1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document. Because of new DML
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**GMP Certificate No. 83/2020-DRAP(K) dated 23-06-2022**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Local purchase from M/s. Saakh Pharma, Karachi

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	HPLC software 21CFR not Installed
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:[PEC-XVI]

- Justify how you claim USP specification for drug substance, when the submitted analytical method is not in accordance with USP neither similar to the assay method of drug substance manufacturer. Further, the assay method given in section 3.2. S. 4.2 is different from the method which is validated in section 3.2.S.4.3, clarification is required in this regard.
- Provide COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Clarification is required regarding the assay results of stability data of drug substance, either the quantity is of anhydrous esomeprazole magnesium or the labelled amount of esomeprazole.
- Justify how 88.888mg esomeprazole magnesium 22.5% enteric coated pellets are equivalent to 20mg esomeprazole as stated in section 3.2. P.1.
- Calculations of comparative dissolution profile is not in accordance with guidelines approved in 293rd meeting of Registration Board with reference to following points:
  - For f2 calculations a minimum of three time points (excluding point zero) must be used; **mentioned the time point which were considered for the calculation of f2 value.**
  - A maximum of one time-point should be considered after 85% dissolution of the innovator / reference product has been reached; **but as per the submitted documents you have used all time point until 30minutes, which are all below 85%. Clarify how you have calculated the f2 without considering the time point after 85% drug release.**
- Provide dissolution profile in pH 4.5 medium of drug product to comply the decision of 293rd meeting of Registration Board, which states that "The results of comparative dissolution profile conducted in three BCS media across the physiological pH range along with calculation of similarity factor f2 should be submitted and discussed.
- Justify how the results of comparative dissolution profile in all the physiologic medium yields f2 factor value 80.
- Justify how you have claimed USP specification when the given analytical method is not in accordance with USP monograph of "***Esomeprazole Magnesium Delayed-Release Capsules".***
- Provide complete method of dissolution testing along with details of HPLC parameters used during the dissolution testing of drug product.
- Provide complete analytical method verification studies of drug product including the specificity and repeatability parameter along with raw data sheets and chromatogram.
- According to the USP monograph of "***Esomeprazole Magnesium Delayed-Release Capsules",*** result of identification test should be represent as the ratio of the retention times of the esomeprazole peak in the Standard solution and the Sample solution and the acceptance criteria is 0.98-1.02, while in the stability data of drug product, you have mentioned the specification of identification test as "the retention time of the major peak in the chromatogram of sample preparation correspond to that in the chromatogram of the standard peak. Justify, how the specification of drug complies the USP specification.
- Clarify, why you have not mentioned the results of dissolution test in acidic medium in the stability data of drug product. Further, the specification of dissolution test did not mention the time limit in which NLT 75% (Q) should be achieved.

- Following variations have been observed between the assay method given in section 3.2. P.5.2 and the raw data sheet of stability data attached in section 3.2. P.8.
  - According to assay method given in section 3.2.P.5.2 the column temperature should be ambient while the raw data sheets revealed that column temperature was maintained 40°C.
  - Dimensions of column mentioned in section 3.2. p.5.2 was different from dimensions mentioned on raw data sheets of section 3.2. P.8.
  - Composition of mobile phase also differ in both aforesaid sections.
- Justify the disparate weight of sample and standard used for preparation of final conc. of solution mentioned on raw data sheets of stability study with reference to the assay method specified in section 3.2. P.5.2.
- Raw data sheets of dissolution testing have not been attached in section 3.2. P.8., provide raw data sheet to analyse the result of dissolution of all six units.
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

Decision: Registration Board noted the request of the firm for withdrawal of the instant application and declared it as rejected.

	Name and address of API manufacturer.	CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co., Ltd. No. 88 Yangzi Road, Economic & Technological Development Zone, Shijiazhuang City, Hebei Province, China.
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. The summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted the accelerated and real time stability data for three batches.
	Stability studies	The firm has submitted details of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including BET and Sterility) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Module-III (Drug Product):	Firm has submitted the accelerated and real time stability data for three batches.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Merem 500mg injection of Global Pharmaceuticals Islamabad
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	**CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co., Ltd.** Address: No. 88 Yangzi Road, Economic & Technological Development Zone, Shijiazhuang City, Hebei Province, China.		
API Batch No.	682104002		
Description of Pack (Container closure system)	1 Vial packed in unit carton (1×1's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3,6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	M-01	M-02	M-03
Batch Size	500 Injection	500 Injection	500 Injection
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	17-04-2022	17-04-2022	17-04-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML granted vide license No. 000951 dated 23.12.2021
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP issued by CFDA vide No. HE20180065 dated 17.08.2018 which is valid till 1608.2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has taken loan of 5Kg of API from M/s Ipram International Rawat Islamabad for product development purpose. The firm has also submitted the DRAP attested documents confirming the import of 10kg of API imported vide invoice No. 2021ZN-0017 dated 24.02.2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The submitted data includes chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	21CFR Compliance record is not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm submitted record of data logger for temperature and humidity monitoring of stability chambers

Remarks:

Sr.#	Observations	Firm's response
1.	Documents regarding the local procurement of 5Kg of API or DRAP attested invoice in case of import.	The firm has taken loan of 5Kg of API from M/s Ipram International Rawat Islamabad for product development purpose. The firm has also submitted the DRAP attested documents confirming the import of 10kg of API imported vide invoice No. 2021ZN-0017 dated 24.02.2021.
2.	3.2.S.4.1 The specifications proposed by the API manufacturer indicates assay ≥ 78%, however USP monograph states 90-120%, this needs clarification.	The firm clarified limits for assay showed in the form of potency. Firm has also submitted revised specifications according to USP
3.	3.2. S.4.4Justification of doing batch analysis of API with the Innovator product and the batch analysis indicates the 80% Meropenem in your and Innovator product. This needs justification.	Written mistakenly innovator instead of API manufacturer, and has submitted revised batch analysis report.
4.	3.2.S.7.3 the stability data does not indicate tests for sodium content, this needs to be clarified.	Firm has submitted revised stability studies data from drug substance manufacturer where in test of "Sodium content" has been reported. Firm has also submitted commercial invoice dated 08-12-2021 for the "Atomic absorption spectrophotometer".
5.	3.2.5.P.1 The identification test (B) of USP monograph needs to be submitted with respective UV spectrums by using diode array detector.	Firm has referred to the HPLC Assay test for identification test as per USP monograph.
6	You have proposed specifications of sodium content by Atomic Absorption Spectroscopy as per USP Monograph, hence latest inspection report needs to be submitted confirming the availability of the Atomic Absorption. Spectrophotometer including its IQ/OQ/PQ. Further spectra's needs to be submitted for the trial batches confirming the quantification of sodium content	Firm has submitted spectra's indicating the quantification of sodium content.
6.	3.2.P.5.2 Analytical procedures for sterility and BET needs to be submitted.	Submitted.

7.	3.2.P.4 The batch analysis report does not reflect the tests for the sodium content, however same is proposed in finished product specifications.	Firm has submitted batch analysis reports with results of sodium content test.
8.	3.2.P.6 Certificate of analysis of reference standard needs to be submitted.	Certificate of analysis of reference standard is submitted
9.	3.2. P.8.3 The stability data does not reflect the tests for the sterility and BET and sodium content, this needs justification.	Firm has submitted revised stability data sheets reflecting the tests for the sterility and BET and sodium content, this needs justification.
10.	3.2. R.1.1. The BMR of liquid injection is submitted instead the applied product. BMR of the applied product needs to be submitted.	Revised BMR of applied product has been submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**
- **Firm shall submit Pharmaceutical equivalence studies against the innovator product along with IQ, OQ & PQ reports of "Atomic Absorption Spectrophotometer" before issuance of registration letter.**
- **Registration Board further deciced that registration letter will be issued upon verification of drug substance loan leter by "M/s Ipram International Rawat Islamabad".**

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML granted vide license No. 000951 dated 23.12.2021
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted the copy of GMP certificate of API manufacturer issued by the Office of Drug Controller Food and Drugs Administration of Madya Pardesh India

3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted that they have acquired 5Kg of API from M/s Ipram Pharmaceuticals International Rawat Islamabad. The firm has submitted copy of COA vide batch No. DCIMCNF06 Mfg date 10.2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted chromatograms, Raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm does not submitted CFR compliance documents.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Manual record maintained

Remarks:

Sr.#	Observations	Firm's response
1.	Copy of DRAP attested invoice for import of API by Ipram Pharmaceuticals International Rawat Islamabad for the batch No. DCIMCNF063.	The firm has submitted that they have acquired 5Kg of API from M/s Ipram Pharmaceuticals International Rawat Islamabad. The firm has submitted copy of COA vide batch No. DCIMCNF06 Mfg date 10.2021 along with permission letter from DRAP I&E Islamabad in name of M/s IPRAM.
2.	Page 2 of the CoA of the API manufacturer is not legible, hence legible copy needs to be submitted. Justification for performing analysis of API with the innovator brand.	Submitted. Written mistakenly innovator instead of API manufacturer, and has submitted revised batch analysis report.
3.	Justification for performing identification by IR as it is not the requirement of USP monograph and same is not performed by the API manufacturer.	IR identification was written mistakenly in our API COA, revised/corrected COA has now been submitted.
4.	USP monograph states the assay limits for both Cilastatin and Imipenem 90-105%, however your limits are 41.67% to 53.24% as per CoA submitted by you. The requires clarification.	The firm clarified limits for assay showed in the form of potency. Firm has also submitted revised specifications according to USP
5.	3.2.S.4.1The specifications/ assay limits proposed by the API manufacturer in respect of assay are different from the USP monograph, this needs justification.	API manufacturer limits show in the form of separate potencies of Imipenem and Cilastatin but USP monograph shows limits in combine Imipenem/Cilastatin.
6.	3.2.S.4.2The analytical procedures by the API manufacturer needs to be submitted.	Submitted.
7.	3.2.S.5 Certificate of analysis of reference standards for both Imipenem and Cilastatin needs to be submitted	Submitted
8.	3.2.S.7 Legible copies of stability sheets needs to be submitted with conclusion on shelf life and storage conditions.	Submitted.
9.	3.2. P.1 The quantity of API per unit needs to be submitted as per label claim with calculations because the submitted details are not satisfactory.	Frim has submitted revised calculations have been submitted based upon potency.
10.	3.2.P.2.2The Pharmaceutical equivalence study does not reflect the tests for sterility and BET, this needs clarification.	Revised PE study data has been submitted indicating performance of Sterility and BET test.
11.	3.2. P.3 Justification required for manufacturing of three different batches while using the sterile API in one cycle of production. The batch formula need to be	150 vials were written mistakenly. The quantity of API used to manufacture product for 500 vials for each trial.

	clarified with the quantity of API used to manufacture 150 vials on one batch.	
12.	3.2. P.5.2 Analytical procedures for sterility and BET needs to be submitted.	Submitted.
13.	3.2. P.6 CoA's of reference standard	Submitted.
14.	3.2.P.7 Details of container closure system.	Submitted.
15.	3.2.P.8 Clarification required for not performing Sterility and BET during stability.	Revised stability data sheets including results of sterility test & BET test has been submitted.

Decision: Approved.

- **M/s Wallace Pharma Evolutions, shall use 10ml 0.9% NaCl injection as diluent for the commercial batches and submit compatibility study with the 0.9%NaCl solution as diluent.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit Pharmaceutical equivalence studies against the innovator product before issuance of registration letter.**
- **Registration Board further deciced that registration letter will be issued upon verification of drug substance loan leter by "M/s Ipram International Rawat Islamabad".**

Remarks:

Sr.#	Observations	Firm's response
1.	Copy of DRAP attested invoice for import of API by Ipram Pharmaceuticals International Rawat Islamabad for the batch No. DCIMCNF063.	The firm has submitted that they have acquired 5Kg of API from M/s Ipram Pharmaceuticals International Rawat Islamabad. The firm has submitted copy of COA vide batch No. DCIMCNF06 Mfg date 10.2021 along with permission letter from DRAP I&E Islamabad in name of M/s IPRAM.
2.	Page 2 of the CoA of the API manufacturer is not legible, hence legible copy needs to be submitted. Justification for performing analysis of API with the innovator brand.	Submitted. Written mistakenly innovator instead of API manufacturer, and has submitted revised batch analysis report.
3.	Justification for performing identification by IR as it is not the requirement of USP monograph and same is not performed by the API manufacturer.	IR identification was written mistakenly in our API COA, revised/corrected COA has now been submitted.
4.	USP monograph states the assay limits for both Cilastatin and Imipenem 90-105%, however your limits are 41.67% to 53.24% as per CoA submitted by you. The requires clarification.	The firm clarified limits for assay showed in the form of potency. Firm has also submitted revised specifications according to USP
5.	3.2.S.4.1The specifications/ assay limits proposed by the API manufacturer in respect of assay are different from the USP monograph, this needs justification.	API manufacturer limits show in the form of separate potencies of Imipenem and Cilastatin but USP monograph shows limits in combine Imipenem/Cilastatin.
6.	3.2.S.4.2The analytical procedures by the API manufacturer needs to be submitted.	Submitted.
7.	3.2.S.5 Certificate of analysis of reference standards for both Imipenem and Cilastatin needs to be submitted	Submitted
8.	3.2.S.7 Legible copies of stability sheets needs to be submitted with	Submitted.

	conclusion on shelf life and storage conditions.	
9.	3.2. P.1 The quantity of API per unit needs to be submitted as per label claim with calculations because the submitted details are not satisfactory.	Frim has submitted revised calculations have been submitted based upon potency.
10.	3.2.P.2.2The Pharmaceutical equivalence study does not reflect the tests for sterility and BET, this needs clarification.	Revised PE study data has been submitted indicating performance of Sterility and BET test.
11.	3.2. P.3 Justification required for manufacturing of three different batches while using the sterile API in one cycle of production. The batch formula need to be clarified with the quantity of API used to manufacture 150 vials on one batch.	150 vials were written mistakenly. The quantity of API used to manufacture product for 500 vials for each trial.
12.	3.2. P.5.2 Analytical procedures for sterility and BET needs to be submitted.	Submitted.
13.	3.2. P.6 CoA's of reference standard	Submitted.
14.	3.2.P.7 Details of container closure system.	Submitted.
15.	3.2.P.8 Clarification required for not performing Sterility and BET during stability.	Revised stability data sheets including results of sterility test & BET test has been submitted.

Decision: Approved.

- **M/s Wallace Pharma Evolutions, shall use 10ml 0.9% NaCl injection as diluent for the commercial batches and submit compatibility study with the 0.9%NaCl solution as diluent.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit Pharmaceutical equivalence studies against the innovator product before issuance of registration letter.**
- **Registration Board further deciced that registration letter will be issued upon verification of drug substance loan leter by "M/s Ipram International Rawat Islamabad".**

Date of Initiation	24.03.2020	17.04.2020	17.04.2020
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Paracetamol:** GMP certificate issued by DRAP Karachi dated 23.06.2020. **Dextromethorphan Hydrobromide** Copy of DML issued by Commissioner Food & Drug Administration Gandhinagar India. **Guaifenesin** Copy of GMP certificate issued by CFDA China valid till 25.09.2023

		<u>Phenylephrine</u> Copy of GMP certificate issued by Guangdong Food and Drug Administration China dated 12.09.2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copies of DRAP attested invoices for import of Dextromethorphan Hydrobromide, Guaifenesin and Phenylephrine.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Evaluator:
The above product was deferred in 321st meeting of Registration Board for following:

- Evidence of approval of applied formulation as drug in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.
- Submission of documents for the procurement of API with approval from DRAP (in case of import).
- Submission of Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

In reply submitted by the firm dated 01.11.2022, the firm informed that Registration Board has already approved the formulation of the products which have OTC status in USFDA. The firm has again submitted the same reference which they have provided previously i.e. Tylenol Cold Plus Flu Severe Caplets of Johnson & Johnson USA. Moreover, the firm has submitted copies of DRAP attested invoices for import of Dextromethorphan Hydrobromide, Guaifenesin and Phenylephrine. Audit trails repost and CFR Compliance certificate is provided by the firm.

Decision: Approved with Innovators specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The status in reference regulatory authorities	Iclusig Tablets USFDA
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Lianyungang Jari Pharmaceutical Co., ltd No. 18 Zhenhua Road, Lianyungang China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Iclusig 45mg tablet , Incyte Biosciences UK limited has been submitted

	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Evaluation by PEC:
Decision in 321st meeting of Registration Board:
Deferred for following points:

i. Justification for conducting Comparative Dissolution studies at "M/s Alpha laboratories India", instead of M/s Beacon Pharmaceuticals Bangladesh.

ii. Regulatory status of Alpha Laboratories India, whether it is licensed entity or otherwise.

In response to the above decision of the Board the firm has submitted the reply on 04.011.2022 which is as under:
The firm has again submitted copy of business agreement dated 04.06.2018 b/w M/s Beacon Pharmaceuticals Bangladesh and M/s Alpha Laboratories India wherein the M/s Alpha Laboratories India shall provide the services being expert in Bioequivalence studies of generic molecules to M/s /s Beacon Pharmaceuticals Bangladesh.

Decision: Deferred for submission of evidence of License/Approval of M/s Alpha Laboratories India, from the relevant regulatory authority of India.

Agenda of Evaluator PEC-XX

Case No. 01 Registration applications of newly granted DML or New section (Human)
New DML
M/s May and Bakers (Pvt) Ltd, 45 Km, Dina Nath Multan Road, Lahore
CLB in its 285th meeting held on 17th and 18th March 2022, has considered and approved the grant of DML by way of Formulation with following 3 sections:
Injectable ampoule Section (General)
Capsule Section (General)
Dry powder suspension section (General)
Sachet section (General)
Dry powder vial section (General)

1994.	Name, address of Applicant / Marketing Authorization Holder	M/s May and Bakers (Pvt) Ltd, 45 Km, Dina Nath Multan Road, Lahore
	Name, address of Manufacturing site.	M/s May and Bakers (Pvt) Ltd, 45 Km, Dina Nath Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30774 (dated: 31-10-2022)

	Details of fee submitted	PKR 30,000/-: dated: 31-10-2022
	The proposed proprietary name / brand name	Myocin 500mg Dry Powder vial I.V
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Vancomycin Hydrochloride eq. to vancomycin …… 500 mg
	Pharmaceutical form of applied drug	Dry powder injection
	Pharmacotherapeutic Group of (API)	Antibacterial
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Vancocin injection 500mg USFDA approved
	For generic drugs (me-too status)	Cinva 500mg IV injection by M/s CCl phamaceuticals, Lahore Reg No. 102464
	GMP status of the Finished product manufacturer	Firm has submitted approval letter for DML grant dated 29-04-2022
	Name and address of API manufacturer.	Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (HAS1507001, HAS1507002, HAS1507003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification,

		reference standard, container closure system and stability studies of drug product.		
	Pharmaceutical equivalence and comparative dissolution profile	The firm has submitted results of pharmaceutical equivalence for all the quality tests for their product as per specification and comparative study against the comparator product i.e. Vancomycin Dry powder vial 500mg by performing quality tests (appearance, volume after reconstitution, identification, Ph after reconstitution, filled volume color, water content, Assay on anhydrous basis, BET, sterility test).		
	Analytical method validation/verification of product	Firm has submitted report of validation of analytical method for the drug product including system suitability, specificity, accuracy, repeatability, intermediate precision, linearity, range & robustness.		
STABILITY STUDY DATA				
Manufacturer of API		Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China		
API Lot No.		HAF 1912013		
Description of Pack (Container closure system)		Glass vial type I with one 10ml glass ampoule of WFI		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.		Trail-01	Trail-02	Trail-03
Batch Size		1000 packs	1000 packs	1000 packs
Manufacturing Date		02 – 2022	02 – 2022	02 – 2022
Date of Initiation		28-02-2022	28-02-2022	28-02-2022
No. of Batches		03		
Administrative Portion				
	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided		
	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice FXIN2002021A dated **25-02-2020** wherein specifying the import of vancomycin hydrochloride (lyophilized) 30 Kg (batch no HAF 1912013) in the name of M/s Vision pharmaceuticals Islamabad, DRAP clearance certificate and license to import has also been issued in the name of M/s vision pharmaceuticals Islamabad		

	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has recently installed HPLC software 21CFR, in future stability studies shall be performed using HPLC software 21CFR.
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr.#	Observation	Reply	Remarks
	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	Firm has submitted GMP certificate No FJ200003 dated 22.09.2020 valid till 21.09.2022 issued by China Food and Drug Administration	Not complied Valid GMP certificate to be submitted
	Regulatory status of diluent (WFI) in Pakistan is required with details of manufacturer and Registration No.	Gee H20 (5ml) by M/s Gallop Water Sciences.	Not complied Registration No. not provided
	CoA from Drug Product manufacturer is not as per USP. The Assay limit as per USP (44) is ≥ 900ug/mg while assay limit mentioned in CoA of Drug product manufacturer is 90-115%. Clarify it	It was a drafting error updated CoA as per USP (44) is submitted.	Complied
	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Firm has submitted analytical testing method of Vancomycin HCl by Drug substance manufacturer only	Not complied
	In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products en.pdf)	Not applicable as the product is immediately used after reconstitution	Not complied In use stability studies are required despite of the fact that formulation is intended to be used immediately after reconstitution
	Documents for the procurement of API (commercial invoice FXIN2002021A dated 25-02-2020, DRAP clearance certificate and license to import) has been issued in the name of M/s vision pharmaceuticals Islamabad. Clarify it.	We are borrowing the material from M/s Vision Pharma. The borrowing undertaking is submitted	Firm has submitted acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad along with copy of

			commercial invoice attested by DRAP I&E Islamabad dated 20-5-2020
	Proposed container closure system (Glass vial Type 1) suitability testing to be submitted as per pharmacopeia.	Product is as per innovator so suitability testing of Container closure system is not required	Not complied Quality testing of container closure system is required as per USP to assess whether container closure system meets proclaimed criteria i.e USP glass vial type I or not
	Details of manufacturer and batch no of comparator product has not been mentioned under pharmaceutical equivalence study. Also justify selection of that particular comparator product	Vancomycin 1g & 500mg By Getz pharma	Not complied Batch no of comparator products are not provided
	Compatibility studies of drug product with container closure system is not provided.	As the material is ready to fill hence compatibility studies with container closure has been performed by drug substance manufacturer	Not complied Compatibility of the container closure system with the FPP is required as under 2.3.P.2.4 and 3.2.P.2
	Calculation regarding potency adjustment (salt factor and assay result of drug substance) has not been provided in Batch formula/ master formula.	Updated batch formula/master formula wherein calculation regarding potency adjustment (salt factor and assay result of drug substance) is provided	Complied

Decision: Deferred for submission of followiing:

- **Valid GMP certificate of Drug Substance manufacturer i.e Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China.**
- **Registration status/ registration number of diluent i.e Gee H20 (5ml) water for injection by M/s Gallop Water Sciences.**
- **Detailed analytical procedures for the testing of drug substance by Drug Product manufacturer.**
- **In use stability data (reconstituted form) to be provided as per guidance document by EMA.**
- **Acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad.**
- **Suitability testing/Quality testing of Proposed container closure system (Glass vial Type 1) as per pharmacopeia**
- **Batch no of comparator product vancomycin 500mg injection to be provided**

- **Compatibility studies of drug product with container closure system is not provided as required under 2.3.P.2.4 and 3.2.P.2**

1.	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	Copy of EUDRA GMP certificate no. OGYÉI/21847-4/2022 issued on basis of inspection conducted on 12-04-2022	Complied
2.	Detailed analytical procedures for the testing of drug substance to be provided by Drug Product manufacturer	Submitted	Complied
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	COA of the batch No DRO/732/11/19 from Drug Substance / API manufacture and CoA of same batch i.e DRO/732/11/19 from Drug product manufacturer is submitted	Complied
4.	Documents for the procurement of API with approval from DRAP is required Documents for the procurement of API (commercial invoice RAAP/19-20/1533 dated 20-01-2020, DRAP clearance certificate and license to import has been issued (15 kg) batch No DRO/732/11/19 in the name of **M/s Vision Pharma Islamabad.**	*We are borrowing the material from M/s Vision Pharma. The borrowing undertaking is submitted*	Not complied Firm has submitted acknowledgement /loan letter from **M/s Global pharma** rather than M/s vision pharmaceuticals Islamabad. ***Later on firm has provided loan letter from M/s Vision pharmaceuticals Islamabad.***
5.	Proposed container closure system (Glass ampoule Type 1) suitability	*Product is as per innovator so suitability testing of Container*	Not complied Quality testing of container closure system

	testing to be submitted as per pharmacopeia.	*closure system is not required*	is required as per USP to assess whether container closure system meets proclaimed criteria i.e USP glass type I or not
6.	Details of manufacturer and batch no of comparator product has not been mentioned under pharmaceutical equivalence study. Also justify selection of that particular comparator product	No-spa M/s Snofi Aventis Batch No FCB48A Mfg date: 02/2022 Exp date: 01/2025	
8.	Compatibility studies of drug product with container closure system is not provided.	*It is evident from stability studies that drug product is compatible with Container Closure system*	Not complied Compatibility of the container closure system with the FPP is required as under 2.3.P.2.4 and 3.2.P.2
8.	Compatibility of the Drug Substance(s) with excipients is not provided since information regarding excipients used in innovator/reference product is not available.	*Not applicable as we are not using any novel excipient and It is evident from stability studies that drug substance is compatible with excipient*	Not complied Compatibility of the container closure system with the FPP is required as under 2.3.P.2.1 and 3.2.P.2 Since information regarding qualitative composition of excipients of innovator product is not known. ***Later on firm has provided Drug-excipient compatibility study wherein it is concluded that Drotaverine HCl is compatible with all excipients.***
9.	Calculation regarding potency adjustment (salt factor) has not been provided in Batch formula/ master formula.	Updated batch formula/master formula has been provided	Complied

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Case N0. 02 Registration applications of newly granted DML or New section (Human)
New Section:
M/s PDH Laboratories (Pvt) Ltd. 9.5km Sheikhupura Road Lahore

CLB in its 285th meeting held on 07th June 2022, has considered and approved the grant of following additional sections/facility:

Oral Liquid section (General) Additional

1998.	Name, address of Applicant / Marketing Authorization Holder	M/s PDH Laboratories (Pvt) Ltd. 9.5km Sheikhupura Road Lahore
	Name, address of Manufacturing site.	M/s PDH Laboratories (Pvt) Ltd. 9.5km Sheikhupura Road Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 27451 dated 28/09/2022
	Details of fee submitted	PKR 30,000/-: dated 05/04/2022
	The proposed proprietary name / brand name	Prohis Elixir 120ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Promethazine HCl….5mg
	Pharmaceutical form of applied drug	Elixir
	Pharmacotherapeutic Group of (API)	Anti-Histamine
	Reference to Finished product specifications	BP Specs
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Phenergan Elixir by Sanofi consumer health care in UK (MHRA)
	For generic drugs (me-too status)	Phenergan Elixir 120ml Sanofi Aventis Pakistan Limited Reg #000826
	GMP status of the Finished product manufacturer	Last inspection (renewal of DML) was conducted on 03.01.2020 and 04.01.2022. New additional section for oral liquid syrup (General) was approved dated June 7,2022.
	Name and address of API manufacturer.	Harika Drugs Private Limited Sy. No 165 A & 165/E, Gummadidala Village, Sangareddy District, Telangana State, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Promethazine HCl present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 12 months Batches:(HPHAPB029,HPHAPB030,HPHAPB031)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Phenergan Elixir (batch no. AWO61) 120ml by M/s Sanofi Aventis Pakistan Limited. by performing quality tests (Identification, Assay, pH).
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	Harika Drugs Private Limited Sy. No 165 A & 165/E, Gummadidala Village, Sangareddy District, Telangana State, India		
API Lot No.	Not mentioned		
Description of Pack (Container closure system)	Amber glass bottle (USP type III) sealed with aluminium cap		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-005	T-006	T-007
Batch Size	40 bottles	40 bottles	40 bottles
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	14/09/2021	14/09/2021	29/09/2021

No. of Batches	03	
Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No.3390/E1/2019 WHO-GMP certificate issued on 20.11.2019 valid till three years.
	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.5201/2020/DRAP-AD-CD(I&E) dated 16/04/2020 is submitted wherein the permission to import different APIs including Promethazine HCl (0.12Kg) for the purpose of test/analysis and stability studies of Promethazine HCl 5mg syrup is granted.
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable UV spectroscopic method has been used as per BP.
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Observation	Reply	Remarks
	Detailed analytical procedures for the testing of drug substance to be provided by Drug Product manufacturer	Detailed analytical procedures for the testing of drug substance, provided by Drug Product manufacturer	Complied
	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non compendial drug substance(s) to be provided	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacture, provided	Complied
	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	CoA of Drug Substance for Batch No. HPHCPP021 has been provided from both Drug Substance and Drug Product manufacturer.	Complied
	For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, justify use of working standard for Promethazine HCl	Titrimetric method has been used by API Manufacturer and UV spectroscopic method	

		adopted for finished product (as per BP) Primary Reference standard has been used for characterization and qualification of working standard	
	Documents for the procurement of API with approval from DRAP is required. In already submitted documents batch no/lot no of Drug Substance has not been mentioned.	Batch certification, invoice has been submitted for import of Promethazine HCl (Batch No. HPHCPP021)	Complied
	Suitability testing of proposed container closure system (Glass bottle USP Type III) to be submitted as per pharmacopeia.	Test performed as per USP as follows: Surface glass test Glass grain test Result fall under acceptance limit for USP type III glass.	Complied
	Compatibility studies of drug substance with container closure system is not provided.	As we have performed stability studies in said container closure system for 6 months, the product found stable with no indication for interaction of API with container closure system.	

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Case No. 03 Priority Registration of Vonoprazan (10mg & 20mg) against manufacturing of Paracetamol 500mg tablets

M/s Axis Pharmaceuticals has requested (dated October 28, 2022) to consider Priority evaluation and registration of following products, Form 5F (CTD) as Per 147th meeting of Authority for distribution of 15,000 Packs of Paracetamol in the market:

Vonopra Tablets 10mg 2.Vonopra Tablets 20mg

Manufacturing and distributing data of Axamol Tablet (Paracetamol 500 mg) is tabulated below;

Axamol Tablets Data (From September 20, 2022 to October 26, 2022)

	Details of fee submitted	PKR 30,000/-: dated: 05-04-2022 (deposit slip# 43031588)
	The proposed proprietary name / brand name	Vonopra Tablet 10mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contain: Vonoprazan (as Fumarate) … 10 mg
	Pharmaceutical form of applied drug	Immediate Release Tablet (Coated).
	Pharmacotherapeutic Group of (API)	Potassium Competitive Acid Blocker (P-CAB)
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	14's, 28's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Takecab Tablet by Takeda (PMDA approved).
	For generic drugs (me-too status)	Vonseca 10mg tablet by M/s Tabros, Karachi ,Reg No. 112584
	GMP status of the Finished product manufacturer	Firm has submitted GMP certificate issued on dated 09-06-2020.

		Section approval letter issued on 30.06.2020
	Name and address of API manufacturer.	Guangdong Xianqiang Pharmaceutical Co. Ltd. Number 6 Industrial Avenue, Conghua Economic Development Zone, Guangzhou City, Guangdong Province, China
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph for drug is not present in any pharmacopoeia. The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (TAK09R150701, TAK09R150702, TAK09R150703)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	The firm has submitted results of pharmaceutical equivalence for all the quality tests for their product as per specification and comparative study against the comparator product i.e. Vonozan tablet 10mg by Getz Pharma (Batch No 003FF8) by performing quality tests (Average weight, moisture content, Disintegration time, content uniformity Assay, Dissolution,). CDP has been performed against the same brand that is Vonozan tablet 10mg by Getz Pharma (Batch No 003FF8) in pH 1.2, pH 4.5, pH 6.8 and Purified Water. The Average % release of Drug substance in all four mediums is more than 85% at 15 minutes

		hence there is no need to calculate f2 value. The CDP of Vonopra Tablet 10mg against Vonozan Tablet 10mg shows equivalence.		
	Analytical method validation/verification of product	Firm has submitted report of validation of analytical method for the drug product including system suitability, specificity, accuracy, repeatability, intermediate precision, linearity, range & robustness.		
STABILITY STUDY DATA				
Manufacturer of API		Guangdong Xianqiang Pharmaceutical Co. Ltd. Guangdong Xianqiang Pharmaceutical Co. Ltd. Number 6 Industrial Avenue, Conghua Economic Development Zone, Guangzhou City, Guangdong Province, China		
API Lot No.		B#: TAK09R210401		
Description of Pack (Container closure system)		Alu-PVC blister packed in unit carton.		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 3 months Accelerated: 3 months		
Frequency		Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)

Manufacturing Date		12 – 2021	12 – 2021	12 – 2021
Date of Initiation		29-12-2021	29-12-2021	29-12-2021
No. of Batches		03		
Administrative Portion				
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Drug manufacturing certificate No Yue20160016 dated 24.12.2020 valid till 23.12.2025 issued by Guandong provincial Drug Administration and GMP certificate (No 20220616) dated 16.06.2022 valid till 15.06.2026		
	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice 13882/2021/DRAP dated 07-09-2021 wherein specifying the import Vonoprazan Fumarate 0.30 Kg. Batch No TAK09R210401		
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.		
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.		
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.		

Remarks of Evaluator:			
Sr.#	Observation	Reply	Remarks
1.	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Provided	Complied
2.	Melting point of Vonoprazan Fumarate is 194.8℃ as per published literature of innovator product while melting point of Drug substance as mentioned in CoA by Drug product manufacturer is 202.3℃ (acceptance limit 200-204℃). Clarify it	As per CoA of drug substance (by API manufacturer) the manufacturer states a melting point range of 200 – 204 ℃ Moreover, as per USP <741> (Melting Range or Temperature) melting range can vary based on factors e.g. sample size, particle size, efficiency of heat of diffusion, etc	Complied Firm has performed FTIR analysis wherein sample has been identified as Vonoprazan fumarate (FTIR spectrum provided)

3.	Justification to be provided for selection of dissolution parameters i.e dissolution medium, acceptance criteria and volume of dissolution medium etc since dissolution test has been performed in purified water only.	*Comparative dissolution profile has been conducted in three BCS media (pH 1.2, 4.5 & 6.8) & purified water Vonoprazan Fumarate has solubility over a broad pH range in aqueous conditions which is expressed in comparative dissolution profile showing more than 85% dissolution within 15 minutes in all dissolution media. Since it's a non-pharmacopoeial product & no data is published regarding dissolution medium in various sites including FDA dissolution data base till now. As the solubility of drug substance is pH independent, therefore Water was selected as dissolution media. Moreover, general parameters for dissolution were selected as per USP <1092> (dissolution procedure development).*	Not complied As per USFDA guidance document for industry Dissolution Testing and Acceptance Criteria for Immediate-Release Solid Oral Dosage Form Drug Products Containing High Solubility Drug Substances, following dissolution parameters to be adopted for highly soluble immediate release tablets: A. **Basket Method (USP apparatus 1)** • Stirring rate = 100 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C B. **Paddle Method (USP apparatus 2)** • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C Moreover, Dissolution medium used in USFDA approved formulation VOQUEZNA for evaluation of release profile of Vonoprazan tablet was 0.05M acetate buffer (pH 4.5) with 50rpm while dissolution medium used by the firm is **water** (900ml) and 50 rpm. Justification to be provided for selection of dissolution medium.
4.	Compatibility of the Drug Substance(s) with excipients is not provided (mainly colloidal Silicon dioxide). Moreover Specifications of colloidal silicon dioxide are also not provided.	Compatibility study of colloidal Silicon dioxide with Drug Substance has been provided The study concludes that there is no incompatibility between the said excipient and API. Moreover, stability study also supports the compatibility study as there is no additional peak observed. Moreover, as the said ingredient is available in BP pharmacopoeia (evidence	Complied

		provided herewith) and is routinely used in oral solid dosage form, therefore	

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**
- **Firm will submit dissolution testing method with revised medium in the light of dissolution parameters selected for evaluation of release profile of Vonoprazan in USFDA approved formulation VOQUEZNA, before issuance of registration letter.**

	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate of Guangdong Xianqiang Pharmaceutical Co. Ltd. The certificate is valid till 19-06-2026.		
	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice 13882/2021/DRAP dated 07-09-2021 wherein specifying the import Vonoprazan Fumarate 0.30 Kg.		
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.		
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.		
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.		

Remarks of Evaluator:

Sr.#	Observation	Reply	Remarks

1.	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Provided	Complied
2.	Melting point of Vonoprazan Fumarate is 194.8℃ as per published literature of innovator product while melting point of Drug substance as mentioned in CoA by Drug product manufacturer is 202.3℃ (acceptance limit 200-204℃). Clarify it	As per CoA of drug substance (by API manufacturer) the manufacturer states a melting point range of 200 – 204 °C Moreover, as per USP <741> (Melting Range or Temperature) melting range can vary based on factors e.g. sample size, particle size, efficiency of heat of diffusion, etc	Complied Firm has performed FTIR analysis wherein sample has been identified as Vonoprazan fumarate (FTIR spectrum provided)
3.	Justification to be provided for selection of dissolution parameters i.e dissolution medium, acceptance criteria and volume of dissolution medium etc since dissolution test has been performed in purified water only.	Comparative dissolution profile has been conducted in three BCS media (pH 1.2, 4.5 & 6.8) & purified water Vonoprazan Fumarate has solubility over a broad pH range in aqueous conditions which is expressed in comparative dissolution profile showing more than 85% dissolution within 15 minutes in all dissolution media. Since it's a non-pharmacopoeial product & no data is published regarding dissolution medium in various sites including FDA dissolution data base till now. As the solubility of drug substance is pH independent, therefore Water was selected as dissolution media. Moreover, general parameters for dissolution were selected as per USP <1092> (dissolution procedure development).	Not complied As per USFDA guidance document for industry Dissolution Testing and Acceptance Criteria for Immediate-Release Solid Oral Dosage Form Drug Products Containing High Solubility Drug Substances, following dissolution parameters to be adopted for highly soluble immediate release tablets: A. **Basket Method (USP apparatus 1)** • Stirring rate = 100 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C B. **Paddle Method (USP apparatus 2)** • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C Moreover, Dissolution medium used in USFDA approved formulation VOQUEZNA for evaluation of release profile of Vonoprazan tablet was 0.05M acetate buffer (pH 4.5) with 50rpm while dissolution medium used

			by the firm is **water** (900ml) and 50 rpm. Justification to be provided for selection of dissolution medium.
4.	Compatibility of the Drug Substance(s) with excipients is not provided (mainly colloidal Silicon dioxide). Moreover Specifications of colloidal silicon dioxide are also not provided.	Compatibility study of colloidal Silicon dioxide with Drug Substance has been provided The study concludes that there is no incompatibility between the said excipient and API. Moreover, stability study also supports the compatibility study as there is no additional peak observed. Moreover, as the said ingredient is available in BP pharmacopoeia (evidence provided herewith) and is routinely used in oral solid dosage form, therefore	Complied

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit dissolution testing method with revised medium in the light of dissolution parameters selected for evaluation of release profile of Vonoprazan in USFDA approved formulation VOQUEZNA, before issuance of registration letter.**

Case No 04 M/s Horizon Healthcare (Pvt.) Ltd. has requested to consider Priority evaluation and registration of Pytol – C Tablets (dated 19.09.2022) as Per 147th meeting of Authority for consideration of registration applications of Paracetamol containing products on priority. This application was missed from the agenda of 321st meeting (20-22 Sep,2022).

2001.	Name, address of Applicant / Marketing Authorization Holder	M/s Horizon Healthcare (Pvt.) Ltd. Plot no. 33 Sundar Industrial Estate Lahore.
	Name, address of Manufacturing site.	M/s Horizon Healthcare (Pvt.) Ltd. Plot no. 33 Sundar Industrial Estate Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐Domestic and Export sales
	Dy. No. and date of submission	Dy.No 26328 dated 19-09-2022
	Details of fee submitted	Rs.75,000/- dated 19-09-2022
	The proposed proprietary name / brand name	Pytol – C Tablets 120mg

Administrative Portion			
	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product: EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin) Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June , 2021. Registration Board decided to approve registration of EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin)	

		Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) by M/s. Horizon Healthcare (Pvt) Ltd. Lahore. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Following two observations were reported in the report: The HPLC software is 21 CFR compliant. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well. Verification of performance of dissolution test at buffer stage pH 5.5 for Dayzol Capsules 30mg and 60mg. Performance of dissolution test for EMPAZON 10mg and 25mg Tablets with revised specifications i.e not less than 80% (Q) in 15minutes at initial and 01-month time point.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm had provided copy of GMP Certificate of Citi Pharma Limited 3.5km, Head Balloki Road, Bhai Pheru, Distt Kasur Pakistan (Dated 17.12.2022) GMP Valid upto: Two years
	Documents for the procurement of API with approval from DRAP (in case of import).	N/A
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of EvaluatorXX: Firm has submitted specification of hardness as follows: Hardness NLT 4Kp Upper limit to be defined as USFDA recommends that hardness for chewable tablets be kept low (<12 kp). A higher hardness value (>12 kp) may be considered if justified.		
Decision: Deferred for comparison of instant formulation against the innovator product for qualitative composition and manufacturing method applied by firm for masking the bitter effect of drug substance.		

Case No.5 Registration applications of newly granted DML or New section (Human)

New Section:
M/s Jaskan Pharmaceutical Private Limited Plot No 50 Sunder Industrial Estate Lahore CLB in its 279th meeting held on 18th February 2021, has considered and approved the grant of following additional section/facility:

Dry Powder for Injection (Cephalosporin) New.

2002.	Name, address of Applicant / Marketing Authorization Holder	M/s Jaskan Pharmaceutical Private Limited Plot No 50 Sunder Industrial Estate Lahore
	Name, address of Manufacturing site.	M/s Jaskan Pharmaceutical Private Limited Plot No 50 Sunder Industrial Estate Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 32619 dated 14.11.2022
	Details of fee submitted	PKR 30,000/- dated 12.10.2022
	The proposed proprietary name / brand name	Jaspime 1gm Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Cefepime HCl with L-Arginine equivalent to Cefepime ……. 1000mg
	Pharmaceutical form of applied drug	Injectable
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Maxipime 1g powder for solution for injection Bristol-Myers Squibb Company Princeton, NJ 08543 USA
	For generic drugs (me-too status)	Maxum 1.0gm Injection Curexa Health Pvt LTD, a subsidiary of Highnoon Laboratories Reg. No. 090509
	GMP status of the Finished product manufacturer	cGMP issued by DRAP based on inspection dated 26.10.2020 valid till 25/10/2022. New Section Approval granted on 12-03-2021(Dry Powder For Injection Cephalosporin) .
	Name and address of API manufacturer.	Qilu Antibiotics Pharmaceutical CO, Ltd NO.849 DongJia Town Licheng District, Jinan , Shandong, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to

		nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controlss, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(40003FK86D-A, 40004FK86D-A and 40005FK86D-A)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Maxum 1.0gm Injection Curexa Health Pvt LTD, Batch No 2180120 by performing quality tests (Identification, Assay, BET, sterility test, Ph (after reconstitution), particulate matter, diluent volume etc against Jaspime injection 1.0g (Batch No KI-01)
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

Remarks of Evaluator:
1.6.5 Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.
3.2.S.4 CoA from Drug Product manufacturer is not as per USP. The Assay limit as per USP (44) is 825ug/mg to 911ug/mg (on anhydrous basis) while assay result mentioned in CoA from Drug product manufacturer is 538 ug/mg (on anhydrous basis)
3.2.S.4 Following tests are not mentioned in CoA of Drug Substance (both from Drug Product manufacturer and Drug Substance manufacturer): crystallinity, water determination. Moreover, acceptance criteria for impurity testing is not as per USP.
3.2.S.4 The L-arginine, at an approximate concentration of 725 mg/g of cefepime, is added reference product (USFDA approved) to control the pH of the constituted solution at 4.0–6.0. Calculation of arginine quantity in bulk powder to be provided.
3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance (Batch No 1011AJ89DB) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture
3.2.P.8 In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products_en.pdf)
3.2.P.8 In stability testing Pharmacopoeial tests like BET, sterility test, water determination and uniformity of dosage unit has not been performed.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports on product
3.2.P.1 Provide information including type of diluent, its composition, quantity or volume, specifications Regulatory status of diluent in Pakistan is required with details of manufacturer and Registration No.

3.2.P.2 Perform suitability testing of proposed container closure system (Ph.Eur type II glass vial) as per pharmacopeia. 3.2.P.2 Justify selection of that particular comparator product. 3.2.P.2 Compatibility studies of drug product with diluent is not provided. 3.2.P.3 Calculation regarding potency adjustment (salt factor and assay result of drug substance) has not been provided in Batch formula/ Master formula.
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Case. No. 01: Request of M/s Aries Pharmaceuticals (Pvt) Ltd, Peshawar for Correction in Label Claim/ Pack Size of Aricain Injection 10mg/ml.

Registration Board in its 320th meeting held on 29th -31st August, 2022 approved registration of Aricain Injection 10mg/ml in the name of M/s Aries Pharmaceuticals (Pvt) Ltd, 1-W, Industrial Estate, Hayatabad, Peshawar as per following details:

1.	Name and address of manufacturer / Applicant	M/s Aries Pharmaceuticals. 1-W, Industrial Estate, Hayatabad, Peshawar, k.p.k
	Brand Name +Dosage Form + Strength	Aricain **10mg/ml** Injection
	Composition	Each **1ml** Ampoule Contains: Lidocaine Hcl…10mg
	Diary No. Date of R& I & fee	Dy.No. 14373 dated 07-03-2019 Rs.20,000/- Dated 06-03-2019
	Pharmacological Group	Local anaesthetic
	Type of Form	Form 5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Lidocaine Injection 1% w/v (MHRA approved)
	Me-too status (with strength and dosage form)	Lacain 1% Injection of M/s. Pulse Pharmaceuticals
	GMP status	cGMP certificate on the basis of Evaluation conducted on 06-04-2022 and valid for two (02) Years.
	Previous remarks of the Evaluator.	
	Previous decision(s)	**Deferred for following reasons:** Deferred for consideration on its turn. **(M-296)**
	Remarks of the Evaluator.	
	Decision of M-320: Approved with USP Specifications.	

Now, the firm has informed that their applied pack size was **"2ml"** instead of **"1ml"** and also submitted a fee of Rs.30,000/- (Invoice # 60746612949), verified from https://fee.dra.gov.pk/admin#/search/slip for change in pack size and accordingly in label claim. Correct pack size and label claim are as under:

"Aricain Injection 20mg/2ml
Each 2ml ampoule contains:
Lidocaine Hydrochloride……...20mg"

Proceedings of M-323:

Registration Board was apprised that there is no change in strength of the product i.e., 1% Lidocaine Hydrochloride. However, label claim will be mentioned in accordance the correct pack size i.e., "2ml"

Decision: Registration Board approved correction in pack size/ label claim of above-mentioned product as per following detail:
"Aricain Injection 1%
Each 2ml ampoule contains:
Lidocaine Hydrochloride……..20mg
(USP Specifications)"

Case. No. 02: Request of M/s Barrett Hodgson Pakistan (Pvt) Ltd, Karachi for Correction in Label Claim of Lincostar 500mg Capsule

Registration Board in its 293rd meeting held on 06th-08th January, 2020 approved registration of Lincostar Capsule 500mg in the name of M/s Barrett Hodgson Pakistan (Pvt) Ltd, F/423, S.I.T.E., Karachi as per following details:

1.	Name and address of manufacturer / Applicant	M/s Barrett Hodgson Pakistan (Private) Ltd. F/423, SITE, Karachi
	Brand Name +Dosage Form + Strength	Lincostar Capsule **500mg**
	Composition	Each capsule contains: Lincomycin as HCl monohydrate….**20mg**
	Diary No. Date of R& I & fee	Dy No. 27715: 13.08.2018 PKR 20,000/-: 13.08.2018
	Pharmacological Group	Lincosamides
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	12's; Rs. 180/-
	Approval status of product in Reference Regulatory Authorities.	Lincocine 500 mg capsule (Lincomycin as HCl hydrate) by Pfizer Holding France. Approved by ANSM France
	Me-too status	Linnco 500mg Capsule (Lincomycin as HCl) by Mafins Pharmaceuticals (Pvt) Ltd., Karachi. Reg. No. 79898
	GMP status	The firm was inspected on 16th-28th August, 2018 Conclusion: The firm has complied and addressed all the observations as advised in the last inspection. Overall found satisfactory and progressive towards good level of GMP compliance.
	Remarks of the Evaluator.	• Form 5 has been signed by person from medical and regulatory department of the firm. • The USP has specified Raman spectroscopy for dissolution study of Lincomycin capsules. The firm was asked to provide proof of provision of Raman spectrophotometer. The firm replied that they will arrange the same. • The firm was asked to revise the API to Lincomycin as HCl monohydrate in label claim. The firm replied that they will revise the same.
	Prevoius decision	The Board in its 292nd meeting deferred the case for: • Proof of provision of Raman spectrophotometer. • Revision of the API to Lincomycin as HCl monohydrate in label claim • Signature of rrespective persons.
	Evaluation by PEC	• The firm has claimed BP specifications. • **The firm has revised the API to Lincomycin as HCl monohydrate in label claim.** • **The firm has submitted Rs. 5000/- fee.** • The firm has submitted revised form 5.
	Decision: Approved.	

Registration letter could not be issued due to disparity in strengths mentioned in composition and alongside the brand name. In this context original dossier could not be retrieved from available record, however, the firm has submitted copies of DRAP's acknowledged receipts, form-5 & fee challan of above-mentioned product, all stating strength of **"500mg"** instead of **"20mg".** Accordingly, the firm has requested for correction in label claim of above-mentioned product.
In this regard, it has been observed from minutes of 293rd meeting that **the firm revised the API to Lincomycin as HCl monohydrate in label claim with fee of Rs.5000/-**. Accordingly, the firm may be directed to submit differential fee of Rs.25000/- before issuance of registration letter.

Decision: Registration Board decided as under:

i. **Approved correction in strength/ label claim of above-mentioned product as per following detail:**

   "Lincostar Capsule 500mg
   Each capsule contains:
   Lincomycin as Hydrochloride Monohydrate……...500mg
   (USP Specifications)"

ii. **The applicant shall submit differential fee of Rs. 25,000/- in the light of notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 for pre-registration variation/ correction in composition/label claim in line with that approved by reference regulatory authorities.**

Case. No. 03: Request of M/s CSH Pharmaceuticals-North (Pvt) Ltd., Peshawar for Correction in Minutes of 282nd Meeting of Registration Board

Registration Board in its 282nd meeting held on 14th – 15th May, 2018 approved registration of Injectacef IV 500mg Injection in the name of M/s Astellas Pharmaceuticals (Pvt) Ltd., 15-C, Hayatabad Industrial Estate, Peshawar as per following details:

Name and address of manufacturer / Applicant	M/s ASTELLAS Pharmaceutical, Peshawar

Diary No. Date of R& I & fee	8145, 10-07-2017, 20,000/-, 07-07-2017
Pharmacological Group	3rd Generation cephalosporin antibiotic
Type of Form	Form-5
Finished product Specification	In house specification
Pack size & Demanded Price	1's;As per SRO
Approval status of product in Reference Regulatory Authorities.	Rocephin IV 500 mg Powder and Solvent for Solution for Injection by M/s Roche Products Ltd, MHRA
Me-too status	Signum 500 mg Injection I.V by M/s Cherwel Pharmaceuticals (Pvt) Ltd (Reg#079307)
GMP status	Routine GMP inspection dated 02-10-2017 overall the firm was operating under satisfactory level of cGMP.
Remarks of the Evaluator.	
Decision: Approved with USP specifications.	

M/s CSH Pharmaceuticals-North (Pvt) Ltd., 38-A Industrial Estate, Hayatabad Peshawar has requested for correction in minutes of 282nd meeting stating that the above-mentioned product was applied by them through contract manufacturing at M/s Astellas Pharmaceuticals (Pvt) Ltd., 15-C, Hayatabad Industrial Estate, Peshawar.

In this context original dossier could not be retrieved from available record, however, in this regard the firm has submitted following supporting documents:

i. Copy of DRAP endorsed receipt of registration application received on 10-07-2017 and Form-5, both stating/indicating particulars of contract manufacturing at M/s Astellas Pharmaceuticals (Pvt) Ltd. Peshawar. Furthermore, copy of fee challan (#0709067) of Rs.50000/- states M/s CSH Pharmaceuticals North (Pvt) Ltd., (DML No. 000511) as name of firm.
ii. Copy of approval letter issued to M/s CSH Pharmaceuticals-North (Pvt) Ltd., 38-A Industrial Estate, Hayatabad Peshawar for extension in contract manufacturing of **"Injectacef 250mg and 1g Injection"** at M/s Astellas Pharmaceuticals (Pvt) Ltd. Peshawar (valid till June, 2025).
iii. Copy of last inspection report of M/s Astellas Pharmaceuticals (Pvt) Ltd. Peshawar dated 06-07-2021 (indication "Good" level of compliance)
iv. Copy of approval of "Dry Powder Injection (Cephalosporin) Section" issued by Licensing Division vide letter dated 17-09-2021.
v. Contract manufacturing agreement.

Decision: Registration Board decided as under:

i. Approved correction in minutes of 282nd meeting with respect to approval of "Injectacef IV 500mg Injection" as per following detail:

Product Name & Composition	**Applicant/ Contract Giver**	**Manufacturer/ Contract Acceptor**
Injectacef IV 500mg Injection **Each vial contains:** **Ceftriaxone Sodium Eq. to Ceftriaxone…….500mg**	**M/s CSH Pharmaceuticals-North (Pvt) Ltd., 38-A Industrial Estate, Hayatabad Peshawar**	**M/s Astellas Pharmaceuticals (Pvt) Ltd., 15-C, Hayatabad Industrial Estate, Peshawar.**

ii. The applicant shall submit fee of Rs. 7500/- in the light of notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 for pre-registration variation/ change in finished product specifications from "In house Specifications" to "USP Specifications".

Case. No. 04: Request of M/s Lisko Pakistan (Pvt) Ltd., Karachi for Correction in Strength/ Label Claim of Glucomin 50mg/1000mg Tablet Approved in 285th Meeting of Registration Board

Registration Board in its 285th meeting held on 03rd-04th October, 2018 approved registration of Glucomin 50/1000mg Tablet in the name of M/s Lisko Pakistan (Pvt) Ltd. L-10-D Block-21 Shaheed Rashid Minhas Road, F.B. Industrial Area, Karachi as per following details:

Name and address of manufacturer / Applicant	M/s Lisko Pakistan (Pvt) Ltd. L-10-D Block-21 Shaheed Rashid Minhas Road, F.B. Industrial Area, Karachi
Brand Name +Dosage Form + Strength	Glucomin 50mg/**1000mg** Tablet
Composition	Each film coated tablet contains: Sitagliptin (as phosphate monohydrate) ……50mg Metformin hydrochloride……**850mg**
Diary No. Date of R& I & fee	Dy.No.13665; 28-08-2017; Rs.20,000/- (25-08-2017)
Pharmacological Group	Antihyperglycemic
Type of Form	Form-5

Finished product Specification	Manufacturer's specifications
Pack size & Demanded Price	10's, 14's, 30's ; As per SRO
Approval status of product in Reference Regulatory Authorities.	Janumet tablets of (TGA approved)
Me-too status (with strength and dosage form)	S-Gliptin Plus Tablets of M/s Barrett Hodgson
GMP status	Last GMP inspection is conducted on 24- 04- 2018 and the report concludes that overall firm has satisfactory level of GMP compliance.
Previous remarks of the Evaluator.	
Previous decision(s)	Deferred for following reasons: Registration Board deferred the case as FID has reported for not having stability chamber for conducting Real time stability studies. **(M-283)**
Evaluation by PEC	FID verified 2 stability chamber 1 for Accelerated stability studies and 1 for Real time stability studies.
Decision: Approved with innovator's specification.	

Registration letter could not be issued due to disparity in strengths mentioned in composition and alongside the brand name. In this context original dossier could not be retrieved from available record, however, the firm has submitted copies of DRAP's acknowledged receipt, form-5 & fee challan of above-mentioned product, all stating strength of **"50/1000mg"** instead of **"50/850mg".** Furthermore, the firm has submitted an undertaking that they applied for registration of only two strengths (i.e., 50/500mg & 50/1000mg) of above formulation and registration of 50/500mg tablet has already been issued (R#092900). Accordingly, the firm has requested for correction in strength/ label claim of above-mentioned product from **"50/850mg"** to **"50/1000mg".**

Decision: Registration Board decided as under:

i. **Approved correction in strength/ label claim of above-mentioned product as per following detail:**

"Glucomin 50mg/1000mg Tablet
Each film coated tablet contains:
Sitagliptin (as Phosphate Monohydrate) ……50mg
Metformin Hydrochloride……..…1000mg"

ii. **The applicant shall submit fee of Rs. 7500/- in the light of notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 for pre-registration variation/ change in finished product specifications from "Manufacturer's Specifications" to "As per Innovator's Specifications".**

Case. No. 05: Correction in Strength/ Label Claim of Aultazole 50mg/5ml Suspension Approved in 307th Meeting of Registration Board

Registration Board in its 307th meeting held on 08th – 10th June, 2021 approved registration of Aultazole 50mg/5ml Suspension in the name of M/s. Athan Pharmaceuticals Plot No 84/1, block B, Phase V, industrial Estate, Hattar as per following details:

Name and address of manufacturer / Applicant	M/s. Athan Pharmaceuticals Plot No 84/1, block B, Phase V, industrial Estate, Hattar
Brand Name +Dosage Form + Strength	Aultazole **50mg / 5ml** Suspension
Composition	Each **5ml** after reconstitution contains: Fluconazole……..**10mg**
Diary No. Date of R& I & fee	14927, 07-03-2019, 20,000/-, 07-03-2019

Pharmacological Group	Antifungal
Type of Form	Form-5
Finished product Specification	BP specifications
Pack size & Demanded Price	As per SRO
Approval status of product in Reference Regulatory Authorities.	Approved in MHRA
Me-too status	Zefung Dry Powder Suspension of Nexus Pharma
GMP status	CLB in its 269th meeting held on 26th February, 2019 has considered and approved the grant of DML (#000900) by way of formulation with following section: Oral Powder suspension (General) section
Previous remarks of the Evaluator.	Fee challan does not specify brand name, strength and dosage form of applied product. Only API is written as Fluconazole. Label claim and master formulation does not suggest Dry powder suspension. Revision of Form-5 is required.
Previous decision(s)	Deferred for revision of formulation as per reference product alongwith submission of applicable fee (M-289). Deferred for submission of remaining fee of Rs. 15,000/- for revision of formulation (M-292).
Evaluation by PEC	The firm has submitted revised Form-5 from liquid suspension to Dry powder suspension alongwith submission of fee challan of Rs. 5,000/- (deposit slip # 1914386) dated 18-07-2019. Fee challan of Rs. 15,000/- (deposit slip # 2044990) dated 25-01-2021 has been submitted.
Decision: Approved.	

Registration letter could not be issued due to disparity in strengths mentioned in composition and alongside the brand name. In this context original dossier could not be retrieved from available record, however, the firm has submitted copies of DRAP's acknowledged receipts, form-5 & fee challan of above-mentioned product, all stating strength of **"50mg/5ml"** instead of **"10mg/5ml".** Accordingly, the case has been placed for correction in strength/ label claim of above-mentioned product.

Decision: Registration Board decided as under:

i. **Approved correction in strength/ label claim of above-mentioned product as per following detail:**

"Aultazole Powder for Suspension 50mg/ 5ml
Each 5ml after reconstitution contains:
Fluconazole……..……..50mg
(BP Specifications)"

ii. **The applicant shall submit differential fee of Rs. 10,000/- in the light of notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 for pre-registration variation/ correction in dosage form from "Liquid Suspension" to "Powder for Suspension" in line with that approved by reference regulatory authorities.**

Case. No. 06: Request of M/s Sanofi-Aventis Pakistan Limited, Karachi for License Withdrawal of Largactil Injection (Reg. No.001218) & Largactil Syrup (Reg. No.000819)

I	II	III	IV	V	VI

1.	021521	Rimactal Syrup 2% Each 100ml contains: Rifampicin…….2mg (Manufacturer Specifications) Fee: Rs.7500/- Invoice # 853694867	Due to global directives the firm has divested this portfolio in Pakistan.	1. Afracin by M/s CCL Pharmaceutical 2. Rifamed by M/s Medicena Pharma 3. Rifampicin by M/s Geofman	13-02-2020 on contract basis for a period of 30months.
Documents submitted by the firm in the light of SOP approved vide 283rd meeting of Registration Board.			a. Copy of Registration Letters. b. List of alternate brands available in the country. c. Justification. d. An Undertaking that: i. No case is pending at any forum/ court of law regarding above mentioned products. ii. Provided information/ documents are true/ correct.		

