Beacon Pharmaceuticals limited. Also, Renewal certificate is submitted (Certificate No. DA/6-110/06/4950).
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from Beacon Pharmaceuticals limited.

		The letter specifies that the manufacturer appoints M/s Himmel Pharmaceuticals Pvt. Ltd. to register their products in Pakistan. The authorization letter is valid till June, 2025.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No.16561 Date:15.06.2021
	Details of fee submitted	PKR: 100,030/- Date: Dec-2020
	The proposed proprietary name / brand name	Pazonix 200mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains Pazopanib Hydrochloride INN….200mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	In house
	Proposed Pack size	30’s (HDPE Bottle)
	Proposed unit price	As per current pricing policy of DRAP
	The status in reference regulatory authorities	Votrient 200mg Tablet
	For generic drugs (me-too status)	Votrient (Novartis)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Ace bright (India) Pharma Private Limited Address: No. 77D &116/117, KIADB Industrial Area Jigani, Bangalore - 560 105 Karnataka, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container

		closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 12 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Votrient 200mg (Novartis) has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Evaluation by PEC:

Sr.no.	Shortcomings/Deficiencies	Response of the Firm
1.	Submit data of analytical Method verification studies including specificity, accuracy and repeatability (method precision).	Firm has submitted analytical method validation studies of drug substance performed by drug product manufacturer.
2.	Justify acceptance criteria set for dissolution test i.e. NLT 70% (Q) in 60 minutes, which is not as per the international guidelines as well as the decision of Registration Board i.e. "*For all type of drug products, the value of "Q" should not be less than 75% in any case as per the recommendations of United States Pharmacopoeia (USP) General Chapter <711> Dissolution, Dissolution testing in BP finished products monographs for solid oral dosage forms and The International Pharmacopoeia Ninth Edition, 2019 -Dissolution testing of tablets and capsules"*. As per the submitted data percentage of drug release at 30 minutes was 55.09% in the USFDA recommended	Firm has submitted the reply, in which it is stated that "The dissolution time for pazonix 200mg tablet has been selected 60 minutes as per the FDA dissolution database. In the database, USP apparatus Type-II and 10,20,30,45 and 50 min has been mentioned for profiling. For the immediate release tablet, we have selected 60 mins as a single time point. Firm has not given any scientific justification for selecting the extreme time point i.e. 60 minutes for dissolution of drug product, while the FDA review document of innovator product reveals that the dissolution criteria should be Q= at 30 minutes using the following conditions. Apparatus: USP Apparatus 2 Volume: 900 mL Medium: 50 mM sodium acetate buffer, pH 4.5, containing 0.75% SDS Agitation: Paddle speed of 75 rpm. Analysis: UV at 270 nm with a background correction at 400 nm. Temperature: 37°C.

	release media. Justify, how your formulation can be considered equivalent to the innovator product which shows release more than Q+5% in 30 minutes.	
3	• Justify how the results of all quality tests for every batch in stability studies are same at all time points. • Justification is required regarding the out of specification assay results i.e. 46.5mg content of pazopanib per tablet at 6-month time interval during the accelerated stability studies of batch no. 3860003 and 3860004.	Firm has not provided any justification regarding these queries, instead submit the stability data of commercial batches. (batch no. 3860005,3860006,3860007)
4	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Firm has submitted the Batch Manufacturing Record of batch no. 3860002, 3860003 and 3860004.
5	Firm has submitted the differential fee of Rs. 50,000 vide Challan no.78134245317 dated 22-08-2022 for finished import drug product, as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021.	

Decision: Deferred for Scientific justification regarding difference in dissolution limits in terms of %age released and time point from that recommended by the US FDA for innovator product .

Previously Deferred Cases of Form 5-F:

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Colistimethate Sodium….1MIU
	Pharmaceutical form of applied drug	Glass vial filled with almost white to off-white coloured Lyophilized Powder.
	Pharmacotherapeutic Group of (API)	Antibiotics

	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	Colistim Injection by Pharmasol (Pvt) Ltd
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 23-4-2019, valid upto 22-4-2022.
	Name and address of API manufacturer.	Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc, Boisar District –Thane.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 6oC ± 2 oC, RH for 48 months Accelerated: 25oC ± 2 o C/60% ± 5%RH for 6 months Batches:(CLS0219006, CLS0219008, CLS0219009)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Colistim Injection by Pharmasol (Pvt) Ltd.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.
STABILITY STUDY DATA		
Manufacturer of API		Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc, Boisar District –Thane.
API Lot No.		A1680997, A1681004, A1600290
Description of Pack (Container closure system)		Glass vial
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period		Real time: 24 months Accelerated: 6 months
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 ,9,12,18,24(Months)

Batch No.		L-159	L-182	L-199
Batch Size		18200 Vials	28000 Vials	30000vials
Manufacturing Date		05-2018	09-2018	12-2018
Date of Initiation		29-05-18	03-10-18	21-12-2018
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empaglif 10mg & 25mg tablet in 296th meeting (Bio-Labs (Pvt). Ltd, Islamabad).		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (NEW-WHO GMP/CERT/KD/74238/2018/11/24897) issued by Maharashtra food and drug administration dated 11-09-2018. The certificate is valid till 10-09-2021.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Colistimethate sodium 5Kg from Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc, Boisar District –Thane. The license was issued on 14-02-2020. • Firm has submitted copy of commercial invoice dated 14-02-2020 specifying import of Colistimethate sodium 5Kg. The invoice is signed by AD (I&E) DRAP.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches including COA and summary data sheets.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The product specifications of colistimethate sodium injection based on USP and there is no application of HPLC in testing method because the assay method based on microbial assay therefore compliance record of HPLC is not applicable here.		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.		

Remarks OF Evaluator:

• Provide detailed analytical procedures for the testing of drug substance by the drug product manufacturer. • Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Firm submitted the analytical method verification studies. Verification has been done on assay procedure which is also not as per the USP.
Justify 90.1mg filled weight of colistimethate sodium per vial against the labelled claim of colistin activity as per the USP monograph of "colistimethate for injection".	Nominal potency of colistimethate sodium used for calculation of filled weight is not correct, according to the innovator product of Colistimethate sodium 1MIU the nominal potency of the drug substance =12,500 IU/mg. So, using of 90.1 filled weight is still not scientifically rationale.
All quality test as per USP monograph has not been performed while establishing the pharmaceutical equivalence against the reference product. Provide results of all quality test of applied and reference product as per USP to establish pharmaceutical equivalence.	Test for uniformity of dosage unit, loss on drying, and free colistin under Colistimethate Sodium are not performed while establishing pharmaceutical equivalence with the reference product, while these tests are included in the USP monograph of colistimethate sodium injection.
Details of type and quantity of diluents used for reconstitution for of applied product is required.	According to the submitted information, to reconstitute the injection, use 3ml 0.9% sodium chloride solution.

	While the international reference product including the innovator, use the range of 7ml-10ml of water for injection or 0.9% sodium chloride for reconstitution of colistimethate injection.
Provide detailed analytical procedures used to evaluate the quality of drug product by the Manufacturer M/s. Bio-Lab Pvt. Ltd.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Further, the test for uniformity of dosage unit, loss on drying, heavy metals, and free colistin under Colistimethate Sodium are not included in finished product specification, since these tests are included in the USP monograph.
According to the filled BMR batch size of Batch L-159, L-199 and L-182 is 11090vials,11,000 vials and 11050 vials respectively. While according to the stability data sheet batch size of all three batches are L-159 18,200 vials, L-199 30,000 vials and L-182 28,000 vials. Justification is required regarding the disparity observed in the batch sizes of the same batch.	Firm submitted the reply that "Batch sizes mentioned on stability was written mistakenly. Please consider BMR batch sizes (11,111 packs) as valid batch size. Correct stability data has been submitted.

Decision of 316th meeting of Registration Board:
Deferred for the submission of following:

- Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
- Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:
Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.
Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.

Decision: Registration Board deferred the case for following points:

- **submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.**
- **Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.**

• **Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.** • **Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.**

- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:
Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.
Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.

Decision: Registration Board deferred the case for following points:

- **submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.**
- **Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.**
- **Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.**
- **Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.**

524.	Name, address of Applicant / Marketing Authorization Holder	M/s Novartana Pharmaceuticals (Pvt). Ltd 87-B Plot of Sundar Industrial Area, Raiwind Road, Lahore Pakistan.

	Status of the applicant	☐Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No.10322 dated 02/04/2021
	Details of fee submitted	PKR 50,000/-: vide slip no. 1913592 dated 08/03/2021
	The proposed proprietary name / brand name	ColiNova 1MIU Injection IV

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Colistimethate Sodium…….…….1MIU
	Pharmaceutical form of applied drug	Glass vial filled with almost white to off-white colored Lyophilized Powder.
	Pharmacotherapeutic Group of (API)	Antibiotics
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	Colistim Injection 80mg by Pharmasol (Pvt) Ltd. Reg.no. 089922
	GMP status of the Finished product manufacturer	GMP certificate no. F.3-19/2019-Addl.Dir. (QA&LT-I) issued based upon inspection conducted on 23-04-2019, valid up to 22-04-2022.
	Section Approval Status	Firm has Lyophilized vial section as per the GMP certificate issued based upon inspection conducted on 23-04-2019, valid up to 22-04-2022.
	Name and address of API manufacturer.	DMF Holder Address: Mac Chem Products (India) Pvt. Ltd. 304, Town Centre, Andheri-Kurla Road, Andheri East Mumbai Manufacturing and Testing Facilities: Mac-Chem Products (India)Pvt.Ltd N-211/2/10, MIDC, Boisar District –Thane. Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5% RH for 12 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(CLS0219006, CLS0219008, CLS0219009)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence Biological Assay for their product against the comparator i.e. Colistim Injection 80mg by Pharmasol (Pvt) Ltd.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA				
Manufacturer of API		Mac-Chem Products (India)Pvt.LtdN-211/2/10, MIDC, Boisar District –Thane.		
API Lot No.		A1680997, A1681004, A1600290		
Description of Pack (Container closure system)		Glass vial		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 24 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 ,9,12,18,24(Months)		
Batch No.		L-159	L-182	L-199
Batch Size		18200 Vials	28000 Vials	30000vials
Manufacturing Date		05-2018	09-2018	12-2018
Date of Initiation		29-05-18	03-10-18	21-12-2018
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empaglif 10mg & 25mg tablet in 296th meeting (Bio-Labs (Pvt). Ltd, Islamabad).		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (NEW-WHO GMP/CERT/KD/74238/2018/11/24897) issued by Maharashtra food and drug administration dated 11-09-2018. The certificate is valid till 10-09-2021.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Colistimethate sodium 5Kg from Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc,Boisar District –Thane. The license was issued on 14-02-2020. • Firm has submitted copy of commercial invoice dated 14-02-2020 specifying import of Colistimethate sodium 5Kg. The invoice is signed by AD (I&E) DRAP.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches including COA and summary data sheets.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.		

Remarks OF Evaluator:

• Provide detailed analytical procedures for the testing of drug substance by the drug product manufacturer. • Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Firm submitted the analytical method verification studies.

	Verification has been done on assay procedure which is also not as per the USP.
Justify 90.1mg filled weight of colistimethate sodium per vial against the labelled claim of colistin activity as per the USP monograph of "colistimethate for injection".	Nominal potency of colistimethate sodium used for calculation of filled weight is not correct, according to the innovator product of Colistimethate sodium 1MIU the nominal potency of the drug substance =12,500 IU/mg. So, using of 90.1 filled weight is still not scientifically rationale.
All quality test as per USP monograph has not been performed while establishing the pharmaceutical equivalence against the reference product. Provide results of all quality test of applied and reference product as per USP to establish pharmaceutical equivalence.	Test for uniformity of dosage unit, loss on drying, and free colistin under Colistimethate Sodium are not performed while establishing pharmaceutical equivalence with the reference product, while these tests are included in the USP monograph of colistimethate sodium injection.
Details of type and quantity of diluents used for reconstitution for of applied product is required.	According to the submitted information, to reconstitute the injection, use 3ml 0.9% sodium chloride solution. While the international reference product including the innovator, use the range of 7ml-10ml of water for injection or 0.9% sodium chloride for reconstitution of colistimethate injection.
Provide detailed analytical procedures used to evaluate the quality of drug product by the Manufacturer M/s. Bio-Lab Pvt. Ltd.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Further, the test for uniformity of dosage unit, loss on drying, heavy metals, and free colistin under Colistimethate Sodium are not included in finished product specification, since these tests are included in the USP monograph.
According to the filled BMR batch size of Batch L-159, L-199 and L-182 is 11090 vials, 11,000 vials and 11050 vials respectively. While according to the stability data sheet batch size of all three batches are L-159 18,200 vials, L-199 30,000 vials and L-182 28,000 vials. Justification is required regarding the disparity observed in the batch sizes of the same batch.	Firm submitted the reply that "Batch sizes mentioned on stability was written mistakenly. Please consider BMR batch sizes (11,111 packs) as valid batch size. Correct stability data has been submitted.

Decision of 316th meeting of Registration Board:
Deferred for the submission of following:

- Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
- Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:
Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.
Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.

Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies. Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included. Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies. Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.
Decision: Registration Board deferred the case for following points: • **submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.** • **Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.** • **Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.** • **Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.**

525. <u>Previously Deferred case of Finished Import Product of Form5-F</u>

Name, address of Applicant / Importer	M/s. Martin Dow Limited Plot no. 37, Sector 19, Korangi Industrial Area, Karachi.
Details of Drug Sale License of importer	License No: 521 Address: Plot No.37 Sector 19 K.I.A. Karachi Godown Addresses:1. 1st Floor Plot no.211 Sector 23 K.I.A. Karachi Plot no. 302 Sector 16 K.I.A. Karachi Validity: 16/06/2022 Status: by way of wholesale

Name of exporting country	Malaysia
Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) • Original legalized & marketed COPP (Certificate# 0095/2021) issued by Pharmaceutical Services Division Ministry of Health Malaysia. • Firm has submitted Legalized copy of GMP certificate (Certificate No.1330/19) issued by Competent authority of "Malaysia" in the name of Duopharma HAPI Sdn. Bhd. No.2, Jalan Saudagar U1/16, Zon Perindustrian HICOM Glenmarie, Seksyen U1,40150 Shah Alam, Selangor, Malaysia., valid for 3 years from the date of inspection conducted on 16-17 July 2019.	
Details of letter of authorization / sole agency agreement • "Letter of Authorization" submitted issued by M/s. Duopharma HAPI Sdn. Bhd. No.2, Jalan Saudagar U1/16, Zon Perindustrian HICOM Glenmarie, Seksyen U1,40150 Shah Alam, Selangor, Malaysia. In the name of M/s Martin Dow for the applied product of "Lebreta 2.5mg (Letrozole Tablets)"	
Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
Status of application	☐New Drug Product (NDP) ☒Generic Drug Product (GDP)
Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales

For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
Dy. No. and date of submission	Dy. No.15628 dated 04-06-2021
Details of fee submitted	Rs.50,000/- dated 03-06-2021 slip no. 73776950099
The proposed proprietary name / brand name	Lebreta 2.5mg (Letrozole Tablets)
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains 2.5mg of letrozole
Pharmaceutical form of applied drug	Film-coated tablets
Pharmacotherapeutic Group of (API)	Anti-neoplastic agents, ATC code: L02BG04
Reference to Finished product specifications	USP
Proposed Pack size	30's
Proposed unit price	As per DPC
The status in reference regulatory authorities	FDA approved
For generic drugs (me-too status)	Femara Tablet 2.5mg of M/s. Novartis (Pakistan) Limited (Reg.no.021129)
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Name, address of drug substance manufacturer	M/s. Natco Pharma Limited, Chemical Division, Mekaguda Village, Nandigama Mandal, Rangareddy District Telangana, India (L.Dis.No.758/E/(k)/TS/2018 dated 14-02-2018)
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability studies has been performed and submitted by the firm.
Module-III Drug Product:	All the relevant details are submitted by the firm.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has performed pharmaceutical equivalence studies and comparative dissolution with the innovator product Femara tablet.
Analytical method validation/verification of product	Analytical method validation studies for drug product has been performed.
Container closure system of the drug product	Blisters
Stability study data of drug product, shelf life and storage conditions	Stability studies has been performed and submitted by the firm. Real time stability studies have been conducted at 30°C/75 % RH. Batch Number — Status 20181101PB — Completed till the claimed shelf life i.e.2years

	20191201 12month data has been submitted 20200201 12month data has been submitted Accelerated stability studies is conducted at 40°C±2°C and 75%±5% RH for 6 months. Shelf life: 24month

Remarks of Evaluator:

Sr.#	Section#	Observations	Firm's response
1.	3.2. S.4	Justify, the verification studies of the drug substance without performing test for accuracy parameter.	The methods for drug substance were adopted from the USP40 Monograph. It is considered as Method Verification (Compendial Method). Based on USP General Chapter <1226>, the verification requirements/parameters that are considered to be appropriate for verification of the particular procedure need to be evaluated during the method verification. The Malaysia, National Pharmaceutical Regulatory Agency (NPRA), formerly known as the National Pharmaceutical Control Bureau (NPCB) had come out with an Analytical Method Validation Guideline stating that the Accuracy parameter and the reliability of these methods are not required to be validated for monograph method (compendial method), but merely verify the methods suitability (System Suitability Testing) under actual conditions of use. Hence, the method verification (compendial method) was not conducted. The accuracy parameters were only performed when validating non-compendial methods. According to the USP General Chapter <1226>*Verification should include an assessment of elements such as the effect of the matrix on the recovery of impurities and drug substances from the drug product matrix, as well as the suitability of chromatographic conditions and* *column, the appropriateness of detector signal response, etc. Recovery studies. This statement indicates that accuracy parameter is the part of verification studies.*
2.	P.2.2.1	Product development studies performed by sending unit i.e. Natco Pharma revealed that after optimization of formulation, the cumulative % of drug release is not less than 85% within 15min as evident from the comparative dissolution profile of exhibit batch of Natco Pharma with RLD Femara tablet in all 4 mediums with 75rpm.While the Comparative dissolution profile of receiving unit i.e. DUOPHARMA HAPI SDN.BHD.Malaysia with the product of Natco pharma shows that average % release of both products are less than	Duopharma HAPI also conducted CDP against Femara 2.5mg (Letrozole) (Brand Leader) and Letrozole Tablets USP, 2.5mg (Natco Pharma). The batch number as below: 1. Duopharma HAPI: 20200201 2. Brand Leader: SUH88 3. Natco Pharma: 410120 From the report (DH.QC.R.CD.002.AD.01), the % dissolution for Natco Pharma at 15 mins for all 4 mediums were also less than 85%. The CDP was proven similar by F2 calculation.

		85% in 15minutes. Justify, the significant variation observed in cumulative % of drug release. • Provide Pharmaceutical Equivalence report between Lebreta tablet and innovator product since the submitted report was between letrozole tablet of Natco Pharma and femara tablet (innovator product).	The Bioequivalent Study (BE) was also conducted for Duopharma HAPI product (Batch No.: 20200201) against the Brand Leader (Batch No.: SUH88) and the BE study passed. Therefore, it justifies the variation of dissolution of < 85% at 15 mins timepoint is not significant.
3.	3.2.P.5.3	Justify, why the accuracy parameter has been performed only at 100% concentration, since the ICH guideline for validation of analytical procedure specify that "*Accuracy should be assessed using a minimum of 9 determinations over a minimum of 3 concentration levels covering the specified range (e.g., 3 concentrations/3 replicates each of the total analytical procedure).*"	For Finished Product, the approach of the method was by the Method Transfer (Comparative Testing Approach) as the Duopharma HAPI Sdn Bhd is a Technology Transfer Plant. This Method Transfer is governed under USP General Chapter <1224> Transfer of Analytical Procedures. Based on the guideline, the method transfer is a documented process that qualifies a laboratory (the Receiving Unit) to use an analytical test procedure that originated in another laboratory (the Transferring Unit) to ensure that the Receiving Unit has the procedural knowledge and ability to perform the transferred analytical procedure as intended. The method validation must be completed prior to the Method Transfer activity. For these methods of the Finished Product, the method validations were conducted by the Transferring Unit. The accuracy parameter was conducted by Transferring Unit based on the ICH Guideline and the USP General Chapter <1225> Validation of Compendial Procedures. The details are as below: 1. Assay: 20%, 100%, 200% and 320% concentration level where each concentration had triplicate samples (total = 12 samples) 2. Related Compounds: LOQ%, 50%, 100% and 200% concentration level where each concentration had triplicate samples (total = 12 samples) 3. Dissolution: 40%, 100% and 160% concentration level where each concentration had triplicate samples (total = 9 samples) During the Method Transfer activity, the accuracy parameter was included at only 100% concentration to verify the method accuracy at the actual concentration of testing.
4.	3.2.P.8.2	Justify the out of specification result of dissolution at 18th month time point i.e. 79% since the acceptance criteria of dissolution is NLT 80% (Q) in 30 minutes.	The dissolution for 18th month timepoint for 20181101PB was still passed within the acceptance criteria at Stage 2. Based on USP General Chapter <711>.The first 6 tablets (Stage 1) obtained below Q (Q=80%), which was 79% (minimum result), then Stage 2 was proceeded. Another 6 tablets were analyzed. Based on 12 tablets (Stage 1 + Stage 2), the average reading obtained was 88% which is ≥ Q (Q=80%) and no tablet was < Q-15% (Q-15% = 65%).

			Therefore, the dissolution at 18th month for 20181101PB passed within the acceptance criteria at Stage 2. Moreover, the additional timepoints of the following batches have been completed.
5.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) of drug product of batch no.20181101PB, since the stability studies data of the said batch has been submitted in Module 3 section 3.2. P.8.	Firm has provided the BMR of batch no. 20181101PB.

Decision of 316th meeting of Registration Board:
Deferred for submission of following:

- Pharmaceutical equivalence studies data of Lebreta 2.5mg tablet manufactured by M/s. Duopharma HAPI Sdn. Bhd. No.2, Jalan Saudagar U1/16, Zon Perindustrian HICOM Glenmarie, Seksyen U1,40150 Shah Alam, Selangor, Malaysia against the innovator product/reference product, since the submitted pharmaceutical equivalence data was between letrozole tablet of M/s Natco Pharma and Femara tablet (innovator product).
- Analytical verification studies of drug product in accordance with relevant guidelines.

Response of the Firm:
Pharmaceutical equivalence studies data of Lebreta 2.5mg tablet manufactured by M/s. Duopharma HAPI Sdn. Bhd. No.2, Jalan Saudagar U1/16, Zon Perindustrian HICOM Glenmarie, Seksyen U1,40150 Shah Alam, Selangor, Malaysia against the innovator product/reference product, since the submitted pharmaceutical equivalence data was between letrozole tablet of M/s Natco Pharma and Femara tablet (innovator product).
Firm has submitted pharmaceutical equivalence data, which incudes only the result of content of active ingredient of test product (Letronat 2.5 mg Tablet of M/s. Duopharma HAPI Sdn. Bhd., Malaysis and reference product (Femara 2.5mg Tablet manufactured by Novartis Pharma Stein, Switzerland).
Further, firm submitted the bioequivalence study report of Letronat 2.5 mg Tablet of M/s. Duopharma HAPI Sdn. Bhd., Malaysia with Femara 2.5mg Tablet manufactured by Novartis Pharma Stein, Switzerland.

Analytical verification studies of drug product in accordance with relevant guidelines.

- Firm submitted the reply in which it is stated that "the assay method was validated by Natco Pharma Limited and successfully transferred from Natco Pharma Limited to Duopharma HAPI via method transfer based on guidance from USP General Chapter <1224>". There are several approaches to the method transfer, for this method transfer, comparative testing approach has been adopted.
- Duopharma HAPI has performed the accuracy parameter at 100% concentration and Natco Pharma has performed it on 4 different concentrations and since Duopharma was comparing all the results with Natco Pharma Limited as the Method Transferrer. There is no requirement to test accuracy at 3 different concentrations.

Comparative testing approach in USP General Chapter <1224> stated that "Comparative testing requires the analysis of a predetermined number of samples of the same lot by both the sending and the receiving units. Other approaches may be valid, e.g., if the receiving unit meets a predetermined acceptance criterion for the recovery of an impurity in a spiked product. Such analysis is based on a preapproved transfer protocol that stipulates the details of the procedure, the samples that will be used, and the predetermined acceptance criteria, including acceptable variability. Meeting the predetermined acceptance criteria is necessary to assure that the receiving unit is qualified to run the procedure".
Firm has submitted the analytical method transfer report in accordance with the guidance of abovesaid USP General chapter.

Decision: Approved with USP specifications as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

Deferred Cases of Form-5:

526.	Name and address of manufacturer / Applicant	M/s. Innvotek Pharmaceuticals, Plot no.35, Industrial Triangle Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Bromycin-D Eye Ointment
	Diary No. Date of R& I & fee	(Duplicate Dossier) Dy. No. dated 15-03-2018 Rs. 8,000/- (photocopy)

		With the statement that due to late submission of differential fee 12,000/- there product was not discussed in any Registration Board so to avoid further delay they withdraw from the fee of rs. 8,000/- i.e. earlier submitted in April, 2005, Dy.no. 570.Now, they resubmitted Rs. 8,000/- and apply for the registration of product. Differential fee (photocopy) of Rs.12,000/- submitted on 05/11/2015 Dy.No.1950 (verified from R&I)
	Composition	Each gram contains: Tobramycin….3mg (0.3% w/w) Dexamethasone…1mg (0.1%w/w)
	Pharmacological Group	Aminoglycoside antibiotic/Corticosteroid
	Type of Form	Form-5
	Finished Product Specification	USP Specification
	Pack Size & Demanded Price	As per SRO
	Approval Status of Product in Reference Regulatory Authorities	USFDA Approved (Tobradex Ophthalmic Ointment tobramycin 0.3% (3 mg) and dexamethasone 0.1% (1 mg).
	Me-too Status	Obradex Eye Ointment of M/s. Vega Pharmaceuticals, Lahore (Reg.no.067753)
	GMP Status	GMP Certificate issued dated 11th January,2021 vide certificate no. F.3-64/2021-Addl.Dit. (QA&LT-I). Eye ointment & Cream (sterile) General section is mentioned in the said certificate.
	Remarks of the Evaluator.	Evidence of availability of separate steroidal dispensing booth is required.
	Decision of 312th meeting of Registration Board	Deferred for clarification regarding status of application.
	Response of the Firm	Firm submitted the clarification in response of decision of Registration Board in which it is stated that "It was mistakenly mentioned in the covering letter of year 2018 which was submitted with fee of Rs.8,000/-,regarding withdrawal of fee of Rs.8,000/- which was deposited initially in 2005 along with Form-5.
	Decision: Approved. • **Frim shall submit evidence of availability of separate dispensing booth for steroidal drug substance.** • **Firm shall also submit fresh fee of Rs. 30,000/-, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**	
527.	Name and address of manufacturer / Applicant	M/s Jawa Pharmaceuticals Pvt Ltd 112/10, Quaid-e-Azam Industrial Area, Kot Lakhpat, Lahore
	Brand Name +Dosage Form + Strength	M. Brozine Injection

	GMP Status	Panel inspection for renewal of DML conducted on 15-12-2020,16-12-2020,26-01-2021 concluded with the following remarks:

		"The panel recommends the renewal of Drug Manufacturing License to M/s. Jawa Pharmaceuticals (Pvt.) Ltd., Lahore by way of formulation"
	Remarks of the Evaluator.	
	Decision of 308th meeting of Registration Board	Deferred for verification of receiving of Registration application from R&I section, DRAP.
	Remarks of the Evaluator	R&I Section of DRAP verified the receiving of fee of Rs.8,000 vide Dy.no. 2283 dated 16-06-2011 and Differential fee of RS.12,000/- received vide Dy.no. 261 dated 16-12-2015.
	Decision: Approved.	

A. Registration applications Veterinary (New): -

528.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.	
	Brand Name + Dosage Form + Strength	THAIBONDOL Suspension	
	Composition	Each ml Contains: Thiabendazole……133.00 mg	
	Diary No. Date of R & I & fee	Dy. No 12165 dated 06-03-2019; Rs.20,000/- dated 05-03-2019.	
	Pharmacological Group	Anthelmintic	
	Type of Form	Form - 5	
	Finished product Specification	USP	
	Pack size & Demanded Price	50ml,100ml,150ml,250ml,500ml,1000ml,2.5L	
	Approval status of product in Reference Regulatory Authorities	Not Applicable	
	Me-too status	Thiabendazole oral liquid,058716, Selmore Pharmaceuticals (Pvt) ltd Lahore	
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as " In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing , machinery/equipment , material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab (pvt) Ltd. Khanqah sharif Bahawalpur , was found to be operating at a satisfactory level of GMP compliance for the following sections only, oral Liquid (General)II and Aerosol section were under maintenance and were not functional at time of inspection": Liquid Injection Section (General) Oral Powder Premix Section (General) Oral Liquid (General)(I) Liquid Injection (penicillin) Dry Powder Injection (penicillin) Oral Powder (penicillin) Liquid Injection (hormone) Liquid Injection (Steroid)	
	Remarks of the Evaluator	• Master Formulation with complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Form 5 prescribed title page dully signed is not provided along with preregistration variation fee challan. • Composition of Active Ingredients per ML is required.	Firm has submitted fee challan No.1856802411 dated 16-06-2022 of 30000/= along with Composition of API /ml, master formulation, manufacturing method, finished product testing method and signed title page.
	Decision: Approved		
529.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.	

	Brand Name + Dosage Form + Strength	BIO-AMOXYLLIN Water Soluble Powder	
	Composition	Each 100 gm Contains: Amoxicillin Trihydrate Equivalent to Amoxicillin Base……70 mg	
	Diary No. Date of R & I & fee	Dy. No 12316 dated 06-03-2019; Rs.20,000/- dated 06-03-2019.	
	Pharmacological Group	Broad Spectrum Antibiotic	
	Type of Form	Form - 5	
	Finished product Specification	B.P (Vet)	
	Pack size & Demanded Price	100 g,250 g,500g,1 kg,2 kg,2.5kg,3kg,5,kg.As per SRO	
	Approval status of product in Reference Regulatory Authorities	Not Applicable	
	Me-too status	PRIMOX 70% WATER SOLUBLE POWDER, 074032, M/s prix pharmaceutical (Pvt) ltd., plot # 5 pharma city, 30-km Multan Road, Lahore.	
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as " In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing , machinery/equipment , material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab (pvt) Ltd. Khanqah sharif Bahawalpur , was found to be operating at a satisfactory level of GMP compliance for the following sections only, oral Liquid (General)II and Aerosol section were under maintenance and were not functional at time of inspection": Liquid Injection Section (General) Oral Powder Premix Section (General) Oral Liquid (General)(I) Liquid Injection (penicillin) Dry Powder Injection (penicillin) Oral Powder (penicillin) Liquid Injection (hormone) Liquid Injection (Steroid)	
	Remarks of the Evaluator	• Master Formulation with complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Form 5 prescribed title page dully signed is not provided along with preregistration variation fee challan.	Firm has submitted fee challan No.545022401 dated 16-06-2022 of 7500/= along with master formulation, manufacturing method, finished product testing method and signed title page.
	Decision: Approved		
530.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.	
	Brand Name + Dosage Form + Strength	TYLAX Injection	
	Composition	Each ml Contains: Tylosin Tartrate eq to Tylosin ……...200 mg	
	Diary No. Date of R & I & fee	Dy. No 12166 dated 06-03-2019; Rs.20,000/- dated 05-03-2019.	
	Pharmacological Group	Broad Spectrum Antibiotic	
	Type of Form	Form - 5	
	Finished product Specification	USP	

	Pack size & Demanded Price	100 ml glass vial type II, As per SRO	
	Approval status of product in Reference Regulatory Authorities	Not Applicable	
	Me-too status	Positive 200 Injection., 063504, M/s Cherished Pharmaceuticals (Private) Limited, Lahore	
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as " In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing , machinery/equipment , material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab (pvt) Ltd. Khanqah sharif Bahawalpur , was found to be operating at a satisfactory level of GMP compliance for the following sections only, oral Liquid (General)II and Aerosol section were under maintenance and were not functional at time of inspection": Liquid Injection Section (General) Oral Powder Premix Section (General) Oral Liquid (General)(I) Liquid Injection (penicillin) Dry Powder Injection (penicillin) Oral Powder (penicillin) Liquid Injection (hormone) Liquid Injection (Steroid)	
	Remarks of the Evaluator	• Master Formulation with complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Pack Size, container and closure is not provided. • Pre-registration variation fee challan.	Firm has submitted fee challan No.475433920 dated 16-06-2022 of 7500/= along with master formulation, manufacturing method, finished product testing method, Packing/closure and signed title page.
	Decision: Approved		
531.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.	
	Brand Name + Dosage Form + Strength	SELMEC Injection	
	Composition	Ivermectin……20 mg	
	Diary No. Date of R & I & fee	Dy. No 12162 dated 06-03-2019; Rs.20,000/- dated 05-03-2019.	
	Pharmacological Group	Anthelmintic	
	Type of Form	Form - 5	
	Finished product Specification	USP	
	Pack size & Demanded Price	250 ml,t ype II glass vial.	
	Approval status of product in Reference Regulatory Authorities	Not Applicable	
	Me-too status	FARMEC-2 INJECTION, 063722, LEADS PHARMA (PVT) LTD., ISLAMABAD.	
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as " In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing , machinery/equipment , material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab	

		(pvt) Ltd. Khanqah sharif Bahawalpur , was found to be operating at a satisfactory level of GMP compliance for the following sections only, oral Liquid (General)II and Aerosol section were under maintenance and were not functional at time of inspection": Liquid Injection Section (General) Oral Powder Premix Section (General) Oral Liquid (General)(I) Liquid Injection (penicillin) Dry Powder Injection (penicillin) Oral Powder (penicillin) Liquid Injection (hormone) Liquid Injection (Steroid)	
	Remarks of the Evaluator	• Master Formulation with Complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Pack Size, container and closure is not provided.	Firm has submitted fee challan No.21841031354 dated 16-06-2022 of 30000/= along with composition of API/ml (**Each ml Contains Ivermectin…20mg),** master formulation, manufacturing method, finished product testing method, Packing/closure and signed title page.
	Decision: Approved		
532.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.	
	Brand Name + Dosage Form + Strength	DOXYRAL Powder	
	Composition	Each gram Contains: Doxycycline Hyclate 923.32 mg equivalent to Doxycycline base…….800 mg	
	Diary No. Date of R & I & fee	Dy. No 12311 dated 06-03-2019; Rs.20,000/- dated 06-03-2019.	
	Pharmacological Group	Tricyclic Antibiotics.	
	Type of Form	Form - 5	
	Finished product Specification	Innovator Specification.	
	Pack size & Demanded Price	100 gm, 500 gm, 1000 gm, 2000 gm, 5000 gm.	
	Approval status of product in Reference Regulatory Authorities	Not Applicable	
	Me-too status	DOXYRAL 80% WATER SOLUBLE POWDER FOR ORAL ROUTE, 082504, "M/S. ORIENT ANIMAL HEALTH (PVT.) LIMITED, KARACHI	
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as " In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing , machinery/equipment , material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab (pvt) Ltd. 	Pharmacological Group	Antipyretic
	Type of Form	Form - 5
	Finished product Specification	Manufacturer specification
	Pack size & Demanded Price	100 ml, Polypropylene Bottle with Euro Cap, As per SRO
	Approval status of product in Reference Regulatory Authorities	MHRA approved with Type I colourless glass vial with bromobutyl stopper and an aluminum /plastic flip-off cap
	Me-too status	Not provided.
	GMP status	GMP report within 3 years is required

	Remarks of the Evaluator	• GMP inspection report conducted within last 3 years is required. • Evidence of applied product in RRA in applied primary packing of Polypropylene bottle or revise formulation along with evidence of manufacturing facility and preregistration variation fee challan. • Revised master formulation as per revised label claim. • Mee-too reference of applied product with applied primary packaging in Pakistan.
	Previous Decision 317th meeting: Deferred for Following shortcomings: 1. GMP inspection report conducted within last 3 years is required. 2. Evidence of applied product in RRA in applied primary packing of Polypropylene bottle or revise formulation along with evidence of manufacturing facility and preregistration variation fee challan. 3. Revised master formulation as per revised label claim. 4. Mee-too reference of applied product with applied primary packaging in Pakistan.	
	Reply of the Firm: • Firm has submitted copy of GMP certificate issued on 29-07-2021 based on inspection conducted on 21-05-2021 for Intravenous Infusion. • Firm has submitted MHRA reference of Paracetamol 10mg/ml (1000mg/100 ml) Solution for infusion mentioning nature and contents of container as,"100 ml solution contained in 100 ml polyethylene/polyamide/polypropylene (Viaflo) plastic bags, provided with one polyethylene dummy non-accessible port and one polyethylene administration port with clear/foil over pouch."	
	Remarks of the Evaluator	• Reference /evidence of Me-Too of applied product already registered in Pakistan with Polypropylene Bottle with Euro Cap is not provided. Nor Firm has applied as new Formulation. • Application on Form 5-D with differential fee for registration of new molecule along with stability study data/comparative study with RRA product container closure system, is also not provided.
	Decision: Approved with innovators specifications. • **The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**	
758.	Name and address of manufacturer/ Applicant	Medipak Limited,554 sundar Industrial Estate, Lahore.
	Brand Name + Dosage Form + Strength	MEDISOL MANITOL I.V Infusion (500ml)
	Composition	Each 1000 ml contains: Mannitol …….175 g Sorbitol……. …….25 g Water for Injection…….1000 ml
	Diary No. Date of R & I & fee	Dy. No 12566 dated 06-03-2019; Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Osmotic Diuretic
	Type of Form	Form - 5
	Finished product Specification	Manufacturer specification
	Pack size & Demanded Price	500 ml, Polypropylene Bottle with Euro Cap, As per SRO
	Approval status of product in Reference Regulatory Authorities	Not provided
	Me-too status	Not provided
	GMP status	GMP report within 3 years is required
	Remarks of the Evaluator	1. GMP inspection report conducted within last 3 years is required. 2. Label claim and master formulation mentioned water for injection 1000 ml instead of whereas applied pack size is 500 ml, clarification is needed

		3. Evidence of applied product in RRA in applied primary packing of Polypropylene bottle or revise formulation along fee challan. 4. Revised master formulation as per revised label claim. 5. Mee-too reference of applied product with applied primary packaging in Pakistan.
	Previous Decision 317th meeting: Deferred for Following shortcomings: 1. GMP inspection report conducted within last 3 years is required. 2. Label claim and master formulation mentioned water for injection 1000 ml instead of whereas applied pack size is 500 ml, clarification is needed 3. Evidence of applied product containing Glucose anhydrous in RRA in applied primary packing of Polypropylene bottle or revise formulation along fee challan. 4. Revised master formulation as per revised label claim. 5. Mee-too reference of applied product with applied primary packaging in Pakistan.	
	Reply of the Firm: • Firm has submitted copy of GMP certificate issued on 29-07-2021 based on inspection conducted on 21-05-2021 for Intravenous Infusion. • Firm has submitted revised Form-5 along with fee challan No.20306238907 dated 06-06-2022 with revised label claim composition and formulation as "Each 100 ml Contains: Mannitol……20 gm Water for Injection …….100 ml (500 ml in Polypropylene Bottle) • Firm has also provided RRA refence of USFDA, Mannitol 20 % in Plastic Container (20 gm/100ml). pack size 500 ml. • Firm has provided me too reference of Steriflutol-20, Reg # 076884, FDL Limited.	
	Remarks of Evaluator	• The me too provided has sorbitol in composition, which is not mentioned in revised form-5, more over the mee too product, Steriflutol-20 has container closure with LDPE where as applied product container closure system is Polypropylene. • Application on Form 5-D with differential fee for registration of new molecule along with stability study data/comparative study with RRA product container closure system, is also not provided.
	Decision: Deferred for following: • **The me too provided has sorbitol in composition, which is not mentioned in revised form-5, more over the me too product, Steriflutol-20 has container closure with LDPE where as applied product container closure system is Polypropylene.** • **Application on Form 5-D with differential fee for registration of new molecule along with stability study data/comparative study with RRA product container closure system, is required.**	
759.	Name and address of manufacturer/ Applicant	Medipak Limited,554 sundar Industrial Estate, Lahore.
	Brand Name + Dosage Form + Strength	MEDISOL I.V Infusion 10 % (1000ml)
	Composition	Each 100 ml contains: Dextrose Anhydrous ……10 g Water for Injection ……...…100 ml
	Diary No. Date of R & I & fee	Dy. No 12567 dated 06-03-2019; Rs.20,000/- dated 06-03-2019
	Pharmacological Group	Carbohydrates
	Type of Form	Form - 5
	Finished product Specification	BP specification
	Pack size & Demanded Price	1000 ml, Polypropylene Bottle with Euro Cap, As per SRO
	Approval status of product in Reference Regulatory Authorities	Not provided
	Me-too status	Not provided
	GMP status	GMP report within 3 years is required
	Remarks of the Evaluator	1. GMP inspection report conducted within last 3 years is required.

