	GMP status	Last inspection conducted on 22.02.2019.
	Remarks of the Evaluator	i. Copy of section approval letter is required. ii. Copy of latest GMP inspection report/certificate is required.
	Decision: Approved. Registration letter shall be issued after submission of latest GMP certificate/ inspection report conducted within last 3 years by QA&LT Division.	

Item No. XV: Agenda of Evaluator PEC-XVII.

Export Facilitation cases:

The following applications were received vide letter No.F.1-6/2019-PR-I (EFD) dated 06th October, 2022 from Assistant Director (PR-I/EFD), PE & R, Division for evaluation on priority basis in pursuance of decision in 133rd meeting of DRAP Authority held on 13th April 2022, regarding export facilitation (Grant of registration

on priority basis to the *pharmaceutical* i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year).

Case No. 1: Registration Applications requiring submission of stability data:

494.	Name and address of manufacturer / Applicant	M/s CCL Pharmaceuticals (Pvt.) Ltd. 62-Industrial Estate, Kot Lakhpat, Lahore.
	Brand Name +Dosage Form + Strength	JARDY-MET XR 5mg/1000mg Tablet
	Composition	Each Film Coated Tablet Contains: Empagliflozin…….5mg Metformin HCl extended release…….1000mg
	Diary No. Date of R& I & fee	Dy. No. 6520 dated 14-02-2019, Fee Rs: 50,000/- dated 23-11-2018 vide deposit slip No.0809686.
	Pharmacological Group	Antidiabetic (Sodium/glucose co transporter 2 (SGLT2) inhibitor and biguanide class)
	Type of Form	Form 5D
	Finished product Specifications	Manufacturer's specifications
	Pack size & Demanded Price	10's, 14's, 20's, 28's, 30's, (4×7's); As per SRO
	Approval status of product in Reference Regulator Authorities	Synjardy XR 5/1000mg film coated tablets (USFDA Approved)
	Me-too status	NA
	GMP status	DML renewal inspection conducted on 21-10-2020, wherein panel recommends the renewal of Drug Manufacturing License to M/s CCL Pharmaceuticals (Pvt) Ltd., by way of formulation to the following sections only Liquid Injectable Section (General) Tablet Section (General) Capsule Section (General) Dry powder suspension Capsule Section (Steroid) Oral liquid section
	Remarks of the Evaluator (PEC-XVII)	Tablet (General) Section (Revised) approval granted vide Licensing Division, letter No.F.1-8/84-Lic (Vol-III) dated 22-06-2018.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	The firm has referred to previous inspection for authenticity of stability data of their products conducted by the panel, on the basis of which Registration Board in its 297th meeting dated 12-15th January, 2021, decided to approve registration of Brivatam Tablets 10mg, Brivatam Tablets 25mg, Brivatam Tablets 50mg, Brivatam Tablets 75mg and Brivatam Tablets 100mg. Inspection date: 14-10-2020. The report shows that: • Finished Pharmaceutical Product stability testing was conducted on HPLC R&D # 19 for Brivatam Tablets 10mg, Brivatam Tablets 25mg, Brivatam Tablets 50mg, Brivatam Tablets 75mg and Brivatam Tablets 100mg which were not 21 CFR compliant for initial 6 months. • Finished Pharmaceutical Product stability studies conducted from 9 months onward was on 21 CFR compliant. HPLC. Q.C .NO 122. • Adequate monitoring and control were available for stability chamber.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	1. Copies of COAs (Batch#L-E-20200409-D01-E06-01) of API (Empagliflozin) from M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Liaoning Province, China and M/s CCL pharmaceuticals (Pvt) Ltd. Lahore are submitted. 2. Copies of COAs (Batch#MT01130220) of API (Metformin hydrochloride) from M/s Wanbury limited, Andra Pradesh India and M/s CCL pharmaceuticals (Pvt) Ltd. Lahore are submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of APIs from both API Manufacturers and Finished Product Manufacturer are provided by the firm.
4.	Stability study data of API from API manufacturer	Empagliflozin: Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30°C ± 2°C / 65% ± 5%RH for 24 months and at Accelerated conditions; 40°C ± 2°C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24 & 0, 1, 2, 3 & 6 months respectively.

		Batches:(20160606,20161017,20161219) 10 days stress stability study at conditions 60°C ± 2°C, Photolysis 4500 ± 500LX and 92.5%± 5%RH at 0, 5th & 10th days intervals also provided. Metformin hydrochloride: Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30°C ± 2°C / 65% ± 5%RH for 60 months and at Accelerated conditions; 40°C ± 2°C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24, 36, 48, 60 & 0, 1, 2, 3 & 6 months respectively. Batches:(MET-E-06640908, MET-E-06650908, MET-E-06660908)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	For Empagliflozin: Firm has submitted copy of GMP certificate dated 24-08-2020 in the name of M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng Country (Yi Ma Tu), Fuxing City, Liaoning Province, China issued by Liaoning Fuxin Management committee, Fluoride Industrial Development Zone. Valid till 23-08-2023. For Metformin hydrochloride: The firm has submitted copy of GMP certificate of M/s Wanbury limited, Doctors Organic Chemicals Division, K. Illindalaparru – 534217, Iragavaram Manadal, West Godavari District, Andra Pradesh, India issued on dated 06-02-2019 by Drugs Control Administration, Andra Pradesh India valid for three (03) years from the date of issue.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	For Empagliflozin: The firm has submitted copy of invoice No. HN20060302-H dated 03-06-2020 from exporter M/s Beijing Sino Hanson Import & Export Col, Ltd. No.3, Zhonghe road, Fengtai District, Beijing China, for import of 10kgs of Empagliflozin (Batch No. L-E-20200409-D01-E06-01) in name of M/s CCL Pharmaceuticals Private Ltd. Lahore attested by AD (I&E) DRAP Lahore dated 18-06-2020. For Metformin hydrochloride: The firm has submitted copy of invoice No. 92003089 dated 29-02-2020 from Wanbury Limited, BSEL Techpark, 'B' Wing, 10th Floor, Sector 30-A, Opp. Vashi Railway Station, Vashi, Navi Mumbai – 400703, India for import of 8000kgs Metformin HCl (1280Kgs,Batch No. MT01130220 used in instant trial batches) in the name of CCL Pharmaceuticals, Lahore attested by AD (I & E) DRAP, Lahore dated 05-03-2020.
7.	Protocols followed for conduction of stability study	Submitted
8.	Method used for analysis of FPP	Submitted
9.	Drug-excipients compatibility studies (where applicable)	Drug excipients compatibility study performed.

<table>
<tr><td>10.</td><td>Complete batch manufacturing record of three stability batches.</td><td>The firm has submitted Batch Manufacturing record of following 03 Batches:<table><tr><th>Batch No.</th><th>Batch Size</th><th>Mfg. Date</th></tr><tr><td>JMXA-T2-20</td><td>1000 tablets</td><td>08-2020</td></tr><tr><td>JMXA-T3-20</td><td>1000 tablets</td><td>08-2020</td></tr><tr><td>JMXA-T4-20</td><td>1000 tablets</td><td>08-2020</td></tr></table></td></tr>
<tr><td>11.</td><td>Record of comparative dissolution data (where applicable)</td><td>Provided
Comparative dissolution was performed against Synjardy XR tablet (5/1000mg) Batch No. 3183238 & Synjardy XR tablet (25/1000mg), Batch No. 3167491 in HCl buffer (pH 1.2), Acetate buffer (pH 4.5) & Phosphate buffer (pH 6.8)</td></tr>
<tr><td>12.</td><td>Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td><td>Submitted</td></tr>
<tr><td>13.</td><td>Compliance Record of HPLC software 21CFR & audit trail reports on product testing.</td><td>Submitted</td></tr>
<tr><td>14.</td><td>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)</td><td>Submitted</td></tr>
</table>

REMARKS OF EVALUATOR (PEC-XVII)

Deficiency/Observation	**Response by Pharma.**
Submit valid GMP certificate of M/s Wanbury limited, Doctors Organic Chemicals Division, K. Illindalaparru – 534217, Iragavaram Manadal, West Godavari District, Andra Pradesh, India.	The firm submitted copy of GMP certificate of M/s Wanbury limited, Doctors Organic Chemicals Division, K. Illindalaparru – 534217, Iragavaram Manadal, West Godavari District, Andra Pradesh, India issued on dated 08-02-2022 by Drugs Control Administration, Andra Pradesh India valid for three (03) years from the date of issue.
In finished drug product testing method, standard and sample absorbance are mentioned in the formula. However, dissolution and content uniformity tests are being performed on HPLC. Clarify or else revise finished drug product testing method as per employed testing methods.	The firm re-submit finished drug product analytical method with revised analysis formula. The firm further stated that since it is a typographical error and not a variation, fee is not applicable as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
Submit CoA of working standard	Firm submitted CoA of working standard.

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents to Be Provided**	**Status**
1.	Reference of previous approval of applications with stability study data of the firm	The firm has referred to previous inspection for authenticity of stability data of their products conducted by the panel, on the basis of which Registration Board in its 297th meeting dated 12-15th January, 2021, decided to approve registration of Brivatam Tablets 10mg, Brivatam Tablets 25mg, Brivatam Tablets 50mg, Brivatam Tablets 75mg and Brivatam Tablets 100mg. Inspection date: 14-10-2020. The report shows that: • Finished Pharmaceutical Product stability testing was conducted on HPLC R&D # 19 for Brivatam Tablets 10mg, Brivatam Tablets 25mg, Brivatam Tablets 50mg, Brivatam Tablets 75mg and Brivatam Tablets 100mg which were not 21 CFR compliant for initial 6 months. • Finished Pharmaceutical Product stability studies conducted from 9 months to onward was on 21 CFR compliant. HPLC. Q.C .NO 122 Adequate monitoring and control were available for stability chamber. The report shows that: • The HPLC software is 21 CFR compliant as per record available with the firm. • Audit Trail on the testing reports on Tenofovir Alafenamide Fumarate API and Vireof-N tablets 25mg is available. • The firm has adequate monitoring and control system for stability chambers.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	1. Copy of COA (Batch#L-E-20200409-D01-E06-01) of API (Empagliflozin) from M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Liaoning Province, China and M/s CCL pharmaceuticals (Pvt) Ltd. Lahore is submitted. 2. Copy of COA (Batch#MT01130220) of API (Metformin hydrochloride) from M/s Wanbury limited, Andra Pradesh India and M/s CCL pharmaceuticals (Pvt) Ltd. Lahore is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of APIs from both API Manufacturers and Finished Product Manufacturer are provided by the firm.
4.	Stability study data of API from API manufacturer	Empagliflozin: Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30°C ± 2°C / 65% ± 5%RH for 24 months and at Accelerated conditions; 40°C ± 2°C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24 & 0, 1, 2, 3 & 6 months respectively. Batches:(20160606,20161017,20161219) 10 days stress stability study at conditions 60°C ± 2°C, Photolysis 4500 ± 500LX and 92.5%±

		5%RH at 0, 5th & 10th days intervals also provided. Metformin hydrochloride: Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30°C ± 2°C / 65% ± 5%RH for 60 months and at Accelerated conditions; 40°C ± 2°C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24, 36, 48, 60 & 0, 1, 2, 3 & 6 months respectively. Batches:(MET-E-06640908, MET-E-06650908, MET-E-06660908)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	For Empagliflozin: Firm has submitted copy of GMP certificate dated 24-08-2020 in the name of M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng Country (Yi Ma Tu), Fuxing City, Liaoning Province, China issued by Liaoning Fuxin Management committee, Fluoride Industrial Development Zone. Valid till 23-08-2023. For Metformin hydrochloride: The firm has submitted copy of GMP certificate of M/s Wanbury limited, Doctors Organic Chemicals Division, K. Illindalaparru – 534217, Iragavaram Manadal, West Godavari District, Andra Pradesh, India issued on dated 06-02-2019 by Drugs Control Administration, Andra Pradesh India valid for three (03) years from the date of issue.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	For Empagliflozin: The firm has submitted copy of invoice No. HN20060302-H dated 03-06-2020 from exporter M/s Beijing Sino Hanson Import & Export Col, Ltd. No.3, Zhonghe road, Fengtai District, Beijing China, for import of 10kgs of Empagliflozin (Batch No. L-E-20200409-D01-E06-01) in name of M/s CCL Pharmaceuticals Private Ltd. Lahore attested by AD (I&E) DRAP Lahore dated 18-06-2020. For Metformin hydrochloride: The firm has submitted copy of invoice No. 92003089 dated 29-02-2020 from Wanbury Limited, BSEL Techpark, 'B' Wing, 10th Floor, Sector 30-A, Opp. Vashi Railway Station, Vashi, Navi Mumbai – 400703, India for import of 8000kgs Metformin HCl (1280Kgs, Batch No. MT01130220 used in instant trial batches) in the name of CCL Pharmaceuticals, Lahore attested by AD (I & E) DRAP, Lahore dated 05-03-2020.
7.	Protocols followed for conduction of stability study	Submitted
8.	Method used for analysis of FPP	Submitted
9.	Drug-excipients compatibility studies (where applicable)	Drug excipients compatibility study performed.

10.	Complete batch manufacturing record of three stability batches.	The firm has submitted Batch Manufacturing record of following 03 Batches: **Batch No.** / **Batch Size** / **Mfg. Date** JMXB-T2-20 / 1000 tablets / 08-2020 JMXB-T3-20 / 1000 tablets / 08-2020 JMXB-T4-20 / 1000 tablets / 08-2020
11.	Record of comparative dissolution data (where applicable)	Provided Comparative dissolution was performed against Synjardy XR tablet (5/1000mg) Batch No. 3183217 & Synjardy XR tablet (25/1000mg), Batch No. 3167491 in HCl buffer (pH 1.2), Acetate buffer (pH 4.5) & Phosphate buffer (pH 6.8)
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator (PEC-XVII)

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents to Be Provided**	**Status**
1.	Reference of previous approval of applications with stability study data of the firm	The firm has referred to previous inspection for authenticity of stability data of their products conducted by the panel, on the basis of which Registration Board in its 297th meeting dated 12-15th January, 2021, decided to approve registration of Brivatam Tablets 10mg, Brivatam Tablets 25mg, Brivatam Tablets 50mg, Brivatam Tablets 75mg and Brivatam Tablets 100mg. Inspection date: 14-10-2020. The report shows that: • Finished Pharmaceutical Product stability testing was conducted on HPLC R&D # 19 for Brivatam Tablets 10mg, Brivatam Tablets 25mg, Brivatam Tablets 50mg, Brivatam Tablets 75mg and Brivatam Tablets 100mg which were not 21 CFR compliant for initial 6 months. • Finished Pharmaceutical Product stability studies conducted from 9 months to onward was on 21 CFR compliant. HPLC. Q.C .NO 122 • Adequate monitoring and control were available for stability chamber.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	1. Copy of COA (Batch#L-E-20200409-D01-E06-01) of API (Empagliflozin) from M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Liaoning Province, China and M/s CCL pharmaceuticals (Pvt) Ltd. Lahore is submitted. 2. Copy of COA (Batch#MT01130220) of API (Metformin hydrochloride) from M/s Wanbury limited, Andra Pradesh India and M/s CCL pharmaceuticals (Pvt) Ltd. Lahore is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of APIs from both API Manufacturers and Finished Product Manufacturer are provided by the firm.
4.	Stability study data of API from API manufacturer	Empagliflozin: Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 65% ± 5%RH for 24 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24 & 0, 1, 2, 3 & 6 months respectively. Batches:(20160606,20161017,20161219) 10 days stress stability study at conditions 60˚C ± 2˚C, Photolysis 4500 ± 500LX and 92.5%± 5%RH at 0, 5th & 10th days intervals also provided. Metformin hydrochloride: Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 65% ± 5%RH for 60 months and at Accelerated conditions; 40˚C ± 2˚C

12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, CoA, summary data sheets etc.	Stability study data for Microbial assay (Bioassay) in the form of inhibition zones measurements provided
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The product specifications of colistimethate sodium injection based on USP and there is no application of HPLC in testing method because the assay method based on microbial assay therefore compliance record of HPLC software 21 CFR and audit trail reports are not applicable
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator (PEC-XVII)

Deficiency/Observation	**Response by Pharma.**
Provide API stability data as per Zone IV-A conditions. Stability data provided at following conditions: Stability study is conducted at Long Term conditions; 25˚C ± 2˚C / 60% ± 5%RH for 36 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5%RH for 6 months.	Firm submitted Stability studies data as per zone IV-B and stated that it is more stressful than zone IV-A.
Description & solubility specifications of API as provided by the firm, termed as USP. However, these specifications are mentioned as "In-house" by the API manufacturer. Also do not exist in USP official monograph of API.	Description and Solubility test are not present in USP Monograph of Colistemethate Sodium. These are additional tests performed by API Manufacturer in addition to USP Tests.
Microbial contamination test/specifications provided in CoA of API by the firm. However, in analytical testing method of API, the same test not mentioned/provided.	Microbial contamination test is mention in Analytical Test Specification. This test is performed as per <USP 61>. *The firm again provided CoA of API from drug substance manufacturer.*
Provide legible/clear copy of DML of API manufacturer.	Firm submitted legible copy of DML of API manufacturer.
The firm has mentioned in stability studies protocol, the Sterility test but the same is not available in stability studies data.	As per USP Monograph, Sterility test is not required for API testing. According to USP Colistimethate Sodium must be subjected to further processing during the preparation of injectable dosage forms. *Response of the firm has not clarified the query/observation.*
CoA of reference/working standard not provided.	Reference standard CoA will be provided. However, API Manufacturer CoA of lot being used in Developmental studies provided.
Justify use of non-sterile API (as evident from lack of sterility testing in CoA & import invoice of API) in manufacturing of injectable dosage form as labelling requirements of Colistimethate Sodium USP states "Where it is intended for use in preparing injectable dosage forms, the label states that it is sterile or must be subjected to further processing during the preparation of injectable dosage forms. However, as per manufacturing record of trial batches submitted, the sterilization process not mentioned.	As per USP Monograph, when label states that Colistimethate Sodium must be subjected to further processing during the preparation of injectable dosage forms, it meets the requirements for Bacterial endotoxins. As per submitted Manufacturing Record and CoA of FPP, BET is performed according to USP. *However, it is stated that as per manufacturing record of trial batches submitted by the firm, there is no details regarding the "further processing".* *USP monograph for Colistimethate sodium include the following labelling requirements:*

	Labeling—*Where it is intended for use in preparing injectable dosage forms, the label states that it is sterile or must be subjected to further processing during the preparation of injectable dosage forms.* ***Other requirements***—*Where the label states that Colistimethate Sodium is sterile; it meets the requirements for Sterility and Bacterial endotoxins under Colistimethate for Injection. Where the label states that Colistimethate Sodium must be subjected to further processing during the preparation of injectable dosage forms, it meets the requirements for Bacterial endotoxins under Colistimethate for Injection.*
• Justify the following: ➢ Dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).	The determined potency is equal to 100.0% in terms of CBA. Hence, dispensed quantity is 52.174g for trial batch manufacturing of 2MIU and 78.261g for trial batch manufacturing of 3MIU, having batch size of 300vials. As 1mg of Colistemethate Sodium is equivalent to 11500IU of Colistemethate Sodium. *As per USP monograph for Colistimethate Sodium "Colistimethate Sodium has a potency equivalent to not less than 390 µg of colistin per mg. In both CoAs (drug substance manufacture & drug product manufacturer, the Assay (on the as-is basis) given as ≥390µg/mg. The nominal potency of Colistimethate sodium is 12500IU/mg, while the firm claimed as 11500IU/mg. It is not clarified as to how the determined potency claimed as 100% in terms of CBA.*
➢ Since firm has claimed USP specifications. Justify the declared label claim in terms of Colistimethate sodium instead of Colistimethate base activity as recommended by USP.	USP states the following Label claim "Colistimethate for Injection contains an amount of Colistimethate Sodium equivalent to not less than 90.0 percent and not more than 120.0 percent of the labeled amount of colistin". Same claim has been recommended by the firm. *The firm label claim mentioned in terms of IU, not colistimethate base activity.*
➢ Submitted CoA does not clarify the potency whether in terms of CBA or IU of CMS.	Submitted CoA mention the potency in terms of both CBA and IU of CMS. CoA again submitted for reference. *As per USP monograph for Colistimethate Sodium "Colistimethate Sodium has a potency equivalent to not less than 390 µg of colistin per mg. In both CoAs (drug substance manufacture & drug product manufacturer, the Assay (on the as-is basis) given as ≥390µg/mg. The nominal potency of Colistimethate sodium is 12500IU/mg, while the firm claimed as 11500IU/mg.*
• As per stability data sheets/reports submitted, the content uniformity test data not provided. Submit	Content Uniformity test will be performed every 10th Batch and data will be submitted accordingly.

content uniformity test data in line with USP general chapter <905> UNIFORMITY OF DOSAGE UNITS.	
• The microbial assay performed is not completely as per USP monograph for "Colistimethate for Injection", general chapter "Antibiotics—Microbial Assays <81>", particularly the standard dilutions preparation, assay calculation/analysis etc. It is therefore required to clarify and justify as to how the adopted assay procedure and data analysis is in accordance with USP general chapter of microbial assay <81>, both for drug substance & drug product.	As per USP <81>, Microbial Assay should be performed by cylinder plate assay (Diffusion Method), same is adopted by the firm. As far as concentrations are concerned, Concentrations recommended by USP is 1mg/ml and concentration adopted by the firm for low dose is 0.8mg/ml i.e., approximately 1.0mg/ml.
The firm has submitted specifications for the finished drug product as per USP. However, the specifications previously mentioned in Form-5, which was presented in 293rd meeting of registration board, wherein the board deferred the application for submission of stability study data, the specifications have been mentioned as BP. It is therefore advised to submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021 for drug product specifications revision.	It was typographical error in form 5. Otherwise, specifications of drug product are derived from USP.
• Provide contract manufacturing agreement.	It will be provided.
• Please provide number of vials consumed for one time-point.	As per testing specification 5 vials be used for real time and 5 for accelerated. Total 10 vial till 6Month time point and then 5 vials till claimed shelf life.
• Submit minimum handling capacity for processing of Colistemethate Sodium trial batches (Trial batch bulk volum given 600ml)	It will be provided.

Decision: Deferred for following:

- **The firm has mentioned in stability studies protocol, the Sterility test but the same is not available in stability studies data.**
- **Justify use of non-sterile API (as evident from lack of sterility testing in CoA & import invoice of API) in manufacturing of injectable dosage form as labelling requirements of Colistimethate Sodium USP states "Where it is intended for use in preparing injectable dosage forms, the label states that it is sterile or must be subjected to further processing during the preparation of injectable dosage forms. However, as per manufacturing record of trial batches submitted, the sterilization process not mentioned.**
- **Justification for dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).**
- **Justification of declared label claim in terms of Colistimethate sodium instead of Colistimethate base activity as recommended by USP as the firm claimed USP specifications for finished drug product.**
- **Submitted CoA does not clarify the potency whether in terms of CBA or IU of CMS.**
- **As per stability data sheets/reports submitted, the content uniformity test data not provided. Submit content uniformity test data in line with USP general chapter <905> UNIFORMITY OF DOSAGE UNITS.**
- **The microbial assay performed is not completely as per USP monograph for "Colistimethate for Injection", general chapter "Antibiotics—Microbial Assays <81>", particularly the standard dilutions preparation, assay calculation/analysis etc.**
- **Submission of minimum handling capacity for processing of Colistemethate Sodium trial batches (Trial batch bulk volume given 600ml)**

• **Submission of contract manufacturing agreement.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents to Be Provided**	**Status**
1.	Reference of previous approval of applications with stability study data of the firm	The firm has referred to 307th meeting of DRB held from 08th-10th June,2021, wherein the product Esorid 40mg IV injection has been approved (Contract manufacturing) by referring to the inspection report of M/s Nabiqasim Industries, Karachi for their product Esomax injection, presented in 294th meeting of DRB, held on 9-04-2020. The board decided to approve Esomax 40mg & Esvin 40mg injection (Contract manufacturing). However, it is also mentioned that the scope of the inspection report pertains to the "authenticity of formulation" only.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Copy of COA (Batch# CMSG 1902001) of API from M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd. 8 Nangang Road, Jiangyin Industrial Concentration Zone, Fuqing, Fuzhou City, Fujina Province, China and M/s Nabiqasim Industries (Pvt.) Ltd. Karachi is submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of APIs from both API Manufacturers and Finished Product Manufacturer are provided by the firm.
4.	Stability study data of API from API manufacturer	Stability study is conducted at Long Term conditions; 25˚C ± 2˚C / 60% ± 5%RH for 36 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24, 36 & 0, 1, 2, 3 & 6 months respectively. Batches:(CMS1707001,CMS1707002, CMS1707003)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of "Written confirmation for active substances exported to EU" dated 22-09-2020 in the name of M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd. No.8 Nangang Road, Jiangyin Industrial Concentration Zone, Fuqing, Fuzhou City, Fujian Province, China issued by Fujian, Food & Drug Administration valid till 21-09-2022. It also states that the manufacturing plant complies with the requirements of the Chinese Good Manufacturing practices (= GMP of EU, WHO/ICH Q7). The drug does not have Chinese approval number as it is for export-only. The firm has also provided copy of Drug Manufacturing License No. (Min) 20160089, of M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd. No.8 Nangang Road, Jiangyin Industrial Concentration Zone, Fuqing, Fuzhou City, Fujian Province, China valid till 21-09-2025. Details of API are not mentioned in the DML. (DML verifiable online)
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. FXIN1902141D dated 20-03-2019 in the name of

		M/s Nabiqasim Industries (Pvt) Ltd. Karachi, attested by AD (I & E), DRAP Karachi vide No. 1541/21-05-19 dated 24/05/2019 for the import of 0.6kg Colistimethate sodium Non-sterile USP, having batch No. CMSG1902001 from Livzon Group Fuzhou Fuxing pharmaceutical co., Ltd. China.
7.	Protocols followed for conduction of stability study	Submitted
8.	Method used for analysis of FPP	Submitted
9.	Drug-excipients compatibility studies (Where applicable)	According to the firm, the formulation has been developed as per reference product Colomycin 2 M IU (Teva limited, UK), the formulation of colistimethate sodium 2 M IU is qualitatively same as per reference product, hence compatibility study not applicable. The reference product contains no other ingredients except colistimethate sodium.
10.	Complete batch manufacturing record of three stability batches.	The firm has submitted Batch Manufacturing record of following 03 Batches: **Batch No.** / **Batch Size** / **Mfg. Date** 360DS01 / 300 vials / 07-2020 360DS02 / 300 vials / 07-2020 360DS03 / 300 vials / 07-2020
11.	Record of comparative dissolution data (where applicable)	Not applicable
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Stability study data for Microbial assay (Bioassay) in the form of inhibition zones measurements provided Firm has submitted record of testing of all batches including COA and summary data sheets.
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The product specifications of colistimethate sodium injection based on USP and there is no application of HPLC in testing method because the assay method based on microbial assay therefore compliance record of HPLC software 21 CFR and audit trail reports are not applicable
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

REMARKS OF EVALUATOR (PEC-XVII)

Deficiency/Observation	**Response by Pharma.**
Provide API stability data as per Zone IV-A conditions. As stability data provided at following conditions: Stability study is conducted at Long Term conditions; 25°C ± 2°C / 60% ± 5%RH for 36 months and at Accelerated conditions; 40°C ± 2°C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24, 36 & 0, 1, 2, 3 & 6 months respectively.	Firm submitted Stability studies data as per zone IV-B and stated that it is more stressful than zone IV-A.
Description & solubility specifications of API as provided by the firm, termed as USP. However, these specifications are mentioned as "In-house" by the API	Description and Solubility test are not present in USP Monograph of Colistemethate Sodium.

manufacturer. Also do not exist in USP official monograph of API.	These are additional tests performed by API Manufacturer in addition to USP Tests.
Microbial contamination test/specifications given in API CoA by the firm. However, in analytical testing method of API, the same test not mentioned/provided.	Microbial contamination test is mention in Analytical Test Specification. This test is performed as per <USP 61>. *The firm again provided CoA of API from drug substance manufacturer.*
Provide legible/clear copy of DML of API manufacturer.	Firm submitted legible copy of DML of API manufacturer.
Initiation of stability studies mentioned as July-2020 in stability studies protocols, however, as per Stability study data sheet of trial batches, the initiation date given as 10-08-2020.	
The firm has mentioned in stability studies protocol, the Sterility test but the same has not been mentioned in stability studies data.	As per USP Monograph, Sterility test is not required for API testing. According to USP Colistimethate Sodium must be subjected to further processing during the preparation of injectable dosage forms. *Response of the firm has not clarified the query/observation.*
CoA of reference standard not provided.	Reference standard CoA will be provided. However, API Manufacturer CoA of lot being used in Developmental studies provided.
Justify use of non-sterile API (as evident from lack of sterility testing in CoA & import invoice of API) in manufacturing of injectable dosage form as labelling requirements of Colistimethate Sodium USP states "Where it is intended for use in preparing injectable dosage forms, the label states that it is sterile or must be subjected to further processing during the preparation of injectable dosage forms. However, as per manufacturing record of trial batches submitted, the sterilization process not mentioned.	As per USP Monograph, when label states that Colistimethate Sodium must be subjected to further processing during the preparation of injectable dosage forms, it meets the requirements for Bacterial endotoxins. As per submitted Manufacturing Record and CoA of FPP, BET is performed according to USP. *However, it is stated that as per manufacturing record of trial batches submitted by the firm, there is no details regarding the "further processing".* *USP monograph for Colistimethate sodium include the following labelling requirements:* ***Labeling**—Where it is intended for use in preparing injectable dosage forms, the label states that it is sterile or must be subjected to further processing during the preparation of injectable dosage forms.* ***Other requirements**—Where the label states that Colistimethate Sodium is sterile; it meets the requirements for Sterility and Bacterial endotoxins under Colistimethate for Injection. Where the label states that Colistimethate Sodium must be subjected to further processing during the preparation of injectable dosage forms, it meets the requirements for Bacterial endotoxins under Colistimethate for Injection.*
In API CoA, the assay limit given "on dried basis" as 11500 IU/mg, that has been used for trial batch calculation. The nominal potency of colistimethate sodium is 12500 IU/mg, which is more than that given for dried basis. Clarification is required regarding batch calculation on dried basis assay. Moreover, loss on	

drying limit mentioned in both API and finished drug product CoA is the same (not more than 7%).	
Clarification is required that how the content uniformity test is in accordance with USP general chapter <905> UNIFORMITY OF DOSAGE UNITS. Also clarify as to why the content uniformity test has not been performed at the required time point during stability studies as evident from the stability data sheets/reports submitted.	Content Uniformity test will be performed every 10th Batch and data will be submitted accordingly.
Contract manufacturing agreement required or not?	It will be provided.
The microbial assay performed is not as per USP monograph for "Colistimethate for Injection", general chapter "Antibiotics—Microbial Assays <81>". It is therefore required to clarify and justify as to how the assay procedure followed and data submitted is in accordance with USP general chapter of microbial assay <81>, both for drug substance & drug product.	As per USP <81>, Microbial Assay should be performed by cylinder plate assay (Diffusion Method), same is adopted by the firm. As far as concentrations are concerned, Concentrations recommended by USP is 1mg/ml and concentration adopted by the firm for low dose is 0.8mg/ml i.e., approximately 1.0mg/ml.
The firm has submitted specifications for the finished drug product as per USP. However, the specifications previously mentioned in Form-5, which was presented in 293rd meeting of registration board, wherein the board deferred the application for submission of stability study data, the specifications have been mentioned as BP. It is therefore advised to submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021 for drug product specifications revision.	It was typographical error in form 5. Otherwise, specifications of drug product are derived from USP.
The number of vials for stability studies of each batch given as 130vials and 60 vials for long term and accelerated stability studies respectively. Please specify, number of vials that has been utilized at each test point with reference to the tests performed.	As per testing specification 5 vials be used for real time and 5 for accelerated. Total 10 vial till 6Month time point and then 5 vials till claimed shelf life.