Decision: **Registration Board did not accede to the request of M/s Novartis Pharma (Pakistan) Limited, 15 West Wharf Dockyard Road, Karachi for de-registration of Rimactal Syrup 2% (Reg. No. 021521). The Board further decided as under:**

i. **Renewal status of the product will be confirmed from RRR section and accordingly registration holder will be directed to continue manufacturing (after correction in label claim from 2mg/100ml to 20mg/100ml) in compliance with the Conditions of Registrations under Rule 30 of Drugs (L, R & Advertising) Rules, 1976 and also ensure regular and adequate supply of above-mentioned product to avoid its shortage in the market.**

ii. **The matter will also be deliberated with "Committee on Availability of Life Saving Drugs" and outcome will be shared with Registration Board for consideration.**

Case No.08: Request of M/s Akhai Pharmaceuticals (Pvt) Ltd., Balochistan for Manufacturing of Ketlar Injection 500mg/ml (Reg.No. 014966) to Consume the Available API

M/s Akhai Pharmaceuticals (Pvt) Ltd., A-248 & A-256 to A-259, Hub Industrial Trading Estate Lasbella Balochistan has informed that they have contract manufacturing permission (valid till 30th June, 2025) of Ketlar Injection (Reg. No.014966) by M/s. Neutro Pharma (Pvt) Ltd. 9.5 KM, Sheikhupra Road, Lahore.

The firm has further informed that the contract manufacturer i.e. M/s Neutro Pharma had imported 50kg of Ketamine HCl on their behalf and for the exclusive manufacturing of their above stated product. Primary and secondary packaging materials are also available with them. However, Ketamine has recently been classified under controlled substances. Now there is acute shortage in the market and patient is suffering due to non-availability of this essential drug. Accordingly, the firm has requested for permission to consume the available quantity of Ketamine HCl in the best interest of patient.

In this context, it is submitted that Ketamine and its salts has been declared as "Psychotropic substances" vide SRO Number 1350(I)/2021 dated 15th October, 2021. Furthermore, as the existing contract manufacturing policy, notified vide SRO 1347(I)/2021, dated 15.10.2021, Rule 20 A 2(c):

"Contract manufacturing of controlled drugs (narcotic drug or psychotropic substances or precursor chemicals) shall not be allowed;"

However, the above referred product was granted registration for contract manufacturing well before classification of Ketamine under controlled substances.

Comments Received from Controlled Drugs Division:

The Committee for Allocation of Quota of Controlled Substances allocates the quota to those firms having valid drug manufacturing license and valid drug registration as per SOP.

Comments Received from QA&LT Division:

Consumption of any API is linked primarily to valid license to manufacture a drug and secondarily to valid registration of that drug. If as a consequence of any change in some rule/regulation or policy the status of both these prerequisite (DML and MA) for any drug becomes void/invalid, the consumption of respective APIs could not be allowed for that particular drug.

Decision: Keeping in view the classification of "Ketamine and its salts" under psychotropic substances (vide SRO 1350(I)/2021 dated 15th October, 2021) and Rule 20A(2)(c) of Drugs (L, R & A), Rules, 1976, Registration Board decided as follows:

- **Decided to issue show cause notice to the firm under Section 7 (11)(d) of the Drug Act, 1976 that why the registration of their product "Ketlar Injection (Reg. No. 014966)" may not be cancelled. Management of the firm shall also be given the opportunity of personal hearing in the forthcoming meeting of the Board under section 42 of the Drugs Act, 1976.**
- **Recommended QA&LT Division to decided case for already imported material as per Drug (I&E) Rules, 1976.**

.

Case No.09. Request of M/s Martin Dow Marker Limited, Quetta for import of Controlled Drug Substances for Trial/ Development & Stability Purposes.

M/s Martin Dow Marker Limited, 7, Jail Road, Quetta has requested for import of different controlled drug substances for trial, development and stability purposes. Detail is as under:

i. Midazolam Injection 5mg/5ml:

S. No.	Controlled Drug Substance	Quantity required for trial development and stability batches	Source
1.	Midazolam Injection 5ml (5mg/5ml)	21.05g	Fabbrica Italiana Sintetici S.p.a, Italy
Total			
2.	Midazolam Reference Standard	300mg	

The firm has submitted break up of quantities required for trial, development & stability batches i.e., as under:

S/N	Product	API	mg/ mL	No. of Bottles/batch	No. of batches	Quantity of API required		
1.	**Midazolam Injection 5ml**	Midazolam	5mg/ 5ml	Development Batch: (800 Ampoules) Stability Batch:01 (800 Ampoules) Stability Batch :02 (800 Ampoules) Stability Batch:03 (800 Ampoules)	Trial + Stability	For Formulation Development	For QC testing & Retention	Total

18th Month	Real Time	20 ml	N/A
24th Month	Real Time	100 ml	12th month testing include bioburden test as well
Total Sample Required for Stability Testing		**420 ml / batch = 42 Bottles/ batch**	

In support of their request, the firm has also submitted following information/ documents:

1. Fee of Rs.7500/each (S#01113943330, 1275025823 and 1054657968)
2. The firm has submitted approval letter of layout plan for New /Additional Section of Liquid Oral Drops (Psychotropic) and Liquid Injection Ampoule (Psychotropic) under DML No.000028 (Formulation) (Reference Letter F.No.4-2/86-Lic (Vol-III)-Pt dated 23-05-2022.
3. The firm has further informed that till establishment of requisite manufacturing facility, they will manufacture the trial and stability batch of drug product in NPD, which is approved facility from DRAP. Consequent to successive establishment of Liquid Oral Drops (Psychotropic) facility and grant of section by DRAP, they will be able to apply for product registration on the basis of completion of stability studies on CTD together with section approval letter. Afterwards, based on registration they will be capable to generate the commercial drug product at designated area.
4. Undertaking that the firm will comply the time plan for the construction of requisite sections for which layout plan has been approved vide Licensing Division's letter No.F.4-2/86-Lic (Vol-VII)-Pt issued on dated 23-05-2022.

5. The firm has further informed that the above-mentioned quantities of APIs have been requested keeping in view the minimum capacity of the equipment (e.g., 4L is the minimum capacity in case of liquid injectables) and to successfully accomplish whole formulation development, analysis & stability studies parameters.

Decision: Registration Board decided as under:

i. **Recommended the allocation of controlled drug substance(s) i.e., Midazolam, Diazepam and Clonazepam along-with their reference standard(s) and related compound(s) for trial, development & stability batches of above-mentioned products.**
ii. **The firm shall be advised to maintain records of used substances and waste materials having above APIs and same shall be destroyed after approval of Controlled Drugs Division, DRAP.**
iii. **Marketing Authorization / registration to M/s Martin Dow Marker Limited, 7, Jail Road, Quetta shall be granted as per applicable policy regarding Psychotropic / Narcotic sections.**
iv. **Authorized Chairman Registration Board for disposal of all types of cases where approval/ recommendation of Registration Board is required for procurement of controlled drug substances/ innovator's drug product pack/ reference and impurity standards etc. for trial/ development & stability purposes.**

Case No.10. Request for Change in Registration Status of Products from M/s Novartis Pharma (Pakistan) Limited, Karachi (DML No.000193) to M/s. AGP Limited, D-109, S.I.T.E, Karachi (DML No. 000044) by way of Contract Manufacturing at M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML No. 000348)

M/s. AGP Limited, D-109, S.I.T.E, Karachi (DML No. 000044) has requested for change in registration status of below mentioned products from M/s Novartis Pharma (Pakistan) Limited, 15-West Wharf, Dockyard Road, Karachi (DML No.000193) to their name by way of contract manufacturing at M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML#000348). **The products were registered dated 13-02-2022 by way of contract manufacturing at M/s GSK Consumer Healthcare Pakistan Ltd., Petaro Road Jamshoro (DML No.000010) for a period of 30months.**

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of registration letter and last renewal status.
ii. Copy of DML of M/s AGP Limited, D-109, S.I.T.E, Karachi (Applicant) renewed w.e.f. 15-07-2019
iii. Copy of DML of M/s AGP Limited, B-23-C, S.I.T.E, Karachi (Manufacturer) renewed w.e.f. 06-02-2020
iv. Copy of approved sections by Central Licensing Board of M/s AGP Limited, D-109, S.I.T.E, Karachi showing 3 sections (Tablet Cephalosporin, Capsule Cephalosporin, Dry Syrup Cephalosporin)
v. Copy of approved sections by Central Licensing Board of M/s AGP Limited, B-23-C, S.I.T.E, Karachi, confirming "Tablet (general)" section (Reference letter dated 30-06-2020)
vi. Copy of GMP certificate M/s AGP Limited, D-109, S.I.T.E, Karachi on the basis of inspection conducted on 03-06-2021. (Validity 02 years)
vii. Copy of last GMP Inspection report dated 06-07-2022 concluding good level of GMP compliance by M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML#000348)

viii.	NOC from Novartis Pharma (Pakistan) Limited, Karachi in the name of M/s AGP Limited, D-109, S.I.T.E, Karachi issued on 23-06-2022
ix.	Contract Agreement between M/s AGP Limited, D-109, S.I.T.E and M/s AGP Limited, B-23-C, S.I.T.E dated 02-05-2022.
x.	Application with Form-5F and required fee as per relevant SRO.
xi.	Relevant undertakings & commitments.

The cases were referred to QMS for scrutinization/evaluation. Detail of submitted documents remarks of evaluators have been mentioned as under:

Evaluator: Mst. Urooj Fatima (AD-QMS)

	Proposed Pack size	1 x 10's
	Proposed unit price	As per DRAP approved price
	The status in reference regulatory authorities	Cipro 250mg Tablet, Bayer Healthcare Pharmaceuticals Inc (FDA)
	For generic drugs (me-too status)	Novidat 250mg Tablet, Sami Pharmaceuticals (Pvt) Ltd. (Reg#011836)
	Name and address of API manufacturer.	Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China.
	1.5.11-Proposed Label	**Not Submitted**
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Ciprofloxacin Hydrochloride, related structure, solubilities, and other general properties, manufacturing site, character elucidation, impurities characterizations, specifications based on USP, analytical procedures and its validation, batch analysis, refence standard, container closure and stability studies summaries of Ciprofloxacin Hydrochloride. Similarly, information summaries for drug product (Axcin) including its description, composition, pharmaceutical development, pharmaceutical equivalence against Ciproxin, Bayer Pakistan, comparative dissolution profile, justification for selection of manufacturing process and in-process controls, analytical procedure and its verification, batch analysis and specification, reference standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism, structure elucidation, impurities, specifications, analytical method, its validation, analytical method verification performed by DP manufacturer, certificate of analysis, impurities,

		specifications based on USP, analytical procedures, batch analysis, reference standard and its CoA, container closure system, specification and test methods for packing materials, and stability studies with study protocol.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 60 months.** DS was packed in a double layered LDPE bag and packaged again in cardboard drums. The DS remained within specified limits as tested on defined intervals.
	Module-III Drug Product:	Firm has submitted data of drug product including its composition, manufacturing process and process control, manufacturing process validation protocol, excipients testing methods, pharmaceutical equivalence, specifications, analytical procedures and its verification, dissolution method verification, batch analysis, justification of specifications, USP procedure for organic impurities, reference standard or materials, container closure system and stability. The Specifications and control tests comply to USP.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was performed against Ciproxin 250mg Tablet of M/s Bayer Pakistan Ltd. which shows comparable results within specified limits. The comparative dissolution profile was performed for Axcin 250mg Tablet against the Ciproxin 250mg, manufactured by Bayer Pakistan. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 45mins. Calculation of value is as under:

Sr	Mediums	Time interval	Axcin Tab	Ciproxin Tab
i.	Acidic buffer (pH 1.2)	10 min	87.1%	81.2%
		15 min	94%	90%
		30 min	97.4%	99.2%
		45 min	98.5%	101.7%
ii	Acetate buffer (pH 4.5)	10 min	81.4%	88.2%
		15 min	93.3%	99.5%
		30 min	97.2%	101%
		45 min	98.4%	100.8%
iii	Phosphate Buffer (pH 6.8)	10 min	38.8%	40.6%
		15 min	42.3%	44.4%
		30 min	43.4%	45.9%
		45 min	44.1%	45.4%

		f1 and f2 value has not been calculated for pH 1.2 and 4.5 because both reference and test sample achieved 85% dissolution within 15 minutes. For pH 6.8 F2 has been calculated which is 82.6. On the basis of similarity factor results (not less than 50) both reference and test products are found similar.
	Analytical method validation/verification of product	Firm has claimed USP specifications for which report of verification of analytical method for the drug product has been provided**. Analytical methods verification was performed in February, 2022.** Dissolution method verification protocol and study report were also provided.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Quvasc Tablet 10mg, 5mg and 2.5mg of M/s AGP, B-23, S.I.T.E. Karachi Approved in 317th meeting of RB held on 16th & 17th May, 2022
2.	Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (Certificate No. ZJ20190157) issued by National Medical Products Administration China, dated 30-11-2019. (Valid up to 29-11-2024).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API purchased from M/s Sunmore Healthcare Co. Ltd, Hunan, China (manufactured by

		Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China verified through COA and GMP certificate of manufacturer). invoice dated 02-08-2021, cleared 16-08-2021 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The drug substance for Axcin 250mg Tablet (Ciprofloxacin HCl) is manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China. (GMP certified by National Medical Products Administration China, on USP specifications. The impurity profiling of DS is also carried out particularly for "Ciprofloxacin diethylamine". Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification is as per USP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to USP specifications.

The drug product is film coated tablet of 250mg manufactured by M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) (Formulation) (White to off-white coloured, round film coated biconvex shaped, with beveled edges). The method of manufacturing is granulation, direct compression and film coating with adequate process controls at critical points. Submitted regulatory specifications are as per USP monograph and submitted stability data shows no degradation product at specified time points.

Analytical methods verification was performed in February, 2022, whereas product is manufactured and tested in November, 2021. However, testing was performed as per USP specifications.

M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) is a GMP complaint unit as per certificate issued by DRAP, Karachi office based on inspection conducted on 03-06-2021. (Validity 02 years).

Axcin 250mg Tablets' pharmaceutical equivalence has been established against the Ciproxin 250mg Tablet of M/s Bayer Pakistan Ltd. which shows comparable results within specified limits. Comparative dissolution profile was conducted against the Ciproxin 250mg Tablet of M/s Bayer Pakistan Ltd. The clinical particulars and pharmacological properties of the Ciprofloxacin, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for Skin and Skin Structure Infections, Bone and Joint Infections, Complicated Intra-Abdominal Infections, Infectious Diarrhea, Typhoid Fever (Enteric Fever), Uncomplicated Cervical and Urethral Gonorrhea, Inhalational Anthrax post-exposure in adult and pediatric patients, Lower Respiratory Tract Infections, Urinary Tract Infections, Acute Sinusitis.

Conclusion:

The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.

The firm shall also ensure black boxed information on "Serious Adverse Reactions Including Tendinitis, Tendon Rupture, Peripheral Neuropathy, Central Nervous System Effects and Exacerbation of Myasthenia Gravis" in the beginning of the leaflet.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Ciprofloxacin Hydrochloride, related structure, solubilities, and other general properties, manufacturing site, character elucidation, impurities characterizations, specifications based on USP, analytical procedures and its validation, batch analysis, refence standard, container closure and stability studies summaries of Ciprofloxacin Hydrochloride. Similarly, information summaries for drug product (Axcin) including its description, composition, pharmaceutical development, pharmaceutical equivalence against Ciproxin, Bayer Pakistan, comparative dissolution profile, justification for selection of manufacturing process and in-process controls, analytical procedure and its verification, batch analysis and specification, reference standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism, structure elucidation, impurities, specifications, analytical method, its validation, analytical method verification performed by DP manufacturer, certificate of analysis, impurities, specifications based on USP, analytical procedures, batch analysis, reference standard and its CoA, container closure system, specification and test methods for packing materials, and stability studies with study protocol.
	Stability Studies of Drug Substance	Firm has submitted stability study data of 3 batches

	(Conditions & duration of Stability studies)	of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 60 months.** DS was packed in a double layered LDPE bag and packaged again in cardboard drums. The DS remained within specified limits as tested on defined intervals.
	Module-III Drug Product:	Firm has submitted data of drug product including its composition, manufacturing process and process control, manufacturing process validation protocol, excipients testing methods, pharmaceutical equivalence, specifications, analytical procedures and its verification, dissolution method verification, batch analysis, justification of specifications, USP procedure for organic impurities, reference standard or materials, container closure system and stability. The Specifications and control tests comply to USP.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was performed against Ciproxin 500mg Tablet of M/s Bayer Pakistan Ltd. which shows comparable results within specified limits. The comparative dissolution profile was performed for Axcin 500mg Tablet against the Ciproxin 500mg, manufactured by Bayer Pakistan. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 45mins. Calculation of value is as under:

Sr	Mediums	Time interval	Axcin Tab	Ciproxin Tab
i.	Acidic buffer (pH 1.2)	10 min	59.6%	66.8%
		15 min	92%	91%
		30 min	93.1%	96.3%
		45 min	94.8%	98%
ii	Acetate buffer (pH 4.5)	10 min	85.1%	78.5%
		15 min	96.6%	93%
		30 min	96.9%	98.2%
		45 min	97.5%	99.6%
iii	Phosphate Buffer (pH 6.8)	10 min	2.9%	10.2%
		15 min	3.1%	11.9%
		30 min	3.2%	11.9%
		45 min	4%	11.8%

f1 and f2 value has not been calculated for pH 1.2 and 4.5 because both reference and test sample achieved 85% dissolution within 15 minutes. For pH 6.8 F2 has been calculated which is 54.2. On the basis of similarity factor results (not less than 50)

		both reference and test products are found similar.
	Analytical method validation/verification of product	Firm has claimed USP specifications for which report of verification of analytical method for the drug product has been provided**. Analytical methods verification was performed in February, 2022.** Dissolution method verification protocol and study report were also provided.

Remarks of Evaluator:

The drug substance for Axcin 500mg Tablet (Ciprofloxacin HCl) is manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China. (GMP certified by National Medical Products Administration China, on USP specifications. The impurity profiling of DS is also carried out particularly for "Ciprofloxacin diethylamine". Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification is as per USP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to USP specifications.

The drug product is film coated tablet of 500mg manufactured by M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) (Formulation) (White to off-white coloured, round film coated biconvex shaped, with beveled edges). The method of manufacturing is granulation, direct compression and film coating with adequate process controls at critical points. Submitted regulatory specifications are as per USP monograph and submitted stability data shows no degradation product at specified time points.

Analytical methods verification was performed in February, 2022, whereas product is manufactured and tested in November, 2021. However, testing was performed as per USP specifications.

M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) is a GMP complaint unit as per certificate issued by DRAP, Karachi office based on inspection conducted on 03-06-2021. (Validity 02 years).

Axcin 500mg Tablets' pharmaceutical equivalence has been established against the Ciproxin 250mg Tablet of M/s Bayer Pakistan Ltd. which shows comparable results within specified limits. Comparative dissolution profile was conducted against the Ciproxin 500mg Tablet of M/s Bayer Pakistan Ltd. The clinical particulars and pharmacological properties of the Ciprofloxacin, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for Skin and Skin Structure Infections, Bone and Joint Infections, Complicated Intra-Abdominal Infections, Infectious Diarrhea, Typhoid Fever (Enteric Fever), Uncomplicated Cervical and Urethral Gonorrhea, Inhalational Anthrax post-exposure in adult and pediatric patients, Lower Respiratory Tract Infections, Urinary Tract Infections, Acute Sinusitis.

Conclusion:
The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.
The firm shall also ensure black boxed information on "Serious Adverse Reactions Including Tendinitis, Tendon Rupture, Peripheral Neuropathy, Central Nervous System Effects and Exacerbation of Myasthenia Gravis" in the beginning of the leaflet.

Decision: Registration Board decided as under:

i. **Cancelled registration of following products from the name of M/s Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No. 000193).**

S. No.	Reg. No.	Product Name & Composition
1.	018615	Axcin 250mg Tablets Each tablet contains: - Ciprofloxacin HCl eq. to Ciprofloxacin……250mg (USP Specifications)
2.	018616	Axcin 500mg Tablets Each tablet contains: - Ciprofloxacin HCl eq. to Ciprofloxacin……500mg (USP Specifications)

ii. **Approved registration of following products in the name of M/s AGP Limited, D-109, S.I.T.E, Karachi (DML#000044) by way of contract manufacturing at M/s AGP Limited B-23-C, S.I.T.E. Karachi (DML No. 000348).**
   a) **Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
   b) **Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.**

S. No.	Product Name & Composition
1.	Axcin 250mg Tablets Each film coated tablet contains: Ciprofloxacin Hydrochloride Monohydrate USP Eq. to Ciprofloxacin……..…250mg (USP Specifications)
2.	Axcin 500mg Tablets Each film coated tablet contains: Ciprofloxacin Hydrochloride Monohydrate USP Eq. to Ciprofloxacin……..…500mg (USP Specifications)

iii. **Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.**

iv. **Legal opinion will be sought from Legal Affairs Division, DRAP whether cases regarding cancellation of registration from one registration holder and issuance of the same in favor of other registration holder on contract manufacturing basis require fee Rs.75000/- or Rs.75000/-+30000/- and registration letter will be issued accordingly.**

Case No. 11: Approved Products of M/s Mediate Pharmaceutical (Pvt) Ltd. Karachi

Registration Board in its 235th meeting (held on 18-09-2012) approved the following products of M/s Mediate Pharmaceutical (Pvt) Ltd. Plot No. 150-151 Sector 24 Korangi Industrial Area Karachi as per details mentioned vide column II & III of below table. The firm has now requested for issuance of registration & submitted requisite fee along-with required documents/ information as per detail recorded vide Column IV of below table:

S/ N	Product Name & Composition	Decision of RB-235	Current Status/ Documents Submitted by the Firm	RRA & Generic Status/ Remarks
I	II	III	IV	V
1.	Madifenac Plus Tablet Each tablet contains:- Diclofenac Sodium .50mg Misoprostol ……200mcg (Anti rheumatics) <u>Demanded MRP/Pack:</u> Rs.200/20's	Approved subject product inspection for bi-layer tablet facility	• Dy.No.11520/R&I dated 12-05-2022 • Differential registration fee of Rs.22000/-(DS#78867109 dated 09-05-2022) • Pre-registration variation fee of Rs.30000/- (DS#6026849524 dated 09-05-2022) for correction in composition as per RRA. Correct composition is: *Each film coated delayed release tablet contains:* *Diclofenac Sodium (Gastro-Resistant Core).....50mg* *Misoprostol (Immediate Release Outer Mantle).....200mcg* • Correct form-5, Master formulation & manufacturing method. • FPP Specifications; USP. • IQ, OQ & PQ report along-with invoice of ZP-420-28D Double Rotary Compression Machine. • Last Inspection Report 17-12-2021.(Acceptable Level of Compliance) • Renewal of DML issued vide Licensing Division's letter dated 15-09-2021 stating approval of "Tablet (General) Section"	• USFDA Approved (with boxed warning) • Osteotec Tablet by M/s CCL, Lahore.
2.	Madifenac Forte Tablet Each tablet contains:-	Approved subject product inspection for bi-	• Dy.No.11522/R&I dated 12-05-2022 • Differential registration fee of Rs.22000/-(DS#6026414777 dated 09-05-2022)	• USFDA Approved

	Diclofenac Sodium……..…75 mg Misoprostol ….200mcg (Anti rheumatics) <u>Demanded MRP/Pack:</u> Rs.300/20's	layer tablet facility	• Pre-registration variation fee of Rs.30000/- (DS#978201833802 dated 09-05-2022) for correction in composition as per RRA. Correct composition is: *Each film coated delayed release tablet contains:* *Diclofenac Sodium (Gastro-Resistant Core).....75mg* *Misoprostol (Immediate Release Outer Mantle).....200mcg* • Correct form-5, Master formulation & manufacturing method. • FPP Specifications; USP. • IQ, OQ & PQ report along-with invoice of ZP-420-28D Double Rotary Compression Machine. • Last Inspection Report 17-12-2021.(Acceptable Level of Compliance) • Renewal of DML issued vide Licensing Division's letter dated 15-09-2021 stating approval of "Tablet (General) Section"	(with boxed warning) • Osteotec Tablet by M/s CCL, Lahore.

Decision: Registration Board approved registration of products at S. No. 1-2 of above table in the name of M/s Mediate Pharmaceutical (Pvt) Ltd. Plot No. 150-151, Sector 24, Korangi Industrial Area, Karachi.

Case No.12. Request for Change in Registration Status of Kapdex Capsules from M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan Pvt Ltd.) C-14, S.I.T.E, Karachi (DML No. 000012) to M/s Aspin Pharma Pvt Ltd., Korangi Industrial Area Karachi (DML No. 000045), through contract manufacturing.

M/s. Aspin Pharma (Pvt.) Ltd., Plot No.10 & 25 Sector 20, Korangi (DML No.000045) Industrial Area Karachi has requested to change the product registration status of Kapdex 60mg and 30mg Capsules from M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan Pvt Ltd.) C-14, S.I.T.E, Karachi (DML No.000012) to their name. However, the product will continue to be manufactured at the manufacturing site of M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan Pvt Ltd.) C-14, S.I.T.E, Karachi through contract manufacturing.

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of GMP certificate of M/s Searle Pakistan Ltd (Formerly OBS Pakistan Ltd.) on the basis of inspection conducted on 08-10-2021.
ii. Copy of DML of M/s OBS Pakistan Pvt Ltd., (DML # 000012) renewed w.e.f. 26-10-2020 and M/s Aspin Pharma Pvt Ltd, (DML# 000045) renewed w.e.f 31-03-2020..

iii. Copy of panel inspection report of M/s Searle Pakistan for GMP Certification dated 08-10-2021 confirming "Capsule (General) Section on the GMP Certification" Copy of DRAP's letter dated 16th June, 2021 for renewal of DML of M/s Aspin Pharma Pvt Ltd, mentioning Capsule General among sections
iv. NOC from M/s. The Searle Company Ltd; Karachi for transfer of Kapdex 60mg and 30mg Capsules in the name of M/s. Aspin Pharma Pvt Pharma Pvt Ltd., Korangi Industrial Area, Karachi issued on 31-10-2022
v. Relevant undertakings & commitments.
vi. Contract Agreement between M/s Aspin Pharma Pvt Ltd, and M/s OBS Pharma.

The cases were referred to Pharmaceutical Evaluation Cell / QMS for scrutinization/evaluation. Detail of submitted documents remarks of evaluators have been mentioned as under:

Evaluator: Mr. Asadullah (AD-QMS)

	Status of the applicant		☐Manufacturer ☐Importer ☒Is involved in none of the above (contract giver)
	GMP status of the firm		**For transfer of registration:** GMP certificate of M/s Searle Pakistan Ltd (Formerly OBS Pakistan (Pvt Ltd, C-14, Manghopir Road, S.I.T.E , Karachi- 75700, issued on 15-02-2022 based on inspection conducted on 08.10.2021.

	Evidence of approval of manufacturing facility	Applicant has provided copies of letter dated 13th April, 2018 and GMP certificate of dated 31st Jan, 2020 showing Capsule (General) among Formulation sections.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 21096: 26-06-2022
	Details of fee submitted	**For transfer of registration and contract manufacturing** PKR 150,000/-, DS 158578340 dated 18-02-22 PKR.75,000/-:DS 33846087281 dated 01-11-22
	The proposed proprietary name / brand name	**Kapdex 60 mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: 270mg Dexlansoprazole Dual Release Pellets 22.5% w/w, equivalent to 60mg of Dexlansoprazole
	Pharmaceutical form of applied drug	HPMC capsule size # 1, green opaque cap and white opaque body containing white to off white enteric coated pellets.
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	3 x 10's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Dexilant 60mg Capsule, Takeda Pharmaceuticals America,
	For generic drugs (me-too status)	Razodex 60mg Capsule(Dexlansoprazole, Getz Pharma (Pvt.) Ltd, Karachi (Reg# 086977)
	Name and address of API manufacturer.	M/s Alphamed Formulations Pvt Ltd, Sy.No. 225, sampanbole village, shamirpet Mandal, Medchal Malkajgiri, District Talengana, India
	1.5.11-Proposed Label	Submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Pellets of Dexlansoprazole were formulated at manufacturing site of M/s Alphamed, India, who has provided information summaries related to structure, properties, solubility, ingredients,

		manufacturing process and in-process controls. Dexlansoprazole pellets were formulated by two types of enteric coating of granules with different polymers intended to exhibit dual release in small intestines. The excipients used in pellets manufacturing were in- compliance to compendial and accordingly analytical methods used to test were pharmacopial. Four critical steps of manufacturing were controlled using four types of in-process test. Manufacturer's In-house analytical method was developed and validated for analysis including identification, assay, dissolution, sugar test, related substances, water contents, and size of Dexlansoprazole pellets. Working standard characterized against USP reference standard was used by M/s Alphamed. A Stability of pellets was conducted for long term and real time duration at zone iv (a) conditions. Applicant M/s OBS Pharma provided summaries of information related to description of finished dosage (Capsules), composition of each capsule, critical steps for encapsulation process, batch formula, in-house developed specifications, analytical procedure and its validation, CoA of raw DS, batch analysis, working standard, container closure system and stability studies of drug product. Information summaries for analytical method procedures and validation were provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubility, physical form, DS and raw material specifications, manufacturers, quantitative composition of dexlansoprazole pellets, manufacturing process, excipients specifications, CoAs and Standard testing procedures. Dexlansoprazole identification and character elucidations was provided M/s Nifty Labs, Pvt Ltd. Analytical methods was developed by M/s Alphamed, India and its validation studies was performed and accordingly an in-house specification was developed. Analytical methods and CoA of excipients were provided. Impurity profiling was established for process impurities, and residual solvents. Certificate of analysis of working standard Lansoprazole was provided. Container closure system of pellets comprises on LPDE bags, triple layered

		aluminium bags in HDPE Drums, and Packaging material specifications were provided. Three batches were subjected to stability studies and based on the data 36month shelf life is proposed for pellets.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches (60 kg each, Mfg Date: 12-2015 & May-2016) of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^oC \pm 2^oC$ / 75% ± 5% RH for 6 months and the real time stability data is conducted at $30^oC \pm 2^oC$ / 65% ± 5% RH for 36 months. The spherical dexlansoprazole Pellets were placed in a single layered aluminium bag and single layered LDPE bag in a HDPE Container. Pellets exhibit stability upto entire period of stability.
	Module-III Drug Product:	Firm has submitted data of drug product including its composition, formulation, encapsulation method, manufacturing procedure, critical parameters of manufacturing process, pharmaceutical development, manufacture, manufacturing process, process control and , control of excipients, specifications, analytical procedures and its validation, batch analysis, justification of specifications, analytical procedure for impurities as per DS method, working standard, container closure system and stability. Analytical method was developed based on the method defined by Alphamed, India and accordingly product specifications has been defined.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The comparative dissolution profile was performed against the Dexilent 60mg Capsule, manufactured by Takeda Pharmaceuticals, America. Comparison was performed in three dissolution medium at pH 1.2, pH 5.5 and pH 7.0 using 12 samples at 10, 20,30, 40, 50, 60 and 120 minutes. Calculation of value was f1 and f2 were in compliance.
	Analytical method validation/verification of product	Firm has provided validation of analytical method protocol and report for both pellets and finished drug product. Firm has also provided validation of dissolution method. The product specification reflects dissolution profiling at both acidic stage, and four steps dissolution at pH 7.0 to monitor dual release pattern.

iv. Before issuance of registration letter, the applicant shall submit valid and legalized GMP certificate of M/s Alphamed Formulations Pvt. Ltd., Sy.No. 225, Sampanbole Village, Shamirpet Mandal, Medchal Malkajgiri, District Talengana, India.

Case No.13. Request for Change in Registration Status of Products from M/s The Searle Company Limited Karachi (DML No.000016) to M/s Searle Pakistan Limited (Formerly OBS Pakistan Private Limited Karachi) (DML No.000012).

M/s. Searle Pakistan Limited (Formerly OBS Pakistan Pvt Ltd.), C-14, Manghopir Road, S.I.T.E, Karachi (DML No.000012) has requested for change in registration of below mentioned products from M/s The Searle Company Ltd., F-319, S.I.T.E Karachi (DML No.000016) to their name.

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of GMP certificate on the basis of inspection conducted on 08-10-2021.
ii. Copy of DML (000012) of M/s OBS renewed w.e.f. 31-03-2020.
iii. Copy of renewal of DML issued by Licensing Division vide letter dated 26-10-2020 stating approval of "Tablet (General) Section" among others.
iv. NOC from M/s. The Searle Company Ltd; Karachi for transfer of Olesta 40mg and 20mg Tablet in the name of M/s. Searle Pakistan Limited (Formerly OBS Pakistan Pvt Ltd.), C-14, Manghopir Road, S.I.T.E, Karachi issued on 04-11-2022
v. Relevant undertakings & commitments.

The cases were referred to Pharmaceutical Evaluation Cell / QMS for scrutinization/evaluation. Detail of submitted documents remarks of evaluators have been mentioned as under:

Evaluator: Mr. Asadullah (AD-QMS)

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Olmesartan medoxomil (DS) physical properties, solubilities, polymorphism, other general properties, manufacturing site, Characterization elucidation using FTIR, impurities profiling of organic / in-process known impurities as per USP monograph and analysis of 03 batches data (NMT 0.10% and total impurities NMT 1.30%), other impurities like heavy metals and residual solvents were also controlled in DS specifications. USP based DS specifications were followed by DP manufacturer. Analytical procedures for DS were verified against USP methods by DP manufacturer. DS lot procured is analyzed. Working standards, container closure and stability studies summaries of 03 batches of Olmesartan medoxomil was provided under Zone IV-b. Similarly, information summaries for drug product (Olesta) including its description, composition, choice of excipients, pharmaceutical development, pharmaceutical equivalence against Benicar, Daiichi Turkey, comparative dissolution profile, justification for selection of manufacturing process and in-process controls, DP specification based on USP, excipients control, analytical procedure and its verification, batch analysis, reference/working standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process,

<table>
<tr><td></td><td></td><td>polymorphism (no isomerism), structure elucidation using UV, FTIR, NMR, etc. Impurities , heavy metals and residual solvents were also identified and analysed in 03 DS batches, specifications, analytical method, its validation, analytical method verification performed by DP manufacturer, certificate of analysis of DS lot, impurities, specifications based on USP, analytical procedures, batch analysis, reference standard and its CoA container closure system, specification and test methods for packing materials, and stability studies with study protocol.</td></tr>
<tr><td></td><td>Stability Studies of Drug Substance (Conditions & duration of Stability studies)</td><td>Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 36 months. DS was packed in a double polyethylene bag (inner clear and outer black opaque) and placed in a fibre board / HDPE Drum. The DS remained within specified limits as tested on defined intervals.</td></tr>
<tr><td></td><td>Module-III Drug Product:</td><td>Firm has submitted data of drug product including its composition, manufacturing process and process control, manufacturing process validation protocol, excipients testing methods, pharmaceutical equivalence, specifications, analytical procedures and its verification, dissolution method verification, batch analysis, justification of specifications, USP procedure for organic impurities, reference standard or materials, container closure system and stability. The Specifications and control tests comply to USP.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>Pharmaceutical equivalence was performed against Olmetec 40mg Tablet which shows comparable results within specified limits.
The comparative dissolution profile was performed for Olesta 40mg Tablet against the Olmetec 40mg, manufactured by Daiichi sankyo, Turkey. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 20min. Calculation of value is as under:
<table>

Remarks OF Evaluator:

The drug substance for Olesta 40mg and 20 mg Tablets is Olmesartan medoxomil USP, manufactured by Glenmark Life Sciences, Pune, India, (GMP certified by Food and Drug Administration (Maharashtra State) Pune, India). DS has no polymorphic form. The impurity profiling DS was carried as per USP monograph. Manufacturing controls, structural characterization, analytical methods and stability studies has been submitted. Specification is considered adequate with respect to USP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to provided specifications.

The drug product is film coated tablet of Olmesartan Medoxomil manufactured by Searle Pakistan Ltd (Formerly OBS Pakistan (Pvt.) Ltd. Karachi DML 000012 (Formulation). The inactive constituents / excipient used in formulation conform to the requirement of pharmacopeia test specification, except the coating material which conform to in-house specification. The method of manufacturing is granulation, direct compression and film coating with adequate in process controls. Analytical and dissolution methods were verified as per USP monograph and final drug product is packed in an Alu PVC blisters as container closure system. Submitted regulatory specifications are as per USP monograph and submitted stability data shows no degradation product at specified time points.

M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan (Pvt.) Ltd.) is a GMP complaint unit as per certificate issued by DRAP, Karachi office based on the inspection conducted on 15-02-2022.

The pharmaceutical equivalence of Olesta tablets has been established against the corresponding strength of Olmetec Tablets approved by the MHRA. The comparative dissolution profile was also studied for both strengths of Olesta against Olmetec tablets. The clinical particulars and pharmacological properties of the Olmesartan medoxomil, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for treatment of essential hypertension in adults.
The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference drug product as approved by reference regulatory authority and this information shall be updated regularly when any new information becomes available for reference drug product in accordance with the post registration variation procedures.
The firm shall also ensure inclusion of warning about the risk of an intestinal condition known as sprue-like enteropathy to the drug's label, in light with the FDA safety communication on Olmesartan medoxomil.

M/s. Searle Pakistan Limited (Formerly OBS Pakistan Pvt Ltd.), C-14, Manghopir Road, S.I.T.E, Karachi (DML No.000012) has requested for change in registration of below mentioned products from M/s The Searle Company Ltd., F-319, S.I.T.E Karachi (DML No.000016) to their name.

Decision: Registration Board decided as under:

i. Cancelled registration of following products from the name of M/s The Searle Company Ltd., F-319, S.I.T.E Karachi (DML No.000016).

S. No.	Reg. No.	Product Name & Composition
1.	050737	**Olesta 40mg Tablets** **Each tablet contains: -** **Olmesartan Medoxomil……..…40mg** **(Manufacturer's Specification)**
2.	050736	**Olesta 20mg Tablets** **Each tablet contains: -** **Olmesartan Medoxomil……..…20mg**

		(Manufacturer's Specification)

ii. Approved registration of following products in the name of M/s Searle Pakistan Limited (Formerly M/s OBS Pakistan Pvt. Ltd.) C-14, S.I.T.E, Karachi (DML No.000012).

a) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

S. No.	Product Name & Composition
i.	**Olesta 40mg Tablets** **Each film coated tablet contains: -** **Olmesartan Medoxomil……..…40mg** **(USP Specifications)**
ii.	**Olesta 20mg Tablets** **Each film coated tablet contains: -** **Olmesartan Medoxomil……..…20mg** **(USP Specifications)**

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.

Case No.14. Request for Change in Registration Status of Caflam 50mg Tablets from M/s Novartis Pharma Pakistan Limited, 15 West Wharf, Karachi (DML # 000193) to M/s Novartis Pharma Pakistan Limited (Formerly Bayer Pakistan Pvt. Ltd.,), S.I.T.E, Karachi (DML # 000003).

M/s. Novartis Pharma Pakistan Limited has requested to change the registration status of Caflam 50mg Tablet from M/s Novartis Pharma Pakistan Limited, 15- West Wharf, Dockyard Road, Karachi (DML#000193) to M/s Novartis Pharma Pakistan Limited, C-21, S.I.T.E, Area, Karachi (DML#000003). They have also requested for change in the manufacturing site from M/s GSK CHC, Jamshoro (i.e., contact manufacturer) to the M/s Novartis Pharma Pakistan Limited, C-21, S.I.T.E, Area, Karachi (i.e., self-manufacturing).

The detail of case is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of GMP certificate on the basis of inspection conducted on 08-09-2021.
ii. Copy of DML of M/s Novartis Pharma Pakistan Limited (DML # 000003) renewed w.e.f. 18-09-2020.
iii. Copy of Tablet (General) section approval letter dated 28-12-2021 issued by Licensing Division in the name of M/s Novartis Pharma Pakistan Ltd, C-21, S.I.T.E Area Karachi (DML # 000003)

iv. NOC from M/s. Novartis Pharma Pakistan Limited, 15- West Wharf, Dockyard Road, Karachi for transfer of Caflam 50mg Tablet on the name of M/s. Novartis Pharma Pakistan Limited (Formerly M/s Bayer Pakistan (Pvt.) Ltd,), C-21, S.I.T.E, Area, Karachi, issued on 09-09-2022
v. Relevant undertakings & commitments.

The cases were referred to Pharmaceutical Evaluation Cell / QMS for evaluation. Detail of submitted documents and remarks of evaluators have been mentioned as under:

Evaluator: Mr. Asadullah (AD-QMS)

	1.5.11-Proposed Label	Same as already registered
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Diclofenac Potassium (DS) for its physical properties, solubility, polymorphism facts and other general properties. The DS manufacturer Amoli organic is GMP certified and is responsible for all steps of manufacturing, packing and testing. Manufacturing process and process controls were briefly stated. Characterization elucidation studies was conducted using UV an NMR techniques. Degradation and process related impurities was listed and analyzed as per BP monograph and analysis of batch used in stability batches showed conformance defined specifications. DS manufacturers followed BP specification and accordingly analytical methods were verified. DS lot procured was analyzed by DP manufacturer. Working standards, container closure and stability studies summaries of 03 batches of Diclofenac Potassium were provided under Zone IV-b. Similarly, information summaries for drug product (caflam 50mg tab) related to its description, composition, choice of excipients, formulation

		development, manufacturing process, pharmaceutical equivalence and comparative dissolution profile against Caflam manufactured by GSK was provided. Justification for selection of manufacturing process and in-process controls, DP specification based on in-house / manufacturer's specification, excipients control as per pharmacopeia reference, analytical procedure and its validation, batch analysis, reference/working standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, synthesis process, manufacturer and manufacturing process, character elucidation using spectroscopy IR and NMR, physical form, polymorphism (no isomerism), structure elucidation using UV, FTIR, NMR, etc. Impurities based on BP, were analysed in 06 DS batches which remain in conformance to BP monograph. Inorganic impurities, residual solvents, genotoxic impurities were also studied. Based on a risk assessment study for arising nitrosamine impurities, firms deduced that there is no possibility for arising NMDA impurities in DS. DS specifications were based on the BP monograph. Analytical method and its verification were performed. DP manufacturer also performed analytical method verification of DS. Certificate of analysis of DS lot, batch analysis, reference standard and its CoA container closure system, specification and test methods for packing materials, and stability studies sheet were provided.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months** and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 36 months. DS was packed in a double HMHDPE bags in mini market pack and stored in well closed HDPE container. The DS remained stable and within specified limits as tested on defined intervals.
	Module-III Drug Product:	Firm has submitted data of drug product including its qualitative and quantitative composition, formulation development, manufacturing process development and in-process control, manufacturing process validation protocol and report, excipients testing methods based on pharmacopeia references with analysis reports, pharmaceutical equivalence and comparative dissolution profile, specifications and analytical procedures developed on the basis of in-house method and its validation studies, dissolution method validation, batch analysis,

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. 20031925 issued by Food and Drug Control Administration, Gujrat State, India valid till 16/03/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API was purchased from Amoli Organics Pvt. Ltd. India, invoice dated 17-08-2021, cleared on 01-09-2021 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The drug substance for Caflam 50 mg Tablet is Diclofenac Potassium BP manufactured by Amoli Organics Pvt. Ltd. India.(GMP certified by Food and Drug Administration (Gujrat State) India). DS has no polymorphic form. The impurity profiling DS was carried as per BP monograph. Manufacturing and controls, comparability protocols, structural characterization, stability protocol and studies has been submitted. Specification is considered adequate with respect to BP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to provided specifications.

The drug product "Caflam" is sugar coated tablet of 50 mg of Diclofenac Potassium manufactured by Novartis Pharma Pakistan Ltd (Formerly Bayer Pakistan (Pvt.) Ltd. Karachi DML 000003 (Formulation). The method of manufacturing is granulation, compression and sugar coating with adequate in process controls. Submitted regulatory specifications are developed in–house which

were also previously notified by DRAP for GSK manufacturing site. Stability data shows no degradation product at specified time points.

M/s Novartis Pharma Pakistan Limited, (Formerly M/s Bayer Pakistan (Pvt.) Ltd.) is a GMP complaint unit as per certificate issued by DRAP, Karachi office based on the inspection conducted on 08-09-2021.

Caflam 50mg Tablets' pharmaceutical equivalence and comparative dissolution profile have been established against the existing registered product manufactured by M/s GSK, Karachi. The firm has submitted product leaflet which shows information related to clinical particulars and pharmacological properties of the Diclofenac potassium as stated for reference authority approved product based on the reliance principle. This product is mainly indicated for treatment of mild the short-term (up to one week) treatment of acute, mild to moderately severe pain.
The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.
The firm shall also ensure inclusion of warnings about the increase risk of serious cardiovascular adverse events with COX-2 inhibitors, and GI adverse events on the drug's label, in light with the reference product as approved by the Health Canada.

Proceedings of M-323:
The Board was informed that the applicant has also requested for conditional approval to produce few batches at existing manufacturing site (i.e., M/s GSK CHC, Jamshoro) due to following reason:

"Application for renewal of contract manufacturing permission of Caflam 50mg Tablet was considered by the Registration Board in its 321st meeting wherein approval was not granted for extension. However, the Board decided that the request of M/s. Novartis Pharma (Pakistan) Ltd., 15-West Wharf Dockyard Road, Karachi for registration of Caflam 50mg Tablets (021528) at their own facility shall be processed by the concerned registration section.

Please note that whenever there is such transfer from one site to another, production continues at the current site to avoid any shortages, however in this case GSK cannot manufacture further since approval letter is not issued for Caflam (i.e., Contract manufacturing permission expired in August 2022) and because of this Custom Authority is not releasing the API of this product since August 2022.

Therefore, even if the subject mentioned case is approved in 323rd meeting of Registration Board, it will take months to receive approval/ registration letter due to the regular process at DRAP. Additionally, once approval letter is received, it will take further few months to manufacture the product and supply in the market from new manufacturing site.

Furthermore, be informed that it has been over a month since production has stopped at GSK Jamshoro due to non-availability of API, this may create possible shortages in the market resulting in serious chaos among public."

Decision: Registration Board decided as under:

i. Cancelled registration of following products from the name of M/s Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No. 000193).

S. No.	Reg. No.	Product Name & Composition

1.	**021528**	**Caflam 50mg Tablets** **Each tablet contains: -** **Diclofenac Potassium……50mg** **(Manufacturer's Specification)**

ii. Approved registration of following product in the name of M/s Novartis Pharma Pakistan Limited, C-21, S.I.T.E Area, Karachi (DML#000003).

a) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

S. No.	Product Name & Composition
1.	**Caflam 50mg Tablets** **Each sugar-coated tablet contains:** **Diclofenac Potassium……50mg**

iii. Approved "Manufacturer's Specifications" till the inclusion of more stringent specifications of the product in any official pharmacopeia of reference countries/ regulatory authorities as specified by the Registration Board in its 275th meeting.

Sr.#	Test Parameters	Manufacturer's Specification (Limits)
1.	**Identification of Diclofenac Potassium**	**By TLC: Corresponds to the reference** **By HPLC: Corresponds to the reference**
2.	**Identity of Potassium**	**Positive**
3.	**Identity of colorants** **Titanium** **Iron**	**Positive**
4.	**Dissolution of Diclofenac potassium after 90 minutes by UV (HCl buffer pH 1.2 & Phosphate buffer pH 7.5)**	***After 60 minutes:*** **Not more than 10% of the declared content.** ***After 90 minutes:*** **Not less than 75% (Q value) of the declared content, according to acceptance table of USP**
5.	**Uniformity of dosage units by Content Uniformity.**	**By HPLC & UV** **Meets the requirements of Ph.Eur., USP & JP**
6.	**Assay**	**By HPLC** **95.0 % - 105.0 % of the declared content**
7.	**Degradation products based on declared content of Diclofenac Potassium**	**By HPLC: Not more than 0.3%** **GP49002: Not more than 0.5%** **GP45828: Not more than 0.2%**

		GP49000: Not more than 0.2% **Other Individual Degradation products:** **Not more than 0.2%** **Total of other Degradation products:** **Not more than 0.3%**
8.	**Microbial enumeration tests (MET)** **1) Total aerobic microbial count (TAMC)** **2) Total yeasts & moulds count (TYMC)** **3) Specified micro-organism (E.coli)**	**1) Not more than 10^3 CFU/g** **2) Not more than 10^2 CFU/g** **3) Not detectable in 1 g**

iv. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.

Case No. 15. Request for Change in Registration Status of Products from M/s Novartis Pharma (Pakistan) Limited, Karachi to M/s AGP Limited B-23-C, S.I.T.E. Karachi (DML No. 000348)

M/s AGP Limited B-23-C, S.I.T.E. Karachi (DML No. 000348) has requested for change in registration status of following products from M/s Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML # 000193) to their name. **The products were registered by way of contract manufacturing at M/s GSK Consumer Healthcare Pakistan Ltd., Petaro Road Jamshoro for period of 30months.**

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of GMP certificate M/s AGP Limited, B-23-C, S.I.T.E, Karachi on the basis of inspection conducted on 03-06-2021. (Validity 02 years)
ii. Copy of DML of M/s AGP B-23-C, S.I.T.E. Karachi renewed w.e.f. 06-02-2020.
iii. Copy of approved sections by Central Licensing Board of M/s AGP Limited, B-23-C, S.I.T.E, Karachi confirming "Tablet (general)" section.
iv. NOC from M/s. Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi dated 23-06-2022.
v. Relevant undertakings & commitments.

	For generic drugs (me-too status)	Acicon Tablet 40mg by M/s Barrett Hodgson Pakistan (Pvt.) Ltd., Reg. No. 024253
	GMP status of the Finished product manufacturer	GMP certificate granted on 17/06/2021
	Name and address of API manufacturer.	M/s Nakoda Chemicals Limited Address: Plot No. 64/A, Phase-I, IDA. Jeedimetla, Hyderabad – 500 055, Telangana, India. Phone: +91-40-23447755, 23447756, 23447757 Fax: +91-40-23447754
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Famotidine is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Accelerated: 40°C ± 2°C, 75%RH ± 5% Long-term: 30°C ± 2°C, 65%RH ± 5% Batches: FM ‘P’/002/11 FM ‘P’/003/11 FM ‘P’/004/11
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the reference product that is Famotidin-RatioPharm 40mg Tablet by RatioPharm, Germany

		CDP has been performed against the same brand that is Famotidin-RatioPharm 40mg Tablet by RatioPharm, Germany in pH 1.2, pH 4.5 & pH 6.8 released more than 85 % within 15minutes and comparative profile is similar. But percent co-efficient values have not been calculated.
	Analytical method validation/verification of product	Method verification studies have submitted.

STABILITY STUDY DATA

Manufacturer of API	M/s Nakoda Chemicals Limited Plot No. 64/A, Phase-I, IDA. Jeedimetla, Hyderabad – 500 055, Telangana, India.		
API Lot No.	FM-2106011U		
Description of Pack (Container closure system)	Alu/PVC blister of 1 x 10's tablets, packed in a secondary carton with a leaflet inside		
Stability Storage Condition	Accelerated stability study: 40°C ± 2°C / 75 ± 5% RH Long-term stability study: 30°C ± 2°C / 65 ± 5% RH		
Time Period	Accelerated: Initial, 3 & 6 months Long-Term: Initial, 3, 6, 9, 12, 18, 24 months		
Frequency	Accelerated: Initial, 3 & 6 months Long-Term: Initial, 3, 6, 9, 12, 18, 24 months		
Batch No.	21/051-STB/FAM-TAB/01	21/052-STB/FAM-TAB/02	21/053-STB/FAM-TAB/03
Batch Size	4000 Tablets	4000 Tablets	4000 Tablets
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	22-11-2021	22-11-2021	22-11-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 65555/TS/2021 issued by DCA valid till 22/09//2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.2620/2021DRAP(K) dated 20/08/2021 is submitted for the permission to import femotidine for the purpose of trial, production, test and analysis is granted.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of Evaluator:		**Response of Firm**
Administrative Documents: • Valid NOC from Novartis for transfer of registration		The firm has submitted NOC from M/s. Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi dated 23-06-2022.
Technical Data: • The CDP submitted by the firm does not reflect percent coefficient of variation for Rt and Tt in all specified dissolution conditions. Firm was asked to provide the calculations to assess variability in results and overall determination of f1 and f2 values.		The firm has submitted RSD values (calculated for mean content dissolved at different time points) which are within acceptable range.

Decision: Registration Board decided as under:

v. Cancelled registration of following products from the name of M/s Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No. 000193).

S. No.	Reg. No.	Product Name & Composition
3.	**018063**	**Nocid 20mg Tablets** **Each tablet contains:** **Famotidine……..20mg** **(USP Specification)**
4.	**018064**	**Nocid 40mg Tablets** **Each tablet contains:** **Famotidine…….40mg** **(USP Specification)**

vi. Approved registration of following products in the name of M/s AGP Limited B-23-C, S.I.T.E. Karachi (DML No. 000348).

c) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

d) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

S. No.	Product Name & Composition
3.	**Nocid 20mg Tablets** **Each film coated tablet contains:** **Famotidine……..20mg** **(USP Specification)**
4.	**Nocid 40mg Tablets** **Each film coated tablet contains:** **Famotidine…….40mg** **(USP Specification)**

vii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.

Case No.16. Request for Change in Registration Status of Products from M/s Novartis Pharma (Pakistan) Limited, Karachi (contract manufactured by M/s GSK Consumer Healthcare Pakistan Ltd., Jamshoro) to M/s AGP Limited, B-23-C, S.I.T.E, Karachi

M/s. AGP Limited, B-23-C, S.I.T.E, Karachi has requested for change in registration of below mentioned products from M/s. Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No.000193)) to their name. **The products were registered by way of contract manufacturing at M/s GSK Consumer Healthcare Pakistan Ltd., Petaro Road Jamshoro for period of 30months.**

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting	
i.	Copy of registration letter and last renewal status.
ii.	Copy of DML of M/s AGP Limited, B-23-C, S.I.T.E, Karachi (Manufacturer) renewed w.e.f. 06-02-2020
iii.	Copy of approved sections by Central Licensing Board of M/s AGP Limited, B-23-C, S.I.T.E, Karachi confirming "Tablet (general)" section (Confirmed from letter dated 30-06-2020)
iv.	Copy of GMP inspection conducted on 06.07.2022, indicating "Good level" of compliance.
v.	NOC from Novartis Pharma (Pakistan) Limited, Karachi for transfer of products in the name of M/s AGP Limited, B-23-C, S.I.T.E dated 23-06-2022.
vi.	Relevant undertakings & commitments.

I	II	III	IV
S. No.	**Reg. No.**	**Registered Brand Name & Composition of Product**	**Dy. No./ Fee/ Date Reg./Renewal status**
1.	007820	Clomfranil 10mg Tablets Each sugar coated tablet contains: Clomipramine Hydrochloride……..10mg (Manufacturer's Specification)	Dy.No.27317/R&I **27-09-2022** Rs.30,000/- (Invoice No. 820327578) DOR:22-01-2020

			Contract manufacturing permission valid upto 21-07-2022
2.	007821	Clomfranil 25mg Tablets Each sugar coated tablet contains: Clomipramine Hydrochloride……..25mg (Manufacturer's Specification)	Dy.No.27318/R&I **27-09-2022** Rs.30,000/- (Invoice No. 71554770820) DOR:22-01-2020 **Contract manufacturing permission valid upto 21-07-2022**

The cases were referred to Pharmaceutical Evaluation Cell/ QMS for scrutinization/evaluation. Detail of submitted documents remarks of evaluators have been mentioned as under:

Evaluator: Mst. Sana Kanwal (Evaluator-XX)

1.	Name, address of Applicant / Marketing Authorization Holder	M/s AGP Limited, B-23-C, S.I.T.E., Karachi
	Name, address of Manufacturing site.	M/s AGP Limited, B-23-C, S.I.T.E., Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 27317 dated 27/09/2022
	Details of fee submitted	PKR 30,000/- dated 13/09/2022
	The proposed proprietary name / brand name	Clomfranil 10mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Clomipramine Hydrochloride ….10mg
	Pharmaceutical form of applied drug	Light yellow colored triangular biconvex film coated tablet plain on both sides
	Pharmacotherapeutic Group of (API)	Tricyclic Anti-depressant (Non-selective monoamine reuptake inhibitor)
	Reference to Finished product specifications	AGP Specifications
	Proposed Pack size	10×10's
	Proposed unit price	As per DRAP approved price of Clomfranil 10mg Tablet at the time of transfer of registration of product.
	The status in reference regulatory authorities	Anafranil 10mg tablet by M/s Apotex Inc, Approved by Health Canada

	For generic drugs (me-too status)	Anafril 10mg Tablet by M/s Glitz Pharma, Reg. No. 038578
	GMP status of the Finished product manufacturer	GMP inspection conducted on 06.07.2022 Tablet (General) section approved.
	Name and address of API manufacturer.	M/s. Sun Pharmaceutical Industries Ltd. Plot No. 24/2 & 25, Phase – IV, G.I.D.C. Industrial Zone, At & Post. Panoli – 394 116, Dist – Bharuch, Gujrat state, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Clomipramine HCl is present in EP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 25°C ± 2°C / 60% ± 5% RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months (CLM/085, CLM/086, CLM/087)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Anafranil 10mg Tablet (Batch No 19L337) by Teofarma Turkey by performing quality tests (Identification, Assay, Disintegration time, Dissolution, Uniformity of dosage form).

		CDP has been performed against the same brand that is Anafranil 10mg Tablet by Teofarma in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). on the basis of similarity factor (f2) result i.e NLT 50 of dissolution profile of both API in test product and reference product, both products are similar.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Decision: Registration Board decided as under:

i. Cancelled registration of following products from the name of M/s Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No. 000193).

S. No.	Reg. No.	Product Name & Composition
1.	**007820**	**Clomfranil 10mg Tablets** **Each sugar coated tablet contains:** **Clomipramine Hydrochloride……..10mg**

		(Manufacturer's Specification)
2.	**007821**	**Clomfranil 25mg Tablets** **Each sugar coated tablet contains:** **Clomipramine Hydrochloride……..25mg** **(Manufacturer's Specification)**

ii. Approved registration of following products in the name of M/s AGP Limited B-23-C, S.I.T.E. Karachi (DML No. 000348).

a) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

S. No.	Product Name & Composition
1.	**Clomfranil 10mg Tablets** **Each film coated tablet contains:** **Clomipramine Hydrochloride……..10mg**
2.	**Clomfranil 25mg Tablets** **Each film coated tablet contains:** **Clomipramine Hydrochloride……..25mg**

iii. The applicant shall submit fee of Rs. 7500/-each (in the light of notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021) for pre-registration variation/ change in finished product specifications from "AGP Specifications" to "As per Innovator's Specifications".

iv. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.

v. The Board further decided that registration letter shall be issued after regularization of registrations of above-mentioned products under SRO 1005(I)/2017.

Case No.17. Request for Change in Registration Status of Products from M/s Novartis Pharma (Pakistan) Limited, Karachi (contract manufactured by M/s Global Pharmaceuticals (Pvt.) Ltd., Islamabad) to M/s AGP Limited, B-23-C, S.I.T.E, Karachi

M/s. AGP Limited, B-23-C, S.I.T.E, Karachi (DML No.000348) has requested for change in registration status of below mentioned products from M/s. Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No.000193) to their name. **The products are currently registered by way of contract manufacturing at M/s Global Pharmaceuticals (Pvt.) Ltd., Plot No. 204-205, Industrial Triangle, Kahuta Road, Islamabad (DML No. 000417) and permission is valid till 30-06-2025.**

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting

i. Copy of registration letter and last renewal status.
ii. Copy of DML of M/s AGP Limited, B-23-C, S.I.T.E, Karachi (Manufacturer) renewed w.e.f. 06-02-2020
iii. Copy of approved sections by Central Licensing Board of M/s AGP Limited, B-23-C, S.I.T.E, Karachi confirming "Tablet (general)" section (Confirmed from letter dated 30-06-2020)
iv. Copy of GMP certificate M/s AGP Limited, B-23-C, S.I.T.E, Karachi on the basis of inspection conducted on 03-06-2021. (Validity 02 years)
v. NOC from Novartis Pharma (Pakistan) Limited, Karachi dated 23-06-2022
vi. Application with Form-5F and required fee as per relevant SRO.
vii. Relevant undertakings & commitments.

The cases were referred to QMS for scrutinization/evaluation. Detail of submitted documents remarks of evaluators have been mentioned as under:

1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted: Copy of GMP certificate (Certificate No. ZJ20190157) issued by National Medical Products Administration China, dated 30-11-2019. (Valid up to 29-11-2024). Copy of DML (No. Zhe 20050427) issued by Zhejiang Medical Products Administration issued on 22-03-2020 (Valid until; 21-02-2025)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API purchased from M/s Sunmore Healthcare Co. Ltd, Hunan, China (manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China verified through COA and GMP certificate of manufacturer). invoice dated 02-08-2021, cleared 16-08-2021 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The drug substance for Levofin 250mg Tablet (Levofloxacin hemihydrate) is manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China. (GMP certified by National Medical Products Administration China) on USP specifications. The impurity profiling of DS is also carried out for pharmacopeial listed impurities (Levofloxacin related compound A, Diamine derivative, Levofloxacin-N-oxide, Decarboxy Levofloxacin). Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification is as per USP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to USP specifications.

