Remark of the Evaluator [XI]

Remarks	**Response by the firm**
• As per 290th decision of Registration board, provide evidence of separate manufacturing facility/section for manufacturing of DPIs including specialized mixing facility to ensure the required particle size of the formulation blend.	The firm submitted approved layout plan for manufacturing of DPI but have no approved section/manufacturing facility at present. Moreover the firm submitted a list of equipments that will be used in manufacturing including eqipments for DPI mixing, DPI filling, capsule polishing, blistering and packaging. **(No evidence of availability)**
• As per 290th decision of Registration board, provide evidence of equipments for performing the test of "Uniformity of Delivered Dose" and "Aerodynamic Particle Size Distribution" as per Pharmacopoeia.	The firm submitted list of equipments for performing the test of "Uniformity of Delivered Dose" and "Aerodynamic Particle Size Distribution" **(No evidence of availability)**
• The reference formulation have mentioned the hydrated form (dihydrate) of Formoterol fumarate in the label claim while you have not mentioned the hydrated form. Revise the label claim as per reference formulation mentioning the hydrated form along with submission of applicable fee.	The firm have revised the label claim mentioning the hydrated form of Formoterol fumarate in the label claim
• Submission of stability studies data of three batches as per Requirements of Registration Board decision of 293rd meeting.	The firm have submitted commitment for performing the stability study as per Requirements of Registration Board decision of 293rd meeting.

Decision of 296th meeting of Registration Board:
Deferred for confirmation of required manufacturing facility "Dry Powder inhaler" section with manufacturing and testing equiments for applied formulation.

Response by the firm: Firm has submitted following documents:

- Evidence of SYMBICORT FORTE TURBUHALER contains 400 mcg of budesonide and 12 mcg of formoterol fumarate dihydrate per dose approved in Health Canada.
- Section approval letter dated 22-12-2020 specifying Dry powder inhaler -New section.
- GMP certificate of M/s Werrick Pharmaceuticals issued on the basis of inspection dated 12-08-2022.
- DPI device: eziHaler (Trademark number 19748-D)
- Delivered dose label claim as:
  Each delivered dose contains:
  Budesonide……..…….320mcg

	Formoterol Fumarate…….9mcg	
	Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021. • **Registration Board further decided that following label claim for delivered dose shall also be declared on registration letter:** **"Each delivered dose contains:** **Budesonide……..…….320mcg** **Formoterol Fumarate…….9mcg**

	Diary No. Date of R& I & fee	Dy.No.17181; 05-10-2017; Rs.20,000/- (04-10-2017)
	Pharmacological Group	1st Gen Cephalosporin
	Type of Form	Form-5
	Finished product Specifications	Not provided
	Pack size & Demanded Price	1's vial + solvent (WFI 5ML ampoule) & Rs.66/-per vial
	Approval status of product in Reference Regulatory Authorities	Discontinued in USFDA
	Me-too status	Velosef injection 250mg of M/s Squibb (Reg. # 001870)
	GMP status	Last GMP inspection was conducted on 19-10-2017 and the report concludes: "The detailed inspection was conducted for the verification of current GMP compliance. It was notated that the firm had segregated the Cephalosporin manufacturing facility, however, it was not truly dedicated. The firm was advised to provide dedicated facility for manufacturing of Cephalosporin products. The overall facilities were found to be operating at satisfactory level of GMP compliance at the time of inspection. The firm had sufficient qualified/ technical staff and given the commitment for re-vamping as a continuous improvement activity.
	Previous remarks of the Evaluator.	• The official monograph of the applied formulation is available in BP. • The evidence of applied formulation in the reference regulatory authorities could not be confirmed. • Dedicated manufacturing facility for Cephalosporin products in the applicant's firm could not be confirmed.

	Previous Decision	**Deferred for following:** • **Evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting.** • **Dedicated manufacturing facility for Cephalosporin products. (M-285)**
	Evaluation by PEC	
	Decision: Approved with USP Specifications. **Firm will revise the label claim as per the decision taken by the Boad in instant meeting regarding Cephradine for Injection along with submission of requisite fee for pre-registration correction/changes of label claim as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Firm has not submitted verification studies of analytical method for the testing of drug substance.**
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not performed by the firm
	Analytical method validation/verification of product	Firm has submitted report of validation of analytical method for the drug product.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. KD/89275/2020/11/33788) issued by FDA Mahrashtra dated 20-10-2020. The certificate is valid till 19-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Doripenem 3Kg from M/s Kopran Research Laboratories Limited K4/4, Additional MIDC, At & Post Birwadi, Taluka Mahad, District Raigad - 402 302 Maharashtra, INDIA issued by AD (I&E) DRAP field office. The license was issued on 08-04-2020. • Firm has submitted copy of commercial invoice cleared dated 08-04-2020 specifying import of 3Kg doripenem Batch No. DIPV/B2002002, DPIV/P2001003, DPIV/P2001004.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for two day 24-04-2020 and 25-04-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP on 3rd September 2021.	
2.	Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.
3.	Justify the finished product specifications as "Inhouse specifications" since the drug product monograph is available in Japanese Pharmacopoeia. Revise your specifications along with submission of requisite fee.	Product specifications are revised as per Japanese Pharmacopoeia referred to "supplement II to Japanese Pharmacopoeia seventeenth edition" notified on June 28th, 2019 and later on circulated. Revised FPP specifications, method of analysis is submitted.
4.	Justify the use of drug substance having in house specifications while the drug substance specifications are present in JP monograph for "Doripenem hydrate"	Revised specification & method of analysis for Doripenem hydrate as per JP is submitted.
5.	Justify the limit of water from 4.0 – 5.5% in drug substance specifications, while JP monograph specifies the limit from 4.0 – 5.0%.	Drug substance was analyzed using a manufacturer specs and method of analysis at time of development. Moreover, in water contents of drug substance also qualifies the acceptance limit of JP.
6.	Justify why the test for residue on ignition is not performed for the drug substance since it is recommended in JP monograph.	Drug substance was analyzed using a manufacturer specs and method of analysis at time of development where residue on ignition wasn't part of specifications. Now revised specs is submitted.
7.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Specifications & method of analyses from Drug Substance & Drug Product manufacturers is submitted.
8.	Justify the use of a different analytical method for assay testing of drug substance from that specified in JP monograph. The method of drug substance manufacturer is different in terms of HPLC column specifications, column temperature, mobile phase, UV detector wavelength, flow rate, standard preparation method and final concentration of standard solution, sample preparation method and final concentration of sample solution, system suitability requirements and acceptance criteria and the formula for calculation of results of assay.	Drug substance was analyzed by using manufacturer's method of analysis at time of development that is why testing conditions differs from that of JP monograph. Product specifications are revised as per Japanese Pharmacopoeia referred to "supplement II to Japanese Pharmacopoeia seventeenth edition" notified on June 28th, 2019 and later on circulated. Revised drug substance specification & method of analysis as per JP is submitted.
9.	Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as noncompendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.	At time to development we followed in-house method of analysis and submitted analytical method validation. We started following the JP at 12 months' study time-point. Now the Analytical Method Verification Protocol & Report is submitted.

10.	Justify how 260mg of Doripenem Monohydrate eq.to Doripenem is equivalent to 250mg of doripenem as per the label claim.	Molecular weight of Doripenem Monohydrate = 438.52 Molecular weight of Doripenem = 420.50 Factor = 438.52 / 420.50 = 1.04 Equivalent weight ofDoripenem monohydrate for 250mgDoripenem = 250 x 1.04 = 260mg
11.	Justify how the applied drug is to be supplied with 10ml of sodium chloride 0.9% solution, since the innovator product recommends different volume for reconstitution.	10ml of sodium chloride 0.9% solution is for primary reconstitution which will then be further diluted as per requirements.
12.	Justify why pharmaceutical equivalence studies are not performed.	As Nexidore 250mg injection is ready to fill product, and fill weight of 250mg injection is half of 500mg injection. There is no addition of any other contents in the formulation so pharmaceutical equivalence study has been done against dorinem 500mg injection by ICI Pakistan.
13.	The process validation protocols does not contain any steps to ensure the sterilization of vials and rubber stopper is adequately performed, further the time and temperature of sterilization cycle is also not validated. Justification is required in this regard.	Revised prospective process validation protocol is submitted.
14.	Justify the drug product specifications section (3.2.P.5.1) with water contents from 4.0% to 5.5% while the JP monograph for the drug product specifies water contents to be 4.0 to 5.0%.	Product specifications has been revised as per Japanese Pharmacopoeia referred to "supplement II to Japanese Pharmacopoeia seventeenth edition" notified on June 28th, 2019 and later on circulated. Moreover during stability study the water contents results also complies the JP limits(4-5%)
15.	Justify the limit of assay from 90 – 115% since the JP monograph specifies the assay limit from 95 – 105%.	Product specifications has been revised as per Japanese Pharmacopoeia referred to "supplement II to Japanese Pharmacopoeia seventeenth edition" notified on June 28th, 2019 and later on circulated. Moreover during stability study the Nexidore assay results also complies the JP limits(95-105%).
16.	Justify the use of a different analytical method for assay testing of drug product from that specified in JP monograph. The analytical method of drug product is different in terms of HPLC column specifications, column temperature, mobile phase, UV detector wavelength, flow rate, total run time and retention time, standard preparation method and final concentration of standard solution, sample preparation method and final concentration of sample solution, system suitability requirements and acceptance criteria and the formula for calculation of results of assay.	Drug substance was analyzed by using manufacturer's method of analysis at time of development that is why testing conditions differs from that of JP monograph. Product specifications are revised as per Japanese Pharmacopoeia referred to "supplement II to Japanese Pharmacopoeia seventeenth edition" notified on June 28th, 2019 and later on circulated. Revised specification & method of analysis for drug product as per JP is submitted.
17.	Justify the assay preparation step in the assay testing of drug product specifications in which the contents of only 1 vial is taken, justify how the contents taken from only 1 vial can be considered representative of the whole batch.	**No justification is provided by the firm.**
18.	Justify why the test of specificity is not performed during the validation studies of the analytical method of drug product.	Nexidore Injection is ready to fill product. It doesn't contain inactive ingredients, so there wouldn't need the test of specificity during validation studies.Now we are following JP method and analytical method verification study of product is attached with inclusion of specificity.
19.	Provide details of the concentration in mg/ml of different solutions i.e. 50% to 150% used in accuracy and precision testing during validation studies.	Concentration of 50% solution in mg/ml: 125/100 x 1/50 = 0.025mg/ml Concentration of 100% solution in mg/ml: 250/100 x 1/50 = 0.05mg/ml Concentration of 150% solution in mg/ml:

		375/100 x 1/50 = 0.075mg/ml **The concentration of standard solution recommended by JP is 0.125mg/ml which is different from the 100% concentration used by the firm.**
20.	Justify why the test of water contents and uniformity of dosage units is not performed in the batch analysis stage.	Both tests have now been performed on drug product
21.	Justify the release of drug product batches on 25-04-2020 after performing test of sterility, since the drug substance was released after testing on 24-04-2020. Justify how the three batches were manufactured and stability studies were being performed within 1 day only.	This is no GMP, non-commercial batch produced for R&D and stability purpose. In case of product development and stability batches the product does not have to go to market normally all test including sterility are started from zero point. Hence in case of product development in order to achieve stability time lines, all test can be started together. Since the product has to stay at stability for atleast three months so by the time sterility will come up and if any test fails the results will together come up.
22.	Justify the use of 25ml type-II glass vial for the applied drug product since as per your submission the drug product is to be reconstituted in 10ml normal saline.	It was typo error at time of submission. It is 15mL Type I glass vial.
23.	Justify how the results of initial time point is different at real time and accelerated stability data sheet for batch DN-001 and DN-002.	The product has been tested separately for real time and accelerated time stability that's why their results vary but it is in acceptable range.
24.	Justify how the results of pH and assay of batch DN-001 and DN-002 at initial time point in real time stability studies is exactly same.	It is typo error
25.	You have submitted that all stability batches were manufactured using the drug substance batch No. DPIV/P2001003. For manufacturing of 3 batches each having batch size 1200 vials, approximately 1.87Kg drug substance is required, while as per the clearance documents and commercial invoice 1Kg drug substance of batch number DPIV/P2001003 was imported. Justify how three batches were manufactured using the drug substance having batch number DPIV/P2001003.	Three stability batches were manufactured with 312gm of powder from each of 3 containers. Consumption detail of each API lots for manufacturing of three stability batches are: **Nexidore 250mg Injection (DN-001):** DPIV/B2002002 **Nexidore 250mg Injection (DN-002):** DPIV/P2001003 **Nexidore 250mg Injection (DN-003):** DPIV/P2001004 Firm has not submitted documents for import of these lots of API.
26.	Justify why stability testing was not performed for the drug product at the end of accelerated stability study.	We have already submitted complete accelerated stability study data (6 months). However, attaching again herewith for your review in Annexure 13.we are also providing 9th, 12th, 18th stability study data as per JP method.
27.	Submit compliance record of HPLC software 21CFR & audit trail reports on product testing for each analysis performed during the study.	Submitted by the firm.

Decision: Registration Board after thorough deliberation observed that the firm has not developed the product as per specifications laid down in Japanese Pharmacopoeia. The Board therefore decided not to accept the stability study data and advised the applicant to again perform product development and stability studies of three batches and submit the data on Form 5-F as per the relevant guidance document.

1057	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Kaizen Pharmaceuticals (Pvt) Ltd. E-127-129, North Western Industrial Zone Bin Qasim Karachi.**
	Name, address of Manufacturing site.	M/s Kaizen Pharmaceuticals (Pvt) Ltd. E-127-129, North Western Industrial Zone Bin Qasim Karachi.

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP inspection report dated 11-08-2020 concludes satisfactory compliance to GMP. Firm has submitted copy of GMP certificate of dated 16-09-2020 based on the inspection dated 28-08-2019. The GMP certificate specifies Tablet (General) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML dated 24-09-2012 specifying Tablet section. Firm has submitted copy of GMP certificate of dated 16-09-2020 based on the inspection dated 28-08-2019. The GMP certificate specifies Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their last onsite inspection conducted for product Rofair (Roflumilast) 500mcg Tablets on 25th June, 2019. The said inspection report was discussed in 290th meeting of Registration Board held on 3rd–4th July, 2019 and the case was approved. The inspection report confirms following points: • The firm has Shimadzu 's LC 20A, with software ―Lab solution DB‖ which is 21 CFR part 11 compliant with audit trail and date time stamped and with complete multi-level user authorization • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate of M/s Zhejiang Menovo Pharmaceutical Co. Ltd. No. 8, Jing 13 Road, Hangzhou Gulf Shangyu Economic and Technological Development zone, Shangyu City Zhejiang Province China. Issued by Agency for medicinal products and medical devices of the republic of Slovenia on the basis of inspection dated 13-03-2017.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of proforma invoice number YP016 dated 26-03-2018 from Ningbo Menovo Pharmaceutical Co. Ltd. Specifying 750g safinamide mesylate. The Invoice is not cleared by AD (I&E). Firm has also submitted copy of DHL invoice with airway bill number 4495533405.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete stability data of 3 batches for 6 months.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance of HPLC system along with report of audit trail.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for accelerated and real time stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit complete label claim in section 1.5.2 stating complete description of product whther film coated tablet or otherwise along with exact salt form and quantity of drug substance contained, since you have only mentioned 100mg.	Each film coated tablet Contains: Safinamide as mesylate……100mg

2.	Submit data in section 3.2.S.3 regarding the characterization of drug substance and its IR spectra.	Firm has submitted characterization studies of the drug substance along with IR spectra.
3.	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted specifications and analytical method of drug substance from drug product manufacturer as well.
4.	Provide verification studies of drug substance from drug product manufacturer in section 3.2.S.4.3.	Firm has submitted analytical method verification studies of the drug substance.
5.	Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product in section 3.2.S.4.4, since COA of different batches is provided in this section.	Firm has submitted COA of relevant lot of API having batch number PD/SAF/05/1511/02R, from both API manufacturer as well as product manufacturer.
6.	Submit COA of reference standard used for analysis of drug substance in section 3.2.S.5.	Firm has submitted COA of reference standard.
7.	Submit Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component in section 3.2.S.6.	Firm has submitted complete details of section 3.2.S.6 with details of container closure system.
8.	Submit data in relevant section / sub-section of module 3.2.P instead of referring to annexures.	Firm has again submitted module 3.2.P as per CTD guidance document.
9.	Submit information and master formulation in section 3.2.P.1	Firm has submitted master formulation and description of drug product as per guidance document in section 3.2.P.1
10.	Submit complete details of all subsections related to pharmaceutical development in section 3.2.P.2 and its sub sections.	Firm has submitted section 3.2.P.2 as per CTD guidance document.
11.	Justify why the qualitative composition of product is different from that of innovator's product.	The composition of the product for core is same as innovator's product. The coating material used in innovator is hypromellose while we are using ready made coat Shef Coat in which polymer used is also hypromellose.
12.	Description of manufacturing process and process controls in section 3.2.P.3.3.	Firm has submitted description of manufacturing process and process controls for the applied formulation.
13.	Controls of critical steps and intermediates in section 3.2.P.3.4.	Firm has submitted controls of critical steps and intermediates for the applied formulation.
14.	You have mentioned product description as Orange round biconvex film coated tablet in section 3.2.P.1 and white round biconvex tablet in section 3.2.P.5.1. Justification is required in this regard.	It was a typo mistake in section 3.2.P.5.1.
15.	Justify the dissolution acceptance criteria NLT 75% in 30 minutes since the dissolution criteria of innovator's product is NLT(Q) in 20 minutes.	Complete dissolution profile (CDP) shows that our product attains 90% dissolution in 15 minutes. This is similar to the innovator's product more than 90% dissolution is achieved at 30 minutes. Dissolution is achieved at 30 minutes. In FDA dissolution guidelines the sampling time for safimide tablet are upto 45 minutes. That's why we have set dissolution criteria NLT 75% in 30 mins although our products meet this criteria in 15 minutes as that of innovator's product.
16.	Submit validation report of analytical method of drug product in section 3.2.P.5.3 instead of submitting raw data and chromatograms.	Firm has submitted validation report of analytical method of drug product.

17.	Submit batch analysis report of three batches in section 3.2.P.5.4.	Firm has submitted batch analysis report of three stability batches.
18.	Submit information in section 3.2.P.5.5 and 3.2.P.5.6.	Firm has submitted information of impurity characterization and justification of specifications in section 3.2.P.5.5. and 3.2.P.5.6.
19.	Submit COA of reference standard actually used in the analysis of drug product in section 3.2.P.6.	Firm has submitted COA of reference standard.
20.	Submit complete details of container closure system of the drug product in section 3.2.P.7.	Firm has submitted details of container closure system.
21.	Submit details and information in section 3.2.P.8.1.	Firm has submitted summary and conclusion of stability studies batches in section 3.2.P.8.1
22.	Provide stability data submmary sheets of three batches of drug product as per the format provided in CTD guidance document in a proper sequence, since your submitted format does not contain information of API lot number and also not provided in any sequence.	Firm has submitted stability study data after proper arrangement in a sequence along with raw data sheets.
23.	The submitted chromatograms does not contain any details of the time of chromatogram acquisition and processing. Clarification is required in this regard.	There was a technical problem in software that's why time was not mentioned in chromatograms.
24.	• Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing. o Record of Digital data logger for temperature and humidity monitoring of both stability chambers.	Firm has submitted data as per 6 points checklist.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Firm will revise the dissolution specifications to NLT(Q) in 20 minutes and perform dissolution test as per revised acceptance criteria for commercial batches.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No previous PSI has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, dated 11-01-2019. The GMP certificate was granted based on inspection dated 08-01-2019.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 09-02-2018 specifying purchase of 25Kg Cefixime (micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, HPLC chromatograms, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Registration Board in its 320th meeting considered the case of Cefixime 100mg/5ml dry suspension manufactured by M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore wherein the Board decided to defer for following points for which the response is tabulated below:

Sr. No	Reasons for deferment	Response by the firm
1.	Scientific justification for having different specifications of the drug substance from that of API manufacturer as well as BP monograph	The firm has submitted revised specifications for drug substance as per B.P.
2.	Scientific justification how a revised method of February 2021 can represent the results of the stability studies which were initiated in March 2018.	The format of SOP For Cefixime was revised in February 2021. However, the testing method was same as that of stability studies initiated in 2018. We didn't change the testing method of API, only format was revised with new revision number and date.
3.	Scientific justification for performing verification studies of the analytical method of drug substance using a different analytical method from that specified in section 3.2.S.4.2.	The firm has stated that the verification studies were performed for analytical method as provided in the section 3.2.S.4.2. Furthermore, the calculation method is also as per B.P. The firm has submitted relevant chromatogram and raw data sheets.
4.	Submission of stability study data of three batches of cefixime trihydrate (micronized) from the API manufacturer as per zone IV-A conditions.	The firm has submitted stability study data of three batches (real time: 36 months : Accelerated : 06 months) according to the conditions of Zone IV-A. Batches: 00243/001/2018, 00243/100/2018, 00243/200/2018
5.	Submission of pharmaceutical equivalence and Comparative Dissolution Profile (CDP) against the innovator's product.	Pharmaceutical equivalence and CDP studies have been performed against Cefspan dry suspension mfg by M/s Barret Hodgson. The firm has submitted the relevant data including calculations of F2 values.
6.	Submission of preservative effectiveness studies.	The firm has performed preservative effectiveness studies and presented the data in relevant section (document no. SOP-MB/02-0238).
7.	Submission of applicable fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	The firm has submitted Rs. 7,500/- for revision of specifications vide challan number 947937869.
8.	Scientific justification how the results of at zero-month time point can be different for accelerated and real time conditions.	The results in raw data sheets are same for accelerated and real time stability at initial time point whereas in stability summary sheets the results are different, it was a typographical error. We are submitting revised stability summary sheets.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Registration Board noted the fact that since separate pharmacopoeial monograph is not available for different grades of Cefixime i.e., micronized and compacted, thereby the submitted stability studies of drug substance is acceptable hence Board approved the instant application. • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Manufacturer shall submit testing record of recently manufactured commercial batch as per USP monograph before issuance of Registration Letter.**

Evaluation by PEC:

Firm was issued letter of shortcomings with following points:

- The application for contract manufacturing from M/s EG Pharmaceuticals Islamabad is not submitted as per the guidance document approved by Registration Board. The submitted application is in variation to the guidance document in module 1 and various sections of module 3. The submitted COA of drug substance, batch analysis report of drug product and stability study data of drug product is not in line with the recommendations of Registration Board and as per the guidance document.
- The drug product testing has been carried out using specifications which are not in line with the specifications of cefixime capsule approved by Registration Board, furthermore the firm has carried out dissolution testing using UV method and the assay test during stability studies are also carried out using a single chromatogram of standard and sample.
- Therefore, you are advised to resubmit your application compiled in the light of the guidance document approved by Registration Board in which product development and stability studies has been conducted as per the monograph approved by Registration Board and notified vide No.F.14-1/2022-PEC dated 14-03-2022 along with submission of requisite fee so that further evaluation of your application could be carried out.