Decision: Deferred for following:

- **The firm has mentioned in stability studies protocol, the Sterility test but the same is not available in stability studies data.**
- **Justify use of non-sterile API (as evident from lack of sterility testing in CoA & import invoice of API) in manufacturing of injectable dosage form as labelling requirements of Colistimethate Sodium USP states "Where it is intended for use in preparing injectable dosage forms, the label states that it is sterile or must be subjected to further processing during the preparation of injectable dosage forms. However, as per manufacturing record of trial batches submitted, the sterilization process not mentioned.**
- **Justification for dispensed quantity of Colistimethate Sodium against the determined potency in terms of Colistimethate base activity (CBA).**
- **Clarification for considering nomial potency as 11500 IU/mg, for trial batch calculation is required. Since the nominal potency of Colistimethate sodium in literature is given as 12500 IU/mg.**
- **Justification of declared label claim in terms of Colistimethate sodium instead of Colistimethate base activity as recommended by USP as the firm claimed USP specifications for finished drug product.**
- **Initiation of stability studies mentioned as July-2020 in stability studies protocols, however, as per Stability study data sheet of trial batches, the initiation date given as 10-08-2020.**
- **Submitted CoA does not clarify the potency whether in terms of CBA or IU of CMS.**
- **As per stability data sheets/reports submitted, the content uniformity test data not provided. Submit content uniformity test data in line with USP general chapter <905> UNIFORMITY OF DOSAGE UNITS.**

- **The microbial assay performed is not completely as per USP monograph for "Colistimethate for Injection", general chapter "Antibiotics—Microbial Assays <81>", particularly the standard dilutions preparation, assay calculation/analysis etc.**
- **Submission of minimum handling capacity for processing of Colistimethate Sodium trial batches (Trial batch bulk volume given 600ml)**

Case No. 2: Registration applications for local manufacturing of (Human) drugs: (Differential Fee cases)

a. <u>New cases</u>:

500.	Name and address of manufacturer/ Applicant	Shrooq Pharmaceuticals (Pvt) Ltd. 21-Km, Ferozpur Road, Lahore.
	Brand Name + Dosage Form + Strength	Tolteri 4mg capsule
	Composition	Each capsule contains: Tolterodine tartrate.....4mg.
	Diary No. Date of R & I & fee	Dy.No. 513 dated 03-12-2012, Fee Rs: 8,000/-, Date.03-12-2012 (Challan photocopy dated 29-11-2012 provided) Dy.No. 410 dated 31-03-2015, Differential fee: Rs. 12,000 Dated 31-03-2015 (Challan No.0300889 dated 26-03-2015, photocopy provided) "Duplicate dossier, R & I verified"
	Pharmacological Group	Anti-cholinergic agent
	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications

	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications
	Pack size & Demanded Price	10's, 20's, As per SRO
	Approval status of product in Reference Regulatory Authorities	JALYN (0.5 mg Dutasteride and 0.4 mg Tamsulosin hydrochloride) capsules, USFDA approved
	Me-too status	Maxflow-D Capsule (Each capsule contains: Tamsulosin hydrochloride (extended-release pellets) eq to tamsulosin hydrochloride: 0.4mg; Dutasteride (as soft gel capsule): 0.5mg Of M/s CCL pharmaceuticals, Lahore. Registration No. 091571
	GMP status	GMP certificate dated 20-06-2019, based on evaluation conducted on 28-02-2019.

	Remarks of the Evaluator (PEC-XVII)	• Capsule (General & Antibiotic) Sections mentioned in DML renewal letter No.F.2-3/98-Lic (Vol-II) dated 17-07-2019. • Provide most recent/last GMP inspection report. • The product approved in reference country contains Tamsulosin HCl SR pellets and soft gel capsule of Dutasteride filled in hard gelatin capsule shell. Provide the following information regarding manufacturing of the product. • Provide source of Tamsulosin Pellets, GMP certificate of pellet manufacturer, Certificate of analysis, stability study data of 3 batches according to the climatic conditions of zone IV-A and in case of imported pellets submit differential fee as well. • Provide source of Dutasteride soft gel capsule. In case of In-house manufacturing of Dutasteride soft gel capsule, provide approval of relevant section/manufacturing facility that is soft gel capsule section. In case of imported dutasteride soft gel capsule, provide the following along with the submission of differential fee: • Certificate of analysis. • Attested copy of valid Drug Sale License. • Attested copy of Valid Sole agency agreement /Authority letter. • Original Embassy attested CoPP. • Original Embassy attested GMP certificate of manufacturer. • Accelerated stability study data & Long-term Stability studies according to Zone IV-A. • Revise label claim as per reference product as: Each capsule contains: Tamsulosin hydrochloride (extended-release pellets) eq to tamsulosin hydrochloride……...0.4mg Dutasteride (as soft gel capsule) ……0.5mg • Complete method of manufactur of tamsulosin and dutasteride soft gel capsule into final dosage form. • Manufacturing facility and equipment for manufacturing. • Evidence of availability of manufacturing facility/equipment that is “capsule in capsule filling” machine. • For above revisions, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021. • The drug product, FLODART™ (Dutasteride and

		Tamsulosin hydrochloride) Capsules, is a pre-printed hard-shell capsule containing one Dutasteride soft gelatin capsule (0.5 mg Dutasteride) and Tamsulosin hydrochloride pellets (containing 0.4 mg Tamsulosin hydrochloride). The pre-printed hard-shell capsules, size 00, have a brown body and an orange cap imprinted with "GS 7CZ" in black ink. The strength of each active component is identical to the commercially available AVODART®, 0.5 mg Dutasteride and FLOMAX®, 0.4 mg Tamsulosin hydrochloride. The capsules are manufactured by encapsulating two intermediate products: A Dutasteride soft gelatin capsule and Tamsulosin hydrochloride pellets, referred to as a Dutasteride Product Intermediate and Tamsulosin Hydrochloride Product Intermediate, respectively. Dutasteride Product Intermediate contains the same dose of Dutasteride as AVODART® (Dutasteride) soft gelatin capsules. The Tamsulosin Hydrochloride Product Intermediate contains the same dose as FLOMAX® (Tamsulosin hydrochloride) capsules (NDA # 20-579). The combination drug product is formulated to be bioequivalent to both commercial AVODART® and FLOMAX® dosed concomitantly. The combination capsule is intended to provide greater convenience to patients and improved compliance, relative to a regimen of two separate dosage units per day
	Decision: Deferred for: • **Drug Manufacturing License of the firm has been suspended by the CLB in its 280th meeting dated 26-27th April 2021.** • **Revision of label claim as per reference product as:** **Each capsule contains:** **Tamsulosin hydrochloride (extended-release pellets) eq to tamsulosin HCl…0.4mg** **Dutasteride (as soft gel capsule) ……0.5mg** • **Source of Tamsulosin Pellets, GMP certificate of pellet manufacturer, Certificate of analysis, stability study data of 3 batches according to the climatic conditions of zone IV-Al.** • **In case of In-house manufacturing of Dutasteride soft gel capsule, provide evidence of approval of requisite manufacturing facilities (Soft gel capsule Section) by Licensing Division.** • **In case of imported dutasteride soft gel capsule, provide certificate of analysis, Attested copy of valid Drug Sale License, Attested copy of Valid Sole agency agreement /Authority letter, Original Embassy attested CoPP, Original Embassy attested GMP certificate of manufacturer, Accelerated stability study data & Long-term Stability studies according to Zone IV-A conditions.** • **Complete method of manufactur of tamsulosin and dutasteride soft gel capsule into final dosage form.** • **Evidence of availability of manufacturing facility/equipment that is "capsule in capsule filling" machine.** • **Submission of fee applicable fee for pellets source fixation as per notification No.F.7-**

	Pharmacological Group	Synthetic anticholinergics, esters with tertiary amino group
	Type of Form	Form-5
	Finished product Specification	Manufacturer specifications
	Pack size & Demanded Price	120ml; As per SRO
	Approval status of product in Reference Regulatory Authorities	MODULON CHILD AND INFANT 4.8 mg / ml, granulated (granules composition per 100 g

		>trimebutine: 0.7870 g) for oral suspension in vial. **ANSM** approved
	Me-too status	Tributine Suspension (trimebutine maleate). Reg. No. 031964 (tributine 0.48gm/100ml or 24mg/5ml)
	GMP status	GMP certificate dated 25-08-2022 based on evaluation conducted on 12-08-2022.
	Remarks of the Evaluator (PEC-IX)	• The me-too product contains trimebutine maleate, while the international product contains trimebutine. • The firm revised the formulation from 'powder for suspension' to 'granules for suspension'. • The firm was asked to provide complete finished product specification and testing method. However, the firm did not submit the same.
	Decision of 288th meeting of Registration Board (14-15th Feb,2019)	• Deferred for following: • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm. • Submission of complete finished product specification and testing method including dissolution test and content uniformity test. • Submission of fee for revision of formulation. • Consideration on its turn.
	Remarks of the Evaluator (PEC-XVII)	• The firm has claimed manufacturer specifications. Official monograph not available. • Dry Powder Suspension (General) Section approved vide DML renewal letter No.F.2-11/2002-Lic (Vol-I) dated 26-05-2022. • The approval status in ANSM is either archived or repealed. • Firm provided generic/me-too evidence as Debridat Oral Suspension (Each 100ml contains: Trimebutine….0.48gm) of M/s Zafa Pharmaceutical Labs (Pvt.) Ltd. Karachi. Registration No.016064. • For above revisions, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
	Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities which were adopted/declard by Registration Board in its 275th meeting as the approval status in ANSM France is either arhived or repealed.	

Case No. 3: Registration applications for local manufacturing of (Veterinary) drugs. (Differential fee)

a; New cases:

691.	Name and address of manufacturer/ Applicant	Zumars Pharma FTY. Pvt. Ltd. Plot No.02, Malir Industrial Area, Malir, Karachi.
	Brand Name + Dosage Form + Strength	LEVAMARS 1.5% Oral Suspension
	Composition	Each 1000ml suspension contains: Levamisole Hydrochloride……15gm Carrier Q.S to……1000ml
	Diary No. Date of R & I & fee	Form- 5, Dy. No.248 dated 28-05-2011 Rs.8000/- dated 28-05-2011 (original) Dy.No.377-R&I (DRAP) dated 04-05-2016, Differential fee Rs.12000/- dated 04-05-2016 vide Challan No.0551828 dated 03-05-2016. (Original Dossier)
	Pharmacological Group	Anthelmintic/dewormers
	Type of Form	Form 5
	Finished product Specification	BP specifications
	Pack size & Demanded Price	100ml, 250ml, 500ml, 1000ml, 5 litres, De-controlled
	Approval status of product in Reference Regulatory Authorities	Not applicable
	Me-too status	Levami 1.5% suspension (Levamisole HCl…...1.5%) of M/s Inshal Pharma, Rawat, Islamabad. Registration No.075757 Levamit Drench (Oral Drench), Each ml contains levamisole HCl…15mg Wimitis pharmaceuticals, Lahore. RegistrationNo.078333 Levomex Drench (Oral Drench) Levamisole HCl….1.5%, Hawk Biopharma, Rawalpindi. Registration No.078391
	GMP status	Not provided
	Remarks of the Evaluator (PEC-XVII)	• In response to deficiency letter No.F.1-1/2017/PEC-DRAP (AD PEC-V) dated 23rd November, 2018, you vide letter No. ZPF/Inch (PEC)/001/DRAP/2019, dated nil specified the proposed route of administration as "oral suspension", revised the master formulation by replacing the coloring agent from tartrazine yellow to Parrot green and excluded the 2% overage of Levamisole hydrochloride in master formulation. It is therefore advised to submit the requisite fee accordingly. • The finished drug product specifications such as assay and identification are given as per B.P monograph for "Levamisole oral solution", while the applied formulation is "Oral Suspension". Please clarify? • Provide most recent GMP inspection report conducted within last three years.
	Decision: Approved with BP specifications and revised label claim as: **Each 1000ml oral solution contains:** **Levamisole hydrochloride…….15gm.** **Registration letter shall be issued upon submission of following documents:** • **GMP audit report from QA & LT Division, valid within last three years.** • **Firm shall submit the fee of Rs. 30,000 for correction/pre-approval change in composition (correction/change of formulation from suspension to solution), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**	
692.	Name and address of manufacturer/ Applicant	Zumars Pharma FTY. Pvt. Ltd. Plot No.02, Malir Industrial Area, Malir, Karachi.

Item No. XVI: Agenda of Evaluator-III

Case No. 01 Registration applications of New section / New License

Case No. 01: M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi

M/s Biogen Life Sciences, Rawalpindi has been granted new license (DML No. 000911) by way of formulation by Licensing division DRAP dated 13-02-2020. Now the firm has submitted following applications as per the details mentioned in the table below:

Name of Section	Considered till 317th RB meeting		Freshly applied	
	No of molecules	No of products	No of molecules	No of products
Dry Vial section (Cephalosporin)	03	12	-	-

Dry suspension section (Cephalosporin)	01	02	-	-
Capsule section (Cephalosporin)	02	02	-	-
Ampoule Section SVP (General)	05	07	-	-
Capsule section (General)	03	05	-	-
Dry Vial section (General)	03	04	-	-
Soft gel capsule general section	02	03	-	-
Hydrocortisone injection (steroid)	01	03	-	-
Sachet section (General)	01	01	-	-
Dry Vial section (Carbapenem)	02	03	-	-
Cream section (general)	02	02	-	-
Ointment section (General)	01	01	-	-
Lotion section (General)	01	01	-	-
Infusion Section (General)	02	02	-	-
Tablet (General) Section	-	-	01	01

Tablet (General) Section: 01 Molecule / 01 Product

706.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Tablet section (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 5414: 25-02-2022
	Details of fee submitted	PKR 30,000/-: 30-12-2021
	The proposed proprietary name / brand name	**MOXIGEN 400mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film coated tablet contains: Moxifloxacin as HCl……400mg
	Pharmaceutical form of applied drug	Yellow Colored, oblong, biconvex film coated tablets
	Pharmacotherapeutic Group of (API)	Fluoroquinolone antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Avelox 400 mg Tablet **(MHRA** Approved)
	For generic drugs (me-too status)	Avelox Tablet by Bayer

	Name and address of API manufacturer.	Shree Je Laboatory Pvt. Ltd. C-24 & 25 RIICO Industrial Area, Sotanala, Behror, District Alwar, Rajasthan India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Moxiget Tablet of Getz Pharma. Firm has submitted results of CDP studies in three dissolution medium for their product against Moxiget Tablet of Getz Pharma.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Shree Je Laboatory Pvt. Ltd. C-24 & 25 RIICO Industrial Area, Sotanala, Behror, District Alwar, Rajasthan India.
API Lot No.	MXYUSU001
Description of Pack (Container closure system)	Glass vials
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	T-002	T-003
Batch Size	1000 Tablets	1000 Tablets	1000 Tablets
Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	06-04-2021	06-04-2021	06-04-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 2019/203) issued by Drugs control Organization, Government of Rajasthan India dated 07-02-2019. The GMP certificate is valid upto three years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 08-03-2021 specifying purchase of 2.5Kg Moxifloxacin. Firm has also submitted copy of DHL invoice number 270400305DTD.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC system are not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data of verification of analytical procedure of drug substance	Firm has submitted report of verification studies of the drug substance from Biogen Life Sciences.
2.	Submit stability study data of drug substance till claimed shelf life as per zone IV-A conditions, since the submitted stability study data is till 1 year only.	Firm has submitted API stability data till 1 year.
3.	Justify why the pharmaceutical equivalence studies were conducted against the comparator product instead of using innovator / reference product.	Due to easily Access of the comparator Moxiget 400mg Tab in market that way the firm (Biogen Life Sciences) preform Pharmaceutical Equivalence & Comparative Dissolution studies with Moxiget 400mg Tablet

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

- **Manufacturer shall submit Pharmaceutical Equivalence and Comparative dissolution profile studies with Innovator product before issuance of registration letter.**

Case No. 02 Registration applications on Form5F.

a. New cases of local manufacturing

707.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Saaaf Pharmaceutical Industries. 15-Nowshera Industrial Estate, Risalpur**

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Contract manufacturing agreement dated 21-04-2017 is submitted
	GMP status of the firm	Firm has been granted new DML by way of formulation dated 06-11-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of Section approval letter dated 06-11-2019 specifying Dry Vial Injection section (Carbapenem).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 25417: 13-09-2021
	Details of fee submitted	PKR 75,000/-: 02-09-2021
	The proposed proprietary name / brand name	**SAFENEM 500mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate)……..500mg (Blended with sodium carbonate)
	Pharmaceutical form of applied drug	Glass vial filled with almost white powder along with 10ml ampoule of WFI further packed in unit carton.
	Pharmacotherapeutic Group of (API)	Carbapenem
	Reference to Finished product specifications	USP
	Proposed Pack size	1’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Meronem Injection by ICI Pakistan Ltd.

	Name and address of API manufacturer.	Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Meronem 500mg injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization, Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Bio-Next Pharmaceuticals have already been approved by Registration Board in its 296th meeting based on the data of same trial batches of drug product as submitted in the instant case. The details of the already approved product in 296th meeting are as follows:

Applicant firm	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
Manufacturer firm	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
Brand Name	MENEPOR 500 mg Injection IV
Batch No. of drug product	MR-001 (350 vials), MR-002 (350 vials), MR-003 (350 vials)

Case No.	14
Registration Board meeting	296th meeting of Registration Board held on (8th, 9th & 10th September 2020)

- The stability data of commercial batches of the same formulation manufactured by M/s Bio-Next Pharmaceuticals have also already been approved by Registration Board in its 320th meeting based The details of the already approved product in 320th meeting are as follows:

Applicant firm	M/s Gray's Pharmaceuticals Plot No. 2, Street # N-3, National Industrial Zone Rawat Islamabad.
Manufacturer firm	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
Brand Name	GRAYNEM 500 mg Injection IV
Batch No. of drug product	21E001 (14084 vials), 21E002 (14084 vials), 21E005 (14084 vials)
Case No.	197
Registration Board meeting	320th meeting of Registration Board held on (29th-31st August, 2022)

- Registration Board in its 321st meeting decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.**

708.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Saaaf Pharmaceutical Industries. 15-Nowshera Industrial Estate, Risalpur**
	Name, address of Manufacturing site.	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Contract manufacturing agreement dated 21-04-2017 is submitted
	GMP status of the firm	Firm has been granted new DML by way of formulation dated 06-11-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of Section approval letter dated 06-11-2019 specifying Dry Vial Injection section (Carbapenem).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 25418: 13-09-2021
	Details of fee submitted	PKR 75,000/-: 02-09-2021
	The proposed proprietary name / brand name	**SAFENEM 1gm IV Injection**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate)……..1g (Blended with sodium carbonate)
	Pharmaceutical form of applied drug	Glass vial filled with almost white powder along with 20ml ampoule of WFI further packed in unit carton.
	Pharmacotherapeutic Group of (API)	Carbapenem
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Meronem Injection by ICI Pakistan Ltd.
	Name and address of API manufacturer.	Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their

		product against the comparator i.e. Meronem 1g injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and drug product.

STABILITY STUDY DATA

Manufacturer of API	Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India.		
API Lot No.	UIMRPS19021		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	MR-004	MR-005	MR-006
Batch Size	350 vials	350 vials	350 vials
Manufacturing Date	01-2020	01-2020	01-2020
Date of Initiation	07-01-2020	07-01-2020	07-01-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product to be manufactured by M/s Bio-Next Pharmaceuticals have already been approved by Registration Board in its 296th meeting based on the data of same trial batches of drug product as submitted in the instant case. The details of the already approved product in 296th meeting are as follows:

Applicant firm	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
Manufacturer firm	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
Brand Name	MENEPOR 1g Injection IV
Batch No. of drug product	MR-004 (350 vials), MR-005 (350 vials), MR-006 (350 vials)
Case No.	15
Registration Board meeting	296th meeting of Registration Board held on (8th, 9th & 10th September 2020)

- The stability data of commercial batches of the same formulation manufactured by M/s Bio-Next Pharmaceuticals have also already been approved by Registration Board in its 320th meeting based The details of the already approved product in 320th meeting are as follows:

Applicant firm	M/s Gray's Pharmaceuticals Plot No. 2, Street # N-3, National Industrial Zone Rawat Islamabad.
Manufacturer firm	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
Brand Name	GRAYNEM 1g Injection IV
Batch No. of drug product	21E008 (10563 vials), 21E009 (10563 vials), 21E010 (10563 vials)
Case No.	198
Registration Board meeting	320th meeting of Registration Board held on (29th-31st August, 2022)

Registration Board in its 321st meeting decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.**

	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real

		time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator Colistimethate sodium 1MIU Injection.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Hebei Shengxue Dacheng Co. Ltd. No. 50, Shengxue Road No. 17 Fuqiangxi Road, Luacheng County, Hebei Province P.R China.		
API Lot No.	HN190202		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T010	T011	T012
Batch Size	500 vials	500 vials	500 vials
Manufacturing Date	02-2020	02-2020	02-2020
Date of Initiation	16-02-2020	17-02-2020	18-02-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20190058) issued by CFDA China. The certificate is valid till 14-08-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 02-02-2020 specifying import of 0.5Kg Colistimethate. The invoice is not attested by AD (I&E) DRAP Field office. The firm has submitted copy of DHL invoice (Invoice No. 20HS-091) for the import of drug substance.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, and pictures of the petri dishes showing zone of inhibitions following the microbial assay.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- The submitted data was already approved by Registration Board. The details of already approved product is as under:

Applicant firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Manufacturer firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Brand Name	LISTIM Injection 1 MIU (IV)
Batch No. of drug product	T010 (500 vials), T011 (500 vials), T012 (500 vials)
Case No.	235
Registration Board meeting	297th meeting of Registration Board.

Decision: Approved.

- **Firm shall submit differential fee 25,000/- for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding Review of Colistimethate for Injection along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi**

712.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Valor Pharmaceuticals. 124/A Industrial Triangle, Kahuta Road Islamabad.**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 25-03-2021.
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.

	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry vial section (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy og DML of the firm (permit number Min 20160089) issued and available online on NMPA China Website. The certificate is valid till 21-09-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 3.005Kg Colistimethate sodium. The invoice is attested by AD (I&E) DRAP Lahore dated 27-02-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not available
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Observation	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by	Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer.

	both Drug substance & Drug Product manufacturer is required."	
2.	Provide verification studies of drug substance from drug product manufacturer in section 3.2.S.4.3.	Firm has submitted verification studies of drug substance from drug product manufacturer.
3.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product in section 3.2.S.4.4, since COA of different batches is provided in this section.	Firm has submitted COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product having batch number CMS1811008.
4.	Provide details including batch number, expiry date and manufacturer of the reference product against which pharmaceutical equivalence studies have been carried out.	Pharmaceutical equivalence is established by comparing ingredients of Colistimethate sodium 2 MIU Injection (Powder for solution for injection) manufactured by "XELLIA PHARMACEUTICAL APS, DENMARK". This medicinal product is authorized in the Member States of the EEA like in France & UK.
5.	Justify why pharmaceutical equivalence studies does not include complete testing as per USP monograph.	As this product specification comply with the Pharmacopoeial reference & all parameters verified with the product specifications as well. So, Pharmacopoeial equivalence does not required in this scope.
6.	Provide details in sections 3.2.P.2.6 as per the CTD guidance document which specifies that "Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product."	As no excipient is added with API in manufacturing process of Drug Product so, compatibility studies are not required.
7.	Your manufacturing method specifies that the product is lyophilized within the vials after solution preparation and filling while your approved manufacturing facility is for dry powder vial general. Justify where the manufacturing of applied product was carried out.	The reference Product as well as our Product is not lyophilized.
8.	Justify why your drug product specification does not contain pH and free colistin test as specified in USP monograph.	pH and free colistin tests are missed due to typographical mistake. Updated Analytical method is provided.
9.	The analytical method for drug product contains bioassay method while the verification studies are carried out usig HPLC method. Justification is required in this regard.	The Drug Product is analyzed by Bioassay as mentioned in analytical method but HPLC method is erroneously added in Verification studies due to typographical mistake.
10.	Provide COA of reference standard actually used in the analysis of drug product.	Lot No. R07870 of Colistimethate Sodium USP Reference standard is used.
11.	Provide BMR of three stability batches.	Firm has submitted copy of BMR of 3 batches.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding Review of Colistimethate for Injection along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**

Manufacturing Date	10-2020	10-2020	10-2020
Date of Initiation	13-10-2020	13-10-2020	13-10-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy og DML of the firm (permit number Min 20160089) issued and available online on NMPA China Website. The certificate is valid till 21-09-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 3.005Kg Colistimethate sodium. The invoice is attested by AD (I&E) DRAP Lahore dated 27-02-2020.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not available
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Observation	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer.
2.	Provide verification studies of drug substance from drug product manufacturer in section 3.2.S.4.3.	Firm has submitted verification studies of drug substance from drug product manufacturer.
3.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product in section 3.2.S.4.4, since COA of different batches is provided in this section.	Firm has submitted COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product having batch number CMS1811008.
4.	Provide details including batch number, expiry date and manufacturer of the reference product against which pharmaceutical equivalence studies have been carried out.	Pharmaceutical equivalence is established by comparing ingredients of Colistimethate sodium 2 MIU Injection (Powder for solution for injection) manufactured by "XELLIA PHARMACEUTICAL APS, DENMARK". This medicinal product is authorized in the Member States of the EEA like in France & UK.
5.	Justify why pharmaceutical equivalence studies does not include complete testing as per USP monograph.	As this product specification comply with the Pharmacopoeial reference & all parameters verified with the product specifications as well. So, Pharmacopoeial equivalence does not required in this scope.
6.	Provide details in sections 3.2.P.2.6 as per the CTD guidance document which specifies that "Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product."	As no excipient is added with API in manufacturing process of Drug Product so, compatibility studies are not required.
7.	Your manufacturing method specifies that the product is lyophilized within the vials after solution preparation and filling while your approved manufacturing facility is for dry powder vial general. Justify where the manufacturing of applied product was carried out.	The reference Product as well as our Product is not lyophilized. As per imported API the appearance is "white to slightly yellow odourless fine powder"
8.	Justify why your drug product specification does not contain pH and free colistin test as specified in USP monograph.	pH and free colistin tests are missed due to typographical mistake. Updated Analytical method is provided.
9.	The analytical method for drug product contains bioassay method while the verification studies are carried out usig HPLC method. Justification is required in this regard.	The Drug Product is analyzed by Bioassay as mentioned in analytical method but HPLC method is erroneously added in Verification studies due to typographical mistake.
10.	Provide COA of reference standard actually used in the analysis of drug product.	Lot No. R07870 of Colistimethate Sodium USP Reference standard is used.
11.	Provide BMR of three stability batches.	Firm has submitted copy of BMR of 3 batches.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding Review of Colistimethate for Injection along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted online copy of manufacturing license of the firm having permit number 20160089 issued by NMPA China. The license is valid till 21-09-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 1Kg Colistimethate sodium. The invoice is attested by AD (I&E) DRAP dated 11-09-2020 for batch # CMS2005002.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted raw data sheets for calculation of results of assay.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not available
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The innovator product Coly-Mycin® M Parenteral (Colistimethate for Injection, USP) is approved by USFDA wherein Each vial contains colistimethate sodium or pentasodium colistinmethanesulfonate (150 mg colistin base activity). As per MHRA and EU approved conversion table for dose of colistimethate sodium (CMS) 150mg CBA is equivalent to 4500000 (4.5MIU).

