1572	**Name and address of manufacturer / Applicant**	**M/s Sapient Pharma 123/S, Quaid e Azam Industrial Estate, Kot Lakhpat, Lahore**
	Brand Name +Dosage Form + Strength	Saprofen 200mg/5ml
	Composition	Each 5ml Contains: Ibuprofen …… 200mg
	Diary No. Date of R& I & fee	Dy. No. 12224 dated 06.03.2019 Rs. 20,000/- dated 04.03.2019
	Pharmacological Group	Non-selective COX inhibitors
	Type of Form	Form 5
	Finished Product Specification	Not submitted. Available in USP and BP
	Pack size & Demanded Price	90ml, 450ml; As per SRO
	Approval status of product in Reference Regulatory Authorities.	Ibuprofen 100mg/5ml Suspension, MHRA approved.
	Me-too status	Tercica 100mg/5ml Suspension, Sami, Karachi, Reg. No. 061206
	GMP status	Copy of GMP certificate No. 80/2020-DRAP (AD-199285-703) dated 22-04-2020 issued on the basis of inspection conducted on 18-11-2019 is submitted.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated. • Firm has submitted signed form 5 along with all the enclosures of form 5. • In initially submitted dossier firm has claimed each 5ml contains 200mg of Ibuprofen. However, in newly submitted enclosures of Form 5 they revised their label claim to each 5ml contains 100mg of Ibuprofen. • They have claimed BP specs.
	Decision of 321st meeting: Deferred for clarification of the label claim for the applied formulation.	
	Firm's reply: Firm has submitted fee of Rs. 7,500/-vide deposit slip# 514007007664 alongwith Form 5 with following composition: "Saprofen 100mg/5ml Each 5ml Contains: Ibuprofen …… 100mg"	
	Decision: Approved with USP specifications per following specifications as per following label claim: **"Saprofen 100mg/5ml** **Each 5ml Contains:** **Ibuprofen …… 100mg"** **The firm shall submit differential fee of Rs. 22,500/- for correction/pre-approval change in product composition as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.**	
1573	**Name and address of manufacturer / Applicant**	**M/s Sapient Pharma 123/S, Quaid e Azam Industrial Estate, Kot Lakhpat, Lahore**

	Brand Name +Dosage Form + Strength	Lsprd 50mg Tablet
	Composition	Each Tablet Contains: Levosulpiride ……..…50mg
	Diary No. Date of R& I & fee	Dy. No. 12208 dated 06.03.2019 Rs. 20,000/- dated 04.03.2019
	Pharmacological Group	Benzamides
	Type of Form	Form 5
	Finished Product Specification	Innovators specifications
	Pack size & Demanded Price	1x10's, 3x10's, 6x10's, 10x10's; As per SRO
	Approval status of product in Reference Regulatory Authorities.	LEVOPRAID® 50 mg Tablets by TEOFARMA Srl. Approved by AIFA
	Me-too status	Sulvo Tablets 50mg. Reg. No. 31748
	GMP status	Copy of GMP certificate No. 80/2020-DRAP (AD-199285-703) dated 22-04-2020 issued on the basis of inspection conducted on 18-11-2019 is submitted.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Submitted form 5 and its enclosures are for Itopride HCl instead of Levosulpiride.
	Decision of 321st meeting: Deferred for clarification of the label claim for the applied formulation.	
	Firm's reply: Firm has submitted fee of Rs. 7,500/-vide deposit slip# 040083095964 alongwith Form 5 and its enclosures.	
	Decision: Approved. The firm shall submit differential fee of Rs. 22,500/- for correction/pre-approval change in composition as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.	
1574	**Name and address of manufacturer / Applicant**	**M/s Sapient Pharma 123/S, Quaid e Azam Industrial Estate, Kot Lakhpat, Lahore**
	Brand Name +Dosage Form + Strength	Sinita 2mg/ml syrup
	Composition	Each ml Contains: Cinitapride Hydrogen Tartrate……..…2mg
	Diary No. Date of R& I & fee	Dy. No. 12226 dated 06.03.2019 Rs. 20,000/- dated 04.03.2019
	Pharmacological Group	Propulsives
	Type of Form	Form 5
	Finished Product Specification	Not submitted. Available in USP and BP
	Pack size & Demanded Price	90ml, 450ml; As per SRO
	Approval status of product in Reference Regulatory Authorities.	Cidine 1 mg/5 ml Oral solution, CIMA approved.
	Me-too status	Gutt oral solution. Reg. No. 75278
	GMP status	Copy of GMP certificate No. 80/2020-DRAP (AD-199285-703) dated 22-04-2020 issued on the basis of inspection conducted on 18-11-2019 is submitted.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• The pharmacological group has not been provided. Mention it as Propulsives. • Revise Each ml Contains: Cinitapride Hydrogen Tartrate…2mg to Each 5ml Contains: Cinitapride as Hydrogen Tar trate…1mg, and fill serial No. 04 of the enclosure accordingly. • You have provided the pack size as 1x14's tablet. Jsutify/revise. • Submit all the requirements /documents as per enclosure of Form 5 along with submission of applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.
	Decision of 321st meeting: Deferred for the following; • Pharmacological group for the applied formulation.	

	• Revision of label claim as per reference product along with submission of full fee. • Revision of pack size from tablet to syrup formulation. • Submission of all the requirements /documents as per enclosure of Form 5..
	Firm's reply: Firm has submitted fee of Rs. 7,500/-vide deposit slip# 2806662406 alongwith Form 5 and its enclosures for following revised composition: Sinita 1mg/5ml syrup Each 5ml Contains: Cinitapride as Hydrogen Tartrate ……1mg
	Decision: Approved as per following label claim: **Sinita 1mg/5ml syrup** **Each 5ml Contains:** **Cinitapride as Hydrogen Tartrate ……1mg** **The firm shall submit differential fee of Rs. 22,500/- for correction/pre-approval change in product composition as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.**

Case no. 07 Priority registration of Isoflurane Inhalational Solution

DRAP in its 143rd meeting of Authority held on 05th August, 2022, keeping in view of essentiality, criticality of isoflurane and pursuance from Government of Punjab to ensure its availability in Pakistan decided that registration application of Isoflurane shall be considered "out of queue" by the Registration Board.
PHARMA LIMITED. Sy. Nos. 7-70, 70/1 & 70/2, Digwal (D), Kohir (M), SANGAREDDY (D), Telangana State, India.
Available applications of Isoflurane 100ml & 250ml liquid for inhalation, are presented below:

	The proposed proprietary name / brand name	**Aerrane 250ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 250 contains: Isoflurane ……. 100%v/v
	Pharmaceutical form of applied drug	Liquid for Inhalation
	Pharmacotherapeutic Group of (API)	General Anaesthetic
	Reference to Finished product specifications	USP
	Proposed Pack size	250ml
	Proposed unit price	Will be provided at the time of pricing.
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	Forane of M/s Getz Pharma.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Baxter Healthcare Corporation. Route 3-Km144.2, Guayama, Puerto, Rico 00783 (USA)
	Module-III Drug Substance:	Firm has submitted detailed drug substance data f related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has referred to the stress studies under following conditions: • Strong base • Various metals • UV radiation • Prolonged heating. Firm has submitted conclusion on basis of above conditions that isoflurane is a very stable substance under variety of conditions. Further firm has submitted that stability data for substance is not applicable as its 99.9% Active substance and there is no excipient in it.
	Module-III Drug Product:	Firm has submitted data of drug product, including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence Studies	Not applicable since applied formulation is Innovator product.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Amber colored, round, Type III glass bottles with a polypropylene cap with a poly-sealer liner.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The Long term stability study data is conducted at 30°C ±2°C / AH for 60 months. Firm has stated that since the container closure system is impermeable, humidity is not a factor during stability studies, long term and under accelerated conditions.
	Claimed shelf life	60 months.

		Firm has stated that since the container closure system is impermeable, humidity is not a factor during stability studies, long term and under accelerated conditions.
	Claimed shelf life	60 months.
	Remarks of Evaluator: Firm has submitted that process validation is not applicable since the manufacturing process for the drug product consists only of packaging the drug substance.	
	Decision: Registration Board approved the applications for Aerrane 250ml Aerrane 100ml as per policy for inspections of manufacturer abroad. Firm shall submit process validation report before issuance of registration letter.	

Case No. 01 Registration applications of New License

a. New Cases

Case No. 01: M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi

M/s Biogen Life Sciences, Rawalpindi has been granted new license (DML No. 000911) by way of formulation by Licensing division DRAP dated 13-02-2020. Now the firm has submitted following applications as per the details mentioned in the table below:

Name of Section	Considered till 317th RB meeting		Freshly applied	
	No of molecules	No of products	No of molecules	No of products
Dry Vial section (Cephalosporin)	03	12	-	-
Dry suspension section (Cephalosporin)	01	02	01	02
Capsule section (Cephalosporin)	02	02	01	01
Ampoule Section SVP (General)	05	07	-	-
Capsule section (General)	03	05	-	-
Dry Vial section (General)	03	04	-	-
Soft gel capsule general section	02	03	-	-
Hydrocortisone injection (steroid)	01	03	-	-
Sachet section (General)	01	01	-	-
Dry Vial section (Carbapenem)	02	03	-	-
Cream section (general)	02	02	-	-
Ointment section (General)	01	01	-	-
Lotion section (General)	01	01	-	-
Infusion Section (General)	02	02	-	-
Tablet (General) Section	01	01	01	01

Capsule section (Cephalosporin): 01 Molecule / 01 Product		
1577.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Capsule section (Cephalosporin).

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20727: 22-07-2022
	Details of fee submitted	PKR 30,000/-: 15-07-2022
	The proposed proprietary name / brand name	**CEFIBIO 200mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule Contains: Cefixime as trihydrate……200mg
	Pharmaceutical form of applied drug	White to off white powder contained in white hard gelatin capsule
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	JP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixima Normon 200 Mg Hard Capsules EFG **(Spain** Approved)
	For generic drugs (me-too status)	Cefim Capsule by Hilton
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols,

		control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cefim 200mg Capsule of Hilton Pharma. Firm has submitted results of CDP for their product against Cefim 200mg Capsule of Hilton Pharma. Firm has tested CDP in three dissolution medium and the results of f2 factor are within the acceptable limit.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.		
API Lot No.	00244/135/2021		
Description of Pack (Container closure system)	Alu-alu blister		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T2001C	T2002C	T2003C
Batch Size	1000 capsule	1000 capsule	1000 capsule
Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	08-10-2021	08-10-2021	08-10-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 30-06-2021 specifying purchase of 25Kg Cefixime (compacted).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Our HPLC system is 21 CFR compliant

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.	Firm has submitted copy of specifications of the drug substance from API manufacturer as well as Biogen Life Sciences.
2.	Provide verification studies of drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the drug substance from Biogen Life Sciences.
3.	Justification is required since the applied product is developed according to Japanese Pharmacopoeial monograph which is for 100mg and 50mg capsule. Moreover, Drug Regulatory Authority of Pakistan has published the monograph for 400mg and 200mg Cefixime as Trihydrate capsule vide notification No.F.14-1/2022-PEC dated 14th March, 2022.	Firm has submitted that they have revised the product specifications in March 2022 after the notification of new monograph by DRAP and have performed 6th month stability testing using the revised monograph.

Decision: Approved with Manufacturer's specifications as approved by Registration Board in its 313th meeting and notified vide letter No. F.14-I/2022-PEC dated 14th March 2022.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 along woth performance of CDP & Pharmaceutical equivalence studies against the innovator drug product.**

	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information

		related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Velosef suspension.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Date of Initiation	10-06-2020	10-06-2020	10-06-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 07-04-2020 specifying purchase of 10Kg Cephradine (Micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm was issued letter of shortcoming dated 14-06-2021 with following observations.

- The method of analysis of the drug substance of Pharmagen Limited submitted in section 3.2.S.4.2 is different from BP as well as USP monograph. Justification is required in this regard.
- Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.
- Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "*Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"* Further specify how the testing of drug substance was carried out without performing verification studies.
- Submit COA of relevant batch of drug substance used in product development and stability studies from both drug substance as well as drug product manufacturer in section 3.2.S.4.4.
- Justify how the batch No 00203/163/2020 was tested by Biogen Pharma and declared pass without testing the cephalexin contents.
- The drug substance manufacturer specify BP specs for the drug substance, justify how Biogen pharma can declare the same product as complying with USP specs.
- Justify the submission of reference standard or material in section 3.2.S.5 in which USP reference standard is used against a drug substance which complies BP specifications.
- Submit COA of cephalexin reference standard which is also required in the analysis of drug substance.
- Justify the selection of excipients in the master formulation, since your qualitative composition is different from that of reference product.
- Justify why drug-excipient compatibility studies is not performed while the formulation is qualitatively different from that of reference product.
- Justify your master formulation without any buffer, while the reference product as well as USP monograph specifies that the suspension contains a suitable buffer.
- Justify why comparative dissolution studies of the product is not conducted against the reference product.
- Specify the details regarding Batch number, manufacturing date and expiry date of the product against which pharmaceutical equivalence was performed.

- Provide preservative effectiveness studies for your formulation since it contains a preservative in the formulation.
- Justify the analytical procedure of drug product in which the assay method is different from that specified in USP. How the product complies USP specifications when the method is different from USP.
- Justify how the assay testing is carried out without using the resolution solution.
- Justify how the analysis of cephradine is conducted without adding the peak response of cephalexin and using cephalexin RS.
- The analytical method used in verification studies is different from that specified in USP monograph. Justify how this method can be considered accurate and reliable.
- Justify how the concentrations of the standard solution were selected for measuring accuracy and repeatability since the concentrations used in your study are totally different from those required in the assay testing of the product.
- Submit COA of working standard of cephradine which is required in the testing of product. The submitted COA was valid before use till 26-10-2016. Justify how you have used the working standard which was expired in 2016 for testing the product which is manufactured in 2020.
- The injection volume specified in analytical method is 10µL while the same mentioned on HPLC chromatograms is 20 µL.
- The retention time of cephradine mentioned in verification studies is 3 minutes while the retention time in HPLC chromatograms is 26 minutes. Justify how the verification studies are representative of the actual performance.
- USP monograph specifies that "relative retention time are about 0.8 for cephalexin and 1.0 for cephradine" while the relative retention time of cephalexin in your chromatograms is around 0.6 while the relative retention time for cephradine also varies. Justification is required in this regard.

Response by the firm:
The firm in its response dated 23-11-2022 submitted new stability study data of three newly manufactured trial batches. The evaluation os newly submitted data is as follows:

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Firm has submitted following documents:

- Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.
- Verification studies of analytical method of drug substance.
- Master formulation having similar qualitative composition as per the reference product.
- Pharmaceutical equivalence against velosef suspension.
- Stability study data along with HPLC chromatograms and raw data sheets showing calculation of results of assay based on sum of cephradine and cephalexin peak areas.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit fee of Rs. 30,000 for revision in stability data and for change in title of the firm from Biogen Pharmaceuticals to Biogen Life Sciences, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021 before issuance of registration letter.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HB20180424) of Hubei Hongyuan Pharmaceutical Technology Co., Ltd. issued by China Food and Drug Administration. The certificate is valid till 30-07-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 2Kg Metronidazole.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted stability study data of 3 batches along with water loss test at each time

	chromatograms, Raw data sheets, COA, summary data sheets etc.	point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Justify why the test of sulphated ash is not specified in the drug substance specification although this tet is recommended in BP monograph.	*Sulphated ash test was not mentioned in BP 2022.* **Firm has not submitted any relevant response.**
2.	Provide COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	**Firm has not submitted any response.**
3.	Provide description of pharmaceutical development as per the CTD guidance document which specifies that "A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed".	*Copy attached for master formulation and method of manufacturing in detail and proper information as per the CTD guidance regarding justification of formulation. And method of manufacturing.* **Firm has not submitted any relevant response.**
4.	You have mentioned "not applicable" for drug substance in section 3.2.P.2.1.1. Justify why you have mentioned not applicable and also provide information as per the CTD guidance document which specifies that "Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product."	*The compatibility of the drug substance with excipients listed in 3.2.P.1 should be discussed. Additionally, key physicochemical characteristics (e.g., water content, solubility, and particle size distribution, polymorphic or solid state form) of the drug substance that can influence the performance of the drug product should be discussed. For combination products, the compatibility of drug substances with each other should be discussed as per the CTD guidance.* **Firm has not submitted any relevant response.**
5.	Provide information regarding excipients added in the formulation in section 3.2.P.2.1.2.	*The choice of excipients listed in 3.2.P.1, their concentration, and their characteristics that can influence the drug product performance should be discussed relative to their respective functions.* **Firm has not submitted any relevant response.**
6.	Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.	*We have studied our comparator product & found that they have the same active ingredients, the same dosage form and are identical in strength, quality, purity, and identity.* **Firm has not submitted any relevant response.**
7.	Justify why complete tests as mentioned in BP monograph is not performed in pharmaceutical equivalence studies.	*Skip testing is the performance of specified tests at release on pre-selected batches and / or at predetermined intervals, rather than on a batch-to-batch basis with the understanding that those batches not being tested still must meet all acceptance criteria established for that product. This represents a less than full schedule of testing and should therefore be justified and presented to and approved by the regulatory authority prior to implementation.* **Firm has not submitted any relevant response.**
8.	Provide microbiological attributes of the drug product in section 3.2.P.2.5.	*Our product is compatible with drug container made of polypropylene of pharmaceutical grade and heat resistant and we can easily sterilize our product at 121°C for 30 minutes to make our product properly sterile.* **Firm has not submitted any relevant response.**

9.	Provide details how terminal sterilization method was validated for PP bottles.	***Terminal sterilization method was validated for PP bottles was validated from external agency.***
10.	Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients.	**Firm has not submitted any response.**
11.	Justify why the assay test mentioned in your analytical method is completely different from that spcifed in latest edition of BP monograph in terms of sample solution preparation, media in which sample solution is to be diluted and the calculation formula and procedure.	*Our analytical method is BP 2022* **Firm has not submitted any relevant response.**
12.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	*We have submitted verification studies of the analytical method of drug product in section 3.2.P.5.3.* **Firm has submitted process validation report instead of analytical method verification.**
13.	Provide COA of working standard / reference standard actually used in the analysis of drug product in section 3.2.P.6 instad of providing COA of the drug substance commercial lot.	**Firm has submitted COA of the drug substance commercial lot as COA of working standard.**
14.	Provide details of the container closure system of the applied product.	*Our sterile product is filled in polypropylene container properly sealed and sterilized. Polypropylene plastic is of pharmaceutical grade and provide strength to the container and .polypropylene is heat resistant and we can easily sterilize our product at 121c. to make our product sterile*
15.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	*Firm has both facility of manufacturing the simple cap & Eurocap.*
16.	Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section.	**Firm has not submitted any response.**
17.	Provide information in section 3.2.P.8.2 as per the CTD guidance document since you have mentioned "not applicable" in this section.	**Firm has not submitted any response.**
18.	The assay results of batch T-001 at batch analysis stage (section 3.2.P.5.4) shows 100% results while the initial stability results (section 3.2.P.8.3) performed on the same day show 104%. Justify how significant difference in results exists on the same date.	*Assay limits are 95-110% in BP 2022.* **Firm has not submitted any relevant response.**
19.	The stability data sheet for batch T001 shows that the assay result at initial time point for accelerated and real time studies are different. Clarification is required in this regard.	**Firm has not submitted any response.**
20.	Specify whether the bottles placed in stability chambers were with Europcap or not.	*Bottles placed in stability chamber were with simple cap not with Euro CAP.*
21.	Provide total capacity of each stability chamber and details of number of bottles of each product placed in the stability chambers. Also provide details how many bottles of the applied product are placed in real time and accelerated stability chamber.	*65 bottles in real stabilty chamber.* *80 bottles in accelerated stabilty chamber.*
22.	Justify why the assay testing procedure adopted during the stability studies is completely different from BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **Firm has not submitted any relevant response. The assay method of the firm is different from BP monograph in terms of sample solution preparation, media in which sample solution is to be diluted and the calculation formula and procedure.**
23.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH	*We have submitted the stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container.*

	guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	**Firm has not submitted any relevant response.**
24.	Justify why you have not perfoemed test of water loss during the stability studies.	**Firm has not submitted any response.**

Decision: Deferred for following submissions:

- **Scientific justification why the test of sulphated ash is not specified in the drug substance specification although this tet is recommended in BP monograph.**
- **COA of reference standard actually used in the analysis of drug substance.**
- **Description of pharmaceutical development of the applied product as per the CTD guidance document.**
- **Submission of details of drug substance in section 3.2.P.2.1.1 of Module 3.**
- **Submission of information regarding excipients added in the formulation in section 3.2.P.2.1.2.**
- **Pharmaceutical equivalence studies against the innovator's product.**
- **Submission of microbiological attributes of the drug product in section 3.2.P.2.5.**
- **Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.**
- **Submission of details of excipients used in the formulation in section 3.2.P.4.**
- **Scientific justification for performing assay test of drug product which is completely different from that spcifed in latest edition of BP monograph in terms of sample solution preparation, media in which sample solution is to be diluted and the calculation formula and procedure.**
- **Report of verification studies of the analytical method of drug product in section 3.2.P.5.3.**
- **Scientific justification for using commercial lot of API as working standard without any standardization.**
- **Submission of requisite information in section 3.2.P.8.1 and 3.2.P.8.2 as per the CTD guidance document.**
- **Scientific justification for the assay results of batch T-001 at batch analysis stage (section 3.2.P.5.4) which shows 100% results while the initial stability results (section 3.2.P.8.3) performed on the same day show 104%.**
- **Scientific justification for having different results at accelerated and real time conditions for batch T001.**
- **Scientific justification why test of water loss is not performed during the stability studies.**
- **Batch size of drug product stability batches in terms of no. of units.**

Liquid Injectable Infusion (LVP) LDPE (General): 01 Molecules / 02 Products

1582.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Ashrafsons Pharmaceuticals (Pvt) Ltd. Plot No. 40, Road R-2, Industrial Estate, Gadoon Amazai District Swabi.**
	Name, address of Manufacturing site.	M/s Ashrafsons Pharmaceuticals (Pvt) Ltd. Plot No. 40, Road R-2, Industrial Estate, Gadoon Amazai District Swabi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021. The letter specifies following section: 1. Liquid Injectable Infusion (SVP) LDPE (General) 2. Liquid Injectable Infusion (LVP) LDPE (General)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 12294: 20-05-2022
	Details of fee submitted	PKR 30,000/- : 20-05-2022
	The proposed proprietary name / brand name	**SAFESOL-RL IV Infusion 500ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Calcium chloride ……0.027g Potassium chloride……0.04g Sodium chloride…… 0.60g Sodium lactate….. ..0.32g
	Pharmaceutical form of applied drug	Clear, odorless and colorless solution filled in PP bottle
	Pharmacotherapeutic Group of (API)	Electrolytes
	Reference to Finished product specifications	BP
	Proposed Pack size	500ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MHRA Approved**
	For generic drugs (me-too status)	Could not be confirmed in applied strength
	Name and address of API manufacturer.	**Sodium Chloride:** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Calcium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Potassium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Sodium lactate** Luoyang Longmen Pharmaceutical Co. Ltd. County Industrial Zone Luoning Henan Province P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications,

		analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Sodium Chloride:** Not submitted. **Calcium chloride:** Not submitted. **Potassium chloride:** Firm has submitted stability data of 3 batches of API as per zone IV-A conditions. **Sodium lactate:** Not submitted.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product 'Sterifluid-RL Infusion by M/s FDL Pharma."
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	**Sodium Chloride:** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Calcium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Calcium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Potassium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Sodium lactate:** Firm has submitted copy of GMP certificate (No. HA20190099) issued by China Food and Drug Administration. The certificate is valid till 29-11-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 25Kg sodium chloride (Batch No. 210909). **Calcium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg calcium chloride. **Potassium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg potassium chloride. **Sodium lactate:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 10Kg Sodium lactate.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Revise your label claim as per the innovator's product along with submission of full fee since innovator product specifies clalcium chloride dihydrate 0.027g/100ml while you have mentioned calcium chloride 0.027g/100ml.	*Applied formulation contains calcium chloride dihydrate as per BP innovator product also contains calcium chloride dihydrate. In master formulation typographic error found. New master formulation has been submitted.*

		Firm has not revised the label claim nor submitted any fee.
2.	Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.	*our main competitor is FRONTIER DEXTROSE LIMITED PHARMA HATTAR having formulation sodium lactate 0.32g/100 ml which is same as our formulation 0.32g/100 ml.* **The available data base shows that Sterifluid RL Infusion (Reg # 052739) of M/s Frontier Dextrose Ltd contains Sodium Lactate 0.31gm**
3.	Provide reference of finished product specifications in module 1 along with submission of fee for revision of specifications.	*Typographic error found. Our product is BP Specifications.* **Firm has not submitted any fee**
4.	Submit verification studies of the Calcium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
5.	Provide actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer. Furthermore, the submitted stabilility sheets does not specify any batch number, manufacturing or expiry date etc.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
6.	Submit verification studies of the Potassium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
7.	Submit verification studies of the Sodium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
8.	Provide actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
9.	Submit verification studies of the sodium lactate drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
10.	Provide actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
11.	The innovator's product is using 0.027g/100ml of clalcium chloride dihydrate while your formulation contains 0.027g/100ml of calcium chloride. Justify how your formulation is similar to that of innovator's product.	*Our formulation is similar to that of innovators product that is 0.027g/100ml of clacium chloride dihydrate.* **The submitted formulation as well as BMR shows that firm is using 0.027g/100ml of calcium chloride.**
12.	Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.	*Because they have the same active ingredients, the same dosage form and are identical in strength, quality, purity, and identity as the brand-name product.* **Firm has not submitted any relevant response.**
13.	Justify why complete tests as mentioned in BP monograph is not performed in pharmaceutical equivalence studies.	*Skip testing is the performance of specified tests at release on pre-selected batches and / or at predetermined intervals, rather than on a batch-to-batch basis with the understanding that those batches not being tested still must meet all acceptance criteria established for that product. This represents a less than full schedule of testing and should therefore be*

		justified and presented to and approved by the regulatory authority prior to implementation. **Firm has not submitted any relevant response.**
14.	Justify how you can perform pharmaceutical equivalence against a product which have different quantitative composition as compared to your product.	*We cannot perform pharmaceutical equivalence against a product which has different quantitative composition to our product.* **Firm has not submitted any relevant response.**
15.	Provide microbiological attributes of the drug product in section 3.2.P.2.5.	*Our product is compatible with drug container made of polypropylene of pharmaceutical grade and heat resistant and we can easily sterilize our product at 121°C for 30 minutes to make our product properly sterile.* **Firm has not submitted any relevant response.**
16.	Provide details how terminal sterilization method was validated for PP bottles.	***Terminal sterilization method was validated for PP bottles was validated from external agency.***
17.	Justify why the drug product specifications does not contain test of particulate matter.	*Product specification concentrate on quality of product till expiry with 100% efficiency .detail is given by literature support.* **Firm has not submitted any relevant response.**
18.	Justify why the acceptance criteria of all assay tests in pharmaceutical equivalence is not as per BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**
19.	Justify why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
20.	Justify why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	*Potassium test is according to BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
21.	Justify why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.	*The method of sodium lactate is HPLC method in BP 2022. We give the HPLC print is attached with the file.* **Firm has used titration method as submitted in the application.**
22.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	*We have submitted verification studies.* **Firm has submitted process validation report instead of analytical method verification.**
23.	Provide details of the container closure system of the applied product.	*Our sterile product is filled in polypropylene container properly sealed and sterilized. Polypropylene plastic is of pharmaceutical grade and provide strength to the container and .polypropylene is heat resistant and we can easily sterilize our product at 121c. to make our product sterile*
24.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	*Firm has both facility of manufacturing the simple cap & Eurocap.*
25.	Specify whether the bottles placed in stability chambers were with Europcap or not.	*At present we are using simple cap to reduce cost of our product but we have the facility of Eurocap machine facility.*
26.	Provide total capacity of each stability chamber and details of number of bottles of each product placed in the stability chambers. Also provide details how many bottles of the applied product are placed in real time and accelerated stability chamber.	*40 bottles in real stabilty chamber.* *60 bottles in accelerated stabilty chamber.*
27.	Justify why the stability studies have been performed using method and acceptance criteria which is completely different from that specified in BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**

28.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	*We have submitted the stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container.* **Firm has not submitted any relevant response.**
29.	Justify why you have not perfoemed test of water loss during the stability studies.	**Firm has not submitted any response.**
30.	The analytical method in section 3.2.P.5.2 specifies titration method for analysis of lactate while in stability studies you have provided single HPLC chromatogram for analysis in which the UV wavelength is also different from that specified in BP monograph.	*we have sumbitted the sodium lactate method on hplc according to BP2022.* **Firm has not submitted any relevant response.**
31.	Justify how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.	**Firm has not submitted any response.**
32.	Provide details of the HPLC system, model along with details of the software available in your QC lab and status of its 21 CFR compliance.	*Our HPLC is LAB SOLUTION 21CFR software in our labortaory.*
33.	Provide evidence of atomic emission spectroscopy required for analysis of drug product as per BP monograph.	**Firm has not submitted any response.**
34.	Provide analysis report for all the testing performed through atomic emission spectroscopy.	**Firm has not submitted any response.**

Decision: Deferred for following submissions:

- **Revision of label claim of the applied product as per the innovator's product along with submission of full fee of registration.**
- **Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.**
- **Report of verification studies of the Calcium chloride drug substance.**
- **Submission of actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.**
- **Report of verification studies of the Potassium chloride drug substance.**
- **Report of verification studies of the Sodium chloride drug substance.**
- **Submission of actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.**
- **Report of verification studies of the sodium lactate drug substance.**
- **Submission of actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.**
- **Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.**
- **Pharmaceutical equivalence studies against the innovator's product.**
- **Submission of microbiological attributes of the drug product in section 3.2.P.2.5.**
- **Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.**
- **Scientific justification for the drug product specifications which does not contain test of particulate matter.**
- **Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.**
- **Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**

	• **Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.** • **Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.** • **Report of verification studies of the analytical method of drug product.** • **Scientific justification why the test of water loss is not performed during the stability studies.** • **Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.** • **Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.** • **Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.** • **Batch size of drug product stability batches in terms of no. of units.**	
1583.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Ashrafsons Pharmaceuticals (Pvt) Ltd. Plot No. 40, Road R-2, Industrial Estate, Gadoon Amazai District Swabi.**
	Name, address of Manufacturing site.	M/s Ashrafsons Pharmaceuticals (Pvt) Ltd. Plot No. 40, Road R-2, Industrial Estate, Gadoon Amazai District Swabi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021. The letter specifies following section: 1. Liquid Injectable Infusion (SVP) LDPE (General) 2. Liquid Injectable Infusion (LVP) LDPE (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 12295: 20-05-2022
	Details of fee submitted	PKR 30,000/- : 20-05-2022
	The proposed proprietary name / brand name	**SAFESOL-RL IV Infusion 1000ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Calcium chloride ……0.027g Potassium chloride……0.04g Sodium chloride…… 0.60g Sodium lactate….. ..0.32g
	Pharmaceutical form of applied drug	Clear, odorless and colorless solution filled in PP bottle
	Pharmacotherapeutic Group of (API)	Electrolytes
	Reference to Finished product specifications	BP

	Proposed Pack size	1000ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MHRA Approved**
	For generic drugs (me-too status)	Could not be confirmed
	Name and address of API manufacturer.	**Sodium Chloride:** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Calcium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Potassium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Sodium lactate** Luoyang Longmen Pharmaceutical Co. Ltd. County Industrial Zone Luoning Henan Province P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Sodium Chloride:** Not submitted. **Calcium chloride:** Not submitted. **Potassium chloride:** Firm has submitted stability data of 3 batches of API as per zone IV-A conditions. **Sodium lactate:** Not submitted.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product 'Sterifluid-RL Infusion by M/s FDL Pharma."
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	**Sodium Chloride:** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Calcium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Potassium chloride** M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Economic Development Zone, Hebei PR China. **Sodium lactate** Luoyang Longmen Pharmaceutical Co. Ltd. County Industrial Zone Luoning Henan Province P.R. China.		
API Lot No.	**Sodium Chloride:** 210909 **Calcium chloride:** 210806 **Potassium chloride:** 211204 **Sodium lactate:** B-2108-517		
Description of Pack (Container closure system)	Polypropylene		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	300 liters	300 liters	300 liters
Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	25-01-2022	25-01-2022	25-01-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Calcium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023. **Potassium chloride:** Firm has submitted copy of GMP certificate (No. HE20180030) issued by China Food and Drug Administration. The certificate is valid till 22-04-2023.

		Sodium lactate: Firm has submitted copy of GMP certificate (No. HA20190099) issued by China Food and Drug Administration. The certificate is valid till 29-11-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 25Kg sodium chloride (Batch No. 210909). **Calcium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg calcium chloride. **Potassium chloride:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 5Kg potassium chloride. **Sodium lactate:** Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 04-01-2022. The invoice declare purchase of 10Kg Sodium lactate.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Revise your label claim as per the innovator's product along with submission of full fee since innovator product specifies clalcium chloride dihydrate 0.027g/100ml while you have mentioned calcium chloride 0.027g/100ml.	*Applied formulation contains calcium chloride dihydrate as per BP innovator product also contains calcium chloride dihydrate. In master formulation typographic error found. New master formulation has been submitted.* **Firm has not revised the label claim nor submitted any fee.**
2.	Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.	*our main competitor is FRONTIER DEXTROSE LIMITED PHARMA HATTAR having formulation sodium lactate 0.32g/100 ml which is same as our formulation 0.32g/100 ml.* **The available data base shows that Sterifluid RL Infusion (Reg # 052739) of M/s Frontier Dextrose Ltd contains Sodium Lactate 0.31gm**
3.	Provide reference of finished product specifications in module 1 along with submission of fee for revision of specifications.	*Typographic error found. Our product is BP Specifications.* **Firm has not submitted any fee**
4.	Submit verification studies of the Calcium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
5.	Provide actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer. Furthermore, the	**Firm has not submitted stability study data sheets for API from API manufacturer.**

	submitted stabilility sheets does not specify any batch number, manufacturing or expiry date etc.	
6.	Submit verification studies of the Potassium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
7.	Submit verification studies of the Sodium chloride drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
8.	Provide actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
9.	Submit verification studies of the sodium lactate drug substance in section 3.2.S.4.3	**Firm has not submitted verification studies for the drug substance.**
10.	Provide actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions, since you have submitted unsigned data sheets on which stamp of Ashrafsons Pharmaceuticals is placed instead of being signed and stamped by drug substance manufacturer.	**Firm has not submitted stability study data sheets for API from API manufacturer.**
11.	The innovator's product is using 0.027g/100ml of clalcium chloride dihydrate while your formulation contains 0.027g/100ml of calcium chloride. Justify how your formulation is similar to that of innovator's product.	*Our formulation is similar to that of innovators product that is 0.027g/100ml of clacium chloride dihydrate.* **The submitted formulation as well as BMR shows that firm is using 0.027g/100ml of calcium chloride.**
12.	Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.	*Because they have the same active ingredients, the same dosage form and are identical in strength, quality, purity, and identity as the brand-name product.* **Firm has not submitted any relevant response.**
13.	Justify why complete tests as mentioned in BP monograph is not performed in pharmaceutical equivalence studies.	*Skip testing is the performance of specified tests at release on pre-selected batches and / or at predetermined intervals, rather than on a batch-to-batch basis with the understanding that those batches not being tested still must meet all acceptance criteria established for that product. This represents a less than full schedule of testing and should therefore be justified and presented to and approved by the regulatory authority prior to implementation.* **Firm has not submitted any relevant response.**
14.	Justify how you can perform pharmaceutical equivalence against a product which have different quantitative composition as compared to your product.	*We cannot perform pharmaceutical equivalence against a product which has different quantitative composition to our product.* **Firm has not submitted any relevant response.**
15.	Provide microbiological attributes of the drug product in section 3.2.P.2.5.	*Our product is compatible with drug container made of polypropylene of pharmaceutical grade and heat resistant and we can easily sterilize our product at 121°C for 30 minutes to make our product properly sterile.* **Firm has not submitted any relevant response.**
16.	Provide details how terminal sterilization method was validated for PP bottles.	***Terminal sterilization method was validated for PP bottles was validated from external agency.***
17.	Justify why the drug product specifications does not contain test of particulate matter.	*Product specification concentrate on quality of product till expiry with 100% efficiency .detail is given by literature support.* **Firm has not submitted any relevant response.**
18.	Justify why the acceptance criteria of all assay tests in pharmaceutical equivalence is not as per BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**

19.	Justify why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
20.	Justify why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.	*Potassium test is according to BP 2022.* **The tests is not as per the BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
21.	Justify why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.	*The method of sodium lactate is HPLC method in BP 2022. We give the HPLC print is attached with the file.* **Firm has used titration method as submitted in the application.**
22.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	*We have submitted verification studies.* **Firm has submitted process validation report instead of analytical method verification.**
23.	Provide details of the container closure system of the applied product.	*Our sterile product is filled in polypropylene container properly sealed and sterilized. Polypropylene plastic is of pharmaceutical grade and provide strength to the container and .polypropylene is heat resistant and we can easily sterilize our product at 121c. to make our product sterile*
24.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	*Firm has both facility of manufacturing the simple cap & Eurocap.*
25.	Specify whether the bottles placed in stability chambers were with Europcap or not.	*At present we are using simple cap to reduce cost of our product but we have the facility of Eurocap machine facility.*
26.	Provide total capacity of each stability chamber and details of number of bottles of each product placed in the stability chambers. Also provide details how many bottles of the applied product are placed in real time and accelerated stability chamber.	*40 bottles in real stabilty chamber.* *60 bottles in accelerated stabilty chamber.*
27.	Justify why the stability studies have been performed using method and acceptance criteria which is completely different from that specified in BP monograph.	*All the test acceptance criteria of all assay tests in pharmaceutical complies BP 2022.* **The acceptance criteria of all tests is not as per the BP monograph.**
28.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	*We have submitted the stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container.* **Firm has not submitted any relevant response.**
29.	Justify why you have not perfoemed test of water loss during the stability studies.	**Firm has not submitted any response.**
30.	The analytical method in section 3.2.P.5.2 specifies titration method for analysis of lactate while in stability studies you have provided single HPLC chromatogram for analysis in which the UV wavelength is also different from that specified in BP monograph.	*we have sumbitted the sodium lactate method on hplc according to BP2022.* **Firm has not submitted any relevant response.**
31.	Justify how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.	**Firm has not submitted any response.**
32.	Provide details of the HPLC system, model along with details of the software available in your QC lab and status of its 21 CFR compliance.	*Our HPLC is LAB SOLUTION 21CFR software in our labortaory.*

33.	Provide evidence of atomic emission spectroscopy required for analysis of drug product as per BP monograph.	**Firm has not submitted any response.**
34.	Provide analysis report for all the testing performed through atomic emission spectroscopy.	**Firm has not submitted any response.**

Decision: Deferred for following submissions:

- **Revision of label claim of the applied product as per the innovator's product along with submission of full fee of registration.**
- **Evidence of me-too status of the applied product since the submitted me-too contains sodium lactate 0.31g while your applied formulation contains 0.32g sodium lactate.**
- **Report of verification studies of the Calcium chloride drug substance.**
- **Submission of actual signed data sheets for three batches of the calcium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.**
- **Report of verification studies of the Potassium chloride drug substance.**
- **Report of verification studies of the Sodium chloride drug substance.**
- **Submission of actual signed data sheets for three batches of the Sodium chloride drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.**
- **Report of verification studies of the sodium lactate drug substance.**
- **Submission of actual signed data sheets for three batches of the Sodium lactate drug substance in which accelerated and real time stability study is conducted as per zone IV-A conditions.**
- **Scientific justification for having the formulation containing 0.027g/100ml of calcium chloride while the innovator's product is using 0.027g/100ml of clalcium chloride dihydrate.**
- **Pharmaceutical equivalence studies against the innovator's product.**
- **Submission of microbiological attributes of the drug product in section 3.2.P.2.5.**
- **Scientific justification for performing validation studies of terminal sterilization procedure from external agency only.**
- **Scientific justification for the drug product specifications which does not contain test of particulate matter.**
- **Scientific justification for having different acceptance criteria of all assay tests in specifications as compared to that specified in BP monograph.**
- **Scientific justification why the test for sodium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
- **Scientific justification why the test for potassium content in the drug product is different from that mentioned in BP monograph in terms of concentration of standard solution and specification parameters of atomic emission spectrophotometry.**
- **Scientific justification why the test for lactate content in the drug product is different from that mentioned in BP monograph, since HPLC test is specified in BP monograph while you have specified titration method.**
- **Report of verification studies of the analytical method of drug product.**
- **Scientific justification why the test of water loss is not performed during the stability studies.**
- **Scientific justification how a single chromatogram of HPLC run at 210nm UV wavelength be used to determine assay of lactate for the applied product.**
- **Evidence of atomic absorption and atomic emission spectroscopy required for analysis of drug product as per BP monograph along with IQ, OQ and PQ of both equipments.**
- **Submission of analysis report and raw data sheets for all the testing performed through atomic emission spectroscopy.**
- **Batch size of drug product stability batches in terms of no. of units.**

Case No. 03: M/s Pasteur and Fleming Pharmaceuticals (Pvt) Ltd. Hattar.

Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000945) dated 11-11-2021. The letter specifies following section:

- Tablet (Hormone)
- Tablet (General)
- Capsule (General)
- Dry Powder Suspension (General)
- Cream / Ointment Section (General)

Now the following applications have been marked to AD PEC-III as per the details mentioned in the table below:

Name of Section	**No of molecules**	**No of products**
Dry Powder Suspension (General)	01	02

Dry Powder Suspension (General): 01 Molecule / 02 Product

1584.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pasteur and Fleming Pharmaceuticals (Pvt) Ltd. Plot No. P.70-A, Road No. 4, Phase-3, Industrial Area Hattar.**
	Name, address of Manufacturing site.	M/s Pasteur and Fleming Pharmaceuticals (Pvt) Ltd. Plot No. P.70-A, Road No. 4, Phase-3, Industrial Area Hattar.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000945) dated 11-11-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000945) dated 11-11-2021. The letter specifies following section: • Tablet (Hormone) • Tablet (General) • Capsule (General) • Dry Powder Suspension (General) • Cream / Ointment Section (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 28549: 07-10-2022
	Details of fee submitted	PKR 30,000/- : 30-09-2022
	The proposed proprietary name / brand name	**P-CLAR 125mg Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml Suspension Contains: Clarithromycin……..125mg
	Pharmaceutical form of applied drug	Off white to light yellow color flavoured mixed powder.
	Pharmacotherapeutic Group of (API)	Macrolide Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	**MHRA Approved**
	For generic drugs (me-too status)	Claritek suspension by Getz Pharma
	Name and address of API manufacturer.	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted signed and stamped stability data sheets as per zone IV-A in which real time stability data is conducted till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the reference product 'Claritek suspension of Getz Pharma."
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
API Lot No.	CTM0685
Description of Pack (Container closure system)	Glass bottle
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-13	T-14	T-15
Batch Size	500 Bottle	500 Bottle	500 Bottle
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	23-04-2022	23-04-2022	23-04-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous approval as it is a new DML
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of delvery challan dated 11-04-2022 for 25 Kg clarithromycin pellets.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have used shimadzu HPLC there was a problem in software of attached computer system due to this problem the audit trail couldn't trail couldn't be turned on the whole process of stability study.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	The drug substance used in the applied formulation contains clarithromycin granules manufactured by Vision Pharmaceuticals while the drug substance details provided in section 3.2.S.1 is for white to off white crystalline powder. Clarification is required in this regard.	*Before the processing of taste masked granules the specified powder White to off white crystalline powder physically appearance mentioned by API Manufacturer.*
2.	Specify the exact polymorphic form of the drug substance used in this preparation since the public assessment report of reference product specifies that the drug substance exists in multiple polymorphic forms and that only 1 form is active.	**Firm has not submitted any response.**
3.	Justify the use of enteric coated pllets/granules for the development of applied product, since the innovator and reference product does not specify that the innovator product contains enteric coated granules, further the pharmacokinetic profiles and the recommendations of FDA dissolution profile database also confirms that the innovator product does not contain enteric coated granules or gastroresistent pellets.	*DMF of Vision pharmaceuticals is under revision.* **Firm has not submitted any response.**
4.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration	**Firm has again submitted API specifications of Vision pharmaceuticals.**

	Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.	
5.	Justify the drug substance loss on drying (LOD) limit NMT 5% while USP recommends the LOD limit NMT 2%.	*Our product is as per USP while the Taste Masked Granules was non-Compendia as they are use as internal specifications.* **Firm is using pellets having upto 5% loss on drying while USP required the LOD to be less than 2%.**
6.	Provide verification studies of drug substance from drug product manufacturer.	**Firm has submitted one page table in which results of precision is mentioned without any other test, results and protocols.**
7.	Justify the use of dried sugar as sweetner while you are already using taste masked granules of clarithromycin in your formulation.	*Dried sugar is used not only as sweetener, but also as viscosity builder, thickening agent and bacteriostatic / biostatic property.* **Reference product has not used this excipient.**
8.	Justify the use of xanthan gum as thickening agent along with granules in the formulation	*Granules are in suspension form, therefore xanthan gum is used as suspending agent.* **Reference product has not used this excipient.**
9.	Justify how 5.42gm of clarithromycin tast masked granles is equivalent to 125mg clarithromycin.	**Firm has not provided any justification**.
10.	Justify the use of flavour in your formulation while you are already using taste masked granules of clarithromycin.	*To enhance the acceptability of our product, the brand leader name Claritek 125mg/5ml granules for oral suspension. Batch # D02033 has already orange flavour.*
11.	Justify the use of citric acid in your formulation while the pH is already controlled by the drug substance manufacturer at pellets stage and pH test is specified in COA of drug substance.	*As the product is a pharmacopeia we use this buffering agents Ceric Acid to maintain the ph limit in pharmaceutical dosage form.*
12.	Justify the use of aerosol and titanium dioxide in your formulation.	*Our product is as a suspension therefore Aerosol is used for as a flow properties and anticaking agent for powder while titanium dioxide is used for as a colorant agent.* **Reference product has not used this excipient.**
13.	Provide details about the container closure system of your applied formulation along with total volume of the container and total clarithromycin contents per bottle. Since the innovator's product has declared that they are using 1250mg clarithromycin per 50ml bottle and 2500mg clarithromycin per 100ml bottle.	*We are already using clarithromycin as same proportion as innovator, and our pack size is 60ml.* **The innovator's product is available as 50ml and 100ml.**
14.	Justify why the qualitative composition of applied product is different from that of innovator's product.	*Our choice of materials is own this product stable and have me-to status the given active and Inactive materials that were used are compatible, stable chemically and as well as physically during the 6th month performed stability study.* **Firm has not provided any scientific justification or compatibility studies.**
15.	Justify why pharmaceutical equivalence is not performed against the innovator's product.	*Due to non-availability of Innovator's than we use brand leader instead of Innovator.*
16.	Justify why comparative dissolution profile (CDP) studies is not conducted for the applied product since FDA as well as public assessment reports of other reference regulatory authorities specifies that comparative dissolution profile against the innovator's product is required to establish the equivalence and interchangeability of the applied product.	*Our product is as per USP Specification there is no specified the competitive dissolution profile (CDP) in USP specification.* **FDA has given details of dissolution parameters in FDA dissolution database and also provided product specific guidelines or this product.**

17.	Provide preservative effectiveness studies for the applied product.	*We used Sodium Benzoate as a preservative.* **Preservative effectiveness studies are not provided.**
18.	Submit compatibility studies of the applied product along with recommended diluent.	*Our product as per USP pharmacopeia. There was no recommended diluent as per USP therefore we use Water as a diluent and our product is compatible with this diluent.* **Firm has not provided compatibility studies of the applied product along with recommended diluent.**
19.	Provide complete description and details of container closure system of the applied product whether glass bottle or PP bottle etc.	*Existing container closure system is on Amber Glass Bottles with Aluminum Caps. In future we will use commercial batches with proper glass bottles and secondary packaging materials.*
20.	Justify significant change (i.e. more than 5% change in assay result from initial value) from 98.72% to 105.10% in your stability studies result.	*The batches was manufactured as a small scale significant changed was **accrued due to weight variation**, but we made first batches, we used higher capacity machinery for small scale batches.* **Firm has not performed weight variation test throughout the stability studies.**
21.	Submit evidence of HPLC system with column oven having capacity to maintain column temperature at 50°.	Firm has submitted copy of a quotation from Western analytical services dated 22-07-2021for HPLC systm along with column oven.
22.	Submit analytical record of the stability data in a proper sequence as recommended by the Board since you have submitted all raw data sheets together and all chromatograms separately without any sequence and separators to segregate stability data of each batch and each time point.	*We had given complete data , with proper tags were also attached to it, Next time we will use proper separator and we will submit will organize file.* **The submitted data was not organized all chromatograms were submitted together without any segregation which was not possible to be properly evaluated.**

Decision: Approved. Registration letter will be issued upon submission of following:

- **Specifications and analytical method verification studies of drug substance from drug product manufacturer.**
- **Pharmaceutical equivalence and CDP studies with the innovator's product.**
- **Preservative effectiveness studies and compatibility studies with reconstitution diluent for the applied product.**
- **IQ, OQ and PQ report of HPLC system equipped with column oven having capacity to maintain column temperature at 50°C.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**P-CLAR 250mg Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml Suspension Contains: Clarithromycin……..250mg
	Pharmaceutical form of applied drug	Off white to light yellow color flavoured mixed powder.
	Pharmacotherapeutic Group of (API)	Macrolide Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MHRA Approved**
	For generic drugs (me-too status)	Claritek suspension by Getz Pharma
	Name and address of API manufacturer.	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted signed and stamped stability data sheets as per zone IV-A in which real time stability data is conducted till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical

		development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the reference product 'Claritek suspension of Getz Pharma."
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.		
API Lot No.	CTM0685		
Description of Pack (Container closure system)	Glass bottle		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-16	T-17	T-18
Batch Size	500 Bottle	500 Bottle	500 Bottle
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	23-04-2022	23-04-2022	23-04-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous approval as it is a new DML
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of delvery challan dated 11-04-2022 for 25 Kg clarithromycin pellets.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have used shimadzu HPLC there was a problem in software of attached computer system due to this problem the audit trail couldn't trail couldn't be turned on the whole process of stability study.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	The drug substance used in the applied formulation contains clarithromycin granules manufactured by Vision Pharmaceuticals while the drug substance details provided in section 3.2.S.1 is for white to off white crystalline powder. Clarification is required in this regard.	*Before the processing of taste masked granules the specified powder White to off white crystalline powder physically appearance mentioned by API Manufacturer.*
2.	Specify the exact polymorphic form of the drug substance used in this preparation since the public assessment report of reference product specifies that the drug substance exists in multiple polymorphic forms and that only 1 form is active.	**Firm has not submitted any response.**
3.	Justify the use of enteric coated pllets/granules for the development of applied product, since the innovator and reference product does not specify that the innovator product contains enteric coated granules, further the pharmacokinetic profiles and the recommendations of FDA dissolution profile database also confirms that the innovator product does not contain enteric coated granules or gastroresistent pellets.	*DMF of Vision pharmaceuticals is under revision.* **Firm has not submitted any response.**
4.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.	**Firm has again submitted API specifications of Vision pharmaceuticals.**
5.	Justify the drug substance loss on drying (LOD) limit NMT 5% while USP recommends the LOD limit NMT 2%.	*Our product is as per USP while the Taste Masked Granules was non-Compendia as they are use as internal specifications.* **Firm is using pellets having upto 5% loss on drying while USP required the LOD to be less than 2%.**
6.	Provide verification studies of drug substance from drug product manufacturer.	**Firm has submitted one page table in which results of precision is mentioned without any other test, results and protocols.**
7.	Justify the use of dried sugar as sweetner while you are already using taste masked granules of clarithromycin in your formulation.	*Dried sugar is used not only as sweetener, but also as viscosity builder, thickening agent and bacteriostatic / biostatic property.* **Reference product has not used this excipient.**
8.	Justify the use of xanthan gum as thickening agent along with granules in the formulation	*Granules are in suspension form, therefore xanthan gum is used as suspending agent.* **Reference product has not used this excipient.**
9.	Justify how 5.42gm of clarithromycin tast masked granles is equivalent to 125mg clarithromycin.	**Firm has not provided any justification**.
10.	Justify the use of flavour in your formulation while you are already using taste masked granules of clarithromycin.	*To enhance the acceptability of our product, the brand leader name Claritek 125mg/5ml granules for oral suspension. Batch # D02033 has already orange flavour.*
11.	Justify the use of citric acid in your formulation while the pH is already controlled by the drug substance manufacturer at pellets stage and pH test is specified in COA of drug substance.	*As the product is a pharmacopeia we use this buffering agents Ceric Acid to maintain the ph limit in pharmaceutical dosage form.*

12.	Justify the use of aerosol and titanium dioxide in your formulation.	*Our product is as a suspension therefore Aerosol is used for as a flow properties and anticaking agent for powder while titanium dioxide is used for as a colorant agent.* **Reference product has not used this excipient.**
13.	Provide details about the container closure system of your applied formulation along with total volume of the container and total clarithromycin contents per bottle. Since the innovator's product has declared that they are using 2500mg clarithromycin per 50ml bottle and 5000mg clarithromycin per 100ml bottle.	*We are already using clarithromycin as same proportion as innovator, and our pack size is 60ml.* **The innovator's product is available as 50ml and 100ml.**
14.	Justify why the qualitative composition of applied product is different from that of innovator's product.	*Our choice of materials is own this product stable and have me-to status the given active and Inactive materials that were used are compatible, stable chemically and as well as physically during the 6th month performed stability study.* **Firm has not provided any scientific justification or compatibility studies.**
15.	Justify why pharmaceutical equivalence is not performed against the innovator's product.	*Due to non-availability of Innovator's than we use brand leader instead of Innovator.*
16.	Justify why comparative dissolution profile (CDP) studies is not conducted for the applied product since FDA as well as public assessment reports of other reference regulatory authorities specifies that comparative dissolution profile against the innovator's product is required to establish the equivalence and interchangeability of the applied product.	*Our product is as per USP Specification there is no specified the competitive dissolution profile (CDP) in USP specification.* **FDA has given details of dissolution parameters in FDA dissolution database and also provided product specific guidelines or this product.**
17.	Provide preservative effectiveness studies for the applied product.	*We used Sodium Benzoate as a preservative.* **Preservative effectiveness studies are not provided.**
18.	Submit compatibility studies of the applied product along with recommended diluent.	*Our product as per USP pharmacopeia. There was no recommended diluent as per USP therefore we use Water as a diluent and our product is compatible with this diluent.* **Firm has not provided compatibility studies of the applied product along with recommended diluent.**
19.	Provide complete description and details of container closure system of the applied product whether glass bottle or PP bottle etc.	*Existing container closure system is on Amber Glass Bottles with Aluminum Caps. In future we will use commercial batches with proper glass bottles and secondary packaging materials.*
20.	Justify significant change (i.e. more than 5% change in assay result from initial value) from 99.45% to 105.92% and 100.44% to 106.98% in your stability studies result.	*The batches was manufactured as a small scale significant changed was **accrued due to weight variation**, but we made first batches, we used higher capacity machinery for small scale batches.* **Firm has not performed weight variation test throughout the stability studies.**
21.	Submit evidence of HPLC system with column oven having capacity to maintain column temperature at 50°.	Firm has submitted copy of a quotation from Western analytical services dated 22-07-2021for HPLC systm along with column oven.
22.	Submit analytical record of the stability data in a proper sequence as recommended by the Board since you have submitted all raw data sheets together and all chromatograms separately without any sequence and separators to segregate stability data of each batch and each time point.	*We had given complete data , with proper tags were also attached to it, Next time we will use proper separator and we will submit will organize file.* **The submitted data was not organized all chromatograms were submitted together without any segregation which was not possible to be properly evaluated.**

Decision: Approved. Registration letter will be issued upon submission of following:

- **Specifications and analytical method verification studies of drug substance from drug product manufacturer.**
- **Pharmaceutical equivalence and CDP studies with the innovator's product.**

- **Preservative effectiveness studies and compatibility studies with reconstitution diluent for the applied product.**
- **IQ, OQ and PQ report of HPLC system equipped with column oven having capacity to maintain column temperature at 50°C.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 04: M/s JHK Pharma (Pvt) Ltd. Nowshera.

Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021. The letter specifies following section:

- Intravenous Infusion-LVP (General)
- Intravenous Infusion-LVP (General Antibiotics)

Firm has submitted another letter dated 19-05-2022 in which CLB approved grant of following additional sections:

- Ampoule-SVP (General)
- Liquid Injectable Vial SVP (General) in place of Intravenous Infusion-LVP (General/ Antibiotics)

Now the firm has submitted following applications as per the details mentioned in the table below:

Name of Section	No of molecules	No of products
Intravenous Infusion-LVP (General)	06	14
Liquid Injectable Vial SVP (General)	-	-
Ampoule-SVP (General)	-	-

Intravenous Infusion-LVP (General): 06 Molecules / 14 Products

Date of Initiation	19-04-2022	19-04-2022	19-04-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SD20170644) issued by China Food and Drug Administration. The certificate is valid till 11-01-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted that we have taken loan of API from Atlantic Pharmaceuticals. ADC invoice is attached. Firm has submitted ADC attested invoice and clearance certificate specifying import of 48000Kg Dextrose anhydrous by M/s Atlantic Pharmaceuticals. The invoice was cleared by AD (I&E) DRAP dated 24-08-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Provide evidence of applied formulation as dextrose anhydrous in reference regulatory authorities.	Dextrose and glucose are used in the same meanings. Baxter UK manufacture glucose 10% From glucose monohydrate that means dextrose monohydrate; is utilized by Baxter UK which is same as dextrose anhydrous with one additional molecule of water and approved by US FDA.
2.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from both Drug substance & Drug Product manufacturer.
3.	Provide verification studies of drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.
4.	Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product.	Firm has submitted COA of batch 202112028 from both API manufacturer as well as drug product manufacturer.
5.	Provide COA of reference standard actually used in the analysis of drug substance and drug product.	Firm has submitted copy of COA of reference standard from the API supplier which was standardized against the BP reference standard.
6.	Provide stability study data of drug substance till claimed shelf life since the submitted real time stability data is only for 9 months.	Firm has submitted API stability study data till 24 months as per zone IV-A conditions.
7.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	Firm has submitted verification studies of the analytical method of drug product.
8.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	Firm has both facilities of manufacturing the Simple caps & Euro cap. However the applied product is without Eurocap
9.	Provide details regarding the method of sterilization of the drug product.	Our Sterilizers/ autoclave are PLC controlled with Automatic additional time selection in Sterilization cycle. Details of sterilization process is provided by firm.
10.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	Stability study Performed at 30°C ± 2°C at 65% + 5%RH, and at 40°C + 2°C at 75% + 5%RH additional water loss study was performed as per ICH guidelines and the data for water loss is submitted.
11.	Submit copy of Batch Manufacturing Record of the stability batches.	Firm has submitted BMR of three stability batches.
12.	Describe the minimum and maximum filling capacity of the manufacturing and filling facility.	Our approved Facilities consist of IV infusion section which includes all volume. Detailed capacity was mentioned in attached list (3.2.A Production Machine List). The details of the simple cap machine are provided below simple cap Machine. No. Made Capacity *Pac* Size *Machine* Machine | Made | Capacity | Pack Size

		simple Cap Welding Machine | ISBM CHINA | 50,000 Bottle/day | 100 mL/ 500mL / 1000mL
13.	Provide raw data sheet for calculation of results of stability studies at each month time point.	Firm has submitted raw data sheets for results of stability studies at each time point.
14.	Submit documents specifying that M/s Atlantic Pharmaceuticals has agreed to give loan of the API for your firm.	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG

Decision: Approved along with primary container closure system as "LDPE bottle without Eurocap.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in pharmacological group as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration letter will be issued after verification of the loan letter by M/s Atlantic pharmaceuticals.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted signed and stamped stability data sheets as per zone IV-A in which real time stability data is conducted till 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification

		of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the reference product 'Pladex-10 IV Infusion by M/s Otsuka Pakistan Limited."
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Xiwang pharmaceutical Co., Ltd. NO.237, Tongfu road, Handian town, Zouping county, Binzhou city, Shandong province, P.R.China		
API Lot No.	202106156		
Description of Pack (Container closure system)	LDPE		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trial # 13	Trial # 14	Trial # 15
Batch Size	500 Bottle	500 Bottle	500 Bottle
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	19-04-2022	19-04-2022	19-04-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SD20170644) issued by China Food and Drug Administration. The certificate is valid till 11-01-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted that we have taken loan of API from Atlantic Pharmaceuticals. ADC invoice is attached. Firm has submitted ADC attested invoice and clearance certificate specifying import of 48000Kg Dextrose anhydrous by M/s Atlantic Pharmaceuticals. The invoice was cleared by AD (I&E) DRAP dated 24-08-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Provide evidence of applied formulation as dextrose anhydrous in reference regulatory authorities.	Dextrose and glucose are used in the same meanings. Baxter UK manufacture glucose 10% From glucose monohydrate that means dextrose monohydrate; is utilized by Baxter UK which is same as dextrose anhydrous with one additional molecule of water and approved by US FDA.
2.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from both Drug substance & Drug Product manufacturer.
3.	Provide verification studies of drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.
4.	Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product.	Firm has submitted COA of batch 202112028 from both API manufacturer as well as drug product manufacturer.
5.	Provide COA of reference standard actually used in the analysis of drug substance and drug product.	Firm has submitted copy of COA of reference standard from the API supplier which was standardized against the BP reference standard.
6.	Provide stability study data of drug substance till claimed shelf life since the submitted real time stability data is only for 9 months.	Firm has submitted API stability study data till 24 months as per zone IV-A conditions.
7.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.	Firm has submitted verification studies of the analytical method of drug product.
8.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	Firm has both facilities of manufacturing the Simple caps & Euro cap. However the applied product is without Eurocap
9.	Provide details regarding the method of sterilization of the drug product.	Our Sterilizers/ autoclave are PLC controlled with Automatic additional time selection in Sterilization cycle. Details of sterilization process is provided by firm.
10.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	Stability study Performed at 30°C ± 2°C at 65% + 5%RH, and at 40°C + 2°C at 75% + 5%RH additional water loss study was performed as per ICH guidelines and the data for water loss is submitted.
11.	Submit copy of Batch Manufacturing Record of the stability batches.	Firm has submitted BMR of three stability batches.
12.	Describe the minimum and maximum filling capacity of the manufacturing and filling facility.	Our approved Facilities consist of IV infusion section which includes all volume. Detailed capacity was mentioned in attached list (3.2.A Production Machine List). The details of the simple cap machine are provided below simple cap Machine. No. Made Capacity *Pac* Size *Machine* Machine | Made | Capacity | Pack Size simple Cap Welding Machine | ISBM CHINA | 50,000 Bottle/day | 100 mL/ 500mL / 1000mL

13.	Provide raw data sheet for calculation of results of stability studies at each month time point.	Firm has submitted raw data sheets for results of stability studies at each time point.
14.	Submit documents specifying that M/s Atlantic Pharmaceuticals has agreed to give loan of the API for your firm.	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG

Decision: Approved along with primary container closure system as "LDPE bottle without Eurocap."

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in pharmacological group as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration letter will be issued after verification of the loan letter by M/s Atlantic pharmaceuticals.**

Date of Initiation	18-04-2022	18-04-2022	18-04-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SD20170644) issued by China Food and Drug Administration. The certificate is valid till 11-01-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted that we have taken loan of API from Atlantic Pharmaceuticals. ADC invoice is attached. Firm has submitted ADC attested invoice and clearance certificate specifying import of 48000Kg Dextrose anhydrous by M/s Atlantic Pharmaceuticals. The invoice was cleared by AD (I&E) DRAP dated 24-08-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Provide evidence of applied formulation as dextrose anhydrous in reference regulatory authorities.	Dextrose and glucose are used in the same meanings. Baxter UK manufacture glucose 10% From glucose monohydrate that means dextrose monohydrate; is utilized by Baxter UK which is same as dextrose

<table>
<tr><td></td><td></td><td>anhydrous with one additional molecule of water and approved by US FDA.</td></tr>
<tr><td>2.</td><td>Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that “Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required.”</td><td>Firm has submitted specifications of drug substance from both Drug substance & Drug Product manufacturer.</td></tr>
<tr><td>3.</td><td>Provide verification studies of drug substance from drug product manufacturer.</td><td>Firm has submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.</td></tr>
<tr><td>4.</td><td>Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product.</td><td>Firm has submitted COA of batch 202112028 from both API manufacturer as well as drug product manufacturer.</td></tr>
<tr><td>5.</td><td>Provide COA of reference standard actually used in the analysis of drug substance and drug product.</td><td>Firm has submitted copy of COA of reference standard from the API supplier which was standardized against the BP reference standard.</td></tr>
<tr><td>6.</td><td>Provide stability study data of drug substance till claimed shelf life since the submitted real time stability data is only for 9 months.</td><td>Firm has submitted API stability study data till 24 months as per zone IV-A conditions.</td></tr>
<tr><td>7.</td><td>Provide verification studies of the analytical method of drug product in section 3.2.P.5.3 instead of providing process validation report.</td><td>Firm has submitted verification studies of the analytical method of drug product.</td></tr>
<tr><td>8.</td><td>Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).</td><td>Firm has both facilities of manufacturing the Simple caps & Euro cap.
However the applied product is without Eurocap</td></tr>
<tr><td>9.</td><td>Provide details regarding the method of sterilization of the drug product.</td><td>Our Sterilizers/ autoclave are PLC controlled with Automatic additional time selection in Sterilization cycle. Details of sterilization process is provided by firm.</td></tr>
<tr><td>10.</td><td>Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.</td><td>Stability study Performed at 30°C ± 2°C at 65% + 5%RH, and at 40°C + 2°C at 75% + 5%RH additional water loss study was performed as per ICH guidelines and the data for water loss is submitted.</td></tr>
<tr><td>11.</td><td>Submit copy of Batch Manufacturing Record of the stability batches.</td><td>Firm has submitted BMR of three stability batches.</td></tr>
<tr><td>12.</td><td>Describe the minimum and maximum filling capacity of the manufacturing and filling facility.</td><td>Our approved Facilities consist of IV infusion section which includes all volume. Detailed capacity was mentioned in attached list (3.2.A Production Machine List). The details of the simple cap machine are provided below simple cap Machine.

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from both Drug substance & Drug Product manufacturer.
2.	Provide verification studies of drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the analytical method of all drug substance performed by drug product manufacturer.

3.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3.	Firm has submitted verification studies of the analytical method of drug product.
4.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	Firm has both facilities of manufacturing the Simple caps & Euro cap. However the applied product is without Eurocap
5.	Provide details regarding the method of sterilization of the drug product.	Our Sterilizers/ autoclave are PLC controlled with Automatic additional time selection in Sterilization cycle. Details of sterilization process is provided by firm.
6.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	Stability study Performed at 30°C ± 2°C at 65% + 5%RH, and at 40°C + 2°C at 75% + 5%RH additional water loss study was performed as per ICH guidelines and the data for water loss is submitted.
7.	Submit copy of Batch Manufacturing Record of the stability batches.	Firm has submitted BMR of three stability batches.
10.	Submit documents for procurement of all drug substances.	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG

Decision: Approved along with primary container closure system as "LDPE bottle without Eurocap."

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after verification of the loan letter by M/s Atlantic pharmaceuticals.**
- **Firm will submit pharmaceutical equivalence against the innovator's product before issuance of Registration Letter along with fee of Rs. 7,500/- for correction/pre-approval change in pharmacological group as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

1593.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s JHK Pharma (Pvt) Ltd. Khushal Khan Khattak Mazar Road, Akora Khattak, Nowshera.**
	Name, address of Manufacturing site.	M/s JHK Pharma (Pvt) Ltd. Khushal Khan Khattak Mazar Road, Akora Khattak, Nowshera.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000946) dated 11-11-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947)

		dated 11-11-2021. The letter specifies following section: • Intravenous Infusion-LVP (General) • Intravenous Infusion-LVP (General Antibiotics) Firm has submitted another letter dated 19-05-2022 in which CLB approved grant of following additional sections: • Ampoule-SVP (General) • Liquid Injectable Vial SVP (General) in place of Intravenous Infusion-LVP (General/ Antibiotics)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 32624: 14-11-2022
	Details of fee submitted	PKR 30,000/- : 25-10-2022
	The proposed proprietary name / brand name	**J-SOL NS Infusion 1000ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Sodium Chloride ……..0.9gm
	Pharmaceutical form of applied drug	Clear, odorless and colorless solution filled in LDPE bottle
	Pharmacotherapeutic Group of (API)	solutions for infusion/electrolytes solution/sodium chloride ATC code: BO5XA03
	Reference to Finished product specifications	USP
	Proposed Pack size	1000ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**USFDA** Approved. 0.9% Sodium Chloride Inj. USP, Hospira Inc. Lake Forest USA
	For generic drugs (me-too status)	Zesol-NS Infusion by Shahzaib Pharmaceutical
	Name and address of API manufacturer.	Dominion Salt (NI) Limited, 89 Totara Street Mount Maunganui, New Zealand.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications,

		analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests as per USP for their product against 'Zeesol NS Infusion by Shahzaib Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. TT60-565-16-3) of M/s Dominion Salt (NI) Limited issued by MEDSAFE Newzealand. The certificate is valid till 28-01-2023.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Date of Initiation	18-04-2022	18-04-2022	18-04-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** Firm has submitted copy of GMP certificate (No. TT60-565-16-3) of M/s Dominion Salt (NI) Limited issued by MEDSAFE Newzealand. The certificate is valid till 28-01-2023. **Glucose:** Firm has submitted copy of GMP certificate (No. SD20170644) issued by China Food and Drug Administration. The certificate is valid till 11-01-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium chloride:** Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG **Glucose:** Firm has submitted that we have taken loan of API from Atlantic Pharmaceuticals. ADC invoice is attached. Firm has submitted ADC attested invoice and clearance certificate specifying import of 48000Kg Dextrose anhydrous by M/s Atlantic Pharmaceuticals. The invoice was cleared by AD (I&E) DRAP dated 24-08-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from both Drug substance & Drug Product manufacturer.

2.	Provide verification studies of drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the analytical method of all drug substance performed by drug product manufacturer.
3.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3.	Firm has submitted verification studies of the analytical method of drug product.
4.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	Firm has both facilities of manufacturing the Simple caps & Euro cap. However the applied product is without Eurocap
5.	Provide details regarding the method of sterilization of the drug product.	Our Sterilizers/ autoclave are PLC controlled with Automatic additional time selection in Sterilization cycle. Details of sterilization process is provided by firm.
6.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	Stability study Performed at 30°C ± 2°C at 65% + 5%RH, and at 40°C + 2°C at 75% + 5%RH additional water loss study was performed as per ICH guidelines and the data for water loss is submitted.
7.	Submit copy of Batch Manufacturing Record of the stability batches.	Firm has submitted BMR of three stability batches.
10.	Submit documents for procurement of all drug substances.	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG

Decision: Approved along with primary container closure system as "LDPE bottle without Eurocap."

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after verification of the loan letter by M/s Atlantic pharmaceuticals.**
- **Firm will submit pharmaceutical equivalence against the innovator's product before issuance of Registration Letter along with fee of Rs. 7,500/- for correction/pre-approval change in pharmacological group as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

1596.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s JHK Pharma (Pvt) Ltd. Khushal Khan Khattak Mazar Road, Akora Khattak, Nowshera.**
	Name, address of Manufacturing site.	M/s JHK Pharma (Pvt) Ltd. Khushal Khan Khattak Mazar Road, Akora Khattak, Nowshera.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000946) dated 11-11-2021.

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000947) dated 11-11-2021. The letter specifies following section: • Intravenous Infusion-LVP (General) • Intravenous Infusion-LVP (General Antibiotics) Firm has submitted another letter dated 19-05-2022 in which CLB approved grant of following additional sections: • Ampoule-SVP (General) • Liquid Injectable Vial SVP (General) in place of Intravenous Infusion-LVP (General/ Antibiotics)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 32819: 15-11-2022
	Details of fee submitted	PKR 30,000/- : 14-11-2022
	The proposed proprietary name / brand name	**J-SOL RL Infusion 500ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Calcium chloride dihydrate…… 0.02g Potassium chloride……. 0.03g Sodium chloride……. 0.60g Sodium lactate…… 0.31g
	Pharmaceutical form of applied drug	Clear, odorless and colorless solution filled in LDPE bottle
	Pharmacotherapeutic Group of (API)	Plasma substitutes and solutions for infusion/electrolytes ATC-Code: B05BB01
	Reference to Finished product specifications	BP
	Proposed Pack size	500ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**USFDA** Approved. Lactated Ringer's in Plastic Container by Baxter Healthcare
	For generic drugs (me-too status)	Ringolact injection by Otsuka Pakistan
	Name and address of API manufacturer.	**Calcium chloride** Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Jiucheng Industrial Park, Hebei, China **Potassium chloride** Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Jiucheng Industrial Park, Hebei, China **Sodium chloride** Dominion Salt (NI) Limited, 89 Totara Street Mount Maunganui, New Zealand. **Sodium lactate** Luoyang Longmen Pharmaceutical Co. Ltd. County Industrial Zone Luoning Henan Province P.R. China.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Calcium chloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months. **Potassium chloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months. **Sodium chloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months. **Sodium lactate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests as per USP for their product against the reference product 'Ringolact injection by Otsuka
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Calcium chloride:** Firm has submitted copy of DML of M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Jiucheng Industrial Park, Hebei, China (Permit No. Hebei 20150116) issued by NMPA China. The license is valid till 11-08-2025. **Potassium chloride:** Firm has submitted copy of DML of M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Jiucheng Industrial Park, Hebei, China (Permit No.

		Hebei 20150116) issued by NMPA China. The license is valid till 11-08-2025. **Sodium lactate:** Firm has submitted copy of GMP certificate (No. HA20190099) of M/s Luoyang Longmen Pharmaceutical Co Ltd issued by NMPA China. The certificate is valid till 29-11-2024. **Sodium chloride:** Firm has submitted copy of GMP certificate (No. TT60-565-16-3) of M/s Dominion Salt (NI) Limited issued by MEDSAFE Newzealand. The certificate is valid till 28-01-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from both Drug substance & Drug Product manufacturer.
2.	Provide verification studies of all drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the analytical method of all drug substance performed by drug product manufacturer.
3.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3.	Firm has submitted verification studies of the analytical method of drug product.
4.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	Firm has both facilities of manufacturing the Simple caps & Euro cap. However the applied product is without Eurocap
5.	Provide details regarding the method of sterilization of the drug product.	Our Sterilizers/ autoclave are PLC controlled with Automatic additional time selection in Sterilization cycle. Details of sterilization process is provided by firm.

6.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	Stability study Performed at 30°C ± 2°C at 65% + 5%RH, and at 40°C + 2°C at 75% + 5%RH additional water loss study was performed as per ICH guidelines and the data for water loss is submitted.
7.	Submit copy of Batch Manufacturing Record of the stability batches.	Firm has submitted BMR of three stability batches.
8.	Describe the minimum and maximum filling capacity of the manufacturing and filling facility.	Our approved Facilities consist of IV infusion section which includes all volume. Detailed capacity was mentioned in attached list (3.2.A Production Machine List). The details of the simple cap machine are provided below simple cap Machine. No. Made Capacity *Pac* Size *Machine* Machine | Made | Capacity | Pack Size simple Cap Welding Machine | ISBM CHINA | 50,000 Bottle/day | 100 mL/ 500mL / 1000mL
9.	Provide raw data sheet for calculation of results of stability studies based on HPLC testing.	Firm has submitted raw data sheets for results of stability studies at each time point.
10.	Submit documents for procurement of all drug substances.	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG

Decision: Approved along with primary container closure system as "LDPE bottle without Eurocap."

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable since it is a newly established license.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Calcium chloride:** Firm has submitted copy of DML of M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Jiucheng Industrial Park, Hebei, China (Permit No. Hebei 20150116) issued by NMPA China. The license is valid till 11-08-2025. **Potassium chloride:** Firm has submitted copy of DML of M/s Hebei Huachen Pharmaceutical Co. Ltd. Huanghua Jiucheng Industrial Park, Hebei, China (Permit No. Hebei 20150116) issued by NMPA China. The license is valid till 11-08-2025. **Sodium lactate:** Firm has submitted copy of GMP certificate (No. HA20190099) of M/s Luoyang Longmen Pharmaceutical Co Ltd issued by NMPA China. The certificate is valid till 29-11-2024. **Sodium chloride:** Firm has submitted copy of GMP certificate (No. TT60-565-16-3) of M/s Dominion Salt (NI) Limited issued by MEDSAFE Newzealand. The certificate is valid till 28-01-2023. **Dextrose:** Firm has submitted copy of GMP certificate (No. SD20180787) of M/s Xiwang pharmaceutical Co., Ltd issued by CFDA China. The certificate is valid till 14-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG **Dextrose:**

		Firm has submitted that we have taken loan of API from Atlantic Pharmaceuticals. ADC invoice is attached. Firm has submitted ADC attested invoice and clearance certificate specifying import of 48000Kg Dextrose anhydrous by M/s Atlantic Pharmaceuticals. The invoice was cleared by AD (I&E) DRAP dated 24-08-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches along with water loss test at each time point. Firm has submitted analytical report at each stability testing interval.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications of drug substance from both Drug substance & Drug Product manufacturer.
2.	Provide verification studies of all drug substance from drug product manufacturer.	Firm has submitted report of verification studies of the analytical method of all drug substance performed by drug product manufacturer.
3.	Provide verification studies of the analytical method of drug product in section 3.2.P.5.3.	Firm has submitted verification studies of the analytical method of drug product.
4.	Describe your container closure system in detail whether it contains Eurocap or not along with evidence of this facility (if applicable).	Firm has both facilities of manufacturing the Simple caps & Euro cap. However the applied product is without Eurocap
5.	Provide details regarding the method of sterilization of the drug product.	Our Sterilizers/ autoclave are PLC controlled with Automatic additional time selection in Sterilization cycle. Details of sterilization process is provided by firm.
6.	Justify the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in PP (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers.	Stability study Performed at 30°C ± 2°C at 65% + 5%RH, and at 40°C + 2°C at 75% + 5%RH additional water loss study was performed as per ICH guidelines and the data for water loss is submitted.
7.	Submit copy of Batch Manufacturing Record of the stability batches.	Firm has submitted BMR of three stability batches.
8.	Describe the minimum and maximum filling capacity of the manufacturing and filling facility.	Our approved Facilities consist of IV infusion section which includes all volume. Detailed capacity was mentioned in attached list (3.2.A Production Machine List). The details of the simple cap machine are provided below simple cap Machine. No. Made Capacity *Pac* Size *Machine* Machine | Made | Capacity | Pack Size simple Cap | ISBM CHINA | 50,000 Bottle/day | 100 mL/

		Welding Machine | | | 500mL / 1000mL
9.	Provide raw data sheet for calculation of results of stability studies based on HPLC and atomic absorption testing.	Firm has submitted raw data sheets for results of stability studies at each time point.
10.	Submit documents for procurement of all drug substances.	Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities: 1. Dextrose Anhydrous 750 KG 2. Sodium Chloride 125 Kg 3. Ciprofloxacine Lactate 5 KG 4. Metronidazole 5 KG 5. Levofloxacine 5 KG 6. Paracetamol 10 KG 7. Sodium Lactate 50 KG 8. Potassium Chloride 5 KG 9. Calcium Chloride Dihydrate 5Kg 10. Mannitol 120 KG
11.	Submit evidence of purchase of atomic absorption which is required for product testing as per USP monograph.	Firm has submitted copy of invoice No. QCS/MPW321/2022 dated 28-02-2022 from Quality Control Services specifying purchase of refurbished atomic absorption perkin elmer.

Decision: Approved along with primary container closure system as "LDPE bottle without Eurocap."

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued after verification of the loan letter by M/s Atlantic pharmaceuticals.**
- **The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in pharmacological group as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Firm will submit IQ, OQ, PQ for the "Atomic absorption spectrophotometer" before issuance of Registration Letter.**

<tr><td>9.</td><td>Provide raw data sheet for calculation of results of stability studies based on HPLC and atomic absorption testing.</td><td>Firm has submitted raw data sheets for results of stability studies at each time point.</td></tr>
<tr><td>10.</td><td>Submit documents for procurement of all drug substances.</td><td>Firm has submitted a letter from Atlantic pharmaceuticals dated 05-04-2022 for Loan of raw material to M/s JHK Pharmaceuticals for performing stability studies. The letter specifies the following APIs along with their quantities:
1. Dextrose Anhydrous 750 KG
2. Sodium Chloride 125 Kg
3. Ciprofloxacine Lactate 5 KG
4. Metronidazole 5 KG
5. Levofloxacine 5 KG
6. Paracetamol 10 KG
7. Sodium Lactate 50 KG
8. Potassium Chloride 5 KG
9. Calcium Chloride Dihydrate 5Kg
10. Mannitol 120 KG</td></tr>
<tr><td>11.</td><td>Submit evidence of purchase of atomic absorption which is required for product testing as per USP monograph.</td><td>Firm has submitted copy of invoice No. QCS/MPW321/2022 dated 28-02-2022 from Quality Control Services specifying purchase of refurbished atomic absorption perkin elmer.</td></tr>
</table>

Decision: Approved along with primary container closure system as "LDPE bottle without Eurocap."

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

- **Registration letter will be issued after verification of the loan letter by M/s Atlantic pharmaceuticals.**
- **The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in pharmacological group as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Firm will submit IQ, OQ, PQ reports for the "atomic absorption spectrophotometer" before issuance of Registration Letter.**

Case No. 05: M/s Wallace Pharma Evolutions, Lahore.

Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000951) dated 27-12-2021. The letter specifies following section:

- Capsule (Penicillin)
- Oral Dry Powder Suspension (Penicillin)
- Dry Powder Injection (Penicillin)
- Injection (Carbapenem)

Now the firm has submitted following applications as per the details mentioned in the table below:

Name of Section	No of molecules	No of products
Capsule (Penicillin)	03	03
Oral Dry Powder Suspension (Penicillin)	03	03

Capsule (Penicillin) Section: 03 Molecules / 03 Products

1600.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Wallace Pharma Evolutions, Kalalwala Stop, 20-Km, Lahore Jaranwala Road Lahore.**
	Name, address of Manufacturing site	M/s Wallace Pharma Evolutions, Kalalwala Stop, 20-Km, Lahore Jaranwala Road Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000951) dated 27-12-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License (DML No. 000951) dated 27-12-2021. The letter specifies following section: • Capsule (Penicillin) • Oral Dry Powder Suspension (Penicillin) • Dry Powder Injection (Penicillin) • Injection (Carbapenem)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 31998: 07-11-2022
	Details of fee submitted	PKR 30,000/- : 03-11-2022
	The proposed proprietary name / brand name	**CLOXXIN 500mg Capsule**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Cloxacillin (as sodium monohydrate)……..500mg
	Pharmaceutical form of applied drug	hard gelatin capsule
	Pharmacotherapeutic Group of (API)	Penicillin Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Anaclosil 500 mg hard capsules **CIMA Spain Approved**
	For generic drugs (me-too status)	Cloxazan 500mg Capsule by Zafa
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted signed and stamped stability data sheets as per zone IV-A in which real time stability data is conducted till 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against cloxacillin capsule without specifying name of manufacturer and brand name. Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against cloxacillin capsule without specifying name of manufacturer and brand name.

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

Date of Initiation	25-02-2022	25-02-2022	25-02-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted stability study data of 3 batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.
- Provide verification studies of drug substance from drug product manufacturer.
- Specify whether the drug substance used is in compacted form or micronized.
- Provide details including name of manufacturer, expiry date and batch number of the comparator product against which pharmaceutical equivalence and CDP studies have been performed.

• Justify why pharmaceutical equivalence and CDP studies are not performed against innovator / reference product. • Provide results of comparative dissolution profile (CDP) in three dissolution medium since only a single table result is provided. • Provide COA of reference standard / working standard actually used in the analysis of drug product. • Provide description of container closure system whether Alu-Alu blister or otherwise. • Submit copy of invoice for procurement of drug substance from Pharmagen. • Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of both stability chambers.		
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine

testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.

- Provide verification studies of drug substance from drug product manufacturer.
- Justify the use of amoxicillin trihydrate compacted API for manufacturing of suspension, since the reference product reveals that micronized particle size is required to achieve the desired drug contents after reconstitution.
- Justify why the qualitative composition is different from that of the innovator's product.
- Provide results of comparative dissolution profile (CDP) in three dissolution medium since FDA dissolution method have recommended dissolution parameters for the applied product.
- Provide preservative effectiveness studies for the drug product in section 3.2.P.2.5.
- Provide compatibility studies of the product along with recommended diluent in section 3.2.P.2.6.
- Provide COA of reference standard / working standard actually used in the analysis of drug product.
- Provide details of the container closure system of the applied product whether packed in glass bottle or PET bottle along with the color of the bottle.
- Justify how 120 bottles batch size is sufficient enough to complete the stability studies.
- Submit copy of invoice for procurement of drug substance from Pharmagen.
- Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of evaluator[3]:

Shortcomings communicated	**Response by the firm**
Evidence of approval of applied formulation in reference regulatory authorities which were adopted by Registration Board in its 275th meeting.	Firm has submitted that the brand leader of the product Velosef injection is being manufactured and marketed by GSK in Pakistan. All these strengths i.e. 250mg, 500mg and 1gm are registered and readily being sold in Pakistan.

Decision of 312th meeting of Registration Board:

Deferred for following submissions:

- Evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting.
- Submission of fee since the title of the firm has been changed from Biogen Pharmaceuticals to Biogen Life sciences.

Response by the firm:

Firm has submitted its response in which the decision of 320th meeting of Registration Board is referred. The decision is as under:

Registration Board deliberated the matter in detail and acknowlwdged the fact that the "Cephradien injection" has not been withdrawan from US market due to safety & efficacy reasons as evident from the above cited notice published in US Federal Register. Hence, Registration Board decided to consider pending registration applications in the light of aforementioned position.

Based on the decision of 320th meeting of RB, firm has requested to consider their case. The detailed evaluation summary of the case is as under:

Name, address of Applicant / Mar keting Authorization Holder	**M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi**
Name, address of Manufacturing site.	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Status of the applicant	☒ Manufacturer ☐ Importer

	☐ Is involved in none of the above (contract giver)
GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry Vial section (Cephalosporin).
Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
Dy. No. and date of submission	Dy. No. 9889: 30-03-2021
Details of fee submitted	PKR 20,000/-: 09-03-2021
The proposed proprietary name / brand name	**GEN-ONE 250mg Injection**
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Cephradine L-Arginine…250mg
Pharmaceutical form of applied drug	Powder for solution for injection
Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
Reference to Finished product specifications	USP
Proposed Pack size	1's
Proposed unit price	As per SRO
The status in reference regulatory authorities	NA
For generic drugs (me-too status)	Velosef Injection by GSK
Name and address of API manufacturer.	M/s NCPC Hebei Huamin Pharmaceutical Co., Ltd No. 98 Hainan Road, Economic and Technological Development Zone, Shijiazhuang, Hebei Province, China.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real

	time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 18 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Velosef Injection of GSK.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20180086) issued by CFDA China. The certificate is valid till 14-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	Each vial contains: Cephradine ……250 mg (As cephradine with L-arginine).
2.	Specify whether the drug substance is cephradine or cephradine monohydrate.	The drug substance is Cephradine L-Arginine
3.	Justify your master formulation which specifies cephradine L-arginine, while the drug substance is cephradine / cephradine monohydrate along with L-arginine.	Cephradine L-Arginine equivalent to Cephradine
4.	Submit documents for the procurement of API with approval from DRAP.	Firm has submitted DHL receipt in name of M.s Biogen pharmaceuticals, declarinig the shipment details for "Cephradine sterile with L-Arginine" dated 18-05-2020
5.	Submit batch manufacturing record of three stability batches.	Firm has submitted copy of BMR of three stability batches
6.	Submit fee since the title of the applicant firm has been changed.	Firm has not submitted any fee.

Decision: Approved.

- **Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding Cephradine for Injection along with submission of requisite fee for pre-registration correction/changes of label claim as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021**
- **Firm shall submit fee of Rs. 30,000 since the title of the firm has been changed from Biogen Pharmaceuticals to Biogen Life Sciences, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021 before issuance of registration letter.**
- **Registration Board further directed the firm to get formal approval for import of drug substance form DRAP I&E office in future.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Name and address of API manufacturer.	M/s NCPC Hebei Huamin Pharmaceutical Co., Ltd No. 98 Hainan Road, Economic and Technological Development Zone, Shijiazhuang, Hebei Province, China.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 18 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Velosef Injection of GSK.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s NCPC Hebei Huamin Pharmaceutical Co., Ltd No. 98 Hainan Road, Economic and Technological Development Zone, Shijiazhuang, Hebei Province, China.		
API Lot No.	B2171911012		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-076	T-077	T-078
Batch Size	500 vials	500 vials	500 vials
Manufacturing Date	06-2020	06-2020	06-2020
Date of Initiation	02-06-2020	02-06-2020	02-06-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20180086) issued by CFDA China. The certificate is valid till 14-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit label claim of applied product in line with the reference product along with submission of requiste fee.	Each vial contains: Cephradine ……500 mg (As cephradine with L-arginine).
2.	Specify whether the drug substance is cephradine or cephradine monohydrate.	The drug substance is Cephradine L-Arginine
3.	Justify your master formulation which specifies cephradine L-arginine, while the drug substance is cephradine / cephradine monohydrate along with L-arginine.	Cephradine L-Arginine equivalent to Cephradine
4.	Submit documents for the procurement of API with approval from DRAP.	Firm has submitted DHL receipt in name of M.s Biogen pharmaceuticals, declarinig the shipment

		details for "Cephradine sterile with L-Arginine" dated 18-05-2020
5.	Submit batch manufacturing record of three stability batches.	Firm has submitted copy of BMR of three stability batches
6.	Submit fee since the title of the applicant firm has been changed.	Firm has not submitted any fee.

Decision: Approved.

- **Firm will revise the label claim as per the decision taken by the Boad in instant meeting regarding Cephradine for Injection along with submission of requisite fee for pre-registration correction/changes of label claim as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021**
- **Firm shall submit fee of Rs. 30,000 since the title of the firm has been changed from Biogen Pharmaceuticals to Biogen Life Sciences, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021 before issuance of Registration Letter.**
- **Registration Board further directed the firm to get formal approval for import of drug substance form DRAP I&E office in future.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1608.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry Vial section (Cephalosporin)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 9888: 30-03-2021
	Details of fee submitted	PKR 20,000/-: 09-03-2021
	The proposed proprietary name / brand name	**GEN-ONE 1g Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Cephradine L-Arginine…1g

Remarks of evaluator[3]:

Shortcomings communicated	**Response by the firm**
Evidence of approval of applied formulation in reference regulatory authorities which were adopted by Registration Board in its 275th meeting.	Firm has submitted that the brand leader of the product Velosef injection is being manufactured and marketed by GSK in Pakistan. All these strengths i.e. 250mg, 500mg and 1gm are registered and readily being sold in Pakistan.

Decision of 312th meeting of Registration Board:
Deferred for following submissions:

	• Evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting. • Submission of fee since the title of the firm has been changed from Biogen Pharmaceuticals to Biogen Life sciences.

Response by the firm:
Firm has submitted its response in which the decision of 320th meeting of Registration Board is referred. The decision is as under:
Registration Board deliberated the matter in detail and acknowlwdged the fact that the "Cephradien injection" has not been withdrawan from US market due to safety & efficacy reasons as evident from the above cited notice published in US Federal Register. Hence, Registration Board decided to consider pending registration applications in the light of aforementioned position.
Based on the decision of 320th meeting of RB, firm has requested to consider their case. The detailed evaluation summary of the case is as under:

Name, address of Applicant / Mar keting Authorization Holder	**M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi**
Name, address of Manufacturing site.	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry Vial section (Cephalosporin).
Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
Dy. No. and date of submission	Dy. No. 9889: 30-03-2021
Details of fee submitted	PKR 20,000/-: 09-03-2021
The proposed proprietary name / brand name	**GEN-ONE 1g Injection**
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Cephradine L-Arginine…1g
Pharmaceutical form of applied drug	Powder for solution for injection
Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
Reference to Finished product specifications	USP
Proposed Pack size	1's
Proposed unit price	As per SRO
The status in reference regulatory authorities	NA
For generic drugs (me-too status)	Velosef Injection by GSK
Name and address of API manufacturer.	M/s NCPC Hebei Huamin Pharmaceutical Co., Ltd No. 98 Hainan Road, Economic and Technological Development Zone, Shijiazhuang, Hebei Province, China.
Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties,

	solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 18 months.
Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Velosef Injection of GSK.
Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

Case No. 01: M/s Wezen Pharmaceuticals, Rawat (New / Additional Section)

M/s Wezen Pharmaceuticals, Rawat has submitted copy of letter of grant of additional section dated 30-12-2020 for following 4 sections.

- Tablet (General)
- Capsule (General)
- Sachet (General)
- Oinment / Cream / Gel (General)

Now the firm has submitted following applications as per the details mentioned in the table below:

Name of Section	Previously considered		Freshly applied	
	No of molecules	No of products	No of molecules	No of products
Capsule (General)	03	08	01	02

Capsule (General) Section: 01 Molecule / 02 Product

1609.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat**
	Name, address of Manufacturing site.	M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	
	Evidence of approval of manufacturing facility	has submitted copy of letter of grant of additional section dated 30-12-2020 for following 4 sections. • Tablet (General) • Capsule (General) • Sachet (General) • Oinment / Cream / Gel (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7362: 16-03-2022
	Details of fee submitted	PKR 30,000/-: 14-01-2022
	The proposed proprietary name / brand name	**DEXZEN 30mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Dexlansoprazole (as dual delayed release pellets)…….30mg
	Pharmaceutical form of applied drug	Small white round enteric coated pellets encapsulated in hard gelatin capsule
	Pharmacotherapeutic Group of (API)	PPI
	Reference to Finished product specifications	Manufacturer's specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Dexilant capsule **USFDA** Approved

	For generic drugs (me-too status)	Razodex Capsule by Getz Pharma
	Name and address of API manufacturer.	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
API Lot No.	
Description of Pack (Container closure system)	Alu-alu blister
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-01
Batch Size	1200 Capsule	1200 Capsule	1200 Capsule
Manufacturing Date	02-2021	02-2021	02-2021
Date of Initiation	27-02-2021	27-02-2021	27-02-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 23-02-2021 specifying purchase of 2Kg dexlansoprazole pellets 22.5%.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm submitted that their HPLC system is not 21 CFR compliant therefore the audit trail reports are not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- GMP certificate / inspection report of the firm conducted within a period of last three years.
- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any method and procedures for preparation of each type of solution. Furthermore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.

- Section 3.2.S.6 specifies that the API manufacturer is using food grade double polyethylene bag for storing these pellets which are highly sensitive to moisture and light. Justification is required in this regard.
- Provide information in section 3.2.S.7.1 amd 3.2.S.7.2 as per CTD guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.
- The stability study of dexlansoprazole pellets performed by Vision Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.
- Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of dexlansoprazole pellets wherein the representative from the pellets manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarification is required in this regard.
- Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.
- Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be perfomed, since you have mentioned that pharmaceutical equivaelence is not required and then you have also provided a brief report of dexlansoprazole tablet in which all tests are not performed.
- Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter.
- Submit information in section 3.2.P.3 as per the guidance document which specifies that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified".
- Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1.
- Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data to support this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified".
- Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."
- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established.
- Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.
- Provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarification is required in this regard.
- Provide validation studies of the analytical method of drug product in section 3.2.P.5.3.

- Provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.
- Provide COA of the reference standard / working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard.
- Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."
- You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard.
- Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.
- Justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets.
- Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.
- Justify the dissolution test in which the acceptance criteria is NLT 75% in 5 hours which is against the specificatiosn of innovator's product.
- Justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter <711> as well as defined by Registration Board in its 293rd meeting.
- Provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule.
- Provide stability study data in a proper sequence by providing stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and sperators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

1610.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat**
	Name, address of Manufacturing site.	M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	

	Evidence of approval of manufacturing facility	has submitted copy of letter of grant of additional section dated 30-12-2020 for following 4 sections. • Tablet (General) • Capsule (General) • Sachet (General) • Oinment / Cream / Gel (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7363: 16-03-2022
	Details of fee submitted	PKR 30,000/-: 14-01-2022
	The proposed proprietary name / brand name	**DEXZEN 60mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Dexlansoprazole (as dual delayed release pellets)…….60mg
	Pharmaceutical form of applied drug	Small white round enteric coated pellets encapsulated in hard gelatin capsule
	Pharmacotherapeutic Group of (API)	PPI
	Reference to Finished product specifications	Manufacturer's specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Dexilant capsule **USFDA** Approved
	For generic drugs (me-too status)	Razodex Capsule by Getz Pharma
	Name and address of API manufacturer.	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6

		months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 23-02-2021 specifying purchase of 2Kg dexlansoprazole pellets 22.5%.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm submitted that their HPLC system is not 21 CFR compliant therefore the audit trail reports are not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- GMP certificate / inspection report of the firm conducted within a period of last three years.
- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any method and procedures for preparation of each type of solution. Furthermore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.
- Section 3.2.S.6 specifies that the API manufacturer is using food grade double polyethylene bag for storing these pellets which are highly sensitive to moisture and light. Justification is required in this regard.
- Provide information in section 3.2.S.7.1 amd 3.2.S.7.2 as per CTD guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.
- The stability study of dexlansoprazole pellets performed by Vision Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.
- Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of dexlansoprazole pellets wherein the representative from the pellets manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarification is required in this regard.
- Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.
- Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be perfomed, since you have mentioned that pharmaceutical equivaelence is not required and then you have also provided a brief report of dexlansoprazole tablet in which all tests are not performed.
- Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter.
- Submit information in section 3.2.P.3 as per the guidance document which specifies that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its

critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified".

- Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1.
- Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data to support this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified".
- Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."
- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established.
- Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.
- Provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarification is required in this regard.
- Provide validation studies of the analytical method of drug product in section 3.2.P.5.3.
- Provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.
- Provide COA of the reference standard / working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard.
- Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."
- You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard.
- Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.
- Justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets.
- Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.
- Justify the dissolution test in which the acceptance criteria is NLT 75% in 5 hours which is against the specificatiosn of innovator's product.
- Justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter <711> as well as defined by Registration Board in its 293rd meeting.
- Provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule.

- Provide stability study data in a proper sequence by providing stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and sperators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area Karachi.

On the recommendations of panel of experts, the CLB in its 277th meeting held on 15th -16th October has considered and approved the following one additional section of M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi. The details of the products applied and already considered against new section are as under:

Already considered in 297th meeting		Freshly applied	
Molecules	Products	Molecules	Products
03	05	01	03

Dry Powder Inhalers Section (General) (1 molecules / 3 Product)

1611.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area Karachi.**
	Name, address of Manufacturing site.	M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	GMP certificate issued based on the inspection dated 7th May 2019. Firm has submitted copy of GMP inspection report dated 20-10-2021 concluding that the firm is operating at good level of GMP compliance.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section dated 27-10-2020 specifying Dry Powder Inhaler Capsule (General) - New section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales

	Dy. No. and date of submission	Dy. No. 17608: 16-06-2022
	Details of fee submitted	PKR 75,000/-: 25-05-2022
	The proposed proprietary name / brand name	**INDACTURA DPI Capsules 150mcg + 80mcg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each DPI capsule contains: Indacaterol (as Acetate)……150 mcg Mometasone Furoate…….80 mcg Each delivered dose contains: Indacaterol (as Acetate)……125 mcg Mometasone Furoate…….62.5 mcg
	Pharmaceutical form of applied drug	Rotacaps
	Pharmacotherapeutic Group of (API)	LABAs and Inhaled synthetic corticosteroid
	Reference to Finished product specifications	In house
	Proposed Pack size	10's, 30's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Atectura Breezhaler by Novartis Europharm Limited **EMA** Approved.
	For generic drugs (me-too status)	NA
	Name and address of API manufacturer.	**Indacaterol Acetate:** Melody Healthcare Pvt. Ltd. Plot No. J-73, M.I.D.C, Tarapur, Boisar, Dist. Palghar 401506, Dist - Thane-Zone 4, Maharashtra State, India. **Mometasone Furoate:** Aarti Industries Limited Plot No E-50, MIDC, Tarapur, Taluka & District-Palghar, 401506 Maharashtra State, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Indacaterol acetate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 18 months.

		Mometasone Furoate: Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 60 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Atectura 150/80mcg DPI capsule (Batch No BWK15) Novartis. Firm has also submitted results of invitro comparative delivered dose uniformity and aerodynamic particle size distribution for their product against the Atectura 150/80mcg DPI capsule of Novartis
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	**Indacaterol Acetate:** Melody Healthcare Pvt. Ltd. Plot No. J-73, M.I.D.C, Tarapur, Boisar, Dist. Palghar 401506, Dist - Thane- Zone 4, Maharashtra State, India. **Mometasone Furoate:** Aarti Industries Limited Plot No E-50, MIDC, Tarapur, Taluka & District-Palghar, 401506 Maharashtra State, India.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Empator 10mg Tablets" which was presented in 291st meeting of Registration Board wherein the Board decided to approve registration of this product Date of inspection: 6th August, 2019. According to inspection report, following points were confirmed. • The firm has 21CFR compliant HPLC software. • The firm has audit trail reports available.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Indacaterol acetate:** Firm has submitted copy of GMP certificate (No. 6100560) dated 09-07-2021 issued by FDA Mahrashtra. The certificate is valid till 08-07-2022. Firm has also submitted copy of Form 29 License to manufacture drugs for purposes of examination, test or analysis (Test Licence No: 201525228 dated 05-01-2021 valid till 04-01-2024. **Mometasone Furoate:** Firm has submitted copy of GMP certificate (No. 92338/2020/11/32133) dated 10-06-2020 issued by FDA Mahrashtra. The certificate is valid till 09-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Indacaterol acetate:** Firm has submitted copy of commercial invoice cleared dated 30-08-2021 specifying import of 40g Indacaterol acetate. The commercial invoice is attested by AD (I&E) DRAP field office. **Mometasone Furoate:** Firm has submitted copy of commercial invoice cleared dated 14-07-2021 specifying import of 0.040Kg Mometasone Furoate. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

DPI device: Monodose Inhaler RS01 Mod. 7 (Catalogue Code: "239700001AB")
Manufacturer: Berry Plastiape S.p.A

Sr. No	Shortcomings communicated	Response by the firm
1.	API stability study data of Indacaterol acetate is till 12 months only.	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 18 months.
2.	Further justify how drug substance was procured from a manufacturer which holds Licence to manufacture drugs for purposes of examination, test or analysis.	Firm has submitted copy of License Retention dated 09-05-2022 issued by FDA Mahrashtra State valid till 24-05-2027.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration Board further decided that following details of "Accompanyiing Delivery device" shall be declared on registration letter:**

"DPI device: Monodose Inhaler RS01 Mod. 7 (Catalogue Code: "239700001AB")
Manufacturer: Berry Plastiape S.p.A"

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Indacaterol acetate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 18 months. **Mometasone Furoate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 60 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Atectura 150/160mcg DPI capsule (Batch No BUE50) of Novartis.

		Firm has also submitted results of invitro comparative delivered dose uniformity and aerodynamic particle size distribution for their product against the Atectura 150/160mcg DPI capsule of Novartis
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	**Indacaterol Acetate:** Melody Healthcare Pvt. Ltd. Plot No. J-73, M.I.D.C, Tarapur, Boisar, Dist. Palghar 401506, Dist - Thane- Zone 4, Maharashtra State, India. **Mometasone Furoate:** Aarti Industries Limited Plot No E-50, MIDC, Tarapur, Taluka & District-Palghar, 401506 Maharashtra State, India.		
API Lot No.	**Indacaterol acetate:** ICA/08/21 **Mometasone Furoate:** MF-20016(JM-01)-001		
Description of Pack (Container closure system)	Alu-alu blister		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	NPD-C-1829-S	NPD-C-1830-S	NPD-C-1831-S
Batch Size	6000 capsule	6000 capsule	6000 capsule
Manufacturing Date	01-2022	01-2022	01-2020
Date of Initiation	18-02-2022	18-02-2022	18-02-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Empator 10mg Tablets" which was presented in 291st meeting of Registration Board wherein the Board decided to approve registration of this product Date of inspection: 6th August, 2019. According to inspection report, following points were confirmed. • The firm has 21CFR compliant HPLC software. • The firm has audit trail reports available.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Indacaterol acetate:** Firm has submitted copy of GMP certificate (No. 6100560) dated 09-07-2021 issued by FDA Mahrashtra. The certificate is valid till 08-07-2022. Firm has also submitted copy of Form 29 License to manufacture drugs for purposes of examination, test or analysis (Test Licence No: 201525228 dated 05-01-2021 valid till 04-01-2024. **Mometasone Furoate:** Firm has submitted copy of GMP certificate (No. 92338/2020/11/32133) dated

		10-06-2020 issued by FDA Mahrashtra. The certificate is valid till 09-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Indacaterol acetate:** Firm has submitted copy of commercial invoice cleared dated 30-08-2021 specifying import of 40g Indacaterol acetate. The commercial invoice is attested by AD (I&E) DRAP field office. **Mometasone Furoate:** Firm has submitted copy of commercial invoice cleared dated 14-07-2021 specifying import of 0.040Kg Mometasone Furoate. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

DPI device: Monodose Inhaler RS01 Mod. 7 (Catalogue Code: "239700001AB")
Manufacturer: Berry Plastiape S.p.A

Sr. No	Shortcomings communicated	Response by the firm
1.	API stability study data of Indacaterol acetate is till 12 months only.	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 18 months.
2.	Further justify how drug substance was procured from a manufacturer which holds Licence to manufacture drugs for purposes of examination, test or analysis.	Firm has submitted copy of License Retention dated 09-05-2022 issued by FDA Mahrashtra State valid till 24-05-2027.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Registration Board further decided that following details of "Accompanyiing Delivery device" shall be declared on registration letter:**

"DPI device: Monodose Inhaler RS01 Mod. 7 (Catalogue Code: "239700001AB")
Manufacturer: Berry Plastiape S.p.A"

1613.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area Karachi.**
	Name, address of Manufacturing site.	M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	GMP status of the firm	GMP certificate issued based on the inspection dated 7th May 2019. Firm has submitted copy of GMP inspection report dated 20-10-2021 concluding that the firm is operating at good level of GMP compliance.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section dated 27-10-2020 specifying Dry Powder Inhaler Capsule (General) - New section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17609: 16-06-2022
	Details of fee submitted	PKR 75,000/-: 25-05-2022
	The proposed proprietary name / brand name	**INDACTURA DPI Capsules 150mcg + 320mcg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each DPI capsule contains: Indacaterol (as Acetate)……150 mcg Mometasone Furoate…….320 mcg Each delivered dose contains: Indacaterol (as Acetate)……125 mcg Mometasone Furoate…….260 mcg
	Pharmaceutical form of applied drug	Rotacaps
	Pharmacotherapeutic Group of (API)	LABAs and Inhaled synthetic corticosteroid
	Reference to Finished product specifications	In house
	Proposed Pack size	10's, 30's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Atectura Breezhaler by Novartis Europharm Limited **EMA** Approved.
	For generic drugs (me-too status)	NA
	Name and address of API manufacturer.	**Indacaterol Acetate:** Melody Healthcare Pvt. Ltd. Plot No. J-73, M.I.D.C, Tarapur, Boisar, Dist. Palghar 401506, Dist - Thane- Zone 4, Maharashtra State, India. **Mometasone Furoate:** Aarti Industries Limited Plot No E-50, MIDC, Tarapur, Taluka & District-Palghar, 401506 Maharashtra State, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Indacaterol acetate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 18 months. **Mometasone Furoate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75% ± 5% RH for 60 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Atectura 150/160mcg DPI capsule (Batch No BUE50) of Novartis. Firm has also submitted results of invitro comparative delivered dose uniformity and aerodynamic particle size distribution for their product against the Atectura 150/160mcg DPI capsule of Novartis
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

Case No. 03: M/s British pharmaceuticals, Lahore. (New / Additional Section)

Firm has submitted copy of letter of grant of additional section dated 11-02-2019 for following 3 sections.

- Tablet Section (General) (New)
- Capsule Section (General) (New)
- Dry Powder Suspension Section (General) (New)

Now the following applications have been marked as per the details mentioned in the table below:

Name of Section	No of molecules	No of products
Tablet Section (General) (New)	01	02

Tablet Section (General) (New): 01 Molecule / 02 Product

1614.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s British pharmaceuticals, 23-KM Sheikhupura Road, Lahore.**
	Name, address of Manufacturing site.	M/s British pharmaceuticals, 23-KM Sheikhupura Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML dated 12-01-2022 specifying Tablet (general) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale

		☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22084: 03-08-2022
	Details of fee submitted	PKR 30,000/-: 27-07-2022
	The proposed proprietary name / brand name	**BRICIP 250mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ciprofloxacin (as hydrochloride) ……250mg
	Pharmaceutical form of applied drug	white oblong film coated tablet
	Pharmacotherapeutic Group of (API)	Fluoroquinolones
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cipro Tablet 250mg by Bayer HealthCare Pharmaceuticals Inc. USA (**USFDA** Approved)
	For generic drugs (me-too status)	Ciproxin Tablet 250mg of M/s Bayer Pakistan (Pvt) Limited (Reg # 010118)
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 12 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification

		of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against novidat tablet of Sami Firm has submitted results of CDP for their product against novidat tablet of Sami
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.

Batch Size	1666 Tablet	1666 Tablet	1666 Tablet
Manufacturing Date	05-2021	05-2021	05-2021
Date of Initiation	08-05-2021	08-05-2021	08-05-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of delivery note for 5Kg Ciprofloxacin hydrochloride dated 11-06-2020 from Pharmagen.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted by the firm
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit GMP certificate / inspection report of the drug product manufacturer.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.
- Provide verification studies of drug substance from drug product manufacturer.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance.
- Submit API stability data till complete shelf life since the real time stability data is only for 12 months.
- Justify why the qualitative composition of your product is different from that of innovator's product.
- Provide description of pharmaceutical development as per the CTD guidance document which specifies that "A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed".
- Submit information in section 3.2.P.2.1.1 as per the CTD guidance document which specifies that "Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product."
- Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.
- Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients.
- Provide complete analytical method of your drug product instead on attaching copy of an old version of USP monograph.
- Provide verification studies of the analytical method of drug product as per ICH guidelines since all the tests performed are not according to ICH guidelines.
- Provide COA of working standard / reference standard actually used in the analysis of drug product in section 3.2.P.6.
- Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section.
- Provide information in section 3.2.P.8.2 as per the CTD guidance document.
- Justify why dissolution test is not performed in stability studies.
- USP monograph specifies that the retention time for ciprofloxacin is 6.4 - 10.8min, while in your submitted analytical record the retention time of ciprofloxacin is below 6.4 minutes.
- USP monograph specifies the use of Ciprofloxacin Ethylenediamine Analog in standard solution as system suitability solution and that The relative retention times for ciprofloxacin ethylenediamine analog and ciprofloxacin are 0.7 and 1.0, respectively, while your analysis does not show any other peak within the relative retention time of 0.7 and 1.0.
- Submit evidencd of column oven having capacity to maintain column temperature at 30°.
- Submit Reference of previous approval of applications with stability study data of the firm (if any).
- Provide stability study data in a proper sequence using separators to segregate the data of each time point and each batch along with relevant raw data sheets.
- Provide proper raw data sheets showing calculation of results of assay instead of just submitting results without any calculation.
- Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 02-09-2020. The GMP certificate was granted based on inspection dated 22-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of delivery note for 5Kg Ciprofloxacin hydrochloride dated 11-06-2020 from Pharmagen.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted by the firm
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit GMP certificate / inspection report of the drug product manufacturer.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.
- Provide verification studies of drug substance from drug product manufacturer.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance.
- Submit API stability data till complete shelf life since the real time stability data is only for 12 months.
- Justify why the qualitative composition of your product is different from that of innovator's product.
- Provide description of pharmaceutical development as per the CTD guidance document which specifies that "A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed".
- Submit information in section 3.2.P.2.1.1 as per the CTD guidance document which specifies that "Discussion shall be provided for the key physicochemical characteristics (e.g. water content, solubility, particle size distribution, polymorphic or solid state form) of the Drug Substance(s) that can influence the performance of the Drug Product."
- Justify why pharmaceutical equivalence is conducted against a comparator product instead of performing against the innovator's product.
- Clarify why you have mentioned not applicable for all section of 3.2.P.4 excipients, while your formulation contains excipients.
- Provide complete analytical method of your drug product instead on attaching copy of an old version of USP monograph.
- Provide verification studies of the analytical method of drug product as per ICH guidelines since all the tests performed are not according to ICH guidelines.
- Provide COA of working standard / reference standard actually used in the analysis of drug product in section 3.2.P.6.
- Provide information in section 3.2.P.8.1 as per the CTD guidance document since you have not submitted any information in this section.
- Provide information in section 3.2.P.8.2 as per the CTD guidance document.
- Justify why dissolution test is not performed in stability studies.
- USP monograph specifies that the retention time for ciprofloxacin is 6.4 - 10.8min, while in your submitted analytical record the retention time of ciprofloxacin is below 6.4 minutes.
- USP monograph specifies the use of Ciprofloxacin Ethylenediamine Analog in standard solution as system suitability solution and that The relative retention times for ciprofloxacin ethylenediamine analog and ciprofloxacin are 0.7 and 1.0, respectively, while your analysis does not show any other peak within the relative retention time of 0.7 and 1.0.
- Submit evidencd of column oven having capacity to maintain column temperature at 30°.
- Submit Reference of previous approval of applications with stability study data of the firm (if any).
- Provide stability study data in a proper sequence using separators to segregate the data of each time point and each batch along with relevant raw data sheets.
- Provide proper raw data sheets showing calculation of results of assay instead of just submitting results without any calculation.
- Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Case No. 04: M/s Titlis Pharma (Pvt) Ltd. Lahore. (New / Additional Section)

Firm has submitted copy of letter of grant of additionall section under Drug Manufacturing License (DML No. 000779) dated 10-05-2022. The letter specifies following section:

1. Tablet Section-II (General)
2. Dry powder suspension (General)
3. Dry powder sachet section (General)

Now the following applications have been marked as per the details mentioned in the table below:

Name of Section	No of molecules	No of products
Dry powder suspension (General)	01	02

Tablet Section (General) (New): 01 Molecule / 02 Product

1616.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Titlis Pharma (Pvt) Ltd. 528-A, Sundar Industrial Estate, Raiwind Road, Lahore.**
	Name, address of Manufacturing site.	M/s Titlis Pharma (Pvt) Ltd. 528-A, Sundar Industrial Estate, Raiwind Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 05-11-2020 issued on the basis of inspection dated 30-09-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of additionall section under Drug Manufacturing License (DML No. 000779) dated 10-05-2022. The letter specifies following section: 1. Tablet Section-II (General) 2. Dry powder suspension (General) 3. Dry powder sachet section (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22073: 03-08-2022
	Details of fee submitted	PKR 30,000/- : 15-07-2022
	The proposed proprietary name / brand name	**CIPROLIS 125mg/5ml Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension contains: Ciprofloxacin HCl……125mg
	Pharmaceutical form of applied drug	Light pinkgranular powder with strawberry flavoured filled in 60ml amber color glass bottle
	Pharmacotherapeutic Group of (API)	Fluoroquinolones
	Reference to Finished product specifications	USP
	Proposed Pack size	60ml
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	**Registration Board in its 269th meeting decided as under:** Keeping in view the following statement written in Qualitative and quantitative composition "2.5 mL suspension after reconstitution (1/2 measuring spoon) contains 125 mg ciprofloxacin" and domestic conditions for difficulties in dispensing 250mg/5ml suspension for children under 2 years of age, Registration Board decided to approve the formulation of ciprofloxacin 125mg/5ml granules and solvent for oral suspension as per reference product approved by USFDA and MHRA.
	For generic drugs (me-too status)	Novidat suspension by Sami
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot# 22-23, Industrial triangle, Kahuta road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product Novidat suspension of Sami Pharmaceuticals.