The drug product is film coated tablet of 250mg manufactured by M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) (Formulation) (orange coloured oblong biconvex film coated scored tablet plain on other side). The method of manufacturing is wet granulation and film coating with adequate process controls at critical points. Submitted regulatory specifications are as per USP monograph and submitted stability data shows no degradation product at specified time points.

Analytical methods verification was performed in January, 2022, whereas product is manufactured and tested in October / November, 2021. However, testing was performed as per USP specifications.

M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) is a GMP complaint unit as per certificate issued by DRAP, Karachi office based on inspection conducted on 03-06-2021. (Validity 02 years).

Levofin 250mg Tablets' pharmaceutical equivalence has been established against the Leflox 250mg Tablet of M/s Getz Pharma, which shows comparable results within specified limits. Comparative dissolution profile was conducted against the Leflox 250mg Tablet of M/s Getz. The clinical particulars and pharmacological properties of the Levofloxacin, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for acute bacterial sinusitis, uncomplicated cystitis, acute exacerbation of COPD including bronchitis, complicated skin and soft tissue infections / complicated skin and skin structure infections.

Conclusion:

The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.

The firm shall also ensure black boxed information on "Serious Adverse Reactions Including Tendinitis, Tendon Rupture, Peripheral Neuropathy, Central Nervous System Effects and Exacerbation of Myasthenia Gravis" in the beginning of the leaflet.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Aceclofenac, related structure, solubilities, and other general properties, manufacturing site, character elucidation, impurities characterizations, specifications based on Eur. Ph, analytical procedures and its validation, batch analysis, reference standard, container closure and stability studies summaries of Aceclofenac. Similarly, information summaries for drug product (Acemed) including its description, composition,

		pharmaceutical development, pharmaceutical equivalence against Beofenac 100mg Tablet of M/s Almirall S.A, comparative dissolution profile, justification for selection of manufacturing process and in-process controls, analytical procedure and its verification, batch analysis and specification, reference standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism, structure elucidation, impurities, specifications, analytical method, its validation, analytical method verification performed by DS and DP manufacturer, certificate of analysis, impurities, specifications based on Eur. Ph, analytical procedures, batch analysis, reference standard and its CoA, container closure system, specification and test methods for packing materials, and stability studies with study protocol.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 25ºC ± 2ºC / 60% ± 5% RH for 72 months.** DS was packed in a double layered LDPE bag and packaged again in fiber drums. The DS remained within specified limits as tested on defined intervals. DS manufacturer also conducted forced degradation studies under stress conditions including acidic, basic, oxidative, thermal and photolytic degradation, which resolve the stability of API. Temperature data log for transportation of API were also provided.
	Module-III Drug Product:	Firm has submitted data of drug product including its composition, manufacturing process and process control, manufacturing process validation protocol, excipients testing methods, pharmaceutical equivalence, specifications, analytical procedures and its validation, dissolution method validation, batch analysis, characterization of impurities, forced degradation studies, justification of specifications, reference standard or materials, container closure system and stability. The Specifications and control tests comply to in house specifications.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was performed against Beofenac 100mg Tablet of M/s Almirall S.A.

(Spain) which shows comparable results within specified limits.
The comparative dissolution profile was performed for Acemed 100mg Tablet against the Beofenac 100mg Tablet of M/s Almirall S.A. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 45mins. Calculation of value is as under:

Sr	Mediums	Time interval	Beofenac Tab	Acemed Tab
i.	Acidic buffer (pH 1.2)	10 min	1%	1.2%
		15 min	1.8%	1.7%
		30 min	2.5%	2.1%
		45 min	2.4%	2.1%
ii	Acetate buffer (pH 4.5)	10 min	24%	34.8%
		15 min	37.4%	43.4%
		30 min	52.1%	55.8%
		45 min	60.1%	62.5%
iii.	Phosphate Buffer (pH 6.8)	10 min	68.2%	97.1%
		15 min	91.3%	99.1%
		30 min	97.5%	98.3%
		45 min	97.4%	95.6%

f1 and f2 value has not been calculated for pH 6.8 because both reference and test sample achieved 85% dissolution within 15 minutes. For pH 1.2 and 4.5, F2 has been calculated which is 99.2 and 58.9, respectively. On the basis of similarity factor results (not less than 50) both reference and test products are found similar.

Analytical method validation/verification of product	Firm has claimed In-house specifications for which report of validation of analytical method for the drug product has been provided**.** Dissolution method verification protocol and study report were also provided.

STABILITY STUDY DATA

Manufacturer of API	Jingxi Synergy Pharmaceutical, Co., Ltd. Jiangxi Fengxin Industrial Park, Fengxin, Jiangxi Province, China
API Lot No.	20200801B
Description of Pack (Container closure system)	Alu/Alu blister of 1x10's in secondary carton
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months

Frequency	Accelerated: 0, 3, 6 (Months) (Continued for 24 months) Real Time: 0, 3, 6, (Months)		
Batch No.	22/021-STB/ACE-TAB/01	22/022-STB/ACE-TAB/02	22/023-STB/ACE-TAB/03
Batch Size	1000 Tablets	1000 Tablets	1000 Tablets
Manufacturing Date	02-2022	02-2022	02-2022
Date of Initiation	03-03-2022	03-03-2022	03-03-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (Certificate No. 2022001) issued by Jiangxi API Engineering Technology Research Centre, China, dated 20-01-2022. (Valid up to 19-01-2027).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API purchased from Jingxi Synergy Pharmaceutical, Co., Ltd. Jiangxi Fengxin Industrial Park, Fengxin, Jiangxi Province, China. Invoice dated 10-09-2021, cleared 16-09-2021 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

The drug substance for Acemed 100mg Tablet (Aceclofenac) is manufactured by Jingxi Synergy Pharmaceutical, Co., Ltd. Jiangxi Fengxin Industrial Park, Fengxin, Jiangxi Province, China (GMP certified by Jiangxi API Engineering Technology Research Centre, China) on Eur. Ph. specifications. The impurity profiling of DS is also carried out. Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification is as per Eur. Ph. monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to Eur.Ph / BP specifications.

The drug product is film coated tablet of 100mg manufactured by M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) (Formulation) (Reddish brown coloured, round biconvex film coated plain on both sides). The method of manufacturing is granulation, direct compression and film coating with adequate process controls at critical points. Submitted regulatory specifications are In-house and submitted stability data shows no degradation product at specified time points.

M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML# 000348) is a GMP complaint unit as per certificate issued by DRAP, Karachi office based on inspection conducted on 03-06-2021. (Validity 02 years).

Acemed 100mg Tablets' pharmaceutical equivalence has been established against the Beofenac 100mg Tablet of M/s Almirall S.A which shows comparable results within specified limits. Comparative dissolution profile was conducted against the Beofenac 100mg Tablet of M/s Almirall S.A. The clinical particulars and pharmacological properties of the Aceclofenac, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for the relief of pain and inflammation in osteoarthritis, rheumatoid arthritis and ankylosing spondylitis.

Conclusion:
The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.

Decision: Registration Board decided as under:

i. Cancelled registration of following products from the name of M/s Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No. 000193).

S. No.	Reg. No.	Product Name & Composition
1.	030510	Levofin 250mg Tablets Each film coated tablet contains: Levofloxacin……..250mg
2.	030511	Levofin 500mg Tablets Each film coated tablet contains: Levofloxacin……..500mg
3.	054727	Acemed 100mg Tablets Each film coated tablet contains: - Aceclofenac……100mg

ii. Approved registration of following products in the name of M/s AGP Limited B-23-C, S.I.T.E. Karachi (DML No. 000348).

a) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

c) For product at S. No. 3 of below table, the applicant shall submit fee of Rs. 7500/- (in the light of notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021) for pre-registration variation/ change in finished product specifications from "In house Specifications" to "As per Innovator's Specifications".

S. No.	Product Name & Composition
1.	Levofin 250mg Tablets Each film coated tablet contains:

	Levofloxacin (as Hemihydrate)……250mg **(USP Specifications)**
2.	**Levofin 500mg Tablets** **Each film coated tablet contains:** **Levofloxacin (as Hemihydrate)…….…500mg** **(USP Specifications)**
3.	**Acemed 100mg Tablets** **Each film coated tablet contains: -** **Aceclofenac……..……100mg** **(As per Innovator's Specifications)**

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.

Case No.18: Approved Product of M/s Mediate Pharmaceutical (Pvt) Ltd. Karachi

Registration Board in its 237th meeting (held on 26-02-2013) approved the following products of M/s Mediate Pharmaceutical (Pvt) Ltd. Plot No. 150-151 Sector 24 Korangi Industrial Area Karachi as per details mentioned vide column II & III of below table. The firm has now requested for issuance of registration & submitted requisite fee along-with required documents/ information as per detail recorded vide Column IV of below table:

S/ N	Product Name & Composition	Decision of RB-237	Current Status/ Documents Submitted by the Firm	RRA & Generic Status/ Remarks
I	**II**	**III**	**IV**	**V**
1.	M-Plate Plus Tablets Each tablet contains:- Clopidogrel ……..75mg Aspirin ……75mg (Anticoagulants/platelet aggregation) <u>Demanded MRP/Pack:</u> Rs.200/10's	Approved subject to confirmation of manufacturing facility for bi layered tablet and payment of differential fee	• Dy.No.11518/R&I dated 12-05-2022 & 34540/ R&I dated 29-11-2022 • Differential registration fee of Rs.22000/-(DS#498618250 dated 09-05-2022) • Pre-registration variation fee of Rs.2x30000/- (DS#47326650474 & 6558788186 dated 25-11-2022) for correction in composition as per RRA. Correct composition is: *Each film coated bi-layered tablet contains:-* *Clopidogrel (as hydrogen sulphate)……..75mg* *Aspirin ……75mg* • Correct form-5, Master formulation & manufacturing method. • FPP Specifications; As per Innovator's.	• EMA Approved • Clobis Plus Tablet by M/s Genome.

			• IQ, OQ & PQ report along-with invoice of ZP-420-28D Double Rotary Compression Machine. • Last Inspection Report 17-12-2021.(Acceptable Level of Compliance) • Renewal of DML issued vide Licensing Division's letter dated 15-09-2021 stating approval of "Tablet (General) Section"	

Decision: Registration Board approved registration of above-mentioned product in the name of M/s Mediate Pharmaceutical (Pvt) Ltd. Plot No. 150-151 Sector 24 Korangi Industrial Area Karachi.

Case No.19. Request for Change in Registration Status of Products from M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) to M/s Sami Pharmaceuticals Pvt Ltd., Plot No. F-140/A, off Hub, River Road, S.I.T.E, Karachi (DML#000938).

M/s Sami Pharmaceuticals Pvt Ltd., Plot No. F-140/A, S.I.T.E, Karachi (DML No.000938) has requested for change in registration status of below mentioned products from M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) to their name.

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of registration letters and last renewal status.
ii. Copy of DML of M/s Sami Pharmaceuticals Pvt Ltd., F -140/A, S.I.T.E, Karachi (DML#000938) issued on 13-09-2021.
iii. Copy of approval letter (dated 13-09-2021) for issuance of DML (No.000938; by way of formulation) confirming "Spansules (General)".
iv. NOC from M/s. Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) to transfer TEpH (40mg and 20mg) Capsule to the M/s Sami Pharmaceuticals Pvt Ltd., Plot No. F -140/A, off Hub, River Road S.I.T.E, Karachi (DML#000938) issued on 23-08-2022
v. Relevant undertakings & commitments.

The cases were referred to QMS for evaluation. Detail of submitted documents and remarks of evaluator have been mentioned as under:

Evaluator: Mr. Asadullah (AD-QMS)

	1.5.11-Proposed Label	Same as already registered
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Monograph of omeprazole for DS and FPP are available in USP. Firm has summarized information of omeprazole (DS) for its nomenclature, physical properties, solubility, polymorphism facts and other general properties. The DS manufacturer Murli Krishna is GMP certified and is responsible for all steps of manufacturing, packing and quality testing. Characterization elucidation studies was conducted using IR, NMR mass spectrum and UV absorption techniques. Potential organic impurities related to API was listed with their structure and acceptance criteria. However, during batch analysis, impurities were analyzed as per USP monograph and analysis of batch used in stability batches showed conformance to defined specifications. DS manufacturers followed in-house specification and accordingly analytical methods were developed and validated. DS lot procured was analyzed by DP manufacturer. Working standards, container closure and stability studies summaries of 03 batches were provided under Zone IV-b. Similarly, information summaries for drug product related to its description, composition, formulation development, manufacturing process, pharmaceutical equivalence and comparative dissolution profile against Losec capsules manufactured by AstraZeneca UK were provided. Development of manufacturing process and in-process controls, batch formula, DP specification based on USP specification, excipients control as per pharmacopeia reference, analytical procedure and its verification, batch analysis, reference/working standard, container closure system and stability studies has been provided. BMR of three stability batches were also provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, Character elucidation using spectroscopy IR and NMR, physical form, polymorphism (no isomerism), structure elucidation using UV, NMR, etc. were provided. Manufacturing process development, critical process steps and intermediate were identified. DS specifications were based on the inhouse method and accordingly analytical method were developed and its validating studies were performed. DP manufacturer also performed analytical method verification of omeprazole pellets.

<table>
<tr><td></td><td></td><td>Certificate of analysis of DS lot, batch analysis, reference/working standard and its CoA, container closure system, its specification and test methods for packing materials were provided. stability studies sheets were also provided.</td></tr>
<tr><td></td><td>Stability Studies of Drug Substance (Conditions & duration of Stability studies)</td><td>Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 65% ± 5% RH for 12 months. DS was packed in a double polyethylene bags with desiccant placed between two bags and stored in well closed HDPE container. The DS, remained stable and within specified limits as tested on defined intervals.</td></tr>
<tr><td></td><td>Module-III Drug Product:</td><td>Firm has submitted data of drug product including its qualitative and quantitative composition, formulation development, manufacturing process development and in-process control, manufacturing process validation protocol and report, excipients testing methods based on pharmacopeia references with analysis reports, pharmaceutical equivalence and comparative dissolution profile, specifications and analytical procedures developed on the basis of USP monograph and its verification studies were performed, batch analysis, reference standard, container closure system and stability studies.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>Pharmaceutical equivalence was performed against Losec 40mg Capsule manufactured by AstraZeneca UK which shows comparable results within specified limits.
The comparative dissolution profile was performed of the stability batch (PL001) against the Losec 40mg Capsule (Batch 3060122). Comparison was performed using 12 samples at pH 1.2 for 2 hours and at pH 6.8 for 30 min. Calculation of value is as under:
<table>
<tr><th>Sr</th><th>Mediums</th><th>Time interval</th><th>Sample</th><th>Reference</th></tr>

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. 20031925 issued by Food and Drugs Administration, Bandra, Mumbai, India valid till 06/07/2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API was purchased from Murli Krishna Pharma Private Limited, India, invoice dated 30-07-2021, cleared on 17-08-2021 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Proceedings of 323rd meeting:

Registration Board deliberated that since "Spansules (General) section" is dedicated only for filling of empty hard gelatin capsules with ready to fill pellets/ granules etc., therefore, products which involve mixing before filling of pellets/granules cannot be manufactured in aforementioned facility. In this context, the Board was informed that mixing step is not involved in manufacturing of the applied products.

Decision: Registration Board decided as under:

i. **Cancelled registration of following products from the name of M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072)**

S. No.	Reg. No.	Product Name & Composition
1.	025595	TEpH 40mg Capsules Each capsules contains: - Omeprazole Enteric Coated Pellets Eq. to Omeprazole……40mg (USP Specification)
2.	018091	TEpH 20mg Capsules Each capsules contains: - Omeprazole Enteric Coated Pellets Eq. to Omeprazole……20mg (USP Specification)

ii. **Approved registration of following products in the name of M/s Sami Pharmaceuticals Pvt Ltd., Plot No. F-140/A, S.I.T.E, Karachi (DML No.000938) subject to inspection of relevant manufacturing facility.**
   a) **Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
   b) **Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.**

S. No.	Product Name & Composition
1.	TEpH 40mg Capsules Each capsules contains: - Omeprazole Enteric Coated Pellets Eq. to Omeprazole……40mg (USP Specifications)
2.	TEpH 20mg Capsules

	Each capsules contains: - **Omeprazole Enteric Coated Pellets Eq. to** **Omeprazole……20mg** **(USP Specifications)**

iii. **Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.**

iv. **Before issuance of registration letter, the applicant shall submit:**

a) **Full fee of registration (for both products) for pre-registration correction/ variation in address of the registration holder from M/s Sami Pharmaceuticals Pvt Ltd., Plot No. F-140/A, off Hub, River Road, S.I.T.E, Karachi to M/s Sami Pharmaceuticals Pvt Ltd., Plot No. F-140/A, S.I.T.E, Karachi.**

b) **Valid and legalized GMP certificate of M/s Murli Krishna Pharma Private Limited, D-98, Ranjangaon MDIC, Ranjangoan, Taluka – Shirur – Pune, Maharashtra, India**

Case No.20. Request for Change in Registration Status of Products from M/s Novartis Pharma (Pakistan) Ltd, Karachi (DML No.000193) to M/s AGP Limited, D-109, S.I.T.E, Karachi (DML#000044) by way of Contract Manufacturing at M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML#000348).

M/s. AGP Limited, D-109, S.I.T.E, Karachi has requested to change the registration status of Ternelin 4mg and 2mg Tablets from M/s Novartis Pharma Pakistan, 15-West Wharf, Dockyard Road, Karachi to M/s AGP Limited, D-109, S.I.T.E, S.I.T.E, Karachi (DML#000044) with permission for contract manufacturing at M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML#000348). **The products were registered by way of contract manufacturing at M/s GSK Consumer Healthcare Pakistan Ltd., Petaro Road Jamshoro (DML No.000010) for a period of 30months.**

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of DML of M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML#000348) w.e.f 06-02-2020.
ii. Copy of approved sections by Central Licensing Board of M/s AGP Limited, B-23-C, S.I.T.E, Karachi confirming "Tablet (general)" section (Confirmed from letter dated 30-06-2020)
iii. Copy of last GMP Inspection report dated 06-07-2022 concluding good level of GMP compliance by M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML#000348)
iv. NOC from M/s. Novartis Pharma Pakistan, 15-West Wharf, Dockyard Road, Karachi to transfer Ternelin 4mg and 2mg Tablets to M/s AGP Limited, D-109, S.I.T.E, S.I.T.E, Karachi (DML#000044) issued on 23-06-2022
v. Agreement of Contract manufacturing among M/s AGP Limited, D-109, S.I.T.E, S.I.T.E, Karachi (DML#000044) and M/s AGP Limited, B-23-C, S.I.T.E, Karachi (DML#000348) executed in June, 2022.
vi. Relevant undertakings & commitments.

The cases were referred to QMS for evaluation. Detail of submitted documents and remarks of evaluator have been mentioned as under:

Evaluator: Mr. Asadullah (AD-QMS)

	Proposed unit price	Already registered product
	The status in reference regulatory authorities	Tizanidine Hydrochloride, EQ 4mg Base Tablet;Oral, ANDA: 076533, APOTEX (FDA)
	For generic drugs (me-too status)	Movax 4mg Tablets manufactured by M/s Sami Pharmaceutical Pvt Ltd, Karachi (Reg#042139)
	Name and address of API manufacturer.	Sun Pharmaceutical Industries Limited, Address: Plot No. 24/2, 25, Phase IV, GIDC, Panoli, Bharuch, Gujrat, India
	1.5.11-Proposed Label	
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Tizanidine HCl (DS) for its physical properties, solubility, polymorphism facts and other general properties. The DS manufacturer Sun Pharma Industries is GMP certified and is responsible for all steps of manufacturing, packing and testing. Synthesis flow, manufacturing process were briefly stated. Characterization elucidation studies was conducted using IR, UV and NMR techniques. Degradation and process related impurities and residual solvents were listed and analyzed as per USP monograph. DS manufacturers followed USP specification and accordingly analytical methods were used. DS lot procured was analyzed by DP manufacturer. Working standards, container closure and stability studies summaries of 03 batches were provided. Similarly, information summaries for drug product (Ternelin 4mg tab) related to its description, composition, choice of excipients, formulation development, manufacturing process, pharmaceutical equivalence and comparative dissolution profile against Tizanidine HCl manufactured by Teva Pharma was provided. Justification for selection of manufacturing process and in-process controls, DP specification based on USP specifications, excipients control as per pharmacopeia reference, analytical procedure and its verification, batch analysis, reference/working standard, container closure system and stability studies has been provided.

	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, synthesis process, manufacturer and manufacturing process, character elucidation using spectroscopy IR and NMR, physical form, polymorphism (no isomerism), structure elucidation using UV, FTIR, NMR, etc. Impurities based on USP, were analysed in DS batches which remain in conformance. Analytical methods of impurities and residual solvents were developed and validated. Genotoxic impurities were also analysed. DS specifications were based on the USP monograph. Analytical method and its verification were performed. DP manufacturer also performed analytical method verification of DS. Certificate of analysis of DS lot, batch analysis, reference standard and its CoA container closure system, specification and test methods for packing materials, and stability studies sheet were provided.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months** and the long-term stability data was conducted at 25^{o}C ± 2^{o}C / 60% ± 5% RH for more than 36 months. DS was packed in a double LDPE bags (transparent followed by black) in miniature fibre board container. The DS remained stable and within specified limits as tested on defined intervals. DS manufacturer also conducted forced degradation studies in various stress condition where oxidative stress conditions leads to 9.82% and 15% degradation. DP manufacturer also conducted degradation studies of Tizanidine tablet under stress conditions including acidic, basic, oxidative, thermal and photolytic degradation for 19th months, which resolve the stability of API. Temperature data log for transportation of API were also provided.
	Module-III Drug Product:	Firm has submitted data of drug product including its qualitative and quantitative composition, formulation development, manufacturing process development and in-process control, manufacturing process validation protocol and report, excipients testing methods based on pharmacopeia references with analysis reports, pharmaceutical equivalence and comparative dissolution profile, specifications and analytical procedures developed on the basis of in-house method and its validation studies, dissolution method validation, batch analysis, justification of specifications, reference standard, container closure system and stability studies.
	Pharmaceutical Equivalence and	Pharmaceutical equivalence was performed against

<table>
<tr><td></td><td>Comparative Dissolution Profile</td><td>Tizanidine HCl 4mg Tablets (Teva Pharma, Hungary), which shows comparable results within specified limits.
The comparative dissolution profile was performed of the stability batch (TR-688) against the Tizanidine HCl 4mg Tablets (Teva Pharma, Hungary). Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 30 min. Calculation of value is as under:
<table>
<tr><th>Sr</th><th>Mediums</th><th>Time interval</th><th>Sample</th><th>Reference</th></tr>
<tr><td rowspan="5">i.</td><td rowspan="5">Acidic buffer (pH 1.2)</td><td>10 min</td><td>88.8 %</td><td>79.0 %</td></tr>

2.	014316	Ternelin 2mg Tablets Each tablet contains:- Tizanidine HCl…….….2mg (USP Specification)

ii. **Approved registration of following products in the name of M/s AGP Limited, D-109, S.I.T.E, Karachi (DML#000044) by way of contract manufacturing at M/s AGP Limited B-23-C, S.I.T.E. Karachi (DML No. 000348).**
   a) **Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
   b) **Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.**

S. No.	Product Name & Composition
1.	Ternelin 4mg Tablets Each tablet contains:- Tizanidine (as Hydrochloride)……..….4mg (USP Specifications)
2.	Ternelin 2mg Tablets Each tablet contains:- Tizanidine (as Hydrochloride)……..….2mg (USP Specifications)

iii. **Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.**

iv. **The Board noted that since instant applications for change in registration status have been submitted after expiration of previously granted permissions of contract manufacturing, therefore, fee of Rs.75000/each shall be submitted for regularization of renewal of previous registrations.**

v. **Legal opinion will be sought from Legal Affairs Division, DRAP whether cases regarding cancellation of registration from one registration holder and issuance of the same in favor of other registration holder on contract manufacturing**

basis require fee Rs.75000/- or Rs.75000/-+30000/- and registration letter will be issued accordingly

vi. **Registration Board regularized above registration and firm shall submit fee as per SRO 1005(I)/2017 before issuance of registration letter.**

Case No.21. Request for Change in Registration Status of Dermazin 1% Cream from M/s Novartis Pharma (Pakistan) Ltd, Karachi (DML No. 000193) to M/s AGP Limited, D-109, S.I.T.E, Karachi (DML#000044) by way of contract manufacturing at M/s. Hiranis Pharmaceutical Pvt Limited, Karachi (DML#000785).

M/s. AGP Limited, D-109, S.I.T.E, Karachi (DML No. 000044) has requested to change the registration status of Dermazin 1% Cream from M/s Novartis Pharma Pakistan, 15-West Wharf, Dockyard Road, Karachi to M/s AGP Limited, D-109, S.I.T.E, S.I.T.E, Karachi (DML#000044) with permission for contract manufacturing from M/s. Hiranis Pharmaceutical Pvt Limited, Plot No. E-145 to 149, North Western Industrial Zone, Port Qasim, Karachi (DML#000785). **The product was registered by way of contract manufacturing at M/s GSK Consumer Healthcare Pakistan Ltd., Petaro Road Jamshoro (DML No.000010) for a period of 30months.**

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of DML of M/s AGP Limited, D-109, S.I.T.E, Karachi (DML#000044) w.e.f 15-07-2019.
ii. Copy of approval letter for renewal of DML(dated 07-02-2014) issued by Licensing Division, confirming Cream / ointment/ Gel (General) among formulation sections.
iii. Copy of last GMP Inspection report dated 12-11-2021 concluding good level of GMP compliance by M/s. Hiranis Pharmaceutical Pvt Limited, Plot No E-145 to 149, North Western Industrial Zone, Port Qasim, Karchi (DML#000785)
iv. NOC from M/s. Novartis Pharma Pakistan, 15-West Wharf, Dockyard Road, Karachi to transfer Dermazin 1% Cream to M/s AGP Limited, D-109, S.I.T.E, S.I.T.E, Karachi (DML#000044) dated 05-12-2022.
v. Agreement of Contract manufacturing among M/s AGP Limited, D-109, S.I.T.E, S.I.T.E, Karachi (DML#000044) and M/s Hiranis Pharmaceutical Pvt Limited, Plot No E-145 to 149, North Western Industrial Zone, Port Qasim, Karchi (DML#000785) dated 01-06-2022.
vi. Relevant undertakings & commitments.

The cases were referred to QMS for evaluation. Detail of submitted documents and remarks of evaluator have been mentioned as under:

Evaluator: Mr. Asadullah (AD-QMS)

	1.5.11-Proposed Label	Not submitted
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of (DS) for its physical properties, solubility, polymorphism facts and other general properties. The DS manufacturer provided synthesis flow, manufacturing process and in process control. Characterization elucidation studies was conducted using IR and NMR techniques. The potential impurities and residual solvents were listed and their limits were defined as per USP monograph. DS manufacturers followed USP specification and accordingly analytical methods were developed and verified. DS lot used in the stability studies of finished products was analyzed by DP manufacturer. Working standards, container closure and stability studies summaries of 03 batches were provided. Similarly, information summaries for drug product related to its description, composition, choice of excipients, formulation development, manufacturing process, pharmaceutical equivalence a was provided. Justification for selection of manufacturing process and in-process controls, DP specification based on USP specifications, excipients control as per pharmacopeia reference, analytical procedure and its verification, batch analysis, reference/working standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of (DS) for its physical properties, solubility, polymorphism facts and other general properties. The DS manufacturer Srikem Laboratories is GMP certified and is responsible for all steps of manufacturing, packing and testing. Synthesis flow, manufacturing process and in process control were briefly stated. Characterization elucidation studies was conducted using IR and NMR techniques. The potential impurities and residual solvents were listed and their limits were defined as per USP monograph. DS manufacturers followed USP specification and accordingly analytical methods were developed and verified. DP manufacturer also verified the analytical method for silver sulphadiazine. CoA of three batches produced in 2021 were provided. DS lot used in the stability studies of finished products was analyzed by DP manufacturer. DS manufacturer developed working standards against USP reference

		standard and provided its COA. Container closure system used for DS was analyzed and their CoA were provided. Stability studies summaries of 03 batches manufactured in 2019 were provided at accelerated and real time conditions as per Zone IV-A.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months** and the long-term stability data was conducted at 30ºC ± 2ºC / 60% ± 5% RH for 18 months. DS was packed in LDPE bags placed in HDPE containers. The DS remained stable and within specified limits as tested on defined intervals.
	Module-III Drug Product:	Firm has submitted data of drug product including its qualitative and quantitative composition of 1% w/w cream of silver sulphadiazine. Product was developed with reference product formulation developed by Novartis Pharma Pakistan using similar excipients. Manufacturing process development, critical attributes, and process validation protocol were provided. Excipients specification were provided which mostly based on pharmacopeial references. Pharmaceutical equivalence was performed against the Quench 1 % cream, manufactured by Ferozsons Laboratories. DP follows USP specifications and analytical procedures were verified. Batch analysis of three batches revealed conformance to assigned specifications. Working standard used in analytical studies was provided by the DS manufacturer. Plastic laminated tube with inner aluminium layer were used as container closure system were used and its CoA was provided.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was performed against Quench 1% cream (Ferzosons Laboratories Pvt Ltd), which shows comparable results within specified limits.
	Analytical method validation/verification of product	Firm has claimed USP specifications for which report of verification of analytical method for the drug product has been provided. Analytical method for silver sulphadiazine, and methyl parben & propyl paraben were verified.

STABILITY STUDY DATA	
Manufacturer of API	Srikem Laboratories Pvt Ltd, Plot No 17/24, 17/22, 17/13, 17/23, M.I.D.C, Taloja – 410 208. Navi Mumbai, Maharashtra India

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. 6100336 issued by Food and Drugs Control Administration, Maharashtra state, India valid till 11/03/2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	13.5kg of API was purchased from Srikem Laboratories Pvt Ltd, India, invoice dated 07-04-2021, cleared on 15-06-2021 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Decision: Registration Board decided as under:

i. Cancelled registration of following products from the name of M/s Novartis Pharma (Pakistan) Limited, 15- West Wharf, Dockyard Road, Karachi (DML No. 000193).

S. No.	Reg. No.	Product Name & Composition

1.	**007533**	**Dermazin 1% Cream** **Each gram contains:** **Silver Sulphadiazine…….. 10mg**

ii. Approved registration of following products in the name of M/s AGP Limited, D-109, S.I.T.E, Karachi (DML#000044) by way of contract manufacturing at M/s. Hiranis Pharmaceutical Pvt Limited, Plot No. E-145 to 149, North Western Industrial Zone, Port Qasim, Karachi (DML#000785).

a) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

S. No.	Product Name & Composition
1.	**Dermazin 1% Cream** **Each gram contains:** **Silver Sulphadiazine…….. 10mg** **(USP Specifications)**

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP) without waiting for confirmation of minutes of instant meeting.

iv. Legal opinion will be sought from Legal Affairs Division, DRAP whether cases regarding cancellation of registration from one registration holder and issuance of the same in favor of other registration holder on contract manufacturing basis require fee Rs.75000/- or Rs.75000/-+30000/- and registration letter will be issued accordingly.

v. Registration Board regularized above registration and firm shall submit fee as per SRO 1005(I)/2017 before issuance of registration letter.

Case No.22. Recommendation to Registration Board in the Light of Decision of Pharmacovigilance Risk Assessment Expert Committee.

Division of Pharmacy Services, DRAP has informed that first meeting of the Pharmacovigilance Risk Assessment Expert Committee (PRAEC) was held on 12th October, 2022. The committee discussed two cases of local signals and eight cases of reliance on international agencies. Accordingly, safety-related decisions were made along with following recommendations to Registration Board:

I. <u>DOMESTIC SIGNALS</u>

1. *Anaphylactic Reaction with Diclofenac Sodium.*

<u>Decision of PRAEC:</u>

i. The PRAEC after detailed deliberation and discussion decided to update the warning, precaution & contraindication sections of the prescribing information/ safety specification/ label of Diclofenac Sodium injection about the occurrence of anaphylactic reaction/ anaphylactic shock and its contraindication in a patient with a history of asthma, urticaria, or allergic-type reactions after taking aspirin or other NSAIDs.

ii. *Furthermore, the PRAEC in light of Rule 10 (1) (e) of the Pharmacovigilance Rules, 2022 decided to recommend the Registration Board to update the safety specification/ label of Diclofenac Sodium Injection.*

2. Infusion-related hypersensitivity reactions with Remdesivir.

Decision of PRAEC

The PRAEC after detailed deliberation & discussion and in light of recommendations of the National Pharmacovigilance Centre decided as under:

i. *To update the prescribing information/ safety specification/ label of Remdesivir with the inclusion of information related to infusion-related hypersensitivity reactions and its monitoring in the warning and precaution sections and onward recommendation to the Registration Board in light of Rule 10 (1) (e) of the Pharmacovigilance Rules, 2022. Furthermore, all the registration holders should also introduce educational training for healthcare professionals on proper preparation, administration and flow rate of Remdesivir, and monitoring of patients;*
ii. *To advise the Registration Board to review the grant of Emergency Use Authorization for the product Viso-Rem Solution for infusion in light of the investigation carried out by the panel of QA and LT Division of the DRAP; and*
iii. *Furthermore, to advise the QA and LT Division of the DRAP in light of Rule 10 (1) (e) of the Pharmacovigilance Rules, 2022 to strengthen its surveillance mechanism of registration holders of Remdesivir.*

II. RELIANCE OF INTERNATIONAL SAFETY DECISIONS.

1. Clozapine: Risk of serious bowel complications

Decision of PRAEC

i. *The PRAEC after detailed deliberation and discussion decided to update and strengthen the warning section of Clozapine with gastrointestinal side effects, including constipation and severe bowel problem in light of Rule 10 (1) (h) (iv) of Pharmacovigilance Rules, 2022.*
ii. *It was decided to onward recommend/inform the Registration Board for necessary action in the matter.*

2. Iodinated contrast media (ICM) injections: Risk of Hypothyroidism in babies and young children.

Decision of PRAEC

i. *The PRAEC after detailed deliberation and discussion decided as per Rule 10 (1) (h) (iv) of Pharmacovigilance Rules, 2022 to update the warning and precaution section of the prescribing information of the entire class of iodinated contrast media (ICM) that are used for radiological purposes to include risks of an underactive thyroid or a temporary decrease in thyroid hormone levels in children 3 years or younger i.e newborns, particularly those born premature, and children in their first 3 years with underlying conditions such as heart issues etc*
ii. *It was decided to onward recommend/inform the Registration Board for necessary action in the matter.*

3. Remdesivir: Risk of sinus bradycardia

Decision of PRAEC

i. *The PRAEC after discussion decided as per Rule 10 (1) (h) (iv) of Pharmacovigilance Rules, 2022 to update the prescribing information (warning & adverse drug reactions sections) of Remdesivir to include the potential risk of sinus bradycardia.*
ii. *It was decided to onward recommend/inform the Registration Board for necessary action in the matter.*

4. Atezolizumab: Risk of severe cutaneous adverse reactions (SCARs)

Decision of PRAEC

i. *The PRAEC after deliberation decided as per Rule 10 (1) (h) (iv) of Pharmacovigilance Rules, 2022 to update prescribing information of Atezolizumab (Tecentriq®) to include*

the risk of severe cutaneous adverse reactions (SCAR) including Stevens-Johnsons Syndrome (SJS) and Toxic Epidermal Necrolysis (TEN).

ii. *Furthermore, it was decided that registration holders should issue direct healthcare professional communication in this regard.*

iii. *It was decided to onward recommend/inform the Registration Board for necessary action in the matter.*

5. Metformin and reduced vitamin B12 levels

Decision of PRAEC

i. *The PRAEC after discussion decided as per Rule 10 (1) (h) (iv) of Pharmacovigilance Rules, 2022 to update prescribing information of Metformin and other medicines containing Metformin to state that vitamin B12 deficiency is an adverse drug reaction with Metformin use and the risk of this adverse reaction occurrence increases with increasing metformin dose and treatment duration and in patients with risk factors known to cause vitamin B12 deficiency.*

ii. *It was decided to onward recommend/inform the Registration Board for necessary action in the matter.*

6. Pregabalin: Risk of Major Congenital Malformations

Decision of PRAEC

i. *The PRAEC after detailed deliberation and discussion decided as per Rule 10 (1) (h) (iv) and (vi) of Pharmacovigilance Rules, 2022 to update prescribing information of Pregabalin to include information from a new study that pregabalin may slightly increase the risk of major congenital malformations if used in pregnancy and include advise on effective contraception during treatment in pregnancy.*

ii. *It was decided to onward recommend/inform the Registration Board for necessary action in the matter*

7. Interaction between hydroxychloroquine or chloroquine, and macrolide antibiotics: increased risk of cardiovascular events with co-administration.

Decision of PRAEC

i. *The PRAEC after discussion decided as per Rule 10 (1) (h) (iv) and (vi) of Pharmacovigilance Rules, 2022 to update prescribing information (warning and interaction sections) of hydroxychloroquine, chloroquine and macrolide antibiotics (azithromycin, erythromycin or clarithromycin excluding topical macrolides) about the potential interaction of increased risk of cardiovascular events and cardiovascular mortality if hydroxychloroquine or chloroquine is taken with a macrolide-antibiotic.*

ii. *It was decided to onward recommend/inform the Registration Board for necessary action in the matter.*

8. Hydroxyethyl-starch solutions for infusion: risk of kidney injury and death

Decision of PRAEC

The PRAEC after detailed deliberation and discussion and as per Rule 10 (1) (h) (v) of Pharmacovigilance Rules, 2022 decided to recommend to the Registration Board to suspend the registration of Hydroxyethyl-Starch (HES) solutions in Pakistan subject to the availability of alternative treatment options.

Decision: Registration Board deferred the case for further deliberation in collaboration with Pharmacy Services Division, DRAP.

Case No.23. Request for Change in Registration Status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro Along-with End to End Local Manufacturing.

Registration Board in its 317th meeting held on 16th-17th May, 2022 considered the request of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro for change in registration status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name.

The applicant initially applied for change in registration status from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name along-with end to end local manufacturing (Dy.No.33338/R&I dated 21-12-2021). However, the firm vide their letter No.REF/DRAP/Reg-003/0322 received dated10-03-2022 (Dy.No.6669) revised their request by informing that there is no change in manufacturing site (abroad) and repacking site (local).

Decision of M-317:

Registration Board deferred the case for submission of updated approval status of the applied formulation along-with safety and efficacy profile in reference regulatory authorities adopted by the Board in its 275th meeting. Moreover, the Board further advised to submit valid and legalized CoPP of the product as existing has been expired.

In line with the above-mentioned decision of Registration Board following information has been collected regarding risk-benefit profile of Paracetamol MR Tablet and regulatory steps taken by different reference regulatory authorities in the best interest of patients.
[Reference: Application to amend the Poisons Standard - Modified Release Paracetamol (tga.gov.au) accessed dated 04-11-2022]:

Paracetamol Modified Release Tablet:

Paracetamol MR tablets are constructed in two layers, an IR layer (31%) and a SR layer (69%) that gradually releases paracetamol over a period of 8 hours at normal doses.
The highest recommended dose of paracetamol for adults is 1.3 g and the maximum daily dose is 4 g (i.e., 2 tablets 3 times a day with highest dose of 6 tablets a day). A toxic dose is 10g or 200mg/kg (whichever is greater). The majority of patients who overdose take less than 30 g.

Summary of Benefits of MR Paracetamol:

i. Three times daily dosing and reduction of tablet burden (compared with four times daily dosing of IR formulations);
ii. MR paracetamol may be preferred over IR paracetamol for long term use in patients with chronic pain conditions such as osteoarthritis.

Summary of Risks of MR paracetamol:

i. Unpredictable and undefined pharmacokinetic profile following an overdose with MR paracetamol.
ii. Severe consequences of overdose may be more likely to occur in patients who have ingested MR paracetamol;
    a. High potential for treating clinician to not be aware that a patient has ingested MR paracetamol
    b. Unpredictable pharmacokinetic profile making monitoring and treatment difficult
iii. Current best practice guidelines do not completely address MR toxicity.
iv. Chronic supratherapeutic overdose is also thought to be not uncommon. This is likely largely due to confusion about the difference in dose between MR and IR paracetamol with the maximum dose being 6 tablets per day for the MR formulation rather than 8 tablets per day for IR. This confusion may be contributed to by the products being available adjacent to one another OTC without counselling/education provided at the point of sale.
v. Paracetamol overdose can result in liver failure requiring liver transplant and may be fatal if not treated appropriately in a timely manner.

To overcome the risk associated with overdosing of Paracetamol MR Tablet, following different regulatory actions have been taken by EMA and TGA:

A. **European Medicines Agency (EMA)** on recommendations of Pharmacovigilance Risk Assessment Committee (PRAC) suspended the marketing of MR paracetamol formulations in September 2017 as the **advantages of a longer-acting product did not outweigh the complications of managing an overdose of the medicine**, since the treatment procedures for immediate-release products are not appropriate for modified-release paracetamol.

In many cases, it may not be known whether an overdose of paracetamol involves immediate-release or modified release products, making it difficult to decide how the overdose should be managed.

Furthermore, the **medicines will remain suspended unless the companies that hold the marketing authorizations can provide evidence of appropriate and practical EU-wide measures to help prevent overdose with these products and adequately reduce its risks.**

B. Therapeutic Goods Administration (TGA) Australia has up-scheduled MR paracetamol from ***Schedule 2 'Pharmacy Medicine'*** to ***Schedule 3 'Pharmacist Only'*** in order to ensure appropriate patient counselling on correct dosing and the risks associated with overdose, whether intentional or accidental.

- There are well established guidelines in Australia for the management of paracetamol overdose including with MR paracetamol.
- The treatment of paracetamol overdose is dependent on a number of factors and treatment given will vary accordingly. Key parameters include dose taken and time since exposure, if known.
- The mainstay of treatment is with acetylcysteine. Whether acetylcysteine is administered depends on certain clinical parameters, including the use of the paracetamol treatment nomogram which plots the blood paracetamol concentration against time.
- Other investigations include measurement of liver function to assess for liver toxicity.

Approval status of Paracetamol extended-release tablets in different regulatory authorities is as under:

S/N	Country	Authority	Product	Approval status
1.	Australia	TGA (Therapeutic Goods Administration) PANADOL OSTEO (reformulation) paracetamol 665 mg modified release tablet blister pack (260264) | Therapeutic Goods Administration (TGA)	PANADOL OSTEO paracetamol 665mg modified release tablet of M/s GlaxoSmithKline Consumer Healthcare Australia Pty Ltd	Active (Non-prescription medicine) **(Pharmacist Only Medicine)**
2.	Australia	TGA (Therapeutic Goods Administration) PANADOL BACK & NECK LONG LASTING paracetamol 665mg modified release tablets blister pack (78493) | Therapeutic Goods Administration (TGA)	PANADOL BACK & NECK LONG LASTING paracetamol 665mg modified release tablets of M/s GlaxoSmithKline Consumer Healthcare Australia Pty Ltd	Active (Non-prescription medicine) **(Pharmacist Only Medicine)**

xiii.	Saudi Arabia

Approval Status of Paracetamol MR tablets in Pakistan:

Application for registration of Panadol Extend Tablet (containing Paracetamol 665mg in modified release form) for finished import from Australia was received dated 22.06.2012 from M/s GlaxoSmithKline Pakistan Limited, 35-Dockyard Road, West Wharf, Karachi and initially considered by the Registration Board in its 243rd meeting held on 08th – 09th May, 2014. Later on, the firm revised the application from 'finished import' to 'bulk import and local repacking'. Registration Board in its 289th meeting held on 14th – 16th May, 2019 approved registration of aforementioned product such that the tablets will be imported in bulk from M/s GlaxoSmithKline Australia Pty Limited, Consumer Healthcare Division, 82 Hughes Avenue, Ermington NSW 2115, Australia and will be blistered and packed along-with final quality control release of the finished pharmaceutical product at M/s. GlaxoSmithKline Pakistan Limited, F-268 S.I.T.E, Karachi. The approval was granted on following grounds:

- Evidence of approval of applied formulation by the reference regulatory authority i.e., Therapeutic Goods Administration (TGA), Australia and confirmation of free sale status in Australia as determined from submitted legalized Certificate of Pharmaceutical Product (CoPP) for bulk labeled tablets.
- On-site Investigation by a panel comprising of Dr. Saif ur Rehman Khattak (Director, CDL, DRAP, Karachi), Dr. Najam us Saqib (Additional Director, DRAP, Karachi) and Mr. Kirshan Das (Assistant Director, DRAP, Karachi) for confirmation of Authenticity / Genuineness of stability data in final container closure system performed by M/s. GlaxoSmithKline Pakistan Limited, F-268 S.I.T.E, Karachi.

Reg. No.	**Product Name & Composition**	**Registration Trail**
097070	Panadol Extend Tablet	**Initial Reg. Date:** 08-07-2019

	Each modified release tablet contains: Paracetamol……665 mg (USP Specifications) Bulk Import & Local Repacking	**Change of Source of Bulk Tablets dated 12- 03-2021:** From M/s GlaxoSmithKline Australia Pty Limited, Consumer Healthcare Division, 82 Hughes Avenue, Ermington NSW 2115, Australia to M/s Glaxo Welcome, S.A. Avda. Extremadura, 3, Pol. Ind. Allendeduero, Arvanda de Duero, 09400 Burgos, Spain **Change of Local Repacking Site dated 26- 10-2021**: From M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro
Information printed on label regarding management of Overdose:		In case of overdose, immediate medical management is required by visiting nearest Emergency Medical Center, even if symptoms of overdose do not appear.

Current Application:

M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro has now requested for change in registration status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name along-with **end to end local manufacturing**. The product is currently registered for bulk import (of tablets) from Glaxo Welcome Spain and local repacking along-with quality control release at M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro.

Evaluation report will be placed before the Registration Board during the meeting.

Decision: Registration Board deferred the case for following reasons:

iii. **Evaluation of application submitted for change in registration status of Panadol Extend Tablet 665mg (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro along-with end to end local manufacturing.**

iv. **The applicant shall submit detail of measures adopted by other countries (whether RRA or non-RRA) to mitigate the risk as reported by EMA.**

v. **The applicant shall also submit detail of practicable measures which will be adopted after grant of marketing authorization to prevent the risk of toxicity associated with over-dose of above-mentioned product.**

Registration-II Section

Case No. 01 M/s. Saffron Pharmaceuticals (Pvt.) Ltd; 19 Km, Sheikhupura Road, Faisalabad

M/s. Saffron Pharmaceuticals (Pvt.) Ltd; 19 Km, Sheikhupura Road, Faisalabad were granted registration of following products with MRP demanded by the firm as mentioned in the minutes. However, the firm has submitted a request that these MRPs are not viable for manufacturing and they unable to manage the cost. Same case was placed in 2nd meeting of C&P Division & PE&R Division and it was decided in said meeting that "The MRPs were granted to firm as per their demand, hence the request of the firm cannot be acceded for revision in MRP, firm may approach C&P Division". The detail is given below:-

S. No.	Reg. No. & Date	Name of Drug(s) with composition	Existing MRP & Pack size
1.	057446 29-04-2009	Dystrone Tablet Each tablet contains:- Dydrogesterone …… 10mg	Rs.25/20's

		(BP Specifications)	
2.	081383 27-07-2016	Episaf 250mg Tablet Each film coated tablet contains:- Levetiracetam …… 250mg (USP Specifications)	Rs.40/1x10's

Later on, firm has submitted fresh applications for product Episaf 250mg Tablet in 293rd meeting and registration letter has also been issued with following details

S. No.	Reg. No. & Date	Name of Drug(s) with composition	Existing MRP & Pack size
1.	102374 29-04-2020	Episaf 250mg Tablet Each film coated tablet contains:- Levetiracetam …… 250mg (USP Specifications)	Rs.787.00 / 30s

For product Dystrone 10mg Tablet, firm has also submitted fresh application which was approved in 313th meeting but registration letter was not yet issued as it was revealed during scrutiny of record that firm has already been granted registration of said product as mentioned above.

Now firm has applied for correction in MRP of Dystrone 10mg Tablet (Reg. No. 057446) as per of C&P Division's letter No. F. 11-12/2021-DD (P) dated 25-06-2021 regarding "Clarification with respect to issuance of revised MRP where the applicant/ pharmaceutical concern had demanded lower MRPs at the time of submission of application for registration" clarified as under;

> The matter was placed before Drug Pricing Committee (DPC) in its 48th meeting held on 03-06-2021 and DPC after considering statutory construction of law, provisions of Drug Pricing Policy-2018 and facts, decided as under;
>
> ***"MRPs of generics are fixed with prospective effect on uniform basis under Drug Pricing Policy- 2018 without regard to a particular brand or applicant. Therefore, all applicants whose registration letters are issued under sub-rule (4) of rule 29 of the Drugs (Licensing, Registration and Advertising) Rules, 1976 after notification of MRPs are entitled for notified MRPs. If a lower MRP is issued to any applicant on the basis of an initial demanded MRP, it will create anomalies against provision of paragraph 12(5) of the Drug Pricing Policy-2018. Therefore, applicants be issued with SRO notified MRPs instead of initial demanded prices. Moreover, corrigendum be issued to applicant companies if initial demanded MRP was notified in registration letter instead of SRO notified MRP under section 12 of the Drugs Act,1976 after approval by the Federal Government.".***

Decision of 320th meeting of RB.

> **Registration Board decided to issue show cause notice to M/s. Saffron Pharmaceuticals (Pvt.) Ltd., Faisalabad for cancellation of Episaf 250mg Tablet (Reg. No. 102374). The Board further decided that registration letter shall not be issued for product Dystrone 10mg Tablet approved in 313th meeting as firm already holds registration of same product.**

In view of above decision of Registration Board, show-cause notice has been served to M/s. Saffron Pharmaceuticals (Pvt.) Ltd., Faisalabad and reply of firm is as under:

They have withdrawn the registration of Episaf 250mg Tablet (Levetiracetam) Reg. No. 081383 and submitted copy of request submitted vide letter Ref. #: Saf/020/076 dated 04-05-2020. They have also not applied for the renewal so; they are not entitled / hold the registration. They had many times applied for correction in price but corrigendum of old registration Episaf 250mg Tablet was not issued. They have not manufactured a single batch of this product due to price issue from registration date 26-07-2016. Renewal of Episaf 250mg Tablet Reg. No. 081383 was expired on 27-07-2021. They have requested to allow firm to retain registration of Episaf 250mg Tablet Reg. No. 102374 and cancel the registration of Episaf 250mg Tablet Reg. No. 081383

They have further submitted that They have not manufactured Dystron 10mg Tablet (Dydrogesterone) Reg. No. 057446 due to price issue from date of registration date 29-04-2009. Updated renewal of this product is also not clear. They had applied for corrigendum which was also

not issued. Hence, they applied new dossier with new fee which was approved in 313th meeting. They have requested to issue updated price corrigendum of Dystron 10mg Tablet (Dydrogesterone) Reg. No. 057446 or issue new registration letter of Dystron 10mg Tablet approved in 313th meeting.

Decision: Registration Board deliberated on reply of M/s. Saffron Pharmaceuticals (Pvt.) Ltd; 19 Km, Sheikhupura Road, Faisalabad in response to show cause dated 27-10-2022 w.r.t. cancellation of registration of Episaf 250mg Tablet (Reg. No. 102374) and decided to confirm renewal status of Episaf 250mg Tablet (Reg. No. 081383) from RRR section and verification of withdrawal letter from R &I for further deliberation in forthcoming meeting.

District, Binh Duong, Vietnam. Firm has also submitted fee of Rs.150000/-, verified from website for correction in name of manufacturer abroad and has also corrected address of manufacturer in registration application.

Decision: **Registration Board decided to approve the correction in name of manufacturer of above product with following details.**
"M/s Phil Inter Pharma Co. Ltd., No. 20, Huu Nghi Blvd., VSIP, Thuan An District, Binh Duong, Vietnam"

Case No.9: Registration Status of Formulations (Diclofenac Potassium 75mg & 100mg, Famotidine 10mg/5ml and combination drug product containing Paracetamol + Thioridazine + Caffeine.

Registration Board in its 317th meeting while considering the case of Diclofenac Potassium 75mg & 100mg, Famotidine 10mg/5ml Suspension and combination drug product containing Paracetamol + Thioridazine + Caffeine on grounds of non-availability of safety and efficacy data as these formulations are neither approved in any of the Reference Regulatory Authorities nor any registration holder / manufacturer submitted data establishing safety and efficacy of these formulations and safety and efficacy profile cannot be established in the absence of a well-established system for reporting of adverse events, decided as under:

For Diclofenac Potassium:

In light of the foregoing discussions, risk-benefit analysis and public health impact of Diclofenac Potassium 75mg and 100mg, the Board made following decisions:

i. Suspended all drug registrations of Diclofenac Potassium 75mg and 100mg under Section 7 (11) (d) read with Section 42 of the Drugs Act, 1976 in the larger public interest, with immediate effect as these are neither approved by any Reference Regulatory Authority nor any safety and efficacy data regarding them is available with any registration holder. Period of suspension will be for one (01) year or till demonstration of its safety and efficacy by conducting indigenous clinical trials in accordance with the Bio Study Rules, 2017 or its approval by the Reference Regulatory Authorities, whichever is earlier. After provision of aforementioned data, cases of such pharmaceutical firms shall be considered on merit by Registration Board.
ii. Suspended manufacturing and import of these drug products immediately and directed to withdraw available stocks from the market in the larger public interest. QA&LT Division, DRAP will monitor and implement the decision in coordination with the respective provincial governments.
iii. Recommended Licensing Division, DRAP for approval of Qualified person for Pharmacovigilance (QPPV) / Local Safety Officer (LSO) whichever is applicable in licensed pharmaceutical units and advised PE&R and BE&R Divisions for implementing similar action for importers of finished drug products as required under Pharmacovigilance Rules, 2022.
iv. Final decision regarding pharmaceutical firms who have obtained interim relief from the Hon'ble Lahore High Court, Lahore shall be announced after decision and direction by the Hon'ble Court. Legal Affairs Division is requested to place the instant decision before the Hon'ble Court and seek expeditious disposal of the matter in the larger public interest.
v. Recommended DRAP Authority for out of queue consideration of registration applications of Diclofenac Potassium 50mg, 25mg and 12.5mg Tablet and 50mg Sachet in order to facilitate the registration holders affected by the instant decision.

For Famotidine Suspension:

In light of the foregoing discussions, risk-benefit analysis and public health impact of Famotidine 10mg/5ml and 40mg/5ml, the Board made following decisions:

i. Suspended all drug registrations of Famotidine 10mg/5ml and 40mg/5ml Liquid Suspension under Section 7(11)(d) read with Section 42 of the Drugs Act, 1976 in the

larger public interest, with immediate effect as neither approved by any Reference Regulatory Authorities nor efficacy data is available with any registration holder. Period of suspension will be for one (01) year or till demonstration of efficacy by conducting indigenous clinical trials in accordance with Bio Study Rules, 2017 or approval by Reference Regulatory Authorities whichever is earlier. After provision of aforementioned data, cases of such pharmaceutical firms shall be considered on merit by the Registration Board

ii. Suspended manufacturing and import of these drug products immediately and directed to withdraw available stocks from the market in the larger public interest. QA&LT Division, DRAP will monitor and implement the decision in coordination with the respective provincial governments.

iii. Final decision regarding pharmaceutical concerns who have obtained interim relief from the Hon'ble Lahore High Court, Lahore shall be announced after decision and direction by the Hon'ble Court. Legal Affairs Division is requested to place the instant decision before the Hon'ble Court and seek expeditious disposal of the matter in the larger public interest.

iv. Recommended DRAP Authority for out of queue consideration of registration applications of Famotidine 40mg/5ml Dry Suspension in order to facilitate the registration holders affected by the instant decision.

For Formulation containing Paracetamol 500mg, Thioridazine 3mg and Caffeine 70mg

In light of the foregoing discussions, risk-benefit analysis and public health impact of the combination (Paracetamol 500mg, Thioridazine 3mg and Caffeine 70mg), the Board made following decisions:

i. Suspended all drug registrations of the combination (Paracetamol 500mg, Thioridazine 3mg and Caffeine 70mg) under Section 7 (11) (b, c & d) read with Section 42 of the Drugs Act, 1976 in the larger public interest, with immediate effect as neither approved by any Reference Regulatory Authorities nor safety and efficacy data is available with any registration holder. Period of suspension will be for 1 year or till sharing of safety and efficacy data either by conducting clinical trials (to establish safety and efficacy) in accordance with the Bio-Study Rules, 2017 or approval by Reference Regulatory Authorities whichever is earlier. After provision of aforementioned data, cases of such pharmaceutical firms shall be considered on merit by the Registration Board.

ii. Suspended manufacturing and import of these drug products immediately and directed to withdraw available stocks from the market. QA&LT Division, DRAP will monitor and implement the decision in coordination with the respective provincial governments.

iii. Recommended Licensing Division, DRAP for approval of Qualified person for Pharmacovigilance (QPPV) / Local Safety Officer (LSO) whichever is applicable in licensed pharmaceutical units and advised PE&R and BE&R Divisions for similar action for importers of finished drug products as required under Pharmacovigilance Rules, 2022.

Accordingly, suspension letters have been issued to all the firms. However, inadvertently following registration holders of Famotidine Suspension 10mg/5ml and Diclofenac Potassium 75mg & 100mg Tablet could not be included in the list previously presented before the Board. Detail is as under;

Case No. 10: Allocation of Quota for Control Substances Ephedrine HCl for the year 2017 to M/s. Sharex Laboratories, Sadiqabad.

The case of M/s. Sharex Laboratories, Sadiqabad was considered in 275th and 286th meeting of Registration Board as per detailed below:-

2. Proceedings of 275th Meeting of Registration Board:

The instant case was presented based on the letter received from Assistant Director (CD) (Dated 21st Sep, 2017) wherein it has been stated that M/s Sharex Laboratories, sadiqabad applied for quota allocation of product Tracodil syrup (Reg. 003158). The case was presented before 43rd meeting of committee on allocation of controlled drug held on 26th July, 2017, the committee deferred the case for issuance of show cause by DRAP for manufacturing of Tracodil syrup (Reg. 003158) 60ml, 400ml pack without approval. It was requested to verify the status of product registration of Tracodil syrup (Reg. 003158) 400ml pack size.

The approved pack sizes of product Tracodil Syrup‖ (Reg. No. 003158) have been verified as per available record i.e 120ml, 450ml (National Formulary 1981) and 60ml (dated 27th October 1988).

3. Decision of 275th meeting of Registration Board:

Registration decided to call M/s Sharex Laboratories, Sadiqabad for personal hearing and for deliberating above mentioned matter before the Registration Board.

4. **Proceedings of 286th meeting of Registration Board:**

Mr. Muhammad Ishfaq, production pharmacist, appeared before Registration Board and apologized on behalf of the firm for applying quota of 400ml pack size of product Tracodil syrup (Reg.003158) without approval.

5. Decision of 286th meeting of Registration Board:

Registration Board in its 286th meeting decided to refer the case to Legal Affair division for legal opinion.

6. Accordingly, the case was refer to Legal Affairs, Division and in response, Legal Affairs, Division has provided following opinion:

i. That M/s. Sharex Laboratory applied for the quota allocation of product Tracodil Syrup (Reg.No.003158).

ii. That the Committee on Allocation of Controlled Drugs held on 26.07.2017 deferred the case for issuance of show cause by DRAP for manufacturing of "Tracodil Syrup" (Reg.No.003158) 60ml, 400ml pack without approval. It was requested to verify the status of product registration of "Tracodil Syrup" (Reg.No.003158) and 60ml (dated 27th October, 1988).

iii. That the approved pack size of the product "Tracodil Syrup" (Reg.No.003158) have been verified as per available record i.e 120ml, 450ml (National Formulary 1981) and 60ml (dated 27th October, 1988).

iv. That Mr. Muhammad Ishfaq production pharmacist, appeared in 286th meeting before Board and apologized on behalf of the firm for applying quota of 400ml pack size of product "Tracodil Syrup" (Reg.No.003158) without approval.

v. That the Registration Board in 286th meeting referred the case to Legal Affairs, Division for legal opinion.

vi. Drug Regulatory Authority of Pakistan Act, 2012 in Schedule-II A(1) (a) (vii) prohibits export, import or manufacture and sale or sell of any therapeutic goods which is not registered or is not in accordance with conditions of registration as disclosed in the registration dossier and that has undergone pharmaceutical evaluation. Furthermore, Schedule-II(A)(c) prohibits to sell any therapeutic goods except under, and in accordance with the conditions of a license issued under this Act. In addition, Schedule-II A(a)(f) prohibit to supply an incorrect, incomplete or misleading information when required to furnish any information under this Act or the rules.

vii. In this regard, DRAP Act, 2012 under section 27 read with schedule-III (6) provides penalty for violating the prohibitions mentioned above.