		2. Evidence of applied product containing Glucose anhydrous in RRA in applied primary packing of Polypropylene bottle or revise formulation along fee challan. 3. Revised master formulation as per revised label claim. 4. Mee-too reference of applied product with applied primary packaging in Pakistan.
	Previous Decision 317th meeting: Deferred for Followings: **1. GMP inspection report conducted within last 3 years is required.** **2. Evidence of applied product containing Glucose anhydrous in RRA in applied primary packing of Polypropylene bottle or revise formulation along fee challan.** **3. Revised master formulation as per revised label claim.** **4. Mee-too reference of applied product with applied primary packaging in Pakistan.**	
	Reply of the Firm: • Firm has submitted copy of GMP certificate issued on 29-07-2021 based on inspection conducted on 21-05-2021 for Intravenous Infusion. • **Firm has also provided RRA refence of USFDA, Dextrose 10 % in Plastic Container (100gm/100ml). Pack Size not mentioned.** • **Firm has provided me too reference of Steriflutol, Reg # 049819, FDL Limited.**	
	Remarks of Evaluator	• The me- too product, Steriflutol-20 has container closure with LDPE where as applied product container closure system is Polypropylene. • USFDA in label has described that the plastic container is made from a multilayered film specifically developed for parenteral drugs. The solution contact layer is a rubberized copolymer of ethylene and propylene. The container is nontoxic and biologically inert. The container-solution unit is a closed system and is not dependent upon entry of external air during use. The container is overwrapped to provide protection from the physical environment and to provide an additional moisture barrier when necessary. • Application on Form 5-D with differential fee for registration of new molecule along with stability study data/comparative study with RRA product container closure system, is also not provided.
	Decision: Deferred for further deliberation regarding container closure system of applied product, already approved generic and RRA approved products.

	Me-too status	Molox (CCL). M-Floxsel Infusion 400mg/250ml by M/s Pharmasol (Pvt) Ltd (Reg#100857)	
	GMP status	DML renewal inspection conducted on 26-10-2021 & 29-10-2021, the panel recommends the renewal of DML.	
	Previous remarks of the Evaluator	1. Firm has RW-500 vial filling Machine which has filling range of 2-100ml, However Firm claims that its range can be increase to 250ml. 2. TOC analyzer and liquid particle counter are under the process of procurement.	
	Previous Decision 245th meeting: Deferred for TOC & Liquid Particle counter. The confirmation of manufacturing facility requirement for large volume parenteral shall be sought out from directorate of Drug Licensing.		
	Reply of the Firm: Firm has submitted their reply along with last inspection report dated 26-10-2021 & 29-10-2021 for Renewal of DML, where in the panel of inspectors has mentioned on page 5 under the heading **h) Vial Infusion Section: The washing and solution area for ampoules and vials were same. Separate filling room for vial infusion was provided which was equipment with <u>vial filling and sealing machine under laminar flow hood</u>, HEPA filter. the area was maintained.** On page 6 of report under the heading **5. Laboratory Control: The quality control laboratory was divided in to chemical laboratory, instrument room and microbiology laboratory. Requisite equipment such as three HPLC, UV spectrophotometer, FTIR, <u>TOC apparatus</u>, Dissolution apparatus, <u>Liquid Particle Counter</u> e.t.c were installed.**		

	Firm has also attached approval of Vial Infusion section vide letter No. F. 6-2/2013-Lic (M-233) dated 7-4-2014 issued by CLB.	
	Remarks of Evaluator	
	Decision: Approved with innovator specification. The firm shall submit preregistration variation fee of 7500/= for revision of finished product specification as per SRO.No. F.7-11/2012-B&A/DRAP dated 13-07-2021	

Agenda of Evaluator PEC-XVII.

Case No. 1: Registration applications for local manufacturing of (Human) drugs.

a; New cases:

764.	Name and address of manufacture / Applicant	M/s Epla Laboratories (Pvt) Ltd., D-12, Estate Avenue, S.I.T.E, Karachi.
	Brand Name + Dosage Form and Strength	CLARBACT suspension (125mg/5ml)
	Composition	Each 5ml of reconstituted suspension contains: Clarithromycin…...125mg (as taste-mask granules)
	Dairy No. date of R &I fee	Dy. No. 13054 dated 06-03-2019 Rs.20,000/- dated 05-03-2019 Challan No. 0817936 dated: 26.02.2019
	Pharmacological Group	Macrolide antibiotic
	Type of form	Form 5
	Finished product specifications	USP specifications
	Pack size and Demand Price	60ml, as per DRAP policy/ Brand leader
	Approval status of product in Reference Regulatory Authorities	MHRA approved (Granules for oral suspension)
	Me-too-status	Texklar 125mg/5ml Dry Suspension of Rotex pharma Islamabad. Registration No. 097435
	GMP Status	Routine GMP inspection conducted on 21-06-2022 with conclusion as: Based on the areas inspected, the people met and the documents reviewed, M/s Epla Laboratories (Pvt) Limited is considered to be operating at good level of GMP compliance as per DRAP Act, 2012 and rules framed thereunder.
	Remark of the Evaluator (PEC-XVII)	• Firm has changed taste-mask granules source from Guobang Pharmachem Group Co., Ltd. China to M/s Surge Laboratories Pvt. Ltd. Sheikhupura and submitted fee of Rs: 30,000/- vide online deposit slip No.3966850056 for source change. • Firm has provided CoA of Clarithromycin taste mask coated granules 27.5% w/w (suspension grade). • Firm has provided GMP certificate of granules manufacturer/supplier (Surge laboratories, Sheikhupura) dated 04-07-2019. • Firm has submitted real-time stability data sheets conducted at 30 ^{0}C ± 2ºC and 65%RH ± 5%RH of three batches for 36 months and accelerated stability data sheets conducted at 40 ^{0}C ± 2 ºC and 75%RH ± 5%RH of three batches for six months with testing

		points as 0, 3, 6, 9, 12, 18, 24 & 36 months (for Long term stability studies) and 0, 1, 2, 3 & 6 months (for Accelerated Stability Conditions). • The Dry Powder Suspension (General) Section mentioned/available vide Licensing Division, DRAP Islamabad letter No.F.2-4/2000-Lic (Vol-II) dated 20-09-2021, titles as "Renewal of Drug Manufacturing Licensing Under the Drugs Act, 1976.
	Decision: Approved.	
765.	Name and address of manufacture / Applicant	M/s Epla Laboratories (Pvt) Ltd., D-12, Estate Avenue, S.I.T.E, Karachi.
	Brand Name + Dosage Form and Strength	CLARBACT DS suspension (250mg/5ml)
	Composition	Each 5ml reconstituted suspension contains: Clarithromycin…..250mg (as taste-mask granules)
	Dairy No. date of R &I fee	Dy. No. 13053 dated 06-03-2019 Rs.20,000/- dated 05-03-2019 Challan No. 0817937 dated: 26.02.2019
	Pharmacological Group	Macrolide antibiotic
	Type of form	Form 5
	Finished product specifications	USP specifications
	Pack size and Demand Price	60ml, as per DRAP policy/ Brand leader
	Approval status of product in Reference Regulatory Authorities	MHRA approved (Granules for oral suspension)
	Me-too-status	Karit 250mg/5ml Dry Suspension of Saffron Pharmaceuticals, Faisalabad. Registration No. 097781
	GMP Status	Routine GMP inspection conducted on 21-06-2022 with conclusion as: Based on the areas inspected, the people met and the documents reviewed, M/s Epla Laboratories (Pvt) Limited is considered to be operating at good level of GMP compliance as per DRAP Act, 2012 and rules framed thereunder.
	Remark of the Evaluator (PEC-XVII)	• Firm has changed taste-mask granules source from Guobang Pharmachem Group Co., Ltd. China to M/s Surge Laboratories Pvt. Ltd. Sheikhupura and submitted fee of Rs: 30,000/- vide online deposit slip No.69855717275 for source change. • Firm has provided CoA of Clarithromycin taste mask coated granules 27.5% w/w (suspension grade). • Firm has provided GMP certificate of granules manufacturer/supplier (Surge laboratories, Sheikhupura) dated 04-07-2019. • Firm has submitted real-time stability data sheets conducted at 30 ^{0}C ± 2ºC and 65%RH ± 5%RH of three batches for 36 months and accelerated stability data sheets conducted at 40 ^{0}C ± 2 ºC and 75%RH ± 5%RH of three batches for six months with testing points as 0, 3, 6, 9, 12, 18, 24 & 36 months (for Long term stability studies) and 0, 1, 2, 3 & 6 months (for Accelerated Stability Conditions). • The Dry Powder Suspension (General) Section mentioned/available vide Licensing Division, DRAP Islamabad letter No.F.2-4/2000-Lic (Vol-II) dated 20-09-2021, titles as "Renewal of Drug Manufacturing Licensing Under the Drugs Act,

		1976.
	Decision: Approved.	
766.	Name and address of manufacturer/ Applicant	Applicant: Gillman Pharmaceuticals, Plot No.41/2-A, Phase I & II, Industrial Estate Hattar. Manufactured by: M/s EG Pharmaceuticals. Plot. No. 13-A, Industrial Triangle, Kahuta Road, Islamabad.
	Brand Name + Dosage Form + Strength	TRANSAGIL 500mg/5ml injection
	Composition	Each 5ml ampoule contains: Tranexamic acid……. 500mg
	Diary No. Date of R & I & fee	Dy.No 11486 dated 05-03-2019 Rs.50,000/- dated 04-03-2019
	Pharmacological Group	Anti-fibrinolytic agent
	Type of Form	Form 5
	Finished product Specification	BP specifications
	Pack size & Demanded Price	1's, As per SRO
	Approval status of product in Reference Regulatory Authorities	MHRA approved
	Me-too status	Hixamic 500mg injection, Himont Pharmaceuticals Lahore. Registration No. 047937
	GMP status	Panel inspection for renewal of DML conducted on 13-02-2019 and concluded as "Based on the area inspected, the people met, documents reviewed and considering the findings especially the efforts in removal of observations noticed during the last inspection of the premises, the panel unanimously recommended the renewal of Drug Manufacturing License No.000752 (by way of formulation) to M/s EG Pharmaceuticals, Plot No.13A, Industrial Triangle, Kahuta Road, Islamabad.
	Remarks of the Evaluator (PEC-XVII)	• GMP inspection report of the contract acceptor that is M/s EG Pharmaceuticals, Kahuta road, Islamabad is required. • GMP inspection report of the contract giver that is M/s Gillman Pharmaceuticals, Plot No.41/2-A, Phase I & II, Industrial Estate Hattar is required. • Method of sterilization has not been mentioned in manufacturing outlines. • Registration Board in its 288th meeting upon detailed deliberation of capacity assessment report and considering the measures taken by the firm for upgradation of QC lab decided to allow contract manufacturing by M/s EG Pharmaceuticals, Industrial Triangle Kahuta • Road, Islamabad • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
	Decision: Approved. **Registration letter will be issued upon submission of following:** • **Revised manufacturing outlines with details of sterilization method employed alongwith fee of Rs. 7,500/- as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021 for manufacturing outlines revision** • **Latest GMP inspection report of both applicant and manufacturer conducted within last three years.**	
767.	Name and address of manufacturer/ Applicant	Applicant: Gillman Pharmaceuticals, Plot No.41/2-A, Phase I & II, Industrial Estate Hattar.

		Manufactured by: M/s EG Pharmaceuticals. Plot. No. 13-A, Industrial Triangle, Kahuta Road, Islamabad.
	Brand Name + Dosage Form + Strength	SETRON 8mg/4ml injection (IM/IV)
	Composition	Each 4ml ampoule contains: Ondansetron (as Hydrochloride dihydrate) …...8mg
	Diary No. Date of R & I & fee	Dy.No 11485 dated 05-03-2019 Rs.50,000/- dated 04-03-2019
	Pharmacological Group	5HT3 antagonist
	Type of Form	Form 5
	Finished product Specification	USP specifications
	Pack size & Demanded Price	5's, As per SRO
	Approval status of product in Reference Regulatory Authorities	MHRA approved
	Me-too status	Anomed 8mg injection by Evergreen pharmaceuticals, Lahore. Registration No.069099 Vemtix 8mg/4ml Injection by M/s Biolabs Islamabad. Reg# 093252)
	GMP status	Panel inspection for renewal of DML conducted on 13-02-2019 and concluded as "Based on the area inspected, the people met, documents reviewed and considering the findings especially the efforts in removal of observations noticed during the last inspection of the premises, the panel unanimously recommended the renewal of Drug Manufacturing License No.000752 (by way of formulation) to M/s EG Pharmaceuticals, Plot No.13A, Industrial Triangle, Kahuta Road, Islamabad.
	Remarks of the Evaluator (PEC-XVII)	• GMP inspection report of the contract acceptor that is M/s EG Pharmaceuticals, Kahuta road, Islamabad is required. • GMP inspection report of the contract giver that is M/s Gillman Pharmaceuticals, Plot No.41/2-A, Phase I & II, Industrial Estate Hattar is required. • Weight of API is not adjusted in the master formulation considering the salt and hydrated form of the drug. • Method of sterilization has not been mentioned in manufacturing outlines. • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
	Decision: Approved. **Registration letter will be issued upon submission of following:** • **Revised manufacturing outlines with details of sterilization method employed alongwith fee of Rs. 7,500/- as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021 for manufacturing outlines revision** • **Latest GMP inspection report of both applicant and manufacturer conducted within last three years.**	
768.	Name and address of manufacture / Applicant	M/s Bio Mark Pharmaceuticals. Plot No. 527, Sundar Industrial Estate, Lahore (Tablet I & II General)
	Brand Name + Dosage Form and Strength	BIOMP 40mg Tablet
	Composition	Each gastro resistant tablet contains: Omeprazole ……. 40mg
	Dairy No. date of R &I fee	Form-5 Dy. No. 10339 dated 05-03-2019 Rs.20,000 dated 04-03-2019
	Pharmacological Group	Proton Pump Inhibitor
	Type of form	Form 5
	Finished product specifications	Innovator's specifications
	Pack size and Demand Price	14's, As per SRO

	Approval status of product in Reference Regulatory Authorities	Losec MUPS (multiple unit pellet system) 40mg AstraZeneca UK (MHRA approved) Omeprazole 40 mg gastro-resistant tablets Each gastro-resistant tablet contains 40 mg Omeprazole (MHRA approved
	Me-too-status	BENZIM 40mg Tablet (M/S Wilshire) Reg. # 044599
	GMP Status	GMP certificate valid till 12-02-2022, issued on the basis of inspection conducted on 13-02-2020.
	Remark of the Evaluator (PEC-XVII)	• Revision is not required since the label claim provided is in line with reference product. Submit master formulation of the product. • Revision of manufacturing outlines not required as the applied formulation is available as gastro-resistant tablet (enteric coated). For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021. • DML granted vide letter No. F.1-29/2011-Lic dated 12-06-2017 w.e.f 12.06.2017 for following sections: Tablet I (General) Tablet II (General) Capsule (General) Sachet (General) Oral syrup (General)
	Decision: Approved with BP specifications. • **Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

	Brand Name + Dosage Form and Strength	NEBVAL 5/80mg tablet
	Composition	Each film-coated tablet contains: Nebivolol …. 5mg Valsartan …... 80mg
	Dairy No. date of R &I fee	Form-5 Dy.No 10331 dated 05-03-2019 Rs.20,000 dated 04-03-2019
	Pharmacological Group	Nebivolol: Beta adrenergic blocker /Anti-hypertensive Valsartan: Angiotensin Receptor Antagonists/Anti-hypertensive
	Type of form	Form 5
	Finished product specifications	Innovator specifications
	Pack size and Demand Price	14's, 30's, 60's, As per SRO
	Approval status of product in Reference RegulatoryAuthorities	BYVALSON 5mg/80mg Allergen USA (USFDA status is discontinued)
	Me-too-status	Could not be confirmed
	GMP Status	GMP certificate valid till 12-02-2022, issued on the basis of inspection conducted on 13-02-2020.

	Remark of the Evaluator (PEC-XVII)	• Provide evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm as the "Me too" provided by the firm could not be confirmed. • Provide evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting as BYVALSON 5mg/80mg Allergen USA (USFDA) status is discontinued. • DML granted vide letter No. F.1-29/2011-Lic dated 12-06-2017 w.e.f 12.06.2017 for following sections: Tablet I (General) Tablet II (General) Capsule (General) Sachet (General) Oral syrup (General)
	Decision: Deferred for following; **•Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.** **•Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.**	
770.	Name and address of manufacture / Applicant	M/s Bio Mark Pharmaceuticals. Plot No. 527, Sundar Industrial Estate, Lahore (Tablet I & II General)
	Brand Name + Dosage Form and Strength	Deflu 10mg Tablet
	Composition	Each film-coated tablet contains: Loratadine…10mg
	Dairy No. date of R &I fee	Form-5 Dy. No 10851 dated 05-03-2019 Rs.20,000/- dated 04-03-2019
	Pharmacological Group	Histamine H1 Antagonists
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	10's, As per SRO
	Approval status of product in Reference Regulatory Authorities	CLARITIN 10mg tablet (Bayer) MHRA approved
	Me-too-status	ANTIAL 10mg tablet by Sami pharmaceuticals, Karachi (Registration No. 019675)
	GMP Status	GMP certificate valid till 12-02-2022, issued on the basis of inspection conducted on 13-02-2020.
	Remark of the Evaluator (PEC-XVII)	• Revise label claim as per reference product as: Each tablet contains: Loratadine…...10mg • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021. • DML granted vide letter No. F.1-29/2011-Lic dated 12-06-2017 w.e.f 12.06.2017 for following sections: Tablet I (General) Tablet II (General) Capsule (General) Sachet (General) Oral syrup (General)
	Decision: Approved with revised label claim as; **Each tablet contains:** **Loratadine…...10mg** **•Firm shall submit the fee of Rs. 7,500 for correction/pre-approval change in composition (correction/change of formulation from film-coated tablet to un-coated tablet), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**	

771.	Name and address of manufacture / Applicant	M/s Bio Mark Pharmaceuticals. Plot No. 527, Sundar Industrial Estate, Lahore (Tablet I & II General)
	Brand Name + Dosage Form and Strength	INVGA 3mg tablet
	Composition	Each sustained release tablet contains: Paliperidone…3mg
	Dairy No. date of R &I fee	Form-5 Dy.No 10853 dated 05-03-2019 Rs.20,000/- dated 04-03-2019
	Pharmacological Group	Anti-Psychotic
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	14's, 28's, As per SRO
	Approval status of product in Reference Regulatory Authorities	Trilayer capsule-shaped white tablets of 11 mm in length and 5 mm in diameter printed with "PAL 3" INVEGA 3mg Janssen Inc. UK Approved MHRA (BNF p# 374-375)
	Me-too-status	VEGADON SR 3mg Danas Pharmaceuticals Reg. # 080372
	GMP Status	GMP certificate valid till 12-02-2022, issued on the basis of inspection conducted on 13-02-2020.
	Remark of the Evaluator (PEC-XVII)	• The reference product Invega, approved by USFDA is Extended release tablet manufactured by OROS Push-Pull Technology and the public assessment report describes that osmotic pressure delivers paliperidone from the dosage form at a controlled rate. Provide evidence of required manufacturing technology as per reference product. • The firm has claimed USP specifications while the product is non-pharmacopoeial. • Master formulation for the applied product is required. • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021. • DML granted vide letter No. F.1-29/2011-Lic dated 12-06-2017 w.e.f 12.06.2017 for following sections: Tablet I (General) Tablet II (General) Capsule (General) Sachet (General) Oral syrup (General)
	Decision: Deferred for following; • **Evidence of availability of requisite manufacturing technology (OROS Push-Pull technology as per innovator/reference product (INVEGA 3mg).** • **Revision of finished drug product specifications as firm has claimed USP specifications, while official monograph of the product not available.** • **Submission of master formulation as per reference product.**	
772.	Name and address of manufacture / Applicant	M/s Bio Mark Pharmaceuticals. Plot No. 527, Sundar Industrial Estate, Lahore (Oral Syrup General)
	Brand Name + Dosage Form and Strength	I folk 40mg/5mg
	Composition	Each 15ml Contains: Iron Protein Succinylate 800mg Eq. to Elemental Iron ……50mg Folic Acid…5mg
	Dairy No. date of R &I fee	Form-5 Dy. No 10870 dated 05-03-2019 Rs.20,000/- dated 04-03-2019
	Pharmacological Group	Iron preparation
	Type of form	Form 5
	Finished product specifications	Innovator

	Pack size and Demand Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Couldn't be confirmed
	Me-too-status	Sucrofer F (800mg, 5mg/15ml) syrup by M/s CCL Pharmaceuticals, Lahore. Varience HB (800mg, 5mg/15ml syrup by Unison Chemicals, Lahore. Batema-F syrup (800mg, 5mg/15ml) Cibex Pvt. Ltd. Karachi Reg # 076713
	GMP Status	GMP certificate valid till 12-02-2022, issued on the basis of inspection conducted on 13-02-2020.
	Remark of the Evaluator (PEC-XVII)	• The strength mentioned in the cover letter as "Iron protein succinylate 200mg + Folid acid 2.5mg/5ml" while in Form-5, the composition mentioned as "Each 15 ml contains Iron Protein Succinylate 800mg equivalent to elemental iron 40mg and folid acid 5mg. Furthermore, there is variation in composition in different sections of the dossier. • DML granted vide letter No. F.1-29/2011-Lic dated 12-06-2017 w.e.f 12.06.2017 for following sections: Tablet I (General) Tablet II (General) Capsule (General) Sachet (General) Oral syrup (General)
	Decision: Deferred for further deliberation regarding composition of applied product and already approved generic products.	
773.	Name and address of manufacture / Applicant	M/s Bio-Labs (Pvt) ltd., Plot No.145, Industrial Triangle, Kahuta Road, Islamabad. Capsule Section (General)
	Brand Name + Dosage Form and Strength	CHOLITOLRATE capsules 4mg
	Composition	Each prolonged-release capsule contains: Tolterodine tartrate…….4mg
	Dairy No. date of R &I fee	Dy. No 12434 dated 06-03-2019 Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Anti-cholinergic agent
	Type of form	Form 5
	Finished product specifications	BP specifications
	Pack size and Demand Price	30's as per DRAP's pricing policy
	Approval status of product in Reference Regulatory Authorities	Detrusitol XL 4 mg, prolonged-release capsules, hard (MHRA approved)
	Me-too-status	Urot 4mg capsules by Ciba pharmaceuticals, Karachi. Registration No. 097154
	GMP Status	GMP certificate issued to firm on 21st May, 2019, on the basis of panel GMP inspection conducted on 23.04.2019 and valid upto 22.04.2022.
	Remark of the Evaluator (PEC-XVII)	• GMP inspection report conducted within last 03years is required. • The firm has mentioned tolterodine tartrate sustained release pellets 2%. Please provide source of pellets, stability studies data of 3 batches, GMP certificate of supplier, COA of pellets and submit differential fee in case of imported pellets source. • Revise label claim as; Each prolonged-release capsule contains: Tolterodine tartrate Sustained Release Pellets Eq. to Tolterodine tartrate……...4mg" since the firm has mentioned Tolterodine tartrate sustained release pellets

		2% in master formulation. • Capsule section (General) approved vide Licensing Division letter No.F.1-12/98-Lic (Vol-II) dated 24.03.2007. • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
	Decision: Deferred for following; • **Submission of pellets source, stability study data of 03 batches, GMP certificate of pellets manufacturer and in case of imported source of pellets, applicable fee shall be submitted.** • **Revision of label claim as;** **Each prolonged-release capsule contains:** **Tolterodine tartrate sustained release pellets equivalent to Tolterodine tartrate……4mg.** • **Submission of GMP audit report from QA & LT Division, valid within last 03 years.** • **Submission of applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.**	
774.	Name and address of manufacture / Applicant	M/s Baxter Pharmaceuticals, A-1/A, Scheme No.33, Phase-1, S.I.T.E., Super Highway, Karachi.
	Brand Name + Dosage Form and Strength	PINEX-V (5/80mg) tablet
	Composition	Each tablet contains: Amlodipine….5mg Valsartan…….80mg
	Dairy No. date of R &I fee	Dy. No 12087 dated 06-03-2019 Rs.20,000/- dated 27-02-2019

	Name, address of manufacturer(s)	M/s Reyoung Pharmaceutical Co., Ltd., No. 1 Ruiyang Road Yiyuan County Shandong Province P.R. China
	Name of exporting country	People's Republic of China
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original legalized COPP No. 201910002 issued by Yiyuan Market Supervision Administration of P.R China. Validity: 23.10.2021
	Details of letter of authorization / sole agency agreement	Copy of sole agency agreement is submitted b/w M/s Reyoung Pharmaceutical Co., Ltd., China and M/s AMB HK Enterprises (Pvt) Ltd. Lahore
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 33107 dated 21.10.2021
	Details of fee submitted	PKR /-: 150000/- dated 02.11.2021
	The proposed proprietary name / brand name	**CEFITRIN 1GM INJECTION**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone as sodium……1gm
	Pharmaceutical form of applied drug	Powder for Injection
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	Pack of 1 Vial and 1ampoule of 10ml
	Proposed unit price	Rs. 319.50/- per vail
	The status in reference regulatory authorities	Rocephin 1gm injection
	For generic drugs (me-too status)	Rocephin 1gm Injection (Reg No.050585)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per Module II.
	Name, address of drug substance manufacturer	M/s Reyoung Pharmaceutical Co., Ltd., No. 1 Ruiyang Road Yiyuan County Shandong Province P.R. China
	Module-III Drug Substance:	Firm has submitted drug substance data for sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, flow diagram of manufacturing process and controls, impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 30°C ± 2°C / 75 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, method validation studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence data submitted with Rocephin 1gm injection.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type I Glass Vial

		10ml Type I Glass Ampoule
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 36 months Firm requested 36months shelf life
Decision:	**Deferred for following points:** • **Issuance of CoPP by relevant regulatory authority.** • **Submission of legalized CoPP as present expired on 23.10.2021 (2 days after submission of application).**	
933.	Name, address of Applicant / Importer	**M/s AGP Limited, B-23-C, S.I.T.E., Karachi-75700, Pakistan**

	Details of fee submitted	PKR 75,000/-: 27-09-2021
	The proposed proprietary name / brand name	**DURART 600**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Darunavir Ethanolate equivalent to Darunavir … 600mg
	Pharmaceutical form of applied drug	Film Coated Tablets.
	Pharmacotherapeutic Group of (API)	Anti-retroviral drug (J05AE10)
	Reference to Finished product specifications	In house
	Proposed Pack size	60's (Bottle of 60 Tablets)
	Proposed unit price	As per DRAP Approved Price
	The status in reference regulatory authorities	Darunavir 600mg Tablets **(USFDA** Approved).
	For generic drugs (me-too status)	Not Applicable
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**M/s Mylan Laboratories Limited (Unit-1)** Survey no 10, Gaddapotharam, Kazipally Industrial Area, Sangareddy District – 502319 Telangana State, India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API (25516977, 25516978, 25516979) conducted at

		accelerated conditions 40ºC ±2ºC / 75% ± 5% RH for 6 months as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC / 60 ± 5% RH & 30ºC ± 2ºC / 75 ± 5% RH. The stability study data is for 9 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted CDP and bioequivalence studies Of Durart 800mg tablet against its innovator brand Prezista® 800mg tablets and bio waiver studies for additional strength Durart 600mg Tablets
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE bottle pack (60's)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches (2011139, 2011142, 011144). The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 75% ± 5% RH. The real time stability study data of 3 batches is for 24 months
Decision:	**Approved with Innovator specifications as per Inspection Policy of manufacturers abroad for Finished Drugs.**

	Name, address of drug substance manufacturer	M/s Shanghai Qingsong Pharmaceutical co., Ltd Suite No. 505 Building No. 2 No. 3377 Kangxin Rd, Pudong New Area Shanghai China 201318
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Iclusig 45mg tablet , Incyte Biosciences UK limited has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Evaluation by PEC:

In response to PEC letter dated 13.07.2022 following still requires clarification/ or the response of the firm:

- The firm was requested to clarify that under 3.2.S.1.3 You have submitted that drug substance is white to off white powder and no polymorphic form exists, however the as per innovator data the Olaparib exists as crystalline powder in four polymorphic forms. However, the query was not addressed.
- The firm was requested to clarify that API is characterized by HNMR study only, characterization of the active substance, polymorphic forms/ impurities are required to be performed as per innovator product (3.2.S.3). However, the query was not addressed.
- The firm was requested to clarify that Particle size (being critical quality attribute) and residual solvents are not specified, this requires justification (3.2.S.4).
- The firm was requested to clarify that Drug substance specifications by drug product manufacturer are required (3.2.S.4)) along with results of analysis of relevant batch(es) of Drug Substance performed by drug

product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA).

- Comparative dissolution profile is conducted by Alpha Laboratories Mumbai India instead of manufacturer. In this regard the firm has informed that for more consistency we did comparative dissolution from third part and in future BE study will also be conducted by Alpha Laboratories Mumbai India.
- The firm was requested to clarify that Stability data of Drug Product indicates same test results/ value for the parameters like moisture content, dissolution and assay, hence raw data needs to be submitted for verification However, the query was not addressed

Decision: **Deferred for clarification/ submission of following documents:**

i. **You have submitted that drug substance is white to off white powder and no polymorphic form exists, however the as per innovator data the Olaparib exists as crystalline powder in four polymorphic forms.**

ii. **API is characterized by HNMR study only, characterization of the active substance, polymorphic forms/ impurities are required to be performed as per innovator product.**

iii. **Particle size (being critical quality attribute) and residual solvents are not specified.**

iv. **The firm was requested to clarify that drug substance specifications by drug product manufacturer are required (3.2.S.4)) along with results of analysis of relevant batch(es) of drug substance performed by drug product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA).**

v. **Comparative dissolution profile is conducted by Alpha Laboratories Mumbai India, as the submitted justification is not relevant.**

vi. **Stability data of Drug Product indicates same test results/ value for the parameters like moisture content, dissolution and assay, hence raw data needs to be submitted for verification**

Via Curiel, 34 Italy-20067 Paullo, Milano **Site of Production: -** CAMBREX PROFARMACO MILANO S.R.L. Via Curiel, 34 Italy-20067 Paullo, Milano

	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25°C ± 2°C. The stability study data is provided till 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has submitted the Pharmaceutical equivalence with reference products.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	The Primary container consists of a 1.8ml glass cartridge made of neutral glass type closed with bromobutyl rubber plunger and bromobutyl rubber seal with an aluminium cap.
	Stability study data of drug product, shelf life and storage conditions	Stability testing results of 3 batches of formulation are reported at 25°C RH 60% for 24 months, **30°C / 65%RH for 12 months** and 40°C RH 75% for 6 months. The only impurity detected whose concentration varies with time and temperature is Articaine acid (Hydrolysis products of Articaine) which although reaches maximum concentration of 0.35% after 6 months at 40°C (stressed condition) still remains within the set specification of NMT 0.4% in area with respect to Articaine. Articaine Acid is the main metabolite of Articaine and the concentrations found in the drug product, even at the end of shelf life does not pose any potential heal concern. The formulation is quite stable and remains within specifications after 24 months at 25°C, consequently a shelf life storage condition of 24 months at 25°C is proposed for the drug product stored in its commercial packaging.
Query		**Reply**
i.	Valid Drug Sale License because the submitted copy indicates validity till 19.02.2022.	i. The firm has submitted new drug sale license issued vide No. 0129 No. DHO (East) Drug-786 dated 18.06.2021 valid till 10.06.2023. having address Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi. The address mentioned on the aforesaid new DSL is different from the address of the DSL submitted initially with the application.
ii.	Differential fee of 50,000/- is required w.r.t. revised fee SRO because registration application was submitted on 07.10.2021.	ii. The firm has now submitted the differential fee of 50000/- vide Slip No. 17375749 dated 03.08.2022.

iii. Proposed Price needs to be submitted being requirement of application i.e. Form-5F. iv. Reference of other similar approved medicines with information pertaining to Manufacturer name, brand name, strength, composition, registration number & dosage form, Pack size and Price as required under 1.5.8. v. Long term stability study data need to be submitted as per Zone IV-A i.e. (30ºC/65%RH).	iii. The firm submitted price of Rs. 7000/- for 50 Cartridges of 1.8ml. iv. Articaine 4% with Epinephrine 1:100000 of continental Chemical Company Islamabad. v. Reg. No: 052238. vi. The firm has attached intermediate study of 30ºC / 65%RH for 12 months of three batches which has already been provided.

Decision: Deferred for following:

- **Clarification whether the sole agency agreement is with M/s. Glisten Pharma, Plot No. 520 Sector 7/A Korangi Industrial Area Karachi or with M/s Glisten Pharma Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi.**
- **Clarification of the address of DSL since two DSL with different address have been submitted.**
- **Submission of long term stability studies data as per Zone IV a conditions till claimed shelf life.**

Via Curiel, 34 Italy-20067 Paullo, Milano **Site of Production:-** CAMBREX PROFARMACO MILANO S.R.L. Via Curiel, 34 Italy-20067 Paullo, Milano
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC. The stability study data is provided till 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has submitted the Pharmaceutical equivalence with reference products.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	The Primary container consists of a 1.8ml glass cartridge made of neutral glass type closed with bromobutyl rubber plunger and bromobutyl rubber seal with an aluminium cap.
	Stability study data of drug product, shelf life and storage conditions	Stability testing results of 3 batches of formulation are reported at 25ºC RH 60% for 24 months, **30ºC / 65%RH for 12 months** and 40ºC RH 75% for 6 months. The only impurity detected whose concentration varies with time and temperature is Articaine acid (Hydrolysis products of Articaine) which although reaches maximum concentration of 0.35% after 6 months at 40ºC (stressed condition) still remains within the set specification of NMT 0.4% in area with respect to Articaine. Articaine Acid is the main metabolite of Articaine and the concentrations found in the drug product, even at the end of shelf life does not pose any potential heal concern. The formulation is quite stable and remains within specifications after 24 months at 25ºC, consequently a shelf life storage condition of 24 months at 25ºC is proposed for the drug product stored in its commercial packaging.
Query		**Reply**
vi.	Valid Drug Sale License because the submitted copy indicates validity till 19.02.2022.	The firm has submitted new drug sale license issued vide No. 0129 No. DHO (East) Drug-786 dated 18.06.2021 valid till 10.06.2023. having address Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi. The address mentioned on the aforesaid new DSL is different from the address of the DSL submitted initially with the application.
vii.	Differential fee of 50,000/- is required w.r.t. revised fee SRO because registration application was submitted on 07.10.2021.	The firm has now submitted the differential fee of 50000/- vide Slip No. 17375740 dated 03.08.2022.
viii.	Proposed Price needs to be submitted being requirement of application i.e. Form-5F.	The firm submitted price of Rs. 7000/- for 50 Cartridges of 1.8ml.
ix.	Reference of other similar approved medicines with information pertaining to Manufacturer name, brand name, strength, composition, registration number & dosage form, Pack size and Price as required under 1.5.8.	Articaine 4% with Epinephrine 1:100000 of continental Chemical Company Islamabad. Reg. No: 052238.

x.	Long term stability study data need to be submitted as per Zone IV-A i.e. (30ºC/65%RH).	The firm has attached intermediate study of 30ºC / 65%RH for 12 months of three batches which has already been provided.
Decision: Deferred for following: • **Clarification whether the sole agency agreement is with M/s. Glisten Pharma, Plot No. 520 Sector 7/A Korangi Industrial Area Karachi or with M/s Glisten Pharma Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi.** • **Clarification of the address of DSL since two DSL withdifferent address have been submitted.** • **Submission of long term stability studies data as per Zone IV a conditions till claimed shelf life.**

	Pharmacological Group	Antibiotics
	Type of Form	Form 5
	Finished product Specifications	As Per Innovators Specification
	Pack size & Demanded Price	500g, Kg, 2.5Kg, 5Kg, 25Kg/Decontrolled
	Me-too status (with strength and dosage form)	Biocillin-SN w/s Powder (Bio-Labs Pharma) Reg # 097941
	Remarks of the Evaluator	
	Decision: Registration Board referred the case to Expert Working Group for review of formulation.	
1090	**Name and address of manufacturer / Applicant**	M/s. D-HAANS PHARMACEUTICALS of Plot No. 9/A, Industrial Estate, Bhimber
	Brand Name +Dosage Form + Strength	Pheno Hans W/S Powder
	Composition	Each g contains:- Phenoxymethylpenicillin ……. 293mg/g eq. to Potassium phenoxymethylpenicillin ……..…….. 325mg/g
	Diary No. Date of R& I & fee	Dy No. 21779: 02.08.2022 PKR. 30,000/-; 01.08.2022
	Pharmacological Group	Antibiotic
	Type of Form	Form 5
	Finished product Specifications	As Per Innovators Specification
	Pack size & Demanded Price	100g, 250g, 500g, Kg/Decontrolled
	Me-too status (with strength and dosage form)	Phenoxypen w/s Powder (Tec-man international) Reg # 081303 Fenapen w/s Powder (My-Lab Pharma) Reg # 106727
	Remarks of the Evaluator	
	Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	

Agenda of Evaluator PEC-XVIII

1.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Winbrains Research Laboratories Plot No.69/1 Block B, Phase I-II, Industrial Estate, Hattar Pakistan**
	Name, address of Manufacturing site.	M/s Winbrains Research Laboratories Plot No.69/1 Block B, Phase I-II, Industrial Estate, Hattar Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 27479 dated 05.10.2021
	Details of fee submitted	PKR 30000/- dated 28.07.2021 (Slip No. 12707594008)
	The proposed proprietary name / brand name	Brainzon 10mg Tablet

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Vonoprazan as Fumarate…… 10mg
	Pharmaceutical form of applied drug	White Color Round Film Coated Tablet
	Pharmacotherapeutic Group of (API)	Potassium-competitive acid blockers
	Reference to Finished product specifications	In-House
	Proposed Pack size	3x10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Takecab Tablet 10mg of Takeda Pharmaceuticals Ltd (PMDA Approved)
	For generic drugs (me-too status)	Vocinti Tablet 10mg f The Searle Company Karachi.
	GMP status of the Finished product manufacturer	GMP certificate was issued to the firm by DRAP Peshawar dated .03.06.2019
	Name and address of API manufacturer.	M/s Ami Lifesciences Private Limited Block No. 82/B ECP road and Kharakhadi 391450 Taluka: Padra district Vadodara Gujrat India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure (including dissolution testing) and batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the reference product Vocinti 20mg Tablets of M/s Takeda CDP has been performed against the aforesaid brand in three media. The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have been submitted.
STABILITY STUDY DATA		

Manufacturer of API	M/s Ami Lifesciences Private Limited Address: Block No.82/B, ECP Road Taluka Padra District, Vadodara Gujarat, INDIA		
API Lot No.	VPF/30051020		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 24 (Months)		
Batch No.	T-06	T-07	T-08
Batch Size	1200 tab	1200 tab	1200 tab
Manufacturing Date	09-2020	09-2020	09-2020
Date of Initiation	22-06-2020	22-06-2020	22-06-2020
No. of Batches	03		

Administrative Portion		
7.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any evidence/ document.
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of License to manufacture drugs issued by Food and Drug Control Administration Gujarat State India.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has provided the copy of Airway Bill along with shipment details. However, at the time of inspection panel shall confirm the evidence of import API specifically DRAP attested invoice for the import of Vonoprazan Fumarate having Batch No. VPF/300512020 Mfg. Date 08.20220, Expiry/ Retest date 08.2023 Further the panel shall also confirm the import of reference standard as COA of the same is not submitted.
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided
Remarks of Evaluator:		
2.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Winbrains Research Laboratories Plot No.69/1 Block B, Phase I-II, Industrial Estate, Hattar Pakistan**

Remarks of Evaluator:

INSPECTION FOR VERIFICATION OF DATA

Q.No.1	Do you have documents confirming the import of Vonoprazan as fumarate API?	The firm provided following documents to confirm the import of Vonoprazan as fumarate API i.e., 1. GD dated 23/08/2020, IGM/EGM No ipaf-1705-2020. 2. Copy of import invoice No. EXP/I/20-21/0107 dated 05.08.2020, Vonoprazan Fumarate IH, B. No. VPF/30051020 Mfg. date 08/2020, Retest date 08/2023. 3. COA. DRAP attested invoice is not provided by the firm. **(Annexure 01)**
Q.No.2	What was the rationale behind selecting the particular manufacturer of API?	The firm informed that selection of API manufacturer was based upon its GMP Certification and availability of DMF (open part). The firm agreed to provide adequate sample for initial testing for prequalification. The API manufacturer qualified their vendor qualification SOP.
Q.No.3	Do you have documents confirming the import of Vonoprazan as fumarate reference standard and impurity standards?	The firm has provided copy of COA of reference/working standard, Batch No VPF/30901118, Mfg. Date: March-2020, provided by API manufacturer, copy attached **(Annexure 02).** However, API manufacturer did not provide impurities standard.
Q.No.4	Do you have certificate of Analysis of the API, reference standards and impurity standards?	Yes, certificate of Analysis of the API and working standards (Vonoprazan as fumarate) are provided. However, the API manufacturer did not provide impurities standard.
Q.No.5	Do you have any approval of API or GMP certificate of API manufacturer issued by regulatory authority of country of origin?	Yes, approval of API or GMP certificate of API manufacture AMI LIFE -SCIENCES No G/25/1704 valid till 14-06-2025 is available. **(Annexure 03)**
Q.No.6	Do you use API manufacturer method of testing?	Yes, the firm use API manufacturer method of testing, also verification of API performed by the firm as per API manufacturer method.
Q.No.7	Do you have stability studies reports on API?	Yes, stability studies report on API (Vonoprazan) are provided by the API manufacturer in DMF.
Q.No.8	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	No, the stability testing has not been performed as per SIM method and degradation product, however firm conduct stability study as per ICH guidelines.
Q.No.9	Do you have method for quantifying the impurities in the API?	Yes, the firm have API manufacturer method of testing impurities.
Q.No.10	Do you have some remaining quantities of the API, its reference standard and impurities standards?	Working standard approx. 500mg available at time of inspection.
Q.No.11	Have you used pharmaceutical grade excipients?	Yes, the firm uses imported pharmaceutical grade excipient, which are procured from local suppliers. Vender qualification SOP is followed.
Q.No.12	Do you have documents confirming the import of the used excipients?	The firm purchased excipients locally (imported excipients), COA and Evidence attached **(Annexure 04).**

Q.No.13	Do you have test reports and other records on the excipients used?	Yes, test reports and other records of the excipients used and copy available with the firm is attached. **(Annexure 05).**
Q.No.14	Do you have written and authorized protocols for the development of Vonoprazan as fumarate tablets?	The firm provided written and authorized protocols for the development of Vonoprazan tablet.
Q.No.15	Have you performed Drug-excipient compatibility studies?	Drug-excipient compatibility studies not performed by the firm, however Firm used brand leader formulation already studied by them copy attached **(Annexure 06).**
Q.No.16	Have you performed comparative dissolution studies?	Yes, the firm performed comparative dissolution studies in three media details attached **(Annexure 07).**
Q.No.17	Do you have product development (R&D) section	No separate dedicated product development (R&D) section is established by the firm. The firm was advised to establish R&D section with required staff on urgent basis.
Q.No.18	Do you have necessary Equipments available in product development section for development of Vonoprazan as fumarate tablets?	Manual/ production facilities are being utilized by the firm for said purpose. The firm is committed to establish R&D section as discussed above.
Q.No.19	Are the Equipments in product development section qualified?	As above.
Q.No.20	Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?	As above.
Q.No.21	Do you have qualified staff in product development section with proper knowledge and training in product development?	As above.
Q.No.22	Have you manufactured three stability batches for the stability studies of Vonoprazan as fumarate tablets as required?	Yes, the firm has manufactured three stability batches for the stability studies of Vonoprazan tablets as required Brainzon 10mg B.NO: T-03, T-04, T-05 Mfg. date:09-2020 Exp date:09-2022, B. Size:1200 Tablet each. Brainzon 20mg B.NO: T-06, T-07, T-08 Mfg. date:09-2020 Exp date:09-2022 B. Size:1200 Tablet each. Printed packs were also checked which were placed in stability chambers.
Q.No.23	What was the criteria for fixing the batch size of stability batches?	The firm said that the criteria for fixing the batch size of stability batches is the number of tablets per testing frequency and number of testing frequencies while keeping in view the decision of Registration Board (RB) in its 249th Meeting.
Q.No.24	Do you have complete record of production of stability batches?	Yes, batch manufacturing record available

Q.No.25	Do you have protocols for stability testing of stability batches?	Yes, firm have protocols for stability testing of stability batches as per ICH guidelines.
Q.No.26	Do you have developed and validated the method for testing of stability batches?	Yes, the firm has developed and validated the method for testing of stability batches summary report attached **(Annexure 08).**
Q.No.27	Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?	NA
Q.No.28	Do you have documents confirming the qualification of Equipments / instruments being used in the test and analysis of Vonoprazan as fumarate API and the finished drug?	The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of API and the finished drug. The panel checked the same and found satisfactory.
Q.No.29	Do your method of analysis stability indicate?	Degradation study not performed by firm.
Q.No.30	Do your HPLC software is 21CFR compliant?	Water 600 pump 486 Detector Empower 2 software 21 CFR Complies
Q.No.31	Can you show Audit Trail reports on Vonoprazan as fumarate testing?	Audit trail on the testing reports is found available.
Q.No.32	Do you have some remaining quantities of degradation products and stability batches?	Only Stability batches available with the firm.
Q.No.33	Do you have commitment batches kept on stability testing?	Yes
Q.No.34	Do you have valid calibration status for the Equipments used in Vonoprazan as fumarate tablets production in analysis?	The firm has valid calibration status for the equipment used in production and analysis of Vonoprazan **(Annexure 09)**
Q.No.35	Do proper and continuous monitoring and control are available for stability chamber?	The firm has two stability chamber local made, manual logbooks maintained with electricity backup.
Q.No.36	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Related manufacturing area, equipment, personnel and utilities are in compliance.
Q.No.36	Power supply Backup	Separate generator available for both QC and Production. Start within minute after light breakage 100KW for Production 25KW for QC Department
With reference to queries, reply is placed at S. No. 1&3. Based on physical inspection and data reviewed, panel has verified the stability data provided by the firm.		
Decision: Registration Board approved Brainzon 10& 20mg Tablet (Vonoprazan as Fumarate) with following conditions: **i. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**		

	ii. Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, method validation studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence data submitted with product of Biomedica Foscama of Italy (TAD 0.6g Injection)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type I Glass Vial 5ml Type I Glass Ampoule
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 36 months Firm requested 24months shelf life
Decision:	**Deferred for following points:** • **Policy decision on the products containing glutathione keeping in view their therapeutic indications and off label uses.** • **Regulatory status of applied formulation in other reference regulatory authorities alongwith its indications, precautions, contra indications etc.**	

Agenda of Evaluator PEC-IV

Case No. 01 Registration applications on Form 5F for local manufacturing of (Human) drugs

a. New cases

	Name, address of Applicant / Marketing Authorization Holder	M/s. Pharmatec Pakistan (Private) Limited D-86/A, S.I.T.E.,Karachi
	Name, address of Manufacturing site.	M/s. Pharmatec Pakistan (Private) Limited D-86/A, S.I.T.E.,Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale

		☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30931 dated 11/11/2021
	Details of fee submitted	PKR 30,000/-: Deposit slip # 7273954379
	The proposed proprietary name / brand name	Dapazin 5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Dapagliflozin Propanediol Monohydrate equivalent to Dapagliflozin ……..5mg
	Pharmaceutical form of applied drug	Yellow color, round shape, biconvex film coated tablets, plain on both side.
	Pharmacotherapeutic Group of (API)	Sodium-Glucose Co-Transporter 2 (SGLT2) Inhibitors
	Reference to Finished product specifications	In-house
	Proposed Pack size	7's,10's,14's,20's,28's,30's & 60's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	FARXIGA 5mg tablet by ASTRAZENECA AB USA, USFDA Approved.
	For generic drugs (me-too status)	XIGA 5 mg Tablet by M/s. CCL Pharmaceutical (Pvt.) Limited, Reg. No. 090504
	GMP status of the Finished product manufacturer	GMP certificate No. 90/2020-DRAP(K) Tablet (General) section is approved.
	Name and address of API manufacturer.	M/s. Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd . Dixi street Luoyang Town, Wuin District Changzho Jiangsu China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Dapagliflozin Propanediol Monohydrate is not present in any pharmacopeia. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity A & related substances (impurity A & any unknown impurity), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (D20161001, D20161002, D20161101)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer

		medium), batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.	
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is XIGA 5mg Tablets CCL Pharmaceutical (Pvt.) Ltd by performing quality tests (Identification, Assay, Dissolution, Hardness, Disintegration Time). CDP has been performed against the same brand that is XIGA 5mg Tablets CCL Pharmaceutical (Pvt.) Ltd in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.	
	Analytical method validation/verification of product	Method validation studies have submitted including System Suitability, Linearity, Accuracy, precision, Specificity, Limit of Quantification, Limit of Detection, Robustness.	
STABILITY STUDY DATA			
Manufacturer of API		M/s. Shanghai Pharma Group Changzhou Kony Pharmaceutical Co., Ltd .China	
API Lot No.		DGF20180501	
Description of Pack (Container closure system)		Alu-Alu blister packed in unit carton (14's)	
Stability Storage Condition		Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH	
Time Period		Real time: 6 months Accelerated: 6 months	
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)	
Batch No.		20PD259DAPT11	20PD260DAPT12	20PD264DAPT13
Batch Size		8000 Tablets	8000 Tablets	8000 Tablets
Manufacturing Date		12-2020	12-2020	12-2020
Date of Initiation		06-01-2022	06-01-2022	06-01-2022
No. of Batches		03		
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Apixa 2.5mg & 5mg (Apixaban) which was conducted on 30-04-2019 and was presented in 289th meeting of Registration Board held on 14th – 16th May 2019 . According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. JS20180935 issued by China Food and Drug Administration valid till 26/11/2023	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 6 , invoice (invoice# WIS180048) dated 05/06/2018 cleared by DRAP Karachi office dated 21.06-2018 specifying import of	

		Dapagliflozin propanediol monohydrate 1.5Kg (Batch# DGF20180501).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trial Reports are attached.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Stability chamber data (real time and accelerated) having monitoring of temperature and humidity are attached.

Remarks OF Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.5.3	In brand name 10mg mentioned. Clarification is required.	Due to typographic error,10mg was mentioned, revised document attached.
2.	3.2.P.5.3	Specifications claimed are Inhouse while drug product analytical method verification submitted. Clarification is required.	There are two strengths of Dapagliflozin Tablet, Dapagliflozin 5mg & Dapagliflozin 10mg Tablet and both formulation are with same dose proportional to excipients ratio , so analytical method validation have been performed on highest strength of Dapagliflozin 10mg Tablet. The scope have covered the Validation of analytical method in term of i.e. System Suitability, Specificity, Linearity, Precision, Intermediate, Precision Accuracy, Robustness Limit of Detection and Limit of Quantitation , hence analytical method validation of Dapagliflozin 5mg Tablet has been performed with limited parameters of analytical method validation i.e. System Suitability, Specificity, Precision.
3.	3.2.P.8	• Stability studies initiation date not mentioned on stability summary sheets. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	• Revised Stability Summary sheets are attached. • Compliance record of HPLC software 21CFR & audit trial reports was submitted from Page no. 638-659, now re-submitting.

Decision: Approved with innovator's specification..

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1099.	Name, address of Applicant / Marketing Authorization Holder	M/s NABIQASIM INDUSTRIES (PVT) LTD. 17 / 24, Korangi Industrial Area, Karachi – Pakistan.
	Name, address of Manufacturing site.	M/s NABIQASIM INDUSTRIES (PVT) LTD. 17 / 24, Korangi Industrial Area, Karachi – Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 34228 dated 31-12-2021
	Details of fee submitted	PKR 30,000/-: Deposit slip # 35283356895
	The proposed proprietary name / brand name	FOVIROX-AF Tablets 25mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Tenofovir Alafenamide Fumarate equivalent to Tenofovir Alafenamide … 25mg
	Pharmaceutical form of applied drug	Yellow color, circular biconvex shape film coated tablet. Both sides plain packed in HDPE Bottle of 30's tablets.
	Pharmacotherapeutic Group of (API)	Antiviral for systemic use, nucleoside and nucleotide reverse transcriptase inhibitors.
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	Packed in HDPE Bottle of 30's tablets
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Vemlidy Tablet 25mg by Gilead Sciences Ltd. U.S.A.., USFDA Approved.
	For generic drugs (me-too status)	Tenofomide Tablet 25mg by M/s. Getz pharma ., Reg. No. 093109
	GMP status of the Finished product manufacturer	cGMP certificate on the basis of evaluation conducted on 19-09-2020 and valid for two years.
	Name and address of API manufacturer.	M/s Yichang changJiang hec pharmaceutical Co., Ltd. No.38-62, Binjiang road ,Yidu, Hubei province P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Monograph of Tenofovir Alafenamide Fumarate is present is as per In-house (Manufacturer's) specifications. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for related substances (Impurity A, PMPA, Unspecified impurity and Total impurities), specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (DTAF-151011, DTAF-151012, DTAF-151013)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Tenofomide Tablets 25mg (Tenofovir Alafenamide) is registered and being marketed by Getz Pharma (Pvt.) Ltd., by performing quality tests (Description, Identification, Assay and Dissolution) CDP has been performed against the same brand that is Tenofomide Tablets 25mg (Tenofovir Alafenamide) by Getz Pharma (Pvt.) Ltd., in Acid media (pH 1.2) & Phosphate Buffer (pH 4.5 & 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Yichang changjiang hec pharmaceutical Co., Ltd. No.38-62, binjiang road ,yidu, hubei province P.R.China

Remarks OF Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Drug substance name in applied dossier and drug substance part is M/s Yichang changjiang hec pharmaceutical Co., Ltd while on National medical Products Administration mentioned as Yichang Dongguang changjiang pharmaceutical Co., Ltd. Clarification is required.	We would like to inform you that, the Manufacturer of said Drug substance has confirmed that, the name of Company is M/s. Yichang HEC Changjiang Pharmaceutical Co. Ltd. Having DML No. 20200013 and Social credit code: 91420000730842584f, which is also mentioned on NMPA website and as well as on attached Drug Manufacturing License, the difference in company name is due to erroneous translation from Chinese to English version on NMPA website, The Manufacturer also provided the attached undertaking for the said point on letter head, for more clarity Moreover, in 289th RB Meeting, Drug Registration board also approved the same Product (Tenofovir Alafenamide) from same API Manufacturer (M/s. Yichang HEC Changjiang Pharmaceutical Co. Ltd), extract from the said RB Meeting also attached for ready reference.

Decision: Approved with innovator's specification..

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Not provided
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Copy of COA of Prucalopride Succinate (Batch# KB/PPD/SSP/19/002.) from M/s Kimia Biosciences Limited, India is submitted. Copy of COA of Prucalopride Succinate (Batch# KB/PPD/SSP/19/002.) from M/s. Weather Folds Pharmaceuticals is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Yes
4.	Stability study data of API from API manufacturer	The firm has submitted copy of accelerated, 06 Months (40°C ± 2°C & 75±5%RH) & long term, 36 Months (30°C ± 2°C & 65±5%RH) stability study reports of 03 batches.
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate for M/s Kimia Biosciences Limited,(Formerly Laurel Organics Ltd.) Village Bhondsi Tehsil-Sohna District-Gurgoan Haryana, India issued by Food and Drug Adminstration Haryana, Panchkula issued on 18-11-2019 and, valid for two years..
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Commercial Invoice No: KBLEXP/19-20/010 Dated: 14-03-2019 from M/s Kimia Biosciences Limited, Village Bhondsi Tehsil-

		Sohna District-Gurgoan Harryana, India attested by AD DRAP (Peshawar) dated ; 28-03-2019 for Pruclopride Succinate batch No# KB/PPD/SSP/19/002.
7.	Protocols followed for conduction of stability study	Yes
8.	Method used for analysis of FPP	Yes
9.	Drug-excipients compatibility studies (where applicable)	NA
10.	Complete batch manufacturing record of three stability batches.	The firm has submitted copy of Trial batch manufacturing record. Details are as under: Prucafold 1mg **Batch No.** / **Bach size** / **Mfg. Started** T-61 / 1100 Tablets / 24-06-2019 T-62 / 1100 Tablets / 24-06-2019 T-63 / 1100 Tablets / 24-06-2019

Report on investigation of authenticity / genuineness of data submitted for registration of Prolide 1mg tablet (Prucalopride as Succinate) 1mg & 2mg Tablet by M/s. Weather Folds Pharmaceuticals, Plot# 69, phase-II, Industrial Estate, Hattar.

Firm Name Address: Weather folds Pharmaceutical plot No 69/2, Phase 2 Industrial Estate Hattar
Date of Inspection: **26.08.2022**

Q.No.1	Do you have documents confirming the import of Prucalopride API?	Firm provided the documents conform the import of Prucalopride API i.e. Form-6 issued by ADC dated 31-01-2020, No. F 10-72/2020-DRAP IPS 490 and attested by Assistant Director Peshawar copy attached **(Annexure 01).**
Q.No.2	What was the rationale behind selecting the particular manufacturer of API?	The firm informed that selection of API manufacturer was based upon its GMP Certification and availability of DMF (open part). The firm agreed to provide adequate sample for initial testing for prequalification. The API manufacturer qualified their vendor qualification SOP.
Q.No.3	Do you have documents confirming the import of Prucalopride reference standard and impurity standards?	Yes, the import documents of working standard, Batch No PCS-P/A069/13, Mfg. Date: Dec-2019, provided by supplier copy attached **(Annexure 02).** However, API manufacturer did not provide impurities.
Q.No.4	Do you have certificate of Analysis of the API, reference standards and impurity standards?	Yes, certificate of Analysis of the API and working standards (Vonoprazan as fumarate) are provided. However, the API manufacturer did not provide impurities.
Q.No.5	Do you have any approval of API or GMP certificate of API manufacturer issued by regulatory authority of country of origin?	Yes, approval of API or GMP certificate of API manufacture METROCHEM API PVT LTD No 1296/DD/DCA/VSP/2020 valid till 28-09-2021 copy attached **(Annexure 03).**
Q.No.6	Do you use API manufacturer method of testing?	Yes, the firm use API manufacturer method of testing, also verification of API performed by the firm.
Q.No.7	Do you have stability studies reports on API?	Yes, stability studies report on API (prucalopride succinate) are provided in DMF.
Q.No.8	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	No, the stability testing has not been performed as per SIM method and degradation product, however firm conduct stability study as per ICH guidelines.
Q.No.9	Do you have method for quantifying the impurities in the API?	Yes, the firm have API manufacturer method of testing impurities.
Q.No.10	Do you have some remaining quantities of the API, its reference standard and impurities standards?	Working standard approx. 100mg available at time of inspection.
Q.No.11	Have you used pharmaceutical grade excipients?	Yes, the firm uses imported pharmaceutical grade excipient, which are procured from local suppliers. Vender qualification SOP is followed.
Q.No.12	Do you have documents confirming the import of the used excipients?	The firm purchased locally import material, COA and Evidence attached **(Annexure 04).**
Q.No.13	Do you have test reports and other records on the excipients used?	Yes, test reports and other records on the excipients use available copy attached **(Annexure 05).**

Q.No.14	Do you have written and authorized protocols for the development of Prucalopride tablets?	The firm provided written and authorized protocols for the development of Prucalopride tablet.
Q.No.15	Have you performed Drug-excipient compatibility studies?	Drug-excipient compatibility studies not performed by the firm, however Firm used brand leader formulation already studied by them copy attached **(Annexure 06).**
Q.No.16	Have you performed comparative dissolution studies?	Yes, the firm performed comparative dissolution studies in three media details attached **(Annexure 07).**
Q.No.17	Do you have product development (R&D) section	No separate dedicated product development (R&D) section is established by the firm. The firm was advised to establish R&D section with required staff on urgent basis.
Q.No.18	Do you have necessary equipments available in product development section for development of Prucalopride tablets?	Manual/ production facilities are being utilized by the firm for said purpose. The firm is committed to establish R&D section as discussed above.
Q.No.19	Are the equipments in product development section qualified?	As above.
Q.No.20	Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?	As above.
Q.No.21	Do you have qualified staff in product development section with proper knowledge and training in product development?	As above.
Q.No.22	Have you manufactured three stability batches for the stability studies of Prucalopride tablets as required?	Yes the firm has manufactured three stability batches for the stability studies of Prucalopride tablets as required Prolide 1mg B.NO:T-01,T-02,T-03 Mfg date:04-2020 Exp date:04-2022, B.Size:1200 Tablet each. Prolide 2mg B.NO:T-04,T-05,T-06 Mfg date:04-2020 Exp date:04-2022 B.Size:1200 Tablet each.
Q.No.23	What was the criteria for fixing the batch size of stability batches?	The firm said that the criteria for fixing the batch size of stability batches is the number of tablets per testing frequency and number of testing frequencies while keeping in view the decision of Registration Board (RB) in its 249th Meeting.
Q.No.24	Do you have complete record of production of stability batches?	Yes batch manufacturing record available
Q.No.25	Do you have protocols for stability testing of stability batches?	Yes, firm have protocols for stability testing of stability batches as per ICH guidelines.
Q.No.26	Do you have developed and validated the method for testing of stability batches?	Yes, the firm has developed and validated the method for testing of stability batches summary report attached **(Annexure 08).**

Q.No.27	Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?	NA
Q.No.28	Do you have documents confirming the qualification of Equipments / instruments being used in the test and analysis of Prucalopride API and the finished drug?	The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of API and the finished drug.
Q.No.29	Do your method of analysis stability indicate?	Degradation study not performed by firm
Q.No.30	Do your HPLC software is 21CFR compliant?	Water 600 pump 486 Detector Empower 2 software 21 CFR Complies
Q.No.31	Can you show Audit Trail reports on Prucalopride testing?	Audit trail on the testing reports is fully available.
Q.No.32	Do you have some remaining quantities of degradation products and stability batches?	Only Stability batches available
Q.No.33	Do you have commitment batches kept on stability testing?	Yes
Q.No.34	Do you have valid calibration status for the Equipments used in Prucalopride tablets production in analysis?	The firm has valid calibration status for the equipment used in production and analysis of Prucalopride **(Annexure 09)**
Q.No.35	Do proper and continuous monitoring and control are available for stability chamber?	digital record of chamber available, Binder chamber 21CFR Complies with ups backup and generator available
Q.No.36	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Related manufacturing area, equipment, personnel and utilities are in compliance
Q.No.36	Power supply Backup	Separate generator available for both QC and Production. Start within minute after light breakage 100KW for Production 25KW for QC Department

With reference to queries, reply is placed at S. No. 1&3. Based on physical inspection and data reviewed, panel has verified the stability data provided by the firm.

Decision:

- **Registration Board decided to approve registration of Prolide 1mg Tablet (Prucalopride as Succinate) and Prolide 2mg Tablet (Prucalopride as Succinate) with Innovator's specifications by M/s. Weather Folds Pharmaceuticals. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months.**
- **Firm shall submit the fee of Rs. 75,000/- for submission of new stability data, for both products separately as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Agenda of Evaluator PEC-XIV

Case No. Registration applications of local manufacturing of human drugs submitted on CTD format (New License)

On the recommendations of panel of experts, the CLB in its 276th meeting held on 03rd September, 2020 has considered and approved the grant of Drug Manufacturing License in the name of M/s Alpenglow pharmaceuticals (Pvt) Ltd, Plot No. A7, Risalpur Export processing Zone, Risalpur.

v. Capsule (Cephalosporin) (1 molecule / 2products)
vi. Dry Powder injection section (Cephalosporin) (1 molecule / 7 products)
vii. Dry powder suspension section (Cephalosporin) (1 molecule / 2 products)
viii. Tablet (Psychotropic)

New cases:

1103.	Name, address of Applicant / Marketing Authorization Holder	M/s Alpenglow Pharmaceuticals Plot # A/7, Export Processing Zone Risalpur, District Nowshera (KP) Pakistan.
	Name, address of Manufacturing site.	M/s Alpenglow Pharmaceuticals Plot # A/7, Export Processing Zone Risalpur, District Nowshera (KP) Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 5855: Dated 24-02-2022
	Details of fee submitted	PKR 30,000/-: Dated 20-10-2021
	The proposed proprietary name / brand name	BACCIL 200mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Cefixime as trihydrate…….200 mg
	Pharmaceutical form of applied drug	Hard Gelatin capsule
	Pharmacotherapeutic Group of (API)	Anti-bacterials for systemic use, Third-generation cephalosporins
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1 x 5's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**Cefixima Norman 200mg** (AEMPS Approved).
	For generic drugs (me-too status)	Cefim 200 mg Capsule
	GMP status of the Finished product manufacturer	New license granted on 22-09-2020.
	Name and address of API manufacturer.	M/s Pharmagen Ltd., Address: Kot nabi Bukhsh wala, 34-Km Ferozepur Road, Lahore-Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefixime as trihydrate is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C±2°C / 65% ± 5%RH for 72 months Accelerated: 40°C±2°C / 75% ± 5%RH for 6 months Batches: (120512013, 120512014, 120512015)
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product that is Cefim 200 mg Capsule by Hilton Pharma by performing quality tests (Identification, assay, Dissolution, Uniformity of dosage form). CDP has been performed against the comparator product that is Cefim 200 mg Capsule by Hilton Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have been submitted including linearity, range, accuracy, precision and specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Pharmagen Ltd., Address: Kot nabi Bukhsh wala, 34-Km Ferozepur Road, Lahore-Pakistan.
API Lot No.	00244-05/095/2021
Description of Pack (Container closure system)	Blister pack of 5's, Printed Unit Carton**,** Product Insert
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 2, 4, 6 (Months)

	Real Time: 0, 3, 6 (Months)		
Batch No.	004	005	006
Batch Size	10000 Capsules	10000 Capsules	10000 Capsules
Manufacturing Date	06-2021	06-2021	06-2021
Date of Initiation	14-06-2021	14-06-2021	14-06-2021
No. of Batches	03		

DOCUMENTS /DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted GMP certificate (06/2019-DRAP(AD/607409-530) issued by DRAP, Lahore dated 11-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the purchase Cefixime (compacted, Batch # 00244-05/095/2021, 25kg) from M/s pharmagen limited, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	As our pharma is new licensee, and we have not came into production. Now we have HPLC (Shimadzu 10AT) which is not 21CFR compliance. However, we commit that we will soon perform the stability studies on a 21CFR compliance HPLC system.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) was submitted.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	In form 5F, USP specs has been mentioned for product, however monograph do not exist in USP, justify.	In USP, the monograph of cefixime tablet exists, the method of analysis of cefixime tablet was used for the cefixime capsule, so USP specs were claimed. However, after the decision of DRAP the product was tested as per specifications defined in 313 meeting of registration board (notification No. F.14-1/2022-PEC) and the results were in concordant to specifications. So it is requested to the board to approved the product as per specifications of cefixime capsule defined in 313 RB meeting of DRAP.
2.	Copies of the Drug Substance Specifications and Analytical procedures used for routine testing of the drug substance / Active Pharmaceutical Ingredient by both Drug Substance & Drug Product Manufacturer are required.	Submitted.
3.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the drug Product Manufacturer for both compendia as well as non-compendial drug substance shall be submitted.	The firm has submitted method verification studies for assay testing of cefixime using system suitability, accuracy, precision, and specificity.

4.	The assay Limit Specified by the drug substance manufacturer (95% to 102%) is different from that specified by drug product manufacturer (95% to 103%) Justification is required.	As per USP, the assay limit of cefixime trihydrate is 95% to 103%. The specification in CoA was incorrect and revised CoA as per USP is submitted.
5.	The submitted CoA shows that the material is of micronised nature. Justify	Mistakenly the CoA of suspension was submitted. The material used in capsule is of compacted nature. The relevant CoA is submitted.
6.	Provide COA of reference standard which is actually used in analysis of drug substance	The firm has submitted CoA of USP reference standard.
7.	Submit Master Formulation including Theoretical fill weight per unit.	The firm has submitted qualitative and quantitative master formulation including theoretical fill weight per capsule.
8.	Justify why the pharmaceutical equivalence was not performed with the innovator's product.	As cefixime capsule is a generic drug product and for the reason of unavailability of innovator's pack due to pandemic COVID, the equivalence studies were performed with a DRAP registered competitor's brand.
9.	Analytical procedure of cephradine capsule has been given in relevant section instead of cefixime capsule.	The analytical procedure was misplaced with cephradine dossier. The method of analysis of cefixime capsule as per DRAP notification was used.
10.	Provide standard and sample preparation methods used in analytical method verification studies. Justify method verification studies of drug without performance of specificity test. Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions.	The firm has submitted method verification for assay of drug product using system, accuracy, precision, and specificity.
11.	Test method for Cefixime as trihydrate Tablet is provided in analytical method verification studies while applied formulation is Cefixime capsule.	The analytical procedure of cefixime tablet dossier was mistakenly mixed with capsule dossier while compiling. The cefixime capsule method was used for testing and verification of method is given above.
12.	The Peak area of standard solution concentration in analytical method verification studies is approximately 6609294 while the peak area of the standard solution of same concentration in stability studies is 5344596. Clarify the difference in peak areas.	The actual area is near about 5280920. The area difference is because of difference in injection volume. The method was verified with actual injection volume and detailed report of verification study of capsule is provided
13.	The result of batch analysis and stability data reflect that dissolution test has not been performed throughout the stability studies. Justify?	The dissolution test was performed at each interval of accelerated and real time stability study. FDA dissolution parameters were adopted and all the results were found within the specified limit.
14.	Justify the addition of test of pH in stability studies of cefixime capsule.	pH test was performed as an internal test. The pH test was performed by same method as that of cefixime raw material.
15.	Provide raw data sheets to justify the calculation of the results for assay testing.	Not submitted
16.	Submit copy of commercial invoice for evidence of purchase of drug substance that have been used in the development of analysis of each batch of Drug Product	The firm has submitted copy of invoice for the purchase Cefixime (compacted, Batch # 00244-05/095/2021, 25kg) from M/s pharmagen limited, Lahore.
17.	Submit Compliance record of HPLC Software 21 CFR and Audit trail report on product testing.	As our pharma is new licensee, and we have not came into production. Now we have HPLC (Shimadzu 10AT) which is not 21CFR compliance. However, we commit that we will

		soon perform the stability studies on a 21CFR compliance HPLC system.

Decision: Approved with Manufacturer's Specifications as approved by Registration Board in its 313th meeting and notified vide letter No. F.14-I/2022-PEC dated 14th March 2022.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that registration letter will be issued after submission of 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

1.	Copies of the Drug Substance Specifications and Analytical procedures used for routine testing of the drug substance / active Pharmaceutical Ingredient by both Drug Substance & Drug Product Manufacturer are required.	The firm has submitted copies of drug substance specifications and analytical procedures from both drug substance manufacturer and drug product manufacturer.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Analytical method verification studies were submitted from drug product manufacturer by performing specificity, accuracy and precision studies.
3.	• The assay limit specified by drug substance manufacturer (95% to 102) is different from that specified by drug product manufacturer (95% to 103%). Justification is required. • The submitted COA shows that the material used is of compacted nature. Justify the type of drug substance used in cefixime suspension since the same is used in Capsule dosage form.	As per USP, the assay limit of cefixime trihydrate is 95% to 103%. The specification in CoA was incorrect and revised CoA as per USP is attached. Mistakenly the CoA of Capsule was submitted. The material used in dry suspension is of micronized nature. The relevant COA is attached.
4.	Provide COA of reference standard which is actually used in the analysis of drug substance	The firm has submitted USP reference standard with lot no. G01139.
5.	Submit master formulation including theoretical fill weight per bottle.	The firm has submitted qualitative and quantitative formula alongwith calculation of equivalency factor of cefixime trihydrate.
6.	• Details of applicant and reference product used in pharmaceutical equivalence are required.	The firm has used cefiget 100mg/5ml dry suspension as reference product. *However,*

	• Submit data of compatibility studies of the drug product with recommended diluent in section 3.2.P.2.6.	*details of reference product including batch number, manufacturing date and expiry date were not provided.* Compatibility studies were conducted using purified water since the label recommends reconstituting this product with purified water.
7.	• The developed formulation is available in 30ml bottle, while the innovator product is available in 50ml, 75ml and 100ml bottle size only. Justify how your formulation will deliver equal number of doses as delivered by the innovator product. • Justify why drug release studies / comparative dissolution studies were not performed to justify your formulation development process	*The submitted justification is not relevant to the point raised.* As the cefixime suspension is formulated as per USP specifications, and USP does not define the test for dissolution of product, so the dissolution is not considered in specification of finished product. However, in the process of formulation development, comparative dissolution was performed in three different media following the parameters defined in FDA dissolution guidelines. Comparative study report is attached.
8.	• The test for deliverable volume is not added in specifications as recommended in USP monograph. Revise your specifications as per USP monograph along with submission of applicable fee. • Provide detailed method of analysis of the drug product in section 3.2.P.5.2 instead of providing copy of USP monograph.	The firm has included the test for deliverable volume after reconstitution and revised specifications of finished product are submitted. Detailed method of analysis of the drug product is provided.
9.	• Provide standard and sample preparation methods used in analytical method verification studies. • Justify method verification studies of drug without performance of specificity test. Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions. • Test method for Cefixime as trihydrate Tablet is provided in analytical method verification studies while applied formulation is cefixime as trihydrate suspension. • The peak area of standard solution concentration in analytical method verification studies is approximately 6609294 while the peak area of the standard solution of same concentration in stability studies is 516942. Clarify the difference in peak areas.	Not submitted. The firm has submitted method verification of drug product by performing accuracy, precision and specificity parameters. *Details of concentrations of 80%, 100% and 120% were not provided.* Method verification report of drug product is attached. The actual area is near about 516942. The area of approx. 6609294 is that of method verification of cefixime capsule. *Mistakenly the area of verification study of capsule was mixed with suspension.*
10.	Provide COA of reference standard actually used in the analysis of drug product.	USP reference standard of cefixime with lot no. G01139 has been submitted.
11.	In-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.	As defined in the labelling, the in-use stability was tested by keeping the reconstituted suspension at room temperature for 7 days and in refrigerator for 14 days.
12.	• USP monograph specifies that the retention time should be 10 minutes, while the retention time in your submitted results is less than 10	USP defines that the flow rate should be adjusted that the retention time is about 10 min. Our retention is a few seconds less than 10 min which is in the acceptable range.

	min. Justify how the method can be considered as per USP monograph.	
13.	Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch.	Not submitted
14.	Submit copy of commercial invoice for evidence of purchase of drug substance that have been used in the development of analysis of each batch of drug product.	The firm has submitted copy of delivery note from M/s pharmagen limited stating purchase of Cefixime micronized 25kg. *However, purchase invoice is not submitted.*
15.	Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing.	As our pharma is a new licensee, and we have not come into production. Now we have HPLC (Shimadzu 10AT) which is not 21CFR compliance. However, we commit that we will soon perform the stability studies on a 21CFR compliance HPLC system.

Previous Decision: 317 meeting

Sr. No.	**Decision of 317th meeting**	**Response by the firm**
1.	Performance of pharmaceutical equivalence and CDP studies with innovator/reference product i.e., Cefspan 100mg / 5ml Dry suspension.	Firm has submitted pharmaceutical equivalence and CDP along with Cefspan 100mg/5ml suspension.
2.	Details of reference product including batch number, manufacturing date and expiry date.	Batch Number: D2159 Manufacturing Date: 07-2022 Expiry Date: 06-2024
3.	Analytical method verification reports of drug product including standard and sample preparation methods used in each tested parameter.	Firm has submitted report of verification studies of analytical method of drug product.
4.	Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch.	Firm has submitted raw data sheets for calculation of results for assay testing at each time point during the stability testing of each batch.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS/DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of delivry note dated 16-08-2021 specifying purchase of 25Kg Cefixime (micronised).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches alongwith raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	**Observations**	**Response by the firm**
1.	Copies of the Drug Substance Specifications and Analytical procedures used for routine testing of the drug substance / active Pharmaceutical Ingredient by both Drug Substance & Drug Product Manufacturer are required.	The firm has submitted copies of drug substance specifications and analytical procedures from both drug substance manufacturer and drug product manufacturer.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Analytical method verification studies were submitted from drug product manufacturer by performing specificity, accuracy and precision studies.

3.	• The assay limit specified by drug substance manufacturer (95% to 102) is different from that specified by drug product manufacturer (95% to 103%). Justification is required. • The submitted COA shows that the material used is of compacted nature. Justify the type of drug substance used in cefixime suspension since the same is used in Capsule dosage form.	As per USP, the assay limit of cefixime trihydrate is 95% to 103%. The specification in CoA was incorrect and revised CoA as per USP is attached. Mistakenly the CoA of Capsule was submitted. The material used in dry suspension is of micronized nature. The relevant COA is attached.
4.	Provide COA of reference standard which is actually used in the analysis of drug substance	The firm has submitted USP reference standard with lot no. G01139.
5.	Submit master formulation including theoretical fill weight per bottle.	The firm has submitted qualitative and quantitative formula alongwith calculation of equivalency factor of cefixime trihydrate.
6.	• Details of applicant and reference product used in pharmaceutical equivalence are required. • Submit data of compatibility studies of the drug product with recommended diluent in section 3.2.P.2.6.	The firm has used cefiget 100mg/5ml dry suspension as reference product. *However, details of reference product including batch number, manufacturing date and expiry date were not provided.* Compatibility studies were conducted using purified water since the label recommends reconstituting this product with purified water.
7.	• The developed formulation is available in 30ml bottle, while the innovator product is available in 50ml, 75ml and 100ml bottle size only. Justify how your formulation will deliver equal number of doses as delivered by the innovator product. • Justify why drug release studies / comparative dissolution studies were not performed to justify your formulation development process	*The submitted justification is not relevant to the point raised.* As the cefixime suspension is formulated as per USP specifications, and USP does not define the test for dissolution of product, so the dissolution is not considered in specification of finished product. However, in the process of formulation development, comparative dissolution was performed in three different media following the parameters defined in FDA dissolution guidelines. Comparative study report is attached.
8.	• The test for deliverable volume is not added in specifications as recommended in USP monograph. Revise your specifications as per USP monograph along with submission of applicable fee. • Provide detailed method of analysis of the drug product in section 3.2.P.5.2 instead of providing copy of USP monograph.	The firm has included the test for deliverable volume after reconstitution and revised specifications of finished product are submitted. Detailed method of analysis of the drug product is provided.

9.	• Provide standard and sample preparation methods used in analytical method verification studies. • Justify method verification studies of drug without performance of specificity test. Specify the details of the accuracy and specificity test including the details of concentration of 80%, 100% and 120% solutions. • Test method for Cefixime as trihydrate Tablet is provided in analytical method verification studies while applied formulation is cefixime as trihydrate suspension. • The peak area of standard solution concentration in analytical method verification studies is approximately 6609294 while the peak area of the standard solution of same concentration in stability studies is 516942. Clarify the difference in peak areas.	Not submitted. The firm has submitted method verification of drug product by performing accuracy, precision and specificity parameters. *Details of concentrations of 80%, 100% and 120% were not provided.* Method verification report of drug product is attached. The actual area is near about 516942. The area of approx. 6609294 is that of method verification of cefixime capsule. *Mistakenly the area of verification study of capsule was mixed with suspension.*
10.	Provide COA of reference standard actually used in the analysis of drug product.	USP reference standard of cefixime with lot no. G01139 has been submitted.
11.	In-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.	As defined in the labelling, the in-use stability was tested by keeping the reconstituted suspension at room temperature for 7 days and in refrigerator for 14 days.
12.	• USP monograph specifies that the retention time should be 10 minutes, while the retention time in your submitted results is less than 10 min. Justify how the method can be considered as per USP monograph.	USP defines that the flow rate should be adjusted that the retention time is about 10 min. Our retention is a few seconds less than 10 min which is in the acceptable range.
13.	Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch.	Not submitted
14.	Submit copy of commercial invoice for evidence of purchase of drug substance that have been used in the development of analysis of each batch of drug product.	The firm has submitted copy of delivery note from M/s pharmagen limited stating purchase of Cefixime micronized 25kg. *However, purchase invoice is not submitted.*
15.	Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing.	As our pharma is a new licensee, and we have not come into production. Now we have HPLC (Shimadzu 10AT) which is not 21CFR compliance. However, we commit that we will soon perform the stability studies on a 21CFR compliance HPLC system.

Previous Decision: 317 meeting

Sr. No.	**Decision of 317th meeting**	**Response by the firm**
1.	Performance of pharmaceutical equivalence and CDP studies with innovator/reference product i.e., Cefspan 100mg / 5ml Dry suspension.	Firm has submitted pharmaceutical equivalence and CDP along with Cefspan 200mg/5ml suspension.
2.	Details of reference product including batch number, manufacturing date and expiry date.	Reference product: Cefspan 200mg/5mL Suspension Batch Number: D1181 Manufacturing Date: 05-2022 Expiry Date: 04-2024
3.	Analytical method verification reports of drug product including standard and sample preparation methods used in each tested parameter.	Firm has submitted report of verification studies of analytical method of drug product.

4.	Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch.	Firm has submitted raw data sheets for calculation of results for assay testing at each time point during the stability testing of each batch.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration applications of local manufacturing of human drugs submitted on CTD format

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to onsite inspection report of their product "Valsac 24mg/26 mg Tablets, Valsac 49mg/51 mg Tablets, Valsac 97mg/103 mg Tablets"which was conducted on 10-03-2020, and was presented in 295th meeting of Registration Board (8-11 June, 2020). Following observations were reported in the report: • The HPLC software is 21CFR Compliant. • Audit trail reports were available and physically checked. Firm has adequate monitoring and controls for stability chambers. Software is installed for continuous monitoring of chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP for Alven Laboratories issued by the competent authority of Czeshia certificate no. *sukls* 94375/2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice (invoice# 20.60070) cleared by DRAP Peshawar Office, Pakistan dated 21-05-2020 specifying import 0.01 kg of cabergoline (Batch# 001012020).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:
DOSTINEX tablets are indicated for the treatment of hyper-prolactinemic disorders, either idiopathic or due to pituitary adenomas.