		Firm has submitted results of CDP for their product against the comparator product Novidat suspension of Sami Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Date of Initiation	27-11-2021	27-11-2021	27-11-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Vision Pharmaceuticals dated 25-02-2019 based on the inspection dated 11-02-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- The label claim of the applied product is not in line with the reference product in terms of salt form as well as equivalency, revise the label claim along with submission of full fee of registration.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.

- Provide verification studies of drug substance from drug product manufacturer.
- Justify the assay testing of drug substance using UV method contrary to that recommended by the innovator's product.
- Submmit COA of relevant batch of API i.e. Lot No. CPX1279 from Vision pharmaceuticals in section 3.2.S.4.4.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance.
- Justify the stability study data of ciprofloxacin micro-pellets from Vision pharmaceuticals initiated in 2013 and completed in 2016 in which ciprofloxacin base is mentioned, while M/s Vision pharmaceuticals was manufacturing ciprofloxacin pellets using ciprofloxacin HCl before Registration Board took the decision to revise the salt form to ciprofloxacin base in its 290th meeting which was held on 3rd - 4th July, 2019. Justify how the salt form in stability study data of previous batches was changed.
- Justify the use of sugar and poly succar ultra DM as sweetner while you are already using taste masked granules in your formulation.
- Justify the use of xanthan gum as suspending agent along with granules in the formulation while the reference product contains no suspending agent.
- Justify how 71.429mg/1ml of ciprofloxacin granules is equivalent to 25mg ciprofloxacin base per ml.
- Justify the use of sodium benzoate anhydrous in your formulation while the pH is already controlled by the drug substance manufacturer at pellets stage and pH test is specified in COA of drug substance. Furthermore, the reference product contains oil based diluent for which pH is not required to be controlled.
- Justify the use of citric acid in your formulation as buffering agent which is not used by the reference product and the reference product contains oil based diluent for which pH is not required to be controlled.
- Justify the use of flavour in your formulation while you are already using taste masked granules.
- Justify the use of aerosil in your formulation.
- Provide details about the diluent which to be used with the applied product in section 3.2.P.1.
- Provide complete module 3.2.P for the diluent which will be used in the administration of applied product as per the decision of 290th and 313th meeting of Registration Board.
- Justify why the qualitative composition of applied product is different from that of innovator's product, and also provide compatibility studies.
- Justify why pharmaceutical equivalence studies are not conducted against the innovator's product.
- Provide microbiological attributes of the applied product in section 3.2.P.2.5 as per USP monograph.
- Submit preservative effectiveness studies in section 3.2.P.2.5.
- Submit compatibility studies of the applied product along with recommended diluent.
- Justify the pH test in your specification since no such test is recommended in USP monograph.
- Justify why Microbial Enumeration Tests is not mentioned in your specifications while it is recommended by USP.
- Justify the analytical method of assay and dissolution test in which initial reconstitution with water is mentioned while USP recommends to use the particular diluent for this purpose. Justify how your analytical method complies USP monograph.
- Justify why identification test using diode array detector is not performed and mentioned in analytical method.
- Justify why you are using different column in assay test as that recommended by USP.
- Submit evidence of diode array detector which is required for identification test as per USP monograph.
- Submit evidence of column oven which is required to maintain column temperature at 40° and 30° for assay and dissolution test.
- Submit evidence of autosampler with HPLC having capacity to maintain 10° which is required to perform assay and dissolution test as per USP monograph.
- Provide details of the exact concentrations of the solutions and its preparation method which are used to perform accuracy, and precision studies in analytical method verification studies.
- Justify how you are using ciprofloxacin HCl manufactured by Shangyu Jingxin pharmaceuticals for the testing of your product.
- The stability chromatograms for assay testing depicts that ciprofloxacin HCl is tested while the applied product contains ciprofloxacin base. Clarification is required in this regard.

- Justify the manufacturing of stability batches in November 2021 while your section was approved on 10-05-2022.
- Provide stability study data in a proper sequence using separators to segregate the data of each time point and each batch along with relevant raw data sheets.
- Clarification regarding reconstitution diluent used for the product development and stability studies.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Solucortef injection.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	CRYSTAL PHARMA S.A Parque Tecnologico Parcela 105 4715, Boecillo (Valladolid), Spain
API Lot No.	B0163/7CB16043
Description of Pack (Container closure system)	Glass vial
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	1116202	1216202	1216203
Batch Size	15000 vials	15000 vials	15000 vials
Manufacturing Date	11-2016	12-2016	12-2016
Date of Initiation	06-12-2016	21-12-2016	20-12-2016
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. ES/064/17) issued by CIMA Spain based on inspection dated 09-01-2017. As per the GMP certificate it is valid for 3 years however this validity may be reduced or extended using regulatory risk management.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate issued by AD (I&E) DRAP dated 08-11-2016 specifying import of 100Kg hydrocortisone sodium succinate.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Provide compatibility studies of the drug product along with recommended diluent.	As per USP monograph testing of sample is performed after reconstitution as reconstituted solution.
2.	Justify the drug product specifications submitted in section 3.2.P.5.1 which does not include the test of free hydrocortisone. Revise your specifications along with submission of requisite fee.	Test for free hydrocortisone is now added in the specs.
3.	Justify why the analytical method for assay test of drug product submitted in section 3.2.P.5.2 is entirely different from that specified in USP monograph, since USP recommends internal standard solution having 3mg/ml of Fluorometholone while your method does not specify the use of internal standard solution.	We are testing our product as per USP monograph and following HPLC method. **USP recommends internal standard solution having 3mg/ml of Fluorometholone while your method does not specify the use of internal standard solution.**
4.	Justify why the stability studies have been performed using UV method.	We are testing our products as per USP monograph by HPLC and by UV also as mentioned in BP. We have performed its all studies on HPLC.

		The analytical record submitted by the firm shows that the HPLC testing is not as per USP monograph in terms of injection volume, internal standard solution having Fluorometholone and the procedure to calculate results of assay based on addition of results of percentage of the labeled amount of hydrocortisone along with free hydrocortisone found in the test for Free Hydrocortisone

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer will submit results of recently manufactured batches of the drug product in which testing has been performed as per USP monograph before issuance of Registration Letter.**
- **Firm will submit 7,500/- fee for revision of specifications by addition of test for free hydrocortisone as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

Date of Initiation	20-02-2020	20-02-2020	20-02-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to following product specific inspection reports • Dexpro (Dexlansoprazole) 30 and 60mg Capsule. PSI was conducted on 11-09-2018 and the product was approved in 285th meeting of Registration Board. • Neovel 800mg Tablet. Its PSI was conducted on 14-12-2018 and the product was approved in 288th meeting of Registration Board. • Serbica 20mg Capsule. Its PSI was conducted on 29-10-2018 and the product was approved in 290th meeting of Registration Board. Firm has further submitted that their product Neogene 2g Injection was approved in 293rd meeting of Registration Board. That product was applied by AGP and contract manufactured by Seraph and was submitted on Form 5F (CTD) along with complete data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Lahore dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of proforma invoice dated 07-01-2020 specifying purchase of 25Kg Cefixime (compacted).

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that since the stability study of this product was initiated in January / Feb 2020, at that time our HPLC (Schimadzu) was not 21 CFR compliant. However now we have 21 CFR compliant (Perkin Elmer) HPLC system. We undertake that in future we will use 21 CFR compliant HPLC system for stability testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	Response by the firm
As per the drug substance specifications of the drug substance manufacturer i.e. Pharmagen Limited, the material complies BP specification and the analytical method also involves testing as per BP monograph. The drug product manufacturer i.e. Seraph Pharmaceutical has submitted drug substance specification as per USP and its analytical method is also as per USP monograph. Clarification is required in this regard how drug product manufacturer can use USP specifications including testing method while the drug substance complies BP monograph.	Firm has submitted revised specifications and analytical procedures of the drug substance as per BP monograph.
The verification studies of the analytical method of drug substance specifies a different column specifications as well as mobile phase. Further the procedure for assay specifies cefixime dry suspension and contains a different method for assay. Clarification is required in this regard.	Firm has submitted that verification studies have been performed according to BP specs and the report is attached which does not contains any date.
As per the analytical method submitted by the firm i.e. Seraph Pharmaceuticals, the flow rate is adjusted so that the retention time of cefixime is about 10 minutes, but as per the verification study report and system suitability testing, the retention time of 6 samples was not more than 3.5 minutes. Justify how the verification studies were concluded to be acceptable since the retention time is different from that specified in the method as well as USP monograph.	Firm has submitted that cefixime raw material was analysed as per BP monograph and BP defined method was also verified. In BP retention time is not specified for cefixime. However in product analysis JP method was followed with little deviation in flow rate so as to manage the samples.
The accuracy and recovery study in verification studies of the drug substance is performed by analysing samples having 80%, 100% and 120% of "A" or reference solution preparation. As per the method, the standard solution has a concentration of 0.2mg/ml while as per the accuracy and recovery table the amount of drug added is 20mg, 25mg and 30mg. Justification / clarification is required how 20, 25 and 30mg is equivalent to 80%, 100% and 120% of "A"	Firm has submitted that verification studies have been performed according to BP specs and the report is attached which does not contains any date.
The repeatability studies have been performed using sample concentration 0.012mg/ml, while neither standard solution or the sample solution has this concentration. Justification is required regarding this concentration to perform repeatability and intermediate precision in verification studies	Firm has submitted that verification studies have been performed according to BP specs and the report is attached which does not contains any date.
The COA of drug substance (Batch No. 00244/051/2020) from Pharmagen Limited specifies that the	Firm has submitted that COA from Pharmagen specifying the manufacturing date to be Feb 2020 and

manufacturing date is February 2020 and the COA has been signed on 19-02-2020, while as per the analytical report of the same batch from Seraph Pharmaceutical, the analysis is performed on 28-01-2020. Justification is required is this regard.	sign date 19-02-2020 is that of Batch number 00244/051/2020 while the report from Seraph pharma is not of the same batch instead is of Batch No 00244/015/2020. The same batch is also used for the formulation development and stability studies.
The COA of drug substance issued from the drug substance manufacturer specifies that the material complies BP specs while the drug product manufacturer concludes that the material complies USP specs. Clarification is required in this regard.	Firm has submitted that the material was tested as per BP specs and complied the specification s as defined in BP. Mistakenly the report was misinterpreted.
Provide justification of the selection of excipients, since the excipients used in the formulation are different from that of the FDA approved innovator product.	Firm has submitted that we have followed the innovator product approved by EMA named Cefixima 200mg Capsules by M/s Laboratories Normon. The excipient we selected are approximately same as that of the innovator product.
The average weight of the product mentioned in pharmaceutical equivalence studies is 335mg while the total weight of master formulation available in section 3.2.P.1 is 260mg. Justification is required in this regard.	In master formulation the weight of shell is not included. Without shell the weight is 260mg and if shell weight "75mg" is added, it makes 335mg weight per capsule.
Justify why the pharmaceutical equivalence as well as comparative dissolution profile was studied against comparator product instead of using innovator / reference product.	Due to unavailability of cefixime 200mg capsule by M/s Laboratoies Normon we have performed equivalence and CDP with comparator product. Moreover the comparator product is approved by DRAP, so we used that for comparative studies.
Provide details including batch number, manufacturing and expiry date of the comparator product used in product development studies.	Product name: Cefim 200mg capsule Batch No 135788 Mfg date: 07/2019 Exp date: 07/2021
Justify the dissolution specifications of NLT 80% in 90 minutes, since the JP monograph specifies this limit only for 100mg potency capsule.	Previously we applied for the registration of cefixime 400mg Capsule with innovator's specs as cefixime 400mg capsule is not defined by JP, USP or BP etc. The DRAP granted the registration with JP specs, in case of cefixime 200mg capsule although not defined by JP, we followed JP specs NLT 80%(Q) in 90 minutes keeping in view the case of cefixime 400mg capsule.
The USFDA review of innovator product of cefixime 400mg capsule reveals that the acceptance criteria for dissolution test should be NLT (Q) in 45 minutes using 7.2 pH phosphate buffer. Justify the results of comparative dissolution profile at 6.8 pH phosphate buffer in which the drug release of both test as well as comparator product was less than 70% in 45 minutes.	The USFDA specification defined are that of cefixime 400mg capsule while for cefixime 200mg, the USFDA recommends tablet dosage form not the capsule, so USFDA 400mg limits can only be used as reference but not mandatory for 200mg capsule. While JP limits are applied because of the point explained in aforementioned query justification.
Justify how exactly same results are obtained in verification studies of drug substance and the drug product.	The results of verification studies of druh product are different from drug substance while compiling dossier we mistakenly misplaced drug substance verification with drug product. Drug product verification studies are now attached.
The formulation development section specifies that the cefixime capsule uses red/red hard gelatin capsule shells, while the batch analysis in section 3.2.P.5.4 specifies that blue/blue hard gelatin capsule shells are used in the product. Clarification is required in this regard.	There was a typo mistake in the batch analysis section 3.2.P.5.4, where capsule color blue/blue is mentioned while we use capsule shel with red/red color.
As per the analytical report of finished product submitted in batch analysis in section 3.2.P.5.4 the results of water, dissolution and assay of Batch T001 are 4.12%, 96.23% and 101.12%, while the results of the same batch mentioned in initial time point of stability studies is 9.06%, 96.69% and 101.06% respectively for the above-mentioned tests. Clarification is required in this regard.	There was a typo mistake in the batch analysis report of T001. Correct report is attached.
Justify how the HPLC analysis was conducted for cefixime capsule in which retention time is around 3.3 minutes, while the JP monograph specifies that the retention time should be around 10 minutes.	JP method was followed for the analysis of cefixime capsule, however, to manage the samples a little deviation in the flow rate was commenced. But in routine analysis JP method was followed without any deviation.

Justify the HPLC analysis using ambient column temperature as mentioned on each chromatogram, since the JP monograph specifies that the column should be maintained at a constant temperature of 40°C.	Column temperature was maintained at 40°C but the column oven is operated manually independent of software so the software does not show the temperature. Now the column oven is replaced with a new oven which is operated with software, so new chromatograms will display the set temperature.
Justify the calculation of results of assay as well dissolution using a different formula as specified in JP monograph.	Firm has submitted new formula for calculation of assay and dissolution results along with revised method and raw data sheets.
Submit copy of commercial invoice as evidence of purchase of drug substance, since proforma invoice dated 07-01-2020 is submitted which does not confirm that the drug substance has been procured.	Firm has submitted copy of invoice (No. 1712), dated 24-01-2021 specifying cefixime compacted 25 Kg Batch number 00244-01/015/2020.
The stability studies specifies that cefixime (compacted) having batch number 00244/015/2020 was used for product development and stability studies. As per the COA of that particular batch, the batch was manufactured in January 2020 and the batch was released after testing on 23-01-2020. Justify how the proforma could be generated on 07-01-2020 even before the analysis and release of the batch.	Proforma invoice is a general agreement (quotation) invoice that is signed between two parties (seller and buyer). It is not for a particular batch. For a particular batch commercial invoice is authentic evidence of purchase.
As per the COA provided in section 3.2.S.4.4. the batch number of drug substance used is 00244/051/2020, while as per stability data the batch number of drug substance used in stability studies is 00244/051/2020. Clarification is required in this regard.	The batch 00244/015/2020 was used for stability studies. A typographic mistake occurred. The COA of the particular batch is also provided.
Provide batch manufacturing record (BMR) of three stability batches.	Firm has submitted copy of BMR of the three stability batches
Provide record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger of temperature and humidity monitoring.

Decision of 307th meeting of Registration Board:

Deferred for following:

- Scientific justification for having retention time around 3.3 minutes in assay testing while JP monograph specifies that retention time should be 10 minutes.
- Scientific justification for adaptation of dissolution acceptance criteria NLT 80% in 90 minutes, since JP monograph specifies this limit only for 100mg potency capsule while USFDA review of innovator product of cefixime 400mg capsule reveals that the acceptance criteria for dissolution test should be NLT (Q) in 45 minutes using 7.2 pH phosphate buffer.

Response by the firm:

Reason for deferment	Response by the firm
Scientific justification for having retention time around 3.3 minutes in assay testing while JP monograph specifies that retention time should be 10 minutes.	• The JP pharmacopoeia does not specify flow rate in the chromatographic conditions for the assay testing. Since flow rate was not specified in JP monograph therefore the flow rate was adjusted during verification studies and system suitability studies. The flow rate at which all the verification parameters and system suitability requirements were met, was finally selected for the assay testing. The retention time of around 4 to 5 minutes was achieved with the flow rate. • The same chromatographic conditions were applied for reference as well as sample solution and both produced similar retention time. The relative retention time for the sample peak was found to be within limit of 0.8 to 1.2. • Furthermore, the USP general chapter (621) CHROMATOGRAPHY under the heading of system suitability specifies that the flow rate for an HPLC method can be adjusted by ±50%. Keeping in view the above scientific justifications we have selected the flow rate which achieved the retention time of 4 to 5 minutes. Therefore, we request that our data may be accepted based upon our scientific justification and supportive data.

Scientific justification for adaptation of dissolution acceptance criteria NLT 80% in 90 minutes, since JP monograph specifies this limit only for 100mg potency capsule while USFDA review of innovator product of cefixime 400mg capsule reveals that the acceptance criteria for dissolution test should be NLT (Q) in 45 minutes using 7.2 pH phosphate buffer.	There are various differences in dissolution test parameters in JP monograph and the FDA innovator product as well as USP. The differences are as follows: **Parameter** / **JP** / **FDA** RPM / 50 / 100 Apparatus / Paddle (II) / Basket (I) Medium / Disodium hydrogen phosphate-citric acid buffer solution / 6.8g/L of monobasic potassium phosphate in water, adjusted with 1N sodium hydroxide pH of the Medium / 7.5 / 7.2 The FDA/ USP method specifies different acceptance criteria i.e. NL T (Q) in 45 minutes as compared to JP monograph. Since FDA method has 2 times higher RPM, a different dissolution apparatus and dissolution medium, and the pH of both medium is also different. Based on these differences in RPM and pH it is evident that performing dissolution test using FDA/ USP conditions will achieve earlier dissolution. To further verify we have also performed dissolution testing of the same batch using FDA/ USP conditions and our results were also more than 80% in 45 minutes. Firm has also submitted results of dissolution test as per FDA method on all of the three batches. The results of all batches were above 90% in 45 minutes.

Discussion of 312nd meeting of Registration Board:
Registration Board deliberated that the product monograph is present in Japanese pharmacopoeia however the dissolution test in JP specifies only 50mg and 100mg strength while the applied product is cefixime 200mg capsule. Therefore, the Board deferred the case for further deliberation in forthcoming meeting.

Proceedings of 313rd meeting of Registration Board:
Registration Board deliberated the matter in detail and after thoroughly reviewing the product review documents of innovator product Suprax 400mg capsule and the monograph of cefixime capsule in Japanese Pharmacopeia 17th Edition, decided to approve the following monograph for cefixime capsule. The Board further decided that the monograph shall be notified for information of all manufacturers and regulatory laboratories. The Board further advised the manufacturer's / importers having registration of the said product to revise their specifications in the light of approved monograph within 6 months after its notification.

Decision of 316th meeting of Registration Board:
Deferred for submission of stability study data of three commercial batches manufactured by the contract manufacturer in section 3.2.P.8.3 as per the 6-points checklist provided in Form 5-F guidance document (PE&R/GL/AF/004) approved by the Registration Board.

Submission by the firm:
Firm has submitted that Registration Board in its 321st meeting decided to also accept product development data / stability data of trial batches manufactured by contract manufacturer. The same stability study data of the contract manufacturer of same batches is already approved by the Board in its 316th meeting of Registration Board.

Decision: Approved with Manufacturer's specifications as approved by Registration Board in its 313th meeting and notified vide letter No. F.14-I/2022-PEC dated 14th March 2022.

- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1621.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A, Sundar Industrial Estate, Raiwind Road Lahore.**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 29-03-2021.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 19-04-2019 based on the inspection dated 01-04-2019. The GMP certificate specifies Dry powder suspension (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 13-06-2016 specifying Dry powder suspension (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 16132: 10-06-2021
	Details of fee submitted	PKR 50,000/-: 19-05-2021 + PKR 25,000/-: 26-05-2021
	The proposed proprietary name / brand name	**GENFIXIM 100mg/5ml Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension Contains: Cefixime as trihydrate……100mg
	Pharmaceutical form of applied drug	White to light yellow powder filled in amber colored glass bottle
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	30 ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime suspension **(USFDA** Approved)
	For generic drugs (me-too status)	Cefim suspension by Hilton
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cebosh dry suspension of Bosch pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.		
API Lot No.	00243/342/2017		
Description of Pack (Container closure system)	Amber color glass bottle		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	180012	180013	180015
Batch Size	5,000 bottles	5,000 bottles	5,000 bottles
Manufacturing Date	02-2018	02-2018	04-2018
Date of Initiation	22-03-2018	19-03-2018	19-04-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous PSI has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 09-02-2018 specifying purchase of 25Kg Cefixime (micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, HPLC chromatograms, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings Communicated	Response by the firm
1.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted drug substance specifications from API manufacturer as well as Cunningham pharmaceuticals dated February 2021. **The specifications of Cunningham pharma are different from API manufacturer as well as BP monograph. Further the API specs are of February 2021 while stability testing was initiated in March 2018.**
2.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board and in line with ICH guidelines specifying the exact concentration of each solution and the detailed procedure for each test.	Firm has submitted verification studies of analytical method of drug substance. The analytical method mentioned in verification studies is different from the analytical procedure submitted in section 3.2.S.4.2. Furthermore the method specifies HPLC technique while the calculation method specifies UV absorbance values.
3.	Submit COA of reference standard actually used in the analysis of drug substance and drug product.	Firm has submitted COA of working standard from Pharmagen Limited.
4.	Submit stability study data of the drug substance (cefixime trihydrate in micronized form) from the drug substance manufacturer as per zone IV-A conditions.	Firm has again submitted the same stability data without clarification whether the cefixime was compacted or micronized.
5.	Provide complete master formulation for each bottle in section 3.2.P.1.	Firm has submitted master formulation per bottle.
6.	Provide details of reconstitution solvent / diluent along with its exact volume which is to be used for reconstitution of the drug product.	Water for injection 20ml is the diluent for reconstitution.
7.	Justify why the pharmaceutical equivalence studies are not performed against the innovator / reference product.	No response submitted by the firm, firm has again submitted the same pharmaceutical equivalence report. **Firm has not performed preservative effectiveness studies.**
8.	Justify why comparative dissolution profile / drug release studies are not performed for your product	Firm has submitted that test for CDP is not mentioned in USP monograph.

	since USFDA has recommended such studies for cefixime suspension.	
9.	Submit data of compatibility of the drug product along with reconstitution solvent in section 3.2.P.2.6.	Firm has submitted results of compatibility studies.
10.	Justify why the test for deliverable volume is not added in drug product specification as recommended in USP monograph. Revise your product specifications in line with USP monograph along with submission of fee for revision of specifications.	Firm has submitted revised specifications in which test of deliverable volume is also added. Firm has not submitted any fee for change of specifications.
11.	Provide details about the standard solution preparation instead of just using the general statement "0.2mg/ml of USP cefixime RS in solution C" as mentioned in USP monograph.	Firm has submitted revised specifications in which detailed method of standard solution preparation is mentioned.
12.	Submit exact details of the assay preparation since the words "*Reconstitute sample as directed n the labelling"* should not be used in the method adopted by a firm. Instead provide details about the exact diluent along with volume in which reconstitution is to be carried out.	Firm has submitted revised specifications in which detailed method of sample solution preparation is mentioned.
13.	Justify the alternate method for assay testing of the drug product which is based on UV analysis.	Firm has submitted that UV method is only for final mix stage in order to save time during the process.
14.	The concentration of standard solution is 0.2mg/ml while your linearity studies are conducted between 0.008mg/ml to 0.02mg/ml in which does not include the concentration of standard solution. Justify your results.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
15.	The repeatability, reproducibility and accuracy studies are reported without specifying the exact concentration of each solution which is tested. Provide results of your verification studies in the light of ICH guidelines.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
16.	Justify how same verification studies are used for the analytical method of cefixime capsule, and suspension as well.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
17.	For Batch No. 180012, the results of batch analysis (performed on 19-02-2018) was 109.86% while the results in initial stability studies at accelerated (performed on 22-03-2018) was 102.65% while the results in initial stability studies at real time (performed on 22-03-2018) was 104.71%. Justify how such significant difference in assay value exists and further justify how the results of initial stability is different for accelerated and real time studies.	It was a typographical error.
18.	For Batch No. 180013, the results of batch analysis (performed on 22-02-2018) was 104.71% while the results in initial stability studies at accelerated (performed on 19-03-2018) was 101.23% while the results in initial stability studies at real time (performed on 19-03-2018) was 104.62%. Justify how such significant difference in assay value exists and further justify how the results of initial stability is different for accelerated and real time studies.	It was a typographical error.
19.	Specify the date of initiation of stability studies for the batch number 180015.	19-04-2018

Decision of 320th meeting of Registration Board:

Deferred for following:

- Scientific justification for having different specifications of the drug substance from that of API manufacturer as well as BP monograph.

- Scientific justification how a revised method of February 2021 can represent the results of the stability studies which were initiated in March 2018.
- Scientific justification for performing verification studies of the analytical method of drug substance using a different analytical method from that specified in section 3.2.S.4.2.
- Submission of stability study data of three batches of cefixime trihydrate (micronized) from the API manufacturer as per zone IV-A conditions.
- Submission of pharmaceutical equivalence and Comparative Dissolution Profile (CDP) against the innovator's product.
- Submission of preservative effectiveness studies.
- Submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Scientific justification how the results of at zero month time point can be different for accelerated and real time conditions.

Response by the firm:

Sr. No	Reasons for deferment	Response by the firm
1.	Scientific justification for having different specifications of the drug substance from that of API manufacturer as well as BP monograph	The firm has submitted revised specifications for drug substance as per B.P.
2.	Scientific justification how a revised method of February 2021 can represent the results of the stability studies which were initiated in March 2018.	The format of SOP For Cefixime was revised in February 2021. However, the testing method was same as that of stability studies initiated in 2018. We didn't change the testing method of API, only format was revised with new revision number and date.
3.	Scientific justification for performing verification studies of the analytical method of drug substance using a different analytical method from that specified in section 3.2.S.4.2.	The firm has stated that the verification studies were performed for analytical method as provided in the section 3.2.S.4.2. Furthermore, the calculation method is also as per B.P. The firm has submitted relevant chromatogram and raw data sheets.
4.	Submission of stability study data of three batches of cefixime trihydrate (micronized) from the API manufacturer as per zone IV-A conditions.	The firm has submitted stability study data of three batches (real time: 36 months: Accelerated: 06 months) according to the conditions of Zone IV-A. Batches: 00243/001/2018, 00243/100/2018, 00243/200/2018
5.	Submission of pharmaceutical equivalence and Comparative Dissolution Profile (CDP) against the innovator's product.	Pharmaceutical equivalence and CDP studies have been performed against Cefspan dry suspension mfg by M/s Barret Hodgson. The firm has submitted the relevant data including calculations of F2 values.
6.	Submission of preservative effectiveness studies.	The firm has performed preservative effectiveness studies and presented the data in relevant section (document no. SOP-MB/02-0238).
7.	Submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	The firm has submitted Rs. 7,500/- for revision of specifications vide challan number 947937869.
8.	Scientific justification how the results of at zero-month time point can be different for accelerated and real time conditions.	The results in raw data sheets are same for accelerated and real time stability at initial time point whereas in stability summary sheets the results are different, it was a typographical error. We are submitting revised stability summary sheets.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

15.	The repeatability, reproducibility and accuracy studies are reported without specifying the exact concentration of each solution which is tested. Provide results of your verification studies in the light of ICH guidelines.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
16.	Justify how same verification studies are used for the analytical method of cefixime capsule, and suspension as well.	Method verification of finished product has been revised as per ICH guidelines. **Firm has not justified previous verification studies.**
17.	Justify how the results of initial stability is different for accelerated and real time studies.	Results of initial stability study are not different from accelerated and real time time studies. However, it was a typographical error. Results of Batch 180016 and Batch 180048 after correction are attached.
18.	Justify why the results of real time stability studies for batch 180016 and 180048 are exactly same.	It was a typographical error. Results of Batch 180016 and Batch 180048 after correction are attached.

Decision of 320th meeting of Registration Board:

Deferred for following:

- Scientific justification for having different specifications of the drug substance from that of API manufacturer as well as BP monograph.

- Scientific justification how a revised method of February 2021 can represent the results of the stability studies which were initiated in March 2018.
- Scientific justification for performing verification studies of the analytical method of drug substance using a different analytical method from that specified in section 3.2.S.4.2.
- Submission of stability study data of three batches of cefixime trihydrate (micronized) from the API manufacturer as per zone IV-A conditions.
- Submission of pharmaceutical equivalence and Comparative dissolution profile (CDP) against the innovator's product.
- Submission of preservative effectiveness studies.
- Submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
- Scientific justification how the results of initial stability can be different for accelerated and real time conditions.

Submission by the firm:

Sr. No	Reasons for deferment	Response by the firm
1.	Scientific justification for having different specifications of the drug substance from that of API manufacturer as well as BP monograph	The firm has submitted revised specifications for drug substance as per B.P.
2.	Scientific justification how a revised method of February 2021 can represent the results of the stability studies which were initiated in March 2018.	The format of SOP For Cefixime was revised in February 2021. However, the testing method was same as that of stability studies initiated in 2018. We didn't change the testing method of API, only format was revised with new revision number and date.
3.	Scientific justification for performing verification studies of the analytical method of drug substance using a different analytical method from that specified in section 3.2.S.4.2.	The firm has stated that the verification studies were performed for analytical method as provided in the section 3.2.S.4.2. Furthermore, the calculation method is also as per B.P. The firm has submitted relevant chromatogram and raw data sheets.
4.	Submission of stability study data of three batches of cefixime trihydrate (micronized) from the API manufacturer as per zone IV-A conditions.	The firm has submitted stability study data of three batches (real time: 36 months : Accelerated : 06 months) according to the conditions of Zone IV-A. Batches: 00243/001/2018, 00243/100/2018, 00243/200/2018
5.	Submission of pharmaceutical equivalence and Comparative Dissolution Profile (CDP) against the innovator's product.	Pharmaceutical equivalence and CDP studies have been performed against Cefspan dry suspension mfg by M/s Barret Hodgson. The firm has submitted the relevant data including calculations of F2 values.
6.	Submission of preservative effectiveness studies.	The firm has performed preservative effectiveness studies and presented the data in relevant section (document no. SOP-MB/02-0238).
7.	Submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	The firm has not submitted any fee.
8.	Scientific justification how the results of at zero-month time point can be different for accelerated and real time conditions.	The results in raw data sheets are same for accelerated and real time stability at initial time point whereas in stability summary sheets the results are different, it was a typographical error. We are submitting revised stability summary sheets.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved. Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1623.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s PDH Laboratories (Pvt) Ltd. 9.5Km Sheikhupura Road Lahore.**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 01-04-2021.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 19-04-2019 based on the inspection dated 01-04-2019. The GMP certificate specifies Capsule (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 13-06-2016 specifying capsule (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 14887: 31-05-2021
	Details of fee submitted	PKR 50,000/-: 28-04-2021 + PKR 25,000/-: 28-05-2021
	The proposed proprietary name / brand name	**PDFIM 400mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule Contains: Cefixime as trihydrate……400mg
	Pharmaceutical form of applied drug	Hard gelatin capsule size # 0 with blue colored body and cap having white to yellow colored powder
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	JP specification
	Proposed Pack size	1x5's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime 400mg capsule **(MHRA** Approved)
	For generic drugs (me-too status)	Cefim Capsule by Hilton
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties,

		solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cebosh capsule.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.		
API Lot No.	00244-11/322/2017 00244-11/344/2017 00244-07/146/2018

Manufacturing Date	02-2018	07-2018	09-2018
Date of Initiation	17-03-2018	07-08-2018	16-10-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP dated 11-01-2019 based on the inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 09-01-2018 specifying purchase of 7Kg Cefixime (compacted) Lot No. 00244-11/322/2017 and 43 Kg cefixime (compacted) Lot No. 00244-11/344/2017. Firm has submitted copy of commercial invoice dated 31-08-2018 specifying purchase of 50Kg Cefixime (compacted) Lot No. 00244-07/146/2018.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted report of stability batches however it is not depicting the audit trail for the analysis of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcomings communicated	**Response by the firm**
Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of method of analysis from drug substance & drug product manufacturer is submitted by the firm.
As per BP method the reference standard solution concentration is 0.01mg/ml while as per the linearity results in verification report of analytical method of drug substance the analysis was made from 0.5mg/ml to 1.4mg/ml. Justify how your linearity studies corresponds to the analytical method of BP.	We performed our linearity studies according to reference solution (a) i.e. 1.0mg/ml and used 0.5mg/ml to 1.4mg/ml concentrations for the linearity study.
You have claimed JP specifications for the drug product and have used drug substance complying BP specifications. Justification is required in this regard.	Firm has not submitted any justification
Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture, since the submitted COA of three batches of API are of different batches than that used in the manufacturing of stability batches.	Submitted COA of relevant batches of drug substance were used for production of commercial batches similar to that used in manufacturing of stability batches. Firm has not provided any COA of relevant batch of API as per the requirements of Form 5F
Justify why pharmaceutical equivalence has been peformed with Cebosh capsule instead of performing	Firm has not submitted any justification

pharmaceutical equivalence against the innovator / reference product.	
Justify how the formulation development has been completed without performing comparative dissolution profile (CDP) studies of your product against the innovator / reference product in three dissolution medium as recommended by WHO guidelines.	Comparative dissolution profile (CDP) was not the requirement at the time of product development. But now CDP has been performed with competitor product. No CDP is submitted by the firm.
Justify the alternate method for assay and dissolution testing of the drug product which is based on UV analysis, since no such alternate method is available in JP monograph.	Firm has not submitted any justification
Justify the dissolution specifications of NLT 80% in 90 minutes, since the JP monograph specifies this limit only for 100mg potency capsule.	Firm has submitted official monograph of JP. Firm has not submitted any justification
The USFDA review of innovator product of cefixime 400mg capsule reveals that the acceptance criteria for dissolution test should be NLT (Q) in 45 minutes using 7.2pH phosphate buffer. Justify how your product may considered equivalent to the innovator product.	Firm has not submitted any justification

- Firm has now submitted stability data sheets for 3 batches. Wherein significant different in assay values exist in accelerated study for batch 180010 (i.e. from 104.32% to 99.18% from initial time to 6 months).
- Similarly the results of initial time point for both accelerated and real time stability is different for both real time and accelerated stability.

Decision of 316th meeting of Registration Board:

Deferred for following:

- Submission of stability study data of three commercial batches of the drug product in which product testing has been conducted as per the product specification approved by Registration Board in its 313rd meeting and notified vide No.F.14-1/2022-PEC dated 14th March 2022.
- Firm shall submit the fee of Rs. 30,000 for revision in stability data, as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021.

Response by the firm:

Firm has submitted stability study data of 3 newly manufactured batches in which product testing has been performed as per the monograph for cefixime capsule approved by Registration Board for 6 months. The details of the newly manufactured batches is as under:

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML No. 20160429 issued by Sichuan Food and Drug Administration. The certificate is valid till 31-12-2020. The certificate was verified from online database of NMPA website of China (accessed on 25-11-2020).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 2nd February 2020 specifying 50gm vitamin D3. The invoice is not attested by AD (I&E). Firm has submitted copy of DL invoice for import of drug substance.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Shortcoming communicated	Response by the firm
Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method*	Firm has submitted report of verification studies of the analytical method of drug substance

Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".	
Submit COA of reference standard in section 3.2.S.5 as per the guidance document approved by Registration Board which specifies that *"COA of primary / secondary reference standard including source and lot number shall be provided"*	Firm has submitted copy of COA of working standard from API manufacturer.
Justify the formulation without any excipient as submitted in section 3.2.P.1 of module 3.	Firm has submitted master formulation containing excipients.
Justify why pharmaceutical equivalence was performed against the comparator product instead of innovator / reference product.	Firm has submitted that the innovator product was not readily available at the time of performing these studies in Pakistan, therefre we have selected comparator product which is approved by DRAP and is the most running brand of Pakistan for comparative studies.
The analytical method submitted in method validation report submitted in section 3.2.P.5.3 contains HPLC method, while the analytical method submitted in section 3.2.P.5.2 was UV method. Further the results of validation of analytical method specifies the value of absorbance which is based on UV method. Clarification is required in this regard.	Firm has not submitted any clarification in this regard.
Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP.	Firm has submitted copy of commercial invoice dated 2nd February 2020 specifying 50gm vitamin D3. The invoice is not attested by AD (I&E). Firm has submitted copy of DHL invoice for import of drug substance.
Submit copy of batch manufacturing record of 3 stability batches.	Firm has submitted Batch Manufacturing Record of 3 stability batches.

Decision of 297th meeting of Registration Board:
Registration Board deferred the case for rationale of applying UV spectrophotometric method performing Assay analysis of finished drug product for quantification of Vitamin D, whereas the drug substance manufacturer has applied HPLC method for the quantification of Vitamin D in Assay test.

Response by the firm:
Firm has submitted stability study data of 3 newly manufactured batches from the same source using the same already imported API, in which product testing has been performed as per HPLC method. The details of the newly manufactured batches is as under:

Batch No.	T001	T002	T003
Batch Size	1000 ampoules	1000 ampoules	1000 ampoules
Manufacturing Date	03-2022	03-2022	03-2022
Date of Initiation	07-03-2022	07-03-2022	07-03-2022

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit fee of Rs. 30,000 for revision in stability data, change in title of the firm from Biogen Pharmaceuticals to Biogen Life Sciences and pharmacological group, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Case No. 04 Registration applications of Form-5 cases

a) New cases

1625	**Name and address of manufacturer / Applicant**	**M/s Scilife Pharma Pvt Ltd. Plot # FD-57/58-A2, Korangi Creek Industrial Park, Karachi**
	Brand Name +Dosage Form + Strength	Biso 2.5mg Tablet
	Composition	Each Film Coated Tablet Contains: Bisoprolol As Fumarate…2.5mg
	Diary No. Date of R& I & fee	Dy No. 16158: 07-03-2019 PKR 20,000/-: 07-03-2019
	Pharmacological Group	Beta blocking agents, selective

Decision of 308th meeting of Registration Board:
The Board after thorough discussion deferred the case for further deliberation for deciding whether the applied product falls under category of Medical Device or Pharmaceutical Drug. Opinion of MDMC Division will also be taken for status of product as per Medical Device Rules.

Evaluation by PEC:
As per the decision of 308th meeting of Registration Board, the case was forwarded to MDMC Division through e-office file number 7-1/2019-PEC. The response of the MDMC Division is placed below:

Reference pre paras, the undersigned searched the GMDN Agency for the said case, and the molecule/formulation 0.1% w/v Sodium Hyaluronate solution is not found in it.
Furthermore, after examination of the case as per the attached documents and provided online link, it is submitted that:-

i. *the intended use of the product as per manufacturer's claim is for the treatment of Keratoconjuctival epithelial disorder and the mechanism of action is that it promotes corneal injury healing by binding to fibronectin and promoting adhering/repairing corneal epithelial cells and not just physiological action.*
ii. *Also the product is a drug in the country of origin i.e. Japan which is one of the stringent regulatory authorities.*

	Therefore, in the light of above stated position, it is proposed that the case may be dealt under the existing rules pertaining to drug.
	Decision: Registration Board after thorough deliberation and considering the response of the MDMC Division and the fact that the applied product is approved as a drug product by PMDA Japan which is a reference regulatory authority, decided to approve the applied product as per Policy for inspection of Manufacturer abroad and verification of local storage facility.

Agenda of Evaluator PEC-IV

Case no. 01 Registration applications for local manufacturing of (Human) drug (Form 5F)

a. New cases

1650.	Name, address of Applicant / Marketing Authorization Holder	M/s Wimits Pharmaceuticals (Pvt) Ltd. Lahore
	Name, address of Manufacturing site.	M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate,Raiwind road,Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 32417 dated 29-11-2021
	Details of fee submitted	PKR 30,000/-: Deposit slip # 080629654
	The proposed proprietary name / brand name	**Mavinate 50mg tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Dimenhydrinate…….50mg
	Pharmaceutical form of applied drug	Almost white coloured round plain tablet
	Pharmacotherapeutic Group of (API)	Anti Histamine agent
	Reference to Finished product specifications	BP
	Proposed Pack size	10×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Dimenhydrinate of MHRA approved.
	For generic drugs (me-too status)	Dymin 50mg tablet by M/s Stanley Pharmaceuticals, Reg. No. 001924
	GMP status of the Finished product manufacturer	cGMP certificate on the basis of evaluation conducted on 08-09-2021
	Name and address of API manufacturer.	M/s S.S Pharmachem,India K-44/45, M.I.D.C. Tarapur, Biosar, Dist. Phalghar Thane, Maharashtra,India.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Dimenhydrinate is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (SAM/DMN/001, SAM/DMN/002, SAM/DMN/003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that Gravinate 50mg tablet by M/s Searle company Lahore (Batch # B0213) by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Gravinate 50mg tablet by M/s Searle company Lahore in Acid media (pH-1.2),Acetate Buffer(pH-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s S.S Pharmachem,India K-44/45, M.I.D.C. Tarapur, Biosar, Dist. Phalghar Thane, Maharashtra, India.
API Lot No.	SAM/DMN/0520014
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (10×10's)
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TDM002	TDM003	TDM004
Batch Size	2000 tab	2000 tab	2000 tab
Manufacturing Date	01-2021	01-2021	01-2021
Date of Initiation	02-02-2021	06-02-2021	10-02-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 6107563 issued by Food and drug Adminstration (Maharashtra State) India valid till 29/06/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 3, form 7 , invoice (invoice# 09/2020-21) dated 25-07-2020 cleared by DRAP Lahore office dated 28-08-2020 specifying import of Dimenhydrinate 100 Kg (Batch# SAM/DMN/0520014).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm submitted assay method by titration as mentioned in B.P monograph.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	Valid Good Manufacturing Practice (GMP) certificate submitted.
2.	3.2.P.2.2.1	Details of product against which Pharmaceutical Equivalence and CDP was conducted.	Gravinate 50mg tablet Batch No # 0213 manufactured by M/s Searle company Lahore
3.	3.2.P.5.2	Method for Dissolution test not submitted.	Method for dissolution submitted.
4.	3.2.P.4.4	Dissolution test not conducted.	Dissolution test are included in COA's
5.	3.2.P.8	• Dissolution is not conducted through out	• Stability studies with dissolution test are submitted

		the stability studies. Clarification is required. • All the test specified in specifications are not in conducted in stability studies. Clarification is required. • In Stability studies summary sheets film coated tablet written while applied formulation is uncoated tablet.	• Complete COA with all test are attached. • It was typographical error and stability summary sheets after correction are attached. Our product is uncoated tablet.

Decision: Approved with BP specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 02 Registration applications for local manufacturing of (Human) drug (Form 5)

a. New cases

1651.	Name and address of manufacturer / Applicant	M/s Rotex Pharma Pvt Ltd. Plot No. 206 & 207. Industrial Triangle, Kahuta Road, Islamabad

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2365 dated 25-01-2022
	Details of fee submitted	PKR 30,000/-: Deposit Slip No# 64944411
	The proposed proprietary name / brand name	**Login 50mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Diclofenac Sodium (as 32% Enteric coated pellets)…50mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	Non steroidal anti inflammatory Drugs
	Reference to Finished product specifications	Innovator specifications
	Proposed Pack size	2 x 10's , 3 x 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Difene 50mg Capsules of Ireland approved
	For generic drugs (me-too status)	Diclogesic 50mg Capsule by Wilson Pharmaceuticals Reg. No. 011892
	GMP status of the Finished product manufacturer	New DML letter issued dated; 16-09-2021
	Name and address of API manufacturer.	Vision Pharmaceuticals (pvt) Ltd Plot3 22-23, Industrial Triangle, Kahutta road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification

		studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Mobikare 50mg Capsule. By M/s Barret Hodgson by performing quality tests (Identification, Assay, and dissolution). Firm has performed comparative dissolution profile against the product i.e Mobikare by M/s Barret Hodgson Batch No# C8862, Pakistan in Acid media (pH 1.2) & Phosphate Buffer (pH 6.8). and the results are within acceptable limit
	Analytical method validation/verification of product	Method Validation have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals (Pvt) Ltd Plot# 22-23, Industrial Triangle, Kahutta road, Islamabad.	
API Lot No.	DE931	
Description of Pack (Container closure system)	PVC Blistering	
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH	
Time Period	Real time: 6 months Accelerated: 6 months	
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)	
Batch No.	TB-C001	TB-C002
Batch Size	5000 Capsules	5000 Capsules
Manufacturing Date	10-2021	10-2021
Date of Initiation	08-10-2021	08-10-2021
No. of Batches	02	

Administrative Portion

13.	Reference of previous approval of applications with stability study data of the firm (if any)	New section
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad. It is valid till 10-02-2022.
15.	Documents for the procurement of API with approval from DRAP (in case of import).	Invoice No # 801689 dated: 16-09-2021 specifying 2 Kg of Diclofenac sodium 32% EC pellets batch no # DE931
16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Data of stability batches have been submitted by UV method along with respective documents like COA, summary data, sheets.
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has performed testing of Login 50mg capsule on UV spectrophotometer
18.	Record of Digital data logger for temperature and humidity monitoring of	Submitted

	stability chambers (real time and accelerated)	

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	2.3.R.1.1	Quantity of Pellets subject to assay and moisture content not calculated, clarification is required	Assay is done on 'as is basis' so there is no need of calculation of moisture content.
2.	2.3.R.1.2	Provide blank master production document / batch manufacturing record to be used during the commercial manufacturing of the applied product.	Submitted
3.	3.2.P.2.2.1	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests of the developed formulation and the innovator product shall be submitted and discussed.	We were unable to arrange the innovator product that's why we couldn't perform Pharmaceutical equivalence against the innovator product. Pharmaceutical equivalence of Login capsules has been performed against Mobikare capsules prepared by Barret Hodgson as per available guidance document on dra website i.e Pharmaceutical equivalence may also be carried out against reference/comparator product.
4.	3.2.P.5.2	• Justification is required for performing assay testing by UV method instead of HPLC method. • Justification is required for setting dissolution limit in phosphate buffer stage as NLT 75% in 45 min which is different from that mentioned in Specifications i.e., NLT 75% in 30 min.	• The assay was performed on UV Spectrophotometer as the method provided by the Diclofenac sodium pellets manufacturer was also on UV, moreover complete method validation has been performed and submitted for your kind consideration. • The dissolution time limit is 45 minutes, the time 30 minutes is typographical error.
5.	3.2.P.5.3	Submit protocols of analytical method validation.	Submitted
6.	3.2.P.8	• Documents for the procurement of the API including purchase invoice from M/s Vision Pharmaceuticals (Pvt.) Ltd. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• Submitted • Submitted

Previous Decision (M-320): The Board deferred the case for scientific justification of performance of assay testing by using UV-spectrophotometer instead of using HPLC method as performed by the reference product.

Reply of firm: For Login 5mg capsules the UV Spectrophotometry was used as in British Pharmacopoeia 2020 Diclofenac sodium Prolong Release Capsule are tested on UV spectrophotometer. The specimen of British pharmacopoeia Diclofenac sodium prolong release capsules is attached. Moreover the supplier also used the same UV spectrophotometric method for testing of pellets**.**

Decision: Approved with innovator's specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Details of fee submitted	PKR 50,000/- deposit Slip # 2037745 PKR 25,000/- deposit Slip # 1453143177
	The proposed proprietary name / brand name	Apalunix 60mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains Apalutamide INN …….60 mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Anti-cancer Androgen receptor inhibitor indicated for the treatment of patients with • Metastatic castration-sensitive prostate. • Cancer. non-metastatic castration-resistant prostate cancer
	Reference to Finished product specifications	In house
	Proposed Pack size	120's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Erleada (Janssen-Cilag Ltd. Belgium)
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Lianyungang Jari Pharmaceutical Co.Ltd No. 18 Zhenhua Road, Lianyungang, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 12 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months Batches: (20180101, 20180102, 20180103)

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against Erleada Tablet 60mg (Janssen-Cilag Ltd. Belgium) the reference product has been submitted. CDP has been performed against the same brand that is Erleada Tablet 60mg by Janssen-Cilag Ltd. in Acid media (pH 1.0-1.2) , Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE bottle (each contains 120 tablets)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months Batches:(3840002, 3840003, 3840004)

Evaluation by PEC:

S.No	Section	Shortcomings Communicated	Reply
1.	1.3.1.	Address mentioned in this section is different than address mentioned on Drug Sale Licence.	Revised new address in section 1.3.1 (Address on DSL after renewal changed)
2.	1.3.4	sole agency agreement / letter of authorization between applicant and marketing authorization holder have different address of applicant	Revised sole agency agreement/letter of authorization submitted. Firm has submitted copy of letter of authorization certificate from Beacon Pharmaceuticals limited. The letter specifies that the manufacturer appoints M/s Himmel Pharmaceuticals Pvt. Ltd. Ground Floor,6-Judicial Colony Phase-I (Ext.) Shahrah Nazaria e Pakistan, Lahore 793-D, Block 'C' , Faisal Town, Lahore to register their products in Pakistan. Issued on : August 14, 2022
3.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by Drug Product manufacturer shall be submitted.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by Drug Product manufacturer
4.	3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of	Certificate of analysis by both drug substance manufacturer and drug product manufacturer are submitted.

		Analysis (CoA) of the same batch from Drug Substance/Active Pharmaceutical Ingredient manufacture.	
5.	3.2.P.5.2	US FDA review document of the Innovator product, specifies the dissolution limit as "NLT Q in 30 minutes" in 0.25% (w/v) SLS in 0.05 M Sodium Phosphate Buffer, pH 4.5 whereas submitted specifications declare the dissolution limits as "NLT 75% in 60 minutes" in 2% SLS in Phosphate Buffer, pH 4.5 as dissolution medium. Justify the variation in time point of dissolution & dissolution medium..	Revised specifications with medium as Innovator product i.e 0.25% (w/v) SLS in 0.05 M Sodium Phosphate Buffer, pH 4.5 and dissolution time is 30 minutes are submitted**.**
Decision: Approved with Innovator's specifications as per Policy for inspection of Manufacturer abroad. Registration letter will be issued upon submission of performance of dissolution testing as per revised specifications according to recommended by innovator drug product. **Firm shall submit full fee of Rs. 75,000/- for pre-approval change/correction in the address fo DSL as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

Batch Size	1000 vials	1000 vials	1000 vials
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	09-2021	09-2021	09-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability studies.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator:

S.no.	Section	Description
1	**2.3.P.1**	Provide summarized information (including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug product.
2	**2.3.P.2.6**	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.
3	**2.3.R.1.1**	**Executed Production Documents** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
4	**3.2.S.4**	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.

		• COA of primary / secondary reference standard including source and lot number shall be provided.
5	**3.2.S.7**	• Significant change in accelerated stability studies of Drug substance manufacturer batch no 16130701, 16130801,16130802 (948 µg/mg to 868 µg/mg, 951 µg/mg to 878 µg/mg and 848 µg/mg to 880 µg/mg respectively). • Justification shall be submitted for not including Sterility and endotoxin testing in stability studies data
6	**3.2.P.3**	• Standard manufacturing procedure for Citi-Taxime 250 mg IM has been provided. Justification required. Furthermore, in Standard manufacturing procure preparation of solution, filtration and filling of liquid (1.00 to 1.20 ml) mentioned for Citi-Taxime. Justification shall be submitted. • The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard.
7	**3.2.P.5**	• In Method validation protocol no. QC/CEPH/MVD/007, issue date 20-11-2021, Testing procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC. • Method validation report for Roxime 250 mg injection (SAP/P/260), procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC. • Detailed analytical procedures used for testing the drug product shall be provided.
8	**3.2.P.7**	Please provide detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials.
9	**3.2.P.8**	• Stability study record of real time batch no. TRI009-003 shall be provided. • In 3.2. P.5. Method validation protocol and report is provided of UV spectrophotometer method. However, in stability studies HPLC chromatograms are provided, which are not in accordance with USP official monograph. As in USP monograph Orcinol in water containing 1.5 mg per mL has been used as internal standard and the resolution, *R*, between the analyte and internal standard peaks is not less than 3.5. However, in provided chromatograms there is no peak of Orcinol. Justification required. • Documents for the procurement of API with approval from DRAP shall be provided. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Please provide Certificate of analysis of API which is actually used in manufacturing of product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Documents for the procurement of API with approval from DRAP (in case of import). • Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: **Real Time**: 16130701, 16130801,16130802. **Accelerated Time:** 16130701, 16130801,16130802.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Zinacef Injection 1.5g IV/IM (GSK Pakistan) by performing quality tests (Identification, Assay, Constituted solution, water , pH., Sterility and Bacterial endotoxin).
	Analytical method validation/verification of product	Method validation studies of UV spectrophotometer method have submitted including , ruggedness, LOD, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Shandong Luoxin Phamaceutical Group Hengxin Pharmaceutical Co, Ltd. West side of Yanbin Road, Economic Development zone, feixian, Linyi, Shandong, P.R. China		
API Lot No.			
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Tri009-001	Tri009-002	Tri009-003
Batch Size	1000 vials	1000 vials	1000 vials
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	09-2021	09-2021	09-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous inspection of the firm has been conducted for verification of stability studies.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator:

S.no.	Section	Description
1	**1.5.4**	Justification shall be provided for pack size of 1.5 g IM/IV injection (10 ml). However, as per innovator its dilution is required with 15 ml water for injection.
2	**2.3.P.1**	Provide summarized information (including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug product.
3	**2.3.P.2.6**	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.
4	**2.3.R.1.1**	**Executed Production Documents** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
5	**3.2.S.4**	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. • COA of primary / secondary reference standard including source and lot number shall be provided.
6	**3.2.S.7**	• Significant change in accelerated stability studies of Drug substance manufacturer batch no 16130701, 16130801,16130802 (948 µg/mg to 868 µg/mg, 951 µg/mg to 878 µg/mg and 848 µg/mg to 880 µg/mg respectively). • Justification shall be submitted for not including Sterility and endotoxin testing in stability studies data
7	**3.2.P.3**	• Standard manufacturing procedure for Citi-Taxime 250 mg IM has been provided. Justification required. Furthermore, in Standard manufacturing procure preparation of solution, filtration and filling of liquid (1.00 to 1.20 ml) mentioned for Citi-Taxime. Justification shall be submitted. • The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard.
8	**3.2.P.5**	• In Method validation protocol no. QC/CEPH/MVD/007, issue date 20-11-2021, Testing procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC. • Method validation report for Roxime 250 mg injection (SAP/P/260), procedure use is UV spectrophotometer at wavelength of 245nm. However, In official monograph USP its method on HPLC.

		• Detailed analytical procedures used for testing the drug product shall be provided.
9	**3.2.P.7**	Please provide detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials.
10	**3.2.P.8**	• Stability study record of real time batch no. TRI009-003 shall be provided. • In 3.2. P.5. Method validation protocol and report is provided of UV spectrophotometer method. However, in stability studies HPLC chromatograms are provided, which are not in accordance with USP official monograph. As in USP monograph Orcinol in water containing 1.5 mg per mL has been used as internal standard and the resolution, *R*, between the analyte and internal standard peaks is not less than 3.5. However, in provided chromatograms there is no peak of Orcinol. Justification required. • Documents for the procurement of API with approval from DRAP shall be provided. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Please provide Certificate of analysis of API which is actually used in manufacturing of product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Documents for the procurement of API with approval from DRAP (in case of import). • Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

Case No.02 Registration applications of local manufacturing of human drugs submitted on Form 5F (New Section)

The central licensing Board in its 282nd meeting held on 31-08-2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five sections in the name of M/s Fleming Pharmaceutical, 23- Km Lahore- Sheikhupura Road, Lahore.

i. Oral Dry powder suspension (Penicillin)
ii. Capsule (Penicillin)
iii. Tablet (Penicillin)
iv. Dry Powder injectable(Penicillin)
v. Dry powder injectable (Carbapenem)

1691.	Name, address of Applicant / Marketing Authorization Holder	M/s Fleming Pharmaceutical 23- Km Lahore-Sheikhupura Road, Lahore.
	Name, address of Manufacturing site.	M/s Fleming Pharmaceutical. 23- Km Lahore- Sheikhupura Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23967 dated 24/08/2022
	Details of fee submitted	PKR 30,000/-: dated 12/08/2022(39263912)

	The proposed proprietary name / brand name	**Dori-F Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Doripenem Monohydrate eq. to Anhydrous Doripenem 500 mg.
	Pharmaceutical form of applied drug	Injectable Vial
	Pharmacotherapeutic Group of (API)	Carbapenems (Beta-Lactam Antibiotic)
	Reference to Finished product specifications	Innovator Specification
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Doripenem Hydrate M/s Shionogi Inc, PMDA Approved.
	For generic drugs (me-too status)	Ronim Injection by M/s Genix Pharma, Reg. No. 088904
	GMP status of the Finished product manufacturer	New license granted on 13/09/2021 Dry Powder injectable (Carbapenem)
	Name and address of API manufacturer.	KOPRAN Research Laboratories. Ltd K-4/4, Additonal MIDC, Post Birwadi Tal, Mahad, Dist. Raigad 402302, Maharashtra State India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm is submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (DPIV-P1807007, DPIV-P1807008, DPIV-P1807009)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader Ronim Injection 500 mg by Genix Pharma by performing quality tests (Identification, Assay, etc.).