7. Decision of 289th meeting of Registration Board:

In light of the opinion of Legal Affair's Division on the matter, Registration Board deliberated the case and decided to issue show cause notice to M/s Sharex Laboratories, Sadiqabad for violation of condition of drug registration, as follows:

- Cancellation of registration.
- Suspension of registration.
- Prosecution in Drug Court

8. Accordingly, show cause notice was served to M/s. Sharex Laboratories, Sadiqabad.

9. Registration Board in its 295th meeting deliberated on the matter in details and decided to give an opportunity of personal hearing as per Drug Act, 1976 and Rules framed there under to M/s. Sharex Laboratories, Sadiqabad in forthcoming meeting of Registration Board.

10. In 296th meeting M/s. Sharex Laboratories, Sadiqabad was called for personal hearing. Mr. Muhammad Ishfaq, production pharmacist, appeared before Registration Board and apologized on behalf of the firm and stated that firm was unaware about the approval of pack sizes of Tracodil Syrup (Reg.No.003158) as on initial registration letter no pack size was written. He has further stated that firm will submit all the relevant documents / approvals granted by DRAP regarding said product.

11. Registration Board in 296th meeting deferred the case for further deliberation after submission of documents as stated by representative of the firm.

In compliance with 296th meeting of Registration Board firm has submitted following documents;

i. Initial registration letter of Ammonium Chloride Syrup Reg. No. 003158 dated 06-11-1977 in which Pack size & MRP are not mentioned.

ii. Change of brand name letter from Ammonium Chloride Syrup to Tracodil Cough Syrup dated 16-08-1979

iii. Price revision of locally manufactured / fixation of prices of additional packs letter dated 27-10-1988 in which Pack sizes along with MRPs are mentioned with following details;

Sr. No.	Reg. No.	Name of Drug	Packing	MRP
1.	003158	Tracodil Cough Syrup	120ml 60ml 450ml	8.00 5.00 18.50

12. **Decision of 308th Meeting of registration Board:**

Registration Board after through deliberation decided as follows:

- Referred the case to Costing & Pricing Division for proceeding as per rules for overcharging of MRP.
- Manufacturing of product as per approval granted by relevant forums.

13. Accordingly, above decision of Registration Board was communicated to Costing & Pricing Division and reply of said Division is as under;

"In light of opinion of the Legal Division, the matter is of selling of an un-approved pack size which may fall under violation of the conditions of Registration. Moreover, no evidence of overpricing has been provided. Therefore, Division of PE&R may proceed in accordance with the opinion of the Legal Division."

14. Opinion of Legal Affair's Division is as under;

i. Drug Regulatory Authority of Pakistan Act, 2012 in Schedule-II A(1) (a) (vii) prohibits export, import or manufacture and sale or sell of any therapeutic goods which is not registered or is not in accordance with conditions of registration as disclosed in the registration dossier and that has undergone pharmaceutical evaluation. Furthermore, Schedule-II(A)(c) prohibits to sell any therapeutic goods except under, and in accordance with the conditions of a license issued under this Act. In addition, Schedule-II A(f) prohibit to supply an incorrect, incomplete or misleading information when required to furnish any information under this Act or the rules.

ii. In this regard, DRAP Act, 2012 under section 27 read with schedule-III (6) provides penalty for violating the prohibitions mentioned above.

Decision of 317th meeting of RB

Registration Board deliberated on the matter in details and decided to give an opportunity of personal hearing as per Drug Act, 1976 and Rules framed there under to M/s. Sharex Laboratories, Sadiqabad in forthcoming meeting of Registration Board.

As per above decision of the Board, case was referred to **Legal Affairs Division and opinion of said division** is as under:

"The apex courts have guided that Principles of natural justice must be read into each and every statute unless and until it is prohibited by the statute itself---Even if there is no provision as to issuance of notice of personal hearing to the affected party, in a statute, it cannot override the principles of natural justice and an opportunity of a hearing has to be provided to the affected party. Registration Board is statutory Board constituted under Section 7 of the drugs act, 1976. And if some new facts came before the Registration Board regarding the firm, then an opportunity of personal herring may be provided to the firm before final decision of the Board if it thinks fit to fulfill the principle of natural justice. It is pertinent to note that in case of any grievance the firm has alternate remedy of appeal under Section 9 of the drugs act, 1976 before the Appellate Board of the Authority."

Proceedings of 323rd Meeting:

It was discussed in meeting that before proceeding for penalty for prohibitions, as per opinion of the Legal Affair's Division mention in para 14 above, show-cause notice has to be issued to the firm for violation of condition of registration as firm is manufacturing un-approved pack size of their registered product.

Decision: Registration Board decided to issue show-cause notice under Section 7 (11) (c) to M/s. Sharex Laboratories (Pvt) Ltd. KLP Road Sharex Colony, P.O Box No. 11, Sadiqabad District Rahim Yar Khan for violation of condition of registration.

Case No.03: Issuance of Duplicate Registration Letter

1.	**000794**	Aqua Pro Injection Each ampoule contains: Aqua Pro Injection	100 x 5ml	Rs.30/-
2.	**000793**	Atropine Sulphate Injection Each ml contains: Atropine Sulphate 1mg	1ml x 100	Rs.25/-
3.	**000784**	Benzyl Pencillin Injection 5lac Each vial contains: Benzyl Penicillin 5 lac	1 vial	Rs.1.42/-
4.	**000786**	Benzyl Pencillin Injection 10lac Each vial contains: Benzyl Penicillin 10 lac	1ml	Rs.2.20/-
5.	**000792**	Chloroquine Phosphate Injection Each ml contains: Chloroquine Phosphate 40mg	5ml x 100	Rs.82/-
6.	**000790**	Benzathine Penicillin Injection 12 lac Each vial contains: Benzathine Penicillin 12 lac	1 vial	Rs.4.50/-
7.	**000791**	Benzathine Penicillin Injection 6 lac Each vial contains: Benzathine Penicillin 6 lac	1 vial	Rs.2.45/-
8.	**000785**	Streptomycin Procaine Penicillin Forte Injection Each vial contains: Streptomycin Sulphate 1gm Procaine Penicillin 3,00,000 Units Benzyl Penicillin 1,00,000 Units	1 vial	Rs.2.67/-
9.	**000782**	Procaine Penicillin Forte Injection 4lac Each vial contains: Procaine Penicillin 4 lac	4 lac 20 lac	Rs.1.42/- Rs.4.08/-
10.	**000783**	Streptomycin Injection Each vial contains: Streptomycin Sulphate 1gm	1 vial	Rs.1.50/-

Case was referred to RRR Section for confirmation of renewal status of these products and reply of RRR Section is reproduced as under:

"The renewal applications for the year 2021 and 2016 were submitted within time w.r.t date of registrations as provided by the firm in renewal application.

The section is requested to verify the date of registration from their record as the copies of the registration letters are not submitted by the firm in aforesaid renewal applications."

Decision: Registration Board advised to seek guidance from Legal Affair Division.

Case No.11: Registration of M/s. NBS Pharma 18 Km Raiwind Road Lahore.

Following product of M/s N.B.S Pharma, Lahore were considering 215th meeting of registration board and decided as follows.

Sr. No	Name of Drug	Decision
1.	Povidone-1 Solution Each 100ml contains:- Povidone Iodine USP 7.5gm equivalent to 0.75% available iodine (USP)	Approved subject to the submission of the last Inspection report.

It is submitted that the above cases were discussed in 215th meeting of registration board and decision of the board has been reflected in the above table. The firm has now submitted the

differential free of Rs. 12000/- and submitted the inspection report dated 12.11.2014. which shows details of the section as under: -

External Preparation Section: -

This section comprised of preparation and filling rooms, equipped with preparation vessels of different sizes. Silver san mixer and filling machines was installed HVAC system was provided in this area and was functional at the time of inspection. Re-packing area was equipped with filling machine and different size vessels. HVAC system was installed production area furnish with epoxy.

Registration Board in its 260th meeting deferred the case for GMP status of the firm and confirmation of section either from Licensing division or from panel / renewal inspection report.

The firm has submitted copy of inspection report 20-09-2019 with conclusion that the firm has rectified most of the shortcomings pointed out during last inspection. The panel recommends that M/s. N.B.S Pharma, Lahore may be allowed to resume the production in all sections.

Mr. Ajmal Sohail Asif Area FID vide letter No. 15075/2016-DRAP (L-II) dated 17-10-2016 clarified that the firm has approved external preparation section and is already manufacturing Povidone I Solution, (Povidone Iodine SP. 10gm eq. to 1% Iodine) under Reg. No. 025552

Decision of 296th meeting:

Registration Board deferred the case for confirmation of section approval from Licensing division.

In response to above decision of Registration Board, Licensing Division has forwarded a letter of Regularization of Layout Plan of M/s. NBS Pharma 18 Km Raiwind Road Lahore, dated 07-02-2022 in which following sections are mentioned:

1. External Preparation Section.
2. Liquid Repacking Section.

Decision: Registration Board deferred the case till the approval of regularization of manufacturing facility by the Licensing division.

Case. No.12: Standardization/Correction of Label Claim as Per Reference / Innovator Product.

a. Regarding following Vitamins-Minerals and cough & cold formulations, **Registration Board decided to constitute working group(s) of relevant experts for evaluation of therapeutic value with respect to the quality, safety and efficacy of both cough and cold preparation and Vitamin-Mineral Formulation.**

Detail of formulations along with their status is as under:

i. Formulations containing Vitamins-Minerals

Sr. No.	Product Name/Formulation	Status of Product
1.	Multivitamin Syrup Each 4ml contains: Vitamin B1…….2mg VitaminB2…….2mg Niacinamide…….10mg Vitamin B6…….2mg Calcium Pantothenic acid…2mg Choline……20mg Inositol…….10mg Vitamin B12……5mcg ICI Pakistan	All the ingredients are between RDA to UL limits. Choline and Inositol UL level has not been mentioned in the approved table.
2.	Neurobion Injection	Approved in DMDI Germany

	Each 3ml contains: Vitamin B1(Thiamine Mononitrate)……..100mg Vitamin B6 (pyridoxine Hydrochloride) ….100mg Vitamin B12(cyanocobalamin)…1000mcg (M/s Martin Dow Marker Ltd)	
3.	Theragran-M tablets Each tablet contains: Vitamin A…….5500IU Vitamin D……400IU Vitamin B1……3mg VitaminB2…….3.4mg Vitamin B6…….3mg Vitamin B12….9mcg Niacinamide….30mg Vitamin E….30IU Vitamin C….120mg Calcium Pantothenate….10mg Folic Acid….0.4mg Biotin…….15mcg Calcium ……40mg Iron …….27mg Iodine ……150mcg Magnesium …….100mg Copper….2mg Zinc…….15mg Manganese……5mcg Chromium….5mg Selenium …….10mcg Potassium ….7.5mg Chloride….7.5mg (M/s GSK Pakistan LTD)	All the ingredients are between RDA to UL limits.
4.	Theragran-H tablets Each tablet contains: Vitamin A ….8333IU Vitamin D….133IU Thiamine mononitrate….3.3mg Riboflavin…….3.3mg Pyridoxine HCl…….3.3mg Niacinamide…….33.mg Calcium pantothenate….11.7mg Vitamin E……5IU Vitamin B12…….50mcg Folic Acid…….0.33mg Vitamin C……100mg Copper…….0.67mg Magnesium……41.7mg Iron Elemental (as ferrous Fumarate)...66.7mg (M/s GSK Pakistan LTD)	All the ingredients are between RDA to UL limits except elemental Iron as the UL limit of elemental iron is 60mg while the amount used in the formulation is 66.7mg.

ii. Formulations used in treatment of cough and cold

Sr. No.	Product Name/Formulation	Status of Product
1.	Dextromethorphan Hydrobromide + Diphenhydramine hydrochloride + Pseudoephedrine hydrochloride cough Syrup Each 5ml contains: Dextromethorphan hydrobromide….6.5mg Diphenhydramine Hydrochloride….14mg Pseudoephedrine hydrochloride ….22.5mg Zafa Pharma	Approval status in RRA has not been confirmed.
2.	Dextromethorphan Hydrobromide + Diphenhydramine hydrochloride + Pseudoephedrine hydrochloride cough Syrup Each 5ml contains: Dextromethorphan hydrobromide….6.5mg Diphenhydramine Hydrochloride….14mg Pseudoephedrine hydrochloride ….22.5mg Zafa Pharma	Approval status in RRA has not been confirmed.
3.	Reltus DM liquid Each 5ml syrup contains: - Dextromethorphan HBr….10mg Pseudoephedrine HCL….30mg Chlorpheniramine Maleate (M/S PHARMATEC PAKISTAN)	Approval status in RRA has not been confirmed.
4.	Reltus C&F Syrup Each 5ml syrup contains: Paracetamol…….80mg Pseudoephedrine HCl….15mg Chlorpheniramine Maleate…….1mg (M/S PHARMATEC PAKISTAN)	Approval status in RRA has not been confirmed.
5.	Reltus C&F Tablet Each tablet contains: - Paracetamol….600mg Pseudoephedrine HCl….60mg Chlorpheniramine Maleate…4mg (M/S PHARMATEC PAKISTAN)	Approval status in RRA has not been confirmed.
6.	Cofcol tablet Each tablet contains: Paracetamol ….325mg Pseudoephedrine HCl….30mg Dextromethorphan HBr….10mg Chlorpheniramine Maleate….1mg Vitamin C….50mg (Abbott)	Approval status in RRA has not been confirmed.
7.	Adicos-M Syrup Each 5ml contains: - Dextromethorphan Hydrobromide B.P….6.5mg Diphenhydramine Hydrochloride B.P….14mg Pseudoephedrine Hydrochloride B.P….22.5mg	Approval status in RRA has not been confirmed.

	Menthol B.P….1.75mg (Zafa)	

iii. Other formulation

Sr. No.	Product Name/Formulation	Status of Product
1.	Cartigen/Jovit tablets Each tablet contains: Glucosamine Sulphate …500mg Chondroitin sulphate….400mg M/s Getz Pharma	Approval status in RRA has not been confirmed.

b. Regarding following other formulations, **Registration Board endorsed its decision regarding grant of registration and advised to inform Task Force on Health about above mentioned status. For Naproxen + Esomeprazole and Cimetidine, registration letters will be issued after response of Health Task Force."**

Sr. No.	Product Name/Formulation	Status of Product
1.	Trimebutine Maleate tablet 200mg Each tablet contains: Trimebutine Maleate…….200mg	Approved in Health Canada
2.	Trihexyphenidyl HCL tablet 2mg Each tablet contains: Trihexyphenidyl HCL…….2mg	Approved in FDA
3.	Paracetamol + Caffeine Tablet Each tablet contains: - Paracetamol BP….500mg Caffeine …….65mg	Approved in MHRA, as film coated tablet
4.	Buscopan Plus tablets Each film-coated tablet contains: Hyoscine-N Butyl bromide….10mg Paracetamol……500mg (M/s Martin Dow Marker LTD)	Approved in DMDI Germany
5.	Esonap 20/500 Tablet (Naproxen 500mg+Esomeprazole as Magnesium 20mg) of M/ s Dyson Research Laboratories (Pvt.) Ltd. 28th KM Ferozpur Road, Lahore.	Approved in USFDA, EMA and MHRA
6.	Promig plus tablets 500mg/20mg (Naproxen 500mg + Esomeprazole as magnesium 20mg) of M/s Global Pharmaceuticals (Pvt.) Ltd, Plot No. 204-205,, Industrial Triangle, Kahuta Road, Islamabad.	
7.	Esonap 20/500 Tablet (Naproxen 500 mg + Esomeprazole as Magnesium 20mg) of M/s. Vision Pharmaceuticals (Pvt.) Ltd., Plot No. 22 - 23, Industrial Estate, Kahuta road, Model Town, Islamabad.	
8.	Promig plus tablets 375mg/20mg (Naproxen 375mg + Esomeprazole as magnesium 20mg) of M/s Global Pharmaceuticals (Pvt.) Ltd, Plot No.	

	204-205,, Industrial Triangle, Kahuta Road, Islamabad.	
9.	Cimtid Fort tablet 800mg (Cimetidine 800mg) of M/s Semos Pharmaceuticals, Pvt. Limited, Plot # -Sector 12 ,11A, North Karachi Industrial Area, Karachi.	Approved in USFDA and MHRA

Above decision was communicated to the Health Task Force for guidance. Health Task force has allowed to proceed as per decision of Registration Board as these cases have been endorsed for second time in 297th meeting of the Registration Board. Accordingly, registration letters of Esomeprazole + Naproxen Tablet and Cemitidine 800mg Tablet were issued.

Decision: Keeping in view the above facts, Registration Board deliberated and discussed the case in detail and decided as under:

a. **Sr. No. 01-03 and 12-15: Endorsed its decision regarding grant of registration**

				Batch Size for Stability Batch 2 (50 Bottles)			Chemical testing: 5g Retention Sample: 5g	
				Batch Size for Stability Batch 3 (50 Bottles)				

Decision: Registration Board decided as under:

i. **Recommended the allocation of controlled drug substance(s) i.e., i) Alprazolam ii) Bromazepam iii) Lorazepam iv) Diazepam v) Clonazepam vi) Phenobarbitone and vii) Pseudoephedrine along-with their reference standard(s) and related compound(s) for trial, development & stability batches of above-mentioned products.**

ii. **The firm shall be advised to maintain records of used substances and waste materials having above APIs and same shall be destroyed after approval of Controlled Drugs Division, DRAP.**

iii. **Marketing Authorization to M/s. Pharman Pharmaceuticals (Pvt.) Ltd., Gujranwala shall be granted as per applicable policy regarding Psychotropic / Narcotic sections.**

iv. **Authorized Chairman Registration Board for disposal of all types of cases where approval/ recommendation of Registration Board is required for procurement of controlled drug substances/ innovator's drug product pack/ reference and impurity standards etc. for trial/ development & stability purposes.**

Case No. 01: Change in registration status of products from Bulk Import Local Repacking to Local Manufacturing applied by M/s Martin Dow Limited, Karachi.

M/s Martin Dow Limited, Karachi applied for change in registration status of their registered products Alemed Injection 5mg/5ml
(Reg. No. 001049) from bulk import local repack to local manufacturing as per following details:

3.	Name, address of Applicant / Marketing Authorization Holder	M/s Martin Dow Limited, Plot no. 37, Sector 19, Korangi Industrial Area, Karachi
	Name, address of Manufacturing site.	M/s Martin Dow Limited, Plot no. 37, Sector 19, Korangi Industrial Area, Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13845 dated 08.06.2022 Dy No 25716 dated 12.09.2022
	Details of fee submitted	PKR 75,000/-: dated 03.06.2022
	The proposed proprietary name / brand name	**Rivotril Tablets 0.5mg** **(Reg No 001049)** Last renewal dated **13.04.2020**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains Clonazepam…… 0.5mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Benzodiazepines
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	50’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by USFDA KLONOPIN 0.5mg TABLET’’ manufactured by CHEPLAPHARM ARZNEIMITTEL GMBH
	For generic drugs (me-too status)	Tovir 0.5mg Tablets by Adamjee Pharmaceuticals Pvt. (Registration No. : 080335)
	GMP status of the Finished product manufacturer	GMP inspection conducted on 20.10.2021 Tablet (psychotropic) section approved on 30.07.2018
	Name and address of API manufacturer.	F.I.S. –Fabbrica Italiana Sintetici S.p.A. **Address:** *Site of Montecchio Maggiore*

Decision: Registration Board approved the registration status of Rivotril Tablets 0.5mg (Reg No 001049) & Rivotril Tablets 2mg (Reg No 003626) from bulk import, local repacking to local manufacturing by M/s Martin Dow Limited, Plot no. 37, Sector 19, Korangi Industrial Area, Karachi.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 01: M/s. Hamaz Pharmaceuticals Pvt Ltd., 13km Bosan Road, Lutfabad, Multan.

M/s Hamaz Pharmaceuticals Pvt. Ltd., Multan has submitted the application for following correction in their formulation:

1.	021324	Skymox Forte Syrup Each 5ml contains:- Amoxycillin Trihydrate eq. to Amoxycillin Base… 250mg	Skymox Forte Suspension	15-05-1998 **Last renewal** 09-05-2018	Fee Rs 30,000/- deposited dated 06-07-2022 R&I Dy. No. 19845 dated 06-07-2022
2.	008184	Skymox Dry Syrup Each 5ml contains:- Amoxycillin Trihydrate eq. to Amoxycillin Base… 125mg	Skymox Suspension	24-05-1997 **Last renewal** 14-04-2022	Fee Rs 30,000/- deposited dated 06-07-2022 R&I Dy. No. 19846 dated 06-07-2022

The case was considered by PRVC and referred to Registration Board as follows:
"The Committee deferred the case and advised to place before Registration Board for discussion on the dosage form mentioned on label of Amoxil Syrup."

It is pertinent to mention that the Innovator drug product is in also Suspension formulation and brand leader in Pakistan i.e. Amoxil of M/s GSK Pakistan, Karachi has also approval of oral suspension.

Decision: Registration Board approved the request of the firm for correction in dosage form of above products from Syrup to Oral Suspension.

Case No. 2: M/s. Lahore Chemical & Pharmaceuticals Works Pvt Ltd., 137 Shahrah Maulana Jalaludin Roomi, Lahore.

M/s. Lahore Chemical & Pharmaceuticals Works Pvt Ltd has submitted application for resemblance / similarity of brand name Pulvilox Tablet Reg. No. 041318 of M/s Hansel Pharmaceuticals (Pvt.) ltd., Lahore with registered **Pulvilox Tablet 250mg, 500mg Reg. No. 069469 & Reg. No. 069470** of **M/s. Lahore Chemical & Pharmaceuticals Works Pvt Ltd., Lahore**.

In this context, it is submitted that the brand Pulvilox was issued first to M/s. Hansel Pharma on **28-02-2013**. Later on, M/s Hansel Pharmaceuticals issued NOC to transfer the brand name in name of M/s Master Pharma (Pvt.) Limited and surrendered all/ any rights of ownership of the said brand. However, the said brand name was never issued in name of M/s Master Pharmaceuticals (Pvt.) Ltd.

Later on, the same brand name was issued to M/s Lahore Chemical & Pharmaceutical Work (Pvt.) Ltd., Lahore against their request of brand name change of registered products **Levopath 250mg (Reg. No. 069469) & Levopath 500mg (Reg. No. 069470) on 04-05-2016.** Accordingly, a letter was issued to M/s Hansel Pharma for change in brand name as they had already surrendered the rights in favor of M/s Master Pharma.

Now, M/s Hansel Pharmaceuticals (Pvt.) Ltd. has submitted a copy of letter No. F. 5-180/2013-Reg. V dated 14-10-2016 issued by then DDC Reg. V advising M/s Lahore Chemical & Pharmaceutical Works (Pvt.) Ltd., Lahore to stop the production of said brand and apply for change in brand name. Moreover, M/s Hansel Pharma submitted that they have supply agreement with Master Pharma to transfer ownership in respect of the mentioned brand name when Master Pharma develop their own manufacturing facility and Master Pharma did not fulfill that requirement. Futhermore, under the agreement NOC to Master Pharma cannot use that brand name to manufacturer its product (Contract & Toll Manufacturing) from other manufacturer.

The case was considered in 88th meeting of PRVC wherein the Committee decided as follows:

"The Committee deferred the case and advised to place the case before Registration Board for discussion."

Decision: Registration Board referred the case for legal opinion on the use of same brand name with two companies on the basis of following details:

i. **M/s Hansel Pharmaceuticals (Pvt.) Ltd., Lahore is marketing their product with brand name *"Pulvilox"*, while they had already surrendered all/ any rights of ownership of the said brand to M/s Master Pharma (Pvt.) Limited. It is pertinent to mention here that M/s Master Pharma (Pvt.) Ltd. is neither a licensed manufacturer nor it has ever applied for said brand name.**

ii. **M/s Lahore Chemical & Pharmaceutical Works (Pvt.) Ltd., Lahore is also marketing their product with brand name *"Pulvilox"*, while initially this brand name was issued to M/s Hansel Pharmaceuticals (Pvt.) Ltd., Lahore and M/s Lahore Chemical & Pharmaceutical Works (Pvt.) Ltd., Lahore had already been advised to change the brand name vide letter No. F. 5-180/2013-Reg. V dated 14-10-2016.**

Case No. 3: M/s Pharmix Laboratories (Pvt.) Ltd., Lahore.

M/s Pharmix Laboratories (Private) Limited, Lahore submitted that they are manufacturer and exporter of Ulcofin (Oral Liquid Suspension) with registration number 053752. DRAP issued a letter for suspension of Famotidine (Oral Liquid Suspension) to suspend all registrations of Famotidine suspension but the name of Pharmix Laboratories was not in that list. The firm further submitted that they tried their best to submit appeal against the decision and deposited fee of Rs. 50,000/- but their appeal was not received as their name was not included in the list. The firm further submitted that they are exporting their products and Appellate Board has already allowed oral liquid formulations, hence, the firm requested to issue them suspension letter in light of decision of 317th meeting, so that they can submit their appeal to Appellant Board.

In this context, it is submitted that Ulcofin Suspension 10mg (Reg. No. 053752) was registered in name of M/s Pharmix Laboratories as liquid suspension. Registration Board in its 250th meeting while considering another case of such formulation, decided as follows:

- *Applicants shall revise their formulation as per innovator (new registration application with complete fee) within six months if manufacturing facility is approved by CLB.*
- *For already registered drugs, same procedure as mentioned above (at Sr. No. i) shall be adopted. Otherwise show cause notice shall be issued for de-registration of registered drugs in this formulation.*
- *All such application shall be processed on priority basis."*

Accordingly, the firm in 2017 applied for the standardization of formulation as per reference regulatory authority and duplicate dossier in January, 2022. The application was discussed in 317th meeting along with other cases of Famotidine and a suspension letter was issued to the registration holders of Famotidine liquid suspension. However, as the firm had already applied for standardization of formulation, therefore, the suspension letter was not issued to the firm and the firm could not file the appeal. Now, as the Appellate Board has allowed resumption of sale and manufacturing of Famotidine liquid suspensions only for the firms who were in appeal before Appellate Board and as the firm could not submit the appeal as noted above, therefore, now the firm is requesting to issue them suspension letter, so that they can file the appeal before Appellate Board.

Decision: Registration Board deliberated the matter in details and decided to refer the case for legal opinion on the request of the firm for resumption of manufacturing and sale of Ulcofin Suspension 10mg (Reg. No. 053752) on the basis of above details.

Case No.01: Registration of Drug (s) of M/s Pharmasol (Pvt.) Ltd, Plot No. 549, Sunder Industrial Estate, Lahore, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML before 2005.	Copy of DML provided Approval of relevant section verified from letter No. F 1-17/2005-Lic dated 22-12/2017
GMP Status. Copy of Inspection report/GMP certificate.	GMP status verified from GMP certificate based / on inspection dated 22-08-2022
Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date
I	**II**	**III**	**IV**
1.	Garakal Infusion Each 100ml contains: L-Arginine HCl..... 4.2gm Levocarnitine.....2gm	Purchase order from Uzbekistan	Dy. No. 8350 (29.09.2022) Rs.75,000/- (27.09.2022)
2.	Garakarnit Infusion Each 100ml contains: L-Carnitine.....2g	Purchase order from Uzbekistan	Dy. No. 8351 (29.09.2022) Rs.75,000/- (27.09.2022)
3.	Garakarnit Injection Each 5ml contains: L-Carnitine.....2g	Purchase order from Uzbekistan	Dy. No. 8352 (29.09.2022) Rs.75,000/- (27.09.2022)

Decision: Registration Board approved request of the firm for registration of above mentioned products for Export Purpose Only. Since applied formulations are neither registered for local use nor approved by any RRA (as adopted by Registration Board in 275th meeting) hence manufacturer and importing country shall be responsible for safety, efficacy and quality of drug product.

Case No.02: Registration of Drug (s) of M/s Scotmann Pharmaceuticals, Plot No. 5-D, I-10/3, Islamabad, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML before 2005.	Copy of DML provided Approval of relevant section verified from Inspection renewal of DML dated 22-11/2018

GMP Status. Copy of Inspection report/GMP certificate.	GMP status verified from GMP certificate based / on inspection dated 09-11-2020
Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(EFD)/Fee with date
I	II	III	IV
1.	Livia Dry Suspension 10mg Each ml contains: Active Ingredient: Sildenafil (as citrate).....10mg	Purchase order from Afghanistan	Dy. No. 8299(28.09.2022) Rs.75,000/- (09.09.2022)

Decision: Registration Board deferred the case as the matter of registration of Sidenafil containing formulations is under consideration of Policy Board of DRAP.

Case No.03: Registration of Drug (s) of M/s Wnsfield Pharmaceuticals, Plot No. 122, Block-A, Phase-V, Industrial Estate Hattar, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;

Undertakings that the applied product is exclusively for export purpose and the proposed names/ label/ colour do not resemble with already registered brands in importing country.	Provided (P.No.1231-1232/C)

Detail of the products is given below:

Sr.#	Name of Drug(s) with composition	Generic/RRA Status	Dy.No.(R&I)/Fee with date
I	II	III	IV
1.	Ferroplex 40mg Injections Each ml contains: Activated Vitamin B12 (injectable raw liver, N.F. 2mcg/ml) Equivalent to Cyanocobalamin……...…….0.20mcg Vitamin C……...……5.00mg Vitamin B12 (Cyanocobalamin)……500.00mcg Ferrous Citrate…….....….0.02g Panthenol (B5)……...…….3.00mg Thiamine HCl (B1)……..……..50.00mg Riboflavin (B2)……...……0.60mg Pyridoxine HCl (B6)……...……3.00mg Niacinamide (B3)…….…….45.00mg Choline Chlorhydrate…….……6.00mg Inositol…….……..6.00mg	Mexico Approved Formulation	Dy. No.7578/22 (07.04.2022) Rs.75,000/- (11.03.2022)

Remarks: Above mentioned formulation has been added in Red List i.e. List of Firms and their products subject to detention without physical examination.

Decision of PRVC: The Committee evaluated the case and deferred the request of firm for approval status in RRA.

The FDA Red List is for specific products and firms and is not a generalized list. Moreover, **t**he firm has submitted the copy of Purchase order of 2000 Injections form Egypt.

Decision: Registration Board approved the request of the firm for registration of product for Export Purpose Only. Since applied formulation is neither registered for local use nor approved by any RRA (as adopted by Registration Board in 275th meeting) hence manufacturer and importing country shall be responsible for safety, efficacy and quality of drug product.

1. Change of Primary Packaging Material of Drug(s) of M/s. ICI Pakistan Ltd. S-33, Hakes Bay Road SITE Karachi.(Page No.0-0/C).

M/s. ICI Pakistan Ltd Karachi, has requested for change in primary packaging material of their following registered product details are as under:

Sr.#	Reg. No.	Name of Product with composition	Existing Packaging	Proposed Packaging
1.	097003	Citralka Liquid Each 5ml contains: Disodium hydrogen citrate……1.351g	Amber Glass Bottle	Amber PET Bottle

Firm has submitted the following documents as per SOP (approved in 283rd meeting).

Sr.#	Documents Required (as per SOP M-283)	Information Provided
1.	Application with required fee as per relevant SRO.	Fee of Rs.10,000/- dated 18.08.2022 Application dated: 18.08.2022 (R&I DRAP 23389) Reply dated 01.04.2022(R&I DRAP 8554)
2.	Copy of registration letter and last renewal status	Reg. 097003 (dated 28.06.2018) Product transferred from Pfizer Pakistan Limited Karachi site on 17.05.2011 Last renewal dated Nil
3.	Justification of proposed change including data on the suitability of the container-closure system (e.g. extractable/ leachable testing (where applicable), permeation testing, light transmission) demonstrating equivalent or superior protection compared to the current packaging system. For changes to functional packaging related to container closure (e.g. MDIs etc.), data to demonstrate the functioning of the new packaging	Provided
4.	If the container closure system of applied formulation is different from that of the reference product, manufacturer will place first three lab scale batches or developmental scale batches as set by Registration Board in 276th meeting, at 3 months of accelerated and 3months of real time studies for compatibility of applied formulation with container closure system as directed by Pharmacopeia of Reference Regulatory Authorities. Registration Board shall be informed immediately and along with market withdrawal in case of any significant change about result of stability studies	Firm has submitted stability data as follows: **Accelerated studies** (Temp 40◦C±2◦C/ RH 75%±5%) Interval: 0,3,6 months **Long term studies** (Temp 30◦C±2◦C /RH 65%±5%) **Interval**: 0,3,6,9,12,18,24 months **Testing parameters**: Description, pH, Assay, Total Aerobic Microbial Count, Total Yeast & Mold Count,Pathogens **Reference Test Method: Inhouse** **Batch No:** T-04, T-05 & T-06 **Batch size**: 2070 Units
5.	Shelf life of the drug product supported with justification.	Provided
6.	Existing and proposed container closure system with differences (e.g. description, materials of construction of primary packaging components,	Provided

	specifications, if appropriate) highlighted in tabular form.	
7.	If the proposed change requires change in manufacturing section/ facility, then a new registration application with prescribed fee shall be submitted.	Not applicable
8.	An Undertaking that: • To perform stress studies. • In case of any quality complaint/OOS result observed by the marketing authorization holder as a result of this change, the same shall be reported to registration board and all the stock shall be recalled from the market immediately. • Provided information is true & correct.	Provided

Decision of 90-PRVC:
"The Committee deferred the case for submission of batch size, evidence of availability of formulation in Amber PET Bottle in RRAs and clarification of performing assay by titration method instead of HPLC method."

Firm's Reply		
S.No.	**Query**	**Response of the firm**
1.	Status in reference regulatory authority	Change of registration status from Pfizer to ICI Pakistan of Citralka was approved by the Registration Board in its 284th meeting based on the confirmation by TGA Australia (copy of DRB decision is attached. RRA of Citralka Liquid in Pet bottle is not available hence reference of Citralka Liquid marketed by Pfizer India in PET bottle is submitted. Due to non-availability of SRA, Primary packing analysis has been provided in addition to the stability studies as submitted in similar cases of mucaine suspension and Ketress syrup.. We would also like to inform that approval for change primary of packing of Registered Drug Ketress syrup was approved by the PRV, Letter No.F.80-PRVC/2022(PR-I)
2.	Trial Batch Size	2070 Units
3.	Rationale for performing titrimetric analysis	Citralka Liquid is tested through titration method since its development by Pfizer Pakistan. At the time of manufacturing site change, ICI Pakistan Limited adopted the same testing method. Analytical method validation performed by ICI Pakistan Limited is also provided.

The firm has also stability data of 24 months.

Decision: Registration Board approved the change in primary packaging of Citralka Liquid (Reg. No. 097003) from Amber Glass Bottle to Amber PET Bottle. The firm shall perform continuous monitoring and in case of any quality complaint/ OOS result observed by the marketing authorization holder as a result of this change, the same shall be reported to Registration Board and all the stock shall be recalled from the market immediately.

2. Application for permission of secondary packaging of registered products on contract basis applied by M/s Sami Pharmaceuticals (Pvt.) Ltd., Karachi.

M/s Sami Pharmaceuticals (Pvt.) Ltd., F-95, Off Hub River Road, SITE, Karachi applied for permission to conduct secondary packaging of their following registered products on contract basis from their other plant situated at Plot No. F-140/A, SITE, Karachi:

Sr. No.	Reg. No.	Name of Product
1.	067516	ECASIL (Linezolid) 200mg/100ml Infusion
2.	067518	ECASIL (Linezolid) 600mg/300ml Infusion

3.	037711	EFFIFLOX (Levofloxacin) 500mg/100ml IV Infusion
4.	053227	MOFEST (Moxifloxacin HCl) Infusion
5.	012066	NOVIDAT (Ciprofloxacin) 200mg/100ml Injection
6.	042270	NOVIDAT DS (Ciprofloxacin) 400mg/100ml Infusion
7.	053223	PROVAS (Paracetamol) Infusion
8.	097180	UBROF (Ibuprofen) 400mg/100ml Infusion
9.	019704	GRASIL (Amikacin Sulphate) 100mg Injection
10.	014251	GRASIL (Amikacin Sulphate) 500mg Injection

The firm has submitted fee of Rs. 75000/- for each product. Moreover, the firm has informed that the final quality control release will be done by registration holder of above product i.e. M/s Sami Pharmaceuticals (Pvt.) Ltd., F-95, Off Hub River Road, SITE, Karachi.

DRAP Authority while consider the said matter in its 152nd meeting decided as follows:
"The Authority deliberated that packing is part of manufacturing operations and permission to pack a drug on another site, other than the manufacturing site of bulk product, is the purview of Registration Board, therefore, decided to forward the matter to Registration Board for its consideration under Rule 20-A of the Drugs (Licensing, Registration & Advertising) Rules, 1976."

Decision: Registration Board approved the request of the firm for change in secondary packaging site only on contract manufacturing basis for already registered drug products as per following details:

Sr. No.	Reg. No.	Name of Product	Manufacturing, Primary Packaging & Quality Control Release Site	Secondary Packaging Site
11.	**067516**	**ECASIL (Linezolid) 200mg/100ml Infusion**	**M/s Sami Pharmaceuticals (Pvt.) Ltd., F-95, Off Hub River Road, SITE, Karachi.**	**M/s Sami Pharmaceuticals (Pvt.) Ltd., Plot No. F-140/A, SITE, Karachi**
12.	**067518**	**ECASIL (Linezolid) 600mg/300ml Infusion**		
13.	**037711**	**EFFIFLOX (Levofloxacin) 500mg/100ml IV Infusion**		
14.	**053227**	**MOFEST (Moxifloxacin HCl) Infusion**		
15.	**012066**	**NOVIDAT (Ciprofloxacin) 200mg/100ml Injection**		
16.	**042270**	**NOVIDAT DS (Ciprofloxacin) 400mg/100ml Infusion**		
17.	**053223**	**PROVAS (Paracetamol) Infusion**		
18.	**097180**	**UBROF (Ibuprofen) 400mg/100ml Infusion**		
19.	**019704**	**GRASIL (Amikacin Sulphate) 100mg Injection**		
20.	**014251**	**GRASIL (Amikacin Sulphate) 500mg Injection**		

3. Change in status of Product Registration Holder from Drug Manufacturing License (000234) to Drug Sale License without change in manufacturing site.

The application of M/s Bayer Pakistan Limited, Lahore was considered in 320th meeting of RB wherein the Board decided as follows:

DMl Site	**DSL Site**	**Manufacturing Site**
DML No. 000243 Bayer Pakistan Pvt Ltd Plot No. 108, Quaid-e-Azam Industrial Esate, Kot Lakhpat, Lahore Pakistan	DSL No. 01. Bayer Pakistan Pvt Ltd. Plot No. 23 Sector No. 22, Korangi Industrial Area, Karachi 74900, Pakistan	Manufacturing site shall remain same i.e. M/s Novartis pharma, C-21, S.I.T.E Karachi

The products details is as under:

Sr. No.	**Reg. No**	**Name of Product**
1.	107229	Canesten 1, Vaginal Cream with Applicator
2.	107224	Canesten 1 Vaginal Tablet of 0.5g
3.	107225	Canesten 6 Vaginal Tablets of 0.1g
4.	107227	Canesten Clotrimazole Cream
5.	107226	Canesten Extra Bifonazole Cream
6.	111897	Baycuten N Cream
7.	109734	Baydal Tablets

Registration Board decided as follows:

"Registration Board after deliberation deferred the request and advised the firm to explain relevant rule for consideration of the proposed change."

The firm has now submitted the following:

"Reference our previous letters on the subject cited above, we, Bayer Pakistan (Pvt) Ltd like to highlight that, we are established in Pakistan Since (1963) and has been a major player in the healthcare sector of the country for last 59 years and also known as availability of Innovator Products in the Country. The Physicians and patients equally trust our products for treatment of diseases.

During the course of our services to people of Pakistan we established our manufacturing plant in the country but due to global financial situation the parent office has decided to close/divest the manufacturing plant in the country. Some of our products as listed below are already on contract manufacturing at Novartis plant in Karachi.

We are sure that you appreciate that "under Rule 30(5) of Drug (Licensing, Registration & Advertisement) Rules 1976", registration holders are responsible to ensure availability of their registered product. Proviso to same rule states *that in the circumstances beyond the control of a manufacturer, of a drug which may lead to reduction in the production of that drug, the circumstances may be intimated to the Registration Board.*

As a law-abiding company, we brought to your notice that we had applied for permission to continue the contract of these products to ensure availability and we fear that if permission to continue contract manufacturing is not granted than we will be unable to maintain the availability of these vital products and large number of patients are likely to suffer due to shortage of these products.

Following are the Bayer's Innovator products in scope of above said changes. The number of patients that may suffer is also provided in the below table.

Units sold in Pakistan:

2018 -2022 Units sold to consumers in Pakistan

In the period between 2018 and 2022 nearly 20.0 Mio units of Canesten and Baycuten N have been served to consumers in Pakistan.

4	Canesten 1 Vaginal Tablet of 0.5g	1 x 1's	9,000	702,596
5	Canesten 6 Vaginal Tablets of 0.1g	1 x 6's	50,372	4,504,147
6	Canesten Extra Bifonazole Cream	1 x 15g	2,000	240,578
7	Canesten 1, Vaginal Cream with Applicator	11 x 5g	29,400	1,998,327

You will also agree that "under Rule 29(8) of Drug (Licensing, Registration & Advertisement) Rules 1986" where it is necessary in the public interest so to do, the Registration Board may even register a drug on its own motion without even having received any application for registration.
We Bayer Pakistan (Pvt) Ltd are of the considered opinion that under the above given powers of the Drug Registration Board and provisions of Rule 20A as amended vide SRO 1347 (I)/2021 can consider the clause "c" (Reproduced below) of the said rules to allow continued manufacturing of the above listed products through contract manufacturing at Novartis Plant based on DSL of Bayer Pakistan (Pvt) Ltd.

As per clause (c), Rule 20A of Drugs (Licensing, Registering and Advertising) Rules, 1976:
"a foreign pharmaceutical company (manufacturer or marketing authorization holder) having drug sale license in Pakistan for their research, innovator, originator drug products or drug products already registered for sale by any of reference regulatory authorities adopted by the Registration Board"

The applied change will ensure continued availability of these quality drugs in best interest of patients. Manufacturing site will also remain the same as already approved by DRAP i.e. Novartis Pharma (Pakistan) Limited (Contract Manufacturer). We ensure maintenance of highest Quality as per Bayer standards."

Decision: **Registration Board deferred the case for opinion of Legal Affairs Division whether clause (c) of Rule 20A of Drugs (Licensing, Registration and Advertising) Rules, 1976 is also applicable for already registered drug products of such firm in Pakistan on its DML and now firm has requested for registration on DSL basis.**

4. Drug products (infusions) seeking approval with Eurocap Cases.

i. M/s. Otsuka Pakistan Ltd, F/4-9, H.I.T.E., Hub, Baluchistan.

M/s Otsuka Pakistan Ltd., Baluchistan applied for change in shape of container closure system with Euro-cap for following products:

1.	018360	Pladex- 5 Injection 1000mL Each 1000mL contains: - Dextrose B.P….. … 50gm LDPE Container (Plabottle) with **middle cap**	Pladex- 5 Injection 1000mL Each 1000mL contains: - Dextrose B.P. . .. … 50gm LDPE Container (Plabottle) with **euro-cap**	Initial date: 05-10-1995 Renewal applied: 01.09.2020	Fee Rs. 10,000/- each deposited on dated 03-03-2022 **<u>Justification</u>: The primary change is only in shape of container closure**
2.	018361	Pladex-10 Injection 1000mL Each 1000mL contains: - Dextrose B.P….. … 100gm LDPE Container (Plabottle) with **middle cap**	Pladex-10 Injection 1000mL Each 1000mL contains: - Dextrose B.P.. .. … 100gm LDPE Container (Plabottle) with **euro-cap**	Initial date: 05-10-1995 Renewal applied: 07.09.2020	

3.	081059	Pladex-25 Injection 1000mL Each 1000mL contains: - Dextrose B.P….. … 250gm LDPE Container (Plabottle) with **middle cap**	Pladex-25 Injection 1000mL Each 1000mL contains: - Dextrose B.P.. .. … 250gm LDPE Container (Plabottle) with **euro-cap**	Initial date: 22-06-2016 Renewal applied: 26.04.2021	**system made from same material LLDPE** Dy.# 647-PR-I, 646, 649, 648, 644, 645, 643& 642. dated 12.04.2022
4.	003031	Plasaline Injection 1000mL Each 1000mL contains: - Sodium Chloride B.P. …….....9.0gm LDPE Container (Plabottle) with **middle cap**	Plasaline Injection 1000mL Each 1000mL contains: - Sodium Chloride B.P… …… … 9.0gm LDPE Container (Plabottle) with **euro-cap**	Initial date: 30-08-1989 Renewal applied: 28.05.2019	
5.	003028	Pladexsal Injection 1000mL Each 1000mL contains: - Dextrose. . …….. … 50gm Sodium Chloride…. 9.0gm LDPE Container (Plabottle) with **middle cap**	Pladexsal Injection 1000mL Each 1000mL contains: - Dextrose. . …….. … 50gm Sodium Chloride…. 9.0gm LDPE Container (Plabottle) with **euro-cap**	Initial date: 30-08-1989 Renewal applied: 13.06.2019	
6.	011225	Plabolyte-M Injection 1000mL Each 1000mL contains: - Calcium Chloride 2H2O U.S.P……..…...0.22 g Potassium Chloride U.S.P……...…1.50 g Sodium Chloride U.S.P……..…2.16 g Sodium Acetate 3H2O U.S.P……...…3.13 g Anhydrous Dextrose B.P…….. …50.0 g LDPE Container (Plabottle) with **middle cap**	Plabolyte-M Injection 1000mL Each 1000mL contains: - Calcium Chloride 2H2O U.S.P……..…...0.22 g Potassium Chloride U.S.P……...…1.50 g Sodium Chloride U.S.P……..…2.16 g Sodium Acetate 3H2O U.S.P……...…3.13 g Anhydrous Dextrose B.P…….. …50.0 g LDPE Container (Plabottle) with **euro-cap**	Initial date: 30-06-1990 Renewal applied: 14.05.2020	
7.	031126	Plabolyte-40 Injection 1000mL Each 1000mL contains: - Dextrose U.S.P…….. 50 g Potassium Chloride U.S.P……3.00 g LDPE Container (Plabottle) with **middle cap**	Plabolyte-40 Injection 1000mL Each 1000mL contains: - Dextrose U.S.P…….. 50 g Potassium Chloride U.S.P…… …3.00 g LDPE Container (Plabottle) with **euro-cap**	Initial date: 03-12-2003 Renewal w.e.f., 03.12.2018 to 02.12.2023	
8.	007782	Ringolact Injection 1000mL Each 1000mL contains: - Calcium Chloride 2H2O U.S.P……...0.20 g Potassium Chloride U.S.P……...…0.30 g Sodium Chloride U.S.P……6.00 g Sodium Lactate U.S.P……..…3.10 g LDPE Container (Plabottle) with **middle cap**	Ringolact Injection 1000mL Each 1000mL contains: - Calcium Chloride 2H2O U.S.P……...0.20 g Potassium Chloride U.S.P……..…..…0.30 g Sodium Chloride U.S.P……6.00 g Sodium Lactate U.S.P……..…3.10 g LDPE Container (Plabottle) with **euro-cap**	Initial date: 30-08-1989 Renewal applied: 28.05.2019

The case was considered in 90th PRVC wherein the Committee decided as follows:

"The Committee decided to refer all such cases to Registration Board for consideration."

ii. Change in primary packaging to Euro-cap for already registered products applied by M/s Mediflow Pharmaceuticals (Pvt.) Ltd., Karachi.

M/s Mediflow Pharmaceuticals (Pvt.) Ltd, Karachi, applied for change in primary packaging to Euro-cap for their already registered following products:

Sr. No.	Reg. No.	Brand Name & Composition	Pack Size
1.	079596	Floviva IV Infusion Each 100ml contains: Sodium chloride_ 0.6 gm Sodium lactate_ 0.31 gm Potassium chloride_ 0.03 gm Calcium chloride.2H2O_ 0.02 gm Water for Injection qs to_ 100 mL	500ml
2.	079597	Flow DS 1/5 IV Infusion Each 100ml contains: Dextrose anhydrous_ 4.30 gm Sodium chloride…….0.18 gm Water for Injection qs to_ 100 mL-	500ml
3.	079598	Flozeal 5% Infusion Each 100ml contains: Dextrose anhydrous_ 5.0 gm Water for Injection qs to_ 100 mL	500ml
4.	079599	Floline IV Infusion Each 100ml contains: Sodium chloride_ 0.90 gm Water for Injection qs to_ 100 mL-	500ml
5.	079600	Flow DS IV Infusion Each 100ml contains: Dextrose anhydrous_ 5.0 gm Sodium chloride_ 0.90 gm Water for Injection qs to_ 100 mL-	500ml
6.	079601	Flow Dex 10% IV Infusion Each 100ml contains: Dextrose anhydrous_ 10.0 gm Water for Injection qs to_ 100 mL-	500mL
7.	079602	Flow DS ½ Infusion Each 100ml contains:	500ml

		Dextrose anhydrous_ 5.0 gm Sodium chloride_ 0.45 gm Water for Injection qs to_ 100 mL-	
8.	080617	Flow NS IV Infusion Each 100ml contains: Sodium chloride_ 0.90 gm Water for injection_ qs to 100 mL-	1000ml
9.	080618	Flow Dex 5% IV Infusion Each 100ml contains: Dextrose anhydrous_ 5 gm Water for injection_ qs to 100 mL-	1000ml
10.	080619	Flow RL IV Infusion Each 100ml contains: Sodium chloride_ 0.6 gm Sodium lactate_ 0.32 gm Potassium chloride_ 0.04 gm Calcium chloride 2H2O_ 0.027 gm Water for injection_ qs to 100 mL-	1000ml
11.		Flow Dex Each 100ml contains: Dextrose anhydrous_ 5.0 gm Water for injection_ 100 ml-	
12.	084684	Flow NS Each 100ml contains: Sodium chloride_ 0.90 gm Water for Injection qs to_ 100 mL	500ml
13.	084685	Flow NS Each 100ml contains: Sodium chloride_ 0.90 gm Water for Injection qs to_ 100 mL	1000ml
14.	084686	Flow Dex 5% IV Infusion Each 100ml contains: Dextrose anhydrous_ 5.0 gm Water for Injection qs to_ 100 mL-	500ml
15.	084687	Flow RL IV Infusion Each 100ml contains: Sodium chloride_ 0.6 gm Sodium lactate_ 0.32 gm Potassium chloride_ 0.04 gm Calcium chloride 2H2O_ 0.027 gm Water for Injection qs to_ 100 mL	500ml
16.	084688	Flow Dex 10% IV Infusion Each 100ml contains: Dextrose anhydrous_ 10.0 gm Water for Injection qs to_ 100 mL	1000ml
17.	084689	Flow DS IV Infusion Each 100ml contains: Dextrose anhydrous_ 5.0 gm Sodium chloride_ 0.90 gm Water for Injection qs to_ 100 mL	1000ml
18.	085006	Flowtol 20% IV Infusion Each 100ml contains: Mannitol_ 20 gm- Water for Injection qs to_ 100 mL	500ml

19.	085007	Flow-MTZ Infusion Each 100ml contains: Metronidazole_ 0.5 gm Water for Injection qs to_ 100 mL	100ml
20.	089079	Flow Lactate D IV Infusion Each 100ml contains: Sodium chloride_ 0.6 gm Sodium lactate_ 0.31 gm Potassium chloride_ 0.03 gm Calcium chloride 2H2O_ 0.02 gm Dextrose Monohydrate_ 5 gm Water for Injection qs to_ 100 mL	500ml
21.	089080	Flow Lactate D IV Infusion Each 100ml contains: Sodium chloride_ 0.6 gm Sodium lactate_ 0.31 gm Potassium chloride_ 0.03 gm Calcium chloride 2H2O_ 0.02 gm Dextrose Monohydrate_ 5 gm Water for Injection qs to_ 100 mL	1000ml

The firm has stated that initially they applied for Euro-cap registration in their application however, while issuance of registration letter no such details were mention in letters. The firm has requested to change their products to Euro-cap in registration letters of above products.
Submitted for consideration of Board please.

iii. Inclusion of Euro-Cap packing in registration letters of already registered products applied by M/s Frontier Dextrose Limited (FDL) , Hattar.

M/s FDL, Hattar has submitted that they had received revised MRP's approval letter from Costing & Pricing Division for their registered products in simple pack but for Euro-Cap products Costing & Pricing Division has advise them to get the variation approval letter of Euro-Cap packing from DRB. The firm further informed that Costing & Pricing Division had previously acknowledged and issued the prices for such products for many years without objection. The firm has requested for issuance of new registration letter for following Euro-Cap products without the requirement of CTD as these are already registered and marketed for many years:

Sr. No.	**Brand Name**	**Sr. No.**	**Brand Name**
1.	Mini BC 50ml	19.	Steriflutol
2.	Mini NaCl	20.	Sterilyte M
3.	Sterifluid NS	21.	Sterifluid N/3
4.	Sterifluid 5%	22.	Sterilyte
5.	Sterioflox	23.	Sterimaize 3%
6.	Sterimet	24.	Sterimaize 6%
7.	Stericipro	25.	Sterifluid 5%
8.	Sterilevo	26.	Sterifluid 10%
9.	Sterimox	27.	Sterifluid 25%
10.	Sterifluid 5%	28.	Sterifluid DS
11.	Sterifluid 10%	29.	Sterifluid NS
12.	Sterifluid DS	30.	Sterifluid RL

13.	Sterifluid NS	31.	Sterifluid RLD
14.	Sterifluid DS1/2	32.	Sterilyte M
15.	Sterifluid RL	33.	Sterifluid N/3
16.	Sterifluid RLD	34.	Sterifluid R
17.	Sterifluid R	35.	Fructosteril
18.	Sterifluid Paeds		

Decision: Registration Board advised PE&R Division to deliberate the matter with Costing & Pricing Division and to place the outcome before Registration Board.

Case No.01: Registration of Drug (s) of M/s Maxitech Pharma (Pvt.) Ltd, Plot No. E-178, S.I.T.E. Phase-II, Super Highway, Karachi, for export purposes only.

Firm has applied for registration of drug(s) only for export purpose as per following details:

Requirements As Per SOP	Submitted Documents
Application on Form-5/ Form 5-D with required fee as per relevant SRO.	Form5;
Copy of DML (Renewal status) along with approval of relevant sections verified by licensing Division or inspection report for renewal of DML before 2005.	Copy of DML provided Approval of relevant section verified from letter No. F 02-12/2012-Lic dated 03-12/2018

S. No.	Reg. No.	Granted Composition/Salt Form.	Demanded correction Composition	Diary No.
1.	081717	Biopen 2.5gm Injection Each dry powder vial contains:- Benzyl Penicillin (USP)…...500,000IU Procaine Penicillin (USP)..1500,000IU Streptomycin Sulphate (BP)…..2.5gm	Biopen 2.5gm Injection Each dry powder vial contains:- **Penicillin G Potassium**…500,000IU **Procaine Penicillin**…….1500,000IU **Streptomycin Sulphate**……..2.5gm	Dy. No. 26285-R&I DRAP dated 16-09-2022.
2.	081718	Biopen 5gm Injection Each dry powder vial contains:- Benzyl Penicillin (USP)…...500,000IU Procaine Penicillin (USP)..1500,000IU Streptomycin Sulphate (BP)……..5gm	Biopen 5gm Injection Each dry powder vial contains:- **Penicillin G Potassium**…500,000IU **Procaine Penicillin**…….1500,000IU **Streptomycin Sulphate**…….5gm	

M/s. Selmore Pharmaceuticals (Pvt) Ltd., Lahore has deposited the required fee of **Rs.30,000 x 2 = Rs.60,000/-** and submitted following supporting documents:-

(i) Copy of initial registration letter.
(ii) Last renewal trails.
(iii) Supporting documents for change of composition.
(iv) Undertaking that the provided information/documents are true/correct.

Benzylpenicillin, also known as penicillin G. (https://pubchem.ncbi.nlm.nih.gov/compound/Penicillin-g).
As per USP **Penicillin G** complete salt form is "**Penicillin G Potassium"** and same is applied by the firm for revision of Benzyl Penicillin presentation.

Decision:- **Registration Board considered and approved the revision of formulation in accordance with innovator/me-too product/reference regulatory authorities and pharmacopeia as per following details:**

S. No.	Reg. No.	Granted Composition/Salt Form.	New Approved Composition
1.	081717	Biopen 2.5gm Injection Each dry powder vial contains:- Benzyl Penicillin (USP)…...500,000IU Procaine Penicillin (USP)..1500,000IU Streptomycin Sulphate (BP)…..2.5gm	Biopen 2.5gm Injection Each dry powder vial contains:- **Penicillin G Potassium**…500,000IU **Procaine Penicillin**…….1500,000IU

			Streptomycin Sulphate……..2.5gm
2.	081718	Biopen 5gm Injection Each dry powder vial contains:- Benzyl Penicillin (USP)…...500,000IU Procaine Penicillin (USP)..1500,000IU Streptomycin Sulphate (BP)……..5gm	Biopen 5gm Injection Each dry powder vial contains:- **Penicillin G Potassium**…500,000IU **Procaine Penicillin**…….1500,000IU **Streptomycin Sulphate**…….5gm

Case No. 02:- Registration of Drugs under the Drugs Act, 1976.

Following non-drug diluents are registered in different meeting of Registration Board and processed.

S. No.	Reg. No.	Manufacturer	Name of Drug(s) & Composition.
1.	111532	M/s. ISIS Pharmaceuticals & Chemical Works, 25/1-3, Sector 12-C, North Karachi Industrial Area, Karachi.	ISIS Diluent (for eye drops vaccines) Each ml contains:- Monobasic Potassium Phosphate……0.37mg Disodium Phosphate Dihydrate……0.72mg Sodium Chloride……..…7.65mg (As per Innovator's Specification)*
2.	112108	M/s. Intervac (Pvt) Ltd., 18 Km Lahore Sheikhupura Road, Sheikhupura.	Diluent VAC Each ml contains:- Monobasic Potassium Phosphate…….....0.37mg Disodium Phosphate Dihydrate…….....0.72mg Sodium Chloride……..7.65 mg Disodium Edetate Dihydrate…….…….0.50mg (As per Innovator's Specification)*

Registration Board approved API of drug products only.

Registration Board in its 320th meeting deferred the case for further deliberation.

Decision:- Registration Board deliberated that applied formulations are diluents (non-drug formulations) for administration / re-constitution of registered vaccines and registrations are granted for drug products only. The Board advised to review practices of various regulatory authorities (reference/non-reference) and also seek opinion of Legal Affair division regarding either grant of registration or permission to manufacture in a licensed facility.

Case No.03:- Request of M/s. Selmore Pharmaceuticals (Pvt) Ltd., Lahore for Standardization of Formulation in Accordance with the Innovator's Product/Reference Regulatory Authorities and Pharmacopeia.

M/s. Selmore Pharmaceuticals (Pvt) Ltd., Lahore has requested for standardization of formulation with the innovator's product/reference regulatory authorities and pharmacopeia of their following registered drug as per detail mentioned against each:-

S. No.	Regn. No.	Product Granted Composition	Demanded Composition	Remarks/ Diary No. R&I & Initial date of Regn.

I	II	III	IV	V
1.	111307	Cynosel Forte 1000mcg Injection **Each 2ml contains:-** Cyanocobalamin …1000mcg	Cynosel Forte 1000mcg Injection **Each ml contains:-** Cyanocobalamin …1000mcg	Dy. No. 4273-R&I DRAP dated 14-02-2022. 04th January, 2022

M/s. Selmore Pharmaceuticals (Pvt) Ltd., Lahore has deposited the required fee of Rs.30,000/- and submitted following supporting documents:-

(i) Copy of Registration letter.
(ii) Copy of me-too reference.
(iii) Undertaking.

Demanded composition already registered various firms including M/s. Baariq Pharmaceuticals, Lahore & M/s. Wimits Pharmaceuticals, Lahore vide registration No.097872 & 102042 respectively.

Remarks:

Approved composition and demanded composition of M/s Selmore is available in generic/me-too separately.

The case was discussed in its 79th Post Registration Variation Committee (PRVC) and the committee evaluated the case and Chairman Registration Board, on the recommendations of the committee, decided to not accede the firm request as demanded composition is new drug formulation.

Remarks:- Initially case was discussed in 312th meeting of Registration Board for two volume 50ml & 100ml with label claim each 2ml contain Cyanocobalamin 1000mcg. 50ml approved and letter issued dated 04-01-2022, while 100ml approved in 316th meeting with label claim correction i.e. each ml contains Cyanocobalamin…..1000mcg with full fee. Now firm request for correction of label claim of 50ml accordingly.

The case was discussed in its 89th meeting of Post Registration Variation Committee (PRVC) and the committee evaluated the case and Chairman Registration Board, on the recommendations of the committee, decided to refer to Registration Board.

Decision:- Registration Board considered and approved the standardization of formulation in accordance with the already registered product as per following details:

S. No.	Regn. No.	Product Granted Composition	New Approved Composition
1.	111307	Cynosel Forte 1000mcg Injection **Each 2ml contains:-** Cyanocobalamin …1000mcg	Cynosel Forte 1000mcg Injection 50ml **Each ml contains:-** Cyanocobalamin …1000mcg

Case No. 04 :- Request of M/s. Onesto Enterprises (Private) Limited, Islamabad for Transfer of Registration of Already Registered Imported Veterinary Drugs.