Response by the firm:

Firm has submitted that the same formulation of cefixime 400mg capsule manufactured by M/s EG Pharmaceuticals have been approved by Registration Board in its 296th meeting as a case of "*Request for Change in Registration Status of Product from M/s Swat Pharmaceuticals to M/s Wahabsons Pharma (Pvt) Ltd. Swat Through Contract Manufacturing at M/s EG Pharmaceuticals, Islamabad*".

Applicant firm	M/s Wahab sons pharma Pvt Ltd 4km Buner Road Barikot Swat
Manufacturer firm	EG Pharmaceuticals 13A Industrial Triangle, Kahuta road Islamabad
Brand Name	Soxime Capsules 400mg
Batch No. of drug product	961 (3500 Packs), 990 (4370 Packs), 933 (4000 Packs)

Case No.	1
Page number	2461-2463
Registration Board meeting	296th meeting of Registration Board.

Decision: Approved. Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Evaluation by PEC:

Firm has initially applied for contract manufacturing with Mediate Pharmaceuticals on Form 5 on 07-03-2019. Later the firm on 02-09-2021 submitted Form 5F along with change of contract manufacturer to M/s Cure Laboratories Islamabad without submission of fee.

- Submission of fee PKR 75,000/- for change of contract manufacturer from Mediate Pharmaceuticals to Cure Laboratories.
- The application for contract manufacturing from M/s Cure Laboratories Islamabad is not submitted as per the guidance document approved by Registration Board. The submitted application is in variation to the guidance document in module 1 and various sections of module 3. The submitted COA of drug substance, batch analysis report of drug product and stability study data of drug product is not in line with the recommendations of Registration Board and as per the guidance document.
- The drug product testing has been carried out using specifications which are not in line with the specifications of cefixime capsule approved by Registration Board, furthermore the firm has carried out assay and dissolution testing using UV method while their own specifications specify HPLC method for assay.
- Therefore, you are advised to resubmit your application compiled in the light of the guidance document approved by Registration Board in which product development and stability studies has been conducted as per the monograph approved by Registration Board and notified vide No.F.14-1/2022-PEC dated 14-03-2022 along with submission of requisite fee so that further evaluation of your application could be carried out.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Manufacturing Date	06-2021	06-2021	06-2021
Date of Initiation	14-06-2021	14-06-2021	14-06-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Evaluation by PEC:

- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine

testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."

- Provide verification studies of drug substance from drug product manufacturer.
- Provide COA of relevant batch of drug substance which is used in the manufacturing of batches of drug product.
- Justify why qualitative composition is different from the reference product, or else submit drug-excipient compatibility studies.
- Justify why the analytical procedures of the drug product are different from that specified in latest edition of USP monograph. Furthermore, submit detailed analytical procedure instead of attaching monograph of USP 29.
- Provide detailed analytical procedures and exact concentrations of sample solutions used to perform verification studies.
- Provide batch analysis report in section 3.2.P.5.4 instead of attaching BMR.
- Provide COA of reference standard actually used in the analysis of drug substance and drug product.
- Justify significant change in assay from 106.31% to 99.89% in accelerated stability of Batch TRL-28.
- Justify significant change in assay from 106.23% to 99.58% in accelerated stability of Batch TRL-29.
- Justify why you have performed stability studies using HPLC analysis performed at different column length, diameter and column temperature from that specified in USP monograph.
- Provide evidence of gradient HPLC system which is required as per USP monograph.
- Provide reference of previous approval of applications with stability study data of the firm (if any)
- Provide evidence of approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
- Provide copy of commercial invoice for evidence of purchase of the drug substance.
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

1063	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Aspin Pharma (Pvt) Ltd. Plot No. 10 & 25, Sector 20, K.I.A., Karachi**
	Name, address of Manufacturing site.	M/s Liven Pharmaceuticals (Pvt) Ltd, 49-Km, Lahore Multan Road, Lahore.

Manufacturing Date	05-2019	05-2019	05-2019
Date of Initiation	08-06-2019	10-06-2019	13-06-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 18101065) issued by Food and Drugs Control Administration Gujrat Estate India. The certificate is valid till 18-10-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice specifying purchase of 3Kg Ondansetron hydrochloride cleared dated 16-04-2019. The invoice is cleared by AD (I&E).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has performed stability studies using UV method.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit verification studies of the analytical method of drug substance in section 3.2.S.4.3.
- Provide stability studies of three batches of drug substance as per zone IV-A conditions.
- Your qualitative composition is different from that of the innovator product. Justification is required in this regard.
- Innovator product has used ondansetron hydrochloride dehydrate while you are using ondansetron hydrochloride. Justification is required in this regard.
- Provide details incuding batch number, exppiry date and manufacturer of the product against which pharmaceutical equivalence studies are conducted, since Zofran 4mg/2ml injection is not registered in Pakistan.
- Justify the UV method as alternate method in the analytical procedure for assay test of your product, since no such test is specified in USP monograph.

• Justify the analytical method validation studies performed on UV method while USP as well as your analytical procedure specifies HPLC test. • Justify the performance of assay method using UV method which is contrary to the USP method for your commercial batches. • Provide reference of previous approval of applications with stability study data of the firm (if any) / previous product specific inspection. • Submit Batch Manufacturing Record of three stability batches.

	Name and address of API manufacturer.	Fermenta Biotech Limited. Village Takoli P.O. Nagwain, Dist Mandi Himachal Pradesh India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 6 months. The real time stability data is conducted at 5°C ± 3°C for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Novel-D Injection 5mg/ml.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and validation studies of the drug product.

STABILITY STUDY DATA			
Manufacturer of API	Sichuan Yuxin Pharmaceutical Co., Ltd. No. 51, West Section of Changjiang Road, Shifang Economic Development Zone (South District) Shifang city, Sichuan Province China.		
API Lot No.	B-1-51-M191210		
Description of Pack (Container closure system)	Glass ampoule		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T022	T023	T024
Batch Size	500 ampoules	500 ampoules	500 ampoules
Manufacturing Date	02-2020	02-2020	02-2020
Date of Initiation	02-2020	02-2020	02-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- *The application for contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Islamabad is not submitted as per the guidance document approved by Registration Board. The submitted application is in variation to the guidance document in module 1 and various sections of module 3. The submitted COA of drug substance, batch analysis report of drug product and stability study data of drug product is not in line with the recommendations of Registration Board and as per the guidance document. Furthermore, it is also pertinent to mention that the drug product testing has been carried out using specifications which are not in line with the recommendations of the general monographs of the official pharmacopoeia and the analytical method of the assay test is based on UV method contrary to the method of analysis of the drug substance manufacturer and the method of analysis specified in section 3.2.P.5.2.*
- *Therefore, you are advised to resubmit your application compiled in the light of the guidance document approved by Registration Board and also justifying the specifications of the drug product so that further evaluation of your application could be carried out.*

In response, the firm has submitted stability study data of new batches manufactured using a different lot of API. The evaluation of newly submitted data is as under:

STABILITY STUDY DATA

Manufacturer of API	Sichuan Yuxin Pharmaceutical Co., Ltd. No. 51, West Section of Changjiang Road, Shifang Economic Development Zone (South District) Shifang city, Sichuan Province China.		
API Lot No.	B-1-51-M180903		
Description of Pack (Container closure system)	Glass ampoule		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	A-644	A-645	A-646
Batch Size	30,000 packs	30,000 packs	30,000 packs
Manufacturing Date	05-2019	05-2019	05-2019
Date of Initiation	27-05-2019	27-05-2019	27-05-2019
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SC20160032) issued by CFDA China. The certificate **was valid till 17-11-2021**.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice for import of Vitamin D3 API having lot number B-1-51-M180903. The invoice is cleared by AD (I&E) dated 29-10-2018.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted copy of clearance certificate specifying import of 2.5Kg API dated 29-10-2018.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 75,000/- fee for revision in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

1068.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Albert Pharmaceuticals (Pvt) Ltd. Plot No. 127, Sundar Industrial Estate, Raiwind Road, Lahore.**

	Name, address of Manufacturing site.	M/s Himedic Pharmaceuticals (Pvt) Ltd. 19 Km Link Multan Road, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted notarized copy of contract manufacturing agreement with applicant firm dated 04-05-2021.
	GMP status of the firm	
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License to M/s Himedic Pharmaceuticals dated 05-08-2015. The letter specifies dry powder for injection (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23879: 31-08-2021
	Details of fee submitted	PKR 75,000/-: 30-06-2021
	The proposed proprietary name / brand name	**ALZON Powder for Injection 250mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……250mg
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Aczon injection by Vision Pharma
	Name and address of API manufacturer.	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District Zhuhai Guangdong P.R China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical

		procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Rocephin 250mg Injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District Zhuhai Guangdong P.R China.		
API Lot No.			
Description of Pack (Container closure system)

Batch No.			
Batch Size			
Manufacturing Date			
Date of Initiation			
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- Specify whther the application is for Intravenous or intra muscular use.
- Provide valid GMP certificate / inspection report of the contract manufacturer as well as applicant firm.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
- Provide COA of relevant batch of drug substace in section 3.2.S.4.4 used in the manufacturing of three batches of drug product for which stability data is submitted.
- Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.
- Submit stability study data of drug substance conducted as per zone IV-A conditions or else submit the following as per the decision of 290th meeting of Registration Board:
    - Record of data logger for the storage conditions throughout the transportation of drug substance.
    - Real term stability studies data of the product for atleast 1 year along with degradation studies in the finished pharmaceutical product.
- Justify your composition of drug product which specifies that the product contains ceftriaxone sodium 250mg while as per your label claim and innovator's product, the product shall contain 250mg of ceftriaxone as ceftriaxone sodium salt.
- The innovator product Rocephin Injection 250mg have specified that 2.4ml WFI is required to reconstitute the injection for intravenous injection, while you are using 5ml WFI. Justify why you are not using the same volume of diluent as specified by the innovator product.
- Justify the use of 5% overage in your commercially manufactured batches as well as during product development studies.
- Submit data of pharmaceutical equivalence in section 3.2.P.2.2.1. as per the decision of 293rd meeting of Registration Board, which states that "Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product should be submitted and discussed."
- You have specified sample solution 1 method in your assay test while is acceptance criteria is for sample solution 2 method. Jutify this practice along with revision of specifications as per monograph and submission of fee.
- USP monograph specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria for assay test, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.
- Justify why the analytical procedure used in validation studies is different from that specified in your section 3.2.S.4.2.
- Validation studies are performed in 2021 while the stability study data is provided for batches of drug product which were manufactured before 2021.
- Justify how a single validation studies are used for all strengths of ceftriaxone injection since USP monograph specifies different analytical method for each strength.

- Provide batch release certificate of 3 batches of drug product in section 3.2.P.5.4 for which complete stability study data is provided in section 3.2.P.8.3. Since you have submitted batch release of different batches.
- Justify how you are using working standard from pharmagen while your drug substance source is Zhuhai United Laboratories.
- Provide details in section 3.2.P.8.1 as per CTD guidance document since this section is not submitted.
- Provide details in section 3.2.P.8.2 as per CTD guidance document since this section is not submitted.
- Provide summary sheets for stability studies data of 3 batches of drug product in section 3.2.P.8.3 as per the format approved by the Board and presented in CTD guidance document since your reports are hand written and not clearly visible and also does not provide information regarding particular lot number of the drug substance used to manufacture this particular batch of drug product.
- Provide documents for the procurement of relevant lot(s) of API used in the manufacturing of 3 batches of drug product for which stability studies data is submitted in section 3.2.P.8.3
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- Specify whther the application is for Intravenous or intra muscular use.
- Provide valid GMP certificate / inspection report of the contract manufacturer as well as applicant firm.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
- Provide COA of relevant batch of drug substace in section 3.2.S.4.4 used in the manufacturing of three batches of drug product for which stability data is submitted.
- Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.
- Submit stability study data of drug substance conducted as per zone IV-A conditions or else submit the following as per the decision of 290th meeting of Registration Board:
    - Record of data logger for the storage conditions throughout the transportation of drug substance.
    - Real term stability studies data of the product for atleast 1 year along with degradation studies in the finished pharmaceutical product.
- Justify your composition of drug product which specifies that the product contains ceftriaxone sodium 1000mg while as per your label claim and innovator's product, the product shall contain 1000mg of ceftriaxone as ceftriaxone sodium salt.
- Jutify the use of 10ml water for injection as a diluent for applied prouct in the line of innovator's drug product.
- Justify the use of 5% overage in your commercially manufactured batches as well as during product development studies.
- Submit data of pharmaceutical equivalence in section 3.2.P.2.2.1. as per the decision of 293rd meeting of Registration Board, which states that "Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product should be submitted and discussed."
- You have specified sample solution 1 method in your assay test while is acceptance criteria is for sample solution 2 method. Jutify this practice along with revision of specifications as per monograph and submission of fee.
- USP monograph specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria for assay test, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.
- Justify why the analytical procedure used in validation studies is different from that specified in your section 3.2.S.4.2.
- Validation studies are performed in 2021 while the stability study data is provided for batches of drug product which were manufactured before 2021.
- Justify how a single validation studies are used for all strengths of ceftriaxone injection since USP monograph specifies different analytical method for each strength.

- Provide batch release certificate of 3 batches of drug product in section 3.2.P.5.4 for which complete stability study data is provided in section 3.2.P.8.3. Since you have submitted batch release of different batches.
- Justify how you are using working standard from pharmagen while your drug substance source is Zhuhai United Laboratories.
- Provide details in section 3.2.P.8.1 as per CTD guidance document since this section is not submitted.
- Provide details in section 3.2.P.8.2 as per CTD guidance document since this section is not submitted.
- Provide summary sheets for stability studies data of 3 batches of drug product in section 3.2.P.8.3 as per the format approved by the Board and presented in CTD guidance document since your reports are hand written and not clearly visible and also does not provide information regarding particular lot number of the drug substance used to manufacture this particular batch of drug product.
- Provide documents for the procurement of relevant lot(s) of API used in the manufacturing of 3 batches of drug product for which stability studies data is submitted in section 3.2.P.8.3
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

1071.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A, Sunder Industrial Estate, Lahore.**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 29-03-2021.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals dated 19-04-2019 based on the inspection dated 01-04-2019. The certificate was valid till 01-04-2022. The GMP certificate specifies dry powder injection (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License to M/s Cunningham Pharmaceuticals dated 13-06-2016. The letter specifies dry powder injection (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23854: 31-08-2021
	Details of fee submitted	PKR 75,000/-: 08-06-2021

	The proposed proprietary name / brand name	**GENXONE Dry Powder Injection 250mg (IV)**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……250mg
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Aczon injection by Vision Pharma
	Name and address of API manufacturer.	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District Zhuhai Guangdong P.R China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Rocephin 250mg Injection.

	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District Zhuhai Guangdong P.R China.		
API Lot No.	3051805046

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	180054	180075	180087
Batch Size	16666 vials	16666 vials	16666 vials
Manufacturing Date	09-2018	11-2018	12-2018
Date of Initiation	09-2018	11-2018	12-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by CFDA China. The certificate is valid till 05-12-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 03-07-2018 specifying import of 80Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Provide valid GMP certificate / inspection report of the contract manufacturer since the submitted GMP certificate has been expired.	The firm has submitted last inspection report dated 01/04/2019. The firm has maintained conformance to GMP compliance in manufacturing and QC operations.
2.	Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.

3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of drug substance by both drug product and drug substance manufacturer in the relevant sections as per guidance document for Form 5F.
4.	Provide details of the analytical method and concentrations in terms of mg/ml used to test the parameters in verification / validation studies of the drug substance. Further justify significant difference in peak areas value at same concentration during different tests like precision and accuracy/linearity.	The firm has submitted analytical method verification studies (including specificity, precision and accuracy etc) with the detail of concentrations of different dilutions used to test the parameters of required studies. Furthermore, different analyst were involve in the said testing therefore the results are not exactly the same.
5.	Justify why the test of specificity is not performed during the verification / validation studies of the drug substance.	The firm has submitted analytical method verification report mentioning the results of the test for specificity parameter for analytical method verification studies for dug substance performed by drug product manufacturer.
6.	The commercial invoice specifying ceftriaxone sodium sterile (USP) having batch number 3051805046 was cleared by AD (I&E) DRAP Lahore on 03-07-2018, while as per the certificate of analysis of raw material from Cunningham Pharmaceuticals, the material of same batch number was received on 05-01-2018 and was tested on 13-01-2018. Justification is required in this regard.	*It was a typographical error, the drug substance was received on 05/07/2018 and tested on 13/07/2018.*
7.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Certificate of analysis of reference standard actually used in the development of the applied product is provided.
8.	Justify how 300mg ceftriaxone sodium sterile powder is equivalent to 250mg of ceftriaxone base.	The firm has submitted revised calculation for potency adjustment considering the assay value of drug substance and stated that the calculations for potency adjustment will be made in future according to the assay value of the drug substance for commercial batches.
9.	The innovator product Rocephin Injection 250mg have specified that 2.4ml WFI is required to reconstitute the injection for intravenous injection, while you are using 5ml WFI. Justify why you are not using the same volume of diluent as specified by the innovator product.	The firm has stated that the volume of diluent used was exactly 2.4mL as recommended by the innovator's product. In the submitted data the volume used is 5mL which is a typographical error.
10.	You have specified that pharmaceutical equivalence studies was performed against Rocephin 250mg injection of Martin Dow Limited, while Rocephin 250mg Injection is not registered in Pakistan. Justification is required in this regard.	The firm has submitted pharmaceutical equivalence data agaisnt Oxidil 250mh injection mfg by Sami Pharmaceuticals by performing all the quality tests. Pharamcetuical equivalence against the other strengths of Ceftriaxone was performed against Rocephin and the data of ther strength was placed mistakenly in the dossier.
11.	Provide details of sample solution 2 preparation i.e. exact volume of water required for initial constitution of the ceftriaxone for injection.	Detail of preparation of sample solution II is provided in the relevant section which is in-lined with USP for the applied product.
12.	Your analytical method for drug product specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria as per USP monograph, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Specifications of finished product has been revised with addition of acceptance criteria for assay as per USP monograph. Revised specifications are submitted which are in-lined with USP. The firm has stated that they have performed one test at the stage of drug substance analysis and the other test is performed at the drug product stage. "*as we are dealing with the toll manufacturing in order for better understanding on COA we opted the 90-115% assay specifications. However, we have revised the SOP along with the specifications and would update and align all the practices and documents".*
13.	Certificate of analysis of finished product for batch number 180054 and batch number 180075 have same results for all the tests. Justification is required in this regard.	*It was a typographical error. We are submitted the COA for 180054 and 180075 having actual values for all the tests.*

14.	Batch number 180075 was manufactured in 11-2018 and its analysis was performed on 31-11-2018 while the batch was released on 19-09-2018. Justification is required in this regard.	*Due to typographical error, the date of release was mentioned as 19/09/2018. However, we are submitted the complete data for your convenience related to testing and release of the batch.*
15.	Provide date of initiation and date of testing at each time point for every batch during stability studies.	Submitted.
16.	Justify why the test for water contents, constituted solution etc is not performed during stability studies since these tests are very critical and are required to make assessment of the stability profile and shelf life.	*We were not performing these tests in our stability testing. Whereas these tests were part of our routine testing.* The firm has performed water content determination test and submitted that relevant data.
17.	Justify how the results of assay and pH of each batch is different at initial time point for accelerated and real time stability study. The results of assay test at initial time point for each batch is different in stability summary sheet and raw data sheets. Justification is required in this regard.	*Results of assay and pH at initial time point are not different. This was a typographical error. We are submitting revised summary sheets with correct value of assay and pH.*
18.	Provide 6 months stability study data of three batches along with HPLC chromatograms and raw data sheets in a proper sequence and with separators as per the guidelines of registration Board for further evaluation.	The firm has submitted the stability study data as per the guidance document available on the official website of DRAP.
19.	Stability study data of initial time point is not submitted for any batch along with stability studies.	The firm has submitted the required data alongwith raw data sheets and chromatograms.
20.	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing. o Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board. • Lenzeu 30mg and 60mg Capsule (Dexlansoprazol) approved in 297th meeting. & Tazipera 45g injection approved in 316th meeting. • Copy of GMP certificate No. GD20180909 valid till 05/12/2023, M/s Zhuhai United Laboratories Co., Ltd., issued by CFDA. • Firm has submitted copy of commercial invoice cleared dated 28-05-2020 specifying import of 100Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP. • Raw data sheet sand chromatograms have been submitted by the firm. • The firm has submitted record of digital data logger for accelerated and real time stability studies in the relevant section. • Compliance record of HPLC & audit trails are submitted.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer shall submit testing record of recently manufactured commercial batch as per USP monograph before issuance of Registration Letter.**

1072.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A, Sunder Industrial Estate, Lahore.**

	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 29-03-2021.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals dated 19-04-2019 based on the inspection dated 01-04-2019. The certificate was valid till 01-04-2022. The GMP certificate specifies dry powder injection (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License to M/s Cunningham Pharmaceuticals dated 13-06-2016. The letter specifies dry powder injection (cephalosporin) section.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by CFDA China. The certificate is valid till 05-12-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 03-07-2018 specifying import of 80Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Provide valid GMP certificate / inspection report of the contract manufacturer since the submitted GMP certificate has been expired.	The firm has submitted last inspection report dated 01/04/2019. The firm has maintained conformance to GMP compliance in manufacturing and QC operations.
2.	Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.
3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of drug substance by both drug product and drug substance manufacturer in the relevant sections as per guidance document for Form 5F.
4.	Provide details of the analytical method and concentrations in terms of mg/ml used to test the parameters in verification / validation studies of the drug substance. Further justify significant difference in peak areas value at same concentration during different tests like precision and accuracy/linearity.	The firm has submitted analytical method verification studies (including specificity, precision and accuracy etc) with the detail of concentrations of different dilutions used to test the parameters of required studies.
5.	Justify why the test of specificity is not performed during the verification / validation studies of the drug substance.	The firm has submitted analytical method verification report mentioning the results of the test for specificity parameter for analytical method verification studies for dug substance performed by drug product manufacturer.
6.	The commercial invoice specifying ceftriaxone sodium sterile (USP) having batch number 3051805046 was cleared by AD (I&E) DRAP Lahore on 03-07-2018, while as per the certificate of analysis of raw material from Cunningham Pharmaceuticals, the material of same batch number was received on 05-01-2018 and was tested on 13-01-2018. Justification is required in this regard.	The firm has stated that separate batches of drug substance were used or manufacturing of different strengths. Firm has submitted copy of commercial invoice cleared dated 19/11/2021 vide dy.no. 17452/2021-DRAP. The invoice is cleared by AD (I&E) DRAP.
7.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Certificate of analysis of reference standard actually used in the development of the applied product is provided.