Sr. No.	Observations	Response by the firm
1.	Submit valid copy of GMP certificate of the drug substance manufacturer issued by relevant regulatory authority of country of origin.	The firm has submitted copy of Eudra GMP for M/s Alven Laboratories s.r.o. issued by the competent authority of Czeshia certificate no. *sukls* 94375/2019. It is valid till 25-01-2024.
2.	Clarify why you have tested a Ph. Eur grade drug substance by applying USP monograph since many tests are not included in USP 43.	As the drug substance and drug product monographs are available in USP, therefore all the tests are performed according to USP monograph for both drug substances and drug product as per drug specification Rules.
3.	Justify the addition of tests of weight of tablet and disintegration time in stability studies since the same is not included in	In stability studies, all the parameters are tested mentioned in general monograph of Tablets. The tests of uniformity of weight and disintegration tests are given in the general monograph of film

	pharmacopoeia instead pharmacopoeia recommends test of uniformity of dosage unit.	coated tablets of USP. The disintegration test is variable parameter that can be affected during stability studies and therefore disintegration test is included to monitor the changes during stability studies.
4.	Submit documents of the procurement of API with approval from DRAP.	The firm has submitted copy of invoice for the purchase of Cabergoline (10g, 001012020) attested by Assistant Director (I & E), DRAP peshawar dated 21-05-2020.
5.	Submit compliance record of HPLC software 21 CFR and audit trail reports on product testing.	The firm has submitted audit trail reports on product testing.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module III (Drug Substance)	Official monograph of Dexlansoprazole Pellets is not present in pharmacopoeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C±2°C/ 65% ± 5%RH for 72 months Accelerated: 40°C±2°C/ 75% ± 5%RH for 6 months Batches: (DLP123T, DLP124T, DLP125T)
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product Dexiva 30mg Capsule (Batch # 039C47) by M/s Ferozsons Laboratories by performing quality tests (Identification, Assay, Dissolution). CDP has been performed against the same product that is Dexon 30mg capsule by M/s Relizon Pharma in Acid media (pH 0.1N HCl) & Phosphate Buffer (pH 5.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s Vision Pharmaceuticals Plot No: 22-23, Kahuta Industrial Triangle, Kahuta Rd, Islamabad. Pakistan.
API Lot No.	DLP467

Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	ST-001	ST-002	ST-003
Batch Size	1500 Capsules	1500 Capsules	1500 Capsules
Manufacturing Date	09-2019	09-2019	09-2019
Date of Initiation	23-09-2019	24-09-2019	26-09-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Applicant has submitted GMP certificate having following information on it: Certificate No. F.3-26/2019-Addl. Dir. (QA&LT-1) Issued to: M/s. Vision Pharmaceuticals Validity: 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of Delivery challan for the purchase of Dexlansoprazole DDR pellets 22.5% (quantity 2.5 kg) from M/s. Vision Pharmaceuticals, Islamabad which is a local source.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has not submitted audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has not submitted any document.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
6.	You have claimed USP specification in module 1 while the product monograph is not present in available monograph.	This is a typographical mistake. The product monograph is in-house.
7.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method validation of the test method for the determination of Dexlansoprazole 22.5% DDR pellets by performing specificity, linearity, accuracy, intermediate precision, repeatability and robustness.
8.	Justify why pharmaceutical equivalence and CDP studies were not performed against innovator product (Dexilant).	We use Dexiva capsule for pharmaceutical equivalence and CDP studies since this brand is easily available in market.
9.	Justify why pharmaceutical equivalence study does not include complete testing of the drug	Not submitted.

	product and the comparator product including the tests recommended by innovator product.	
10.	Clarify the type of capsule shell used in dexlansoprazole pellets since innovator product has specified hypromellose capsule shells.	We use hard gelatin capsule for the filling of Dexon Capsule.
11.	If the product monograph is present in USP, justify how you have adopted specifications and analytical procedures of drug substance manufacturer.	The product is not available in USP, so we use in-house method.
12.	The tests of content uniformity and loss on drying were not included in the submitted specifications as recommended by literature of innovator product.	Not submitted
13.	Submit analytical procedures of all the tests mentioned in finished drug product specifications.	The firm has submitted analytical procedures used for testing of drug product.
14.	Justify analytical method for assay testing without performance of analytical method verification / validation studies. Justify your statement that since the product is pharmacopoeial therefore analytical process validation is not mandatory in the light of Pharmacopoeial/ICH/WHO guidelines.	The firm has not submitted analytical method validation studies of drug product.
15.	The results of batch analysis and stability data reflect that tests of content uniformity and loss on drying have not been performed throughout stability studies. Justify your stability study data without performance of these tests.	Not submitted.
16.	Justify the selection of time points for stability studies in the light of relevant guidelines.	Not submitted.
17.	Submit copy of invoice for evidence of purchase of pellets used in the development of analysis of each batch of drug product.	The firm has submitted copy of invoice (600714) for the purchase of Dexlansoprazole DDR pellets 22.5% (batch # DLP467, 3kg) dated 12-09-2019.
18.	Provide copy of Batch Manufacturing Record (BMR) for the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	Not submitted
19.	Submit copy of GMP certificate of drug substance manufacturer.	The firm has submitted copy of GMP certificate for M/s Vision Pharmaceuticals issued by Additional Director, DRAP, Islamabad. The certificate was valid till 10th February, 2022.
20.	Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail reports on testing of drug product.

Decision: Deferred for following:

- **Submission of 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Pharmaceutical equivalence study with complete testing of the drug product and the comparator product including the tests recommended by innovator product.**
- **Results of tests of content uniformity and loss on drying as recommended by literature of innovator product.**
- **Report of analytical method validation studies of the drug product.**
- **Scientific justification for the selection of time points for stability studies in the light of ICH/WHO relevant guidelines.**
- **Batch Manufacturing Record (BMR) for the batches of drug product for which stability studies data is provided.**

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Estine (Ebastine) tablets 10mg & 20mg which was conducted on 06th May 2019 and was presented in 289th meeting of Registration Board held on 14th - 16th May 2019. The case was approved and the inspection report confirms following points:

<table>
<tr><td></td><td></td><td>• The HPLC software is 21CFR Compliant as per record available with the firm.
• Audit trail on the testing reports is available.
• Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
• Related manufacturing area, equipment, personnel and utilities are GMP compliant.</td></tr>
<tr><td>2.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>Firm has submitted copy of Good Manufacturing Practice (GMP) certificate no. K. Dis. No. 17264/D1/4/2018 issued by Department of Food Safety and Drug Control Administration Tamil Nadu India. It is valid till 31-12-2021.</td></tr>
<tr><td>3.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>The firm has submitted copy of invoice attested by Assistant Director (I&E) DRAP, Karachi, has been submitted.
<table>
<tr><th>Batch no.</th><th>Invoice no.</th><th>Quantity imported</th><th>Date of approval</th></tr>
<tr><td>SDMNF 20087</td><td>7000047066</td><td>3.5kg</td><td>17-06-2020</td></tr>
</table></td></tr>
<tr><td>4.</td><td>Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td><td>Firm has submitted data of stability batches along with batch manufacturing record, analytical record and attested documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td></tr>
<tr><td>5.</td><td>Compliance Record of HPLC software 21CFR & audit trail reports on product testing.</td><td>Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.</td></tr>
<tr><td>6.</td><td>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)</td><td>Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated).</td></tr>
</table>

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Copy of GMP inspection report / GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	The firm has submitted copy of GMP certificate granted based on inspection conducted on 13-01-2022.
2.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical Method Verification studies including specificity, linearity, repeatability and range performed by the Drug Product manufacturer. This is to bring to your kind attention that we have used 100% API without any placebo in Analytical Method Verification Studies of Sodium Valporate; therefore, requirement of accuracy is not applicable. Further, we have performed linearity to check area response of the sample as the concentration of the sample raised within working range of sample i.e., 50% - 150%.
3.	Justify the acceptance criteria for nominal volume in finished product specifications as "Not less than 5ml". Moreover, justification	This is to inform your good office that we have developed the product formulation of Valsop Solution for Injection and Infusion 500mg/5ml by Benchmarking the product **Epival 500mg /**

	is required for inclusion in the finished product specification.	**5ml Injection**. Since the reference product has pack size of 5ml for injection, therefore we have adopted the same volume for our product per ampoule. Further, acceptance criteria for nominal volume in finished product specifications as "Not less than 5ml" is derived from USP chapter **⟨697⟩ Container Content For Injections** wherein it is mentioned that *"The volume is NLT the nominal volume in the case of containers examined individually".*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer will perform accuracy studies as part of verification studies of analytical method of drug substance before issuance of Registration Letter.**

	Stability studies	Stability study conditions: Long term: 30°C ± 2°C / 65% ± 5%RH for 6 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (T-01, T-02, T-03)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product Sildoso capsules 8mg (Batch # SA2) by CCL Pharmaceuticals by performing quality tests (Identification, Disintegration time, Dissolution, Assay). CDP has been performed against the same comparator product. Dissolution profiles of both products (sildoso capsules 8mg and silo capsules 8mg) were compared at three pH (1.2, 4.5, and 6.8) graphically and statistically.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, Robustness, accuracy, precision (Repeatability), specificity.
STABILITY STUDY DATA		
Manufacturer of API		Name: M/s Zhejiang Tianyu Pharmaceutical Co., Ltd. Factory Address: No.15, Donghai 5th Avenue, Zheijiang provincial chemical and medical raw materials base Linhai Zone, Taizhou City, Zhejiang province, China. Office address: Jiangkou Development Zone, Huangyan, Taizhou City, Zhejiang province, China.

API Lot No.	13000-180801		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Long term: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Long term: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 4, 6 (Months) Long term: 0, 3, 6 (Months)		
Batch No.	Trial#01	Trial#02	Trial#03
Batch Size	1500 Capsules	1500 Capsules	1500 Capsules
Manufacturing Date	01-2020	01-2020	01-2020
Date of Initiation	16-01-2020	16-01-2020	16-01-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any).	Mekolade Tablets containing Metolazone 5mg DRAP Registration no. 108059
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 202004051 issued by Zhejiang Medical Product Service Center for information publicity and Development Issue & Valid Upto Dt: 23-12-2020 – 22-12-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Letter to Assistant Director (Reg III) (R&I dated; 13-07-2018) is submitted wherein the permission to import different APIs including Silodosin for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of evaluator:

Sr. No.	Observations	Response by the firm
1.	Provide copies of the drug substance specifications and analytical procedures used for routine testing of the drug substance by both Drug Substance and Drug Product manufacturer.	Copies of the drug substance specifications and analytical procedures used for routine testing of the drug substance by both Drug Substance and Drug Product manufacturer have been submitted.
2.	Analytical method verification studies including specificity, accuracy and repeatability performed by the Drug Product Manufacturer for both compendial as well as non-compendial drug substances shall be submitted.	Analytical method verification studies including specificity, accuracy, and repeatability, were performed and are now submitted as per the requirement.

3.	The drug substance exists in three polymorphic forms. The polymorphic form of drug substance used has not been specified.	The drug substance exists in β polymorphic form as clearly mention in DMF.
4.	Justify why pharmaceutical equivalence and CDP studies were not performed with the innovator product (RAPAFLO).	Innovator product was not available in Pakistan. As a result, we selected the DRAP-approved reference product that was currently available in the market.
5.	Justify why assay limits of Silodosin Capsules 8mg are different in specifications (90-110%), batch analysis (90-105%) and pharmaceutical equivalence (90-105%).	The assay limit of Silodosin Capsules 8mg is 90-110% which is clearly mentioned in the submitted method of analysis and stability data sheet. There was a typographic error where the assay limit of 90-105% was written in batch analysis and pharmaceutical equivalence instead of 90-110%.
6.	The drug substance silodosin is light sensitive and cautions should be taken to avoid exposure to light during the complete analysis of the drug substance and drug product, justify your performance without taking into consideration the photosensitive nature of the drug substance.	The silodosin drug substance is stored in well closed container protected from light and the product is processed under diffused light. For analysis of the drug substance and product amber color flask are used to protect from direct exposure of light.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	Ritufen 125mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet Contains: Terbinafine as hydrochloride……125mg
	Pharmaceutical form of applied drug	White or almost white round, biconvex tablets with a breakline on one side.
	Pharmacotherapeutic Group of (API)	Allylamine antifungal ATC code: D01BA02
	Reference to Finished product specifications	BP Specifications
	Proposed Pack size	1 × 10's
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	LAMISIL® (terbinafine hydrochloride) 125 mg and 250 mg Tablet, TGA approved.
	For generic drugs (me-too status)	Terbin 125mg Tablet of M/s Martin Dow (Reg# 028975)
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 07-03-2019.
	Name and address of API manufacturer.	M/s Zhejiang East-Asia pharmaceutical Co., Ltd. Coastal Industrial City, Pubagang town, Sanmen county, Zhejiang, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, control of drug substance, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C±2°C/65% ± 5%RH for 24 months Accelerated:40°C±2°C/75% ± 5%RH for 6 months Batches: DC-013-1707001, DC-013-1707002, DC-013-1707003
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product Lamisil 125mg Tablet (Batch no. WW402(8)) of Novartis by performing description, average weight, disintegration time, dissolution and assay. CDP has been performed against the same product in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate (No: ZJ20180010) of M/s Zheijiang East-Asia Pharmaceutical co., Ltd, China issued by China Food and Drug Administration. It is valid till 23-01-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice for the purchase of Terbinafine hydrochloride (60 kg, DC-013-2006007) attested by Assistant Director (I & E), Lahore dated 26-06-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has not submitted audit trail on testing of drug product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) has been submitted.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted	The firm has submitted method verification studies of test method of drug substance using system suitability, specificity, accuracy, precision and linearity.
2.	Justify why you have mentioned Sodium starch glycolate two times in master formulation.	In master formulation, we have mentioned sodium starch glycolate two time because it is used as disintegrant by function and divided into two portions, one portion used at pre-mixing stage and other portion used at final mixing stage.

3.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate (No: ZJ20180010) of M/s Zheijiang East-Asia Pharmaceutical co., Ltd, China issued by China Food and Drug Administration. It is valid till 23-01-2023.
4.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice for the purchase of Terbinafine hydrochloride (60 kg, DC-013-2006007) attested by Assistant Director (I & E), Lahore dated 26-06-2020.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) has been submitted.
7.	Justify the selection of storage conditions of 30°C/35% RH for ongoing stability studies of drug product.	It was typographic error. We have performed stability study according to ICH guidelines. Stability study conditions are mentioned as below: Real time: 30 °C ± 2 °C/ 65% ± 5% RH Accelerated: 40 °C ± 2 °C/ 75% ± 5% RH

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	It is the submission of first dossier on CTD format, thus no inspection conducted regarding stability studies of the applied product.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Norethisterone Enanthate:** The firm has submitted copy of GMP certificate for M/s Zhejiang Xianju Junye Pharmaceutical Co. issued by national medical products administration valid till 29-11-2024. **Estradiol valerate:** The firm has submitted copy of GMP certificate for M/s ASG Biochem Pvt. Ltd. issued by Director of Drugs Control, Govt. of West Bangal. The license is valid till 24-10-2024.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Norethisterone Enanthate**: The firm has submitted copy of invoice specifying import of Norethisterone enanthate 20gm (Batch # 3076190701M) attested by Assistant Director (I & E) Lahore dated 30-09-2019. **Estradiol Valerate:** The firm has submitted copy of invoice specifying import of estradiol valerate 20gm (Batch # 190401) attested by Assistant Director (I & E) Lahore dated 01-08-2019.	

4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable.
6.	Record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Provide copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.	The firm has provided copies of drug substance specifications and analytical procedures.
2.	Provide certificate of Analysis (CoA) of the drug substance (Estradiol valerate) from drug substance manufacturer.	The firm has submitted certificate of analysis of Estradiol valerate from drug substance manufacturer.
3.	Provide the details of the reference product including batch number, manufacturing date and expiry date.	The firm has submitted details of reference product: Name: FEMI-JECT Injection Batch number: MP06249 Mfg date: 09-2019 Expiry date: 09-2024
4.	Justify why you have not performed the tests of clarity of solution and bacterial endotoxin in the pharmaceutical equivalence study.	Not submitted
5.	Justify why tests of pH and ampoule sealing are included in specifications under analytical procedures (3.2.P.5.2). Moreover, provide the pharmacopoeial reference where the test of "ampoule sealing" is mentioned	Not submitted
6.	Justify the test of pH throughout stability studies for development batches of oily injection.	Not submitted
7.	Reference of previous approval of applications with stability study data of the firm (if any).	The firm has submitted previous approvals of products in this section.
8.	Submit compliance Record of HPLC software 21CFR. The submitted audit trail reports do not specify the software used in HPLC and further clarify the demo version of software.	The firm has not submitted audit trail record of HPLC software 21 CFR.

Decision: Deferred for following:

- **Evidence of required manufacturing facility / section from Licensing Division.**
- **Scientific justification for not performing the tests of clarity of solution and bacterial endotoxin in the pharmaceutical equivalence study.**
- **Scientific justification for the test and limits of pH and ampoule sealing test for oily injection.**
- **Scientific justification for performing the test of pH throughout stability studies for development batches of oily injection.**

Agenda of Evaluator PEC-VII

Case no. 01 Registration applications for local manufacturing of (Human) drugs

Case no. 02 Registration applications of drugs for which stability study data is submitted Registration applications for Form 5D

a) Form 5D cases Exemption

114.	**Name and address of manufacturer / Applicant**	**M/s Neutro pharma (Pvt) Limited 9.5 km Sheikhupura road Lahore**
	Brand Name +Dosage Form + Strength	Neuleval 0.63 mg Respules

DOCUMENTS / DATA PROVIDED BY THE APPLICANT			

Sr. No.	Documents to Be Provided	Status
9.	Reference of previous approval of applications with stability study data of the firm	
10.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Levalbuterol**: Copy of COA (Batch# LH-18003) from M/S Aarti industries Ltd unit-IV, plot No E-50 midc tarapur taluka and district palghar Maharashtra state India is submitted.
11.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Yes
12.	Stability study data of API from API manufacturer	Yes
13.	Approval GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of certificate of cGMP: KD/65674/2018/11/22940 Dated: 21-3-2018 from office of the commissioner food and drug administration MS Bandra, Kurla complex, Mumbai
14.	Documents for the procurement of API with approval from DRAP (in case of import).	Commercial invoice for API from India, which is AD (Lahore) attested and invoice for batch 801805254 (AD attested) provided
15.	Protocols followed for conduction of stability study	Provided
16.	Method used for analysis of FPP	Provided
17.	Drug-excipients compatibility studies (where applicable)	Not applicable
18.	Complete batch manufacturing record of three stability batches.	Provided
19.	Record of comparative dissolution data (where applicable)	Not applicable
20.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Yes
21.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Yes
22.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Yes

REMARKS OF EVALUATOR

S No	Deficiency	Response
1.	In RRA, XOPENEX Inhalation Solution Concentrate is supplied in 0.5 mL unit-dose vials that must be diluted with normal saline before administration by nebulization. Each 0.5 mL unit-dose vial contains 1.25 mg of levalbuterol (as 1.44 mg of levalbuterol HCl), sodium chloride to adjust tonicity, and hydrochloric acid to adjust the pH but in applied formulation sulfuric acid is used instead of HCl	In Xopenex inhalation solution sulfuric acid instead of hydrochloric acid is used to adjust the pH. Literature is provided
2.	In RRA active is as levalbuterol as HCl but in form 5, firm applied as just levalbuterol HCl	Firm has mistakenly written levalbuterol HCL on form 5 while according to USP specs. It is

		Levalbuterol as HCl so form 5 is revised
3.	Availability of section	Section of small and large volume parenteral (blow filled and sealing in LDPE) available
4.	The USP product release specifications tests for this including tests for content uniformity, enantiomeric purity and impurity testing Justify the exemption of these tests.	Content uniformity test and impurities are provided
5.	The storage condition on accelerated data is mentioned as 40°C ± 2°C / 25% as aqueous solution is packed in LDPE ampoule according to ICH guideline Aqueous-based products packaged in semi-permeable containers should be evaluated for potential water loss in addition to physical, chemical, biological, and microbiological stability	The applied formulation is filled in LDPE container that is why storage condition on accelerated stability data is mentioned as at Real time: 30°C ± 2°C / 35% ± 5%RH and Accelerated: 40°C ± 2°C / 25% ± 5%RH
6.	The valid GMP certificate of M/S Aarti industries Ltd, India is not provided. Provided one was valid till 16 March	GMP certificate of M/S Aarti industries Ltd, India valid till 09-Jun 2023 is provided
7.	Documents for the procurement of API with approval from DRAP is needed with AD attestation	Provided
8.	API stability at Accelerated and real time conditions is not submitted	Provided
9.	Protocols of conducting stability studies for the specific product is needed.	Protocols of conducting stability studies for the specific product is needed.
10.	At some places like form 5D container is mentioned as vial and some were as LDPE ampule. Clarification is needed	The firm has mistakenly written vial on form 5 D while in actual the product is packed in LDPE ampoule
11.	The DML of neutro is expired valid till 5 year from 10-05-2015	The inspection for drug manufacturer license renewal is already conducted and waiting for license renewal
12.	The internal method used for analysis of FPP by the manufacture in details containing all dilutions preparations and calculations is needed	Product Test Method and Specifications for Neuleval Respules available
13.	Reference of previous approval of applications with stability study data of the firm	Reference of previous approval of application of dexol 30 mg capsule and 60 mg capsule approved in board meeting with stability study data of the firm is provided. No inspection of this dosage form is conducted
14.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
15.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

1115.	**Name and address of manufacturer / Applicant**	**M/s Neutro pharma (Pvt) Limited 9.5 km Sheikhupura road Lahore**
	Brand Name +Dosage Form + Strength	Neuleval 0.31 mg Respules
	Composition	Each vial contains: Levalbuterol as HCl…….0.31 mg
	Diary No. Date of R& I & fee	Dy. No. 6876, 22/02/2018, Rs: 50,000/- Dated: 19/02/2018 (#0730321)

	Pharmacological Group	Relatively selective beta2- Adrenergic receptor agonist
	Type of Form	Form 5
	Finished product Specifications	USP specifications
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulator Authorities	Xopenex inhalation solution 0.31 mg (3ml) of M/s Oak Pharms Inc. (USFDA Approved)
	Me-too status	NA
	GMP status	The last inspection conducted on 18-07-2017 concluding that the firm maintained a fair level of GMP compliance as per schedule B-II of the Drugs Licensing registration and advertisement rules 1976.
	Remarks of the Evaluator	

STABILITY STUDY DATA

Drug	Neuleval 0.31 mg Respules		
Name of Manufacturer	M/s Neutro pharma (Pvt) Limited 9.5 km Sheikhupura road Lahore		
Manufacturer of API	M/S Aarti industries Ltd, India.		
API Lot No.	**Levalbuterol:** : LH-18003		
Description of Pack (Container closure system)	As per SRO (3ml)		
Stability Storage Condition	Real time: 30˚C ± 2˚ C / 65% ± 5% RH Accelerated: 40 °C ± 2 °C/NMT 25% RH		
Time Period	Real time: 6 months Accelerated:6 months		
Frequency	Accelerated: 0,1,2,3,4, 6 (month) Real Time: 0,3,6 (month)		
Batch No.	LEV-NUB-0.31-001-19	LEV-NUB-0.31-002-19	LEV-NUB-0.31-003-19
Batch Size	210 ampoules	210 ampoules	210 ampoules
Manufacturing Date	12-2019	12-2019	12-2019
Date of Initiation	12-12-2019	12-12-2019	12-12-2019
No. of Batches	03		
Date of Submission	23-07-2020 (18066)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
23.	Reference of previous approval of applications with stability study data of the firm	
24.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Levalbuterol**: Copy of COA (Batch# LH-18003) from M/S Aarti industries Ltd unit-IV, plot No E-50 midc tarapur taluka and district palghar Maharashtra state India is submitted.
25.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Yes
26.	Stability study data of API from API manufacturer	Yes

27.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of certificate of cGMP: KD/65674/2018/11/22940 Dated: 21-3-2018 from office of the commissioner food and drug administration MS Bandra, Kurla complex, Mumbai
28.	Documents for the procurement of API with approval from DRAP (in case of import).	Commercial invoice for API from India, which is AD (Lahore) attested and invoice for batch 801805254 (AD attested) provided
29.	Protocols followed for conduction of stability study	Provided
30.	Method used for analysis of FPP	Provided
31.	Drug-excipients compatibility studies (where applicable)	Not applicable
32.	Complete batch manufacturing record of three stability batches.	Provided
33.	Record of comparative dissolution data (where applicable)	Not applicable
34.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Yes
35.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Yes
36.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Yes

REMARKS OF EVALUATOR

S No	Deficiency	Response
1.	In RRA, XOPENEX Inhalation Solution Concentrate is supplied in 0.5 mL unit-dose vials that must be diluted with normal saline before administration by nebulization. Each 0.5 mL unit-dose vial contains 1.25 mg of levalbuterol (as 1.44 mg of levalbuterol HCl), sodium chloride to adjust tonicity, and hydrochloric acid to adjust the pH but in applied formulation sulfuric acid is used instead of HCl	In Xopenex inhalation solution sulfuric acid instead of hydrochloric acid is used to adjust the pH. Literature is provided
2.	In RRA active is as levalbuterol as HCl but in form 5, firm applied as just levalbuterol HCl	Firm has mistakenly written levalbuterol HCL on form 5 while according to USP specs. It is Levalbuterol as HCl so form 5 is revised
3.	Availability of section	Section of small and large volume parenteral (blow filled and sealing in LDPE) available
4.	The USP product release specifications tests for this including tests for content uniformity, enantiomeric purity and impurity testing Justify the exemption of these tests.	Content uniformity test and impurities are provided
5.	The storage condition on accelerated data is mentioned as 40°C ± 2°C / 25% as aqueous solution is packed in LDPE ampoule according to ICH guideline Aqueous-based products packaged in semi-permeable containers should be evaluated for potential	The applied formulation is filled in LDPE container that is why storage condition on accelerated stability data is mentioned as at Real time: 30°C ± 2°C / 35% ± 5%RH and Accelerated: 40°C ± 2°C / 25% ± 5%RH

	water loss in addition to physical, chemical, biological, and microbiological stability	
6.	The valid GMP certificate of M/S Aarti industries Ltd, India is not provided. Provided one was valid till 16 March	GMP certificate of M/S Aarti industries Ltd, India valid till 09-Jun 2023 is provided
7.	Documents for the procurement of API with approval from DRAP is needed with AD attestation	Provided
8.	API stability at Accelerated and real time conditions is not submitted	Provided
9.	Protocols of conducting stability studies for the specific product is needed.	Protocols of conducting stability studies for the specific product is needed.
10.	At some places like form 5D container is mentioned as vial and some were as LDPE ampule. Clarification is needed	The firm has mistakenly written vial on form 5 D while in actual the product is packed in LDPE ampoule
11.	The DML of neutro is expired valid till 5 year from 10-05-2015	The inspection for drug manufacturer license renewal is already conducted and waiting for license renewal
12.	The internal method used for analysis of FPP by the manufacture in details containing all dilutions preparations and calculations is needed	Product Test Method and Specifications for Neuleval Respules available
13.	Reference of previous approval of applications with stability study data of the firm	Reference of previous approval of application of dexol 30 mg capsule and 60 mg capsule approved in board meeting with stability study data of the firm is provided. No inspection of this dosage form is conducted
14.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
15.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks:

- The DML of neutro is expired valid till 5 year from 10-05-2015
- The internal Method used for analysis of FPP by the manufacture in details containing all dilutions and calculations is needed
- Reference of previous approval of applications with stability study data of the firm
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Administrative Portion

19.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "EMPOLI (Empagliflozin) 10mg & 25mg Tablets" which was presented in 290th meeting of Registration Board wherein the Board decided to approve registration of this product. Date of inspection: 13th June, 2019 According to inspection report, following points were confirmed. • The firm has 21CFR compliant HPLC software. • The firm has audit trail reports available. • Adequate monitoring and control are available for stability chamber

20.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 18101065 issued by FOOD AND DRUGS CONTROL ADMINISTRATION Gujarat State valid till 18/10/2021 (Updated GMP Provided)
21.	Documents for the procurement of API with approval from DRAP (in case of import).	Detail of loan material (200gm of Ondansetron HCl) from M/s Indus Pharma (Pvt.) Ltd. of the lot supplied by M/s. Cadila Pharmaceuticals Pvt Limited under their invoice no. 3202040403 dated 10-07-2020 attested by AD (I&E), Karachi dated 19-07-2020. (Justification regarding procuring material on loan is attached here with)
22.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
23.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
24.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S #	Query	Reply
1.	Summary of the stability results observed for the accelerated and long-term studies: The long-term stability results for 3 batches instead of 2 shall be provided	Awaited The long-term stability results for 2 batches instead of 3 was provided Firm claim that " we have stability data of ondansetron HCl two batches at 30ºC we will keep third batches on 30ºC
2.	Documents for the procurement of API with approval from DRAP (in case of import).	Detail of loan material (200gm of Ondansetron HCl) from M/s Indus Pharma (Pvt.) Ltd. of the lot supplied by M/s. Cadila Pharmaceuticals Pvt Limited under their invoice no. 3202040403 dated 10-07-2020 attested by AD (I&E), Karachi dated 19-07-2020. (Justification regarding procuring material on loan is attached here with)
3.	In RRA the drug substance used is ondansetron (as hydrochloride dihydrate) but in your proposed formulation the active is ondansetron hydrochloride	Ondansetron Tablet is available in USP and we followed the same specifications for our product. In USP, the definition of Ondansetron Tablet is as follows, "Ondansetron Tablets contain Ondansetron Hydrochloride equivalent to NLT 90.0% and NMT 110.0% of the labeled amount of ondansetron (C18H19N3O)"In the above statement of USP, it is clearly mentioned that the drug substance required for the preparation of Ondansetron Tablet is "Ondansetron Hydrochloride" and we followed the same drug substance for manufacturing of our product. Furthermore, the drug substance Ondansetron Hydrochloride actually exists in Dihydrate form and our drug substance is also USP claim and USP mentioned it as "Ondansetron

		Hydrochloride" in its monograph with a molecular formula of C18H19N3O · HCl · 2H2O. As water is a variable factor, therefore calculation was done on Ondansetron Hydrochloride (as is basis) and water was removed through potency adjustment. In the light of above references, it is clear that Ondansetron Hydrochloride and Ondansetron Hydrochloride Dihydrate both are same and as our specs is USP (for both drug substance and drug product), therefore we used the term Ondansetron Hydrochloride as mentioned in USP.USP monographs for both Ondansetron Hydrochloride (drug substance) and Ondansetron Hydrochloride Tablet (drug product) are attached for your kind perusal.
4.	Detailed analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient Drug Product manufacturer is required.	Analytical procedure of drug substance provided
5.	Provide details comparator product against which Pharmaceutical Equivalence was established.	Pharmaceutical Equivalence have been established against the brand leader that is ZOFRAN 8mg Tablet by M/s. Novartis Pharma Limited Batch # 844519L /mfg 12-2019 by performing quality tests (Appearance, Disintegration test, Average weight, Dissolution, Assay, Impurity profile, Microbial limit test). Comparative dissolution profile has been performed against the same brand that is ZOFRAN 8mg Tablet by M/s. Novartis Pharma Limited in Acidic media (pH 1.0-4.2) & Phosphate buffer (pH 6.8). The values of f1 and f2 are in the acceptable range.
6.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Provided

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module III (Drug Substance)	Official monograph of Levosulpiride is not present in pharmacopoeia. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 18 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 12 months Batches: (LSP-0010415, LSP-0020515, LSP-0030515)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer

		medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Sulvorid 25mg tablet by High Q Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Sulvorid 25 mg tablet by High Q pharma in Acidic media (pH 0.1 N HCl), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Atlas life sciences pvt Ltd C-1/360-361, G.I.D.C, estate, Odhav Ahmedabad-382 415, Gujrat, India.		
API Lot No.	LSP-1910020		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, (Months)		
Batch No.	PD-183	PD-184	PD-185
Batch Size	400 tablets	400 tablets	400 tablets
Manufacturing Date	05-09-2020	05-09-2020	07-09-2020
Date of Initiation	07-09-2020	10-09-2020	10-09-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. S-GMP/20021839 issued by Food and Drug control administration valid till 10/02/2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Attached
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S No	Section #.	Deficiencies	Reply
1.	1.6.5	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	2.3.S.3.1	In Elucidation of Structure and other Characteristics, Discussion on the potential for isomerism and identification of stereochemistry is missing as in innovator the S isomer is active	Provided
3.	***3.2.P***	In USP dissolution method database the last recommended sampling time is 45 minutes but firm last time point is 30 minutes' justification is needed	Firm clarify that we established and validate our inhouse method for the said product which is an immediate release tablet and hence we observed that the maxiumum amount of API was dissolved in 30 minutes during comparative dissolution profile. Both our formulation and comparative brand achieve about 105%dissolution in 30 min with 100 rpm
4.	***3.2.P.4***	Firm claimed that excipients were selected for the development of product as used by innovator product, but excipients are different. Clarify	This is typographical error our firm used own excipient in our product development we use innovators products for only checking parameters or in comparative study of dissolution
5.	***3.2.P.8***	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Data of stability batches supported with chromatograms, Raw data sheets, COA, summary data sheets etc. provided
6.	***3.2.P.8***	Documents for the procurement of API with approval from DRAP (in case of import).	Procurement details from M/s Atlas life sciences pvt Ltd C-1/360-361, G.I.D.C, estate, Odhav Ahmedabad-382 415, Gujrat, India is provided
7.	***3.2.P.8***	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
8.	***3.2.P.8***	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Decision: Deferred for submission of following:

- **Documents for the procurement of API with approval from DRAP (in case of import).**

- **Valid GMP certificate or DML of the drug substance manufacturer issued by relevant regulatory authority.**
- **Latest GMP inspection report of M/s Woodward Pakistan, conducted within last three years.**
- **Justification of the batch size of stability batches against the no. of units required for the completion of long-term stability studies data.**

	Module III (Drug Substance)	The official monograph of Levetiracetam is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity Pyridin-2-ol, Levetiracetam acid, Levetiracetam related compound A, Any individual unspecified impurity & related compound B, Total impurities specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (C5146-09-016, C5146-09-017, C5146-09-018)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, descriptions of manufacturing processes and controls, impurities, specifications, analytical procedure, and its verification studies, batch analysis and justification of specification, reference standard, container closure system, and stability studies of the drug product.
	Pharmaceutical equivalence	Pharmaceutical Equivalence has been established against the brand leader is Lerace Injection 500mg/5ml (Batch# 135069) by Hilton Pharma by performing quality tests (Description, Identification, Assay, pH of solution, Particulate matter,

		Extractable Volume, Sterility test, Bacterial Endotoxin test).
	Analytical method validation/verification of product	Method Validation studies have been submitted including System suitability, linearity, range, accuracy, precision, and specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Huahai Pharmaceutical Co., Ltd., Chuannan, Duqiao, Linhai, Zhejiang 317016, China		
API Lot No.	D5294-20-128R		
Description of Pack (Container closure system)	Printed clear glass ampoule of 5ml placed in a white opaque PVC tray. (1×5's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3 (completed), 6 months (remaining) Real Time: 0, 3 (completed), 6, 9, 12, 18 and 24 months (remaining)		
Batch No.	TR-1/LVT 500mg/5ml	TR-2/LVT 500mg/5ml	TR-3/LVT 500mg/5ml
Batch Size	2000 ampoules	2000 ampoules	2000 ampoules
Manufacturing Date	01-2021	01-2021	01-2021
Date of Initiation	11-01-2021	11-01-2021	11-01-2021
No. of Batches	03		

Administrative Portion

7.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by the concerned regulatory authority of the country of origin.	Copy of GMP certificate No. IT/E/API/10/2019 rev.1 issued by EudraGMP valid till 14/03/2022.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Invoice no: HH20201126R FTA Certificate no: P201479688170134 Batch no: D5294-20-128R Country of Origin: China DRAP AD Clearance date: 10-12-2020
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliant
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real-time and accelerated)	Submitted

Remarks OF Evaluator:

S. No	Section #	Observations/Deficiencies/Short-comings	Remarks of the firm
01	3.2.S.4.4	The submitted COA from drug substance manufacturer mentions the	The API and Finished product both were tested as per the pharmacopeia monograph

		reference for specs as USP but drug product manufacturer is claiming BP specification. Clarification is needed	of USP, for which the COA of API (tested by manufacturer) USP specification is provided
02	3.2.P.1	Composition is different from reference product of USFDA	Formulation of Lecetam injection 500mg/5 ml is as per the formulation of USFDA approved product "Kepra" which **i**s supplied in single-use 5 mL vials containing 500 mg levetiracetam, water for injection, 45 mg sodium chloride, and buffered at approximately pH 5.5 with glacial acetic acid and 8.2 mg sodium acetate trihydrate. KEPPRA injection must be diluted prior to intravenous infusion
03	2.3.P.2.5	Discussion of microbiological attributes of the Drug Product (e.g., preservative effectiveness studies to be performed as per recommendation of pharmacopoeia) not provided.	The preservative effectiveness study of Lecetam injection is not needed as the composuoj of the applied product is as per Kapra injecton (USFDA) and have no preservative
04	2.3.P.4	Control of excipients is missing	We have used Pharmacopeia standard excipients for which monographs and Analytical Procedures are attached, however for in-house excipient, analytical procedure is attached along with the COA of all excipients used in formulation.

Previous Decision: Deferred in 313
Deferred for the submission of microbiological attributes of the Drug Product i.e. complete 28-day preservative effectiveness study.

Response by Firm:
The preservative effectiveness study of Lecetam injection is not needed as the composition of the applied product is as per Kapra injection (USFDA) and have no preservative

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Agenda of Evaluator PEC-XI

Case No. 01: Registration applications of New Section of Human drugs on Form 5-F

a. M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore

The Central Licensing Board in its 285th meeting held on 17th & 18th March, 2022 has considered and approved the grant of following sections of **M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore** under Drug Manufacturing License No. 000779 (Formulation) vide approval letter No. F. 1-11/2009-Lic (Vol-I) dated 10th May, 2022.

S No.	Section
4.	Tablet Section II (General) **New**
5.	Dry Powder Suspension Section. **New**
6.	Dry Powder Sachet Section (General). **New**

Following applications have been submitted for registration by the firm.