	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	KOPRAN Research Laboratories. Ltd K-4/4, Additional MIDC, Post Birwadi Tal, Mahad, Dist. Raigad 402302, Maharashtra State India.		
API Lot No.	DPIV-P2108007		
Description of Pack (Container closure system)	Dori-F injection is filled in Glass vial further packed in unit carton along with patient leaflet insert

Date of Initiation	06-03-2022	06-03-2022	06-03-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML granted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. WHO-GMP/CERT/KD/89275/2020/11/33788 issued by F&DA valid till 19-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Documents for the procurement of API with approval from DRAP, Lahore is provided, specifying the import of 1 kg of Doripenem Monohydrate vide DRAP clearance no. 831/2022DRAP, dated 18-01-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of evaluator:

S.no.	Section	Remarks of evaluator	Response of Firm
1.	**1.5.6**	Justify the finished product specifications as "In-house specifications" since the drug product monograph is available in Japanese Pharmacopoeia. Revise your specifications along with submission of requisite fee.	Specification has been revised to "Japanese Pharmacopoeia". Fee for change in spec has been submitted. **Dori-F 250mg INJECTION**: *SLIP NUMBER: 359794707110* **DORI-F 500mg INJECTION:** *SLIP NUMBER: 8284978682*

<table>
<tr>
<td>2</td>
<td>3.2.S.4</td>
<td>

Justify the use of drug substance having in house specifications while the drug substance specifications are present in JP monograph for “Doripenem hydrate”
Justify the limit of water from 4.0 – 6% in drug substance specifications, while JP monograph specifies the limit from 4.0 – 5.0%.
Justify the limit of Optical rotation from +30° to +40° in drug substance specifications, while JP monograph specifies the limit from +33° to +38°.
Justify why the test for residue on ignition is not performed for the drug substance since it is recommended in JP monograph.
Justify the use of a different analytical method for assay testing of drug substance from that specified in JP monograph. The method of drug substance manufacturer is different in terms of HPLC column specifications, column temperature, mobile phase, UV detector wavelength, flow rate, standard preparation method and final concentration of standard solution, sample preparation method and final concentration of sample solution, system suitability requirements and acceptance criteria and the formula for calculation of results of assay

</td>
<td>

Specification has been revised to “Japanese Pharmacopoeia” and the same will be used for commercial batches.
Comparison of JP & Manufacturer Specs is tabulated below:

<table>
<tr><th>Parameter</th><th>JP Specs.</th><th>Mfg. Specs.</th><th>Fleming Results</th></tr>
<tr><td>Identification</td><td>By UV
By IR</td><td>By HPLC
By IR</td><td>Complies</td></tr>
<tr><td>Water</td><td>4.0 – 5.0%</td><td>4.0 – 5.5%</td><td>4.2</td></tr>
<tr><td>pH</td><td>4.5 and 6.0</td><td>4.0 – 6.0</td><td>4.92</td></tr>

Microbial tests are generally related to manufacturing process, Microbes are not uniformity distributed in a whole batch, a portion of batch may have different results as compared to other if environmental conditions are changed during manufacturing. So sterility test and BET was not performed with Competitor Pack, however We performed both tests for our trials.
However, we assure the competent authority to perform both tests i.e sterility & endotoxin testing if directed.</td></tr>
<tr><td>6</td><td>3.2.P.3</td><td>The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard.</td><td>Details of steps is mentioned in BMRs, Process validation protocol has been revised and accordingly. We assure the competent authority that Validation of manufacturing process will be carried out on commercial batches.
The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper</td></tr>
<tr><td>7</td><td>3.2.P.5</td><td>• Justify the drug product specifications section</td><td>Our trial results are within limits as per JP monograph:
Dori-F 250mg Injection:</td></tr>
</table>

(3.2.P.5.1) with **water** contents from 4.0% to 5.5% while the JP monograph for the drug product specifies water contents to be 4.0 to 5.0%.

- Justify the drug product specifications section (3.2.P.5.1) with **pH** from 4-6 while the JP monograph for the drug product specifies pH to be 4.5-6.0.
- Justify the **limit of assay** from 90 – 110% since the JP monograph specifies the assay limit from 95 – 105%.
- Justify the use of a **different analytical method** for assay testing of drug product from that specified in JP monograph. The analytical method of drug product is different in terms of HPLC column specifications, column temperature, mobile phase, UV detector wavelength, flow rate, total run time and retention time, standard preparation method and final concentration of standard solution, sample preparation method and final concentration of sample solution, system suitability requirements and acceptance criteria and the formula for calculation of results of assay.

Parameter	**JP Specs.**	**Results T-001**	**Results T-002**	**Results T-003**
Water	4.0 – 5.0%	4.7	4.4	5.0
pH	4.5 and 6.0	5.01	4.98	4.52
Assay	95 – 105%	99.82%	99.70%	99.52

a. It is requested to accept the revised limit for the test for "Water" as per JP monograph. We assure to use JP Specs. COA is submitted

b. It is requested to accept the revised limit for the test for "pH" as per JP monograph. Our already stated results are within pharamcopoeial limits. COA is submitted.

c. It is requested to accept the revised limit for the test for "Assay" as per JP monograph. Our already stated results are within pharamcopoeial limits. COA is submitted.

d. Comparison of JP method and Fleming method is tabulated below:

HPLC MFG. METHOD	**HPLC METHOD BY JP**
• **Mobile phase:** Buffer & Acetonitrile:: 96: 4 • **Chromatographic Conditions:** **Column** : 4.6 mm x 250 mm, 5µm ODS RP-8 **Detector** : 295 nm **Column Temperature** :40 ^{0}C **Injection volume** : 10 µl **Flow rate** : 1ml/min	• **Mobile phase:** Buffer & Acetonitrile :: 97: 3 • **Chromatographic Conditions:** **Column** : 4.6 mm x 150 mm, 5µm ODS RP-8 **Detector** : 300 nm **Column Temperature** : 25^{0}C **Injection volume** : 10 µl **Flow rate** : Adjust so that the retention time should be 15 minutes.

We used different HPLC based method however the same was validated for following parameters:

1.2. System suitability.
   a. RSD.
   b. Tailing factor.
   c. Theoretical plates.
1.2. Specificity
1.3. Linearity

			1.4. Accuracy 1.5. Repeatability 1.6. Intermediate Precision 1.7. Stability of Solution 1.8. Robustness Moreover, we have tested our product Dori-F Injection 500 mg (T-001) at 8th Month Stability study as per JP monograph as well as on manufacturer method. Comparison is tabulated below: **Parameter** / **JP Method** / **Mfg. Method** Weight of Ref Standard Taken: 25 mg Conc.(0.125mg/mL) / 50mg Conc.(0.1mg/mL) Average Peak Area: 5242.63 / 4058.01 % RSD: 0.44% / 0.13% Retention Time: 15 minutes / 8 minutes Tailing Factor: 1.23 / 1.01 Assay Results: 100.31% / 99.21% **NO data is submitted**
8	**3.2.P.5.4**	• The copies of complete analysis of at least two batches shall be provided.	Submitted.
9	**3.2.P.7**	• Please provide detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials. • In BMR it is mentioned that USP Type –III glass is used. Whereas in section 3.2.P.1 it is mentioned USP TYPE-II glass vials. Justification required.	• Detail of the container closure systems is provided below: ➢ Transparent Glass vial ➢ Volume 10ml ➢ USP Type-II ➢ Rubber Stopper 20 mm ➢ Flip of seal 20 mm We request to ignore the typographic error, USP Type –II glass vial was used for Trial batches.
10	**3.2.P.8**	a. In stability studies acceptance criteria, limits of tests i.e. **pH , water , assay** etc. are not in accordance with Pharmacopoeia. b. **Sterility testing, Bacterial endotoxin testing, Foreign Insoluble matter** has not been performed in stability studies. c. Documents for the procurement of API with	a. Specification has been revised as per JP monograph, So it is requested to accept our current stability data for the test for "pH, water, assay". Furthered, our already submitted results are within pharamcopoeial limits. We assure to use JP spec for commercial batches. b. In stability studies Sterility testing, Bacterial endotoxin testing, Foreign Insoluble matter has been performed. ***Revised Stability summary provided.*** c. Documents for the procurement of API with approval from DRAP, Lahore is provided, specifying the import of 1 kg of

		approval from DRAP shall be provided. d. Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. e. Please provide Certificate of analysis of API which is actually used in manufacturing of product. f. Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.	Doripenem Monohydrate vide DRAP clearance no. 831/2022DRAP, dated 18-01-2022 d. Record of Digital data logger submitted. e. Certificate of analysis of API(DPIV-P2108007) is provided. f. Compliance record of HPLC software 21CFR & audit trail reports is submitted.

Decision Approved with Japanese Pharmacopoeia(JP) specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021 along with following data:

- **Performance of analysis of next time point of long term stability studies of drug product as well as analytical method verification report of Drug substance and Drug product as per JP monograph.**
- **Performance of residue on ignition test of drug substance as per Japanese Pharmacopoeia(JP) by M/s Fleming Pharmaceutical.**
- **Complete stability data of drug substance as per claimed shelf life (03 years) by the drug substance manufacturer.**

	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (DPIV-P1807007, DPIV-P1807008, DPIV-P1807009)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader Ronim Injection 250 mg by Genix Pharma by performing quality tests (Identification, Assay, etc.).
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	KOPRAN Research Laboratories. Ltd K-4/4, Additional MIDC, Post Birwadi Tal, Mahad, Dist. Raigad 402302, Maharashtra State India.
API Lot No.	DPIV-P2008015
Description of Pack (Container closure system)	Dori-F injection is filled in Glass vial further packed in unit carton along with patientleaflet insert
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	002	003
Batch Size	400 Vial	400 Vial	400 Vial
Manufacturing Date	03-2022	03-2022	03-2022
Date of Initiation	06-03-2022	06-03-2022	06-03-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML granted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. WHO-GMP/CERT/KD/89275/2020/3118/11 issued by F&DA valid till 22/10/2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Documents for the procurement of API with approval from DRAP, Lahore is provided, specifying the import of 1 kg of Doripenem Monohydrate vide DRAP clearance no. 831/2022DRAP, dated 18-01-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.no.	Section	Remarks of evaluator	Response of Firm
1.	**1.5.6**	Justify the finished product specifications as "Inhouse specifications" since the drug product monograph is available in Japanese Pharmacopoeia. Revise your specifications along with submission of requisite fee.	Specification has been revised to "Japanese Pharmacopoeia". Fee for change in spec has been submitted. **Dori-F 250mg INJECTION**: *SLIP NUMBER: 359794707110* **DORI-F 500mg INJECTION:** *SLIP NUMBER: 8284978682*
2	3.2.S.4	• Justify the use of drug substance having in house specifications while the drug substance specifications are present in JP monograph for "Doripenem hydrate" • Justify the limit of water from 4.0 – 6% in drug substance specifications, while JP monograph specifies the limit from 4.0 – 5.0%. • Justify the limit of Optical rotation from +30° to +40° in drug substance specifications,	• Specification has been revised to "Japanese Pharmacopoeia" and the same will be used for commercial batches. Comparison of JP & Manufacturer Specs is tabulated below:

Parameter	JP Specs.	Mfg. Specs.	Fleming Results
Identification	By UV By IR	By HPLC By IR	Complies
Water	4.0 – 5.0%	4.0 – 5.5%	4.2

		while JP monograph specifies the limit from +33º to +38º. • Justify why the test for residue on ignition is not performed for the drug substance since it is recommended in JP monograph. • Justify the use of a different analytical method for assay testing of drug substance from that specified in JP monograph. The method of drug substance manufacturer is different in terms of HPLC column specifications, column temperature, mobile phase, UV detector wavelength, flow rate, standard preparation method and final concentration of standard solution, sample preparation method and final concentration of sample solution, system suitability requirements and acceptance criteria and the formula for calculation of results of assay	<table><tr><td>pH</td><td>4.5 and 6.0</td><td>4.0 – 6.0</td><td>4.92</td></tr><tr><td>Optical rotation</td><td>+33 - + 38º</td><td>+30 - + 40º</td><td>+35.2</td></tr><tr><td>Residue on ignition</td><td>Not more than 0.1%</td><td>Not required to be perform</td><td>Not performed</td></tr><tr><td>Sulphated Ash</td><td>Not required to be perform</td><td>NMT 0.2%</td><td>0.088%</td></tr><tr><td>Assay</td><td>97 – 102% OAB</td><td>98 – 102% OAB</td><td>98.80%</td></tr></table> • It is requested to accept the revised limit for the test for "Water" as per JP monograph. Already stated results are within pharamcopoeial limits. **COA is attached**. • It is requested to accept the revised limit for the test for "Optical rotation" as per JP monograph. Our already stated results are within pharamcopoeial limits. **COA is attached**. • HPLC based method was used and the same was validated for following parameters: 1.3. **System suitability.** a. RSD. b. Tailing factor. c. Theoretical plates. 1.2. **Specificity** 1.3. **Linearity** 1.4. **Accuracy** 1.5. **Repeatability** 1.6. **Intermediate Precision** 1.**7. Stability of Solution** 1.8. **Robustness** Since Specs has been revised to **JP monograph** so the same will be used for commercial batches.
3	3.2.S.7	24 months Real time stability data has been provide for drug substance. However as per COA it has 3 years shelf life. Please provide complete stability data	Not submitted
4	**3.2.P.1**	• Justify how 526mg of Doripenem Monohydrate eq.to Doripenem is equivalent to 500mg of Doripenem as per the label claim. • Justify how 263mg of Doripenem Monohydrate eq.to Doripenem is equivalent to 250mg of Doripenem as per the label claim.	Filled weight per vial was calculated based on Factor and potency of API used. As per JP monograph: Molecular weight of Doripenem Monohydrate : 438.50 g/mol Molecular weight of Doripenem : 420.5 g/mol **Factor** : 1.04 **Potency of API used** = 98.80 % on anhydrous bases

5	3.2.P.2	Please provide complete details of product against which Pharmaceutical Equivalence has been performed. Justification shall be submitted for not performing sterility, endotoxin testing etc. in Pharmaceutical equivalence studies.	Pharmaceutical Equivalence was performed against a competitor Product **Competitor Name**: Genix Pharmaceuticals (Pvt.) Limited **Brand Name** : Ronim Injection ***However, Firm has not provided the details of batch no etc. used details***

1.3 Reference product information

Sr #	Parameters	Acceptable limits /Information	Actual Results
1	Description	--	White to Sligthtly yellowish, off white crystalline powder filled in glass glass vial and properly sealed, labeled and packed in white colored printed unit card board box.
2	Batch No.	--	0121050
3	Average weight	--	Avg. 532.8mg
4	Manufacturing date	--	15-09-21
5	Expiry date	--	14-09-23
6	Manufacturer	--	Genix pharma (Pvt.) Ltd. Pharmaceuticals.
7	pH	--	5.1
8	Water content	--	4.13%
10	Assay	--	98.24%

Microbial tests are generally related to manufacturing process, Microbes are not uniformity distributed in a whole batch, a portion of batch may have different results as compared to other if environmental conditions are changed during manufacturing. So sterility test and BET was not performed with Competitor Pack, however We performed both tests for our trials.
However, we assure the competent authority to perform both tests i.e sterility & endotoxin testing if directed.

6	3.2.P.3	The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard.	Details of steps is mentioned in BMRs, Process validation protocol has been revised and accordingly. We assure the competent authority that Validation of manufacturing process will be carried out on commercial batches. **The process validation protocols do not contain any steps to ensure the sterilization of vials and rubber stopper**
7	3.2.P.5	• Justify the drug product specifications section (3.2.P.5.1) with **water** contents from 4.0% to 5.5% while the JP monograph for the drug product specifies water contents to be 4.0 to 5.0%. • Justify the drug product specifications section (3.2.P.5.1) with **pH** from 4-6 while the JP monograph for the drug product specifies pH to be 4.5-6.0.	Our trial results are within limits as per JP monograph: Dori-F 250mg Injection:

Parameter	**JP Specs.**	**Results T-001**	**Results T-002**	**Results T-003**
Water	4.0 – 5.0%	4.7	4.4	5.0
pH	4.5 and 6.0	5.01	4.98	4.52
Assay	95 – 105%	99.82%	99.70%	99.52

- Justify the **limit of assay** from 90 – 110% since the JP monograph specifies the assay limit from 95 – 105%.
- Justify the use of a **different analytical method** for assay testing of drug product from that specified in JP monograph. The analytical method of drug product is different in terms of HPLC column specifications, column temperature, mobile phase, UV detector wavelength, flow rate, total run time and retention time, standard preparation method and final concentration of standard solution, sample preparation method and final concentration of sample solution, system suitability requirements and acceptance criteria and the formula for calculation of results of assay.

e. It is requested to accept the revised limit for the test for "Water" as per JP monograph. We assure to use JP Specs. COA is submitted

f. It is requested to accept the revised limit for the test for "pH" as per JP monograph. Our already stated results are within pharamcopoeial limits. COA is submitted.

g. It is requested to accept the revised limit for the test for "Assay" as per JP monograph. Our already stated results are within pharamcopoeial limits. COA is submitted.

h. Comparison of JP method and Fleming method is tabulated below:

HPLC MFG. METHOD	HPLC METHOD BY JP
• **Mobile phase:** Buffer & Acetonitrile:: 96: 4 • **Chromatographic Conditions:** **Column** : 4.6 mm x 250 mm, 5µm ODS RP-8 **Detector** : 295 nm **Column Temperature** :40 ^{0}C **Injection volume** : 10 µl **Flow rate** : 1ml/min	• **Mobile phase:** Buffer & Acetonitrile :: 97: 3 • **Chromatographic Conditions:** **Column** : 4.6 mm x 150 mm, 5µm ODS RP-8 **Detector** : 300 nm **Column Temperature** : 25^{0}C **Injection volume** : 10 µl **Flow rate** : Adjust so that the retention time should be 15 minutes.

We used different HPLC based method however the same was validated for following parameters:

1.4. System suitability.
   a. RSD.
   b. Tailing factor.
   c. Theoretical plates.
1.2. Specificity
1.3. Linearity
1.4. Accuracy
1.5. Repeatability
1.6. Intermediate Precision
1.7. Stability of Solution
1.8. Robustness

Moreover, we have tested our product Dori-F Injection 500 mg (T-001) at 8th Month Stability study as per JP monograph as well as on manufacturer method. Comparison is tabulated below:

Parameter	JP Method	Mfg. Method
Weight of Ref Standard Taken	25 mg Conc.(0.125mg/mL)	50mg Conc.(0.1mg/mL)
Average Peak Area	5242.63	4058.01
% RSD	0.44%	0.13%
Retention Time	15 minutes	8 minutes
Tailing Factor	1.23	1.01
Assay Results	100.31%	99.21%
NO data is submitted		

8	**3.2.P.5.4**	• The copies of complete analysis of at least two batches shall be provided.	Submitted.
9	**3.2.P.7**	• Please provide detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials. • In BMR it is mentioned that USP Type –III glass is used. Whereas in section 3.2.P.1 it is mentioned USP TYPE-II glass vials. Justification required.	• Detail of the container closure systems is provided below: ➢ Transparent Glass vial ➢ Volume 10ml ➢ USP Type-II ➢ Rubber Stopper 20 mm ➢ Flip of seal 20 mm We request to ignore the typographic error, USP Type –II glass vial was used for Trial batches.
10	**3.2.P.8**	g. In stability studies acceptance criteria, limits of tests i.e. **pH , water , assay** etc. are not in accordance with Pharmacopoeia. h. **Sterility testing, Bacterial endotoxin testing, Foreign Insoluble matter** has not been performed in stability studies. i. Documents for the procurement of API with approval from DRAP shall be provided. j. Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. k. Please provide Certificate of analysis of API which is actually used in manufacturing of product.	a. Specification has been revised as per JP monograph, So it is requested to accept our current stability data for the test for "pH, water, assay". Furthered, our already submitted results are within pharamcopoeial limits. We assure to use JP spec for commercial batches. b. In stability studies Sterility testing, Bacterial endotoxin testing, Foreign Insoluble matter has been performed. ***Revised Stability summary provided.*** c. Documents for the procurement of API with approval from DRAP, Lahore is provided, specifying the import of 1 kg of Doripenem Monohydrate vide DRAP clearance no. 831/2022DRAP, dated 18-01-2022 d. Record of Digital data logger is submitted. e. Certificate of analysis of API(DPIV-P2108007) is provided. f. Compliance record of HPLC software 21CFR & audit trail reports is submitted.

	l. Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.	

Decision Approved with Japanese Pharmacopoeia(JP) specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021 along with following data:

- **Performance of analysis of next time point of long term stability studies of drug product as well as analytical method verification report of Drug substance and Drug product as per JP monograph.**
- **Performance of residue on ignition test of drug substance as per Japanese Pharmacopoeia(JP) by M/s Fleming Pharmaceutical.**
- **Complete stability data of drug substance as per claimed shelf life (03 years) by the drug substance manufacturer.**

Case no. 3. Registration applications of local manufacturing of human drugs submitted on Form 5F format (Deferred cases)

1693.	Name, address of Applicant / Marketing Authorization Holder	M/s Standpharm Pakistan Pvt. Ltd., 20-km, Ferozepur Road, Lahore
	Name, address of Manufacturing site.	M/s Vision Pharmaceuticals (Pvt.) Ltd, Plot # 22-23, Industrial triangle, Kahuta Road, Islamabad
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	**M/s Standpharm Pakistan:** Panel inspection conducted on 18-02-2020 wherein the panel recommended the renewal of DML. **M/s Vision Pharmaceuticals:** The firm is granted GMP certificate based on inspection conducted on 23-04-2019.
	Evidence of approval of manufacturing facility	**M/s Vision Pharmaceuticals:** The firm has provided sterile Dry powder injection vials (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 11788: 20-04-2021
	Details of fee submitted	PKR 50,000/-: 09-03-2021
	The proposed proprietary name / brand name	CISEC 40mg IV Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Omeprazole sodium eq. to Omeprazole (as lyophilized powder) …….40mg
	Pharmaceutical form of applied drug	Lyophilized Powder for injection
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor
	Reference to Finished product specifications	Innovator's specifications

	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole 40mg powder for solution for infusion of M/s Sandoz Novartis (MHRA approved)
	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Semi-basic Plant (DML # 000806). Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of the developed formulation Rapid 40mg Injection (B#2005707) and comparator product Risek Injection 40mg (B # 789P06) of M/s GETZ Pharma. Quality tests of both products including physical appearance, solubility, water content, pH and assay were compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance.

		Firm has submitted analytical method validation report of applied product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals (Pvt.) Ltd. Semi-basic Plant (DML # 000806). Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad.
API Lot No.	1702901 1702902 1702903
Description of Pack (Container closure system)	Glass vial
Stability Storage Condition	Real Time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Rapid 40mg I.V Injection

Batch No.	1803707	1803708	1803709

Manufacturing Date	03-2018	03-2018	03-2018
Date of Initiation	03-2018	03-2018	03-2018
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad. It is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has procured material from their semi basic manufacturing facility.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail on testing reports of product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Sr. No.	Observations communicated	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification report from M/s Vision Pharmaceuticals Pvt, Ltd. Islamabad.

2.	Certificate of analysis of both drug substance manufacturer and drug product manufacturer are required.	The firm has submitted COAs of 3 batches of omeprazole lyophilized powder. The firm stated that we have a combined QC of both Formulation (000517) and Semi-Basic (000806) facility having same equipment and analysts for both facilities.
3.	Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed.	The firm has performed pharmaceutical equivalence of the developed formulation Rapid 40mg Injection (B#2005707) and Risek 40mg Injection (B # 789P06) manufactured by M/s GETZ Pharma. Quality tests of both products including physical appearance, solubility, water content, pH and assay were compared.
4.	Scientific justification is required for performing assay testing by UV method instead of HPLC method.	As the stability studies of the Bulk lyophilized material is performed by the Bulk manufacturer in the same QC lab with the same instrument (on HPLC) so just for verification purpose we performed the stability of the said product by UV. The firm has not submitted stability study data performed by HPLC alongwith raw data sheets, chromatograms and summary data sheets.
5.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copy of batch manufacturing record of 3 batches for which stability studies were carried out.
6.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Stability testing is performed by UV spectrophotometry therefore audit trail is not required.
7.	Documents for the procurement of drug substance with approval from DRAP is required.	We have procured omeprazole sodium lyophilized ready to fill powder our own Semi-basic facility.
8.	Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.	The firm has not submitted the details of reconstitution diluents with which dilution was carried.
9.	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.	Compatibility studies were not provided with required diluents.

Evaluation by PEC:

<table>
<tr><th>Sr. No.</th><th>Decision of 313th meeting of RB</th><th>Response by the firm</th></tr>
<tr><td>1.</td><td>Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.</td><td>• As we have the facility for semi basic preparation & we are lyophilizing the omeprazole and conduct the testing on HPLC.
• In Omeprazole 40 mg Injection (commercial batch) we are filling the same lyophilized powder tested in our quality control laboratory.
• We performed the final month Stability testing on HPLC. Testing for 36th month is attached in Annexure I.</td></tr>
<tr><td>2.</td><td>Submission of results of in-use stability studies of the drug product to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.</td><td>Testing after reconstitution shows satisfactory results
<table>
<tr><th>Reconstituted Diluent</th><th>Storage Condition</th><th>In-Use Shelf Life</th></tr>
<tr><td rowspan="2">NaCl 0.9% solution</td><td>2 – 8 ºC</td><td>24 Hours</td></tr>
<tr><td>25 ºC</td><td>12 Hours</td></tr>
</table>
</td></tr>
</table>

		Testing Reports with brief summary of results are attached in Annexure II.
3.	Submission of compatibility studies for the dry powder for injections to be performed as per the instructions provided in individual label of the drug product.	Omeprazole Dry Powder for Injection in reconstituted with 10ml of NaCl 0.9% solution and shows satisfactory results after 8 hours under storage condition 2 – 8 ºC. Testing Reports are attached in Annexure III
4.	Capacity assessment of manufacturing and testing facility of M/s Vision Pharmaceuticals Pvt. Ltd.	Capacity Assessment of manufacturing and testing facility of M/s Vision Pharma has been carried out.

Decision of 321st meeting of Registration Board: Registration Board noted the fact that firm had initially submitted stability studies data by UV spectrophotometric method for Assay test, while HPLC method was adopted for the 36th month time point of long term stability studies hence Registration Board deferred the case for submission of batch release data of recently manufactured commercial batches by M/s Vision pharmaceuticals wherein assay testing shall be performed using HPLC method.

Sr. No.	Decision of 321st meeting of RB	Response by the firm
1	**Registration Board noted the fact that firm had initially submitted stability studies data by UV spectrophotometric method for Assay test, while HPLC method was adopted for the 36th month time point of long term stability studies hence Registration Board deferred the case for submission of batch release data of recently manufactured commercial batches by M/s Vision pharmaceuticals wherein assay testing shall be performed using HPLC method.**	The Standard Analytical Procedure for Omeprazole 40mg Injection & Analytical Reports Along with supporting data of **3** latest commercial batches of Omeprazole sodium 40mg Injection have been submitted with HPLC testing

S.no.	Batch no.	Manufacturing date
1.	22J079	09-2022
2.	22H033	08-2022
3.	22J038	09-2022

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The Board further decided that applicant will submit latest GMP inspection report/ GMP Certificate valid within last three years of finished drug product manufacturer before issuance of registration letter along with fee of Rs. 75000/- as pre-registration variation fee for revision of stability data as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

	The status in reference regulatory authorities	Omeprazole 40mg powder for solution for infusion of M/s Sandoz Novartis (MHRA approved)
	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Semi-basic Plant (DML # 000806). Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 36 months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of the developed formulation Rapid 40mg Injection (B#2005707) and Risek 40mg Injection (B # 789P06) manufactured by M/s GETZ Pharma. Quality tests of both products including physical appearance, solubility, water content, pH and assay were compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals (Pvt.) Ltd. Semi-basic Plant (DML # 000806). Plot No. 22-23, Industrial Triangle Kahuta Road, Islamabad.
API Lot No.	1702901 1702902 1702903
Description of Pack (Container closure system)	Glass vial
Stability Storage Condition	Real Time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Rapid 40mg I.V Injection

Batch No.	1803707	1803708	1803709
Batch Size	10,000 vials	10,000 vials	10,000 vials
Manufacturing Date	03-2018	03-2018	03-2018
Date of Initiation	03-2018	03-2018	03-2018
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad. It is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has procured material from their semi basic manufacturing facility.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail on testing reports of product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Sr. No.	Observations communicated	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification report from M/s Vision Pharmaceuticals Pvt, Ltd. Islamabad.
2.	Certificate of analysis of both drug substance manufacturer and drug product manufacturer are required.	The firm has submitted COAs of 3 batches of omeprazole lyophilized powder. The firm stated that we have a combined QC of both Formulation (000517) and Semi-Basic (000806) facility having same equipment and analysts for both facilities.
3.	Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed.	The firm has performed pharmaceutical equivalence of the developed formulation Rapid 40mg Injection (B#2005707) and Risek 40mg Injection (B # 789P06) manufactured by M/s GETZ Pharma. Quality tests of both products including physical appearance, solubility, water content, pH and assay were compared.
4.	Scientific justification is required for performing assay testing by UV method instead of HPLC method.	As the stability studies of the Bulk lyophilized material is performed by the Bulk manufacturer in the same QC lab with the same instrument (on HPLC) so just for verification purpose we performed the stability of the said product by UV. The firm has not submitted stability study data performed by HPLC alongwith raw data sheets, chromatograms and summary data sheets.
5.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copy of batch manufacturing record of 3 batches for which stability studies were carried out.
6.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Stability testing is performed by UV spectrometry therefore audit trail is not required.
7.	Documents for the procurement of drug substance with approval from DRAP is required.	We have procured omeprazole sodium lyophilized ready to fill powder our own Semi-basic facility.
8.	Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use	The firm has not submitted the details of reconstitution diluents with which dilution was carried.

	storage statement and in-use shelf-life shall be provided.	
9.	Compatibility studies for the dry powder for injections and dry powder for suspension shall be performed as per the instructions provided in individual label of the drug product.	Compatibility studies were not provided with required diluents.

Evaluation by PEC:

Sr. No.	Decision of 313th meeting of RB	Response by the firm
1.	Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.	• As we have the facility for semi basic preparation & we are lyophilizing the omeprazole and conduct the testing on HPLC. • In Omeprazole 40 mg Injection (commercial batch) we are filling the same lyophilized powder tested in our quality control laboratory. • We performed the final month Stability testing on HPLC. Testing for 36th month is attached in Annexure I.
2.	Submission of results of in-use stability studies of the drug product to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life.	Testing after reconstitution shows satisfactory results **Reconstituted Diluent** | **Storage Condition** | **In-Use Shelf Life** NaCl 0.9% solution | 2 – 8 ºC | 24 Hours 25 ºC | 12 Hours Testing Reports with brief summary of results are attached in Annexure II.
3.	Submission of compatibility studies for the dry powder for injections to be performed as per the instructions provided in individual label of the drug product.	Omeprazole Dry Powder for Injection in reconstituted with 10ml of NaCl 0.9% solution and shows satisfactory results after 8 hours under storage condition 2 – 8 ºC. Testing Reports are attached in Annexure III
4.	Capacity assessment of manufacturing and testing facility of M/s Vision Pharmaceuticals Pvt. Ltd.	Capacity Assessment of manufacturing and testing facility of M/s Vision Pharma has been carried out.

Decision of 321st meeting of Registration Board: Deferred for submission of data of recently manufactured commercial batches in which assay testing has been performed using HPLC method.

Sr. No.	Decision of 321st meeting of RB	Response by the firm
1	**Deferred for submission of data of recently manufactured commercial batches in which assay testing has been performed using HPLC method.**	The Standard Analytical Procedure for Omeprazole 40mg Injection & Analytical Reports Along with supporting data of **3** latest commercial batches of Omeprazole sodium 40mg Injection have been submitted with HPLC testing S.no. Batch no. Manufacturing date 1. 22J079 09-2022 2. 22H033 08-2022 3. 22J038 09-2022

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The Board further decided that applicant will submit latest GMP inspection report/ GMP Certificate valid within last three years of finished drug product manufacturer before issuance of registration letter.**
- **The Board further decided that applicant will submit latest GMP inspection report/ GMP Certificate valid within last three years of finished drug product manufacturer before issuance of registration letter along with fee of Rs. 75000/- as pre-registration variation fee for revision of stability data as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

Agenda of Evaluator PEC-VIII

Case No. 01: Paracetamol Priority Case:

1695	**Name, address of Applicant / Marketing Authorization Holder**	M/s Horizon Healthcare (Pvt) Ltd, Plot No. 33, Sundar Industrial Estate, Lahore.
	Name, address of Manufacturing site.	M/s Horizon Healthcare (Pvt) Ltd, Plot No. 33, Sundar Industrial Estate, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the drug product manufacturer	GMP Certificate issued on 28-03-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of DML No. 000782 (Formulation) renewed on 03-02-2019 which the approved sections are mentioned including section namely Tablet (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26329 dated 19-09-2022.
	Details of fee submitted	PKR 30000 dated: 18-10-2022 bearing Deposit Slip No. 968710443987
	The proposed proprietary name / brand name	**PYTOL-X Tablet (665 mg)**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Extended release tablet contains: Paracetamol … 665mg USP Specs.
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Analgesic
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	As per SRO

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	OSTEOMOL 665 PARACETAMOL modified release Film **Coated tablet** TGA Australia.
	For generic drugs (me-too status)	Panadol-XR M/s GSK Paksitan Limited, Karachi.
	Name and address of API manufacturer.	**Paracetamol (B.P):** M/s Citi Pharma Limited, 3km, Head Balloki Road, Bhai Pheru, Dist. Kasur, Paksitan DML No. 000512 GMP Certificate No .(Not legible) issued on 19-03-2019
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 60 months. **(Batch No. PGP14-37, PGP14-38, PGP14-39)**
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Panadol Extended Release 665mg Tablets by performing quality tests including Identification, weight variation, Hardness, Assay, Dissolution. CDP has been performed against the same brand that is Panadol Extended Release 665mg Tablets Batch No. 2S6L manufacturing date December 2021 in, Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA			
Manufacturer of API	**Paracetamol:** M/s Citi Pharma Limited, 3km, Head Balloki Road, Bhai Pheru, Dist. Kasur, Paksitan DML No. 000512 GMP Certificate No.(Not legible) issued on 19-03-2019		
API Lot No.	**PGP21-549**		
Description of Pack (Container closure system)	The proposed pack size of PYTOL-X Tablet 665 mg is 2x 10's in Alu—Alu Blister/Aluminum File.		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 12 months Accelerated: 06 months

No. of Batches	02		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	• Not Submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Paracetamol:** M/s Citi Pharma Limited, 3km, Head Balloki Road, Bhai Pheru, Dist. Kasur, Paksitan DML No. 000512 **GMP Certificate No.(Not legible)** issued on 19-03-2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not Required**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with summary data sheets , however, the chromatograms, raw data sheets are not submitted at every point of sampling/testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Following Documents are found deficient:

1. The GMP certificate of API manufacturer is issued on 19-03-2019, therefore, provide updated legible copy of GMP certificate of API manufacture in the light of guidance document.
2. Firm has applied for extended release un-coated tablets while the innovator Product OSTEOMOL 665 PARACETAMOL is modified release Film Coated tablet , therefore, submit evidence of un-coated tablet (Paracetamol 665mg) in Relevant Regulatory authorities.

3. Compatibility studies of the Drug Substance(s) with excipients shall be provided if the qualitative composition of the formulation is not similar to innovator / reference product.
4. Provide Proposed Pack Size of Product.
5. The chromatograms, raw data sheets are not submitted at every point of sampling/testing.
6. Justification shall be submitted for same reading throughout the stability studies of both chambers as per submitted data logger record.

Reply of the Firm :

Sr No	Deficiencies/Short-coming	Answers
1	Provide updated legible copy of GMP certificate of API manufacturer.	Updated GMP Copy of API manufacturer has been attached here
2	Evidence of approval of applied formulation in reference regulatory authorities as defined by the registration Board shall be submitted. As the applied formulation in reference regulatory authorities is approved as "Film coated" tablets while the applicant has applied as un-coated tablets.	It is a typographical mistake to written in composition, Product has been formulated as film coated tablet In process testing record at film stage, filled BMR has been attached here
3	Compatibility studies of the Drug Substance(s) with excipients shall be provided if the qualitative composition of the formulation is not similar to innovator/ reference product.	Qualitative Composition of Pytol-x is same as Innovator Product so Compatibility studies has been not performed Formulation of reference product has been attached here.
4	The chromatograms, raw data sheets shall be submitted for every point of sampling/testing during stability study.	chromatograms, raw data sheets for every point of sampling/testing during stability study has been attached here
5	Justification shall be submitted for same reading (Temperature & Humidity) throughout the stability studies of both chambers as per submitted data logger record.	Stability chamber 21 CFR Compliance software Audit trail has been attached here which shows all changes with date and time

Decision: Registration Board deferred the case for following reasons:

i. **The applicant shall submit detail of measures adopted by other countries (whether RRA or non-RRA) to mitigate the risk of toxicity associated with over-dose of above-mentioned product.**
ii. **The applicant shall also submit detail of practicable measures which will be adopted after grant of marketing authorization to prevent the risk of toxicity associated with over-dose of above-mentioned product.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	• Medasia Pharma is a new license facility hence no such inspection has been conducted.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	. GMP certificate No. DC-I/A-I/WHO-GMP/2019/203 dated 07/2-19 valid till three years
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• **Not Provided**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Not Submitted**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	**Not Submitted**

Evaluation by PEC:

Following Documents are found deficient:

1. Provide valid GMP certificate of API manufacturer.
2. In the standard testing method for assay testing of API Moxifloxacin HCL (USP) the preparation of diluent and Mobile Phase is not done as specified in the USP monograph.
3. USP Specified test namely Microbial Enumeration test and enantiomeric impurity are performed by DS manufacturer in COA but not in stability test reports of API batches.
4. Specifications of excipients are not mentioned. The excipients used are different from the innovator Product (MHRA), therefore, submit compatibility studies .
5. The CDP and test reports are un-signed.
6. Uniformity of content test is USP specified test but is not performed during stability of Drug Product.
7. The HPLC conditions (injection volume and flow rate) are different from the ones specified in USP in assay testing of Drug Product.
8. Chromatograms supporting the stability studies are not submitted for every point of stability testing.
9. Compliance Record of HPLC software 21CFR & audit trail reports on product testing & Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted.
10. BMR of trial batches is not submitted.
11. Specify the API Lot No being used in trial batches along with Documents for the procurement of API with approval from DRAP (in case of import).

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	M/s Zenith Chemical Industry Lahore GMP Certificate No. 141/2019-DRAP(AD-813875-228) dated : **22-05-2019**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not required.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	For march 2021 while the stability is initiated in May 2021.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Submitted.**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	**Submitted.**

Evaluation by PEC:

1. GMP certificate of API manufacturer is issued on 22-05-2019.
2. Analytical assay method verification test reports/results of API by both Drug Substance and Drug Product manufacturer are not submitted
3. Provide detail of excipients along with specifications along with compatibility studies as the excipients used in Product development are different from the ones of innovator product.
4. Uniformity of Dosage forms is a USP Specified test for Drug Product but in stability study reports/results it is not performed and is not mentioned in Stability data test reports of 400mg tablet and both Uniformity of Dosage forms
5. Detail of equipment's/machinery as used in Product Development if not submitted.
6. Product Assay method as mentioned in Product Development is different from the one specified in (USP).
7. Specificity Method and test reports are not submitted for Drug Product.
8. %RSD is not calculated for tests performed for Drug Product analytical method verification.
9. In BMR check points include i.e. average tablet size to be 460mg, and target weight is also 460mg while the Tablet is of 200mg.
10. Chromatograms submitted along with stability data sheets in Briprofin 200mg tablets, date of data processing/acquiring is mentioned as 11-03-2021 while the stability is initiated in May 2021.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

Evaluation by PEC:		
Following Documents are found deficient:		

1. In the standard testing method for testing of DS Losartan Potassium (USP) ,the wavelength used by DS Manufacturer is 215nm while the wavelength used by the manufacturer of Product is 220nm and the wavelength specified in the USP is different.
2. Stability data of Data Product provided is of three(03) months rather than 06 months.

Reply of Observations:

S. No.	Deficiencies / Short-comings	Justification
1.	In the standard testing method for testing of testing of DS Losartan potassium (USP), the wavelength used by DS manufacturer is 215nm while the wavelength used by the manufacturer of drug product is 220nm and the wavelength specified in the USP is different.	We have been performed Analysis / testing of Losartan potassium Drug Substance as per USP monograph and analytical method verification studies as per ICH guidelines, supporting documents are being attached for your kind perusal: i. Drug substance analytical method as per USP. ii. Drug substance analytical method verification studies in accordance with USP. iii. Revised Certificate of analysis of drug substance analyzed by USP method.
2.	Stability data of product provided is of three (03) months rather than 06 months.	Initially we have submitted CTD dossier application with 3 months stability data, later on again we have submitted 6 months stability data accordingly vide letter DRAP/TAB-REG/03-22, dated March 2,2022. Copy of acknowledgment letter is attached for your ready reference.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

S. No.	Deficiencies / Short-comings	Justification
1.	In the standard testing method for testing of testing of DS Losartan potassium (USP), the wavelength used by DS manufacturer is 215nm while the wavelength used by the manufacturer of drug product is 220nm and the wavelength specified in the USP is different.	We have been performed Analysis / testing of Losartan potassium Drug Substance as per USP monograph and analytical method verification studies as per ICH guidelines, supporting documents are being attached for your kind perusal: i. Drug substance analytical method as per USP. ii. Drug substance analytical method verification studies in accordance with USP. iii. Revised Certificate of analysis of drug substance analyzed by USP method.
2.	Stability data of product provided is of three (03) months rather than 06 months.	Initially we have submitted CTD dossier application with 3 months stability data, later on again we have submitted 6 months stability data accordingly vide letter DRAP/TAB-REG/03-22, dated March 2,2022. Copy of acknowledgment letter is attached for your ready reference.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform procss validation of first three batches as per the commitment submitted in the registration application.**

Agenda of Evaluator PEC-IX

1701.	Name and address of manufacturer/ Applicant	M/s Alfalah Pharma (pvt), Ltd, 12-Km, Sheikhupura Road, Lahore (contract giver) (DML No. 000461) M/s Synchro Pharmaceuticals, 77-Industrial Estate, Kot Lakhpat, Lahore (Contract Acceptor) (DML No. 000575) Dry Powder Injection (Cephalosporin)
	Brand Name + Dosage Form + Strength	ALFAXON 500mg Injection (IM)
	Composition	Each Vial Contains; Ceftriaxone (as sodium) ….500mg
	Diary No. Date of R & I & fee	Dy. No. 16422 dated 07.03.2019. Fee paid Rs. 50,000/- vide Slip No. 0795642 dated 06-03-2019, endorsed on 07.03.2019. Duplicate Dossier submitted vide Dy. No. 32790 dated 15.11.2022.
	Pharmacological Group	Third-generation cephalosporins. ATC Code: J01DD04
	Type of Form	Form-5 (Contract manufacturing)
	Finished product Specification	USP Specification
	Pack size & Demanded Price	01's. As per SRO.
	Approval status of product in Reference Regulatory Authorities	Ceftriaxone 250mg, 500mg and 1g Powder for Solution for Injection and 2g Pwder for Solution for Injection or Infusion - PL 22805/0001, 3-5 MHRA Approved.
	Me-too status	Rociphen Injection 500mg IM Reg. No. 008434 M/s Martin Dow.
	GMP status	Last inspection conducted on 22.01.21. GMP status is good. GMP certificate valid till 21.01.2023 is submitted
	Remarks of the Evaluator	
	Decision: Approved. Registration Board further decided to verify fee challan as per decision of 285th meeting of Registration Board.	
1702.	Name and address of manufacturer/ Applicant	M/s Perk Pharma (Pvt.) Ltd. Plot No. 197/1-B Main Road, Industrial Estate, Gadoon. (contract giver) (DML No. 000857) M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle, Kahuta Road Islamabad (Contract Acceptor) (DML No. 000296) LVP
	Brand Name + Dosage Form + Strength	LINZEPERK 600mg/300mL (IV)
	Composition	Each Vial Contains; Linezolid …..600mg
	Diary No. Date of R & I & fee	Dy. No. 16811 dated 07.03.2019. Fee paid Rs. 50,000/- vide Slip No. 0840478 dated 05-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	Other antibacterials. ATC Code: J01XX08
	Type of Form	Form 5 (Contract)
	Finished product Specification	Manufacturer's Specifications.

	Pack size & Demanded Price	300mL x 1's. As per SRO
	Approval status of product in Reference Regulatory Authorities	Zyvox 2 mg/ml solution for infusion, 300 ml infusion bags contain 600 mg linezolid. MHRA Approved
	Me-too status	Nezkil 600 mg Infusion, Reg. No. 048804 M/s S.J. & G. Fazul Ellahi (Pvt.) Ltd. Karachi
	GMP status	Last inspection conducted on 08.03.2021. GMP status is good.
	Remarks of the Evaluator	Section Approval letter (for LVP) of M/s Bio Labs is required.
	Decision: Deferred for evidence of availability of filling line for fill volume of parenteral solutions upto 300ml in M/s Bio-Labs (Pvt.) Ltd. Islamabad.	
1703.	Name and address of manufacturer/ Applicant	M/s Medisave Pharmaceuticals 578-579 Sundar Industrial Estate Sundar Raiwind Road Lahore. (contract giver) (DML No. 000681) M/s Stallion Pharmaceuticals (Pvt.) Ltd. Plot No. 581, Sundar Industrial Estate Lahore (Contract Acceptor) (DML No. 000783) Dry Powder Injection (Penicillin) Section
	Brand Name + Dosage Form + Strength	TAZOSAVE 4.5g (IV)
	Composition	Each Vial Contains; Piperacillin (as piperacillin sodium)…..4g Tazobactam (as tazobactam sodium)….0.50g
	Diary No. Date of R & I & fee	Dy. No. 14984 dated 07.03.2019. Fee paid Rs. 50,000/- vide Slip No. 0536167 dated 05-03-2019, endorsed on 06.03.2019.
	Pharmacological Group	Combinations of penicillins, incl. beta-lactamase inhibitors. ATC Code: J01CR05
	Type of Form	Form 5 (Contract)
	Finished product Specification	USP Specifications.
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	PIPERACILLIN/TAZOBACTAM 4 G/ 0.50 G POWDER FOR SOLUTION FOR INJECTION OR INFUSION - PL 28176/0046 MHRA APPROVED.
	Me-too status	Tanzo 4.5gm Inj Reg. No. 039439 M/s Bosch Pharmaceuticals Karachi..
	GMP status	Last inspection conducted on 22.11.2018.
	Remarks of the Evaluator	i. Section approval letter of carbapenem section is provided, penicillin section approval letter is required. ii. Latest GMP inspection report/GMP certificate of M/s Stallion is required.
	Decision: Approved. Registration Board further authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt.) Ltd	
1704.	Name and address of manufacturer/ Applicant	M/s Medisave Pharmaceuticals 578-579 Sundar Industrial Estate Sundar Raiwind Road Lahore. (contract giver) (DML No. 000681) M/s Stallion Pharmaceuticals (Pvt.) Ltd. Plot No. 581, Sundar Industrial Estate Lahore (Contract Acceptor) (DML No. 000783) Dry Powder Injection (Carbapenem) Section
	Brand Name + Dosage Form + Strength	MEROSAVE 500mg (IV)
	Composition	Each Vial Contains; Meropenem (as Meropenem trihydrate)…..500mg

	Diary No. Date of R & I & fee	Dy. No. 14986 dated 07.03.2019. Fee paid Rs. 50,000/- vide Slip No. 0788765 dated 05-03-2019, endorsed on 06.03.2019.

III: M/s Evergreen Pharmaceuticals, 69-70/B, Main Glaxo Town, 20-Km Ferozepur Road, Lahore. Central Licensing Board in its 287th meeting held on 24th June, 2022 has considered and approved the following additional section of firm M/s Evergreen Pharmaceuticals, 69-70/B, Main Glaxo Town, 20-Km Ferozepur Road, Lahore. Accordingly, the Secretary CLB has issued letter for grant of additional section dated 04th July, 2022.

In 321st meeting below mentioned products have been considered on priority against new sections as detailed below:

Sr. No.	Section	Previously considered applications

		Molecules	Products
01	**Oral powder penicillin section**	**07**	**10**

Now following applications of the firm have been received and are presented below for consideration, against the available balance for priority consideration.

Oral powder penicillin section
02 Molecules/ 02 Products

1832.	Name and address of manufacturer / Applicant	M/s Evergreen Pharmaceuticals, 69-70/B, Main Glaxo Town, 20-Km Ferozepur Road, Lahore
	Brand Name +Dosage Form + Strength	PPS-Plus Powder
	Composition	Each 1000gm Contains: Procaine Penicillin (Procaine Benzylpenicillin) …12gm Streptomycin Sulphate…36gm Zinc Bacitracin…52gm Colistin Sulphate…60 MIU
	Diary No. Date of R& I & fee	Dy. No 33423 dated 21-11-2022 Rs. 30,000/- dated 17-11-2022
	Pharmacological Group	Antibacterial/Antibiotic
	Type of Form	Form 5
	Finished product Specification	Innovator's specifications
	Pack size & Demanded Price	1Kg, 5Kg, 25Kg, 50Kg: Decontrolled
	Me-too status	BPS-Plus Powder of M/S Baariq Pharmaceuticals, Lahore. (Reg. No.087171)
	GMP status	**Oral powder (Penicillin) section** granted vide letter No. F. 1-31/2010-Lic (Vol-I) dated 04-07-2022
	Remarks of the Evaluator [X]	The firm was asked to provide conversion of Colistin Sulphate from MIU to grams. In this regard it has been submitted, *That the observation related to API **Colistin Sulphate** and its conversion from MIU to Grams, is variable, consequent upon the **COA of Active Raw material, and its Assay**, which always vary from batch to batch, so this API need to be ascertained its weight vis-à-vis its assay.* *There is no hard and fast rule to ascertain its weight, before the authentication of assay, so this objection may not be considered as mandatory, considering the manufacturing of the product and its assay of the batch.*
	Decision: Approved with pack size of 1Kg.	
1833.	Name and address of manufacturer / Applicant	M/s Evergreen Pharmaceuticals, 69-70/B, Main Glaxo Town, 20-Km Ferozepur Road, Lahore
	Brand Name +Dosage Form + Strength	GPS-100 Powder

	Remarks of the Evaluator [x]	• Latest GMP inspection report (conducted within the period of last three years). • Approval of section/manufacturing facility by the Central Licensing Board. However, you may submit panel inspection report for renewal of DML verifying the section/manufacturing facility. • Provide evidence of pharmacopoeial reference of finished product specification. In case, the product is non pharmacopoeial, submit product specification in the light of decision taken in 267th meeting of Registration Board. • Separate registration is granted to separate pack size/fill volume of injectable dosage form. However, multiple pack sizes of injectable dosage form are demanded in a single application. So clarification is required for which pack size/ fill volume you want to apply this dossier.
	Decision: Approved with Innovator's Specifications. Registration letter shall be issued after submission of following: • **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **GMP inspection report conducted within the period of last three years** • **Choice of fill volume of 10ml or 20ml.** • **Fee verification as per procedure adopted by Registration Board in its 285th meeting.**

		panel inspection report for renewal of DML verifying the section/manufacturing facility. • Provide evidence of pharmacopoeial reference of finished product specification. In case, the product is non pharmacopoeial, submit product specification in the light of decision taken in 267th meeting of Registration Board.
	Decision: Approved with Innovator's Specifications. **Registration letter shall be issued after submission of following:** • **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **GMP inspection report conducted within the period of last three years** • **Fee verification as per procedure adopted by registration Board in its 285th meeting**	
1855.	Name and address of manufacturer / Applicant	M/s A & K Pharmaceuticals, 94-A, Punjab Small Industrial Estate, Faisalabad.
	Brand Name +Dosage Form + Strength	Fendacare Drench
	Composition	Each 100ml contains: Fenbendazole……..2.5gm
	Diary No. Date of R& I & fee	**Duplicate dossier submitted which was confirmed from R&I section, DRAP** Dy.No 361 dated 08-10-2015 Rs.20,000/- dated 08-10-2015 (**Duplicate fee challan attached**)
	Pharmacological Group	Anthelmintic
	Type of Form	Form 5
	Finished product Specification	Not mentioned
	Pack size & Demanded Price	100ml, 450ml, 500ml, 1Liter; Decontrolled
	Me-too status	Avi-Fen Liquid of M/s Avicenna Laboratories (Pvt) Ltd., Sheikhupura. (Reg. No. 063656)
	GMP status	Not submitted
	Remarks of the Evaluator [X]	• Latest GMP inspection report (conducted within the period of last three years). • Approval of section/manufacturing facility by the Central Licensing Board. However, you may submit panel inspection report for renewal of DML verifying the section/manufacturing facility. • Provide evidence of pharmacopoeial reference of finished product specification. In case, the product is non pharmacopoeial, submit product specification in the light of decision taken in 267th meeting of Registration Board.
	Decision: Approved with Innovator's Specifications. **Registration letter shall be issued after submission of following:** • **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **GMP inspection report conducted within the period of last three years** • **Fee verification as per procedure adopted by registration Board in its 285th meeting**	
1856.	Name and address of manufacturer / Applicant	M/s A & K Pharmaceuticals, 94-A, Punjab Small Industrial Estate, Faisalabad.
	Brand Name +Dosage Form + Strength	Milko-Plus Granules
	Composition	Each kg Contains: Calcium…….155 grams Phosphorus……135 grams Magnesium……..…55 grams Sodium…….45 grams

		Iron……..…1 grams Zinc……3 grams Manganese…..…2 grams Copper……0.6 grams Cobalt……..0.01 grams Iodine……0.04 grams
	Diary No. Date of R& I & fee	**Duplicate dossier submitted which was confirmed from R&I section, DRAP** Dy.No 42766 dated 14-12-2018 Rs.20,000/- dated 14-12-2018 (**Duplicate fee challan attached**)
	Pharmacological Group	Immunological, electrolyte
	Type of Form	Form 5
	Finished product Specification	Not mentioned
	Pack size & Demanded Price	1Kg Jar, 5Kg bag, 10Kg bag, 25Kg bag; Decontrolled
	Me-too status	L.S. Minerals Powder of M/s Nawan Labs Karachi. (Reg. No. 021306)
	GMP status	Not submitted
	Remarks of the Evaluator [X]	• Latest GMP inspection report (conducted within the period of last three years). • Approval of section/manufacturing facility by the Central Licensing Board. However, you may submit panel inspection report for renewal of DML verifying the section/manufacturing facility. • Provide evidence of pharmacopoeial reference of finished product specification. In case, the product is non pharmacopoeial, submit product specification in the light of decision taken in 267th meeting of Registration Board.
	Decision: Deferred for evidence of testing facility and completion of salt form.	

Agenda of Evaluator PEC-XI

Case No. 01: Registration applications of New Section of Human drugs on Form 5-F (Local)

M/s Titlis Pharma, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore
The Central Licensing Board in its 285th meeting held on 17th & 18th March, 2022 has considered and approved the grant of following sections of **M/s Titlis Pharma, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore** under Drug Manufacturing License No. 000779 (Formulation) vide approval letter No. F. 1-11/2009-Lic (Vol-I) dated 10th May, 2022.

S No.	Section
	Tablet Section II (General) **New**
	Dry Powder Suspension Section. **New**
	Dry Powder Sachet Section (General). **New**

Following applications have been submitted for registration by the firm.