8.	Justify how same results of pharmaceutical equivalence are produced for ceftriaxone 250mg IM and IV injection.	The firm has submitted pharmaceutical equivalence against Oxidil 250mg injection mfg by M/s Sami Pharmaceuticals by performing all the quality tests.
9.	Justify how 300mg ceftriaxone sodium sterile powder is equivalent to 250mg of ceftriaxone base.	
10.	Justify how you have manufactured batch number 200076 for axitrim 250mg IM as well as IV while both products have seprate registration numbers and have different analytical method for analysis.	The firm has submitted complete batch manufacturing record for 250mg IM injection for 3 batches along with the complete stability studies with the detail analytical method and other relevant documents.
11.	You have specified that pharmaceutical equivalence studies was performed against Rocephin 250mg injection of Martin Dow Limited, while Rocephin 250mg Injection is not registered in Pakistan. Justification is required in this regard.	The firm has submitted Pharmaceutical equivalence data against Oxidil 250mg Injecciton (Batch number : 014H mfg by M/s Sami Pharma) by performing quality tests.
12.	Justify how compatibility studies of IV injection can be used for ceftriaxone IM injection as well	The firm has submitted compatibility studies for 250mg IM injection with the recommended diluent. The data is presented in the relevant section (0H, 4H, 8H & 16H).
13.	Provide details of sample solution 2 preparation i.e. exact volume of water required for initial constitution of the ceftriaxone for injection.	Detail of preparation of sample solution II is provided in the relevant section which is in-lined with USP for 250mg IM injection.
14.	Your analytical method for drug product specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria as per USP monograph, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Specifications of finished product has been revised with addition of acceptance criteria for assay as per USP monograph. Revised specifications are submitted which are in-lined with USP. The firm has stated that they have performed one test at the stage of drug substance analysis and the other test is performed at the drug product stage. "*as we are dealing with the toll manufacturing in order for better understanding on COA we opted the 90-115% assay specifications. However, we have revised the SOP along with the specifications and would update and align all the practices and documents".*
15.	Justify how you are releasing commercial batches of ceftriaxone 250mg IM and IV as a single batch by producing two COA having exactly same results for each test.	Data of 250mg IM injection has been submitted with separate COAs. Certificate of Analysis of finished products are attached in executed BMRS of three batches enclosed in module 3 section 3.2.R.
16.	Justify how Batch number 180054, 180075 and 180087 submitted for IV injection are also used for IM injection.	The firm has submitted stability summary sheets for 250mg IM injection along with the relevant chromatograms and raw data sheets. The firm has stated that the data of 250mg IV injection was placed in 250mgIV dossier mistakenly.
17.	Justify how single BMR can be used for a single batch of two separately registered products like ceftriaxone 250mg IM and 250mg IV Injection.	Separate BMRs for 250mg ceftriaxone IM injection is submitted in section 3.2.R.1.2 along with the blank template of BM. The firm has submitted that the BMR were placed in 250mg IM injection mistakenly in the dossier on 250mg IV injection.
18.	Submit product development and stability study data of 3 batches of ceftriaxone 250mg IM injection for further evaluation.	The firm has submitted product development and stability study data of 3 batches of Ceftriaxone 250mg IM Injection along with the raw data sheets chromatograms, COAs etc.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

• **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.** • **Manufacturer shall submit testing record of recently manufactured commercial batch as per USP monograph before issuance of Registration Letter.**		
1073	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A, Sunder Industrial Estate, Lahore.**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 29-03-2021.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals dated 19-04-2019 based on the inspection dated 01-04-2019. The certificate was valid till 01-04-2022. The GMP certificate specifies dry powder injection (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License to M/s Cunningham Pharmaceuticals dated 13-06-2016. The letter specifies dry powder injection (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23857: 31-08-2021
	Details of fee submitted	PKR 75,000/-: 08-06-2021
	The proposed proprietary name / brand name	**GENXONE Dry Powder Injection 500mg (IV)**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……500mg
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Aczon injection by Vision Pharma
	Name and address of API manufacturer.	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District Zhuhai Guangdong P.R China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Rocephin 500mg Injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District Zhuhai Guangdong P.R China.		
API Lot No.	3051805046 3051805005		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	180004	180019	180040
Batch Size	16666 vials	16666 vials	16666 vials

Manufacturing Date	01-2018	05-2018	07-2018
Date of Initiation	01-2018	05-2018	07-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by CFDA China. The certificate is valid till 05-12-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 03-07-2018 specifying import of 80Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Provide valid GMP certificate / inspection report of the contract manufacturer since the submitted GMP certificate has been expired.	The firm has submitted last inspection report dated 01/04/2019. The firm has maintained conformance to GMP compliance in manufacturing and QC operations.
2.	Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.
3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of drug substance by both drug product and drug substance manufacturer in the relevant sections as per guidance document for Form 5F.
4.	Provide details of the analytical method and concentrations in terms of mg/ml used to test the parameters in verification / validation studies of the drug substance. Further justify significant difference in peak areas value at same concentration during different tests like precision and accuracy/linearity.	The firm has submitted analytical method verification studies (including specificity, precision and accuracy etc) with the detail of concentrations of different dilutions used to test the parameters of required studies.
5.	The commercial invoice specifying ceftriaxone sodium sterile (USP) having batch number 3051805046 was cleared by AD (I&E) DRAP Lahore on 03-07-2018, while as per the certificate of analysis of raw material from Cunningham Pharmaceuticals, the material of same batch number was received on 05-01-2018 and was tested on 13-01-2018. Justification is required in this regard	*It was a typographical error. COA after correction is attached in 3.2.S.4.4.* *Receiving date: 07/07/2018* *Test date: 13/07/2018*
6.	Provide details of diluent which is used to perform compatibility studies of drug product.	Zee-inject (Water for injection (WFI) is used as a diluent for reconstitution of drug product. The reconstituted product is yellowish clear solution. COA of diluent is attached in Module 3 section

		3.2.P.1(c)Description of accompanying reconstitution diluent.
7.	Justify why the test of specificity is not performed during the verification / validation studies of the drug substance.	The firm has submitted analytical method verification report mentioning the results of the test for specificity parameter for analytical method verification studies for dug substance performed by drug product manufacturer.
8.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Certificate of analysis of reference standard actually used in the development of the applied product is provided.
9.	Provide details of sample solution 2 preparation i.e. exact volume of water required for initial constitution of the ceftriaxone for injection.	Detail of preparation of sample solution II is provided in the relevant section which is in-lined with USP for the applied product.
10.	Your analytical method for drug product specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria as per USP monograph, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Specifications of finished product has been revised with addition of acceptance criteria for assay as per USP monograph. Revised specifications are submitted which are in-lined with USP. The firm has stated that they have performed one test at the stage of drug substance analysis and the other test is performed at the drug product stage. "*as we are dealing with the toll manufacturing in order for better understanding on COA we opted the 90-115% assay specifications. However, we have revised the SOP along with the specifications and would update and align all the practices and documents".*
11.	Batch 180004 was manufactured on 01/2018 while stability was initiated on 12-05-2018. Justification is required in this regard. Batch 180019 was manufactured in May 2018 using drug substance lot number 3051805046 which was imported and cleared in July 2018. Justification is required in this regard. Batch 180004 was manufactured in January 2018 using drug substance lot number 3051805005 which was imported and cleared in July 2018. Justification is required in this regard.	*Batch # 180004 was released on 25-01-2018.But unfortunately; due to unavailability of packaging material (Unit cartons) the packing of this batch had faced some delay. That's why stability was initiated in 12-05-2018.* *Invoice for Batch # 180019 and Batch # 180004 was missing during file compilation. Import invoice is attached in Module 3 section 3.2.P.8.3. COA of drug substance is attached in Module 3 section 3.2.S.4.4.* *Invoice for Batch # 180019 and Batch # 180004 was missing during file compilation. Import invoice is attached in Module 3 section 3.2.P.8.3. COA of drug substance is attached in Module 3 section 3.2.S.4.4.*
12.	Justify why the test for water contents, constituted solution etc is not performed during stability studies since these tests are very critical and are required to make assessment of the stability profile and shelf life.	*We were not performing these tests in our stability testing. Whereas these tests were part of our routine testing.* The firm has performed water content determination test and submitted that relevant data.
13.	Justify how the results of assay and pH of each batch is different at initial time point for accelerated and real time stability study. The results of assay test at initial time point for each batch is different in stability summary sheet and raw data sheets. Justification is required in this regard.	*Results of assay and pH at initial time point are not different. This was a typographical error. We are submitting revised summary sheets with correct value of assay and pH.*
14.	Provide 6 months stability study data of three batches along with HPLC chromatograms and raw data sheets in a proper sequence and with separators as per the guidelines of registration Board for further evaluation.	The firm has submitted 6 months stability data (including accelerated and real time) of three batches along with the relevant chromatograms, raw data sheets etc as per the guidelines of Registration Board.
15.	Stability study data of initial time point is not submitted for any batch along with stability studies.	The firm has submitted the required data alongwith raw data sheets and chromatograms.
16.	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board. • Lenzeu 30mg and 60mg Capsule (Dexlansoprazol) approved in 297th meeting. & Tazipera 45g injection approved in 316th meeting. • Copy of GMP certificate No. GD20180909 valid till 05/12/2023, M/s Zhuhai United Laboratories Co., Ltd., issued by CFDA.

	○ Documents for the procurement of API with approval from DRAP (in case of import). ○ Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. ○ Compliance Record of HPLC software 21CFR & audit trail reports on product testing. ○ Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• Firm has submitted copy of commercial invoice cleared dated 28-05-2020 specifying import of 100Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP. • Raw data sheet sand chromatograms have been submitted by the firm. • The firm has submitted record of digital data logger for accelerated and real time stability studies in the relevant section. • Compliance record of HPLC & audit trails are submitted.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer shall submit testing record of recently manufactured commercial batch as per USP monograph before issuance of Registration Letter.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate (No. SX20180229) issued by CFDA China is submitted by the firm. The certificate is valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 06-10-2017 specifying import of 50Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Provide valid GMP certificate / inspection report of the contract manufacturer since the submitted GMP certificate has been expired.	The firm has submitted last inspection report dated 01/04/2019. The firm has maintained conformance to GMP compliance in manufacturing and QC operations.
2.	Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.

3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of drug substance by both drug product and drug substance manufacturer in the relevant sections as per guidance document for Form 5F.
4.	Provide details of the analytical method and concentrations in terms of mg/ml used to test the parameters in verification / validation studies of the drug substance. Further justify significant difference in peak areas value at same concentration during different tests like precision and accuracy/linearity.	The firm has submitted analytical method verification studies (including specificity, precision and accuracy etc) with the detail of concentrations of different dilutions used to test the parameters of required studies.
5.	Justify use of drug substance from Sinopharm Weiqida Pharmaceutical Co. Ltd for the applied strength, since you have claimed drug substance source from Zhuhai United Laboratories Co. Ltd in other strengths of the same product.	For manufacturing of already registered product Axitrim injeciton 1g IV of M/s Cunningham, the drug substance was purchase from M/s Sinopharm Weiqida Pharmaceuticals. Further demand for active material was placed but due to unavailability of active material from sinopharm we decided to change the manufacturer to Zhuhai United and developed our products using the material from Zhuhai united.
6.	Justify why the test of specificity is not performed during the verification / validation studies of the drug substance.	The firm has submitted analytical method verification report mentioning the results of the test for specificity parameter for analytical method verification studies for dug substance performed by drug product manufacturer.
7.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Certificate of analysis of reference standard actually used in the development of the applied product is provided.
8.	Provide details of sample solution 2 preparation i.e. exact volume of water required for initial constitution of the ceftriaxone for injection.	Detail of preparation of sample solution II is provided in the relevant section which is in-lined with USP for the applied product.
9.	Your analytical method for drug product specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria as per USP monograph, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Specifications of finished product has been revised with addition of acceptance criteria for assay as per USP monograph. Revised specifications are submitted which are in-lined with USP. The firm has stated that they have performed one test at the stage of drug substance analysis and the other test is performed at the drug product stage. "*as we are dealing with the toll manufacturing in order for better understanding on COA we opted the 90-115% assay specifications. However, we have revised the SOP along with the specifications and would update and align all the practices and documents".*
10.	Provide date of initiation and date of testing at each time point for every batch during stability studies.	Batch No.: 180003 initiated on 12/04/2018 Batch No.: 180017 initiated on 28/06/2018 Batch No.: 180018 initiated on 07/06/2018
11.	Justify why the test for water contents, constituted solution etc is not performed during stability studies since these tests are very critical and are required to make assessment of the stability profile and shelf life.	*We were not performing these tests in our stability testing. Whereas these tests were part of our routine testing.* The firm has performed water content determination test and submitted that relevant data.
12.	Justify how the results of assay and pH of each batch is different at initial time point for accelerated and real time stability study. The results of assay test at initial time point for each batch is different in stability summary sheet and raw data sheets. Justification is required in this regard.	*Results of assay and pH at initial time point are not different. This was a typographical error. We are submitting revised summary sheets with correct value of assay and pH.*

13.	Provide 6 months stability study data of three batches along with HPLC chromatograms and raw data sheets in a proper sequence and with separators as per the guidelines of registration Board for further evaluation.	The firm has submitted 6 months stability data (including accelerated and real time) of three batches along with the relevant chromatograms, raw data sheets etc as per the guidelines of Registration Board.
14.	Stability study data of initial time point is not submitted for any batch along with stability studies.	The firm has submitted the required data alongwith raw data sheets and chromatograms.
15.	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing. o Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board. • Lenzeu 30mg and 60mg Capsule (Dexlansoprazol) approved in 297th meeting. & Tazipera 45g injection approved in 316th meeting. • Copy of GMP certificate No. GD20180909 valid till 05/12/2023, M/s Zhuhai United Laboratories Co., Ltd., issued by CFDA. • Firm has submitted copy of commercial invoice cleared dated 28-05-2020 specifying import of 100Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP. • Raw data sheet sand chromatograms have been submitted by the firm. • The firm has submitted record of digital data logger for accelerated and real time stability studies in the relevant section. • Compliance record of HPLC & audit trails are submitted.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer shall submit testing record of recently manufactured commercial batch as per USP monograph before issuance of Registration Letter.**

1075	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A, Sunder Industrial Estate, Lahore.**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 29-03-2021.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals dated 19-04-2019

		based on the inspection dated 01-04-2019. The certificate was valid till 01-04-2022. The GMP certificate specifies dry powder injection (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License to M/s Cunningham Pharmaceuticals dated 13-06-2016. The letter specifies dry powder injection (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 23851: 31-08-2021
	Details of fee submitted	PKR 75,000/-: 08-06-2021
	The proposed proprietary name / brand name	**GENXONE Dry Powder Injection 1g (IM)**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Ceftriaxone (as sodium)……1g
	Pharmaceutical form of applied drug	Sterile white to off white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone sodium Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Aczon injection by Vision Pharma
	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real

		time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Rocephin 1g Injection.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China		
API Lot No.	3051805046 3051805005		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	180003	180017	180018
Batch Size	8333 vials	8333 vials	8333 vials
Manufacturing Date	01-2018	05-2018	05-2018
Date of Initiation	01-2018	05-2018	05-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate (No. SX20180229) issued by CFDA China is submitted by the firm. The certificate is valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 06-10-2017 specifying import of 50Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Provide valid GMP certificate / inspection report of the contract manufacturer since the submitted GMP certificate has been expired.	The firm has submitted last inspection report dated 01/04/2019. The firm has maintained conformance to GMP compliance in manufacturing and QC operations.
2.	Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.
3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of drug substance by both drug product and drug substance manufacturer in the relevant sections as per guidance document for Form 5F.
4.	Provide details of the analytical method and concentrations in terms of mg/ml used to test the parameters in verification / validation studies of the drug substance. Further justify significant difference in peak areas value at same concentration during different tests like precision and accuracy/linearity.	The firm has submitted analytical method verification studies (including specificity, precision and accuracy etc) with the detail of concentrations of different dilutions used to test the parameters of required studies.
5.	Justify use of drug substance from Sinopharm Weiqida Pharmaceutical Co. Ltd for the applied strength, since you have claimed drug substance source from Zhuhai United Laboratories Co. Ltd in other strengths of the same product.	For manufacturing of already registered product Axitrim injeciton 1g IV of M/s Cunningham, the drug substance was purchase from M/s Sinopharm Weiqida Pharmaceuticals. Further demand for active material was placed but due to unavailability of active material from sinopharm we decided to change the manufacturer to Zhuhai United and developed our products using the material from Zhuhai united.
6.	Justify why the test of specificity is not performed during the verification / validation studies of the drug substance.	The firm has submitted analytical method verification report mentioning the results of the test for specificity parameter for analytical method verification studies for dug substance performed by drug product manufacturer.
7.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	The firm ha ssubmitted COA of the relevant batch of drug substance which was used in product development from drug product and drug substance manfuactruer.
8.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Certificate of analysis of reference standard actually used in the development of the applied product is provided.
9.	You have specified that diluent for this product is 2ml lignocaine injection while the innovator's product recommend use of 2.1 or 3.6ml of diluent.	The firm has stated that the volume of diluent that is lignocaine was exactly the same as used by the innovator.
10.	Justify how compatibility studies of IV injection can be used for ceftriaxone IM injection as well	The firm has submitted compatibility studies of the product with the recommended diluent that is Lignocaine for IM injection.
11.	Justify how single BMR can be used for a single batch of two separately registered products like ceftriaxone 1g IM and 1g IV Injection.	The firm has submitted complete batch manufacturing record for the applied formulation and has stated that the BMD of IV injection was placed in the dossier, mistakenly.

12.	Submit product development and stability study data of 3 batches of ceftriaxone 1g IM injection for further evaluation.	The firm has submitted product development along with the stability study data including accelerated and real time stability studies of 3 batches along with the relevant chromatograms and raw data sheets.
13.	Provide details of sample solution 2 preparation i.e. exact volume of water required for initial constitution of the ceftriaxone for injection.	Detail of preparation of sample solution II is provided in the relevant section which is in-lined with USP for the applied product.
14.	Your analytical method for drug product specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria as per USP monograph, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Specifications of finished product has been revised with addition of acceptance criteria for assay as per USP monograph. Revised specifications are submitted which are in-lined with USP. The firm has stated that they have performed one test at the stage of drug substance analysis and the other test is performed at the drug product stage. "*as we are dealing with the toll manufacturing in order for better understanding on COA we opted the 90-115% assay specifications. However, we have revised the SOP along with the specifications and would update and align all the practices and documents".*
15.	Justify why the test for water contents, constituted solution etc is not performed during stability studies since these tests are very critical and are required to make assessment of the stability profile and shelf life.	*We were not performing these tests in our stability testing. Whereas these tests were part of our routine testing.* The firm has performed water content determination test and submitted that relevant data.
16.	Provide 6 months stability study data of three batches along with HPLC chromatograms and raw data sheets in a proper sequence and with separators as per the guidelines of registration Board for further evaluation.	The firm has submitted 6 months stability data (including accelerated and real time) of three batches along with the relevant chromatograms, raw data sheets etc as per the guidelines of Registration Board.
17.	Stability study data of initial time point is not submitted for any batch along with stability studies.	The firm has submitted the required data alongwith raw data sheets and chromatograms.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer shall submit testing record of recently manufactured commercial batch as per USP monograph before issuance of Registration Letter.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by CFDA China. The certificate is valid till 05-12-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 28-05-2020 specifying import of 100Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Provide valid GMP certificate / inspection report of the contract manufacturer since the submitted GMP certificate has been expired.	The firm has submitted last inspection report dated 01/04/2019. The firm has maintained conformance to GMP compliance in manufacturing and QC operations.
2.	Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.
3.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of drug substance by both drug product and drug substance manufacturer in the relevant sections as per guidance document for Form 5F.
4.	Provide details of the analytical method and concentrations in terms of mg/ml used to test the parameters in verification / validation studies of the drug substance. Further justify significant difference in peak areas value at same concentration during different tests like precision and accuracy/linearity.	The firm has submitted analytical method verification studies (including specificity, precision and accuracy etc) with the detail of concentrations of different dilutions used to test the parameters of required studies.
5.	Justify why the test of specificity is not performed during the verification / validation studies of the drug substance.	The firm has submitted analytical method verification report mentioning the results of the test for specificity parameter for analytical method verification studies for dug substance performed by drug product manufacturer.
6.	Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Certificate of analysis of reference standard actually used in the development of the applied product is provided.
7.	You have mentioned that 10ml water for injection is used as diluent for the applied product while the innovator's product has recommended use of much high volume of diluent. Justification is required in this regard.	The recommended volume for diluent (Water for Injection) for 2g injection is 20mL as mentioned in product monograph of Rocephin (IV)2g. Compatibility studies of diluent that is water for injection 20mL with the finished product has been performed and submitted.
8.	Justify why pharmaceutical equivalence studies are conducted against comparator product instead of using innovator or reference product.	The firm has stated that Pharmaceutical equivalence is performed against Oxidil 2g injection mfg by M/s Sami Pharma. The innovator's product is not avalaible in
9.	Provide details of the diluent which is used to perform compatibility studies of the drug product.	Water for injection 20mL is used as diluent for reconstitution of drug product. The reconstituted product is yellowish clear solution. The firm has submitted compatibility studies of diluent with the rug product.
10.	Provide details of sample solution 2 preparation i.e. exact volume of water required for initial constitution of the ceftriaxone for injection.	Detail of preparation of sample solution II is provided in the relevant section which is in-lined with USP for the applied product.

11.	Your analytical method for drug product specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria as per USP monograph, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Specifications of finished product has been revised with addition of acceptance criteria for assay as per USP monograph. Revised specifications are submitted which are in-lined with USP. The firm has stated that they have performed one test at the stage of drug substance analysis and the other test is performed at the drug product stage. "*as we are dealing with the toll manufacturing in order for better understanding on COA we opted the 90-115% assay specifications. However, we have revised the SOP along with the specifications and would update and align all the practices and documents".*
12.	Provide 6 months stability study data of three batches along with HPLC chromatograms and raw data sheets in a proper sequence and with separators as per the guidelines of registration Board for further evaluation.	The firm has submitted 6 months stability data (including accelerated and real time) of three batches along with the relevant chromatograms, raw data sheets etc as per the guidelines of Registration Board.
13.	Submit stability study data of 3 commercial batches manufactured by the drug product manufacturer as per the decision of 312th meeting of Registration Board wherein the Board decided that the permission for contract manufacturing shall be granted on the basis of stability study data of commercial batches.	The firm has submitted stability study data of 3 batches as well. Batch size: 1000 vials Mfg date: 11/2020 Date of initiation of stability studies: 05/12/2020 Batches: T01, T02, T03 Batch size: 1000 vials
14.	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing. o Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board. • Lenzeu 30mg and 60mg Capsule (Dexlansoprazol) approved in 297th meeting. & Tazipera 45g injection approved in 316th meeting. • Copy of GMP certificate No. GD20180909 valid till 05/12/2023, M/s Zhuhai United Laboratories Co., Ltd., issued by CFDA. • Firm has submitted copy of commercial invoice cleared dated 28-05-2020 specifying import of 100Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP. • Raw data sheet sand chromatograms have been submitted by the firm. • The firm has submitted record of digital data logger for accelerated and real time stability studies in the relevant section. • Compliance record of HPLC & audit trails are submitted.