1.	Name, address of Applicant / Marketing Authorization Holder	M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore
	Name, address of Manufacturing site.	M/s Titlis Pharma (Private) Limited, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 11040 dated 06/05/2022
	Details of fee submitted	PKR 30,000/-: dated 10/02/2022 (slip No#79520976505)
	The proposed proprietary name / brand name	Pentadol 75mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Tablet contain Tapentadol (as HCl) …….75mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	opioid analgesic
	Reference to Finished product specifications	Manufacturer's Specifications
	Proposed Pack size	1×10's, 2 ×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	NUCYNTA (50mg, 75mg, 100mg) film-coated tablets USFDA Approved
	For generic drugs (me-too status)	Tapento IR 75mg tablet by M/s Sami Pharmaceuticals (Reg#093064)
	GMP status of the Finished product manufacturer	New section granted on 17th & 18th March, 2022 and letter issued on 10th May, 2022
	Name and address of API manufacturer.	M/s Precise Chemipharma Pvt. Ltd., C-384, T.T.C. Industrial Area M.I.D.C., Pawane Village, Navi Mumbai 400 703, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, tests for impurity & related substances, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months

		Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (6001012013, 6002012013, 6003022013)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Tapento 75mg Tablet by Sami Pharmaceuticals by performing quality tests (disintegration, weight variation, Assay, Dissolution, of dosage form). CDP has been performed against the same brand Tapento 75mg Tablet by Sami Pharmaceuticals in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values of f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Precise Chemipharma Pvt. Ltd., C-384, T.T.C. Industrial Area M.I.D.C., Pawane Village, Navi Mumbai 400 703, India		
API Lot No.	060007112020		
Description of Pack (Container closure system)	Yellow colored, round shaped, biconvex Film coated tablet, Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TP-01	TP-02	TP-03
Batch Size	666 tab	666 tab	666 tab
Manufacturing Date	Sep-2021	Sep-2021	Sep-2021
Date of Initiation	28-10-2021	28-10-2021	28-10-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	**The firm has referred to previous inspection for authenticity of stability data of their product on the basis of which Registration Board in its 289th meeting held on 14-16th May, 2019 decided to approve registration of Delanso 30mg capsule and Delanso 60mg capsule.** **Inspection date: 02nd May, 2019** **The report shows that:** • **The firm have quaternary gradient HPLC (Shimadzu; Model; LC20AT); with time and date locked but it is not 21 CFR compliant.** • **Power backup by UPS and 200kv generator was available. Digital data logger was not installed for continuous monitoring and control of stability**

		chambers. Storage conditions were being recorded thrice daily manually.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted GMP certificate of M/s Precise Chemipharma Pvt. Ltd., C-384, T.T.C. Industrial Area M.I.D.C., Pawane Village, Navi Mumbai 400 703, India issued by Food & Drug Administration Marashtra State India valid upto 28-09-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice attested by AD I&E DRAP, Lahore dated 12-07-2021 **Invoice No. & date** / **Batch No.** / **Quantity Imported** **EXPS/00020224/ 2021-22 dated 05-07-2021** / 060007112020 / 1.4 kg The invoice is issued from M/s Precise Chemipharma Pvt. Ltd India in the name of M/s Titlis Pharma (Pvt) Ltd.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of all three batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
	• Firm has stated that they have R&D section as date of manufacturing of batches is September 2021 and grant of additional section is March 2022	
3.2.S.4	• You have proposed IR method for sample identification in specifications while stated performance by HPLC in specifications, clarify? • You have not included the tests for Solubility, loss on drying, melting point and chiral purity by HPLC in specification although these specifications are included in specifications by drug substance manufacturer, justify? • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted • Justification is required since mobile phase composition provided in chromatographic conditions for assay of drug substance by drug product manufacturer	• The firm submitted that we have performed the analysis of Tapentadol HCl as per BP Specifications • The firm further submitted that we have performed the analysis by both **FTIR & Liquid chromatography** and we are fully complaint with the BP testing method. Reports of tests are submitted. • The firm submitted that method of analysis for Tapentadol HCL is as per BP specifications; and we are fully complaint with the BP testing method. However, tests for enantiomeric purity also given in BP monograph while not included in specifications by drug product manufacturer. • Firm has submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance

	(orthophosphoric acid:methanol:water 0.1:35:65) is different from drug substance manufacturer(ammonium phosphate buffer adjust ph 6.3 with triethylamine: methanol 48:52)	• Drug substance manufacturer has performed the test as per in- hose (IH) specifications. • As this API (Tapentadol HCL) is in BP Pharmacopeia, so we have performed the analysis of Tapentadol HCL as per BP specifications; and we are fully complaint with the BP testing method. However, the ratio of mobile phase is different from BP monograph ~ ***mobile phaseA:*** *phosphoric* ***acid R, methanol R2, warer for*** *chromatography R* (0.1:10:90 *VIVIJ1);* ***- mobile phase B:*** *phosphoric* ***acid R, water for*** *chromatography R, methanal R2* (0.1:10:90 *VIVIJ1);*
3.2.P.2	• You have not performed CDP and pharmaceutical equivalence against the innovator brand justify? • Justification is required as your formulation contains Aerosil 200 (silicon dioxide) while innovator product does not contain this excipient?	• The firm submitted that as the innovator product is not registered in Pakistan therefore, Comparative dissolution profile of Pentadol 75mg Tablet was performed against the reference product Tapento IR 75mg Tablet Manufactured by Sami Pharmaceuticals (Pvt) Ltd. which is available in the market. • It is notable that the data of comparative dissolution profile report for Pentadol 75mg Tablet is remarkable and that the product is highly soluble and dissolves more than 85% within 15minutes in all three media (0.1 N HCl pH 1.2, Acetate buffer pH 4.5 and Phosphate buffer pH 6.8) at all sampling points. The results show that dissolution profile of test and reference products are almost similar. • Moreover, f2 calculations are not required. • Formulation of Pentadol 75mg Tablet is as similar as the formulation of innovator product except that it contains Aerosil 200 in its composition. • As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that Aerosil 200 is an **inert excipient**, has compatibility with other excipients and active pharmaceutical ingredient of Pentadol 75mg tablet. Its safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies.
3.2.P.5	• You have used USP apparatus II for dissolution studies instead of USP apparatus I as recommended by innovator product review document, justify?	• The firm submitted that initially we performed dissolution by using following parameters: **Media: 0.1N HCl (900ml), RPM: 75, Apparatus: II (Paddle), Time 30 min**. • The firm submitted all the dissolution parameters are same to innovator's specifications except for the dissolution apparatus.

- Stability batches were analyzed at 0, 3,& 6 months on in house testing but after reviewing the FDA drug approval /literature review **(FDA reviewing)**, we revised our testing method as follows:
Media: 0.1N HCl (900ml), RPM: 75, Apparatus: I (Basket), Time 30 min.

We develop the following protocol for stability studies

4. **To manufacture 3 new batches (Batch numbers: TP-07, TP-08 and TP-09) for performance of accelerated and long run stability testing as per innovator's specifications / dissolution parameters.**

- We have analyzed these batches as per innovator's specifications / dissolution parameters; and "0", 3rd month testing has been completed and results are complying with innovator specification. (Reports and chromatogram are submitted)

5. **To perform one month stress testing at 60℃ ± 2℃ / 75% ± 5% RH on samples of ongoing stability studies as per innovator's specifications / dissolution parameters.**

- We have drawn samples from our ongoing stability studies and kept them on stress conditions for one month (from 15th July - 2022 to 16th August - 2022); and analyzed that results are complying with innovator specification. (Reports and chromatogram are submitted)

6. **To perform the ongoing/long run stability studies of 9th month and other time intervals as per innovator's specifications / dissolution parameters.**

- We have performed 9th month stability studies as per innovator's specifications / dissolution parameters and analyzed that results are complying with innovator specification. (Reports and chromatogram are submitted)

- Moreover, we have performed 9th month stability study as per Titlis specifications and conclude that results are comparable. Results on both conditions are found similar and no impact observed in the results due to change in dissolution parameters. (Reports and chromatogram are submitted)

3.2.P.8	• Justification is required that 36 packs of tablets will be sufficient enough for performance of stability study till shelf life. • Justify the manufacturing of trial batches for stability study in September 2021 as approval of new section is granted on 17th & 18th March, 2022 and new section letter issuance date is 10-05-2022. • Submit documents for the procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	• We would like to submit that our batch size of Pentadol 75mg Tablets is 66 packs (666 tablets), whereas only 28.8 packs (288 tablets) are sufficient for the performance of stability study till the claimed shelf life (24 months). • Total sample size for accelerated stability study is 32 x 2 = 64 tablets .(Stability data sheet is attached) • Total sample size for long run stability study (24 months) is 32 x 7 = 224 tablets. (Stability data sheet is attached) • Total tablets is 64 + 224 = 288 tablets. • Firm has stated that they have R&D section and development of trial batches of Pentadol 75mg tablet was performed in our development (R&D) section. • The firm has submitted copy of form 6 No#10339/2021-DRAP dated 12-07-2021 from Precise Chem Pharma Pvt. Ltd., for the import of 1.4kg of tapentadol Hydrochloride attested by AD (I&E) DRAP Lahore. • The firm submitted that We have performed the stability study of Pentadol 75mg Tablet on our HPLC (QC-HPLC-001) SHIMAZDZU Model No. LC-20 AT, which is not 21CFR Compliant. • However, it is certified that **date and time of this HPLC (QC-HPLC-001) is locked and data alteration/editing is strictly restricted**. Moreover, this HPLC (QC-HPLC-001) has access control and only two authorized QC analysts have authorization to access and operate this HPLC (QC-HPLC-001). • Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is submitted
Decision: Approved with innovators specifications. • **Registration letter will be issued upon submission of CDP studies against the innovator/reference product.** • **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

Case No. 02: Routine Registration applications of human drugs on Form 5-F

2.	Name, address of Applicant / Marketing Authorization Holder	ATCO Laboratories Limited., B-18, S.I.T.E., Karachi - 7500, Pakistan
	Name, address of Manufacturing site.	ATCO Laboratories Limited., B-18, S.I.T.E., Karachi -

		7500, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 28455 Dated 15/ 10/ 2021
	Details of fee submitted	PKR 30,000/-: Dated 04/10/2021 (Deposit Slip#03634033378)
	The proposed proprietary name / brand name	Ondansetron Tablet 8mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ondansetron……..8mg (as Ondansetron Hydrochloride Dihydrate BP)
	Pharmaceutical form of applied drug	Film coated Tablet
	Pharmacotherapeutic Group of (API)	Antiemetics and antinauseants, Serotonin (5-HT3) antagonists.
	Reference to Finished product specifications	USP
	Proposed Pack size	7's, 10's, 14's, 20's, 28's, 30's.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zofran 8mg film coated tablet MHRA approved
	For generic drugs (me-too status)	Ongene 8mg Tablet by M/s High-Q Pharmaceuticals (Reg#091207)
	GMP status of the Finished product manufacturer	The firm was inspected on 22-03-2022 & 05-04-2022 by the panel for renewal of DML, regularization of section as per layout plan and additional sections and decision of panel is: Keeping in view the good facilities provided for manufacturing and quality control of pharmaceutical products registered in the name of firm being produced at the site and overall good maintenance of plan and the required documentation and SOPs, the panel recommended the grand of DML of the firm as well as regularization of sections as per layout plan and approval of additional sections
	Name and address of API manufacturer.	M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bengaluru Rural District-561203 India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.

	Module III (Drug Substance)	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time:30˚C±2˚C/75% ± 5%RH Accelerated:40˚C±2˚C/75%±5%RH Stability of all three batches at accelerated conditions (AOND-17002, AOND-17003, AOND-17004) conducted for 06 months Real time stability study of two batches AOND-17002, AOND-17003, conducted for 36 months while real time stability study of one batch AOND-17004 conducted for 24 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Zofran 8mg Tablet by **GlaxoSmithKline Research Triangle Park, NC 27709** **Marketed by: Novartis Pharmaceuticals UK Limited** performing quality tests (Identification, Assay, Dissolution, disintegration). CDP of ondansetron 8mg tablets has been performed against the zofran 8mg tablets in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method verification studies including range, accuracy, precision, specificity and robustness.

STABILITY STUDY DATA			
Manufacturer of API	M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bangaluru Rural District-561203 India

Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of Rofl 500mcg tablet on the basis of which Registration Board in its 277th meeting dated 27-29 December, 2017 decided to approve registration of Rofl 500mcg tablet. Inspection date: 10-10-2017 The report shows that: The HPLC software is 21 CFR compliant. Adequate monitoring and control are available for stability chambers
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted copy of GMP certificate #DCD/SPL.CL-1/CR-1510/2020-21 dated 06-02-2021 of M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bengaluru Rural District-561203 India valid upto one year from the date of issue. The firm has submitted copy of DML #DCD/MFG/Applicant Id-240 dated 26/06/2020 of M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bangaluru Rural District-561203 India valid upto 13/02/2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice # OND1200 dated 10-11-2020 for import of 300gm of Ondansetron HCl Dihydrate Batch #AOND-20014, AOND-20012 and AOND-20013 in the name of M/s Atco Laboratories Ltd Karachi from M/s Anugraha Chemical India. ***However, the invoice is not attested by AD (I&E) DRAP field office***
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	Valid GMP certificate issued by the relevant regulatory authority of country of origin of drug substance manufacturer shall be submitted	The firm has submitted valid copy of GMP certificate #DCD/SPL-1/CR-1733/2021-22 dated 31-01-2022 of M/s Anugraha Chemicals, D-47, D-48, D-49, D-50 and C-62, KSSIDC, Industrial Estate, Doddaballapur, India valid upto one year from the date of issue.
3.2.S.4	• Copies of the analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Firm has submitted copy of BP Monograph mentioning the test used for routine testing of the Drug substance / Active Pharmaceutical ingredient by Drug Product manufacturer. • Firm has submitted analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance.

3.2.P.2	• Submit compatibility study as the qualitative composition of the applied formulation is not similar to innovator / reference product. Applied product: Zofran 8mg tab Lactose anhydrous: Lactose Sodium starch glycolate: Microcrystalline Cellulose Crospovidone: Pregelatinized maize starch Magnesium stearate: Magnesium Stearate, Opadry white: Methyl hydroxypropyl cellulose Purified water: Titanium dioxide (E171) Iron oxide (E172)	Firm has submitted drug excipient compatibility study and the results show that insignificant variation occurs during compatibility studies. Hence it is concluded that drug is compatible with excipients.
3.2.P.5.1	Justification for finished product specifications of USP is required as the drug substance has been analysed as per BP specifications by M/s Atco Laboratories. ***(drug substance manufacturer given both BP & USP specifications)***	The firm submitted that initially at the time of development, we have started the material and product development according to British pharmacopeia monograph. During the development of product, we found that the drug release of both test and reference sample is greater than 85% within 15 minutes in comparison studies while the time limit mentioned in BP was 45 minutes. We switched to more stringent specification for our products and complies with USP specifications which states that "NLT 80% (Q) of the labeled amount of $C_{18}H_{19}N_3O$ is dissolved in 15 minutes".
3.2.P.8	Submit documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. EXP-018 dated 17-08-2021 from M/s Anugraha Chemicals India in the Name of Atco Laboratories Ltd for import of 180gm of Ondansetron Hydrochloride dihydrate batch No AOND-21007 attested by AD (I&E) DRAP Karachi dated 05-09-2021. ***The batch No. of API is different from that submitted in batch analysis of drug substance and stability summary sheets. Furthermore the date of manufacturing of API mentioned in invoice is June 2021 and attestation date of AD (I&E) DRAP Karachi is 5/09/2021 while manufacturing of finished product is 03/2021.***

Decision: Deferred for clarification since batch No. of API mentioned in invoice attested by AD (I&E) DRAP is different from that mentioned in batch analysis of drug substance, BMR and stability summary sheets of drug product

3.	Name, address of Applicant / Marketing Authorization Holder	ATCO Laboratories Limited., B-18, S.I.T.E., Karachi - 7500, Pakistan
	Name, address of Manufacturing site.	ATCO Laboratories Limited., B-18, S.I.T.E., Karachi - 7500, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30933 Dated 11/ 11/ 2021
	Details of fee submitted	PKR 30,000/-: Dated 04/10/2021 (Deposit Slip#65306391198)
	The proposed proprietary name / brand name	Ondansetron Syrup 4mg/5ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Ondansetron……..4mg (as Ondansetron Hydrochloride Dihydrate BP)
	Pharmaceutical form of applied drug	Syrup
	Pharmacotherapeutic Group of (API)	Antiemetics and antinauseants, Serotonin (5-HT3) antagonists.
	Reference to Finished product specifications	USP
	Proposed Pack size	5ml, 15ml, 25ml, 50ml, 60ml, 100ml, 120ml.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zofran Syrup 4 mg/5 ml MHRA approved
	For generic drugs (me-too status)	Dysit 4mg/5ml Syrup by M/s Wimits Pharmaceuticals (Reg#096447)
	GMP status of the Finished product manufacturer	The firm was inspected on 22-03-2022 & 05-04-2022 by the panel for renewal of DML, regularization of section as per layout plan and additional sections and decision of panel is: Keeping in view the good facilities provided for manufacturing and quality control of pharmaceutical products registered in the name of firm being produced at the site and overall good maintenance of plan and the required documentation and SOPs, the panel recommended the grand of DML of the firm as well as regularization of sections as per layout plan and approval of additional sections
	Name and address of API manufacturer.	M/s Anugraha Chemicals, No D-47 to D-50, and C-62 to C-63, KSSIDC, Industrial Estate, Doddaballapur, Bengaluru Rural District-561203 India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of

		drug substance.
	Stability studies	Stability study conditions: Real time:30˚C±2˚C/75% ± 5%RH Accelerated:40˚C±2˚C/75%±5%RH Stability of all three batches at accelerated conditions (AOND-17002, AOND-17003, AOND-17004) conducted for 06 months Real time stability study of two batches AOND-17002, AOND-17003, conducted for 36 months while real time stability study of one batch AOND-17004 conducted for 24 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Onseron 4mg/5ml syrup by M/s Indus Pharma (Pvt.) Ltd by performing quality tests (description, Identification, pH, Assay).
	Analytical method validation/verification of product	Firm has submitted method verification studies including range, accuracy, precision, specificity and robustness.

STABILITY STUDY DATA

Manufacturer of API	M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bangaluru Rural District-561203 India		
API Lot No.	AOND-20013		
Description of Pack (Container closure system)	Amber glass bottle packed in printed carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	FE074C	MA077C	MA088C
Batch Size	2000ml	2000ml	2000ml
Manufacturing Date	05/03/2021	05/03/2021	05/03/2021
Date of Initiation	17/03/2021	17/03/2021	17/03/2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection for authenticity of stability data of Rofl 500mcg tablet on the basis of which Registration Board in its 277th meeting dated 27-29 December, 2017 decided to approve registration of Rofl 500mcg tablet. Inspection date: 10-10-2017 The report shows that: The HPLC software is 21 CFR compliant. Adequate monitoring and control are available for stability chambers

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted copy of GMP certificate #DCD/SPL.CL-1/CR-1510/2020-21 dated 06-02-2021 of M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bengaluru Rural District-561203 India valid upto one year from the date of issue. The firm has submitted copy of DML #DCD/MFG/Applicant Id-240 dated 26/06/2020 of M/s Anugraha Chemicals, No D-47 to D-50, C-62 and C-63, KSSIDC, Industrial Estate, Doddaballapur, Bangaluru Rural District-561203 India valid upto 13/02/2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice # OND1200 dated 10-11-2020 for import of 300gm of Ondansetron HCl Dihydrate Batch #AOND-20014, AOND-20012 and AOND-20013 in the name of M/s Atco Laboratories Ltd Karachi from M/s Anugraha Chemical India. ***However, the invoice is not attested by AD (I&E) DRAP field office***
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	Valid GMP certificate issued by the relevant regulatory authority of country of origin of drug substance manufacturer shall be submitted	The firm has submitted valid copy of GMP certificate #DCD/SPL-1/CR-1733/2021-22 dated 31-01-2022 of M/s Anugraha Chemicals, D-47, D-48, D-49, D-50 and C-62, KSSIDC, Industrial Estate, Doddaballapur, India valid upto one year from the date of issue.
3.2.S.4	• Copies of the analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Firm has submitted copy of BP Monograph mentioning the test used for routine testing of the Drug substance / Active Pharmaceutical ingredient by Drug Product manufacturer. • Firm has submitted analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance.
3.2.P.2	• Submit compatibility study as the qualitative composition of the applied formulation is not similar to innovator / reference product. Applied product: Zofran 4mg/5ml syrup Citric acid monohydrate: Citric acid Sodium citrate dihydrate: Sodium citrate dihydrate	• Firm has submitted drug excipient compatibility study and the results show that insignificant variation occurs during compatibility studies. Hence it is concluded that drug is compatible with excipients. • Firm submitted that Pharmaceutical equivalence studies of test formulation against locally available approved formulation has been performed due to unavailability of innovator product in Pakistan with reference to "Decision of

	Sodium benzoate — Sodium benzoate Liquid Sorbitol — Sorbitol solution Sodium Saccharin — ------ Liquid Glucose — -------- Banana Flavour — Strawberry flavour (contains ethanol*) Purified water — Purified water • Justification is required since pharmaceutical equivalence have not been conducted against the innovator product.	307th and 308th meeting of Drug Registration Board"
3.2.P.5.1	Justification for finished product specifications of USP is required as the drug substance has been analysed as per BP specifications by M/s Atco Laboratories. ***(drug substance manufacturer given both BP & USP specifications)***	The firm submitted that initially at the time of development, we have started the material and product development for tablet dosage form according to British pharmacopeia monograph. Once the material has been established as per BP Specification, parallel development of syrup dosage form started. The syrup formulation is only available in United States Pharmacopeia so we have to develop the specifications of Ondansetron Syrup 4mg/5mL as per USP monograph.
3.2.P.8	Submit documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. EXP-018 dated 17-08-2021 from M/s Anugraha Chemicals India in the Name of Atco Laboratories Ltd for import of 180gm of Ondansetron Hydrochloride dihydrate batch No AOND-21007 attested by AD (I&E) DRAP Karachi dated 05-09-2021. ***The batch No. of API is different from that submitted in batch analysis of drug substance and stability summary sheets. Furthermore the date of manufacturing of API mentioned in invoice is June 2021 and attestation date of AD (I&E) DRAP Karachi is 5/09/2021 while manufacturing of finished product is 03/2021.***
Decision: Deferred for clarification since batch No. of API mentioned in invoice attested by AD (I&E) DRAP is different from that mentioned in batch analysis of drug substance, BMR and stability summary sheets of drug product		
4.	Name, address of Applicant / Marketing Authorization Holder	M/s Jawa Pharmaceuticals Private Limited., 112/10 Quaid-e-Azam Industrial Area Kot Lakhpat, Lahore,

	Dy. No. and date of submission	Dy. No. 25925 dated 17-09-2021

	Details of fee submitted	PKR 30,000/-: dated 13-08-2021
	The proposed proprietary name / brand name	"Amacure oral granules USP 4mg"
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sachet contains: Montelukast sodium……4mg
	Pharmaceutical form of applied drug	Oral granule is a white granular coarse free-flowing, homogeneous solid with no extraneous particles packaged in polyethylene aluminium / polyester sachet which finally packed in unit carton. Each unit carton contain 10 sachet
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonist
	Reference to Finished product specifications	USP
	Proposed Pack size	10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Singulair (4mg) oral granules USFDA Approved
	For generic drugs (me-too status)	Moncid Sachet by M/s De-Mont Research Laboratories (Reg# 084056)
	GMP status of the Finished product manufacturer	The firm have submitted cGMP certificate issued on 06-07-2020 based on inspection conducted on 04-03-2020
	Name and address of API manufacturer.	M/s Dhanuka Laboratories Limited., Keshwana, Rajput, Kotputli, Shahpura, Jaipur-303108 Rajhastan India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (MLS-F#009/15, MLS-F#010/15, MLS-F#011/15)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence against the Montiget sachet by Getz pharma by performing quality tests (Appearance and assay)

		Firm has submitted CDP report of their applied product against Montiget sachet 4mg by Getz pharma in Acid media (pH 1.2), acetate Buffer (pH 4.5) & 0.5% sodium dodecyl sulphate solution. The values for f2 is in the acceptable range
	Analytical method validation/verification of product	Firm have submitted method verification studies including accuracy, precision and specificity.

STABILITY STUDY DATA

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted copy of GMP certificate #DC/A-2/WHO GMP/2019/35 dated 17-01-2019 of M/s Dhanuka Laboratories Limited., Keshwana, Rajput, Kotputli, Shahpura, Jaipur-303108 Rajhastan India valid 16-01-2022
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice # SO/KE/2122/0011 dated 22-04-2021 for import on 5kg of Montelukast sodium Batch #MTS-2104004 attested by AD (I&E) DRAP Lahore on 30-04-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm have submitted Data of stability batches supported by attested respective documents like chromatograms and summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit. Strength of Active ingredient shall be stated clearly. In case API is in	The firm submitted that in formulation of Amacure Oral Granules 4mg, Sachet, Montelukast is used as active ingredient. Where it is present with salt sodium. In batch formula it is clearly mentioned "4mg

	the form of salt, specify the equivalent strength of the base e.g., AAA sodium 50 mg (equivalent to AAA) etc.	Montelukast is equal to 4.160mg of Montelukast sodium"
1.6.5	• Submit valid GMP certificate of drug substance manufacturer	The firm have submitted copy of GMP certificate #DC/A-2/WHO-GMP/2022/77 dated 27-01-2022 of M/s Dhanuka Laboratories Limited., SP4-4, Industrial Area, Keshwana, Rajput, Kotputli, Shahpura, Jaipur-303108 Rajasthan India issued by Drug Control Organization Rajasthan India valid for three years from the date of issue.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies is provided
3.2.S.5	• The title of reference standard Montelukast Sodium does not relate with lot No. R035A0. Clarify? • The submitted COA of working standard for batch No#WS/19/003 mentions both limits for Montelukast Sodium and Montelukast Dicyclohexylamine in assay test, clarify?	The firm submitted that as per USP monograph of Amcure sachet oral granules Montelukast Dicyclohexamine Reference standard used for testing and we follow same. ***The firm didn't give clarification how they submitted assay test results for two different salts against the same standard***
3.2.P.2	• Details of comparator product including batch numbers, mfg & expiry date in pharmaceutical equivalence are required to be provided • Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph (dissolution, identification, uniformity of dosage unit. • You have not performed Pharmaceutical equivalence of the applied drug with the innovator / product, justify?	• The firm have submitted details of comparator product. Montiget Sachet by M/s Getz Pharma Batch No. 686D03 Mfg date; July 2020 Expiry date; July 2022 • The firm submitted that we have done all testing of both product (Amcure sachet and Montiget Sachet), it was just human error that complete results are not listed. The firm have submitted complete analysis report with comparator. • The firm submitted that innovator product Singulair Paediatric 4mg Granule by Organon Pharma UK was not available in market and DRAP give us relaxation to do equivalence studies with me-too product
3.2.P.5	• Test for uniformity of dosage unit (content uniformity) and dissolution is not included in specifications and not performed in batch analysis although given in USP monograph of drug product, clarify? • The copies of complete analysis of at least two batches shall be provided. • Provide details of analytical columns used in analytical procedure • The title of reference standard Montelukast Sodium does not relate with lot No. R035A0. Clarify? • The submitted COA of working standard for batch No#WS/19/003 mentions both limits for Montelukast Sodium and Montelukast	• The firm have submitted that we have done complete testing as per USP monograph; it was a human error that complete results are not listed. The firm submitted revised finished product specifications results • Firm has submitted copies of complete analysis of three trail batches • The firm submitted revised analytical procedure containing details of analytical column • The firm stated that submitted certificate of analysis of working standard is placed in product dossier by mistake, as we receive both COA's from vendor. The certificate of analysis received from manufacturer with working standard has both assay test limits.

	Dicyclohexylamine in assay test, clarify?	***However same COA has been submitted by the firm*** • The submitted certificate of analysis is correct as manufacturer of API done testing of both forms of API collectively. But we use Montelukast sodium in our product for manufacturing. The COA received from manufacturer with working standard has both assay test limits.
3.2.P.8	• Stability data reflect that test for identification, dissolution test and uniformity of dosage unit has not been performed at initial time point and throughout stability studies at both accelerated and real time conditions, justify? • The limits for assay test in stability study data is mentioned as 90%-110% instead of 90%-108% as mentioned in USP monograph, clarify? • Submit COA, Raw data sheets & analytical record of stability studies containing calculation formula for both assay & dissolution test • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required. • Submit latest inspection report for exemption conducted by the panel for authenticity of stability data (PSI) • Th API was imported on 30-04-2021 while the batches were manufactured in 01-2021 before the import of API, justify the manufacturing of batches before import of API	• ***The firm has submitted revised stability summary sheets containing all test at each time points and conditions.*** • The firm submitted that al results are within limits, the term written in specifications was just a copy past error and submitted revised stability summary sheets. • The firm has submitted raw data sheet containing calculation formula for both assay & dissolution test. ***However, the firm has not submitted COA and analytical record of all batches during stability study. Raw data sheets show that the results of dissolution tests are different than that reported in summary sheets.*** • Audit trail reports on product testing is submitted • Latest inspection report for exemption conducted by the panel for authenticity of stability data (PSI) is not submitted • The firm submitted Letter No. 4233/202/DRAP-AD-CD(I&) dated 20-03-2020 for ***"permission to Import API as per guidelines for import of pharmaceutical raw material for the purpose of test/analysis and stability studies"*** containing Montelukast sodium 5kg issued AD (I&E) DRAP Lahore

Decision: Deferred for following:

- **Submission of Scientific justification for use of Montelukast sodium as reference standard in analytical procedures instead of Montelukast dicyclohexylamine specified by USP monograph.**
- **Submission of COA and analytical record of all batches during stability study.**
- **Clarification since the results of dissolution test mentioned in Raw data sheets are different than that reported in summary sheets.**
- **Justification is required since the submitted copy of commercial invoice # SO/KE/2122/0011 dated 22-04-2021 has been attested by AD (I&E) DRAP Lahore dated 30-04-2021 for import of 5kg of Montelukast sodium Batch #MTS-2104004 while trial batches have been manufactured in January 2021**.

Case No; 03; Withdrawal Registration application

a. Withdraw of application for registration of drugs of New DML M/s Swera Pharmaceuticals Rawat Islamabad

The firm submitted a request dated 14-09-2022 and humbly stated that we have submitted data for Mepra 40mg Injection CTD Dossier upto 3rd month stability data dated 11-01-2022. We are withdrawing the complete application of Mepra 40mg injection and submitting new application with full fee challan No. 802460765103 and stability data of new batch numbers i.e. RD-1003 and RD-1004. So kindly consider batch No. RD-1003 and RD-1004 batch number for evaluation. 6th month stability data submitted RD-1003 and RD-1004

5.	Name, address of Applicant / Marketing Authorization Holder	M/s Swera Pharmaceuticals., Plot No. 27, Street No. S-4, National Industrial Zone Rawat-Islamabad

	Name, address of Manufacturing site.	M/s Swera Pharmaceuticals., Plot No. 27, Street No. S-4, National Industrial Zone Rawat-Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Remark of the Evaluator [XI]	• The firm have mentioned different names on cover letter, form 5 and fee challan. Migno gel 2% w/w (cover letter), Linocaine jelly 2% w/w (form 5), Migno / Lignocaine gel (fee challan) • The firm submitted that brand name Linocaine jelly 2% w/w proposed in form-5 is for the formulation of Lignocaine 2%. • Submit undertaking at the end of form 5 duly signed by the technical persons • The firm submitted letter No. F. 1-37/93-Lic dated 03.08.2015 issued by Secretary Central Licensing Board confirming the presence of Cream/Ointment/Gel (General) Section • The firm provide evidence of applied product in RRA. Xylocaine 2% jelly TGA Approved. It contains lidocaine (lignocaine) hydrochloride 20mg/g. The label claim should be revised as per reference formulation
	Decision: Approved with following label claim: **Each gram contains:** **Lignocaine HCl ……20mg** **Firm shall submit the fee of Rs. 30,000 for correction/pre-approval change in composition (correction/ change of hydrated factor and adjustment of weight of the drug substance), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**	
20.	Name and address of manufacture / Applicant	M/s Hamaz Pharmaceuticals (Pvt.) Ltd. 13-km, Bosan Road, Lutfabad, Multan
	Brand Name + Dosage Form and Strength	Dantron Injection 8mg/4ml
	Composition	Each 4ml Contains: Ondansetron (as HCl Dihydrate)……8mg
	Dairy No. date of R &I fee	Form-5 Dy.No 13019 dated 05-03-2019 Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Antiemetics and Antinauseants
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	4mlx5's, 4mlx1's; As per SRO
	Approval status of product in Reference Regulatory Authorities	Ondansetron 8mg/4ml Solution for Injection MHRA Approved

	Me-too-status	Vemtix 8mg/4ml Injection by M/s Biolabs (Pvt) Ltd (Reg#093252)
	GMP Status	GMP certificate issued to the firm on 25-05-2021 based on inspection conducted on 13-04-2021
	Remark of the Evaluator [XI]	• The firm have mentioned different names on cover letter, form 5 and fee challan. Anset injection 2mg/ml (cover letter), Dantron injection 8mg/4ml (form 5), Anset / Ondansetron as HCl Dihydrate inj (fee challan) • The firm submitted that brand name Dantron injection 8mg/4ml proposed in form-5 is for the formulation of Ondansetron as HCl Dihydrate. • The firm submitted letter No. F. 1-37/93-Lic dated 03.08.2015 issued by Secretary Central Licensing Board confirming the presence of Liquid Injectable (Ampoule/Vial) (General and General Antibiotic) Section • The firm have submitted complete manufacturing outline mentioning terminal sterilization
	Decision: Approved.	
21.	Name and address of manufacture / Applicant	M/s Hamaz Pharmaceuticals (Pvt.) Ltd. 13-km, Bosan Road, Lutfabad, Multan
	Brand Name + Dosage Form and Strength	Permeth Cream 5%
	Composition	Each Gram Contains: Permethrin……50mg
	Dairy No. date of R &I fee	Form-5 Dy.No 13033 dated 05-03-2019 Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Ectoparasiticides, Incl. Scabicides, Insecticides And Repellents
	Type of form	Form 5

	Remark of the Evaluator [XI]	• The firm have mentioned different names on cover letter, form 5 and fee challan. Telfin cream 1% w/w (cover letter), Bina cream 1% w/w (form 5), Telfin / Terbinafine cream (fee challan)

		• The firm submitted that brand name Bina cream 1% w/w proposed in form-5 is for the formulation of Terbinafine. • The firm submitted letter No. F. 1-37/93-Lic dated 03.08.2015 issued by Secretary Central Licensing Board confirming the presence of Cream/Ointment/Gel (General) Section
	Decision: Approved.	
26.	Name and address of manufacture / Applicant	M/s Hamaz Pharmaceuticals (Pvt.) Ltd. 13-km, Bosan Road, Lutfabad, Multan
	Brand Name + Dosage Form and Strength	Trama Injection 100mg/2ml
	Composition	Each 2ml Contains: Tramadol HCl…….100mg
	Dairy No. date of R &I fee	Form-5 Dy.No 13017 dated 05-03-2019 Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Opioids Analgesic
	Type of form	Form 5
	Finished product specifications	Manufacturer's specifications
	Pack size and Demand Price	2mlx5's; As per SRO
	Approval status of product in Reference Regulatory Authorities	TRAMAL tramadol hydrochloride 100mg/2mL injection ampoule TGA Approved
	Me-too-status	Amadrol Injection 100mg/ 2ml by M/s Amarant Pharmacetuicals (Reg#83042)
	GMP Status	GMP certificate issued to the firm on 25-05-2021 based on inspection conducted on 13-04-2021
	Remark of the Evaluator [XI]	• The firm have mentioned different names on cover letter, form 5 and fee challan. Ramadol injection 100mg/2ml (cover letter), Trama injection 100mg/2ml (form 5), Ramadol / Tramadol HCl inj (fee challan) • The firm submitted that brand name Trama injection 100mg/2ml proposed in form-5 is for the formulation of Tramadol HCl. • The firm submitted letter No. F. 1-37/93-Lic dated 03.08.2015 issued by Secretary Central Licensing Board confirming the presence of Liquid Injectable (Ampoule/Vial) (General and General Antibiotic) Section • The firm have revised the weight of API in master formulation as 100mg/2ml instead of 105mg/2ml as per the applied label claim. • The firm have submitted complete manufacturing outline.
	Decision: Approved with innovator's specifications. • **Firm shall submit the fee of Rs. 30,000 for correction/pre-approval change of weight of API in the master formulation and product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**	

Case No. 05: Deferred cases:

a. Deferred cases of Human drugs on Form 5 F:

27.	Name, address of Applicant / Marketing Authorization Holder	M/s Pacific Pharmaceuticals Ltd., 30 Km Multan Road, Lahore
	Name, address of Manufacturing site.	M/s Pacific Pharmaceuticals Ltd., 30 Km Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20556 dated 28-07-2021
	Details of fee submitted	Rs.30,000/- dated 16-06-2021
	The proposed proprietary name / brand name	Gluset 10mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains Empagliflozin …. 10 mg
	Pharmaceutical form of applied drug	Oral solid dosage form
	Pharmacotherapeutic Group of (API)	Sodium-glucose co-transporter 2 (SGLT2) inhibitors ATC code: A10BK03
	Reference to Finished product specifications	In-House
	Proposed Pack size	10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	JARDIANCE (10mg, 25mg) film coated tablets USFDA Approved
	For generic drugs (me-too status)	Diampa Tablet 25 mg by M/s Getz Pharma (Reg#093073)
	GMP status of the Finished product manufacturer	The firm have submitted GMP certificate issued on 25-04-209 based on inspection conducted 07-03-2019.
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co. Ltd., Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province - 123000, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III (Drug Substance):	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance	Long-term stability studies were performed at a storage temperature of 30°C±2°C/65%±5% RH for 24 months. Accelerated stability studies were performed at a temperature of 40±2°C/75%±5% RH for 6 months. (Batch No. 20160606, 20161017, 20161219)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has submitted Pharmaceutical Equivalence Studies of the applied product against the reference product of "Diampa 10 mg Tablet" by M/s Getz pharma. CDP has been performed against the same brand that "Diampa 10 mg Tablet" by Getz pharma in HCl buffer Acetate Buffer pH 4.5 and Phosphate buffer pH 6.8. The values for f2 are in the acceptable range.
	Analytical method validation / verification of product	Firm has submitted verification/ validation studies of the drug product.

STABILITY STUDY DATA

Manufacturer of APIs	Fuxin Long Rui Pharmaceutical Co., Ltd Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province - 123000, China		
API Lot No.	L-E-20200409-D01-E06-01		
Description of Pack (Container closure system)	Alu-PVC blisters sealed with Aluminium foil		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% HR ±5% Accelerated: 40°C ± 2°C / 75% HR ±5%		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 24, (Months)		
Batch No.	SEG00109P	SEG00209P	SEG00309P
Batch Size	5000 Tablet	5000 Tablet	5000 Tablet
Manufacturing Date	09/2020	09/2020	09/2020
Date of Initiation	22-09-2020	22-09-2020	22-09-2020
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Refer to previous onsite inspection report of their product Esmelin tablet 15mg dated 10-08-2020 on the basis of which Registration Board in its 313th meeting decided to approve the registration of Esmelin 15mg tablet. The report shows that: • The HPLC software is 21 CFR compliant and Log of data was available in the HPLCs. The data was also checked through hard copies of chromatograms. • Adequate monitoring and control were available for stability chamber. The firm was advised to improve the alarm system.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate in the name of M/s Fuxin Long Rui Pharmaceutical Co., Ltd, Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province - 123000, China issued on dated: 24/08/2020, valid till 23/08/2023 by Liaoning Fuxin Management Committee – China is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice attested by AD I&E DRAP, Lahore.