Sr. No	Observation	Response by the firm
1.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product in section 3.2.S.4.4, since COA of different batches is provided in this section.	COA of relevant batch of drug substance (Batch No. CMS 2005002) used in manufacturing of batches of drug product is enclose
2.	Provide details including batch number, expiry date and manufacturer of the reference product against which pharmaceutical equivalence studies have been carried out.	Xylistin 4.5 MIU (Colistimethate Sodium 4.5MIU) reference product use in pharmaceutical equivalence studies. Details are as follows: Manufactured By: Cipla LTD. Batch No.: L610246 Mfg. Date: Jun.21 Exp. Date: May 23
3.	Justify why pharmaceutical equivalence studies does not include complete testing as per USP monograph.	Firm has now submitted pharmaceutical equivalence with complete tests as per USP
4.	Provide details in sections 3.2.P.2.6 as per the CTD guidance document which specifies that "Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product."	Firm has submitted compatibility studies /In-Use studies for the Colistimethate sodium injection.
5.	Provide COA of reference standard actually used in the analysis of drug product.	Firm has submitted COA of reference standard along with standardization record.
6.	Justify why sterility test is not performed during stability studies.	Trial batches for stability studies were manufactured in Research & Development Department, that's why sterility studies were not conducted, however for

		commercial batches sterility testing will be perform before QC release as well as on stability studies. Firm has also submitted the following response: NabiQasim is the only company that has a highly automated Lyophilized vial inspection machine and this facility has 100% non-destructive vial testing ensuring that oxygen and moisture content is not present in vials that could lead to degradation of the active substances causing a loss in efficacy and quality of the product. Colistimethate Sodium 4.5 MIU for development studies was manufactured in the R&D Lab facility by using an R&D dedicated Lab scale Lyophilizer. As your good self-ask about sterility testing of Colistimethate Sodium 4.5 MIU on development batches, now we have developed a trial batch of Colistimethate Sodium 4.5MIU in our state-of-the-art commercial Lyophilized facility and **till to date** sterility of product has been found satisfactory. Finished product Specifications to conduct sterility testing on Colistimethate Sodium Injection 4.5 MIU is enclosed for your ready reference for QC commercial release and stability batches. Moreover, NabiQasim Industries Private Limited already manufacturing and marketing Lyophilized Branded Generic Products as follows: • Remdesivir 100mg Injection • Colistimethate Sodium 1MIU • Colistimethate Sodium 2 MIU • Colistimethate Sodium 3 MIU
7.	Justify how 300 vials batch size is sufficient enough to complete the accelerated and real time stability studies of the product.	Please note that actual batch size as per BMR of stability batches is 200 vials. Batch size mention on stability summary sheet is 300 vials which was a typo-error. As per stability protocol 190 vials were collected for stability studies. Revise stability summary sheet is enclose for your ready reference. Justification letter for 200 vials of each batch is sufficient enough for stability studies. **Total Vials require** Description/Appearance = 01 pH = 01 Loss on Drying = 01 Free Colistin = 01 Bacterial Endotoxin Test = 02 Assay = 02 **Total Vials = 08** **Total Intervals (Real Time Stability)** = 06 Total Vials Required for Real Time Stability Studies =6*08 =48 vials **Total Intervals (Accelerated Stability)** = 02 Total Vials Required for Accelerated Condition Stability Studies =02*08 =16 vials Although batch size is of 200 Vials, we place 130 Vials for Real Time condition stability studies and 60 Vials for Accelerated Condition stability studies which are sufficient enough to conduct stability studies till proposed shelf life period.

8.	Specify where the manufacturing of trial batches was carried out including details of the equipment as well as its minimum capcity to justify the sterile solution preparation for 300 vials.	Manufacturing of trial batches was carried out in R&D facility having R&D Lab scale lyophilizer equipment and approximately 600 vials can be lyophilized at a time.
9.	Submit Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin, since the submitted "VAI" inspection report of FDA does not specify the exact address of manufacturing site.	Firm has submitted online copy of manufacturing license of the firm having permit number 20160089 issued by NMPA China. The license is valid till 21-09-2025.
10.	Provide BMR of three stability batches.	Firm has submitted BMR of three stability batches.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding "Review of Colistimethate for Injection" along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of License Retention Certificate for License number 3/NG/TS/2015/B/G of M/s Optrix Laboratories Pvt Ltd. The license is permitted with validity upto 02-06-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Clearance certificate dated 06-09-2018 specifying import of 50Kg Linezolid. The clearance certificate is issued by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC system are not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Observation	Response by the firm
1.	The drug substance manufacturer has specified HPLC test for assay of drug substance while the drug product manufacturer has specified UV method for assay of drug substance. Justify how drug product manufacturer can adopt different test for assay method from that recommended by the drug substance manufacturer.	The drug substance testing was done by UV method at that time, but currently we are using HPLC method for both API and finished product. Revised SOP is submitted by the firm.
2.	Justify why the pharmaceutical equivalence studies were conducted against the comparator product instead of using innovator / reference product. Further justify why pharmaceutical equivalence does not include all quality tests.	Pharmaceutical equivalence study was done against Nezkil of continental pharma as it is among brand leaders in Pakistan and registered/approved by DRAP. All tests have been performed.
3.	Justify why the test for filled volume is not specified in the specifications of the drug product	The filled volume test was performed and the test reports are attached.

	although this test is recommended in general monograph of official pharmacopoeia.	
4.	Justify why terminal sterilization is not performed for the said product although being the method of choice for sterilization.	Terminal sterilization is performed and also mentioned in BMR.
5.	Justify the pH of the drug product from 4.4 to 5.5 since the pH range recommended by the innovator's product is 4.4-5.2.	Linezolid infusion batches kept on stability have pH almost in the range of 4.6 to 4.8, and this is in limit of 4.4 to 5.2, However, we will Revise the pH limit as according to innovator specs and will revise the testing SOP.
6.	Justify the analytical method for assay testing of the drug product which is based on UV method since the innovator's product as well as the drug substance manufacturer specify HPLC method for assay test.	As this product is not pharmacopeial, so previously batches were tested according to the method of UV spectrophotometer. Hence, the submitted stability batches were tested according to the previous testing method. Then, we had shifted to HPLC method effective from 13-9-2021, for which we have shared the revised SOP now. We are following this method for stability studies and stability data of batches tested according to this method. Revised SOP is attached

Decision: Approved with Innovator's specifications.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit fee 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Firm shall submit data of HPLC testing on recently manufactured batches of the applied drug product before issuance of Registration letter.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.**

718.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Limited. Plot No. 37, Sector 19, Korangi Industrial Area, Karachi**
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 29-05-2020 is submitted.
	GMP status of the firm	**Global pharmaceuticals:** GMP certificate issued on the basis of inspection dated 03-01-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000417 of M/s Global Pharmaceuticals Islamabad dated 18-12-2017 specifying reallocation of dry powder injection (carbapenem) section in place of withdrawn Biotech section (BSF)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales

	Dy. No. and date of submission	Dy. No. 24852: 08-09-2021
	Details of fee submitted	PKR 75,000/-: 28-08-2021
	The proposed proprietary name / brand name	**CIMIPEN 500mg/500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Imipenem (as monohydrate).……500mg Cilastatin (as sodium)……500mg
	Pharmaceutical form of applied drug	White to pale yellow powder filled in clear glass vials with grey rubber stopper and blue color flip off seal
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Primaxin Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Onem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	Zhuhai United Laboratories Co., Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District, Zhuhai City Guangdong Province China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 6 months. The real time stability data is conducted at 5°C ± 3°C for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Primaxin Injection IV of Merck & Co.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Zhuhai United Laboratories Co., Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District, Zhuhai City Guangdong Province China		
API Lot No.	3951902009 3951903005		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	19G096	19G097	19G098
Batch Size	9041 vials	9041 vials	9041 vials
Manufacturing Date	07-2019	07-2019	07-2019
Date of Initiation	07-08-2019	07-08-2019	23-08-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by China Food and Drugs Administration. The certificate is valid till 12-05-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**3951902009:** Firm has submitted copy of commercial invoice cleared dated 27-06-2019 specifying import of 50Kg imipenem and cilastatin for injection. The commercial invoice is attested by AD (I&E) DRAP field office.
		3951903005: No evidence of import is submitted for this batch.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm was communicated the following decision of Registration Board

Registration Board in its 313th meeting considered the case of Imipenem / Cilastatin injection manufactured by Global Pharmaceuticals, Islamabad wherein the Board decided as under:
"Registration Board deliberated that the commercial batches manufactured by the manufacturer i.e. Global Pharmaceuticals was not developed and tested as per the USP monograph. Keeping in view the USP monograph, public assessment report of the innovator product and the data submitted by the firm, the Board decided to defer the case and advised the manufacturer to perform product development studies keeping in view the innovator product and product testing and stability studies by complying USP monograph and submit data upon completion of 6 months stability studies".

In response the firm has submitted complete new CTD (Form 5F) with new data. The evaluation of newly submitted data is as under:

Dy. No. and date of submission	
Details of fee submitted	Fee for revised stability batches not submitted
The proposed proprietary name / brand name	**CIMIPEN 500mg/500mg Injection**
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Imipenem monohydrate eq. to imipenem…….500mg Cilastatin Sodium eq. to Cilastatin ……500mg
For generic drugs (me-too status)	Cilapen 500mg Injection of Bosch Pharmaceuticals Reg No. 048491
Name and address of API manufacturer.	M/s ACS DOBFAR S.p.A Viale Addetta 2a/12-3/5 20067 Tribiano, Milano- Italy
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
Stability studies	Stability study conditions: Real time: Temp.: 30°C ± 2°C, RH: 65% ± 5% for 36 month Accelerated: Temp.: 40°C ± 2°C, RH: 75% ± 5%for 6 months

	Batches: (990068 8004 2, 990068 8005 2, 990068 8006 2)
Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
Pharmaceutical equivalence and comparative dissolution profile	The Firm has performed pharmaceutical equivalence of their developed formulation Cinam 500mg injection (B #22A338) with reference product Cilapen 500mg Injection Batch No: CP200034 by Bosch Pharmaceuticals. The results showed that both test and reference products were comparable.
Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s ACS DOBFAR S.p.A Viale Addetta 2a/12-3/5 20067 Tribiano, Milano- Italy.	
API Lot No.	990068-0008-E1	
Description of Pack (Container closure system)	White to pale yellow color powder filled in clear glass vial, packed in Unit carton (1's)	
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH	
Time Period	Real time: 24 months Accelerated: 6 months	
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)	
Batch No.	22A337	22A338
Batch Size	5550 vials	5550 vials
Manufacturing Date	01-2022	01-2022
Date of Initiation	22-01-2022	22-01-2022
No. of Batches	02	

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Italian pharmaceutical Agency valid till 26/03/2025 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of and attested ADC (I&E) DRAP, Islamabad dated 02-06-2021 for Imipenem and cilastatin sodium sterile Batch No. 990068 0008 E1.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted Compliance Record of HPLC software 21CFR

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

- The diluent for reconstitution used by the firm is 10ml WFI while innovator and reference product recommend 10ml 0.9% NaCl injection.
- Firm is using 1081mg/ vial which is not justified keeping in view both drug substances are available as salt form where 530mg imipenem monohydrate is equivalent to 500 mg imipenem and 530 mg cilastatin sodium salt is equivalent to 500mg cilastatin. Furthermore, the COA of API depicts that the maximum percentage of both API could be 96.6% (48.3 % of individual API).
- The panel has conducted capacity assessment of the firm, M/s Global Pharmaceuticals on 21.10.2022 for following sections and has submitted report to PE&R Division for further processing:

1. Dry Powder Injection (Cephalosporin)
2. Dry Powder Injection (Penicillin)
3. Dry Powder Injection (Carbapenem)
4. Liquid Injection Ampoule (General)

Discussion: Registration Board was apprised that the firm has submitted response against the above mentioned observations on the day of meeting in which firm has submitted that in BMR they have mentioned 10ml WFI as diluent, however from now onwards they will use 10ml 0.9% NaCl solution as diluent as per the recommendations of innovator's drug product. Furthermore, the firm has also submitted calculation for fill weight of drug substance in the vials in which they have taken sodium contents as per innovator's drug product claim instead of using sodium contents as per the drug substance.

Decision: Approved.

- **M/s Global shall use 10ml 0.9% NaCl injection as diluent for the commercial batches and submit compatibility study with the 0.9%NaCl solution as diluent along with BMR of recently manufactured batches from M/s Global Pharmaceuticals, as evidence of use of the recommended diluent before issuance of Registration letter.**
- **Firm shall use correct fill weight per vial considering the sodium content as per the drug substance manufacturer's claim for the commercial batches and submit BMR of recently manufactured batches from M/s Global Pharmaceuticals as evidence of correct fill weight before issuance of Registration letter.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit full fee 75,000/- for revision of stability study data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 along with Pharmaceutical equivalence studies against the innovator product..**
- **Registration Board further authorized its Chairman for issuance of registration letter upon consideration of satisfactory capacity assessment of manufacturing and testing facility of M/s Global Pharmaceuticals.**

719.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Sigma Pharma International (Pvt) Ltd. Plot # E-50, North Western Industrial Zone, Port Qasim, Karachi.**
	Name, address of Manufacturing site.	M/s Sigma Pharma International (Pvt) Ltd. Plot # E-50, North Western Industrial Zone, Port Qasim, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 12-11-2020. The letter specifies Tablet (General) Section.

	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 12-11-2020. The letter specifies Tablet (General) Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 24405: 20-11-2019
	Details of fee submitted	PKR 20,000/-: 19-11-2019
	The proposed proprietary name / brand name	**TRED SR 100mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated sustained release tablet contains: Tramadol HCl……100mg
	Pharmaceutical form of applied drug	White color round shaped film coated sustained release tablet with line of bisection on one side.
	Pharmacotherapeutic Group of (API)	Analgesic
	Reference to Finished product specifications	USP
	Proposed Pack size	1 x 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MHRA Approved**
	For generic drugs (me-too status)	Tramal SR Tablet by Searle
	Name and address of API manufacturer.	Supriya Lifescience Ltd., A-5/2, Lote Parshuram Industrial Area, M.I.D.C. Taluka – Khed, District – Ratnagiri, Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 12 months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product Tramal SR Tablet by Searle. Firm has submitted results of CDP for their product against the comparator product Tramal SR Tablet by Searle. The CDP is performed in 3 dissolution medium.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Supriya Lifescience Ltd., A-5/2, Lote Parshuram Industrial Area, M.I.D.C. Taluka – Khed, District – Ratnagiri, Maharashtra, India		
API Lot No.	SLL/TDM/0121006		
Description of Pack (Container closure system)	Alu-PVC		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Manufacturing Date	07-2021	07-2021	07-2021
Date of Initiation	06-07-2021	20-07-2021	28-07-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No PSI of the firm has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 6099317) issued by Food & Drugs Administration (Maharashtra State) India. The certificate is valid till 29-04-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice from Globe Chemicals GmbH cleared by AD (I&E) DRAP dated 22-04-2021. The invoice declare purchase of 300Kg Tramadol HCl.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted stability study data of 3 batches along with water loss test at each time

	chromatograms, Raw data sheets, COA, summary data sheets etc.	point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	HPLC system is not 21 CFR compliant
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Firm has submitted initial application on Form 5F on 20-11-2019 before the start of process of CTD pre-submission screening. The initial application was without any product development or stability study data. Later in response to the letter of shortcoming the firm submitted product development and stability study data on 05-10-2021.
- The real time stability study data of API is till 12 months only.
- GMP certificate of API was valid till 29-04-2022.
- Real time stability study data was conducted at 0, 6, 12, 18, 24 month and does not include testing at 3 and 9 months.

Decision: Registration Board observed that the firm has submitted various documents at different time intervals and that completely compiled application is not submitted. The Board after thorough deliberation decided to defer the case for submission of complete application on Form 5-F as per the guidance document approved by Registration Board.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability data of 3 batches of API at accelerated and real time conditions**.**
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Colixin Injection of Pharmis Biofamaceutica
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Hebei Shengxue Dacheng Pharmaceutical Co Ltd. No. 50 Shengxue Road Launcheng District Shijiazhuang, Hebei Province, China		
API Lot No.	HN180401		
Description of Pack (Container closure system)	Clear glass vial		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 3, 6 (Months) Real Time: 0, 1, 3, 6 (Months)		
Batch No.	Trial 05	Trial 06	
Batch Size	2700 packs	2700 packs	
Manufacturing Date	06-2020	06-2020	
Date of Initiation	15-07-2020	15-07-2020	
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate (No. HE20190058) issued by China Food and Drug Administration valid upto 14-08-2024 is submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 8Kg Colistimethate sodium. The invoice is attested by AD (I&E) DRAP Lahore dated 19-11-2018 for batch # HN180401
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted Stability data along-with HPLC chromatograms and raw data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not available

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The submitted product development and stability study data of manufacturer is already approved in 320th meeting in Coliate 4.5MIU Injection case of M/s English Pharmaceuticals Industries. Link Kattar Bund Road, Thokar Niaz Baig, Multan Road, Lahore.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding Review of Colistimethate for Injection along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s. English Pharmaceutical Industries, Link Kattar Bund Road, Thokar Niaz Baig, Multan Road, Lahore.**

722.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Daneen Pharma Pvt Ltd. 27, Sundar industrial Estate, Sundar Raiwind Road, Lahore**
	Name, address of Manufacturing site.	M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement between contract giver and contract acceptor dated 18-12-2017.
	GMP status of the firm	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 28-10-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate dated 30-10-2019 which specifies Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22650: 17-08-2021
	Details of fee submitted	PKR 50,000/-: 26-07-2021 + PKR 25,000/-: 10-06-2021
	The proposed proprietary name / brand name	**ROXET CR 12.5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each enteric, film-coated, controlled-release tablet contains: Paroxetine (as hydrochloride)…..12.5mg
	Pharmaceutical form of applied drug	Green color, round, biconvex enteric coated tablets, plain from both sides
	Pharmacotherapeutic Group of (API)	Selective serotonin reuptake inhibitors
	Reference to Finished product specifications	USP
	Proposed Pack size	10’s, 20’s, 30’s, 50’s, 100’s

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Paxil CR Tablet **(USFDA** Approved)
	For generic drugs (me-too status)	Paraxyl Tablet by CCL Pharmaceuticals
	Name and address of API manufacturer.	Zhejiang Haisen Pharmaceutical Co Ltd. Liushi Street, Dongyang city, Zhejiang Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Seroxat CR 12.5 mg Tablet.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "WYMLY Tablets 25mg (Tenofovir Alafenamide)", which was conducted on 09-04-2018, and was presented in 281st meeting of Registration Board held on 11-13th April, 2018. Registration Board decided to approve registration of WYMLY Tablets 25mg (Tenofovir Alafenamide)", by M/s. Genix Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for 26 weeks. Following observations were reported in the report: • The HPLC software is 21CFR complaint and having certificates of compliance by USFDA. • Audit trail on the testing reports of WYMLY Tablets 25mg (Tenofovir Alafenamide) is available. • Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. ZJ20180136) issued by China Food and Drug Administration dated 14-11-2018. The certificate is valid till 13-11-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Paroxetine HCl 1Kg from M/s Zhejiang Haisen Pharmaceutical Co Ltd. Liushi Street, Dongyang city, Zhejiang Province China issued by AD (I&E) DRAP field office. The license was issued on 17-06-2019. • Firm has submitted copy of commercial invoice specifying import of 1Kg Paroxetine HCl. The invoice was signed by AD (I&E) DRAP field office dated 17-06-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- The submitted product development and stability study data of manufacturer is already approved in 297th meeting in Patrox 12.5mg CR Tablet case of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.
- Registration Board in its 321st meeting decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer.

Decision: Approved. Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

	The proposed proprietary name / brand name	**ROXET 20mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Paroxetine HCl…20mg
	Pharmaceutical form of applied drug	Square shape pink color, biconvex film coated tablet engraved GENIX on one side and plain from other side.
	Pharmacotherapeutic Group of (API)	Selective serotonin reuptake inhibitors
	Reference to Finished product specifications	USP
	Proposed Pack size	10's, 20's, 30's, 50's, 100's

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Paxil Tablet **(USFDA** Approved)
	For generic drugs (me-too status)	Paraxyl Tablet by CCL Pharmaceuticals
	Name and address of API manufacturer.	Zhejiang Haisen Pharmaceutical Co Ltd. Liushi Street, Dongyang city, Zhejiang Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Seroxat 20mg Tablet. Firm has also submitted results of comparative dissolution profile of their product against Seroxat 20mg Tablet in three dissolution medium.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.
STABILITY STUDY DATA		

Manufacturer of API	Zhejiang Haisen Pharmaceutical Co Ltd. Liushi Street, Dongyang city, Zhejiang Province China.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "WYMLY Tablets 25mg (Tenofovir Alafenamide)", which was conducted on 09-04-2018, and was presented in 281st meeting of Registration Board held on 11-13th April, 2018. Registration Board decided to approve registration of WYMLY Tablets 25mg (Tenofovir Alafenamide)", by M/s. Genix Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for 26 weeks. Following observations were reported in the report: • The HPLC software is 21CFR complaint and having certificates of compliance by USFDA. • Audit trail on the testing reports of WYMLY Tablets 25mg (Tenofovir Alafenamide) is available. • Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. ZJ20180136) issued by China Food and Drug Administration dated 14-11-2018. The certificate is valid till 13-11-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Paroxetine HCl 1Kg from M/s Zhejiang Haisen Pharmaceutical Co Ltd. Liushi Street, Dongyang city, Zhejiang Province China issued by AD (I&E) DRAP field office. The license was issued on 17-06-2019. • Firm has submitted copy of commercial invoice specifying import of 1Kg Paroxetine HCl. The

		invoice was signed by AD (I&E) DRAP field office dated 17-06-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- The submitted product development and stability study data of manufacturer is already approved in 297th meeting in Patrox 20mg Tablet case of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.
- Registration Board in its 321st meeting decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer.

Decision: Approved. Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

726.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Daneen Pharma Pvt Ltd. 27, Sundar industrial Estate, Sundar Raiwind Road, Lahore.**
	Name, address of Manufacturing site.	M/s Genix Pharma (Pvt) Ltd, 44-45-B, Korangi Creek Road, Karachi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm is inspected on 02-07-2020 wherein the firm was found to be operating at good level of GMP compliance.
	Evidence of approval of manufacturing facility	The firm has provided Sachet (General) section from confirmed from approved layout plan from licensing division.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 16758: 16-06-2021
	Details of fee submitted	PKR 50,000/-: 08-04-2021
	The proposed proprietary name / brand name	**POLYCOL** Jar 578g Powder for Solution
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each dose contains: Polyethylene glycol 3350…….17g
	Pharmaceutical form of applied drug	White to off white color powder filled in HDPE bottle.
	Pharmacotherapeutic Group of (API)	Osmotic laxative

	Reference to Finished product specifications	Manufacturer's specifications
	Proposed Pack size	1's
	Proposed unit price	As per PRC
	The status in reference regulatory authorities	Miralax for oral solution of M/s Bayer Healthcare LLC (USFDA Approved, over the counter)
	For generic drugs (me-too status)	Not available
	Name and address of API manufacturer.	M/s Avesta Pharma Pvt Ltd., Shivam chambers, 106/108, First Floor, S.V. Road, Goregaon west, Mumbai–400 062 Maharashtra India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has performed pharmaceutical equivalence and comparative dissolution profile of

		Movcol 578g Jar (B#19SB-149-01) and Miralax 578g Jar (B # TN00RM) of M/s Bayer. Quality tests of both products including description, identification, filled weight, moisture content and assay were compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of applied product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s. Avesta Pharma Pvt. Ltd, Maharashtra state, India issued by Food and Drug Administration, Maharashtra state, India. It is valid upto 15-09-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of polyethylene glycol-3350 (5000Kg, Batch # AP0919009) attested by AD (I & E) DRAP, Karachi dated 18-04-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance record of HPLC software from Waters Corporation. Audit trail of testing of product has not been submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Submit valid contract manufacturing agreement between the contract giver and contract acceptor.
- Scientific justification of using Jar container closure system instead of using foil pouch as per reference product i.e., Miralax of M/s Bayer for achieving unit dose dispensing of applied product.
- Evidence of availability of drug product in applied container closure system in reference regulatory authorities.
- Submit product development and stability study data of commercial batches manufactured by the drug product manufacturer, since the submitted data are of trial batches.

Decision: Deferred for following submissions:

- **Confirmation of required facility where manufacturing and packaging in Jar can be carried out.**
- **Clarification how the applied product is similar in terms of packaging material, unit dose and total dose per pack in comparison with the innovator's product.**
- **Evidence of HPLC system along with RI detector which is used for product testing.**
- **Submission of 25,000/- differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.**
- **Valid contract manufacturing agreement between the contract giver and contract acceptor.**

Evaluation by PEC[3]:

- The submitted product development and stability study data of manufacturer is already approved in 297th meeting in XONEM Injection 250mg IV case of M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
- Registration Board in its 321st meeting decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer.

Decision: Approved.

- **M/s Bio-Next Pharmaceuticals shall use 10ml 0.9% NaCl injection as diluent for the commercial batches and submit compatibility study with the 0.9%NaCl solution as diluent along with BMR of recently manufactured batches from M/s Bio-Next Pharmaceuticals, as evidence of use of the recommended diluent before issuance of Registration letter.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit Pharmaceutical equivalence studies against the innovator product before issaunce of registration letter.**

• **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Bio-Next Pharmaceuticals.**		
729.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Cherwel Pharmaceuticals (Pvt) Ltd. Plot # 20, Phase 4, Hattar Industrial Estate Hattar.**
	Name, address of Manufacturing site.	M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Contract manufacturing agreement dated 21-04-2017 is submitted
	GMP status of the firm	Firm has been granted new DML by way of formulation dated 06-11-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of Section approval letter dated 06-11-2019 specifying Dry Vial Injection section (Carbapenem).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7213: 04-03-2021
	Details of fee submitted	PKR 50,000/-: 24-02-2021
	The proposed proprietary name / brand name	**IMIPEN Injection 500mg IV**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Imipenem as monohydrate…500mg Cilastatin as sodium…500mg
	Pharmaceutical form of applied drug	Glass vial filled with white t pale yellow powder along with ampoule of 0.9% NaCl solution.
	Pharmacotherapeutic Group of (API)	Carbapenem
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Impenem and cilastatin Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Cilapen Injection by Bosch Pharma
	Name and address of API manufacturer.	Sun Pharmaceutical Industries Ltd. Industrial Area 3, Dewas, 455001, Madhiya Paradesh India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Cilapen 500mg Injection (IV) of Bosch Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance and the drug product product.

STABILITY STUDY DATA

Manufacturer of API	Sun Pharmaceutical Industries Ltd. Industrial Area 3, Dewas, 455001, Madhiya Paradesh India.		
API Lot No.	AB06444		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	CI-004	CI-005	CI-006
Batch Size	350 vials	350 vials	350 vials
Manufacturing Date	01-2020	01-2020	01-2020
Date of Initiation	07-01-2020	07-01-2020	07-01-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. V/WHOGMP/Rev./Sun-17/2019/5115) issued by Office of the Drugs Controller, Food & Drug Administration Madhya Pradesh dated 3-10-2019. The certificate is valid till 02-10-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Imipenem / Cilastatin 2Kg from M/s Sun Pharmaceuticals India issued by AD (I&E) DRAP field office. The license was issued on 16-01-2020. • Firm has submitted copy of commercial invoice dated 16-01-2020 specifying import of 2Kg Imipenem/cilastatin. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- The submitted product development and stability study data of manufacturer is already approved in 297th meeting in XONEM Injection 500mg IV case of M/s Bio-Next Pharmaceuticals Plot No. 50, St No. S-10, RCCI Industrial Estate Rawat Islamabad.
- Registration Board in its 321st meeting decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer.

Decision: Decision: Approved.