M/s. Onesto Enterprises (Pvt) Ltd, Flat No.304, Third Floor, Civic Centre, Phase-4, Bahria Town, Islamabad request for transfer of registration of their already registered imported veterinary drugs from the name of previous importer M/s. 	GMP status	The firm was inspected on 31-5-2021 with the following conclusion: Based on the above observation their current GMP compliance level is rated as good.

	Remarks of the Evaluator	

(i) We are going to submit comprehensive reply on our 6 products namely (i) Progevet Injection 10ml (ii) Progevet Injection 20ml (iii) Cylovet Injection 2ml (iv) Cylovet Injection 10ml (v) Lecivet Injection 2ml (vi) Lecivet Injection 10ml & Dinopevet Injection 5ml. We desire the manufacturing facility for hormones.

(ii) Here we desire the condition in which production dedicated area clearly mentioned to hormone according to Schedule-B Drug Licensing and Registering and Advertising Rule in 1976. Keeping in this view we prepared separate and dedicated area's for hormone section. We apply 14 products for registration, so we request the Registration Board that all applied products in hormone section should be granted, if all products are being registered so the products containing oxytocin hormone should be suspended till we prepare new area and rest deferred products should be allotted because only two products does not meet expense of the area. We hope that above narrator will satisfy you.

The details of already registered hormone products are as under:-

S. No.	Reg. No.	Name of Drug(s) & Composition.	Packing	Maximum Retail Price.	Approved Shelf Life.
1.	109960	Buserovet Injection Each ml contains:- Buserelin Acetae…….0.0042mg equivalent to Buserelin…..0.004mg (As per Innovator's Specification)*	2.5ml	De-controlled	02 years
2.	109961	Buserovet Injection Each ml contains:- Buserelin Acetae..…...….0.0042mg (equivalent to Buserelin.....0.004mg (As per Innovator's Specification)*	5ml	De-controlled	02 years
3.	111468	Oxytovetz Injection Each ml contains:- Oxytocin (USP)……..10 IU (USP Specifications)	50ml	De-controlled	02 years
4.	111469	Oxytovetz Injection Each ml contains:- Oxytocin (USP)…..….10 IU (USP Specifications)	100ml	De-controlled	02 years
5.	111470	Oxytovetz Injection Each ml contains: Oxytocin (USP)……..10 IU (USP Specifications)	250ml	De-controlled	02 years
6.	111471	Oxytovetz Injection Each ml contains:- Oxytocin (USP)……..10 IU (USP Specifications)	500ml	De-controlled	02 years
7.	111472	Oxytovetz Injection Each ml contains:- Oxytocin (USP)……20 IU (USP Specifications)	100ml	De-controlled	02 years

Decision M-321: Registration Board considered and deferred for further deliberation M/s Vetz pharma submitted that they intend to manufacture only hormonal products in the said facility and accordingly products registration letter may be issued.

Decision: Registration Board deliberated the matter and decided as follows:

a. **Approved products from S.No. 3-7.**
b. **Deferred products from S.No.1-2 for steroidal manufacturing facility.**

Case No.06: Deferred cases (M-321) Locally Manufactured Veterinary Drugs.

1.	Name and address of manufacturer / Applicant	M/s. Selmore Pharmaceuticals Pvt Ltd. 36-Km, Multan Road, Lahore.
	Brand Name +Dosage Form + Strength	Prokill Powder
	Composition	Alkyl (60% C_{14}, 30% C_{16}, 5%C_{12}, 5%C_{18}) dimethyl benzyl ammonium chloride… 40%. Inert Ingredient: urea……...60%

Decision 79th PRVC

On the recommendations of the committee, Chairman Registration Board considered and defer the case as submitted data of product is not of new manufacturing site.

Reply of the firm.

The firm has submitted their reply.

Product Name	Your Query	Our Response
Sandostatin 0.05 mg/ml Ampoule (Reg. No. 013473) AND **Sandostatin 0.1** mg/ml Ampoule (Reg. No. 013472)	1. Submitted data of product is not new manufacturing site. 2. Sandostatin 0.05mg/ml ampoule and Sandostatin 0.1mg/ml ampoule manufacturer as per initial registration letter and your application is not same, Clarify	1. We are submitting the following documents, showing our application is for new manufacturing site change: (i) Manufacturer's name on CTD (ii) Already submitted CPP (iii) Already submitted LoA 2. Please note that Sandoz and Ciba-Geigy was merged in 1996. We informed to ex-Ministry of Health regarding merger and submitted all relevant documents for change of title from Sandoz/Ciba-Geigy to Novartis. In this application, we submitted change of manufacturing site from Novartis Basel to Novartis Stein as a package and we obtained approval for change of title. We are enclosing these documents for your kind consideration.
Sandostatin 0.5 mg/ml Ampoule (Reg. No. 086485)	Submitted data of product is not new manufacturing site.	3. We are submitting again the following documents, showing our application for new manufacturing site change: (i) Manufacturer's name on CTD (ii) Already submitted CPP (iii) Already submitted LoA

Remarks: Initial registration letter shows that M/s Sandoz Pharma Ltd Basle, Switzerland is manufacturer but firm submitted covering letter shows that M/s. Novartis pharma stein ag, schaffhauserstrasse, 4332 stein, Switzerland is previous manufacturer.

Firm inform to ministry dated 25th April 1997 as per their application their name of parent company changed from M/s Sandoz Pharma AG Basle, Switzerland to M/s Novartis Pharma AG Basle, Switzerland. M/s Novartis Pakistan have no approval of this.

Form-5F shows manufacturer of finished product is M/s. Novartis pharma stein ag, schaffhauserstrasse, 4332 stein, Switzerland.

Decision of 80th PRVC:

On the recommendations of the committee, Chairman Registration Board considered and deferred the case for followings:

i. Cclarification regarding import of these products the name of M/s Novartis Pharma AG Basle, Switzerland while as per available record M/s Sandoz Pharma Ltd Basle, Switzerland is the manufacturer.
ii. Moreover, submitted data regarding form-5F is of old manufacturing site.

Fresh Proceedings:
The firm has submitted reply for above queries as under -

Product Name	DRAP Query	Novartis Response
Sandostatin 0.5mg/ml Ampoule (Reg No. 086485) Sandostatin 0.05mg/ml Ampoule (Reg No 013473) Sandostatin 0.1mg/ml Ampoule (Reg No 013472)	1. Clarification regarding import of these products in the name of M/s Novartis Pharma AG Basel, Switzerland while as per available record M/s Sandoz Pharma Ltd Basel, Switzerland is the manufacturer.	Please note that Sandoz and Ciba Geigy were merged in 1996. We informed to ex-Ministry of Health regarding merger and submitted all relevant documents for change of title from Sandoz/Ciba-Geigy to Novartis Pharma AG. Attaching relevant documents that we had submitted to Health Authority for your reference.
	2. Submitted data regarding form-5F is of old manufacturing site.	We are submitting the following documents, showing our application is for new manufacturing site change: i. Manufacturer's name on CTD (32P31) ii. Form 5F (for all three strengths) iii. Already submitted CPP (for all three strengths) iv. Already submitted LoA.

Decision 85th PRVC.
On the recommendations of the committee, Chairman Registration Board considered and decided to refer the case to Registration Board.

Decision 323:
Registration Board considered the request and decided to refer to seek legal opinion as per above facts.

Case No. 02. ELI LILLY PAKISTAN'S REQUEST TO MAKE LABELING WEBSITE LIVE WITH THEIR CURRENT APPROVED LEAFLETS/PRESCRIBING INFORMATION.

The subject case was discussed in M-321 meeting of Registration Board and deferred as under: -

Eli Lilly Pakistan submitted application on 25-Aug-2022 for approval to make the website (www.mealabels.lilly.com) live and accessible to public/HCPs having their current approved Leaflets/Prescribing Information of their products:

E-Labeling is the dissemination of approved product information, via an electronic method (such as through a machine-readable QR code or URL) to the healthcare providers and patients.
With e-labeling, public/HCPs will have access to the most updated product information immediately after DRAP's approval/Notification.

In the below table, they further elaborated the benefits of e-labeling when it comes to patients, pharmacists and doctors:

Patient	Pharmacist	Doctor
❖ Access to the latest product information immediately after DRAP approval/Notification ❖ Product in the market will include the latest information	❖ Ability to access the locally approved product information without having to open the pack with the QR Code	❖ Providing a repository for doctors to reach local approved product information
Better readability and searchability of information		

Eli Lilly is implementing e-labeling across the Middle East countries through the addition of a QR code and a website URL to the product outer pack and physical leaflet.
Accordingly, once they got this 'website go live' approval, they will start notifying to DRAP artworks of their products by adding the QR codes and the website URL on the outer packs and leaflets.
Recently they have received approval to make their website Live from Lebanon and UAE Health Authorities.
They will not be eliminating the physical leaflet at this stage. The website will be updated right after new product information is approved by DRAP, allowing immediate implementation of label updates.
It is confirmed by the company that the website will only hold product information on the Pakistan pages that are already approved/Notified to DRAP.
Website layout also submitted with relevant pages to Pakistan.
Submitted for the recommendation of the Board for approval to make www.mealabels.lilly.com Labeling website Live with their current approved Leaflets/Prescribing Information.

Decision M-321: Registration Board considered and deferred for further deliberation.
Registration Board was apprised that e-labeling will be done by manufacturer for Middle East countries through the addition of a QR code and a website URL to the product outer pack and they will not eliminate the physical leaflet at this stage. After this 'website go live' approval, they will start notifying to DRAP artworks of their products by adding the QR codes and the website URL on the outer packs and leaflets. Further they apprise the Board, regarding approval to make their website Live from Lebanon and UAE Health Authorities.

Decision: Registration Board deliberated that request is not contradictory to drugs (Labelling & Packing) rules, 1976 and thus the Board approved firm's request.

Case No.03:- <u>REQUEST OF M/S HAJI MEDICINE CO., RAWALPINDI FOR INCREASE IN SHELF LIFE OF REGISTERED PRODUCT</u>.

The subject case was discussed in 29th PRVC, 41st meeting of PRVC & 69th PRVC, 316th meeting of Registration Board and deferred as per following details:-A

M/s. Haji Medicine Co., B-327, Iqbal Road, Rawalpindi has requested for increase in shelf life of registered product from 2 years to 60 months as per following details.

Reg. No.	Name/ Composition	Name of Manufacturer (as per registration letter)	Name of Manufacturer / PLH (as per COPP)	Initial registration with renewal	Remarks
I	I	III	IV	V	VI
052244	Setrovel Solution for Injection.	**Manufacturer:-** M/s Novell Pharmaceutical	**Manufacturer &**	25-10-2008	Dy. No.533 R&I dated 17-06-2014,

	Each ml contains:- Tropisetron Hydrochloride equivalent to 1.00mg	Laboratories, Indonesia.	**Product License Holder:** PT. Novell Pharmaceutical Laboratories JI. Wanaherang No.35, tlajung Udik, Gunung Putri Bogor 16962, Indonesia.	Last renewal date 21-05-2018	Dy. No.136 R&I dated 19-08-2014, Dy. No.669 R&I dated 11-09-2014, Dy. No.1162 R&I dated 19-11-2018& Dy. No.2299 R&I dated 01-04-2019 As per COPP shelf life is 60 months.

The firm has submitted the following supporting documents:-

a. Requisite fee of Rs.5000/-
b. Application on Form 5A.
c. Copy of registration letter with complete renewal trail.
d. Copy of valid DSL.
e. Stability data for Zone IV B of 3 batches.
f. Original & legalized COPPs issued by Indonesian Authority.
g. Justificaiton for increase in shelf life (3 stability batch data are provided).
h. "We conduct the stability study in storge conditions 30±2˚C, 75±5& RH following the condition for the climate zone IV-B which harsher/more extreme than the conditions requested (IV-A 30±2˚C, 65±5& RH). Also, storing product with the same temerature but different RH does not give specifically impact to the bulk contained in the ampules because RH can't penetrate directly into glass ampules. And it can be seen in the stability studies report that the reslut for the stability studies for 60 months are still complies with the specification therfore, it can be expected that the result will still be similar if it is conducted in less extreme condition (Zone IV-A)".
i. Undertaking that informaiton is true and correct.

Decision 29th PRVC:

Deferred for the submission of SmpC clearly mentioning the shelf-life of the innovator's product approved in any Reference Regulatory Authority.

Fresh Proceedings:

The firm has submitted as under: -

As per wikipedia there are two brand leaders in Tropisetron i.e. Navoban (Manf. By Novartis) and Setrovel (Manf. By PT Novell Pharmaceuticals Indonesia). Snap shot of said page from Wikipedia is attached and you can find the same through the following wbsie link.

http://en.Wikipedia.org/wiki/tropisetron

Novartis has withdrawan marketing of Navoban from Europe, USA and Austrialia etc and hence it has very limited availability throughout the owrld. Resultanly there is no avaible current data of Navoban on US-FDA, UK-MHRA and TGA-Australia etc.

In the absence of Navoban, now setrovel is the brand leader of Tropisetron Injction and any shelf life stability studies conducted by the manufacture of Strovel i.e. P Novell Pharmaceuticals Indonesia shall be acceptable as Industry Norm.

"AS we have already provided shelf life stability studies of Setrovel Injection for 05 years and CoPP of Setrovel Injection for 05 years shelf life issued by Indonesian Health Ministry and Attested by Embassy of Pakistan Jakarta so kindly approve extension of shelf life of Setrovel Injection from 02 Years to 05 years" As per Zone IV-B.

Decision 41st PRVC:
Deferred for final reminder for the submission of SmpC clearly mentioning the shelf-life of the innovator's product or any other regulatory document confirming proposed shelf life of the product approved in any Reference Regulatory Authority.

Fresh Proceedings:

The firm has submitted their reply as under: -

Please note that all comparative brands of Tropisetron including brand leader Navoban have discontinued this product and hence no comparative data is currently available in Reference Regulatory Authorities. Subsequently our brand i.e. Injection Setrovel is current brand leader of Tropisetron.

Secondly, Indonesian drug regulatory authority i.e. National Agency of Drug and Food control (NADFC) indonesia is a member of PIC/S since 2012. The pharmaceutical inspection convention is an international body for mutural recognition of inspections in respect of pharmaceutial products.

Therefore, it is obligatory upon DRAP to honor the recommendations of NADFC indonesia to increse the shelf life of Inj. Setrovel to 05 years.

NADFC Indonedia has already thoroguhly scrutinized the Zone 4 stability studies reltaing to Inj. Setrovel conducted by PT Novell Pharmaceutical Labortories, Indonesia and subsequently allowed them to increase the shelf life to 05 years.

Decision 69th PRVC
The Committee evaluated the case and Chairman Registration Board, on the recommendations of the committee & decided to defer for the submission of shelf-life of the innovator's product or any other regulatory document confirming proposed shelf life of the product approved in any Reference Regulatory Authority.

Fresh Proceedings by the firm:
Innovator's Product i.e. Navoban was manufactured by Novartis but Novartis has discontinued its manufacturing for last many years.
No other comparative brand is currently available in the world. No data of this product is available in any RRA.
Our brand i.e. Setrovel is manufactured by PT Novell Pharmaceutical Laboratories, Indonesia. Setrovel is currently brand leader of this product in the world.
We have already submitted 05 years stability studies data of Setrovel that has been approved by National Agency of Drug and Food Control (NADFC) Indonesia. NADFC Indonesia is member of PIC/S.

Decision 76th PRVC:
The Committee evaluated the case and Chairman Registration Board, on the recommendations of the committee & decided to refer the case to Registration Board.

Decision M-316:
Registration Board considered and decided to advise the firm to submit impurity profile and degradation data of the finished drug product upto assigned shelf life.

Fresh Proceedings by the firm:
The firm has submitted impurity profile and degradation data of Setrovel Injection over shelf life of 05 years.

Decision: Registration Board considered and approved the firm request for increase in shelf life from 02 years to 05 years as per following details: -

Reg. No.	Name of Drug/Composition	Name of Manufacturer & Product License Holder	New Approved Shelf Life
052244	Setrovel Solution for Injection. Each ml contains:- Tropisetron Hydrochloride equivalent to 1.00mg	PT. Novell Pharmaceutical Laboratories JI. Wanaherang No.35, tlajung Udik, Gunung Putri Bogor 16962, Indonesia.	05 Years

Case No.04: <u>REQUEST OF M/S NOVARTIS PHARMA FOR CANCELLATION OF REGISTRATION OF IMPORTED DRUGS.</u>

M/s Novartis Pharma Pakistan has submitted request for cancellation of registration of imported drug as per following details.

Case No. 08. <u>GUIDANCE REQUIRED REGARDING COMPLIANCE WITH PHARMACOPEIAL SPECIFICATIONS.</u>

Director Drug Testing Laboratory Faisalabad vide letter on subject "Guidelines Required regarding compliance with Pharmacopeial specifications" dated 06-09-2022, in which he has informed that the timeline given by the Registration Board has been ended on 26th April 2022. In the light of the decision of the Registration Board DTL Faisalabad requested the guidance on following:

Sr.#	DTL Faisalabad guidance requested points
1.	Manufacturers/ Registration holders of drug products that are still (May, 2022 onward) manufacturing their products as per Manufacturer's /Innovator's Specifications despite the availability of the monographs in Pharmacopoeia and are unable to provide DRAP's approval shall be Misbranded?
2.	If product specifications mentioned on the label are MS/Innovator's Specs and DRAP has not yet granted the approval though monograph is available in official pharmacopeias, which specifications would be opted to test/analyze the said product?
3.	In United States Pharmacopeia (USA), several tests are mentioned in dissolution test of various monographs and USP stated that except the test I, the Dissolution test number should be mentioned on the label of the product, If dissolution test no. is not printed on the label and manufacturer specify USP test 2 or test 3 in its method of analysis, on which dissolution test, the said product should be tested. And whether product would be declared misbranded or not.

Registration Board in its 317th meeting held on 16-17th May 2022 decided not to further extend timelines for compliance with pharmacopeial specifications.

Pharmaceuticals firms started to apply for specifications as per decision of Registration Board and PE&R division processed many of these applications and a number of applications are still under the process of evaluation and final approval.

Proceedings:

The Board was appraised that PE&R Division has already decided/disposed of cases applied for the change in specifications as per direction of the Board.

Decision of 321st Meeting: Keeping in view above proceedings, Registration Board decided to advise the DTL Faisalabad to proceed in accordance with Drug Specification Rules 1978 for queries at S.No.1 and 2 while query at SNo.3 will be deliberated in the forthcoming meeting of Registration Board.

Matter related to specifications discussed in several meetings of the Registration Board as some products have been declared mis-branded by Drug Testing Laboratories as their official monographs

have been included in pharmacopeia and registration holders mentioned manufacturer's specifications on unit cartons.
In 316th meeting of Registration Board Dr.Muhammad Munawar Hayat, Director, DTL Punjab Opined that Registration Board is not competent to relax the compliance of pharmacopoeial specification, as these are Rules (Drugs Specification Rules, 1978) made under the Drugs Act, 1976. Director DTL Faisalabad query regarding dissolution test discussed and deliberated that several product have more than one dissolution tests in their monographs.
Example 1:
Omeprazole Delayed Release Capsules USP has two different dissolution tests namely Dissolution Test 1 & Test 2. Furthermore, pharmacopeia has mentioned that:
"Test 2: If the product complies with this test, the labeling indicates that it meets USP *Dissolution Test 2*"
Example 2:
Esomeprazole Magnesium Delayed-Release Capsules USP has four different dissolution tests namely Dissolution Test 1, Test 2, Test 3 & Test 4.
Furthermore, pharmacopeia has mentioned that:
Test 2: If the product complies with this test, the labeling indicates that the product meets USP *Dissolution Test 2*
Test 3: If the product complies with this test, the labeling indicates that the product meets USP *Dissolution Test 3*.
[NOTE—Use only glass bowls]
Test 4: If the product complies with this test, the labeling indicates that the product meets USP *Dissolution Test 4*
If dissolution test specifically is not mentioned than definitely manufacturer will follow test 1

Decision: **Keeping in view above proceedings, Registration Board decided to issue advisory to mention the dissolution test Number on the immediate container of product for dissolution tests No 2,3 or 4 as per requirement of USP otherwise it would be presumed that dissolution test No.1 shall be performed on the finished product.**

Case No: 09 **M/S SANOFI-AVENTIS PAKISTAN REQUESTED FOR EXTENSION IN EXEMPTION FROM LABELING TEXT ON - FLUDARA 50MG (REG. NO. 088890) POWDER FOR SOLUTION FOR INJECTION/INFUSION & AUBAGIO 14MG TABLET (REG. NO. 105585).**

M/s Sanofi-aventis Pakistan requested that **Fludara** is indicated for the treatment of B-cell chronic lymphocytic leukaemia (CLL) in adult patients with sufficient bone marrow reserves and low-grade Non-Hodgkin's Lymphoma. Since Fludara is a highly specialized **Life Saving Medicine** and **critically needed essential drug** provided to institutes therefore, it is our social responsibility to make it available for patients in need.

Fludara is being manufactured and primarily packaged in large volume at the source point in Germany, then it is supplied to United Kingdom for Secondary Packaging from where supplies are made to various countries as per their needs.

SALES RECORD:

The sales record of Fludara is mentioned below since the transfer of its registration in name of sanofi-aventis Pakistan limited:

Product name	**No of unit packs imported**			**No of unit packs sold**			
Fludara	2019	2020	2021	2019	2020	2021	2022
	60	**60**	**60**	**37**	**45**	**68**	**24**

***6 Packs used for QI sampling**

Fludara is purely used by the Government and Private institutes. Below is the list of institutions where Fludara Injection is being supplied;

S. #	Institutes	City
1	Armed Forces Bone Marrow Transplant Centre	Rawalpindi
2	Combined Military Hospital (CMH)	Rawalpindi
3	MINAR	Multan
4	Shaukat Khanum Memorial Lahore	Lahore
5	Hameed Latif Hospital	Lahore
6	INMOL Cancer Hospital	Lahore
7	Children's Hospital	Karachi
8	Agha Khan Hospital	Karachi

The firm has submitted the following documents:

i. An undertaking that to print the Urdu Text, Registration Number and Maximum Retail Price (MRP) on each pack of above product at their Karachi site bearing DML No. 000007, before releasing the goods into the market.
ii. Copy of Registration letter
iii. Copy of DML
iv. Fee 10,000/-

Decision: Registration Board acceded to the request for import of already registered products (Fludara 50mg Powder for solution for Injection/Infusion (Reg. no. 088890) & Aubagio 14mg tablet (reg. No. 105585) in Standard Export Packs. The Board advised the firm to locally print MRP and Registration Number along with Urdu Text before sale of drug at their Licensed Premises (DML No.000007) to comply requirements as per Drugs (Labelling & Packing) Rules, 1986. This permission shall be valid for two (02) year only. The firm shall submit the future plan regarding the import of Drugs (Labelling & Packing) Rules, 1986 compliant packs.

9. Copy of DSL.
10. Prescribed undertaking.

Decision M-296: Registration Board approved the change of address of manufacturing site of following registered product medicaine injection (Reg. No. 023645) subject to policy for inspection of manufacturer abroad for imported finished drugs. Other terms and conditions will remain the same.

Reg. No.	Name & Composition (as per approval)	Existing approved Manufacturing Site (as per approval)	New approved Site / Manufacturer & Product License Holder (as per COPP)
023645	**As per Approval** Kwang Myung Lidocaine HCL Injection. Each 1.8ml cartridge contains:- Lidocaine Hcl USP 36mg. Epinephrine Bitrtrate USP 0.324mg (Eq to 0.018mg of Epinephrine) **As per Transfer letter** Kwang Myung Lidocaine HCL Injection (Medicaine Injection)	M/s Kwang Myung Pharm. Co. Ltd 907, Sangshin – RI, Hyangnam – Myun, Hwaseong-Kun, KyuncGI-Do, Rep. of Korea.	**Manufacturer & Product License Holder: -** M/s Huons Co., Ltd, 100 Bio Valley-ro, Jecheon-si, Chungcheongbuk-do, Republic of Korea

The comments /remarks of Legal Affair Division are as under:

"The instant case is of import of un-registered drug from a manufacturer which was not approved by the Registration Board yet. Moreover, mere approval by the Registration Board does not create any vested right of registration for any company / firm till the registration letter / post registration variation letter is issued. Therefore, the PE&R Division may process the case for prosecution of import of unregistered drug".

Area FID Report

It is pertinent to mention that the clearance of the product under question was given in light of registration letter no.F.1-16/93-Reg-I dated 4th November, 2004 in which the name of manufacturer was changed from M/s Kwang Myung Pharm.Co.Ltd: 907, Sangshin-ri, Hyangnam-Myun, Hwaseong-city, Kyunggi-do. Rep.of Korea to M/s Huons Co. Ltd Korea whereas the address of the manufacturer is not mentioned.

In the light of above it is established that M/s Hospital Supply Corporation Karachi has imported consignment of Medicaine Injection from the new source before getting the approval letter.

Decision: Registration Board deliberated on the opinion of the Legal Affairs Division to prosecute the firm for import of unregistered . The Board after deliberation decided to issue show cause notices to the firm M/s Hospital Supply Corporation, Karachi, under section 7 (11) read with 42 of the Drugs Act, 1976 for violation the condition of registration as reported by area FID.

As per decision, show cause notice issued to the firm vid F.No.3-4/2022-I&V-II(M-320)/Human Import dated 2nd December 2022

Proceeding and Decision:

Mr. Mahmood Feroz (Director) Hospital Supply corporation appeared before the Board and requested for issuance of variation of letter as per need of this medicine. Board inquired about the import of drug before official approval letter from new source but they did not reply satisfactory.

Registration Board after deliberation and keeping in view the above discussion decided as follows:

- **To prosecute the firm through its Directors/Management/Partners/Technical persons for violation of conditions of registration under section 7 (11) read with Rule 30 of the Drugs (L,R & A) Rules, 1976 under Drugs Act, 1976**
- **To issue variation letter to the importer as already approved by Registration Board.**

Case No.1 Renewal application under Drug (LR&A) Rules 1976 and SRO 1005(I)/2017.

Case No.2 Renewal application of M/s Amros Pharmaceuticals A96/, S.I.T.E. Super Highway, Karachi Pakistan deferred in 316th meeting of Registration Board.

M/s Amros Pharmaceuticals Karachi informed that they have submitted late renewal application due some unavoidable circumstances and in future this mistake will not be repeated. The firm further informed that as under SRO 1005, the renewal application can be submitted within 01 year of the due date. Due to COVID situation most of our staff which was involved in regulatory submission was unavailable. As per SRO the due date for the renewal submission for Registration No.039355 & 039356 was 11.07.2021. But unfortunately, 10.07.2021 and 11.07.2021 was official holiday (Saturday Sunday) and for registration No.061861,061862,061863,061864,061865, & 061866 was 29.08.2021 but on 28.08.2021 & 29.08.2021 was holiday (Saturday Sunday) in this regard the renewal application was submitted on next working day. Accordingly, the case was considered in 316th meeting of Registration Board and Board decided as under:

"Keeping in view the stance of the firm as narrated in last column above, the renewal applications of above products are within one year after due date under SRO 1005(I)/2015. Registration Board directed M/s. Amrose Pharmaceuticals, A-96 SITE Karachi to submit differential fee under aforesaid SRO for onward consideration".

Now the firm has submitted the differential fee, details are as under:

7.	007877	M. Brovit Syrup Each 5ml contains: Vitamin A 25000IU Vitamin D 250IU Thiamine HCl….0.55mg Nicotinamide…….5.5mg Riboflavin…...0.65 mg Ascorbic Acid….15mg	03-02-1985 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	
8.	004954	Carminative Mixture Each 100ml contains: Sodium Bicarbonate…5gm	05-08-1979 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	

		Spirit Ammonia Aromatic…6.5ml Tr. Cardco….6.5ml Aqua Mentha Pip Conc… 4.8ml				
9.	004486	Chloroquine Phosphate Syrup Each 100ml contains: Chloroquine Phosphate eq. to Chloroquine Base…..40mg	20-11-1978 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	
10.	004955	Ferrous Gluconate Syrup Each 5ml contains: Ferrous Gluconate...300mg	08-09-1979 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	
11.	007794	M.Brozine Elixir Each 5ml contains: Promethazine HCl…...5mg	28-01-1985 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	
12.	004953	Mephen Syrup Each 5ml contains: Diphenhydramine HCl…..13.5mg Ammonium Chloride…...131.5 mg	05-08-1979 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	
13.	004432	Diatrin Suspension Each 30ml contains: Kaolin……5.832g Pectin…...0.130gm	30-09-1985 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	
14.	004433	Tr. Benzoine Co Contains: Benzoin Crushed….10% Aloes BP……2% Tolu Balsam BPC…….40% Prepared Storax BPC…8% Spirit rectified…90%	22-11-1978 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	
15.	006603	Mandls Paint Each 100ml contains: Iodine….1.25gm Pot. Iodine…...2.5gm	23-11-1982 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	

		Peppermint Oil….0.4ml Alcohol 90%...4ml Water……...2.5ml Glycerine….100ml				
16.	006710	Gum Paint Each 100ml contains: Tr. Aconite….1% Tr. Myrrh….10% Tr. Iodine Mitis Rect……...4% Oil of clove……0.01% Menthol….0.01% Glycerine….25% Spt. Rectified…100ml	21-02-1983 Renewal granted: **28.04.2015**	27.04.2015	13-04-2015	

Decision of 317th meeting:

Registration Board cancelled the registration of above products as renewal applications were submitted after prescribed time period under rule 27 of Drug (LR&A) Rules 1976. Accordingly, cancellation letter was issued on 04 & 05th July 2022.

Reply of the firm:

Sr. No.	Reg. No	Name of product	Transfer of Reg /Issuance of renewal	Date of submission of renewal
1.	004713	Amrid Syrup (Ammonium Chloride Cough Syrup)	23.12.2006	17-02-2016
2.	007873	Aminophylline 100mg Tablet	Renewal granted till **28.04.2015** vide letter No. 11-17/2006-RRR dated 11.06.2009	13-04-2015
3.	007875	Chlorpheniramine Maleate 4mg Tablet	-do-	13-04-2015
4.	007874	M.Broplex Tablet	-do-	13-04-2015
5.	004712	Calamine Lotion	-do-	13-04-2015
6.	004954	Carminative Mixture	-do-	13-04-2015
7.	004486	Chloroquine Phosphate Syrup	-do-	13-04-2015
8.	004955	Ferrous Gluconate Syrup	-do-	13-04-2015
9.	007794	M.Brozine Elixir	-do-	13-04-2015
10.	004953	Mephen Syrup	-do-	13-04-2015
11.	007877	M.Brovit Syrup	-do-	13-04-2015
12.	004432	Diatrin Suspension	-do-	13-04-2015
13.	004433	Tr. Benzoine Co	-do-	13-04-2015
14.	006603	Mandls Paint	-do-	13-04-2015

15.	006710	Gum Paint	-do-	13-04-2015
16.	007876	Scabicid Lotion	-do-	13-04-2015

Firm has requested to review the above decision.

Decision: **Keeping in view the submission of approval of post registration variation and renewals by the firm as recorded above, the renewal applications for year 2015 and 2016 were submitted within time. Hence the cancellation letter issued vide letter No. F.3-8/2022-RRR (M-317) dated 04 & 05th July 2022 is hereby withdrawn *void ab initio.***

Case No.5 **Renewal application of Ribunal Suspension (078904) of M/s. Al-Fazal Pharma Industries (Pvt) Ltd.,16-Km Sheikhupura Road Lahore.**

The firm on 10.06.2020 submitted a letter regarding renewal of products including the said product and stated they are not able to submit these files within time due Covid-19 and requested to considered the current situation and renew them all. The fee and application on Form-5B was later on submitted on 15.09.2021 with Rs. 30,000/- fee. The firm further informed that they have submitted deposited the late fee for mentioned products. The delay is due to COVID-19 as the industry remains closed for few months in 2020. As opened they submitted the renewal with late fee in 2021. Accordingly, the case was considered in 316th meeting of Registration Board and deferred for opinion of legal affairs.

Now the firm has informed that description of the dosage form was changed Ribunal syrup to Ribunal Suspension vide DRAP letter No. 15-4/2017-Reg.V (M-267) dated 05.04.2017. Hence w.r.t aforesaid approval the renewal application submitted 15.06.2021 can be considered for the year 2022. Details are as under.

Reg. No.	Brand Name & Composition	Initial date of Registration PRV (If any)	Date of application (R&I) Fee submitted	Remarks
078904	Ribunal Suspension Each 5ml contains: Ibuprofen… 100mg (B.P Specifications)	26/02/2015 Change of description of dosage form: **15.06.2017**	15.09.2021 Rs. 30000/-	

Decision: **Keeping in view the post registration variation as recorded above, the renewal application dated 15.09.2021 is considered for the year 2022. Hence Registration Board granted renewal to Ribunal Suspension (078904) w.e.f 15.06.2022 to 14.06.2027.**

Cases of AD-II (Mr. Saadat Ali Khan)

A: Imported Human Biological product from Reference countries/WHO PQ:

1.	**Name, address of Applicant / Importer** Details of Drug Sale License of importer	M/s Sanofi-Aventis Pakistan Limited, Plot No. 23, Sector No. 22, Korangi Industrial Area, Karachi-74900, Pakistan **License No**: 542 **Address**: Plot No.23 Sec:22 K.I.A Karachi. **Validity**: 25-09-2023 **Status**: License to sell, stock & exhibit for sale, distribute and sell drugs by way of whole sale by of manufacturer, importer or indenter.
	Name and address of marketing authorization holder/Product License Holder (abroad)	M/s Sanofi Healthcare India Private Limited, Survey No. 274, Athvelli Village, Medchal Mendal-501 401, Medchal-Malkajgiri District, Telangana, India
	Name, address of manufacturer(s)	M/s Sanofi Healthcare India Private Limited, Survey No. 274, Athvelli Village, Medchal Mendal-501 401, Medchal-Malkajgiri District, Telangana, India
	Name of exporting country	India
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	The Firm has submitted • Legalized copy of CoPP (No. 2284325/TS/2021) issued on 15-12-2021 valid upto 20-11-2024 issued by Drug Control Administration, Government of Telangana for ShanIPV (Inactivated Poliomyelitis Vaccine B.P), Suspension for Injection. The CoPP specifies free sale status of the product in country of origin along with its availability. The CoPP also confirms the GMP status of the firm. (Periodicity of routine inspection: Once in a year) • Legalized copy of GMP (L. Dis. No. 70967/TS/2021) dated 22/11/2021 valid upto 20/11/2024 issued by Drugs Control Administration, Government of Telangana.
	Details of letter of authorization / sole agency agreement	Firm has submitted product specific letter of Power of Attorney dated 28-04-2022 from M/s Sanofi Healthcare India Private Limited. According to the letter, Sanofi Healthcare India Private Limited appoints "M/s sanofi-aventis Pakistan limited" with address "Plot No.23 Sector 22, Korangi Industrial Area, Karachi – 74900, Pakistan" it's truthful attorney for sole purpose of registration of the said product to allow the marketing and distribution within the country of Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale

For imported products, specify one the these	☐ Domestic and Export sales ☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
Dy. No. and date of submission	
Details of fee submitted	Rs. 75,000/- via e-deposit slip No. **31729956923** dated 24-05-2022 and differential fee of Rs. 75,000/- via e-deposit slip No. **44680420713** dated 24-10-2022
The proposed proprietary name / brand name	**ShanIPV**, Inactivated Poliomyelitis Vaccine B.P, Suspension for Injection in Multidose Vial – **For Tender Purpose only**
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	**One dose of 0.5 mL contains:** **Poliovirus (inactivated)** **Type 1 (Mahoney strain)#……..40 DU**[*+] **Type 2 (MEF-1 strain)#……8 DU**[*+] **Type 3 (Saukett strain) #…….32 DU**[*+] [#]produced on VERO cells [*]DU: D-antigen Unit [+]or equivalent antigenic quantity determined by a suitable immunochemical method.
Dosage form of applied drug	Suspension for Injection
Pharmacotherapeutic Group of (API)	Poliomyelitis Vaccine
Finished product specifications	B.P Specifications – BP monograph submitted by firm
Proposed Pack size	5.0 mL – 10 Doses / Vial (30 x 5.0mL – 300 Doses)
Proposed unit price	**MRP not applicable (For Tender purpose only)**
Shelf Life	36 months
Storage Conditions	2°C to 8°C
The status in reference regulatory authorities	**WHO Prequalified** – Firm submitted the prequalification letter dated 22-Apr-2022
For generic drugs (me-too status)	**Imovax** Polio Vaccine
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO Format. Firm has summarized information related to nomenclature, structure, general properties, manufacture, characterization, control of the API, Justification of specifications, Reference standard or materials, Container Closure System, Stability of drug substance. The firm has also summarized information of drug product including description and composition, pharmaceutical development, manufacture, control of excipients, control of Finished Pharmaceutical Porduct, reference standard or materials, container closure system and stability.
Name, address of drug substance manufacturer	Sanofi Pasteur, 1541, Avenue Marcel Mérieux, Marcy L'Etoile, 69280, France
Module-III Drug Substance:	Firm has submitted drug substance related data containing: General Information, Manufacture, Characterization, Control of Drug Substance, Reference Standards or Materials, Container Closure System, Stability

Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 10 batches. Stability study performed under normal storage conditions on three industrial batches stored in glass bottles at +5˚C ± 3˚C for 36 months and a complementary batch was added in order to check the pH fluctuations observed in two of the three industrial batches. Stability study performed under normal storage conditions on three industrial batches stored in stainless steel tanks at +5˚C ± 3˚C for 24 months. Stability study performed under accelerated storage conditions on three industrial batches stored in stainless steel tanks at +25˚C ± 2˚C for 3 months.
Module-III Drug Product	Firm has submitted drug product related date including Description and Composition, Pharmaceutical Development, Manufacture, Control of Excipients, Control of Drug Product, Reference Standard or Materials, Container Closure System and Stability.
Analytical method validation/verification of product	Firm has submitted analytical procedures along with validation via 3.2.P.5.2 and 3.2.P.5.3
Container closure system of the drug product	The final formulated ShanIPV is filled aspetically in USP Type I glass containers (vials). The filled vials are stoppered with chlorobutyl rubber stoppers and sealed with aluminium and Poly propylene flip top seals.
Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability studies performed on ShanIPV (filled product) for real time storage conditions +5˚C ± 3˚C for 42 months, accelerated condition 25˚C ± 2˚C for 6 months.
Module-IV	Only toxicology studies are performed as per following details: Two repeat-dose toxicity studies in 12 weeks (once a week) mice and 8 weeks (every 5 days) dogs assessing systemic toxicity - An hypersensitivity test in guinea pigs
Module-V	The firm has submitted summary of nine trials which included more than 1300 Indian subjects (1325 infants) have demonstrated the excellent immunogenicity profile of the vaccines.
Remarks	**Decision: Keeping in view legalized CoPP and WHO Prequalification (Reference Regulatory Authority); Registration Board approved the product subject to compliance of current Import Policy for finished drugs.** **The Board further advised for comments of Costing & Pricing Division regarding the issuance of registration letter for tender purpose only without fixation of MRP.**
2. Name, address of Applicant / Importer	**M/s Novartis Pharma (Pakistan) Ltd., 15, West Wharf, Dockyard Road, Karachi.**
Details of Drug Sale License of importer	License No: 007 Address: 15 West Wharf, Dockyard Road, Karachi, Pakistan. **Address of Godown:** C-21, SITE, Karachi. Validity: 12-03-2023.

	Status: License to sell drugs by way of wholesale
Name and address of marketing authorization holder (abroad)	M/s Sandoz GmbH, Biochemiestr. 10, 6250 Kundl, Austria.
Name, address of manufacturer(s)	M/s Lek Pharmaceuticals d.d, Verovskova 57, 1526 Ljubljana, Slovenia.
Name of exporting country	European Union
Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	Firm has submitted original & legalized CoPP certificate (No. 20/20/150517) dated 21.10.2020 issued by European Medicine Agency (EMA) for Rixathon 100mg Concentrate for Solution for Infusion. The CoPP confirms product is on market in exporting country. The CoPP also confirms the GMP compliance status of manufacturer.
Details of letter of authorization / sole agency agreement	Firm has submitted product specific Original & Legalized Power of Attorney from Member of Management Board of M/s Lek Pharmaceuticals d.d. Accordingly to the letter, M/s Lek Pharmaceuticals authorizes "M/s Novartis Pharma (Pakistan) Limited" to register product in Pakistan. The letter was issued on 27-10-2020 and valid till 30-10-2023.
Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)/ Biosimilar
Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
Dy. No. and date of submission	Dy. No: 32102 Date of submission: 23-11-2021
Details of fee submitted	PKR 150,000/-: 18-11-2021
The proposed proprietary name / brand name	Rixathon 100mg
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 10ml vial contains: Rituximab.....100mg
Dosage form of applied drug	Concentrate for Solution for Infusion
Pharmacotherapeutic Group of (API)	Antineoplastic agent/Monoclonal Antibody
Reference to Finished product specifications	Manufacturer's Specifications
Proposed Pack size	10ml vial – Pack of 2 or 3 vials
Proposed unit price	Proposed MRP per pack shall be furnished later
Shelf Life	3 Years
Storage Conditions	2°C-8°C

The status in reference regulatory authorities	Product is itself approved by EMA.
For generic drugs (me-too status)	Rituxim by M/S Pharmevo (Pvt.) Ltd. (Reg. # 107878) Mabthera by M/S Roche Pakistan Ltd. (Reg. # 031394) Tuximab by M/S Searle Company Ltd. (Reg. # 107882)
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO-QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Name, address of drug substance manufacturer	Rituximab: M/S Sandoz GmbH, Schaftenau Biochemiestrasse 10, 6336 Langkampfen, Austria.
Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API on accelerated conditions conducted on 5 ± 3°C for 12 months duration and long term conditions I conducted on ≤ -60°C and long term condition II conducted on -40 ± 10°C for 36 months duration.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
Container closure system of the drug product	Clear, colourless vials made of tubular glass and closed with rubber stoppers. The rubber stoppers are made of chorobutyl rubber. The vial-stopper combination is crimped with an aluminum cap with a flip-off component
Stability study data of drug product, shelf life and storage conditions.	Firm has submitted the long term stability study data at 5 ± 3°C for the duration of 36 months for 02 batches. The accelerated stability study is conducted at 25 ± 2°C / 60 ± 5 % RH for the duration of 6 months for 02 batches.
Module – IV Non-Clinical	Summarized in Biosimilarity data.
Module-V Clinical	Summarized in Biosimilarity data.

Decision: Keeping in view legalized CoPP, approval of European Medicine Agency (EMA) (Reference Regulatory Authority) and biosimilarity data submitted in light of decision of 297th meeting of Registration Board; Registration Board approved the products subject to compliance of current Import Policy for finished drugs.

Container closure system of the drug product	Clear, colourless vials made of tubular glass and closed with rubber stoppers. The rubber stoppers are made of chorobutyl rubber. The vial-stopper combination is crimped with an aluminum cap with a flip-off component

Stability study data of drug product, shelf life and storage conditions.	Firm has submitted the long term stability study data at 5 ± 3°C for the duration of 36 months for 03 batches. The accelerated stability study is conducted at 25 ± 2°C / 60 ± 5 % RH for the duration of 6 months for 03 batches. Proposed shelf life of finished product is 36 months.
Module – IV Non-Clinical	Summarized in Biosimilarity data.
Module-V Clinical	Summarized in Biosimilarity data.

Bio similarity data as per WHO guidelines submitted by the firm is as follows:

WHO Biosimilarity Guidelines	**Data Submitted by the firm**
Quality Comparison • Physicochemical Characterization	**Molecular mass and primary structure:** rituximab is a 145 kDa monoclonal antibody (mAb) composed of two light chains (213 amino acid) and two heavy chains (451 amino acid), which are N-glycosylated at Asn301. Based on its theoretical sequence, digestion with endoproteinase LysC allowed the generation of peptides covering the majority of the entire primary sequence. Together with the LysC data obtained for all batches it can be stated that the sequence of GP2013 is identical to the originator product and thus identical to the theoretical sequence of rituximab. In addition, mass spectrometry analyses showed that all test items had the expected masses in native and reduced/ alkylated forms. • **N-Glycosylation:** Analyses of oligosaccharides showed that GP2013 had consistent oligosaccharide distribution and expected glycosylation for an antibody produced in CHO (Chinese hamster ovary) cells, showing one single N-glycosylation site at the heavy chains. Approximately 99% of the heavy chains are N-glycosylated at Asn301 and there are no other glycosylation sites detected. • **Charged variants**: Charge heterogeneity was evaluated for all test items by CEX and revealed consistent values for acidic and basic peak variants. **Molecular size variants**: Size heterogeneity was assessed by capillary gel electrophoresis and size exclusion chromatography (SEC). The results show that all variants detected are product related and no differences between test items were detected with the exception of the results obtained with SEC. • **Content:** The content ranges of batches sourced from both regulatory jurisdictions are highly overlapping and do not differ from content values determined for GP2013. Thus, all products show the same content with an expected and justified variability caused by the process.
Biological Activity & Immunochemical properties	• **Functional Characterization of Fc Domain:** **i. Characterization of Complement Dependent Cytotoxicity (CDC) Function:** Rituximab has a number of elements that are known to contribute to its mode of action. After binding of the CD20 antigen on the surface of B cells, the complement system is activated via binding of C1q to the Fc part of the antibody, leading to complement dependent cytotoxicity (CDC).

	ii. Characterization of Complement Dependent Cytotoxicity (CDC) Function: The antibody can interact with FcgammaR positive cells and can thereby induce antibody dependent cellular cytotoxicity (ADCC). Furthermore, binding of rituximab can induce apoptosis of the target cell.
Impurities	Degradation pathways such as **deamidation, oxidation, fragmentation, crosslinking, and isomerization** induced by extreme **pH values, aggregation by mechanical stress or oxidative stress** were addressed. In addition, the forced degradation studies were used to predict GP2013 degradation pathways and to compare them to the originator product.
Stability Studies	The currently available stability data for GP2013 DP batches and originator product batches demonstrated a very low susceptibility of rituximab to degradation at long-term storage condition. No relevant differences could be noted between GP2013 and the originator product when stored either at the long-term or at accelerated conditions. **Storage at the long-term condition (5 ± 3°C):** All batches tested demonstrated a very similar stability behavior; no significant changes were observed for the majority of quality characteristics tested over time. **Storage at the accelerated condition (25 ± 2°C):** the stability behavior of GP2013 and the originator products show highly comparable degradation pathways for all investigated parameters.
Non-clinical Comparison	The biological activity of GP2013 was compared to that of MabThera and Rituxan in a number of *in vitro* pharmacology studies that included binding and the various ascribed rituximab MOAs of B cell depletion. **Primary Pharmacodynamic Studies:** • CD20 target Binding • C1q Binding • FcRs and FcRn Binding • ADCC assay • PDMC and Freshly purified NK Cells mediated ADCC assay • CDC Assay • Apoptosis Assay • Whole blood assay **Pharmacokinetic/Toxicokinetic Studies:** • Single-dose PK/PD study in monkey (cyomolgus) male between drug product and originator product • Repeat-dose toxicity study with TK evaluations in monkey (cyomolgus) male & female between drug product and originator product.
Clinical Comparison	Clinical Comparability between GP2013 and the Originator Product: • a pivotal clinical PK/PD, safety, efficacy and immunogenicity study in patients with active Rheumatoid Arthritis (study GP13-201, Part I) and • a pivotal clinical efficacy, PK/PD, safety and immunogenicity in patients with advanced Follicular Lymphoma (study GP13-301). • An open label, single arm, multi-center study to assess the safety and pharmacokinetics of GP2013 monotherapy administered weekly in Japanese patients with CD20 positive low tumor burden indolent B-cell non-Hodgkin's lymphoma. • A randomized, double-blind, controlled study to evaluate PK, PD, safety and efficacy of GP2013 and rituximab in patients with rheumatoid arthritis refractory

or intolerant to standard DMARDs and one or up to three anti-TNF therapies.

Remarks of Evaluator: The fee has been submitted in the Pharmaceutical Evaluation & Registration division' head instead of BE&R division. And now the firm has submitted letter issued by Budget & Account (B&A) division DRAP wherein it has been stated "you are advised to submit the original challans along with an undertaking that the recipts will not be used for more than one application, in the concerned division". The firm has also submitted undertaking on the stamp paper of Rs. 100/- wherein it is mentioned that the recipts will not be used for more than one application.

Decision: Keeping in view legalized CoPP, approval of European Medicine Agency (EMA) (Reference Regulatory Authority) and biosimilarity data submitted in light of decision of 297th meeting of Registration Board, Registration Board approved the products subject to compliance of current Import Policy for finished drugs.

B: Imported Human Biological Product from Non-Reference Countries:

4.	**Name, address of Applicant / Importer**	**M/s SIND MEDICAL STORES,** 13-B, Block 6, PECHS, Karachi.
	Details of Drug Sale License of importer	**License No**: 0257 **Address Sector 13B/B-10, Block 6, PECHS, Karachi.** **Validity:** 01-07-2024

	The status in reference regulatory authorities	Influvac Tetra by Abbot Biologicals B.V, The Netherlands
	For generic drugs (me-	Influvac Tetra (Abbot Lab Pakistan)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure

	Name, address of drug substance manufacturer	**M/s SINOVAC BIOTECH CO.LTD** **For bulk**: No. 39, Shangdi Xi Road, Haidian District, Beijing,P.R.China. **For Formulation,** Filling & Packaging : No. 15, Zhitong Road, Changping Science Park, Changping District, P.R.China **Exporter:** Sinovac Biotech (Singapore) Pte. Ltd 80 Robinson Road, #02-00, Singapore 068898
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of Multiple batches (9 batches) manufactured in different years with different virus strains have been applied in the long-term stability study at 2-8°C. Three batches for 0,3,6,9 months,three batches for 0,3,6,9,12,18 months) & three batches for 0,6,9,12 months to support the validity of the monovalent pooled harvest for 12 months. And Accelerated stability data at 25°C for six batches (0,1,2,3 months) The testing items include protein content, bacteria endotoxin,
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of
	Analytical method validation/verification of product	Firm has submitted the of analytical method validation.
	Container closure system of the drug product	Assemblages for the pre fillable syringe consist of: • 1 mL glass barrel, • Plunger rod, • Plunger stopper, • Stainless steel needle, • Needle shield
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of Multiple batches (6 batches) manufactured in different years with different virus strains have been applied in the long-term stability study at 2-8°C for 0,3,6,9,12,18 months. Accelerated stability data at 25°C for six batches (0,7,14,21 & 21 days) and at 37°C for six batches (0,1,3 days). The testing items include protein content, bacteria endotoxin, haemagglutinin content and ovalbumin
	Module-IV Non-Clinical	• Single-Dose Toxicity: Acute Toxicity of Intramuscular injection in Mice. • To observe the irritant reaction of quadriceps femoris muscle after injection of the test drug in rabbits, and to indicate the possible irritation at the injection site in the linical application of the drug, to provide reference for the clinical application of the drug

	Module-V Clinical	**An open-label phase I** and **Randomized, double-blind, controlled phase III clinical trial** to evaluate the safety and immunogenicity of Influenza Vaccine (Split Virion), Inactivated, Quadrivalent in healthy subjects aged 3 years old and older. (Subjects : 2380)
	Remarks:	
	Decision: Keeping in view legalized CoPPs indicating products availability in country of origin, Registration Board approved the products subject to compliance of current Import Policy for finished drugs. The Board further advised that the firm shall update strains of Influenza virus each year as per recommendations of WHO for Northern Hemisphere.

	Dy. No. and date of submission	Dy. No 32871Dated 15-12-2021, Dy. No 10726 dated 28-04-2022
	Details of fee submitted	Rs. 150,000/- Dated 21 September, 2022 (in pharmaceutical division) Rs. 150,000/- Dated 03 November, 2022 (in biological division)
	The proposed proprietaryname / brand name	Infertreat
	Strength / concentration ofdrug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: 250mcg (6500IU) Vial
	Dosage form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Sex hormones and modulators of the genital system, gonadotropins, ATC code:G03GA08
	Reference to Finished product specifications	Manufacturer Spec
	Proposed Pack size	Pack Size: … 1 vial Per small box 10 small boxes per Middle box
	Proposed unit price	Retail price As per SRO
	Shelf Life	24 Months. **But stability study of 12 months has been submitted.**
	Storage Conditions	Store and transport below 30 °C in the original package
	The status in reference regulatory authorities	Ovidrele 250mcg/Inj, approved by FDA &EMA
	For generic drugs (me-toostatus)	Ovidrele 250mcg/Inj, of Merck (importer)
	Module-II (Quality OverallSummary)	Firm has summarized information related to nomenclature, structure, general properties, manufacture, characterization, control of the API, Justification of specifications, Reference standard or materials, Container Closure System, Stability of drug substance. The firm has also summarized information of drug product including description and composition, pharmaceutical development, manufacture, control of excipients, control of Finished Pharmaceutical Porduct, reference standard or materials, container closure system and stability.

	Name, address of drug substance manufacturer	**Livzon (Group) Pharmaceutical Factory** No. 38 North Chuangye Road, Jinwan District, Zhuhai City, Guangdong Province,China
	Module-III Drug Substance:	Firm has submitted the drug substance's general information, manufacture, characterization, quality control, Reference Standards or Materials, Container Closure System, Stability and Process Validation Report of Drug Substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The firm has submitted date for four batches at -80^{o}C±10^{o}C (real time) for 0,3,6,9,12,18,24 months & at 5^{o}C±3^{o}C (accelerated Stability testing) for 0.1,2,3,6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification ofproduct	Firm has submitted analytical method validation/verification of the product.
	Container closure system ofthe drug product	Primary container of the product is 2ml neutral borosilicate glass tube injection with 13 mm rubber stopper & aluminum-plastic combination cap.
	Stability study data of drugproduct, shelf life and storage conditions	Firm has submitted stability study data of 3 batches as per Zone IVA. The accelerated stability study data is conducted at 40°C ± 2°C/75% ±5% RH for 6 months. The real time/long term stability study data is conducted at 30°C ± 2°C/75% ± 5% RH for 12 months. Details are Submitted.
	Module-IV	The pharmacodynamics and safety pharmacology of LZM003 were studied (mice & cynomolgus monkey). The pharmacokinetic studies of LZM003 included single-dose pharmacokinetics (non-GLP) and multiple-dose pharmacokinetics (GLP) with cynomolgus monkey via subcutaneous injection. Single Dose Toxicity (in mice) , Repeated Dose Toxicity (Cynomolgus Monkey), In vitro hemolysis (in Rabbit) & Systemic Active allergies (in Guinea Pigs)
	Module-V	Firm has submitted Clinical studies, Healthy Subject PK and Initial Tolerability Study Reports, Study Reports of Controlled Clinical Studies Pertinent to the Claimed Indication, Individual Patient Listing for phase I, Individual Patient Listing for phase III. Pharmacokinetic comparison study of LZM003 and Ovidrel in Chinese healthy subjects via single subcutaneous injection A multi-center, randomized, double-blind, positive-drug parallel controlled, equivalence study (Ovidrel 250 μ) 200 subjects. A multi-center, randomized, double-blind, positive-drug parallel-controlled clinical trial to evaluate the efficacy and safety of LZM003 in

		Chinese women for controlled ovarian. Subjects: 229
	Remarks:	
	Decision: Keeping in view legalized CoPPs indicating products availability in country of origin, Registration Board approved the products subject to compliance of current Import Policy for finished drugs. Firm will submit real time stability data of 3 commercial batches up to the demanded shelf life before issuance of registration letter.	

Locally Manufactured Human Biological

6.	**Name of Manufacturer**	**M/s Macter International Limited.** **F- 216, S.I.T.E, Karachi 75700, Pakistan.**

	Dy. No. and date of submission	Form 5-F Dy. No 2186 Dated 24-01-2022
	Details of fee submitted	Fee Submitted: Rs.30,000/- dated 26-03-2021.
	Brand Name + Dosage Form + Strength	**Momentum** Lyophilized powder for injection with one ampule of one ml WFI
	Composition	Each vial after reconstitution contains 10 mg of etanercept in 1 ml.

Dosage form of applied drug	Lyophilized powder for injection
Pharmacotherapeutic Group of (API)	Act as IMMUNO SUPPRESSANT Tumor necrosis factor receptor fusion protein
Reference to Finished product specifications	As per innovator's specification
Proposed Pack size	1's Vial /As per DPC
Proposed unit price	
Shelf Life	24 Months
Storage Conditions	(2^0C-8^0C)
The status in reference regulatory authorities	"Enbrel" registered product of Immunex Corporation (Amgen) in USA approved by FDA
For generic drugs (me-too status)	Enbrel (062228) Wyeth (Pfizer) Pakistan Momentum in 25mg (091268) Macter International ltd.
Module-II (Quality Overall Summary	Firm has submitted QOS as per WHO. Firm has summarized information related to nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, Characterization (Elucidation of Structure and Other Characteristics), impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis an justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches at long term conditions at -20 ℃ for 36months. The accelerated stability data is conducted at 30**º**C ± 2 ℃ /60% ± 5%RH for 10 days for accelerated conditions.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Analytical method validation/verification of product	Firm has submitted the details of analytical method validation.
Container closure system of the drug product	Packaging for Etanercept finished products are 3 ml USP type 1 clear glass vials accompanied with 13 mm Single slit siliconized butyl grey rubber stoppers and aluminum flip off seal, along with

	an ampoule of 1 ml WFI (water for injection) for reconstitution of momentum.
Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches (two pilot scale & one lab scale) at long term conditions at 5±3°C for 06 months. The accelerated stability data is conducted at 25±2°C 60±5%RH for 6 months

Documents required as per 297th RB decision for Biological Drugs (Concentrated Form/Ready to fill Form)	**Documents submitted by firm**
The firms shall provide legalized GMP certificate (issued by relevant regulatory authority) of biological drug substance manufacturer abroad (who will provide concentrate / ready to fill bulk of biological drug to Pakistani manufacturers for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin. Submission of valid GMP is exempted, if valid GMP status is evident from official website of regulatory authority of country of origin.	Legalized copy of GMP in case of its already registered product Momentum 25mg but it has been expired on 29-09-2021. The firm has submitted copy of new GMP along with verification link which was verified on 04th November, 2022. https://www.nmpa.gov.cn/datasearch/search-info.html?nmpa=aWQ9MTQ3MzkmaXRlbUlkPTJjOWJhMzg0NzU5Yzk1NzcwMTc1OWNjMjcxNmMwMjMw
The firms shall provide legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority (or its website) as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk.	Legalized CoPP of 25mg was already submitted by the firm in case of its already registered product Momentum 25mg but the CoPP expired on December, 2018. Now the firm has submitted copy of new CoPP which can be verified online on the official website of NMPA china by the given link was verified on 04th November, 2022. https://www.nmpa.gov.cn/datasearch/en/search-info-en.html?nmpa=aWQ9Nzk0MiZpdGVtSWQ9MmM5YmEzODE3OWQwOGY0ZjAxNzlkMGYyZmRhMjAwMzU=
The firm shall provide the complete Bio-similarity studies of the finished product of same source (bulk concentrate or ready to fill) manufactured either from country of origin or by any reference regulatory authority as adopted by Registration Board to demonstrate the biosimilarity. However, it will not be required	Provided & Evaluated below

if the finished drug product was approved before implementation of biosimilarity in the said country and finished drug product is still freely available and the firm shall provide the safety, efficacy data of finished drug product as per applicable regulatory requirements at that time.	
The firm shall provide the lot release certificate of the finished product manufactured by same bulk concentrate/ ready to fill from country of export (If applicable).	The firm has submitted that lot release is not required in country of orgin (BulK provided country).
The firm shall provide the 6 months accelerated and real time stability studies for drug substance & drug product manufactured locally.	Provided
The local manufacturer shall manufacture three trial batches (quantity sufficient to meet the complete testing up to the assigned shelf life both for real time and accelerated stability studies) of the finished biological product to finalize the formulation and then perform tests as per following order: i. Latest Pharmacopoeia ii. Innovator Product iii. Reference Biotherapeutic Product iv. In case aforementioned tests are not available then tests as adopted by drug substance manufacturer shall be followed.	Provided results for the following tests with comparative with Enbrel (Wyeth Pakistan Ltd.) : • Identification and purity by SDS-PAGE, • Purity by Gel Filtration Chromatography • Potency (Protein Concentration) by bicinchoninic acid assay (BCA) Method. • Biological Activity by Cytotoxicity Inhibition assay. • Endotoxin Test by Gel Clot Method • Sterility Test by Membrane Filtration Technique The following tests are also performed: Physical appearance (before & after re-constitution), Reconstitution Time, Particulate Matter (After Reconstitution) Moisture Content (by Karl Fischer), PH, Protein content by BCA Method, Specific Bioactivity, lmmuno identification Western Blotting, Molecular weight identification by SOS-PAGE (Reducing, silver Staining), Purity by SOS- PAGE (Reducing, Silver Staining), Purity by Gel Filtration-HP LC, Bacteria Endotoxin, sterility test.
The manufacturer shall perform all tests locally as mentioned on Certificate of analysis of finished product of drug substance supplier in case of non-pharmacopoeial product.	Submitted as mentioned above
The firm shall also provide the list of finished products being manufactured from same bulk concentrate or ready to fill form	Provided

in any country of the world (if available).	
The firm shall provide the agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	The firm has submitted copy of supply agreement wherein it has been mentioned that any changes in the process shall be communicated to DRAP. However, the name of bulk manufacturer mentioned is "**Shanghai CP** Guojian Pharmaceutical co. ltd. 399 Libing Road, **Zhangjiang Hi-tech Park**, Shanghai P.R. China" while in provided GMP/FSC the name & address of Bulk manufacturer is "**Sunshine** Guojian Pharmaceutical (Shanghai) co. ltd. 399 Libing Road, China (Shanghai) **Pilot Free Trade Zone**, China" **The firm has submitted clarification letter from its manufacturer where it has been mentioned that manufacturer name has been changed & nomenclature of the adrres has been also changed while the site remain the same.**
Regular monitoring through pharmacovigilance reporting system shall be observed through proper pharmacovigilance cell of the manufacturer and report will be forwarded to the National Pharmacovigilance Centre, Division of Pharmacy Services and Biological Division of DRAP. In case of any severe adverse event, immediate mandatory reporting procedure shall be followed.	The firm has provided SOP for Pharmacovigilance Surveillance. The firm has also provided Commitment on on stamp paper mentioning the said statement.
The firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	Commitment provided on stamp paper by the applicant.
If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	Commitment provided on stamp paper by the applicant.
All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	Commitment provided on stamp paper by the applicant.