1857.	Name, address of Applicant / Marketing Authorization Holder	M/s Titlis Pharma (Pvt.) Limited., 528-A , Sunder Industrial Estate, Raiwind Road, Lahore.
	Name, address of Manufacturing site.	M/s Titlis Pharma (Pvt) Limited., 528-A , Sunder Industrial Estate, Raiwind Road, Lahore.
	Status of the applicant	☒ Manufacturer

		☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20726 dated 22/07/2022
	Details of fee submitted	PKR 30,000/-: dated 10/06/2022 (Slip#136469119630)
	The proposed proprietary name / brand name	**Respiklar 125mg/5ml Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Clarithromycin ……. 125mg/5ml
	Pharmaceutical form of applied drug	Dry powder suspension
	Pharmacotherapeutic Group of (API)	Macrolide Antibiotics
	Reference to Finished product specifications	USP
	Proposed Pack size	60ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Klaricid Paediatric Suspension 125mg/5ml MHRA Approved
	For generic drugs (me-too status)	Claritek Granules for Oral Suspension 125mg/5mg by M/s Getz Pharma (Reg#09846)
	GMP status of the Finished product manufacturer	New section granted on 17th & 18th March, 2022 and letter issued on 10th May, 2022
	Name and address of API manufacturer.	Vision Pharmaceuticals (Pvt.) Ltd, Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad- Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CTM0510, CTM0511, CTM0513)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Claritek 125mg/5ml Dry Powder Suspension by M/s Getz Pharma by performing quality tests (pH, Assay, Dissolution, weight/ml and weight variation) and results are within specifications
	Analytical method validation/verification of product	Firm has submitted method verification studies including specify, accuracy, precision.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals (Private) Limited, Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad- Pakistan		
API Lot No.	CTM0678		
Description of Pack (Container closure system)	Amber colored glass bottle sealed with aluminium PP cap printed with 'Titlis Pharma' packed in cardboard carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RP-01	RP-02	RP-03
Batch Size	100 Bottle	100 Bottle	100 Bottle
Manufacturing Date	Dec-2021	Dec-2021	Dec-2021
Date of Initiation	12-12-2021	12-12-2021	12-12-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted;
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of M/s Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022. The firm has also submitted receiving of request applied for GMP Inspection dated 22nd December 2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not Submitted;
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted;
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted;

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.2	• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while	The firm submitted that the title of our company has been changed in 279th meeting of Central Licensing Board, and the new approved title is "Titlis Pharma (Private) Limited". The change of title approval letter from Central Licensing Board

	name mentioned on DML is M/s Titlis Pharma., Clarification is required	in the name of "Titlis Pharma (Private) Limited" is submitted.
1.5.2	• Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit shall be clearly mentioned	The firm has submitted the Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit as: Each 5 ml contains: Clarithromycin…… 125mg
2.3.R	• In executed BMR percentage of clarithromycin (granules) is written as 28.33 % while in module 3 section 3.2.P.1 percentage of clarithromycin (granules) is written as 27.5%, clarification is required	The firm submitted that the specification of Clarithromycin taste masked pellets being used is 27.5% (Limit is 24.75% to 30.25%) as per manufacturer's COA; and COA of Vision Pharma is submitted., We M/S Titlis Pharma performed testing of API (Clarithromycin taste masked pellets 27.5%; Batch # CTM0678) and results of assay was 28.33% which was well within the specified limit (COA of API from Titlis Pharma is submitted). Thus the specification of Clarithromycin granules being used is 27.5% and in executed BMR the percentage of Clarithromycin granules was mentioned as 28.33% which was as per our QC results
3.2.S.4	• Copies of the specifications and analytical procedures used for routine testing of the Drug substance by Drug product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Copies of the specifications and analytical procedures used for routine testing of the Drug substance by Drug product manufacturer is submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) is submitted.
3.2.P.2	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the innovator/comparator product including the tests recommended USP monograph (deliverable volume, loss on drying). • Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product?	• The firm submitted that we have performed all the tests as per USP monograph including deliverable volume & loss on drying in pharmaceutical equivalence study; and revised Pharmaceutical Equivalence Study Reports are submitted • The firm submitted that Pharmaceutical Equivalence Study has been established against the innovator product 'Klaricid 125mg/5ml Dry Powder suspension' of Abbot Laboratories and against 'Claritek 125mg/5ml Dry Powder suspension' of Getz Pharma by performing quality tests as per USP; and results are within specifications and comparable with both Klaricid and Claritek dry powder suspension. Pharmaceutical Equivalence Study Reports against Klaricid is submitted.
3.2.P.5	• Justification is required for not including test for deliverable volume in specifications as recommended by USP • Justification is required since chromatographic conditions mentioned in analytical procedure (injection volume 20ul instead of 50ul, column length 250 mm instead of 15cm) is different from that recommended by USP • Justification is required for using 100rpm in dissolution studies instead of 50rpm as recommended by USFDA dissolution database	• The firm submitted that we have revised the specification and included the test for deliverable volume in finished product specification; as per USP. The firm has also submitted revised specification and analytical method • The firm submitted that sample and standard were analyzed under same chromatographic conditions (including the same injection volume) and found that the results were closely comparable. • The firm submitted that USP <621> states that injection volume can be adjusted as it is consistent with acceptable precision. • The firm submitted we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification, Linearity, Accuracy and Recovery. Results of above said validation parameters complied with the Relative Standard Deviation limits. ***However, firm have submitted analytical method verification studies and not method validation studies.***

Justification is required for using 100rpm in dissolution studies instead of 50rpm as recommended by USFDA dissolution database;

The firm submitted that we have performed the dissolution testing at 50rpm for our product Respiklar 125mg/5ml Dry Powder Suspension' and innovator's 'Klaricid 125mg/5ml Dry Powder Suspension', and the results are as follows:

Dissolution data table:
Dissolution Study at 50 RPM

Limit: NLT 75 % in 45 minutes at 50 RPM

Respiklar Dry Powder Suspension 125mg/5ml
Batch No: RP-01
Dissolution Results:
Minimum %= 87.38% Maximum %= 96.24% Average %= 92.01%

Batch No: RP-02
Dissolution Results:
Minimum %= 86.33% Maximum %= 98.45% Average %= 92.52%

Batch No: RP-03
Dissolution Results:
Minimum %= 87.63% Maximum %= 96.00% Average %= 92.13%

Klaricid Dry Powder Suspension 125mg/5ml
Batch No: 412897XV
Dissolution Results:
Minimum %= 89.86% Maximum %= 100.25% Average %= 96.30%

Dissolution Study at 100 RPM
Limit: NLT 75 % in 45 minutes at 100 RPM

Respiklar Dry Powder Suspension 125mg/5ml
Batch No: RP-01
Dissolution Results:
Minimum %= 88.78% Maximum %= 101.47% Average %= 94.95%

Batch No: RP-02
Dissolution Results:
Minimum %= 91.01% Maximum %= 99.77% Average %= 95.29%

Batch No: RP-03
Dissolution Results:
Minimum %= 93.46% Maximum %= 101.56% Average %= 96.06%

Klaricid Dry Powder Suspension 125mg/5ml
Batch No: 412897XV
Dissolution Results:
Minimum %= 85.17% Maximum %= 97.21% Average %= 88.35%

The data shows there is no impact of change of rpm as the results are more than 80% within 45 minutes.
We further undertake in future, we will perform all the testing at 50rpm

3.2.P.6	Clarification is required since the submitted COA of reference / working standard is from M/s Nexchem Pharmaceutical Co., Ltd China and it follow enterprise standard specifications while source of API is M/s Vision Pharma and the product monograph is available in USP

Firm's Response: Firm submitted a comparison table of tests for USP specifications and specifications followed by Working standard of M/s Nexchem Pharmaceutical.

TEST PERFORMED	SPECIFICATION USP	Working standard Nexchem Pharmaceutical; RESULTS
Description	White to almost white crystalline powder	Complies
Solubility	Practically insoluble in water, soluble in methyl chloride, and in acetone, Slightly soluble in phosphate buffer at pH values of 2 to 5.	Complies
Identification	The FTIR spectrum of sample must concordant with spectrum of reference standard.	Complies
pH	7.5 – 10.0	8.5
Water Contents	Not More Than 2.0% w/w	0.87% w/w

Sulphated Ash	NMT 0.2%	0.02%
Heavy Metals	--------	0.02%
Residual solvents (Ethanol)	--------	0.002%
Related Substances 1. Any individual impurity 2. NMT 4 such impurity 3. Total Impurities	1. NMT 1.0% 2. NMT 0.4% 3. NMT 3.5%	1. 0.18% 2. Complies 3. 0.75%
Assay By HPLC	96.0% - 102% w/w (Anhydrous)	98.0%w/w DS

*The working standard from Nexchem Pharmaceuticals Co; the results are well within USP specs.
Now currently we are using Working standard of USP Specs from Vision Pharma (COA Copy attached)
We undertake that in future we will always use the Working Standard of USP Specs.

3.2.P.8	• Tests for antimicrobial preservative content and efficacy of preservative as recommended by USP chapter <51> should be performed for finished product • In use stability study of reconstitution suspension shall be submitted • Submit documents for procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• Firm has submitted antimicrobial preservative content and efficacy of preservative for finished product • Firm has submitted in use stability study of reconstitution suspension • Firm has submitted invoice No#60008 dated 07-12.2021 from M/s Vision Pharma in name of M/s Titlis Pharma (Pvt) Ltd for purchase of 5kg Clarithromycin Taste Masked Micro Pellets 27.5% Batche No. CTM0678. • Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers at accelerated conditions only and not at real time conditions

Decision: Approved with following label claim:
Each 5 ml contains:
Clarithromycin…… 125mg

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Pharmaceutivcal Equivalence & CDP studies performed against the innovator product.**
- **IQ, OQ and PQ reports of the HPLC equipped with oven having capacity to maintain column temperature at 50°C.**
- **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Respiklar Dry Powder Suspension 250mg/5ml
Batch No: RP-04
Dissolution Results:
Minimum %= 82.21% Maximum %= 87.28% Average %= 86.12%

Batch No: RP-05
Dissolution Results:
Minimum %= 87.58% Maximum %= 102.09% Average %= 90.70%

Batch No: RP-06
Dissolution Results:
Minimum %= 88.26% Maximum %= 89.90% Average %= 89.05%

Klaricid Dry Powder Suspension 250mg/5ml
Batch No: 452376XV
Dissolution Results:
Minimum %= 93.42% Maximum %= 98.83% Average %= 96.29%

The data shows there is no impact of change of rpm as the results are more than 80% within 45 minutes.
We further undertake in future, we will perform all the testing at 50rpm.

3.2.P.6	Clarification is required since the submitted COA of reference / working standard is from M/s Nexchem Pharmaceutical Co., Ltd China and it follow enterprise standard specifications while source of API is M/s Vision Pharma and the product monograph is available in USP

Firm's Response: Firm submitted a comparison table of tests for USP specifications and specifications followed by Working standard of Nexchem Pharmaceutical.

TEST PERFORMED	**SPECIFICATION USP**	**Working standard Nexchem Pharmaceutical; RESULTS**
Description	White to almost white crystalline powder	Complies
Solubility	Practically insoluble in water, soluble in methyl chloride, and in acetone, Slightly soluble in phosphate buffer at pH values of 2 to 5.	Complies
Identification	The FTIR spectrum of sample must concordant with spectrum of reference standard.	Complies
pH	7.5 – 10.0	8.5
Water Contents	Not More Than 2.0% w/w	0.87% w/w
Sulphated Ash	NMT 0.2%	0.02%
Heavy Metals	--------	0.02%
Residual solvents (Ethanol)	--------	0.002%
Related Substances 4. Any individual impurity 5. NMT 4 such impurity 6. Total Impurities	 4. NMT 1.0% 5. NMT 0.4% 6. NMT 3.5%	 4. 0.18% 5. Complies 6. 0.75%
Assay By HPLC	96.0% - 102% w/w (Anhydrous)	98.0%w/w DS

*The working standard from Nexchem Pharmaceuticals Co; the results are well within USP specs.
Now currently we are using Working standard of USP Specs from Vision Pharma (COA Copy attached)
We undertake that in future we will always use the Working Standard of USP Specs.

3.2.P.8	• Tests for antimicrobial preservative content and efficacy of preservative as recommended by USP chapter <51> should be performed for finished product • In use stability study of reconstitution suspension shall be submitted • Submit documents for procurement of API	• Firm has submitted antimicrobial preservative content and efficacy of preservative for finished product • Firm has submitted in use stability study of reconstitution suspension • Firm has submitted invoice No#60008 dated 07-12-2021 from M/s Vision Pharma in name of M/s Titlis Pharma (Pvt) Ltd for purchase of 5kg Clarithromycin Taste Masked Micro Pellets 27.5% Batche No. CTM0678.

	• Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers at accelerated conditions only and not at real time conditions

Decision: Approved with following label claim:
Each 5 ml contains:
Clarithromycin…… 250mg

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following

- **Pharmaceutivcal Equivalence & CDP studies performed against the innovator product.**
- **IQ, OQ and PQ reports of the HPLC equipped with oven having capacity to maintain column temperature at 50°C.**
- **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

The testing and COA of most recent batch of metformin HCL (Batch no; MEF/12051645) as per USP Method is submitted.
• The firm submitted that previously, we were performing the analysis of Metformin HCL by BP method. However, we have revised our testing method and now performing testing of Metformin HCL by HPLC method as per USP43 monograph and test for appearance of solution and sulphated ash is not mentioned in USP monograph.
• The testing METHOD and COA of most recent batch of metformin HCL as per USP Method is submitted.

• Pharmaceutical equivalence and CDP of the applied product has not been submitted.
• Only protocol for CDP is submitted
</td>
<td>
• The firm submitted that as per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Dametit tablet 5mg/1000mg. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies.
• The firm further stated that we have also performed Drug Excipients Compatibility studies. ***However, no compatibility studies is submitted.***
• The firm have submitted pharmaceutical equivalence and CDP of the applied product.
Pharmaceutical Equivalence have been established against Daplozmet 5/1000mg Tablet of M/s Highnoon Laboratories Ltd by performing quality tests (disintegration, weight variation, Dissolution and Assay).
CDP has been performed against the same brand that is Daplozmet 5/1000mg Tablet of M/s Highnoon Laboratories Ltd in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**<u>Linagliptin:</u>** The firm have submitted written confirmation for active substance exported to EU to M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China for Active substance Linagliptin by Deputy General Director confirming that the manufacturing plant complies with requirement of

		Chinese Good Manufacturing practices. This certificate is valid till 25-05-2024 Metformin HCl: The firm has submitted GMP certificate for M/s Aarti Drugs Limited (Unit-II) India issued by Food & Drug Control Administration Gandhinagar India. The certificate is valid till 19-03-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.1	• Submit differential fee as the applied product is new drug molecule	
1.3.2	• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while name mentioned on DML is M/s Titlis Pharma., Clarification is required	
1.4	• Clarification is required as the applied drug product is a New Drug Product while you have applied for generic drug product	
1.6.5	• Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for Linagliptin issued by relevant regulatory authority of country of origin	
3.2.S.4	• Justification is required for not including the test for sulphated ash in drug substance specification of drug substance metformin by drug product manufacturer as recommended by BP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) linagliptin and Metformin HCl shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method as per BP while drug product manufacturer has performed assay of drug substance Metformin HCl by titrimetric method. • Justification is required for not performing test for appearance of solution and sulphated ash test in batch analysis of drug substance metformin by drug product manufacturer as recommended by BP.	
3.2.S.7	• Stability study of Linagliptin drug substance batch No. L-20170604-D01-L9-03 at accelerated conditions is not submitted	
3.2.P.2	• Compatibility studies of the Drug Substance(s) with excipients shall be provided as the qualitative composition of the formulation is not similar to innovator / reference product.	

	<table><tr><th>Applied product</th><th>JENTADUETO tablet</th></tr><tr><td>Linagliptin Metformin HCl</td><td>Linagliptin Metformin HCl</td></tr><tr><td>Lactose</td><td>Arginine</td></tr><tr><td>Avecil PH 102</td><td>Corn Starch</td></tr><tr><td>Starch</td><td>Copovidone</td></tr><tr><td>PVP K30</td><td>Colloidal Silicon Dioxide</td></tr><tr><td>Aerosil 200</td><td>Magnesium Stearate</td></tr><tr><td>Ac-di-sol</td><td></td></tr><tr><td>Magnesium stearate</td><td></td></tr><tr><td>Purified water</td><td></td></tr></table> • Pharmaceutical equivalence and CDP of the applied product has not been submitted. • Only protocol for CDP is submitted	
3.2.P.4	• The specifications, Analytical procedures and Validation of analytical procedures for excipients shall be provided as the firm have stated that excipient specifications follow in-house or manufacturer specifications	
3.2.P.5	• Justification is required for setting dissolution specification of NLT 75% in 45 minutes while innovator product review document recommends NLT Q in 30 minutes • Justification is required for not including test for identification test active substances and uniformity of dosage units in finished product specification as recommended by innovator product review document. • Justification is required since composition of dissolution media and rotation (0.03M Potassium dihydrogen phosphate and 75rpm) mentioned in dissolution method for applied drug product is different than that recommended by innovator product review document (0.1N HCl and 50 rpm)	
3.2.P.8	• Justification is required since composition of dissolution media (0.03M Potassium dihydrogen phosphate) mentioned in dissolution test for applied drug product in stability summary sheets is different than that recommended by innovator product review document (0.1N HCl) • Justification is required for setting dissolution specification NLT 75% in 45minutes in stability study summary sheets instead of NLT 75% in 30minutes as recommended by innovator product review document. • Submit documents for procurement of API with approval from DRAP • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) • Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing	

INDICATIONS AND USAGE

JENTADUETO is indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

Limitations of Use

JENTADUETO should not be used in patients with type 1 diabetes.

JENTADUETO has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at an increased risk for the development of pancreatitis while using JENTADUETO

2 DOSAGE AND ADMINISTRATION

2.1 Recommended Dosing

The dosage of JENTADUETO should be individualized on the basis of both effectiveness and tolerability, while not exceeding the maximum recommended dose of 2.5 mg linagliptin/1000 mg metformin hydrochloride (HCl) twice daily. JENTADUETO should be given twice daily with meals. Dose escalation should be gradual to reduce the gastrointestinal (GI) side effects associated with metformin use. **Recommended starting dose:** • In patients currently not treated with metformin HCl, initiate treatment with 2.5 mg linagliptin/500 mg metformin HCl twice daily. • In patients already treated with metformin HCl, start with 2.5 mg linagliptin and the current dose of metformin HCl taken at each of the two daily meals (e.g., a patient on metformin HCl 1000 mg twice daily would be started on 2.5 mg linagliptin/1000 mg metformin HCl twice daily with meals). • Patients already treated with linagliptin and metformin HCl individual components may be switched to JENTADUETO containing the same doses of each component.		
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

INDICATIONS AND USAGE

JENTADUETO is indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

Limitations of Use

JENTADUETO should not be used in patients with type 1 diabetes.

JENTADUETO has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at an increased risk for the development of pancreatitis while using JENTADUETO

2 DOSAGE AND ADMINISTRATION

2.1 Recommended Dosing

The dosage of JENTADUETO should be individualized on the basis of both effectiveness and tolerability, while not exceeding the maximum recommended dose of 2.5 mg linagliptin/1000 mg metformin hydrochloride (HCl) twice daily. JENTADUETO should be given twice daily with meals. Dose escalation should be gradual to reduce the gastrointestinal (GI) side effects associated with metformin use.

Recommended starting dose:

- In patients currently not treated with metformin HCl, initiate treatment with 2.5 mg linagliptin/500 mg metformin HCl twice daily.
- In patients already treated with metformin HCl, start with 2.5 mg linagliptin and the current dose of metformin HCl taken at each of the two daily meals (e.g., a patient on metformin HCl 1000 mg twice daily would be started on 2.5 mg linagliptin/1000 mg metformin HCl twice daily with meals).
- Patients already treated with linagliptin and metformin HCl individual components may be switched to JENTADUETO containing the same doses of each component.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

INDICATIONS AND USAGE

JENTADUETO is indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

Limitations of Use

JENTADUETO should not be used in patients with type 1 diabetes.

JENTADUETO has not been studied in patients with a history of pancreatitis. It is unknown whether patients with a history of pancreatitis are at an increased risk for the development of pancreatitis while using JENTADUETO

2 DOSAGE AND ADMINISTRATION

2.1 Recommended Dosing

The dosage of JENTADUETO should be individualized on the basis of both effectiveness and tolerability, while not exceeding the maximum recommended dose of 2.5 mg linagliptin/1000 mg metformin hydrochloride (HCl) twice daily. JENTADUETO should be given twice daily with meals. Dose escalation should be gradual to reduce the gastrointestinal (GI) side effects associated with metformin use.

Recommended starting dose:

- In patients currently not treated with metformin HCl, initiate treatment with 2.5 mg linagliptin/500 mg metformin HCl twice daily.
- In patients already treated with metformin HCl, start with 2.5 mg linagliptin and the current dose of metformin HCl taken at each of the two daily meals (e.g., a patient on metformin HCl 1000 mg twice daily would be started on 2.5 mg linagliptin/1000 mg metformin HCl twice daily with meals).
- Patients already treated with linagliptin and metformin HCl individual components may be switched to JENTADUETO containing the same doses of each component.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

• Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product?
• CDP of the applied product has not been submitted.
• Only protocol for CDP is submitted</td><td></td></tr>
<tr><td>3.2.P.5</td><td>• Clarification is required as the method of preparation and concentration of standard solution in analytical method of dissolution test is different from USP.
• Firm have used isocratic method for assay test with mobile phase composition of solution A and solution B (30:70) while USP recommends gradient method</td><td></td></tr>
</table>

Table 1

Time (min)	Solution A (%)	Solution B (%)
0	48	52
5	45	55
12	45	55
22	25	75
23	25	75
25	48	52
30	48	52

3.2.P.6	• Clarification is required since the submitted COA of reference / working standard states that it follows in house specifications while the product monograph is available in USP	
3.2.P.8	• Submit DRAP attested documents for the procurement of API. • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time conditions)	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Case No. 02: Registration applications of New Section of Human drugs on Form 5-F (Local)

M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha.
The Central Licensing Board in its 276th meeting held on 3rd September, 2020 has considered and approved the following additional section of M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha. under Drug Manufacturing License No. 000609 (Formulation) vide approval letter No. F. 1-37/2003-Lic (Vol-I) dated 29th September 2020.

S No.	Section
	Capsule (General) Section (New)
	Sachet (General) Section (New)

Following applications have been submitted for registration by the firm.

1866.	Name, address of Applicant / Marketing Authorization Holder	M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha.
	Name, address of Manufacturing site.	M/s Quaper (Pvt) Ltd. 26-A, Small Industrial Estate, Lahore Road, Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 29207 dated 26-10-2021
	Details of fee submitted	PKR 30,000/-: dated 20-10-2021

	The proposed proprietary name / brand name	PREQUAP 50 mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Pregabalin…….50 mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	Anticonvulsant
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LYRICA (25mg, 50mg, 75mg, 100mg, 150mg, 200mg, 225mg, 300mg) Capsule USFDA Approved
	For generic drugs (me-too status)	Zeegap 50mg Capsule by M/s Hilton Pharmaceuticals (Reg# 047358)
	GMP status of the Finished product manufacturer	New sections
	Name and address of API manufacturer.	M/s Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Long-term stability studies were performed at a storage temperature of 30°C±2°C/65%±5% RH for 60 months. Accelerated stability studies were performed at a temperature of 40±2°C/75%±5% RH for 6 months. Batches: (D5248-14-002, D5248-14-003, D5248-14-004)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Lyrica 50 mg Capsule by Pfizer by performing quality tests (Description, Assay, Dissolution, weight variation). CDP has been performed against the same brand Lyrica 50 mg Capsule by Pfizer in Acid media 0.1N HCl (pH

		1.2), ***Phosphate Buffer*** (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision,-

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China		
API Lot No.	D5248-19-069		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	T04	T05	T06
Batch Size	1500 Cap	1500 Cap	1500 Cap
Manufacturing Date	02-2021	02-2021	02-2021
Date of Initiation	05-02-2021	05-02-2021	05-02-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm submitted that Quaper Pvt. Ltd is a new license facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	***GMP cetificate of M/s Zhejiang Huahai Pharmaceutical Co., Ltd Xunqiao, Linhai, Zhejiang is submitted while manufacturer is*** M/s Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm have submitted data of stability batches along with respective documents like chromatograms, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	***Not applicable. Our HPLC system are not 21CFR compliant***
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm have submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.15-1.5.20	• Commitments not submitted as per the CTD guidance document	Commitments are not submitted
1.6.5	• Drug Manufacturing License (DML) / Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin	***Firm has submitted GMP certificate No. ZJ20180073 of M/s Zhejiang Huahai Pharmaceutical Co., Ltd Xunqiao, Linhai, Zhejiang China valid upto 25-06-2023 instead of*** M/s Zhejiang Huahai Pharmaceutical Co., Ltd.

	shall be submitted as the submitted GMP certificate is of different manufacturing site	Chuannan, Duqiao, Linhai, Zhejiang, 317016, China ***The submitted GMP certificate of the drug substance manufacturer of different manufacturing site.***
3.2.S.4.2	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is required. • In analytical procedure in assay test you have mentioned the conc. Of standard and sample solution as 2mg/ml while in validation of analytical procedure you have mentioned the conc. Of standard and sample solution as 1mg/ml, justify?	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer ***is not submitted.*** • The firm submitted that the concentration of 1mg/1ml is to cover the lower range of assay.
3.2.S.4.3	• Results for specificity of drug substance not given by drug product manufacturer	Firm has submitted result of specificity test in analytical method verification studies for drug substance
3.2.S.5	• The Retest Date Mentioned on COA of Reference Standards or Materials is 07.2018, clarify whether the same was used for test and analysis?	Firm has not submitted clarification regarding retest date of Reference Standards or Materials. However, firm has submitted COA of USP reference standard catalog No. 1559618.
3.2.P.2	• Justification is required as Phosphate buffer ph 4.5 was used instead of acetate buffer ph 4.5 in CDP studies	The firm submitted that it was a typographical error, CDP was performed in Acetate buffer of pH 4.5 in addition to pH 1.2 and pH 6.8 buffers.
3.2.P.5.1	• You have mentioned innovators specifications in module I section 1.5.6 while in house specifications in control of drug product section 3.2.P.5.1 and 3.2.P.5.4, clarify? • Justify the acceptance criteria of dissolution test NLT Q in 45min in product specifications since FDA review documents specifies that dissolution criteria shall be NLT Q in 30 min for the applied product • Justification is required as the registration board in its 293rd meeting decided that For rapidly dissolving as well as immediate release drug products, wherein the stability batches will be manufactured after 01-06-2020, variation from innovator /reference product with reference to dissolution specification will not be acceptable.	• Te firm submitted that since the applied product was non pharmaopeial at the time of development at the time of development hence, we had applied for "innovator's specifications" as mentioned in section 1.5.6. • The firm submitted that for dissolution test we adopted the general provision for immediate release dosage forms and both 30min and 45mn time point are admissible for immediate release dosage form. • The firm submitted that we have revised the drug product specification as per latest BP monograph for "Pregabalin capsule" and same will be adopted for commercial batches and submit BP monograph for applied product.
3.2.P.5.2	• Details of analytical method for drug substance has been submitted against the drug product. • Justify the adoption of dissolution parameters including dissolution media (0.06N HCl)	• Analytical method for drug product is not submitted. • Te firm submitted that since the applied product was non pharmaopeial at the time of development at the time of development hence, we had applied for "innovator's specifications" but now on the issuance of BP monograph for "Pregabalin capsule" in latest edition, the same has been adopted. Same dissolution media (0.06M HCl) is mentioned in BP monograph.
3.2.P.5.3	• Results for specificity of drug product not given by drug product manufacturer	Firm has submitted results of specificity test in method validation studies for applied product
3.2.P.5.4	• In batch analysis acceptance criteria set for average weight of Batch No. T-05 is 225.00mg±7.5% while the results are 201.00mg, justify your results?	The firm submitted that it was a typographical error, the actual average weight is 200mg and limit for weight variation as 200.00mg±7.5 (Limit: 185mg-215mg) as evident from section 3.2.P.2.and COAs of other trial batches.

3.2.P.8	• Submit Raw data sheets of stability studies containing calculation formula for both assay & dissolution test • In COA for stability study acceptance criteria set for average weight of Batch No. T-04 is 225.00mg±7.5% (Limit; 208.125mg-241.875mg) while the results are 203.00mg at initial time point, 202.00mg at 3rd month time point of real time stability study, 200.00mg at 6th month time point real time stability study, justify your results? Furthermore, the acceptance criteria set for average weight of other batches are 200.00mg±7.5% (Limit; 185mg-215mg) • The injection volume mentioned in the submitted analytical method is 20µl while 10µl in the submitted chromatogram, clarify? • Submit documents for the procurement of API with approval from DRAP	• The firm submitted that same calculation formulas have been applied in calculation of assay and dissolution results as given in drug product test method. ***However, Raw data sheets of stability studies containing calculation formula for both assay & dissolution test is not submitted*** • The firm submitted that it was a typographical error, the actual average weight is 200mg and limit for weight variation as 200.00mg±7.5 (Limit: 185mg-215mg) as evident from section 3.2.P.2.and COAs of other trial batches. • ***The firm submitted that change in injection volume is within permissible limits of USP general chapter <621>*** • Firm has submitted copy of invoice No# HH20200723R1 dated 12th December 2020 in name of M/s Quaper Pvt Ltd from M/s Zhejiang Huahai Pharmaceutical Co., Ltd for import of 1.114kg Pregabalin batch No#D5248-19-069. ***However, the invoice not attested by AD (I&E) DRAP field office.*** • The firm also submitted copy of goods decalaration certificate.

Decision: Deferred for following:

- **Submission of commitments as per the Form5F guidance document**
- **Submission of GMP certificate / Drug Manufacturing License (DML) of the Drug Substance manufacturer issued by concerned regulatory authority of country of origin**
- **Submission of copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer**
- **Clarification whether the same Reference Standards or Materials was used for test and analysis of drug substance as the Retest Date Mentioned on COA of Reference Standards or Materials is 07.2018, while manufacturing date of drug substance was 23-02-3019.**
- **Submission of complete analytical method for applied drug product**
- **Submission of raw data sheets of stability studies containing calculation formula for both assay & dissolution test**
- **Clarification since the injection volume mentioned in the submitted analytical method is 20µl while 10µl in the submitted chromatogram.**
- **Submission of copy of invoice attested by AD (I&E) DRAP field office.**

	Analytical method validation/verification of product	Method validation studies have been submitted including linearity, range, accuracy, precision.

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China
API Lot No.	D5248-19-069
Description of Pack	Alu-Alu blister packed in unit carton

(Container closure system)			
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	1500 Cap	1500 Cap	1500 Cap
Manufacturing Date	02-2021	02-2021	02-2021
Date of Initiation	06-02-2021	06-02-2021	06-02-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm submitted that Quaper Pvt. Ltd is a new license facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	***GMP certificate of M/s Zhejiang Huahai Pharmaceutical Co., Ltd Xunqiao, Linhai, Zhejiang is submitted while manufacturer is*** M/s Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm have submitted data of stability batches along with respective documents like chromatograms, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	***Not applicable. Our HPLC system are not 21CFR compliant***
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm have submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.15-1.5.20	• Commitments not submitted as per the CTD guidance document	Commitments are not submitted
1.6.5	• Drug Manufacturing License (DML) / Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin shall be submitted as the submitted GMP certificate is of different manufacturing site	***Firm has submitted GMP certificate No. ZJ20180073 of M/s Zhejiang Huahai Pharmaceutical Co., Ltd Xunqiao, Linhai, Zhejiang China valid upto 25-06-2023 instead of*** M/s Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China ***The submitted GMP certificate of the drug substance manufacturer of different manufacturing site.***
3.2.S.4.2	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer is required. • In analytical procedure in assay test you have mentioned the conc. Of standard and sample solution as 2mg/ml (as per USP)	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug substance manufacturer ***is not submitted.*** • The firm submitted that the concentration of 1mg/1ml is to cover the lower range of assay.

	while in validation of analytical procedure you have mentioned the conc. Of standard and sample solution as 1mg/ml, justify?	
3.2.S.4.3	• Results for specificity of drug substance not given by drug product manufacturer	Firm has submitted result of specificity test in analytical method verification studies for drug substance
3.2.S.5	• The Retest Date Mentioned on COA of Reference Standards or Materials is 07.2018, clarify whether the same was used for test and analysis?	Firm has not submitted clarification regarding retest date of Reference Standards or Materials. However, firm has submitted COA of USP reference standard catalog No. 1559618.
3.2.P.2	• Justification is required as Phosphate buffer ph 4.5 was used instead of acetate buffer ph 4.5 in CDP studies • Specify the batch number of innovator product against which pharmaceutical equivalence and CDP was performed	• The firm submitted that it was a typographical error, CDP was performed in Acetate buffer of pH 4.5 in addition to pH 1.2 and pH 6.8 buffers. • ***The firm has not submitted*** Batch number of innovator product against which pharmaceutical equivalence and CDP
3.2.P.5.1	• You have mentioned innovators specifications in module I section 1.5.6 while in house specifications in control of drug product section 3.2.P.5.1 and 3.2.P.5.4, clarify? • Justify the acceptance criteria of dissolution test NLT Q in 45min in product specifications since FDA review documents specifies that dissolution criteria shall be NLT Q in 30 min for the applied product • Justification is required as the registration board in its 293rd meeting decided that For rapidly dissolving as well as immediate release drug products, wherein the stability batches will be manufactured after 01-06-2020, variation from innovator /reference product with reference to dissolution specification will not be acceptable.	• Te firm submitted that since the applied product was non pharmaopeial at the time of development at the time of development hence, we had applied for "innovator's specifications" as mentioned in section 1.5.6. • The firm submitted that for dissolution test we adopted the general provision for immediate release dosage forms and both 30min and 45min time point are admissible for immediate release dosage form. • The firm submitted that we have revised the drug product specification as per latest BP monograph for "Pregabalin capsule" and same will be adopted for commercial batches and submit BP monograph for applied product.
3.2.P.5.2	• Details of analytical method for drug substance has been submitted against the drug product. • Justify the adoption of dissolution parameters including dissolution media (0.06N HCl)	• Analytical method for drug product is not submitted. • Te firm submitted that since the applied product was non pharmaopeial at the time of development at the time of development hence, we had applied for "innovator's specifications" but now on the issuance of BP monograph for "Pregabalin capsule" in latest edition, the same has been adopted. Same dissolution media (0.06M HCl) is mentioned in BP monograph.
3.2.P.5.3	• Results for specificity of drug product not given by drug product manufacturer	Firm has submitted results of specificity test in method validation studies for applied product
3.2.P.8	• Submit Raw data sheets of stability studies containing calculation formula for both assay & dissolution test • The injection volume mentioned in the submitted analytical method is 20µl while 10µl in the submitted chromatogram, clarify? • Submit documents for the procurement of API with approval from DRAP	• The firm submitted that same calculation formulas have been applied in calculation of assay and dissolution results as given in drug product test method. ***However, Raw data sheets of stability studies containing calculation formula for both assay & dissolution test is not submitted*** • ***The firm submitted that change in injection volume is within permissible limits of USP general chapter <621>*** • Firm has submitted copy of invoice No# HH20200723R1 dated 12th December 2020 in name of M/s Quaper Pvt Ltd from M/s Zhejiang Huahai Pharmaceutical Co., Ltd for import of 1.114kg Pregabalin batch No#D5248-19-069. ***However, the invoice not attested by AD (I&E) DRAP field office.***

		• The firm also submitted copy of goods decalaration certificate.

Decision: Deferred for following:

- **Submission of commitments as per the CTD guidance document**
- **Submission of GMP certificate / Drug Manufacturing License (DML) of the Drug Substance manufacturer issued by concerned regulatory authority of country of origin**
- **Submission of copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer**
- **Clarification whether the same Reference Standards or Materials was used for test and analysis of drug substance as the Retest Date Mentioned on COA of Reference Standards or Materials is 07.2018, while manufacturing date of drug substance was 23-02-3019.**
- **Submission of details of innovator product including batch number against wich pharmaceutical equivalence and CDP studies is performed**
- **Submission of complete analytical method for applied drug product**
- **Submission of raw data sheets of stability studies containing calculation formula for both assay & dissolution test**
- **Clarification since the injection volume mentioned in the submitted analytical method is 20µl while 10µl in the submitted chromatogram.**
- **Submission of copy of invoice attested by AD (I&E) DRAP field office.**

Case No. 3: Deferred Registration applications of Human Drugs on form 5F (New DML):

M/s Carer Pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat.
The Central Licensing Board in its 278th meeting held on 10th-11th December, 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five sections to M/s, Carer Pharmaceuticals Industries Plot # 27, Main Road, Rawat Industrial Estate, Rawat under Drug Manufacturing License No. 000925 by way of Formulation vide approval letter No. F. 1-32/2016-Lic dated 07th June 2021. **The Drug Manufacturing License No. 000925 by way of formulation is hereby issued w.e.f. 18-03-2021.**

S No.	Section
1.	Capsule Section (General) Section
2.	Dry Powder Suspension (General) Section
3.	Sachet (General) Section
4.	Ampoule (General) Section
5.	Tablet (General) Section

Following applications have been submitted for registration by the firm.

1869.	Name, address of Applicant / Marketing Authorization Holder	M/s Carer Pharmaceuticals Industries., plot No. 27 Main Road, Rawat Industrial Estate, Rawat
	Name, address of Manufacturing site.	M/s Carer Pharmaceuticals Industries., plot No. 27 Main Road, Rawat Industrial Estate, Rawat
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13411; dated 02/06/2022
	Details of fee submitted	PKR 30,000/-: dated 27/05/2022

	The proposed proprietary name / brand name	Carazole 30mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Lansoprazole as enteric coated pellets (8.5%)……..30mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	PPI
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	PREVACID (15mg, 30mg) delayed-release capsules, USFDA approved
	For generic drugs (me-too status)	Caralans 30mg capsule by M/s Caraway Pharmaceuticals (Reg#50809)
	GMP status of the Finished product manufacturer	New license granted on 18/03/2021
	Name and address of API manufacturer.	Vision Pharmaceuticals (Pvt.) Ltd. Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad Pakistan. Tel : + 92-51-4493587-90 Fax : + 92-51-4493591
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (LPS0129, LPS0134, LPS0141)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Caralans 30mg capsule by Caraway Pharmaceuticals by performing quality tests (Identification, Assay, Dissolution).

		CDP has been performed against the same brand that is Caralans 30mg capsule by Caraway Pharmaceuticals in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Not submitted

STABILITY STUDY DATA

Administrative Portion

19.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
20.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of M/s Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
21.	Documents for the procurement of API with approval from DRAP (in case of import).	No document submitted
22.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm have submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, summary data sheets etc.
23.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
24.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Submit valid GMP certificate of the Drug Substance manufacturer	• The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.

2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	• Firm have submitted Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3
3.2.S.4.	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer is required." • Drug substance manufacturer have claimed USP specifications while monograph for lansoprazole enteric coated pellets are not available in USP., clarification is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Firm have submitted Copies of analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer. ***However, Copies of the Drug substance specifications by Drug Product manufacturer is not submitted.*** • The firm submitted that API manufacturer claimed and followed USP specifications because Lansoprazole pellets are delayed release and ready to fill in capsule. • Firm have submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance
3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	• Firm have submitted results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.
3.2.P.2	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph (uniformity of dosage units, loss on drying). • Justification is required since pharmaceutical equivalence and CDP studies have not been conducted against the innovator product. • A minimum of three time-points should be included for CDP, the time-points for both reference (comparator) and test product being the same as per WHO guidelines while you have performed at only one time points i.e. 15 min, justification is required	• ***No justification submitted*** • Fir submitted that study conducted we me-too product due to unavailability of innovator product • The firm has submitted CDP considering multiple time points for both reference (comparator) and test product. CDP has been performed against the same brand that is Caralans 30mg capsule by Caraway Pharmaceuticals in Acid media (pH 1.0-1.2), acetate buffer (pH 5.5) & Phosphate Buffer (pH 6.8).
3.2.P.5	• Justification is required since the submitted specification does not include tests for uniformity of dosage units and loss on drying as recommended by USP. • Justification shall be submitted as the concentration and method of sample and standard solution preparation in assay test is different than that recommended by USP. • Justification is required since drug product manufacturer have proposed 20µl injection volume in chromatographic conditions in assay test instead of 10µl as recommended by USP. • Results of Analytical method verification studies of drug product performed by drug product manufacturer including	• The firm has submitted revised specifications and included tests for uniformity of dosage units and loss on drying as recommended by USP. • The firm have submitted revised method of sample and standard solution preparation in assay test having same concentration of both standard and sample solution. • The firm submitted that writing of 20µl injection volume instead of 10µl injection volume in chromatographic conditions in assay was a human error/typing mistake • Firm have submitted results of Analytical method verification studies of drug product performed by drug product manufacturer including specificity, repeatability (method precision) and accuracy.

	specificity, repeatability (method precision) and accuracy shall be submitted	
3.2.P.8	• Justification is required as 6th month stability study is performed at 04-05-2022 while trial batches are manufactured at 12-2021 before due time (01 month before) of all batches as depicted from raw data sheet and chromatograms at real time and accelerated conditions • COA of the stability batches throughout the stability study is not submitted • Test of uniformity of dosage unit has not been performed at the time of batch release, justify? • Submit documents for the procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	• The firm submitted that 6th month stability study was conducted as realized the provided study was 5th month. The firm has submitted stability study at 6th month time point • ***COA of the stability batches throughout the stability study is not submitted*** • The firm submitted that content uniformity was conducted at the time of batch release but not mentioned in COA of the product. The firm requested to consider the COA of the product submitted now. ***However, the firm have not submitted COA of the product*** • Firm have not submitted documents for the procurement of API • Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is not submitted • Compliance record of HPLC software 21CFR & audit trail reports on product testing is not submitted.

Previous Decision (321-DRB):
Deferred for following:

- Submission of Copies of the Drug substance specifications by Drug product manufacturer
- Submission of justification as the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph i.e., uniformity of dosage units, loss on drying.
- Submission of COA of the stability batches throughout the stability study
- Submission of record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Response of the Firm:

- Copies of the Drug substance specifications by Drug product manufacturer is not submitted instead Copies of the Drug substance specifications by drug substance manufacturer is submitted
- Firm has submitted pharmaceutical equivalence study of the drug product and the comparator product including the tests recommended by USP monograph (uniformity of dosage units, loss on drying).
- Firm has submitted COA of the stability batches throughout the stability study. ***However, results for loss on drying and uniformity of dosage unit (content uniformity) test are not included in submitted COA. Furthermore, rpm mentioned in COA is 100 rpm istead of 75rpm at acid stage release and time point at buffer stage is 30 min instead of 60 minute as recommended by USP.***
- Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Copies of the Drug substance specifications by Drug product manufacturer.**
- **Data for next time point of long term stability studies including performance of "loss on drying", "uniformity of dosage unit (content uniformity") and "dissolution test" as recommended by USP monongraph.**
- **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• The applied product contains immediate release pellets while you have applied enteric coated pellets, clarify	• The firm submitted that itraconazole pellets are immediate release while enteric coated pellets was written by mistake and now rectified. The firm submitted revise label as: Each Capsule contains: Itraconazole 22.0% IR pellets equivalent to Itraconazole ……100mg
1.5.5	• You have stated that itraconazole belongs to PPI. Indicate correct Pharmacological class of the API (drug substance) with proper reference.	• The firm have revised Pharmacological class of the API (drug substance) as Antifungal agent
1.6.5	• Submit valid GMP certificate of the Drug Substance manufacturer	• The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	• Firm have submitted Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer is required." • Drug substance manufacturer have claimed USP specifications while monograph for Itraconazole IR coated pellets are not available in USP., clarification is required • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Results of dissolution studies given in batch analysis in only 0.1N HCl without SLS, while drug substance manufacturer	• Firm have submitted Copies of analytical procedures used for routine testing of the Drug substance / Active Pharmaceutical Ingredient by Drug Product manufacturer. ***However, Copies of the Drug substance specifications by Drug Product manufacturer is not submitted.*** • The firm submitted that API manufacturer claimed and followed USP specifications because Itraconazole pellets are ready to fill in capsule. • Firm have submitted Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance • ***No clarification is submitted***

	uses 0.25% w/v SLS in 0.1N HCl., clarification is required	
3.2.S.7	• Stability study data of drug substance till proposed shelf life shall be submitted	• No reply submitted
3.2.P.2	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph (uniformity of dosage units, dissolution, identification). • A minimum of three time-points should be included for CDP, the time-points for both reference (comparator) and test product being the same as per WHO guidelines while you have performed at only one time points i.e. 15 min, justification is required • As per WHO guideline surfactants should be avoided in comparative dissolution testing while you have used surfactant in CDP, clarify? • Justification is required since pharmaceutical equivalence and CDP studies have not been conducted against the innovator product. • Similarity factor (F2) of the resulting comparative dissolution profiles should be calculated • The brand name of Comparator product mentioned in pharmaceutical equivalence and CDP studies is Polac 100mg capsule while the brand name of product as per available database is rolac 100mg capsule, clarification is required	• ***No justification submitted*** • Fir submitted that study conducted we me-too product due to unavailability of innovator product • The firm has submitted CDP considering multiple time points for both reference (comparator) and test product. CDP has been performed against the POLAC 100mg capsule by SAMI Pharmaceuticals in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8) • ***No justification is submitted*** • Similarity factor (F2) of the resulting comparative dissolution profiles is not provided • ***No clarification is submitted***
3.2.P.5	• Detailed analytical procedures used for testing of the drug product shall be provided. • Results of Analytical method verification studies of drug product performed by drug product manufacturer including specificity, repeatability (method precision) and accuracy shall be submitted	• Firm has submitted analytical procedures used for testing of the drug product • Firm have submitted results of Analytical method verification studies of drug product performed by drug product manufacturer including specificity, repeatability (method precision) and accuracy.
3.2.P.8	• Manufacturing date of pellets as per submitted COA of drug substance manufacturer is 22-12-2021 and release date as per COA is 10-01-2022 while manufacturing of applied product is 12-2021. Justification is required • COA of the stability batches throughout the stability study is not submitted • Test of uniformity of dosage unit has not been performed at the time of batch release, justify? • Submit documents for the procurement of API • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)	• The firm submitted that COA of drug substance was not of the material received and was replaced but unfortunately submitted with the dossier. • ***COA of the stability batches throughout the stability study is not submitted*** • ***No justification is submitted*** • ***Firm has not submitted documents for the procurement of API*** • ***Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is not submitted*** • ***Compliance record of HPLC software 21CFR & audit trail reports on product testing is not submitted.***

	• Compliance record of HPLC software 21CFR & audit trail reports on product testing is required.	

Previous Decision (321-DRB):
Deferred for following:

- Submission of Copies of the Drug substance specifications by Drug product manufacturer
- Submission of clarification since results of dissolution studies for drug substance (pellets) given in batch analysis in only 0.1N HCl without SLS, while drug substance manufacturer uses 0.25% w/v SLS in 0.1N HCl.
- Submission of Stability study data of drug substance till proposed shelf life as the submitted stability data is till 06th months.
- Submission of justification as the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph.
- Submission of justification for using surfactant in CDP studies which is not recommended as per WHO guideline.
- Submission of COA of the stability batches throughout the stability study
- Submission of justification for not performing test of uniformity of dosage unit at the time of batch release.
- Submission of record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Response of the Firm:

- Copies of the Drug substance specifications by Drug product manufacturer is not submitted instead Copies of the Drug substance specifications by drug substance manufacturer is submitted
- The firm has submitted revised specificaions and stated that they used same dissolution medium as was used by drug substance manufacturer.
- Firm has submitted Stability study data of drug substance as per zone IV-A conditions.

Real time: 30˚C ± 2˚C / 65% ± 5%RH for 18 months
Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
Batches: (ICZ1464, ICZ1465, ICZ1466)

- Firm has submitted pharmaceutical equivalence study of the drug product and the comparator product including the tests recommended by USP monograph
- Firm has submitted CDP of applied drug product as per WHO guidelines without using surfactant. However, the release of drug product in all the three media is more than 80% while dissolution media as per USP is 0.25% (w/v) sodium lauryl sulfate in 0.1 N hydrochloric acid which shows the solubility of product in the mediu may be low.
- Firm has submitted COA of the stability batches throughout the stability study
- Firm has submitted COA of drug product mentioning weight variation test instead of content uniformity test at time of batch release.
- Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Decision: Approved with following label claim:
Each Capsule contains:
Itraconazole 22.0% IR pellets equivalent to Itraconazole ……100mg

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Copies of the Drug substance specifications by Drug product manufacturer.**
- **Data for next time point of long term stability studies including performance of "uniformity of dosage unit (content uniformity") test as recommended by USP monongraph.**
- **CDP studies in three dissolution mediums of pH 1.2, 4.5 & 6.8, without use of surfactant.**
- **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 31-07-2019 based on inspection conducted on 11-02-2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice #502094 dated 19-02-2019 for 1.2kg of Dexlansoprazole DDR Pellets

		22.5% batch # DLP420 from Vision Pharmaceuticals Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of one batch only along with chromatograms, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time.

Remarks of Evaluator [XI]:

Section	Observations	Response
	• Submit valid DML as the submitted DML has been expired on 24-11-2021 • Submit latest GMP inspection report conducted with in last three years • Submit valid GMP certificate of drug substance manufacturer	• The firm have submitted valid copy of DML issued in name of M/s Magns Pharmaceuticals on 06/06/2022 • The firm have submitted GMP certificate issued on 13-04-2022 based on inspection conducted on 11-03-2022. • The firm have submitted cGMP certificate of Vision Pharmaceuticals issued on 25-03-2022 based on inspection conducted on 11-02-2019 and further extended till 09-05-2022.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted Batch Manufacturing Record (BMR) for all the batches (T-003, T-004, T-005) of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>. ***Two more batches, Batch T-004 and T-005 was manufactured on 12/10/2021 and 15/10/2021 respectively while batch T-003 was manufactured on23/06/2019. The details of these two batches are incorporated in above table.***
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• ***Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is not submitted.*** • ***Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) is not submitted.***
3.2.P.2.2.1	• Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product. • Comparative dissolution profile against the innovator product shall be submitted	• ***No clarification is submitted. However pharmaceutical equivalence is again submitted. Test like content uniformity, loss on drying and identification are not performed.*** • ***The firm submitted that we have performed comparative study for assay and dissolution hence Comparative dissolution profile is not required***
3.2.P.4	• Justify the use of gelatine capsule shell in dexlansoprazole capsule since innovator product has specified hypromellose capsule shells. • For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. • Halal certificate for gelatin shall be provided	• The firm submitted that hard gelatine capsules are easily available and having same dissolving time and behaviour and other competitors are also using gelatine capsule shell. • ***No clarification submitted*** • The firm have submitted Halal certificate for gelatin shall

3.2.P.5	• You have mentioned innovator specifications under section 1.5.6 while you have followed manufacturer specifications for applied product, justify? • The tests of content uniformity and loss on drying were not included in the submitted specifications as recommended by literature of innovator product, justify? • Results of specificity test in method validation is not submitted • The copies of complete analysis of at least two batches shall be provided while you have provided batch analysis of only one batch, justify?	• The firm submitted that we have followed innovator's specifications. • ***The firm submitted that content uniformity test is recommended for dosage form which have API 25mg or less than 25mg in all pharmacopeia reference, so we have not performed.*** • ***Results of specificity test in method validation is not submitted*** • Firm have submitted copies of complete analysis of two batches
3.2.P.8	• Submit latest inspection report for exemption conducted by the panel for authenticity of stability data (PSI) • Submit Raw data sheets & analytical record of stability studies containing calculation formula for both assay & dissolution test • Justify why you have submitted stability study data of only one batch while it is required to submit stability study data of three batches as per zone IV-A conditions • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)	• ***Inspection report for exemption conducted by the panel for authenticity of stability data (PSI) is not submitted*** • ***Firm has not submitted stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.*** • ***Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) is not submitted***

Previous Decision (321-DRB): Deferred for following:

- Submission of Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer
- Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)
- Submission of Comparative dissolution profile against the innovator product
- Submission of results of specificity test in method validation studies of drug product
- Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.
- Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)

Response of Firm:

- Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is submitted
- Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer *for drug substance(s) is not submitted instead Analytical Method validation studies for drug product is submitted*
- Comparative dissolution profile against the innovator product *is not submitted instead pharmaceutical equivalence report is again submitted.*
- *The firm submitted that in as in specificity test placebo product is required but we are using ready to fill pellets and we have no placebo pellets and specificity test of API manufacturer is attached.*
- *Stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram is not submitted as per requirement*
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) *for time in which Batch T-004 and T-005 is manufactured is submitted*
- The firm further submitted that our product Cetamol tablet has been approved in 321st meeting and we have submitted audit trial and CFR 21 compliance already but if required PEC can conduct inspection for stability data

Decision: Deferred for following:

• **Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)** • **Submission of Comparative dissolution profile against the innovator product** • **Submission of results of specificity test in method validation studies of drug product** • **Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.** • **Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)**

Previous Decision (321-DRB): Deferred for following:

- Submission of Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer
- Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)

- Submission of Comparative dissolution profile against the innovator product
- Submission of results of specificity test in method validation studies of drug product
- Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.
- Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)

Response of the firm:

- Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is submitted
- Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer *for drug substance(s) is not submitted instead Analytical Method validation studies for drug product is submitted*
- Comparative dissolution profile against the innovator product *is not submitted instead pharmaceutical equivalence report is again submitted.*
- *The firm submitted that in as in specificity test placebo product is required but we are using ready to fill pellets and we have no placebo pellets and specificity test of API manufacturer is attached.*
- *Stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram is not submitted as per requirement*
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions) *for time in which Batch T-004 and T-005 is manufactured is submitted*
- The firm further submitted that our product Cetamol tablet has been approved in 321st meeting and we have submitted audit trial and CFR 21 compliance already but if required PEC can conduct inspection for stability data

Decision: Deferred for following:

- **Submission of Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s)**
- **Submission of Comparative dissolution profile against the innovator product**
- **Submission of results of specificity test in method validation studies of drug product**
- **Submission of stability study data including summary data sheets, COA, raw data sheet and attested respective chromatogram as per requirement.**
- **Submission of Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated conditions)**

1873.	Name, address of Applicant / Marketing Authorization Holder	M/s Jawa Pharmaceuticals Private Limited., 112/10 Quaid-e-Azam Industrial Area Kot Lakhpat, Lahore,
	Name, address of Manufacturing site.	M/s Jawa Pharmaceuticals Private Limited., 112/10 Quaid-e-Azam Industrial Area Kot Lakhpat, Lahore,
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 25925 dated 17-09-2021
	Details of fee submitted	PKR 30,000/-: dated 13-08-2021
	The proposed proprietary name / brand name	"Amacure oral granules USP 4mg"
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sachet contains: Montelukast sodium……4mg
	Pharmaceutical form of applied drug	Oral granule is a white granular coarse free-flowing, homogeneous solid with no extraneous particles packaged

		in polyethylene aluminium / polyester sachet which finally packed in unit carton. Each unit carton contain 10 sachet
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonist
	Reference to Finished product specifications	USP
	Proposed Pack size	10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Singulair (4mg) oral granules USFDA Approved
	For generic drugs (me-too status)	Moncid Sachet by M/s De-Mont Research Laboratories (Reg# 084056)
	GMP status of the Finished product manufacturer	The firm have submitted cGMP certificate issued on 06-07-2020 based on inspection conducted on 04-03-2020
	Name and address of API manufacturer.	M/s Dhanuka Laboratories Limited., Keshwana, Rajput, Kotputli, Shahpura, Jaipur-303108 Rajhastan India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (MLS-F#009/15, MLS-F#010/15, MLS-F#011/15)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence against the Montiget sachet by Getz pharma by performing quality tests (Appearance and assay) Firm has submitted CDP report of their applied product against Montiget sachet 4mg by Getz pharma in Acid media (pH 1.2), acetate Buffer (pH 4.5) & 0.5% sodium dodecyl sulphate solution. The values for f2 is in the acceptable range
	Analytical method validation/verification of product	Firm have submitted method verification studies including accuracy, precision and specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Dhanuka Laboratories Limited., Keshwana, Rajput, Kotputli, Shahpura, Jaipur-303108 Rajhastan India		
API Lot No.	MTS-2104004		
Description of Pack (Container closure system)	Amacure oral granule is a white granular coarse free-flowing, homogeneous solid with no extraneous particles packaged in alu-alu sachet packets.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	T01	T02	T03
Batch Size	2000 Sachets	2000 Sachets	2000 Sachets
Manufacturing Date	04-01-2021	06-01-2021	08-01-2021
Date of Initiation	09-01-2021	09-01-2021	09-01-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted copy of GMP certificate #DC/A-2/WHO GMP/2019/35 dated 17-01-2019 of M/s Dhanuka Laboratories Limited., Keshwana, Rajput, Kotputli, Shahpura, Jaipur-303108 Rajhastan India valid 16-01-2022
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice # SO/KE/2122/0011 dated 22-04-2021 for import on 5kg of Montelukast sodium Batch #MTS-2104004 attested by AD (I&E) DRAP Lahore on 30-04-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm have submitted Data of stability batches supported by attested respective documents like chromatograms and summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit. Strength of Active ingredient shall be stated clearly. In case API is in the form of salt, specify the equivalent strength of the base e.g., AAA sodium 50 mg (equivalent to AAA) etc.	The firm submitted that in formulation of Amacure Oral Granules 4mg, Sachet, Montelukast is used as active ingredient. Where it is present with salt sodium. In batch formula it is clearly mentioned "4mg Montelukast is equal to 4.160mg of Montelukast sodium"
1.6.5	• Submit valid GMP certificate of drug substance manufacturer	The firm have submitted copy of GMP certificate #DC/A-2/WHO-GMP/2022/77 dated 27-01-2022

		of M/s Dhanuka Laboratories Limited., SP4-4, Industrial Area, Keshwana, Rajput, Kotputli, Shahpura, Jaipur-303108 Rajasthan India issued by Drug Control Organization Rajasthan India valid for three years from the date of issue.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies is provided
3.2.S.5	• The title of reference standard Montelukast Sodium does not relate with lot No. R035A0. Clarify? • The submitted COA of working standard for batch No#WS/19/003 mentions both limits for Montelukast Sodium and Montelukast Dicyclohexylamine in assay test, clarify?	The firm submitted that as per USP monograph of Amcure sachet oral granules Montelukast Dicyclohexamine Reference standard used for testing and we follow same. ***The firm didn't give clarification how they submitted assay test results for two different salts against the same standard***
3.2.P.2	• Details of comparator product including batch numbers, mfg & expiry date in pharmaceutical equivalence are required to be provided • Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP monograph (dissolution, identification, uniformity of dosage unit. • You have not performed Pharmaceutical equivalence of the applied drug with the innovator / product, justify?	• The firm have submitted details of comparator product. Montiget Sachet by M/s Getz Pharma Batch No. 686D03 Mfg date; July 2020 Expiry date; July 2022 • The firm submitted that we have done all testing of both product (Amcure sachet and Montiget Sachet), it was just human error that complete results are not listed. The firm have submitted complete analysis report with comparator. • The firm submitted that innovator product Singulair Paediatric 4mg Granule by Organon Pharma UK was not available in market and DRAP give us relaxation to do equivalence studies with me-too product
3.2.P.5	• Test for uniformity of dosage unit (content uniformity) and dissolution is not included in specifications and not performed in batch analysis although given in USP monograph of drug product, clarify? • The copies of complete analysis of at least two batches shall be provided. • Provide details of analytical columns used in analytical procedure • The title of reference standard Montelukast Sodium does not relate with lot No. R035A0. Clarify? • The submitted COA of working standard for batch No#WS/19/003 mentions both limits for Montelukast Sodium and Montelukast Dicyclohexylamine in assay test, clarify?	• The firm have submitted that we have done complete testing as per USP monograph; it was a human error that complete results are not listed. The firm submitted revised finished product specifications results • Firm has submitted copies of complete analysis of three trail batches • The firm submitted revised analytical procedure containing details of analytical column • The firm stated that submitted certificate of analysis of working standard is placed in product dossier by mistake, as we receive both COA's from vendor. The certificate of analysis received from manufacturer with working standard has both assay test limits. ***However same COA has been submitted by the firm*** • The submitted certificate of analysis is correct as manufacturer of API done testing of both forms of API collectively. But we use Montelukast sodium in our product for manufacturing. The COA received from manufacturer with working standard has both assay test limits.