- Capacity assessment of M/s Cunningham Pharmaceuticals Lahore was carried out on 12-11-2020 and the report was presented in 297th meeting of Registration Board. As per the report, firm has 3 HPLC systems and the reported available capacity in major areas is as under:

Sr. No	Section	Average Available capacity
1.	HPLC	75.52%
2.	Sterility testing	84.86 %

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will submit 7,500/- fee for revision of specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Manufacturer shall submit testing record of recently manufactured commercial batch as per USP monograph before issuance of Registration Letter.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications,

		analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator i.e. Oxidil 250mg Injection IM.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical Zone, Economic and Technological Development Zone, Datong Shanxi. China		
API Lot No.			
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	C-FML 41K	C-FML 42K	C-FML 43K
Batch Size	50,000 vials	50,000 vials	50,000 vials
Manufacturing Date	07-2017	07-2017	07-2017
Date of Initiation	16-08-2017	23-08-2017	29-08-2017
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Specify whether your application is for IV or IM use.
- Submi module 2 and module 3 as per the format and data requirements as specified in the CTD guidance document approved by Registration Board.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3.
- Submit COA of relevant batch of drug substance from API manufacturer as well as drug product manufacturer in section 3.2.S.4.4 which is actually used for manufacturing of three stability batches.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance and drug product.
- Submit details of the manufacturer of the comparator product Recephin Injection Batch No. B0063 against which pharmaceutical eqivalence studies were conducted.
- Justify how the average weight of filled vials of the comparator product as well as your product is 272mg and the assay is 105%.
- Submit compatibility studies in section 3.2.P.2.6.
- Submit process validation protocols as per the requirements of CTD guidance document.
- Justify the specifications of the drug product which are not as per USP monograph, since the test for constituted solution, bacterial endotoxin test, particulate matter in injection, crystallinity, pH, water determination, assay having acceptance criteria (NLT 776 µg/mg of ceftriaxone) and impurities.
- Justify your analytical method for assay test of drug product which is entirely different from that of USP in terms of mobile phase composition, standard and sample preparation, and chromatographic conditions including UV wavelength, flow rate, injection volume etc.
- Justify the assay test of drug product using UV method in your specifications since no such test exist in USP monograph.
- Provide verification studies of the analytical method of drug roduct in section 3.2.P.5.4 in the light of ICH guidelines.
- Justify the stability testing of the product in which assay is determined using UV method against the recommendations of USP.
- Provide Batch Manufacturing Record of three stability batches for which stability study data is submitted.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.

	○ Documents for the procurement of API with approval from DRAP (in case of import). ○ Compliance Record of HPLC software 21CFR & audit trail reports on product testing. ○ Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

The application for contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Islamabad is not submitted as per the guidance document approved by Registration Board. The submitted application is in variation to the guidance document in module 1 and various sections of module 3. The submitted COA of drug substance, batch analysis report of drug product and stability study data of drug product is not in line with the recommendations of Registration Board and as per the guidance document. Furthermore, it is also pertinent to mention that the drug product testing has been carried out using specifications which are not in line with the recommendations of the general monographs of the official pharmacopoeia and the analytical method of the assay test is based on UV method contrary to the method of analysis of the drug substance manufacturer and innovator's product.

Therefore, you are advised to resubmit your application compiled in the light of the guidance document approved by Registration Board and also justifying the specifications of the drug product so that further evaluation of your application could be carried out.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

The application for contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Islamabad is not submitted as per the guidance document approved by Registration Board. The submitted application is in variation to the guidance document in module 1 and various sections of module 3. The submitted COA of drug substance, batch analysis report of drug product and stability study data of drug product is not in line with the recommendations of Registration Board and as per the guidance document. Furthermore, it is also pertinent to mention that the drug product testing has been carried out using specifications which are not in line with the recommendations of the general monographs of the official pharmacopoeia and the analytical method of the assay test is based on UV method contrary to the method of analysis of the drug substance manufacturer and innovator's product.

Therefore, you are advised to resubmit your application compiled in the light of the guidance document approved by Registration Board and also justifying the specifications of the drug product so that further evaluation of your application could be carried out.

Firm has now submitted application as per guidance document. However, the following observations are still not addressed.

- Verification studies of the analytical method of drug substance since the API used is non-lyophilized powder.
- pH of reference product is 9 – 10.5 while the limit set by firm is 9 – 12 and results are above 11.0
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftazidime Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Nivador injection by Sami Pharma
	Name and address of API manufacturer.	Qilu Antibiotics Pharmaceutical Co. Ltd. 849 Dongjia Town, Licheng District Jinan City PR China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference

		standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Fortum 250mg Injection of GSK.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Qilu Antibiotics Pharmaceutical Co. Ltd. 849 Dongjia Town, Licheng District Jinan City PR China.		
API Lot No.			
Description of Pack (Container closure system)	Glass vials

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SD20170590) issued by CFDA China dated 31-07-2017. The GMP certificate is valid till 30-07-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

The application for contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Islamabad is not submitted as per the guidance document approved by Registration Board. The submitted application is in variation to the guidance document for various modules, sections and sub sections majorly including complete module 1, section 3.2.S.4.1, 3.2.S.4.2, 3.2.S.4.3, 3.2.S.4.4, 3.2.S.5, 3.2.P.2.2.1, 3.2.P.2.6, 3.2.P.3.5, 3.2.P.5.1, 3.2.P.5.2, 3.2.P.5.3, 3.2.P.5.4, 3.2.P.6 and 3.2.P.8. Furthermore, it is also pertinent to mention that the drug product manufacturer has submitted COA of drug substance imported in 2021 and released on 13-03-2021 and provided batch release certificates of 3 batches of drug product released on 19-05-2021, 15-01-2021 and 22-12-2020 and submitted stability study data of 3 batches of drug product 19-03-2018, 18-06-2018 and 17-09-2018 instead of submitting data of same batches as per the guidance document. Therefore, you are advised to resubmit your application compiled in the light of the guidance document approved by Registration Board and also justifying the following additional observations so that further evaluation of your application could be carried out.

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- You have submitted Innovator's specification in module 1 while the product monograph is available in USP, revise the specifications along with submission of requisite fee.
- You have submitted label claim that each vial contains ceftazidime as sodium 250mg while the innovator product contains ceftazidime pentahydrate.
- The specifications of the drug substance manufacturer is different from USP in terms of limit of loss on drying as well as chromatographic conditions (including column specifications, wavelength, flow rate, mobile phase etc). Justify how this material can be used to develop commercial batches of a product which is registered with USP specifications.
- M/s Biolabs have released a batch of drug substance (Batch No. 1045AJ81JD) on 13-03-2021 in which loss on drying was 13.45% while USP specifies that the limit of LOD is NMT 12.5%. Justify how this drug substance was released for commercial use to manufacture batches of the drug product registered with USP specifications.
- You have specified in section 3.2.P.1 that filled weight per vial is 250mg which is contrary to that of the innovator product.
- Your product development and pharmaceutical equivalence studies does not include complete testing as recommended by innovator product or by USP.
- Compatibility studies of your product shows that pH after reconstitution is from 3 to 4 which is different from that of USP recommendations.
- Your drug substance specifications are different from that of drug substance manufacturer as well as USP without any scientific rationale.
- Your process validation report performed on commercial batches have specified that weight variation of the filled vials is approximately 250mg. Justify how 250mg powder per vial containing sodium carbonate as well as 13.5% water can have 250mg of ceftazidime base as well.
- Your drug product specifications are not as per USP since many tests recommended by USP are not performed by the product manufacturer even for the release of commercial batches in the market.
- The drug product manufacturer have not provided complete method of analysis of the drug product although it is manufacturing commercial batches of the said product.
- Justify why contents of sodium carbonate is not performed in the drug product also provide evidence of atomic absorption to justify that you have necessary equipment to carry out the product testing.
- The limit of Bacterial endotoxin test of the drug product manufacturer is different from USP pharmacopoeia.

- Provide evidence of import of Ceftazidime, Delta-3-Isomer RS which is used in the analysis of drug product.
- The drug product method of analysis specifies that a resolution solution containing Delta-3-Isomer RS is added in the sample solution, while no peak is observed in the chromatograms. Justify how your method of analysis can be considered accurate and reliable.
- Your analytical method verification studies are not performed in the light of ICH guidelines, furthermore the analysis of results is also not performed as per ICH recommendations. Justify how you have been testing commercial batches of the drug product without having a verified method of analysis in which the resolution solution peak is also not observed in the chromatograms.

Response by the firm:
The firm has submitted stability study data of 3 newly manufactured batches of drug product without addressing the observations mentioned in the letter of shortcoming.

Batch No.	VP-339	VP-340	VP-361
Batch Size	15384 Packs	15384 vials	5,000 vials
Manufacturing Date	12-2019	12-2019	12-2019
Date of Initiation	26-12-2019	26-12-2019	26-12-2019

- The analysis performed in the newly submitted data is still not as per USP monograph in terms of relative retention time between ceftazidime and Delta-3-Isomer and the calculation of results of assay.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

- Your drug product specifications are not as per USP since many tests recommended by USP are not performed by the product manufacturer even for the release of commercial batches in the market.
- The drug product manufacturer have not provided complete method of analysis of the drug product although it is manufacturing commercial batches of the said product.
- Justify why contents of sodium carbonate is not performed in the drug product also provide evidence of atomic absorption to justify that you have necessary equipment to carry out the product testing.
- The limit of Bacterial endotoxin test of the drug product manufacturer is different from USP pharmacopoeia.
- Provide evidence of import of Ceftazidime, Delta-3-Isomer RS which is used in the analysis of drug product.
- The drug product method of analysis specifies that a resolution solution containing Delta-3-Isomer RS is added in the sample solution, while no peak is observed in the chromatograms. Justify how your method of analysis can be considered accurate and reliable.
- Your analytical method verification studies are not performed in the light of ICH guidelines, furthermore the analysis of results is also not performed as per ICH recommendations. Justify how you have been testing commercial batches of the drug product without having a verified method of analysis in which the resolution solution peak is also not observed in the chromatograms.

Response by the firm:
The firm has submitted stability study data of 3 newly manufactured batches of drug product without addressing the observations mentioned in the letter of shortcoming.

Batch No.	VP-257	VP-258	VP-260
Batch Size	3846 Packs	3846 Packs	3846 Packs
Manufacturing Date	09-2019	09-2019	09-2019
Date of Initiation	26-09-2019	26-09-2019	26-09-2019

- The analysis performed in the newly submitted data is still not as per USP monograph in terms of relative retention time between ceftazidime and Delta-3-Isomer and the calculation of results of assay.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

1084	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Reliance Pharma, Plot # 8, Street No. S-8, RCCI, Industrial Estate, Rawat Islamabad.**
	Name, address of Manufacturing site.	M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Copy of agreement for contract manufacturing of pharmaceutical products between contract giver and acceptor dated 25-02-2019 is submitted.
	GMP status of the firm	**Global pharmaceuticals:** 11 & 24-10-2018: On the basis of findings, panel unanimously decided to recommend the issuance of GMP certificate.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000417 of M/s Global Pharmaceuticals Islamabad dated 03-02-2016 specifying reallocation of dry powder injection (carbapenem) section is place of withdrawn Biotech section (BSF)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 1984: 15-07-2021
	Details of fee submitted	PKR 75,000/-: 28-06-2021
	The proposed proprietary name / brand name	**TAVIZEM 200mg/5ml suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension Contains: Cefixime as trihydrate……200mg
	Pharmaceutical form of applied drug	Off white powder filled in amber colored glass bottle
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	30 ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime suspension **(USFDA** Approved)
	For generic drugs (me-too status)	Cefim suspension by Hilton
	Name and address of API manufacturer.	Saakh Pharma (Pvt) Ltd. C-7/1, North Western Industrial Zone Port Qasim Karachi.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of

		analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cefiget 200mg/5ml dry suspension.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Saakh Pharma (Pvt) Ltd. C-7/1, North Western Industrial Zone Port Qasim Karachi.

Date of Initiation	18-04-2018	07-11-2018	05-07-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued on the basis of inspection dated 18-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm

1.	Submit GMP certificate / GMP inspection report of the drug product manufacturer within last three years.	Firm has submitted GMP certificate issued on the basis of inspection dated 03-01-2022.
2.	Submit evidence of approval of requisite manufacturing facility / section of the drug product manufacturer approved from Licensing Division DRAP.	The submitted GMP certificate specifies dry powder suspension (Cephalosporin) section.
3.	Submit module 1 as per CTD guidance document without referring to annexures.	Firm has submitted module 1 as per guidance document.
4.	Submit label claim as per the innovator product along with submission of fee for revision of label claim.	Firm has submitted label claim.
5.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Specifications of drug substance from API manufacturer and product manufacturer is submitted by the firm.
6.	Justify how the drug substance specification complies both USP as well as BP specifications.	As few tests were common in USP and BP therefore drug substance manufacturer mentioned both in CoA but we are following USP specification. Procedures as per USP are attached
7.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm has submitted verification of analytical procedure of drug substance.
8.	Submit COA of reference standard actually used in the analysis of drug substance and drug product.	Firm has submitted COA of reference working standard
9.	Submit stability study data of the drug substance (cefixime trihydrate in micronized form) from the drug substance manufacturer as per zone IV-A conditions.	Firm has submitted stability data of API
10.	Justify why your formulation is qualitatively different from that of innovator's product.	As per function of excipients, we are following the innovator formulation. No other ingredient is changed except the Thickening agent Xanthan Gum is replaced with Carboxy methylcellulose Sodium. Carboxy methylcellulose Sodium is synthetically prepared thickening agent purer as compare to Xanthan gum and has computability with cefixime.
11.	Justify how 1383.1mg of cefixime trihydrate is equivalent to 6 doses after reconstitution each having 200mg of cefixime base.	Yes the 1383mg of cefixime Trihydrate is equivalent to 06 doses of 200mg cefixime. Molecular weight of cefixime Trihydrate=507.50 Molecular weight of cefixime =453.46 %age purity of cefixime= (453.46/507.5)*100=89.35% (when 100% cefixime is present in cefixime Trihydrate), but USP states that: - Cefixime contains the equivalent of not less than 950ug (95%) and not more 1030ug (103%) of cefixime per mg, calculated on anhydrous basis. So average content of cefixime will be =(95+103)/2=99% Considering the average purity of cefixime in cefixime Trihydrate, then 89.35*(99/100)= 88.46% For 06 doses of 200mg/5mlcefixime suspension:- Cefixime required will be = 1200mg/Vial

		1200mg cefiximewill be equivalent to =(100/88.46)*1200=1355.438mg/Vial 2% overage was in practice due to production losses. So the adopted fill weight= 1382.54 Note :- this 2% overage is removed from the formulation now.
12.	Justify how your product is equivalent to the innovator's product since the innovator's product is available in 50ml, 75ml and 100ml bottle delivering 10, 15 and 20 doses while your product is available in 30ml bottle which can deliver 6 doses.	All product registered in Pakistan for cefixime DS Suspension (e.g. Cefspan DS Suspension brand leader in Pakistan provide 30ml Pack size for 06 doses) is also available in 30ml Pack size, those also delivers 6 doses.
13.	Justify how you are reconstituting your product with 20ml water since the innovator product use 34ml water to reconstitute for 50ml bottle.	Reconstitution volume doesn't have any effect on the quality of Dry suspension, but for the sake comparison, we suppose:- If innovator uses 34ml for 50ml reconstitution, then for 30ml reconstitution we required =20.4ml, which is approximately equal to 20ml. As data of innovator formulation in quantitative form is not available, so this kind of change does come in generic development. Secondly as reference "Cefspan DS Suspension" the brand leader in Pakistan, is also reconstituting its product with 20ml water.
14.	Justify why you have performed pharmaceutical equivalence studies against Cefiget suspension instead of performing studies against the innovator / reference product.	We have performed the pharmaceutical equivalence against the competitor product, which is allowed by DRAP.
15.	Justify your pharmaceutical equivalence studies in which only assay and identification test has been performed. Justify how you can declare your product as pharmaceutically equivalent just on the basis of two tests.	Complete testing as per USP and innovator has been performed
16.	Justify why comparative dissolution profile / drug release studies are not performed for your product since USFDA has recommended such studies for cefixime suspension.	Dissolution test in the innovator recommended media is attached 8 for you concern. Note:-We have provided you the commercial batches data as per USP monograph, which doesn't mention the dissolution as quality parameter. Secondly the SMPC of innovator product only give the dissolution in one media (buffer pH 7.4), and mention it worthless quality control tool. SMPC clearly states that The current USP monograph for cefixime for oral suspension doesn't include dissolution. Itshould be noted that under established test conditions, all cefixime suspensions are rapidly dissolved (greater than settled limit (75%) in first 10minutes; dissolution is complete within 30minutes). The established test therefore appears to have limited value as quality control tool.
17.	Provide detailed method of analysis of the drug product in section 3.2.P.5.2 instead of providing USP monograph only.	Firm has submitted complete method of analysis of drug product.
18.	Provide detailed analytical method verification studies along with interpretation of each test in the light of ICH guidelines. Further also provide exact concentration of each solution tested in each test of the verification studies.	Firm has submitted detailed analytical method verification studies of drug product.
19.	Provide COA of 3 batches of drug product in section 3.2.P.5.4 for which stability study data is submitted in section 3.2.P.8.3.	Frm has submitted COA of three batches of drug product.
20.	Provide COA of reference standard which is actually used in the analysis of drug product.	Firm has submitted COA of working standard.
21.	Scientific justification for using only 3 chromatograms of the standard solution for HPLC testing while USP General chapter <621>	6 injections of standard solution run for system suitability confirmation in each assay and then 3 more

	recommends that five replicates of standard solution should be used for system suitability studies.	standards run in order to calculate results. System suitability RSD Sheets are attached as annexure 12.
22.	Provide reference of previous approval of applications with stability study data of the firm (if any), instead of mentioning not applicable.	Not submitted
23.	Provide documents for the procurement of API including commercial invoice of the relevant batch of drug substance used in the manufacturing of 3 batches for which stability study data is submitted.	Firm has submitted invoice of different batches of API
24.	Provide stability study data of 3 batches of the drug product in section 3.2.P.8.3 as per the 6 points checklist approved by Registration Board in CTD guidance document along with submission of stability study data of each batch in proper sequence i.e. analytical report, raw data sheet and chromatograms of standard and sample preparation at each time point so that further evaluation of the data could be carried out.	Submitted by the firm

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer shall submit data of product testing of recently manufactured commercial batches as per USP before issuance of Registration Letter.**

Evaluation by PEC:

The product development and stability study data of the contract manufacturer was considered by Registration Board in its 312nd meeting and observed that the contract manufacturer has not performed complete product development studies, and the specifications adopted by the manufacturer throughout stability studies were not according to USP and further observed that the stability batches have expired. Accordingly, the Board deferred for following submissions:

- Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.
- Scientific justification for not performing compatibility studies with the recommended diluent.
- Scientific justification for using an entirely different formula for calculation of assay results of commercial batches from that specified in USP monograph.
- Scientific justification for not performing test of sodium content.
- Scientific justification for not performing critical tests like constituted solution, and loss on drying during the stability studies.
- Scientific justification for performing stability studies in which the test of bacterial endotoxin and sterility is not performed at 6 months time interval.
- Scientific justification for using only 3 chromatograms of the standard solution for HPLC testing while USP General chapter <621> recommends that five replicates of standard solution should be used for system suitability studies.
- Evidence of purchase of atomic absorption spectrophotometer including commercial invoice and Installation Qualification (IQ) and Operational Qualification (OQ) of atomic absorption alongwith performance data for sodium content test on stability batches.
- Submission of fee for pre-registration changes in the drug product specifications.

The Board further decided that the submitted stability study data is not acceptable and directed the contract manufacturer to either perform complete product development and stability studies as per USP specifications or submit aforementioned data for commercial batches manufactured as per USP specifications.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Submit valid contract manufacturing agreement.
- Provide label claim as per the innovator's product in module 1.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Justify how the drug substance specifications conforms to USP, since the acceptance criteria for various tests is different from USP monograph.
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
- Provide COA of relevant batch of drug substance used in the manufacturing of batches for which stability study data is submitted.
- Justify the stability studies of the drug substance as per zone IV-A conditions, since as per API manufacturer as well as USP the storage conditions is to store the drug substance from 2 to 8 degree.
- Justify the pharmaceutical equivalence studies against the comparator product instead of performing these studies against the innovator / reference product.
- Justify why complete tests as mentioned in USP are not performed during pharmaceutical equivalence studies.
- Provide detailed method of manufacturing including details of the amount of distilled water added to prepare the solution and the pH range which is maintained for that solution and exact temperature and total time used for lyophilization process.
- Justify your process validation protocols and reports which does not include any step for optimization of the solution preparation and lyophilization process.
- Provide details of the lyophilizer installed in your premises including details of the minimum and maximum capacity of the equipment.
- Provide evidence of autosampler and low actinic glassware to carry out the analysis of the drug product.
- Provide results of verification studies of the analytical method of drug product in the light of ICH guidelines.
- Batch L-131 and L-138 are manufactured using drug substance from any other source while the batch L-242 was manufactured using drug substance from the source which is mentioned in module 3. Justification is required in this regard.

• Justify how three injections of standard solution were used for the assay testing of the drug product in stability studies. • Provide Reference of previous approval of applications with stability study data of the firm (if any) instead of mentioning not applicable. • Provide Documents for the procurement of API with approval from DRAP (in case of import) for the relevant batch of drug substances which are used in the manufacturing of 3 batches of drug product whose stability data is submitted in section 3.2.P.8.3. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide batch manufacturing record of three stability batches.		
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 03-11-2020.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies Liquid ampoule (General) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies Liquid ampoule (General) section. Firm has also submitted copy of letter for grant of additional section dated 23-07-2012 specifying Ampoule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 16115: 10-06-2021
	Details of fee submitted	PKR 50,000/-: 30-04-2021
	The proposed proprietary name / brand name	**DAVICOBAL Injection 500mcg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 1 ml ampoule Contains: Mecobalamin……500mcg
	Pharmaceutical form of applied drug	Almost red colour solution filled in amber glass ampoule.
	Pharmacotherapeutic Group of (API)	Vitamin B12
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	1ml x 10's

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Mecobalamin 500mcg Injection **(PMDA** Japan Approved)
	For generic drugs (me-too status)	Mecomax Injection by Global Pharma
	Name and address of API manufacturer.	M/s. Vital Laboratories (Pvt) Ltd. Plant II, Plot No. 1710, GIDC Estate, Phase III, Vapi – 396 195 Gujrat India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{o}C ± 2^{o}C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has performed pharmaceutical equivalence against the product Methycobal 500 mg injection by Hilton Pharma
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and validation studies of the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s. Vital Laboratories (Pvt) Ltd. Plant II, Plot No. 1710, GIDC Estate, Phase III, Vapi – 396 195 Gujrat India
API Lot No.	MCB2010061
Description of Pack	Glass ampoule

(Container closure system)			
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	A-431	A-443	A-456
Batch Size	37,000 Ampoules	10,000 Ampoules	10,800 ampoules
Manufacturing Date	04-2018	05-2018	06-2018
Date of Initiation	29-8-2018	02-07-2018	10-09-2018
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate # 20031928 of M/s. Vital Laboratories (Pvt) Ltd. Plant II, Plot No. 1710, GIDC Estate, Phase III, Vapi – 396 195 Gujrat India valid upto 16-03-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice # HHM/2021/00256) attested by AD DRAP
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Provide label claim as per the innovator's product in module 1.
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
- Provide COA of relevant batch of drug substance used in the manufacturing of batches for which stability study data is submitted, since the submitted COA is of batch manufactured in 2020, while stability batches were manufactured in 2018.
- Justify your master formulation in which sodium chloride, propylene glycol, benzyl alcohol, sodium acetate and water for injection is used as excipient, since the innovator product only use D-mannitol and pH regulator.
- Justify the use of preservative in a single dose ampoule preparation.