For the already registered drugs for local manufacturing, the current guidelines shall apply at the time of renewal of product.	

Bio-similarity studies of the finished product of same source (bulk concentrate or ready to fill) manufactured from country of origin.	
WHO Bio-similarity guidelines	**Data submitted by the firm**
Quality Comparison Physicochemical characterization	**Physicochemical Characterization** **<u>Structure Characterization</u>** i) Primary Structure ii) Relative Molecular Weight by Electrophoresis iii) Molecular Weight by SEC-DLS iv) Peptide Mapping BY HPLC v) Peptide Mass Mapping vi) N-terminal Amino Acid Sequence vii) C-terminal Amino Acid Sequence by LC-MS/MS **Secondary Structure** by Far UV CD Spectrum by Near UV CD Spectrum) **Posttranslational Modification** i) N-glycan Analysis ii) Content of Sialic Acid
Biological Activity & Immunochemical properties	Biological activity in vitro for Yisaipu and Enbrel is tested by TNFα neutralization killing test based on L929 cell with the active reference produced. **Receptor Binding Activity** ELISA Test **Affinity Analysis:** Binding of rhTNFR Affinity with antigen TNF- α **Affinity with Fc segment key receptor** Affinity with FcRn receptor Affinity with FcγRIa receptor Affinity with FcγRIIa receptor Affinity with FcγRIIb receptor Affinity with FcγRIIIa receptor Binding activity with complement C1q **Antibody-dependent cell-mediated cytotoxicity (ADCC)** **Complement dependent cytotoxicity (CDC)** **C-terminal lysine charge variants analysis**
Impurities	**Purity** i) SEC-HPLC Purity ii) HIC-HPLC Purity iii) SDS-PAGE Purity iv) Electric Charge Analysis
Stability Studies	Stability studies are provided.
Non-clinical Studies	**Pharmacology** <u>In-vitro Studies</u>: Comparative Primary Pharmacodynamics i. Murine L929 cells

i. In-vitro Studies ii. In-vivo Studies	ii. Biacore T100 **Secondary Pharmacodynamics (In-vivo Studies.)** -Collagen-induced arthritis (CIA)model in mice -Adjuvant-induced arthritis (AA)model in rats -Dalactos amine-induced neutralizing model in mice **Safety Pharmacology** **Pharmacokinetics** Toxicology studies **i) Single Dose Toxicity (Kunming mice)** **ii) Repeated Dose Toxicity (rhesus model)** **iii) Local Tolerance**
Clinical Studies	**Phase I Clinical Study** Compare the pharmacokinetic properties and tolerability of two formulations of Etanercept in Mexican healthy volunteers to establish biocomparability and non-biocomparability between both. **Phase II Clinical Study** i. Observe the safety and efficacy of rhTNFR: Fc (INN: ETANERCEPT) after administration in the patients with moderate or severe active rheumatoid arthritis (RA).' ii. Randomized double blind, placebo parallel control multi-center clinical trial for the efficacy and safety of treating ankylosing spondylitis with Yisaipu **Phase III Clinical Study** An open label, prospective, non-comparative, multicentre study to assess the safety and efficacy of Etanercept for injection 25mg in patients with moderate to severe active rheumatoid arthritis. **Phase IV Clinical Study** A multi-center and open study to evaluate the safety and efficacy of the recombinant human tumor necrosis factor receptor II antibody fusion protein for injection in the treatment of active rheumatoid arthritis (RA).
Remarks	Phase I is submitted comparative while phase-III clinical study is non-comparartive. However, its already registered strength of the same product i.e. Momentum 25mg was approved & registered on the basis of the same data. And M/s Getz Pharma also imported the same molecule from the same manufacturer which was also approved & registered on the basis of the same clinical trial data.
Decision: Keeping in view the data submitted by the firm in light of guidelines of 297th meeting, Registration Board approved the product in combo pack with WFI (1ml).	

C: Miscellaneous/ Deferred Cases

Locally Manufactured Human Biological i.e. Heparin & Enoxaparin Injections applied by M/s Macter International Limited deferred in 320th meeting of Registration Board.

7.	**Name of Manufacturer**	**M/s Macter International Limited.** **F- 216, S.I.T.E, Karachi 75700, Pakistan.**
	DML and last GMP details	DML No. 000141 Address: F- 216, S.I.T.E, Karachi 75700, Pakistan. **Evidence of section:** Liquid and Lyophilized recombinant DNA technology products (biological) section dated 19th July, 2012 GMP: Last GMP conducted on 13-08-2020 valid up to 12-08-2022

Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
For imported products, specify one the these	☐ Finished Pharmaceutical product import ☒ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
Dy. No. and date of submission	Form 5 Dy.No.30665 dated 09-11-2021. Fee Submitted: Rs.30,000/- dated 20-10-2021.
Details of fee submitted	Rs: 30,000/- dated: 20-10-2022
Brand Name + Dosage Form + Strength	**Hepanox** Solution for Injection
Composition	One ml of solution for injection contains 5000 IU of heparin sodium. While 1 vial (5 ml) contains 25000 IU of heparin sodium.
Dosage form of applied drug	Injection
Pharmacotherapeutic Group of (API)	Anticoagulants
Reference to Finished product specifications	B.P
Proposed Pack size	1’s, 2’s, 5’s, 10’s & 25’s vialAs per DPC/
Proposed unit price	
Shelf Life	24 Months
Storage Conditions	(Store below 25^0C)
The status in reference regulatory authorities	Heparin Sodium Injection, USP FDA Approved
For generic drugs (me-too status)	Brand Name: Heparin Injection 25000 IU/ 5ml, 1’s Pack Importer Name: M/s Leo/ Zam Zam Pharma
Module-II (Quality Overall Summary	Firm has submitted QOS as per WHO. Firm has summarized information related to nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, Characterization (Elucidation of Structure and Other Characteristics), impurities, specifications, analytical procedures,

	batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis an justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches at long term conditions at 25 ℃ RH 60%±10% for 48months. The accelerated stability data is conducted at 40ºC ± 2 ℃ /60% ± 5%RH for 06 months for accelerated conditions.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Analytical method validation/verification of product	Firm has submitted the details of analytical method validation.
Container closure system of the drug product	USP Type-I glass vial (5mL),13mm slit less butyl grey stopper 133 mm Flip off aluminum caps
Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches (two pilot scale & one lab scale) at long term conditions at 25 ℃ RH 60%±10% for 06 months. The accelerated stability data is conducted at 40ºC ± 2 ℃ /75% ± 5%RH for 06 months for accelerated conditions.

Decision of 320th meeting of RB:

"Registration Board referred the case to Licensing Division for confirmation of manufacturing section for production of Heparin Sodium".

The case was processed to Licensing division for the section requirement of local manufacturing non-rDNA Biological Drugs (i.e. Heparin) whether such products can be manufactured in rDNA Biological section as per current rules/regulation/practice of licensing division or not?

The Licensing division has conveyed the following comments:

"the Central Licensing Board approved **Liquid and Lyophilized recombinant DNA Technology** products (Biological) section in its 229th meeting held on 13-06-2021 under Drugs Act 1976 and rule framed thereunder. However, it is pertinent to mention that matter

regarding conditions/requirement for manufacturing and registration of drugs does not come under the purview of Licensing Division, DRAP".

Submitted for consideration of the Board please.
Remarks :

Decision: Registration Board deferred the case for following:

- **Submission of section wise products details of M/s Macter International Limited Karachi**
- **Submission of pharmaceutical equivalence (Quality comparison) of the product.**

8.	**Name of Manufacturer**	**M/s Macter International Limited.** **F- 216, S.I.T.E, Karachi 75700, Pakistan.**
	DML and last GMP details	DML No. 000141 Address: F- 216, S.I.T.E, Karachi 75700, Pakistan. **Evidence of section:** Liquid and Lyophilized recombinant DNA technology products (biological) section dated 19th July, 2012 GMP: Last GMP conducted on 13-08-2020 valid up to 12-08-2022
	Bulk Manufacturer	Hubei Enoray Biopharmaceutical Co.,Ltd. No.108, Yanjiang Road, Xiaochi Town, Huangemei County, Hubei Province, China
	Brand Name + Dosage Form + Strength	**Inhixa 0.2ml vial**
	Composition	Each 0.2 ml vial contains Enoxaparin sodium 20 mg.
	Finished product specifications	Ph. Eur.
	Pharmacological Group	Antithrombotic agent
	Shelf life	24 Months (Store below 25^0C)
	International availability	Levenox the product is available in PFS in the said strenght & volume.
	Products already registered in Pakistan	Clexane 20mg/0.2ml but the product is available in PFS
	Type of Form	Form 5
	Dy. No. Date of Application, Fee submitted	Dy.No.32430 dated 29-11-2021. Fee Submitted: Rs.30,000/- dated 27-10-2021.
	Demanded Price / Pack size	s & 2's vial/As per SRO'1
	General Documentation	The formulation in 0.2ml vial is not available in reference country.
9.	**Name of Manufacturer**	**M/s Macter International Limited.** **F- 216, S.I.T.E, Karachi 75700, Pakistan.**
	DML and last GMP details	DML No. 000141 Address: F- 216, S.I.T.E, Karachi 75700, Pakistan. **Evidence of section:** Liquid and Lyophilized recombinant DNA technology products (biological) section dated 19th July, 2012 GMP: Last GMP conducted on 13-08-2020 valid up to 12-08-2022

General Documentation	The formulation in One ml vial is not available in reference country.

Data as per guidelines of 289th meeting of Registration Board;

i) For Bulk Concentrate Import, Local formulation Filling:

	Documents Required	Documents submitted by the firm
i.	The firms shall provide legalized GMP certificate of biological drug substance manufacturer abroad (who will provide concentrate / ready to fill bulk of biological drug to Pakistani manufacturers for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin.	Copy of GMP No.2020-20 dated 07-09-2020 issued by Hubei Provincial Drug Administration, China. Copy of GMP issued by Mo Industry and trade of the Russian Federation. Manufactuerer and its address: Hubei Enoray Biopharmaceutical Co.,Ltd. No.108, Yanjiang Road, Xiaochi Town, Huangemei County, Hubei Province, China
ii.	The firms shall provide legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority.	Not provided.

iii. The firm shall provide the complete data as adopted for imported Enoxaparin injections in 281st meeting of Registration Board of the finished product of same source (bulk concentrate or ready to fill) manufactured either from country of origin or by any reference regulatory authority as adopted by Registration Board to demonstrate the similar efficacy and safety to innovator product covering following requirements:

a)	The first criterion for demonstrating sameness of enoxaparin is equivalence of physicochemical properties, such as molecular weight distribution using size exclusion chromatography, chain mapping by cetyltrimethylammonium-coated strong anion exchange	Heparin sodium is dissolved and through salification, esterification, it is converted to heparin benzyl ester, then, Enoxaparin sodium is formed by alkaline degradation. Following a series of purification process (filtration, oxidization, ultrafiltration, membrane filtration, lyophilization,

chromatography, matrix-assisted laser desorption ionization mass spectrometry (MALDIMS), gel permeation chromatograph—electro spray ionization mass spectroscopy (GPC-ESI-MS), or reverse phase ion pair—electro spray ionization mass spectroscopy (RPIPESI-MS).

b) The second criterion for demonstrating the sameness of enoxaparin is equivalence of heparin source material (ie, heparin that is derived from porcine intestinal mucosa and that meets USP monograph standards for heparin sodium USP) and mode of depolymerization (ie, cleavage by alkaline b-elimination of the benzyl ester derivative of heparin). The equivalent heparin source material should have at least a similar distribution of natural disaccharide building block sequences (within the context of its variability). If an equivalent mode of depolymerization is used, the generic drug products should be at least similar.

c) The third criterion for demonstrating the sameness of enoxaparin is equivalence in disaccharide building blocks, fragment mapping, and sequence of oligosaccharide species. This can be achieved by exhaustive digestion of enoxaparin with purified heparin digesting enzymes (heparinases I, II, and III) and nitrous acid, among other means, to yield the constituent disaccharide building blocks comprising enoxaparin. These individual disaccharide building blocks can be quantified by capillary electrophoresis (CE), reverse phase high-performance liquid chromatography (RP-HPLC), strong anion exchange HPLC (SAX-HPLC), mass spectroscopy, and nuclear magnetic resonance (NMR) spectroscopy. Chemical approaches such as analysis with modifying reagents (e.g. sodium borohydride, nitrous acid) or modifying enzymes (eg, 2-0-sulfatase, 6-0-sulfatase, and 5-glucuronidase) can be included.

d) The fourth criterion for establishing sameness of enoxaparin is equivalence of in vitro biological and biochemical assay results using activated partial thromboplastin time (aPTT) and Heptest prolongation time. The equivalence in anti-Xa activity, anti-IIa activity, and anti-

grinding and mixing), the final product Enoxaparin sodium is obtained.

The structure & quality of Enoxaparin sodium has been compared with reference standard (Eu) & reference product**:**

a. Elucidation of Structure and other Characteristics:

i. Molecular weight distribution by LC & eighteen-angle laser scattering instrument, Electronic balance.
ii. Quantitative analysis of uronic acid by Microplate reader.
iii. Qualitative analysis of amino sugar by Ion chromatograph, ampere pulsed, electronic balance.
iv. Qualitative analysis of free anions and combined sulfo groups by Ion chromatograph, Electrical conductivity Dectector.
v. Nuclear Magnetic Resonance analysis by NMR analyzer.
vi. Infrared analysis by Fourier transform infrared spectrometer.
vii. Disaccharide composition analysis by HPLC
viii. Reducing end content analysis by HPLC.
ix. Oligosaccharide sequence LC-MS analysis by Superhigh pressure liquid chromatograph-mass spectrometer
x. Fingerprinting analysis with 2D-LC-Q/Tof-MS

a. Equivalence of heparin source material:

Based on USP monograph, the starting material of Enoxaparin sodium is from porcine intestinal mucosa & these are obtained from marketing authorization. CoA of crude Heparin Sodium has been submitted. Equivalence of Heparin degradation by chemical reaction (Benzethonium heparinate, nHeparin benzyl ester)

Invitro Bioequivalence study of Low molecular weight Heparins for comparison of the product on aPTT & FXa activity with that of reference drug by aPTT assay & Anti-FXa assay.

Equivalence in Biological & Biochemical assays: Anti-factor Xa activity & Anti-

	Xa/anti-IIa ratio between the generic LMWHs should be provided.	factor IIa activity by potency test method of USP mpnograph.
	e) The fifth criterion for establishing sameness of enoxaparin is equivalence of ex vivo pharmacodynamic (PD) profile in human volunteers. The comparison of in vivo PD profiles is based on measurements of in vivo anti-Xa and anti-IIa profiles.	Single center, open, randomized, single dose, two cycle, two-sequence & cross pharmacodynamics bioequivalence study aims to pre-estimate the effects of subcutaneous injection of test preparation Enoxaparin Sodium Injection & reference preparation Clexane in Chinese healthy subject under fasting.
iv.	The firm shall provide the lot release certificate of the finished product manufactured by same bulk concentrate/ ready to fill from country of export (If applicable).	NA
v.	The firm shall provide the 6 months accelerated and real time stability studies for drug substance.	24months real time stability study data at 25°C±2°C, 60%RH±5% RH & 6 months accelerated stability study at 40°C±2°C, 75%RH ±5% RH of drug substance from API manufacturer.
vi.	The local manufacturer shall perform all the tests on Enoxaparin Sodium bulk as detailed in Pharmacopoeial monograph of Enoxaparin Sodium.	• Identification by Size-Exclusion Chromatography (GPC) • Anti-Factor Xa Activity Chromogenic assay • Anti-Factor Ila activity Chromogenic assay • Color & clarity of solution • Light Absorption • Sodium by Atomic Absorption Spectrophotometry • Related Substances by HPLC
vii.	The local manufacturer shall manufacture three trial batches of the finished biological product to finalize the formulation and then perform the six months stability data on all the batches along with all the tests as detailed in Pharmacopoeial monograph of Enoxaparin Sodium Injection.	The stability study has been submitted for lowest 20mg, middle 60mg & highest 100mg vial (as per bracketing) 6-months real time stability study data at 25°C±2°C, 60%RH±5% RH & 6 months accelerated stability study at 40°C±2°C, 75%RH ±5% RH.
viii.	The local manufacturer shall perform suitable tests to evaluate the product and process related impurities both in their product and in Innovator product e.g. Total proteins, Individual proteins, Lipids and DNA content etc. The following techniques may be used: a. SDS-PAGE for individual proteins b. GC-MS for lipid impurities c. Threshold ® Total DNA Assay System for DNA content.	Related Substances by HPLC: Purity of LMW heparins by using Anion Exchange Chromatography based test. Sodium by Atomic Absorption Spectrophotometry
ix.	The firm shall provide the agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall	Not submitted

	inform DRAP immediately along with relevant documents.	
x.	Regular monitoring through pharmacovigilance reporting system shall be observed through proper pharmacovigilance cell of the manufacturer and report will be forwarded to the National Pharmacovigilance Centre, Division of Pharmacy Services and Biological Division of DRAP. In case of any severe adverse event, immediate mandatory reporting procedure shall be followed.	Submitted
xi.	The firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	Not submitted
xii.	If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	Not submitted
xiii.	All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	Not submitted

The case was deferred in 320th meeting of Registration Board & the firm has submitted reply which are tabulated below.

Decision of the Board	Response of the firm	Remarks
i. Evidence of availability of formulations in vials in Reference Regulatory Authorities.	With reference to your letter no. F.No.3-88/2015-DDC (BD) Para wise answers are given below, (i.) We would like to inform you that marketed formulation of our innovator brand i.e. Lovenox is available in vial in USA, see link provided below for the presence of Enoxaparin vial in USA; •https://www.accessdata.fda.gov/drugsatfda_docs/label/2017/020164s110lbl.pdf In number of countries Enoxaparin formulation is marketed in vial & ampoule i.e. in china and India. Web link is provided below: •http://www.baiyujituan.com/english.php?m=product&a=show&id=29 •https://integratedlaboratories.in/enoxaparin-injection-40mg-inoxa-40/	The submitted links were accessed **the products have not been found in vial in the applied concentration in the USFDA or any other reference regulatory authority.** Only available in China & India as per the link submitted by the firm.
ii. Valid legalized Free sale certificate/CoPP either from country of origin or by any reference	• The firm ha ssubmitted copy of CoPP issued by China . The firm has submitted that Finished dosage form of our API supplier HUBEI ENORAY	

regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority.	BIOPHARMACEUTICAL is registered in country of origin (China) where market authorization holder is Tianjin Chase Sun Pharmaceutical Co.Ltd. Evidence of availability in Chinese market is mentioned in below; https://www.nmpa.gov.cn/datasearch/search-info.html?nmpa=aWQ9MTkxMzc5Jml0ZW1JZD1mZjgwODA4MTdjODMxMmM0MDE3YzliYmZjOGRlMDM2MA== • The firm has also submitted that HUBEI ENORAY BIOPHARMACEUTICAL Co .Ltd also exports Enoxaparin API to turkey region where it is registered with brand name AXEPARIN. Copy of Registration letter & GMP certificate of Turkish brand Axeparin is enclosed as hard copy. Copy cwerificate of Turkish company purchasing API from our Chinese source is also submitted.
iii. Agreement with the source manufacturer (bulk concentrate) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	
iv. Referred the case to Licensing Division for confirmation of manufacturing section for production of Heparin Sodium.	**Comments of Licensing division is given on the previous case.**
v. An undertaking that the firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	**Submitted on stamp paper.**
vi. An undertaking that if any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration	**Submitted on stamp paper.**

shall stand cancelled with immediate effect.	
vii. An undertaking that all the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	**Submitted on stamp paper.**

Decision: Registration Board deferred the case for submission of following:

- **Section wise details of products of M/s Macter International Limited Karachi**
- **Submission of compatibility, extractables, leachebles and other relevant studies of rubber stopper with the product.**

Imported Human Biologicals applied by M/s Nees International, Lahore deferred in 296th meeting of Registration Board

The following two products are deferred in the 296th meeting of Registration Board. The details of the products are as under;

13.	**Name of Importer**	**M/s Nees International ,Office No.6, 3rd Floor Al-Hafeez View Sir Syed Road Gulberg-III, Lahore.**
	DSL details	License No. 171-A/GT/11/2017, Valid: 14 June, 2019 Qualified Person: Umair Ikram Dar
	Name of Manufacturer	**Product License Holder & Manufacturer:** Hugel, Inc. Address: 23 Geodudanji 1-gil, Dongnae-myeon, Chuncheon-si Gangwon-do, Republic of Korea
	Brand Name +Dosage Form + Strength	Botulax Inj (100 units/ /vial) Lyophilized powder for injection
	Composition	Each vial (100 units) Contains….Clostridium botulinum toxin type A (CBFC26 strain)-------100 units
	Finished product specifications	BP specification
	Pharmacological Group	Muscle relaxant, peripherally acting agent
	Shelf life	36 months (2^0C-8^0C)
	International availability	China
	Products already registered in Pakistan	Not Available
	Type of Form Dy No & Date of application, Fee submitted	Form-5A Dy. No. (R&I) Dated 6th February 2018 Rs. 100,000/-6th February, 2018
	Demanded Price / Pack size	$60+ 10%FOC /100 units Vial
	General documentation	Legalized CoPP No.2017-A1-2061 dated 16-10-2017 Legalized GMP No. 2017-B1-0313 dated 27-06-2017

		Copy of distribution Agreement
14.	**Name of Importer**	**M/s Nees International, Office No.6, 3rd Floor Al-Hafeez View Sir Syed Road Gulberg-III, Lahore.**
	DSL details	License No. 171-A/GT/11/2017, Valid: 14 June, 2019 Qualified Person: Umair Ikram Dar
	Name of Manufacturer	**Product License Holder & Manufacturer:** Hugel, Inc. Address: 23 Geodudanji 1-gil, Dongnae-myeon, Chuncheon-si Gangwon-do, Republic of Korea
	Brand Name +Dosage Form + Strength	Botulaxinj (50 units/ /vial) Lyophilized powder for injection
	Composition	Each vial (50 units) Contains….Clostridium botulinum toxin type A (CBFC26 strain)-------50 units
	Finished product specifications	**BP specification**
	Pharmacological Group	Muscle relaxant, peripherally acting agent
	Shelf life	36 months (2^0C-8^0C)
	International availability	China
	Products already registered in Pakistan	Not Available
	Type of Form Dy No & Date of application, Fee submitted	Form-5A Dy. No. 5615 (R&I) Dated 11thFebruary 2019 Rs. 100,000/- 7th February, 2019
	Demanded Price / Pack size	$37.5+ 10% FOC/100 units Vial
	General documentation	CoPP No.2017-A1-2062 dated 16th October,2017 Legalized GMP No. 2017-B1-0313 dated 27-06-2017 Copy of distribution Agreement
Decision of 296th meeting of RB: Registration Board deferred and advised applicant to provide data / evidence regarding availability of formulation in any of reference regulatory authorities. Now the firm that their manufacturer "got registration by the name "Letybo" in different countries of Europe. Like UK, Italy, Spain, Netherland, Ireland, Romania etc." The firm has aslo submitted copy of multiple documents for same. The product i.e. Clostridium botulinum toxin type A (Letibotulinumtoxin A) was searched on the websites of the different reference regulatory authprity website & the formulation in 50 IU was found in the official website of Germany i.e. Federal Institute for Drugs and Medical Devices (Bundesinstitut für Arzneimittel und Medizinprodukte, BfArM) vide below link. https://www.bfarm.de/EN/Medicinal-products/Information-on-medicinal-products/Research-medicinal-products/AMIce/_node.html But the formulation in 100 IU has been found.		
Decision: Registration Board deferred the case for confirmation of the product formulation in other reference regulatory authorities.		

15. LICENSE WITHDRAWAL OF SHAN 5 – SUSPENSION FOR INTRAMUSCULAR INJECTION – 1'S VIAL OF 0.5ML (REG. NO.090315)

The firm M/s Sanofi Aventis Pakistan Limited, Karachi, Pakistan has applied for withdrawal/ de-registration of their product detailed as under:

Product License Holder & Manufacturer:	**Brand Name & Composition**
Shantha Biotechnics Private Limited, Address: Survey No. 274, Athvelli Village, Medchal Mandal-501 401, Ranga Reddy Distt. Talangana, India	Shan 5 Suspension for Intramuscular Injection Each dose of 0.5ml contains: Diphtheria Toxoid: ≥30 IU; Tetanus Toxoid: ≥60 IU; B. pertussis (Whole cell): ≥4 IU; r-DNA Hepatitis-B Surface Antigen: 10 µg; Purified Capsular Polysaccharide of Hib Conjugated to 20-40 microgram of Tetanus Toxoid (Carrier Protein): 10 µg

In this context the firm has informed that the manufacturer M/s Sanofi Healthcare India Private Limited has withdrawn the license of said vaccine. Moreover, it has been stated that the decision is based on commercial reason and is not related to safety, quality or efficacy of the vaccine.

Decision: Registration Board referred the case to the availability committee.

Product Clotless Injection 40 mg Reg No 074149 and Clotless Injection 60mg, Reg No 074150. (Enoxaparin Sodium) of M/s Himont Pharmaceuticals Lahore for issuance show cause Notice for manufacturing the products without Biological section.

M/s Himont Pharmaceuticals Lahore has applied for the release of their imported raw material Enoxaparin Sodium 0.925 Kg , B.No 8ZE201001, Mfg: Oct 6 2020, Exp: Sep 2023 for their registered product Clotless Injection 40 mg Reg No 074149 and Clotless Injection 60mg, Reg No 074150. The remaining shelf life of the material is 35%.

Sr.No.	**Brand Name and Registration No**
1.	Clotless Injection 40 mg Reg No 074149
2.	Clotless Injection 60mg, Reg No 074150.

The case was placed in the 57th meeting of Committee for disposal of import cases of short shelf life drugs. As Enoxaparin is a biological product hence the Licensing Division was asked to verify/confirm if the firm has approved biological section or not.

The licensing division has forwarded the last inspection report conducted for renewal of DML of the firm wherein it is evidenct that the firm do not have separate approved section for biological products. The case was processed to the Chairman RB to issue showcause to the firm and the case was returned back to BE&R Division with advice to place the matter of registration of product ***'Noclot"*** before the forthcoming meeting of Registration Board please. As the Chairman is not authorized in such case for approval of issuance of show cause notice.

Decision: Registration Board advised to issue a show cause notice to M/s Himont Pharmaceuticals Lahore to explain as to why not the registrations Clotless Injection 40 mg Reg. No 074149 and Clotless Injection 60mg, Reg. No 074150 cancelled as the biological section for production of Biological drugs is not available. The Board further advised to ask the firm that if they desire to be heard in person they may inform accordingly

<u>Cases of AD-III (Ms. Haleema Sharif)</u>

Human Biologicals of Local manufacture:

16.	**Name, address of Applicant / Importer**	**M/s Dow Institute of Life sciences, Ojha Campus, Suparco Road, off main University road, Gulza-e-Hijri, Scheme 33, Karachi**
	Details of Drug Sale License of importer	**License No: 000915** **Address:** Ojha Campus, Suparco Road, off main University road, Gulza-e-Hijri, Scheme 33, Karachi **Validity:** **Status:** License to manufacture by way of formulation.
	Name and address of marketing authorization holder (abroad)	Bulk manufacture: M/s. Changchun Zhuoyi Biological Co., Ltd Address: No.2 Yongxin Road, Economic Development Zone, Shuangyang district, Changchun City Jilin Province, China.
	Name, address of manufacturer(s)	(Bulk Import Local Repack) M/s Dow Institute of Life sciences, Ojha Campus, Suparco Road, off main University road, Gulza-e-Hijri, Scheme 33, Karachi
	Name of exporting country	China (bulk import local repack)
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	Not provided
	Details of letter of authorization / sole agency agreement	N/A Bulk import local repack
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	For imported products, specify one the these	☐ Finished Pharmaceutical product import ☒ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No.24366 (R&I) Dated 22.09.2020
	Details of fee submitted	Rs. 100,000/-
	The proposed proprietary name / brand name	**Dow-RAB Lyophilized Powder for Injection Rabies Vaccine (Vero Cell) for Human Use**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	**Lyophilized Part:** Each dose of lyophilized vaccine for immunizing dose (0.5ml) contains: Purified, Inactivated Rabies Virus……...2.5IU (Prepared on Vero cells PM strain of Rabies virus)

		Diluent Part: Each ampule contains: Sterile water for injection…. 0.5ml
	Dosage form of applied drug	Powder for Injection
	Pharmacotherapeutic Group of (API)	Viral Vaccines
	Reference to Finished product specifications	In-House
	Proposed Pack size	USP type I clear transparent glass vial, 1's vial with 0.5ml diluent
	Proposed unit price	As per SRO/DPC
	Shelf Life	24 months
	Storage Conditions	2-8 ^{o}C
	The status in reference regulatory authorities	Firm is requested in shortcoming letter to provide it with applied strain
	For generic drugs (me-too status)	------
	Module-II (Quality Overall Summary)	Firm has submitted QOS. Firm has summarized information related to general properties, manufacturers, description of manufacturing process, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	M/s Changchun Zhouyi BiologicalCo., Ltd. No.2 Yongxin Road, Shuangyang economic Development Area, Changchun, Jilin Province, China.
	Module-III Drug Substance:	Firm has submitted drug substance data related to nomenclature, structure, manufacturers, description of manufacturing process, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and real time stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability studies at 2-8^{o}C of three batches of drug substance for six months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Analytical method validation/verification of product	Firm has submitted validation of Analytical methods of Heparin Sodium Assay, benzyl Alcohol determination.
	Container closure system of the drug product	Not provided
	Stability study data of drug product	Not submitted **2.3.P (Drug Product part) of locally manufactured drug product.**
	Module-IV Non-Clinical	The firm has also submitted the non-clinical overviews.
	Module-V Clinical	The firm has also submitted the clinical overviews and summaries.
	Remarks of Evaluator	i. Stability data is only for three months. ii. Applied vaccine strain is CTN 1V as per documents and clarification submitted by the firm and it has not been confirmed from Reference Regulatory Authorities and also from locally registered product and name strain is also not mentioned on CoPP.
	Decesion: Registration Borad advised to seek following information before approval of minutes • **Seek information from CDC, NIH regarding circulating strains of Rabies virus in Pakistan and need of Inactivated Rabies virus CTN 1V strain vaccine in Pakistan** • **Seek information from NIH regarding strain of their registered rabies virus vaccine.** • **Advised Dow Institute to submit 6 months real time and accelerated stability studies for consideration by Registration Board.** **The Board further advised to process case for consideration of registration Board after submission of 6 months stability data.**	

Imported Veterinary Biologicals from Reference Countries:

17.	**Name and address of Importer**	**M/s UM Enterprises,** Plot No. 12, Sector 15, Korangi Industrial Area, Karachi-74900
	Detail of DSL	**M/s UM Enterprises,** Address: Plot No. 12, Sector 15, Korangi Industrial Area, Karachi. Valid till: 22-03-2021 to 21-03-2023.

	Decision: Keeping in view the legalized FSC certificate indicating product availability in the country of origin and GMP certificate of the firm, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.	

Case: Imported Veterinary Biological applied by M/s Snam Pharma, Lahore deferred in 316th meeting of Registration Board.

20. Name and address of Importer	**M/s Snam Pharma 61-G, Phase-1, Commercial Area, DHA, Lahore**
Detail of DSL	M/s Snam Pharma, Address: 61-Block G, Phase-I, DHA, Lahore Cannt, District Lahore. Valid till: 14 November, 2022.
Name and address of Manufacturer	M/s Sante Animale Lot 157, zone industrielle Sud
Name of exporting country	Morroco
Brand Name +Dosage Form + Strength	Bovivax LSD-N Vaccine (50 doses)
Diary No. Date of R& I & fee	Dy. No. 8315R&I Dated 30-03-2022 Rs. 75,000/- (Slip No. 10439736)
Composition	**Lyophilizate:** Each dose contains: Attenuated live LSD virus, Neethling strain ≥ $10^{3.5}$ $TCID_{50}$ **Solvent:**

	Calcium chloride dihydrate… 0.132mg Disodium phosphate dihydrate…1.441mg Sodium chloride…8mg Potassium chloride….0.2mg Monopotassium phosphate…0.2mg Magnesium chloride….0.1mg Water for Injection …s.q.f…1ml
Pharmacological Group	Vaccine
Type of Form	Form-5A
Finished Product Specification	Manufacturer's specifications
Shelf Life	24months (2^0C-8^0C) Stability studies of three batches at (2^0C-8^0C) for 30months.
Document Details	Copy of FSC for Bovivax LSD -N lyophilizate and copy of FSC for MCI solvent. Notarized copy of marketing authorization letter showing sale of Bovivax LSD-N-Lyophilizate vials of 10,25,50 and100 doses of freeze-dried vaccine+ bottle of 20,50,100 and 200ml of MCI Solvent for live vaccines respectively. For GMP of manufacturer firm has referred to Eudra GMP Certificate No. 118/2020/GMP. Which is verifiable from the site.
Pack size	50 doses 50ml solvent
Reference Regulatory Authority Availability	N/A
Products already registered in Pakistan	Mevac LSD of Bromed
Remarks of Evaluator	In response to this division's letter firm has submitted following: i. Notarized copy of product specific sole agency agreement. ii. Stability studies of diluent for 20ml and 200ml bottles is submitted. For FSC indicating diluent firm has submitted following: a. Notarized copy of marketing authorization letter showing sale of Bovivax LSD-N-Lyophilizate vials of 10,25,50 and100 doses of freeze-dried vaccine+ bottle of 20,50,100 and 200ml of MCI Solvent for live vaccines respectively in Morocco. b. Copy of registration license of biological product for Bovivax LSD-N with following pack vial 10 doses+20ml diluent, 25doses+50ml diluent, 50doses+100ml diluent and 100doses+200ml diluent (MCI sterile diluent) in Egypt. Document still required: i. FSC indicating free sale status of product in country of origin.
Previous Decision (M-317)	*Registration Board deferred the product for submission of valid legalized Free Sale Certificate indicating product availability in country of origin.*
Evaluation by DBER	*Firm has submitted original legalized FSC which does not indicate product availability in country of origin.*
Previous Decision in 321st RB meeting	*Registration Board deferred the case for submission of evidence of approval of applied product in other countries including reference regulatory authorities.*

Evaluation by DBER	*Firm has submitted that Bovivax LSD-N vaccine is registered and exported to in following countries:* *Bulgaria* *Kenya* *Egypt* *UAE* *To support above statement firm has also submitted copies of registration letters of subject product in Bulgaria, Kenya, Egypt and UAE.* *The firm has further submitted that the manufacturer of Bovivax LDS-N vaccine ca also be verified from the site of FAO (Food and Agriculture Organization of United Nations) and shared following link:* *https://www.fao.org/3/cb1892en/cb1892en.pdf*
Decision: Registration Board deferred the case for further deliberation as FAO is not a regulatory organization and asdvised to confirm free sale status in reference / non-reference regulatory authorities.

Imported Veterinary Biological applied by M/s Vety Care (Pvt.) Ltd. Islamabad deferred in 316th meeting of Registration Board.

22. Name and address of Importer	**M/s Vety Care (Pvt.) Ltd.** **Plot No. 77, Street No.6, I-10/3 Islamabad.**
Detail of DSL	DSL No. DSL-156 ICT/2013 dated 31-12-2014 valid till 30-12-2018. Copy of Renewal receipt dated 26-12-2018
Name and address of Manufacturer	M/s Intervet International B.V. Wim de Korverstraat, 5831 AN Boxmeer, The Netherlands.
Brand Name +Dosage Form + Strength	**Nobivac Tricat Trio** Lyophilisate and solvent for suspension for injection
Composition	After Freeze-drying Each dose contains: Live FCV strain F9……at least 4.6 log10 PFU Live FVR strain G2620A……at least 5.2 log10 PFU Live FPLV strain MW-1……at least 4.3 log10 TCID50 Nobivac Solvent: Each ml contains: Disodium phosphate dihydrate.....0.31mg Potassium dihydrogen Phosphate ….0.21mg Water for injections to 999.16 mg
Finished Product Specification	Innovator Specs
Pharmacological Group	Veterinary Vaccine
Shelf Life	33 months (2-8^{0}C)
International availability	Not Provided.
Products already registered in Pakistan	Not Available as per record.
Type of Form Dy. No. & Date of application, Fee submitted	Form-5A Dy. No. 11336(R&I) Dated 28-03-2018 Rs. 100000/- 28-03-2018
Demanded Price / Pack size	1's Vial Powder 1's Vial Solvent
General documentation	Valid legalized CoPP No. 249028 dated 21-03-2018 issued by Ministry of Agriculture Nature and Food, the Netherlands.
Remarks of Evaluator	The product is not registered in country of origin. The firm submitted that some registrations in the Netherlands differ from the standard registration for a product. This does not mean that the product is in principle not registered or marketed in the Netherlands, but only with a deviation to the standard registration.

	Real time stability data provided is of 0,9,15,21,27,36 months instead of appropriate time intervals and only titer and residual moisture is tested instead of all controls of finished product. The firm submitted that according to Ph. Eur. Monograph 0062, the test should be performed at regular intervals until 3 months beyond the end of shelf life. For veterinary vaccines the intervals at which the vaccines are tested for stability evaluation are not defined within European legislation. The monograph includes following tests in stability studies: Virus titrations, bacterial counts or potency tests carried out at regular intervals until 3 months beyond the end of the shelf life on not fewer than 3 representative consecutive batches of vaccine kept under recommended storage conditions together with results from studies of moisture content (for freeze-dried products), physical tests on the adjuvant, chemical tests on substances such as the adjuvant constituents and preservatives, and pH, as appropriate.
Decision of RB in 288th meeting:	*"Registration Board deferred the case for submission of following by the firm:* *a. Approval status of above product registration by reference regulatory authorities.* *b. Complete stability data indicating all the parameters tested in COA."*
Evaluation by DBER	*The firm has now submitted the following:* *a. Copy of modification approval in Nobivac Tricat Trio indicating registration number of said product issued by Ministry of Economic Affairs, Chief Veterinary Officer of The Netherlands, The Hague. However, as per submitted CoPP the product is not registered in country of origin.* *b. As per Intervet the stability data already provided as per European Union Guidelines, and is being accepted all over the world.*
Decision of RB in 292nd meeting:	*Registration Board decided to refer the case to expert working group on veterinary drugs regarding the prevalence of strains and advised the firm to submit valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies.*
Evaluation by expert working group on veterinary drugs	*Referred for expert opinion from Ministry of National Food Security & Research, Islamabad.*
Decision of RB in 313th meeting:	*Deferred for expert opinion from Ministry of National Food Security & Research, Islamabad.*
Evaluation of DBE&R	*Expert opinion from Ministry of National Food Security & Research, Islamabad placed in 317th RB meeting:* *Feline (cat)vaccine.* *It is a routine combination, already many companies have this combination, therefore, may be recommended for import.*
Decision of RB in 317th meeting:	As the firm had not submitted valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies till 317th RB meeting so the Registration Board in its 317th decided as under:

	Deferred the product for submission of valid legalized CoPPs indicating products availability in country of origin and European Union Guidelines regarding stability studies.
Evaluation by DBE&R	***Now the firm has submitted following:*** *Original legalized COPP indicating product availability in country of origin, but the word "live" is missing in it however it is live as per information available on following web link* https://db.cbg-meb.nl/marketedauth/v10471-90wr-29012014.pdf *European Union Guidelines regarding stability studies of veterinary vaccine wherein time interval for stability studies is 0,3,6, 9… months but stability studies of applied formulation* are at *0,9,15,21,27,36 months' time intervals.*
Decision: Deferred for submission of complete stability data indicating all parameters tested in COA and on all time points as recommended by European Union Guidelines.	
23. Name and address of Importer	**M/s Vety Care (Pvt.) Ltd.** **Plot No. 77, Street No.6, I-10/3 Islamabad.**

General documentation	Valid legalized CoPP No. 249030 dated 21-03-2018 issued by Ministry of Agriculture Nature and Food, the Netherlands.
Remarks of Evaluator	The product is not registered in country of origin. The firm submitted that some registrations in the Netherlands differ from the standard registration for a product. This does not mean that the product is in principle not registered or marketed in the Netherlands, but only with a deviation to the standard registration.

	Real time stability data provided is of 0, 6, 12, 18, 24, 30, 36, 39 months instead of appropriate time intervals and only titer is tested instead of all controls of finished product. The firm submitted that according to Ph. Eur. Monograph 0062, the test should be performed at regular intervals until 3 months beyond the end of shelf life. For veterinary vaccines the intervals at which the vaccines are tested for stability evaluation are not defined within European legislation. The monograph includes following tests in stability studies: Virus titrations, bacterial counts or potency tests carried out at regular intervals until 3 months beyond the end of the shelf life on not fewer than 3 representative consecutive batches of vaccine kept under recommended storage conditions together with results from studies of moisture content (for freeze-dried products), physical tests on the adjuvant, chemical tests on substances such as the adjuvant constituents and preservatives, and pH, as appropriate.
Decision of RB in 288th meeting:	"Registration Board deferred the case for submission of following by the firm: a. Approval status of above product registration by reference regulatory authorities. b. Complete stability data indicating all the parameters tested in COA."
Evaluation by DBER	The firm has now submitted the following: a. Copy of market authorization approval of product issued by Icelandic Medicine Agency. b. As per Intervet the stability data already provided as per European Union Guidelines, and is being accepted all over the world.
Decision of RB in 292nd meeting:	Registration Board decided to refer the case to expert working group on veterinary drugs regarding the prevalence of strains and advised the firm to submit valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies.
Evaluation by expert working group on veterinary drugs	Referred the case for expert opinion from Ministry of National Food Security & Research, Islamabad.
Decision of RB in 313th meeting	Deferred for expert opinion from Ministry of National Food Security & Research, Islamabad.
Evaluation by DBER	Expert opinion from Ministry of National Food Security & Research, Islamabad placed in 317th RB meeting: This is vector vaccine for gumboro(IBD) already 2 similar vaccines are available in Pakistan. May be recommended for import for making healthy competition.
Decision of RB in 317th meeting	*As the firm had not submitted valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies till 317th RB meeting so the Registration Board in its 317thmeeting decided as under:* ***Deferred the product for submission of valid legalized CoPPs indicating products availability in country of origin and European Union Guidelines regarding stability studies.***
Evaluation by DBER	***Now the firm has submitted following:*** *Original legalized COPP indicating product availability in country of origin (firm has applied for approval of lyophilized part of product but product is supplied with diluent as per CoPP).*

	European Union Guidelines regarding stability studies of veterinary vaccine wherein time interval for stability studies is 0,3,6, 9… months but stability studies of applied formulation are at *0, 6, 12, 18, 24, 30, 36, 39 months' time intervals*
Decision: Deferred for the following: • **For submission of complete stability data indicating all the parameters tested in COA and on all time points as recommended by European Union Guidelines.** • **For clarification regarding status of product would it be in combo pack or otherwise as firm has applied for approval of lyophilized part of product but product is supplied with diluent as per CoPP.**	
24. Name and address of Importer	**M/s Vety Care (Pvt.) Ltd.** **Plot No. 77, Street No.6, I-10/3 Islamabad.**
Detail of DSL	DSL No. DSL-156 ICT/2013 dated 31-12-2014 valid till 30-12-2018. Copy of Renewal receipt dated 26-12-2018
Name and address of Manufacturer	M/s Intervet International B.V. Wim de Korverstraat, 5831 AN Boxmeer, The Netherlands
Brand Name +Dosage Form + Strength	**Nobilis IB Primo QX** Lyophilisate for suspension for spray
Composition	Each dose of reconstituted vaccine contains: Live attenuated avian infectious bronchitis virus, strain D388…$10^{4.0}$-$10^{5.5}$ EID50* *50% egg infective dose
Finished Product Specification	Innovator Specs
Pharmacological Group	Veterinary Vaccine
Shelf Life	15 months (2^0C-8^0C)
International availability	Not Provided.
Products already registered in Pakistan	Not Available as per record.
Type of Form Dy. No. & Date of application, Fee submitted	Form-5A Dy. No. 5721(R&I) Dated 16-02-2018 Rs. 100000/- 16-02-2018
Demanded Price / Pack size	10Cups x 10000 doses
General documentation	Valid legalized CoPP No. 01/17/113770 dated 13-10-2017 issued by EMA indicating product availability in exporting region.
Remarks of Evaluator	Real time stability data provided is of 0, 6, 11, 18 months instead of appropriate time intervals and only **titer and residual humidity** are tested instead of all controls of finished product. The firm submitted that according to Ph. Eur. Monograph 0062, the test should be performed at regular intervals until 3 months beyond the end of shelf life. For veterinary vaccines the intervals at which the vaccines are tested for stability evaluation are not defined within European legislation. The monograph includes following tests in stability studies:

	Virus titrations, bacterial counts or potency tests carried out at regular intervals until 3 months beyond the end of the shelf life on not fewer than 3 representative consecutive batches of vaccine kept under recommended storage conditions together with results from studies of moisture content (for freeze-dried products), physical tests on the adjuvant, chemical tests on substances such as the adjuvant constituents and preservatives, and pH, as appropriate
Decision of RB in 288th meeting:	*"Registration Board deferred the case for submission of complete stability data indicating all the parameters tested in COA.*
Evaluation by DBER	The firm has now submitted that as per Intervet the stability data already provided as per European Union Guidelines and is being accepted all over the world.
Decision of RB in 292nd meeting:	*Registration Board decided to refer the case to expert working group on veterinary drugs regarding the prevalence of strains and advised the firm to submit valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies.*
Evaluation by expert working group on veterinary drugs	*Referred the case for expert opinion from Ministry of National Food Security & Research, Islamabad.*
Decision of RB in 313th meeting:	*Deferred for expert opinion from Ministry of National Food Security & Research, Islamabad.*
Evaluation of DBE&R	*Expert opinion from Ministry of National Food Security & Research, Islamabad placed in 317th RB meeting:* *Already D274 strain is present which gives protection against D388 because* *D388 is IB variant equal to QX virus it may be recommended for import but in killed form not in live form.*
Decision of RB in 317th meeting:	As the firm had not submitted valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies till 317th RB meeting so the Registration Board in its 317th decided as under: ***Deferred the product for submission of valid legalized CoPPs indicating products availability in country of origin and European Union Guidelines regarding stability studies.***
Evaluation by DBE&R	***Now the firm has submitted following:*** *Original legalized COPP indicating product availability in country of origin. (firm has applied for approval of lyophilized part of product but product is supplied with diluent as per CoPP).* *European Union Guidelines regarding stability studies of veterinary vaccine wherein time interval for stability studies is 0,3,6, 9… months but stability studies of applied formulation* are at *0, 6, 11, 18 months' time intervals*
Decision: Decision: Deferred for the following: • **For submission of complete stability data indicating all the parameters tested in COA and on all time points as recommended by European Union Guidelines.** • **For clarification regarding status of product would it be in combo pack or otherwise as firm has applied for approval of lyophilized part of product but product is supplied with diluent as per CoPP.**	

25. Application for Registration of Dow ASV 10ml sterile liquid for injection by M/s Dow Institute of Life sciences.

It is submitted that following registration application of M/s. DOW Institute of Life Sciences Karachi has been received as per following details:

Name of product	Name of Importer	Name of manufacturer	Date of R&I
Dow ASV 10ml sterile liquid for injection Each ml of polyvalent equine immunoglobulin neutralizes following: Cobra: 0.6mg Common Krait 0.45mg Russell's viper: 0.6mg Saw-scaled viper: 0.45mg	Local Manufacturing	M/s. Dow Institute of Life Sciences, Karachi, Pakistan	24-Jan-2022

It is pertinent to mention that the application of the firm indicates that M/s. DOW Institute of Life Sciences, Karachi has Drug Manufacturing License by the way of formulation while in instant application the firm is itself manufacturing the following active ingredients:

i. Cobra Anti venom
ii. Common Krait Anti venom
iii. Russell's Viper Anti venom
iv. Saw-Scaled Viper Anti venom

The matter was referred to Licensing Division for guidance whether the M/s Dow university of Health sciences Karachi, can manufacture above mentioned active ingredients for production of Polyvalent Equine Immunoglobulin on their DML or otherwise.

Division of licensing opined as under:

All those manufacturers who are manufacturing Biological products including vaccines and utilizing indigenous source as raw material be advised to get also DML on same premises for Basic manufacture of drugs as GMP of raw materials could be ensured before formulation of product.

The opinion/advice of licensing division has already been communicated to the firm M/s Dow Institute of Life sciences.

Decision: Registration Board deferred the case and advised to submit copy of DML by way of basic manufacturing as per comments of Licensing Division.

No. 35 & 36
Original and Legalized Certificate of Pharmaceutical Product as per WHO format for new MAH name	Original and Legalized CLI for the products at S. No 35,36 &37 has been submitted.	

	Link of manufacturer for both the addresses has been provided from which on google map it has been verified that site is same and only entrance gates are changed from 115 Transtech Drive Athens, Georgia 30601 USA to 1730 Olympic Drive Athens, Georgia 30601 USA.
Revised Sole Agency Agreement when there is change in MAH	Submitted
Proof/ evidence of the contract between Product License Holder & manufacturer (with changed/new name), where the manufacturer and product license holder are different entities	Not applicable
Undertaking that provided information/documents are true & correct.	Submitted

M/s Merial had only two following sites of manufacturing in USA which had been acquired by M/s Boehringer Ingelheim Animal health USA Inc:

1. M/s Merial .1730 Olympic Drive Athens, Georgia 30601 USA.
2. M/s Merial 1168 airport parkway, SW, Gainesville, GA, GA 30501-6816.

Which are changed to:

1. M/s Boehringer Ingelheim Animal Health USA Inc.1730 Olympic Drive Athens, Georgia 30601 USA.
2. M/s Boehringer Ingelheim Animal Health USA Inc. 1168 airport parkway, SW, Gainesville, GA, GA 30501-6816.

In view of above, copy of picture of aerial view of the manufacturing site of submitted by the firm and confirmation on google map on the links provided by the firm it shows that the site is same and only entrance gates are changed for which the firm has no regulatory approval however for both the addresses the firm has submitted Certificates of licensing inspection.

(C) Approval of combo pack for the products at S.No.35 as per following details.

Reg, No.	Brand Name with composition	Packing

082022	Purevax Feline 4 Feline Rhinotracheitis-Calici-Panleukopenia-Chlamydia psittaci Vaccine, Modified Live Virus and Chlamydia (Freeze-dried pellet) Each dose contains: Feline Rhinotracheitis Virus, F-2 strain at least ……10 4.9 TCID50 Feline Calicivirus, F-9 strain at least ……..10 4.7 TCID50 Feline Panleukopenia virus, Johnson leopard origin strain , at least 10 4.0 FAID50 Chlamydia psittaci, strain 905, at least……..102.5 EID50 Sucrose/ gelatin stabilizer ……..25-35% Gentamicin ……≤30 µg/ml Sterile Diluent Sterile water ……1ml vial	One dose vial x 25's 25 x 1-ml vials of Sterile water

Submitted for consideration of the Board;

Decision: Registration Board decided as under:

a. **Regularized the registration of the products at S. No. 60 and 61 w.e.f. 02-11-2021 to 01-11-2026.**
b. **Approved M/s Boehringer Ingelheim Animal Health USA Inc., 2621 North Belt Highway St. Joseph, Missouri 64506 USA as Marketing Authorization Holder and M/s Boehringer Ingelheim Animal Health USA Inc.1730 Olympic Drive Athens, Georgia 30601 USA as manufacturer for the products at S. No. 62 to 64.**
c. **Approved the combo pack of the products at S.No.62.**

63. Extension in labelling exemption for Cerezyme (Reg. No. 107918).

M/s Sanofi Aventis Pakistan Limited, Karachi has submitted that Cerezyme is indicated for a rare disease called Gaucher disease and required to be imported in a limited quantity. Therefore, it is not possible for manufacturer to follow the Packaging and labeling rules of every country at the time of export plus production, packaging, quality controls of this sterile and temperature sensitive product requires specialized methods and techniques of handling under highly controlled environment. The firm requested to extend the exemption of Urdu Text, Registration number and MRP on packs of Cerezyme.The firm has submitted the following documents:

v. Fee Challan of Rs. 7500/- via e-deposit slip No. **80495466** and differential fee of Rs. 2500/- via e-deposit slip No. **631567805** dated **16- Nov-2022**.
vi. Copy of SOPs for control of local repacking operations.
vii. An undertaking that to print the Registration Number and Maximum Retail Price (MRP) on each pack of above product at their Karachi site bearing DML No. 000007, before releasing the goods into the market.
viii. Copy of Registration letter dated 24-05-2021
ix. Copy of DML
x. Copy of permission of Extension in labeling exemption for Cerezyme (Reg. No. 107918) vide letter No. F.3-5/2014-DD(BD)(V-VI) (M-295) dated 13th July 2021.

In this context, it is stated that the last request of the firm for exemption of labeling text for Cerezyme (Reg. No. 107918) was approved by Registration Board in its 295th meeting for one year from the date of issuance of registration letter. The registration letter was issued on 24-05-2021, hence the permission was valid till 24-05-2022.

Decision: Registration Board decided as follows:

- **Acceded to the request of the firm and extended the permission, for one year from the date of expiry of previous permission i.e. 23-05-2022, to import Cerezyme 400 U(1's, 5's & 25's)(Reg. No. 107918) in Standard Export Packs and to locally print MRP and registration number along with urdu text and other parameters as per Drugs (Labelling & Packing) Rules, 1986 before sale of drug at M/s Sanofi Aventis, Plot 23, sector 22, Korangi Industrial Area, Karachi to comply the requirements as per Drugs (Labelling & Packing) Rules, 1986.**
- **Advised firm to submit the future plan regarding the import of Drugs (Labelling & Packing) Rules, 1986 compliant packs.**

64. Information case referred by PRVC of biologicals. (Extension of shelf life and approval of combo pack)

M/s Saadat International has applied for Extension of shelf life from 24 months to 36 months of their already registered biological product as per following details:

Reg. No.	Brand Name with composition	Current Shelf Life	Demanded Shelf Life
084586 Dated 25-04-2018	Recombitek C6(Suspension part, killed vaccine) (**Suspension Part**) Each ml dose of diluent vaccine contains: Leptospira canicola ……≥ 40 nephelometric units Leptospira icterohaemorrhagiae …… ≥30 nephelometric units Thimerosal..…….. 1:30,000 final ConcentrationResidual free formaldehyde……≤0.74 g/L	24 months 2-7℃	36 months 2-8℃

The application has been evaluated as per approved SOPs in 283rd and 292nd meeting of Registration Board for extension in shelf life of the registered imported products and tabulated as under;

Requirements as per SOP	Documents submitted by the firm	Remarks
Application with required fee as per relevant SRO.	Application on company letter head with Fee of Rs. 5000/- is submitted	
Copy of registration letter and last renewal status.	Copy of initial Registration letter (25-04-2018) has been submitted.	
Proposed shelf-life, justification & data of long-term stability testing (as per conditions of zone IV-A) including chromatograms for a minimum of 3 commercial scale batches or development scale batches upto the proposed shelf-life.	long-term stability testing +5℃ for three batches of product upto 36 months is submitted.	
Approval of regulatory body of country of origin or Original and legalized Certificate of Pharmaceutical Product as per WHO format.	legalized CLI Product as per WHO format is submitted with the demanded shelf life.	

Undertaking that: Submitted
i. Provided information is true & correct.

As per CLI and registration letters the above product is in combo pack as per following details

Reg, No.	Brand Name with composition
082026	Recombitek C6 **(Freeze dried live vaccine)** Each 1 ml dose of vaccine contains: Canarypox/Canine distempervirus, CP258,Rentschler/onderstepoort strain- …… ≥$10^{6.4}$$TCID_{50}$ Canine Adenovirus Type 2,Toronto A/26/61 strai……. ≥ $10^{4.3}$ $TCID_{50}$ Canine Parainfluenza virus ,D-008 strain…..…≥ $10^{3.9}$ $TCID_{50}$ Canine Parvovirus, 780916 strain ……. ≥ $10^{3.3}$ $TCID_{50}$ Stablizer …… 25-35% Gentamicin …….. ≤ 30µg/ml **(Suspension part, killed vaccine)** Each 1 ml dose of diluent vaccine contains: Leptospira canicola ……≥ 40 nephelometric units Leptospira icterohaemorrhagiae …..… ≥30 nephelometric units Thimerosal..…….. 1:30,000 final Concentration Residual free formaldehyde……≤0.74 g/L

Registration Board in its 307th meeting delegated its power/Functions for Increase/ decrease in shelf life of registered drug to the Chairman Registration Board.

Decision: The PRV Committee for biologicals evaluated the case and Chairman Registration Board, on the recommendations of the committee decided as follows:

a. Approved the combo pack and shelf life of above product on the basis of Certificate of original and legalized Licensing and Inspection issued by United States Department of Agriculture and Animal and Plant Health Inspection Service Veterinary Service as per following details.

" The expiration date of the combination package is the earliest expiration date of the individual product components. The combination package is composed of released product of codes 13D1.R1 and 2671.02.

13D1.R1(Freeze dried live vaccine); the expiration date is 18 months after the initiation of first potency test.

2671.02(Suspension part, killed vaccine): the expiration date is 36 months after the initiation of first potency test.

b. Advised to inform the Registration Board.

Decision: Registration Board acknowledged the informations.

65. Inclusion of parameters in renewal letter

FR is a letter No. NIH-ISB-CBPD/69/Reg/2022 dated Nill from Ghazala Parveen Chief Biological Production division, NIH, Islamabad which states as under:

"This is with reference to DRAP's letter F-9-33/2022 AD(BD)(PRV)(M-318) dated 7th July 2022 on above subject. Please find enclosed herewith the copy for your ready reference at (Flag-A).

The Sera lab is under process of product sample testing for independent product Risk assessment by WHO. In this regard samples along with relevant documentation has to be submitted to NCLB for release at the earliest.

In this regard the essential product information for renewal of registration of drugs under drugs act 1976 and rules framed thereunder is required to be submitted to NCLB on registration renewal letter/certificate.

Registration Number	Product Name /brand name	Specifications	Packing	Storage conditions & shelf life	Maximum retail price.
003846	Polyvalent Snake Antivenom serum (Liquid Equine Immunoglobulins) B.P specifications	Each 1ml of Antivenom neutralizes not less than $2LD_{50}$ challenge venom dose of following snakes: 5.Russell's viper (*Daboia russellii*) 6.Cobra species (*Naja naja,Naja Oxiana*) 7. Common krait (*Bungarus caeruleus*) 8.Saw-scale viper (*Echis carinatus*).	10ml vial	+2 to 8 ℃ 2 years from date of manufacturing.	Current Price Rs.1651.46/- As per SRO.

The above application has been evaluated as per approved SOPs and is tabulated as under;

S. No	Reg. No.	Current parameters	Demanded parameters	Remarks
1.	003846	Polyvalent Anti Snake venom	Polyvalent Snake Antivenom serum (Liquid Equine Immunoglobulins)	Application for change of Brand Name as per Approved SOPs is required to be submitted. The firm has submitted fee of Rs.30,000/-(Full fee for registration for local manufacturing).
2.		Not Mentioned	2 years from date of manufacturing.	Application for change/Inclusion of shelf Life as per Approved SOPs is required to be submitted.
3.		Not Mentioned	(+2 to 8 ℃)	Application for change/Inclusion of labelled storage condition as per Approved SOPs is required to be submitted.
4.		USP Type-I Glass vial of 10ml	10ml vial	
5.		B.P specifications	B.P specifications	Already given.
6.		Not Mentioned	Current Price Rs.1651.46/- As per SRO.	Relates to Pricing Division.