3.2.P.8	• Stability data reflect that test for identification, dissolution test and uniformity of dosage unit has not been performed at initial time point and throughout stability studies at both accelerated and real time conditions, justify? • The limits for assay test in stability study data is mentioned as 90%-110% instead of 90%-108% as mentioned in USP monograph, clarify? • Submit COA, Raw data sheets & analytical record of stability studies containing calculation formula for both assay & dissolution test • Compliance record of HPLC software 21CFR & audit trail reports on product testing is required. • Submit latest inspection report for exemption conducted by the panel for authenticity of stability data (PSI) • Th API was imported on 30-04-2021 while the batches were manufactured in 01-2021 before the import of API, justify the manufacturing of batches before import of API	• ***The firm has submitted revised stability summary sheets containing all test at each time points and conditions.*** • The firm submitted that al results are within limits, the term written in specifications was just a copy past error and submitted revised stability summary sheets. • The firm has submitted raw data sheet containing calculation formula for both assay & dissolution test. ***However, the firm has not submitted COA and analytical record of all batches during stability study. Raw data sheets show that the results of dissolution tests are different than that reported in summary sheets.*** • Audit trail reports on product testing is submitted • Latest inspection report for exemption conducted by the panel for authenticity of stability data (PSI) is not submitted • The firm submitted Letter No. 4233/202/DRAP-AD-CD(I&) dated 20-03-2020 for ***"permission to Import API as per guidelines for import of pharmaceutical raw material for the purpose of test/analysis and stability studies"*** containing Montelukast sodium 5kg issued AD (I&E) DRAP Lahore

Previous Decision (321-DRB): Deferred for following:

- Submission of Scientific justification for use of Montelukast sodium as reference standard in analytical procedures instead of Montelukast dicyclohexylamine specified by USP monograph.
- Submission of COA and analytical record of all batches during stability study.
- Clarification since the results of dissolution test mentioned in Raw data sheets are different than that reported in summary sheets.
- Justification is required since the submitted copy of commercial invoice # SO/KE/2122/0011 dated 22-04-2021 has been attested by AD (I&E) DRAP Lahore dated 30-04-2021 for import of 5kg of Montelukast sodium Batch #MTS-2104004 while trial batches have been manufactured in January 2021.

Response of Firm:

- The firm has not submitted scientific justification for use of Montelukast sodium as reference standard in analytical procedures instead of Montelukast dicyclohexylamine specified by USP monograph.
- The firm have submitted COA of stability batches. However complete analytical record of all batches during stability study is not submitted
- The firm submitted that it was a typographical error and submitted revised summary sheet.
- No justification is submitted

Decision: Deferred for following:

- **Submission of Scientific justification for use of Montelukast sodium as reference standard in analytical procedures instead of Montelukast dicyclohexylamine specified by USP monograph.**
- **Submission of COA and complete analytical record of all batches during stability study.**
- **Justification is required since the submitted copy of commercial invoice # SO/KE/2122/0011 dated 22-04-2021 has been attested by AD (I&E) DRAP Lahore dated 30-04-2021 for import of 5kg of Montelukast sodium Batch #MTS-2104004 while trial batches have been manufactured in January 2021.**
- **Verification of submitted commercial invoices by DRAP Lahore since firm has submitted two invices with same particulars, except the date of sign & stamp by the AD I&E.**

Agenda of Evaluator PEC-XIII.

Case 01; Registration applications of New section (Human) drugs on Form 5F.

CLB in its 284th meeting held on 16th December 2021 has considered and approved the grant of following four (04) additional section to M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura;

- Capsule (Penicillin). – New.
- Oral Dry Powder Suspension (Penicillin). – New.
- Dry Powder Injectable (Penicillin). – New.
- Dry Powder Injectable (Carbapenem). – New.

Following applications of M/s Fynk Pharma are placed before the Board for consideration.

1874.	Name, address of Applicant / Marketing Authorization Holder	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Name, address of Manufacturing site.	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17523 dated 15-06-2022.
	Details of fee submitted	PKR 30,000/-, Challan No: 64628423, Dated 09/06/2022.
	The proposed proprietary name / brand name	FAXCIL Cap 250 mg.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Amoxicillin as Trihydrate ……..…….250 mg
	Pharmaceutical form of applied drug	White to off White colored granular powder filled in hard gelatin capsule shell size '2'.
	Pharmacotherapeutic Group of (API)	Beta-Lactam Antibacterial, Penicillin.
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	10×10's
	Proposed unit price	700/-
	The status in reference regulatory authorities	Amoxil-250 mg, USFDA approved. *250MG **Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons*****
	For generic drugs (me-too status)	Amoxil 250mg, GSK Karachi, Reg. No. 000213.
	GMP status of the Finished product manufacturer	New license for additional sections granted on 16/12/2021.

	Evidence of section approval	Capsule (Penicillin) section New approved vide letter No. F. 1-63/84-Lic (Vol-III) dated 27-12-2021.
	Name and address of API manufacturer.	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Amoxicillin trihydrate is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis (000130/852/2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (00013/210/2009, 00013/211/2009, 00013/212/2009)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its description and composition, manufacturers, description of manufacturing process and controls, specifications, analytical procedure (including dissolution as per monograph) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Amoxil 250 mg capsule by GSK Pharma by performing quality tests (Identification, Assay, Dissolution and microbial limit).

		CDP is also performed against the same brand that is Amoxil 250 mg Capsule, batch No. 6G8W manufactured by GSK Karachi in water as dissolution medium as per monograph.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.		
API Lot No.	000130/852/2021		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (10×10's)

Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TR-01	TR-02	TR-03
Batch Size	1000 Capsules	1000 Capsules	1000 Capsules
Manufacturing Date	02-2022	02-2022	02-2022
Date of Initiation	15-02-2022	15-02-2022	15-02-2022
No. of Batches	03		

Administrative Portion		
25.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product D-Lazol 30mg capsules which was conducted on 07-09-2021 and was presented in 312th meeting of Registration Board (14 - 16 September, 2021). Report has confirmed that HPLC used in the analysis has HPLC software that is 21 CFR compliant and compliance certificate from the vendor was available. Audit trial of the system on which testing was reviewed.
26.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted.
27.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Performa invoice No. PL/P-INV/HO /866 dated 03-01-2022 mentioning 5kg of the active ingredient is submitted. *However, no batch number is mentioned on the invoice.*

28.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
29.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
30.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of GMP certificate of the finished product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 198/2022-DRAP (AD-9405944056-789) dated 17-11-2022 issued on the basis of inspection conducted on 14-11-2022.
2.	1.6.5	Valid copy of the GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02-09-2020 on the basis of inspection conducted on 22-06-2020 is submitted.
3.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
4.	3.2.P.2.2	• Uniformity of dosage unit is not performed in the pharmaceutical equivalence. Clarification shall be submitted. • Justification for the use of water as dissolution medium in the CDP studies shall be submitted.	Pharmaceutical equivalence of our product with reference product i.e Amoxil Capsules by M/s GSK Pharma was established by performing Comparative Dissolution Profile. Now we have performed the Uniformity of dosage unit by weight variation as per USP <905> and results found satisfactory. Results of reference product are compared with our product (at 9th month stability). Amoxil Capsules 250mg by M/s GSK | Faxcil Capsules 250mg by Fynk Pharma 5.9 | 7.4 Limit : AV values NMT 15 Firm has submitted that dissolution media was selected based on USP monograph, as FPP monograph is available in USP (2022) so we used the same media i.e water as mentioned in USP monograph. ***Comparative Dissolution is not as per Guidelines.***
5.	3.2.P.5.2	Sample preparation in analytical method for assay test is different from USP. As per pharmacopoeia 200mg of anhydrous amoxicillin is used whereas the FPP has provided 20mg anhydrous amoxicillin. Clarification shall be submitted.	Firm has submitted that Assay testing was carried out as per USP monograph; however, there was a clerical error while typing the analytical method, 20mg was typed instead of 200mg. We request to ignore the typographic error. They also provided corrected method.
6.	3.2.P.5.4	Batch analysis of all the three trial batches shall be submitted.	Submitted.
7.	3.2.P.8	Justification for not performing uniformity of dosage units in the stability data shall be submitted.	Firm has submitted that Uniformity of dosage unit was performed at the time of batch release as it is a critical attribute for "mixing". Since uniformity is not included taken as Stability Indicator testing parameter by different guidelines such as WHO TRS 1010 (Annex 10), so we skipped this parameter.

			However we assure to perform it on commercial batches if directed by competent authority.
8.		• In some parts of the application finished product specification has mentioned dissolution specifications of Q = 80% in 30 minutes while the official monograph has mentioned 60 minutes. Justify.	Firm has submitted that Dissolution testing was conducted as per USP monograph; however, there were some clerical mistakes while typing. In our Standard Analytical Method dissolution specifications of Q = 80% in 60 minutes is mentioned. We request to ignore the typographic error.
		• Submitted invoice for the raw material has no information regarding the lot No. manufacturing date etc. Clarification shall be submitted.	Firm has submitted that material was purchased from Pharmagen Limited Pakistan. Commercial invoice is also provided. It has mentioned API lot No. 000130-12/852/2022 *However, the batch No. mentioned in the commercial invoice is different from the API lot number used in the development studies. Development of trial batches has mentioned 000130/852/2021.*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will b eissued upon submission of following:

- **Fee of Rs. 7500/- for correction/pre-approval change in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Performance of Comparative Dissolution Profile studies against innovator product, conducted in three dissolution medias of ph 1.2, 4.5 & 6.8 along with calculation of similarity factor f2 as per relevant guidelines.**
- **Verifcation of procurement of drug substance form M/s Pharmagen Ltd.**

Manufacturer of API	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.		
API Lot No.	000130/852/2021		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (10×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TR-01	TR-02	TR-03
Batch Size	1000 Capsules	1000 Capsules	1000 Capsules
Manufacturing Date	02-2022	02-2022	02-2022
Date of Initiation	15-02-2022	15-02-2022	15-02-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product D-Lazol 30mg

		capsules which was conducted on 07-09-2021 and was presented in 312th meeting of Registration Board (14 - 16 September, 2021). Report has confirmed that HPLC used in the analysis has HPLC software that is 21 CFR compliant and compliance certificate from the vendor was available. Audit trial of the system on which testing was reviewed.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Performa invoice No. PL/P-INV/HO /866 dated 03-01-2022 mentioning 5kg of the active ingredient is submitted. ***However, no batch number is mentioned on the invoice.***
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of GMP certificate of the finished product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 198/2022-DRAP (AD-9405944056-789) dated 17-11-2022 issued on the basis of inspection conducted on 14-11-2022.
2.	1.6.5	Valid copy of the GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02-09-2020 on the basis of inspection conducted on 22-06-2020 is submitted.
3.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
4.	3.2.P.2.2	• Uniformity of dosage unit is not performed in the pharmaceutical equivalence. Clarification shall be submitted.	Pharmaceutical equivalence of our product with reference product i.e Amoxil Capsules by M/s GSK Pharma was established by performing Comparative Dissolution Profile. Now we have performed the Uniformity of dosage unit by weight variation as per USP <905> and results found satisfactory. Results of reference product are compared with our product (at 9th month stability).

Amoxil Capsules 250mg by M/s GSK	Faxcil Capsules 250mg by Fynk Pharma
5.9	7.4
Limit : AV values NMT 15	

		• Justification for the use of water as dissolution medium in the CDP studies shall be submitted.	Firm has submitted that dissolution media was selected based on USP monograph, as FPP monograph is available in USP (2022) so we used the same media i.e water as mentioned in USP monograph. *Comparative Dissolution is not as per Guidelines.*
5.	3.2.P.5.2	Sample preparation in analytical method for assay test is different from USP. As per pharmacopoeia 200mg of anhydrous amoxicillin is used whereas the FPP has provided 20mg anhydrous amoxicillin. Clarification shall be submitted.	Firm has submitted that Assay testing was carried out as per USP monograph; however, there was a clerical error while typing the analytical method, 20mg was typed instead of 200mg. We request to ignore the typographic error. They also provided corrected method.
6.	3.2.P.5.4	Batch analysis of all the three trial batches shall be submitted.	Submitted.
7.	3.2.P.8	Justification for not performing uniformity of dosage units in the stability data shall be submitted.	Firm has submitted that Uniformity of dosage unit was performed at the time of batch release as it is a critical attribute for "mixing". Since uniformity is not included taken as Stability Indicator testing parameter by different guidelines such as WHO TRS 1010 (Annex 10), so we skipped this parameter. However we assure to perform it on commercial batches if directed by competent authority.
8.		• In some parts of the application finished product specification has mentioned dissolution specifications of Q = 80% in 30 minutes while the official monograph has mentioned 60 minutes. Justify. • Submitted invoice for the raw material has no information regarding the lot No. manufacturing date etc. Clarification shall be submitted.	Firm has submitted that Dissolution testing was conducted as per USP monograph; however, there were some clerical mistakes while typing. In our Standard Analytical Method dissolution specifications of Q = 80% in 60 minutes is mentioned. We request to ignore the typographic error. Firm has submitted that material was purchased from Pharmagen Limited Pakistan. Commercial invoice is also provided. It has mentioned API lot No. 000130-12/852/2022 *However, the batch No. mentioned in the commercial invoice is different from the API lot number used in the development studies. Development of trial batches has mentioned 000130/852/2021.*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will b eissued upon submission of following:

- **Fee of Rs. 7500/- for correction/pre-approval change in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Performance of Comparative Dissolution Profile studies against innovator product, conducted in three dissolution medias of ph 1.2, 4.5 & 6.8 along with calculation of similarity factor f2 as per relevant guidelines.**
- **Verifcation of procurement of drug substance form M/s Pharmagen Ltd.**

CLB in its 282nd meeting held on 31st August 2021 has considered and approved the grant of following 03 additional section to M/s M/s Citi Pharma (Pvt.) Ltd., 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur;

- Oral dry powder suspension (Cephalosporin)-New.
- Capsule (Cephalosporin) Section-New.
- Dry Powder Injection (Cephalosporin) – New.

Following applications are placed before the Board for consideration.

1876.	Name, address of Applicant / Marketing Authorization Holder	M/s Citi Pharma (Pvt.) Ltd., Kasur.
	Name, address of Manufacturing site.	M/s Citi Pharma (Pvt.) Ltd., 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 21162 dated 2707/2022.
	Details of fee submitted	PKR 30,000/-: vide slip No. 1323525483 dated 05/07/2022.
	The proposed proprietary name / brand name	Ceph-Sporin Dry Powder Suspension 125/5ml.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml suspension contain; Cephradine monohydrate Eq. to Cephradine …… 125mg.
	Pharmaceutical form of applied drug	Oral suspension.
	Pharmacotherapeutic Group of (API)	1st generation Cephalosporin.
	Reference to Finished product specifications	BP
	Proposed Pack size	1×90ml
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Cephradine for Suspension; Oral (125MG/5ML) and (250MG/5ML) USFDA Approved. Anspor (125MG/5ML) and (250MG/5ML) by GSK, USFDA approved. Status is discontinued in USFDA
	For generic drugs (me-too status)	Velosef 125mg Suspension, GSK Pakistan, Reg. No. 001867.
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 89/2021-DRAP (AD-84281917-5101) dated 15-11-2021 on the basis of inspection conducted on 13-08-2021 is submitted.
	Evidence of approval of manufacturing facility.	Oral dry powder suspension (Cephalosporin) New section is approved vide letter No. F. 1-30/94- Lic. (Vol-II) dated 20-09-2021 is approved.
	Name and address of API manufacturer.	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cephradine is available in USP & BP. Firm has submitted detail of the drug substance regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted a document mentioning batch number for the drug substance without mentioning the condition for the stability. Furthermore, it is on plain paper. Batch No. (00202/001/2008, 00202/050/2008 & 00202/100/2008)
	Module-III (Drug Product):	The firm has submitted detail of drug product including its description and composition, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Velocef Suspension, Mfg. date 02-2021 manufactured by GSK, Pakistan performing quality tests (Identification, content Uniformity & Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.
API Lot No.	Not provided.
Description of Pack (Container closure system)	Amber color bottle of 90ml.

Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	CPS-001	CPS-002	CPS-003
Batch Size (Scientifically rational batch size)	1000 bottles.	1000 bottles.	1000 bottles.
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	11-2021	11-2021	11-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

- All the undertakings are unsigned.
- Evidence of approval of applied formulation in reference regulatory authorities as defined by the Registration Board shall be submitted.
- Table for literature references is not as per format and does not include information of drug substance and drug product in other pharmacopoeias than USP and BP.
- Firm has submitted BP and USP specifications for the drug substance wherein no limits for 4,5 dihydrocepfradine are given while BP has mentioned the same. Clarify.
- Analytical method has also not mentioned any method for 4,5 dihydrocepfradine while the official monograph has mentioned. Clarify.
- Concentration of the standard and test samples are different from pharmacopoeia. Clarify.
- Chromatographic conditions i.e. flow rate and injection volume are also different from the pharmacopoeia.
- Analytical procedures by the finished product manufacturer shall be submitted.
- Verification of the drug product performed by the finished product manufacture shall be submitted.
- COA of the drug substance used in the development studies of the applied formulation from both drug substance and finished product manufacturer shall be submitted.
- COA submitted by both the drug substance and finished product manufacturer have no limits for 4,5 dihydrocepfradine

- Specifications has mentioned BP specifications for the drug substance while the reference standard provided is that of the USP. Clarify?
- Both real time and accelerated stability data for the drug substance from the drug substance manufacturer with conditions shall be submitted.
- 3.2.P.5.1 has claimed BP specifications while 1.5.6 has claimed USP.
- Stability data sheets shall be as per decision of 293rd meeting of RB with inclusion of API lot number, date of initiation & packing details etc.
- Complete six-month stability data.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Reference of previous approval of applications with stability study data of the firm (if any).
- Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.2	Label claim of the applied formulation is not in line with the reference product. Reference product has mentioned Cephradine 250mg/5ml while the applied formulation has	

		mentioned Cephradine monohydrate 250mg/5ml. Justification shall be submitted.	
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	
3.	1.5.15 to 1.5.20	All the undertakings are unsigned. Signed undertaking shall be submitted.	
4.	2.3	Table for literature references is not as per format and does not include information of drug substance and drug product in other pharmacopoeias than USP and BP.	
5.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
6.	3.2.S.4.1	Firm has submitted BP and USP specifications for the drug substance wherein no limits for 4,5 dihydrocepfradine are given while BP has mentioned the same. Clarify.	
7.	3.2.S.4.2	• Analytical procedures for the drug substance by the finished product manufacturer shall be submitted. • Analytical method has also not mentioned any method for 4,5 dihydrocepfradine while the official monograph has mentioned. Clarify. • Concentration of the standard and test samples in analytical procedures from the drug substance manufacturer are different from BP. Justification shall be submitted. • Chromatographic conditions i.e. flow rate and injection volume are also different from the pharmacopoeia. Justify.	
8.	3.2.S.4.3	Verification of the drug product performed by the finished product manufacture shall be submitted.	
9.	3.2.S.4.4	• Justify the physical form of the drug substance whether monohydrate or otherwise. • COA of the drug substance used in the development studies of the applied formulation from both drug substance and finished product manufacturer shall be submitted. • COA submitted by both the drug substance and finished product manufacturer have no limits for 4,5 dihydrocepfradine. Justify.	
10.	3.2.S.5	Specifications has mentioned BP specifications for the drug substance while the reference standard provided is that of the USP. Clarification shall be submitted.	
11.	3.2.S.7	Both real time and accelerated stability data for the drug substance from the drug substance manufacturer with conditions and specifications of the drug substance shall be submitted.	
12.	3.2.P.2.1	Qualitative composition of the applied formulation is different from the reference product. Justification shall be submitted.	
13.	3.2.P.5.1	Specifications has mentioned 4,5 dihydrocephalexin while BP has not mentioned any 4,5 dihydrocephalexin. Justify.	

14.	3.2.P.5.4	COAs of the finished product submitted has not quantified the Cefalexin quantity.	
15.	3.2.P.6	COAs and details of the reference standard used shall be submitted.	
16.	3.2.P.8	• Stability data sheets shall be as per decision of 293rd meeting of RB with inclusion of API lot number, date of initiation & packing details etc. • Justify the submitted chromatograms and also not calculating the content of 4,5 dihydrocephalexin as per BP monograph. • Complete six-month stability data for the applied formulation shall be submitted.	
17.		• Documents for the procurement of API with approval from DRAP (in case of import). • Reference of previous approval of applications with stability study data of the firm (if any). • Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.2	Label claim of the applied formulation is not in line with the reference product. Reference product has mentioned 250mg cefradine anhydrous while the applied formulation has mentioned Cephradine monohydrate Eq. to Cephradine 250mg. Justification shall be submitted.	
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	
3.	1.5.15 to 1.5.20	All the undertakings are unsigned. Signed undertaking shall be submitted.	
4.	2.3	Table for literature references is not as per format and does not include information of drug substance and drug product in other pharmacopoeias than USP and BP.	
5.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
6.	3.2.S.4.1	Firm has submitted both BP and USP specifications for the drug substance wherein no limits for 4,5 dihydrocepfradine are given while BP has mentioned the same. Clarify.	
7.	3.2.S.4.2	• Analytical procedures for the drug substance by the finished product manufacturer shall be submitted. • Analytical method has also not mentioned any method for 4,5 dihydrocepfradine while the official monograph has mentioned. Clarify. • Concentration of the standard and test samples in analytical procedures from the drug substance manufacturer are different from BP. Justification shall be submitted. • Chromatographic conditions i.e. flow rate and injection volume are also different from the pharmacopoeia. Justify.	
8.	3.2.S.4.3	Verification of the drug product performed by the finished product manufacture shall be submitted.	
9.	3.2.S.4.4	• Justify the physical form of the drug substance whether monohydrate or otherwise.	

		• Justification for use of micronized Cefradine (as evident from the submitted COA) in the Capsule dosage form shall be submitted. • COA of the drug substance used in the development studies of the applied formulation from both drug substance and finished product manufacturer shall be submitted. • COA submitted by both the drug substance and finished product manufacturer have no limits for 4,5 dihydrocepfradine. Justify.	
10.	3.2.S.5	Specifications has mentioned BP specifications for the drug substance while the reference standard provided is that of the USP. Clarification shall be submitted.	
11.	3.2.S.7	Both real time and accelerated stability data for the drug substance from the drug substance manufacturer with conditions and specifications of the drug substance shall be submitted.	
12.	3.2.P.5.1	Specifications has mentioned 4,5 dihydrocephalexin while BP has not mentioned any 4,5 dihydrocephalexin. Justify.	
13.	3.2.P.5.4	COAs of the finished product submitted has not quantified the Cefalexin quantity.	
14.	3.2.P.6	COAs and details of the reference standard used shall be submitted.	
15.	3.2.P.8	• Stability data sheets shall be as per decision of 293rd meeting of RB with inclusion of API lot number, date of initiation & packing details etc. • Justify the submitted chromatograms and also not calculating the content of 4,5 dihydrocephalexin as per BP monograph. • Complete six-month stability data for the applied formulation shall be submitted.	
16.		• Documents for the procurement of API with approval from DRAP (in case of import). • Reference of previous approval of applications with stability study data of the firm (if any). • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	
17.		Justification shall be submitted regarding the submitted chromatograms as neither system suitability nor all the three contents are calculated. BP pharmacopoeia states that assay is not valid unless, chromatograms obtained with solution (4), the resolution factor between the peaks corresponding to cefradine and cephalexin is at least 4.0.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 21163 dated 27-07-2022.
	Details of fee submitted	PKR 30,000/-: vide slip No. 54244495992 dated 05/07/2022.
	The proposed proprietary name / brand name	Ceph-Sporin Capsule 500mg.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contain; Cephradine monohydrate Eq. to Cephradine …… 500mg.
	Pharmaceutical form of applied drug	Oral Capsule.
	Pharmacotherapeutic Group of (API)	1st generation Cephalosporin.
	Reference to Finished product specifications	BP
	Proposed Pack size	2 x 6's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Each capsule contains 500mg cefradine anhydrous, MHRA approved.
	For generic drugs (me-too status)	Velosef 500mg Capsule, GSK Pakistan, Reg. No. 001863.
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 89/2021-DRAP (AD-84281917-5101) dated 15-11-2021 on the basis of inspection conducted on 13-08-2021 is submitted.
	Evidence of approval of manufacturing facility.	Capsule (Cephalosporin) New section is approved vide letter No. F. 1-30/94- Lic. (Vol-II) dated 20-09-2021 is approved.
	Name and address of API manufacturer.	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.

	Module III (Drug Substance)	Official monograph of Cephradine is available in USP & BP. Firm has submitted detail of the drug substance regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis (00203/013/2020) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted a document mentioning batch number for the drug substance without mentioning the condition for the stability. Furthermore, it is on plain paper. Batch No. (00202/001/2008, 00202/050/2008 & 00202/100/2008)
	Module-III (Drug Product):	The firm has submitted detail of drug product including its description and composition, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Velosef Capsule 500mg by GSK, Pakistan performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has is performed against the same brand that is Velosef Capsule 500mg by GSK, Pakistan in Acid media pH 1.2, Acetate buffer 4.5 & Phosphate Buffer pH 6.8. The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.4	Proposed pack size has mentioned 1 x 20ml. Clarification shall be submitted.	
2.	1.5.15 - 1.5.20	All the undertakings are unsigned. Signed undertaking shall be submitted.	
3.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	
4.	2.3	Table for literature references has mentioned both the USP and BP for drug substance However, Cephradine with L arginine is not available in any pharmacopoeia. Furthermore, Table for literature references is not as per format and does not include information of drug substance and drug product in other pharmacopoeias than USP and BP.	

5.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
6.	3.2.S.	Drug substance part for Cephradine for injection is provided while the drug substance is Cephradine L-Arginine. Justification shall be submitted.	
7.	3.2.S.4.1	• Specifications provided by the drug product manufacturer has not mentioned any limits for L arginine. Justification shall be submitted. • Specification of the drug substance by the drug substance manufacturer shall be submitted. • USP monograph of Cephradine for injection has mentioned assay limits of 90.0 percent and not more than 115.0 percent of the labeled amount of cephradine, calculated as the sum of cephradine and cephalexin. While the specifications provided by the applicant has mentioned NLT 62% calculated as the sum of cephradine and cephalexin. Justification shall be submitted.	
8.	3.2.S.4.2	• Analytical method for the drug substance used by the drug substance manufacturer shall be submitted. • Analytical method for the assay test of the drug substance provided by the drug product manufacturer is completely different from the USP. Justify.	
9.	3.2.S.4.3	Analytical method verification studies performed by the drug product manufacturer shall be submitted.	
10.	3.2.S.4.4	• COA of the drug substance from both the drug substance and drug product manufacturer used in the development studies shall be submitted. • COA submitted by the drug product manufacturer for the drug substance has assay results of 93.80%. Justify.	
11.	3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	
12.	3.2.S.7.3	• Justification shall be submitted for overwriting the stability data condition of the drug substance in real time stability data of all the three batches. • Stability of the drug substance from the drug substance manufacturer shall be submitted.	
13.	3.2.P.3.3	Manufacturing process provided by the applicant is for injectable solution. Justify.	
14.	3.2.P.3.5	Process validation provided by the applicant is for some other product	
15.	3.2.P.5.1	Specifications for the drug product has not mentioned most of the test while they are included in USP. Sterility, Bacterial endotoxin, loss on drying, particulate matters etc.	
16.	3.2.P.5.2	Analytical procedures used for the drug product shall be submitted.	
17.	3.2.P.5.3	• Analytical procedure of assay in USP monograph is HPLC while provided method validation protocol No. QC/Ceph/MVD/012 issue date 21-11-2021 is for UV spectrophotometer. Justification shall be submitted.	

		• Method validation report No. QC/Ceph/MV/009 issue date 14-01-2022 is also for UV spectrophotometer. Justification shall be submitted.	
18.	3.2.P.5.4	Batch analysis/COAs of all the three trial batches shall be submitted.	
19.	3.2.P.6	COA of primary / secondary reference standard including source and lot number shall be provided.	
20.	3.2.P.8.1	• Stability data sheets shall be as per decision of 293rd meeting with inclusion of starting of stability date and API lot number used in the development studies. • Justify the accelerated stability data of all the three trial batches with respect to the provided/submitted chromatograms as all the three trial batches have same values up to the decimal points.	
21.	3.2.P.8.3	• Justification shall be submitted for not performing sterility, bacterial endotoxin and particulate matters etc in the stability studies of the drug product. • In-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.	
22.		• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	
23.		• Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. • Chromatograms for all the three trial batches along with raw data sheets for each batch separately shall be submitted.	
24.		Justification shall be submitted regarding more than 5 types of signatures in the submitted dossiers.	
25.		Justification regarding the real time and accelerated stability data of all the trial batches with respect to the 500mg & 1gm strength of the same formulation as all the values are similar to the decimal points.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.4	Proposed pack size has mentioned 1 x 20ml. Clarification shall be submitted.	
2.	1.5.15 - 1.5.20	All the undertakings are unsigned. Signed undertaking shall be submitted.	
3.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	
4.	2.3	Table for literature references has mentioned both the USP and BP for drug substance However, Cephradine with L arginine is not available in any pharmacopoeia. Furthermore, Table for literature references is not as per format and does not include information of drug substance and drug product in other pharmacopoeias than USP and BP.	
5.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
6.	3.2.S.	Drug substance part for Cephradine for injection is provided while the drug substance is Cephradine L-Arginine. Justification shall be submitted.	
7.	3.2.S.4.1	• Specifications provided by the drug product manufacturer has not mentioned any limits for L arginine. Justification shall be submitted. • Specification of the drug substance by the drug substance manufacturer shall be submitted. • USP monograph of Cephradine for injection has mentioned assay limits of 90.0 percent and not more than 115.0 percent of the labeled amount of cephradine, calculated as the sum of cephradine and cephalexin. While the specifications provided by the applicant has mentioned NLT 62% calculated as the sum of cephradine and cephalexin. Justification shall be submitted.	
8.	3.2.S.4.2	• Analytical method for the drug substance used by the drug substance manufacturer shall be submitted. • Analytical method for the assay test of the drug substance provided by the drug product	

		manufacturer is completely different from the USP. Justify.	
9.	3.2.S.4.3	Analytical method verification studies performed by the drug product manufacturer shall be submitted.	
10.	3.2.S.4.4	• COA of the drug substance from both the drug substance and drug product manufacturer used in the development studies shall be submitted. • COA submitted by the drug product manufacturer for the drug substance has assay results of 93.80%. Justify.	
11.	3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	
12.	3.2.S.7.3	• Justification shall be submitted for overwriting the stability data condition of the drug substance in real time stability data of all the three batches. • Stability of the drug substance from the drug substance manufacturer shall be submitted.	
13.	3.2.P.3.3	Manufacturing process provided by the applicant is for injectable solution. Justify.	
14.	3.2.P.3.5	Process validation provided by the applicant is for some other product	
15.	3.2.P.5.1	Specifications for the drug product has not mentioned most of the test while they are included in USP. Sterility, Bacterial endotoxin, loss on drying, particulate matters etc.	
16.	3.2.P.5.2	Analytical procedures used for the drug product shall be submitted.	
17.	3.2.P.5.3	• Analytical procedure of assay in USP monograph is HPLC while provided method validation protocol No. QC/Ceph/MVD/012 issue date 21-11-2021 is for UV spectrophotometer. Justification shall be submitted. • Method validation report No. QC/Ceph/MV/009 issue date 14-01-2022 is also for UV spectrophotometer. Justification shall be submitted.	
18.	3.2.P.5.4	Batch analysis/COAs of all the three trial batches shall be submitted.	
19.	3.2.P.6	COA of primary / secondary reference standard including source and lot number shall be provided.	
20.	3.2.P.8.1	• Stability data sheets shall be as per decision of 293rd meeting with inclusion of starting of stability date and API lot number used in the development studies. • Justify the accelerated stability data of all the three trial batches with respect to the provided/submitted chromatograms as all the three trial batches have same values up to the decimal points.	
21.	3.2.P.8.3	• Justification shall be submitted for not performing sterility, bacterial endotoxin and particulate matters etc in the stability studies of the drug product. • In-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided.	

22.		• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	
23.		• Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. • Chromatograms for all the three trial batches along with raw data sheets for each batch separately shall be submitted.	
24.		Justification shall be submitted regarding more than 5 types of signatures in the submitted dossiers.	
25.		Justification regarding the real time and accelerated stability data of all the trial batches with respect to the 250mg & 1gm strength of the same formulation as all the values are similar to the decimal points.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	03-2021	03-2021	03-2021
No. of Batches	03		

Administrative Portion		
31.	Reference of previous approval of applications with stability study data of the firm (if any)	Seven Products are approved in 307th Meeting of Registration Board with stability Data. Loxiten 20mg Capsules, Loxiten 30mg Capsules, Loxiten 60mg Capsules, Omexa 20mg Capsules, Omexa 40mg Capsules, Lansasure 15mg Capusles and Lansasure 30mg Capsules.
32.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
33.	Documents for the procurement of API with approval from DRAP (in case of import).	25kg of Pantoprazole as sodium sesquihydrate USP is imported from Metrochem API private Limited, Unit-I, Plot No. 62/C/6, Pipeline Road phase-I IDA, Jeedimetla, Quthbullapur (M), Medchal- Malkajgiri (Distt.) Telangana State India through Invoice # AE/20/0503 Dated 19-01-2021 for their export Registered product with Reg. No. 009762EX. Clearance certificate Dated: 02-02-2021 from Assistant Director I&E, DRAP, Islamabad is also attached.
34.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
35.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
36.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Response by the firm
	1.6.5	Valid GMP certificate of the drug substance manufacturer issued by the concerned / relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. 36935/TS/2020 issued by the DCA Government of Telangana dated 22-04-2020 in the name of Metrochem API private Limited, Unit-I, Plot No. 62/C/6, Pipeline Road phase-I IDA, Jeedimetla, Quthbullapur (M), Medchal- Malkajgiri (Distt.) Telangana State India. Valid till 22-04-2021.
1	2.3	Table of literature references for the drug substance has mentioned JP pharmacopoeia for the drug substance. Clarification is required.	Firm has submitted revised table of literature references.
	3.2.S.4	Justification for using crystalline I form of the drug substance shall be submitted.	Firm has submitted that Crystalline Form-I is mentioned in some Parts of DMF but in provided COAs of the API white to off white powder is mentioned. The actual description of the powder is almost white powder. We have contacted the supplier via email regarding crystalline form-I but they haven't responded yet.
2	3.2.S.4.2	Signed analytical procedures for drug substance by the finished product manufacturer shall be submitted.	Submitted.
3	3.2.P.2.1.2	Qualitative composition of the applied formulation is different form reference product. Clarification shall be submitted.	Still different from innovator product.
4	3.2.P.2.2.1.	• Justification of using KCl buffer in CDP shall be submitted. • Justification shall be submitted for using only one-time point in CDP in all the three mediums. • Justification for not performing CDP against the innovator product shall be submitted.	Firm has submitted new results for CDP against Zentro 40 mg Tablets, B. No. 08916F manufactured by Bosch Pharmaceuticals at three pH 1.2 HCl buffer, 4.5 Acetate Buffer & 6.8 Phosphate Buffer by using different time points instead of using only one-time point and also the similarity factor (f2) is calculated and found satisfactory. We have tried to arrange the innovator product (Protonix 40mg Tablets) but we are unable to arrange the innovator and therefore, we have performed the CDP with Brand Leader in Pakistan Zentro 40mg Tablets Mfg. By Bosch Pharma Karachi Pakistan.
5	3.2.P.3	EMA public assessment report has mentioned that "the drug substance is incompatible with all conventional gastro-resistant coating polymers, which are acidic. It was, therefore, necessary to seal the tablet core with an additional isolating layer of neutral coating material before applying the gastro-resistant coat". However, manufacturing method of the applied formulation has no such sealing or coating before enteric coating. Clarify.	Actually in the BMRs of Executed Batches we have applied seal coating before enteric coating. But in the stage of Dossier compilation the manufacturing method of seal coating may forgot to mention. But in the new CTD Dossier of P-Panto 40mg Tablets we have mentioned the complete seal coating method before enteric coating.
6	3.2.P.5.2.	Signed copy of analytical method of drug product shall be submitted.	Submitted.
7	3.2.P.5.3.	In analytical method validation data 100% concentration of the sample has an area of 550332 while the raw data sheets of stability study data have an area of 453426 for the same concentration. Clarification is required.	
8	3.2.P.8	• Stability data sheets have mentioned manufacturing date of April 2021 for the trial batches while the same sheets	***Firm has submitted new stability data vide Dy. No. 30260 dated 25-10-2022 for the applied formulation with submission of full fee of***

		have mentioned initial testing in march 2021. Clarification is required. • Submit stability data sheets as per approved format by the Registration Board with inclusion of API lot number. • Stability data sheets are for vial dosage form. Clarification is required. • Finished product specification has mentioned tablet weight of 215mg ± 3% while the raw data sheets for assay calculation has mentioned average weight content of 265mg. clarification is required. • Analytical record for dissolution test shall be provided.	***30,000/- fee vide slip No. 27965616690 dated 10-11-2022.*** ***Details of the stability data are given below;***

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. 36935/TS/2020 issued by the DCA Government of Telangana dated 22-04-2020 in the name of Metrochem API private Limited, Unit-I, Plot No. 62/C/6, Pipeline Road phase-I IDA, Jeedimetla, Quthbullapur (M), Medchal-Malkajgiri (Distt.) Telangana State India. Valid till 22-04-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	25kg of Pantoprazole as sodium sesquihydrate USP is imported from Metrochem API private Limited, Unit-I, Plot No. 62/C/6, Pipeline Road phase-I IDA, Jeedimetla, Quthbullapur (M), Medchal- Malkajgiri (Distt.) Telangana State India through Invoice # AE/20/0503 Dated 19-01-2021 for their export Registered product with Reg. No. 009762EX. Clearance certificate Dated: 02-02-2021 from Assistant Director I&E, DRAP, Islamabad is also attached.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted.

Remarks of the Evaluator:

- Firm has submitted document No. L. Dis. No. 4084/A3/2019 dated 20-05-2020 in the name of Metrochem API private Limited, Unit-I, Plot No. 62/C/6, Pipeline Road phase-I IDA, Jeedimetla, Quthbullapur (M), Medchal- Malkajgiri (Distt.) Telangana State India issued by Drugs Control Administration Government of Telangana wherein it is stated that the manufacturer confirms to requirements for Good Manufacturing Practices in the manufacturing and quality control (As recommended by the WHO) in respect of the products mentioned above (Twenty-Six in number) for export in the international market. Validity is for three years from date of issuance.
- Graphical representation of the CDP has shown more than 80% release of the drug in acidic media to which firm replied that it was presented mistakenly for another product while the tabulated results were in compliance.
- Qualitative composition is different from the innovator product. Clarify.

Decision: Approved. Firm shall submit "Drug Excipinet Compatibility" studies before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case 02; Registration applications of Locally Manufactured Routine (Human) drugs on Form 5F.

1884.	Name, address of Applicant / Marketing Authorization Holder	Pharmasol Private Limited, 82, R-1, M.A. Johar Town. Lahore.
	Name, address of Manufacturing site.	Pharmasol Private Limited, Plot No. 549, Sundar Industrial Estate, Raiwind Road, Lahore.
	Status of the applicant	☒ Manufacturer. ☐ Importer.

		☐ Is involved in none of the above (contract giver).
	Status of application	☐ New Drug Product (NDP). ☒ Generic Drug Product (GDP).
	Intended use of pharmaceutical product	☐ Domestic sale. ☐ Export sale. ☒ Domestic and Export sales.
	Dy. No. and date of submission	Dy. No. 34237 dated 31-12-2021.
	Details of fee submitted	PKR 30,000/-: dated 19-06-2021.
	The proposed proprietary name / brand name	Tigesol 60mg tablet.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains; Ticagrelor …… 60mg.
	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Platelet aggregation inhibitors excl. heparin.
	Reference to Finished product specifications	Innovator's specifications.
	Proposed Pack size	Alu/Alu foil blister of 7's, 10's. 7's, 10's, 14's, 20's, 21's, 28's, 30's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Brilinta 60 mg film coated tablets, USFDA approved.
	For generic drugs (me-too status)	Anplag 60mg, PharmEvo (Pvt.) Ltd., Reg. No.093105.
	GMP status of the Finished product manufacturer	GMP certificate No. 249/2019-DRAP (AD-716018-5101) dated 21-08-2019 issued on the basis of inspection conducted on 25-07-2019 is submitted by the firm.
	Evidence of section approval.	Tablet section general, Anti-cancer & Hormone mentioned in the above submitted GMP certificate.
	Name and address of API manufacturer.	M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road, Yangkou Chemical Industrial park, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China. Firm has submitted copy of GMP certificate for M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical industry association valid till 05-05-2022.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.

	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (RD-TG-201806261, RD-TG-201808021, RD-TG-201810081)
	Module-III (Drug Product):	The firm has submitted detail of manufacturer, description of manufacturing process and controls, batch formula, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against Anplag 60 mg tablet by PharmEvo (Pvt) Ltd, Batch number 9H209, Mfg. date 07-2019, Exp. Date 06-2021 by performing quality tests (Disintegration, Assay, Dissolution). CDP has been performed against the same brand that is Anplag 60 mg tablet by PharmEvo (Pvt) Ltd in four different mediums i.e. pH 1.2 in 0.1 N HCl, pH 4.5 Acetate buffer, pH 6.8 Phosphate buffer & polysorbate 80. The values for f2 are in the acceptable range and 0.2% polysorbate 80 in water. The values are in the acceptable range.
	Analytical method validation/verification of product	Method Validation studies have submitted including linearity, range, accuracy, precision, specificity.

No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate for M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical industry association valid till 05-05-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice number CY120024 dated 14-02-2020 mentioning 1.83kg quantity of ticagrelor, Batch No. RD-TG-201911211 attested by Assistant Director DRAP, Lahore vide No. 3434/2020DRAP dated 05-03-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observations.	Response by the firm.
1.	1.3.4	Valid copy of GMP certificate of the drug product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 140/2022-DRAP (AD-084433115014) dated 26-08-2022 issued on the basis of inspection conducted on 22-08-2022.
2.	1.5.6	This section has mentioned innovator specifications while the official monograph is available in BP. Clarification is required.	Firm has submitted that trial batches were developed in August, 2020, whereas, the monograph for ticagrelor tablets was published in BP in 2022, that's why trial batches were developed with innovator specifications.
3.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted.	Manufacturing License (No. Su 20160512) for M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si road, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province, China issued by Jiangsu Food & Drug Administration valid upto 2-12-2025
4.	2.3	Table for literature references has not mentioned any pharmacopoeia neither for the drug substance nor for	Firm has submitted that at the time of development and submission of dossier, neither monograph for the drug substance nor for the

		the drug product while the official monograph for both the drug substance as well as drug product is available in BP. Justification shall be submitted.	drug product was available in any pharmacopoeia. ***Firm has not submitted any revised document for literature references.***
5.	3.2.S.4.1	• In house specification are claimed for the drug substance while the official monograph is available in BP. Justification shall be submitted. • Specifications of the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted that trial batches were developed in August, 2020, whereas, the monograph for ticagrelor tablets was published in BP in 2022, that's why trial batches were developed with innovator specifications. Submitted.
6.	3.2.S.4.2	• Analytical procedure for the assay test provided by the drug substance manufacturer has no formula for the assay calculation. Clarification shall be submitted. • Analytical procedures for the drug substance by the drug product manufacturer shall be submitted	Submitted. Submitted.
7.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Firm has submitted commitment to perform method verification studies both for drug substance and drug product before commercial manufacturing. ***Firm has not submitted any verification/ validation studies for the drug substance.***
8.	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	Firm has submitted that Polymeric form II has been declared by Drug substance manufacturer under Section 3.2.S.1.3 General Properties, hence it is not mentioned on COA.
9.	3.2.S.5	Details of the reference standard or material and COA of primary / secondary reference standard including source and lot number shall be provided.	Submitted.
10.	3.2.P.2.2	• Justification of not performing Pharmaceutical Equivalence & CDP against innovator product shall be submitted. • Justification shall be submitted for carrying CDP in polysorbate medium.	Firm has submitted that as per DRAP guidelines, they have performed, Pharmaceutical Equivalence & CDP studies against comparator brand leader in local market, ANPLAG 60mg Tablets (manufactured by PharmEvo Pvt. Limited). In addition, the results were found similar and in compliance with quality test parameters. They further submitted that although the CDP was performed in 0.1N HCl, Acetate Buffer pH 4.5 & Phosphate Buffer pH 6.8. However, dissolution in 0.2% Polysorbate was additionally performed to verify the results in USFDA dissolution media.
11.	3.2.P.5.1	• This section has mentioned in-house specifications while the official monograph of the applied formulation is available in BP. • Dissolution limits provided by the drug product manufacturer (NLT 85% after 75 minutes) are different from official monograph (Q = 70% after 45 minutes). Justification shall be submitted.	Firm has again referred to the response made under point number 2.3 that the monograph for Ticagrelor tablet was not available in BP-2020 and hence product was developed as per Innovator's Specifications and the same limits had been applied. Firm has submitted that the drug product was developed as per Innovator's Specifications because of unavailability of monograph in BP-2020. However, the commercial batches shall be developed and tested as per monograph available in BP-2022.

12.	3.2.P.5.2	• Analytical method for dissolution test has mentioned phosphate buffer as medium. Clarification shall be submitted. • Analytical procedures for both the tests assay and dissolution are different from the official monograph in respect of conditions, parameters and standard preparation, sample preparation and mobile phase etc. clarification shall be submitted.	Firm has submitted that it was a typographic mistake. Dissolution media for drug product is Polysorbate 80 in water. Firm has again referred to the response made under point number 2.3 that the monograph for Ticagrelor tablet was not available in BP-2020 and hence product was developed as per Innovator's Specifications and the same limits had been applied.
13.	3.2.P.8.1	• Reference of previous approval of applications with stability study data shall be submitted.	Not submitted.
14.	3.2.P.8.3	• Justification shall be submitted for using 99.55 potency in the calculation of assay and dissolution tests of the stability studies with respect to the potency of with reference to the COA of reference / working standard material (98.7%) as per available information in the application of 90mg. • Justify the run time and retention time for ticagrelor in the submitted chromatograms as the official monograph has mentioned retention time of about 4 minutes and run time of twice the retention time.	Firm has submitted COA of the primary reference standard wherein the assay is 99.55%. Firm has again referred to the response made under point number 2.3 that the monograph for Ticagrelor tablet was not available in BP-2020 and hence product was developed as per Innovator's Specifications and the same limits had been applied.

Decision: Approved with BP specifications. The firm shall submit fee of Rs. 75,00/- for correction/pre-approval change in specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

7.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Firm has submitted commitment to perform method verification studies both for drug substance and drug product before commercial manufacturing. ***Firm has not submitted any verification/ validation studies for the drug substance.***
8.	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	Firm has submitted that Polymeric form II has been declared by Drug substance manufacturer under Section 3.2.S.1.3 General Properties, hence it is not mentioned on COA.
9.	3.2.P.2.2	• Justification shall be submitted for carrying CDP in polysorbate medium.	Firm has submitted that although the CDP was performed in 0.1N HCl, Acetate Buffer pH 4.5 & Phosphate Buffer pH 6.8. However, dissolution in 0.2% Polysorbate was additionally performed to verify the results in USFDA dissolution media.
10.	3.2.P.5.1	• This section has mentioned in-house specifications while the official monograph of the applied formulation is available in BP. • Dissolution limits provided by the drug product manufacturer (NLT 85% after 75 minutes) are different from official monograph (Q = 70% after 45 minutes). Justification shall be submitted.	Firm has submitted that as per DRAP guidelines, they have performed, Pharmaceutical Equivalence & CDP studies against comparator brand leader in local market, ANPLAG 60mg Tablets (manufactured by PharmEvo Pvt. Limited). In addition, the results were found similar and in compliance with quality test parameters. However, the commercial batches shall be developed and tested as per monograph available in BP 2022.
11.	3.2.P.5.2	• Analytical method for determination of assay is for 60mg tablets. Analytical method for 90mg tablet shall be submitted. • Analytical method for dissolution test has mentioned phosphate buffer as medium. Clarification shall be submitted. • Analytical procedures for both the tests assay and dissolution are different from the official monograph in respect of conditions, parameters and standard preparation, sample preparation and mobile phase etc. clarification shall be submitted.	Submitted. Firm has submitted revised method for dissolution test with Polysorbate 80 as dissolution medium. Firm has again referred to the response made under point number 2.3 that the monograph for Ticagrelor tablet was not available in BP-2020 and hence product was developed as per Innovator's Specifications and the same limits had been applied.
12.	3.2.P.8.1	• Reference of previous approval of applications with stability study data shall be submitted.	Not submitted.
13.	3.2.P.8.3	• Justification shall be submitted for using 99.55 potency in the calculation of assay and dissolution tests of the stability studies with respect to the potency of with	Firm has submitted COA of the primary reference standard wherein the assay is 99.55%.

		reference to the COA of reference / working standard material. • Justify the run time and retention time for ticagrelor in the submitted chromatograms as the official monograph has mentioned retention time of about 4 minutes and run time of twice the retention time.	Firm has again referred to the response made under point number 2.3 that the monograph for Ticagrelor tablet was not available in BP-2020 and hence product was developed as per Innovator's Specifications and the same limits had been applied.

Decision: Approved with BP specifications. The firm shall submit fee of Rs. 75,00/- for correction/pre-approval change in specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case 03; Registration applications of New section (Human) deferred drugs on Form 5F.

On the recommendations of panel of experts, the CLB in its 273rd meeting held on 15th January, 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following four sections:

i. Tablet Section (General)
ii. Capsule Section (General)
iii. Sachet Section (General)
iv. Dry powder injection section (pre-lyophilized) vial

	The proposed proprietary name / brand name	Levosulpiride 25mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains Levosulpiride …….. 25mg
	Pharmaceutical form of applied drug	Tablet.
	Pharmacotherapeutic Group of (API)	Antipsychotic.
	Reference to Finished product specifications	Innovator's specifications

	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Levosulpiride 25mg tablet, AIFA ITALY Approved.
	For generic drugs (me-too status)	Syconor Tablet 25mg, Opal Laboratories, Reg. No. 096116.
	GMP status of the Finished product manufacturer	New license granted on 13/02/2020. General Tablet, General Capsule, General Sachet and General dry powder injectable (pre-lyophilized) Vial.
	Evidence of section approval.	Tablet general section is approved vide letter No. F.1-1/2016/Lic. Dataed 24-02-2020.
	Name and address of API manufacturer.	Alcon Biosciences Private Limited, A-1/2104, phase III, GIDC, Vapi, Gujarat –396 195 India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Official monograph of Levosulpiride is not present in USP/BP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 48 months. Batches:(ALC/LSP/180304, ALC/LSP/180305, ALC/LSP/180306).
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is LEVOPRAID 25 mg Tablets by M/s Pacific Pharma (Pvt.) Ltd., B. No. AQ2309Q by performing quality tests (description, Assay, Dissolution). CDP has been performed against the same brand that is LEVOPRAID 25 mg Tablets by M/s Pacific Pharma (Pvt.) Ltd., in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Manufacturing Date	08-2021	09-2021	09-2021
Date of Initiation	02-09-2021	06-09-2021	11-09-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of GMP certificate No. S-GMP/20102297 in the name of Alcon Biosciences Private Limited, A-1/2104, phase III, GIDC, Vapi, Gujarat –396 195 India issued by the Food & Drug Control Administration Gandhinagar, Gujarat State, India valid till 21-10-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Invoice No. ALC/20210215 wherein quantity of 1.1kg of Levosulpiride for test/analysis is imported by the firm. The invoice is signed and stamped by the Assistant Director I&E, DRAP, Lahore dated 28-07-2021.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	3.2.S.4.1	Specifications of the drug substance by the finished product manufacturer shall be submitted.	*Firm has submitted specification for drug product instead of Drug substance.*
2.	3.2.S.4.2	Analytical procedures for the dug substance by the finished product manufacturer shall be submitted.	Submitted. *However, the assay method in the analytical procedure submitted by the drug product manufacturer is by UV method and HPLC method while the drug substance has mentioned potentiometric method for the assay of the drug substance.*
3.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
4.	3.2.S.4.4	Analytical record for the drug substance shall be submitted.	Firm has submitted analytical record for the drug substance. Submitted analytical has shown hand written date of 16-08-2021 while the firm has also submitted new COA with release date of 16-08-2021. However, in the initially submitted dossier, COA with release date of 24-05-2021 was submitted. Furthermore, submitted chromatograms of the drug substance in the analytical record submitted by the firm has also shown processing date of 22-05-2021.
5.	3.2.S.4.5	Justification of specifications for the drug substance shall be submitted.	*Justifications of specification submitted by the firm has assay value of 98.5% - 101% while the drug substance manufacturer has assay limits of 99% - 101%.*
6.	3.2.P.2.2	• Justification shall be submitted for not carrying the CDP against the innovator's brand. • Calculation of F2 for CDP shall be submitted.	Firm has submitted that according to WHO technical report series, No. 902,2002, if the innovator product is not available in the local market you can use the market leader product. They further submitted that in their case Levopraid 25mg tablets manufactured by Pacific pharmaceuticals under the license from Ravizza pharmaceutici S.p.A. Milan, Italy is considered appropriate for pharmaceutical equivalence studies as this product is currently widely used within our local market and repute of company and the product is also satisfactory. Firm has submitted complete calculations of F2 value for all the three mediums used in CDP.

7.	3.2.P.8	Documents for the procurement of API with approval from DRAP mentioning the batch number of the drug substance shall be submitted.	Firm has submitted commercial invoice No. AB/I/00001/21-22 dated 02-04-2021 mentioning 05kg of Levosulpiride, batch No. LSP/N/21/001, manufacturing date Feb, 2021 attested by Assistant Director I&E, DRAP, Lahore dated 12-04-2021. *However, the API lot used in the formulation development studies has batch number of 31L01Z2122-001.*

Decision: Registration Board decided to defer the case for verification or submission of the following points:

- COA of the drug substance initially submitted was having release date of 24-05-2021 while the substance clearance (invoice) is signed and stamped by the Assistant Director I&E, DRAP, Lahore dated 28-07-2021.
- Furthermore, submitted chromatograms of the drug substance in the analytical record submitted by the firm has also shown processing date of 22-05-2021. Justification shall be submitted.
- API lot used in the formulation development studies has batch number of 31L01Z2122-001, while firm has submitted commercial invoice No. AB/I/00001/21-22 dated 02-04-2021 mentioning 05kg of Levosulpiride, batch No. LSP/N/21/001, manufacturing date Feb, 2021.

Reply by the firm;

COA of the drug substance initially submitted was having release date of 24-05-2021 while the substance clearance (invoice) is signed and stamped by the Assistant Director I&E, DRAP, Lahore dated 28-07-2021.	Firm has submitted that they have export registration of Levosulpiride under brand name of ***Evorant 50mg TABLET (Re g# 009908-EX).*** And we import 05kg Raw material via ***FORM 5 # 5599/2021 DRAP*** *dated* ***14-04-2021*** under invoice # **AB/I/00001/21-22** with ***AD I&E Lahore approval date 04-05-2021.*** The data of above-mentioned batch is by mistake copied and sent to you initially, upon knowing our mistake we provide you the correct data of material import via ***Form 6 # 11241/2021-DRAP*** *Approved on* ***28-07-2021*** and **Invoice # ALC/20210215** dated **15-02-2021** and **AD (I&E) approval date 28-07-2021.**
Furthermore, submitted chromatograms of the drug substance in the analytical record submitted by the firm has also shown processing date of 22-05-2021. Justification shall be submitted.	We have export registration of Levosulpiride under brand name of ***Evorant 50mg TABLET (Reg # 009908-EX).*** And we import 05kg Raw material via ***Form 5 # 5599/2021 DRAP*** *DATED* ***14-04-2021*** under invoice # **AB/I/00001/21-22** with ***AD I&E Lahore approval date 04-05-2021.*** The data including Chromatograms of above-mentioned batch is by mistake copied and sent to you initially, upon knowing our mistake we provide you the correct data of material import via ***Form 6 # 11241/2021-DRAP*** *Approved on* ***28-07-2021*** and **Invoice # ALC/20210215** dated **15-02-2021** and **AD (I&E) approval date 28-07-2021**
API lot used in the formulation development studies has batch number of 31L01Z2122-001, while firm has submitted commercial invoice No. AB/I/00001/21-22 dated 02-04-2021 mentioning 05kg of Levosulpiride, batch No. LSP/N/21/001, manufacturing date Feb, 2021.	As mentioned above we copied the data of commercial **(FORM-5)** drug substance instead of R&D **(FORM-6)** drug substance. We have imported the drug substance for export purpose via ***FORM 5 # 5599/2021 DRAP*** *DATED* ***14-04-2021*** under invoice # **AB/I/00001/21-22** with ***AD I&E Lahore approval date 04-05-2021.*** Initially the invoice # **AB/I/00001/21-22** was approved on 14-04-2021 with **Levosulpiride batch # LSP/N/21-001**

	Mfg. date: 02-2021, **Exp. date** 02-2024. But due to shortage of material the manufacturer excuses us to provide **batch # LSP/N/21-001** and send us documents of new batch # ***31L01Z2122-001 Mfg. date 04-2021 Exp. date: 03-2024.*** *Both of these batches are for the manufacturing of our export product EVORANT 50mg TABLET (Reg. # 009908-EX).* And for commercial purpose. While the drug substance imported for R&D under ***FORM 6 # 11241/2021-DRAP.*** *Approved on* ***28-07-2021*** and **Invoice # ALC/20210215** dated **15-02-2021** and **AD (I&E) APPROVAL DATE 28-07-2021** Contains batch # ***31L01Z2122-001 Mfg. date 04-2021 Exp date 03-2024.*** **1.1 kg** of above-mentioned batch is imported on Form-6 for CTD product development and this material is used in our R&D and CTD dossier of Levosulpiride 25mg & 50mg tablet is made keeping in mind of this material but unfortunately, we have copied the supporting data of commercial drug substance.
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Remarks of the Evaluator PEC XIII	Full fee along with new form 5 and master formulation shall be submitted.
	Decision: Deferred for following; • **Submission of full fee of 30,000/- for correction/pre-approval change in the label claim, method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021 along with revised form 5 shall be submitted.** • **Evidence of testing facility required for conducting testing of the applied formulation.**	

Agenda of Evaluator PEC-XV.