- **M/s Bio-Next Pharmaceuticals shall use 10ml 0.9% NaCl injection as diluent for the commercial batches and submit compatibility study with the 0.9%NaCl solution as diluent along with BMR of recently manufactured batches from M/s Bio-Next Pharmaceuticals, as evidence of use of the recommended diluent before issuance of Registration letter.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit Pharmaceutical equivalence studies against the innovator product before issaunce of registration letter.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Bio-Next Pharmaceuticals.**

b. Deferred cases of local manufacturing

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.	Firm has responded that they have already submitted differential fee PKR 25,000/- dated 15-06-2021 vide slip number 087907483660.
Submit valid contract manufacturing agreement between the contract giver and contract acceptor.	Firm has submitted copy of contract manufacturing agreement dated 01-02-2021 between the contract giver and contract acceptor.
Submit product development and stability study data of commercial batches manufactured by the drug product manufacturer, since the submitted data are of trial batches.	Firm has submitted 6 months stability study data of trial batches. Firm has also submitted stability data sheets for 3 months stability testing of three commercial batches with following details: **Batch No: P07381** Batch size: 13000 packs; Mfg date: 07-2021; Stability initiation date: 11-08-2021; API lot number: 2104000065 2104000146

Batch No: P07388

Batch size	Mfg date	Stability initiation date	API lot number
8659 packs	07-2021	12-08-2021	2104000065 2104000146

Batch No: P07627

Batch size	Mfg date	Stability initiation date	API lot number
13000 packs	11-2021	30-11-2021	2104000065 2104000146

However, firm has not submitted complete stability study data of 3 commercial batches along with requisite documents as per CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Submission by the firm:

Firm has submitted complete stability data of commercial batches for which initial detail was provided in 316th meeting.

- The submitted product development and stability study data of manufacturer is already approved in 297th meeting in TYCORT 200mcg + 6mcg DPI Capsule case of M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan.
- Registration Board in its 321st meeting also decided as "*Registration Board deliberated the matter in detail and decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer"*
-

The dry powder inhaler capsule is intended to be marketed along with Dry Powder Inhaler Device of following description:
Name: DPI Device
Model no. BDD07
Capsule size: 3 # Capsule
Manufacturer: Shanghai Huarui Aerosol Co., Ltd,
No.222, Yuanchun Road, Pudong New Area,
Shanghai, china.
Shelf life: 3 years

Decision: Approved. The firm shall submit fee of Rs. 75,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**
- **Registration Board further decided that following details of "Accompanyiing Delivery device" shall be declared on registration letter:**

"**Name: DPI Device**
Model no. BDD07

- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan**

732.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Marker Limited, 7 Jail Road Quetta.**
	Name, address of Manufacturing site.	M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Contract manufacturing agreement dated 01-02-2021 is submitted

	GMP status of the firm	The Firm has submitted copy of GMP certificate based on evaluation conducted on 07-05-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of grant of additional section dated 27th October, 2020 specifying Dry Powder Inhaler Capsule (General)- New.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 16009: 09-06-2021
	Details of fee submitted	PKR 50,000/-: 05-04-2021 + PKR 25,000/-: 15-06-2021
	The proposed proprietary name / brand name	**TIO HALER DPI Capsule 18 mcg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: 22.5mcg of Tiotropium bromide monohydrate eq. to Tiotropium……..18mcg The delivered dose (the dose that leaves the mouthpiece) is 10.4 mcg Tiotropium.
	Pharmaceutical form of applied drug	Hard gelatin capsule
	Pharmacotherapeutic Group of (API)	Anticholinergic agents
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	30's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Spiriva 18 mcg capsule (**USFDA** approved)
	For generic drugs (me-too status)	Gentrop 18 mcg Rotacaps of Genix Pharma (Reg#086941)
	Name and address of API manufacturer.	M/s Vamsi Labs Ltd. Address A-14/15, MIDC area, Chincholi, Solapur-413255, Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 6 months accelerated and 60 months real time data of 3 batches of API.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their formulation with innovator product Spiriva 18mcg DPI Capsule of M/s Boehringer Ingelheim and performed tests of Aerodynamic particle size distribution (APSD) & Delivered dose uniformity (DDU) of both capsules.
	Analytical method validation/verification of product	Firm has submitted protocols and reports of analytical method validation of drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vamsi Labs Ltd., Address A-14/15, MIDC area, Chincholi, Solapur-413255, Maharashtra, India		
API Lot No.	TBM0090619		
Description of Pack (Container closure system)	Alu Alu Blister pack, 30's		
Stability Storage Condition	Real Time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	NPD-C-885-L	NPD-C-886-P	NPD-C-887-P
Batch Size	6000 capsules	6000 capsules	6000 capsules
Manufacturing Date	27-11-2019	27-11-2019	27-11-2019
Date of Initiation	06-12-2019	06-12-2019	06-12-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate for M/s Vamsi Labs Ltd., India issued by Food and Drugs Administration (Maharashtra State), India. It is valid till

		19-05-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice specifying purchase of 20g of Tiotropium Bromide Monohydrate (micronised) attested by AD I & E Karachi dated 02-11-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance record of HPLC software 21 CFR and copies of audit trail on testing of drug product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.	Firm has responded that they have already submitted differential fee PKR 25,000/- dated 15-06-2021 vide slip number 7815511710.
Submit valid contract manufacturing agreement between the contract giver and contract acceptor.	Firm has submitted copy of contract manufacturing agreement dated 01-02-2021 between the contract giver and contract acceptor.
Submit product development and stability study data of commercial batches manufactured by the drug product manufacturer, since the submitted data are of trial batches.	Firm has submitted 6 months stability study data of trial batches. Firm has also submitted stability data sheets for 3 months stability testing of three commercial batches with following details: **Batch No: P07380** Batch size: 12333 packs; Mfg date: 07-2021; Stability initiation date: 04-08-2021; API lot number: 2103000010 **Batch No: P07387** Batch size: 9333 packs; Mfg date: 08-2021; Stability initiation date: 27-08-2021; API lot number: 2103000010 **Batch No: P07456** Batch size: 12466 packs; Mfg date: 09-2021; Stability initiation date: 16-09-2021; API lot number: 2103000010 However, firm has not submitted complete stability study data of 3 commercial batches along with requisite documents as per CTD guidance document.

Decision of 316th meeting of Registration Board:

Deferred for submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Submission by the firm:

Firm has submitted complete stability data of commercial batches for which initial detail was provided in 316th meeting. • The submitted product development and stability study data of manufacturer is already approved in 297th meeting in Tiohale DPI Capsule 18 mcg case of M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan. Registration Board in its 321st meeting also decided as "*Registration Board deliberated the matter in detail and decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer"*
Decision: Approved. The firm shall submit fee of Rs. 75,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter. • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application** • **Registration Board further decided that following details of "Accompanyiing Delivery device" shall be declared on registration letter:** "**Name: DPI Device** **Model no. BDD07** **Capsule size: 3 # Capsule** **Manufacturer: Shanghai Huarui Aerosol Co., Ltd,** **No.222, Yuanchun Road, Pudong New Area,** **Shanghai, china.** • **Shelf life: 3 years".** • **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan**

733.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Swiss Pharmaceuticals Pvt Ltd A/159, SITE-II Super Highway Karachi.**

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 29-05-2020 is submitted.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Vision Pharmaceuticals dated 25-03-2022 based on inspection dated 11-02-2019. As per the certificate, it was valid till 09-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML of M/s Vision Pharmaceuticals DML No 000517 dated 07-06-2021 specifying sterile dry powder injectable vial (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales

	Dy. No. and date of submission	Dy. No. 20655: 29-07-2021
	Details of fee submitted	PKR 50,000/-: 22-12-2020
	The proposed proprietary name / brand name	**PTONIX 40mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial Contains: Pantoprazole (as sodium)……40mg
	Pharmaceutical form of applied drug	White or almost white colored lyophilized powder
	Pharmacotherapeutic Group of (API)	PPI
	Reference to Finished product specifications	BP specification
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Protonix IV 40mg **(USFDA** Approved)
	For generic drugs (me-too status)	Zopent Injection by Hilton
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Protonix IV Injection of Pfizer Pharmaceutical
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate dated 31-07-2019 of M/s Vision Pharmaceuticals (DML No. 000806 semi basic) issued based on inspection dated 11-02-2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted inventory transfer note from SAP of the firm dated 08-10-2020 for the same batch.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The application of the firm for contract manufacturing from M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad was not submitted as per the guidance document approved by Registration Board. The submitted application was in variation to the guidance document for various modules, sections and sub sections majorly including complete module 1, section 3.2.S.4.1, 3.2.S.4.2, 3.2.S.4.3, 3.2.S.4.4, 3.2.S.5, 3.2.P.2.2.1, 3.2.P.2.6, 3.2.P.3.5, 3.2.P.5.1, 3.2.P.5.2, 3.2.P.5.3, 3.2.P.5.4, 3.2.P.6 and 3.2.P.8. Furthermore, it is also pertinent to mention that the drug product manufacturer has submitted COA of drug substance which is released on 26-02-2018 and provided batch release certificates of 3 batches of drug product released on 09-2017 instead of submitting data of same batches as per the guidance document. Therefore, the firm was advised to resubmit the application compiled in the light of the guidance document approved by Registration Board so that further evaluation of your application could be carried out.

In response, the firm has changed drug product specifications from in house to BP without submission of fee. Firm has also changed the drug substanbce source from Everest Organics Limited Aroor Village Sadasivapet Mandal Sangareddy District Aroor (V), Sadasivpet(M), Sangareddy District Telangana India to M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.

The response was also evaluated, and the found deficient for various points. The following points were communicated to the firm.

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit label claim of the applied product in line with innovator product / reference product along with submission of requisite fee.	Firm has submitted following label claim without submission of fee. Each vial Contains: Pantoprazole (as sodium)……40mg
2.	In your initial submission, you have mentioned in house specifications for the drug product, while in the later submission you have mentioned BP specifications. Justification is required in this regard along with evidence when you have changed the specifications of your already registered product.	In our previous submission the testing for 3 batches was done on UV, but parallel we change our Standard Analytical Procedure and shift our testing method to HPLC. Firm has submitted Revised testing method which was signed and issued on 31-12-2021. This method contains HPLC test for assay of drug product, however, for bulk stage the assay method was based on UV. As per Documents, firm has changed assay to HPLC method on 31-12-2021 while the stability data was initiated on October 2020. Furthermore, firm could not provide any evidence of intimation to DRAP regarding revision of the specifications of their already registered product from in house to BP specs.

3.	In your initial application you have specified that the source of drug substance is Everest Organics Limited Aroor Village Sadasivapet Mandal Sangareddy District Aroor (V), Sadasivpet(M), Sangareddy District Telangana India, while in new submission you have changed the source to M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad. Justification is required in this regard along with submission of requisite fee.	As we have two DMLs one for finished drugs and secod for semi basic dosage forms. The lyophilized pantoprazole is always procured from M/s Vision Pharmaceuticals but the powder pantoprazole for lyophilization is procured from Everest organics limited.
4.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted standard testing method of pantoprazole sodium sesquihydrate drug substance from Vision Pharmaceuticals dated 29-12-2021. The submitted document does not specify whether it is of semi basic DML or of DML issued by way of formulation. Moreover the specifications are issued on December 2021 while stability batches were manufactured in October 2020.
5.	Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".	Firm has submitted verification studies dated 05-09-2020 based on HPLC method, while as per the submitted specifications of the drug substance, the assay method is based on potentiometric titration.
6.	The COA of drug substance manufacturer specifies that the material was released on 31-09-2020 while the drug product manufacturer has sampled the product on 02-09-2020 and released on 16-09-2020. Justification is required in this regard.	Firm submitted that it was a typo error. Firm has submitted another copy of COA of the same batch. In the newly submitted COA from Vision Pharmaceuticals (Semi-Basic DML) the batch was released on 31-08-2020 as per In-house specification and assay on UV method. While as per the raw material analysis report from Vision Pharmaceuticals (Formulation DML), the batch was released on 16-09-2020 as per Innovator's specification and assay on UV method. The drug substance specifications, BP monograph and submitted COA are contradictory.
7.	Justify the use of 10ml water for injection as diluent since the innovator product recommends that the product should be reconstituted with 10ml 0.9% sodium chloride solution.	Firm has submitted that they are using 10ml of 0.9% sodium chloride solution as diluent. However previously the firm has specified water for injection as the diluent.

8.	Submit results of compatibility studies in section 3.2.P.2.6.	Firm has not submitted compatabiity study report instead only submitted a batch release report.
9.	The analytical method and specifications of the drug product has been generated and signed on 31-12-2021 with a dsscription "this is a new document on this subject" while the stability batches were manufactured in September 2020. Justify how the submitted specifications could be considered applicable for testing of these batches.	The provided analytical method and specifications of drug product has been submitted is the updated one, replacing the old version. As per Documents, firm has changed assay to HPLC method on 31-12-2021 while the stability data was initiated on October 2020. Furthermore, firm could not provide any evidence of intimation to DRAP regarding revision of the specifications of their already registered product from in house to BP specs.
10.	Analytical method alidation studies of the drug product were developed in 2017 wherein the specifications and analytical method of BP 2020 were claimed. Justify how validation of analytical method of 2020 can be performed in 2017.	Firm has once again submitted same old verification studies of 2017 in which the assay method was different from that specified in the latest specifications of the firm as well as BP monograph.
11.	Justify how three batches of drug product with BP specs were released on 05-10-2020 while the drug specifications are different from that specified in BP monograph and are exactly same as that submitted in initial application as in-house specifications.	It was a typo error, updated range was according to BP.
12.	Submit evidence of procurement of the drug substance.	Firm has submitted inventory transfer note from SAP of the firm dated 08-10-2020 for the same batch. However, the document does not specify any quantity. Moreover, the document for transfer of inventory is of 08-10-2020, while as per the raw material analysis report from Vision Pharmaceuticals (Formulation DML), the batch was released on 16-09-2020.
13.	Justify how the manufacturing of commercial batches were carried out from 17-09-2020 while the drug substance used in those batches was released on 31-09-2020.	The drug substance was released on 07-09-2020. However as per invoice the material was transferred on 08-10-2020, and as per raw material analysis report the material was released on 16-09-2020.

Decision of 320th meeting of Registration Board:

Deferred for following:

- Submission of applicable fee for revision of source of drug substance, revision of specifications and label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Scientific justification how a revised HPLC method dated 31-12-2021 can represent the results of the stability studies which were initiated in October 2020.
- Approval of DRAP for change in specifications of the registered product for which stability data is submitted.

- Scientific justification for performing verification studies of analytical method of drug substance dated 05-09-2020 based on HPLC method, while as per the submitted specifications of the drug substance, the assay method is based on potentiometric titration.
- Scientific justification for having drug substance specifications which are different from the specifications of drug substance manufacturer as well as BP monograph.
- Clarification about the use of 10ml water for injection as diluent for the applied product since the innovator product recommends different diluent.
- Verification studies of the analytical method of drug product.
- Evidence of procurement of the drug substance.
- Scientific justification for manufacturing and testing commercial batches of a registered drug product on non-pharmacopoeial specifications while BP monograph was already available for the drug product.

Submission by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Submission of applicable fee for revision of source of drug substance, revision of specifications and label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm has not submitted any fee.
2.	Scientific justification how a revised HPLC method dated 31-12-2021 can represent the results of the stability studies which were initiated in October 2020.	Change specification granted from DRAP in May 2021, after that testing specification change to BP from vision specification. Testing method also revised after grant of this permission from DRAP.
3.	Approval of DRAP for change in specifications of the registered product for which stability data is submitted.	Firm has submitted one page which shows that specifications of Fitral 40mg Injection is changed from inhouse to BP Specs. However, the letter do not contain first page which shows date of the
4.	Scientific justification for performing verification studies of analytical method of drug substance dated 05-09-2020 based on HPLC method, while as per the submitted specifications of the drug substance, the assay method is based on potentiometric titration.	Raw material once received is Lyophilized by Vision Semi Basic Plant and that Lyophilized ready to fill powder is then filled in vials. So, Method verification/validation of that Lyophilized material is performed by HPLC which is according to BP method, and that material is filled in Vials. The titration method is just mentioned for Pantoprazole sodium sesquihydrate Raw material, not for Lyophilized material.
5.	Scientific justification for having drug substance specifications which are different from the specifications of drug substance manufacturer as well as BP monograph.	Pantoprazole sodium (Lyophilized) is present in BP Monograph and we are following BP Specs.
6.	Clarification about the use of 10ml water for injection as diluent for the applied product since the innovator product recommends different diluent.	Normal saline 10ml under registration with DRAP, water for injection only use to solubilized the material and this 10ml solution transfer to 100ml Normal saline infusion.
7.	Verification studies of the analytical method of drug product.	Verification studies of drug product are provided by the firm.

8.	Evidence of procurement of the drug substance.	Firm has submitted inventory transfer note from SAP of the firm dated 06-07-2020 for batch008902.
9.	Scientific justification for manufacturing and testing commercial batches of a registered drug product on non-pharmacopoeial specifications while BP monograph was already available for the drug product.	Change specification granted from DRAP in May 2021, after that testing specification change to BP from vision specification. Testing method also revised after grant of this permission from DRAP

Decision: Deferred for following:

- **Review of manufacturing requirement of the applied product as per innovator drug product or reference regulatory authority, whether lyophilized or otherwise.**
- **details of already registered drug products with available manufacturing facilities**

	Name and address of API manufacturer.	Zhuhai United Laboratories Co., Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District, Zhuhai City Guangdong Province China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 6 months. The real time stability data is conducted at 5°C ± 3°C for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Primaxin Injection IV of Merck & Co.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Zhuhai United Laboratories Co., Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District, Zhuhai City Guangdong Province China
API Lot No.	3951902009 3951903005
Description of Pack (Container closure system)	Glass vial
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	19G096	19G097	19G098
Batch Size	9041 vials	9041 vials	9041 vials
Manufacturing Date	07-2019	07-2019	07-2019
Date of Initiation	07-08-2019	07-08-2019	23-08-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by China Food and Drugs Administration. The certificate is valid till 12-05-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**3951902009:** Firm has submitted copy of commercial invoice cleared dated 27-06-2019 specifying import of 50Kg imipenem and cilastatin for injection. The commercial invoice is attested by AD (I&E) DRAP field office. **3951903005:** No evidence of import is submitted for this batch.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	Response by the firm
Provide correct label claim as per the innovator / reference product in section 1.5.2 along with submission of requisite fee, since the submitted label claim is not as per reference product.	Firm has revised the label claim as per the reference product without submission of fee.
Justify your drug substance without sodium bicarbonate since USP as well as reference product specifies that sodium bicarbonate is present in the finished drug product.	Firm has submitted that the drug substance contains sodium bicarbonate. Firm has also submitted COA of drug substance which specify sodium bicarbonate.
Provide data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the	Firm has submitted that we have performed method verification for drug product and we are using the same testing method for the drug substance therefore we did not perform verification studies of the drug substance.

Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was carried out without performing verification studies.	
Submit CoA of reference standard used in the testing of drug substance in section 3.2.S.5.	Firm has submitted USP certificate of reference standard for imipenem as well as cilastatin.However the method of analysis submitted by the firm specify that they are not using this reference standard.
Justify how 1106mg drug substance is equivalent to 500mg of imipenem and 500mg cilastatin along with sodium bicarbonate.	Firm has not submitted any justification against this observation
Justify the use of 10ml WFI as a diluent along with applied product. Since this diluent is not used by the innovator / reference product.	Firm has submitted that WFI is used for reconstitution of those injectables vials which is injected through IV. Innovator mentioned on label of the vials that after suspension, vial contents transferred to 100ml of infusion solution and does not describe the procedure for preparation of the suspension of the vial contents. So based on this fact use of WFI is suitable and justified. Innovator product does not recommend reconstitution with WFI
Justify why the pharmaceutical equivalence study does not include all critical steps as mentioned in USP monograph.	As per WHO guidelines pharmaceutical equivalence for parenteral drugs is not required but we applied two test for quality and safety of our product that are pH and assay. Firm has not submitted any evidence of such guidelines. Nor they have submitted any scientific justification for skipping important tests.
Provide data in section 3.2.P.2.6 as per the guidance document approved by Registration Board which specifies that "Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product."	Firm has submitted that Innovator mentioned on label of the vials that after suspension, vial contents transferred to 100ml of infusion solution and does not describe the procedure for preparation of the suspension of the vial contents and particular diluent. WFI is used for reconstitution of those injectables vials which is injected through IV so based on this fact we used WFI as diluent. Firm has not submitted compatibility studies as per the requirement of CTD.
Justify why the test of "constituted solution" and "particulate matter in injection" is not included in your product specification since these tests are recommended by USP.	Firm has submitted that testing method has been revised as per USP. Firm has not submitted any fee for revision of specification and testing method. Moreover the submitted testing method is different from USP monograph in terms of standard preparation, and assay calculation method and formula.
Justify the test of pH in section 3.2.P.5.2 which specifies that reconstitute the sample in 10ml WFI, however USP specifies that reconstitute as directed in the labelling. The labelling of the innovator / reference product does not recommend reconstitution in WFI.	Firm has submitted that Innovator mentioned on label of the vials that after suspension, vial contents transferred to 100ml of infusion solution and does not describe the procedure for preparation of the suspension of the vial contents and particular diluent. WFI is used for reconstitution of those injectables vials which is injected through IV so based on this fact we used WFI as diluent. Firm has not submitted any justification for the observation.
Justify the use of imipenem + cilastatin working standard for the assay since USP has recommended separate standard preparation for imipenem as well as cilastatin for the assay test.	Firm has again submitted separate USP certificate of reference standard for imipenem as well as cilastatin. However the method of analysis submitted by the firm specify that they are not using seprate reference standard.
Justify why the calculation formula used for the assay test is different from that specified in USP monograph.	Firm has submitted that testing method is revised and all required formulas incorporated. However as per the revised testing method the formula is different from that specified in USP monograph.
Clarify the batch size of stability batches, since batch size of 9041 vials is mentioned in stability data sheets, while 4520 vials is mentioned in product batch analysis certificate.	Typographic error. The batch size is 9041 vials.
USP recommends separate injections of imipenem and cilastatin standard preparation, while you have	Firm has submitted that seprate imipenem and cilastatin sodium commercial material is not available with us. We

used same standard preparation containing both drug substances. Justification is required in this regard.	standardized our combined available material with USP reference standard of imipenem and cilatstatin and using it as secondary working standard for routine testing of drug substance and product. Firm has not submitted any scientific justification.
Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
Documents for the procurement of API (Batch number 3951903005) with approval from DRAP.	Not submitted
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted

Decision of 312nd meeting of Registration Board:

Registration Board delibrated the case in detail and observed that the contract manufacturer has not performed complete product development studies, the specifications adopted by the manufacturer throughout stability studies were not according to USP and that the stability batches have also expired.

- Scientific justification for not performing verification studies for analytical method of drug substance.
- Certificate of analysis of reference standard which is actually used in the analysis of drug substance and drug product.
- Scientific justification for using pre-mixed drug substance having both imipenem as well as cilatatin as working standard for analysis of commercial bathes of drug product.
- Scientific justification for having a master formulation containing 1106mg of drug substance in pre-mixed form containing imipenem monohydrate, cilastatin sodium as well as sodium bicarbonate which is equivalent to 500mg imipenem and 500mg cilastatin.
- Scientific justification for using water for injection as a diluent for your commercial batches contrary to the diluent recommended by the innovator / reference product.
- Scientific justification for not performing complete pharmaceutical equivalence studies as per the USP specifications against the innovator product.
- Scientific justification for not performing compatability studies of your product with the recommended diluent.
- Scientific justification for not performing test of "constituted solution" and "particulate matter in injection" in your commercial batches since these tests have been recommended in USP monograph.
- Scientific justification for your test of pH which specifies that "reconstitute the sample in 10ml WFI", however USP specifies that reconstitute as directed in the labelling and the labelling of the innovator / reference product does not recommend reconstitution in WFI.
- Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.
- Scientific justification for using an entirely different formula for calculation of assay resultsof commercial batches from that specified in USP monograph.
- Scientific justification for using standard preparation containing both drug substances i.e. imipenem and cilastatin in a single injection for testing your commercial batches while USP recommends separate injections of imipenem and cilastatin standard preparation.
- Documents confirming import of drug substance having drug substance batch number 3951903005.
- Submission of fee for pre-registration changes in the drug product specifcations.

Keeping in view the above, the Board decided that the submitted stability study data is not acceptable and directed the manufacturer to either perform complete product development and stability studies or submit the aforementioned data as per USP specifications and submit data accordingly. The Board further directed the manufacturer to comply USP Specifications for already registered drug products.

Response by the firm:

Shortcoming	**Reply**
Scientific justification for not performing verification studies for analytical method of drug substance.	Method verification for the drug product (Imipenem and Cilastatin for Injection) is performed and same testing method is being used for the drug substance (because it is ready to fill powder). As method is same therefore this method verification is applicable for both. Method verification of Imipenem and Cilastatin for Injection is also provided. The verification studies

	were performed on the analytical method in which standard preparation and sample preparation is not exactly as per USP monograph.
Certificate of analysis of reference standard which is actually used in the analysis of drug substance and drug product.	In house working standard analytical report as Standardization report of API with reference standard is provided by the firm. Firm has used the premixed drug substance as working standard which is not recommended by USP.
Scientific justification for using pre-mixed drug substance having both Imipenem as well as Cilastatin as working standard for analysis of commercial batches of drug product.	We used premix of drug substance (Imipenem & Cilastatin for Injection) as working standard (batch no. 2009R0099) after standardizing it against Imipenem USP reference standard (lot no. R038R0) & Cilastatin USP reference standard (lot no. R012Y0). Firm has used the premixed drug substance as working standard which is not recommended by USP.
Scientific justification for having a master formulation containing 1106mg of drug substance in pre-mixed form containing Imipenem monohydrate, Cilastatin sodium as well as sodium bicarbonate which is equivalent to 500 mg Imipenem and 500mg Cilastatin.	Below is the calculation of fill weight if Imipenem & Cilastatin for Injection: For assay of API, attached certificate of analysis specifies NLT 400µg/mg of Imipenem and 400µg/mg of Cilastatin, while ratio of Imipenem to Cilastatin is 0.95 ~ 1.05 : 1. Therefore, in order to adjust claim of drug substance we have to choose component with lower potency. In this case Imipenem has low potency i.e. 452 µg/mg. Now, $\frac{452\mu g/mg}{1000} \times 100 = 45.2\%$ After considering both Imipenem & Cilastatin at 45.2 For Onem 500mg = $\frac{100 \times 500}{45.2\%} = 1106.19$mg/vial
Scientific justification for using water for injection as a diluent for your commercial batches contrary to the diluent recommended by the innovator / reference product.	Water for Injection will not be part of Cilsnim Injection; we have revised our artwork in order to eliminate the water for injection. The revised artwork specifies that after reconstitution administer the solution within 12 hours while the innovator product recommends that the product should be administered within 4 hours after reconstitution.
Scientific justification for not performing complete pharmaceutical equivalence studies as per the USP specification against the innovator product.	All tests that are mentioned in USP could not perform during pharmaceutical equivalence due to limited quantity of innovator sample. Therefore, we have included only all major test while performing pharmaceutical equivalence.
Scientific justification for not performing compatibility studies of your product with the recommended diluent.	Compatibility studies were performed but were not made of CTD application. Copy of compatibility studies is provided by the firm.
Scientific justification for not performing test of "constituted solution" and "particulate matter in injection" in your commercial batches since these test have been recommended in USP monograph.	As for as test of particulate matter is concerned, we have purchase Liquid particle counter in March 2020, that why this test was not performed during manufacturing of stability batches. Currently we use Liquid particle counter to perform this test. Firm has submitted following documents • Service report of IQ, OQ and PQ of Liquid Particle counter is enclosed for your review. • Report including test of particulate matter is attached. • Revised test method is also attached.
Scientific justification for your test for pH which specifies that "reconstitutes the sample in 10ml WFI", however USP specifies that reconstitute as directed in the labeling and the labeling of the innovator /	As per USP monograph pH of Imipenem and Cilastatin for Injection should be "between 6.5 and 8.5, when constituted as directed in the labeling".

reference product does not recommend reconstitution in WFI.	Based upon above statement, we reconstitute content of vial using sterile water for injection, then make the volume up to 100ml using normal saline (saline TS) and then check pH of solution using calibrated pH meter.
Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.	Sample solution preparation mentioned in our testing method is same as in USP. Copy of revised test method and USP monograph is also provided. The testing method which was submitted along with the original application was not as per USP monograph.
Scientific justification for using an entirely different formula for calculation of assay results of commercial batches from that specified in USP monograph.	Formula of content of drug product is elaborated with context to standard and sample preparation procedure which has now been updated as per USP format. Documents provided are; • Copy of revised test method and USP monograph is attached.
Scientific justification for using standard preparation containing both drug substance i.e. Imipenem and Cilastatin in a single injection for testing your commercial batches while USP recommends separate injection of Imipenem and Cilastatin standard preparation	We used premix of drug substance (Imipenem & Cilastatin for Injection) as working standard while testing of our standard solution as working standard was made after standardizing it against separate Imipenem USP reference standard & Cilastatin USP reference standard. Moreover, for future we have planned to import/purchase separate Imipenem and Cilastatin and standardize against USP reference standards. Firm has used the premixed drug substance as working standard which is not recommended by USP.
Documents confirming import of drug substance having drug substance batches number 3951903005.	Firm has submitted copy of commercial invoice but for batch number 3951805003.
Submission of fee for pre-registration changes in the drug product specifcations.	Firm has submitted fee 7500/- dated 05-11-2021 for change in specifications
Keeping in view the above, the Board decided that the submitted stability study data is not acceptable and directed the manufacturer to either perform complete product development and stability studies or submit the aforementioned data as per USP specifications and submit data accordingly. The Board further directed the manufacturer to comply USP Specifications for already registered drug products.	Firm has not submitted product development and stability study data of new batches in which the development and testing is carried out as per USP specifications from initial time point.