Invoice No.	Batch No.	Quantity Imported	Date of approval by DRAP
SY2006 1201-F	L-E-20200409-D01-E06-01	0.35 kg	26-06-2020

		The invoice is issued from M/s Shenyang Vast Pharm-Tech Co., Ltd China and it does not contain the name of manufacturer.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted supporting document including summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not submitted
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4- 1.3.5	• Submit copy of valid drug manufacturing license • Provide evidence of required manufacturing facility	• The firm have submitted copy of DML issued on 22-07-2015 and renewal of DML applied on 13-07-2020. • *The firm have submitted panel inspection report dated* 13-04-2017 for renewal on DML showing presence of Tablets (General, Antibiotic, Anti-TB, Psychotropic) section
1.4.1	• You have applied for a new drug product while the applied product is generic drug product, clarify?	• The firm submitted that it is a typographical mistake and we applied for generic drug product and submitted corrected form 5F
1.5.15-1.5.20	• Commitments submitted without signature	• The firm have submitted signed commitments as per module-I
3.2.S.4.3	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) is submitted
3.2.S.5	• The firm have submitted COA of Reference Standards or Materials which was expired on 18.04.2018. Justification is required for using expired working standard	• The firm submitted that this reference standard was use in the analysis of stability batches of drug substance. So, it was not expired at that time. COA of drug substance is submitted. ***However, the firm did not submit COA of the reference standard that was used in analysis of drug substance.***
3.2.P.1	• You have used Povidone K-30 instead of hydroxypropyl cellulose used by innovator product and not performed compatibility study, clarify? • Pharmaceutical equivalence of the applied drug with the innovator product is not performed, justify?	• The firm have submitted compatibility study report. The firm have performed compatibility study through binary mixture approach and assessed through HPLC. The samples were stored at 25ºC/60% and 40ºC/75% in both open and closed container for 1month. *However, compatibility report of only 40ºC/75% RH open container is submitted and compatibility report 40ºC/75% closed container and 25ºC/60% in both open and closed container is not submitted*

		• The firm submitted that innovator product was not available so they use reference product for pharmaceutical equivalence studies.
3.2.P.2.2.1	• Justify the CDP studies at 50 rpm, since the innovator product review documents specifies 75 rpm for dissolution studies.	• *The firm submitted that in FDA dissolution guidance 2018, CDP studies is at 50 rpm, but we also perform at 75 rpm and submitted revised CDP report.*
3.2.P.5.1	• Justify the acceptance criteria of dissolution test i.e. NLT 70% (Q) in 30min since FDA review documents specifies that dissolution criteria shall be NLT Q in 15 min and BP/USP/Ph. Int specifies that Q should not be less than 75%. • Justification is required as the registration board in its 293rd meeting decided that For rapidly dissolving as well as immediate release drug products, wherein the stability batches will be manufactured after 01-06-2020, variation from innovator /reference product with reference to dissolution specification will not be acceptable. • Test for identification, degradation products, content uniformity and microbial quality not included in specifications although included by innovator's product, justify? • Justify the dissolution studies at 50 rpm, since the innovator product review documents specifies 75 rpm for dissolution studies.	• *The firm submitted that it is a typographical mistake, the acceptance criteria of dissolution test is NLT 80% in 30 min as per FDA dissolution guidance 2018. And our batches results are more that 100%. However, FDA review documents specifies that dissolution criteria shall be NLT Q in 15 min* • We are assuring that we do not variate from innovator / reference product with reference to dissolution specifications • *The firm submitted that we also performed these tests and also updated the specifications*. However, test for degradation products are not performed. Updated SOP and COA of the product is submitted • *The firm submitted that in FDA dissolution guidance 2018, CDP studies is at 50 rpm, but we also perform at 75 rpm and submitted revised CDP report.*
3.2.P.5.3	• In validation of analytical procedure Methanol 45; buffer 55 is mentioned as the mobile phase while in analytical procedure ACN 45; buffer 55 is mentioned as mobile phase, Clarify?	• The firm submitted that it is a typographical mistake, no methanol is used, ACN is used as per analytical procedure and submitted revised validation of analytical procedure report.
3.2.P.6	Justify the use of Reference Standards or Materials from M/s Clearsynth Labs Ltd India since drug substance manufacturer is Fuxin Long Rui Pharmaceutical Co., Ltd china.	• The firm stated that we use Reference Standards or Materials from Fuxin Long Rui Pharmaceutical Co., Ltd for testing. The use of M/s Clearsynth Labs reference standard is only for comparison purpose. *However, the firm did not submit COA of Reference Standards or Materials from Fuxin Long Rui Pharmaceutical Co., Ltd*
3.2.P.8	• Submit documents for procurement of API, since the submitted invoice does not specify the details of manufacturer • Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required. • Submit chromatograms, raw data sheets & COAs of the conducted stability study with proper separator so that the data can be evaluated	• *The firm submitted that only distributor name is mentioned in invoice but Batch no. and expiry date of product is mentioned.* • The firm submitted copy of DML certificate No. Liao20150233, dated: 21/12/2017 valid till 20/12/2022, issued by Food & Drug Administration of Liaoning Province- China. • The firm have submitted chromatograms, raw data sheets of the conducted stability study. *The COAs are still not submitted. Chromatograms of assay at initial time point is still not submitted. Submitted*

	• Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Submit Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	*chromatogram not readable. Raw data sheet of accelerated stability study at 3rd month time point is not submitted* • *The lambda given in chromatogram is 225/224nm while lambda mentioned in analytical procedure is 210nm.* • *The firm have submitted declaration of software quality form Agilent for HPLC software 21CFR. However, the firm have not submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.* • The firm have submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers at real time conditions. *Record of Digital data logger for temperature & humidity monitoring of stability chambers at accelerated conditions is not submitted*	

Decision of 316the meeting of DRB:

Deferred for following:

- Submission of COA of the reference/working standard that was used in analysis of drug substance.
- Justification of the acceptance criteria of dissolution test i.e. NLT 70% (Q) in 30min since FDA review documents specifies that dissolution criteria shall be NLT Q in 15 min
- Submission of COA of Reference/Working Standards from Fuxin Long Rui Pharmaceutical Co., Ltd.
- Submission of COAs and readable copies of Chromatograms of assay at initial time point.
- Submission of Raw data sheet of accelerated stability study at 3rd month time point
- Clarification regarding variation in the lambda wavelength specified in analytical procedure from that mentioned on chromatograms.
- Submission of Compliance Record of HPLC software 21CFR & audit trail reports on product testing for complete stability studies
- Submission of Record of Digital data logger for temperature & humidity monitoring of stability chambers at accelerated conditions
- Submission fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Evaluation by PEC:

- Firm has submitted COA of working standard
- Firm submitted that Dissolution criteria Q=80% in 30 minutes according to FDA guidelines, in our document it was a typographical error and submitted updated SOP for analysis and revised specifications. ***However, FDA review documents of innovator product specifies that dissolution criteria shall be NLT Q in 15 min***
- Firm has submitted COA of Working Standards from Fuxin Long Rui Pharmaceutical Co., Ltd.
- Firm has submitted readable copies of Chromatograms of assay at initial time point. ***However, COA at initial time point is not submitted***
- Firm has submitted Raw data sheet of accelerated stability study at 3rd month time point
- The firm has submitted updated SOP for analysis containing same lambda / wavelength as mentioned on chromatograms
- Firm has submitted a certificate of HPLC software 21CFR compliance. ***However, audit trail reports on product testing for complete stability studies is not submitted***
- Record of Digital data logger for temperature & humidity monitoring of stability chambers at accelerated conditions is submitted
- Firm has submitted Fee Rs. 7,500/- on deposit slip No. 55298427798 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Decision: Approved with innovator's specifications.

- **Registration letter shall be issued after submission of revised dissolution specifications of *NLT Q in 15 min* of applied product as per innovator's product**
- **Submission of batch analysis certificate of initial time point of all stability batches, as per submitted analytical record**
- **Submission of audit trail reports on product testing for complete stability studies**

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

28.	Name, address of Applicant / Marketing Authorization Holder	M/s Pacific Pharmaceuticals Ltd., 30 Km Multan Road, Lahore
	Name, address of Manufacturing site.	M/s Pacific Pharmaceuticals Ltd., 30 Km Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20557 dated 28-07-2021
	Details of fee submitted	Rs.30,000/- dated 16-06-2021
	The proposed proprietary name / brand name	Gluset 25 mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains Empagliflozin …. 25 mg
	Pharmaceutical form of applied drug	Oral solid dosage form
	Pharmacotherapeutic Group of (API)	Sodium-glucose co-transporter 2 (SGLT2) inhibitors ATC code: A10BK03
	Reference to Finished product specifications	In-House
	Proposed Pack size	10’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	JARDIANCE (10mg, 25mg) film coated tablets USFDA Approved
	For generic drugs (me-too status)	Diampa Tablet 25 mg by M/s Getz Pharma (Reg#093074)
	GMP status of the Finished product manufacturer	The firm have submitted GMP certificate issued on 25-04-209 based on inspection conducted 07-03-2019.
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co. Ltd., Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province - 123000, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III (Drug Substance):	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities,

		specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Long-term stability studies were performed at a storage temperature of 30°C±2°C/65%±5% RH for 24 months. Accelerated stability studies were performed at a temperature of 40±2°C/75%±5% RH for 6 months. (Batch No. 20160606, 20161017, 20161219)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has submitted Pharmaceutical Equivalence Studies of the applied product against the reference product of "Diampa 25 mg Tablet" by M/s Getz pharma. CDP has been performed against the same brand that is "Diampa 25 mg Tablet" by Getz pharma in HCl buffer, Acetate Buffer pH 4.5 and Phosphate buffer pH 6.8. The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted verification/ validation studies of the drug product.

STABILITY STUDY DATA

Manufacturer of APIs	Fuxin Long Rui Pharmaceutical Co., Ltd Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province - 123000, China		
API Lot No.	L-E-20200409-D01-E06-01		
Description of Pack (Container closure system)	Alu-PVC 110 mm blisters sealed with Aluminium foil		
Stability Storage Condition	Real time: 30ºC ± 2ºC / 65% HR ±5% Accelerated: 40ºC ± 2ºC / 75% HR ±5%		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 24, (Months)

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Refer to previous onsite inspection report of their product Esmelin tablet 15mg dated 10-08-2020 on the basis of which Registration Board in its 313th meeting decided to approve the registration of Esmelin 15mg tablet. The report shows that: • The HPLC software is 21 CFR compliant and Log of data was available in the HPLCs. The data was also checked through hard copies of chromatograms. • Adequate monitoring and control were available for stability chamber. The firm was advised to improve the alarm system.

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4-1.3.5	• Submit copy of valid drug manufacturing license • Provide evidence of required manufacturing facility	• The firm have submitted copy of DML issued on 22-07-2015 and renewal of DML applied on 13-07-2020. • The firm have submitted panel inspection report dated 13-04-2017 for renewal of DML showing presence of Tablets (General, Antibiotic, Anti-TB, Psychotropic) section
1.4.1	• You have applied for a new drug product while the applied product is generic drug product, clarify?	• The firm submitted that it is a typographical mistake and we applied for generic drug product and submitted corrected form 5F
1.5.6	• The firm have claimed In house specifications and the product is not available in any pharmacopeia	• ***No reply submitted***
1.5.15-1.5.20	• Commitments submitted without signature	• The firm have submitted signed commitments as per module-I
3.2.S.4.3	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) is submitted
3.2.S.5	• The firm have submitted COA of Reference Standards or Materials which was expired on 18.04.2018. Justification is required for using expired working standard	• The firm submitted that this reference standard was use in the analysis of stability batches of drug substance. So, it was not expired at that time. COA of drug substance is submitted. ***However, the firm***

		did not submit COA of the reference standard that was used in analysis of drug substance.
3.2.P.1	• You have used Povidone K-30 instead of hydroxypropyl cellulose used by innovator product and not performed compatibility study, clarify? • Pharmaceutical equivalence of the applied drug with the innovator product is not performed, justify?	• The firm have submitted compatibility study report. The firm have performed compatibility study through binary mixture approach and assessed through HPLC. The samples were stored at 25ºC/60% and 40ºC/75% in both open and closed container for 1month. ***However, compatibility report of only 40ºC/75% RH open container is submitted and compatibility report 40ºC/75% closed container and 25ºC/60% in both open and closed container is not submitted*** • The firm submitted that innovator product was not available so they use reference product for pharmaceutical equivalence studies.
3.2.P.2.2.1	• Justify the CDP studies at 50 rpm, since the innovator product review documents specifies 75 rpm for dissolution studies.	• ***The firm submitted that in FDA dissolution guidance 2018, CDP studies is at 50 rpm, but we also perform at 75 rpm and submitted revised CDP report.***
3.2.P.5.1-3.2.P.5.2	• Justify the acceptance criteria of dissolution test i.e. NLT 70% (Q) in 30min since FDA review documents specifies that dissolution criteria shall be NLT Q in 15 min and BP/USP/Ph. Int specifies that Q should not be less than 75%. • Justification is required as the registration board in its 293rd meeting decided that For rapidly dissolving as well as immediate release drug products, wherein the stability batches will be manufactured after 01-06-2020, variation from innovator /reference product with reference to dissolution specification will not be acceptable. • Test for identification, degradation products, content uniformity and microbial quality not included in specifications although included by innovator's product, justify? • Justify the dissolution studies at 50 rpm, since the innovator product review documents specifies 75 rpm for dissolution studies.	• ***The firm submitted that it is a typographical mistake, the acceptance criteria of dissolution test is NLT 80% in 30 min as per FDA dissolution guidance 2018. And our batches results are more that 100%. However, FDA review documents specifies that dissolution criteria shall be NLT Q in 15 min*** • We are assuring that we do not variate from innovator / reference product with reference to dissolution specifications. Our product dissolution results are within limits of innovator specifications. • ***The firm submitted that we updated the specifications as per innovator's specifications***. However, test for degradation products are not performed. Updated SOP and COA of the product is submitted • ***The firm submitted that in FDA dissolution guidance 2018, CDP studies is at 50 rpm, but we also perform at 75 rpm and submitted revised CDP report.***
3.2.P.5.3	• In validation of analytical procedure Methanol 45; buffer 55 is mentioned as the mobile phase while in analytical procedure ACN 45; buffer 55 is mentioned as mobile phase, Clarify?	• The firm submitted that it is a typographical mistake, no methanol is used, ACN is used as per analytical procedure and submitted revised validation of analytical procedure report.
3.2.P.6	Justify the use of Reference Standards or Materials from M/s Clearsynth Labs Ltd India since drug substance manufacturer is Fuxin Long Rui Pharmaceutical Co., Ltd china.	• The firm stated that we use Reference Standards or Materials from Fuxin Long Rui Pharmaceutical Co., Ltd for testing. The use of M/s Clearsynth Labs reference standard is only for comparison purpose. ***However, the firm did not submit COA of Reference Standards or Materials from Fuxin Long Rui Pharmaceutical Co., Ltd***

3.2.P.8	• Submit documents for procurement of API, since the submitted invoice does not specify the details of manufacturer • Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required. • Submit chromatograms, raw data sheets & COAs of the conducted stability study with proper separator so that the data can be evaluated • Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Submit Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated) • The quantity of imported drug substance as per submitted invoice is 0.35kg and three batches of 25mg gluset tablets and 10mg gluset tablets each of 5000 tablets were manufactured from it. Justification is required as how the imported drug substance was sufficient enough to manufacture three batches of each strength. • The total quantity required for manufacturing of three batches of both strength is 0.525kg while imported drug substance is 0.35kg	• ***The firm submitted that only distributor name is mentioned in invoice but Batch no. and expiry date of product is mentioned.*** • The firm submitted copy of DML certificate No. Liao20150233, dated: 21/12/2017 valid till 20/12/2022, issued by Food & Drug Administration of Liaoning Province- China. • The firm have submitted chromatograms, raw data sheets of the conducted stability study. ***The COAs are still not submitted. Chromatograms of assay at initial time point is still not submitted. Submitted chromatogram not readable. Raw data sheet of accelerated stability study at 3rd month time point is not submitted*** • ***The lambda given in chromatogram is 225/224nm while lambda mentioned in analytical procedure is 210nm.*** • ***The firm have submitted declaration of software quality form Agilent for HPLC software 21CFR. However, the firm have not submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.*** • The firm have submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers at real time conditions. ***Record of Digital data logger for temperature & humidity monitoring of stability chambers at accelerated conditions is not submitted*** • The firm submitted that we import more material to fulfil the required batch quantity. • The firm has submitted another copy of commercial invoice attested by AD I&E DRAP, Lahore. **Invoice No.** | **Batch No.** | **Quantity Imported** | **Date of approval by DRAP** **SY200714-F** | L-E-20200409-D01-E06-01 | 0.75 kg | 27-07-2020 The invoice is issued from M/s Shenyang Vast Pharm-Tech Co., Ltd China and it does not contain the name of manufacturer

Decision of 316th meeting of DRB:

Deferred for following:

- Submission of COA of the reference/working standard that was used in analysis of drug substance.
- Justification of the acceptance criteria of dissolution test i.e. NLT 70% (Q) in 30min since FDA review documents specifies that dissolution criteria shall be NLT Q in 15 min
- Submission of COA of Reference/Working Standards from Fuxin Long Rui Pharmaceutical Co., Ltd
- Submission of COAs and readable copies of Chromatograms of assay at initial time point.
- Submission of Raw data sheet of accelerated stability study at 3rd month time point
- Clarification regarding variation in the lambda wavelength specified in analytical procedure from that mentioned on chromatograms.
- Submission of Compliance Record of HPLC software 21CFR & audit trail reports on product testing for complete stability studies
- Submission of Record of Digital data logger for temperature & humidity monitoring of stability chambers at accelerated conditions

• Submission fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
Evaluation by PEC: • Firm has submitted COA of working standard • Firm submitted that Dissolution criteria Q=80% in 30 minutes according to FDA guidelines, in our document it was a typographical error and submitted updated SOP for analysis and revised specifications. ***However, FDA review documents of innovator product specifies that dissolution criteria shall be NLT Q in 15 min*** • Firm has submitted COA of Working Standards from Fuxin Long Rui Pharmaceutical Co., Ltd. • Firm has submitted readable copies of Chromatograms of assay at initial time point. ***However, COA at initial time point is not submitted*** • Firm has submitted Raw data sheet of accelerated stability study at 3rd month time point • The firm has submitted updated SOP for analysis containing same lambda / wavelength as mentioned on chromatograms • Firm has submitted a certificate of HPLC software 21CFR compliance. ***However, audit trail reports on product testing for complete stability studies is not submitted*** • Record of Digital data logger for temperature & humidity monitoring of stability chambers at accelerated conditions is submitted • Firm has submitted Fee Rs. 7,500/- on deposit slip No. 1105707479 for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
Decision: Approved with innovator's specifications. • **Registration letter shall be issued after submission of revised dissolution specifications of *NLT Q in 15 min* of applied product as per innovator's product** • **Submission of batch analysis certificate of initial time point of all stability batches, as per submitted analytical record.** • **Submission of audit trail reports on product testing for complete stability studies** • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

b. Deferred cases of form 5 for consideration of turn:

29.	Name and address of manufacture / Applicant	M/s Wimits Pharmaceuticals (Pvt.) Ltd., Plot No. 129, Sundar Industrial Estate, Raiwind Road, Lahore

	Dairy No. date of R &I fee	Form-5 Dy.No 14936 dated 07-03-2019 Rs.50,000/- Dated 07-03-2019
	Pharmacological Group	Cephalosporin
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Ceftriaxone 500mg powder for solution for injection MHRA Approved
	Me-too-status	Ceftro Injection 500mg IV by Biocef (Pvt) Ltd, (Reg. No. 82738)
	GMP Status	Issuance of DML to M/s Athan Pharmaceuticals Hattarin 269th Meeting of CLB dated 05-03-2019. Last GMP inspection of M/s Aulton Pharmaceuticals Hattar was conducted on 27-06-2019 and conclusion of inspection was: As per observations made during inspection, the manufacturing, quality control and environmental facilities, provided the qualified staff employed, the documentation maintained, implementation of the SOP's the GMP compliance status of the firm M/s Aulton Pharma is found to be satisfactory.
	Previous Remark of the Evaluator [XI]	• The firm submitted letter No. F. 1-17/2013-Lic dated 11th April 2017 issued by Secretary Central Licensig Board showing that M/s Aulton Pharmaceuticals have Capsule section (Cephalosporin), Dry Powder Suspension Section (Cephalosporin) and Dry Powder Injection Section (Cephalosporin) • Firm submitted duly filled form 5 signed by the signatory and undertaking at the end of form 5 signed by technical persons • Fee of Rs. 50000/- submitted by manufacturer M/s Aulton Pharmaceuticals and not the applicant M/s Athan Pharmaceuticals. The firm informed that it was clerical mistake to deposit the fee on deposit slip of M/s Aulton Pharmaceuticals and they requested to consider it on account of M/s Athan Pharmaceuticals. However the deposit slip contain both the name of M/s Aulton Pharmaceutical and its DML No. 000828. • A copy of contract manufacturing agreement between M/s Athan Pharmaceuticals and M/s Aulton Pharmaceuticals is submitted • The firm submitted list of 08 approved sections of applicant. i.e. M/s Athan Pharmaceuticals

		• The firm informed that they don't have any product registered/approved on contract manufacturing • The firm submitted list of 05 applied products for contract manufacturing • The firm did not mentioned type of primary packaging material of applied formulation whether it is type I, II or III glass container
	Previous Decision (296-DRB)	**Deferred for consideration on its turn.**
	Evaluation by PEC	
	Decision: Approved. • **Registration letter shall be issued after mentioning the type of primary packaging material of applied formulation** • **Applicant shall submit the full fee of Rs. 75,000/- as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021, since initially fee was submitted bythe contract manufacturer instead of the applicant.** • **Submission of GMP audit report for both M/s Athan Pharmaceuticals and M/s Aulton Pharmaceuticals from QA&LT Division, valid within last three years** • **Registration Board Authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Aulton Pharmaceuticals. Plot No. 84/1, Block A, Phase V, Industrial Estate, Hattar, K.P.K**	
49.	Name and address of manufacture / Applicant	M/s Athan Pharmaceuticals Plot 84/1, Block B, Phase 5, Industrial Estate Hattar ***Contract Manufactured by:*** M/s Aulton Pharmaceuticals. Plot No. 84/1, Block A, Phase V, Industrial Estate, Hattar, K.P.K
	Brand Name + Dosage Form and Strength	Cefixon 250mg injection IV

c. Deferred cases of Human Drugs on Form 5:

52.	Name and address of manufacture / Applicant	M/s Gulf Pharmaceuticals Plot # 49 street-5 National Industrial zone Rawat Islamabad,
	Brand Name + Dosage Form and Strength	Gulped 25mg Tablet
	Composition	Each film coated tablet contains: Levosulpiride…….25 mg
	Dairy No. date of R &I fee	Dy.No.2684; 24-02-2017; Rs.20,000/- (24-02-2017)
	Pharmacological Group	Antidepressant
	Type of form	Form 5
	Finished product specifications	Manufacturer specification
	Pack size and Demand Price	2 x 10's ; As per SRO
	Approval status of product in Reference Regulatory Authorities	Approved by Italian Medicine Agency
	Me-too-status	Scipride 25mg tablet by M/s Getz Pharma (Reg#057902)
	GMP Status	Last GMP inspection conducted on 18-05-2016, and the report concludes that firm is complying GMP.
	Previous Remark of the Evaluator	•
	Previous Decision (278-DRB)	• Deferred for clarification of formulation since reference product is available as uncoated tablet whereas firm has applied for film coated formulation.
	Evaluation by PEC	• The firm has submitted revised form 5 and master formulation and revised the formulation from film coated to uncoated tablets along with submission of Rs 7500/- on deposit slip# 961250993063. The revised label claim is as under: Each uncoated tablet contains: Levosulpiride…….25 mg
	Decision: Approved with innovator's specifications and following label claim: **Each uncoated tablet contains:** **Levosulpiride…….25 mg**	
53.	Name and address of manufacture / Applicant	M/s Gulf Pharmaceuticals Plot # 49 street-5 National Industrial zone Rawat Islamabad,
	Brand Name + Dosage Form and Strength	Gulped 50mg Tablet
	Composition	Each film coated tablet contains: Levosulpiride…….50 mg
	Dairy No. date of R &I fee	Dy.No.2689; 24-02-2017; Rs.20,000/- (24-02-2017)
	Pharmacological Group	Antidepressant
	Type of form	Form 5
	Finished product specifications	Manufacturer specification

	Pack size and Demand Price	2 x 10's ; As per SRO
	Approval status of product in Reference Regulatory Authorities	Approved by Italian Medicine Agency
	Me-too-status	Scipride 50mg tablet by M/s Getz Pharma (Reg#057903)
	GMP Status	Last GMP inspection conducted on 18-05-2016, and the report concludes that firm is complying GMP.
	Previous Remark of the Evaluator	•
	Previous Decision (278-DRB)	• Deferred for clarification of formulation since reference product is available as uncoated tablet whereas firm has applied for film coated formulation.
	Evaluation by PEC	• The firm has submitted revised form 5 and master formulation and revised the formulation from film coated to uncoated tablets along with submission of Rs 7500/- on deposit slip# 727236260767. The revised label claim is as under: Each uncoated tablet contains: Levosulpiride…….50 mg
	Decision: Approved with innovator's specifications and following label claim: **Each uncoated tablet contains:** **Levosulpiride…….50 mg**	
54.	Name and address of manufacture / Applicant	"M/s Inventor Pharma., Plot No. K/196, S.I.T.E. (SHW) Phase II, Karachi"
	Brand Name + Dosage Form and Strength	Lincoventor 300mg/ml
	Composition	Each 1ml ampoule contains: Lincomycin as HCl.…300mg
	Dairy No. date of R &I fee	Form-5 Dy.No 74 dated 01-01-2019 Rs.20,000/- Dated 31-12-2018
	Pharmacological Group	Lincosamides
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	1ml; As per SRO
	Approval status of product in Reference Regulatory Authorities	LINCOMYCIN LWS lincomycin (as hydrochloride monohydrate) 300 mg/1 mL solution for injection ampoule; TGA Australia Approved
	Me-too-status	LincoShar Injection of M/s Sharex Labs (Reg. # 065681)
	GMP Status	The firm was inspected on 05-07-2018 and conclusion of inspection was: Keeping in view the stated conditions and attitude of the firm towards better compliance, their current GMP is rated as GOOD.
	Previous Remark of Evaluator [XI]	• Letter of deficiencies sent on 21-04-2020 and reminder on 04-11-2020 but no reply received yet • You have not mentioned label claim in form 5. Please mention the label claim • Revise weight of API in master formulation considering the salt factor. Moreover mention the hydrated form of API in label claim and master formulation • You have not performed terminal sterilization, justify • Mention type of primary packaging material of applied formulation whether it is type I, II or III
	Previous Decision (297-DRB)	Deferred for following: • You have not mentioned label claim in form 5. Please mention the label claim • Revise weight of API in master formulation considering the salt factor. Moreover, mention the hydrated form of API in label claim and master formulation • not performed terminal sterilization • Mention type of primary packaging material of applied formulation whether it is type I, II or III

	Evaluation by PEC	• The firm mentioned the label claim without submission of applicable fee. The submitted label claim is as under: Each ml contains: Lincomycin HCl monohydrate eq. to Lincomycin ..…300mg • The firm submitted that product is sterilized by membrane filtration using 0.2micron membrane filter and filled aseptically. Hence no need for terminal sterilization • The firm submitted glass ampoule Type I as primary packaging material of applied formulation • The firm did not submit revised master formulation and did not revise weight of API in master formulation considering the salt factor and hydrated form.
	Previous Decision (307-DRB)	Deferred for following: • Submission of master formulation and revise weight of API considering the salt factor and hydrated form. • Scientific justification for not performing terminal sterilization
	Evaluation by PEC	• The firm have submitted revised master formulation and adjusted the weight of API considering the salt factor without submission of applicable fee. • The firm have submitted revised manufacturing outline and mentioned terminal sterilization process in manufacturing outline
	Decision: Approved with following label claim: Each ml contains: Lincomycin HCl monohydrate eq. to Lincomycin ..…300mg Firm shall submit the fee of Rs. 30,000/- for correction/pre-approval change in composition (correction/change of hydrated form of the drug substance), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	
55.	Name and address of manufacture / Applicant	"M/s Inventor Pharma., Plot No. K/196, S.I.T.E. (SHW) Phase II, Karachi"
	Brand Name + Dosage Form and Strength	Lincoventor 600mg/2ml
	Composition	Each 2ml contains: Lincomycin as HCl..…600mg
	Dairy No. date of R &I fee	Form-5 Dy.No 75 dated 01-01-2019 Rs.20,000/- Dated 31-12-2018
	Pharmacological Group	Lincosamides
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	2ml; As per SRO
	Approval status of product in Reference Regulatory Authorities	LINCOMYCIN LWS lincomycin (as hydrochloride monohydrate) 600 mg/2 mL solution for injection ampoule TGA approved
	Me-too-status	Olinc 600mg/2ml vial of M/s Bosch (Reg#025416)
	GMP Status	The firm was inspected on 05-07-2018 and conclusion of inspection was: Keeping in view the stated conditions and attitude of the firm towards better compliance, their current GMP is rated as GOOD.
	Previous Remark of Evaluator [XI]	• Letter of deficiencies sent on 21-04-2020 and reminder on 04-11-2020 but no reply received yet • You have not mentioned label claim in form 5. Please mention the label claim • Revise weight of API in master formulation considering the salt factor. Moreover mention the hydrated form of API in label claim and master formulation • You have not performed terminal sterilization, justify • Mention type of primary packaging material of applied formulation whether it is type I, II or III
	Previous Decision (297-DRB)	Deferred for following: • You have not mentioned label claim in form 5. Please mention the label claim

		• Revise weight of API in master formulation considering the salt factor. Moreover mention the hydrated form of API in label claim and master formulation • You have not performed terminal sterilization, justify • Mention type of primary packaging material of applied formulation whether it is type I, II or III
	Evaluation by PEC	• The firm mentioned the label claim without submission of applicable fee. The submitted label claim is as under: Each 2ml contains: Lincomycin HCl monohydrate eq. to Lincomycin ..…600mg • The firm submitted that product is sterilized by membrane filtration using 0.2micron membrane filter and filled aseptically. Hence no need for terminal sterilization • The firm submitted glass ampoule Type I as primary packaging material of applied formulation • The firm submitted revised master formulation and revised weight of API in master formulation considering the salt factor and hydrated form.
	Previous Decision (307-DRB)	• Deferred for scientific justification for not performing terminal sterilization
	Evaluation by PEC	• The firm have submitted revised manufacturing outline and mentioned terminal sterilization process in manufacturing outline
	Decision: Approved with following label claim: Each 2ml contains: Lincomycin HCl monohydrate eq. to Lincomycin ..…600mg Firm shall submit the fee of Rs. 30,000/- for correction/pre-approval change in composition (correction/change of hydrated form of the drug substance), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	
56.	Name and address of manufacture / Applicant	"M/s Inventor Pharma., Plot No. K/196, S.I.T.E. (SHW) Phase II, Karachi"
	Brand Name + Dosage Form and Strength	Dicloin Injection 75mg/3ml
	Composition	Each 3ml ampoule contains: Diclofenac sodium…..75mg
	Dairy No. date of R &I fee	Form-5 Dy.No 69 dated 01-01-2019 Rs.20,000/- 31-12-2018
	Pharmacological Group	NSAIDS
	Type of form	Form 5
	Finished product specifications	BP
	Pack size and Demand Price	3ml (1x5's); As per SRO
	Approval status of product in Reference Regulatory Authorities	Diclofenac Sodium 75 mg/3 ml Solution for Injection MHRA Approved
	Me-too-status	V- Ren Liquid Injection of M/s Regal Pharmaceuticals (Reg#082002)
	GMP Status	The firm was inspected on 05-07-2018 and conclusion of inspection was: Keeping in view the stated conditions and attitude of the firm towards better compliance, their current GMP is rated as GOOD.
	Previous Remark of Evaluator [XI]	• Letter of deficiencies sent on 21-04-2020 and reminder on 04-11-2020 but no reply received yet • Revise weight of API in master formulation not considering the salt factor • You have not performed terminal sterilization, justify • Mention type of primary packaging material of applied formulation whether it is type I, II or III • The manufacturer have claimed BP specifications while official monograph is not available in any pharmacopeia (USP, BP, IP, JP).
	Previous Decision (297-DRB)	Deferred for following:

		• Revise weight of API in master formulation not considering the salt factor • You have not performed terminal sterilization, justify • Mention type of primary packaging material of applied formulation whether it is type I, II or III
	Evaluation by PEC	• The firm submitted revised master formulation and revised the weight of API without considering the salt factor. However, firm have mentioned the 10% excess addition of API • The firm submitted that product is sterilized by membrane filtration using 0.2micron membrane filter and filled aseptically. Hence no need for terminal sterilization • The firm submitted glass ampoule (Ph.Eur. Type I) as primary packaging material of applied formulation
	Previous Decision (307-DRB)	Deferred for following: • Scientific justification for addition of 10% overage of API • Scientific justification for not performing terminal sterilization
	Evaluation by PEC	• The firm have submitted revised master formulation and removed the addition of 10% overage • The firm submitted that A known impurity is formed in the production of a parenteral dosage from of diclofenac sodium if terminally sterilized by autoclave. This impurity has been detected as 1-(2,6-dichlorophenyl) indolin-2qione, which is also an intermediate from which diclofenac sodium is generally synthesized. It is only the condition of the autoclave method (i.e., 123±2 degree C) that enforces the intramolecular cyclic reaction of diclofenac sodium forming indoline derivative and sodium hydroxide. The formation of this impurity has been found to depend on the initial pH of the formulation. The other excipients in the formulation do not have a role in this reaction. The concentration of the impurity in the resultant product in the ampule goes beyond the limit of the raw materials in the pharmacopoeias. It is thus preferable to use an alternative sterilization method, that is, an aseptic filtration method in which the formation of the impurity can be avoided. Hence, the Aseptic filtration method is adopted.
	Decision: Approved with innovator's specifications. Firm shall submit the differential fee of Rs. 7,500/- for correction/pre-approval change in master formulation and product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	

Registration applications of Human Drugs on Form 5F (Import)

57.	Name, address of Applicant / Importer	Atco Pharma International (Pvt.) Ltd, B-18, S.I.T.E, Karachi.

	Name of exporting country	Germany
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized CoPP certificate (No. Ag1525) dated 19-11-2019 ***issued by State Social Services Agency Schleswig-Holstein Health and Consumer Protection Adolf-Westphal-Str. 4 24143 Kiel Germany*** for PABAL® RTS 100 micrograms /ml solution for injection. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspections. The name of importing country on CoPP is mentioned as the Islamic Republic of Pakistan.
	Details of letter of authorization / sole agency agreement	Firm has submitted colored copy of product specific Power of Attorney from Ferring GmbH/ Wittland 11, 24109 Kiel, Germany in the name of Atco Pharma International (Pvt.) Ltd B-18, S.I.T.S., Manghopir Road, Karachi 75700 Pakistan which is valid upto 31-12-2021.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 22749, Date of submission: 20-08-2021
	Details of fee submitted	PKR 100,000/- dated 28-01-2021 Deposit Slip No:2050341
	The proposed proprietary name / brand name	PABAL® RTS 100 micrograms /ml solution for injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Carbetocin 100 micrograms/ml.
	Pharmaceutical form of applied drug	Injectable
	Pharmacotherapeutic Group of (API)	Antihemorrhagic
	Reference to Finished product specifications	In house Specification
	Proposed Pack size	5 x 1ml vial.
	Proposed unit price	Rs. 150,000/- pack of 5 vials.
	The status in reference regulatory authorities	PABAL® RTS 100 micrograms /ml solution for injection by M/s Ferring Medicinal products GmbH/Germany
	For generic drugs (me-too status)	Not Applicable
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Polypeptide Laboratories 7 rue de Boulogne, Technopole du Rhin. Strasbourg 67100 France.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls of material, control of critical steps and intermediates, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Seven batches have been placed on stability at long term (-20ºC ± 5ºC) and accelerated conditions (25ºC ± 2ºC / 60% RH ± 5% RH). The study is scheduled to run for 48 months for the seven Batches. So far, 48 months data is available for five batches and 36 months data is available for two batches. (Batches: MZ77098, MZ77103, MZ77133, MZ77135, MZ77140, MZ77156, MZ77157)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturers, manufacturing process and control of critical steps validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, characterization of impurities, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not Applicable since the applied product is innovator drug products
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	USP Type 1 colourless glass vial (2R) sealed with a bromobutyl rubber stopper (type I according to Ph. Eur.) and an aluminium crimp cap with tear-off over cap.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The long-term storage condition at 30ºC/ 75% RH for 36 months and at accelerated storage conditions at 40ºC/75% RH for 6 months. Shelf life: 3 years.

Batch No.	Mfg. Date	Initiation date
H14020	13 Aug 2013	08 Oct 2013
H14025	27 Aug 2013	15 Oct 2013
H14830	03 Sep 2013	15 Oct 2013

Remarks of Evaluator [XI]:

Section	Observations	Response

1.3.4	Submit Valid copy of Drug Sale License,	Firm has submitted drug sale License; details are given; **License No: 054** **Address:** B-18, S.I.T.E., Karachi **Address of Godown:** B-4, S.I.T.E., Karachi **Validity:** 22-1-2024. **Status:** License to sell, stock and exhibit for sale, distribute and sell drugs by way of whole sale.
	• Submit valid original legalized product specific sole agency agreement (valid upto 31-12-2021.)	The firm submitted that it is under process
1.5.2.	• Describe Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit as per guidance document	Reply not submitted
1.6.5	• Submit valid GMP certificate of drug substance manufacturer as the submitted GMP is expired.	Firm has submitted GMP certificate No. 20MPP075HFR01 of M/s Polypeptide Laboratories France 7 rue de Boulogne, Technopole du Rhin. Strasbourg 67100 France issued based on inspection conducted on 10-12-2020, valid upto three years from date of issue
3.2.S.2	• Copy of quality agreement shall be included as manufacturing, processing, packaging or testing is performed by an outside contractor or third party contractor.	Reply not submitted
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is required.	Reply not submitted
3.2.P.1.2	• In composition of drug product, you have mentioned "Each vial is filled with 1.28 g solution for injection to ensure an extractable volume of 1.0 mL". clarification is required for declaring filled volume in units of grams	During production of Pabal RTS at Ferring GmbH in Kiel, a gravimetric in process control (IPC) test for fill mass. For this test, the extractable volume is transferred to scale and measured in gram. As the density of solution is very consistent (within a range of 1.01 to 1.02 g/ml), the gravimetric IPC test with the given limits of 1.23 g – 1.33 g ensures the required extractable volume of 1.0 ml of finished product is kept
3.2.P.6	• COA of primary / secondary reference standard including source and lot number shall be provided without referring to other section of form 5F	COA of primary / secondary reference standard is not provided

Decision: Registration Board while considering the non-availability of applied formulation in Pakistan and its indicated use, approved the product with innovator's specifications with condition of submission of following before issuance of registration letter:

- **Valid original legalized product specific letter of authorization / sole agency agreement**
- **Copy of quality agreement as manufacturing, processing, packaging or testing is performed by an outside contractor or third party contractor;**
- **Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer**
- **COA of primary / secondary reference standard including source and lot number without referring to other section of form 5F**
- **Firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

58.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Novamed Pharmaceuticals(Pvt.) Ltd Lahore**
	Name, address of Manufacturing site.	M/s Novamed Pharmaceuticals(Pvt.) Ltd., 28km Ferozepur Road Lahore

	Details of fee submitted	PKR 30,000/-: dated 14/09/2021
	The proposed proprietary name / brand name	Agomet 25mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film coated Tablet Contains: Agomeltaine…… 25mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Melatonin agonist (i.e., MT1 and MT2 receptor-site agonism) and a 5HT2c antagonist.
	Reference to Finished product specifications	In-House
	Proposed Pack size	10's, 14's.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Valdoxan Tablet 25mg, Company: Servier Laboratories Limited
	For generic drugs (me-too status)	Agoviz by Pharmevo Reg No: 086887
	GMP status of the Finished product manufacturer	License granted on 08/04/2006 and renewed on 08/04/2021 General tablet section approved and GMP certificate on 31/08/2021.
	Name and address of API manufacturer.	Name: Shanku's Pharmaceuticals Address: Plot No 9, 10, 11 Milan Industrial Estate, Santej, Ta: Kalol, Dist: Gandhinagar – 382721, Gujrat, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical

		form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches :(AGO/07-15/012, AGO/07-15/013 & AGO/07-15/014)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Agoviz 25mg tablet by performing quality tests (Identification, Assay, and Dissolution). CDP was applicable and has been submitted.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity, robustness and Limit of Quantification.

STABILITY STUDY DATA			
Manufacturer of API	Name: Shanku's Pharmaceuticals Address: Plot No 9, 10, 11 Milan Industrial Estate, Santej, Ta: Kalol, Dist: Gandhinagar – 382721, Gujrat, India.		
API Lot No.	AGM2.t004		
Description of Pack (Container closure system)	Alu-Alu blisters, each containing Yellow color, round biconvex film coated tablets, having breaking line on upper side & lower side is plain. One side of blister is printed with labeling specification. After primary packing blister is packed in specific hard card unit carton along with Patient information leaflet		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Manufacturing Date	01-2021	01-2021	01-2021
Date of Initiation	27-02-2021	27-02-2021	27-02-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted copy of Last inspection Report conducted on 24/01/2018 (Daclatasvir), 06/03/2017 (Sofosbuvir)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Food and drug control administration Gandhinagar,Gujarat State to Shanku's Pharmaceuticals India valid till 24/08/2022
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.12259/2020/DRAP-AD-G(I&E) dated 31/08/2020 is submitted wherein the permission to import API Agomelatin for the purpose of test/analysis and stability studies is granted. AD Attested invoice E-053/2020-22 Dated.18/11/2020 is also submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2. S.7	Title of long-term stability sheets mentioned that the storage condition was 30°C ±2°C /RH 65%±5%RH, while the conclusion of all three stability batches specified that drug substance was kept at 30°C ±2°C /RH 60%±5%RH, clarification is required in this regard.	Firm replied that, upon query, it is informed by API Manufacturer that there is a typo error in conclusion of stability batches while the conditions for stability testing were 30°C ±2°C/RH65%±5% RH. Firm submitted the revised stability data sheet of all three batches of drug substance.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Mirab (Mirabegron) Extended release Tablets 25mg & 50mg on 12th December, 2017. Further, the said panel inspection report was discussed in 277th Drug Registration Board meeting held on 27 – 29th December, 2017. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.

	Dy. No. and date of submission	Dy. No. 32361 dated 26/11/2021
	Details of fee submitted	PKR 30,000/-: dated 26/11/2021
	The proposed proprietary name / brand name	Olaxetine 6mg + 25mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Olanzapine USP….6mg Fluoxetine Hydrochloride USP equivalent to Fluoxetine……25mg
	Pharmaceutical form of applied drug	Hard gelatin capsule with blue opaque cap and yellow opaque body containing yellow powder.
	Pharmacotherapeutic Group of (API)	Antidepressant
	Reference to Finished product specifications	USP specs.
	Proposed Pack size	10’s, 14’s, 20’s & 30’s
	Proposed unit price	Rs. 470/- (10’s) Rs. 660/- (14’s) Rs. 900/- (20’s) Rs. 1290/- (30’s)
	The status in reference regulatory authorities	SYMBYAX Capsules 6mg + 25mg by M/s Lilly USA, LLC, USA, USFDA Approved.
	For generic drugs (me-too status)	Co-Depricap Capsule 6mg + 25mg by M/s NABIQASIM Industries (Pvt.) Ltd., Karachi. (Reg. No.: 076135)
	GMP status of the Finished product manufacturer	Last GMP Inspection dated 03-12-2021 concludes that M/s Getz Pharma Pvt. Ltd. is considered to be operating at an acceptable level of compliance of GMP requirements. Capsule (General) section approved.
	Name and address of API manufacturer.	<u>Olanzapine:</u> M/s CADILA PHARMACEUTICALS LIMITED. 3203, G.I.D.C Estate, Ankleshwar - 393 002, District Bharuch, INDIA, <u>Fluoxetine HCl:</u> M/S SATYADIVIS PHARMACEUTICAL PVT.LTD INDIA Survey No. 10, I.D.A, Khazipally, Gaddapotaram (V), Jinnaram (M) Sangareddy Dist.,502319 India

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Olanzapine: Official monograph of Olanzapine is present in USP. Firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Fluoxetine HCl: Official monograph of Fluoxetine HCl is present in USP. Firm has submitted detail of nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Olanzapine: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 18 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (18OLZ012, 180LZ013, 180LZ014) Fluoxetine HCl: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (FLU/001/15, FLU/002/15, FLU/003/15)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against SYMBYAX Capsules 6mg + 25mg by M/s Lilly USA, LLC, USA, by performing quality tests (Appearance, Average weight, Assay and Dissolution). CDP has been performed against the same brand that is SYMBYAX Capsules 6mg + 25mg by M/s Lilly USA, LLC, USA, in Acidic media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The APIs are releasing more than 85% in 15min, therefore, f2 value calculation is not applicable.
	Analytical method validation/verification of product	Method verification studies have submitted including, system suitability, specificity, linearity, accuracy, precision repeatability, Stability of solution and range.