1898.	Name, address of Applicant / Marketing Authorization Holder	M/s Pasteur & Fleming Pharmaceuticals Pvt. Ltd. Industrial Estate Hattar.
	Name, address of Manufacturing site.	M/s Pasteur & Fleming Pharmaceuticals (Pvt). Ltd. Plot No. 70-A, Road No. 04, Phase 3, Industrial Estate. Hattar, Khyber Pakhtunkhwa Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Dy. No. and date of submission	Dy. No.29637 dated 19/10/2022
	Details of fee submitted	PKR 30,000/-: dated. 02/08/2022. Slip No. 90054196801
	The proposed proprietary name / brand name	Ciflox 250mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ciprofloxacin as Hydrochloride (USP)……..…….250mg
	Pharmaceutical form of applied drug	White colored film coated , Oblong shaped, oral tablet
	Pharmacotherapeutic Group of (API)	Fluoroquinolone (Broad spectrum Antibiotic)
	Reference to Finished product specifications	USP
	Proposed Pack size	1×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ciprofloxacin 250mg Tablets U.K MHRA Accord Health Care Limited Sage .House 319 Pimmer Road Harrow Middlesex.
	For generic drugs (me-too status)	Cipax 250mg Tablet mg by M/s Genome Pharma Reg. No. 062916
	GMP status of the Finished product manufacturer	New license granted on 10/11/2021 Tablet (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	M/s Pharmagen Limited 34-Km, Ferozepur Road, Lahore, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ciprofloxacin Hydrochloride is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 75 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches # :(00510011/001/2014, 00510011/002/2014, 00510011/003/2014)

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Cipvax 250mg Tablets by Genome Pharmaceuticals performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage form). CDP has been performed against the same brand that is 250mg tablet by Genome Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion				
37.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
38.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	DML # 00325. Sami Basic Manufacturer .Copy of GMP certificate No. 129/2020-DRAP (Ad/1998630-530) issued by DRAP.		
39.	Documents for the procurement of API with approval from DRAP (in case of import).	Invoice # 2334, Dated .29/03/2022 By Pharmagen Lahore		

40.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
41.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
42.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit specification and analytical procedures of drug substance from drug product manufacturer in section 3.2.S.4.1 and 3.2.S.4.2 respectively.	Firm submit the specification and analytical procedure of drug substance in compliance of USP.
2.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	Firm submitted the analytical verification of drug substance in which the specificity parameter has not performed in accordance with ICH guidelines.
3.	Clarification is required either the drug substance complies USP or BP specifications, since the COA by drug substance manufacturer claimed that the API complies BP specification, while the specification and analytical method reflects that the drug substance comply USP specification. Further, the quality analysis report of drug substance by drug product manufacturer is also required.	Firm submitted the COA of drug substance by both drug substance manufacturer and drug product manufacturer. However, the result of water content test was out of specification in the batch analysis report of drug substance by drug product manufacturer i.e. 3.5% ,while the USP recommended water content between 4.7%-6.7%.
4.	Justify why the pharmaceutical equivalence and comparative dissolution profile studies were conducted against the comparator product instead of using brand leader/innovator product.	Firm submit the revised pharmaceutical equivalence report performed against the novidat tablet of M/s. Sami Pharmaceuticals (Batch no. 228G, Exp date: 11-2024)
5.	Submit results of Comparative Dissolution Profile (CDP) in section 3.2.P.2.2.1 to comply the decision of 293rd meeting of Registration Board, which states that "Where applicable the results of comparative dissolution profile conducted in three BCS media across the physiological pH range along with calculation of similarity factor *f*2 should be submitted and discussed." Since the submitted one-page document did not fulfill the requirement of this section.	Firm submitted the Comparative Dissolution Profile (CDP) conducted in three BCS media across the physiological pH range along with calculation of similarity factor *f*2.

6.	Provide compatibility studies of the Drug Substance(s) with excipients as the qualitative composition of the formulation is not similar to innovator / reference product.	Firm replied that we performed 6th months stability study, the product is physically and chemically stable.
7.	Submit verification report of analytical method of the drug product in section 3.2.P.5.3,since the submitted summary table did not fulfill the requirement of this section.	Firm submitted the analytical verification of drug substance in which the specificity parameter has not performed in accordance with ICH guidelines.
8.	Provide certificate of analysis of reference standard /working standard used for testing of the drug product.	Firm submitted the COA of working standard.
9.	Clarification is required on which date stability study has been initiated, as the covering letter of stability data reflects that initiation date was 08-04-2022 while the stability data sheet reflects that the date of analysis of zero month was 14-04-2022.	Firm replied that the date mentioned on the covering letter was mistakenly written ,the actual date is 14/04/2022.
10	Clarification required that the results of assay test represents either the quantity of ciprofloxacin or ciprofloxacin hydrochloride.	Firm claimed that the assay results were the quantification of ciprofloxacin HCl, while the USP monograph recommends the quantification of ciprofloxacin in the assay results.
11	According to the chromatograms of assay testing, retention time of main peak was around 2.6 minutes, while as per USP monograph the retention time for ciprofloxacin is 6.4-10.8minutes justify, the change of RT of applied product from that specified in USP.	Firm replied that we had used the 150mm column instead of 250mm column, due to the change of column specification the peak retention time is reduced. Now we had bought 250mm column, again performed assay test of ciprofloxacin HCl and performed confirmation of assay test and the main peak of said product has arrived in 5.9 minutes.
12	Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm replied that we have used Schimadzu HPLC there was a problem in the software of the attached computer system due to this problem the audit trail couldn't be turned on the whole process of stability study.
13	Raw data sheets of assay testing performed during different time points of stability study should be submitted.	Not submitted
14	According to the BMR theoretical weight per tablet is 374 for 250mg tablet /748mg for 500mg tablet, while batch formula given in section 3.2.P.3.1 specified that average weight of tablet would be 394 for 250mg strength /768mgfor 500mg strength, clarity required regarding the disparity in average weight of tablet and provide along with calculations.	Firm has not submitted the calculation of weight per tablet along with adjustment of HCL factor and water content.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

• **Manufacturer shall dispense drug substance on basis of the actual potency determined during drug substance analysis for commercial manufacturing of drug product.** **Registration letter will be issued upon submission of following:** **i. Pharmaceutical equivalence and Comparative Dissolution Profile(CDP) studies against the innovator's product i.e. Ciproxin tablet.** **ii. Drug substance batch analysis COA as per USP monograph along with analytical method verification studies for drug substance performed by drug product manufacturer.** **iii. Data of next time point of long term stability studies of drug product wherein assay test shall be conducted as per USP monograph along with raw data sheets for submitted stability studies.**

	Details of fee submitted	PKR 30,000/-: dated. 02/08/2022. Slip No. 90054196801
	The proposed proprietary name / brand name	Ciflox 500mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ciprofloxacin as Hydrochloride (USP)……..…….500mg
	Pharmaceutical form of applied drug	White colored film coated , Oblong shaped, oral tablet
	Pharmacotherapeutic Group of (API)	Fluoroquinolone (Broad spectrum Antibiotic)
	Reference to Finished product specifications	USP
	Proposed Pack size	1×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Cipax 500mg Tablet mg by M/s Genome Pharma Reg. No. 043310
	GMP status of the Finished product manufacturer	New license granted on 10/11/2021 Tablet (General & General Antibiotic) section approved.

	Name and address of API manufacturer.	M/s Pharmagen Limited 34-Km, Ferozepur Road, Lahore, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ciprofloxacin Hydrochloride is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 75 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches # :(00510011/001/2014, 00510011/002/2014, 00510011/003/2014)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Cipvax 500mg Tablets by Genome Pharmaceuticals performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage form). CDP has been performed against the same brand that is 250mg tablet by Genome Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML Granted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. NEW-WHO-GMP/CERTKD/89275/2020/11/33788 issued by FDA Bandra Mumbai valid till 19/10/2023.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Commercial Invoice No. EXP-2122-328 dated 28-12-2021 is submitted for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of Evaluator: Firm has submitted the analytical instrument list in section 3.2.A.1, from which it is evident that firm has atomic absorption spectrophotometer (Model no. iCE 3000 Series of Thermo Scientific USA.		
Decision: Approved. Firm shall submit Pharmaceutical equivalence studies against the innovator product before issuance of registration letter. **• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** **• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks OF Evaluator:			

<table>
<tr><th>S.no.</th><th>Observations/Deficiencies/ Short-comings</th><th>Response of the Firm</th></tr>
<tr><td>1.</td><td>Justify the composition of applied formulation without EDTA and buffering agent comparing the formulation of USFDA innovator product which contains EDTA as chelating agent and citric acid monohydrate as a buffer.</td><td>Firm replied that “Fletazo Injection (Piperacillin as Sodium and Tazobactam as Sodium) complies all parameters as mentioned in USP monograph.

• USP monograph requires it to indicate its sodium content on label and there is no requirement to mention buffer and stabilizer nor is any testing required for. Hence it was not mentioned in label;
• Our application part 2.3.P.1 and 2.3.P.3.2 contains information about the presence of EDTA i.e 0.5mg for 2.25g injection and 1.0mg of EDTA in 4.5g injection.
We assure the competent authority that the weight of filled vial will be adjusted by incorporating the quantity of EDTA and citric acid during commercial batches.
• Since testing of EDTA and buffering agent was not required, so it was not mentioned in DS manufacturer’s Specifications and COA. As per our supplier, formulation ingredients are not declared in given open part of DMF. EDTA and citric acid are mixed before Lyophilisation.
• Low pH leads to inactivation of drug so USP monograph specify pH limits and our results are well within limit, tabulated below:
<table><tr><th>Batch #</th><th>USP limit</th><th>Fletazo Injection 2.25g</th><th>Fletazo Injection 4.5g</th></tr><tr><td>T-001</td><td rowspan="3">5.0 – 7.0</td><td>6.05</td><td>6.12</td></tr><tr><td>T-002</td><td>6.16</td><td>6.01</td></tr><tr><td>T-003</td><td>6.17</td><td>6.15</td></tr></table>
• Our product Fletazo Injection, results complies the USP limits for PARTICULATE MATTER IN INJECTIONS <788>, tabulated below. Presence of EDTA lessen the possibility of particulate matter accumulation upon reconstitution.
<table><tr><th rowspan="2">Batch #</th><th rowspan="2">USP limit</th><th colspan="2">*Fletazo Injection 2.25g</th><th colspan="2">*Fletazo Injection 4.5g</th></tr><tr><th>10 µm</th><th>25 µm</th><th>10 µm</th><th>25 µm</th></tr><tr><td>T-001</td><td rowspan="3">≥ 10µm NMT 1200 particle/gm</td><td>50</td><td>4</td><td>80</td><td>7</td></tr><tr><td>T-002</td><td>42</td><td>1</td><td>51</td><td>6</td></tr><tr><td>T-003</td><td>53</td><td>0</td><td>56</td><td>2</td></tr></table>*Slips are attached.
Moreover, pharmaceutical equivalence and stability study also shows satisfactory results as per USP monograph.</td></tr>
<tr><td>2.</td><td>Submit documents for the procurement of API including</td><td>DRAP attested commercial invoice submitted by the firm with the following details:</td></tr>
</table>

	copy of commercial invoice attested by AD (I&E) DRAP. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Commercial invoice number: XLH 220106-D dated Jan 26 2022 Batch/Lot # HF 1123G5 Manufacturing date: 25/10/2021 Expiry date: 24/10/2024
3.	Justify the filled weight of powder per vial against the determined potency of drug on as is basis.	Firm replied that Ratio of Piperacillin & Tazobactam in our product applied = 8:1 Raw Material imported is mixture of Piperacillin & Tazobactam having ratio of assay (8:1) Assay of Piperacillin = 83.72% Assay of Tazobactam = 10.24 % Ratio of Assay =83.72/10.24 = 8:1 Factor of Piperacillin = 1.042 Factor of Tazobactam =1.073 Potency adjustment = filled weight / assay x 100 We assure the competent authority that the filled weight of powder per vial will be adjusted against the determined potency and by incorporating the quantity of EDTA and citric acid during commercial batches.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer shall dispense drug substance on basis of the actual potency determined during drug substance analysis for commercial manufacturing of drug product.**

	Pharmaceutical form of applied drug	DPI Capsule (White color powder filled in capsule shell no 3, having purple opaque cap and transparent body.)		
	Pharmacotherapeutic Group of (API)	Cholinergic Antagonist: This medicinal product is a combination of indacaterol, a long-acting beta2-adrenergic agonist (LABA), and mometasone furoate, an inhaled synthetic corticosteroid (ICS).		
	Reference to Finished product specifications	Manufacturer's Specs/ Innovator		
	Proposed Pack size	5's, 7's, 10's, 14's, 20's, 28's, 30's, 50's, 60's, 100's, 120's		
	Proposed unit price	As per SRO		
	The status in reference regulatory authorities	Bemrist Breezhaler 125 micrograms/260 micrograms inhalation powder, hard capsules (MHRA approved)		
	For generic drugs (me-too status)	Atectura Breezhaler inhalation powder, hard capsule 150/320mcg by M/s. Novartis Pharma, Pakistan Approved in 316th DRB meeting		
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 06/2022-DRAP (AD-334240006) issued by DRAP valid till 11/11/2023.		

	Name and address of API manufacturer.	Indacaterol Acetate: M/s MELODY HEALTHCARE PVT. LTD. Plot No. J-73, MIDC, Tarapur, Boisar Dist. Palghar – 401 506, Maharashtra, India. Mometasone Furoate: M/s AARTI INDUSTRIES LIMITED. Unit – IV, Plot No E – 50, MIDC, Tarapur, Taluka & District-Palghar, Pin 401 506 Maharashtra, INDIA.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Mometasone furoate is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Whereas Indacaterol acetate complies Manufacturer's specifications. So, firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance as per inhouse specifications.
	Stability studies	Stability study conditions: 3. Indacaterol acetate: Real time: 30°C ± 2°C / 65% ± 5%RH for 9 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ICA/01/21, ICA/01/21, ICA/01/21) 4. Mometasone furoate:

		Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (MF-10002(JM-01)001, MF-10003(JM-01)001, MF-10004(JM-01)001)
	Module-III (Drug Produ ct):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Bemrist Breezhaler 125 micrograms/260 micrograms inhalation powder, hard capsules by Novartis Pharmaceuticals UK by performing tests (DUSA (Delivered dose uniformity by dosage sampling apparatus), ACI (Aerodynamic particle size distribution by Andersen cascade impactor (USP Apparatus 3). CDP is not applicable in case of Dry powder inhalers.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.
	Description of the delivery devices (Inhaler intended to be marketed along applied formulation)	Complete description and specification of delivery device describe orange and white body with transparent cavity inhaler device properly sealed packed polythene and suitable to open shell size 3 with smooth opening and closing of device

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to previous approval of Ultivair 50mcg/ 110mcg rotacaps, which was presented in 320th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	M/s Aarti Industries Limited: Copy of License no. 28-KD/433 issued by FDA Maharashtra valid till 16-08-2026. M/s Melody Helathcare: Copy of License no. 25KD/649 issued by FDA Maharashtra valid till 24-05-2027.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Indacaterol Acetate: Firm has submitted copy of invoice (invoice# MBR2122/GEP00034) Dated 23-7-2021 cleared by DRAP Lahore office dated 03-08-2021 specifying import 80gm of Indacaterol Acetate (Batch# ICA/08/21). Mometasone Furoate: Firm has submitted copy of invoice (invoice# EX/7483/20-21) Dated 20-3-2021 cleared by DRAP Lahore office dated 05-4-2021 specifying import 120gm Mometasone Furoate (Batch# MF-20023 (JM-01)-001).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Section#	Observations	Firm's response

1.1	Submit evidence of generic / me-too status alongwith registration number, brand name and name of firm or else submit differential fee of Rs. 45,000/- for each strength as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Differential fee of Rs. 45,000/ for each strength against challan no: 48731624, 337526673 and 04557284157 has been submitted dated 23-11-2022.
3.2.S.4 (Indacaterol)	• Clarification shall be submitted regarding polymorphic form of Indacaterol. • Qualification date of the working standard has been reported as June 2022, whereas the drug substance analysis has been conducted prior to this date. • Long term stability studies data has been submitted for 9 months only.	• Polymorphic form of Indacaterol acetate is crystalline form as single R-Isomer and same is depicted in general properties and elucidation of characterization of substance along with reports of XPRD analysis. • Qualification date of the working standard that has been utilized during drug substance analysis is November-2021. • Whereas the working standard having qualification date June-2022 was used for further analysis. • Firm has submitted long term stability studies till 18 months as per Zone IVA, from drug substance manufacturer.
3.2.S.4 (Mometasone)	Drug substance specifications shall include test of specific optical rotation.	Firm has submitted drug substance specifications including test of specific optical rotation and has also referred to submitted COA , wherein test of specific optical rotation was performed.
3.2.P.1	Details of accompanying device shall be submitted.	Medical device name: Rotaflo Model Number: DL-D07 Specification attached as Annexure-VI The same device is already approved and used with our registered product Glynvair 50mcg/110mcg Rotacaps having registration number 113986 dated 27th October 2022.
3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests for both applied and reference formulation.	Firm has submitted Pharmaceutical equivalence report against the innovator product of "Atectura breezhaler" for each strength wherein performance of various tests including "Assay", "Delivered Dose Uniformity" & Aerodynamic particle size distribution has been reported.
3.2.P.5.1	• Justification shall be submitted for not including test of "Indacaterol S-enantiomer" in drug product specifications. • Justification shall be submitted for the limits of Assay test.	• Test of' Indacaterol S- Enantiomer' has been included and controlled at stage of API analysis. • The Assay limits set due to micro-contents of active substance in the formulation, and as per generalized DPI's assay limit available in the British Pharmacopeia. Therefore, the same limit of Assay test has been used to ensure the delivery dose of product.

Decision: Registration Board approved the applications of "Covair 150mcg/160mcg Rotacaps", "Covair 150mcg/320mcg Rotacaps" & "Covair 150mcg/80mcg Rotacaps".

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Registration Board further decided that following details of "Accompanyiing Delivery device" shall be declared on registration letter: "**Rotaflo (inhaler Device) Model Number: DL-D07."**

Remarks OF Evaluator:

Section# Observations Firm's response

1.1	Submit evidence of generic / me-too status alongwith registration number, brand name and name of firm or else submit differential fee of Rs. 45,000/- for each strength as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Differential fee of Rs. 45,000/ for each strength against challan no: 48731624, 337526673 and 04557284157 has been submitted dated 23-11-2022.
3.2.S.4 (Indacaterol)	• Clarification shall be submitted regarding polymorphic form of Indacaterol. • Qualification date of the working standard has been reported as June 2022, whereas the drug substance analysis has been conducted prior to this date. • Long term stability studies data has been submitted for 9 months only.	• Polymorphic form of Indacaterol acetate is crystalline form as single R-Isomer and same is depicted in general properties and elucidation of characterization of substance along with reports of XPRD analysis. • Qualification date of the working standard that has been utilized during drug substance analysis is November-2021. • Whereas the working standard having qualification date June-2022 was used for further analysis. • Firm has submitted long term stability studies till 18 months as per Zone IVA, from drug substance manufacturer.
3.2.S.4 (Mometasone)	Drug substance specifications shall include test of specific optical rotation.	Firm has submitted drug substance specifications including test of specific optical rotation and has also referred to submitted COA , wherein test of specific optical rotation was performed.
3.2.P.1	Details of accompanying device shall be submitted.	Medical device name: Rotaflo Model Number: DL-D07 Specification attached as Annexure-VI The same device is already approved and used with our registered product Glynvair 50mcg/110mcg Rotacaps having registration number 113986 dated 27th October 2022.
3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests for both applied and reference formulation.	Firm has submitted Pharmaceutical equivalence report against the innovator product of "Enerzair breezhaler" for each strength wherein performance of various tests including "Assay", "Delivered Dose Uniformity" & Aerodynamic particle size distribution has been reported.
3.2.P.5.1	• Justification shall be submitted for not including test of "Indacaterol S-enantiomer" in drug product specifications. • Justification shall be submitted for the limits of Assay test.	• Test of' Indacaterol S- Enantiomer' has been included and controlled at stage of API analysis. • The Assay limits set due to micro-contents of active substance in the formulation, and as per generalized DPI's assay limit available in the British Pharmacopeia. Therefore, the same limit of Assay test has been used to ensure the delivery dose of product.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Registration Board further decided that following details of "Accompanyiing Delivery device" shall be declared on registration letter: "**Rotaflo (inhaler Device) Model Number: DL-D07."**		
1908.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited Lahore

Remarks of Evaluator:

Deficiencies/ Short-comings

- Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.
- Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"
- Submit complete long-term stability data of all three batches of drug substance, complete data of batch no. CEIV/B1203011 has only been submitted in section 3.2. S.7.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify why pharmaceutical equivalence was performed against comparator product instead of using innovator / reference product.
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided". Since the submitted flow diagram of manufacturing procedure is of different drug product (cefotaxime sodium) instead of cefepime.

- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.
- Analytical method of drug product verified in section 3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.
- Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the stability data, stability study has performed in the year 2022 whereas the submitted chromatograms and audit trail reports were of 2021, clarification required in this regard.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
- In-use stability studies of reconstituted injection are required along with proposed in-use storage statement and in-use shelf-life.
- Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Decision: Deferred for submission of reply of above-cited shortcomings within six month.

Remarks OF Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.	Firm replied that "There was a typo error only in Form 5-F (attached in start of the dossier), rest of the dossier is on USP specifications. It is now corrected and attached." Firm submit the correct specification without fee.
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.	Firm has submitted the Analytical procedure and specifications by both Drug substance & Drug Product manufacturer with the claim of BP specifications.
3.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	Submitted
4.	Justify for not performing all the quality test which are include in USP monograph while establishing the pharmaceutical equivalence with comparator product.	Revised pharmaceutical equivalence report performed against comparator product of M/s. Adamjee RISP Oral Solution 30ml Batch no. 111 expiry date: 01-2024.
5.	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that the applied formulation is composed of iron polymaltose, sorbitol and sugar, clarify the composition of applied oral solution given in manufacturing process development section comparing to the formulation submitted mentioned in section 3.2. P.1.	Firm replied that it was a typographical revised and correct manufacturing method has been submitted.

6.	Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph.	submitted
7.	There were 2 main peaks appeared on most of the chromatograms of analytical method verification report, please, clarify that which of the peak represents the elution of risperidone and identity of other peak.	Firm replied that Revised analytical method verification report will be submitted.
8.	Justify for not performing the test of deliverable volume, microbial enumeration test and test for specified microorganism, since these test are included in the USP monograph of risperidone oral solution.	Revised COAs of three trial batches are submitted by the firm.
9.	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Submitted.
10	• As per the analytical method verification report the peak area of chromatograms for the standard solution was 9353890.6940, while as per your stability records the peak area of the standard solution having the same concentration is 2149164.23. Justification is required in this regard how such difference in the area of HPLC can exist using the same method and parameters. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.	Firm replied that due to new staff, the column of HPLC was not appropriate. We will submit the revised analytical method verification. Without any clarification that which chromatograms are in accordance with the assay method used for the analysis of drug product. Later, firm submitted the revised analytical verification report of drug product dated 8th December, 2022 , which is performed in conformance to the chromatographic recommended by the USP monograph of Risperidone oral, further the chromatograms of verification studies are correlated with the chromatograms of assay testing performed for the stability studies of drug product specifically with reference to the peak area.
11	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3, since you have submitted only the BMR of T-006.	Submitted.

Decision: Approved with innovator's specifications. Registration Board further decided that registration letter will be issued after submission of applicable fee that is Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

- M/s. Winbrains Research Laboratories Plot no.69/1 Block B, Phase I-II, Industrial Estate, Hattar

The Central Licensing Board in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of additional section of "Dry Powder Inhaler Capsule section (General)" to M/s. Winbrains Research Laboratories Plot no.69/1 Block B, Phase I-II, Industrial Estate, Hattar.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.5.6	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.
2.	3.2.S.4.1-3.2.S.4.2	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.
3.	3.2.S.4.3	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.
4.	3.2.S.4.4 (Fluticasone)	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph. Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer,since it was evident from the batch analysis report that you have perfoemd Particle size test by Malvern.
5.	3.2.S.7.3 (Salmetrol Xinafoate)	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.
6.	3.2.P.1	• Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules. • Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcg of

		salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins). • Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration).
7.	3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation. Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.
8.	3.2.P.2.3	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.
9.	3.2.P.5.2	• Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph. • Batch release specification did not include the performance test for inhalation powder i.e. Delivered Dose Uniformity & Aerodynamic Size Distribution test, clarification is required in this regard.
10	3.2.P.5.3	Provide analytical method verification report of drug product in compliance of USP monograph.
11	3.2.P.5.4	• Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product. • Further provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformity.
12	3.2.P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.
13	3.2.P.8	• Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. • Provide Reference of previous approval of applications with stability study data of the firm (if any) • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
14	2.3 R.1.1	• Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. • Calculation of dispensed weight of active along with salt and factor adjustment was not given in the BMR,please provide the calculations.

15	Amendment in QOS (Module 2) for above points.	
Decision: Deferred for submission of reply of above-cited shortcomings within six month.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	1.5.6	Justify the finished product specifications as "Manufacturer's specifications" since the drug product monograph is available in USP. Revise your specifications along with submission of requisite fee.
2.	3.2.S.4.1- 3.2.S.4.2	Submit data for both drug substance in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required", since you have only submitted analytical procedure by drug substance manufacturer which is also not in accordance with USP.
3.	3.2.S.4.3	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.
4.	3.2.S.4.4 (Fluticasone)	Drug substance specifications shall include test of specific optical rotation as recommended by BP monograph. Evidence of availability of MALVERN mastersizer instrument by drug product manufacturer,since it was evident from the batch analysis report that you have performed Particle size test by Malvern.

5.	3.2.S.7.3 (Salmetrol Xinafoate)	Accelerated stability data of third batch was of Formetrol Fumarate Hydrate instead of Salmetrol Xinafoate, please submit the correct data.
6.	3.2.P.1	• Submitted details of accompanying device is for the multidose pre-filled dry powder inhaler instead of inhaler device required for DPI capsules. • Composition of drug product given in section 3.2.P.1 (d) is different from the composition of innovator brand approved in USFDA, according to the label of innovator brand Each blister on the strip contains a white powder mix of micronized fluticasone propionate (100, 250, or 500 mcg) and micronized salmeterol xinafoate salt (72.5 mcg, equivalent to 50 mcg of salmeterol base) in 12.5 mg of formulation containing lactose monohydrate (which contains milk proteins). • Provide the details regarding the metered amount and the mass of the drug delivered from the mouthpiece under defined test conditions (i.e., flow rate, duration).
7.	3.2.P.2.2.1	Pharmaceutical equivalence report against the innovator/reference product shall be submitted including results for batch release tests in accordance with USP for both applied and reference formulation. Submit Pharmaceutical equivalence report of strength 100/50mcg by performing all the quality test mentioned in USP.
8.	3.2.P.2.3	Manufacturing procedure submitted in section 3.2.P.2.3 and 3.2.P.3 reflect that particle size of powder is further reduced till 3µm, please provide details and evidence of availability of sheer mixer and the instrument/particle size analyzer used for the analysis of final particle size achieved.
9.	3.2.P.5.2	• Submit detailed analytical procedure used for testing of drug product in accordance with USP monograph. • Batch release specification did not include the performance test for inhalation powder i.e. Delivered Dose Uniformity & Aerodynamic Size Distribution test,clarification is required in this regard.
10	3.2.P.5.3	Provide analytical method verification report of drug product in compliance of USP monograph.
11	3.2.P.5.4	• Justify for not performing the test of microbial enumeration test and test for specified microorganism and foreign particulate matter test while batch release of drug product. • Further provide evidence of availability of Cascade impaction sampling apparatus for performance of Aerodynamic Size Distribution test and sampling apparatus used for the performance of Delivered Dose Uniformit.
12	3.2.P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.
13	3.2.P.8	• Justify for not performing the test Delivered Dose Uniformity, Aerodynamic Size Distribution test, test of microbial enumeration test and test for specified microorganism and foreign particulate matter while performing the stability study of drug product. • Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study. • Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.

		• Provide Reference of previous approval of applications with stability study data of the firm (if any) • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
14	2.3 R.1.1	• Manufacturing procedure mentioned in BMR is different from the manufacturing procedure given in 3.2.P.3, justification is required in this regard. • Calculation of dispensed weight of active alomg with salt and factor adjustment was not given in the BMR,please provide the calculations.

Remarks OF Evaluator:

Deficiencies/ Short-comings
Shortcomings communicated to the Firm: • You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not available in USP, but present in JP. Revise the specifications along with submission of requisite fee. • The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provide scientific justification in this regard. • Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May-22 sodium, when the monograph has not been present in USP.

- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance manufacturers."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability data of 3 months has submitted despite the batch had been manufactured in 2017.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used for reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strength.
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both actives.
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module 1, and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. However, monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactured on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured in sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with the acceptance criteria mentioned on COA of drug substance by drug substance manufacturer i.e. 4.5-6.5 and NMT 3.0%. Elevation of pH and water content of drug product without any further processing of formulation needs to be justify with the pharmacopeial reference and innovator product.
- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference and innovator product.

- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data sheet represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptance limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
- In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Remarks of the Evaluator:

In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which drug substance was imported from a new source and accordingly data of trial batches of drug product manufactured from new source of drug substance has submitted. Newly submitted dossier has again evaluated and presented below before the Board for its consideration.

1914.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22143 dated 11/04/2022
	Details of fee submitted	PKR 7,500/-: dated 02/08/2022
	The proposed proprietary name / brand name	**Cef-Sulb Injection IV/IM**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder Cefoperazone sodium JP equivalent to Cefoperazone…….500mg Sterile Powder Sulbactam sodium JP equivalent to Sulbactam…….500mg
	Pharmaceutical form of applied drug	Dry powder for injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	JP Specifications
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Sulperazone Injection 1gm by M/s Pfizer Ltd. USA, USFDA Approved.
	For generic drugs (me-too status)	Toxirid Injection 1gm by Global Pharmaceuticals, Reg. No. 042552
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Qilu Antibiotics Pharmaceutical Co. Ltd. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of cefoperazone sodium /sulbactam sodium Injection is present in JP pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (2003FJ81NH, 2002FJ81NH, 2001FJ81NH)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator product 2SUM (Cefoperazone Sodium + Sulbactam Sodium) 1g Injection of M/s. Healthtek Pvt. Ltd. Karachi, performing quality tests (Identification, Assay, constituted solution, BET & sterility test).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

<tr><td>11.</td><td>3.2.P.8</td><td>Firm has not submitted following documents to support the stability data of drug product:
Reference of previous approval of applications with stability study data of the firm (if any)
Documents for the procurement of API with approval from DRAP (in case of import).
Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.</td></tr>
<tr><td>12.</td><td>3.2.R</td><td>Firm has not submitted the copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.</td></tr>
</table>

Decision of 321st meeting of Registration Board:

- Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.
- Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit long term stability data of drug substance till the claimed shelf life.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.
- Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.
- Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug product.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply of the Firm:

Sr.no.	Decision	Response of the Firm
1.	Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.	Firm replied that "Ask the supplier about analytical method verification ,will be dispatched soon".
2.	Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.	Firm replied that "By mistake it was attached, actual criteria of drug substance as per JP monograph".
3.	COA of primary / secondary reference standard including source and lot number used for testing of drug substance.	Firm submitted the COA of USP primary reference standard
4.	Submit long term stability data of drug substance till the claimed shelf life.	Firm replied that " Ask to supplier for long term stability, will be dispatched soon."
5.	Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.	Firm submitted the formulation table in which only the material has been listed with the information that the API (cefoperazone sodium plus sulbactum sodium) was used 3% in excess, while the calculation of dispense quantity of API per vial was not submitted by the firm.
6.	Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.	Firm submitted the pharmaceutical equivalence report in which all the quality test has been performed.
7.	Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.	Submitted

	8. Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.	Submitted
	9. COA of primary / secondary reference standard including source and lot number used for testing of drug product.	Not submitted
	10. Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.
	11. Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Not submitted
	12. Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Not submitted
	13. Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm submitted the fee of Rs.30,000/- vide slip no. 057382167110 dated 04-11-2022

Decision: Deferred for submission of following:

- **Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.**
- **COA of primary / secondary reference standard including source and lot number used for testing of drug substance.**
- **Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.**
- **Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.**
- **Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.**

Remarks OF Evaluator:

Deficiencies/ Short-comings
Shortcomings communicated to the Firm:

- You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not available in USP, but present in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provide scientific justification in this regard.
- Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May-22 sodium, when the monograph has not been present in USP.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance manufacturers."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability data of 3 months has submitted despite the batch had been manufactured in 2017.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used for reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strength.
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both actives.
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module 1, and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. However, monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.
- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactured on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured in sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with the acceptance criteria mentioned on COA of drug substance by drug substance manufacturer

i.e. 4.5-6.5 and NMT 3.0%. Elevation of pH and water content of drug product without any further processing of formulation needs to be justify with the pharmacopeial reference and innovator product.

- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference and innovator product.
- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data sheet represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptance limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
- In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Remarks of the Evaluator:

In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which drug substance was imported from a new source and accordingly data of trial batches of drug product manufactured from new source of drug substance has submitted. Newly submitted dossier has again evaluated and presented below before the Board for its consideration.

1916.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22144 dated 04/08/2022
	Details of fee submitted	PKR 7,500/-: dated 02/08/2022
	The proposed proprietary name / brand name	**Cef-Slub Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder of Cefoperazone sodium JP equivalent to Cefoperazone 1g Sterile Powder of Sulbactam sodium JP equivalent to Sulbactam 1g
	Pharmaceutical form of applied drug	Dry Powder for Injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	JP Specifications
	Proposed Pack size	1×1's

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Sulperazone Injection 2gm by M/s Pfizer Ltd. USA, USFDA Approved.
	For generic drugs (me-too status)	Toxirid Injection 2gm by Global Pharmaceuticals, Reg. No. 042555
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Qilu Antibiotics Pharmaceutical Co. Ltd. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of cefoperazone sodium /sulbactam sodium Injection is present in JP pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 6 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (2003FJ81NH, 2002FJ81NH, 2001FJ81NH)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator product 2SUM (Cefoperazone Sodium + Sulbactam Sodium) 2g Injection of M/s. Healthtek Pvt. Ltd. Karachi, performing quality tests (Identification, Assay, constituted solution, BET & sterility test).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

		• Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin. • Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.
12.	3.2.R	Firm has not submitted the copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Decision of 321st meeting of Registration Board:

- Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.
- Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit long term stability data of drug substance till the claimed shelf life.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.
- Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.
- Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug product.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply of the Firm:

Sr.no.	Decision	Response of the Firm
1.	Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.	Firm replied that "Ask the supplier about analytical method verification ,will be dispatched soon".
2.	Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.	Firm replied that "By mistake it was attached, actual criteria of drug substance as per JP monograph".
3.	COA of primary / secondary reference standard including source and lot number used for testing of drug substance.	Firm submitted the COA of USP primary reference standard
4.	Submit long term stability data of drug substance till the claimed shelf life.	Firm replied that " Ask to supplier for long term stability, will be dispatched soon."

5.	Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.	Firm submitted the formulation table in which only the material has been listed with the information that the API (cefoperazone sodium plus sulbactum sodium) was used 3% in excess, while the calculation of dispense quantity of API per vial was not submitted by the firm.
6.	Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.	Firm submitted the pharmaceutical equivalence report in which all the quality test has been performed.
7.	Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.	Submitted
8.	Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.	Submitted
9.	COA of primary / secondary reference standard including source and lot number used for testing of drug product.	Not submitted
10.	Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.
11.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Not submitted
12.	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Not submitted
13.	Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm submitted the fee of Rs.30,000/- vide slip no. 057382167110 dated 04-11-2022

Decision: Deferred for submission of following:

- **Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.**
- **COA of primary / secondary reference standard including source and lot number used for testing of drug substance.**
- **Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.**
- **Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.**
- **Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.**

Remarks OF Evaluator:

Sr.no.	Section	Observations/Shortcomings	Reply of the Firm
1.	3.2.S.4.1 3.2. S.4.2	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm has not submitted the specifications and analytical procedure of drug substance by drug product manufacturer.
2.	3.2. S.4.3	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.
3.	3.2. S.7	Submit complete long-term stability data of all three batches of drug substance, since only the complete data of batch no. CEIV/B1203011 has been submitted in section 3.2. S.7.	Firm has not submitted the long-term stability data of batch no. CEIV/B1203013.
4.	3.2. P.2.6	Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"	Firm has not submitted the reply in response of this query.
5.	3.2. P.3.1	Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.	Firm has submitted the amended document in which cefepime HCl with L-arginine is mentioned as the only active ingredient. However, the information regarding the quantity of dry powder filled per vial has not been given. Further, the flow chart of manufacturing process submitted in the reply of section 3.2.P.3.3 is of ceftriaxone.
6.	3.2.P.5.2	Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm again submit the copy of monograph of USP in section 3.2.P.5.2 and in section 3.2.P.4.2 submit the analytical procedure of cefotaxime injection.

7.	3.2.P.5.3	Analytical method of drug product verified in section 3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.	Firm has not given the reply in response of this query.
8.	3.2.P.5.4	Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product	firm has submitted batch analysis report of three trail batches TRA-001, TRA-002, TRA-003 which were not the batch numbers of trial batches used for stability studies as evident from the submitted stability data sheets. Further, the test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test was not been included in batch analysis report nor given any justification. Furthermore, the firm submitted the same batch analysis report for cefepime 500mg injection and cefepime 1gm injection.
9.	3.2.P.6	Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.	Firm has submitted the reply in response of this query.
10.	3.2.P.8	Submit the stability data sheet of cefepime injection, since the submitted sheets are of ceftriaxone.	Firm stated that rectified and corrected stability data sheets are submitted.
11.	3.2.P.8	According to the document submitted in section 3.2. P.8 batch no. Cef-P-004, Cef-P-005and Cef-P-006 has been manufactured on 09-2021, while the dossier submitted in R&I of DRAP on 13th May,2022i.e. after 8 months of manufacturing of trial batches, clarification is required how you have submitted the stability data of real time study till 24month.	Firm stated that rectified and corrected stability data sheets are submitted. However, the firm submitted the raw data sheets of batch no. TC006-01, TC006-02, TC006-03.
12.		1. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. 2. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. 3. Provide Reference of previous approval of applications with stability study data of the firm (if any) 4. Documents for the procurement of API with approval from DRAP (in case of import).	Firm has only submitted the chromatograms and 21 CFR audit trail report of instant product. Remaining documents has not been provided by the firm.

		5. Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. 6. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). 7. In-use stability studies of reconstituted injection is required along with proposed in-use storage statement and in-use shelf-life. 8. Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	

Decision of 321st meeting of Registration Board:

- Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.
- Analytical method verification report of drug substance performed by drug product manufacturer.
- Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.
- Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.
- Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.
- Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.
- Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.
- Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.
- Batch analysis report of all three trial batches, in which all the quality test should be included that are specify in USP monograph of Cefepime injection.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Reply of the Firm:

Sr.no.	Decision of Registration Board	Response of Firm
1.	Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm submitted the specification and analytical procedure of drug substance by drug substance manufacturer instead from drug product manufacturer.
2.	Analytical method verification report of drug substance performed by drug product manufacturer.	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the USP monograph.
3.	Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.	submitted

4.	Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.	submitted
5.	Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.	Not submitted
6.	Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.	Submitted
7.	Analytical method verification report of assay testing of drug product ,in compliance of USP monograph of Cefepime Injection	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the USP monograph.
8.	Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.	Firm submitted the batch analysis report of three trial batches (TC006-001,TC006-002,TC006-003), Further the stability data sheet of real time stability study and COA of individual time points were of trial batches TC007-001,TC007-02,TC007-03.
9.	• Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted the form-6 bearing the dy.no. 6176 dated 16-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine. Firm submitted the commercial invoice bearing the dy.no. 6017/2021 DRAP dated 22-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine.
10.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	As per the submitted raw data sheets and chromatograms it is evident that firm has not applied the chromatographic condition with reference to mobile phase program, injection volume and sample conc. as recommended by USP.
11.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3	Not submitted

Decision: Deferred for submission of following:

- **Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.**
- **Manufacturer will provide analytical method verification studies for drug substance by drug product manufacturer as per USP including specificity, accuracy and precision before the issuance of registration letter.**
- **Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.**
- **Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.**
- **Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.**
- **Clarification required for not applied the same chromatographic condition for assay testing of drug product as recommended by USP monograph of cefepime injection, as evident from the submitted raw data sheets and chromatograms of stability batches.**
- **Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3**

1918.	Name, address of Applicant / Marketing Authorization Holder	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 11608 dated 13/05/2022
	Details of fee submitted	PKR 30,000/-: dated 01/11/2021
	The proposed proprietary name / brand name	Citi-Pime Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder of Cefepime HCL with L-Arginine Eq. to Cefepime 500mg
	Pharmaceutical form of applied drug	Dry powder for injection
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Maxipime Injection 500mg by M/s Hospira Inc. USA, USFDA Approved.
	For generic drugs (me-too status)	Zepime Injection 500mg by Global Pharmaceuticals, Reg. No. 046015
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Kopran Research Laboratories Ltd,Maharashtra, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefepime for injection is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (CEIV/B1203011, CEIV/B1203012, CEIV/B1203013)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Zepime Injection 500mg by Global Pharmaceuticals Pakistan performing quality tests (Identification, Assay, Constituted Solution, Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Kopran Research Laboratories Ltd India		
API Lot No.	CFM-2104004		
Description of Pack (Container closure system)	One clear glass vial 15ml with LDPE ampoule of WFI or 1% Lidocaine along with leaflet in unit carton.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TC006-001	TC006-002	TC006-003
Batch Size (Scientifically rational batch size)	Not mentioned	Not mentioned	Not mentioned
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	02-2023	02-2023	02-2023
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted the requisite document.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Form-6 grant permission for license to import from M/s. Kopran Research laboratories, India vide Dy. No. 6176 Dated: 16-04-2021.

		Invoice attested vide Dy.no. 6017/2021 DRAP dated: 22-04-2021in which exporter was M/s. Kopran Research laboratories, India
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Raw data sheets and chromatograms attached.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr.no.	Observations/Shortcomings	Reply of the Firm
1.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm has not submitted the specifications and analytical procedure of drug substance by drug product manufacturer.
2.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted"	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.
3.	Submit complete long-term stability data of all three batches of drug substance, since only the complete data of batch no. CEIV/B1203011 has been submitted in section 3.2. S.7.	Firm has not submitted the long-term stability data of batch no. CEIV/B1203013.
4.	Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"	Firm has not submitted the reply in response of this query.
5.	Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail	Firm has submitted the amended document in which cefepime HCl with L-arginine is mentioned as the only active ingredient. However, the information regarding the quantity of dry powder filled per vial has not been given. Further, the flow chart of manufacturing process submitted in the reply of section 3.2.P.3.3 is of ceftriaxone.

	manufacturing procedure given in section 3.2. P.3.3.	
6.	Provide complete analytical procedure used for routine testing of drug product since submitting the copy of USP monograph did not fulfil the requirement of section 3.2. P.5.2.	Firm again submit the copy of monograph of USP in section 3.2.P.5.2 and in section 3.2.P.4.2 submit the analytical procedure of cefotaxime injection.
7.	Analytical method of drug product verified in section 3.2.P.5.3 is different from that specified in USP monograph. Justify, for using different analytical method for verification studies.	Firm has not given the reply in response of this query.
8.	Scientific justification for not performing test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test during the batch release of the drug product	firm has submitted batch analysis report of three trail batches TRA-001, TRA-002, TRA-003 which were not the batch numbers of trial batches used for stability studies as evident from the submitted stability data sheets. Further, the test of completeness and clarity of solution, bacterial endotoxin test, testing of pH, water determination test and sterility test was not been included in batch analysis report nor given any justification. Furthermore, the firm submitted the same batch analysis report for cefepime 500mg injection and cefepime 1gm injection.
9.	Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.	Firm has submitted the reply in response of this query.
10.	Submit the stability data sheet of cefepime injection, since the submitted sheets are of ceftriaxone.	Firm stated that rectified and corrected stability data sheets are submitted.
11.	According to the document submitted in section 3.2. P.8 batch no. Cef-P-004, Cef-P-005and Cef-P-006 has been manufactured on 09-2021, while the dossier submitted in R&I of DRAP on 13th May,2022i.e. after 8 months of manufacturing of trial batches, clarification is required how you have submitted the stability data of real time study till 24month.	Firm stated that rectified and corrected stability data sheets are submitted. However, the firm submitted the raw data sheets of batch no. TC006-01, TC006-02, TC006-03.
12.	9. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. 10. Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point. 11. Provide Reference of previous approval of applications with	Firm has only submitted the chromatograms and 21 CFR audit trail report of instant product. Remaining documents has not been provided by the firm.

	stability study data of the firm (if any) 12. Documents for the procurement of API with approval from DRAP (in case of import). 13. Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. 14. Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). 15. In-use stability studies of reconstituted injection is required along with proposed in-use storage statement and in-use shelf-life. 16. Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	

Decision of 321st meeting of Registration Board:

- Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.
- Analytical method verification report of drug substance performed by drug product manufacturer.
- Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.
- Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.
- Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.
- Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.
- Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.
- Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.
- Batch analysis report of all three trial batches, in which all the quality test should be included that are specify in USP monograph of Cefepime injection.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Reply of the Firm:

Sr.no.	Decision of Registration Board	Response of Firm
1.	Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.	Firm submitted the specification and analytical procedure of drug substance by drug substance manufacturer instead from drug product manufacturer.
2.	Analytical method verification report of drug substance performed by drug product manufacturer.	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of

		conc of sample and standard solution recommended in the USP monograph.
3.	Long-term stability data of batch no. CEIV/B1203013 of drug substance till the claimed shelf life/re-test period.	submitted
4.	Compatibility study data of drug product with its diluent under the requirement of section 3.2.P.2.6.	submitted
5.	Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.	Not submitted
6.	Complete analytical procedure used for routine testing of applied drug product in section 3.2. P.5.2.	Submitted
7.	Analytical method verification report of assay testing of drug product ,in compliance of USP monograph of Cefepime Injection	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the USP monograph.
8.	Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.	Firm submitted the batch analysis report of three trial batches (TC007-001,TC007-002,TC007-003).
9.	• Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted the form-6 bearing the dy.no. 6176 dated 16-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine. Firm submitted the commercial invoice bearing the dy.no. 6017/2021 DRAP dated 22-04-2021 and the stamp of concerned officer on the same document was of dated 22-04-2021, further the name of drug mentioned on the document was cefepime instead of cefepime L-Arginine.
10.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	As per the submitted raw data sheets and chromatograms it is evident that firm has not applied the chromatographic condition with reference to mobile phase gradient program, injection volume and sample conc. as recommended by USP.
11.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3	Not submitted

Decision: Deferred for submission of following:

- **Specifications as well as analytical method of the drug substance from the drug product manufacturer in section 3.2.S.4.1 and 3.2. S.4.2.**
- **Manufacturer will provide analytical method verification studies for drug substance by drug product manufacturer as per USP including specificity, accuracy and precision before the issuance of registration letter.**
- **Complete batch formula along with quantity of filled weight per vial in section 3.2.P.3.**
- **Analytical method verification report of assay testing of drug product, in compliance of USP monograph of Cefepime Injection.**
- **Clarification regarding the trial batches which were actually manufactured for the stability study of applied product.**

- **Clarification required for not applied the same chromatographic condition for assay testing of drug product as recommended by USP monograph of cefepime injection, as evident from the submitted raw data sheets and chromatograms of stability batches.**
- **Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3**

	Details of fee submitted	PKR 50,000/-: dated 03/05/2021
	The proposed proprietary name / brand name	Aqua-RET 15mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each uncoated tablet contains: Tolvaptan.....15mg
	Pharmaceutical form of applied drug	White to Off white, round, biconvex, unscored, uncoated tablets
	Pharmacotherapeutic Group of (API)	Competitive antagonist at vasopressin V2 receptors
	Reference to Finished product specifications	Innovator
	Proposed Pack size	1x 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Samsca 15 mg Tablet by Otsuka Pharmaceuticals, Registered in UK.
	For generic drugs (me-too status)	N.A
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conducted on 26-06-2020
	Name and address of API manufacturer.	Aurore Pharmaceuticals Private Limited. Unit-1, Plot Nos. 35, 36, 38 to 40, 49 to 51 Phase IV, IDA, Jeedimetla, Hyderabad – 500055, Telangana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system

		and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of drug substance is not present in any Pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (TAAF190003, TAAF190004, TAAF190005)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Samsca 15 mg Tablet by Otsuka Pharmaceuticals performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage form). CDP has been performed against the same brand that is Samsca 15 mg Tablet by Otsuka Pharmaceuticals in Acid media (pH 1.2), Acetate (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have been submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Valsac 24mg/26 mg Tablets, Valsac 49mg/51 mg Tablets, Valsac 97mg/103 mg Tablets"which was conducted on 10-03-2020, and was presented in 295th meeting of Registration Board (8-11 June, 2020). Following observations were reported in the report: ✓ The HPLC software is 21CFR Compliant. \ ✓ Audit trail reports were available and physically checked Firm has adequate monitoring and controls for stability chambers. Software is installed for continuous monitoring of chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP for Aurore Pharmaceuticals Issued by Drugs Control Administration Government of Telangana valid upto 11/12/2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice (invoice# 019) cleared by DRAP Peshawar Office, Pakistan dated 03-06-2020 specifying import 01 Kg (Batch# TAAF190005).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit differential fee for the registration of applied new drug product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP on 14th Sep, 2021.	Firm submitted the fee of Rs 25,000/- vide slip no. 84097079479 dated 15-09-2022.
2.	Submit copy of valid Drug Manufacturing License (DML) issued by Licensing Division, DRAP.	Submitted
3.	Justify of including Isopropyl alcohol in the composition of formulation, since the given manufacturing method in section 3.2.P.3.3 did not the mentioned the use of IPA in any step.	Firm replied that it was consider the typographic error ,accordingly revised formulation has been submitted.
4.	Provide data of stability batches along with supporting documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Firm submitted the data of stability batches along with supporting documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.

Indication, Dosage & Administration of Innovator Brand Samsca:

Indication:

SAMSCA is a selective vasopressin V2-receptor antagonist indicated for the treatment of clinically significant hypervolemic and euvolemic hyponatremia [serum sodium < 125 mEq/L or less marked hyponatremia that is symptomatic and has resisted correction with fluid restriction], including patients with heart failure, cirrhosis, and Syndrome of Inappropriate Antidiuretic Hormone (SIADH).

Important Limitations:

• Patients requiring intervention to raise serum sodium urgently to prevent or to treat serious neurological symptoms should not be treated with SAMSCA. • It has not been established that SAMSCA provides a symptomatic benefit to patients. Dosage & Administration: Patients should be in a hospital for initiation and re-initiation of therapy to evaluate the therapeutic response and because too rapid correction of hyponatremia can cause osmotic demyelination resulting in dysarthria, mutism, dysphagia, lethargy, affective changes, spastic quadriparesis, seizures, coma and death. The usual starting dose for SAMSCA is 15 mg administered once daily without regard to meals. Increase the dose to 30 mg once daily, after at least 24 hours, to a maximum of 60 mg once daily, as needed to achieve the desired level of serum sodium. During initiation and titration, frequently monitor for changes in serum electrolytes and volume. Avoid fluid restriction during the first 24 hours of therapy. Patients receiving SAMSCA should be advised that they can continue ingestion of fluid in response to thirst. BOX Warning: *WARNING: INITIATE AND RE-INITIATE IN A HOSPITAL AND MONITOR SERUM SODIUM See full prescribing information for complete boxed warning. • SAMSCA should be initiated and re-initiated in patients only in a hospital where serum sodium can be monitored closely. • Too rapid correction of hyponatremia (e.g., >12 mEq/L/24 hours) can cause osmotic demyelination resulting in dysarthria, mutism, dysphagia, lethargy, affective changes, spastic quadriparesis, seizures, coma and death. In susceptible patients, including those with severe malnutrition, alcoholism or advanced liver disease, slower rates of correction may be advisable.* Therapeutic indications of Tolvaptan tablets submitted by the applicant: Aqua-ret 15 mg and 30mg tablets are manufactured according to the reference product Samsca manufactured by Otsuka Pharmaceutical Netherlands. The formulation of Aqua-ret 15 mg and 30 mg is according to the reverence product mentioned above. Samsca tablets are registered in 7.5 mg, 15 mg and 30 mg and available in 10's and 30's individual pack size. According to the summary of the product characteristic, this product is indicated in adults for the treatment of hyponatremia secondary to the syndrome of inappropriate antidiuretic hormone secretion (SIADH). The treatment with Tolvaptan has to be initiated at a dose of 15 mg once daily. The dose may be increased to a maximum of 60 mg once daily as tolerated to achieve the desired level of serum sodium. The dose titration can be achieved from initial dose 15 mg using one tablet of 15mg and the maximum dose 60 mg using two tablets of 30 mg. The treatment with Tolvaptan to be initiated in hospital to closely monitor the dose titration and level of serum sodium. All the information for the dose titration and precautions are mentioned the patient leaflet provided with this product and enclose herewith. **Therapeutic Indication:** **Tolvaptan is a selective vasopressin V2-receptor antagonist and the applied product is indicated for the treatment of clinically significant hypervolemic and euvolemic hyponatremia [serum sodium < 125 mEq/L or less marked hyponatremia that is symptomatic and has resisted correction with fluid restriction], including patients with heart failure, cirrhosis, and Syndrome of Inappropriate Antidiuretic Hormone (SIADH).** **Important Limitations:** **• Patients requiring intervention to raise serum sodium urgently to prevent or to treat serious neurological symptoms should not be treated with SAMSCA.** **• It has not been established that SAMSCA provides a symptomatic benefit to patients.** ***WARNING: INITIATE AND RE-INITIATE IN A HOSPITAL AND MONITOR SERUM SODIUM See full prescribing information for complete boxed warning. • SAMSCA should be initiated and re-initiated in patients only in a hospital where serum sodium can be monitored closely. • Too rapid correction of hyponatremia (e.g., >12 mEq/L/24 hours) can cause osmotic demyelination resulting in dysarthria, mutism, dysphagia, lethargy, affective changes, spastic quadriparesis, seizures, coma and death. In susceptible patients, including those with severe malnutrition, alcoholism or advanced liver disease, slower rates of correction may be advisable.***		
Decision: Approved with above therapeutic indication, limitations of use and box warning as recommended by the USFDA innovator product Samsca tablet.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Valsac 24mg/26 mg Tablets, Valsac 49mg/51 mg Tablets, Valsac 97mg/103 mg Tablets"which was conducted on 10-03-2020, and was presented in 295th meeting of Registration Board (8-11 June, 2020). Following observations were reported in the report: ✓ The HPLC software is 21CFR Compliant. \ ✓ Audit trail reports were available and physically checked		

		Firm has adequate monitoring and controls for stability chambers. Software is installed for continuous monitoring of chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP for Aurore Pharmaceuticals Issued by Drugs Control Administration Government of Telangana valid upto 11/12/2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice (invoice# 019) cleared by DRAP Peshawar Office, Pakistan dated 03-06-2020 specifying import 01 Kg (Batch# TAAF190005).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit differential fee for the registration of applied new drug product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP on 14th Sep, 2021.	Firm submitted the fee of Rs 25,000/- vide slip no. 84097079479 dated 15-09-2022.
2.	Submit copy of valid Drug Manufacturing License (DML) issued by Licensing Division, DRAP.	Submitted
3.	Justify of including Isopropyl alcohol in the composition of formulation, since the given manufacturing method in section 3.2.P.3.3 did not the mentioned the use of IPA in any step.	Firm replied that it was consider the typographic error ,accordingly revised formulation has been submitted.
4.	Provide data of stability batches along with supporting documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	Firm submitted the data of stability batches along with supporting documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.

Indication, Dosage & Administration of Innovator Brand Samsca:

Indication:

SAMSCA is a selective vasopressin V2-receptor antagonist indicated for the treatment of clinically significant hypervolemic and euvolemic hyponatremia [serum sodium < 125 mEq/L or less marked hyponatremia that is symptomatic and has resisted correction with fluid restriction], including patients with heart failure, cirrhosis, and Syndrome of Inappropriate Antidiuretic Hormone (SIADH).

Important Limitations:

• Patients requiring intervention to raise serum sodium urgently to prevent or to treat serious neurological symptoms should not be treated with SAMSCA.

• It has not been established that SAMSCA provides a symptomatic benefit to patients.

Dosage & Administration:

Patients should be in a hospital for initiation and re-initiation of therapy to evaluate the therapeutic response and because too rapid correction of hyponatremia can cause osmotic demyelination resulting in dysarthria, mutism, dysphagia, lethargy, affective changes, spastic quadriparesis, seizures, coma and death.

The usual starting dose for SAMSCA is 15 mg administered once daily without regard to meals. Increase the dose to 30 mg once daily, after at least 24 hours, to a maximum of 60 mg once daily, as needed to achieve the desired level of serum sodium. During initiation and titration, frequently monitor for changes in serum electrolytes and

volume. Avoid fluid restriction during the first 24 hours of therapy. Patients receiving SAMSCA should be advised that they can continue ingestion of fluid in response to thirst.
BOX Warning:
WARNING: INITIATE AND RE-INITIATE IN A HOSPITAL AND MONITOR SERUM SODIUM See full prescribing information for complete boxed warning. • SAMSCA should be initiated and re-initiated in patients only in a hospital where serum sodium can be monitored closely. • Too rapid correction of hyponatremia (e.g., >12 mEq/L/24 hours) can cause osmotic demyelination resulting in dysarthria, mutism, dysphagia, lethargy, affective changes, spastic quadriparesis, seizures, coma and death. In susceptible patients, including those with severe malnutrition, alcoholism or advanced liver disease, slower rates of correction may be advisable.