Decision of 313th meeting of Registration Board:

Registration Board deliberated that the commercial batches manufactured by the manufacturer i.e. Global Pharmaceuticals was not developed and tested as per the USP monograph. Keeping in view the USP monograph, public assessment report of the innovator product and the data submitted by the firm, the Board decided to defer the case and advised the manufacturer to perform product development studies keeping in view the innovator product and product testing and stability studies by complying USP monograph and submit data upon completion of 6 months stability studies.

Response by the firm:

Firm has submitted completely new CTD for the same product manufactured by M/s Global Pharmaceuticals. The response of the firm along with product development and stability data was received in R&I DRAP vide Dy number 28764 dated 11-10-2022. The evaluation of newly submitted data is as under:

Dy. No. and date of submission	28764 dated 11-10-2022
Details of fee submitted	Fee for revised stability batches not submitted
The proposed proprietary name / brand name	CILSNIM 500mg Injection
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains:

	Imipenem monohydrate eq. to imipenem…….500mg Cilastatin Sodium eq. to Cilastatin ……500mg
Name and address of API manufacturer.	M/s ACS DOBFAR S.p.A Viale Addetta 2a/12-3/5 20067 Tribiano, Milano- Italy
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
Stability studies	Stability study conditions: Real time: Temp.: 30°C ± 2°C, RH: 65% ± 5% for 36 month Accelerated: Temp.: 40°C ± 2°C, RH: 75% ± 5%for 6 months Batches: (990068 8004 2, 990068 8005 2, 990068 8006 2)
Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
Pharmaceutical equivalence and comparative dissolution profile	The Firm has performed pharmaceutical equivalence of their developed formulation Cinam 500mg injection (B #22A338) with reference product Cilapen 500mg Injection Batch No: CP200034 by Bosch Pharmaceuticals. The results showed that both test and reference products were comparable.
Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s ACS DOBFAR S.p.A Viale Addetta 2a/12-3/5 20067 Tribiano, Milano- Italy.
API Lot No.	990068-0008-E1
Description of Pack (Container closure system)	White to pale yellow color powder filled in clear glass vial, packed in Unit carton (1's)
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 24 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months)

		Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)	
Batch No.		22A337	22A338
Batch Size		5550 vials	5550 vials
Manufacturing Date		01-2022	01-2022
Date of Initiation		22-01-2022	22-01-2022
No. of Batches		02	
Administrative Portion			
7.	Reference of previous approval of applications with stability study data of the firm (if any)	NA	
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Italian pharmaceutical Agency valid till 26/03/2025 is submitted.	
9.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of and attested ADC (I&E) DRAP, Islamabad dated 02-06-2021 for Imipenem and cilastatin sodium sterile Batch No. 990068 0008 E1.	
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.	
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted Compliance Record of HPLC software 21CFR	
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.	

Remarks OF Evaluator:

- The diluent for reconstitution used by the firm is 10ml WFI while innovator and reference product recommend 10ml 0.9% NaCl injection.
- Firm is using 1081mg/ vial which is not justified keeping in view both drug substances are available as salt form where 530mg imipenem monohydrate is equivalent to 500 mg imipenem and 530 mg cilastatin sodium salt is equivalent to 500mg cilastatin. Furthermore, the COA of API depicts that the maximum percentage of both API could be 96.6% (48.3 % of individual API).

Discussion: Registration Board was apprised that the firm has submitted response against the above mentioned observations on the day of meeting in which firm has submitted that in BMR they have mentioned 10ml WFI as diluent, however from now onwards they will use 10ml 0.9% NaCl solution as diluent as per the recommendations of innovator's product. Furthermore, the firm has also submitted calculation for fill weight of drug substance in the vials in which they have taken sodium contents as per innovator's product claim instead of using sodium contents as per the drug substance.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit full fee 75,000/- for revision of stability study data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Firm shall submit compatibility study with the 0.9%NaCl solution as diluent along with BMR of recently manufactured batches as evidence of use of the recommended diluent before issuance of Registration letter and shall use 10ml 0.9% NaCl injection as diluent for the future manufacturing of all registered drug products of applied formulation as well.**
- **Firm shall use correct fill weight per vial considering the sodium content as per the drug substance manufacturer's claim for the commercial batches and submit BMR of recently manufactured batches as evidence of correct fill weight before issuance of Registration letter.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Global Pharmaceuticals.**

735.	Name, address of Applicant / Marketing Authorization Holder	M/s CCL Pharmaceuticals (Pvt) Ltd. 62-Industrial Estate, Kot Lakhpat Lahore.
	Name, address of Manufacturing site.	M/s Next Pharmaceuticals Products (Pvt) Ltd. Plot # 44 A&B, Sunder Industrial Estate, Raiwind Road Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) (Contract manufacturing agreement between both firms is provided)
	GMP status of the firm	CCL Pharmaceuticals: GMP certificate issued on the basis of inspection conducted on 30-04-2019. Next Pharmaceuticals: GMP certificate issued on the basis of inspection conducted on 28-05-2019.
	Evidence of approval of manufacturing facility	Firm (M/s Next Pharmaceuticals) has submitted copy of Issuance of DML letter dated 31-10-2016 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy No. 3326 dated 28-01-2021

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	No inspection of Next Pharmaceuticals have been conducted on the basis of stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of License retention certificate (No. 1238/AP/DCA/2017) issued by Drugs Control Administration Government of Andhra Pradesh, dated 09-02-2018. The retention certificate specifies that the validity of license has been permitted till 30-12-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 27-07-2017 specifying purchase of 30Kg Domperidone base.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has performed initial testing using HPLC while the 3rd and 6th month stability testing using UV method.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted manual record of logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	Response by the firm
Justify the submission of application for contract manufacturing of tablet from a contract manufacturer since the same section i.e. Tablet (general) section is already available with CCL Pharmaceuticals.	Since, we are undergoing development / stability studies for many products and the CTD data pf the subject product was available with contract acceptor as the product is already registered for Next pharma with brand name "Domflash", registration number 084816. We hereby solicit that our concern and option may please be considered and registration of drug may please be approved. The contract manufacturing policy published vide SRO 152(I)/2014 dated 4th March 2014 does not allow contract manufacturing in such case.
Provide details regarding number of already registered products of M/s CCL Pharmaceuticals on contract manufacturing basis along with total number of approved sections.	Firm has submitted that currently they have registration of 20 products on contract manufacturing. Other than these 20 active products, firm has requested for cancellation of 17 other products that are also registered in the name of M/s CCL Pharmaceuticals on contract manufacturing basis. Firm has currently 6 active sections.
Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "*Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"* Further specify how the testing of drug substance was carried out without performing verification studies.	Firm has submitted that domflash-oro tablet is marketed since 2018 having registration number 084816. Firm has now submitted protocols for the verification studies of the drug substance dated 07-04-2021. Firm has not yet performed verification studies of the analytical procedure of drug substance. Further all the analysis of drug substance was carried out without verification of the analytical method.
Justify how the stability studies of drug substance submitted in section 3.2.S.7.3 shows different results for same batch at initial time point of accelerated and real time stability studies.	Firm has again submitted stability study data in which the results at initial time point is same for real-time and accelerated stability data.

Justify why the formulation submitted in section 3.2.P.1 has different qualitative composition as compared to the innovator / reference product.	Firm has submitted that Domflash -oro tablet is an established formulation which is being marketed since 2018having registration number 084816. There is no critical and significant side-effect observed till date. COAs of three ongoing commercial batches is attached. Firm has not submitted any justification of having a different master formulation as compared to the innovator / reference product.
Provide detailed method along with analytical details how the drug-excipient compatibility studies were performed.	Firm has submitted that Domflash -oro tablet is an established formulation which is being marketed since 2018having registration number 084816. There is no critical and significant side-effect observed till date. COAs of three ongoing commercial batches is attached. Firm has different master formulation as compared to the innovator / reference product and the firm has also not performed any compatibility studies.
Specify details including batch number and manufacturing date of the reference / comparator product against which pharmaceutical equivalence is performed.	Test product: Batch No. BU-0014 Mfg date: 09-2018 Innovator product Name: Motilium manufactured by Janssen Cilag Italy Batch No. 18JQ230 Mfg date: 10-2018 Pharmaceutical equivalence has been performed on batch manufactured on 09-2018 while stability study was initiated on batches manufactured earlier on 02-2018
Justify the results of disintegration time above 1 minute since USFDA Guidance for Industry on Orally Disintegrating Tablets specifies that "*Based on the original product rationale and Agency experience, we recommend that, in addition to the original definition, ODTs be considered solid oral preparations that disintegrate rapidly in the oral cavity, with an in-vitro disintegration time of approximately 30 seconds or less, when based on the United States Pharmacopeia (USP) disintegration test method or alternative*."	Firm has submitted that based on WHO guidelines, Revision of monograph on tablets for additional in international pharmacopoeia dated March 2011 mentions disintegration time within 3 minutes. As our product is non pharmacopoeial so we are using this WHO guidelines. The quoted reference by the firm is for dispersible tablet while the applied formulation is orally disintegrating / oro-dispersible tablet.
Justify why dissolution test was not performed during pharmaceutical equivalence study.	Firm has submitted that dissolution test is not applicable for oro-dispersible tablets "USP general chapter <1711> oral solid dosage forms - dissolution testing" recommends dissolution testing.
Justify why comparative dissolution profile is not performed.	Firm has submitted that dissolution test is not applicable for oro-dispersible tablets "USP general chapter <1711> oral solid dosage forms - dissolution testing" recommends dissolution testing.
Justify the drug product specifications without the test of dissolution, since dissolution test is recommended for oro-dispersible tablets in USP general chapter <1711> oral solid dosage forms - dissolution testing.	Firm has submitted that USP general chapter <1711> oral solid dosage forms – dissolution testing does not include dissolution test. However the said general chapter recommends dissolution testing for oro dispersible tablet.
The analytical procedures of drug product (section 3.2.P.5.2) specifies both UV as well as HPLC method for identification as well as assay testing of the drug product. Clarification is required regarding which method will be used for testing of the product for batch release and stability studies.	Domflash 10mg tablet orodispersible tablet was developed in house for testing on UV and HPLC. For batch release and stability studies both methods are validated.
The stability batches were manufactured in February / Mach 2018 while the analytical method for drug product was validated on 09-2019 and 12-2019. Justify how the testing of these batches were carried out without validating the analytical method.	The product has been developed and marketed earlier as per previous practice. Now we have performed validation studies as per requirement and the results obtained from non-validated method were found same as that of validated method with no deviations.
Justify why disintegration test was not performed during stability studies.	Initially disintegration test was not performed, but now as per updated requirements disintegration test is

	incorporated in the testing and implemented on all batches till date.
The initial stability study testing was performed using HPLC method while the 3rd and 6th month stability testing was performed using UV method. Justify why the analytical method was changed during the stability studies.	Domflash 10mg tablet orodispersible tablet was developed in house for testing on UV and HPLC. For batch release and stability studies both methods are validated.
The submitted record of data logger of stability chambers show only 2 temperature and humidity record readings per day (i.e. 09:00-11:00 and 15:00-17:00). Justify how only two readings per day can demonstrate the temperature and humidity control throughout the day.	Initially manual monitoring of temperature and humidity was done. Due to manual monitoring, recording the temperature and humidity was taken twice a day. Our system is now upgraded and we have successfully installed digital data logger. With data logger monitoring of temperature and humidity was taken after every 5 minutes. The submitted record of data logger is of year 2020 while the stability batches were kept in chamber in March 2018.
The submitted record of data logger of stability chambers show record of working days only, while there is no record available for weekends (i.e. Saturday and Sunday) and other public holidays (i.e. Eid holidays). Justify why there was no mechanism for recording temperature and humidity readings during the off days and how stability studies can be concluded without having the capacity to identify any deviation in temperature and humidity in the stability chambers.	

Decision of 307th meeting of Registration Board:

Registration Board after thorough deliberation and keeping in view the review of innovator product, guidelines of USFDA for orally disintegrating tablets and the recommendations of USP general chapter <1711> oral solid dosage forms - dissolution testing decided that since the contract manufacturer i.e. M/s Next Pharmaceuticals is also manufacturing the same product for its own use therefore the technical queries and onservations on the contract manufactured product shall also apply on the self manufactured product of the firm. Based on the discussion, Board decided as under:

- Submission of product development and stability study data of the recently manufactured batches by M/s Next Pharmaceuticals Products (Pvt) Ltd since their formulation is qualititaively different from that of the innovator product and the firm has not performed drug-excipient compatability studies, the acceptance criteria of disintegration test is is more than 1 minute while for oro-dispersible tablets USFDA recommends disintegration time of less than 30 seconds and the finished product specifications or product development studies does not include dissolution test which is recommended in USP general chapter <1711>.
- Scientific justification of having a master formulation which is qualitatively different from that of innovator product without performance of drug-excipient compatibility studies
- Scientific rational for the adaptation of acceptance criteria of disintegration test i.e. more than 1 minute while for oro-dispersible tablets USFDA recommends disintegration time of less than 30 seconds.
- Scientific rational for not performing dissolution test during product development studies, batch release as well as during stability studies while the USP general chapter <1711> oral solid dosage forms - dissolution testing recommends dissolution testing for orodispersibe tablets.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Registration Board after thorough deliberation and keeping in view the review of innovator product, guidelines of USFDA for orally disintegrating tablets and the recommendations of USP general chapter <1711> oral solid dosage forms - dissolution testing decided that since the contract manufacturer i.e. M/s Next Pharmaceuticals is also manufacturing the same product for its own use therefore the technical queries and onservations on the contract manufactured product shall also apply on the self manufactured product of the firm	No response from the manufacturer M/s Next Pharmaceuticals have been received in this regard.
2.	Submission of product development and stability study data of the recently manufactured batches by M/s Next Pharmaceuticals Products (Pvt) Ltd since their formulation is qualititaively different	Firm has not submitted any product development data or revised formulation / composition, drug-excipient compatability studies, pharmaceutical equivalence and CDP studies.

	from that of the innovator product and the firm has not performed drug-excipient compatability studies, the acceptance criteria of disintegration test is is more than 1 minute while for oro-dispersible tablets USFDA recommends disintegration time of less than 30 seconds and the finished product specifications or product development studies does not include dissolution test which is recommended in USP general chapter <1711>.	A Brief pharmaceutical development report has been submitted by CCL pharmaceuticals while the product manufacturer is Next Pharmaceuticals. Moreover firm has submitted stability study data of three batches in which the first batch was manufactured **in May 2021 while the 307th meeting of Registration Board in which this case was considered, was conducted on 8,9 and 10th June 20221.**
3.	Scientific justification of having a master formulation which is qualitatively different from that of innovator product without performance of drug-excipient compatibility studies	No response submitted by the firm
4.	Scientific rational for the adaptation of acceptance criteria of disintegration test i.e. more than 1 minute while for oro-dispersible tablets USFDA recommends disintegration time of less than 30 seconds.	No response submitted by the firm
5.	Scientific rational for not performing dissolution test during product development studies, batch release as well as during stability studies while the USP general chapter <1711> oral solid dosage forms - dissolution testing recommends dissolution testing for orodispersibe tablets.	No response submitted by the firm

Firm has submitted another response dated 21-11-2022 in which the firm has submitted stability study data of 3 newly manufactured batches for the drug product manufactured from same source of API. Firm has also perfomed dissolution test on the newly submitted data. The details of the stability data is as under:

STABILITY STUDY DATA

Manufacturer of API	Vasudha Pharma Chem Limited, Unit-II, Plot No. 79, Jiawaharlal Nehru Pharma city Thanam village Parawada, Mandal, Visakhapatanam Andhra Pradesh India.		
API Lot No.	BDOM/1902010		
Description of Pack (Container closure system)	Alu-alu blister		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	BU-0053	BU-0054	BU-0055
Batch Size	38815 Packs	39488 Packs	39066 Packs
Manufacturing Date	05-2021	08-2021	11-2021
Date of Initiation	11-06-2021	27-08-2021	07-12-2021
API Lot No.	BDOM/1902010	BDOM/2105066	BDOM/2105066
No. of Batches	03		

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit fee 75,000/- for revision of stability study data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

736.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Farm Aid Pharmaceuticals, 3/2 Phase I & II Hattar, Industrial Estate, Hattar.**
	Name, address of Manufacturing site.	M/s Cure Laboratories (Pvt) Ltd. Plot # 11-12, Street # NS-2, RCCI Industrial Estate, Rawat Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 19-10-2020.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cure Laboratories dated 18-02-2021 based on the inspection dated 12-08-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License of M/s Cure Laboratories (Pvt) Ltd dated 05-03-2019 specifying Dry Powder suspension (Cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 10738: 07-04-2021
	Details of fee submitted	PKR 50,000/-: 23-11-2020
	The proposed proprietary name / brand name	**FOFAM 100mg/5ml Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension Contains: Cefixime as trihydrate……100mg
	Pharmaceutical form of applied drug	Off white powder filled in amber colored glass bottle
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	30 ml, 60ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime suspension **(USFDA** Approved)
	For generic drugs (me-too status)	Cefim suspension by Hilton
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cefspan dry suspension.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.		
API Lot No.	00243/178/2019		
Description of Pack (Container closure system)	Amber color glass bottle		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	19001	19002	19006

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous product specific inspectinon of the firm has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-

		2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 13-11-2019 specifying purchase of 25Kg Cefixime (micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Justify the analytical procedure and validation studies of drug substance in which the injection volume is 20µl and the retention time is around 5 minutes and the total run time is 7 minutes, while as per USP monograph, the injection volume is 10 µl and the retention time is 10 min. Justify how you have deviated from the USP monograph and performed verification studies.	Previously the QC department not following USP monograph for analytical method verification studies. That's why there were deviations from USP monograph like injection volume were taken as 20uL and run time as 7 minutes. Therefore we have re-performed the analytical method validation studies in line with USP monograph and the analytical method verification report is attached herewith. **Firm has not justified their previous practice. Moreover the newly submitted verification studies are not as per ICH and USP recommendations and also does not specify any date on which these studies were conducted.**
As per the analytical procedure of drug substance, the concentration of standard solution is 0.2mg/ml while you have defined 10ppm solution as 100% solution in accuracy studies. Justify how your verification studies are representative of the same analytical procedure.	Previously the QC department not following USP monograph for analytical method verification studies. That's why there were deviations from USP monograph like single reading of a solution among two analysts. **The newly submitted verification studies are not as per ICH and USP recommendations and also does not specify any date on which these studies were conducted. Moreover the specificity studies does not specify the solution concentration.**
You have specified that 30ml bottle containing cefixime powder for suspension is to be reconstituted with 20ml water for injection. Justify how this reconstitution will yield similar concentration of the drug as hat of the innovator product.	Firm has submitted that we have followed cefspan 100mg/5ml powder for oral suspension as our innovator brand for product development. **The innovator product is available as 50ml, 75ml and 100ml bottle only.**
Justify why the test for uniformity of dosage unit is not added in drug product specification as recommended in USP monograph. Revise your product specifications in line with USP monograph along wih submission of fee for revision of specifications.	Firm has revised the specifications along with submission of fee PKR 7500/-vide slip number 6290135711 dated 24-01-2022. **Moreover, the new method again does not provide detailed method of sample solution preparation.**
Submit exact details of the assay preparation since the words "*Reconstitute sample as directed n the labelling"* should not be used in the method adopted by a firm. Instead provide details about the exact diluent along with volume in which reconstitution is to be carried out.	Firm has revised the specifications without **submission of any fee**. **Moreover, the new method again does not provide detailed method of sample solution preparation.**
Justify the alternate method for assay testing of the drug product which is based on UV analysis.	We haven't used any alternate method or analysis of finished product. The UV method for assay was submitted mistakenly.
You have submitted the results of verification studies of drug substance in section 3.2.P.5.3 under the heading of verification studies of the drug product. Justify how same	Previously the QC department not following USP monograph for analytical method verification studies. That's why there were deviations from USP monograph.

results for all the parameters can be achieved for drug substance and drug product.	Therefore, we have re-performed the analytical method validation studies. **The submitted studies again show similar results from that of drug substance verification studies. Moreover, the HPLc chromatograms show 1uL injection volume and various chromatograms have been printed before the execution time of the relevant chromatogram.**
Justify the significant difference in assay for batch No. 19002 in accelerated stability studies where the assay declined from 110% at initial time point to 99.03% after 6 months. This difference is considered to be significant change as per the ICH guidelines, justify how your stability studies for this batch may be considered acceptable in the light of ICH guidelines keeping in view that the real time stability studies are also available for 9 months and the same trend is also observed in real time stability studies.	The accelerated stability studies of the Batch No. 19002 in which the assay declined from 110% at initial month and 99.03% at 6th month, this **may** be due to mishandling by the analyst or **may** be due to dilution factor. If our product is unstable then same trend should be in other batches of this product. Other two batches are not showing this trend it clearly depicts the **mishandling or wrong dilution by the analyst.** The response of the firm regarding **mishandling or wrong dilution by the analyst raise question on the complete data and testing since the firm is also not complying USP specifications and also not performed the verification studies.**
Justify why the assay test is performed using UV method while the method of analysis of drug substance manufacturer, innovator product and USP monograph is based on HPLC method. Furthermore, the verification studies were also conducted for HPLC method. Justify how you have released the commercial batches without testing the product as per USP specifications and also performed stability studies.	We have checked the batches of Fixikef 100mg/5ml dry suspension on HPLC as well on that time before release of the batches. We have performed on UV for verification of the results only. Due to some mis-understanding the UV report was submitted. **The firm in its response in a question above stated that "*We haven't used any alternate method or analysis of finished product. The UV method for assay was submitted mistakenly*". The response of the firm is contradictory among different points.**
Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice (Invoice # 1013, customer PO# NIL, Proforma invoice No. PL/P-INV/HO/663, DN No. 1013) dated 13-11-2019 specifying purchase of 25Kg Cefixime (micronized). **However, the invoice submitted by the firm does not seems to be real and may require to be verified.**
Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted that they have submitted 21 CFR compliance report in Fofam 100mg/5ml suspension file. **However, audit trail report was not submitted.**
You have specified that the capacity of double cone mixer for dry suspension is 200Kg, while the batch size for which stability data is submitted is 85Kg. Justify how uniform mixing was carried out using a mixer of two times higher capacity than the batch size.	We have initially sieved all the ingredients through sieve # 30 and then loaded into mixer then run for 45 minutes at 30 RPM. Then we intimated for sampling for QC analysis. QC has tested the sample and released the batch for filling. Our mixing method is validated for this batch size and all the batches are showing the results within the specified limits. Therefore uniform mixing of 85Kg can be done in a 200Kg capacity.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Scientific justification for testing commercial batches of the drug product using specifications different from that specified in USP monograph.
- Scientific justification for having drug product specifications and testing method different from that specified in USP monograph.
- Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.
- Scientific justification for stability testing of the product using UV method which is not recommended by USP monograph.
- Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Submission by the firm:

Sr. No	Reason for deferment	Respose by the firm
1.	Scientific justification for testing commercial batches of the drug product using specifications different from that specified in USP monograph.	We have performed all the tests of the finished products of the commercial batches Fixikef 100mg/5ml Suspension as per USP Monograph but during typing of Reports our analyst forget to mention all the tests / parameters on the Finished Product Reports. Now we have corrected the COAs of the Finished Products of these Commercial Batches of Fixikef 100mg/5ml Suspension and a copy of the reports are submitted.
2.	Scientific justification for having drug product specifications and testing method different from that specified in USP monograph.	Initially there were some mistakes in the Specifications and Testing Method of the finished product. Now we have corrected the Specifications and SAP as per Current USP Monograph and a copy of Specification and SAP of Fixikef 100mg/5ml Suspension is submitted. **The revised specifications specify that revision number is 00 and the amendment history also does not show any changes in specifications.**
3.	Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.	We have performed all the parameters of method verification studies of finished product but there may be some variation from ICH Guideline due handling from the analyst or may be dilution factor. Therefore, we will be careful next time and try to perform as per ICH Guidelines.
4.	Scientific justification for stability testing of the product using UV method which is not recommended by USP monograph.	Initially there were some mistakes our Quality Control end that they haven't follow USP monograph in real sense and perform stabilities on UV Spectrophotometer. When we realized this mistake we have performed remaining stability time points on HPLC Spectrophotometer. We enclosed a copy of stability of remaining time points performed on HPLC Spectrophotometer. Firm has now submitted HPLC chromatograms for assay testing dated 28-10-2021 in which only 1 standard injection was used and the calculation formula was also not as per USP. Moreover firm has submitted HPLC data of 28-10-2021 while 316th meeting in which this case was dicusedd was conducted in March 2022.
5.	Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.	Firm has submitted audit trail report of 2022 and digital data logger record of stability chambers.

Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Cure Laboratories (Pvt) Ltd. Plot # 11-12, Street # NS-2, RCCI Industrial Estate, Rawat Islamabad.**
- **Firm shall submit record of testing of recently manufactured commercial batches as per USP monograph before issuance of Registration letter.**

737.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Farm Aid Pharmaceuticals, 3/2 Phase I & II Hattar, Industrial Estate, Hattar.**

	The proposed proprietary name / brand name	**FOFAM 200mg/5ml Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension Contains: Cefixime as trihydrate……200mg
	Pharmaceutical form of applied drug	Off white powder filled in amber colored glass bottle
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	30 ml, 60ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime suspension **(USFDA** Approved)
	For generic drugs (me-too status)	Cefim suspension by Hilton
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cefspan 200mg/5ml dry suspension.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.		
API Lot No.	00243/178/2019		
Description of Pack (Container closure system)	Amber color glass bottle		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	19003	19007	20002
Batch Size	3000 bottles	3000 bottles	3000 bottles
Manufacturing Date	12-2019	12-2019	01-2020
Date of Initiation	04-12-2019	26-12-2019	08-01-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous product specific inspectinon of the firm has been conducted.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 13-11-2019 specifying purchase of 25Kg Cefixime (micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Justify the analytical procedure and validation studies of drug substance in which the injection volume is 20µl and the retention time is around 5 minutes and the total run time is 7 minutes, while as per USP monograph, the injection volume is 10 µl and the retention time is 10 min. Justify how you have deviated from the USP monograph and performed verification studies.	Previously the QC department not following USP monograph for analytical method verification studies. That's why there were deviations from USP monograph like injection volume were taken as 20uL and run time as 7 minutes. Therefore we have re-performed the analytical method validation studies in line with USP monograph and the analytical method verification report is attached herewith. **Firm has not justified their previous practice. Moreover the newly submitted verification studies are not as per ICH and USP recommendations and also does not specify any date on which these studies were conducted.**
As per the analytical procedure of drug substance, the concentration of standard solution is 0.2mg/ml while you have defined 10ppm solution as 100% solution in accuracy studies. Justify how your verification studies are representative of the same analytical procedure.	Previously the QC department not following USP monograph for analytical method verification studies. That's why there were deviations from USP monograph like single reading of a solution among two analysts. **The newly submitted verification studies are not as per ICH and USP recommendations and also does not specify any date on which these studies were conducted. Moreover, the specificity studies does not specify the solution concentration.**
Justify the total fill weight of 14.940gm per bottle, since you have mentioned exactly same quantities of each excipient and have used double quantity of the drug substance as that provided in 100mg/5ml suspension.	We have used quantities of all the excipients are same except that of sugar, which adjusted in Fixikef 200mg/5ml DS for double quantity of API.
You have specified that 60ml bottle containing cefixime powder for suspension is to be reconstituted with 20ml water for injection. Justify how this reconstitution will yield similar concentration of the drug as hat of the innovator product.	Firm has submitted that the 60ml bottle contains 17.20g powder and it will be reconstituted using 20ml sterile water for injection.
Justify why the test for uniformity of dosage unit is not added in drug product specification as recommended in USP monograph. Revise your product specifications in line with USP monograph along wih submission of fee for revision of specifications.	Firm has revised the specifications along with submission of fee PKR 7500/-vide slip number 6290135711 dated 24-01-2022. **Moreover, the new method again does not provide detailed method of sample solution preparation.**
Submit exact details of the assay preparation since the words "*Reconstitute sample as directed n the labelling"* should not be used in the method adopted by a firm. Instead provide details about the exact diluent along with volume in which reconstitution is to be carried out.	Firm has revised the specifications without **submission of any fee**. **Moreover, the new method again does not provide detailed method of sample solution preparation.**

Justify the alternate method for assay testing of the drug product which is based on UV analysis.	We haven't used any alternate method or analysis of finished product. The UV method for assay was submitted mistakenly.
You have submitted the results of verification studies of drug substance in section 3.2.P.5.3 under the heading of verification studies of the drug product. Justify how same results for all the parameters can be achieved for drug substance and drug product.	Previously the QC department not following USP monograph for analytical method verification studies. That's why there were deviations from USP monograph. Therefore, we have re-performed the analytical method validation studies. **The submitted studies again show similar results from that of drug substance verification studies. Moreover, the HPLc chromatograms show 1uL injection volume and various chromatograms have been printed before the execution time of the relevant chromatogram.**
Justify the significant difference in assay for batch No. 20002 in accelerated stability studies where the assay declined from 103% at initial time point to 97.47% after 6 months. This difference is considered to be significant change as per the ICH guidelines, justify how your stability studies for this batch may be considered acceptable in the light of ICH guidelines.	The accelerated stability studies of the Batch No. 2002 in which the assay declined from 103% at initial month and 97.47% at 6th month, this **may** be due to mishandling by the analyst or **may** be due to dilution factor. If our product is unstable then same trend should be in other batches of this product. Other two batches are not showing this trend it clearly depicts the **mishandling or wrong dilution by the analyst.** The response of the firm regarding **mishandling or wrong dilution by the analyst raise question on the complete data and testing since the firm is also not complying USP specifications and also not performed the verification studies.**
Justify why the assay test is performed using UV method while the method of analysis of drug substance manufacturer, innovator product and USP monograph is based on HPLC method. Furthermore, the verification studies were also conducted for HPLC method. Justify how you have released the commercial batches without testing the product as per USP specifications and also performed stability studies.	We have checked the batches of Fixikef 100mg/5ml dry suspension on HPLC as well on that time before release of the batches. We have performed on UV for verification of the results only. Due to some mis-understanding the UV report was submitted. **The firm in its response in a question above stated that "*We haven't used any alternate method or analysis of finished product. The UV method for assay was submitted mistakenly*". The response of the firm is contradictory among different points.**
Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice (Invoice # 1013, customer PO# NIL, Proforma invoice No. PL/P-INV/HO/663, DN No. 1013) dated 13-11-2019 specifying purchase of 25Kg Cefixime (micronized). **However, the invoice submitted by the firm does not seems to be real and may require to be verified.**
Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted that they have submitted 21 CFR compliance report in Fofam 100mg/5ml suspension file. **However, audit trail report was not submitted.**
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted that they have submitted temperature and humidity logger report in Fofam 100mg/5ml suspension file. **However, data logger report was not submitted.**
You have specified that the capacity of double cone mixer for dry suspension is 200Kg, while the batch size for which stability data is submitted is 85Kg. Justify how uniform mixing was carried out using a mixer of two times higher capacity than the batch size.	We have initially sieved all the ingredients through sieve # 30 and then loaded into mixer then run for 45 minutes at 30 RPM. Then we intimated for sampling for QC analysis. QC has tested the sample and released the batch for filling. Our mixing method is validated for this batch size and all the batches are showing the results within the specified limits. Therefore uniform mixing of 51Kg can be done in a 200Kg capacity.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Scientific justification for testing commercial batches of the drug product using specifications different from that specified in USP monograph.