7.	Each 1ml neutralizes: 0.6mg of Russel's viper (Daboia russellii) venom 0.6mg of Black Cobra (Naja naja) venom 0.45mg of saw Scale Viper (Echis carinatus) venom 0.45mg of Common krait (Bungarus caeruleus) venom	Each 1ml of Antivenom neutralizes not less than $2LD_{50}$ challenge venom dose of following snakes: 1.Russell's viper (*Daboia russellii*) 2.Cobra species (*Naja naja,Naja Oxiana*) 3. Common krait (*Bungarus caeruleus*) 4.Saw-scale viper (*Echis carin.atus*).	Registration Board in its 318th approved the expression of titer of current composition from not less than $2LD_{50}$ challenge venom dose.

The firm has submitted following documents:

1. Application.
2. A copy of regularization of registration letter.
3. Fee of Rs. 30,000/- (Full fee for registration for local manufacturing).
4. Justification of change of the expression of titer of current composition to not less than $2LD_{50}$ challenge venom dose.

Registration Board in its 307th meeting delegated its power/Functions for all the parameters except S. No. 6 (Which relates to Pricing Division) and Registration Board has also not specifically delegated its power/Functions change of Expression of Titer at S. No. 7 to the Chairman Registration Board.

Decision: Registration Board decided to approve request as per following details:

Brand Name & Composition	**Other parameters**
Polyvalent Snake Antivenom serum (Liquid Equine Immunoglobulins) Each 1ml of Antivenom neutralizes not less than 2 LD_{50} challenge venom dose of following snakes: Russell's viper (*Daboia russellii*) Cobra species (*Naja naja, Naja Oxiana*) Common krait (*Bungarus caeruleus*) Saw-scale viper (*Echis carinatus*)	**Container closure system: 10 ml vial Specification: British Pharmacopoeia Shelf Life: 2 years Storage conditions: 2°C to 8°C**

66. Constitution of Post Registration Variations Committee (PRVC) of Biologicals.

1st meeting for the Post Registration Variations for Biologicals was held on 15th - 16th November, 2022 in the Office of the Director BE&R, Division DRAP, Drug Regulatory Authority of Pakistan, Islamabad. The meeting was chaired by Dr. Obaidullah, Director(PE&R)/ Chairman Drugs Registration Board DRAP.

Following officers attended the meeting:

1. **Dr. Noor-us-Saba Director(BE&R), DRAP**
2. **Ms. Aisha Irfan Additional Director (BE&R), DRAP**
3. **Mr. Zeeshan Nazir Bajar Additional Director(PE&R), DRAP**
4. **Mr. Muhammad Kashif, Deputy Director(BE&R), DRAP**

Following will be the members of PRVC of biologicals for evaluation and approval of post registration variations of biological products for which the Registration Board has already delegated its functions to the Chairman Registration Board in its various meetings for approval of such cases.

1. **Chairman Registration Board, DRAP**
2. **Director (BE&R), DRAP**
3. **Secretary Registration Board /Additional Director(PE&R), DRAP**
4. **Additional Director (BE&R), DRAP**
5. **Deputy Director (BE&R), DRAP**
6. **Assistant Director (BE&R), DRAP**

Decision: Registration Board constituted the Post Registration Variation Committee for Biologicals and the committee which will comprise of the following members. Furthermore the committee can also co-opt any member if required:

1. **Chairman Registration Board, DRAP**
2. **Director (BE&R), DRAP**
3. **Secretary Registration Board /Additional Director(PE&R), DRAP**
4. **Additional Director (BE&R), DRAP**
5. **Deputy Director / Assistant Director (BE&R), DRAP**

67. Change in expression of titer.

M/s Hilton Pharma (Pvt.) Ltd has applies for change in Expression of Titer of their already registered biological product as per following details.

Reg. No. and date	**Brand Name and Composition**	**Existing Expression of Titer**	**Demanded Expression of Titer**
084989 dated 30-10-2017	Medivac ND G7 Emulsion (Inactivated vaccine) Each dose (0.5ml) of vaccine contains: Inactivated Newcastle disease virus, MD15 strain…at least 50 PD_{50}	Each dose (0.5ml) of vaccine contains: Inactivated Newcastle disease virus, MD15 strain…at least 50 PD_{50}	Each dose (0.5ml) of vaccine contains: Inactivated Newcastle disease virus, MD15 strain ……at least10^7 EID_{50}

There is no approved SOP for change in Expression of Titer and the firm has submitted following documents.

1. Application with fee for the product along with Brand name change fee of Rs.152500/- is submitted.
2. Registration letter dated 30-10-2017 is submitted.
3. Justification for proposed change for the products is submitted.
4. Legalized CoPP issued by the Ministry of Ministry of Agriculture Directorate General Of Livestock and Animal Health Services Indonesia mentioning the demanded expression of titer.

5. Undertaking is submitted that the provided documents are true and correct.

Registration Board has not specifically delegated its power/Functions change of Expression of Titer already registered drugs to the Chairman Registration Board.

Decision: The Committee evaluated the case and Chairman Registration Board, on the recommendations of the committee deferred the case for deliberation in Registration Board along with status of innovator and other registered drug products.

Decision: Registration Board deferred the case for provision of any reference product with requisite expression of titer.

68. Change in Expression of Titer

M/s Hilton Pharma (Pvt.) Ltd has applies for change in Expression of Titer of their already registered biological product as per following details.

Reg. No. and date	**Brand Name and Composition**	**Existing Expression of Titer**	**Demanded Expression of Titer**
084988 dated 30-10-2017	Medivac ND Gumboro Emulsion vaccine (Freeze Dried Live Vaccine) Each dose (0.5ml) contains: Inactivated Newcastle Disease Virus, LaSota Strain..at least …….50 PD_{50} Inactivated infectious bursal disease virus, winterfield 2512 strain…at least 800 serum neutralization (SN).	Each dose (0.5ml) contains: - Inactivated Newcastle Disease Virus, LaSota Strain..at least …….50 PD_{50} Inactivated infectious bursal disease virus, winterfield 2512 strain…at least 800 serum neutralization (SN).	Each dose (0.5ml) contains: - Inactivated Newcastle Disease Virus, LaSota Strain..at least …….10^{7} EID_{50} Inactivated infectious bursal disease virus, winterfield 2512 strain…at least $10^{4.5}$ EID_{50}.

There is no approved SOP for change of expression of titer but the firm has submitted following documents.

1. Application with fee of Rs. 10,000/- for the products is submitted.
2. Registration letters for the product dated 30-10-2017 is submitted.
3. Justification for proposed change for the product is submitted.
4. Legalized CoPP issued by the Ministry of Ministry of Agriculture Directorate General of Livestock and Animal Health Services Indonesia mentioning the demanded expression of titer
5. Undertaking is submitted that the provided documents are true and correct.

Registration Board has not specifically delegated its power/Functions change of Expression of Titer already registered drugs to the Chairman Registration Board.

Decision: The Committee evaluated the case and Chairman Registration Board, on the recommendations of the committee referred the case for deliberation in Registration Board along with status of innovator and other registered drug products

Decision: Registration Board deferred the case for provision of any reference product with requisite expression of titer.

Cases of AD-I (Mr. Hafiz Ahsan)

Imported Human Biological product from Reference countries (WHO PQ):

	For generic drugs (me-too status)	Measles vaccine live attenuated, (freeze – dried) lyophilized injection. Imported by PEARL & PEARLS INTERNATIONAL Reg. #. 052298
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	M/S PT Bio Farma (Persero), Jalan Pasteur 28, Bandung 40161- Indonesia
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	All 3 batches of measles bulk (MVB) have completed 2 years of Real-time stability study period. The interim result shows that Measles bulk is stable until 2 years at temperature of ≤ -60 °C. The real-time stability study will be continued until 11 years of the stability period. All 3 batches of measles bulk (MVB) had completed 42 months of stability study period. The accelerated time stability study results show that Measles bulk is stable until 24 months at temperature of -25 °C ~ -20 °C.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Analytical method validation of Product	Firm has submitted the details of analytical method validation.
	Container closure system of the drug product	10 ml USP Type 1 clear glass blow back vials closed with 20 mm bromo butyl RFS rubber stoppers and sealed with Orange plastic covered flip-off aluminum cap.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of Measles vaccine 10 dose at accelerated and real time conditions. All of 3 batches of measles vaccine 10 dose have completed 3 years of Real time stability study period. All testing parameters still fulfilled the requirements at each testing point. The interim result shows that measles vaccine 10 dose is stable until 3 years at temperature of 2°C - 8°C. The stability study will be continued up to 4 years of storage periods. The Accelerated stability study period at temperature of 25±2 ˚C and 30 days at temperature of 37°C ±1°C. The result shows that measles vaccine 10 dose is stable until 6 months at temperature of 25°C ±2°C and 21 days at temperature of 37±1˚C.
	Module-IV Non-Clinical	The firm has submitted that there is no data regarding the non-clinical study of measles vaccine due to the requirement for pre-clinical trial was not implemented at the time when the product was registered. However, for additional information, the tests on animal are conducted as routine test for product release to ensure the safety of product, such as: 1. Abnormal toxicity study for measles vaccine The results of above tests are mentioned in CoA of finished product enclosed in annex 3.2.P.5.4.
	Module-V Clinical	Firm has submitted following: -A randomized, multicenter, controlled field trial to compare the immunogenicity and reactogenicity of CAM-70BF (Perum Biopharma) with Schwarz vaccine, the standard Indonesian EPI Measles vaccines in infants aged 9-11 months. Subjects : 1061 infants of ages ranging between 9 and 11 months old were recruited as study group)
	Remarks of Evaluator: The product is WHO PQ and its status is checked on 22-11-2022 @ https://extranet.who.int/pqweb/vaccines/prequalified-vaccines. The firm has submitted that there is no data regarding the non-clinical study of measles vaccine due to the requirement for pre-clinical trial was not implemented at the time when the product was registered.	
	Decision: Keeping in view the WHO PQ status and legalized CoPP indicating product availability in the country of origin and GMP status of the firm, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	M/S PT Bio Farma (Persero) Jalan Pasteur 28, Bandung 40161- Indonesia
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of Monovalent Bulk of Poliomyelitis Type 1and Monovalent Bulk of Poliomyelitis Type 3 at accelerated and real time conditions. The real time stability data of Monovalent Bulk of Poliomyelitis Type 1 is conducted at ≤ -60 ºC for 20 years for 3 batches and the real time stability data of Monovalent Bulk of Poliomyelitis Type 3 is conducted at ≤ -60 ºC for 20 years for 3 batches. The Accelerated stability data is conducted at -25 – -20 ºC for 3 years for 3 batches of Monovalent Bulk of Poliomyelitis Type 1 and Type 3.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Analytical method validation/verification of product	Firm has submitted the details of analytical method validation.
	Container closure system of the drug product	2 ml USP Type II clear glass blow back vials closed with bromo butyl RFS rubber stoppers and sealed with 20 mm flip off seals –Identical color
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted Real time stability study data: All 3 batches of Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 10 doses have completed 3 years of stability study period. The result shows that Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 10 doses is stable until 2.5 years at temperature of -25 °C ~ -20°C. The accelerated stability study data: All 3 batches of Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 10 doses have completed the stability study period. The result shows that Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 10 dosess is stable until 7 months at temperature of 5°C ± 3°C, 8 days at temperature of 23°C ± 2°C, and 12 hours at temperature of 37°C ± 1°C.
	Module-IV Non-Clinical	The firm has submitted that there is no data regarding the non-clinical study of bOPV types 1 and 3 since there was no requirement for pre-clinical trial at the time when the product was registered. However, we conduct safety test in animal as a routine test for product release which is enclosed in section 3.2.S.4 for the result of safety test.
	Module-V Clinical	Firm has submitted following: - Comparative Evaluation of immunogenicity and Safety of monovalent Oral polio vaccine type I (mOPV1 Bio Farma) with Trivalent OPV (tOPV Bio Farma) in Indonesian Children. - Immunogenicity of bivalent types 1 and 3 oral poliovirus vaccine: a randomized, double blind, controlled trial - Evaluation on immunogenicity and safety profile of Trivalent OPV (tOPV Bio Farma) with Different Batch numbers in Indonesian infants - Immunogenicity and safety profile of primary dose of bivalent OPV (bOPV Bio Farma) given simultaneously with pentabio and inactivated Poliovirus vaccine (IPV) at the 4th visit in Indonesian infants.
	Remarks of Evaluator: The product is WHO PQ and its status is checked on 22-11-2022 @ https://extranet.who.int/pqweb/vaccines/prequalified-vaccines.	
	Decision: Keeping in view the WHO PQ status and legalized CoPP indicating product availability in the country of origin and GMP status of the firm, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.	
71.	**Name, address of Applicant / Importer**	M/s Amson Vaccines & Pharma (Pvt.) Ltd. Plot No. 115, Industrial Triangle, Kahuta Road, Islamabad.

	For generic drugs (me-too status)	Oral Bivalent Types 1 And 3 Poliomyelitis Vaccine Imported by M/s SANOFI-AVENTIS PAKISTAN LIMITED. Karachi Reg. #. 072532
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	M/S PT Bio Farma (Persero), Jalan Pasteur 28, Bandung 40161- Indonesia.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of Monovalent Bulk of Poliomyelitis Type 1and Monovalent Bulk of Poliomyelitis Type 3 at accelerated and real time conditions. The real time stability data of Monovalent Bulk of Poliomyelitis Type 1 is conducted at ≤ -60 °C for 20 years for 3 batches and the real time stability data of Monovalent Bulk of Poliomyelitis Type 3 is conducted at ≤ -60 °C for 20 years for 3 batches. The Accelerated stability data is conducted at -25 to -20 °C for 3 years for 3 batches of Monovalent Bulk of Poliomyelitis Type 1 and Type 3.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation of Product	Firm has submitted the details of analytical method validation.

	Container closure system of the drug product	5 ml USP Type II clear glass blow back vials closed with bromo butyl RFS rubber stoppers and sealed with 20 mm flip off seals –Identical color
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted Real time stability study data: All 3 batches of Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 20 doses have completed 3 years of stability study period. The result shows that Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 20 doses is stable until 3 years at temperature of -25 ºC ~ -20°C. The accelerated stability study data: All 3 batches of Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 20 doses have completed the stability study period. The result shows that Bivalent Oral Poliomyelitis Types 1 & 3 (bOPV) 20 doses is stable until 7 months at temperature of 5°C ± 3°C, 8 days at temperature of 23°C ± 2°C, and 12 hours at temperature of 37°C ± 1°C.
	Module-IV Non-Clinical	The firm has submitted that there is no data regarding the non-clinical study of bOPV types 1 and 3 since there was no requirement for pre-clinical trial at the time when the product was registered. 	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Diphtheria Toxoid Bulk:** • Accelerated Stability Study All 3 batches of purified diphtheria bulk have completed 6 months of stability study period. All testing parameters still fulfilled the requirements at each testing point. It is concluded that purified diphtheria toxoid is stable until 6 months when stored at temperature 25±2°C and 37±1°C. • Real Time Stability Study All 3 batches of purified diphtheria bulk have completed 6 years of stability study period. All testing parameters still fulfilled the requirements at each testing point. It is concluded that purified diphtheria toxoid is stable until6years at temperature 2°C - 8°C. **Tetanus Toxoid Bulk:** AcceleratedStability Study All 3 batches of purified tetanus bulk have completed 6 months of stability study period. All testing parameters still fulfilled the requirements at each testing point. It is concluded that purified tetanus toxoid is stable until 6 months when stored at temperature 25±2°C and 37±1°C. • Real Time Stability Study All 3 batches of purified tetanus bulk have completed 6 years of stability study period. All testing parameters still fulfilled the requirements at each testing point. It is concluded that purified tetanus toxoid is stable until6years at temperature 2°C - 8°C. **Pertussis Bulk:**

		<u>Accelerated Stability Study</u> All 3 batches of pertussis final bulk have completed the accelerated stability study period. All testing parameters still fulfilled the requirements at each testing point. It is concluded that pertussis final bulk is stable until 6 months at temperature 25 ± 2 °C and 2 months at temperature 37±1°C. <u>Real Time Stability Study</u> All 3 batches of pertussis final bulk have completed 3 years of stability study period. All testing parameters still fulfilled the requirements at each testing point. It is concluded that the shelf life of pertussis final bulk is 3 years at temperature 2°C - 8°C.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted the details of analytical method validation.
	Container closure system of the drug product	5 ml USP Type 1 clear glass blow back vials closed with bromo butyl RFS Rubber stopper 13 mm having Aluminum flip off-cap 13 mm–Yellow color.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted accelerated study of all 3 batches of DTP vaccine 10 doses have completed 3 months of stability study period at temperature of 25°C ±2°C and 4 weeks at temperature of 37°C ±1°C. The result shows that DTP vaccine 10 dose is stable until 3 months at temperature of 25°C ±2°C and 2 weeks at temperature of 37°C ±1°C. Real time stability study data of all 3 batches of DTP vaccine 10 doses have completed 3 years of stability study period.The result shows that DTP vaccine 10 dose is stable until 3 years at temperature of 2°C - 8°C.
	Module-IV Non-Clinical	The firm has submitted that there is no data regarding the non-clinical study of DTP vaccine due to the requirement for pre-clinical trial was not implemented at the time when the product was registered. However, for additional information, the tests on animal are conducted as routine test for product release to ensure the safety of product, such as: 1. Abnormal toxicity study for adsorbed vaccine 2. Mouse weight gain test for pertussis component Furthermore, to ensure the Immunogenicity of the product following tests were performed. Potency of diphtheria Potency of tetanus Potency of pertussis

		The results of above tests are mentioned in CoA of finished product enclosed in annex 3.2.P.5.4.
	Module-V Clinical	**Study Reports of Controlled Clinical Studies Pertinent to the Claimed Indication** • DPT Immunization Efficacy in 2 Months Old Infants in Yogyakarta (Diphteria, pertussis, and tetanus). • Immunogenicity and Safety of a Haemophilus Influenzae Type B Conjugate (PRP-T) Vaccine Combined with or Given Concomitantly with a DTP Whole-Cell Combination Vaccine. • Immunogenicity and Safety of DTwP (Bio Farma) Vaccine Combined with Recombinant Hepatitis B 10µg (GCVC) Vaccine in Indonesian Children. **Study Reports of Uncontrolled Clinical Studies** • Immunity and Safety of DPT Vaccine in Infants • Immunogenicity and safety of DTwP Booster in 18-24 months of age children. • Immunogenicity and safety of DTwP (Bio Farma) vaccine, with modified medium for pertussis cultivation.
	Remarks of Evaluator: The product is WHO PQ and its status is checked on 22-11-2022 @ https://extranet.who.int/pqweb/vaccines/prequalified-vaccines. The firm has submitted that there is no data regarding the non-clinical study of DTP vaccine due to the requirement for pre-clinical trial was not implemented at the time when the product was registered. Following tests are	
	Decision: Keeping in view the WHO PQ status and legalized CoPP indicating product availability in the country of origin and GMP status of the firm, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.	

Imported Human Biological product from Non-reference countries:

DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than **100,000 USD** during the **fiscal Year 2022-2023** and submitted their applications for priority consideration in lieu of export facilitation for Registration Board, please.

73.	Name, address of Applicant / Importer	M/s Getz Pharma (Pvt.) Ltd. Address: Plot No.: 29-30, Sector 27, Korangi Industrial Area, Karachi, Pakistan.

	Proposed unit price	Rs. 150,000/- (1 vial)
	Shelf Life	24 months
	Storage condition	2°C-8°C
	The status in reference regulatory authorities	Humira Solution for Injection 40mg/0.8mL (M/s AbbVie Inc., USA. USFDA Approved).
	For generic drugs (me-too status)	Not Applicable
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Name: Shanghai Henlius Biopharmaceutical Co., Ltd. Address: Building 1 (Building D), No.1289 Yishan Road, Xuhui District, Shanghai, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of bulk drug substance at accelerated and real time conditions. The accelerated stability data is conducted at 25°C ± 2°C / 60% ± 5% for 6 months, and the real time stability data is conducted at 2°C to 8°C for 12 months. MS201801 MS201802 MS201803
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted bio-similarity studies with innovator product.
	Analytical method validation/verification of product	Firm has submitted summary of analytical method validation of product.
	Container closure system of the drug product	The primary packaging materials of Adalimumab Injection is vial made of middle borosilicate glass tubing, bromobutyl rubber stoppers for injectable drug, caps made of aluminum-plastic combinations for antibiotics.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches. The accelerated stability study data is conducted at 25±2°C, 60%±5% RH for 6 months. The real time stability study data is conducted at 2°C-8°C for 36 months. M20180501 M20180502 M20180503
	Module IV	Detailed in Biosimilarity data mentioned below.
	Module V	Detailed in Biosimilarity data mentioned below.

The firm has submitted biosimilarity data as per following details:

WHO Biosimilarity Guidelines	**Data Submitted by M/s Getz Pharma Karachi**
Quality Comparison Physicochemical Characterization	Adalimumab from Shanghai Henlius has been compared with Humira – Reference Listed Drug (RLD)

Test Category		**Quality Attribute**	**Tier**
Physicochemical characterization	Primary structure	Amino acid sequence	1
		Molecular weight, disulphide linkages, free thiols, posttranslational modifications	2

		Ratio of PTMs	2
	Higher order structure	Higher order structure	2
	Charge Variants and Isoelectric point	Charge variants	2
		Isoelectric point	2
	Glycan	Glycosylation site and modification ratio	2
		Glycan profiling	2
		Sialic acid	2
	Size Variants	High molecular weight species	1
		Low molecular weight species and monomer	2
Functional Assays	Immunochemical properties	FcRn	2
		C1q	3
		FcγRIa, FcγRIIa, FcγRIIb/c, FcγRIIIa (F and V) and FcγRIIIb	3
	Bioactivity	Neutralization of soluble TNFα	1
		Soluble TNFα binding	1
		Transmembrane TNFα binding, Anti-apoptosis	3
		ADCC (reporter gene assay)	3
		ADCC (In vivo simulating assay)	3
		ADCC (Clinically representative assay)	3
		CDC	3
		TNFα、LTα induced inhibition of ICAM-1 expression.	3
Process-related impurities		Residual DNA, HCP and Protein A	1
Forced degradation Study		Degradation products and degradation trends	3

.

Biological Activity

Biological activity evaluation included 8 assays. The soluble TNFα binding and neutralization of TNFα are the primary MoA, closely related to clinical outcomes, so they were classified as Tier 1; anti-apoptosis, tmTNFα Binding, ADCC, CDC, TNFα induced inhibition of ICAM-1 expression and LTα induced inhibition of ICAM-1 expression are not related to the efficacy of RA, AS and PS indication treatments, so they were classified as Tier 3.

Quality Attribute		Tier	Method	Reason of Tier
Biological Activity	Soluble TNFα Binding	1	ELISA	Primary MoA
	Neutralization	1	Cell-based assay	
	Anti-apoptosis	3	Cell-based assay	Secondary MoA
	tmTNFα Binding	3	Whole cell-based binding	
	ADCC	3	Cell-based assay	
	CDC	3	Cell-based assay	
	TNFα induced inhibition of ICAM-1 expression	3	Cell-based assay	
	LTα induced inhibition of ICAM-1 expression	3	Cell-based assay	

The similarity results of biological activities suggested that HLX03 (Adalimumab of Shanghai Henlius) and Humira have similar biological activities.

Immunochemical properties

As IgG1, Adalimumab have the ability to bind with C1q, FcRn and FcγR. FcRn is expressed in endothelial cells and monocytes, and is involved in recycling of IgG and regulates its serum half-life, but has a relatively low risk to clinical outcomes. FcRn binding was assigned as Tier 2 attribute. Fc-mediated effector functions are less relevant to MoA, and the abilities to bind with C1q and FcγR have the lowest risk to clinical outcomes. C1q and FcγR binding were assigned as Tier 3 attributes.

Quality Attribute		Tier	Method	Reason of Tier
Immunochemical properties	FcRn binding	2	SPR	Impact PK
	C1q binding	3	ELISA	Least relevant to MoA
	FcγRIa binding	3	SPR	
	FcγRIIa binding	3		

	<table><tr><td></td><td>FcγRIIb/c binding</td><td>3</td><td></td><td></td></tr><tr><td></td><td>FcγRIIIa (F) binding</td><td>3</td><td></td><td></td></tr><tr><td></td><td>FcγRIIIa (V) binding</td><td>3</td><td></td><td></td></tr><tr><td></td><td>FcγRIIIb binding</td><td>3</td><td></td><td></td></tr></table> The similarity results of immunochemical properties and their correlation with clinical outcomes suggested that HLX03 (Adalimumab of Shanghai Henlius) and Humira have similar immunochemical properties.
Impurities	The process related impurities to be tested during drug substance batch release are Protein A, Insulin, HCP and DNA.
Non-clinical Comparison **In-vitro Studies** **In-vivo Studies** **Biological / Pharmacodynamic activity** **Non- clinical toxicity as determined in one repeat dose toxicity study**	Characterization of the primary structure, higher order structure, charge heterogeneity and post-translational modification, glycosylation, molecular size heterogeneity, immunological properties, biological activity, as well as forced degradation, suggesting that HLX03 (Adalimumab of Shanghai Henlius) is highly similar to Humira. Primary pharmacodynamics: • A comparative study of the affinity of HLX03 (Adalimumab of Shanghai Henlius) and Humira to TNFα using Surface Plasmon Resonance technique. • Evaluation of the efficacy of HLX03 (Adalimumab of Shanghai Henlius) in preventing arthritic symptoms in the Tg197 transgenic mouse model of arthritis. • To compare the in-vitro activity of HLX03 (Adalimumab of Shanghai Henlius) with that of Adalimumab (reference product) via Neutralization assay. Safety pharmacology: • Toxicity of recombinant Anti-TNFα Human monoclonal antibody injection after repeated subcutaneous injection in Cynomolgus Monkeys with a 4-week recovery period. Pharmacokinetics: • Pharmacokinetics study of recombinant Anti-TNFα Human monoclonal antibody injection (02 batches) after single subcutaneous injection in Cynomolgus Monkeys. • Pharmacokinetics study of recombinant Anti-TNFα Human monoclonal antibody injection and Adalimumab after single subcutaneous injection in Cynomolgus Monkeys. • Pharmacokinetics study of recombinant Anti-TNFα Human monoclonal antibody injection in Cynomolgus Monkeys. Toxicology: • Tissue cross reactivity study of recombinant Anti-TNFα Human monoclonal antibody injection.

	• In-vitro Hemolysis test of recombinant Anti-TNFα Human monoclonal antibody injection with Rabbit Red Blood Cells. • Toxicity studies of recombinant Anti-TNFα Human monoclonal antibody injection after repeated subcutaneous injection in Cynomolgus Monkeys with a 4-week recovery period. • Toxicity studies of recombinant Anti-TNFα Human monoclonal antibody injection after a single subcutaneous injection in Cynomolgus Monkeys.
Clinical Comparison	• A randomized, double blind, parallel controlled phase I clinical study of HLX03 (Adalimumab of Shanghai Henlius) versus Humira in Healthy Chinese Male subjects for comparison in Pharmacokinetics profile, safety, tolerability and immunogenicity. • A phase III, randomized, double blind, multicenter, active-controlled parallel clinical study to investigate the efficacy and safety of recombinant Anti-TNFα fully human monoclonal antibody injection (HLX03: Adalimumab of Shanghai Henlius) versus Adalimumab injection (Humira) in patients with moderate to severe plague psoriasis (N = 216).
Decision: Keeping in view the legalized CoPP indicating product availability in the country of origin and GMP status of the firm, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.	

Imported Veterinary Biologicals from Reference Countries:

	Marketing authorization holder	Laboratorios HIPRA, S.A., Avda. la Selva, 135, 17170 Amer (Girona) Spain.
	Name of Manufacturers	Laboratorios HIPRA, S.A., Carretera C-63, Km 48, 300, Poligono Industrial El Rieral, 17170 Amer (Girona), Spain (Responsible for primary packaging). Laboratorios HIPRA, S.A., Avda. la Selva, 135, 17170 Amer (Girona) Spain. (Responsible for batch release in the EU, quality control and Secondary packaging).
	Exporting country	Spain
	Brand Name + Dosage Form + Strength	GUMBOHATCH, Lyophilisate and solvent for suspension for injection 1000 dose
	Dy. No. Date of Application, Fee submitted	Dy. No. 2055: Dated 28-07-2021 Rs.150,000/- Dated 09-07-2021
	Composition	Each dose of reconstituted vaccine contains

	Live attenuated infectious bursal disease virus, strain 1052…….....$10^{1.18}$-$10^{2.80}$ *PU PU: Potency Units* Solvent: Phosphate buffer solution
Pharmacological Group	Live attenuated vaccine against Infectious Bursal Disease
Type of Form	Form 5A
Finished product specifications	As per European Pharmacopoeia
Shelf life	24 Months (Store at 2°C-8°C)
International availability	Lyophilized Gumbohatch and solvent for Injectable Suspension for Chickens by M/s Laboratorios HIPRA, S.A. (AEMPS approved).
Products already registered in Pakistan	GUMBOHATCH 1000 dose
Demanded Price / Pack size	1000 dose Decontrolled for Veterinary products
Stability data of the finished product	Now the firm has submitted stability study data of 3 batches conducted at 2°C - 8°C for 24 months: P.4D62 P.4S19 P.4T71
Document Details	The firm has submitted copy of certificate of veterinary medicinal product (Certificate No. 05/21/160295) issued by European Medicines Agency, Domenico Scarlattilaan 6, 1083 HS Amsterdam, The Netherlands on 19-07-2021. The certificate confirms fee sale status of the product in the country of origin as well as GMP status of the manufacturer.

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Valid copy of drug sale license is required since submitted copy of DSL is expired on 19-02-2022.	The firm has submitted updated copy of DSL (License No. 05-352-0058-050528D) valid till 19-Feb-2024.
2.	Potency units mentioned in applied composition of live IBDV are between $10^{1.48}$-$10^{2.80}$ which are different from that mentioned in CVMP certificate i.e., $10^{1.48}$-$10^{2.63}$. Clarification is required.	During the registration process, we requested a change in the active substance specifications from $10^{1.48}$ - $10^{2.80}$ PU to $10^{1.48}$- $10^{2.63}$ PU in accordance with EMA (European Medicines Agency) indications. The change refers to limits of acceptance of results of the active substance to release a batch. It is a change of internal specifications of the potency control, not a composition change. *Initially, the firm submitted CoPP with potency units $10^{1.48}$- $10^{2.63}$ PU while now the firm has submitted CoPP potency units which are $10^{1.18}$ – $10^{2.80}$.*
3.	Reference to finished product specifications shall be mentioned.	Innovator's specifications
4.	Clarification regarding primary packing material and desired pack size	For the lyophilisate of the vaccine GUMBOHATCH 1,000 doses the

	of applied formulations.	container used consists of 10 ml glass vials. These vials are closed by rubber stoppers and caps. **Desired Pack size** Cardboard box with 10 freeze-dried powder vials containing 1,000 doses.
5.	The submitted real time stability data is only for 9 months. Provide stability study data till claimed shelf life for product at serial No. 1.	Now the firm has submitted stability study data of 3 batches conducted at 2°C - 8°C for 24 months: **P.4D62** **P.4S19** **P.4T71**

Decision: Registration Board deferred the case for submission of revised dossier with requisite fee in line with updated CoPP with composition of $10^{1.18} – 10^{2.80}$ potency units (PU).

	Name of Manufacturer	M.s.Choong Ang Vaccine Laboratories Co., Ltd. 1476-37 Yuseong-daero, Yuseong-gu, Daejeon, 34055, Korea.
	Brand Name + Dosage Form + Strength	**PoulShot® IB-Castle** Lyophilized Solution 2000 Doses / vial
	Type of Form	Form 5-A
	Dy. No. Date of Application, Fee submitted	Dy. No.14754(R&I) Dated 24-06-2020, Dy. No.11891(R&I) Dated 21-04-2021. Rs.100,000/- dated 17-06-2020
	Composition	Each dose contains: Newcastle Disease virus (NDV, NDRL0901 strain) ≥ $10^{6.0}EID_{50}$

		Infectious bronchitis virus (IBV, AVR1/08 strain) : ≥ $10^{6.0}EID_{50}$
	Finished product specifications	Ph. Eur. Specifications
	Pharmacological Group	Live viral veterinary vaccine
	Shelf life	24 Months (Store at 2°C -8°C)
	Demanded Price / Pack size	2000 Doses / Vial, Decontrolled
	Products already registered in Pakistan	The combination is available but strains mentioned are not available as per record.
	General Documentation	• Legalized FSC having Certificate No.M196216 issued by Animal & Plant Quarantine Agency of the Ministry for Agriculture Food & Rural Affairs of Korea dated 12-11-2019. • Legalized GMP Certificate issued by Animal & Plant Quarantine Agency of Korea dated 27-02-2020.
	Previous Decisions:	Registration Board referred the case to Expert Working Group on Veterinary Drugs **(M-307)**. Referred the product to Ministry of National Food Security & Research, Islamabad for comments regarding the need of vaccine, prevalence of disease and immunological relevance of the strain in Pakistan **(M-313)**. Deferred for confirmation of availability of such combination in reference regulatory authorities **(M-317).**
	Evaluation by DBE&R	**Recommendations by Assistant Animal Husbandry Commissioner:** Routine combination already many companies have this combination, therefore, may be recommended for import. The firm has submitted that our product is a veterinary vaccine, registered and freely available in Korea and as per recommendations by Assistant Animal Husbandry Commissioner similar vaccine is already available in Pakistan. We have reviewed the Registration Board minutes and could not find a requirement of availability in reference regulatory authority for veterinary medicine / vaccine (Extract of decisions on various products attached).

Decision: Registration Board deferred the case for following:

- **Status of applied strains in reference regulatory authorities as adopted by Registration Board in its 275th meeting.**
- **Characteristics of strain worth considering in Pakistan.**

Demanded Price / Pack size	1000 Doses / Vial, Decontrolled
Products already registered in Pakistan	The combination is available but strains mentioned are not available as per record.
General Documentation	• Legalized FSC having Certificate No. M2003187 issued by Animal & Plant Quarantine Agency of the Ministry for Agriculture Food & Rural Affairs of Korea dated 12-03-2020. • Legalized GMP Certificate issued by Animal & Plant Quarantine Agency of Korea dated 27-02-2020.
Previous Decisions:	Registration Board referred the case to Expert Working Group on Veterinary Drugs **(M-307)**. Referred the product to Ministry of National Food Security & Research, Islamabad for comments regarding the need of vaccine, prevalence of disease and immunological relevance of the strain in Pakistan **(M-313)**. Deferred for confirmation of availability of such combination in reference regulatory authorities **(M-317).**
Evaluation DBE&R	**Recommendations by Assistant Animal Husbandry Commissioner:** Already one such combination is available in Pakistan. It's good combination may be recommended for import to make healthy combination. The firm has submitted that our product is a veterinary vaccine, registered and freely available in Korea and as per recommendations by Assistant Animal Husbandry Commissioner similar vaccine is already available in Pakistan. We have reviewed the Registration Board minutes and could not find a

requirement of availability in reference regulatory authority for veterinary medicine / vaccine (Extract of decisions on various products attached).

Decision: Registration Board deferred the case for following:

- **Status of applied strains in reference regulatory authorities as adopted by Registration Board in its 275th meeting.**
- **Characteristics of strain worth considering in Pakistan.**

Miscellaneous Cases:

The following product was approved in 257th meeting of Registration Board and during the processing of the case, the firm informed that the manufacturing site of their product abroad has been changed from Address: **"**No.8, Jingsheng North 3rd Street, Golden Bridge Science, Industrial Base, Tongzhou District Beijing,China.**"** to Address : **"**No. 8 Nanfeng West 1st Street, Huoxian, Tongzhou District, Beijing, China**"**. Now the firm has submitted fresh dossier of with full Fee which is placed before the board for consideration.

82.	Name, address of Applicant / Importer	**M/s Getz Pharma (Pvt.) Ltd**. Plot No.: 29-30, Sector 27, Korangi Industrial Area, Karachi, Pakistan.
	Details of Drug Sale License of importer	M/s Getz Pharma (Pvt.) Limited. Plot No.: 29-30, Sector 27, Korangi Industrial Area, Karachi, Pakistan. License No.: 570 Valid till: 16-08-2024
	Name and addressof marketing authorization holder (abroad)	Name: Gan & Lee Pharmaceuticals, Address: No. 8 Nanfeng West 1st Street, Huoxian, Tongzhou District, Beijing, China.
	Name, address of manufacturer(s)	Name: Gan & Lee Pharmaceuticals, Address: No. 8 Nanfeng West 1st Street, Huoxian, Tongzhou District, Beijing, China.
	Name of exporting country	China
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original legalized CoPP certificate (No. 20200290) valid till 02.08.2022 issued by Beijing Municipal Medical Products Administration for Recombinant Insulin Glargine Injection, Solution for injection. The CoPP specifies that the product is licensed to be placed for use in the exporting country as well as the product is actually in the market in exporting country. The CoPP confirms the GMP status of the manufacturing site through periodic inspection in every 1 year.
		DML: Firm has submitted copy of Drug Manufacturing License of manufacturer (No. J.20150012) issued by Medical Product Administration of Beijing. The certificate is valid till 17-11-2025.
	Details of letter of authorization / sole agency agreement	Firm has submitted a copy of letter of authorization from Director of Gan & Lee

		Pharmaceuticals. According to the letter, the firm Gan & Lee Pharmaceuticals authorizes "Getz Pharma (Pvt.) Limited with its place of business at Plot No. 29-30, Sector 27, Korangi Industrial Area, Karachi, Pakistan as their business representative with undisputed powers authorized to deal with the product registration of Basagine, Insulin Glargine Injection (3 mL: 300 IU / Cartridge) in Pakistan as per mutually agreed terms and conditions by both companies. The letter was issued on August 26th, 2020. Further, firm has submitted sole agency Agreement between Getz Pharma (Pvt.) Limited and Gan & Lee Pharmaceuticals issued on October 23, 2020 valid for 05 years from date of issue.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and Date of submission	Dy. No. 19551 Dated 04-07-2022
	Details of fee submitted	PKR 150,000/- dated 12.05.2022
	The proposed proprietary name / brand name	**BASAGINE Solution for Injection 100 IU/mL in 3ml Cartridge.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Recombinant Insulin Glargine……....100 IU (3mL cartridge)
	Pharmaceutical form of applied drug	Colorless sterile solution in 3ml Cartridge.
	Pharmacotherapeutic Group of (API)	Insulins and Analogues for injection, long-acting (ATC Code: A10AE04)
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1's in 3ml cartridge 3's in 3ml cartridge 5's in 3ml cartridge

	Proposed unit price	As per DPC
	Shelf Life	36 Months
	Storage Condition	Store between 2°C to 8°C
	The status in reference regulatory authorities	Lantus Solostar Injection 100units/mL (Sanofi Aventis US)
	For generic drugs (me-too status)	Lantus Optiset Injection 100units/mL (Sanofi-Aventis Pakistan Limited, Karachi) Reg. No.: 031389
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Name: Gan & Lee Pharmaceuticals Address: No. 8 Nanfeng West 1st Street, Huoxian, Tongzhou District, Beijing, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of both API at accelerated and real time conditions. The real time stability data is conducted at -15°C ~ -20°C for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted Assay Method Validation by performing linearity, accuracy, precision, and robustness.

	Container closure system of the drug product	Insulin glargine injection consist of a prefilled 3mL Type I glass cartridge. The cartridge is closed at one end with a bromobutyl rubber plunger and sealed at the other end with a combiseal consisting of a rubber liner in an aluminum cap. Further packed in secondary carton along with package insert.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches. The accelerated stability study data is conducted at 25±2°C, 60%±5% RH for 6 months. The real time stability study data is conducted at 5±3°C for 36 months. 121807011 121807021 121807031
	Module IV	Detailed in Biosimilarity data mentioned below
	Module V	Detailed in Biosimilarity data mentioned below
	The firm has submitted Biosimilarity data as per following details:	
WHO Biosimilarity Guidelines	**Data Submitted by M/s Gtz Karachi**	

<table>
<tr><td>Quality Comparison Physicochemical Characterization</td><td>Insulin Glargine from Gan & Lee has been compared with Lantus – Reference Listed Drug (RLD)
<table>
<tr><th>Category</th><th>Quality Attributes</th><th>Analytical methods</th></tr>

<tr><td>Biological Activity</td><td>Cell based Bioactivity Assay – Receptor Phosphorylation Assay
The assay based on the HTRF technology provided by Cisbio mainly, aimed to develop a method that can detect the level of Insulin Receptor. Besides the phosphorylation level of IGFIR (Insulin like Growth Factor I Receptor) was detected based on Alpha technology provided by PerkinElmer.</td></tr>
<tr><td>Immunochemical properties</td><td>To evaluate the immunogenicity of Insulin Glargine Injection (Gan & Lee, China) in patients with diabetes mellitus, compared to Lantus Injection (Sanofi-Aventis, Germany). The immunogenicity will be evaluated based on the respective endpoints as:</td></tr>
</table>

	- Incidence of immune response (formation of antibodies against insulin) in the groups of the study drug and comparison drug in %; - Comparison of the mean antibody titer in the studied groups; - Analysis of the dynamic changes of the antibody titer after the end of treatment and during the treatment compared to the screening data.
Impurities	Product/Process-related Impurities - Cell Substrate-derived Impurities - Single-chain Precursor - Related Proteins - High Molecular Weight Proteins - Inorganic Impurities
Stability Studies	The firm has submitted stability studies.
Non-clinical Comparison **In-vitro Studies** **In-vivo Studies** **Biological / Pharmacodynamic activity** **Non- clinical Studies**	**Non-comparative:** Safety Pharmacology: Effects on Central Nervous System, Cardiovascular System, Respiratory System Primary Pharmacodynamics: Effect of insulin glargine injection to lower blood glucose in normal rabbits. Safety Pharmacology: Hypersensitivity and Skin Irritation Test The study was to observe the hypersensitivity of insulin glargine injection in guinea pigs and skin irritation test at the injected site in rabbits. **Comparative evaluation** of toxicity and toxicokinetic Characteristic of Insulin Glargine Injection following 28 day repeated subcutaneous doses in Spargue Dawley Rats.
Clinical Studies	To compare the pharmacokinetic and pharmacodynamic properties of Insulin Glargine injection (Gan & Lee - China) with Lantus in healthy subjects. Open label, comparative, randomized, multicenter clinical study of the efficacy, safety and immunogenicity of Insulin Glargine solution for subcutaneous injection 100U/ml (Gan & Lee - China) and Lantus solution for subcutaneous injection 100U/ml (Sanofi Aventis - Germany), in patients with diabetes mellitus. (Phase III clinical trial, Patients 118.)
Decision: Keeping in view the legalized CoPP indicating product availability in the country of origin and GMP status of the firm, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.	

Deferred cases:
Locally manufactured Enoxaparin Injections (Form-5)

83.	**Name of Manufacturer**	**M/s Nextar Pharma (Pvt) Ltd** **Plot No. E-58. North Western, Industrial Zone, Port Qasim Karachi.**
	DML and last GMP details	DML No. 000777 Address: Plot No. E-58. North Western, Industrial Zone, Port Qasim Karachi. **Evidence of section:** Injectable Ampoule and Pre-filled Syringe (biological) section dated 3rd June, 2021 GMP: Last GMP conducted on 20th-05-2021 valid up to 19th-05-2023

Data as per guidelines of 289th meeting of Registration Board;

ii) For Bulk Concentrate Import, Local formulation Filling:

i.	The firms shall provide legalized GMP certificate of biological drug substance manufacturer abroad (who will provide concentrate / ready to fill bulk of biological drug to Pakistani manufacturers for further processing) as an evidence that the manufacturer is an authorized manufacturer of biological drug in the country of origin.	Legalized GMP Certificate No.SD 20180757 dated 30-08-2018 issued by Shandong Food and Drug Administration, China valid till 29-08-2023. Manufacturer and its address: Dongying Tiandong Pharmaceutical Co., Ltd. No.1236, Nan-er Road, Dongying City, Shandong Province, China.
ii.	The firms shall provide legalized free sale certificate/CoPP either from country of origin or by any reference regulatory authority as adopted by Registration Board of finished product as evidence that the final product has been manufactured by same concentrate/ready to fill bulk after submission of data to the concerned regulatory authority.	Legalized FSC (Certificate No.: 2018-001) dated 01-08-2018 issued by Shandong Food and Drug Administration of People's Republic of China.
iii.	The firm shall provide the complete data as adopted for imported Enoxaparin injections in 281st meeting of Registration Board of the finished product of same source (bulk concentrate or ready to fill) manufactured either from country of origin or by any reference regulatory authority as adopted by Registration Board to demonstrate the similar efficacy and safety to innovator product covering following requirements:	
	f) The first criterion for demonstrating sameness of enoxaparin is equivalence of physicochemical properties, such as molecular weight distribution using size exclusion chromatography, chain mapping by cetyltrimethylammonium-coated strong anion exchange chromatography, matrix-assisted laser desorption ionization mass spectrometry (MALDIMS), gel permeation chromatograph—electro spray ionization mass spectroscopy (GPC-ESI-MS), or reverse phase ion pair—electro spray ionization mass spectroscopy (RPIPESI-MS).	The firm has submitted physicochemical Characterization performed by the bulk manufacturer. The comparison has not been performed with innovator. 1.Molecular mass and molecular mass distribution. 2.HPLC-MS 3.NMR • 1H NMR: • 13C NMR: 4.UV: 5.Sodium content 6. Molar ratio of sulfate ions to carboxylate ions

g)	The second criterion for demonstrating the sameness of enoxaparin is equivalence of heparin source material (ie, heparin that is derived from porcine intestinal mucosa and that meets USP monograph standards for heparin sodium USP) and mode of depolymerization (ie, cleavage by alkaline b-elimination of the benzyl ester derivative of heparin). The equivalent heparin source material should have at least a similar distribution of natural disaccharide building block sequences (within the context of its variability). If an equivalent mode of depolymerization is used, the generic drug products should be at least similar.	**Equivalence of heparin source material:** R: The starting material of generic Enoxaparin (manufactured by Tiandong) is porcine crude heparin, and no ruminant gene is detected as per qPCR.
h)	The third criterion for demonstrating the sameness of enoxaparin is equivalence in disaccharide building blocks, fragment mapping, and sequence of oligosaccharide species. This can be achieved by exhaustive digestion of enoxaparin with purified heparin digesting enzymes (heparinases I, II, and III) and nitrous acid, among other means, to yield the constituent disaccharide building blocks comprising enoxaparin. These individual disaccharide building blocks can be quantified by capillary electrophoresis (CE), reverse phase high-performance liquid chromatography (RP-HPLC), strong anion exchange HPLC (SAX-HPLC), mass spectroscopy, and nuclear magnetic resonance (NMR) spectroscopy. Chemical approaches such as analysis with modifying reagents (e.g. sodium borohydride, nitrous acid) or modifying enzymes (eg, 2-0-sulfatase, 6-0-sulfatase, and 5-glucuronidase) can be included.	**Not submitted**
i)	The fourth criterion for establishing sameness of enoxaparin is equivalence of in vitro biological and biochemical assay results using activated partial thromboplastin time (aPTT) and Heptest prolongation time. The equivalence in anti-Xa activity, anti-IIa activity, and anti-Xa/anti-IIa ratio between the generic LMWHs should be provided.	**Not submitted**
j)	The fifth criterion for establishing sameness of enoxaparin is equivalence of ex vivo pharmacodynamic (PD) profile in human volunteers. The comparison of in vivo PD profiles is based on measurements of in vivo anti-Xa and Anti-IIa profiles.	**Not submitted**
iv.	The firm shall provide the lot release certificate of the finished product manufactured by same	Not Applicable

	bulk concentrate/ ready to fill from country of export (If applicable).	
v.	The firm shall provide the 6 months accelerated and real time stability studies for drug substance.	The stability studies performed by API manufacturer for drug substance for 24months real time stability study data at 25°C±2°C, 60%RH±5% RH & 6 months accelerated stability study at 40°C±2°C, 75%RH ±5% RH and the results found satisfactory against the specified specification limits.
vi.	The local manufacturer shall perform all the tests on Enoxaparin Sodium bulk as detailed in Pharmacopoeial monograph of Enoxaparin Sodium.	Testing of Enoxaparin sodium was performed as per pharmacopeial method and results complies with specifications and the data has been submitted. i.e. • Identification by: - Size-Exclusion Chromatography (RP-HPLC) - Ratio of anti-factor Xa activity to anti-factor IIa activity - Sodium salt Assay: - Anti-factor Xa Activity - Anti-factor IIa Activity • Clarity and colour of solution • Acidity or alkalinity • Light absorption • Related Substances by HPLC • Sodium • Bacterial Endotoxins
vii.	The local manufacturer shall manufacture three trial batches of the finished biological product to finalize the formulation and then perform the six months stability data on all the batches along with all the tests as detailed in Pharmacopoeial monograph of Enoxaparin Sodium Injection.	The firm has submitted three trial batches for each strength i.e. 20mg, 40mg, 60mg, 80mg, 100mg conducted at 30°C ± 2°C/65% ± 5%RH for the finished biological product. The stability studies have performed till shelf life stability (24 months) as per pharmacopoeial monograph of enoxaparin sodium injection and results found within the specified limits.
viii.	The local manufacturer shall perform suitable tests to evaluate the product and process related impurities both in their product and in Innovator product e.g. Total proteins, Individual proteins, Lipids and DNA content etc. The following techniques may be used: a. SDS-PAGE for individual proteins b. GC-MS for lipid impurities c. Threshold ® Total DNA Assay System for DNA content.	Related substances by HPLC: Purity of LMWHs have been demonstrated by using Anion Exchange chromatography based test in comparison with innovator product i.e. Clexane Injections.
ix.	The firm shall provide the agreement with the source (of bulk concentrate/ready to fill) that if	Not Submitted

	there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	
x.	Regular monitoring through pharmacovigilance reporting system shall be observed through proper pharmacovigilance cell of the manufacturer and report will be forwarded to the National Pharmacovigilance Centre, Division of Pharmacy Services and Biological Division of DRAP. In case of any severe adverse event, immediate mandatory reporting procedure shall be followed.	The firm has submitted undertakings as detailed in 289th meeting of Registration Board by the local manufacturer.
xi.	The firm shall inform DRAP if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.	Firm has submitted undertaking if there shall be any adverse event or ADR reporting from the country of manufacture of concentrate/ready to fill bulk and finished product as required vide Rules 30 of Drug (LR&A) Rule.
xii.	If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	Firm has submitted undertaking If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.
xiii.	All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.	Firm have submitted undertakings All the provisions as contained in the Drugs Act, 1976 and rules made there under including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to.

Remarks of Evaluator:

Sr. No.	**Decision of 321st meeting of RB**	**Response by the firm**
1.	The first criterion for demonstrating sameness of enoxaparin is equivalence of physicochemical properties, such as molecular weight distribution using size exclusion chromatography, chain mapping by cetyltrimethyl ammonium-coated strong anion exchange chromatography, matrix-assisted laser desorption ionization mass spectrometry (MALDIMS), gel permeation chromatograph—electro spray ionization mass spectroscopy (GPC-ESI-MS), or reverse phase ion pair—electro spray ionization mass spectroscopy (RPIPESI-MS).	**Physicochemical Characterization performed with innovator product by the bulk manufacturer:** 1. **Molecular mass and molecular mass distribution**. Size exclusion chromatography is used to detect molecular mass, characterizing the distribution and proportion of enoxaparin sodium oligosaccharide chain length and data is comparable between Lovenox (Branded) and generic Enoxaparin Sodium (Manufactured by Tiandong). 2. **HPLC-MS** MS spectra of generic Enoxaparin and branded Lovenox are submitted. The retention time and mass to charge ratio

		are comparable to oligosaccharide peak and oligosaccharide sequence. 3. **NMR** • ^{1}H NMR: Spectra obtained are similar to that obtained with Enoxaparin Sodium reference standard • ^{13}C NMR: Spectra obtained are similar to that obtained with Enoxaparin Sodium reference standard 4.**UV:** The maximum UV absorption wavelength of both generic Enoxaparin and brand Lovenox is 232 nm, and specific absorption coefficient falls within specified range. 5. **Sodium content** The sodium content of generic Enoxaparin (Manufactured by Tiandong) and branded Lovenox are within 11.3% to 13.5%. 6. **Molar ratio of sulfate ions to carboxylate ions** The molar ratio of sulfate ions to carboxylate ions of generic Enoxaparin and branded Lovenox are no less than 1.8.
2.	The second criterion for demonstrating the sameness of enoxaparin is equivalence of heparin source material (ie, heparin that is derived from porcine intestinal mucosa and that meets USP monograph standards for heparin sodium USP) and mode of depolymerization (ie, cleavage by alkaline b-elimination of the benzyl ester derivative of heparin). The equivalent heparin source material should have at least a similar distribution of natural disaccharide building block sequences (within the context of its variability). If an equivalent mode of depolymerization is used, the generic drug products should be at least similar.	Enoxaparin sodium is the sodium salt of a low-molecular-mass heparin that is obtained by alkaline depolymerization of the benzyl ester derivative of heparin from porcine intestinal mucosa. Enoxaparin consists of a complex set of oligosaccharides that have not yet been completely characterised. Based on current knowledge, the majority of the components have a 4-enopyranose uronate structure at the non-reducing end of their chain. 15 per cent to 25 per cent of the components have a 1,6-anhydro structure at the reducing end of the chain. The mass-average relative molecular mass ranges between 3,800 and 5,000, with a characteristic value of about 4,500. The degree of sulfation is about 2 per disaccharide unit. The potency is not less than 90 IU and not more than 125 IU of anti-Factor Xa per milligram, calculated with reference to the dried substance. The anti-factor IIa activity is not less than 20.0 IU and not more than 35.0 IU per milligram,

calculated with reference to the dried substance.

First, crude heparin (i.e., the starting material) through enzymolysis, centrifugation and then, following a series of purification processes, is purified to obtain heparin sodium (i.e., Intermediate I). After that, through salification, the Intermediate I is converted to benzethonium heparinate (i.e., Intermediate II). After that, through esterification, the Intermediate II is converted to heparin benzyl ester (i.e., Intermediate III), then, Enoxaparin sodium is formed by alkaline degradation. Following a series of purification process (filtering, precipitating, decoloring, filtering, lyophilizing, milling and blending, packaging, and examining), the final product (Enoxaparin sodium API) is obtained.
The starting material of generic Enoxaparin
(manufactured by Tiandong) is porcine crude heparin, and no ruminant gene is detected as per qPCR.

3. The third criterion for demonstrating the sameness of enoxaparin is equivalence in disaccharide building blocks, fragment mapping, and sequence of oligosaccharide species. This can be achieved by exhaustive digestion of enoxaparin with purified heparin digesting enzymes (heparinases I, II, and III) and nitrous acid, among other means, to yield the constituent disaccharide building blocks comprising enoxaparin. These individual disaccharide building blocks can be quantified by capillary electrophoresis (CE), reverse phase high-performance liquid chromatography (RP-HPLC), strong anion exchange HPLC (SAX-HPLC), mass spectroscopy, and nuclear magnetic resonance (NMR) spectroscopy. Chemical approaches such as analysis with modifying reagents (e.g. sodium borohydride, nitrous acid) or modifying enzymes (eg, 2-0-sulfatase, 6-0-sulfatase, and 5-glucuronidase) can be included.

- Size exclusion chromatography is used to detect the molecular mass, characterizing the distribution and proportion of Enoxaparin sodium oligosaccharide chain length.
- Oligosaccharide sequence determined by HPLC-MS.
- Sulfated disaccharide structure by ^{1}H NMR, ^{13}C NMR.
- Specific absorption coefficients by UV.
- Molar ratio of sulfate ions to carboxylate ions by titration.
- Sodium content by Atomic Absorption.

Via above provided tests, equivalence in disaccharide building blocks, fragment mapping, and sequence of oligosaccharide species have been submitted.

4. The fourth criterion for establishing sameness of enoxaparin is equivalence of in vitro biological and biochemical assay results using activated partial thromboplastin

APTT test:
The APTT value is related to the Enoxaparin sodium concentration, the higher the concentration, the longer the

	time (aPTT) and Heptest prolongation time. The equivalence in anti-Xa activity, anti-IIa activity, and anti-Xa/anti-IIa ratio between the generic LMWHs should be provided.	APTT value. There is no significantly difference of the APTT value between generic Enoxaparin (manufactured by Tiandong) and brand LOVENOX. **Anti-Xa activity and Anti-IIa activity test**: The Anti-Xa activities and Anti-IIa activity of generic Enoxaparin (manufactured by Tiandong) and brand LOVENOX are within the specification range of 90 IU/mg~125 IU/ mg (dry basis) and 20 IU/mg~35 IU/mg (dry basis) respectively; Anti-Xa/ Anti-IIa value of Generic Enoxaparin (manufactured by Tiandong) and brand LOVENOX are also within the specification range of 3.3~5.3.
5.	The fifth criterion for establishing sameness of enoxaparin is equivalence of *ex-vivo* pharmacodynamic (PD) profile in human volunteers. The comparison of in vivo PD profiles is based on measurements of *in vivo* anti-Xa and Anti-IIa profiles	The firm has Submitted bioequivalence study reports Open, Randomized, Single Dose, two period crossover bioequivalence trial under fasting conditions on healthy subjects. 24 subjects enrolled in the group according to the screening number of the subjects in ascending order. The statistician provides a random allocation table and randomly allocates the subjects to one of the two dosing sequence A (T-R) group or the B (R-T) group in a 1:1 ratio, with the same number of subjects in each dosing sequence. Test preparation: Enoxaparin sodium Injection 0.6 mL: 6000 AxaIU; Reference preparation: Enoxaparin sodium Injection 0.6 mL: 6000 AxaIU. The test preparation Enoxaparin sodium injection (0.6 mL: 6000 AxaIU) developed and produced by Dongying Tiandong Pharmaceutical Co., Ltd. and the brand reference preparation Clexane® (Enoxaparin sodium injection, 0.6 mL: 6000 AxaIU) were found bioequivalent in Chinese healthy subjects under fasting subcutaneous injection.
6.	The local manufacturer shall perform suitable tests to evaluate the product and process related impurities both in their product and in Innovator product e.g. Total proteins, Individual proteins, Lipids and DNA content etc. The following techniques may be used:	The firm has submitted that comparative impurity testing for enoxaparin has been performed as per British Pharmacopoeia. Tests of related substances by HPLC has been submitted in comparison with innovator product i.e. Clexane Injections.

a. SDS-PAGE for individual proteins
b. GC-MS for lipid impurities
c. Threshold ® Total DNA Assay System for DNA content.

7.	Agreement with the source (of bulk concentrate/ready to fill) that if there shall be any critical change in manufacturing process, biological systems used to manufacture, etc. the firm shall inform DRAP immediately along with relevant documents.	The firm has submitted process change declaration from source (Dongying Tiandong Pharmaceutical Co. Ltd) stating that we would inform for the critical process changes related to the product and implement only after approval.
8.	Commitment that "If any of the conditions is not fulfilled or public health risk reported at any stage, the drug registration shall stand cancelled with immediate effect.	Submitted.
9.	Commitment that "All the provisions as contained in the Drugs Act, 1976 and rules made thereunder including provisions of Lot Release certification from National Control Laboratory for Biologicals shall be strictly adhered to".	Submitted.

Remarks of Evaluator:
The firm has provided Pre-filled syringe Biological Section. Already registered products are as under:

1. Nexfil 300 (Filgrastim)
2. Pegaron Inj. (Pagylated Interferon alpha 2a)
3. NP-POETIN (Erythropoietin)

Decision: Registration Board deferred the case for submission of section wise details of products of M/s Nextar Pharma (Pvt) Ltd., Karachi in the biological facility.