Therapeutic indications of Tolvaptan tablets submitted by the applicant:
Aqua-ret 15 mg and 30mg tablets are manufactured according to the reference product Samsca manufactured by Otsuka Pharmaceutical Netherlands. The formulation of Aqua-ret 15 mg and 30 mg is according to the reverence product mentioned above.
Samsca tablets are registered in 7.5 mg, 15 mg and 30 mg and available in 10's and 30's individual pack size. According to the summary of the product characteristic, this product is indicated in adults for the treatment of hyponatremia secondary to the syndrome of inappropriate antidiuretic hormone secretion (SIADH).
The treatment with Tolvaptan has to be initiated at a dose of 15 mg once daily. The dose may be increased to a maximum of 60 mg once daily as tolerated to achieve the desired level of serum sodium. The dose titration can be achieved from initial dose 15 mg using one tablet of 15mg and the maximum dose 60 mg using two tablets of 30 mg. The treatment with Tolvaptan to be initiated in hospital to closely monitor the dose titration and level of serum sodium.
All the information for the dose titration and precautions are mentioned the patient leaflet provided with this product and enclose herewith.

Decision: Approved with following therapeutic indication, limitations of use and box warning as recommended by the USFDA innovator product Samsca tablet:

Therapeutic Indication:
Tolvaptan is a selective vasopressin V2-receptor antagonist and the applied product is indicated for the treatment of clinically significant hypervolemic and euvolemic hyponatremia [serum sodium < 125 mEq/L or less marked hyponatremia that is symptomatic and has resisted correction with fluid restriction], including patients with heart failure, cirrhosis, and Syndrome of Inappropriate Antidiuretic Hormone (SIADH).

Important Limitations:
• Patients requiring intervention to raise serum sodium urgently to prevent or to treat serious neurological symptoms should not be treated with SAMSCA.
• It has not been established that SAMSCA provides a symptomatic benefit to patients.

WARNING: INITIATE AND RE-INITIATE IN A HOSPITAL AND MONITOR SERUM SODIUM See full prescribing information for complete boxed warning. • SAMSCA should be initiated and re-initiated in patients only in a hospital where serum sodium can be monitored closely. • Too rapid correction of hyponatremia (e.g., >12 mEq/L/24 hours) can cause osmotic demyelination resulting in dysarthria, mutism, dysphagia, lethargy, affective changes, spastic quadriparesis, seizures, coma and death. In susceptible patients, including those with severe malnutrition, alcoholism or advanced liver disease, slower rates of correction may be advisable.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Justify the finished product specifications as "USP specifications" since the drug product monograph is only available in BP Pharmacopoeia. Revise your specifications along with submission of requisite fee.	Firm submitted the revised finished product specification from USP specification to BP specification in section 3.2.P.5., however in module 1 section 1.5.6 firm again claimed USP specification for drug product.
2.	Submit specifications as well as analytical method of the drug substance from the drug product manufacturer as well as drug substance manufacturer in section 3.2.S.4.1 and 3.2.S.4.2.	Firm only submit the copy of USP monograph of carboxymethyl cellulose sodium. Specification and analytical procedure by drug substance manufacturer has not been submitted by the firm.
3.	Submit data in section 3.2.S.4.3 as per the guidance document approved by Registration	Firm submitted the analytical method verification report without any detail regarding the assay procedure

	Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	which has been verified and clarity related quantification data of precision and accuracy parameter (either the quantify amount was of carboxymethyl cellulose sodium or only the sodium content)
4.	• Provide details including batch number, expiry date and name of manufacturer of the product along with pharmaceutical equivalence was performed. • Perform all the test which are included in the BP monograph of carmellose sodium ophthalmic drops to establish pharmaceutical equivalence with the reference product.	Firm submitted the pharmaceutical equivalence report performed against the optheez eye drop of M/s. Barrett & Hodgson and only identification and pH and osmolality test has been included in the report. Assay has not performed while the performance of pharmaceutical equivalence.
5.	According to the batch analysis report of finished product you have adopted in-house specification for the testing of drug product since the monograph of applied product is present in BP pharmacopeia. Revise the specification of drug product in compliance to BP monograph and accordingly submit the revised analytical procedure and verification report.	Firm submitted the analytical verification report from which it is evident that the performance of accuracy parameter did not cover the range of conc of sample and standard solution recommended in the BP monograph.
6.	Provide COA of the reference standard / working standard actually used in the analysis of drug product in section 3.2.P.6.	Firm submitted the COA of working standard with USP claim, while the claimed specification of finished product is BP.
7.	Provide detail about the container closure system and performance report of water loss study	Firm informed that the primary container closure system is plastic bottle and did not submit the report of water loss study.
8.	Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP. Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the letter related to submission of sample of carboxymethyl cellulose sodium to M/s. Ophth Pharma from Rasheedsons for evaluation purpose.
9.	Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.	As per the submitted raw data sheets it is evident that firm has not performed the assay testing as recommended by BP monograph with reference to sample and standard conc.
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Submitted.

Decision: Deferred for the submission of following:

- **Fee of Rs. 7,500/- for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Submit detailed analytical method of the drug substance from the drug product manufacturer as well as drug substance manufacturer in section 3.2.S.4.2.**

- **Performed verification study on the assay method of drug substance in accordance with USP monograph by drug product manufacturer.**
- **Pharmaceutical Equivalence report against the innovator/reference product and performed all the quality test as recommended by the BP monograph.**
- **Analytical method verification report of drug product including specificity, accuracy and precision (repeatability) parameter.**
- **Submitted COA of working standard is of USP grade, whereas drug product specifications have been claimed as per BP monograph.**
- **Water loss study of drug product, since the primary container of drug product is LDPE bottles.**
- **API procurement document including copy of commercial invoice attested by AD (I&E) DRAP.**
- **Scientific justification for non-compliance of BP monograph while performing the assay testing of drug product during stability studies as evident from submitted raw data sheets.**

1.	Provide Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin since the submitted GMP certificate was valid till 2021.	Firm has submitted the copy of GMP certificate of drug substance manufacturer i.e. M/s. Virupaksha Organic Limited, Telangana state which is valid up till 29/01/2022.

2.	Justification is required for not performing the powder x-ray diffraction test by drug product manufacturer to confirm the polymorphic state of drug substance, since the bilastine has three different polymorphic forms. Further, the test has been included in the COA of the drug substance manufacturer.	Since, the testing facility of P-XRD is not available in Pakistan therefore we rely on drug substance manufacturer COA.
3.	Formulation contain preservative, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted preservative effectiveness studies of drug product.
4.	Justification is required for not performing compatibility studies of excipient with active ingredient, since the solubilizing agent of innovator is betadex and you have using β-Cyclodextrin sulfobutylether, sodium salt as a solubilizer.	Firm submitted the API- Excipient compatibility study report of bilastine oral solution.
5.	Provide data of pharmaceutical equivalence against the innovator product to justify your formulation development as per the requirement of section 3.2. P.2.2.1.	Firm submitted the reply that the reference product is not available in Pakistan, they have tried to arrange it from the country of origin but unfortunately not succeeded.

Decision of 321st meeting of Registration Board:
Deferred for submission of pharmaceutical equivalence report against the innovator drug product.

Response of the Firm:
Firm submitted the Pharmaceutical equivalence report performed against the reference product Bilaxten 2.5mg/ml oral solution of M/s. FAES FARMA, S.A. Maximo Aguirre, 1448940 – Leioa, Spain and Batch no. 3124, Expiry date june-2024 performed quality test (pH, weight/ml, Assay, quantification of methyl paraben, propyl paraben, Microbial enumeration test.)

Decision: Approved.
• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Agenda of Evaluator PEC-XVI.

Case No.01
A: REGISTRATION HUMAN (NEW LICENSE) FORM-5F

1923.	Name, address of Applicant / Marketing Authorization Holder	M/s Pinnacle Biotech (Pvt.) Ltd.
	Name, address of Manufacturing site.	M/s Pinnacle Biotech (Pvt.) Ltd. Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale

		☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.27405 dated 27-09-2022
	Details of fee submitted	PKR 30,000/-: Slip No. 45811149 dated 21/09/2022
	The proposed proprietary name / brand name	Pinabax 5mg tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Apixaban ……..……5mg
	Pharmaceutical form of applied drug	Red, oval tablet, plain on both sides.
	Pharmacotherapeutic Group of (API)	Anticoagulant, Cardiovascular, Factor Xa Inhibitor
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	3×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Eliquis Tablets 5mg by M/s Bristol Myers Squibb Co pharmaceutical Research Institute, USFDA Approved.
	For generic drugs (me-too status)	Apixaget 5mg Tablet by M/s Getz Pharma Pakistan (Pvt.) Ltd., Reg. No. 105248
	GMP status of the Finished product manufacturer	New license granted on 13/09/2021 Tablet (general), Capsule (general), Sachet (general) and Research and Development Laboratory section is approved.
	Name and address of API manufacturer.	**API-Apixaban:** CHANGZHOU PHARMACEUTICAL FACTORY. No.518 Laodong East Road, Changzhou, Jiangsu Province 213018, **China.**
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity AG-A, AG-G, AG-C, AG-4, AG-II, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: **Apixaban:** Firm has submitted signed and stamped stability data sheets as per zone IV-A in which real time stability data conditions are: Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Eliquis Tablets 5mg by M/s Bristol Myers Squibb Co pharmaceutical Research Institute, by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Eliquis Tablets 5mg by M/s Bristol Myers Squibb Co pharmaceutical Research Institute in Acid media (pH 1.2) & Phosphate Buffer (pH 6.8) and acetate Buffer (pH 4.5). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including Linearity, Range, Accuracy, Precision, specificity and/or selectivity, Repeatability, Intermediate precision Robustness, Solution Stability, and LOD & LOQ.

STABILITY STUDY DATA

Manufacturer of API	**API-Apixaban** Changzhou Pharmaceutical Factory.		
API Lot No.	**Apixaban** ZSAP211001		
Description of Pack (Container closure system)	Alu. Alu. Blister strips of 3x10's Tablets packed in a printed unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T024	T034	T035
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	27-04-2022	27-04-2022	27-04-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate Jiangsu Changzhou Pharmaceutical Quality Association valid till 15/09/2025.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not Provided**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	HPLC software CRF 21 Compliance is not provided, However firm has submitted audit trail reports.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Provided

Remarks of Evaluator:

Sr#	Section	Observation	Reply of firm vide dairy No.34064 dated 25-11-2022
01	**1.6.5**	Copy of GMP certificate Jiangsu Changzhou Pharmaceutical Quality Association is provided. GMP of Drug Control/Administration of country of origin is required.	Firm has submitted copy of GMP GMP certificate Jiangsu Changzhou Pharmaceutical Quality Association. Firm also submitted copy of Drug Manufacturing License of API manufacturer issued by provincial Drug and Food Authority of China.
02	**2.3.P.2.1.2**	Firm has mentioned that acceptable limit of Croscarmellose Sodium is 2-5 % w/w , however firm has utilized 9.00 % of Croscarmellose sodium per tablet as disintegrant , which needs clarification/justification.	Firm stated that they decided to use 9 % Croscarmellose Sodium in Apixaban formulation development to improve the dissolution profile of Apixaban. In case of initial formulation, where 5 % Croscarmellose was used, the dissolution results did not meet the required specifications, so we decided to add 9 % to improve the dissolution as the results of which dissolution profile was improved. Croscarmellose sodium is mainly used as a disintegrent in oral pharmaceutical formulations and is generally regarded as essentially nontoxic and nonirritant material. In U.K, Croscarmellose sodium is accepted for use in dietary supplement therefore use of Croscarmellose more than 5 % is safe. WHO has not specified an acceptable daily intake for the related substance carboxymethyl cellulose sodium ,used as food additive ,since the levels necessary to achieve a desired effect were not considered sufficient to be a hazard to health .we have also studied various pharmaceutical formulations papers and found that the use limit may be extended up to 25 %
03	**2.3.P.5.2**	• The testing method specifications/conditions mentioned for Dissolution test does not mentioned 0.05% Sodium lauryl Sulphate to be added along with 6.8 P.H Sodium Phosphate Buffer at 37 C, USP type II apparatus at 75 rpm. 0.05 % SLS is mentioned in release and stability study specification /conditions for conducting dissolution test mentioned in USFDA pharmaceutical review of Innovator product. Clarification is needed. • The chromatographic system used to conduct dissolution assay mentioned UV -242nm whereas for conducting Assay test HPLC is used with detector at UV-280nm. Clarification is needed.	• Firm has stated that they have adopted dissolution of Apixaban Tablet from FDA dissolution data base in which addition of 0.05 % SLS is recommended in P.H 6.8 sodium buffer dissolution media, Same conditions followed throughout the stability testing and same already mentioned in specification and testing method. • The chromatographic system is used to conduct both dissolution & Assay test is 28 nm, same mentioned in chromatographic conditions of dissolution & Assay.

04	**3.2.P.2**	Comparative dissolution profile study is conducted with Eliquis Tablets 5mg by M/s Bristol Myers Squibb Co pharmaceutical Research Institute's , However the dissolution medium used does not mentioned addition of 0.05 % SLS which has been mentioned in Biopharmaceuticals review of USFDA for innovator product tablet Eliquis .Clarification is needed.	Revised Comparative dissolution profile study as per FDA with the addition of 0.05 % SLS is performed and submitted
05	**3.2.P.8.3**	• Documents for the procurement of API with approval from DRAP (in case of import). • COA of Same Batch of API conducted by API manufacturer and subsequently finished product manufacturer. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated	Firm has provided copy of commercial invoice# CYI21376 attested by AD I&E DRAP dated 29-11-2021 for import of 0.1Kg of Apixaban (Batch# ZSAP211001) Not Provided Provided

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board directed the firm to optimize the formulation for quantity of Crosscarmellose within permissible limits as per Handbook of Pharmaceutical excipients/recommendations of reference regulatoruy authorities, for commercial batches.**

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Certificate No: 6097474 Issue Date: Jan 13, 2021 (Expired) License No: MH/102854 Issue Date: 01/01/2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**API: Rosuvastatin Calcium.** • Permission to import different APIs including Rosuvastatin calcium for the purpose of test/analysis and stability studies is granted. • License No.3940/21/DRAP-AD-CD(I&E) dated 10/12/2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	HPLC software CRF 21 Compliance is not provided, However firm has submitted audit trail reports.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr#	Section	Observation	Reply of firm vide dairy No.33871 dated 24-11-2022
i	1.6.5	Provided copy of GMP certificate of API manufacturer is expired.	Firm has provided copy of GMP certificate No. 6103654 validity period up to 26-12-2022
ii	2.3.S.7.1	Firm has provided API stability study data (Real time) which is conducted by API manufacturer at 25 C temperature and 60 % relative humidity. Stability Study data conducted at zone IV A is required.	Firm has provided copy of API stability study data of 3 batches conducted at Temperature 30 C and relative humidity of 75 %.
iii	2.3.S.4.3	Firm is requested to provide details of column utilized to conduct Pharmacopoeial Enantiomeric impurity testing of Rosuvastatin Calcium API and also mention provision/availability of L 107 chiral column in this regard as the same is not evident form the provided data.	Firm has submitted that for the testing of Enantiomeric purity of Rosuvastatin calcium USP monograph recommend the 4.6-mm × 15-cm; 5-µm packing L107. Firm has utilized • Lux® 5-µm cellulose-3 LC Column 150 x 4.6mm part No: 00F-4493-E0 of Phenomenex for testing the Enantiomeric purity of Rosuvastatin calcium *(ref: USP Chromatographic Column & picture of column box is attached)* • Firm has submitted copy of import Invoice & Packing list is also attached for reference
iv	2.3.P.2.1.2	Firm has submitted that Crospovidone acceptable range is 2-5 % however they have utilized 6 % in their formulation also the provided acceptable range of Calcium Phosphate tribasic is 10-20 % w/w however 25 % is utilized. Justification of utilization of excipients out of acceptable range is required.	Firm has submitted that • Calcium Phosphate, Tribasic is a diluent and which can be used from 10-90. However, 10-20 was a typo error • Crospovidone is a cross-linked, water-insoluble super disintegrant. It is usually incorporated dry in the running powder of a tablet formulation, but it can also be processed by wet and dry granulation methods. Generally, crospovidone is used at the concentration of 2%–5% w/w (Rowe et al., 2009). Crospovidone levels higher than 8% of tablet weight produces weaker tablets with a faster disintegration Similar to sodium starch glycolate, crospovidone disintegrates tablets mainly by swelling, with little tendency to form gels. Crospovidone can also be used for solubility enhancement of poorly soluble drugs in the process of evaporation. This

			process enables the drug adsorption onto crospovidone in the presence of a suitable solvent, and the solvent is then evaporated to provide a solid mixture with a faster drug dissolution rate. Crospovidone is used in oral pharmaceutical formulations and is generally regarded as a nontoxic and nonirritant material. Short term animal toxicity studies have shown no adverse effects associated with crospovidone.
v	2.3.P.5.1	Firm has calculated assay of Rosuvastatin in finished tablet utilizing formula which seems different from the pharmacopoeial calculation for assay, justification of adopted formula in comparison to pharmacopoeial formula is required	Firm has submitted that as per USP appended formula is mentioned for the calculation of assay content Result = (*rU*/*rS*) × (*CS*/*CU*) × [*M* × (*Mr1*/*Mr2*)] × 100 PHARMACOPEIAL CALCULATION **Calculation of std concentration** Wt of standard/20 x 5/200 x potency (%on as is basis)/100 x 1000 19.83/20 x 5/200 x 94.98/100 x 1000 Cs= 23.54 µg/ml **Assay**= (899967/812102.8) x (23.54/25) x [2 x (481.54 /1001.14)] x 100 Result= 100.38% In our testing method appended formula is used to calculate the assay content IN-HOUSE CALCULATION Area of spl. x Wt. of std. x 5 x P (% as is basis) x 200 x 50 x Avg.Wt.x factor (0.962) / Area of std. x 20 x 200 x 100 x Wt. of spl. x 5 = mg Rosuvastatin / Tablet % = Rosuvastatin (mg/Tablet) x 100 Label Claim (5mg) = % Rosuvastatin 899967 x 19.83 x 5 x 94.98 x 200 x 50 x 196.39 x 0.962 812102.8 x 20 x 200 x 100 x 1963.9 x 5 = 5.02mg Rosuvastatin / Tablet Result = 100.40% USP used the concentration of Standard and sample preparation, while our in-house calculation used the accurate weight and dilution of both so there is no chance of error in results, moreover either used pharmacopoeial formula or in-house, results were same as mentioned in above calculation.
vi	3.2.P.8.3	• Documents for the procurement of API with approval from DRAP (in case of import). • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• Firm has provided copy of Form-6, License No.3940/21/DRAP-AD-CD(I&E) dated 10/12/2021 for import on .60 kg of Rosuvastatin Calcium. • Firm has also provided copy of invoice No Nil dated Nil for import of .06 kg of Rosuvastatin Calcium cleared from DRAP khi office.

Decision: Approved with USP specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate Jiangsu Changzhou Pharmaceutical Quality Association valid till 15/09/2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	HPLC software CRF 21 Compliance is not provided, However firm has submitted audit trail reports.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

Sr#	Section	Observation	Reply of firm vide dairy No.34064 dated 25-11-2022
01	**1.6.5**	Copy of GMP certificate Jiangsu Changzhou Pharmaceutical Quality Association is	Firm has submitted copy of GMP GMP certificate Jiangsu Changzhou Pharmaceutical Quality Association. Firm also submitted copy

		provided. GMP of Drug Control/Administration of country of origin is required.	of Drug Manufacturing License of API manufacturer issued by provincial Drug and Food Authority of China.
02	**2.3.P.2.1.2**	Firm has mentioned that acceptable limit of Croscarmellose Sodium is 2-5 % w/w , however firm has utilized 9.00 % of Croscarmellose sodium per tablet as disintegrant , which needs clarification/justification.	Firm stated that they decided to use 9 % Croscarmellose Sodium in Apixaban formulation development to improve the dissolution profile of Apixaban. In case of initial formulation, where 5 % Croscarmellose was used, the dissolution results did not meet the required specifications, so we decided to add 9 % to improve the dissolution as the results of which dissolution profile was improved. Croscarmellose sodium is mainly used as a disintegrent in oral pharmaceutical formulations and is generally regarded as essentially nontoxic and nonirritant material. In U.K, Croscarmellose sodium is accepted for use in dietary supplement therefore use of Croscarmellose more than 5 % is safe. WHO has not specified an acceptable daily intake for the related substance carboxymethyl cellulose sodium ,used as food additive ,since the levels necessary to achieve a desired effect were not considered sufficient to be a hazard to health .we have also studied various pharmaceutical formulations papers and found that the use limit may be extended up to 25 %
03	**2.3.P.5.2**	• The testing method specifications/conditions mentioned for Dissolution test does not mentioned 0.05% Sodium lauryl Sulphate to be added along with 6.8 P.H Sodium Phosphate Buffer at 37 C, USP type II apparatus at 75 rpm. 0.05 % SLS is mentioned in release and stability study specification /conditions for conducting dissolution test mentioned in USFDA pharmaceutical review of Innovator product. Clarification is needed. • The chromatographic system used to conduct dissolution assay mentioned UV -242nm whereas for conducting Assay test HPLC is used with detector at UV-280nm. Clarification is needed.	• Firm has stated that they have adopted dissolution of Apixaban Tablet from FDA dissolution data base in which addition of 0.05 % SLS is recommended in P.H 6.8 sodium buffer dissolution media, Same conditions followed throughout the stability testing and same already mentioned in specification and testing method. • The chromatographic system is used to conduct both dissolution & Assay test is 28 nm, same mentioned in chromatographic conditions of dissolution & Assay.
04	**3.2.P.2**	Comparative dissolution profile study is conducted with Eliquis Tablets 5mg by M/s Bristol Myers Squibb Co pharmaceutical Research Institute's , However the dissolution medium used does not mentioned addition of 0.05 % SLS which has been mentioned in Biopharmaceuticals review of USFDA for innovator product tablet Eliquis .Clarification is needed.	Revised Comparative dissolution profile study as per FDA with the addition of 0.05 % SLS is performed and submitted
05	**3.2.P.8.3**	• Documents for the procurement of API with approval from DRAP (in case of import). • COA of Same Batch of API conducted by API manufacturer and subsequently finished product manufacturer. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated	Firm has provided copy of commercial invoice# CYI21376 attested by AD I&E DRAP dated 29-11-2021 for import of 0.1Kg of Apixaban (Batch# ZSAP211001) Not Provided Provided.
Decision: Approved with innovator's specifications.			

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board directed the firm to optimize the formulation for quantity of Crosscarmellose within permissible limits as per Handbook of Pharmaceutical excipients/recommendations of reference regulatoruy authorities, for commercial batches.**

B: REGISTRATION HUMAN (NEW LICENSE) FORM-5

Following Decision of DRAP authority 152th meeting has been communicated by In charge PEC through AD (CEO office) as under:

The Authority, keeping in view the decision of the Appellate Board, exercising its power under Rule 26 of the Drugs (Licensing, Registering & Advertising) Rules, 1976 amended via SRO 713(1)/2018 dated 8th June, 2018, decided to grant one time exemption to M/s A.J Mirza Pharma (Pvt) Ltd, Karachi to submit registration applications on Form 5 / Form 5-A / Form 5-D instead of Form 5F for those drugs whose registrations were cancelled, due to cancellation of Drug Manufacturing License on account of non-submission of renewal application within the specified time, or those registration applications which were approved by the Registration Board at the time of cancellation of DML of A.J. Mirza Pharma (Pvt) Ltd, Karachi

1930.	Name and address of manufacturer/ Applicant	A.J. Mirza Pharma (Pvt) Ltd. Plot No .44,sector 27 ,Korangi Industrial Area, Karachi
	Brand Name + Dosage Form + Strength	Ajloid Tablet 5mg
	Composition	Each Tablet Contains: Amlodipine Besilate equal to Amlodipine ……5 mg

	GMP status	New License dated 08-11-2022
	Remarks of the Evaluator	• Finished product specification mentioned Content uniformity testing specification which is not as per claimed USP specifications • Chromatographic conditions as provided in Finished testing specifications for conducting assay test does not comply USP specifications
	Decision: Approved with USP specifications. Firm shall submit revised product testing specification as per USP monograph along with preregistration variation fee challan of 7500/= as per S.R.O No.7-11/2012-B&A/DRAP dated 07/05/2021 , before issuance of registration letter.	

C: REGISTRATION HUMAN (NEW SECTION) FORM 5-F

1947.	Name, address of Applicant / Marketing Authorization Holder	M/s PDH Laboratories (Pvt) Ltd. 9.5km Sheikhupura Road Lahore
	Name, address of Manufacturing site.	M/s PDH Laboratories (Pvt) Ltd. 9.5km Sheikhupura Road Lahore

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 28258 dated 05-10-2022
	Details of fee submitted	Rs.30,000/- dated 05-04-2022
	The proposed proprietary name / brand name	**Pd-Care Syrup 60ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Hyoscine Butyl Bromide…5mg
	Pharmaceutical form of applied drug	Clear colorless syrup
	Pharmacotherapeutic Group of (API)	Anti-spasmodic
	Reference to Finished product specifications	Manufacturer Specs
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Not Available
	For generic drugs (me-too status)	SPASLER-P Syrup 5mg/5ml AGP Pharma Reg #016419
	GMP status of the Finished product manufacturer	New GMP license was granted on 27/07/2022. New additional section for oral liquid syrup (General) was approved on June 7,2022.
	Name and address of API manufacturer.	Prism Industries Limited Survey No. 637/23/A1, Khambhat Dhuvaran Road, At Kalamsar, Tal, Khambhat, District. Anand, Gujrat. India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Hyoscine Butyl bromide is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity of related substances , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions:

		Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5% RH for 6 months Batches: (HBBR-003-03-17, HBBR-002-01-17, HBBR-001-12-16)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Spasler-P syrup 6oml by M/s AGP Pharma Ltd. by performing quality tests (Identification, Assay). Comparative dissolution profile is not applicable
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Prism Industries Limited Survey No. 637/23/A1, Khambhat Dhuvaran Road, At Kalamsar, Tal, Khambhat, District. Anand, Gujrat. India		
API Lot No.	HBBR/02/06/2020		
Description of Pack (Container closure system)	Clear colorless Syrup filled in a ambered glass bottle sealed with aluminium cap packed in a unit carton along with leaflet.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-002	T-003	T-004
Batch Size	40 bottles	40 bottles	40 bottles
Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	01/10/2021	02/10/2021	03/10/2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. S-GMP/19081515.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.5201/2020/DRAP-AD-CD(I&E) dated 16/04/2020 is submitted wherein the permission to import different APIs including Hyoscine butylbromide for the purpose of test/analysis and stability studies is granted.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr#	Section	Observation	Reply of the firm vide dairy No.39683 dated 30-11-2022
i.	1.6.5	Provided copy of GMP certificate of API manufacturer is expired.	Valid copy submitted
ii.	1.5.9	Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board is not provided.	Firm has provided reference of registration in of Finished product in South Africa and Malaysia. However No evidence of Approval of applied formulation in reference regulatory Authorities as adopted in in 275th meeting is provided.
iii.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendia as well as non-compendial drug substance(s) shall be submitted, which are not provided.	Submitted
iv.	3.2.S.5	Evidence of Compendial Reference standard utilized for development of secondary reference standard is not provided.	The drug substance was tested against potentiometric titration method, in which compendial reference standard is not required.
v.	3.2.P.2.2	Firm has not performed Identification test and viscosity measurement test in COA submitted for demonstration of pharmaceutical equivalence with Syp Spasler of M/s AGP. Clarification is needed.	We have revised the finished product analytical method to include more applications of analytical method and to align the content as per guidelines, hence the revised pharmaceutical equivalence is attached.
vi.	3.2.P.5.1	Firm has not included test for measuring viscosity of finished product in syrup dosage form. Clarification is needed.	Revised Finished product COA as per revised method of analysis are submitted.
vii.	3.2.P.5.2	Firm has not submitted SOP, s for conducting Identification test of Finished product. Clarification is needed	Revised finished product analytical method is submitted.
viii.	3.2.P.8.3	SOP for conducting Analytical method for Assay and Analytical method validation protocol for Assay mentioned testing on HPLC whereas the stability study data demonstrates that Assay testing is conducted through Titration. Clarification in this regard is required. Tests for identification and Viscosity are not included and performed in stability study data , Clarification is needed.	Revised analytical method and analytical method validation protocol report is submitted. Revised stability study protocol and charts are submitted.

Decision: Registration Board has deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting.

D: Registration (Human) New, Form-5: -

1948.	Name and address of manufacturer/ Applicant	M/s Shrooq Pharmaceuticals (Pvt) LTd.21-Km, Ferozpur Road, Lahore.

		(General Tablet) Section approved
	Brand Name + Dosage Form + Strength	Mino ER Tablet
	Composition	Each Extended Release Tablet Contains: Minocycline Hcl ……..105 mg
	Diary No. Date of R & I & fee	Dy. No 14602 dated 19-04-2018; Rs.20,000/- dated 17-02-2018 , Duplicate Dossier Dy No.30437 dated 27-10-2022.
	Pharmacological Group	Antibiotic
	Type of Form	Form - 5
	Finished product Specification	USP specification
	Pack size & Demanded Price	10's ,
	Approval status of product in Reference Regulatory Authorities	USFDA approved .Tablet Solodyn Extended release tablet containing minocycline Hcl eq to 105 mg of minocycline.
	Me-too status	Tablet Tetra-Derm ER by Valor Pharma (Not verifiable)
	GMP status	GMP certificate issued to M/s Shrooq Pharma based upon evaluation / inspection conducted on 29-10-2021.
	Remarks of the Evaluator	• Firm has applied with label claim as each extended release tablet contains Minocycline Hcl = 105 mg. whereas the USFDA reference product tablet Solodyn is Extended release tablet containing minocycline Hcl eq to 105 mg of minocycline. • Provided Me-too status of Tablet Tetra-Derm ER by Valor Pharma is not verifiable. Valid evidence of me too/generic registered in Pakistan is required.
	Decision: Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.	
1949.	Name and address of manufacturer/ Applicant	M/s Shrooq Pharmaceuticals (Pvt) LTd.21-Km, Ferozpur Road, Lahore. (Cream/ointment/lotion/gel) Section approved
	Brand Name + Dosage Form + Strength	Oxy Plus Solution 5 %
	Composition	Each Gram Contains: Minoxidil ……..5 % w/v
	Diary No. Date of R & I & fee	Dy. No 14604 dated 19-04-2018; Rs.20,000/- dated 17-02-2018 , Duplicate Dossier Dy No.30438 dated 27-10-2022.
	Pharmacological Group	Antihypertensive / Vasodilators.
	Type of Form	Form - 5
	Finished product Specification	Not provided
	Pack size & Demanded Price	60 ml
	Approval status of product in Reference Regulatory Authorities	MINOXIDIL EXTRA STRENGTH (FOR MEN). MINOXIDIL EXTRA STRENGTH (FOR WOMEN).USFDA approved as OTC product
	Me-too status	Follinox 5% Solution. Reg. No. 82173
	GMP status	GMP certificate issued to M/s Shrooq Pharma based upon evaluation / inspection conducted on 29-10-2021.
	Remarks of the Evaluator	Firm has mentioned correct master formulation mentioning, each **ml** contains minoxidil…5% w/v. However, label claim mentioned on Form-5 is mentioned as, "each **gram** contains, Minoxidil ….5% w/v.

		Therefore Revised label claim on form -5 as "**Each ml Contains:Minoxidil……50mg (5%)w/v** is required along with pharmacological group as "Other Dermatological".
	Decision: Approved with USP specifications with label claim as under; **Each ml Contains:** **Minoxidil…….50 mg (5% w/v)** **Firm shall submit revised form-5 with above label claim and pharmacological group as "other dermatological" ,along with preregistration variation fee challan of 7500/= as per S.R.O No.7-11/2012-B&A/DRAP dated 07/05/2021 , before issuance of registration letter.**	
1950.	Name and address of manufacturer/ Applicant	M/s Shrooq Pharmaceuticals (Pvt) LTd.21-Km, Ferozpur Road,Lahore. (Cream/ointment/lotion/gel) Section approved.
	Brand Name + Dosage Form + Strength	Oxy Solution 2%
	Composition	Each ml Contains: Minoxidil ……..2 % w/v
	Diary No. Date of R & I & fee	Dy. No 14603 dated 19-04-2018; Rs.20,000/- dated 17-02-2018 , Duplicate Dossier Dy No.30436 dated 27-10-2022.
	Pharmacological Group	Antihypertensive
	Type of Form	Form - 5
	Finished product Specification	Not provided.
	Pack size & Demanded Price	60 ml.
	Approval status of product in Reference Regulatory Authorities	Men's Rogaine 2% topical solution. Women's Rogaine 2% topical solution. USFDA approved as OTC product
	Me-too status	Follinox 2% Solution. Reg. No. 82172
	GMP status	GMP certificate issued to M/s Shrooq Pharma based upon evaluation / inspection conducted on 29-10-2021.
	Remarks of the Evaluator	Revised Pharmacological Group as :Others dermatological".
	Decision: Approved with USP specifications with label claim as under; **Each ml Contains:** **Minoxidil…….20 mg (2% w/v)** **Firm shall submit revised form-5 with above label claim and pharmacological group as "other dermatological" ,along with preregistration variation fee challan of 7500/= as per S.R.O No.7-11/2012-B&A/DRAP dated 07/05/2021 , before issuance of registration letter.**	
1951.	Name and address of manufacturer/ Applicant	Pharmasol (Pvt) Ltd. Plot No. 549, Sundar IndustrialEstate, Raiwind Road, Lahore (Tablet Section)
	Brand Name + Dosage Form + Strength	TRAMAX-SR Tablet 100 mg
	Composition	Each sustained release tablet contains: Tramadol Hydrochloride……100 mg
	Diary No. Date of R & I & fee	Dy.No.12736 dated 06-03-2019; Rs.20,000/- dated 17-02-2018 ,
	Pharmacological Group	Opioid Analgesic
	Type of Form	Form - 5
	Finished product Specification	BP Specification.
	Pack size & Demanded Price	10's,20's,As per SRO
	Approval status of product in Reference Regulatory Authorities	Zydol SR 100 mg prolonged release tablet MHRA approved.
	Me-too status	Volpan SR tab , Reg No. 080368, Rotex Pharma
	GMP status	Firm has submitted copy of GMP certificate No.

		140/2022-DRAP (AD-084433115014) dated 26-08-2022 on the basis of inspection conducted on 22-08-2022.
	Remarks of the Evaluator	
	Decision:Approved.	

E: Registration Applications (Deferred) Form-5: -

1952.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.
	Brand Name + Dosage Form + Strength	METABOLASE Injectable Solution
	Composition	Each 100 ml contains: L-Carnitine Hcl(613.3 mg)Equivalent to Carnitine….50 mg D.L Acetylmethionine ……200 mg Cyanocobalamin…….0.2 m A-Tocopherol Acetate(33.0mg) Equivalent to A-Tocopherol……30 mg
	Diary No. Date of R & I & fee	Dy. No 12318 dated 06-03-2019; Rs.20,000/- dated 06-03-2019.
	Pharmacological Group	Amino Acid and vitamins
	Type of Form	Form - 5
	Finished product Specification	Not provided
	Pack size & Demanded Price	100ml, Glass vials.
	Approval status of product in Reference Regulatory Authorities	Not applicable.
	Me-too status	METABOLASE FORTE INJECTABLE SOLUTION, 043109, PRIX PHARMACEUTICA, LAHORE, imported from ITALY
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as " In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing , machinery/equipment , material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab (pvt) Ltd. Khanqah sharif Bahawalpur , was found to be operating at a satisfactory level of GMP compliance for the following sections only, oral Liquid (General)II and Aerosol section were under maintenance and were not functional at time of inspection": Liquid Injection Section (General) Oral Powder Premix Section (General) Oral Liquid (General)(I) Liquid Injection (penicillin) Dry Powder Injection (penicillin) Oral Powder (penicillin) Liquid Injection (hormone) Liquid Injection (Steroid)
	Remarks of the Evaluator	• Master Formulation with Complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Pack Size, container and closure is not provided. • Form-5 cover letter dully signed by management.

		• Pre-registration variation fee challan.
	Previous Decision of 321th meeting: Deferred for following shortcomings: **1. Master Formulation with Complete Outline of manufacturing method is required.** **2. Complete finished good testing specifications mentioning assay of finished products.** **3. Pack Size, container and closure is not provided.** **4. Form-5 cover letter dully signed by management.** **5. Pre-registration variation fee challan**	
	Reply of Firm: Firm has submitted revised Form-5 along with preregistration fee challan of 30000/= vide slip No 97077652776 dated 07-11-2022. In revised form-5 firm has mentioned revised label claim as under: Each ml contains: L-Carnitine Hcl(61.3mg)Equivalent to L.Carnitine……...50 mg D.L Acetylmethionine ……..……200 mg Cyanocobalamin……0.2 mg Alpha-Tocopherol Acetate(33.0mg) Equivalent to Alpha-Tocopherol……30 mg Revised form-5 also mentioned innovator specifications and pack size of 100 ml in glass vial ,me too status , and revised master formulation along with outline of manufacturing method.	
	Remarks of Evaluator :	
	Decision: Deferred the case for provision of evidence of testing facility along with drug analytical procedure for applied drug product.	
1953.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.
	Brand Name + Dosage Form + Strength	COMBIGENT Injection
	Composition	Each 100 ml contains: Gentamycin as sulphate……5 G Tylosin Tartarated……10 G Colistin Sulphate……20 MIU
	Diary No. Date of R & I & fee	Dy. No 12152 dated 06-03-2019; Rs.20,000/- dated 05-03-2019.
	Pharmacological Group	Broad Spectrum Antibiotic
	Type of Form	Form - 5
	Finished product Specification	Innovator Specification
	Pack size & Demanded Price	50 ml, Glass vial.
	Approval status of product in Reference Regulatory Authorities	Not Applicable

	Reply of Firm: Firm has submitted revised Form-5 along with preregistration fee challan of 30000/= vide slip No 94376926835 dated 16-11-2022. In revised form-5 firm has mentioned revised label claim as under: Each ml contains: L-Carnitine Hcl (61.3mg)Equivalent to L.Carnitine……...50 mg D.L Acetylmethionine ……..……200 mg Cyanocobalamin……0.2 mg Alpha-Tocopherol Acetate(33.0mg) Equivalent to Alpha-Tocopherol……30 mg Revised form-5 also mentioned innovator specifications and pack size of 50 ml in glass vial ,me too status , and revised master formulation along with outline of manufacturing method.	
	Decision: Deferred the case for provision of evidence of testing facility along with drug analytical procedure for applied drug product.	

Agenda of Evaluator PEC-XVII.

Case No. 1: REGISTRATION APPLICATIONS (RE-GRANT OF NEW LICENSE OF M/S A.J MIRZA) FOR LOCAL MANUFACTURING OF (HUMAN) DRUGS ON FORM-5.

Decision: (152nd Meeting of Authority)

The Authority, keeping in view the decision of the Appellate Board, exercising its power under Rule 26 of the Drugs (Licensing, Registering & Advertising) Rules, 1976 amended via SRO 713(1)/2018 dated 8th June, 2018, decided to grant one time exemption to M/s A.J Mirza Pharma (Pvt) Ltd, Karachi to submit registration applications on Form 5 / Form 5-A / Form 5-D instead of Form 5F for those drugs whose registrations were cancelled, due to cancellation of Drug

Manufacturing License on account of non-submission of renewal application within the specified time, or those registration applications which were approved by the Registration Board at the time of cancellation of DML of A.J. Mirza Pharma (Pvt) Ltd, Karachi.		
1955	Name and address of manufacturer/ Applicant	M/s A.J Mirza Pharma (Pvt.) Ltd., Plot No.44, Sector 27, Korangi Industrial Area, Karachi.
	Brand Name + Dosage Form + Strength	Ajlol 50mg Tablet
	Composition	Each tablet contains: Atenolol…..…50mg
	Diary No. Date of R & I & fee	Form-5, Dy.No 34650 dated 30-11-2022, Fee Rs.30,000/- vide online deposit slip No. 7045477479 dated 16-11-2022
	Pharmacological Group	Antihypertensive
	Type of Form	Form-5.
	Finished product Specification	USP Specifications.
	Pack size & Demanded Price	As per current SRO / Pack of 2×10's blister
	Approval status of product in Reference Regulatory Authorities	TENORMIN®, AstraZeneca pharmaceuticals (US FDA approved)
	Me-too status	Lotonol 50mg tablet of M/s Lotus Pharmaceuticals Islamabad. Registration No. 090167
	GMP status	DML re-granted w.e.f 08-11-2022.
	Remarks of the Evaluator (PEC-XVII)	• Tablet Section (General) mentioned in panel inspection report dated 22-08-2022 for the Re-grant of Drug Manufacturing License (By way of Formulation). • The product is available both as un-coated and film-coated tablet. • Tab. Ajlol 50mg, Registration No. 101031 was previously registered in the name of M/s A.J.M Pharma, Karachi.
	Decision: Approved.	
1956	Name and address of manufacturer/ Applicant	M/s A.J Mirza Pharma (Pvt.) Ltd., Plot No.44, Sector 27, Korangi Industrial Area, Karachi.
	Brand Name + Dosage Form + Strength	Ajlol 100mg Tablet

-

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.2	• The strength/label claim provided is not in accordance with the innovators product that is: Each film-coated tablet contains: Ondansetron (as HCl dihydrate) …….4mg	
2.	1.6.5 (b)	• No evidence of approval of manufacturing facility of API by concerned regulatory body submitted.	
3.	2.3.S.4.4	• The firm has provided HPLC method verification summary instead of Batch analysis data.	
4.	2.3.P.2.2.1 (a)	• In the formulation development, both film-coating and enteric coating processes mentioned, while the applied formulation is film-coated tablet.	
5.	3.2.S.4.1	• Specifications for drug substance provided by the drug product manufacturer has two different values for residue on ignition test. Clarification shall be submitted.	
6.	3.2.S.4.2	• Analytical procedure (signed) for the drug substance by the drug product manufacturer shall be submitted.	
13.	3.2.S.7.3	• Incomplete long term stability studies summary data sheets (only for 6 & 9 months) for the drug substance have been submitted by the firm.	
14.	3.2.P.1 (b)	• The qualitative composition is not in line with innovator's formulation, since the pre-gelatinized starch is not mentioned in applicant formulation. Provide scientific justification.	
15.	3.2.P.1 (b)	• The API quantity given without considering salt factor of the API. As evident from the trial batches BMR attached at 2.3.R.1, the quantity of API has been dispensed/mentioned without salt factor calculation.	

16.	3.2.P.2.2.1	• (ii) In pharmaceutical equivalence specifications comparison table, the applied product (Vomita 4mg tablet) is mentioned of some other firm and not of the applicant itself.	
17.	3.2.P.2.2.1 (iii)	• In comparative dissolution profile table, the time points mentioned as 5, 10, 15, 20, 25 & 30 minutes, however, during calculation, the time points given in calculation of similarity factor, the last time point mentioned as 45 minutes.	
18.	3.2.P.2.2.1 (iii)	• The buffer for pH 4.5 has been mentioned as Phosphate buffer instead of Acetate buffer.	
19.	3.2.P.2.2.1 (iii)	• The comparative dissolution profile for Acetate buffer, the % dissolution values for sample No. 5 to 12 at all-time points have significantly decreased for reference product. The similarity factor (f2) turns out to be 33. Provide scientific justifications for the particular dissolution profile.	
20.	3.2.P.2.2.1 (iii)	• The comparative dissolution data submitted for both strengths of Vomita tablet 4mg & Vomita tablet 8mg is same in all three buffers. All the dissolutions values at all-time points for all the samples have same values. Please clarify and scientifically justify.	
21.	3.2.P.2.6	• The excipients mentioned includes colloidal anhydrous silica, however, the same excipient has not been mentioned in other sections of the dossier such as composition, batch formula, formulation development etc.	
22.	3.2.P.3.3	• Granulation process has been mentioned in manufacturing process, however, the product is being manufactured through direct compression, clarification is required.	
23.	3.2.P.3.5	• In the process validation SOP, under list of equipment, rotary granulator, FBD, oscillating granulator are mentioned. However, the product to be manufactured through direct compression process.	
24.	3.2.P.3.5	• In the process validation SOP, under packing, the firm has mentioned packing of capsules (2×7's), instead of applied product.	
25.	3.2.P.5.2	• The assay method of FPP is not in accordance with that given in official	

		monograph (USP) of Ondansetron tablets. For sample solution preparation, the firm has mentioned 10 tablets, while as per official monograph, 20 tablets to be taken, from which portion of powder, equivalent to 50mg of Ondansetron, to be transferred. The applied strength is 4mg ondansetron (as HCl dihydrate). • Moreover, as per official monograph standard solution concentration is 0.05mg/ml of Ondansetron (free base) in diluent (Acetonitrile & Buffer, 1:1) from USP Ondansetron HCl RS. While the firm has provided as 0.2mg/ml of USP Ondansetron HCl RS in mobile phase. • The method also varies with respect to sample stock solution preparation and column specifications.	
26.	3.2.P.5.2	• The dissolution method varies from the USP official monograph of Ondansetron HCl tablet in terms of standard solution preparation and result analysis formula. Clarification is required.	
27.	3.2.P.5.2	• The dissolution limit mentioned NLT 80% of Ondansetron HCl in 30 minutes, while in official monograph, the limit mentioned as NLT 80% (Q) of Ondansetron HCl in 15 minutes. (Test 1)	
28.	3.2.P.5.2	• The dosage form uniformity test provided on the basis of weight variation (USP General monograph Uniformity of Dosage unit <905>), however as per label claim/strength (4mg/tablet), the content uniformity test is recommended.	
29.	3.2.P.5.2	• In the specifications table, the identification test of the FPP given as of HPLC. However, in analytical procedure, the identification tests mentioned the test for chloride.	
30.	3.2.P.8.3	• Provide raw data sheets, summary data sheets, audit trial reports and digital data logger record for temperature & humidity monitoring of stability chambers (both real and accelerated) in support of stability studies performed of the trial batches.	
31.	3.2.P.8.3	• The wavelength mentioned in chromatogram/HPLC reports submitted is 328nm, however, as per analytical procedures submitted and	

		official monograph of the product, the wave length for assay determination is 216nm.	
32.	3.2.P.8.3	• Provide raw data sheets for dissolution determination of trial batches during stability studies performed.	
33.	3.2.P.8.3	• The firm has mentioned content uniformity test in CoA of trial batches (at all-time points). Provide raw data sheets and chromatograms/HPLC reports for the content uniformity tests.	
34.	3.2.P.8.3	• The time intervals among the chromatograms/HPLC reports of standard and samples analysis, mostly vary from 1-3minutes. While the runtime for each analysis is 15 minutes, with retention time of peaks for all standards and samples as 3.770-3.774 (approx. 3.77). Clarification and scientific justification is required in this regard, as to how such intervals among chromatograms possible, with aforementioned peak retention times and run time of the analysis performed.	
35.	3.2.R.1.1	• The BMR of trial batches (T-01, T-02 & T-03) submitted are blank BMRs, having no details of actual execution of production/manufacturing of the trial batches, such as personnel signatures, in-process checks, reconciliation record, time intervals for different manufacturing steps, quantities dispensed etc.	
36.		Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
37.		Documents for the procurement of API with approval from DRAP (in case of import)	
38.		Compliance record of HPLC software 21CFR & audit trail reports on product testing.	
39.		Record of digital data logger for temperature and humidity monitoring of both stability chambers.	
Decision: Registration Board noted the request of the firm for withdrawal of the instant application and declared it as rejected.

		Name, address of Manufacturing site.	M/s Fortune Pharmaceuticals, Plot No. K/201, S.I.T.E, Super Highway, Phase-II, Karachi.

	Status of the applicant	☒ Manufacturer. ☐ Importer. ☐ Is involved in none of the above (contract giver).
	Status of application	☐ New Drug Product (NDP). ☒ Generic Drug Product (GDP).
	Intended use of pharmaceutical product	☐ Domestic sale. ☐ Export sale. ☒ Domestic and Export sales.
	Dy. No. and date of submission	Dy. No 27134 dated 26-09-2022.
	Details of fee submitted	Rs.30,000/- vide challan No. 75896857 dated 20-07-2022.
	The proposed proprietary name / brand name	VOMITA 8mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Ondansetron hydrochloride……..…8mg
	Pharmaceutical form of applied drug	White color round shaped film-coated tablet, packed in Alu-Alu blisters (1×10's) and further packed in printed unit cartons along with a patient information leaflet.
	Pharmacotherapeutic Group of (API)	Serotonin (5HT3) antagonists
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	1 × 10's
	Proposed unit price	As per policy.
	The status in reference regulatory authorities	ZOFRAN® 8 mg film-coated tablet (ondansetron hydrochloride dihydrate equivalent to 8 mg of ondansetron) by Novartis pharmaceuticals, Co. (USFDA approved)
	For generic drugs (me-too status)	OND8 8mg film-coated tablet (Ondansetron hydrochloride dihydrate eq to ondansetron: 8mg), Registration No. 102513 of M/s Innvotek Pharmaceuticals, Islamabad.
	GMP status of the Finished product manufacturer	New DML (DML No. 000924 granted vide Licensing Division letter No.F.2-3/2016-Lic dated 22-02-2021.
	Evidence of section approval.	Tablet (General) Section approval granted vide Licensing Division letter No.F.2-3/2016-Lic dated 22-02-2021.
	Name and address of API manufacturer.	M/s Anugraha Chemicals, No. D-47 to D-50 & C-62 to C-63, KSSIDC Industrial Estate Doddaballapur, Bengaluru-561203, India.

	Module-II (Quality Overall Summary)	Firm has submitted Quality Overall Summary: Product Dossier details as per WHO QOS-PD template.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substances.
	Stability studies (Drug substance.)	Incomplete stability studies summary data sheets of drug substance submitted: Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 06 & 09 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (AOND-17002, AOND-17003 & AOND-17004)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its composition, formulation development, pharmaceutical equivalence, comparative dissolution profile, manufacturer, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Zofran 8mg tablet of M/s GSK, Pakistan by performing quality tests such as Identification, Assay, Dissolution and Uniformity of dosage unit. Comparative dissolution profile (CDP) has been performed against the same brand that is Zofran 8mg tablet of M/s GSK, Pakistan in Acid media (pH 1.0-1.2), Acetate Buffer pH 4.5 & Phosphate Buffer (pH 6.8). Discrepancy in data

		observed. Details given below in remarks column.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Anugraha Chemicals, No. D-47 to D-50 & C-62 to C-63, KSSIDC Industrial Estate Doddaballapur, Bengaluru-561203, India.		
API Lot No.	AOND-21001		
Description of Pack (Container closure system)	1 × 10's in Alu-Alu blisters, packed in a printed carton.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted M/s Anugraha Chemicals, No. D-47 to D-50, C-62 & C-63, KSSIDC Industrial Estate, Doddaballapur, Bengaluru, Karnataka, India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted Quantity received 1kg as mentioned in CoA of API by drug product manufacturer. Date of received 12-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Incomplete submission as raw data sheets, summary data sheets, content uniformity data and dissolution data not provided.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks OF Evaluator: (PEC-XVII)

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.2	• The strength/label claim provided is not in accordance with the innovators product that is: Each film-coated tablet contains: Ondansetron (as HCl dihydrate) …….4mg	
2.	1.6.5 (b)	• No evidence of approval of manufacturing facility of API by concerned regulatory body submitted.	
3.	2.3.S.4.4	• The firm has provided HPLC method verification summary instead of Batch analysis data.	
4.	2.3.P.2.2.1 (a)	• In the formulation development, both film-coating and enteric coating processes mentioned, while the applied formulation is film-coated tablet.	
5.	3.2.S.4.1	• Specifications for drug substance provided by the drug product manufacturer has two different values for residue on ignition test. Clarification shall be submitted.	
6.	3.2.S.4.2	• Analytical procedure (signed) for the drug substance by the drug product manufacturer shall be submitted.	
7.	3.2.S.7.3	• Incomplete long term stability studies summary data sheets (only for 6 & 9 months) for the drug substance have been submitted by the firm.	
8.	3.2.P.1 (b)	• The qualitative composition is not in line with innovator's formulation, since the pre-gelatinized starch is not mentioned in applicant formulation. Provide scientific justification.	
9.	3.2.P.1 (b)	• The API quantity given without considering salt factor of the API. As evident from the trial batches BMR attached at 2.3.R.1, the quantity of API has been dispensed/mentioned without salt factor calculation.	
10.	3.2.P.2.2.1	• (ii) In pharmaceutical equivalence specifications comparison table, the applied product (Vomita 4mg tablet) is mentioned of some other firm and not of the applicant itself.	
11.	3.2.P.2.2.1 (iii)	• In comparative dissolution profile table, the time points mentioned as 5, 10, 15, 20, 25 & 30 minutes, however, during calculation, the time points	

		given in calculation of similarity factor, the last time point mentioned as 45 minutes.
12.	3.2.P.2.2.1 (iii)	• The buffer for pH 4.5 has been mentioned as Phosphate buffer instead of Acetate buffer.
13.	3.2.P.2.2.1 (iii)	• The comparative dissolution profile for Acetate buffer, the % dissolution values for sample No. 5 to 12 at all-time points have significantly decreased for reference product. The similarity factor (f2) turns out to be 33. Provide scientific justifications for the particular dissolution profile.
14.	3.2.P.2.2.1 (iii)	• The comparative dissolution data submitted for both strengths of Vomita tablet 4mg & Vomita tablet 8mg is same in all three buffers. All the dissolutions values at all-time points for all the samples have same values. Please clarify and scientifically justify.
15.	3.2.P.2.6	• The excipients mentioned includes colloidal anhydrous silica, however, the same excipient has not been mentioned in other sections of the dossier such as composition, batch formula, formulation development etc.
16.	3.2.P.3.3	• Granulation process has been mentioned in manufacturing process, however, the product is being manufactured through direct compression, clarification is required.
17.	3.2.P.3.5	• In the process validation SOP, under list of equipment, rotary granulator, FBD, oscillating granulator are mentioned. However, the product to be manufactured through direct compression process.
18.	3.2.P.3.5	• In the process validation SOP, under packing, the firm has mentioned packing of capsules (2×7's), instead of applied product.
19.	3.2.P.5.2	• The assay method of FPP is not in accordance with that given in official monograph (USP) of Ondansetron tablets. For sample solution preparation, the firm has mentioned 10 tablets, while as per official monograph, 20 tablets to be taken, from which portion of powder, equivalent to 50mg of Ondansetron, to be transferred. The applied strength is 4mg ondansetron (as HCl dihydrate).

20.	3.2.P.5.2	• The dissolution method varies from the USP official monograph of Ondansetron HCl tablet in terms of standard solution preparation and result analysis formula. Clarification is required.	
21.	3.2.P.5.2	• The dissolution limit mentioned NLT 80% of Ondansetron HCl in 30 minutes, while in official monograph, the limit mentioned as NLT 80% (Q) of Ondansetron HCl in 15 minutes (Test 1).	
22.	3.2.P.5.2	• The dosage form uniformity test provided on the basis of weight variation (USP General monograph Uniformity of Dosage unit <905>), however as per label claim/strength (4mg/tablet), the content uniformity test is recommended.	
23.	3.2.P.5.2	• In the specifications table, the identification test of the FPP given as of HPLC. However, in analytical procedure, the identification tests mentioned the test for chloride.	
24.	3.2.P.8.3	• Provide raw data sheets, summary data sheets, audit trial reports and digital data logger record for temperature & humidity monitoring of stability chambers (both real and accelerated) in support of stability studies performed of the trial batches.	
25.	3.2.P.8.3	• The wavelength mentioned in chromatogram/HPLC reports submitted is 328nm, however, as per analytical procedures submitted and official monograph of the product, the wave length for assay determination is 216nm.	
26.	3.2.P.8.3	• Provide raw data sheets for dissolution determination of trial batches during stability studies performed.	
27.	3.2.P.8.3	• The firm has mentioned content uniformity test in CoA of trial batches (at all-time points). Provide raw data sheets and chromatograms/HPLC reports for the content uniformity tests.	
28.	3.2.P.8.3	• The time intervals among the chromatograms/HPLC reports of standard and samples analysis, mostly vary from 1-3minutes. While the runtime for each analysis is 15 minutes, with retention time of peaks for all standards and samples as 3.770-3.774 (approx. 3.77). Clarification and	

		scientific justification is required in this regard, as to how such intervals among chromatograms possible, with aforementioned peak retention times and run time of the analysis performed.
29.	3.2.R.1.1	• The BMR of trial batches (T-01, T-02 & T-03) submitted are blank BMRs, having no details of actual execution of production/manufacturing of the trial batches, such as personnel signatures, in-process checks, reconciliation record, time intervals for different manufacturing steps, quantities dispensed etc.
30.		Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
31.		Documents for the procurement of API with approval from DRAP (in case of import)
32.		Compliance record of HPLC software 21CFR & audit trail reports on product testing.
33.		Record of digital data logger for temperature and humidity monitoring of both stability chambers.

Decision: Registration Board noted the request of the firm for withdrawal of the instant application and declared it as rejected.

	Details of fee submitted	PKR 30,000/-: dated 27/04/2022
	The proposed proprietary name / brand name	F -EZOLE 20mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Esomeperazole Magnisium Trihydrate E.q to to Esomeperazole 20mg
	Pharmaceutical form of applied drug	A dark blue cap with blue body size "3" hard Gelatin filled capsule having white pallets.

	Pharmacotherapeutic Group of (API)	Drugs for acid-related disorders, Proton pump inhibitors
	Reference to Finished product specifications	USP
	Proposed Pack size	1×14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	NEXIUM 20mg Capsule USFDA. Esomeprazole 20mg Gastro – resistant capsule MHRA
	For generic drugs (me-too status)	ACIREG CAPSUL 20 mg BARRETT HODGSON PAKISTAN (PVT) LTD
	GMP status of the Finished product manufacturer	New license granted on 21/02/2021 Tablet (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	SAAKH PHARMA. Address: Plot # C -7/1, North West Industrial Zone,Karachi
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Esomeprazole Mg is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (ESO-EC – 22.5-001-19, ESO-EC – 22.5-002-19, ESO-EC – 22.5-003-19)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification,

		reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is ACIREG CAPSULE 20 mg Capsule by BARRETT HODGSON PAKISTAN (PVT) LTD. performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is ACIREG CAPSULE 20 mg by BARRETT HODGSON PAKISTAN (PVT) LTD.in Acid media (pH 1.2), pH 4.5 & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.