- Scientific justification for having drug product specifications and testing method different from that specified in USP monograph.
- Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.
- Scientific justification for stability testing of the product using UV method which is not recommended by USP monograph.
- Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Submission by the firm:

Sr. No	Reason for deferment	Respose by the firm
1.	Scientific justification for testing commercial batches of the drug product using specifications different from that specified in USP monograph.	We have performed all the tests of the finished products of the commercial batches Fixikef 100mg/5ml Suspension as per USP Monograph but during typing of Reports our analyst forget to mention all the tests / parameters on the Finished Product Reports. Now we have corrected the COAs of the Finished Products of these Commercial Batches of Fixikef 100mg/5ml Suspension and a copy of the reports are submitted.
2.	Scientific justification for having drug product specifications and testing method different from that specified in USP monograph.	Initially there were some mistakes in the Specifications and Testing Method of the finished product. Now we have corrected the Specifications and SAP as per Current USP Monograph and a copy of Specification and SAP of Fixikef 100mg/5ml Suspension is submitted. **The revised specifications specify that revision number is 00 and the amendment history also does not show any changes in specifications.**
3.	Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.	We have performed all the parameters of method verification studies of finished product but there may be some variation from ICH Guideline due handling from the analyst or may be dilution factor. Therefore, we will be careful next time and try to perform as per ICH Guidelines.
4.	Scientific justification for stability testing of the product using UV method which is not recommended by USP monograph.	Initially there were some mistakes our Quality Control end that they haven't follow USP monograph in real sense and perform stabilities on UV Spectrophotometer. When we realized this mistake we have performed remaining stability time points on HPLC Spectrophotometer. We enclosed a copy of stability of remaining time points performed on HPLC Spectrophotometer. Firm has now submitted HPLC chromatograms for assay testing dated 28-10-2021 in which only 1 standard injection was used and the calculation formula was also not as per USP. Moreover firm has submitted HPLC data of 28-10-2021 while 316th meeting in which this case was dicusedd was conducted in March 2022.
5.	Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.	Firm has submitted audit trail report of 2022 and digital data logger record of stability chambers.

Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Cure Laboratories (Pvt) Ltd. Plot # 11-12, Street # NS-2, RCCI Industrial Estate, Rawat Islamabad.**
- **Firm shall submit record of testing of recently manufactured commercial batches as per USP monograph before issuance of Registration letter.**

738.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Farm Aid Group Pharmaceuticals, 3/2 Phase-I & II Hattar Industrial Estate Hattar, Haripur.**
	Name, address of Manufacturing site.	M/s Cure Laboratories (Pvt) Ltd. Plot # 11-12, Street # NS-2, RCCI Industrial Estate, Rawat Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 19-10-2020.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cure Laboratories dated 18-02-2021 based on the inspection dated 12-08-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License of M/s Cure Laboratories (Pvt) Ltd dated 05-03-2019 specifying Dry Powder vial (Cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 16367: 14-06-2021
	Details of fee submitted	PKR 50,000/-: 23-11-2020 + PKR 25,000/: 20-01-2022
	The proposed proprietary name / brand name	**SOCEF 250mg Injection IM**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……250mg
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Aczon injection by Vision Pharma

	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Oxidil 250mg Injection of M/s Sami Pharma.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
API Lot No.	Q012002060
Description of Pack (Container closure system)	Glass vials
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	20028	20029	20030
Batch Size	3000 vials	3000 vials	3000 vials
Manufacturing Date	05-2020	05-2020	05-2020
Date of Initiation	17-06-2020	18-06-2020	18-06-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous product specific inspectinon of the firm has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SX20180229) issued by CFDA China dated 06-06-2018. The GMP certificate is valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 200Kg Ceftriaxone sodium (sterile) dated 04-05-2020. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail report of 2022 and 2021 **but the audit trail report for the product testing of the applied product is not provided.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.	Firm has submitted fee challan for differential fee of PKR 25,000 dated 20-01-2022.
Justify the drug substance specifications submitted in section 3.2.S.4.1 which states that the material is non-sterile and the assay limit is 98 – 102% which is contrary to that specified in USP monograph for ceftriaxone for injection. Furthermore, clarify whether you have used sterile ready to fill drug substance or non-sterile ceftriaxone sodium.	There was a typographic mistake that non-sterile was mentioned and the assay limit was mentioned 98-102%. Actually, we have used sterile ceftriaxone sodium and just filled in vials under aseptic conditions. Actual assay limit for ceftriaxone sterile was NLT 795ug/mg on anhydrous basis. **The assay limit defined by FPP manufacturer is NLT 795ug/mg, while the assay limit of API manufacturer is NLT 840 ug/mg.**
Justify how the drug substance batch No. Q012002060 was released on 18-05-2020 without performing sterility test since this test is mentioned in the drug substance specifications as well as COA of drug substance manufacturer. Justify how 200kg material was released for production without performing sterility test.	At the time of import from the source SINO PHARM CHINA, No vendor sample was provided by the Supplier. Therefore, the container was opened in the sterile area under laminar flow hood and take sample for Chemical and Microbiological Tests. The chemical test was conducted at the spot and microbiological test (sterility) initiated by same day but on the basis of chemical analysis

	and the nature of sterile powder that can't be waited for sterility completion as sterility is for 14 days, we have decided to release the lot for production use **conditionally** for Filling and Sealing only. The condition was that after complying sterility we can label or pack the filled vials. On the Release Report the Analyst Forget to mention **Conditionally Released**, Now corrected the Release report and is attached. The Endotoxin and sterility reports are also attached herewith.
Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the innovator product as per USP specifications. Justify how only pH and assay test can demonstrate pharmaceutical equivalence.	Firm has again submitted pharmaceutical equivalence study report with oxidil injection in which more tests are also incorporated in the test report **without justifying the previously submitted studies.**
Justify why the pharmaceutical equivalence is performed against comparator product instead of testing against the innovator product.	We have performed Pharmaceutical Equivalence Studies with Comparator Product (Oxidil 250mg Injection IM of Sami Pharmaceuticals) because we are unable to arrange innovator pack of Rocephin 250mg Injection IM due to shortage of supply. Kindly accept the Pharmaceutical Equivalence Studies with Oxidil as an Exceptional Case Please.
Justify your process validation protocols without any process for optimization of sterilization process and sealing of vials etc. Further justify why complete process validation is not performed since commercial batches of the drug product have been manufactured by the manufacturer.	Firm has submitted revised process validation protocols **without justifying the previously submitted protocols.**
Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain important tests as recommended by USP including test for constituted solution, particulate matter in injection, crystallinity and complete assay test.	Firm has submitted revised specifications of the drug product **without justifying the previously submitted justifications.**
Provide detailed testing method for the drug product as per the USP specifications since the submitted method is not complete. Also submit fee for revision of specifications in the light of USP monograph.	Firm has submitted revised specifications of the drug product without justifying the previously submitted justifications. **However the revised method of analysis is also in variation to USP in terms of the assay test since USP recommends two different type of test for the assay and the sample solution preparation method of USP is in mobile phase, while the firm is preparing sample solution in 1% lignocaine.** Firm has also submitted fee PKR 7500 for revision of specifications dated 18-01-2022.
Clarify the sample solution preparation method in your analysis which states "constitute ceftriaxone for injection in a volume of water corresponding to the volume of solvent specified in the labelling". Specify what is the exact volume in which reconstitution is to be carried out instead of mentioning generalized statements.	Break the tip of the Ampoule of Lignocaine 1% Solution for injection 2ml. Draw the Solution inside in syringe (Almost drawable volume is 1.8ml). Then inject the solution into the Niasef 250mg Injection IM Vial and reconstitute for 5 minutes until clear solution is obtained. Then leave the solution for 1-2 minutes to clear the bubbles inside, then take a fresh syringe and draw the ceftriaxone solution into the syringe and inject through IM route. **Firm has submitted method for administration of the injection instead of providing detailed method for sample solution preparation in assay method.**
Justify how three commercial batches were released for commercial use without performing complete tests as specified in USP monograph.	**Firm has not submitted any response**
The batches are released after 16-06-2020, while the stability studies were initiated on 02-06-2020. Justify how the batch could be initiated for stability studies before the batch release.	We have initiated stability 02-06-2020 because our micro Lab completed the stability of filled vials on 02-06-2020. We have packed the required stability packs on same date manually i.e. 02-06-2020 but remaining packing of whole batch was carried out by production department on 16-06-2020 and our QC Released the batch on 16-06-2020 after checking retained packs received on 16-06-2020.

Justify why the test for bacterial endotoxin, sterility, water contents, constituted solution etc is not performed during stability studies since these tests are very critical and are required to make assessment of the stability profile and shelf life.	**Firm has not submitted any response**
Justify the raw data sheets in which sample preparation method is incomplete.	Firm has still provided incomplete raw data sheets in which the calculation procedure is different from that specified in the analytical method of the firm, moreover **firm is preparing sample solution in 1% lignocaine contrary to the recommendations of USP.**
Justify how only single value of peak area of standard and sample is used to calculate the assay of drug product during stability studies.	**Firm has not submitted any justification,** instead provided new chromatograms in which 2 standard injections are used which is still not as per the recommendations of USP.
Provide complete record of the stability testing of each batch with proper separators in a sequence instead of separately providing the data without any sequence.	**Firm has again submitted data without any proper sequence again and the raw data sheets are also incomplete since they only contain single value of standard and sample area, further the potency of standard used in raw data sheets are 830.4, while the actual potency of standard as per COA submitted by the firm is 843. Furthermore, the sample solution prepared by the firm is in lignocaine contrary to USP recommendations.**
Justify the batch manufacturing record in which the exact time of start and end of sterilization, filling of vial and sampling etc is not mentioned.	This was a typographical mistake that the BMRs should include Sterilization Start and End Time not mentioned. Actually the sterilization start and End time was noted on the Sterilization Log book. Now we have corrected the BMR and included Sterilization Start and End time.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Scientific justification for assay limit as NLT 795ug/mg, while the assay limit of drug substance manufacturer is NLT 840 ug/mg.
- Scientific justification for testing commercial batches of the drug product using specifications different from that specified in USP monograph.
- Scientific justification for having drug product specifications and testing method different from that specified in USP monograph.
- Scientific justification how three commercial batches were released in the market without complete testing as per USP monograph.
- Scientific justification why the test for bacterial endotoxin, sterility, water contents, constituted solution etc is not performed during stability studies.
- Scientific justification how only single value of peak area of standard and sample is used to calculate the assay of drug product during stability studies.
- Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Submission by the firm:

Sr. No	Reason for deferment	Respose by the firm
1.	Scientific justification for assay limit as NLT 795ug/mg, while the assay limit of drug substance manufacturer is NLT 840 ug/mg.	Initially we have followed USP Monograph for testing of Ceftriaxone Sodium API and the limit for Assay of Ceftriaxone Sodium was 795ug/mg. But after discussion with concerned Assistant Director (AD) we have realized that we should follow the narrow range for Assay of Ceftriaxone Sodium. Therefore, we have changed the Assay Limit and the new limit (as per API Supplier Chinese Pharmacopeia) we have adopted 840ug/mg for Assay of Ceftriaxone Sodium. We will follow 840ug/mg

		as Assay Limit for future API (Ceftriaxone Sodium) lots testing.
2.	Scientific justification for testing commercial batches of the drug product using specifications different from that specified in USP monograph.	We have performed all the tests of the finished products of the commercial batches NIASEF 250MG INJECTION IM as per USP Monograph but during typing of Reports our analyst forget to mention all the tests / parameters on the Finished Product Reports. Now we have corrected the COAs of the Finished Products of these Commercial Batches of NIASEF 250MG INJECTION IM and a copy of the reports are attached herewith for your review please.
3.	Scientific justification for having drug product specifications and testing method different from that specified in USP monograph.	Initially there were some mistakes in the Specifications and Testing Method of the finished product. Now we have corrected the Specifications and SAP as per Current USP Monograph and a copy of Specification and SAP of Socef 250mg Injection IM is attached herewith. We have already paid a Fee of RS 7500/- for change of Specifications of Socef 250mg Injection IM.
4.	Scientific justification how three commercial batches were released in the market without complete testing as per USP monograph.	We have performed all the tests of the finished products of the commercial batches NIASEF 250MG INJECTION IM as per USP Monograph but during typing of Reports our analyst forget to mention all the tests / parameters on the Finished Product Reports. Now we have corrected the COAs of the Finished Products of these Commercial Batches of NIASEF 250MG INJECTION IM and a copy of the reports are attached herewith for your review please.
5.	Scientific justification why the test for bacterial endotoxin, sterility, water contents, constituted solution etc is not performed during stability studies.	We have performed all the tests of the stability batches at every interval of time but at the time of typing of Stability Reports our analyst forget to mention on stability sheets. Now after 9th month we have performed all the parameters as per USP Monograph and the results of stability studies on 12th month 18th month and a current time point is attached for your review and evaluation.
6.	Scientific justification how only single value of peak area of standard and sample is used to calculate the assay of drug product during stability studies.	Initially we have performed stability studies with a single value of standard and a sample but when we realize our mistake than we have corrected our studies with three standards and two samples. The stability data time points with 12th month, 18th month and current point is as per three standards and two samples. **Firm is now using 2 standard injection.**
7.	Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.	Firm has submitted audit trail report of 2022 and digital data logger record of stability chambers.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Cure Laboratories (Pvt) Ltd. Plot # 11-12, Street # NS-2, RCCI Industrial Estate, Rawat Islamabad.**

- **Firm shall submit record of testing of recently manufactured commercial batches as per USP monograph before issuance of Registration letter.**

739.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi.**
	Name, address of Manufacturing site.	M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 02-08-2021 is submitted.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Vision Pharmaceuticals dated 25-03-2022 based on inspection dated 11-02-2019. As per the certificate, it was valid till 09-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML of M/s Vision Pharmaceuticals DML No 000517 dated 07-06-2021. Firm has also submitted copy of letter dated 09-12-2021 which specifies that CLB in its 283rd meeting held on 28th October 2021 also approved renewal of DML for Liquid Injectable (LVP) General Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23864: 31-08-2021
	Details of fee submitted	PKR 75,000/-: 06-08-2021
	The proposed proprietary name / brand name	**JYTHON 600mg/300ml Infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial of 300ml Contains: Linezolid…..…600mg
	Pharmaceutical form of applied drug	Liquid infusion
	Pharmacotherapeutic Group of (API)	Antibacterials for systemic use
	Reference to Finished product specifications	In-house specs
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zyvox IV **(USFDA** Approved)
	For generic drugs (me-too status)	Nezkil Infusion by Continental pharma
	Name and address of API manufacturer.	Optrix Laboratories Pvt Ltd. Survey No. 145/A & 147, Ramalingampally (V), Bommalaramaram (M), Yadadri-Bhuvanagiri District Telangana India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and

		its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Nezkil infusion of Continental Pharma.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Optrix Laboratories Pvt Ltd. Survey No. 145/A & 147, Ramalingampally (V), Bommalaramaram (M), Yadadri-Bhuvanagiri District Telangana India.		
API Lot No.	OP-LID/10/17/107		
Description of Pack (Container closure system)	Glass vials

Manufacturing Date	12-2017	12-2017	12-2017
Date of Initiation	27-12-2017	29-12-2017	29-12-2017
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 68951/TS/2021) issued by Drugs control administration, Government of Telangana dated 20-09-2021. The GMP certificate is valid till 19-09-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 08-11-2017 specifying import of 50Kg Linezolid. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC system are not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Justify the manufacturing of 300ml glass vial (linezolid 600mg/300ml Infusion), while your approved manufacturing facility is "Liquid Injectable Vial SVP (General) section".	Firm has also submitted copy of letter dated 09-12-2021 which specifies that CLB in its 283rd meeting held on 28th October 2021 also approved renewal of DML for Liquid Injectable (LVP) General Section.
2.	The drug substance manufacturer has specified HPLC test for assay of drug substance while the drug product manufacturer has specified UV method for assay of drug substance. Justify how drug product manufacturer can adopt different test for assay method from that recommended by the drug substance manufacturer.	The drug substance testing was done by UV method at that time, but currently we are using HPLC method for both API and product.
3.	Submit COA of relevant batch of API used in the manufacturing of batches for which stability study data is submitted in section 3.2.P.8.3 from both drug substance manufacturer as well as drug product manufacturer in section 3.2.S.4.4, since you have submitted COA of batch number OP-LID/10/17/107 (Mfg date: 09-2017), while as per the submitted import documents the lot number of the API is OP-LID/07/18/077 (Mfg date: 05-2018) and the three stability batches are manufactured in 12-2017.	Firm has submitted ADC attested commercial invoice for lot number OP-LID/10/17/107.
4.	Innovator drug product is using sodium hydroxide and/or hydrochloric acid for ataining the pH within a narrow range of 4.4-5.2 while your master formulation does not specify the use of any such ingredient. Justification is required in this regard.	For pH adjustment we had mentioned HCL and sodium hydroxide in BMR. As our formulation is stable and upon manufacturing the pH comes in limit as defined, and we do not require HCl or Sodium hydroxide for pH adjustment.
5.	Justify why the pharmaceutical equivalence studies were conducted against the comparator product instead of using innovator / reference product. Further justify why pharmaceutical equivalence does not include all quality tests.	Pharmaceutical equivalence study was done against Nezkil of continental pharma as mentioned in DRAP 293rd meeting we can use Reference or comparator product for comparison and comparator product is among brand leaders in Pakistan.
6.	The pH of the product mentioned in section 3.2.P.2.6 is 6.12 with a range of 5.0 to 7.0 which is contrary to the limit defined in your	It was a typo error. Actual pH range is 4.4 to 5.5 and our results fall in it.

	speifications. Justification is required in this regard.	
7.	Justify why terminal sterilization is not performed for the said product although being the method of choice for sterilization.	Firm has submitted that they have performed terminal sterilization and have also submitted copy of BMR.
8.	Justify why the test for filled volume is not specified in the specifications of the drug product although this test is recommended in general monograph of official pharmacopoeia.	Filled volume test reports are now provided by the firm.
9.	Justify the pH of the drug product from 4.4 to 5.5 since the pH range recommended by the innovator's product is 4.4-5.2.	Linezolid infusion batches kept on stability have pH almost in the range of 4.4 to 4.8, and this is in limit of 4.4 to 5.2, However we will revise the pH limit as according to innovator specs and will revise the testing SOP.
10.	Justify the analytical method for assay testing of the drug product which is based on UV method since the innovator's product as well as the drug substance manufacturer specify HPLC method for assay test.	Firm has submitted revised analytical procedures of the drug product dated 13-09-2021. As per the method, buk product is tested by UV method while filled vial are tested using HPLC method. **The revised method is signed on 13-09-2021 while the stability studies were initiated on December 2017.**
11.	The container closure system of the innovator is "flexible plastic infusion bags in a foil laminate overwrap" while your prduct is packed in glass vial. Justify how your container closure system can prevent the product from exposure to the light.	Stability is done in glass vial and it is stable. Also our glass vials are wrapped in laminated foil.
12.	Justify why the test of pH is not performed during stability studies.	pH is not included in stability summary sheets, however all testing is performed and mentioned in analysis certificates. pH results added in stability summary sheet.

Decision of 320th meeting of Registration Board:

Deferred for following:

- Scientific justification for revised analytical procedures of the drug product dated 13-09-2021 in which buk product is tested by UV method while filled vial are tested using HPLC method.
- Scientific justification how a revised method dated 13-09-2021 can represent the results of the stability studies which were initiated in December 2017.

Submission by the firm:

Sr. No.	Reason for deferment	Response by the firm
1.	Scientific justification for revised analytical procedures of the drug product dated 13-09-2021 in which buk product is tested by UV method while filled vial are tested using HPLC method.	Testing of bulk batch is not regulatory requirement so its testing is performed on UV (already validated method), because after bulk testing product is released for filling while finished product is tested on HPLC and product released for packing after HPLC test.
2.	Scientific justification how a revised method dated 13-09-2021 can represent the results of the stability studies which were initiated in December 2017.	As this product is not phrmacopoeial so previously batches were tested according to UV method hence the submitted stability were tested according to previous methods. Then we shifted to HPLC method effectively from 13-09-2021 for which we have revised our SOPs.

Decision: Approved with Innovator's specifications.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit fee 7,500/- for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Firm shall submit data of HPLC testing on recently manufactured batches of the applied drug product before issuance of Registration letter.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Nagarsons Pharmaceutical is a new license facility hence no such inspection has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Drug Manufacturing License of Hebei Guolong Pharmaceutical Co. Ltd. (No. JI20150058) issued by Hebei Provincial Drug Administration dated 22-07-2020. The certificate is valid till 21-07-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying purchase of 10Kg Azithromycin dihydrate cleared dated 24-08-2021. The invoice is cleared by AD (I&E).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with UV spectra, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC systems are not 21 CFR compliant
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications and analytical method from both API manufacturer as well as Nagarsons Pharma.
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	Firm has submitted report of verification studies of the analytical method of drug substance.
3.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product.	Firm has submitted COA of relevant batch of drug substance from API manufacturer as well as Nagarsons Pharma.
4.	Justify why pharmaceutical equivalence and CDP studies are performed against zetamax tablet of Pfizer instead of using the innovator's product.	We use Zetamax tablet by Pfizer because the innovator product is not available in the market in Pakistan.
5.	Provide raw data sheets for the calculation of results of dissolution test throughout the stability studies.	Firm has submitted raw data sheets for the calculation of results of dissolution test throughout the stability studies using HPLC method.
6.	Provide evidence of column oven which is required to maintain temperature of 50°	Firm has not submitted evidence of HPLC along with column oven.
7.	Submit Batch Manufacturing Record of three stability batches.	Firm has submitted copy of Batch Manufacturing Record of three stability batches.

Decision of 320th meeting of Registration Board:

Deferred for submission of evidence of HPLC system along with column oven which is required to maintain temperature of 50° for assay testing of drug product as per USP monograph.

Response by the firm:

Firm has submitted following documents:

- Copy of invoice from Prestigious Multi Enterprises for purchase of HPLC dated 12-01-2021.

- Firm has also submitted another copy of invoice from Prestigious Multi Enterprises dated 12-01-2021 for purchase of HPLC column c-18 along with HPLC Column Oven.
- Firm has also submitted caliberation certificate from Galvano Scientific (Pvt) Ltd dated 12-04-2022 for caliberation of HPLC including its column oven set at 40 degree.
- Picture of an HPLC system with column oven set at 50 degree claimed to be placed in their QC lab.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit IQ, OQ and PQ of HPLC system along with column oven before issuance of registration letter.**

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications and analytical method from both API manufacturer as well as Nagarsons Pharma.
2.	Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.	Firm has submitted report of verification studies of the analytical method of drug substance.

3.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product.	Firm has submitted COA of relevant batch of drug substance from API manufacturer as well as Nagarsons Pharma.
4.	Submit stability study data in proper sequence as per the guidelines of registration Board since the submitted data is not properly aligned.	Firm has submitted complete data in section 3.2.P.8.3 as per the guidelines specified in CTD guidance document.
5.	Provide raw data sheets for the calculation of results of dissolution test throughout the stability studies.	Firm has submitted raw data sheets for the calculation of results of dissolution test throughout the stability studies using HPLC method.
6.	Provide evidence of column oven which is required to maintain temperature of 50°	Firm has not submitted evidence of HPLC along with column oven.
7.	Submit Batch Manufacturing Record of three stability batches.	Firm has submitted copy of Batch Manufacturing Record of three stability batches.

Decision of 320th meeting of Registration Board:
Deferred for submission of evidence of HPLC system along with column oven which is required to maintain temperature of 50° for assay testing of drug product as per USP monograph.

Response by the firm:
Firm has submitted following documents:

- Copy of invoice from Prestigious Multi Enterprises for purchase of HPLC dated 12-01-2021.
- Firm has also submitted another copy of invoice from Prestigious Multi Enterprises dated 12-01-2021 for purchase of HPLC column c-18 along with HPLC Column Oven.
- Firm has also submitted caliberation certificate from Galvano Scientific (Pvt) Ltd dated 12-04-2022 for caliberation of HPLC including its column oven set at 40 degree.
- Picture of an HPLC system with column oven set at 50 degree claimed to be placed in their QC lab.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit IQ, OQ and PQ of HPLC system along with column oven before issuance of registration letter.**

742.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Valor Pharmaceuticals. 124/A Industrial Triangle, Kahuta Road Islamabad.**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 25-03-2021.
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry Vial section (Cephalosporin).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Dy. No. and date of submission	Dy. No. 19891: 15-07-2021
	Details of fee submitted	PKR 50,000/-: 27-04-2021
	The proposed proprietary name / brand name	**ROVITROX 2g Injection IV**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……2g
	Pharmaceutical form of applied drug	Sterile white to off white / yellowish crystalline powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Rocephin injection by Roche.
	Name and address of API manufacturer.	Pharmagen Ltd. Kot Nabi Buksh Wala 34-Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted compatibility studies of the drug product along with the recommended diluent i.e. water for injection.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests defined in USP for their product against the comparator i.e. Rocephin 2g Injection of M/s Roche Pakistan.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Ltd. Kot Nabi Buksh Wala 34-Km, Ferozepur Road, Lahore.		
API Lot No.	00421/002/2019		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	002	003
Batch Size	400 vials	400 vials	400 vials
Manufacturing Date	02-2020	02-2020	02-2020
Date of Initiation	20-02-2020	20-02-2020	20-02-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying import of 10Kg Ceftriaxone sodium (sterile) dated 19-02-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm was asked to submit the following:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.

- Submit product development and stability study data of commercial batches manufactured by the drug product manufacturer as per the decision of 312nd meeting of Registration Board, since the submitted data are of trial batches.

Response by the firm:
The firm submitted its response (Dy No. 6979) dated 14-03-2022 submitted the following data:

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China.		
API Lot No.	Q012105004		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	16-08-2021	16-08-2021	16-08-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SX20180229) issued by CFDA China dated 06-06-2018. The GMP certificate is valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 28-06-2021 specifying import of 150Kg Ceftriaxone sodium (sterile). The invoice was cleared by AD (I&E).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Firm has changed the source of drug substance from Pharmagen limited to Sinopharm Weiqida.
- Firm has submitted copy of BMR of commercial batches.
- Firm has not submitted fee for change of API source and stability study data.

Decision of 320th meeting of Registration Board:
Deferred for clarification for performing pharmaceutical equivalence studies against Rocephin Injection 2g since this product is not registered in Pakistan.

Response by the firm:
Firm has submitted as under:
Please refer to the subject cited above; we are hereby submitting the Pharmaceuticals equivalence of Rovitrox 2g Injection with Oxidil 2g Injection. Typographically mistake in Pharmaceutical equivalence Report mentioned Rocipen 2g injection instead of oxidil 2gm injection.