Batch Size	3000 Capsules	3000 Capsules	3000 Capsules
Manufacturing Date	23-11-2020	23-11-2020	23-11-2020
Date of Initiation	07-12-2020	07-12-2020	07-12-2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Mirab (Mirabegron) Extended release Tablets 25mg & 50mg on 12th December, 2017. Further, the said panel inspection report was discussed in 277th Drug Registration Board meeting held on 27 – 29th December, 2017. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	<u>Olanzapine:</u> Firm has submitted copy of Good Manufacturing Practices Certificate (GMP) issued by Food & Drugs Control administration (Gujrat State) India valid till 30-08-2024. <u>Fluoxetine:</u> Firm has submitted copy of Good Manufacturing Practices Certificate (GMP) issued by Drugs Control Administration (Telangana State) India valid till 21-01-2023.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Vonoprazan Fumarate: Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies & Comparative Dissolution Profile studies against the reference product of Takecab 20 Tablets, in three dissolution mediums has been submitted with acceptable level of f2 results.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted audit trail reports on product testing.

6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator:

Initially firm submitted the data of applied product in which API manufacturer was M/s. *Beijing THTD Pharmaceuticals Technology CO., Ltd. Floor 2nd, No.1 Building, No.29Qingfeng West Road, Zhongguancun Science Park, Daxing, Beijing, China*, while the copy of GMP certificate submitted was of *M/s. Hefei Lifeon Pharmaceuticals co. Ltd. Tangkou Road and Qingluan Road Intersection, Economic and Technological Development ZoneWenqu Road No.446 High Tech Zone Hefei*.Dossier has been submitted with Dy.no. 16359 dated 14-06-2021 and fee of Rs.20,000/- dated 03-07-2021. Now, Firm submitted the new data in which the drug substance has been procured from M/s. Jiangxi Synergy Pharmaceutical Co., Ltd., Jiangxi Fengxin Industrial park, Fengxin 330700, Jiangxi Province, P. R China vide invoice no. JXSG220162 dated 31-01-2022 attested by DRAP Karachi.New data has been submitted without any fee.

Decision: Approved. Firm shall submit full fee of registration i.e., Rs. 30,000 for submission of revised stability data, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DEFERRED CASE OF PREVIOUS MEETING:

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	NA

Remarks OF Evaluator:

Sr.no.	Observations/Shortcomings	Reply of the Firm
1.	Scientific justification for using an entirely different formula for calculation of assay results of drug substance from that specified in USP monograph.	Firm has replied that "Meropenem for Injection is a sterile mixture of Meropenem & Sodium Carbonate which is received in bulk form in sterile sealed containers. The formula given in USP is for single dose container and the one used by the firm is for the analysis and release of bulk raw material received in sterile containers which are further dispensed into single dose containers seeing release potency of relevant lot.
2.	Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer.	Initially firm replied that "since Meropenem for Injection is received as a ready to fill sterile material and as no further compounding/processing is involved therein the material, so bulk raw material is released for filling based on seeing satisfactory test results of Sodium Content from the CoA of Manufacturer". Later firm submitted the response that the test for Content of Sodium foreseen by USP has been performed through titrimetric analysis of Sodium Carbonate content, as the only source of Sodium in Meropenem for Injection (Sterile Bulk) is due to the presence of Sodium Carbonate and procedure for the determination has been attached for reference. However as per USP test for sodium content should be performed on atomic absorption spectrophotometer.
3.	The USP monograph under the assay method specifies that sample	Firm replied that "in practice, test samples are kept on hold for 2hrs before injecting into

	should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph.	chromatograph, the specific step was missing in analytical procedure and has been added again considering USP Specifications".
4.	Which diluent has been used for the preparation of sample and standard solution. The statement mentioned in sample and standard preparation that "make up the volume with same diluent" did not clarify the type of diluent.	Firm replied that "by same diluent means, the diluent which is being initially taken for dissolving the weighed quantity for standard and sample preparation".
5.	Justify the flow rate of 1.0ml/min as mentioned in the method verification studies for the assay test of drug substance, since USP recommends flow rate to be 1.5ml/min.	The adjustment in flow rate (1.5ml/min) to obtain retention time between 6.0 – 8.0minute was done as per the recommendation of USP. Adjustment in flow rate has been there till USP 42 (NF37), (*Copy of monograph is attached as Annex-I*). This study was also performed seeking guidance from USP monograph on *Chromatography (621), System Suitability, under Flow rate*, where for only Isocratic Elution it is stated that an adjustment can be made in flow rate up to ±50%.
6.	Justify the test of specificity under the verification studies of the drug substance in which you have calculated the percentage of recovery, while as per the ICH guidance "*For chromatographic procedures, representative chromatograms should be used to demonstrate specificity and individual components should be appropriately labelled".* Justify how this test is considered to be the test of specificity in the light of scientific guidelines.	Firm has replied that "For specificity in method verification, we used previously spiked sample solution, where the peak purity (unaffectedness of main analyte) has been demonstrated through recovery method. The recovery was performed just to check the disparity (if any) in the peak area of main analyte in sample solution with respect to working standard solution. The concentration of standard and sample solutions was kept same so that we can determine peak purity through ratio of peak areas. The peak purity (average recovery) of main analyte observed during specificity was around 99%.
7.	Provide the data along with the raw data sheet reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.	Raw data has been submitted reflecting the reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.
8.	Scientific justification for not performing the test of sodium content for the analysis of the drug substance.	Since Meropenem for Injection is received as a ready to fill sterile material and as no further compounding/processing is involved therein the material, so bulk raw material is released for filling based on seeing satisfactory test results of Sodium Content from the CoA of Manufacturer. Later firm submitted the response that the test for Content of Sodium foreseen by USP has been performed through titrimetric analysis of Sodium Carbonate content, as the only source of Sodium in Meropenem for Injection (Sterile Bulk) is due to the presence of Sodium Carbonate and procedure for the determination has been attached for reference.

		However as per USP test for sodium content should be performed on atomic absorption spectrophotometer.
9.	Compatibility Compatibility studies for the dry powder for injections with its diluent shall be performed as per the instructions provided in individual label of the drug product.	Compatibility Studies data of Sterile Meropenem for injection with its Diluent (Sterilized Water for Injection) has been submitted and were performed on single reconstituted vial stored in refrigerator (2-8°C) up to 24hrs.
10.	Manufacturing Process Development Process validation and/or evaluation Justify how 1382mg of meropenem as trihydrate blended with sodium carbonate contains 1000mg of meropenem.	The fill weight, 1382mg, is with respect to release potency of lot used in the batch along-with overage. Scientific justification of using of overage of active ingredient has not been provided by the firm.
11.	Justify the weight variation limit ±10% along with the pharmacopoeial reference.	The weight variation limit, ±10%, for powder for parenteral preparation (single dose) has been adopted from British Pharmacopoeia, *Appendix XII C. Consistency of Formulated Preparations, Uniformity of Weight (Mass).*
12.	Control of Drug Product Specification Justify why the test of content of sodium is not included in the specifications of drug product.	Firm has submitted that the meropenem for Injection is received as a ready to fill sterile material which is further dispensed into single dose containers (under aseptic conditions) based on release potency of the relevant lot. So, in this case, the test parameters which are previously performed on bulk raw material are also performed on filled vials with few additional tests required for filled vials. The bulk material is released based on satisfactory test results of Sodium Content from the CoA of Manufacturer.
13.	As per the provided procedure of performing assay, content of vial has been reconstituted in distilled water clarification is required that either the prescribed diluent for reconstitution of meropenem injection is distilled water.	Firm has replied that "For analysis, the diluent for reconstitution of meropenem for injection is distilled water which is actually purified water meeting the requirement of test parameters mentioned in USP pharmacopeia. Whereas for parenteral administration, the prescribed diluent is sterilized water for injection (10ml ampoule), which is packed in the carton". However, as per USP
14.	As per the provided procedure of performing assay, content of vial has been reconstituted in distilled water clarification is required that either the prescribed diluent for reconstitution of meropenem injection is distilled water.	Firm has submitted the reply that "For analysis, the diluent for reconstitution of meropenem for injection is distilled water which is actually purified water meeting the requirement of test parameters mentioned in USP pharmacopeia. Whereas for parenteral administration, the prescribed diluent is sterilized water for injection (10ml ampoule), which is packed in the carton."
15.	The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph.	Firm has submitted the reply that "*In practice, test samples are kept on hold for 2hrs before injecting into chromatograph, the specific step was missing in analytical procedure and has been added again considering USP Specifications."*

16.	Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer.	Firm has submitted the reply that "*In case of filled product, for sodium content, we follow the released bulk raw material which is released for filling based on seeing satisfactory test results of Sodium Content from the CoA of Manufacturer*".
17.	Reference Standards or Materials Provide COA of primary / secondary reference standard including source and lot number.	Firm has submitted the COA of working standard of ICI Pakistan Ltd. of Meropenem with sodium carbonate having assay limit of NLT 78% calculated on dried basis standardized against USP reference standard of meropenem.
18.	Following data has not been provided along with the stability data: • Reference of previous approval of applications with stability study data of the firm (if any) • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing	• Firm has submitted Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Reference of previous approval of applications with stability study data of the firm (if any) (when the name of Manufacturer was M/s. Cirin Pharmaceuticals (Pvt.) Ltd., Hattar KPK). • Firm has submitted the audit trail report of merpen injection while applied product is Mepronam Injection.

Decision of 316th meeting of Registration Board:

- Justification of submitted fill weight per vial with reference to the actual sodium content in the drug substance.
- Evidence of purchase of Atomic absorption spectrophotometer along with Installation Qualification (IQ) and Operational Qualification (OQ) reports as well as performance data for sodium content test as per USP monograph on upcoming commercial batch of product already registered on contract manufacturing.

Response of the Firm:

Justification of submitted fill weight per vial with reference to the actual sodium content in the drug substance. Firm submitted the calculation of filled weight per vial and according to the document filled weight per vial is calculated by using actual potency of meropenem (on as basis) and the formula used was *Fill Weight Calculation (Per vial): Label Claim x 100/Actual Potency*.Filled weight per vial should be 1382mg for 1000mg strength.

Evidence of purchase of Atomic absorption spectrophotometer along with Installation Qualification (IQ) and Operational Qualification (OQ) reports as well as performance data for sodium content test as per USP monograph on upcoming commercial batch of product already registered on contract manufacturing.
Firm has submitted the invoice number SL1 108293 dated 17-07-2022 as an evidence of purchase of atomic absorption spectrophotometer. Firm submitted the Installation Qualification (IQ) and Operational Qualification (OQ) reports and performance data of sodium content test of two commercial batches which are already registered on contract manufacturing with ICI Hattar. Data of Batch no. 2C471, 2C474 has submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

		Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (MT110204, MT110301, MT110302)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is MERONEM INJECTION TM IV 500mg Pfizer Pakistan Limited by performing quality tests (Identification, Assay, Sterility, BET, Impurity, and Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including Specificity, Accuracy, Repeatability, Linearity and Range

STABILITY STUDY DATA			
Manufacturer of API	SHENZHEN HAIBIN PHARMACEUTICAL CO., LTD. Add: 2003 Shenyan Road, 518081 Shenzhen Yantian District, Guangdong, P.R. China.		
API Lot No.	612-6878R		
Description of Pack (Container closure system)	15cc clean transparent tubular glass vial with dark blue flip off seal. Rubber Stopper 20mm		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)

Date of Initiation	12-01-2017	13-01-2017	26-01-2017
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. GD20190927 issued by CFDA valid till 03/01/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of ADC attested invoice HBINV16187 dated 2-12-2016
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted the audit trail report of merpen injection while applied product is Mepronam Injection.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr.no	Observations/Shortcomings	Reply of the Firm
1.	Scientific justification for using an entirely different formula for calculation of assay results of drug substance from that specified in USP monograph.	Firm has replied that "Meropenem for Injection is a sterile mixture of Meropenem & Sodium Carbonate which is received in bulk form in sterile sealed containers. The formula given in USP is for single dose container and the one used by the firm is for the analysis and release of bulk raw material received in sterile containers which are further dispensed into single dose containers seeing release potency of relevant lot.
2.	Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer.	Initially firm replied that "since Meropenem for Injection is received as a ready to fill sterile material and as no further compounding/processing is involved therein the material, so bulk raw material is released for filling based on seeing satisfactory test results of Sodium Content from the CoA of Manufacturer". Later firm submitted the response that the test for Content of Sodium foreseen by USP has been performed through titrimetric analysis of Sodium Carbonate content, as the only source of Sodium in Meropenem for Injection (Sterile Bulk) is due to the presence of Sodium Carbonate and procedure for the determination has been attached for reference. However as per USP test for sodium content should be performed on atomic absorption spectrophotometer.
3.	The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph.	Firm replied that "in practice, test samples are kept on hold for 2hrs before injecting into chromatograph, the specific step was missing in analytical procedure and has been added again considering USP Specifications".
4.	Which diluent has been used for the preparation of sample and standard solution. The statement mentioned in sample and standard preparation that "make up the volume with same diluent" did not clarify the type of diluent.	Firm replied that "by same diluent means, the diluent which is being initially taken for dissolving the weighed quantity for standard and sample preparation".
5.	Validation of analytical procedures Justify the flow rate of 1.0ml/min as mentioned in the method verification studies for the assay test of drug substance, since USP recommends flow rate to be 1.5ml/min.	The adjustment in flow rate (1.5ml/min) to obtain retention time between 6.0 – 8.0minute was done as per the recommendation of USP. Adjustment in flow rate has been there till USP 42 (NF37), (*Copy of monograph is attached as Annex-I*). This study was also performed seeking guidance from USP monograph on *Chromatography (621), System Suitability, under Flow rate*, where for only Isocratic Elution it is stated that an adjustment can be made in flow rate up to ±50%.
6.	Justify the test of specificity under the verification studies of the drug substance in which you have calculated the percentage of recovery, while as per the ICH guidance "*For chromatographic procedures, representative chromatograms should be used to demonstrate specificity and*	Firm has replied that "For specificity in method verification, we used previously spiked sample solution, where the peak purity (unaffectedness of main analyte) has been demonstrated through recovery method. The recovery was performed just to check the disparity (if any) in the peak area of main analyte in sample solution with respect to working standard solution. The concentration of standard and sample solutions was kept same so that we can determine peak purity through

	individual components should be appropriately labelled". Justify how this test is considered to be the test of specificity in the light of scientific guidelines.	ratio of peak areas. The peak purity (average recovery) of main analyte observed during specificity was around 99%.
7.	Provide the data along with the raw data sheet reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.	Raw data has been submitted reflecting the reflecting the sample, standard and placebo preparation procedure for performance of precision, specificity and accuracy parameters.
8.	Scientific justification for not performing the test of sodium content for the analysis of the drug substance.	Since Meropenem for Injection is received as a ready to fill sterile material and as no further compounding/processing is involved therein the material, so bulk raw material is released for filling based on seeing satisfactory test results of Sodium Content from the CoA of Manufacturer. Later firm submitted the response that the test for Content of Sodium foreseen by USP has been performed through titrimetric analysis of Sodium Carbonate content, as the only source of Sodium in Meropenem for Injection (Sterile Bulk) is due to the presence of Sodium Carbonate and procedure for the determination has been attached for reference. However as per USP test for sodium content should be performed on atomic absorption spectrophotometer.
9.	Compatibility studies for the dry powder for injections with its diluent shall be performed as per the instructions provided in individual label of the drug product.	Compatibility Studies data of Sterile Meropenem for injection with its Diluent (Sterilized Water for Injection) has been submitted and were performed on single reconstituted vial stored in refrigerator (2-8°C) upto 24hrs.
10.	Manufacturing Process Development Process validation and/or evaluation Justify how 710mg of meropenem as trihydrate blended with sodium carbonate contains 500mg of meropenem.	The fill weight, 710mg, is with respect to release potency of lot used in the batch along-with overage. Scientific justification of using of overage of active ingredient has not been provided by the firm.
11.	Justify the weight variation limit ±10% along with the pharmacopeial reference.	The weight variation limit, ±10%, for powder for parenteral preparation (single dose) has been adopted from British Pharmacopoeia, *Appendix XII C. Consistency of Formulated Preparations, Uniformity of Weight (Mass).*
12.	As per the filled BMR of trial batches the weight variation has been ranges from 677.67mg to 705.33 mg and objective fill weight was 691. 5mg.Clarification is required regarding the variation in specification of filled weight in different sections of CTD.	Firm has submitted the reply that "*Trial batch was filled in Jan-2017 without any overage with stringent fill weight in order to make assessment of process related critical attributes".*
13.	Control of Drug Product Specification Justify why the test of content of sodium is not included in the specifications of drug product.	Firm has submitted that the meropenem for Injection is received as a ready to fill sterile material which is further dispensed into single dose containers (under aseptic conditions) based on release potency of the relevant lot. So, in this case, the test parameters which are previously performed on bulk raw material are also performed on filled vials with few additional tests required for filled vials. The bulk material is released based on satisfactory test results of Sodium Content from the CoA of Manufacturer.

14.	As per the provided procedure of performing assay, content of vial has been reconstituted in distilled water clarification is required that either the prescribed diluent for reconstitution of meropenem injection is distilled water.	Firm has replied that "For analysis, the diluent for reconstitution of meropenem for injection is distilled water which is actually purified water meeting the requirement of test parameters mentioned in USP pharmacopeia. Whereas for parenteral administration, the prescribed diluent is sterilized water for injection (10ml ampoule), which is packed in the carton".
15.	As per the provided procedure of performing assay, content of vial has been reconstituted in distilled water clarification is required that either the prescribed diluent for reconstitution of meropenem injection is distilled water.	Firm has submitted the reply that "For analysis, the diluent for reconstitution of meropenem for injection is distilled water which is actually purified water meeting the requirement of test parameters mentioned in USP pharmacopeia. Whereas for parenteral administration, the prescribed diluent is sterilized water for injection (10ml ampoule), which is packed in the carton."
16.	The USP monograph under the assay method specifies that sample should be hold for 1-2 hours at 25± 1°C before testing, while your method does not mention the same. Justify how your method could be considered as complying with USP monograph.	Firm has submitted the reply that "*In practice, test samples are kept on hold for 2hrs before injecting into chromatograph, the specific step was missing in analytical procedure and has been added again considering USP Specifications."*
17.	Provide the detailed procedure used for determination of content of sodium as per USP along with the evidence of availability of atomic absorption spectrophotometer.	Firm has submitted the reply that "*In case of filled product, for sodium content, we follow the released bulk raw material which is released for filling based on seeing satisfactory test results of Sodium Content from the CoA of Manufacturer*".
18.	Reference Standards or Materials Provide COA of primary / secondary reference standard including source and lot number.	Firm has submitted the COA of working standard of ICI Pakistan Ltd. of Meropenem with sodium carbonate having assay limit of NLT 78% calculated on dried basis standardized against USP reference standard of meropenem.
19.	Following data has not been provided along with the stability data: • Reference of previous approval of applications with stability study data of the firm (if any) • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing	• Firm has submitted Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Reference of previous approval of applications with stability study data of the firm (if any) (when the name of Manufacturer was M/s. Cirin Pharmaceuticals (Pvt.) Ltd., Hattar KPK).

Decision of 316th meeting of Registration Board:

- Justification of submitted fill weight per vial with reference to the actual sodium content in the drug substance.
- Evidence of purchase of Atomic absorption spectrophotometer alongwith Installation Qualification (IQ) and Operational Qualification (OQ) reports as well as performance data for sodium content test as per USP monograph on upcoming commercial batch of product already registered on contract manufacturing.

Response of the Firm:

Justification of submitted filled weight per vial with reference to the actual sodium content in the drug substance.

Firm submitted the calculation of filled weight per vial and according to the document filled weight per vial is calculated by using actual potency of meropenem (on as basis) and the formula used was *Fill Weight*

Calculation (Per vial): Label Claim x 100/Actual Potency. Filled weight per vial should be 691.5mg for 500mg strength. Evidence of purchase of Atomic absorption spectrophotometer alongwith Installation Qualification (IQ) and Operational Qualification (OQ) reports as well as performance data for sodium content test as per USP monograph on upcoming commercial batch of product already registered on contract manufacturing. Firm has submitted the invoice number SL1 108293 dated 17-07-2022 as an evidence of purchase of atomic absorption spectrophotometer. Firm submitted the Installation Qualification (IQ) and Operational Qualification (OQ) reports and performance data of sodium content test of two commercial batches which are already registered on contract manufacturing with ICI Hattar. Data of Batch no. 2H862, 2H871 has submitted.
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Stability Cases:

66.	Name and address of manufacturer / Applicant	M/s. Winthrox Laboratories K-219-A,Phase II,S.I.T.E., Super Highway, Karachi
	Brand Name +Dosage Form + Strength	Winnac Fort Eye Drop (Nepafenac 3mg/ml)
	Composition	Each ml contains: Nepafenac…..3mg (Pack size 5ml)
	Diary No. Date of R& I & fee	Dy.No.17893 dated 15-05-2018 Rs. 20,000/- 14-05-2018
	Pharmacological Group	NSAID
	Type of Form	Form 5
	Finished product Specifications	Manufacturers specification
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulator Authorities	USFDA (Nepafenac ophthalmic suspension, 0.3%, topical ophthalmic, Each mL of Nepafenac ophthalmic suspension, 0.3% contains 3 mg of nepafenac 1.7ml in a 4ml bottle.)
	Me-too status	Ilevro Eye drops (suspension) , pack size: 3ml of M/s. Novartis registered in 278th meeting ,Reg. no. 095874.
	GMP status	19-11-2020 Routine GMP Inspection "overall GMP compliance level is rated as good."

- REMARKS OF EVALUATOR

Sr.no.	Shortcoming/Deficiencies	Reply of Firm
1.	Submit reference of previous approval of applications with stability study data of the firm (if available)	Not submitted
2.	Provide certificate of Analysis of API from API Manufacturer, since the COA of API from finished product manufacturer has only submitted with the dossier.	Submitted
3.	Provide method used for analysis of API from API Manufacturer.	Submitted
4.	Submit stability study data of API from API manufacturer	Firm submitted the stability data of 24months, while the stability study duration is of 24months asper the submitted stability summary sheet.
5.	Submit approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate for M/s.Flax Laboratories (756096), Plot No. B-29/1, MIDC Mahad,Village Birwadi,Mahad,Dist. Rigad,India issued by Food and Drug Adminstration Maharashtra issued on 13-01-2021 and, valid till 12-01-2022.
6.	Provide documents for the procurement of API with approval from DRAP (in case of import).	Copy of Commercial Invoice no. AE/19/0436 Dated: 20-01-2020 from M/s.Flax Laboratories (756096), Plot No. B-29/1, MIDC Mahad,Village Birwadi,Mahad,Dist. Rigad, India attested by AD DRAP (Karachi) dated ; 26-02-2020 for Nepafenac Micronized & Sterilized batch no. PSS/1912042.
7.	Provide protocols followed for conduction of stability study	Submitted
8.	Complete batch manufacturing record of three stability batches, since stability data of trial batch T-03 has only been submitted.	Firm submitted the complete BMR of trial batches T-03,T-04 & T-05.

9.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
10.	Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing, certificate of compliance from shimadzu corporation did not fulfill the requirement.	Audit trail of instant product has not been submitted.
11.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). Record of temperature and humidity with time and date.	Submitted
12.	Scientific justification is required for setting the pH criteria 7.2-7.7 as specified in the BMR, since the innovator product mentioned that the pH of ophthalmic suspension should be approx. 6.8. Further, the limit of pH mentioned in the specification of product is 6.7-7.6.	Firm stated that we have revised the pH range i.e. 6.7-7.6 in BMR as per the finished product specification of winnac forte eye drop.
13.	Justification is required for using high quantity of Benzalkonium Chloride i.e. 0.1mg/ml, since the innovator product contains 0.05mg of Benzalkonium chloride per ml of ophthalmic suspension.	Firm submitted the reply in which it is stated that due to typographical error we have mentioned 0.1mg/ml of Benzalkonium Chloride instead of 0.05mg /ml
14.	Justify why the test of osmolality, resuspendability, viscosity and Bacterial endotoxin test has not performed/included in the batch release specification of finished product.	Firm submitted the revised batch analysis report in which the test of osmolality, resuspendability, viscosity and Bacterial endotoxin test has been included.

Decision: Approved. Registration letter shall be issued after submission of following documents:

- **Pharmaceutical equivalence report, performed against the innovator product/reference product.**
- **Water loss study of drug product, since the primary container of drug product is LDPE bottles.**
- **Preservative efficacy test of drug product, since the formulation contains Benzalkonium chloride as a preservative.**

PREVIOUSLY DEFERRED CASES OF Form-5

67.	**Name and address of manufacturer / Applicant**	**Bryon Pharmaceuticals (Pvt.) Ltd. 48-Hayatabad Industrial Estate, Peshawar**

Case 01; Registration applications of locally manufactured New License / New Section on form 5F.

Firm has submitted copy of Acknowledgment of receipt of application for grant of DML by way of formulation to M/s Nagarsons Pharmaceuticals dated 19-02-2021 from Secretary Central Licensing Board. The letter specifies that CLB in its 278th meeting held on 10th and 11th December 2020 has approved the grant of DML in the name of M/s Nagarsons Pharmaceuticals for following sections:

1. Tablet (General)
2. Tablet (Psychotropic)
3. Capsule (General)
4. Cream /ointment/Lotion/Gel

This is their first application in the Cream /ointment/Lotion/Gel section.

69.	Name, address of Applicant / Marketing Authorization Holder	Nagarsons Pharmaceuticals (Pvt.) Ltd., Plot No. 34, Street No NS-2, National Industrial Zone Rawat, Islamabad.
	Name, address of Manufacturing site.	Nagarsons Pharmaceuticals (Pvt.) Ltd., Plot No. 34, Street No NS-2, National Industrial Zone Rawat, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Name and address of API manufacturer.	M/S Saptagir Laboratories (Pvt.) Ltd., Sy. No. Parts of 27, 46 & 50 to 56, 502247 Ananthasagar (Vill.), Chegunta (Mandal), Medak (Distt.) Telangana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Terbinafine as hydrochloride is present in USP. Firm has submitted detail of nomenclature, structure, general properties, solubilities, manufacturers, description of manufacturing process and controls, Characterization, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies (Drug substance)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (TH0131216, TH0141216 & TH0151216)
	Module-III (Drug Product):	The firm has submitted detail of description, composition, pharmaceutical development, manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Limisil 1% cream by Novartis pharma by performing quality tests (Identification, minimum fill & Assay).
	Analytical method validation/verification of product	Method verification studies have been submitted including accuracy, precision, repeatability, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/S Saptagir Laboratories Pvt Ltd. Sy. No. Parts of 27,46 & 50 to 56, Ananthasagar (Vill.), Chegunta (Mandal), Medak (Distt). Telangana, India.		
API Lot No.	TH0180421		
Description of Pack (Container closure system)	White or almost white cream packed in collapsible Aluminum Tube with polyethylene Screw packed in unit carton (10 gram)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	500 tubes	500 tubes	500 tubes
Manufacturing Date	10-2021	10-2021	10-2021

Date of Initiation	05-10-2021.	05-10-2021.	05-10-2021.
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document. They further submitted that we are newly granted DML holder hence no such inspection has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate dated 01-03-2021 in the name of M/S Saptagir Laboratories Pvt Ltd. Sy. No. Parts of 27,46 & 50 to 56, Ananthasagar (V), Chegunta (M), Medak (Distt). Telangana, India issued by the Drug Control Administration Government of Telangana, India. The certificate is unsigned and it is written on it that this document is digitally signed. Signature is not required. Validity; 01-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice (invoice# 2122/SL/033 dated 21-07-2021) for terbinafine hydrochloride USP B. No. TH180421 with quantity of 25kg attested by Assistant Director I&E, DRAP, Islamabad dated 15-09-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.7	This section has mentioned oral route of administration. Clarification shall be submitted.	Firm has submitted that route of administration is topical.
2.	1.6.5	Signed and valid GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate dated 01-03-2021 in the name of M/S Saptagir Laboratories Pvt Ltd. Sy. No. Parts of 27,46 & 50 to 56, Ananthasagar (V), Chegunta (M), Medak (Distt). Telangana, India issued by the Drug Control Administration Government of Telangana, India. The certificate is unsigned and it is written on it that this document is digitally signed. Signature is not required. Validity; 01-03-2022. ***Valid copy of the GMP certificate of the drug substance is not submitted by the applicant.***
3.	2.3	Table for literature references has mentioned USP and BP monograph for the drug product. Clarification is required.	Firm has submitted that drug product monograph is available in JP only. ***However, no revised table for literature references is submitted by the applicant.***
4.	2.3.R	Complete batch manufacturing record for the stability batches along	***Not submitted by the applicant.***

		with blank production document shall be submitted.	
5.	3.2.S.4.1	Specifications for the drug substance by the finished product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.2	Analytical procedures for the drug substance by the finished product manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.3	Verification studies of the drug substance by the finished product manufacturer shall be submitted.	Submitted.
8.	3.2.S.7.3	Assay test has not been provided in the stability studies of the drug substance. Clarification shall be submitted.	Firm has stated that stability studies always include assay test and assay test is already mentioned in the submitted stability studies. ***However, in the submitted stability studies of the drug substance there is no assay test.***
9.	3.2.P.2.2	This section is mentioned for immediate release tablets. Clarification is required.	Firm has submitted that development of formulation of terbinag 1% cream is based on the detailed review and characterization of the reference product Lamisil 1% cream of GSK having FDA number 020980.
10.	3.2.P.5.3	Only three parameters of the validation of the finished product are submitted. Clarification shall be submitted for not conducting robustness and linearity in the validation of the finished product	Firm has submitted that verification studies of compendial methods do not require robustness and linearity studies.
11.	3.2.P.5.4	Batch analysis of the finished product by the finished product manufacturer shall be submitted.	Firm has submitted that batch analysis has already been submitted in the dossier. COA s were not provided in section 3.2p5.4 titled "Batch analysis", whereas in stability studies data analytical record of all time points including initial time point was submitted.
12.	3.2.P.8.1	Stability data sheets shall be as per format approved by the Registration Board with API lot number and total quantity of the finished product.	Firm has only provided the API lot number (TH0180421) and batch size 500 tubes.
13.	3.2.P.8.3	• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Firm has submitted that we have performed stability studies using UV and HPLC equipments present in our QC lab. The QC lab have been visited by the panel of inspectors for the grant of DML based on satisfactory performance of these equipments. They further submitted that their HPLC system is not 21 CFR compliant, but they have maintained all log and records using manual logbooks as per the GMP requirements Firm has submitted that the digital data logger's data is already submitted in in other CTD applications of our firm. Since we are new DML and we have placed all products on stability studies in consecutive months therefore, the same data is applicable for all products.

Decision: Approved. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Firm will also submit Valid copy of the GMP certificate of the drug substance manufacturer, stability studies for the drug substance including assay test and COA's of all the three trial batches by the finished product manufacturer.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case 02; Registration applications of locally manufactured (Human) drugs on Form 5F.

GMP certificate No.2020002 dated 12-03-2020 in the name of M/s Jiangxi Synergy Pharmaceutical Co. Ltd., Jiangxi Fengxin Industrial Park, Fengxin

		330700, Jiangxi Province, P.R. China issued by Jiangxi API engineering technology research Centre valid till 11-03-2025.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for related substances, specifications, analytical procedures and its validation, batch analyses and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 12 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (20190801BD, 20190802BD, 20190803BD)
	Module-III (Drug Product):	The firm has submitted detail of description, composition, pharmaceutical development, manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Takecab Tablets 10 mg by Takeda Pharmaceutical Company Limited by performing quality tests (Identification, Disintegration, Dissolution & Assay). CDP has been performed against the same brand that is Takecab Tablets 10 mg by Takeda Pharmaceutical Company Limited in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have been submitted including linearity, range, accuracy, precision, specificity.
STABILITY STUDY DATA		
Manufacturer of API		Jiangxi Synergy Pharmaceutical Co., Ltd.
API Lot No.		20190802BD
Description of Pack (Container closure system)		Primary Container: 10 tablets are packed in Alu-Alu Foil Secondary Container:

	1 blister of Alu-Alu Foil containing 10 film-coated tablets, packed in a printed carton along with a leaflet.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Administrative Portion

	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Valsac 24mg/26 mg Tablets, Valsac 49mg/51 mg Tablets, Valsac 97mg/103 mg Tablets" which was conducted on 10-03-2020, and was presented in 295th meeting of Registration Board (8-11 June, 2020). Following observations were reported in the report: • The HPLC software is 21CFR Compliant. \ • Audit trail reports were available and physically checked Firm has adequate monitoring and controls for stability chambers
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP for M/s Jiangxi Synergy Pharmaceutical Co., Ltd. Issued by Jiangxi API Engineering Technology Research Center valid upto 11-03-2025.
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice (invoice# JXSG200352) cleared by DRAP Peshawar Office, Pakistan dated 08-04-2020 specifying import 0.4 Kg (Batch# 20190802BD, Mfg. date 05-08-2019).
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

	section	Observations	Response by the firm
	1.3.4	Valid copy of Drug Manufacturing License of finished product manufacturer shall be submitted.	Firm has submitted copy of Drug Manufacturing license w.e.f. 27-10-2020.

	3.2.S.4.2	Injection volume in the assay test of the drug substance provided by the finished product manufacturer is 20µl while that of the drug substance manufacturer is 10 µl. clarify?	Firm has submitted that injection volume of 20µl is selected for analysis due to fixed loop of 20µl in manual rheodyne of HPLC. The same procedure with 20µl is validated in the submitted data.
	3.2.P.2	Justify the qualitative composition of the applied formulation with innovator product.	Firm has submitted that composition of P-Cab 10mg tablets is according to the composition of the innovator's product "Takecab 10mg" and also provided following link; https://www.pmda.go.jp/files/000211075.pdf composition of the applied formulation is same as per innovator product.
		Provide scientific rationale for selection of dissolution parameters including type of apparatus, rpm, dissolution medium, sampling time and the analytical method.	Firm has submitted that Vonoprazan is highly soluble drug substance based on ICH Q6A, which states that the drug substance should be considered highly soluble if it meets the following two conditions; The dissolution profile of all strengths of the dosage form should be rapid i.e. dissolution >80% in 15 minutes at pH 1.2, 4.0 & 6.8. The highest drug product's strength is soluble in 250ml or less of aqueous media over the pH range of 1.2 to 6.8 at 37 ºC ± 1 ºC. As per ICH Q6A, for dosage forms having drug substances falls in above conditions will be considered as highly soluble drugs and do not require development of discriminatory dissolution method/parameter. Generally, a single time point with one medium is acceptable. Comparative dissolution study by Genome the "P-Cab tablets" against the Innovator Product 'Takecab Tablets' Vonoprazan release more than 85% in all three mediums within 15minutes at 50 RPM. Also, the solubility of Vonoprazan is very high throughout the physiological pH range (1.2 to 6.8). The lowest solubility of Vonoprazan is found to be in pH 6.8 as compared to solubility in pH 1.2 (about 16.5mg/ml) & pH 4.5 (8.1mg/ml) i.e. is about 4.7 mg/ml which is greater than the highest strength divided by 250 (20mg/250=0.08mg/ml), so we selected dissolution medium having pH 6.8 as a worst-case scenario. In light of the above discussion and high solubility of drug substance, discriminatory dissolution parameter are not required for Vonoprazan 10mg & 20mg tablets. Therefore, generalized lowest 50RPM with 900ml medium was selected for release and stability studies of the drug product. Based on above literature and studies, we selected dissolution medium having pH 6.8 as a worst-case scenario, since the solubility of Vonoprazan in pH 6.8 is less as compared to solubility in pH 1.2 (about 16.5mg/ml) & pH 4.5 (8.1mg/ml).

			As vonoprazan release in all the three mediums within 15 minutes was more than 85% therefore, we selected the time point i.e. 15 minutes for dissolution.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION				
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.				
Administrative Portion				
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate for M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical industry association valid till 05-05-2022. Certificate has mentioned different drug substances however; the applied drug substance is not mentioned in the certificate.		
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice number CY118257 dated 04-12-2018 mentioning 0.35kg quantity of ticagrelor, Batch No. RD-TG-201810081 attested by Assistant Director DRAP, Lahore vide No. 3874/2019DRAP dated 20-03-2019.		
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted		
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted		

Remarks OF Evaluator:

Sr. No.	Section	Observations.	Response by the firm.
1	1.3.4	Valid copy of DML of the drug product manufacturer shall be submitted.	Firm has submitted copy of DML issued on 06-06-2022 w.e.f. 03-02-2019 in the name of M/s Horizon Pharma, Lahore.
2	1.5.6	This section has mentioned innovator specifications while the official monograph is available in BP. Clarification is required.	Firm has submitted that when the Product Project was initiated (2020), The official monograph was not available in British pharmacopeia. So, we followed the Innovator's specifications. So, we will Changed our Analytical method and specification for

			commercial batches according to B.P official monograph 2022.
3	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted. Provided GMP certificate has different drug substances however, the applied drug substance is not included/mentioned in the certificate. Clarification shall be submitted.	Not submitted by the firm. Firm has submitted that the GMP certificate was provided by Drug product manufacturer was right and obtained from Nantong Chanyoo Pharmatech Co., Ltd. but the certificate was mistakenly attached of our other manufacturer which is applied in our other strength 90mg. Provided GMP certificate is not valid as is valid till 05-05-2022. Furthermore, certificate has mentioned different drug substances however; the applied drug substance is not mentioned in the certificate.
4	2.3	Table for literature references has not mentioned any pharmacopoeia neither for the drug substance nor for the drug product while the official monograph for both the drug substance as well as drug product is available in BP. Justification shall be submitted.	Firm has submitted that when the Product Project was initiated (2020), The official monograph of both drug substance and drug product was not available in British pharmacopeia. So, we followed the Innovator's specifications. So, we will Changed our Analytical method and specification for commercial batches according to B.P official monograph 2022. However, no revised table for literature references is provided.
5	3.2.S.4.1	Manufacturer specification are claimed for the drug substance while the official monograph is available in BP. Justification shall be submitted.	Firm has submitted that when the Product Project was initiated (2020), The official monograph of both drug substance and drug product was not available in British pharmacopeia. That's why they used innovator's specifications.
6	3.2.S.4.2	Analytical procedure for the assay test provided by the drug substance manufacturer has no formula for the assay calculation. Clarification shall be submitted. Analytical procedures provided by the drug product manufacturer for assay test is different from the drug substance manufacturer. Clarification shall be submitted. Analytical procedures provided by the drug product manufacturer for assay test is different from the official monograph. Clarification shall be submitted.	Firm has submitted that the Manufacturer prepared the solution of standard and sample in the similar manner as per manufacturer method. So, they calculate the potency as per comparison profile with standard solution. Firm has submitted new analytical method which is similar to the drug substance manufacturer. However, initially submitted analytical method was different from the drug substance manufacturer in respect of mobile phase, wavelength, injection volume etc. When the Product Project was initiated (2020), The official monograph of drug substance was not available in British pharmacopeia. So, we followed the Analytical procedure provided by the manufacturer. Hence, we will Changed our Analytical method and specification for commercial batches according to B.P official monograph 2022.
7	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	Firm has submitted that as per Drug Master file of the drug substance, it is clear that Ticagrelor exist as amorphous forms or crystalline form II.