- Justify the use of around 45% overage of active ingredient in your master formulation while USP recommends much lower overage for vitamin B12.
- Justify why complete tests as mentioned in general monographs for such preparations are not performed during pharmaceutical; equivalence studies.
- Justify how pharmaceutical equivalence studies were conducted with results of assay 127.80% and 128.30% for test and comparator product in the light of USP general chapters and allowable limit of overages for vitamin B12.
- Justify why the test for particulate matter, uniformity of dosage unit and antimicrobial preservative content / effectiveness is not included in the drug product specifications, since these tests are recommended in general monograph of USP.
- Justify the pH value of 5 – 7, since the pH of the innovator's product is 5.3 – 7.3. Revise your specifications along with submission of requisite fee.
- Justify the analytical method for assay and identification test based on UV method, since the drug substance manufacturer's method as well as the innovator product analytical method is based on HPLC testing.
- Justify the validation studies based on UV method, since the innovator's product methodis based on HPLC testing.
- Justify how the three batches i.e. I-150, I-163 and I-173 were released in 2019 having assay values of 100, 100.1and 100.2% respectively while 145% overage of the active ingredient was added.
- Provide COA of reference standard actually used in the analysis of drug product.
- Provide batch number in terms of number of ampoules for batch A-431.
- Provide exact lot number of COA of drug substance used in manufacturing of each batch of drug product.
- Justify the results of assay as all the batches just showed minor decrease in assay results less than which is usually observed in vitamin preparations. Scientific justification / clarification is required in this regard.
- Justify why photostability studies are not performed for the drug product.
- Provide Reference of previous approval of applications with stability study data of the firm (if any) instead of mentioning not applicable.
- Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
- Documents for the procurement of API with approval from DRAP (in case of import).
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide batch manufacturing record of three stability batches.
- Specify the details how the manufacturing and analysis of the product was carried out without exposure to light. Further also provide evidence of light resistant vessels to carry out analysis as recommended in JP monograph.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 10-01-2020 specifying import of 0.05Kg nalbuphine hydrochloride. The invoice is **not** attested by AD (I&E) DRAP Field office. Firm has also submitted copy of Form 3 and form 7.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Submit contract manufacturing agreement between contract giver and contract acceptor.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
- Submit data of batch analysis of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture"* since the submitted COA is for the batch manufactured in December 2020 while the drug product batches were manufactured in 2018 and 2019.
- Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.
- Justify your master formulation without any solvent / diluent, further justify how you are using sodium chloride as solvent.
- Justify your master formulation which is significantly different from the innovator product in terms of quantitative composition where you have used sodium citrate, sodium chloride and citric acid anhydrous in 29.71%, 6.34% and 36.03% respectively, since the innovator product specifies sodium citrate, sodium chloride and citric acid anhydrous in 0.94%, 0.2% and 1.26% respectively.
- Justify why pharmaceutical equivalence was performed against the comparator product instead of innovator / reference product.
- Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify how you are not performing terminal sterilization for your product.
- Specify the container closure system whether available in amber color glass ampoule or otherwise.
- Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain complete tests as recommended by innovator product as well as the tests recommended in general monographs of official pharmacopoeia.
- Justify the pH of your product between 3 to 4.5 since the pH of the innovator product is 3.5 to 3.7. Revise your specifications along with submission of requisite fee.
- Justify your analytical method for assay testing of the drug product which is based on UV analysis, since the analytical method of drug substance manufacturer as well as innovator / reference product is based on HPLC method.
- Justify your validation studies of the drug product in the light of ICH guidelines, since your analysis and reporting of the results is not exactly in line with the ICH recommendations.
- Justify why the stability study data of three different batches is submitted from those for which batch analysis is provided in section 3.2.P.5.4.

- You have submitted that the drug substance manufacturer is Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri, but the drug substance used in the manufacturing of 3 batches of drug product is from any other source. Justification is required in this regard.
- Justify significant difference in the batch size of your products ranging from 15,000 to 50,000 ampoules. Justify your response in the light of the minimum and maximum capacity of your manufacturing equipments.
- Justify the pH of batch A-608 where the pH value exceed 3.70 to 3.78 during stability studies, since the maximum pH limit defined by innovator product is 3.70.
- Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch. Submit complete data with proper separators and in a sequence along with raw data sheets.
- Submit reference of previous approval of applications with stability study data of the firm instead of mentioning not applicable.
- Submit valid GMP certificate of the drug substance manufacturer.
- Submit documents for the procurement of API with approval from DRAP for the relevant batch of API which is used in the manufacturing of stability batches.
- Submit Batch Manufacturing Record of three batches for which stability study data is submitted.
- Submit copy of batch manufacturing record of 3 stability batches.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

- Justify your validation studies of the drug product in the light of ICH guidelines, since your analysis and reporting of the results is not exactly in line with the ICH recommendations.
- Justify why the stability study data of three different batches is submitted from those for which batch analysis is provided in section 3.2.P.5.4.
- You have submitted that the drug substance manufacturer is Mallinckrodt Pharmaceuticals SpecGx LLC 3600 North Second Street St. Louis, Missouri, but the drug substance used in the manufacturing of 3 batches of drug product is from any other source. Justification is required in this regard.
- Justify significant difference in the batch size of your products ranging from 15,000 to 50,000 ampoules. Justify your response in the light of the minimum and maximum capacity of your manufacturing equipments.
- Justify the pH of batch A-608 where the pH value exceed 3.70 to 3.78 during stability studies, since the maximum pH limit defined by innovator product is 3.70.
- Provide raw data sheets to justify the calculation of results for assay testing at each time point during the stability testing of each batch. Submit complete data with proper separators and in a sequence along with raw data sheets.
- Submit reference of previous approval of applications with stability study data of the firm instead of mentioning not applicable.
- Submit valid GMP certificate of the drug substance manufacturer.
- Submit documents for the procurement of API with approval from DRAP for the relevant batch of API which is used in the manufacturing of stability batches.
- Submit Batch Manufacturing Record of three batches for which stability study data is submitted.
- Submit copy of batch manufacturing record of 3 stability batches.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SX20180229) issued by CFDA China dated 06-06-2018. The GMP certificate is valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Provide valid GMP certificate of the drug product manufacturer.
- Justify the drug substance specifications submitted in section 3.2.S.4.1 which states that the material is non-sterile and the assay limit is 98 – 102% which is contrary to that specified in USP monograph for ceftriaxone for injection. Furthermore, clarify whether you have used sterile ready to fill drug substance or non-sterile ceftriaxone sodium.
- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Justify how the drug substance batch No. Q012002060 was released on 18-05-2020 without performing sterility test since this test is mentioned in the drug substance specifications as well as COA of drug substance manufacturer. Justify how 200kg material was released for production without performing sterility test.
- Provide COA of reference standard which is actually used in the analysis of drug substance in section 3.2.S.5.
- Justify the label claim submitted in section 3.2.P.1 which specifies that each vial contains 1g ceftriaxone sodium.
- Justify how 1200mg ceftriaxone sodium sterile powder per vial will be equivalent to 1g of ceftriaxone base.
- Specify the type of diluent along with its exact volume which is to be used for the reconstitution of the applied product.
- Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the innovator product as per USP specifications. Justify how only pH and assay test can demonstrate pharmaceutical equivalence.
- Provide details including the batch number, expiry date and manufacturer of the comparator product against which pharmaceutical equivalence is conducted.
- Justify why compatibility study of the drug product along with recommended diluent is not performed as per the requirement of section 3.2.P.2.6. Further justify how you have completed product development without performing complete studies.
- Justify your process validation protocols without any process for optimization of sterilization process and sealing of vials etc. Further justify why complete process validation is not performed since commercial batches of the drug product have been manufactured by the manufacturer.

- Justify why the specifications of the drug product (section 3.2.P.5.1) does not contain important tests as recommended by USP including test for constituted solution, particulate matter in injection, crystallinity and complete assay test.
- Provide detailed testing method for the drug product as per the USP specifications since the submitted method is not complete. Also submit fee for revision of specifications in the light of USP monograph.
- Clarify the sample solution preparation method in your analysis which states "constitute ceftriaxone for injection in a volume of water corresponding to the volume of solvent specified in the labelling". Specify what is the exact volume in which reconstitution is to be carried out instead of mentioning generalized statements.
- Justify how three commercial batches were released for commercial use without performing complete tests as specified in USP monograph.
- Provide COA of reference standard actually used in the analysis of drug product in section 3.2.P.6.
- Provide details of the primary and secondary packaging material of the drug product including details of type, colour and specifications of the glass vial, rubber stopper and seal etc. in section 3.2.P.7.
- The batches are released after 16-06-2020, while the stability studies were initiated on 02-06-2020. Justify how the batch could be initiated for stability studies before the batch release.
- Justify why the test for bacterial endotoxin, sterility, water contents, constituted solution etc is not performed during stability studies since these tests are very critical and are required to make assessment of the stability profile and shelf life.
- Justify the raw data sheets in which sample preparation method is incomplete.
- Justify how only single value of peak area of standard and sample is used to calculate the assay of drug product during stability studies.
- Submit date of initiation of stability studies for all the three batches.
- Justify the testing at 3rd month time point on 25-08-2020 while the batches were released after 16-06-2020. Provide complete justifications of the stability schedule with respect to testing time points to justify that 6 months stability studies have been conducted and the time period between 0 to 3rd month and 3rd to 6th month is justifiable in the light of ICH / WHO guidelines.
- Provide stability data sheets for all the batches as per the template provided in the CTD guidance document since your template does not contain various information like stability initiation date, API lot number, date of testing at 0 month, 3rd month and 6th month time point.
- Provide complete record of the stability testing of each batch with proper separators in a sequence instead of separately providing the data without any sequence.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)
- Justify the manufacturing of batches having 4166 batch size in which 5Kg of drug substance was used, keeping in view the fact that the drug substance also contains 9.1% water which is evident from the COA of the relevant batch of drug substance.
- Justify the supply of 5ml WFI along with ceftriaxone sodium 1g IV injection since the innovator product recommends different quantity of diluent.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

- Submit valid contract manufacturing agreement between the contract giver and contract acceptor.
- Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.
- Submit label claim in module 1 as per the reference product along with submission of requisite fee.
- You have mentioned innovator's specification in section 1.5.6 in module 1 and in-house specifications in module 2 section 2.3.P.5.1 while the drug product monograph is available in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both BP and USP specifications for the drug substance, provide scientific justification in this regard.
- The drug substance manufacturer has claimed USP specifications for the assay method, while the submitted method is different from USP in terms of column specifications including column length and pore size. Justification is required in this regard.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture, since the submitted COA of three batches of API are of 2020 while the drug product batches were manufactured in 2018.
- Justify the use of overage in the formulation to compensate the potency of the product during process loss.
- Justify the formulation which is different in terms of qualitative composition from that of innovator product.
- Justify how you have performed comparative dissolution profile by taking only three time points, also justify how 30, 45 and 60 minutes time point was selected during the CDP studies. Also clarify why the initial time point was taken at 30 minutes for an immediate release dosage form.
- Provide detailed analytical method along with dissolution parameters used during the comparative dissolution profile study. Also provide detailed results of comparative dissolution profile studies.
- Justify how mixing time has been finalized during the process validation studies.
- Justify why the test for water content is not performed for the drug product.
- Justify how you have performed dissolution test since your submitted method of analysis for this test does not provide details for sample solution preparation or standard preparation. Furthermore no formula for calculation of the results is provided.
- Justify why the analytical method for dissolution test for cefixime capsule is based on UV method instead of using HPLC method which have been used by the innovator product as well as also specified in JP monograph.
- Justify why the assay test is performed using UV method while the method of analysis of drug substance manufacturer and the innovator product is based on HPLC method. Furthermore the JP monograph also specifies HPLC test for assay method for cefixime capsule.

• Justify the analytical method validation studies which have been performed at totally different concentrations than that specified in the assay method. The assay method specify that the concentration of sample and standard solution is 0.02mg/ml while the validation studies have been performed at very high concentrations. • The process validation studies have been conducted on three batches having 10,000 capsule batch size. While the batch size of the commercial batches for which stability study data is submitted, ranges from 25,000 to 60,000 Capsule. Justification is required in this regard. • Provide COA of the reference standard / working standard actually used in the analysis of drug product in section 3.2.P.6, since you have submitted USP certificate for Lot No. R03930 which was valid till 31-10-2019. Further submit evidence of purchase of the particular lot number of USP reference standard. • Specify the date of initiation of stability studies for all the stability batches. • Justify why weight variation test is not performed during the stability studies. • Justify how the results of assay and dissolution test at initial time point is different at both real time and accelerated conditions. • Justify why you have mentioned not applicable against "Reference of previous approval of applications with stability study data of the firm (if any)" since various inspections of bio labs have been conducted to verify the stability study data. • Submit copy of commercial invoice for evidence of purchase of each batch of drug substance that have been used in the analysis of each batch of drug product. • Batch 261 was manufactured on 05-2018, the initial testing of real time studies was conducted on 04-07-2018 while the accelerated stability testing of initial time point was conducted on 15-05-2018. Justify how this stability design is considered appropriate where different testing has been conducted for initial studies, moreover the testing time for both accelerated and real time stability studies have difference of approximately 2 months. • Submit batch manufacturing record (BMR) of the three batches for which stability study data has been submitted, since the submitted BMRs are of different batches.	
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.		
1093	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Variant Pharmaceuticals Pvt Ltd. Plot No. 5, M2-Pharma Zone Lahore, Sharikpur Road, Sheikhupura**
	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 10-11-2020.
	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies oral dry powder suspension (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies oral dry powder suspension (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale

		☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 17791: 25-06-2021
	Details of fee submitted	PKR 50,000/-: 09-04-2021
	The proposed proprietary name / brand name	**VARICEF 100mg/5ml Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension Contains: Cefixime as trihydrate……100mg
	Pharmaceutical form of applied drug	Almost pink colored powder having strawberry flavour powder for reconstitution
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	~~USP~~
	Proposed Pack size	30 ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime suspension **(USFDA** Approved)
	For generic drugs (me-too status)	Cefim suspension by Hilton
	Name and address of API manufacturer.	Saakh Pharma (Pvt) Ltd. C-7/1, North Western Industrial Zone, Port Qasim, Karchi.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cefspan dry suspension.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Karachi dated 23-06-2020. The GMP certificate was granted based on inspection dated 18-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Submit valid contract manufacturing agreement between the contract giver and contract acceptor.

- Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.
- Submit label claim in module 1 as per the reference product along with submission of requisite fee.
- You have mentioned innovator's specification in section 1.5.6 in module 1 while the drug product monograph is available in USP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both BP and USP specifications for the drug substance, provide scientific justification in this regard.
- The drug substance manufacturer has claimed USP specifications for the assay method, while the submitted method is different from USP in terms of column specifications including column length and pore size. Justification is required in this regard.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Submit data in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that "Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture, since the submitted COA of three batches of API are of 2020 while the drug product batches were manufactured in 2019.
- Justify how your unit formula containing 0.685gm of drug substance is equivalent to 100mg cefixime base per 5ml after reconstitution. Further specify which is the unit which has been taken as reference for your formulation.
- Justify the formulation which is different in terms of qualitative composition from that of innovator product Suprax suspension.
- Innovator product has not used sodium citrate which is used in your formulation as preservative along with sodium benzoate. Justify the use of two different preservatives without determining the preservative effectiveness.
- The acceptance criteria for pH is 2.5 to 4.5 while your compatibility results specifies that after reconstitution with the recommended diluent / solvent, the pH is 5.08 which lies outside the acceptance criteria. Justify how you have passed this formulation and performed stability studies on the same formulation.
- The process validation studies have been conducted on three batches having 5000 bottles batch size. While the batch size of the commercial batches for which stability study data is submitted, ranges from as low as 7500 and as high as 60,000 bottles. Justification is required in this regard.
- Submit detailed method of analysis of the drug product in section 3.2.P.5.2 instead of submitting print of USP monograph.
- Submit exact details of the assay preparation since the words "*Reconstitute sample as directed n the labelling"* should not be used in the method adopted by a firm. Instead provide details about the exact diluent along with volume in which reconstitution is to be carried out.
- Justify the analytical method verification studies without performing test or specificity and precision. Further also specify the exact concentration of solutions of 50%, 100% and 150% solutions used in the analysis of accuracy and recovery test.
- Provide COA of the reference standard / working standard actually used in the analysis of drug product in section 3.2.P.6.
- You have provided batch release certificate for batch D-220, D-221 and D-222 in section 3.2.P.5.4 while provided stability study data for batch D-006, D-018 and D-022 in section 3.2.P.8.3. Clarification is required in this regard.
- Provide batch size of Batch D-006 in terms of number of bottles instead of providing batch size in terms of Kg.

- You have submitted that API lot used in manufacturing of stability batches is 18CF10035 while submitted COA of totally different batches in section 3.2.S.4.4. Justify why data was not submitted in line with the guidance document issued by Registration Board.
- Justify why only 3 chromatographs of the standard solution was run while USP General chapter <621> recommends that five replicates of standard solution should be used for system suitability studies.
- Provide raw data sheets showing calculation of the results during the stability studies for all batches.
- Justify why the stability study data is section 3.2.P.8.3 is not submitted as per the guidance document issued by Registration Board.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing
- Justify why BMR of different batches is submitted than that for which stability studies were conducted.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

The product development and stability study data of the contract manufacturer was considered by Registration Board in its 312nd meeting and observed that the contract manufacturer has not performed complete product development studies, the specifications adopted by the manufacturer throughout stability studies were not according to USP and that the stability batches have also expired. Accordingly, the Board deferred for following submissions:

- Scientific justification for having the method of sample solution preparation for the commercial batches which is entirely different from that specified in USP monograph.
- Scientific justification for not performing compatibility studies with the recommended diluent.
- Scientific justification for using an entirely different formula for calculation of assay resultsof commercial batches from that specified in USP monograph.
- Scientific justification for not performing test of sodium content.
- Scientific justification for not performing criticial tests like constituted solution, and loss on drying during the stability studies.
- Scientific justification for performing stability studies in which the test of bacterial endotoxin and sterility is not performed at 6 months time interval.
- Scientific justification for using only 3 chromatograms of the standard solution for HPLC testing while USP General chapter <621> recommends that five replicates of standard solution should be used for system suitability studies.
- Evidence of purchase of atomic absorption spectrophotometer including commercial invoice and Installation Qualification (IQ) and Operational Qualification (OQ) of atomic absorption along with performance data for sodium content test on stability batches.
- Submission of fee for pre-registration changes in the drug product specifications.

The Board further decided that the submitted stability study data is not acceptable and directed the contract manufacturer to either perform complete product development and stability studies as per USP specifications or submit aforementioned data for commercial batches manufactured as per USP specifications.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	COA of API	
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	
3.	Protocols followed for conduction of stability study and details of tests.	
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	

5.	Documents confirming import of API etc.	
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	
7.	Commitment to continue real time stability study till assigned shelf life of the product.	
8.	Commitment to follow Drug Specification Rules, 1978.	

REMARKS OF EVALUATOR

- Drug substance related information including name and address of API manufacturer, and approval of manufacturing facility of API manufacturer by regulatory body of the concerned country as per the requirements of sub section 1.6.5 needs to be submitted.
- Quality overall summary (QOS) in module 2 needs to be submitted as per WHO QOS - PD template.
- Complete information related to drug substance as per requirement of sub section 3.2.S needs to be submitted in the light of guidance document approved by Registration Board in its 293rd meeting.
- Complete information related to drug product as per requirement of sub section 3.2.P needs to be submitted in the light of guidance document approved by Registration Board in its 293rd meeting.
- Submit stability study data of 3 batches of drug product along with associated data / documents (as per 6 points checklist) as per the guidance document approved by Registration Board in its 293rd meeting.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Composition	"Each 1ml Contains: Cholecalciferol (Vitamin D3)…5mg"
	Diary No. Date of R& I & fee	Dy. No 17650 dated 11-05-2018 Rs.20,000/- Dated 11-05-2018 Rs. 30,000/- dated 27-06-2019
	Pharmacological Group	Vitamin
	Type of Form	Form 5
	Finished product Specifications	Manufacturer specifications
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	Approved by ANSM of France
	Me-too status (with strength and dosage form)	D-Tres 5mg/ml Injection by M/s Sami (Reg#076115)
	GMP status	Last GMP inspection dated 5th & 27th December, 2017 conclusion by Panel ―The firm (M/s NovaMed Pharmaceuticals Pvt. Ltd. Lahore) is compliant to Good cGMP guidelines at the time of inspection.
	Remarks of the Evaluator[II]	Form 5 was initially submitted from the manufacturer i.e. M/s Novamed Pharmaceuticals (Pvt.) Ltd. 28-km, Ferozepur Road, Lahore. Subsequently fresh Form 5 has been submitted by the applicant i.e., M/s Next Pharmaceutical Products Private Limited. Plot No. 44 A-B, Sundar Industrial Estate, Lahore, dated 25-07-2019.

		• Reference product is available in ampoule whereas firm has applied for vial.
	Decision of 291st meeting: Registration Board decided to defer all applied products of contract manufacturing from M/s Novamed Pharmaceuticals (Pvt) Ltd. 28-km, Ferozepur Road, Lahore, for assessment of manufacturing and quality control capacity of M/s Novamed Pharmaceuticals (Pvt) Ltd. 28-km, Ferozepur Road, Lahore. Moreover, clarification shall be submitted regarding container closure system, since reference product is available in ampoule whereas firm has applied for vial.	
	Firm's response: Firm has referred to the Capacity assessment inspection report of M/s Novamed Pharmaceuticals Pvt Ltd, 28km Ferozepur Road, Lahore presented in 295th meeting of Registration Board wherein Board decided to allow contract manufacturing from M/s Novamed Pharmaceuticals Pvt Ltd, 28km Ferozepur Road, Lahore for following sections: • Dry Powder Injection (Cephalosporin) Section • Dry Powder Suspension (Cephalosporin) Section • Capsule (Cephalosporin) Section • General Liquid Injection (Ampoule) • General Liquid Injection Vials (SVP)	
	Decision of 320th meeting: Registration Board deferred the applications of contract manufacturing from M/s Medisave pharmaceuticals, Plot 578-579, Sunder Industrial Estate, Lahore, Pakistan for submission of upgradation plan regarding increase in testing capacity especially HPLC, microbiological testing etc to cater the need of pharmacopoeial testing of already registered drug products, products under development and contract manufactured products as decided in 317th meeting of Registration Board.	
	Remark Evaluator: Subsequent evaluation of record has revealed that decision of Board was erroneously drafted as deferred considering the drug product manufacturer as M/s Medisave, whereas firm has applied for contract manufacturing from Novamed Pharmaceuticals (Pvt) Ltd.	
	Decision: Registration Board noted the information and decided to approve the applied product of D-Next 5mg/ml IV/IM Injection with innovator's specification. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter. • **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Bio Mark Pharmaceuticals. Plot No. 527, Sundar Industrial Estate, Lahore.**

	Name, address of Manufacturing site.	M/s.Carer pharmaceuticals plot No.27 RCCI Industrial estate Rawat Islamabad Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 6506 dated 09-03-2022
	Details of fee submitted	Rs.30,000/- dated 25-01-2022
	The proposed proprietary name / brand name	**Caracip 500mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ciprofloxacin as hydrochloride …….. 500mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	CIPRO 500mg tablet by Bayer Healthcare USFDA Approved.
	For generic drugs (me-too status)	CFLOX 500 mg Tablet by Global
	GMP status of the Finished product manufacturer	New license granted on 07/06/2021 Tablet, Capsule, Dry powder and Ampule (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	M/s Saakh Pharma Pvt. Ltd., Plot # C-7/1, North Western Industrial Zone Port Qasim, Karachi
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ciprofloxacin Hydrochloride is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Ciproxin 500mg Tablets by Bayer Healthcare performing quality tests. CDP has been performed against the same brand that is Ciproxin 500mg Tablet by Bayer Healthcare in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 83/2020-DRAP(K) issued by CFDA valid till 23/06/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Local purchase from SAAKH PHARMA KARACHI.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	N/A

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4.1	• Drug substance specifications & analytical procedure submitted form M/s Saakh Pharma, mention both USP & BP as reference. Clarification shall be submitted for claiming both standards as specifications. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the	Drug substance manufacturer has claimed that the drug substance complies both BP & USP monograph while M/s Carer Pharma has adopted USP specifications and analytical procedure for Drug substance.

	Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	Submitted.
3.2.S.4.4	Submitted COA of drug substance mentions manufacturing date as December 2021, whereas date of analysis is declared as 25-06-2021.	Firm has declared it a typographical error and has submitted revised COA.
3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	Submitted.
3.2.S.7	Long term stability studies data of 3 batches for drug substance shall be submitted form M/s Saakh pharma.	Firm has submitted long term stability studies data as per Zne IVa of three batches till 48 months.
3.2.P.2.2.1	CDP studies have been performed with two sampling time points only whereas relevant guidelines recommend at least three sampling time points.	
3.2.P.5.3	• Performance of precision & specificity parameter shall be submitted for analytical method verification studies. • Results of accuracy parameter are not as per the specified concentrations in the method.	Firm has submitted revised analytical method verification studies with performance of precision & specificity parameter.
3.2.P.6	• COA of primary / secondary reference standard including source and lot number shall be provided.	Submitted.
3.2.P.8.3	• Analytical results mentioned in stability summary sheets are different from that declared in batch analysis COA. • Manufacturing date mentioned on Stability summary sheets is different form that declared on COAs. • UV wavelength declared on submitted chromatograms of Assay analysis is different from that mentioned in method. • HPLC chromatograms have been submitted from dissolution analysis whereas USP monograph recommends USP spectrophotometric method. • Complete batch manufacturing record shall be submitted for all three stability batches.	• Firm has submitted revised stability summary sheets declaring results & manufacturing date as per submitted COA. • Firm has submitted complete batch manufacturing records of all three stability batches.

Decision: Registration Board approved the applications of Caracip 500mg tablet and Caracip 250mg tablet with change of brand name. Registration letter will be issued upon submission of following:

- **CDP studies against the innovator product as per time points recommended by relevant guidelines**
- **Performance of stability studies with revised analyticalmethod as per USP at next time point of long term stability studies.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 32728 dated 01-12-2021
	Details of fee submitted	Rs.20,000/- dated 16-04-2021 & Rs.10,000/- dated 20-09-2021
	The proposed proprietary name / brand name	SciAmpa-M 5+500 mg tablet

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin……..5mg Metformin HCl……..500mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Anti-hyperglycemic agents (A10BD20)
	Reference to Finished product specifications	Manufacturer's
	Proposed Pack size	14's & 28's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Synjardy 5+500 mg tablet **(EMA** Approved).
	For generic drugs (me-too status)	XENGLU-MET 5MG +500mg Tablet of Hilton Pharma (Reg #093102)
	GMP status of the Finished product manufacturer	Renewal of license granted on 01/06/2021 Tablet, Capsule, Ointment/Cream, Sachet, Dry Powder Inhalaer & Dry Powder suspension (General) sections approved. Last inspection conducted on 16-11-2021 and concludes that firm was considered to be operating at Good level of compliance
	Name and address of API manufacturer.	**API manufacturer of Empagliflozin** Name: Fuxin Long Rui Pharmaceutical CO., Ltd. Address: Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China **API manufacturer of Metformin Hydrochloride** Name: Shouguang Fukang Pharmaceutical Co., Ltd. Address: North-East of Dongwaihuan Road, Dongcheng Industrial Area
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of both API at accelerated as well as real time conditions. The real time stability data of Empagliflozin conducted at 30±2°C, 65%±5% RH. The stability study data is till 26 months.

		The real time stability data of Metformin hydrochloride conducted at 30±2°C, 75%±5% RH. The stability study data is till 60 months.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Compartitive dissolution profile against Xenglu Met 5+500mg Tablet of Hilton Pharma
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Glusimet XR 50/500mg Tablets & Glusimet XR 50/1000mg Tablets which was conducted on 16th July, 2020 and was presented in 296th meeting of Registration Board held on 8th - 10th September, 2020. According to the report following points were confirmed. □ The firm has 21 CFR compliant HPLC software □ The firm has audit trail reports available. □ The firm possesses stability chambers with digital data loggers.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin** Copy of DML certificate No. Liao20150233 issued by FDA of Liaoning Province valid till 20/12/2022. **Metformin HCl:** Copy of GMP certificate No. SD20190888 issued by CFDA valid till 12/03/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of form 5, invoice (invoice# HN19011801-H) Dated: 18-01-2020, cleared by DRAP Karachi office dated 30-01-2020 specifying import 10Kg Empagliflozin (Batch# E-20190920-D02-E06-01). **Metformin HCl:** Firm has submitted copy of Form 5 & invoice (invoice# 20FK04Z4106B) Dated: 05-05-2020 from Shouguang Fukang Pharmaceutical Co., Ltd. cleared, cleared by DRAP Karachi office dated 30-01-2020 specifying import 3000Kg Metformin HCl (Batch# A-32612004031 & A-32612004032).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Decision: Approved with innovator's specification. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator[II]:

- The applied formulation to be manufactured by M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi have already been granted approval in 297th meeting of Registration Board. The case of the applied formulation of M/s Genix Pharma Private Limited 44-45B Korangi Creek Road Karachi, was considered and approved by Registration Board in its 297th meeting on Form 5D, based on the stabiltiy data as per checklist for "Exemption from On-site inspection". The details of the already considered product in 297th meeting are as follows:

Applicant firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi	
Manufacturer firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi	
Brand Name	Silpro 4mg capsule	Silpro 8 mg capsule
Batch No. of drug product	19SB-209-01 19SB-209-02 19SB-209-03	19SB-212-01 19SB-213-02 19SB-214-03
Case No.	532	533
Registration Board meeting	297th meeting of Registration Board held on 12 -15 January, 2021	

- Following data had been evaluated earlier in the above referred application of M/s Genix Pharma approved in 289th meeting:
  - Method used for analysis of API along with COA.
  - Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)
  - Record of comparative dissolution data against the reference product of Synjardy tablet.
  - Complete batch manufacturing record of three stability batches.
  - Reports of stability studies of API from manufacturer.
  - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

In addition to above referred data, which has also been evaluated in applicaton of M/s Genix pharma, the firm has submitted following data also in compliance to the requirements of Form 5F:

- QOS.
- Pharmaceutical Equivalence studies.
- Process validation protocol.
- Analytical method validation studies for drug product.

- Analytical method verification studies for drug substance performed by the drug product manufacturer shall be submitted.

Decision: Registration Board approved applications of Sildos 4mg Capsule & Sildos 8mg Capsule.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

Remarks of Evaluator[II]:

- The applied formulation to be manufactured by M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi have already been granted approval IN 317th meeting of Registration Board. The case of the applied formulation of M/s Genix Pharma Private Limited 44-45B Korangi Creek Road Karachi, was considered and approved by Registration Board in its 317th meeting on Form 5D, based on the stabiltiy data as per checklist for "Exemption from On-site inspection". The details of the already considered product in 317th meeting are as follows:

Applicant firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi	
Manufacturer firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi	
Brand Name	ERTOZIN-S Tablet 5mg/100mg	ERTOZIN-S Tablet 15mg/100mg
Batch No. of drug product	20SB-004-01 20SB-005-02 20SB-006-03	20SB-001-01 20SB-002-02 20SB-003-03
Case No.	11	12

Registration Board meeting	317th meeting of Registration Board held on 16 -17 May, 2022

- Following data had been evaluated earlier in the above referred application of M/s Genix Pharma approved in 289th meeting:
  - Method used for analysis of API along with COA.
  - Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)
  - Record of comparative dissolution data against the reference product of Synjardy tablet.
  - Complete batch manufacturing record of three stability batches.
  - Reports of stability studies of API from manufacturer.
  - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

In addition to above referred data, which has also been evaluated in applicaton of M/s Genix pharma, the firm has submitted following data also in compliance to the requirements of Form 5F:

- QOS.
- Pharmaceutical Equivalence studies.
- Process validation protocol.
- Analytical method validation studies for drug product.

- Analytical method verification studies for drug substance performed by the drug product manufacturer shall be submitted.

Decision: Registration Board approved applications of Erglif-S 15/100 mg Tablet & Erglif-S 5/100 mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

1377	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Daneen Pharma Private Limited 27-Sundar Industrial Estate, Sundar Raiwind Road, Lahore**

Remarks of Evaluator[II]:

- The applied formulation to be manufactured by M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi have already been granted approval 19-10-2020. The case of the applied formulation of M/s Genix Pharma Private Limited 44-45B Korangi Creek Road Karachi, was considered and approved by Registration Board in its 293rd meeting on Form 5D, based on the stabiltiy data as per checklist for

"Exemption from On-site inspection". The details of the already considered product in 293rd meeting are as follows:

Applicant firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi
Manufacturer firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi
Brand Name	Empag M 5mg + 1000mg XR Tablets
Batch No. of drug product	18SB-103-01 18SB-104-02 18SB-105-03
Case No.	2453
Registration Board meeting	293rd meeting of Registration Board held on 6 -8 January, 2020

- Following data had been evaluated earlier in the above referred application of M/s Genix Pharma approved in 289th meeting:
  - Method used for analysis of API along with COA.
  - Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)
  - Record of comparative dissolution data against the reference product of Synjardy tablet.
  - Complete batch manufacturing record of three stability batches.
  - Reports of stability studies of API from manufacturer.
  - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

In addition to above referred data, which has also been evaluated in applicaton of M/s Genix pharma, the firm has submitted following data also in compliance to the requirements of Form 5F:

- QOS.
- Pharmaceutical Equivalence studies.
- Process validation protocol.
- Analytical method validation studies for drug product.

- Analytical method verification studies for drug substance performed by the drug product manufacturer shall be submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

Case No.	403
Registration Board meeting	289th meeting of Registration Board held on 14-16 May, 2019

- Following data had been evaluated earlier in the above referred application of M/s Genix Pharma approved in 289th meeting:
  - Method used for analysis of API along with COA.
  - Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)
  - Record of comparative dissolution data against the reference product of Synjardy tablet.
  - Complete batch manufacturing record of three stability batches.
  - Reports of stability studies of API from manufacturer.
  - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

In addition to above referred data, which has also been evaluated in applicaton of M/s Genix pharma, the firm has submitted following data also in compliance to the requirements of Form 5F:

- QOS.
- Pharmaceutical Equivalence studies.
- Process validation protocol.
- Analytical method validation studies for drug product.

Analytical method verification studies for drug substance performed by the drug product manufacturer shall be submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

f	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

- The applied formulation to be manufactured by M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi have already been granted approval 19-10-2020. The case of the applied formulation of M/s Genix Pharma Private Limited 44-45B Korangi Creek Road Karachi, was considered and approved by Registration Board in its 289th meeting on Form 5D, based on the stabiltiy data as per checklist for "Exemption from On-site inspection" of same batches of drug product as submitted in the instant case. The details of the already considered product in 289th meeting are as follows:

Applicant firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi
Manufacturer firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi
Brand Name	Empag-M Tablet 5mg/1000mg
Batch No. of drug product	18SB-097-01 18SB-098-02 18SB-099-03
Case No.	405
Registration Board meeting	289th meeting of Registration Board held on 14-16 May, 2019

- Following data had been evaluated earlier in the above referred application of M/s Genix Pharma approved in 289th meeting:
  - Method used for analysis of API along with COA.
  - Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)
  - Record of comparative dissolution data against the reference product of Synjardy tablet.
  - Complete batch manufacturing record of three stability batches.
  - Reports of stability studies of API from manufacturer.
  - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

In addition to above referred data, which has also been evaluated in applicaton of M/s Genix pharma, the firm has submitted following data also in compliance to the requirements of Form 5F:

- QOS.
- Pharmaceutical Equivalence studies.
- Process validation protocol.
- Analytical method validation studies for drug product.

Analytical method verification studies for drug substance performed by the drug product manufacturer shall be submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

1381	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Daneen Pharma Private Limited 27-Sundar Industrial Estate, Sundar Raiwind Road, Lahore**

Remarks of Evaluator[II]:

- The applied formulation to be manufactured by M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi have already been granted approval 19-10-2020. The case of the applied formulation of M/s Genix Pharma Private Limited 44-45B Korangi Creek Road Karachi, was considered and approved by Registration Board in its 289th meeting on Form 5D, based on the stabiltiy data as per checklist for "Exemption from On-site inspection" of same batches of drug product as submitted in the instant case. The details of the already considered product in 289th meeting are as follows:

Applicant firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi
Manufacturer firm	M/s Genix Pharma Private Limited 44-45B Korangi creek Road Karachi
Brand Name	Empag-M Tablet 5mg/500mg
Batch No. of drug product	18SB-093-01, 18SB-095-01, 18SB-096-01,
Case No.	406
Registration Board meeting	289th meeting of Registration Board held on 14-16 May, 2019

- Following data had been evaluated earlier in the above referred application of M/s Genix Pharma approved in 289th meeting:
  - Method used for analysis of API along with COA.
  - Method used for analysis of FPP & complete record of testing of stability batches (i.e. chromatograms, lab reports, raw data sheets etc.)
  - Record of comparative dissolution data against the reference product of Synjardy tablet.
  - Complete batch manufacturing record of three stability batches.
  - Reports of stability studies of API from manufacturer.
  - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

In addition to above referred data, which has also been evaluated in applicaton of M/s Genix pharma, the firm has submitted following data also in compliance to the requirements of Form 5F:

- QOS.
- Pharmaceutical Equivalence studies.
- Process validation protocol.
- Analytical method validation studies for drug product.

Analytical method verification studies for drug substance performed by the drug product manufacturer shall be submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Genix Pharma Pvt Ltd. 44,45-B, Korangi Creek Road, Karachi, 75190, Pakistan.**

Batch Size	7434 vials	7558 vials	7791 vials
Manufacturing Date	09-2017	02-2018	07-2018
Date of Initiation	15-10-2017	15-03-2018	29-08-2018
No. of Batches	03		

Administrative Portion

a	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
b	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
c	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Purchase invoice No. S180201 attested by DRAP dated 06.06.2018 is submitted
d	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
e	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
f	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observation	Firm's response
1.6.5	Valid GMP certificate of drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP issued by Ministry of Health & Welfare, Taiwan, valid till 23/01/2024
3.2.S.5	• Justification shall be submitted for using Ertapenem sodium lyophilized powder as working standard insetad of the pure Eertapenem sodium. • Submitted drug substance analytical procedure mandates use of Ertapenem as working standard whereas submitted COA is of Ertapenem sodium lyophilized powder.	We received working standard Ertapenem sodium as lyophilized powder from supplier. Saviour Lifetech Corporation herenby confirmed that ertapenem sodiumlyophilized powder is more suitable as workingstandrad than Ertapneem sodium due to its longer retest period. 24 m. In thi scase, ertapaneme sodiumlyophilized powder can be used in a more reliable way. The actual assay can be calibrated by method calculation. The ertapenem sodium lyophilized powder is preferable as working standard by our expert's persepective. Therefore, the submitted COA of Ertapneem sodiumlyophilized powder was provide din 3.2.S.5.
3.2.S.7.3	Justification shall be submitted for conducting drug substance stability studies at refrigerating conditions.	As Ertapenem sodium lyophilized powder will b edirectly filled in to vial, the quality of Ertapenem sodium lyophilized powder is very critical and should be preserved in conservative way at lower temperature. Therefore based on this concept we chose to conduct the stability studies of drug substance in storage conditions of 5 $\pm$3^{o}C to ensure quality.
3.2.P.1	• Justification shall be submitted for proposed fill weight per vial of Eetapenem sodium considering the actual content of sodium declared in the drug substance analysis and content of sodium bicarbonate in the drug substance. • Details of accompanying reconstitutuin diluent shall be submitted.	• The justification is as under: 1gmof Ertapenem for injection (Bulk sterile) will contain following: Ertapenem monosodium ….. 809.60mg Sodium bicarbonate …….. 135.40mg NaOH…….. 55.0mg Total……. 1000.0mg Factor = Ertapenem sodium/Ertapneem = 497.50/475.5 = 1.046 Then, 1000.0mg x 1.046 1046.00mg appx. 1050mg. The filled weight of 1340mg against the determined potency of 78.20% of drug substance eis justified as per above referred calculations. • Diluent is not the part of finished pack.
3.2.P.2.2.1	• Submit justification of not performing tests of pH, sterility, water content, endotoxins and particulate matter in Pharmaceutical equivalence studies.	Due to insufficient qanity of innovator sample, we performed appearance, identification and Assay. As per requirements from DRAp, we performed all test on new innovator sample "Invanz injection".
3.2.P.2.6	• Comaptibility studies with the reconstitution diluent shall be submitted.	Submitted with 0.9% sodium chloride solution.
3.2.P.5	• Justification shall be submitted for not including tests of completeness and clarity of solution, pH, & water content in the drug product	The material Ertapenemm sodium is lyiophilized sterile powder and ready to fill material, we performed these test during API testing.

	specifications, as recommended by the Innovator product.	
3.2.P.6	• Justification shall be submitted for using Ertapenem sodium lyophilized powder as working standard insetad of the pure Eertapenem sodium.	Same as above in section 3.2.S.6
3.2.P.8	• Justification shall be submitted for not performing tests of completeness and clarity of solution, pH, & water content during stability studies. • Complete batch manufacturing record shall be submitted for the three stability batches. • Microbial reports shall be submitted for the sterility testing during stability studies. • Documents confirming import of drug substance with approval form DRAP shall be submitted.	• The material Ertapenemm sodium is lyiophilized sterile powder and ready to fill material, we performed these test during API testing in order to reduce the test on finished product testing and on basis of supplier stability studies of real time as well as accelerated. It is concluded that the API is stable throghot the shelf life. • BMRs have been submitted.

Decision: Deferred for scientific justification for:

- **Use of Ertapenem sodium lyophilized powder as working standard insetad of the pure Eertapenem sodium since submitted drug substance analytical procedure mandates use of Ertapenem as working standard whereas submitted COA is of Ertapenem sodium lyophilized powder.**
- **Not including tests of ests of completeness and clarity of solution, pH, & water content in drug product specifications and stability studies.**

Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Dexilant capsule 60mg** M/s Takeda Pharmaceuticals America, Inc. CDP is submitted.
	Analytical method validation/verification of product	Method verification studies have been submitted including justification of system suitability, specificity, linearity, accuracy, precision-repeatability.

STABILITY STUDY DATA

Manufacturer of API	M/s Alphamed Formulations Private Limited. Survey No.: 225, Sampanbole Village, Shamirpet Mandal, Ranga Reddy District, Telangana – 500 078, India
API Lot No.	ABC082021001/B
Description of Pack (Container closure system)	Alu/alu blister
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 24 months Accelerated: 6 months
Frequency	Accelerated:0,3 & 6(Months)

		Real Time: 0,3, 6, 9 ,12,18 & 24 (Months)		
Batch No.		001C208	002C208	003C208

	Name, address of Manufacturing site.	M/s Vision Pharmaceuticals Plot # 22,23, Industrial Triangle, Kahuta Road, Islamabad		
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)		
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)		
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales		
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate issued on basis of inspection conducted on 11-02-2019, wherein Liquid Ampoule general section is declared.		
	Dy. No. and date of submission	Dy.No 29539 dated 29-10-2021		

	Details of fee submitted	Rs.50,000/- dated 12-2021 & Rs.25,000/- dated 15-10-2021
	The proposed proprietary name / brand name	**Rogvit-D Injection 5mg/ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ampoule Contains: Cholecalciferol ……. 5mg
	Pharmaceutical form of applied drug	Liquid Injection
	Route of administration	IM
	Pharmacotherapeutic Group of (API)	Vitamin
	Reference to Finished product specifications	**In-House**
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by ANSM of France.
	For generic drugs (me-too status)	Sunny D Injection of M/s Scotmann Pharma (Reg.#063450)
	GMP status of the Finished product manufacturer	Firm has submitted copy of GMP certificate issued on basis of inspection conducted on 11-02-2019
	Name and address of API manufacturer.	M/s FERMENTA BIOTECH LIMITED, Village Takoli, P.O. Nagwain, Dist. Mandi-175121, Himachal Pradesh, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $25^{O} \pm 2^{O}$ C /60% ± 5% RH for 6 months. The real time stability data is conducted at $5^{O}C \pm 3^{O}$ C.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence studies against the Indrop-D injection.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Manufacturing Date	01-2018	12-2018	12-2018
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate (Certificate# 2062043) of M/s FERMENTA BIOTECH LIMITED. Plot no. Z-109-B 7 C, SEZ-II, DAHEJ, TAL-VAGRA, Dahej, dist. Bharuch, Gujarat State, India issued BY Food 7 Drugs Control Administration, Gujarat, India valid up to 17-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice (invoice#RV2010020173) approved by AD DRAP I&E Islamabad dated 11-11-2020 for the import of Cholelcalciferol from M/s FERMENTA BIOTECH LIMITED. Plot no. Z-109-B 7 C, SEZ-II, DAHEJ, TAL-VAGRA, Dahej, dist. Bharuch, Gujarat State, India
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	--
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.1	Differential fee for Rs. 25,000/- shall be submitted.	
3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Submitted
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	Submitted.
3.2.S.4.4	Provide results of analysis along with analytical record, of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / Active Pharmaceutical Ingredient manufacture.	Submitted
3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	Submitted
3.2.S.7	Evidence of availability of cold storage facility in the raw material store shall be submitted, since the drug substance manufacturer has recommended storage of API at 2- 8°C.	Calibration Certificate is attached for evidence
3.2.P.3.3	Submitted manufacturing procedure neither includes step of terminal sterilization nor the aseptic filtration prior to the ampoule filling. Justification shall be submitted regarding how the sterility of product is ensured.	Firm has submitted BMRs declaring steps of sterilization.
3.2.P.4.1	Pharmacopoeial reference for the used excipient shall be submitted or else detailed specifications and analytical procedure shall be submitted for excipient used in the formulation.	Submitted.
3.2.P.5.1	• Submitted drug product specifications does not include test of "Uniformity of Dosage Units". • Justification shall be submitted for un-conventional Assay limits of "90% to 120%". • Test of sterility does not refer to any particular or general limits. • Submitted specification does not include test of sterility & endotoxin.	Firm has submitted revised specifications. Previously we were adding overage/excess quantity in formulation and that was the reason that we were giving the limit of 90-120% but currently we are not adding any excess and also the limit of BP for Cholecalciferol injection 7.5mg/ml which is 90-110% is followed for 5mg/ml injection. Revised SOP of product of Shine D injection is attached here with. For sterility testing we are following the USP monograph <71>. Submitted Specifications already have specs of sterility and Endotoxin
3.2. P.5.2	• Detailed analytical procedures used for testing the drug product shall be provided	Submitted
3.2. P.5.3	• Assay limits proposed in 3.2.P.5.1 are 90-120%, whereas various parameters of	Typographic mistake.