Firm has submitted pharmaceutical equivalence report against Oxidil 2g Injection manufactured by Sami with following product details
Batch No: 010E
Mfg. Date: 09-2019
Exp. Date: 08-2021

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi.**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm was issued letter of shortcoming for the following observations. The firm has replied to the queries and the response is as below:

Shortcomings communicated	**Response by the firm**
Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.	Firm has submitted that they will submit the differential fee before issuance of registration letter.
Submit valid contract manufacturing agreement between the contract giver and contract acceptor.	Firm has submitted contract manufacturing agreement dated 17th December 2020 between the contract giver and contract acceptor.
Submit product development and stability study data of commercial batches manufactured by the drug product manufacturer, since the submitted data are of trial batches.	Firm has submitted stability study data of 3 commercial batches and have referred to the product development studies previously submitted in the initial application. The details of the stability studies data is as follows:

STABILITY STUDY DATA OF COMMERCIAL BATCHES

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of previous inspection report of Rofair 500 mcg Tablet which is conducted on 25-06-2019. The report confirms that: HPLC system is 21 CFR part II compliant. Digital data logger was present.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of DML No. GAN 20160125 issued by Jiangxi province FDA valid till 15-02-2021. The firm has submitted copy of GMP certificate (No. 2017001) issued by Jiangxi CCD valid till 23-07-2022.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of Form 6 license no. 2782 cleared by AD (I & E) DRAP, dated 12-10-2017. However, invoice is not attested.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance Record of HPLC software 21CFR & Audit trail on testing reports of product submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Observations communicated	Response by the firm
1.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the drug substance / active pharmaceutical ingredient by both drug substance & drug Product manufacturer.	The firm has submitted copies of drug substance specifications and analytical procedures from both drug substance manufacturer and drug product manufacturer.
2.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification report of Rebamipide by titration method.
3.	COA of primary / secondary reference standard including source and lot number shall be provided.	The firm has submitted copy of CoA of working standard of Rebamipide (lot # 201639).
4.	List of all components of the dosage form, and their amount on a per unit basis, the function of the components, and a reference to their quality standards (e.g. compendial monographs or manufacturer's specifications) shall be submitted.	The firm has submitted qualitative and quantitative composition alongwith function of components and reference to their quality standards.
5.	Details of batch numbers of reference product and test formulation used for Pharmaceutical equivalence are required.	Details of pack of innovator product Mucosta Tablet 100mg (Batch # 7B79MT3) of M/s Otsuka pharmaceutical Co., Ltd have been submitted.
6.	The results of analytical method verification studies need to be summarized in tabulated form for each parameter since only chromatograms are presented for each parameter.	The firm has provided summarized tabulated results for linearity, accuracy, precision and specificity.
7.	The copies of complete analysis of at least two batches shall be provided.	Batch analysis of two batches of Rebamipide tablet 100mg were provided.
8.	Those impurities that are degradation product shall be included in the specifications.	Details of related substances were included in finished product specifications.
9.	Justification of specification of non-pharmacopeial product shall be based on batch analysis results.	Since the monograph of Rebamipide Tablet 100mg is available in Japanese pharmacopoeia. Therefore, no justification of specifications is required.
10.	Description of the primary container closure systems shall be submitted.	The firm has provided specifications of PVC film clear transparent and Aluminium Foil Blister.
11.	The results of stability data of B. No.: 002 (TF-02) are lying borderline limit of 95% at 18 months. Result of 24-month stability time point is not submitted.	The firm has submitted 6-month accelerated and 24-month real time stability study data of applied product. The assay result of 24-month time point is

		95.09% for B. No. 002 which is lying at borderline limit of 95% -105%.
12.	Submitted chromatograms do not reflect the UV detector wavelength at which analysis has been conducted.	Details of UVProbe software containing wavelength of 326 nm have been provided.
13.	The submitted copy of DML is expired and submitted copy of GMP certificate is not issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s Jiangxi Synergy Pharmaceutical Co., Ltd, china issued by Jiangxi Food and Drug Administration. The certificate is valid till 23-07-2022.
14.	Documents for the procurement of API with approval from DRAP including commercial invoice.	The firm has submitted copy of invoice for the import of Rebamipide JP17 (260g) dated 18-07-2017 received through DHL courier. The invoice is not cleared by AD (I&E) of field office.

Previous Decision: Deferred for submission of any document confirming that material (Rebamipide (260g)) has been imported and cleared by Custom authorities against the submitted invoice.
Evaluation by PEC: The firm has submitted copies of Form-6 and invoice for the purchase of Rebamipide JP (Quantity: 260mg, invoice no. JXSS170718) from M/s Jiangxi Fengxin pharmaceutical Co. Ltd., China attested by Assistant Director (I&E) DRAP, Karachi dated 17-10-2017.

Decision of 317th meeting of Registration Board:
Registration Board decided to defer the case and referred both invoices to DRAP Karachi for verification from record since 1st submitted invoice was without attestation/clearance from DRAP Karachi.

Evaluation by PEC:
The case along with copy of invoice, Form 6 and Decision of 317th meeting of Registration Board was forwarded to Additional Director DRAP Karachi office through e-office file number "copy-of-31/2022-PEC-002" by Incharge PEC on 18-08-2022. The status of the invoice has been verified with following remarks:
"*Respected Sir,*
with refer to Para- 2/N Form-6 and invoice has been checked from available office records and it is verified that the same has been issued from this office further the copies are also attached for ready reference, please"
The case is submitted for consideration by the Board.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their last inspection report for their product "saferon tablet " Registration Board in its 278th meeting decided to approve Registration of "Saferon (Sofosbuvir 400mg) tablets by M/s Wilson Pharmaceuticals, I-9 Industrial Area, Islamabad. Date of Inspection: 10-12-2015 , 19-04-2017 & 20-01-2018 • Software of HPLC present in the firm is 21CFR compliant and audit trail on the testing reports was available and confirmed.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Phenylephrine HCl:** Copy of GMP certificate (No. GD20150448) issued by CFDA china is submitted by the firm. The certificate is valid till 07-12-2020. **Ibuprofen:** Copy of GMP certificate of M/s Zenith Chemical Industries (Pvt) Limited dated 22-05-2019 issued on the basis of inspection dated 06-12-2018 is submitted by the firm. The certificate is issued by Additional Director DRAP Lahore.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Phenylephrine HCl:** Firm has submitted copy of commercial invoice specifying import of 308.25g of phenylephrine dated 10-05-2018. The invoice is signed by AD (I&E) DRAP Islamabad.

		Ibuprofen: Firm has submitted copy of invoice specifying purchase of 250Kg Ibuprofen from Zenith Chemical Industries Lahore dated 26-06-2018.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

Shortcomings communicated	**Response by the firm**
Submit data of pharmaceutical equivalence in section 3.2.P.2.2.1. to comply the decision of 293rd meeting of Registration Board, which states that "*Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation & the innovator / reference / comparator product should be submitted and discussed*."	Pharmaceutical equivalence dissolution study has not been performed due to non-availability of reference product in local market (Pakistan) and it is difficult to arrange. However, we are committed to conduct / perform pharmaceutical equivalence of reference product as available and will submit the requisite data.
Submit summary of the results of comparative dissolution profile in section 3.2.P.2.2.1. to comply the decision of 293rd meeting of Registration Board, which states that "*The results of comparative dissolution profile conducted in three BCS media across the physiological pH range along with calculation of similarity factor f2 should be submitted and discussed. For comparative dissolution profile, the guidelines specified in WHO Technical Report Series No. 992, 2015, Annex 7, Appendix 1 Recommendations for conducting and assessing comparative dissolution profiles and USFDA Guidance for Industry Dissolution Testing of Immediate Release Solid Oral Dosage Forms - Dissolution Profile Comparisons may be followed".*	Comparative dissolution study has not been performed due to non-availability of reference product in local market (Pakistan) and it is difficult to arrange. However, we are committed to conduct / perform pharmaceutical equivalence of reference product as available and will submit the requisite data.
Scientific rationale for development of tablet having bisect line on one side of the tablet.	Our applied Drug products (Conofen Tablets 5/200mg and Conofen Tablets 10/200mg) compressed on oval (bi-convex) shaped having bisect line on one side and plain on other side which is our available punch design and the applied drug products are stable with afore mentioned punch design. Moreover, we had submitted the stability studies data of three batches (Trials) on accelerated and real-Time stability conditions (as per decision of 293rd meeting of Drug Registration Board.
Provide acceptance criteria in terms of the amount of dissolved active ingredient "Q" for dissolution test at 15 minutes.	Acceptance criteria in terms of the amount of dissolved active ingredient Q = NLT 80% for dissolution test of conofen tablets at 15minutes for both Phenylephrine HCL and Ibuprofen.

Decision of 296th meeting of Registration Board:

Deferred for following submissions:

- Pharmaceutical equivalence data of the applied product along with innovator / reference or comparator product.
- Comparative Dissolution Profile (CDP) data of the applied product along with innovator / reference or comparator product.

Response by the firm:

Reason for deferment	Response by the firm
Pharmaceutical equivalence data of the applied product along with innovator / reference or comparator product.	Firm has submitted results of pharmaceutical equivalence of their product against the reference product Advil Tablet. Manufacturer: Pfizer Madison NJ USA Batch No: R86956 Exp Date: 06/2023
Comparative Dissolution Profile (CDP) data of the applied product along with innovator / reference or comparator product.	Firm has submitted results of Comparative Dissolution Profile (CDP) of their product against the reference product Advil Tablet in three dissolution medium as recommended by WHO guidelines. Manufacturer: Pfizer Madison NJ USA Batch No: R86956 Exp Date: 06/2023

Decision of 313rd meeting of Registration Board:

Deferred for following:

- Updated GMP status of the firm from QA&LT Division DRAP.
- Submission of fee for revision of specifications of the drug product.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Updated GMP status of the firm from QA&LT Division DRAP.	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 28-07-2022.
2.	Submission of fee for revision of specifications of the drug product.	Firm has submitted copy of fee challan (Number: 77974410916) for change in specifications for amount 7,500/- dated 22-08-2022.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Zenith Chemical Industries is issued by DRAP on 22-05-2019. The certificate is issued based on the inspection dated 06-12-2018.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with UV spectra, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable. Our HPLC systems are not 21 CFR compliant
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine

testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."

- Provide verification studies of drug substance from drug product manufacturer.
- Specifications are mentioned as BP in some sections and USP in other sections.
- Assay method is based on HPLC while verification studies are conducted on UV method.
- Analytical method specifies HPLC method, while assay testing in stability studies is conducted on UV
- Provide copy of commercial invoice for evidence of purchase of the drug substance.

Decision of 320th meeting of Registration Board:

Deferred for;

- Submission of data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submission of verification studies of drug substance from drug product manufacturer.
- Clarification since specifications are mentioned as BP in some sections and USP in other sections.
- Clarification regarding the assay method which is based on HPLC while verification studies are conducted on UV method.
- Clarification since analytical method specifies HPLC method, while assay testing in stability studies is conducted on UV
- Submission of copy of commercial invoice for evidence of purchase of the drug substance.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Submission of data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted copy of specifications of the drug substance from drug product manufacturer as well.
2.	Submission of verification studies of drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.
3.	Clarification since specifications are mentioned as BP in some sections and USP in other sections.	Applied product is of BP specifications.
4.	Clarification regarding the assay method which is based on HPLC while verification studies are conducted on UV method.	We have adopted alternate method in which assay is based on UV method for stability of batches for CTD purpose. After registration we will adopt pharmacopoeia method and will verify it as per ICH guidelines.
5.	Clarification since analytical method specifies HPLC method, while assay testing in stability studies is conducted on UV	We have adopted alternate method in which assay is based on UV method for stability of batches for CTD purpose. After registration as per undertaking we will adopt pharmacopoeial method for process validation and both accelerated and long term stability studies of commercial batches.
6.	Submission of copy of commercial invoice for evidence of purchase of the drug substance.	Firm has submitted copy of commercial invoice dated 29-10-2021 specifying purchase of 10Kg paracetamol.

Decision of 321st meeting of Registration Board:

The Board discussed that the official monograph of the applied product is present in B.P whereas the firm has performed the testing according to In-House specifications. The Board decided to defer the case for submission of testing of the applied product according the monograph available in B.P along with the analytical method verification studies for the drug product on the next month time point of long term stability studies for all the 03 stability batches.

Submission by the firm:

Firm has submitted following documents:

• Copy of method verification studies of the applied product according to BP monograph. • 9 months stability study data at real time conditions for three batches conducted as per BP monograph along with analytical record.
Decision: Approved with Innovator's specifications. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The certificate is valid till 3 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Evaluation by PEC:

- Firm has submitted fee 70,000 for the application of contract manufacturing

Shortcomings communicated	**Response by the firm**
Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted copy of analytical method of drug substance from the drug product manufacturer. The analytical method is issued on 20-07-2021.
Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.	Firm has submitted report of verification studies of the analytical method of drug substance. However, the verification studies were conducted on 21-01-2021 while the analytical method of drug substance was issued by the drug product manufacturer on 20-07-2021.
Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product	Firm has submitted COA of the drug substance generated by drug product manufacturer only, while the COA of drug substance manufacturer is not submitted.

manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".	
Submit COA of reference standard / working standard including source and lot number which is actually used in the testing of drug substance and drug product.	Firm has submitted COA of working standard from drug substance manufacturer which has been standardized against USP reference standard. However drug product manufacturer is using working standard of meropenem Batch No. SI/MPM/00060120 manufactured by M/s Sterile India.
Justify the master formulation containing 570mg of meropenem trihydrate for manufacturing of 500mg meropenem for injection, since the drug substance contains meropenem blended with 15.10 to 16.50% w/w of sodium carbonate.	Firm has submitted calculation to justify the filled weight. As per calculations submitted by the firm the weight 570mg per vial is calculated on theoretical basis considering that the drug substance has 100% assay, while the actual dispensing is to be made on the basis of actual % assay of the meropenem.
Justify the use of 5% overage in the formulation, since the justification submitted in this regard is not supported by any guidelines.	We hereby justify that in development stage we added 5% extra meropenem sterile powder for injection in initial batches. After completion of stability study degradation is no more than 2 – 3% within the limit assay range is 90 – 120% so no more 5% meropenem sterile powder for injection is added.
Submit results of compatibility studies in section 3.2.P.2.6.	Firm has submitted result of compatibility studies of the drug product with WFI.
Justify how the time and temperature of sterilization cycle is directly selected without any protocols for its validation.	Firm has submitted summary report of autoclave machine re qualification instead of providing justification.
Provide detailed method of sample stock solution preparation instead of mentioning the general statement "Constitute a container of Meropenem for Injection with a volume of water, corresponding to the quantity of solvent specified in the labelling".	Firm has not submitted complete method of analysis of the drug product in which the method of sample solution preparation is explained.
Justify why the formula for calculation of assay contents of meropenem is different than that mentioned in USP monograph.	Firm has submitted that we are using potency of working standard as percentage. USP taking the potency in mg/mg which is converted into percentage by multiplying this ratio with 100. Firm has submitted calculation to justify that their formula is equivalent to USP. However, the USP formula used by the firm is different from that specified in USP.
Analytical method verification studies have not been conducted and evaluated in the light of USP general chapters and ICH guidelines.	Firm has submitted verification studies of the analytical method dated 21-01-2021, while the analytical method of the drug product was revised and updated on 12-07-2021.
Justify why the drug product specifications does not contain the test for sodium contents as recommended by USP.	In Meropenem trihydrate injection label claim is as meropenem while trihydrate and sodium considered as impurity. We are verifying the meropenem by HPLC and due to unavailability of the atomic absorption we were verifying the sodium content by titration method. Moreover, for verification purpose, we analysed sodium content from PCSI and Citi Pharma with atomic absorption. And now we have atomic absorption in our facility and we have changed our SOP accordingly and now we are conducting each and every analysis of sodium content in our facility as per USP monograph.
Justify the test of accuracy in analytical method validation without specifying the concentrations of the solution which are analysed for accuracy. Further justify the use of solutions having low, medium, and high concentration of sample without specifying their exact	Firm has submitted that we had performed the accuracy by making a concentration of standard preparation and three concentrations. The concentrations used by the firm for accuracy test is 0.16mg/ml, 0.20mg/ml and 0.24mg/ml.

concentration. Such words are not recommended by any scientific guidelines.	As per the analytical method the standard solution concentration is 0.11mg/ml and the concentration used by the firm to study accuracy does not include the said concentration.
Linearity and range have been studied from 70% to 120% of the solution wherein the area under curve for 100% solution was 4691449 while in accuracy studies in the same method none of the solution (either low, medium or high concentration) achieved such area although the concentration of the solution is expected to be the same. Justification is required in this regard.	Two different samples were prepared for linearity and accuracy parameter of analytical method verification, for linearity parameter from the first dilution 6 further second dilutions 70%, 80%, 90%, 100%, 110% and 120% were prepared while in accuracy 3 further second dilutions low, medium and high were prepared. Because the weights of the sample are different in linearity and accuracy parameters that's why the area achieved is different for both parameters.
In linearity studies the area under curve for 100% solution was 4691449, while in stability studies the area under curve of the sample solution having exactly same concentration is reported to be 11769485. Justification is required in this regard how such huge difference in area under the curve can exist in the analysis and how this method can be considered reliable and verified.	In linearity the sample solution preparation is different from the sample preparation of finished product. In linearity a concentration of standard taken to prepare first dilution then make second dilution by taking 7ml, 8ml, 9ml, 10ml, 11ml, 12ml from the first dilution, second dilution of 10ml is considered as 100% concentration while in finished good the dilution contain 100mg of sample that's why area under curve for 100% solution is different from the area of 100mg in finished product.
The analytical method verification studies have been conducted in January 2021 while the batches were manufactured in 2017. Justification is required in this regard.	In 2017, we had completed analytical method verification by performing three parameters which are linearity, system suitability and specificity while when we submit the CTD dossier we came to know the DRAP requirement of accuracy and repeatability, then we had complete the analytical method verification by performing five parameters which are linearity, system suitability, specificity accuracy and repeatability.
Justify the limit of sodium content in the in house generated COA of drug substance, in which limit of sodium content is taken as 6.0% to 9.3% and the drug substance was passed on the basis of results of 9.12%, while the drug substance manufacturer specifies the limit of sodium content as 6.56% to 7.20%.	In past we were doing sodium content analysis by titration method (due to unavailability of AAS) the result was 9.12% limit of sodium content is 6.0% - 9.3% while the drug substance manufacturer specifies the sodium content as 6.65 to 7.20%. Now we are doing sodium content with AAS according to USP.
As per the submitted results of sodium content in meropenem injection by CITI Pharma, the results of % sodium content is 7.867%, while USP specifies the acceptance criteria to be 80%–120% of the labeled amount of sodium. Justify how your results complies USP specifications keeping in view the labelled amount of sodium in your product.	Firm has not submitted any justification
Justify the use of commercial lot of meropenem for injection as working standard since USP recommends that reference standard should be pure meropenem trihydrate.	The assay of meropenem trihydrate USP reference standard lot# J0K434, is 87.3% meropenem. Similarly by comparing with reference standard we prepare our meropenem trihydrate working standard in which 82.12% is meropenem present. Actually the material used in USP Reference standard and the working standard is the same as meropenem trihydrate because the product label claim is meropenem, therefore we have to calculate the assay against the purity of material as meropenem which is 87.3% in USP Reference standard and 82.12% in working standard.
Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm has not submitted details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Further documents confirming import of these relevant batches are also required.
Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point, since the	Firm has not yet submitted stability study data in proper sequence with COA for each time point, raw data sheets and chromatograms. Raw data sheets are not submitted. Further the calculation formula used for the calculation

submitted chromatograms and analytical reports are without any proper sequence.	of assay result is also different from USP as well as the method of sample and standard solution preparation.
Provide Reference of previous approval of applications with stability study data of the firm (if any)	No response submitted by the firm
Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.	No response submitted by the firm
Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	No response submitted by the firm

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of differential fee as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
- Submission of COA of relevant batch of drug substance from drug substance manufacturer used in the manufacturing of batches for which stability study data is submitted.
- Scientific justification for using commercial batch manufactured by M/s Sterile India as working standard.
- Scientific justification for use of 5% overage in the formulation.
- Submission of complete protocols of process validation studies of the drug product.
- Submission of detailed method of analysis of the drug product with details of sample solution preparation.
- Scientific justification for using calculation formula for assay testing which is different from that specified in USP monograph.
- Revision of drug product specifications in the light of USP monograph and inclusion of test for sodium content along with submission of fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
- Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.
- Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Submission of differential fee as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm has submitted differential fee 5,000/- vide slip number 551237597908 dated 20-05-2022.
2.	Submission of COA of relevant batch of drug substance from drug substance manufacturer used in the manufacturing of batches for which stability study data is submitted.	Firm has submitted COA of relevant batch of drug substance generated by drug substance manufacturer.
3.	Scientific justification for using commercial batch manufactured by M/s Sterile India as working standard.	This firm has submitted that the assay of Meropenem Trihydrate USP reference standard lot # J0k434 is 87.3%. Therefore, we used sterile India material as working Standard having potency 82.02% by using standardization procedure with USP reference standard. Material used for batch manufacturing is from Aurobindo China and working standard prepared is of Sterile India having Potency 82.02% COA's for Reference standard & working standard along with standardization procedure is submitted by the firm.
4.	Scientific justification for use of 5% overage in the formulation.	Firm has submitted that an overage is used to cover losses during manufacturing. Initially we used extra 5% of Meropenem to deliver our product with exact quantity of API in injection, the idea behind was to deliver exact quantity of the active substance. After that our product was stable throughout its shelf life so no need to add extra 5% overage. In general, use of an overage of a drug substance to compensate for degradation during manufacture or a product's shelf life, or to extend shelf life, is discouraged. Overages are nothing but the extra

		quantity of material taken, which is lost during process stage.ICH Q8 guide line, provide a structured way to define product critical quality attributes. We are not using any overage in the manufacturing of Meropenem injection
5.	Submission of complete protocols of process validation studies of the drug product.	Firm has submitted general protocols for process validation. **Firm has not submitted specific protocols for the process validation of applied product.**
6.	Submission of detailed method of analysis of the drug product with details of sample solution preparation.	Firm has submitted detailed method of analysis of the drug product, **However in the submitted method, sample solution preparation method is still not clear in terms of exact volume of water used to reconstitute the contents of vial and then how to make further dilutions.** Furthermore, the calculation formula use weight of sample and standard while USP recommends to use concentration of sample and standard.
7.	Scientific justification for using calculation formula for assay testing which is different from that specified in USP monograph.	Firm has submitted that they are using the potency of working standard as percentage. USP taking the Potency into mg/mg which is covered into percentage multiplying the ratio with 100 so there is no difference between the USP formula & our standard operating formula further more we have amended our SOP with respect to the formula given in USP. **However, the newly used calculation formula use weight of sample and standard while USP recommends to use concentration of sample and standard. The new formula is also not exactly as per USP monograph.**
8.	Revision of drug product specifications in the light of USP monograph and inclusion of test for sodium content along with submission of fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm has now added sodium content test in their specifications. Firm has also submitted fee 7,500/- vide slip number 212267176 dated 20-05-2022. **However, no data regarding the sodium content testing during stability studies is provided.**
9.	Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.	Firm has not justified the previous validation reports, instead the firm has submitted new report in which the analysis is carried out on July 2022. The new report was performed in line with ICH recommendations.
10.	Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.	Firm has submitted data in section 3.2.P.8.3. The evaluation os submitted data is as under:

Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 3298/E1/2019) issued by Drugs Control Administration, Government of Telangana dated 11-02-2020. The certificate is valid till 3 years from the date of issue.
Documents for the procurement of API with approval from DRAP (in case of import).	**1705205135, 1705205096:** Firm has submitted copy of commercial invoice cleared dated 19-10-2017 specifying import of 20Kg meropenem for lot number 1705205135, 1705205096. The invoice is cleared by AD (I&E) DRAP. **1705203623:**

		Firm has submitted copy of commercial invoice cleared dated 12-09-2017 specifying import of 15Kg meropenem for lot number 1705203623. The invoice is cleared by AD (I&E) DRAP.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of product testing including HPLC chromatogram and raw data sheets
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for stability chambers for accelerated and real time stability study.

Decision of 320th meeting of Registration Board:

Deferred for following:

- Clarification for use of 5% overage in sterile products and specifications of the manufactured products in the light of approved specifications and pharmacopoeial monographs.
- Capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd. 581, Sundar Industrial Estate, Raiwind Road Lahore.
- Submission of specific protocols for the process validation of applied product.
- Submission of preparation sample solution is required since it is not clear in terms of exact volume of water used to reconstitute the contents of vial and then how to make further dilutions. Furthermore, the calculation formula use weight of sample and standard while USP recommends to use concentration of sample and standard.
- Clarification regarding use of formula which is different from the formula as recommended by USP for calculation of assay.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Clarification for use of 5% overage in sterile products and specifications of the manufactured products in the light of approved specifications and pharmacopoeial monographs.	An overage is used to cover losses during manufacturing. Initially we used extra 5% of Meropenem to deliver our product with exact quantity of API in injection, the idea behind was to deliver exact quantity of the active substance. After that our product was stable throughout its shelf life so no need to add extra 5% overage. In general, use of an overage of a drug substance to compensate for degradation during manufacture or a product's shelf life, or to extend shelf life, is discouraged. Overages are nothing but the extra quantity of material taken, which is lost during process stage.ICH Q8 guide line, provide a structured way to define product critical quality attributes. We are not using any overage in the manufacturing of Meropenem injection
2.	Capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd. 581, Sundar Industrial Estate, Raiwind Road Lahore.	Capacity assessment report is not yet received.
3.	Submission of specific protocols for the process validation of applied product.	Firm has submitted process validation protocols
4.	Submission of preparation sample solution is required since it is not clear in terms of exact volume of water used to reconstitute the contents of vial and then how to make further dilutions. Furthermore, the calculation formula use weight of sample and standard	Firm has submitted revised testing method and specifications dated 30-09-2022. The revised method is again unclear about the sample solution preparation method since it is not clear in terms of exact volume of water used to reconstitute the contents of vial.

	while USP recommends to use concentration of sample and standard.	
5.	Clarification regarding use of formula which is different from the formula as recommended by USP for calculation of assay.	Firm has submitted revised testing method and specifications dated 30-09-2022. The formula used for calculation of assay of drug product is different from USP since USP recommends concentration of sample and standard solution while the firm is using weight of sample and standard solution. Firm has again submitted another revised testing method and specifications dated 23-11-2022 in which the testing method is as per USP monograph along with test for sodium contents.

Proceedings & Decision: Registration Board was apprised that the applied formulation has already been approved in 312th meeting opf Registration Board for contract manufacturing from M/s Stallion Pharmaceuticals Pvt Ltd. on basis of Form 5F (CTD) of M/s Healthtek (Pvt) Ltd., Karachi as applicant, wherein following submission had also been made by the firm and above mentioned points have been addressed and responded:

1. **Evidence for purchase of atomic absorption spectrophotometer in the form of purchase order dated 14-06-2021, deliver challan dated 19-06-2021 & invoice No. 06/3029 dated 18-06-2021.**
2. **Installation and operational qualification reports of atomic absorption spectrophotometer**
3. **Analysis report of Sodium Content in Mopen (Meropenem) Injection by M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore.**

On basis of above cited reference Registration Board decided to approve instant application. Registration Board further authorized its Chairman for issuance of registration letters upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**

748.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Aspin Pharma (Pvt) Ltd. Plot No. 10 & 25 Sector 20, Korangi Industrial Area Karachi.**
	Name, address of Manufacturing site.	M/s Stallion Pharmaceuticals (Pvt) Ltd. 581, Sundar Industrial Estate, Raiwind Road Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 21-01-2021 is submitted.
	GMP status of the firm	**Stallion Pharmaceuticals:** Firm has submitted GMP certificate issued on the basis of inspection dated 22-09-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000783 of M/s Stallion Pharma Islamabad dated 08-02-2016 specifying dry powder injection Vial (carbapenem) section.
	Status of application	☐ New Drug Product (NDP)

		☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7087: 03-03-2021
	Details of fee submitted	PKR 70,000/-: 19-01-2021
	The proposed proprietary name / brand name	**ASPINEM 1g Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate)……1g (blended with sodium carbonate)
	Pharmaceutical form of applied drug	White or almost white, hygroscopic, crystalline, powder filled in clear glass vials
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s Aurobindo Pharma Limited Unit-V, Plot No. 68-70, 73-91, 95, 96, 260, 261 I.D.A Chemical Zone, Pashamylaram, Patancheru Mandal, Sanga Reddy District Telangana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols,

		control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem 1g Injection of Pfizer Pakistan Ltd.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Aurobindo Pharma Limited Unit-V, Plot No. 68-70, 73-91, 95, 96, 260, 261 I.D.A Chemical Zone, Pashamylaram, Patancheru Mandal, Sanga Reddy District Telangana, India.		
API Lot No.	1705205135 1705205096 1705203623		
Description of Pack (Container closure system)	Glass vial

Manufacturing Date	09-2017	10-2017	11-2017
Date of Initiation	04-10-2017	14-11-2017	17-11-2017
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 3298/E1/2019) issued by Drugs Control Administration, Government of Telangana dated 11-02-2020. The certificate is valid till 3 years from the date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Evaluation by PEC:

- Firm has submitted fee 70,000 for the application of contract manufacturing

Shortcomings communicated	Response by the firm
Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted copy of analytical method of drug substance from the drug product manufacturer. The analytical method is issued on 20-07-2021.
Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.	Firm has submitted report of verification studies of the analytical method of drug substance. However, the verification studies were conducted on 21-01-2021 while the analytical method of drug substance was issued by the drug product manufacturer on 20-07-2021.
Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".	Firm has submitted COA of the drug substance generated by drug product manufacturer only, while the COA of drug substance manufacturer is not submitted.
Submit COA of reference standard / working standard including source and lot number which is actually used in the testing of drug substance and drug product.	Firm has submitted COA of working standard from drug substance manufacturer which has been standardized against USP reference standard. However drug product manufacturer is using working standard of meropenem Batch No. SI/MPM/00060120 manufactured by M/s Sterile India.
Justify the master formulation containing 1140mg of meropenem trihydrate for manufacturing of 1g meropenem for injection, since the drug substance contains meropenem blended with 15.10 to 16.50% w/w of sodium carbonate.	Firm has submitted calculation to justify the filled weight. As per calculations submitted by the firm the weight 1140mg per vial is calculated on theoretical basis considering that the drug substance has 100% assay, while the actual dispensing is to be made on the basis of actual % assay of the meropenem.
Justify the use of 5% overage in the formulation, since the justification submitted in this regard is not supported by any guidelines.	We hereby justify that in development stage we added 5% extra meropenem sterile powder for injection in initial batches. After completion of stability study degradation is no more than 2 – 3% within the limit assay range is 90 – 120% so no more 5% meropenem sterile powder for injection is added.
Submit results of compatibility studies in section 3.2.P.2.6.	Firm has submitted result of compatibility studies of the drug product with WFI.
Justify how the time and temperature of sterilization cycle is directly selected without any protocols for its validation.	Firm has submitted summary report of autoclave machine re qualification instead of providing justification.
Provide detailed method of sample stock solution preparation instead of mentioning the general statement "Constitute a container of Meropenem for Injection with a volume of water, corresponding to the quantity of solvent specified in the labelling".	Firm has not submitted complete method of analysis of the drug product in which the method of sample solution preparation is explained.