8	3.2.P.2.2	Justification of not performing Pharmaceutical Equivalence & CDP against innovator product shall be submitted. Justification shall be submitted for carrying CDP in polysorbate medium.	Firm has once again submitted the same results of CDP against Anplag while no justification is provided. Firm has submitted that the dissolution method was borrowed from FDA Dissolution Data profile which was 0.2% w/v solution of polysorbate 80 at different time points that was claimed in our dissolution profile.
9	3.2.P.5.1	This section has mentioned in-house specifications while the official monograph of the applied formulation is available in BP. Assay limits and dissolution limits provided by the drug product manufacturer (90-110% & NLT 75% Q in 75 minutes & NLT 80% Q in 60 minutes) are different from official monograph (95-105% & Q = 70% after 45 minutes). Justification shall be submitted.	Firm has submitted that when the Product Project was initiated (2020), The official monograph of drug substance was not available in British pharmacopeia. So, we followed the Analytical procedure provided by the manufacturer. Hence, we will Changed our Analytical method and specification for commercial batches according to B.P official monograph 2022.
10	3.2.P.8.1	Submit stability data sheets as per approved format by the Registration Board with inclusion of API lot number. Details of the API lot number used during the stability study data shall be submitted. Reference of previous approval of applications with stability study data shall be submitted.	Firm has submitted new stability data sheets wherein they have included API lot number in the sheets and new stability data sheets are as per approved format by the Registration Board. No data submitted.
11		Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing and testing of all the three six batches of Ticlor 60mg & 90mg tablets.	Firm has submitted that the Drug substance was imported for Ticlor 90mg from Jiangxi Synergy Pharmaceutical Co., Ltd. 400g (0.4 Kg) while our consumption was 324g (0.324 Kg) for three batches (TGH001, TGH002, TGH003) The Drug substance was imported for Ticlor 60mg from Nantong Chanyoo Pharmatech Co., Ltd. 350g (0.35 Kg) while our consumption was 270g (0.270 Kg) for three batches (TGL001, TGL002, TGL003).

Decision: Approved with BP Specifications.

- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Firm will also submit valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Date of Initiation	29-01-2020	30-01-2020	31-01-2020

No. of Batches		03
REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate for M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical industry association valid till 05-05-2022. Certificate has mentioned different drug substances however; the applied drug substance is not mentioned in the certificate.
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice number CY118257 dated 04-12-2018 mentioning 0.35kg quantity of ticagrelor, Batch No. RD-TG-201810081 attested by Assistant Director DRAP, Lahore vide No. 3874/2019DRAP dated 20-03-2019.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observations.	Response by the firm.
1	1.3.4	Valid copy of DML of the drug product manufacturer shall be submitted.	Firm has submitted copy of DML issued on 06-06-2022 w.e.f. 03-02-2019 in the name of M/s Horizon Pharma, Lahore.
2	1.5.6	This section has mentioned innovator specifications while the official monograph is available in BP. Clarification is required.	Firm has submitted that when the Product Project was initiated (2020), The official monograph was not available in British pharmacopeia. So, we followed the Innovator's specifications. So, we will Changed our Analytical method and specification for commercial batches according to B.P official monograph 2022.
3	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted.	Firm has submitted new GMP certificate for M/s Jiangxi Synergi Pharmaceutical co., Ltd. Jiangxi Fengxin Industrial Park, Jingxi province, China issued by Jiangxi API Engineering Technology Research Centre dated 12-03-2020 valid till 11-03-2025. Firm has also submitted another GMP certificate for M/s Jiangxi Synergi Pharmaceutical co., Ltd. Jiangxi Fengxin Industrial Park, Jingxi province, China issued by Fengxin administration for market

		Provided GMP certificate has different drug substances however, the applied drug substance is not included/mentioned in the certificate. Clarification shall be submitted.	regulation People's Republic of China valid till 01-03-2025. This certificate has alos mentioned Ticagrelor API. Firm has submitted that GMP certificate provided in the registration file was mistakenly attached of our other vendor i.e. M/s Nantong Chanyoo Pharmatech Co., Ltd., while the drug substance was used of M/s Jiangxi Synergi Pharmaceutical co., Ltd. So we attached the correct GMP certificate.
4	2.3	Table for literature references has not mentioned any pharmacopoeia neither for the drug substance nor for the drug product while the official monograph for both the drug substance as well as drug product is available in BP. Justification shall be submitted.	Firm has submitted that when the Product Project was initiated (2020), The official monograph of both drug substance and drug product was not available in British pharmacopeia. So, we followed the Innovator's specifications. So, we will Changed our Analytical method and specification for commercial batches according to B.P official monograph 2022. However, no revised table for literature references is provided.
5	3.2.S.4.1	Manufacturer specification are claimed for the drug substance while the official monograph is available in BP. Justification shall be submitted.	Firm has submitted that when the Product Project was initiated (2020), The official monograph of drug substance was not available in British pharmacopeia. So, we followed the specifications provided by the manufacturer.
6	3.2.S.4.2	Analytical procedure for the assay test provided by the drug substance manufacturer has no formula for the assay calculation. Clarification shall be submitted. Analytical procedures provided by the drug product manufacturer for assay test is different from the drug substance manufacturer. Clarification shall be submitted. Analytical procedures provided by the drug product manufacturer for assay test is different from the official	Firm has submitted that the Manufacturer prepared the solution of standard and sample in the similar manner as per manufacturer method. So, they calculate the potency as per comparison profile with standard solution. The Analytical procedure of drug product manufacturer was provided in Registration file was mistakenly attached of our other i.e. vendor Jiangxi Synergy Pharmaceutical co., Ltd while the drug substance was used of 'Nantong Chanyoo Pharmatech Co., Ltd. Following attachments has attached of this manufacturer; Commercial Invoice No. JXSG181028 dated 03-12-2018 mentioning 0.40 kg quantity of Ticagrelor batch No. 20180504T attested by AD I&E, DRAP Lahore vide No. 4051/2019DRAP dated 22-03-2019. Stability data of drug substance (accelerated and real time for batch No. 20170601T, 20170602T & 20170603T.) Analytical method procedure and specifications of both Drug substance manufacturer and Drug Product Manufacturer COA of Manufacturer COA from Drug Product Manufacturer Standard Analytical Procedure. When the Product Project was initiated (2020), The official monograph of drug substance was not available in British pharmacopeia. So, we followed the Analytical procedure provided by the manufacturer. Hence, we will Changed our Analytical method and specification for

		monograph. Clarification shall be submitted.	commercial batches according to B.P official monograph 2022.
7	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	As per Drug Master file of the drug substance, it is clear that Ticagrelor exist as amorphous forms or crystalline form II.
8	3.2.P.2.2	Justification of not performing Pharmaceutical Equivalence & CDP against innovator product shall be submitted. Justification shall be submitted for carrying CDP in Polysorbate medium.	Firm has once again submitted the same results of CDP against Vitara while no justification is provided. Firm has submitted that the dissolution method was borrowed from FDA Dissolution Data profile which was 0.2% w/v solution of Polysorbate 80 at different time points that was claimed in our dissolution profile.
9	3.2.P.5.1	This section has mentioned in-house specifications while the official monograph of the applied formulation is available in BP. Assay limits and dissolution limits provided by the drug product manufacturer (90-110% & NLT 75% Q in 75 minutes & NLT 80% Q in 60 minutes) are different from official monograph (95-105% & Q = 70% after 45 minutes). Justification shall be submitted.	Firm has submitted that when the Product Project was initiated (2020), The official monograph of drug substance was not available in British pharmacopeia. So, we followed the Analytical procedure provided by the manufacturer. Hence, we will Changed our Analytical method and specification for commercial batches according to B.P official monograph 2022.
10	3.2.P.8.1	Submit stability data sheets as per approved format by the Registration Board with inclusion of API lot number. Details of the API lot number used during the stability study data shall be submitted. Reference of previous approval of applications with stability study data shall be submitted.	Firm has submitted new stability data sheets wherein they have included API lot number in the sheets and new stability data sheets are as per approved format by the Registration Board. No data submitted.
		Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing and testing of all the three six batches of Ticlor 60mg & 90mg tablets.	Firm has submitted that the Drug substance was imported for Ticlor 90mg from Jiangxi Synergy Pharmaceutical Co., Ltd. 400g (0.4 Kg) while our consumption was 324g (0.324 Kg) for three batches (TGH001, TGH002, TGH003) The Drug substance was imported for Ticlor 60mg from Nantong Chanyoo Pharmatech Co., Ltd. 350g (0.35 Kg) while our consumption was 270g (0.270 Kg) for three batches (TGL001, TGL002, TGL003).

Decision: Approved with BP specifications.

- **Registration letter will be issued after submission of fee of Rs. 30,000/- for correction/pre-approval changes, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Firm will also submit valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION			
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.			
Administrative Portion			

	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted a document issued in the name of M/s Nantong Chanyoo Pharmatech Co., Ltd., by the Jiangsu Drug Administration with the title of "Written confirmation for active substances exported to EU". The document confirms that the plant complies with the requirements of the Chinese Good Manufacturing Practice. This written confirmation remains valid till 12-03-2023.
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 6 No. 00980/2019/DRAP dated 28/10/2019 DRAP (p)/6417 in the name Cirin Pharmaceuticals Pvt. Ltd., 32/2A, Phase III, Industrial Estate, Hattr district Haripur, KPK mentioning 1.90 kg quantity of Ticagrelor attested by Assistant Drug Controller, DRAP, Peshawar.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observation	Response by the firm
1	1.5.6	This section has mentioned innovator specifications while the official monograph is available in BP. Clarification is required.	Firm has submitted that the trial batches of Rilinta (Ticagrelor 60mg) Tablets were developed in August-2020, whereas the monograph for Ticagrelor tablets was published in British Pharmacopoeia in 2022, hence trial batches were developed as per Innovator's Specifications. They further submitted fee 7500 for change of specifications form innovator to BP specification. Deposit Slip# 5247216348 Dated:26.08.2022
2	1.6.5	GMP certificate of the drug substance manufacturer issued by the concerned regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate in the name of M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical Industry Association dated 21-02-2022 valid till 21.02.2026.
3	2.3	Table for literature references has not mentioned any pharmacopoeia neither for the drug substance nor for the drug product while the official monograph for both the drug substance as well as drug product is available in BP. Justification shall be submitted.	Firm has submitted that at the time of development and submission of dossier, neither monograph of drug substance nor drug product was available in any official pharmacopeia.

4	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	Firm has submitted that Polymeric form II has been declared by Drug substance manufacturer under section 3.2. S.1.3 General Properties hence it is not mentioned on CoA.
5	3.2.P.2.2	Justification shall be submitted for CDP up to 75 minutes as the BP monograph has mentioned 45 minutes time for dissolution for the ticagrelor tablets. Justification of not performing Pharmaceutical Equivalence & CDP against innovator product shall be submitted.	Firm has submitted that Comparative Dissolution Profile (CDP) up-to 74minutes was performed in the year 2020 considering the time-points as mentioned in FDA Dissolution Database for Ticagrelor tablets, while the monograph of Dissolution test for Ticagrelor tablet published in BP 2022. As per DRAP guidelines, we have performed, Pharmaceutical Equivalence & CDP studies against comparator brand leader in local market, ANPLAG 60mg Tablets (manufactured by PharmEvo Pvt Limited). In addition, the results were found similar and in compliance with quality test parameters.
6	3.2.P.5.1	Innovator specifications are claimed for the finished product while the official monograph is available in BP. Clarification shall be submitted. Assay limits and dissolution limits provided by the drug product manufacturer (90-110% & NLT 75% Q in 75 minutes) are different from official monograph (95-105% & Q = 70% after 45 minutes). Justification shall be submitted.	Referring the response made under point number 1.5.6, it is restated, that the monograph for Ticagrelor tablet was not available in BP-2020 and hence product was developed as per Innovator's Specifications and the same limits had been applied. However, the commercial batches shall be developed and tested as per monograph available in BP-2022.
7	3.2.P.5.6.	Justification of specification are given that specification for this product has been derived in compliance with innovator's specification while official monograph is available in BP.	Refer to the response made under point number 1.5.6
8	3.2.P.8	Reference of previous approval of applications with stability study data of the firm shall be submitted.	Firm has referred to the inspection of their product Dorinem Injection 500mg (Doripenem (as Monohydrate) 500mg): Approved in Registration Board Meeting-291 Date of Investigation: 24-07-2019 Panel members 1.Prof. Dr. Jamshed Ali Khan, Member Central Licensing Board. 2. Dr. Khalid Javed, Director Drug Testing Laboratory, Peshawar. 3. Mr. Atiq Ul Bari, FID/`Assistant Director, DRAP Peshawar.
9	3.2.P.8	Stability data sheets have mentioned 19-09-2020 as date of initiation for the stability studies while the chromatograms have shown 03-09-2020. Clarification shall be submitted.	Firm has submitted that QC received sample of Coated tablets on 03.09.2020 and performed Assay on the same day. Dissolution test was performed on the next day, 04.09.2020 and released batches on 05.09.2020 for blistering and packing. Batches were blistered and packed on 15.09.2020 and stability samples were submitted to QC on 16.09.2020.

			QC placed the sample in the chamber on 19.09.2020 and as per our SOP of stability study, the date of placement of sample is Stability Chamber is the Data of Initiation of Stability Study. The whole activity has been performed well within the normal manufacturing process time.

Decision: Approved with BP specifications.

- **Registration letter will be issued after submission of valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Intended use of pharmaceutical product	☐ Domestic sale. ☐ Export sale. ☒ Domestic and Export sales.
	Dy. No. and date of submission	Form 5D initial submission; 31-01-2017. Stability data submitted; 05-05-2021. Form 5F Dy. No. 33585 dated 23-12-2021.
	Details of fee submitted	PKR 50,000/-: dated 31-01-2017 (Cirin pharma). 50,000/- fee submitted dated 27-04-2021 for title change from Cirin pharma to ICI Pakistan Limited.
	The proposed proprietary name / brand name	Rilinta 90mg Tablets.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains; Ticagrelor …… 90mg.
	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Platelet aggregation inhibitors excl. heparin.
	Reference to Finished product specifications	Innovator's specifications.
	Proposed Pack size	2 x 10's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	BRILINTA® 90mg (ticagrelor) film coated tablets, USFDA approved.
	For generic drugs (me-too status)	Bilinta 90mg Tablet, Scilife Pharma, Reg. No. 090782.

	GMP status of the Finished product manufacturer	GMP certificate No.F.11-6/2020-27 dated 21-05-2020 issued on the basis of inspection conducted on 14-04-2020.
	Evidence of section approval.	Tablet general section approved vide letter No. F.3-4/92-Lic (Vol-III) (Pt)dated 16-06-2021.
	Name and address of API manufacturer.	M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS details as per WHO QOS PD template.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of both drug substances.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (RD-TG-201806261, RD-TG-201808021& RD-TG-201810081)
	Module-III (Drug Product):	The firm has submitted detail of manufacturer, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the reference product Anplag 90mg Tablet by Pharma Evo (Pvt.) Ltd., (Batch No: 0L124 Mfg. 10-2020 & Exp. 10-2022) by performing quality tests (Identification, uniformity of weight, Disintegration time, Dissolution & Assay). CDP has been performed against the same brand that is Anplag 90mg Tablet by Pharma Evo (Pvt) Ltd., in in three different mediums i.e. pH 1.2 in 0.1 N HCl, pH 4.5 Acetate buffer & pH 6.8 Phosphate buffer. The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method Validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	Nantong Chanyoo Pharmatech Co. Ltd., No. 2 Tonghai Si Road, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province China.
API Lot No.	RD-TG-201907211.
Description of Pack (Container closure system)	2 Alu-Alu blisters of 10's yellow color film coated tablets.
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 12 months Accelerated: 06 months
Frequency	Accelerated: 0, 3, 6 (Months)

	Real Time: 0, 3, 6, 9, 12 (Months)		
Batch No.	ST0H015	ST0H016	ST0H017
Batch Size	3000 tablets	3000 tablets	3000 tablets
Manufacturing Date	09-2020	09-2020	09-2020
Date of Initiation	21-09-2020	21-09-2020	21-09-2020
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted a document issued in the name of M/s Nantong Chanyoo Pharmatech Co., Ltd., by the Jiangsu Drug Administration with the title of "Written confirmation for active substances exported to EU". The document confirms that the plant complies with the requirements of the Chinese Good Manufacturing Practice. This written confirmation remains valid till 12-03-2023.
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 6 No. 00980/2019/DRAP dated 28/10/2019 DRAP (p)/6417 in the name Cirin Pharmaceuticals Pvt. Ltd., 32/2A, Phase III, Industrial Estate, Hattar district Haripur, KPK mentioning 1.90 kg quantity of Ticagrelor attested by Assistant Drug Controller, DRAP, Peshawar.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observation	Response by the firm
1	1.5.6	This section has mentioned innovator specifications while the official monograph is available in BP. Clarification is required.	Firm has submitted that the trial batches of Rilinta (Ticagrelor 60mg) Tablets were developed in August-2020, whereas the monograph for Ticagrelor tablets was published in British Pharmacopoeia in 2022, hence trial batches were developed as per Innovator's Specifications. They further submitted fee 7500 for change of specifications form innovator to BP specification. Deposit Slip# 5247216348 Dated:26.08.2022

2	1.6.5	GMP certificate of the drug substance manufacturer issued by the concerned regulatory authority shall be submitted.	Manufacturing License (No. Su 20160512) for M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si road, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province, China issued by Jiangsu Food & Drug Administration valid upto 2-12-2025
3	2.3	Table for literature references has not mentioned any pharmacopoeia neither for the drug substance nor for the drug product while the official monograph for both the drug substance as well as drug product is available in BP. Justification shall be submitted.	Firm has submitted that at the time of development and submission of dossier, neither monograph of drug substance nor drug product was available in any official pharmacopeia.
4	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	Firm has submitted that Polymeric form II has been declared by Drug substance manufacturer under section 3.2. S.1.3 General Properties hence it is not mentioned on CoA.
5	3.2.P.2.2	Justification shall be submitted for CDP up to 75 minutes as the BP monograph has mentioned 45 minutes time for dissolution for the ticagrelor tablets. Justification of not performing Pharmaceutical Equivalence & CDP against innovator product shall be submitted.	Firm has submitted that Comparative Dissolution Profile (CDP) up-to 74minutes was performed in the year 2020 considering the time-points as mentioned in FDA Dissolution Database for Ticagrelor tablets, while the monograph of Dissolution test for Ticagrelor tablet published in BP 2022. As per DRAP guidelines, we have performed, Pharmaceutical Equivalence & CDP studies against comparator brand leader in local market, ANPLAG 90mg Tablets (manufactured by PharmEvo Pvt Limited). In addition, the results were found similar and in compliance with quality test parameters.
6	3.2.P.5.1	Innovator specifications are claimed for the finished product while the official monograph is available in BP. Clarification shall be submitted. Assay limits and dissolution limits provided by the drug product manufacturer (90-110% & NLT 75% Q in 75 minutes) are different from official monograph (95-105% & Q = 70% after 45 minutes). Justification shall be submitted.	Referring the response made under point number 1.5.6, it is restated, that the monograph for Ticagrelor tablet was not available in BP-2020 and hence product was developed as per Innovator's Specifications and the same limits had been applied. However, the commercial batches shall be developed and tested as per monograph available in BP-2022.
7	3.2.P.5.6.	Justification of specification are given that specification for this product has been derived in compliance with innovator's specification while official monograph is available in BP.	Refer to the response made under point number 1.5.6
8	3.2.P.8	Reference of previous approval of applications with stability study data of the firm shall be submitted.	Firm has referred to the inspection of their product Dorinem Injection 500mg (Doripenem (as Monohydrate) 500mg): Approved in Registration Board Meeting-291 Date of Investigation: 24-07-2019 Panel members 1.Prof. Dr. Jamshed Ali Khan, Member Central Licensing Board. 2. Dr. Khalid Javed, Director Drug Testing Laboratory, Peshawar.

			3. Mr. Atiq Ul Bari, FID/`Assistant Director, DRAP Peshawar.
9	3.2.P.8.3	Stability data sheets have mentioned 21-09-2020 as date of initiation for the stability studies while the chromatograms have shown 14-09-2020. Clarification shall be submitted.	Firm has submitted that QC received sample of Coated tablets on 03.09.2020 and performed Assay on the same day. Dissolution test was performed on the next day, 04.09.2020 and released batches on 05.09.2020 for blistering and packing. Batches were blistered and packed on 15.09.2020 and stability samples were submitted to QC on 16.09.2020. QC placed the sample in the chamber on 19.09.2020 and as per our SOP of stability study, the date of placement of sample is Stability Chamber is the Data of Initiation of Stability Study. The whole activity has been performed well within the normal manufacturing process time.

Decision: Approved with BP specifications.

- **Registration Board further decided that registration letter will be issued after submission of applicable fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

No. of Batches	03		

Administrative Portion

	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. IT/E/API/10/2018 in the name of Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China valid up to 01-12-2020 issued by Eudra GMP is provided. Copy of GMP certificate No. ZJ200047 in the name of Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China issued by Zhejiang Medical Product Administration valid till 28-06-2023 is submitted.
	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD I&E DRAP, Lahore, has been submitted. Invoice No. HH2020887, mentioning a quantity: 0.175 kg with Batch No. D5304-19-002R with date of approval by DRAP: 14-05-2020.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports on product testing.
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Remarks OF Evaluator:

Sr. No.	Section	Observation	Response by the firm

	1.3	Valid copy of DML and evidence of approval of manufacturing facility of finished product manufacturer shall be submitted. Valid copy of GMP certificate of the finished product manufacturer shall be submitted.	Firm has provided copy of DML w.e.f. 22-07-2015. They also provided copy of a letter received in DRAP on 13-07-2020 for grant of renewal of DML. However, Valid DML is not provided. GMP certificate No. 84/2021-DRAP (AD-386964298-1196) dated 01-11-2021 issued on the basis of inspection conducted on 14-09-2021 is submitted.
	3.2.S.4.3	Verification studies of drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
	3.2.S.4.4	Justification shall be submitted for quantity of the drug substance as COA of the drug substance provided by the finished product manufacturer has mentioned quantity of 0.18 kg while the clearance certificate has mentioned 0.175 kg.	Firm has submitted that it was typographic error and also provided corrected COA.
	3.2.P.2	Justification shall be submitted regarding the Qualitative composition of the applied formulation as Polysorbate 80 and SLS are not included in applied composition which are otherwise included in innovator formulation i.e. Bystolic.	Firm has submitted that their composition is according to the innovator, it was typographical error. Compatibility study is also attached. They also provided new pharmaceutical development wherein they have included Polysorbate 80 and SLS in the composition of the applied formulation. However, in the initially submitted dossier Polysorbate 80 and SLS are not included in applied composition.
	3.2.P.2.2.1	Justification for not performing CDP against the innovator product. CDP has mentioned 15mg of prolong release tablets of M/s Highnoon laboratories. Clarify. USFDA dissolution data base has recommended sampling time of 10, 20, 30 and 45 minutes while the time points selected by the applicants are 15, 30, 45 & 60 minutes. Justification is required.	No reply submitted against this point. No reply submitted against this point. Firm has submitted new CDP studies in three different mediums as per reference of USFDA dissolution data base against Nebix 2.5mg, Batch No. 203502 manufactured by M/s Highnoon laboratories. The values of f2 are in acceptable range.
	3.2.P.5.1	Applied product has dissolution specifications of NLT 80% after 45 minutes while the chemistry review of the innovator product has mentioned 15 minutes. Justification is required. Water content and content uniformity tests are performed by the innovator while the applicant has not performed both the mentioned test on finished product. Clarification is required.	Firm has submitted that dissolution test is performed as per FDA guidelines and the dissolution time specified is 10, 20, 30, 45 minutes. However, FDA dissolution guidelines are for the release pattern while the chemistry review of the innovator product has mentioned 15 minutes for dissolution of the applied formulation.

	3.2.P.8.	Reference of previous approval of applications with stability study data of the firm shall be submitted. Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted. Firm has submitted chromatograms for the applied formulation. However, submitted chromatograms have shown that retention time in some chromatograms is between 4-5 minutes while the retention time in some chromatograms is around 2 minutes for the same salt i.e. Nebivolol HCl. While the analytical method for both the dissolution and assay have same chromatographic conditions. The submitted chromatograms are inconsistent and have variation independent of concentration i.e. peak area for different concentrations not correlatable with respective strengths of 2.5mg, 5mg & 10mg. Multiple batch numbers and multiple strength are mentioned on same chromatograms due to which it could not be confirmed that for which strength the same chromatogram is submitted. Furthermore, the chromatograms are blurred and even some are not visible.
	3.2.P.8.3	Raw data sheets for assay test & dissolution test of the finished product shall be submitted.	Submitted.
	3.2.R.1.2	Blank production document shall be submitted.	Not submitted.
		Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing and testing of all the three trial batches.	Firm has submitted that quantity used in all three batches of Nebivolol 2.5mg, 5mg & 10mg is 0.0137 kg, 0.02725 kg & 0.0545 kg respectively. While quantity of the drug substance imported is 0.175kg. they further submitted that they have used the free sample quantity of 0.100kg of same lot during the manufacturing and testing process. They have also provided invoice for the same but no clearance is for free sample. Firm as manufactured three trial batches each of 5000 tablets. After the potency adjustments, total quantity of drug substance used per tablet is 2.75mg. 5000 X 3 = 15000 tablets. 15000 X 2.75 = 41.25 gm Total quantity used in the three trial batches is 41.25gm

			Furthermore, clearance of the free sample is also not given.

Decision: Registration Board decided to defer the case for the following points:

i. **Justification shall be submitted regarding the Qualitative composition of the applied formulation as batch formula and submitted executed BMR's have shown that Polysorbate 80 and SLS are not included in applied composition which are otherwise included in innovator formulation i.e. Bystolic.**

ii. **Justification for dissolution specifications of the applied formulation shall be submitted as the applied formulation has dissolution specifications of NLT 80% after 45 minutes while the innovator product has mentioned NLT 80% in 15 minutes.**

iii. **Justification shall be submitted regarding the submitted chromatograms as submitted chromatograms have shown that retention time in some chromatograms is between 4-5 minutes while the retention time in some chromatograms is around 2 minutes for the same salt i.e. Nebivolol HCl. While the analytical method for both the dissolution and assay have same chromatographic conditions for the above mentioned salt.**

iv. **Justification shall be submitted regarding the submitted chromatograms as the submitted chromatograms are inconsistent and have variation independent of concentration i.e. peak area for different concentrations not correlatable with respective strengths of 2.5mg, 5mg & 10mg.**

v. **Justification shall be submitted regarding the submitted chromatograms as the submitted chromatograms have multiple batch numbers and multiple strength are mentioned on same chromatograms due to which it could not be confirmed that for which strength the same chromatogram is submitted. Furthermore, the chromatograms are blurred and even some are not visible.**

vi. **Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing and testing of all the three strengths and their three trial batches each. As the document submitted for import of the raw material has mentioned 0.175kg quantity of the drug substance. While the submitted Executed BMR's have shown that total of 42.25gm quantity of the drug substance is used in the three trial batches of tablets 2.5mg and 82.50 gm of the drug substance is used in the three trial batches of 5mg tablets and 163.5 gm of the drug substance is used in the three trial batches of 10mg tablets. Total quantity of the drug substance used in all the three strengths of the trial batches is 290gm.**

No. of Batches		03		
Administrative Portion				
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. IT/E/API/10/2018 in the name of Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China valid up to 01-12-2020 issued by Eudra GMP is provided. Copy of GMP certificate No. ZJ200047 in the name of Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China issued by Zhejiang Medical Product Administration valid till 28-06-2023 is submitted.		
	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD I&E DRAP, Lahore, has been submitted. Invoice No. HH2020887, mentioning a quantity: 0.175 kg with Batch No. D5304-19-002R with date of approval by DRAP: 14-05-2020.		
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not Submitted		
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports on product testing.		
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)		
Remarks OF Evaluator:				

Sr. No.	Section	Observation	Response by the firm
	1.3	Valid copy of DML and evidence of approval of manufacturing facility of finished product manufacturer shall be submitted. Valid copy of GMP certificate of the finished product manufacturer shall be submitted.	Firm has provided copy of DML w.e.f. 22-07-2015. They also provided copy of a letter received in DRAP on 13-07-2020 for grant of renewal of DML. However, Valid DML is not provided. GMP certificate No. 84/2021-DRAP (AD-386964298-1196) dated 01-11-2021 issued on the basis of inspection conducted on 14-09-2021 is submitted.
	3.2.S.4.3	Verification studies of drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
	3.2.S.4.4	Justification shall be submitted for quantity of the drug substance as COA of the drug substance provided by the finished product manufacturer has mentioned quantity of 0.18 kg while the clearance certificate has mentioned 0.175 kg.	Firm has submitted that it was typographic error and also provided corrected COA.
	3.2.P.2	Justification shall be submitted regarding the Qualitative composition of the applied formulation as Polysorbate 80 and SLS are not included in applied composition which are otherwise included in innovator formulation i.e. Bystolic.	Firm has submitted that their composition is according to the innovator, it was typographical error. Compatibility study is also attached. They also provided new pharmaceutical development wherein they have included Polysorbate 80 and SLS in the composition of the applied formulation. However, in the initially submitted dossier Polysorbate 80 and SLS are not included in applied composition.
	3.2.P.2.2.1	Justification for not performing CDP against the innovator product. USFDA dissolution data base has recommended sampling time of 10, 20, 30 and 45 minutes while the time points selected by the applicants are 15, 30, 45 & 60 minutes. Justification is required.	No reply submitted against this point. Firm has submitted new CDP studies in three different mediums as per reference of USFDA dissolution data base against Nebix 5mg, Batch No. 221679 manufactured by M/s Highnoon laboratories. The values of f2 are in acceptable range.
	3.2.P.5.1	Applied product has dissolution specifications of NLT 80% after 45 minutes while the chemistry review of the innovator product has mentioned 15 minutes. Justification is required.	Firm has submitted that dissolution test is performed as per FDA guidelines and the dissolution time specified is 10, 20, 30, 45 minutes. However, FDA dissolution guidelines are for the release pattern while the chemistry review of the innovator product has mentioned 15 minutes for dissolution of the applied formulation.

		Water content and content uniformity tests are performed by the innovator while the applicant has not performed both the mentioned test on finished product. Clarification is required.	Firm has submitted updated SOP's wherein they have performed the said test on the finished product.
	3.2.P.8.	Reference of previous approval of applications with stability study data of the firm shall be submitted. Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted. Firm has submitted chromatograms for the applied formulation. However, submitted chromatograms have shown that retention time in some chromatograms is between 4-5 minutes while the retention time in some chromatograms is around 2 minutes for the same salt i.e. Nebivolol HCl. While the analytical method for both the dissolution and assay have same chromatographic conditions. The submitted chromatograms are inconsistent and have variation independent of concentration i.e. peak area for different concentrations not correlatable with respective strengths of 2.5mg, 5mg & 10mg. Multiple batch numbers and multiple strength are mentioned on same chromatograms due to which it could not be confirmed that for which strength the same chromatogram is submitted. Furthermore, the chromatograms are blurred and even some are not visible.
	3.2.P.8.3	Raw data sheets for assay test & dissolution test of the finished product shall be submitted.	Submitted.
	3.2.R.1.2	Blank production document shall be submitted.	Not submitted.
		Justification regarding the quantity of drug substance shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing and testing of all the three trial batches.	Firm has submitted that quantity used in all three batches of Nebivolol 2.5mg, 5mg & 10mg is 0.0137 kg, 0.02725 kg & 0.0545 kg respectively. While quantity of the drug substance imported is 0.175kg. they further submitted that they have used the free sample quantity of 0.100kg of same lot during the manufacturing and testing process. They have also provided invoice for the same but no clearance is for free sample. Firm as manufactured three trial batches each of 5000 tablets. After the potency adjustments, total quantity of drug substance used per tablet is 5.5mg.

			5000 X 3 = 15000 tablets. 15000 X 5.5 = 82.50 gm Total quantity used in the three trial batches is 82.50gm Furthermore, clearance of the free sample is also not given.

Decision: Registration Board decided to deferred the case for the following points:

i. **Justification shall be submitted regarding the Qualitative composition of the applied formulation as batch formula and submitted executed BMR's have shown that Polysorbate 80 and SLS are not included in applied composition which are otherwise included in innovator formulation i.e. Bystolic.**

ii. **Justification for dissolution specifications of the applied formulation shall be submitted as the applied formulation has dissolution specifications of NLT 80% after 45 minutes while the innovator product has mentioned NLT 80% in 15 minutes.**

iii. **Justification shall be submitted regarding the submitted chromatograms as submitted chromatograms have shown that retention time in some chromatograms is between 4-5 minutes while the retention time in some chromatograms is around 2 minutes for the same salt i.e. Nebivolol HCl. While the analytical method for both the dissolution and assay have same chromatographic conditions for the above mentioned salt.**

iv. **Justification shall be submitted regarding the submitted chromatograms as the submitted chromatograms are inconsistent and have variation independent of concentration i.e. peak area for different concentrations not correlatable with respective strengths of 2.5mg, 5mg & 10mg.**

v. **Justification shall be submitted regarding the submitted chromatograms as the submitted chromatograms have multiple batch numbers and multiple strength are mentioned on same chromatograms due to which it could not be confirmed that for which strength the same chromatogram is submitted. Furthermore, the chromatograms are blurred and even some are not visible.**

vi. **Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing and testing of all the three strengths and their three trial batches each. As the document submitted for import of the raw material has mentioned 0.175kg quantity of the drug substance. While the submitted Executed BMR's have shown that total of 42.25gm quantity of the drug substance is used in the three trial batches of tablets 2.5mg and 82.50 gm of the drug substance is used in the three trial batches of 5mg tablets and 163.5 gm of the drug substance is used in the three trial batches of 10mg tablets. Total quantity of the drug substance used in all the three strengths of the trial batches is 290gm.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION				
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.				
Administrative Portion				
	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their product Pirfedow Tablets 267mg which was approved in 297th Meeting of Registration Board held on 12th – 15th January 2021 Inspection was conducted on 04th January, 2020. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 203300CT110178 in the name of Industrias Quimicas Falcon de Mexico, S.A. de C.V Km. 4.5 Carretera Federal Cuernavaca-Cuautla 62578 Jiutepec, Morelos, México issued by Federal commission for the protection against Sanitary Risks (COFEPRIS); PIC/S member since 2018 is provided by the applicant & Valid up to 09-April-2023.		
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice (invoice# OS3612128407 Dated: 30-09-2020 from Dr. Reddy's Laboratories Limited, mentioning 7,938.600 kg quantity of Naproxen Sodium USP with different batch number		

		(also having B. No. ANNA00467B, 39 x 50kg) cleared by DRAP Karachi office dated 26-10-2020. Firm has submitted copy of invoice (invoice# OS3612105345 Dated: 18-06-2020 from Dr. Reddy's Laboratories Limited, mentioning 4,000.00 kg quantity of Naproxen Sodium USP with different batch number (also having B. No. ANNA00301B, 28 x 50kg) cleared by DRAP Karachi office dated 30-06-2020.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
	1.3.4	Valid copy of GMP certificate of the drug product manufacturer shall be submitted.	Firm has submitted routine GMP inspection report dated 20-10-2021 wherein it is concluded that M/s Martin Dow Limited is considered to be operating at Good level of compliance with cGMP guidelines as per Drugs Act, 1976 and DRAP Act 2012 and rules framed there under. Firm has submitted that we have applied for renewal of GMP certificate, and we are expecting to receive the GMP certificate soon.
	1.6.5	GMP certificate for the drug substance manufacturer has mentioned Industrias Quimicas Falcon de Mexico, S.A. de C.V Km. 4.5 Carretera Federal Cuernavaca-Cuautla 62578 Jiutepec, Morelos, México while the invoice has mentioned Dr. Reddy's Laboratories Limited, D. No. 8-2-337, Road No. 3 Banjara Hills, Telangana State India. Clarification of relationship shall be submitted between these two.	Dr. Reddy's Laboratories Limited is the administrative headquarters and Industrias Quimicas Falcon de Mexico is their manufacturing site. This clarification is mentioned in the 3.2.S.2.1 of DMF. 3.2.S.2.1 of DMF has mentioned that Industrias Quimicas Falcon de Mexico, S.A. de C.V is subsidiary of Dr. Reddy's Laboratories Limited.
	2.3	Table for literature references has mentioned that drug product is not available in any pharmacopoeia while the official monograph is available in USP. Clarification shall be submitted.	Firm has submitted that table for Literature reference shows all the pharmacopeias that the drug product is available in. They provided new table for literature references for both the drug substance and drug product.
	3.2.S.7	Stability studies of the drug substance has mentioned assay test by HPLC while the specification and analytical procedure has mentioned titration method. Clarification shall be submitted.	Firm has submitted that the drug substance manufacturer performed Assay test by Titration Method in the DMF but the provided stability data in DMF was on Zone-II i.e. 25°C ± 2°C, 60% ± 5% RH (attached herewith as reference) and tested according to Method No. CV0484. However, on our request the drug substance manufacturer provided the stability data on Zone-IV -B

			wherein the Assay is performed via HPLC method according to Method No. CV0694 which is more reliable and stringent than Titration. Also, we have requested the drug substance manufacturer to provide the Analytical Method with HPLC method No. CV0694 which will be subsequently submitted to your esteemed authority.

Decision: Approved.

- **Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval change, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case 03; Registration applications of Imported (Human) drugs on Form 5F.

79.	Name, address of Applicant / Importer	M/s AGP Limited, B-23-C, S.I.T.E., Karachi.
	Details of Drug Sale License of importer	License No: 1126. Address: B-23-C, S.I.T.E., Karachi-75700, Pakistan Address of Godown: AGP Limited, B-23-C, S.I.T.E., Karachi. Validity: 21-09-2021. Status: License to sell, stock & exhibit for sale, distribute and sell drugs by way of wholesale by of manufacturer, importer or indenter.
	Name and address of marketing authorization holder (abroad)	Mylan Laboratories Limited, Plot No. 11,12 & 13, Indore Special Economic Zone, Pharma Zone, Phase-II, Sector-III, Pithampur - 454775, Dist.- Dhar, Madhya Pradesh India.
	Name, address of manufacturer(s)	Mylan Laboratories Limited, Plot No. 11,12 & 13, Indore Special Economic Zone, Pharma Zone, Phase-II, Sector-III, Pithampur - 454775, Dist.- Dhar, Madhya Pradesh India.
	Name of exporting country	India.
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted copy of CoPP certificate (No. 7/2014) dated 21-Dec-2018 issued by Food and Drug Administration, Madhya Pradesh, India, for Ricovir-EM (Emtricitabine 200mg/ Tenofovir Disopproxil Femerate 300mg Tablet). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP was valid till 17-Dec-2021. **GMP:** Firm has submitted copy of legalized GMP certificate No. 07/2014 in the name of Mylan Laboratories Limited, Plot No. 11,12 & 13, Indore SEZ, Pharma Zone, Phase-II, Sector-III, Pithampur - 454775, Dist.- Dhar, Madhya Pradesh India issued by Food and Drug Administration, Idgah Hills, Bhopal (M.P) India. Validity is 21-11-2021.

		Firm has also submitted notarized copy of GMP Certificate No. OGYEI/49552/2017 in the name of Mylan Laboratories Limited, Plot No. 11,12 & 13, Indore SEZ, Pharma Zone, Phase-II, Sector-III, Pithampur - 454775, Dist.- Dhar, Madhya Pradesh India issued by National Institute of Pharmacy and nutrition, Hungary on the basis of inspection conducted on 17-08-2018 valid for three years **WHO Prequalification:** The product is WHO prequalified (Reference Number: HA417)
	Details of letter of authorization / sole agency agreement	**Letter of Authorization:** Firm has submitted original, legalized & product specific letter of Authorization from Mylan Laboratories Limited, having its corporate office at House No. 8-2-293/82/J-III, Plot No. 564/A/22, Road No. 92, Jubilee Hills, Hyderabad, India. The letter specifies that the manufacturer appoints M/s AGP Limited, B-23-C, S.I.T.E., Karachi to register their products in Pakistan. The authorization letter is valid till 16-Apr-2023.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 26351: dated 22-09-2021.
	Details of fee submitted	PKR 150,000/-: 08-09-2021.
	The proposed proprietary name / brand name	Ricovir-EM
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Emtricitabine …….…… 200mg Tenofovir Disoproxil Fumarate ……. 300mg (Innovator's Specification)
	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Antivirals for treatment of HIV infections, combinations ATC code: J05AR03
	Reference to Finished product specifications	In house.
	Proposed Pack size	28's, 30's & 100's.
	Proposed unit price	As fixed by DRAP.
	The status in reference regulatory authorities	TRUVADA® 200mg/300mg (emtricitabine and tenofovir disoproxil fumarate) tablets, USFDA approved.

	For generic drugs (me-too status)	Tenofo-EM 200mg/300mg Tablet, Getz Pharma, Reg # 076090.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**Emtricitabine:** Active drug substance Emtricitabine is being manufactured in Mylan Laboratories Limited - Bulk pharmaceutical chemical production plants at Telangana and Andhra Pradesh India. Manufacturing, testing, packing and release operations have been performed independently in respective manufacturing sites. Aurore Pharmaceuticals Private Limited (Unit-1) # Plot Nos. 35, 36, 38 to 40, 49 to 51, Phase IV, IDA, Jeedimetla Hyderabad - 500055 Telangana, India. *# Formerly known as Mylan Laboratories Limited (Unit-3) (B.