	Analytical method validation have been performed with limit of90.0% - 110%. • Accuracy parameter has not been performed for concentration range below 100%.	In Linearity and range we had checked the sample even on 50% concentration, which is below 100%, and this gives a linear result. In recent validation methods we had incorporated checking at low concentration for accuracy and recovery below 100%, (i.e 80%), and also at 120%. Revised/Current Method validation is submitted.
3.2. P.5.4	The copies of complete analysis reports of stability batches shall be provided.	Submitted.
3.2. P.5.6	The section declares that "Product is pharmacopoeial". Evidence of monograph shall be submitted for the claimed Pharmacopoeial status of the product.	--
3.2.P.8.3	• Submitted GMP certificate is of other drug substance manufacturer than that declared in section 1.6.5 & 3.2.S.2. • Submitted commercial invoice is of date subsequent to the date of manufacturing of stability batches. • Submitted commercial invoice is from other drug substance manufacturer than that declared in section 1.6.5 & 3.2.S.2. • Submitted COA of stability batches at all time points of stability studies does not include performance of tests of "Uniformity Of Dosage Units", • Submitted Summary sheets of batch #1218408 & 1218409 declare the use of API lot# CLC0420149 for the manufacturing of said batches, but as per submitted commercial invoice the manufacturing date of the said API Lot# CLC0420149 is October 2020, which is subsequent to the date of manufacturing of stability batch#1218408 & 1218409.	API lot No: CLC0417053 is used for all of three stability batches.

Decision: Regsitration Board deferred the case for following:

- **Documents attested by AD DRAP I&E, confirming import of relevant batch# of drug substance used in the manufacturing of drug product stability batches.**
- **Drug product manufacturing and analytical record of recent commercial batch manufactured by M/s Vision Pharmaceuticals.**
- **Registration status of the "Vitamin D3 injection" in name of M/s Vision pahrmaceuticals.**

1386.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Rogen Pharmaceuticals Plot No 30, S-4, national industrial zone, Rawat, Islamabad, Islamabad Capital, Territory**

Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18 & 24 (Months)		
Batch No.	19F015	19G352	19H018
Batch Size	90 Liters	90 Liters	90 Liters
Manufacturing Date	05-2019	07-2019	08-2019
Date of Initiation	03-07-2019	13-11-2019	18-09-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: The HPLC software is 21 CFR compliant. The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted valid GMP Certificate No: HE2019-142 by National Medical Products Administration China, valid till 29-11-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of ADC (I&E) granted by DRAP dated on 09/07/2019, diary No: 1055.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Observations	Firm's response
3.2.S.5	COA of submitted working standard declares validity date as 02-09-2018, whereas drug substance analysis has been performed subsequent to this date, by M/s Global	Coa of an old working standard was submitted mistakenly. COA of working standard actually use din analysis is submitted now.
3.2. P.1	Describe functional role of each excipient used in formulation	Firm has submitted functional role of each excipient used in the formulation , wherein "Benzyl alcohol" has been declared as preservative.
3.2. P.2.2.2	The justification statement "Overage is added to adjust potency", shall be elaborated.	To compnensate the machine variation and to overcome weigt losses in manufacturing process, overage was added.
3.2.P.5.1	• Literature of the innovator product approved by PMDA of japan declares the specifications for pH as 5.3-7.3, whereas firm has proposed pH range of 5.0-7.0. Justification shall be submitted for this variation. • Submitted specification does not include test for "Antimicrobial effectiveness", as recommended by USP general chapter <51>. Justify this disparity since proposed formulation contains "Benzyl Alcohol" as an antimicrobial agent. • Justify the unconventional limits of 90-125% for Assay test.	• As literature of innovator product was not available at the time of product development, pH of innovator product was determined by pH meter and set the pH of our product close to innovator actual pH. Stability studies are around 6.6, which is wel within th elimits of Innovator given in literature. Limit of ph is now changed from 5.0 -7.0 to 5.3 – 7.3 in specifications. • Test for antimicrobial effectiveness is recommended for multi-dose sterile products to check the effectiveness of anti-microbial agent after opening of injection and storage for second dose, our injection is single dose solution. • In drug product specifcations i.e., 90-125% is a typographical mistake. Correct Assay limits are 90-150%.
3.2.P.5.2	• Justification shall be submitted for performance of Assay analysis by "UV spectrophotometric method", whereas the JP monograph of mecobalamin has applied HPLC method. • Different Assay limit between COA (90-150%) and 5.1 (90-125%) •	• JP does not contain mecobalamin injection monograph. We have validated metghod on UV spectrophotometry and performed testing. As the product is developed according to in-house specifications so initially UV method was adopted for testing of drug product. The method was applied for stability studies and later on method was changed to HPLC and stability studies of other batches were carried according to HPLC method. • Firm has not submitted any data as per HPLC method.
3.2.P.5.4	Submitted batch analysis COA specify different Assay limits i.e., 90-150% than those declared in drug product specifications i.e., 90-125% submitted in section 3.2.P.5.1 • No batch size mention on COA • Two batches have Assay results above 125% which is against specifications submitted in section 3.2.P.5.1	• In drug product specifications 90-125% is a typographica;l mistake. Correct Assay limits are 90 -150%. • Batch size of 90.0 ltrs is mentioned on stability data and summary sheets of each batch. • Assay limits are 90-15% as mentioned in stability summary sheets and COAs.
3.2.P.5.6	This section declares details for Ketorolac injection.	It is a typographical mistake.

	3.2.P.8	• Different results for Assay test at initial time point have been reported in stability summary sheet of batch# 19F015 than those declared in COA submitted in section 3.2.P.5.4. • Significant change i.e., more than 5% in Assay results of accelerated stability studies for batch # 19H018 & 19G352 have been reported. • Submitted invoice is subsequent to the manufacturing date of batch# 19F015 • Submitted BMR does not declare the actual quantity dispensed for formulation of batches. • Justification shall be submitted for performance of Assay analysis by "UV spectrophotometric method", whereas the JP monograph of mecobalamin has applied HPLC method.	• It is a typographical mistake, results mentioned in stability summary sheets is correct. • 19H018 contain significant change at 6th month assay and test has been performed as per long term conditions i.e., 30°C ± 2°C / 65% ± 5%RH that covers the additional requirement i..e, 30°C ± 2°C / 60% ± 5%RH as per WHO guidelines. Result salso found within the specified limits i.e., 90-150%. • Firm has submitted copy of License to import fro 5Kg Mecobalamin batch# M190522 issued by AD I&E, Islamabad, dated 09-07-2019. • Firm has submitted copy of manufacturing orders for stability batches wherein excess quantity of 28% for Mecobalamin has been declared. • JP does not contain mecobalamin injection monograph. We have validated metghod on UV spectrophotometry and performed testing. As the product is developed according to in-house specifications so initially UV method was adopted for testing of drug product. The method was applied for stability studies and later on method was changed to HPLC and stability studies of other batches were carried according to HPLC method.

Decision: Deferred for scientific justification of:

- **Using excess quantity of 28% of drug substance in the formulation of submitted drug product stability batches.**
- **Use of "Benzyl alcohol" as preservative since applied formulation is single dose injection.**
- **Performance of Assay analysis during drug product stability studies by "UV spectrophotometric method", whereas the JP monograph of Mecobalamin has applied HPLC method.**

Batch Size	90 Liters	90 Liters	90 Liters
Manufacturing Date	03-2019	01-2019	04-2019
Date of Initiation	03-07-2019	13-11-2019	18-09-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP Certificate No: 3124 from Food & Drug Administration, Punjab valid till 24-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of ADC (I&E) granted by DRAP dated on 09/07/2019, diary No: 1055.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Observations	Firm's response
1.3.8-1.5.7	Relevant information has not been submitted	
2.3.R.1.1	Manufacturing process flow chart submitted in the batch manufacturing record declare the product as terminally sterilized via Autoclave, whereas no such step is mentioned in the executed batch manufacturing record. Clarification shall be submitted whether applied product is terminally sterilized or otherwise.	
3.2.S.5	COA of submitted working standard declares validity date as 29-05-2016, whereas drug substance analysis has been performed subsequent to this date, by M/s Global.	
3.2. P.1	Justify the proposed quantity of 30.9mg/ml of Ketorolac tromethamine, declared in composition table against the label claim of 30mg/ml.	
3.2.P.8	• Submit following: i. Documents for the procurement of API with approval from DRAP (in case of import). ii. Analytical record for complete stability studies including chromatograms, raw data sheets etc..	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

1388.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Ahad International Pharmaceuticals Ltd Dera Ismail Khan**

	The proposed proprietary name / brand name	**Parasafe Infusion 1gm/100ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml infusion contains: Paracetamol ……. 1gm
	Pharmaceutical form of applied drug	Solution for infusion
	Pharmacotherapeutic Group of (API)	Analgesic and Antipyretic
	Reference to Finished product specifications	In house specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Paracetamol 10mg/ml solution for infusion (One 100ml vial contains 1000mg Acetaminophen) of M/s Accord-UK Ltd approved by MHRA of UK
	For generic drugs (me-too status)	Provas Infusion 1Gm/100ml by Sami Pharma
	GMP status of the Finished product manufacturer	Panel inspection report dated 09-07-2020 concludes satisfactory level of cGMP compliance.
	Evidence of manufacturing facility	Copy of panel inspection report dated 09-07-2020 has been submitted wherein availability of "Sterile Vial Infusion" & "Ampoule" section has been mentioned.
	Name and address of API manufacturer.	M/s Citi Pharma (Pvt) Ltd, 3KM Head Baloki Road Phool Nagar District Qasur
	Module-II (Quality3. Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Acetaminophen is present in USP and BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence	Pharmaceutical Equivalence have been established against the Provas infusion 1Gm/100ml by Sami Pharma.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.3.1	The said section declares M/s Hebei Jiheng Pharmaceutical Co. Ltd as producer of Acetaminophen instead of M/s Citi Pharma.	According to invoice Neon chemical is our indenter which deals both companies. Now we are performing all the procedure according to Hebei Jiheng Pharma.
3.2.S.4.2	Analytical procedure submitted by Drug substance manufacturer is as per USP monograph, whereas Drug product manufacturer has submitted	Drug substance manufacturer complies both BP & USP specifications. Now we adopt analytical procedure according to USP specification.

	analytical procedure as per BP monograph. Justification shall be submitted for this variation.	
3.2.S.4.3	• Clarification shall be submitted that whether submitted analytical method verification studies have been performed by M/s Citi Pharma or M/s Ahad International. • Clarification shall be submitted that whether submitted analytical method verification studies have been performed as per USP or BP monograph.	• Analytical method verification studies have been performed M/s Ahad International. • Performed according ot USP monograph.
3.2.S.4.4	• COA of Paracetamol submitted from M/s CITI Pharma declares it as "Analytical Working Standard", whereas results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer shall be submitted. • Submitted COA form M/s Citi Pharma & M/s Ahad International does not include test of sterility. Clarification shall be submitted in this regard, since the drug substance is to be used in the formulation of a sterile product.	• Firim has submitted COA of drug substance from M/s Hebei Jiheng Pharmaceutical Co. Ltd. China for batch# COS012012049 which also includes sterility test.
3.2.S.4.5	The said section declares that the specifications adopted are as per the monograph specified in USP while in section 3.2.S.4.2 analytical procedure as per BP monograph has been submitted.	Drug substance manufacturer complies both BP & USP specifications. Now we adopt analytical procedure according to USP specification.
3.2.P.3.5	Submitted process validation protocol mentions the strength as 1000mg/10ml whereas applied strength is 1000mg/100ml.	It is typographic mistake while the original strength is 1000mg/100ml.
3.2.P.5.1	Justification shall be submitted for the proposed pH range of 4.0 -7.0 for the drug product since the available literature of the reference product declares different pH range than that proposed by the applicant.	Actual pH range 5 – 7 for drug product according to USP specifications.
3.2.P.5.3	Performance of Linearity parameter shall be submitted in Analytical method validation studies.	Submitted.
3.2.P.5.4	The copies of complete analysis reports of all three trial batches shall be provided. Submitted analytical report of Trial-01 does not include test of Sterility & Endotoxin.	Firm has submitted copies of batch analysis reports fo all three stability bayches including results for sterility testing and endotoxin.
3.2.P.8	• Submitted invoice from M/s Neon Chemicals declare quantity of Paracetamol as of	• Firm has submitted copy of letter from M/s Neon Chemicals, declaring submission of drug sample of

	50gm. Justification shall be submitted for manufacturing of three trial batches of 400vials each with 50gm of API. • Submitted stability summary sheets & reports declare condition of real time stability studies as 25˚C ± 2˚C / 60% ± 5%RH which is not as per Zone IVa. • Submitted analytical record shows that Assay calculations for all three stability batches at each time point of both accelerated & long-term stability studies have been performed by applying same value of Standard peak area. Justification shall be submitted in this regard. • Record of data logger of stability chambers shall be submitted. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.	2Kg from M/s Hebei Jiheng Pharmaceutical Co., Ltd., China to M/s Ahad International. • No document attested by AD I&E DRAP has been submitted in this regard. • Firm has submitted revised stability summary sheets m conditions as per Zone Iva. • Firm has submitted revised analytical record along with chromatograms. • Record of digital data logger has been submitted. • GMP certificate eof the drug substance manufacturer has not been submitted.
Decision: Deferred for clarification regarding manufacturer of drug substance along with documents confirming procurement of drug substance with approval of DRAP I&E office.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Pharmaceutical equivalence and CDP Studies data in three dissolution mediums of pH 1.2, 4.5 & 6.8 has been submitted against the Tamsolin-S tablet pf M/s Getz Pharma		

Section#	Observations	Firm's response
3.2.S.4 (Tamsulosin HCl)	• Submitted drug substance specifications of Tamsulosine granules does not include test of dissolution hence it's not evident that the Tamsulosine granules are modified release or otherwise. Justification shall be submitted in this regard. • Submitted COA from both drug substance and drug product manufacturer does not declare	• With reference to the control of drug substance, API manufacturer has tested the dissolution against the RLD Vesomni, but did not include the test in release specifications. Moreover, FPP Manufacturer has included the Dissolution Testing of Tamsulosin Granules at finished product stage, that shows the granules release is modified. • Dissolution testing is not included in the release specification. However, modified

	the Tamsulosine granules as "modified release". • Justification shall be submitted for using Tamsulosine granules 0.178% w/w% for drug product formulation without establishing its dissolution profile.	release of tamsulosin granules is declared in the label claim of the Finished Product. • Dissolution profile of the granules established at FPP stage as evident from the Product testing Method and CDP.
3.2.P.1	• Submitted label claim does not elaborate the immediate release & modified release layer of the dosage form.	Label claim of the tablet is as follow: Each bilayer modified release tablet contains: Solifenacin succinate… 6mg (Corresponding to 4.5mg of Solifenacin base) (Immediate release layer) Tamsulosin hydrochloride….0.4mg (Corresponding to 0.37mg of Tamsulosin base) (Modified release layer)
3.2.P.2.2.1	• Justification shall be submitted for performing CDP studies till 12 hours' time point only, whereas the drug product specifications mention the last time point as of 16hrs.	For Tamsulosin in CDP, release NLT 80% achieved in 12hours therefore next time point was not included in consideration.
3.2.P.5	• Justification shall be submitted for applying speed of 100rpm with USP Apparatus II in the dissolution test with reference to the provisions of USP general chapter <1092>.	According to USP General Chapter <1092>, Please consider the following, *"100 rpm may be used with Apparatus 2, especially for extended-release products. Decreasing or increasing the apparatus rotation speed may be justified if to achieve an in vitro–in vivo correlation (IVIVC) the resulting profiles better reflect in vivo performance, or if the method results in better discrimination without adversely affecting method variability."*
3.2.P.8.3	• Documents confirming import of drug substance used for formulation of stability batches, attested by DRAP, shall be submitted.	Copy of letter issued by AD I& E DRAP Islamabad, dated 28-10-2021, permitting import of Solifenacin 6% granules (25Kg) & Tamsulosin HCl 0.178% granules (50 Kg)
	• Submitted BMRs does not reflect the dispensing of Magnesium stearate, whereas the composition submitted in section 3.2.P.1 includes magnesium stearate. • Dispensed quantity of Tamsulosine HCl granules & Solifenacin granules, shall be justified against the potency determined during drug substance analysis.	• Mg. stearate in Section 3.2.P.1 is approximately 2% of the formulation which is used to increase the flow properties of granules only if required and that would be of Pharmacopeial Grade (BP), if used. Therefore, submitted BMR does not includes the Mg. Stearate. • Potency determined during the Analysis of both the drug substance is more than 100%, that's why Potency is considered equivalent to 100% while dispensing of Drug substance.

Decision: Deferred for following:

- **Justification for claiming "Tamsulosine HCl granules" as modified relase since no such declaration has been maned in drug substance specifications and COA.**
- **Scientific justification from drug substance emanufcaturer for not including test of "Dissolution" in the specifications of "Tamsulocin HCl granules" for establishing the modified release profile.**
- **Scientific justification from drug product manufacturer for not establishing dissolution profile of "Tamsulosine HCl granules" vide performance of dissolution test before using them as in the drug product formulation.**
- **Capacity assessment of manufacturing and testing facility of M/s Global Pharmaceuticals Pvt Ltd. Plot # 204-205, Industrial Triangle, Kahuta Road, Islamabad**

REMARKS OF EVALUATOR

Observations	**Firm's response**
3.2.S.4 You have submitted finished product specifications, COA, analytical method etc. instead of providing drug substance information.	Firm has submitted specifications and analytical method for drug substance.
Justify why the test for nitrates, sulphates, Aluminium and ammonium are not performed during stability studies.	We follow the USP specifications and as per USP 43 official monograp/ water 4653 we performed (appearance, pH, Conductivity, Total Orgainc Carbon, Bacterial Endotoxin tests) thereof tests of nitrates, sulphates, aluminum and ammonium are not mentioned in USP specifications.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm (manufcaturer)	GMP certificate issued on 13-08-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate of M/s Neutro Pharma, declaring the availability of Injectable general section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 32576 dated 30-11-2021
	Details of fee submitted	Rs.50,000/- dated 29-03-2021
	The proposed proprietary name / brand name	**Parmol 1000mg/100ml Infusion**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml vial contains: Paracetamol ……. 1000mg
	Pharmaceutical form of applied drug	Parenteral (Injectable)
	Pharmacotherapeutic Group of (API)	Analgesic/Antipyretic
	Reference to Finished product specifications	Manufacturer's Spec
	Proposed Pack size	1's x 100ml
	Proposed unit price	As per DRAP policy.
	The status in reference regulatory authorities	Approved by MHRA of UK
	For generic drugs (me-too status)	Falgan infusion of M/s Bosch
	Name and address of API manufacturer.	ANHUI BBCA LIKANG PHARMACEUTICAL CO., LTD Address: No 6288 Donghai Road, Bengube city, Anhui province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the brand leader that is BOFALGAN 1g/100ml Solution for infusion by **BOSH PHARMACEUTICALS (PVT) LTD** by performing quality tests (Identification, Assay, sterility & volume variation N/A
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long-term conditions.

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	GMP status & Evidence of manufacturing facility	Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The certificate is valid till 22-04-2022. The GMP certificate specifies Lyophilized vial (General) section. Firm has also submitted copy of letter for grant of additional section dated 23-07-2012 specifying Lyophilized vial (General) section.
	Dy. No. and date of submission	Dy.No 27956 dated 11-10-2021
	Details of fee submitted	Rs.75,000/- dated 20-09-2021

	The proposed proprietary name / brand name	**Inviczole 40mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each lyophilized vial contains: Esomeprazole as sodium……..40mg
	Pharmaceutical form of applied drug	Almost white colored lyophilized, hygroscopic powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Proton pump inhibitors
	Reference to Finished product specifications	In-house
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Nexium IV 40mg Injection of M/s AstraZeneca (USFDA approved).
	For generic drugs (me-too status)	Esomine 40mg Injection of M/s Lawari International (Reg # 069703)
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 23-4-2019, valid upto 22-4-2022.
	Name and address of API manufacturer.	M/s. Sterile India Pvt. Ltd. Plot No. 100, Sec-56 Phase - 4, Kundli Sonipat (Haryana) India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. (Batch No. SI/EPZ/0010312, SI/EPZ/0020312 & SI/EPZ/0030312).
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development,

		manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted pharmaceutical equivalence study report of trial formulation (Batch # L-315) with Nexum 40mg injection (Batch # 137P07) of M/s Getz pharma by performing quality tests (Description, water contents, pH, Sterility, assay). CDP- Not applicable
	Analytical method validation/verification of product	Analytical method validation studies have been submitted including linearity, range, accuracy, precision, specificity.