Cases of AD-II (Mr. Saadat Ali Khan)

A: Imported Human Biological product from Reference countries/WHO PQ:

88.	**Name, address of Applicant / Importer**	**HealthBee Projects Private Limited** **Address: Office 202, 2nd floor, Business Heights II, Plot no 133, Civic Center, Phase IV, Bahria Town, Islamabad**

	Name of exporting country	China
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original legalized COPP (No Beijing 20220116) issued on 17th August 2022 **by Beijing Municipal Medical Product Administration** The CoPP specifies free sale status of the product in country of origin along with its availability. The CoPP also confirms the GMP status of the firm. (Periodicity of routine inspection: 1 years)
	Details of letter of authorization / sole agency agreement	Firm has submitted product specific letter of authorization dated 30th June 2022 from Beijing Institute of Biological Products Co., Ltd The letter specifies that the manufacturer appoints HealthBee Projects Private Limited to register & sell their products in Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No.28917 Dated: 12.10.2022
	Details of fee submitted	Rs. 150030/- Dated 21/9/2022
	The proposed proprietary name / brand name	Poliomyelitis Vaccine (Vero Cell), Inactivated, Sabin Strains 1 dose (0.5ml)/vial
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each dose contains Inactivated poliovirus **Type I (Sabin): 15DU** **Type II (Sabin): 45DU** **Type III (Sabin): 45DU**

	Dosage form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Inactivated vaccine (IPV)
	Reference to Finished product specifications	In house
	Proposed Pack size	0.5ml/vial, 1 vial/box, 3 vials/box and 10 vials/box
	Proposed unit price	Retail price as per SRO
	Shelf Life	24 months
	Storage Conditions	$2^{O}C$ -$8^{O}C$
	The status in reference regulatory authorities	WHO PQ
	For generic drugs (me-too status)	Sanofi Pasteur (Imovex) Bilthoven Biologicals IPV
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance & drug product.
	Name, address of drug substance manufacturer	Beijing Institute of Biological Products Co., Ltd Manufacturing Address: No 6&9 Boxing 2^{nd} Road, Economic Technological Development, Area, Beijing, P.R China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturer description of manufacturing process and control, impurities, specifications, analytical procedure and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of Drug substance at accelerated as well as real time conditions. Real time stability data: 2-$8^{O}C$ for 24 months, Accelerated stability data: 20-$25^{O}C$ for 4 weeks
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process control, process validation protocol, control of excipients, control of drug product, specification, analytical procedures, verification, batch analysis, justification of specification, reference standard or materials container closure system and stability

	Analytical method validation/verification of product	Firm has submitted analytical method validation/ verification of product including accuracy, stability, precision, and solution stability
	Container closure system of the drug product	The final container closure system is film coated middle borosilicate glass vial, film coated brominated butyl rubber stopper,
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches at real time conditions. The real time stability data is conducted at $2^{O}C$ -$8^{O}C$ for 24 months. The accelerated stability data provided is of 03 batch and is conducted at at 25°C for 06 months.
	Module-IV	• Rats Immunogenicity Study for sIPV (Pre-clinical). • Single Dose Toxicity Study on ICR Mice with Intramuscular Injection and Intravenous Injection of sIPV • Repeat-dose Toxicity Study on Macaca Fascicularis with Intramuscular Injection of sIPV, 12 Weeks and 8-Week Recovery. • Systemic Active Anaphylaxis Study on Guinea Pigs Immunized with sIPV.
	Module-V	• The Phase I trial was to evaluate its safety, it was evaluated on adults aged 18-45 years old, 4 years old aged group and infants aged 2 months old group in the order of low, middle and high dosage. • The Phase II trial is a single-blind, randomized, controlled study in which approximately 500 healthy new born infants will be enrolled and allocated across five arms. • The Phase III trial is a single-blind, randomized, controlled study in which approximately 1200 healthy new born infants will be enrolled and allocated across two arms. • Phase IV clinical study was initiated by BIBP in Henan CDC to assess the safety, immunogenicity and lot-to-lot consistency of 3 lots of sIPV and non-inferiority in comparison to a WHO prequalified comparator wlPV (Sanofi Pasteur). • A Phase IV clinical study was initiated to evaluate the safety and immunogenicity of coadministration of sIPV and DTaP. • A Phase IV clinical study was initiated by BIBP to immunogenicity of sIPV-bOPV-bOPV, sIPV-sIPV-bOPV, sequential immunization schedule.
	Remarks	
	Decision: Keeping in view legalized CoPP and WHO Prequalification (Reference Regulatory Authority); Registration Board approved the product subject to compliance of current Import Policy for finished drugs.	
89.	**Name, address of Applicant / Importer**	Vikor Enterprises Plot # Z2-A, S.I,T.E. Manghopir Road , Karachi

	For generic drugs (me-too status)	Rota virus in 5 dose is not registered as per available record.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance & drug product.
	Name, address of drug substance manufacturer	M/S Bharat Biotech International Limited, Genome Valley, Shameerpet, Mandal, Medchal District 500078, Talangana India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The real time stability data of Rotavirus 116E Live has conducted at -70 C +/-5C for 120 months and at -20 C +/-5C for 48 months. The accelerated stability studies conducted at +5 C +/- 3C for 12 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Analytical method validation/verification of product	Firm has submitted Analytical test method along with validation studies of the drug product.
	Container closure system of the drug product	Filled in 5 ml tubular glass vial having 20 mm neck of USP type I with 20 mm grey bromobutyl rubber stopper (RFU) sealed with 20 mm tear lift flip down (RFU) transparent violet colour seals.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches at real time conditions Rotavac 0.5 ml vial & 5 ml vial at -20 ^{O}C +5 ^{O}C for 60 months. And for the current presentation the firm has submitted stability study data for 36 months for 3 batches & for 60 months for two batches.
	Module-IV	The firm has submitted repeat dose toxicity study on Harlan Sprague Dawley Rats and New Zealand white rabbits.
	Module-V	i. Double blind Randomized Placebo controlled dose escalating Phase Ib/IIa Study to evaluate the safety and Immunogenicity of Live Attenated Rotavirus vaccine in Healthy Non Malnourished Infant 8-20 Weeks of Age. ii. A Phase III Randomized double blind placebo controlled trial to evaluate the protective efficacy of three doses of oral rotavirus vaccine (ORV) 116E, against severe rotavirus gastroenteritis in infants (**6799 Subjects**) iii. A Phase III Randomized double blind placebo controlled trial to evaluate the Non-interference in the Immune Response og three doses of oral rotavirus vaccine (ORV) 116E to Antigens contained in childhood vaccinre and to assess the clinical Lot Consistency of three production Lots.
	Remarks	a. CoPP is expired on **valid upto 03-04-2022** while was valid at the time of submission of the application. b. Real time stability study of two batches are submitted however as per ICH brackating study, the firm has submitted real time stability study data for lowest (0.5ml vial) & highest presenatation (5ml vial).
	Decision: Keeping in view legalized CoPP and WHO Prequalification (Reference Regulatory Authority); Registration Board approved the product subject to compliance of current Import Policy for finished drugs. The firm shall submit valid legalized CoPP before issuance of Registration letter.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance & drug product.
	Name, address of drug substance manufacturer	M/S Bharat Biotech International Limited, Genome Valley, Shameerpet, Mandal, Medchal District 500078, Talangana India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The real time stability data of Rotavirus 116E Live has conducted at -70 C +/-5C for 120 months and at -20 C +/-5C for 48 months. The accelerated stability studies conducted at +5 C +/- 3C for 12 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted Analytical test method along with validation studies of the drug product.
	Container closure system of the drug product	Filled in 5 ml tubular glass vial having 20 mm neck of USP type I with 20 mm grey bromobutyl rubber stopper (RFU) sealed with 20 mm tear lift flip down (RFU) transparent violet colour seals.

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches at real time conditions. The real time stability data is conducted at -20 ^{O}C +5 ^{O}C for 60 months. The accelerated stability data provided is of 03 batch and is conducted at at 5°C ± 3°C for 06 months.
	Module-IV	The firm has submitted repeat dose toxicity study on Harlan Sprague Dawley Rats and New Zealand white rabbits.
	Module-V	iv. Double blind Randomized Placebo controlled dose escalating Phase Ib/IIa Study to evaluate the safety and Immunogenicity of Live Attenated Rotavirus vaccine in Healthy Non Malnourished Infant 8-20 Weeks of Age. v. A Phase III Randomized double blind placebo controlled trial to evaluate the protective efficacy of three doses of oral rotavirus vaccine (ORV) 116E, against severe rotavirus gastroenteritis in infants (**6799 Subjects**) vi. A Phase III Randomized double blind placebo controlled trial to evaluate the Non-interference in the Immune Response og three doses of oral rotavirus vaccine (ORV) 116E to Antigens contained in childhood vaccinre and to assess the clinical Lot Consistency of three production Lots.
	Remarks	a. CoPP is expired on **valid upto 03-04-2022** while was valid at the time of submission of the application. b. The product is from India & not Prequalfied in the 0.5 ml single dose vial while the other two presenatation are WHO PQ.
	Decision: Registration Board approved the product and referred the case to DRAP Authority for seeking guidance regarding the importability of the product from India as per IPO being non WHO PQ product.	
92.	Name, address of Applicant / Importer	**M/s Roche Pakistan Limited,** 1st floor, 37-B, Block 6, PECHS, Karachi.
	Details of Drug Sale License of importer	License No: 0171 Address: Roche Pakistan Limited, 1st floor, 37-B, Block 6, PECHS, Karachi. Validity: 13-09-2024. Status: Drug License by way of wholesale and Drug License by way of retail sale
	Name and address of marketing authorization holder (abroad)	Genentech, Inc. (A member of the Roche Group), 1 DNA Way, PDRO Building 35, MS 355J, South San Francisco, CA 94080 Unites States of America
	Name, address of manufacturer(s)	F. Hoffmann-La Roche AG, Wurmisweg, Kaiseraugst 4303 Switzerland
	Name of exporting country	Switzerland

	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	Copy of BLA Approval Letter dated 28-05-2021, issued by USFDA indicating that the product is manufactured at M/s F. Hoffmann-La Roche Ltd, Kaiseraugst. Web link of official US FDA website for approval letter verification is given below: https://www.accessdata.fda.gov/scripts/cder/daf/index.cfm
	Details of letter of authorization / sole agency agreement	• Product specific authorization letter from M/s F. Hoffmann-La Roche Ltd., Basel Switzerland in name of M/s Roche Pakistan Limited, Karachi dated 12-04-2022 wherein the applicant has been authorized for marketing & distribution of the product in Pakistan. • Copy of letter indicating relationship between Genentech, Inc. (A member of the Roche Group) and M/s F. Hoffmann-La Roche Ltd., Basel. Switzerland.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No.20209 dated 15th July, 2022
	Details of fee submitted	Deposit Slip no. 752867851401 PKR 75,000: Dated 15-06-2022
	The proposed proprietary name / brand name	Vabysmo
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Faricimab 6mg/0.05ml (120mg/mL) Each single dose vial contains: Faricimab…….6mg

	Dosage form of applied drug	Intravitreal use
	Pharmaco-therapeutic Group of (API)	Ophthalmological, other ocular vascular disorder agent. Humanized anti-VEGF-A and anti-Ang-2 bispecific Antibody VA2
	Reference to Finished product specifications	Innovator's specifications
	Proposed pack size	1's 2mL vial (Each glass vial contains an overfill amount to allow for administration of a single 0.05 mL dose of solution containing 6 mg of VABYSMO)
	Proposed unit price	As per SRO
	Shelf life	24 months
	Storage conditions	2°C - 8°C
	The status in reference regulatory authorities	The product is registered in USFDA
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	Roche Diagnostics GmbH, Nonnenwald 2 , 82377 Penzberg, Germany.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification

		of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 18 months real time stability data at -40°C of 03 batches • 06 month accelerated stability data 5°C of 03 batches
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted that the data from the PPQ batches demonstrate that the FDC drug product manufacturing process consistently yields drug product that meets the predetermined acceptance criteria for all quality attributes and that the in-process tests are suitable to monitor the manufacturing process.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	2 mL, USP/Ph. Eur./JP Type I glass, borosilicate, colorless
	Stability study data of drug product, shelf life and storage conditions	• 24 months real time stability data at 5°C of 03 batches • 06 month accelerated stability data 25°C of 03 batches

Faricimab (RO6867461): Humanized anti-ANG-2 and anti-VEGF-A Bispecific Antibody, Carcinogenicity Assessment Document
	Module-V Clinical	A Phase III, Multicenter, Randomized, Double-Masked, Active Comparator-Controlled Study to Evaluate the Efficacy and Safety of Faricimab (RO6867461) in Patients with Neovascular Age-Related Macular Degeneration (nAMD). Primary CSR - Study GR40844, LUCERNE: A Phase III, Multicenter, Randomized, Double-Masked, Active Comparator-Controlled Study to Evaluate the Efficacy and Safety of Faricimab (RO6867461) in Patients with Neovascular Age-Related Macular Degeneration (nAMD). A Multiple-Center, Multiple-Dose And Regimen, Randomized, Active Comparator Controlled, Double Masked, Parallel Group, 36-Week Study To Investigate The Safety, Tolerability, Pharmacokinetics, And Efficacy Of RO6867461 Administered Intravitreally In Patients With Choroidal Neovascularization Secondary To Age-Related Macular Degeneration. Report No. 1083912. September 2018 A Phase III, Multicenter, Randomized, Double-Masked, Active Comparator-Controlled Study to Evaluate the Efficacy and Safety of Faricimab (RO6867461) in Patients with Diabetic Macular Edema. A Phase III, Multicenter, Randomized, Double-Masked, Active Comparator-Controlled Study to Evaluate the Efficacy and Safety of Faricimab in Patients with Diabetic Macular Edema. A Multiple-Center, Multiple-Dose, Randomized, Active Comparator-Controlled, Double-Masked, Parallel Group, 36-Week Study to Investigate the Safety,Tolerability,

		Pharmacokinetics, and Efficacy of RO6867461 Administered Intravitreally in Patients with Diabetic Macular Edema. A Phase III, Multicenter, Randomized, Double-Masked, Active Comparator-Controlled Study to Evaluate the Efficacy and Safety of Faricimab (RO6867461) in Patients with Diabetic Macular Edema.
Remarks of Evaluator: The firm has not submitted CoPP rather copy of Biologics license application (BLA) Approval Letter dated 28-05-2021, issued by indicating that the product is manufactured at M/s F. Hoffmann-La Roche Ltd, Kaiseraugst which is verifiable below mentioned link. https://www.accessdata.fda.gov/scripts/cder/daf/index.cfm Product specific authorization letter has been issued by M/s F. Hoffmann-La Roche Ltd., Basel Switzerland & the marketing authorization letter (BLA) issued by USFDA is for M/s Genentech, Inc. (A member of the Roche Group), 1 DNA Way, PDRO Building 35, MS 355J, South San Francisco, CA 94080 Unites States of America. For this purpose, that firm has submitted copy of letter indicating relationship between Genentech, Inc. (A member of the Roche Group) and M/s F. Hoffmann-La Roche Ltd., Basel. Switzerland wherein it has been mentioned M/s F. Hoffmann-La Roche Ltd., Basel. Switzerland is the operational headquarter company of the Roche group.		
Decision: Keeping in view the approval of USFDA Biologics license application (BLA), Registration Board approved the product subject to compliance of current Import Policy for finished drugs.		

93. Locally Manufactured Human Biological

The product HEPROX Injection Heparin Sodium 500 IU/ml; 5ml (Bovine Origin & Porcine Origin) along with other 19 products were applied by the firm for local manufacturing registration **on 7th March 2019** in the Pharmaceutical Evaluation Cell (PEC), PE&R division, DRAP on Form 5, when there was no requirement of Form-5F (CTD). However, **at that time the firm did not have Biological Section approval and Section approval was granted on 09-04-2020**. **The Biological Drugs Division received these applications on 15-09-2020 from PE&R Division.**
The guidance was sought from the Chairman Registration Board regarding the requirement of application on Form-5F (CTD) & it was communicated by the PE&R division duly endorsed by the Chairman RB wherein it was stated that registration Board considered such application if taken after its section approval.
The products are as under;

Sr.#	**Brand Name**	**Nature**
93.	EPTIN 2000 IU/ML Injection (Erythropoietin Alpha 2000 IU/ml)	r-DNA
94.	EPTIN 4000 IU/ML Injection (Erythropoietin Alpha 4000 IU/ml)	r-DNA
95.	EPTIN 10000 IU/ML Injection (Erythropoietin Alpha 10000 IU/ml)	r-DNA
96.	INOGEN Injection [Insulin Glargine 100 units/ml (3ml)]	r-DNA
97.	INOROX M Injection [70% Isophane Insulin Human and 30% Soluble Insulin Human 100 units/ml (10ml vial)]	r-DNA
98.	INOROX N Injection [Isophane Insulin Human 100 units/ml (10ml vial)]	r-DNA
99.	INOROX R Injection [Insulin Soluble Human 100 units/ml (10ml vial)]	r-DNA
100.	FILGET 300mcg/ml Injection (Filgrastim)	r-DNA

101.	PEG FILGET 6mg/0.6ml Injection (Pegfilgrastim 6mg/0.6ml)	r-DNA
102.	Ristop Injection (Rituximab 10mg/ml; (10ml vial & 50ml vial)	r-DNA
103.	ASTIN Injection (Bevacizumab 25mg/ml 4ml & 16ml)	r-DNA
104.	BOMIN 20% Injection (Albumin Human 2% (50ml Vial & 100ml Vial)	Non-rDNA
105.	V-NOM Injection (Polyvalent Anti Snake Venem Serum)	Non-rDNA
106.	HPT 10mcg Vaccine (Hepatitis B 10mcg/0.5ml Surface antigen adsorbed onto 0.25 Aluminium Hydroxide)	Non-rDNA
107.	Terox Vaccine (Tetanus Toxoid not less than 40IU Adsorbed Tetanus Vaccine)	Non-rDNA
108.	HPT 20mcg Vaccine (Hepatitis B 20mcg/1ml Surface antigen adsorbed onto 0.25 Aluminium Hydroxide)	Non-rDNA
109.	TYPHO Vaccine (Sammonella typhi 25mcg/0.5ml)	Non-rDNA
110.	GLOMIN 5% Injection (Human Immunoglobulin 5% (10ml Vial & 50ml Vial)	Non-rDNA
111.	HEPROX Injection Heparin Sodium 500 IU/ml; 5ml Bovine Origin	Non-rDNA
112.	HEPROX Injection Heparin Sodium 500 IU/ml; 5ml Porcine Origin	Non-rDNA

The products HEPROX Injection Heparin Sodium 500 IU/ml; 5ml (Bovine Origin & Porcine Origin) along with others non-rDNA product (formulation) are evaluated below as no requirements other than Form-5 is implemented for local manufacturing while the products at sr. no. 113-123 are rDNA in nature and Registration Board in its 297th meeting has approved the guidelines for local manufacturing and the data as per those guidelines are required to be submitted.

	Composition	Each vial contains: Human Immunoglobulin : 5% (10ml vial & 50ml vial)
	Finished product specifications	USP Specification
	Pharmacological Group	Immunoglobulin
	Shelf life	3 Years (store below 25^0C)

Products already registered in Pakistan	Brand name: Gammaraas Registration Holder: M/s Popular International, Karachi
Type of Form	Form-5A
Dy No & Date of application,	Dy. No. 14284 (R&I) Dated 07-March-2019
Fee submitted	Rs. 20,000/- 06-March-2019
Demanded Price / Pack size	As per SRO Pack of 1x10ml vial & 1x100ml vial
General documentation	The firm has approval of following biological sections from Central Licensing Board: Biotech rDNA Vial Section (Formulation, filling and sealing) Biological- Non-rDNA Vial Section (Formulation, filling and sealing) Biological- Vaccines Ampoule filling & Sealing (Ready to Fill Form) Quality Control (Revised)
Remarks of Evaluator	

Decision: Registration Board advised to evaluate all such cases for which the required section is available at the time of evaluation. The Board advised the firm to submit the following data:

For non-rDNA products:

a) Nature of the bulk being imported (Ready-to-fill or Bulk Concentrate).
b) 6 months accelerated and real time stability studies for drug substance from exporting country.
c) Certificate of Analysis (performed by bulk manufacturer) of finished product being manufactured from same bulk.
d) The local manufacturer shall manufacture three trial batches of the finished biological product to finalize the formulation and then perform analytical studies as detailed in Certificate of Analysis or as per Pharmacopoeia monograph in case of Pharmacopoeial products.
e) The local manufacturer shall provide the product development and accelerated and real time stability study data of 3 batches for 6 months of drug product manufactured locally.

For rDNA products:

a) Data in light of guidelines for locally manufactured r-DNA therapeutic proteins approved in 297th meeting of Registration Board.

Miscellaneous/ Deferred Cases:

The following product was deferred in 285th meeting of Registration Board as per following details.

121.	Name of Importer	M/s Sindh Medical Store, Sector 13B/B-10 Block-6 PECHS Karachi.
	DSL details	Copy of DSL No. 0160dated 02-07-2016 valid till 01-07-2018. The firm has submitted the copy of renewal fee challan of Rs. 5000/- dated 27-06-2018
	Name of Manufacturer	M/s Bharat Biotech International Ltd., Genome Valley, Shameerpet Mandal, Medchal District- 500 078, Telangana State, India.

Brand Name	Rotavac
+Dosage Form + Strength	Rotavirus Vaccine (Live, Oral) BP
Composition	Each dose of 0.5mL (5 drops) contains: Vero cell derived Rotavirus 116E Bulk, Live Attenuated……..NLT $10^{5.0}$ FFU
Finished product specifications	BP Specification
Pharmacological Group	Live viral vaccine
Shelf life	60 months at -20^0C
Products already registered in Pakistan	
Type of Form	Form 5-A
Dy No & Date of application, Fee submitted	Dy No. 1254(R&I) Date: 03-03-2016. Rs. 100,000/- dated 02-03-2016
Demanded Price / Pack size	1's Vial (2.5ml)/ Not Provided

The product was deferred in 285th meeting of RB & the Board decided as under;
Registration Board deferred the product for following by the firm:
a. Confirmation of sole agency agreement.
b. Submission of complete data of real time and accelerated stability studies of three (03) batches.

The firm has not provided the required sole agency agreement till date & M/s Vikor entreprise Karachi has applied for registration of the products long with submission of product specific letter of authorization original legalized dated 18-06-2019 from Bharat Biotech International Limited The letter specifies that the manufacturer exclusively authorized M/s Vikor Enterprises (Pvt) Ltd. Karachi to distribute, market , promote their mentioned products along with registration of the product in Pakistan.

Decision: Registration Board rejected the application as firm does not have valid Authorization/ sole agency agreement for the said product.

Deferred case of Nivolunix 40mg Injection applied by M/s Himmel Pharmaceuticals (Pvt) Ltd Lahore.

The following products of M/s Himmel Pharmaceuticals (pvt) Ltd Lahore was deferred in 320th meeting of Registration Board as per following details.

122.	**Name, address of Applicant / Importer**	**M/s Himmel Pharmaceuticals (Pvt.) Ltd, 793-D, Block 'C', Faisal Town, Lahore-54000, Pakistan**
	Details of Drug Sale License of importer	**License No:** 05-352-0065-0016174D **Address:** 793-D, Block 'C', Faisal Town, Lahore-54000, Pakistan **Address of go-down: N/A** **Validity: 06-02-2022** **Status:** License to sell drugs by way of Distributor
	Name and address of marketing authorization holder (abroad)	M/s Beacon Pharmaceuticals Limited **Plant address**: Kathali Bhaluka Mymensingh **Bangladesh.** **Office Address**: 9/B/2 Toyenbee Circular Road Motijheel, Dhaka 1223 Bangladesh

	Name, address of manufacturer(s)	-do-
	Name of exporting country	Bangladesh
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original legalized COPP (DA/6-110/2016/3355) issued on 4-June-2020 **by** Directorate General of Drug Administration Ministry of Health & Family welfare Government of the people's republic of Bangladesh. The CoPP specifies free sale status of the product in country of origin along with its availability. The CoPP also confirms the GMP status of the firm. (Periodicity of routine inspection:2years)
	Details of letter of authorization / sole agency agreement	Firm has submitted product specific letter of authorization dated 02-06-2020 from Beacon Pharmaceuticals limited. The letter specifies that the manufacturer appoints M/s Himmel Pharmaceuticals Pvt. Ltd. to register & sell their products in Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Details of fee submitted	Rs. /- 50000 Dated 19.11.2020
	The proposed proprietary name / brand name	Nivolunix 40 Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each dose contains Nivolumab INN….40mg
	Dosage form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Antineoplastic agents (Anti-cancer), Monoclonal Antibodies
	Reference to Finished product specifications	In house
	Proposed Pack size	Pack Size: 1's
	Proposed unit price	Retail price As per SRO

	Shelf Life	24 months
	Storage Conditions	2 ^{O}C -8^{O}C
	The status in reference regulatory authorities	OPDIVO (NIVOLUMAB 40mg/4mL single dose vial) | BLA #125554 | BRISTOL MYERS SQUIBB in USFDA
	For generic drugs (me-too status)	Not available in Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO. Firm has summarized information related to nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, Characterization (Elucidation of Structure and Other Characteristics), impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Geneway Bio-Technology co., Ltd Address: No. 6 Anmin Road, Huangdai Town, Xiangcheng, Suzhou, Jiangsu China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at 25±2°C for 10 days, at 5 ±3 °C for 6months & ≤-30 °C for 12 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted specification & in-house analytical method along with Analytical method validation studies for the applied product.
	Container closure system of the drug product	Nivolunix 40mg injection is provided in 5mL clear glass vial (USP type-I glass) 20 mm rubber stopper, type -1 and 20 mm Flip off seal with red color top.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 commercial batches. The accelerated stability study data is conducted at 40° C ± 2° C & 75% ± 5% RH for 6 months. The real

		time stability study data is conducted at 2 ^{O}C -8^{O}C for 24 months.
	Module-IV	**Pharmacology studies:** The binding of product to human CD279 (programmed cell death 1, PD-1): • Effects on interaction between PD-1 and PD-1 ligands using the PD-1/CHO cell line and biotin-labeled recombinant human PD-L1- Fc and PD-L2-Fc fusion proteins. • Effect on immunoreactivity (on alloantigen-induced T-cell activation, antigen-specific T cell reactivity using Cynomolgus monkeys) • Activity against malignant tumors in mice with malignant melanoma B16F10 cells. • Secondary pharmacodynamics (antibody-dependent cell-mediated cytotoxicity) • Safety pharmacology (Effects on the central nervous system, Effects on the cardiovascular system, Effects on the respiratory system) **Pharmacokinetic studies:** (Analytical procedures-assay, antibody assay, Single-dose administration, Repeated-dose administration) **Toxicology studies:** Single-dose toxicity using cynomolgus monkeys, Repeated-dose toxicity in cynomolgus monkeys, Extended study of pre- and postnatal development in cynomolgus monkeys, Cross-reactivity studies, Four-week repeated intravenous dose toxicity study with ipilimumab coadministration in cynomolgus monkeys) **Note:** The submitted clinical trial data is from bulk manufacture not from the finish product manufacter.
	Module-V	**Phase I study:** • An open-label study to investigate the pharmacokinetics (PK) in 17 patients with advanced solid tumors resistant to conventional therapies. **Phase II study:** An open-label study to investigate the PK and other endpoints in 35 patients. **Phase III study:** A Phase III trial to compare the efficacy & safety of FX02 and Opidivo (Nivolumab) injection in patients with advance NSCLC who had received prior platinum-based chemotherapy. **Note:** The submitted clinical trial data is from bulk manufacture not from the finish product manufacturer.

Bio-similarity studies:	
WHO Bio-similarity guidelines	**Data submitted by the firm**
Quality Comparison Physicochemical characterization	**Primary Structure:** Amino acid sequence by LC-MS & MS/MS N-terminal sequence by LC-MS. C-terminal lysine by LC-MS. N-glycosylation site by Liquid Chromatography with tandem mass spectrometry (LC-MS-MS) **Secondary Structure & high order Structure** Intact mass by LC-MS Disulfide bond by LC-MS Free thiol (Ellman's) Circular Dichroism (Secondary Structure) by Far spectrogram. Thermostability by differential fluorimetry (DSF) **Heterogenicity** Glycan by LC-MS Heterogenicity of glycosylation by FLD-HPLC Isoelectric point by CIEF Charge variant (CEX-HPLC
Biological Activity	Biological activity by: PD-I binding activity by ELISA
Impurities	Purity by SEC-HPLC Purity by CE-SDS Protein A by ELISA DNA residual by qPCR Host cell protein by ELISA
Stability Studies	Stability studies are provided.
Non-clinical Studies	Primary pharmacodynamics by: Binding to PD-I Inhibitory effect against binding of PD-I to PD-L1 or PD-L2 One month repeated doses toxicity study in monkeys Six months repeated doses toxicity study in monkeys
Clinical Studies	Comparative clinical study has not been submitted.

Registration board in it 320th meeting deferred the case as per following details.

Registration Board deferred the case for submission of following by the firm:

Clarification of label claim (composition).

Comparative clinical trial data with innovator drug.

Regulatory Guidelines of country of origin (Bangladesh) indicating that the registration of above products was granted in exporting country on the basis of non-clinical & clinical trial data of bulk manufacturer of China.

The firm has submitted new legalized CoPP wherein the label claim (composition) was corrected (from "Formulated bulk of Nivolumab INN" to "Nivolumab INN".

The submitted data (non-clinical, clinical etc.) is from bulk manufacture not from the finish product manufacturer for this purpose the firm has submitted guidelines of the country of origin

(Bangladesh) wherein it has been mentioned in Annexure 1 that clinical trial report from bulk manufacturer may also be submitted instead of clinical trial report conducted in Bangladesh.
Decision: Registration Board deferred the case to confirm the relevant guidelines and regulatory (free sale) status of the finished product manufactured by the same bulk in China.

Imported Human Biologicals applied by M/s Punjab Medical Services, Lahore approved in 312th meeting of Registration Board.

Following product of M/s Punjab Medical Services, Lahore was approved in 312th meeting of Registration Board as per following details:

	Details of fee submitted	Rs.100,000/- dated 10-02-2020.
	The proposed proprietary name / brand name	**Pamintu 10mg/ml** **Solution for Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Protamine Sulfate..……10mg
	Dosage form of applied drug	Suspension for Injection
	Pharmacotherapeutic Group of (API)	Antidote
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	1's Vial (5mL)
	Proposed unit price	As per SRO
	Shelf Life	24 months
	Storage Conditions	Below 30^0C
	The status in reference regulatory authorities	Prosulf® 10mg/ml Solution for Injection
	For generic drugs (me-too status)	Protamine Sulphate of CP Pharma.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO Template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	M/s Alps Pharmaceuticals Ind. Co.,Ltd. 10-50, Furukawacho Mukaimachi Nichome, Hida, Gifu, 5009-4241, Japan.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities,

		physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at real time and accelerated conditions. The real time stability data is conducted at 25ºC ± 2ºC, 60% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted that the Assay Analytical Method Validation, Related Compound Method Analytical Method Validation, Bacterial Endotoxin Method Validation and Sterility Method Validation are performed for Pamintu 10 mg/mL Solution for Injection.
	Container closure system of the drug product	• Pamintu 10 mg/mL Solution for Injection as 50 mg/5 mL is placed in 5 mL sterile Type I neutral glass vial and 20 mm bromobutyl rubber stopper and 20 mm flip tear off seal. Vials are presented with instructions for use in a cardboard box.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted real time stability study data of 3 batches at 30°C±2°C %65RH±%5RH for 30 months. The accelerated stability study data is conducted at 40°C±2°C %75RH±%5RH for 6 months for 03 batches.
	Module-IV Non-Clinical	Not Performed
	Module-V Clinical	Not Performed.

Last Decision of RB:

Keeping in view the shortage of product and public health need, Registration Board approved the product as per valid legalized CoPP and current import policy for finished drugs. The firm shall submit following documents before issuance of registration letter and Chairman Registration Board is authorized for issuance:

Periodic Safety Update Report of last 03 years of the product from country of origin.

Certificate of Analysis of 03 consecutive batches from country of origin.

Guidelines of country of origin on the basis of which product was approved.

The Board further decided that the said decision is only applicable to instant case to ensure the availability of product for needy patients and shall not be applicable to any other case.

In light of above decision of the Board, the firm has submitted the following documents:

i. Periodic Benefit Risk Evaluation Report from 28-04-2016 to 28-11-2020 which indicates that 595118 boxes were sold during reporting period and concluded that there is nothing to change the benefit-risk balance in the reporting interval and the benefit-risk profile of the product remains useful in its approved indication.
ii. Certificates of Analysis of 03 batches and clarification regarding consecutive batches.
iii. For guidelines, the firm has submitted that Turkish Health Authority follows European Guidelines as indicated in Turkish Marketing Authorization Regulation dated **19-01-2005**.

However, there is no such information on the marketing authorization certificate of Pamintu 10mg/ml dated **28-04-2016**.

The case was taken in 316th meeting of Registration board & the Board decided as under;

"Registration Board advised DBE&R to write an email to Turkish Medicine Agency to confirm the applicability of clinical trial data for registration of Pamintu 10mg/ml (Protamine Sulfate) in Turkey."

The email was sent accordingly & the following reply has been received through email addressed to Mr Zubair Masood Assistant Director (zubair.masood@dra.gov.pk) which is reproduced as under ;

"*Information about the product you requested from Turkish Medicines and Medical Devices Agency is shared with your side below.*

It has been seen that the product named "Pamintu 10 mg/ml Vial Containing Solution for Injection", which Drug Regulatory Authority of Pakistanrequested information about the marketing authorization process, is ***a generic product.***

Definition of generic medicinal product in Article 4 (i) of the Regulation on the Marketing Authorization of Medicinal Products for Human Use published in the Official Gazette dated 11 December 2021 is as follows:

*"****Generic medicinal product:*** *A medicinal product that has the same qualitative and quantitative composition and the same pharmaceutical form as the reference medicinal product in terms of active substance(s) and whose bioequivalence has been proven by appropriate bioavailability studies (Different salts, esters, ethers, isomers, isomer mixtures of an active substance, its complexes or derivatives are considered the same as the active substance unless their properties differ significantly in terms of safety or efficacy. In such cases, additional information providing proof of the safety and/or efficacy of the various salts, esters or derivatives of an authorised active substance shall be submitted by the applicant. The various immediate-release oral pharmaceutical forms shall be considered to be one and the same pharmaceutical form. The applicant does not need to submit bioavailability studies if he/she fulfils the relevant criteria as detailed in the guidelines for the generic medicinal product."*

Regarding the information and documents required to be submitted in the marketing authorization application in the same regulation the following provision is present,

"Informed consent application, established medical use application, allergen product application, generic medicinal product application, hybrid application, biosimilar medicinal product application, fixed combination application

ARTICLE 9 – (1) Save for the provisions of the Industrial Property Law dated 22/12/2016 and numbered 6769;

a) The applicant shall not be required to provide the results of toxicological and pharmacological tests and clinical trials provided that the he proves one of the following:

4) In the case of a generic medicinal product application to be made in the event that the medicinal product for human use for which the marketing authorisation application has been made, is basically similar to a reference medicinal product that has been authorised in accordance with the current legislative provisions and its data exclusivity period has expired."

In accordance with the Regulation on the Marketing Authorisation of Medicinal Products for Human Use, ***clinical trial results have not been sought in accordance with the European Union in the marketing authorisation application for the product in question.***

There are clinical data in the form of literature in the marketing authorization dossier."

It is clear from the email that the product under discussion Pamintu 10mg/ml (Protamine Sulfate) has been registered as a generic product in the country of origin & clinical trial is not required for generic product as per ARTICLE 9 – (1) as mentioned in the above email.

Decision: Keeping in view position narrated above, Registration Board approved the product as per valid legalized CoPP and current import policy for finished drugs.

125. Imported Human Biological applied by M/s Sanofi Aventis Pakistan Limited, Karachi.

M/s Sanofi Aventis Pakistan Limited, Karachi has applied Quadrivalent Seasonal Influenza vaccine **having strains of Southern Hemisphere for grant of registration for Hajj Tender Purpose only**. The details of the applications are as follows:

Name of Manufacturer	**Name of Product**	**Pack Size**	**Document Details**	**Dy. No. Date of Application**
PLH: M/s Sanofi Pasteur, 14 Espace Henry Vallee 69007 Lyon, France. **Manufacturer:** M/s Sanofi Pasteur, Parc Industriel d'Incarville 27100, Val de Reuil, France	Vaxigrip Tetra Suspension for Injection in pre-filled syringe, quadrivalent influenza Vaccine (split virion, inactivated)-SH strains	1's PFS	Copy of CoPP No. 044853 dated 02-11-2021.	Dy. No. 33078 dated 17-12-2021 Rs. 75000/- dated 03-12-2021

The firm has submitted that WHO recommends strains for Northern Hemisphere in February and for Southern Hemisphere in September. It takes almost 6-8 months to produce and approve the full global supply of influenza vaccines. Shelf life of Flu vaccine is 12 months and NH 2021 strains that were recommended in February 2021 by WHO will not be available because it will be near expiry/ expired or consumed during Hajj season and new NH strains will not be available before Sept-Oct 2021. The firm further submitted the following recommendation of Ministry of Health of Saudi Arabia:
"Travelers arriving for Umrah, Hajj or for seasonal work in Hajj areas are recommended to get vaccinated against seasonal influenza.
Influenza vaccination is particularly important for pregnant women, children under 5 years, the elderly, and individuals with underlying health conditions (such as chronic cardiac, pulmonary, renal, metabolic, neurodevelopmental, liver or hematologic diseases) and individuals with immunosuppressive conditions (such as HIV/AIDS, receiving chemotherapy or steroids, or malignancy).

Therefore, if SH strains vaccine is not secured by us, we will be left without any choice for our pilgrims.

i. The copy of CoPP submitted indicates that the product is not subject to Market Authorization in country of origin as France is in Northern Hemisphere and the said product is for Southern Hemisphere.
ii. WHO recommends strains of seasonal influenza vaccines each year depending upon the circulating strains. Neither Pakistan nor Saudi Arabia is in Southern Hemisphere.

It is pertinent to mention that WHO recommends strains for Northern Hemisphere in February and as per firm's claim, it takes 6-8 months for manufacturing which means that the vaccine will be ready till August-October. Moreover, the shelf life of flu vaccine is 12 months. Hence, the product shall be valid till August-October. The Hajj 2022 is going to be held in start of July, hence, the vaccines of Northern Hemisphere shall not be expired at that time.

The case was taken in 316th meeting of Registration board & the Board decided as under;
Registration Board advised the firm to submit scientific justification of using Southern Hemisphere strains in Pakistan.

Now the firm has submitted that WHO recommended strains for year 2022-23 is same for both Northern Hemisphere **& Southern Hemisphere as reproduced**

- **an A/Victoria/2570/2019 (H1N1)pdm09-like virus;**
- **an A/Darwin/9/2021 (H3N2)-like virus;**

- **a B/Austria/1359417/2021 (B/Victoria lineage)-like virus; and**
- **a B/Phuket/3073/2013 (B/Yamagata lineage)-like virus.**

The firm requested to consider their request and register Vaxigrip Tetra (SH strains) for Hajj tender purpose only**,** so that Flu vaccine can be available for the Pakistani pilgrims going for hajj in upcoming year without any hinderance.

Remarsk of Evaluater: It is submitted the WHO recommended strain for southern hemisphere released in September, 2022 are changed from that of WHO recommended strains for year 2022-23 for Northern Hemisphere. The both are reproduced as under;

WHO recommends that quadrivalent vaccines for use in the 2023 **southern hemisphere influenza** season contain the following:

- an A/Sydney/5/2021 (H1N1)pdm09-like virus;
- an A/Darwin/9/2021 (H3N2)-like virus;
- a B/Austria/1359417/2021 (B/Victoria lineage)-like virus; and
- a B/Phuket/3073/2013 (B/Yamagata lineage)-like virus.

WHO recommended strains for year 2022-23 for **Northern Hemisphere.**

- an A/Victoria/2570/2019 (H1N1)pdm09-like virus;
- an A/Darwin/9/2021 (H3N2)-like virus;
- a B/Austria/1359417/2021 (B/Victoria lineage)-like virus; and
- a B/Phuket/3073/2013 (B/Yamagata lineage)-like virus.

Decision: Registration Board advised to seek comments from CDC NIH regarding the request of the firm.

ADDITIONAL AGENDA 323RD MEETING

129. Products Lumpyvac vaccine and Teylovac vaccine applied by M/s Huzaifa International, Sargodha

The following products of M/s Huzaifa International, Sargodha were approved in various meetings of Registration Board. The details are as under:

Product name and composition	Document Details	Decisions of RB
Lumpyvac (Lumpy Skin Disease vaccine with Diluent) Each 2 ml Dose contains: Attenuated Lumpy skin disease virus (Neethling strain) …. ≥ $10^{3.5}$ $TCID_{50}$	• Original Legalized Free Sale certificate dated 24-02-2022 • Legalized copy of GMP certificate dated 12-02-2019	**Decision of 316th meeting:** Keeping in view legalized GMP certificate and Legalized Free Sale Certificate indicating product availability in country of origin; Registration Board approved the product with "As per Innovator Specifications" subject to compliance of current Import Policy for finished drugs.
TEYLOVAC Vaccine Live attenuated Freeze dried Theileria Annulata cells based vaccine with diluent Each dose of vaccine contains Theileria annulata…...…….≥ $1x10^7$ cells	Legalized Certificate of Pharmaceutical Product (CoPP) NoB028634. issued by Ministry of Agriculture and Forestry, Turkey, dated.01-10-2019 valid till. 10-11-2024.	**Decision of 313th meeting** Registration Board approved the product namely TEYLOVAC Vaccine as product is highly needed for veterinary use in Pakistan.

The firm M/s Huzaifa International, Sargodha has already been granted registration of Lumpyvac Vaccine having Registration No.111128 vide letter No. F.1-5/2022-AD(BD)(M316) dated 25th March 2022, however as per decision of Policy Board in its 41st meeting, the inspection exemption of manufacturer abroad i.e., M/s Vetal Animal Health Products, Turkey was granted for six months to M/s Huzaifa International, Sargodha. The six months' time period has been completed, hence the virtual inspection was conducted.

The virtual inspection of manufacturing facility abroad namely M/s Vetal Hayvan Sagligi Urunleri A.S. Turkey was conducted on 3rd – 4th November, 2022 by the panel of inspectors vide DRAP's letter No. F.8-1/2022-(I&V-I) dated 24th October, 2022. The conclusion and recommendations are as under:

Conclusion

Keeping in view the proceedings of virtual inspection conducted by the panel of inspectors, it was observed that *due to inadequate communication/ weak tools such as internet connectivity, inappropriate cameras, as mostly mobile cameras were used. Proper inspection cameras, borescopes, fiberscopes (communicated vide DRAP letter No.F.3-2/2005-Reg-I(Vol-II) dated 27th September, 2022) were not utilized, hence on this remote virtual inspection the basic system such as manufacturing facility/ Q.C etc were seen but actual manufacturing proceeding Q.C testing, HVAC system functioning etc could not be verified.*
Moreover, it was also observed that Mr. Asim Rauf, the then Additional Director (E&M) Lahore, DRAP and Mr. Abdullah, Additional Director (PE&R), DRAP (co-opted member) had visited the same unit from 24th to 26th September, 2018 when it was newly built, while on official inspection of another unit of M/s Vetal Animal Health Products in Turkey.
It was highlighted in that inspection report that the newly built unit was a state of the art facility in which trial batches were being manufactured and QC testing of vaccines were performed.

Recommendations:

Based on the proceedings of virtual inspection, documents reviewed and videos of the unit seen, the panel has reached to the conclusion that the firm has basic systems to manufacture veterinary vaccines and appeared to comply the GMP requirements. *Hence, the panel recommends that the Registration Board may grant the registration of applied products namely Teylovac and Lumpyvac vaccines to M/s Huzaifa International, Sargodha for six months. However, the panel strongly recommends on-site inspection in order to verify/ ascertain the Good Manufacturing Practices (GMP) of the firm within six months' time period.*

a. As per inspection report, the filling area of both Lumpyvac and Teylovac vaccine was same, as Teylovac is a live protozoal vaccine while Lumpyvac is a live viral vaccine. The firm informed that cleaning validation procedures are performed for same filling line.
The same was discussed and it was decided to send emails to EMA, FAO and USDA dated 29-11-2022 regarding manufacturing requirements of live viral and live protozoal vaccines to be manufactured for animals in the same filling line. Accordingly, emails were sent to relevant authorities and the responses received did not address the query so far, therefore the case may be submitted for further directions if any.
b. As per recommendation of the panel, the Registration of the products namely Teylovac and Lumpyvac vaccines may be granted for six months only (the details are given above).

Decision: Registration Board after thorough deliberation decided to defer the case of Teylovac Vaccine and advised to seek following clarifications:

- **Manufacturing requirements of live protozoal and live viral vaccines in the same filling line as outlined in the inspection report of the firm and also send emails to Turkish veterinary authority i.e., Directorate-General for Animal Health and Veterinary Medicines and OIE –World Organization for Animal Health.**
- **Legal Affair Divion regarding issuance of registration letter for 6 months' time till onsite inspection by the panel.**

130. Product Hepalid (Heparin Sodium) applied by M/s Lab Diagnostic Pvt. Ltd. Rawalpindi approved in 321st meeting of RB

The following product of M/s Lab Diagnostic Pvt. Ltd. Rawalpindi was approved in 321st meeting of Registration board subject to submission of the data/documents by the firm as per detail mentioned below:

Brand Name / Composition	**Shelf life**	**Decision of 321st meeting of RB**

Hepalid 5000IU/ 5ml Injection Each 5ml contains: Heparin sodium: 5000 USP units	36 months Store at 30°C± 2°C	Keeping in view the approval of USFDA (Reference Regulatory Authority), Registration Board approved the product subject to compliance of current Import Policy for finished drugs & submission of valid legalized CoPP issued by USFDA. The firm shall submit the real time stability data before issuance of Registration letter & shelf life will be granted as per the submitted real time stability study data. The Chairman Registration Board is authorized for issuance of letter after submission of said document & data.

The firm submitted 24 months' real time stability study of applied product Hepalid 5ml vial(25000 IU). Previously, the firm submitted stability data of one year & it was decided that one-year shelf life may be issued on the basis of their already submitted data for the product (5mL vial). Now the case is placed before the Board with updated stability data which is of 24 months.

Decision: Keeping in view the submitted stability data of 24 months, Registration Board approved the shelf life of 24 months for applied product Hepalid 25000IU/5ml vial.

131. Application for the grant of Additional Pack of 1000ml of Locally Manufactured Veterinary Vaccine diluent namely VAXI-DROP by M/s Grand pharma (Pvt). Ltd, Rawat.

Following product of M/s Grand Pharma Pvt Ltd, Lahore was deferred in various meetings of Registration Board in 313th, 316th, 320th meeting of RB as per following details;

Name and address of product manufacturer (Applicant)	**M/s Grand Pharma Pvt Ltd** Plot # 5-A, Street No.N-5, RCCI Estate, Rawat, Islamabad
Brand Name +Dosage Form + Strength	Vaxi-drop 1000ml
Type of Form, Diary No. Date of R& I & fee	Form-5 Dy. No.20999 Date:21-8-2020 Rs. 20,000/- Date: 19-8-2020
Composition	Each ml contains: Monobasic Potassium Phosphate : 0.37 mg Disodium Phosphate Dihydrate : 0.72 mg Sodium Chloride : 7.65mg
Pharmacological Group	Diluent for live Avian vaccines
Finished Product Specification	Manufacturer' Spec
Shelf Life	2 Years (15^0C -25^0C)
Document Details	All the undertaking has been submitted by the firm. Copy of DML Copy of inspection report for GMP for viral vaccines section (killed) & Bacterial killed vaccine section.
Pack size & Demanded Price	0.30ml per bird **Decontrolled**
Products already registered in Pakistan	*MS Bac* (M/s Hi-Tech Pharma, Lahore)
Remarks of Evaluator	

Previous Decisions:
Decision of 313th Meeting:

Deferred for submission of method of administration of vaccine and container closer system of diluent.

Decision of 316th Meeting:

Deferred for confirmation of manufacturing facility for the diluents

Decision of 320th Meeting:

Deferred for confirmation of international practices regarding the manufacturing sections requirement for manufacturing of vaccine diluents

In response, the firm has submitted following:

a. The vaccines diluents are sterile water preparations used for diluting & dispensing live vaccines of poultry and livestock which are presented in lyophilized form in a vial of 12-5ml capacity, containing 1000-5000 doses of a live vaccine. The vaccines for livestock and poultry are available in multiple doses format, therefore, to dispense these live vaccines a sterile water-based Diluent preparation is required. These diluents are available in separate packing and already a number of imported and local products have been registered 36ml (1000 doses) for eye-drop usage or 25ml and 50ml (25-50 doses) for sub/ cut injection or 200ml (1000 doses) for sub/ cut injection.
b. The container closure system comprises of an autoclavable polypropylene bottle having rubber caps with aluminum seals.
c. The required equipment for producing and filling/ packing of proposed 1000ml pack size is already available in the production facility of Grand Pharma.
d. The following vaccine diluents are already registered with DRAP:

Vaccine Type	Presentation of Approved Diluents	Administration Route	Doses per vaccine vial	Company
NDV/ IBD/ IBV Live	36ml	Eye Drop/ Spray Drinking water	1000	- Lead pharma (local) - MSD - Elanco
NDV/ IBDV/ IBV live	Bulk RO water	Drinking water	-	Normal Field practice
MD/ CAV Live	200ml	Sub-Cut	1000	- MSD - CEVA
LSD Live	50ml	Sub-Cut	25 & 50	- MSD - Arriah

e. Regarding international practices for the production of diluents, the firm submitted that as per literature, diluents are produced in injectable facilities of a Pharma or Biologics production unit.

Based on the above, it is pointed out that although all types of queries from DRAP in this case have been responded accordingly, however, it has taken more than 2 years to reach to any decision in this case. Such delays are badly affecting our production plans for this product. It is therefore requested that all the queries raised during its evaluation by the Drug Registration Boards, so approval may please be granted at the earliest for production of VAXI-Drop (1000 ml pack size) at Grand Pharma (Pvt) Ltd., Rawat Islamabad, accordingly.

Decision: Registration Board deferred the case and advised BE&R Division to compile data of all such registrations granted to M/s Grand Pharma and place before Registration Board for its consideration.

Item No. III: Division of Quality Assurance & Laboratory Testing

S. NO.	CASE TITLE
AGENDA ITEM NO. 01 - ROUTINE CASES	
1.	MANUFACTURE & SALE OF SUB-STANDARD PROTONIX 40MG TABLETS, BATCH NO. 052 & 069 BY M/S WILSHIRE LABORATORIES (PVT.) LTD., LAHORE.

Case No. I: MANUFACTURE & SALE OF SUB-STANDARD PROTONIX 40MG TABLETS, BATCH NO. 052 & 069 BY M/S WILSHIRE LABORATORIES (PVT.) LTD., LAHORE.

Detail of samples:

Name:	Protonix 40mg Tablet	Protonix 40mg Tablet
Composition:	Each tablet contain 40mg Pantoprazole	Each tablet contain 40mg Pantoprazole
Registration No:	030041	030041
Batch No:	**052**	**069**
Manufacturing Date:	09-17	Jan. 2020
Expiry Date:	08-20	Jan. 2023
Manufactured By:	M/s Wilshire Laboratories (Pvt.) Ltd, Lahore	M/s Wilshire Laboratories (Pvt.) Ltd, Lahore

Summary of the case:

Date	Action
25-04-18	FID-VI, DRAP Karachi visited the premises of M/s Marhaba Medicos, Shop No. 51, Bismillah Market, near New Sabzi Mandi Super Highway, Karachi and took sample of Protonix 40mg Tablets, Batch No.052 on form-3
26-04-2018	The FID-VI, Karachi has forwarded one sealed portion of sample to CDL, Karachi
20-06-2018	The Federal Government Analyst, CDL, Karachi declared the sample as of Sub-standard quality **on the basis of dissolution** vide test/analysis report R.KQ.310/2018. Details of report are: ***Description:*** *Yellow colored, circular shaped enteric coated tablets.* ***Identification:*** *Pantoprazole Sodium identified.* ***Dissolution test:*** ***Does not comply.*** ***Uniformity of dosage unit By Weight Variation:*** *Complies.* ***Assay for Pantoprazole Sodium:*** *Determined amount/tablet: 38.2609mg* *Stated amount/tablet: 40mg* *Percentage: 95.7%* *Limits: 90.0% to 110.0% Complies.* ***Remarks:*** *The sample is of **"Substandard"** quality under the Drugs Act, 1976.*
26-06-2018	The area FID-VI, Karachi served an explanation letter to M/s Wilshire Laboratories (Pvt.) Ltd, Lahore.
06-07-2018	M/s Wilshire Laboratories (Pvt.) Ltd, Lahore submitted their reply vide letter wherein *they have stated that*

	"They received the sealed portion of their product Protonix 40mg Tablets (Samples quantity of 30 tablets) while Batch No/Mfg Date/Exp Date was not visible on sample pack. We also receive the sample after 41 days after picking the sample which is violation of Section 19 (3) of the Drugs Act 1976. As guidelines of the Drugs Act 1976 were not followed which is illegal and the said procedure is null and void in the eyes of law. The sample dispatched to us remained in transit during very hot months of May and June while no temperature and humidity conditions were maintained. Storage conditions are not mentioned on the report where the sample was stored after receipt and we fail to understand as the sample remained untested for 54 days. We had provided reference standard to CDL but we are not sure whether our provided reference standard was used for testing or CDL arranged reference standard from some other source because USP 40 method was used. So, USP reference standard must have been used. Please provide a copy of reference standard of Pantoprazole USP. As per USP method of testing, 68 tablets are required while the sample sent to CDL, Karachi contain 30 tablets so how the required tests can be performed with provided sample."
06-03-2019	Show cause notice has been issued to the technical staff/management of the firm vide letter no. 03-49/2018-(QC).
13-03-2019	The firm submitted their reply with reference number WL/OC/S-267
16-05-2019	**They have been appeared in 289th Meeting of Registration Board and** re-iterated points already submitted in showcause reply and the firm requested for retesting of drug product. **Decision:** *Registration Board after hearing the accused deliberated the matter in depth in the light of available record/ investigation report of FID decided that the Board's portion of the sample shall be retested from appellate laboratory, NIH, Islamabad.*
17-07-2019	The subject cited sample was received in Appellate laboratory, NIH, Islamabad as per decision of the Registration Board in its 289th meeting.
16-09-2019	National Institute of Health, Islamabad also declared the sample of Protonix 40mg Tablets, Batch No. 052 by M/s Wilshire Laboratories (Pvt.) Ltd Lahore as of "**Sub-standard"** quality vide their test report No. 017-M/2019 **on the basis Dissolution test**. Results are reproduced as under: **Description:** Light yellow, circular, biconvex enteric coated tablets plain on both sides packed in blister packing further contained in an outer carton. **Identification:** Pantoprazole sodium identified. **Wt. Variation:** Complies with USP 39 **Dissolution test:** **Determined.** **Limit:** **Acid stage** 12.7% of label amount Not more than 10% (Q) of the label amount. **Buffer stage** 36.32% of the label amount Not more than 75% (Q) of the label amount.

	(Does not comply with USP 39) **Assay:** **Stated:** **Found:** **Limit:** **Percentage:** Pentoprazole sodium 40mg/tablet 41.40mg/tablet 90-110% 103.51% Sesquihydrate **(Complies with USP 39)** In the opinion of the undersigned the sample is of sub-standard quality as defined in the Drug Act, 1976 for the reason(s) given below. **Dissolution test:** **Determined.** **Limit:** **Acid stage** 12.7% of label amount Not more than 10% (Q) of the label amount. **Buffer stage** 36.32% of the label amount Not more than 75% (Q) of the label amount. **(Does not comply with USP 39)**
14-02-2019	The Appellate Laboratory, NIH, Islamabad declared the said sample as Misbranded and Substandard quality (on the basis of dissolution) vide test report No.04-M/2019.
12-11-2019	Show cause notice has been served to the technical staff/management of the firm – responsible persons U/S 7(11) of the Drugs Act, 1976 vide letter no. 03-49/2018-(QC).
18-11-2019	M/s Wilshire Laboratories (Pvt.) Ltd., Lahore vide reference No.WL/OC/S-344 submitted their reply and is reproduced as under: • *Our DRAP registration letter for Protonix 40mg tablet is with MS Specification" and same was mentioned on all packing materials of Protonix 40mg tablets, B# 052. We have provided method of testing with "**Manufacturer Specification**" to NIH but we are surprised to learn that our product has been tested on USP-39.* • *In USP monograph of pantoprazole sodium delayed release tablets, label cliaim is pantoprazol ($C_{16}H_{15}F_2N_3O_4S$) and identification test is derived on the basis of retention time of peaks from assay, while in both CDL and NIH reports the identification test claim is pantoprazole sodium which is violation of USP claim.* • *In CDL report assay test result is 95.7% while in NIH report assay test result is 103.51% which deviate more than 5% of ICH stability limit.* • *In dissolution test, Test1 is not mentioned in NIH report.* • *Acid stage failure is not mentioned in CDL report while the NIH declared the product fail on both stages.* • *In calculation formula applied on both stages is not precisely mentioned for given six batches as reading deviates from individual reports as well average results.* • *In tolerance of dissolution acid stage Pantoprazole Sodium is written which further entitles that there is calculation errors in this report.* • *As per our continuous improvement policy, we have already worked regarding dissolution of our product. We have complete product development and stability data available with us and can be provided in personal hearing.*

	In light of the above mentioned submissions, it is respectfully and humbly prayed that the report by CDL and NIH be held to be based upon misreading and non reading of evidence and consequently a nullity in the eyes of the law; Furthermore, the show cause notice dated 12-11-2019 be held to be not based upon the law and facts and be withdrawn/dismissed; *You are most humbly requested to provide us with a right of hearing; any other relief as deemed just, appropriate and equitable by the learned Board may also most graciously be granted.*
08-01-2019	They appeared before the Board in 293rd meeting of Registration Board and stated that they still have concerns on the analytical method of NIH, Islamabad. Furthermore, they have made necessary improvements and shifted their product from manufacturer's specifications to Pharmacopoeal specifications. They further requested to analyze their product from individual laboratory. **Decision of 293rd meeting of Registration Board.** The case was presented before the Registration Board in its 293rd meeting held on 08th January, 2019 and the Board after detailed discussion and deliberations considering the test reports of CDL & NIH, Islamabad unanimously decided as under: **i.** Suspension of the Registration of the said product for six (06) months or till the verification of root cause analysis and satisfactory report by the panel whichever is later. **ii.** Corrective and preventive action (CAPA) by the firm and product development data. **iii.** Product Specific Inspection including verification of product development data and confirmation of CAPA by the following panel: ➢ Mr. Iftikhar Ahmad Member Registration Board. ➢ Area Federal Inspector of Drugs. ➢ Hafiz Ahsan AD, PEC.
21-04-2020	Decision was communicated.
15-03-2021	**PSI Report** In compliance to the decision of 293rd Meeting of Registration Board, FID, DRAP, Lahore has submitted the PSI report of M/s. Wilshire Labs (Pvt.) Ltd., K}Lahore. The inspection was conducted for verification of root cause analysis, corrective and preventive action (CAPA) and product development data of their product Protonix 40mg Tablet containing Pantoprazole sodium sesquihydrate. ***Conclusion:*** *Based on the inspection proceedings, such as verification of documents, interaction with management e.t.c the panel concludes that the company has not given root cause analysis and rectified their dissolution problem through product development process. The firm only shifted their testing method from Mfg spec to UPS. However, the management made commitment and also agreed to make necessary improvements in procedures.* ***Recommendation:*** *Keeping in view the above observations the panel could not verify the product development process and root cause analysis conducted by the firm at this stage. However, the final*

	conclusion would be based upon the test report results received from the Central Drugs Laboratory, Karachi. *Hence the panel recommend that the decision of the Drug Registration Board for suspension of registration of Protonix 40mg Tablets may remain intact.*
26-06-2019	PSI report was presented in 308th meeting of Registration Board. **Decision of 308th Meeting of Registration Board** The Board after thorough deliberations, considering the facts of the case, report submitted by the FID, DRAP, Lahore decided as i. The suspension of registration of Protonix 40mg Tablet remain intact. ii. 08-09-2021	The decision has been communicated to the firm.
14-09-2021	M/s. Wilshire Labs (Pvt.) Ltd., Lahore vide Ref # WL/OC/S-597 submitted that they used Dissolution Test 2 for testing of our product. They also requested for personal hearing.
16-11-2021 to 18-11-2021	**Proceedings and Decision of 313th Meeting of Registration Board.** The Board after thorough deliberations, considering the facts of the case, decided to issue show cause notice for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s. Wilshire Labs (Pvt.) Ltd., Lahore and called them for personal hearing before Registration Board**.**
15-03-2022 to 16-03-2022	**Proceedings and Decision of 316th Meeting of Registration Board:** **a)** Mr. Faisal Javed (Plant Head) and Mr. Muhammad Omer (Quality Control Manager) of M/s. Wilshire Labs (Pvt.) Ltd., Lahore appeared before the Board and endorsed/re-iterated their already submitted stance. **b)** The Board after considering the facts of the case and after thorough deliberations decided as follows: i) The sample of Protonix 40mg Batch No. 069 shall be sent for Appellate testing as per USP specification (Dissolution Test-Type 2) ii) Firm shall develop product as per guidelines approved in 293rd meeting and will share data with QA Division. iii) Registration of product 'Protonix 40mg Tablet' (Reg# 030041) shall remain suspended till compliance of both above points.
27-07-2022	The decision of the Board has been communicated to firm and the Board's portion submitted in NIH as per decision.
13-10-2022	Test report of the sample has been received from NIH where in it is concluded as: *"The sample is of Sub-standard quality on the basis of test performed."*

Decision:

The board after detailed deliberation decided to issue ***Show Cause notice to M/s. Wilshire Labs (Pvt.) Ltd., Lahore on manufacturing and sale of substandard Protonix 40mg Tablets, Batch No. 052 & 069 and provide personal hearing under Section 42 of the Drugs Act, 1976 and rules framed thereunder.***

Meeting ended with vote of thanks to and from the chair.