Justify why the formula for calculation of assay contents of meropenem is different than that mentioned in USP monograph.	Firm has submitted that we are using potency of working standard as percentage. USP taking the potency in mg/mg which is converted into percentage by multiplying this ratio with 100. Firm has submitted calculation to justify that their formula is equivalent to USP. However, the USP formula used by the firm is different from that specified in USP.
Analytical method verification studies have not been conducted and evaluated in the light of USP general chapters and ICH guidelines.	Firm has submitted verification studies of the analytical method dated 21-01-2021, while the analytical method of the drug product was revised and updated on 12-07-2021.
Justify why the drug product specifications does not contain the test for sodium contents as recommended by USP.	In Meropenem trihydrate injection label claim is as meropenem while trihydrate and sodium considered as impurity. We are verifying the meropenem by HPLC and due to unavailability of the atomic absorption we were verifying the sodium content by titration method. Moreover, for verification purpose, we analysed sodium content from PCSI and Citi Pharma with atomic absorption. And now we have atomic absorption in our facility and we have changed our SOP accordingly and now we are conducting each and every analysis of sodium content in our facility as per USP monograph.
Justify the test of accuracy in analytical method validation without specifying the concentrations of the solution which are analysed for accuracy. Further justify the use of solutions having low, medium, and high concentration of sample without specifying their exact concentration. Such words are not recommended by any scientific guidelines.	Firm has submitted that we had performed the accuracy by making a concentration of standard preparation and three concentrations. The concentrations used by the firm for accuracy test is 0.16mg/ml, 0.20mg/ml and 0.24mg/ml. As per the analytical method the standard solution concentration is 0.11mg/ml and the concentration used by the firm to study accuracy does not include the said concentration.
Linearity and range have been studied from 70% to 120% of the solution wherein the area under curve for 100% solution was 4691449 while in accuracy studies in the same method none of the solution (either low, medium or high concentration) achieved such area although the concentration of the solution is expected to be the same. Justification is required in this regard.	Two different samples were prepared for linearity and accuracy parameter of analytical method verification, for linearity parameter from the first dilution 6 further second dilutions 70%, 80%, 90%, 100%, 110% and 120% were prepared while in accuracy 3 further second dilutions low, medium and high were prepared. Because the weights of the sample are different in linearity and accuracy parameters that's why the area achieved is different for both parameters.
In linearity studies the area under curve for 100% solution was 4691449, while in stability studies the area under curve of the sample solution having exactly same concentration is reported to be 11769485. Justification is required in this regard how such huge difference in area under the curve can exist in the analysis and how this method can be considered reliable and verified.	In linearity the sample solution preparation is different from the sample preparation of finished product. In linearity a concentration of standard taken to prepare first dilution then make second dilution by taking 7ml, 8ml, 9ml, 10ml, 11ml, 12ml from the first dilution, second dilution of 10ml is considered as 100% concentration while in finished good the dilution contain 100mg of sample that's why area under curve for 100% solution is different from the area of 100mg in finished product.
The analytical method verification studies have been conducted in January 2021 while the batches were manufactured in 2017. Justification is required in this regard.	In 2017, we had completed analytical method verification by performing three parameters which are linearity, system suitability and specificity while when we submit the CTD dossier we came to know the DRAP requirement of accuracy and repeatability, then we had complete the analytical method verification by performing five parameters which are linearity, system suitability, specificity accuracy and repeatability.
Justify the limit of sodium content in the in house generated COA of drug substance, in which limit of sodium content is taken as 6.0% to 9.3% and the drug substance was passed on the basis of results of 9.12%, while the drug substance manufacturer specifies the limit of sodium content as 6.56% to 7.20%.	In past we were doing sodium content analysis by titration method (due to unavailability of AAS) the result was 9.12% limit of sodium content is 6.0% - 9.3% while the drug substance manufacturer specifies the sodium content as 6.65 to 7.20%. Now we are doing sodium content with AAS according to USP.

As per the submitted results of sodium content in meropenem injection by CITI Pharma, the results of % sodium content is 7.867%, while USP specifies the acceptance criteria to be 80%–120% of the labeled amount of sodium. Justify how your results complies USP specifications keeping in view the labelled amount of sodium in your product.	Firm has not submitted any justification
Justify the use of commercial lot of meropenem for injection (batch number SI/MPM/00060120) manufactured by sterile India as working standard since USP recommends that reference standard should be pure meropenem trihydrate.	The assay of meropenem trihydrate USP reference standard lot# J0K434, is 87.3% meropenem. Similarly, by comparing with reference standard we prepare our meropenem trihydrate working standard in which 82.12% is meropenem present. Actually the material used in USP Reference standard and the working standard is the same as meropenem trihydrate because the product label claim is meropenem, therefore we have to calculate the assay against the purity of material as meropenem which is 87.3% in USP Reference standard and 82.12% in working standard.
Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm has not submitted details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Further documents confirming import of these relevant batches are also required.
Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point, since the submitted chromatograms and analytical reports are without any proper sequence.	Firm has not yet submitted stability study data in proper sequence with COA for each time point, raw data sheets and chromatograms. Raw data sheets are not submitted. Further the calculation formula used for the calculation of assay result is also different from USP as well as the method of sample and standard solution preparation.
Provide Reference of previous approval of applications with stability study data of the firm (if any)	No response submitted by the firm
Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.	No response submitted by the firm
Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	No response submitted by the firm

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of differential fee as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
- Submission of COA of relevant batch of drug substance from drug substance manufacturer used in the manufacturing of batches for which stability study data is submitted.
- Scientific justification for using commercial batch manufactured by M/s Sterile India as working standard.
- Scientific justification for use of 5% overage in the formulation.
- Submission of complete protocols of process validation studies of the drug product.
- Submission of detailed method of analysis of the drug product with details of sample solution preparation.
- Scientific justification for using calculation formula for assay testing which is different from that specified in USP monograph.
- Revision of drug product specifications in the light of USP monograph and inclusion of test for sodium content along with submission of fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.
- Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.
- Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm

1.	Submission of differential fee as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm has submitted differential fee 5,000/- vide slip number 658476562996 dated 20-05-2022.
2.	Submission of COA of relevant batch of drug substance from drug substance manufacturer used in the manufacturing of batches for which stability study data is submitted.	Firm has submitted COA of relevant batch of drug substance generated by drug substance manufacturer.
3.	Scientific justification for using commercial batch manufactured by M/s Sterile India as working standard.	This firm has submitted that the assay of Meropenem Trihydrate USP reference standard lot # J0k434 is 87.3%. Therefore, we used sterile India material as working Standard having potency 82.02% by using standardization procedure with USP reference standard. Material used for batch manufacturing is from Aurobindo China and working standard prepared is of Sterile India having Potency 82.02% COA's for Reference standard & working standard along with standardization procedure is submitted by the firm.
4.	Scientific justification for use of 5% overage in the formulation.	Firm has submitted that an overage is used to cover losses during manufacturing. Initially we used extra 5% of Meropenem to deliver our product with exact quantity of API in injection, the idea behind was to deliver exact quantity of the active substance. After that our product was stable throughout its shelf life so no need to add extra 5% overage. In general, use of an overage of a drug substance to compensate for degradation during manufacture or a product's shelf life, or to extend shelf life, is discouraged. Overages are nothing but the extra quantity of material taken, which is lost during process stage.ICH Q8 guide line, provide a structured way to define product critical quality attributes. We are not using any overage in the manufacturing of Meropenem injection
5.	Submission of complete protocols of process validation studies of the drug product.	Firm has submitted general protocols for process validation. **Firm has not submitted specific protocols for the process validation of applied product.**
6.	Submission of detailed method of analysis of the drug product with details of sample solution preparation.	Firm has submitted detailed method of analysis of the drug product, **However in the submitted method, sample solution preparation method is still not clear in terms of exact volume of water used to reconstitute the contents of vial and then how to make further dilutions.** Furthermore, the calculation formula use weight of sample and standard while USP recommends to use concentration of sample and standard.
7.	Scientific justification for using calculation formula for assay testing which is different from that specified in USP monograph.	Firm has submitted that they are using the potency of working standard as percentage. USP taking the Potency into mg/mg which is covered into percentage multiplying the ratio with 100 so there is no difference between the USP formula & our standard operating formula further more we have amended our SOP with respect to the formula given in USP. **However, the newly used calculation formula use weight of sample and standard while USP recommends to use concentration of sample and standard. The new formula is also not exactly as per USP monograph.**
8.	Revision of drug product specifications in the light of USP monograph and inclusion of test for sodium content along with submission of fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per	Firm has now added sodium content test in their specifications. Firm has also submitted fee 7,500/- vide slip number 45752149528 dated 20-05-2022. **However, no data regarding the sodium content testing during stability studies is provided.**

	notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	
9.	Scientific justification for the analytical method verification studies of the drug product which is not performed as per ICH guidelines.	Firm has not justified the previous validation reports, instead the firm has submitted new report in which the analysis is carried out on July 2022. The new report was performed in line with ICH recommendations.
10.	Submission of stability study data of three commercial batches in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.	Firm has submitted data in section 3.2.P.8.3. The evaluation os submitted data is as under:

Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 3298/E1/2019) issued by Drugs Control Administration, Government of Telangana dated 11-02-2020. The certificate is valid till 3 years from the date of issue.
Documents for the procurement of API with approval from DRAP (in case of import).	**1705205135, 1705205096:** Firm has submitted copy of commercial invoice cleared dated 19-10-2017 specifying import of 20Kg meropenem for lot number 1705205135, 1705205096. The invoice is cleared by AD (I&E) DRAP. **1705203623:** Firm has submitted copy of commercial invoice cleared dated 12-09-2017 specifying import of 15Kg meropenem for lot number 1705203623. The invoice is cleared by AD (I&E) DRAP.
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of product testing including HPLC chromatogram and raw data sheets
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for stability chambers for accelerated and real time stability study.

Decision of 320th meeting of Registration Board:

Deferred for following:

- Clarification for use of 5% overage in sterile products and specifications of the manufactured products in the light of approved specifications and pharmacopoeial monographs.
- Capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd. 581, Sundar Industrial Estate, Raiwind Road Lahore.
- Submission of specific protocols for the process validation of applied product.
- Submission of preparation sample solution is required since it is not clear in terms of exact volume of water used to reconstitute the contents of vial and then how to make further dilutions. Furthermore, the calculation formula use weight of sample and standard while USP recommends to use concentration of sample and standard.
- Clarification regarding use of formula which is different from the formula as recommended by USP for calculation of assay.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm

1.	Clarification for use of 5% overage in sterile products and specifications of the manufactured products in the light of approved specifications and pharmacopoeial monographs.	An overage is used to cover losses during manufacturing. Initially we used extra 5% of Meropenem to deliver our product with exact quantity of API in injection, the idea behind was to deliver exact quantity of the active substance. After that our product was stable throughout its shelf life so no need to add extra 5% overage. In general, use of an overage of a drug substance to compensate for degradation during manufacture or a product's shelf life, or to extend shelf life, is discouraged. Overages are nothing but the extra quantity of material taken, which is lost during process stage.ICH Q8 guide line, provide a structured way to define product critical quality attributes. We are not using any overage in the manufacturing of Meropenem injection
2.	Capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd. 581, Sundar Industrial Estate, Raiwind Road Lahore.	Capacity assessment report is not yet received.
3.	Submission of specific protocols for the process validation of applied product.	Firm has submitted process validation protocols
4.	Submission of preparation sample solution is required since it is not clear in terms of exact volume of water used to reconstitute the contents of vial and then how to make further dilutions. Furthermore, the calculation formula use weight of sample and standard while USP recommends to use concentration of sample and standard.	Firm has submitted revised testing method and specifications dated 30-09-2022. The revised method is again unclear about the sample solution preparation method since it is not clear in terms of exact volume of water used to reconstitute the contents of vial.
5.	Clarification regarding use of formula which is different from the formula as recommended by USP for calculation of assay.	Firm has submitted revised testing method and specifications dated 30-09-2022. The formula used for calculation of assay of drug product is different from USP since USP recommends concentration of sample and standard solution while the firm is using weight of sample and standard solution. Firm has again submitted another revised testing method and specifications dated 23-11-2022 in which the testing method is as per USP monograph along with test for sodium contents.

Proceedings & Decision: Registration Board was apprised that the applied formulation has already been approved in 312th meeting opf Registration Board for contract manufacturing from M/s Stallion Pharmaceuticals Pvt Ltd. on basis of Form 5F (CTD) of M/s Healthtek (Pvt) Ltd., Karachi as applicant, wherein following submission had also been made by the firm and above mentioned points have been addressed and responded:

1. **Evidence for purchase of atomic absorption spectrophotometer in the form of purchase order dated 14-06-2021, deliver challan dated 19-06-2021 & invoice No. 06/3029 dated 18-06-2021.**
2. **Installation and operational qualification reports of atomic absorption spectrophotometer**
3. **Analysis report of Sodium Content in Mopen (Meropenem) Injection by M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore.**

On basis of above cited reference Registration Board decided to approve instant application. Registration Board further authorized its Chairman for issuance of registration letters upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**

Case No. 03 Export facilitation cases

Case No. 1: M/s Herbion Pakistan Pvt Ltd. Industrial Triangle, Kahuta Road, Islamabad

Assistant Director PR-I / EFD vide its letter No. F.1-6/2019-PR-I (EFD) dated 6th October 2022 informed that as per decision of 133rd meeting of DRAP Authority wherein it was decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicine (to a maximum of 15 such molecules) during a financial year.

In compliance to the above decision M/s Herbion Pakistan Pvt Ltd. Islamabad have achieved benchmark of more than 100,000 USD and submitted their applications for priority consideration including following applications:

- Diance-Met 12.5/500mg Tablet
- Diance-Met 12.5/1000mg Tablet
- Diance-Met 5/1000mg Tablet

749.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Herbion Pakistan Pvt Ltd. Industrial Triangle, Kahuta Road, Islamabad**
	Name, address of Manufacturing site.	M/s Herbion Pakistan Pvt Ltd. Industrial Triangle, Kahuta Road, Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm has submitted copy of GMP certificate dated 17-07-2019. The certificate is valid till 20-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of grant of revised / relocated section letter dated 09-04-2020 in which Tablet (general) section is specified.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 24971: 25-11-2019
	Details of fee submitted	PKR 20,000/-: 25-11-2019
	The proposed proprietary name / brand name	**DIANCE-MET 5/1000mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin…5mg Metformin HCl…1000mg
	Pharmaceutical form of applied drug	Beige yellow oblong shaped plain on both sides
	Pharmacotherapeutic Group of (API)	Antidiabetic
	Reference to Finished product specifications	Innovator's specs
	Proposed Pack size	14's (2x7's)
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	**(USFDA** Approved)
	For generic drugs (me-too status)	Xelglu-Met Tablet by Hilton
	Name and address of API manufacturer.	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China. **Metformin:** Aarti Drugs Limited Plot No. 211 - 213, Road No.2G.I.D.C., Sarigam, Dist.: Valsad, Gujarat. INDIA.39615
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months. **Metformin:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Xenglu-Met Tablet of Hilton Pharma.

		Firm has submitted results of CDP for their product against Xenglu-Met Tablet of Hilton Pharma.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and analytical method validation of the drug product.

STABILITY STUDY DATA

Manufacturer of API	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China. **Metformin:** Aarti Drugs Limited Plot No. 211-213, Road No.2G.I.D.C., Sarigam, Dist.: Valsad, Gujarat. INDIA.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their previous onsite inspection for Vocab 10 and 20mg tablet which was conducted on 15-11-2021 and was considered by the Board in its 313rd meeting. The report cofirms following points: • FPP testing had been conducted on HP-QCE-048 (shimadzu LC-2030) and HP-QCE-001 (shimadzu 2080), which were 21 CFR compliant. • The audit trail report was reproduced at the time of inspection. • Adequate monitoring and control were available for stability chamber.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Copy of DML certificate No. Liao20150233, dated: 21/12/2017 valid till 20/12/2022, issued by Food & Drug Administration of Liaoning Province- China is submitted. **Metformin:** Copy of GMP Certificate (No. 20031933) for M/s Aarti Drugs Limited issued by Food and Drug Control Administration, Gujrat State India is submitted. It is valid till 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has also submitted copy of commercial invoice specifying import of 0.38Kg Empagliflozin. The invoice is cleared by AD (I&E) DRAP dated 20-04-2021.

		Metformin: Firm has also submitted copy of commercial invoice specifying import of 25Kg Metformin HCl. The invoice is cleared by AD (I&E) DRAP dated 07-10-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted HPLC audit trail reports and 21 CFR compliance certificate
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC(III)::

The application was initially submitted on 25-11-2019 without product development and stability study data. The firm was issued a letter of shortcoming dated 26-12-2019. Later the firm submitted complete data on 18th April 2022 and the data was evaluated and following further shortcomings were communicated to the firm. The response of the firm is tabulated below:

Shortcomings communicated	**Response by the firm**
Submit drug substance specifications and analytical method from drug product manufacturer for metformin hydrochloride.	The firm has submitted specifictations and analytical method of metformin hydrochloride from Herbion Pharma.
Submit verification studies of analytical method of metformin hydrochloride drug substance.	Firm has submitted verification studies of the analytical method of metformin hydrochloride drug substance.
Submit stability study data of metformin hydrochloride drug substance as per zone IV-A conditions.	Firm has submitted metformin hydrochloride drug substance stability study data as per zone IV-A conditions.
Submit GMP certificate for API manufacturer of metformin hydrochloride.	Copy of GMP Certificate (No. 20031933) for M/s Aarti Drugs Limited issued by Food and Drug Control Administration, Gujrat State India is submitted. It is valid till 19-03-2023.
Clarify the exact source of empaglifloin drug substance, since Beijing Huikang Pharmaceuticals is mentioned in module 1 and 3.	Firm has submitted that Beijing Huikang is the DMF holder / supplier for this drug substance while it is manufactured at Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China. The commercial invoice and clearance certificate issued by AD (I&E) also specify that the manufacturer is Fuxin Long Rui Pharmaceutical.
Submit copy of BMR of three stability batches	Firm has submitted copy of BMR of the three batches

Decision of 317th meeting of Registration Board:

Deferred for consideration on its turn since the product development and stability study data was submitted in April 2022.

Submission by the firm:

Firm has requested to consider their application of priority basis as per export facilitation as per the letter of Assistant Director PR-I / EFD (letter No. F.1-6/2019-PR-I (EFD) dated 6th October 2022) wherein it was informed that M/s Herbion Pakistan Pvt Ltd. Islamabad have achieved benchmark of more than 100,000 USD and submitted their applications for priority consideration as per decision of 133rd meeting of DRAP Authority wherein it was decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicine (to a maximum of 15 such molecules) during a financial year.

The application was already evaluated and presented by the Board and was deferred for consideration on its turn since the product development and stability study data was submitted in April 2022.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
750.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Herbion Pakistan Pvt Ltd. Industrial Triangle, Kahuta Road, Islamabad**
	Name, address of Manufacturing site.	M/s Herbion Pakistan Pvt Ltd. Industrial Triangle, Kahuta Road, Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm has submitted copy of GMP certificate dated 17-07-2019. The certificate is valid till 20-05-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of grant of revised / relocated section letter dated 09-04-2020 in which Tablet (general) section is specified.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 24968: 25-11-2019
	Details of fee submitted	PKR 20,000/-: 25-11-2019
	The proposed proprietary name / brand name	**DIANCE-MET 12.5/500mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin…12.5mg Metformin HCl…500mg
	Pharmaceutical form of applied drug	White colored, oblong shaped break line on one side and other side is plain.
	Pharmacotherapeutic Group of (API)	Antidiabetic
	Reference to Finished product specifications	Innovator's specs
	Proposed Pack size	14's (2x7's)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**(USFDA** Approved)
	For generic drugs (me-too status)	Xelglu-Met Tablet by Hilton
	Name and address of API manufacturer.	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China. **Metformin:** Aarti Drugs Limited Plot No. 211 - 213, Road No.2G.I.D.C., Sarigam, Dist.: Valsad, Gujarat. INDIA.39615
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and

		stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months. **Metformin:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Xenglu-Met Tablet of Hilton Pharma. Firm has submitted results of CDP for their product against Xenglu-Met Tablet of Hilton Pharma.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and analytical method validation of the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their previous onsite inspection for Vocab 10 and 20mg tablet which was conducted on 15-11-2021 and was considered by the Board in its 313rd meeting. The report cofirms following points: • FPP testing had been conducted on HP-QCE-048 (shimadzu LC-2030) and HP-QCE-001 (shimadzu 2080), which were 21 CFR compliant. • The audit trail report was reproduced at the time of inspection. • Adequate monitoring and control were available for stability chamber.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Copy of DML certificate No. Liao20150233, dated: 21/12/2017 valid till 20/12/2022, issued by Food & Drug Administration of Liaoning Province- China is submitted. **Metformin:** Copy of GMP Certificate (No. 20031933) for M/s Aarti Drugs Limited issued by Food and Drug Control Administration, Gujrat State India is submitted. It is valid till 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has also submitted copy of commercial invoice specifying import of 0.38Kg Empagliflozin. The invoice is cleared by AD (I&E) DRAP dated 20-04-2021. **Metformin:** Firm has also submitted copy of commercial invoice specifying import of 25Kg Metformin HCl. The invoice is cleared by AD (I&E) DRAP dated 07-10-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted HPLC audit trail reports and 21 CFR compliance certificate
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC(III)::

The application was initially submitted on 25-11-2019 without product development and stability study data. The firm was issued a letter of shortcoming dated 26-12-2019. Later the firm submitted complete data in 18th

April 2022 and the data was evaluated and following further shortcomings were communicated to the firm. The response of the firm is tabulated below:

Shortcomings communicated	**Response by the firm**
Submit drug substance specifications and analytical method from drug product manufacturer for metformin hydrochloride.	The firm has submitted specifictations and analytical method of metformin hydrochloride from Herbion Pharma.
Submit verification studies of analytical method of metformin hydrochloride drug substance.	Firm has submitted verification studies of the analytical method of metformin hydrochloride drug substance.
Submit stability study data of metformin hydrochloride drug substance as per zone IV-A conditions.	Firm has submitted metformin hydrochloride drug substance stability study data as per zone IV-A conditions.
Submit GMP certificate for API manufacturer of metformin hydrochloride.	Copy of GMP Certificate (No. 20031933) for M/s Aarti Drugs Limited issued by Food and Drug Control Administration, Gujrat State India is submitted. It is valid till 19-03-2023.
Clarify the exact source of empaglifloin drug substance, since Beijing Huikang Pharmaceuticals is mentioned in module 1 and 3.	Firm has submitted that Beijing Huikang is the DMF holder / supplier for this drug substance while it is manufactured at Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China. The commercial invoice and clearance certificate issued by AD (I&E) also specify that the manufacturer is Fuxin Long Rui Pharmaceutical.
Submit copy of BMR of three stability batches	Firm has submitted copy of BMR of the three batches

Decision of 317th meeting of Registration Board:
Deferred for consideration on its turn since the product development and stability study data was submitted in April 2022.

Submission by the firm:
Firm has requested to consider their application of priority basis as per export facilitation as per the letter of Assistant Director PR-I / EFD (letter No. F.1-6/2019-PR-I (EFD) dated 6th October 2022) wherein it was informed that M/s Herbion Pakistan Pvt Ltd. Islamabad have achieved benchmark of more than 100,000 USD and submitted their applications for priority consideration as per decision of 133rd meeting of DRAP Authority wherein it was decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicine (to a maximum of 15 such molecules) during a financial year.
The application was already evaluated and presented by the Board and was deferred for consideration on its turn since the product development and stability study data was submitted in April 2022.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	GMP status	

Remarks of the Evaluator[3].

Sr. No	Observation	Response by the firm
1.	Latest GMP inspection report conducted within a period of last three years.	Firm has submitted inspection report dated 11-12-2019 conducted to verify rectification status of observations noted in previous inspection. The panel in its written statement on inspection book mentioned that the firm is operating at acceptable level of GMP as of today. The panel in its detailed report concluded that firm has rectified majority of observations and the report is being forwarded to competent authority for resumption of production activities in Oral Liquid Syrup section.
2.	Reference of finished product specifications.	Firm has submitted USP monograph of API and betamethasone cream and gentamicin ointment separately, **however for the applied product no reference has been submitted.**
3.	Clarify the salt form of betamethasone as well as gentamicin, since both	Firm has submitted revised label claim in which salt form has been clarified. The revised label claim is as follows:

	betamethasone dipropionate and betamethasone valerate are available.	Each gram of cream contains: Betamethasone (as dipropionate)…0.5mg Gentamicin (as sulphate)……1mg **Firm has NOT submitted any fee for correction of salt form.**
4.	Evidence of requisite manufacturing facility / section approval letter from Licensing Division DRAP.	Firm has submitted letter of issuance of DML dated 24-08-2016 specifying Tablet (General), Capsule (General), Topical (General), Sachet (General), Liquid Syrup (General) and Oral dry powder for suspension (General) section.
5.	Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.	Effigenta Cream by Mass Pharma (Reg # 024735)

Decision: Approved with Innovator's specifications and with following label claim:

Each gram of cream contains:
Betamethasone (as dipropionate)…0.5mg
Gentamicin (as sulphate)……1mg

- **Firm shall submit 30,000/- fee for correction in salt form as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration letter will be issued after submission of latest GMP inspection report conducted within last three years.**

77(**Name and address of manufacturer / Applicant**	**M/s Moon Pharmaceuticals** **Plot No. 5, SS-4 Road, National Industrial Zone, Rawat, Islamabad**
Brand Name +Dosage Form + Strength	Moncep 125mg/5ml Dry Suspension
Composition	Each 5ml Contains: Ciprofloxacin as Hcl…250mg
Diary No. Date of R& I & fee	Dy No. 14436: 07-03-2019 PKR 20,000/-: 07-03-2019
Pharmacological Group	Fluoroquinolones
Type of Form	Form 5
Finished Product Specification	USP
Pack size & Demanded Price	As per SRO
Approval status of product in Reference Regulatory Authorities.	Registration Board in 269th meeting approved the formulation of ciprofloxacin 125mg/5ml granules and solvent for oral suspension
Me-too status	Novidat suspension by Sami
GMP status	

Remarks of the Evaluator[3].

Sr. No	Observation	Response by the firm
1.	Latest GMP inspection report conducted within a period of last three years.	Firm has submitted inspection report dated 11-12-2019 conducted to verify rectification status of observations noted in previous inspection. Remarks of the Evaluator[3].

Sr. No	Observation	Response by the firm
1.	Evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting.	Firm submitted that Registration Board already approved the formulation in DRB meeting No. M-295 without any availability of RRA reference for Hilton Pharma Karachi.
2.	Evidence of atomic absorption spectrophotometer used for the analysis of drug product.	Firm has submitted copy of letter dated 27-08-2020 from Rotex Pharma specifying that they have atomic absorption spectrophotometer (Model AA 7000 Brand Shimadzu) available and operating at our factory premises located at plot No. 206 & 207,

				Industrial Triangle Kahuta Road Islamabad. The letter is verified and signed by FID Islamabad dated 01-09-2020.
	Decision: Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.			

885.	**Name and address of manufacturer / Applicant**	**M/s Werrick Pharmaceuticals, 216-217, I-10/3, Industrial Area, Islamabad.**
	Brand Name +Dosage Form + Strength	Oxytide-F Dry Powder Inhaler 50/250mcg