DOCUMENTS / DATA TO BE PROVIDED WITH STABILITY STUDY		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s. Sterile India Pvt. Ltd. Plot No. 100, Sec-56 Phase -4, Kundli Sonipat (Haryana) India valid upto 21-5-2021
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted attested copy of invoice (invoice# E/161/SIPL/19-20)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has not submitted audit trail reports on product testing.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

- Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP after 7th May 2021.
- Manufacturer has changed specifications of the drug product without submission of fee.
- The applied product to be manufactured by M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabadhave already been approved by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product in 316th meeting are as follows:

Applicant firm	M/s Gray's Pharmaceuticals. Plot No. 2, Street No. N-3, RCCI Rawat Rawalpindi.
Manufacturer firm	M/s Bio-Labs (Pvt) Ltd. Plot No. 145, Industrial Triangle Kahuta Road Islamabad
Brand Name	ESOMEP Injection 40mg
Batch No. of drug product	L-315, L-287, L-283
Case No.	787
Registration Board meeting	316th meeting of Registration Board

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	MR-004	MR-005	MR-006
Batch Size	350 vials	350 vials	350 vials
Manufacturing Date	01-2020	01-2020	01-2020
Date of Initiation	07-01-2020	07-01-2020	07-01-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. DC/A-1/WHO-GMP/2020/1961) issued by Drugs control organization, Governmnet of Rajasthan dated 09-12-2020. The certificate is valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of meropenem 3Kg from M/s Rajasthan Antibiotics Ltd. Plot No. 619 & 630 RIICO Industrial Area Bhiwadi – District Alwar Rajasthan India issued by AD (I&E) DRAP field office. The license was issued on 02-01-2020. • Firm has submitted copy of commercial invoice dated 02-01-2020 specifying import of 3Kg

		meropenem. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms,Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for only single day 01-07-2020.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.
Remarks of Evaluator: The applied formulation has already been approved for M/s Bio-next Pharma on basis of evaluation of Form 5F application in 296th meeting held on 8th, 9th & 10th September 2020.		
Decision: Registration Board approved the applications of Meropenem Injection I.V 500mg & Meropenem Injection I.V 1gm. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection"** • **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Bio-Next Pharmaceuticals wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.**		

b. Deferred cases

1396	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Martin Dow Marker Limited, 7-Jail Road, Quetta**	
	Name, address of Manufacturing site.	M/s Martin Dow Marker Limited, F-126, S. I. T. E., Karachi, Pakistan	
	Status of the applicant	☐Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)	
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)	
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales	
	Dy. No. and date of submission	Dy.No 25930 dated 17/09/2021	
	Details of fee submitted	PKR 50,000/-: PKR 25,000/-:	dated 04/05/2020 dated 30/06/2021

	The proposed proprietary name / brand name	ADVITA 20,000 IU CAPSULES
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Soft gel Capsule contains: Cholecalciferol…...20,000 IU
	Pharmaceutical form of applied drug	Clear light-yellow oily liquid
	Pharmacotherapeutic Group of (API)	Vitamin D analogs
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Fultium 20,0000 IU Capsule by M/s Internis Pharmaceuticals Limited, MHRA Approved.
	For generic drugs (me-too status)	
	GMP status of the Finished product manufacturer	Certificate No: F.14-1/DRAP/GMP/MDM-2022 issued on 03rd Feb 2022 Soft Gelatin Capsule (General) Dispensing, Mixing, Drying, Granulation, Compression, Coating, Blistering & Packaging.
	Name and address of API manufacturer.	M/s DSM Nutritional Product, France
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 25°C ± 2°C / 60% RH ± 5% RH for 24 months Accelerated: 30°C ± 2°C / 65% RH ± 5% RH for 6 months

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that **Fultium 20,0000 IU Capsule by M/s Internis Pharmaceuticals Limited**. Since Vitamin D3 capsules are Fat soluble in nature so the dissolution in not recommended by any Pharmacopoeia & FDA dissolution guideline.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Date of Initiation	02-2022	02-2022	02-2022
No. of Batches	03		

Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	Acidex 60mg Capsule Dexlansoprazole was approved in 312th Registration Board meeting. 1) Compliance Record of HPLC software 21CFR & audit trail reports on product testing were present
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP Certificate No 18MPP077HFR02 issued by EUDRA . Period of validity is extended to 26.09.2023 in case of cholecalciferol .

	Documents for the procurement of API with approval from DRAP (in case of import).	**M/s DSM Nutritional Product, France** ADC Invoice No: 2831239200, 29-08-2019
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of batches along with chromatograms, raw data sheets, COA and summary data sheets
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance record of HPLC software 21 CFR and copies of audit trail on testing of drug product.
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

Decision of 320th meeting: Deferred for following points:

- Clarification of conditions of stability studies of drug substance and drug product.
- Justification why comparative dissolution profile studies are not performed against the innovator drug product.

Firm's response:

- Cholecalciferol is sensitive & not stable when exposed to high temperature condtion so in the light of above condition stability performed at 25ºC +2ºC/60% RH +5%RH. SmPc of innovator product "Fultium-D3 20,000IU capsules" clearly instructed to store the product below 25ºC.

- As Choleclaciferol is present in USP and its nature is fat soluble. Therefore, its dissolution is not recommended in any Pharmacopoeia as well as FDA dissolution guideline. While complete comparative analysis & Pharmaceutical equivalence with innovator has already been submitted with initial dossier.

Decision: Deferred for following:

- **Scientific justification for performing drug product stability studies on storage conditons different from that required by ICH/WHO guidelines for Zone IVA.**
- **Submission of reference from pharmacopoeia/ innovator drug product literature regarding non-performance of dissolution test for applied formulation.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 1296/DD/DCA/VSP/2020 issued by Deputy Director & Certifying Authority drugs control administration Visakhapatnam Region India valid up to 28-09-2021
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levocetirizine Dihydrochloride for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches including raw data sheets, COAs, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Sr. No.	Observations	Response by the firm
1.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of standard and sample preparation methods alongwith chromatograms in different parameters were not provided.*
2.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided	Applicant batch No: T-02 **Comparator product:** T-day 2.5mg / 5ml oral solution of M/s GSK consumer healthcare Batch No: HH11L
3.	Discussion of microbiological attributes of the Drug Product (e.g. preservative effectiveness studies to be performed as per recommendations of pharmacopoeia) shall be provided.	The firm has not submitted preservative effectiveness studies as recommended by pharmacopoeia.
4.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	The firm has submitted analytical method verification reports of drug product. *However, details of standard and sample preparation methods alongwith chromatogram in different parameters were not provided.*
5.	The submitted copy of GMP certificate of API manufacturer is expired on 28-09-2021. Updated copy of GMP certificate shall be submitted.	The firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Telangana India valid up to 20-05-2023.
6.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levocetirizine Dihydrochloride for the purpose of test/analysis

		and stability studies is granted. However, invoice is not cleared by AD (I&E) DRAP of field office.
7.	The submitted chromatograms do not differentiate between real time or accelerated stability studies of prepared batches.	Not submitted
8.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted that *audit trail is maintained manually.*

Decision of 317th meeting: Deferred for submission of following:

- Analytical method verification report of drug substance performed by drug product manufacturer as
- per requirement of section 3.2.S.4.3 of Form-5F.
- Performance of pharmaceutical equivalence and CDP studies with innovator/reference product.
- Preservative effectiveness studies as recommended by Pharmacopoeia.
- HPLC chromatograms of all time points of real time and accelerated stability studies.
- Analytical method verification reports for testing of drug product as per requirements of section 3.2.P.5.3 of Form-5F.

Firm's response: Firm has submitted following:

- Analytical method verification studies for drug substance performed by M/s Himark.
- Pharmaceutical equivalence studies against the T-Day syrup.
- Preservative efficacy studies for all three stability batches.
- Analytical method verification report for drug product
- HPLC chromatograms of the stability studies.

Decision of 323rd meeting: Approved with innovator's specification.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.**

No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API / DML / GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. DCD/SPL-1/CR-1207/2020-21 issued by Government of Karnataka, Drugs Control Department India valid up to 05-01-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD (I&E) dated 26/12/2019 wherein the permission to import different APIs including Fexofenadine hydrochloride for the purpose of test/analysis and stability studies is granted. Copy of invoice for the purchase of API has not submitted.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches including raw data sheets, COAs, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Sr. No.	**Observations**	**Response by the firm**
1.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of standard and sample preparation methods alongwith chromatograms of different tested parameters were not provided.*
2.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided	Applicant batch No: T-01 **Comparator product:** T-day 5mg Tablet of M/s Sanofi-Aventis Batch No: AN002
3.	Justify your acceptance criteria for dissolution test as NLT 60% of the labeled amount of Fexofenadine HCl is dissolved in 10 min; NLT 80% of the labeled amount of Fexofenadine HCl is dissolved in 30 min while USP has specified as NLT 60% (Q) of the labeled amount of Fexofenadine HCl dissolved in 10 min; NLT 80% (Q) of the labeled amount of Fexofenadine HCl dissolved in 30 min.	USP defines quantity Q, is the amount of dissolved active ingredient specified in the individual monograph. When we look at a Q value, we are looking at what percent has dissolved at that time. Thus, there is no difference between NLT 60% in 10 min and NLT 60% (Q) in 10 minutes and NLT 80% in 30 min and NLT 80 (Q) in 30 min. *However, USP general chapter of dissolution <711> defines S1 stage of dissolution as each unit is not less than Q + 5% and did not revise dissolution acceptance criteria as per USP.*
4.	Submit acceptance criteria for release and shelf life specifications.	The firm has submitted acceptance criteria for release and shelf life specifications.
5.	Justify dissolution results in the submitted batch analysis since results are not complying USP monograph.	The firm has referred to USP definition of Q, as the amount of dissolved active ingredient specified in individual monograph. *The firm has not provided justification of dissolution results not complying USP monograph.*
6.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	The firm has submitted analytical method verification reports of drug product. *However, details of standard and sample preparation methods alongwith chromatograms of different tested parameters were not provided. The results of repeatability parameter show absorbance values while rest of the parameter gives values in peak area.*
7.	COA of primary / secondary reference standard including source and lot number shall be provided.	The firm has submitted COA of working standard from drug substance manufacturer with lot no. WS-Fex-210209.
8.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levocetirizine

		Dihydrochloride for the purpose of test/analysis and stability studies is granted. However, invoice is not cleared by AD (I&E) DRAP of field office.
9.	The submitted chromatograms do not differentiate between real time or accelerated stability studies time points of different batches.	Not submitted
10.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted that audit trail is maintained manually.
11.	Submit copies of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of batch manufacturing record of stability batches.
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Decision of 317th meeting: Deferred for submission of following:

- Analytical method verification report of drug substance performed by drug product manufacturer as
- per requirement of section 3.2.S.4.3 of Form-5F.
- Performance of pharmaceutical equivalence and CDP studies with innovator/reference product.
- Justify acceptance criteria for dissolution test in the light of USP monograph.
- Justify dissolution results in the submitted batch analysis since results are not complying USP specifications.
- HPLC chromatograms of all time points of real time and accelerated stability studies.
- Analytical method verification reports for testing of drug product as per requirements of section 3.2.P.5.3 of Form-5F.

Firm's response: Firm has submitted following:

- Analytical method verification studies for drug substance performed by M/s Himark.
- Pharmaceutical equivalence & CDP studies in three dissolution mediums against the Telfast tablet.
- Revised dissolution limits as per USP monograph as under:
  - NLT 60(Q) i.e., 65% of the labelled amount of Fexofenadine HCl is dissolved in 10 minutes.
  - NLT 60(Q) i.e., 85% of the labelled amount of Fexofenadine HCl is dissolved in 30 minutes.
- Dissolution test has been repeated in 10minutes our results did not fall in S1 stage. However, in S2 stage our results qualify i.e., no dissolution result is below 60%.
- HPLC chromatograms for stability studies.
- Analytical method verification report for drug product

Decision of 323rd meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.**

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	GMP status of the Finished product manufacturer	New license granted on 26-09-2019. Tablet (General & General Antibiotic) section approved.
	Dy. No. and date of submission	Dy. No. 33578 Dated: 23-12-2021
	Details of fee submitted	PKR 30,000/-: Dated 29-11-2021
	The proposed proprietary name / brand name	**Fexomark 180mg film coated tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Fexofenadine hydrochloride……180mg
	Pharmaceutical form of applied drug	Whilte colored round shaped film coated tablet, Packed in Alu-Alu Blisters (1 × 10's)
	Pharmacotherapeutic Group of (API)	Anti-histamine
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1 × 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Telfast 180mg film coated tablet of M/s Aventis Pharma Limited, United Kingdome (MHRA approved).
	For generic drugs (me-too status)	Fexet 180mg film coated tablet of M/s GETZ Pharma
	Name and address of API manufacturer.	M/s VPL Chemicals Pvt. Ltd., Plot # 64, 1st phase, Sompura Industrial Area, Dobbespet, Nelamangala (Taluk), Bangalore Rural – 562 111, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5% RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5% RH for 6 months Batches: (FE III 1503013, FE III 1503014, FE III 1503015).
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference

		standard or materials, container closure system and stability.		
	Pharmaceutical equivalence and comparative dissolution profile	The firm has submitted pharmaceutical equivalence against comparator product **Telfast 180 mg tablet** by **Sanofi-Aventis** by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is **Telfast 180 mg Tablet** by **Sanofi-Aventis** in Acid media (pH 1.0-1.2) and pH 4.5 & phosphate buffer (pH 6.8). The values for f_1 and f_2 are in the acceptable range.		
	Analytical method validation/verification of product	Analytical method verification reports have not been submitted.

No. of Batches		03		
DOCUMENTS / DATA PROVIDED BY THE APPLICANT				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
2.	Approval of API / DML / GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. DCD/SPL-1/CR-1207/2020-21 issued by Government of Karnataka, Drugs Control Department India valid up to 05-01-2025.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD (I&E) dated 26/12/2019 wherein the permission to import different APIs including Fexofenadine hydrochloride for the purpose of test/analysis and stability studies is granted. Copy of invoice for the purchase of API has not submitted.		

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches including raw data sheets, COAs, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Sr. No.	Observations	Response by the firm
1.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of standard and sample preparation methods alongwith chromatograms of different tested parameters were not provided.*
2.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided	Applicant batch No: T-01 **Comparator product:** T-day 5mg Tablet of M/s Sanofi-Aventis Batch No: AW 006
3.	Justify your acceptance criteria for dissolution test as NLT 60% of the labeled amount of Fexofenadine HCl is dissolved in 10 min; NLT 80% of the labeled amount of Fexofenadine HCl is dissolved in 30 min while USP has specified as NLT 60% (Q) of the labeled amount of Fexofenadine HCl dissolved in 10 min; NLT 80% (Q) of the labeled amount of Fexofenadine HCl dissolved in 30 min.	USP defines quantity Q, is the amount of dissolved active ingredient specified in the individual monograph. When we look at a Q value, we are looking at what percent has dissolved at that time. Thus, there is no difference between NLT 60% in 10 min and NLT 60% (Q) in 10 minutes and NLT 80% in 30 min and NLT 80 (Q) in 30 min. *However, USP general chapter of dissolution <711> defines S_1 stage of dissolution as each unit is not less than Q + 5% and did not revise dissolution acceptance criteria as per USP.*
4.	Submit acceptance criteria for release and shelf life specifications.	The firm has submitted acceptance criteria for release and shelf life specifications.
5.	Justify dissolution results in the submitted batch analysis since results are not complying USP monograph.	The firm has referred to USP definition of Q, as the amount of dissolved active ingredient specified in individual monograph. *The firm has not provided justification of dissolution results not complying USP monograph.*
6.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	The firm has submitted analytical method verification reports of drug product. *However, details of standard and sample preparation methods alongwith chromatograms of different tested parameters were not provided. The results of repeatability parameter show absorbance values while rest of the parameter gives values in peak area.*
7.	COA of primary / secondary reference standard including source and lot number shall be provided.	The firm has submitted COA of working standard from drug substance manufacturer with lot no. WS-Fex-210209.
8.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levocetirizine Dihydrochloride for the purpose of test/analysis

		and stability studies is granted. However, invoice is not cleared by AD (I&E) DRAP of field office.
9.	The submitted chromatograms do not differentiate between real time or accelerated stability studies time points of different batches.	Not submitted
10.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted that *audit trail is maintained manually*.
11.	Submit copies of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of batch manufacturing record of stability batches.
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Decision of 317th meeting: Deferred for submission of following:

- Analytical method verification report of drug substance performed by drug product manufacturer as
- per requirement of section 3.2.S.4.3 of Form-5F.
- Performance of pharmaceutical equivalence and CDP studies with innovator/reference product.
- Justify acceptance criteria for dissolution test in the light of USP monograph.
- Justify dissolution results in the submitted batch analysis since results are not complying USP specifications.
- HPLC chromatograms of all time points of real time and accelerated stability studies.
- Analytical method verification reports for testing of drug product as per requirements of section 3.2.P.5.3 of Form-5F.

Firm's response: Firm has submitted following:

- Analytical method verification studies for drug substance performed by M/s Himark.
- Pharmaceutical equivalence & CDP studies in three dissolution mediums against the Telfast tablet.
- Revised dissolution limits as per USP monograph as under:
  - NLT 60(Q) i.e., 65% of the labelled amount of Fexofenadine HCl is dissolved in 10 minutes.
  - NLT 60(Q) i.e., 85% of the labelled amount of Fexofenadine HCl is dissolved in 30 minutes.
- Dissolution test has been repeated in 10minutes our results did not fall in S1 stage. However, in S2 stage our results qualify i.e., no dissolution result is below 60%.
- HPLC chromatograms for stability studies.

Analytical method verification report for drug product

Decision of 323rd meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.**

No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. ZJ201190145 issued by China food & Drugs administration is attached and it is valid till 29-11-24.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levofloxacin hemihydrate for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches including raw data sheets, COAs, summary data sheets etc.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Sr. No.	Observations	Response by the firm
1.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of standard and sample preparation methods alongwith chromatograms in different tested parameters were not provided.*
2.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided	Applicant batch No: T-58 **Comparator product:** Leflox 500mg Tablet of M/s GETZ Pharma Batch No: LF-095
3.	The submitted CDP data showed less than 75% release in 30 min in all media, therefore, justify CDP data in the light of WHO Recommendations for conducting and assessing CDP wherein it is stated: "*In the case where 85% dissolution cannot be reached due to poor solubility of the API, the dissolution should be conducted until an asymptote (plateau) has been reached*".	The firm has revised comparative dissolution studies by adding 45 min time point in the studied dissolution media. *However, dissolution studies are not conducted until asymptote as per WHO recommendations.*
4.	Justify your acceptance criteria for dissolution test as NLT 80% of the labeled amount of Levofloxacin is dissolved in 30 min.	The firm has submitted that there is no difference between NLT 80% in 30 min and NLT 80% (Q) in 30 min. *However, USP general chapter of dissolution <711> defines S_1 stage of dissolution as each unit is not less than Q + 5% and accordingly did not revise dissolution acceptance criteria as per USP.*
5.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of standard and sample preparation methods alongwith chromatograms in different tested parameters were not provided.*
6.	The submitted copy of GMP certificate of API manufacturer is expired on 28-09-2021. Updated copy of GMP certificate shall be submitted.	The firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Telangana India valid up to 20-05-2023.
7.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levocetirizine Dihydrochloride for the purpose of test/analysis and stability studies is granted. However, invoice is not cleared by AD (I&E) DRAP of field office.
8.	The submitted chromatograms do not differentiate between real time or accelerated stability studies time points of different batches.	Not submitted.

9.	UV spectra of dissolution results alongwith raw data sheets for dissolution tests throughout stability data are required to be submitted.	Not submitted.
10.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted that *audit trail is maintained manually.*
11.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Decision of 317th meeting: Deferred for submission of following:

- Analytical method verification report of drug substance performed by drug product manufacturer as
- per requirement of section 3.2.S.4.3 of Form-5F.
- Performance of pharmaceutical equivalence and CDP studies with innovator/reference product.
- Justify comparative dissolution studies in the light of WHO recommendations which recommend conduction of dissolution studies until asymptote if 85% dissolution could not be reached due to poor solubility of API
- Justify your acceptance criteria for dissolution test in the light of USP specifications.
- HPLC chromatograms of all time points of real time and accelerated stability studies.
- UV spectra alongwith raw data sheets for dissolution tests in stability study data.
- Analytical method verification reports for testing of drug product as per requirements of section 3.2.P.5.3 of Form-5F.

Firm's response: Firm has replied as under:

- Analytical method verification studies for drug substance performed by M/s Himark.
- Pharmaceutical equivalence & CDP studies in three dissolution mediums against the Leflox tablet till the time point where 85% release is achieved.
- Revised dissolution limits as per USP monograph as under:
  - NLT 80(Q) i.e., 85% of the labelled amount of Levofloxacin is dissolved in 30 minutes.
- Dissolution test has been repeated in 10minutes our results did not fall in S1 stage. However, in S2 stage our results qualify i.e., no dissolution result is below 60%.
- HPLC chromatograms & UV spectrums along with raw data sheets for stability studies.
- Analytical method verification report for drug product

Decision of 323rd meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. DC/A-2/WHO GMP/2019/35 issued by Drugs Control Organization Swasthya Bhawan Tilak Marg, Jaipur Rajasthan, India, issued on 17-01-2019 and valid for 3 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26-12-2019 is submitted wherein the permission to import different APIs Montelukast Sodium for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches including raw data sheets, COAs, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Sr. No.	Observations	Response by the firm
1.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of standard and sample preparation methods alongwith chromatograms in different tested parameters were not provided.*
2.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided	Applicant batch No: T-103 **Comparator product:** Montiget 4mg Sachet of M/s GETZ pharma Batch No: B656D03
3.	The reference formulation states granules for oral suspension for applied formulation. Clarification is required in manufacturing process and process control whether granules will be prepared in-house or otherwise.	The granules are prepared in-house by sieving the materials from appropriate mesh.
4.	Analytical method verification reports of each parameter like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	The firm has submitted analytical method verification reports of drug product. *However, details of standard and sample preparation methods alongwith chromatograms in different tested parameters were not provided.*
5.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26-12-2019 is submitted wherein the permission to import different APIs Montelukast Sodium for the purpose of test/analysis and stability studies is granted.
6.	The submitted chromatograms do not differentiate between real time or accelerated stability studies time points of different batches.	Not submitted.
7.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted that *audit trail is maintained manually.*
8.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Decision of 317th meeting: Deferred for submission of following:

- Analytical method verification report of drug substance performed by drug product manufacturer as
- per requirement of section 3.2.S.4.3 of Form-5F.
- Performance of pharmaceutical equivalence and CDP studies with innovator/reference product i.e., Singulair® Paediatric 4 mg Granules.
- HPLC chromatograms of all time points of real time and accelerated stability studies.
- Analytical method verification reports for testing of drug product as per requirements of section 3.2.P.5.3 of Form-5F.

Firm's response: Firm has replied as under:

- Analytical method verification studies for drug substance performed by M/s Himark.
- Pharmaceutical equivalence & CDP studies in three dissolution mediums against the Montiget sachet stating that Singulair Paediatric granules by Organon Pharma UK is not available in Pakistan.
- HPLC chromatograms for stability studies.
- Analytical method verification report for drug product

• COA of reference standard of "Montelukast Dicyclohexylamine"		
Decision of 323rd meeting: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
1402.	Name, address of Applicant / Marketing Authorization Holder	M/s Himark Laboratories Private Limited., Plot 37-A, Sundar Industrial Estate, Lahore.

	Details of fee submitted	PKR 30,000/-: Dated 29-11-2021
	The proposed proprietary name / brand name	**Citromark 5 mg film coated tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Levocetirizine dihydrochloride…….5 mg
	Pharmaceutical form of applied drug	White color round shaped film coated tablet
	Pharmacotherapeutic Group of (API)	Anti-histamine
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	1 × 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	XYZAL Levocetirizine hydrochloride 5 mg film coated tablet by M/s UCB Pharma (Approved in TGA)
	For generic drugs (me-too status)	T-Day 5 mg film coated Tablet by M/s GSK Consumer Healthcare (Reg. No. 083964)
	GMP status of the Finished product manufacturer	New license granted on 26-09-2019. Tablet (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	M/s Metrochem API Private Limited., Factory: Unit-I, Plot No. 62/C/6, Pipeline Road, Phase – I, IDA, Jeedimetla Hyderabad-500 055, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and

		stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Levocetirizine dihydrochloride is present in USP. The firm has submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, Identification, Assay and specific optical rotation, heavy metals and enantiomeric purity by HPLC, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C /65% ± 5% RH for 36 months Accelerated: 40˚C ± 2˚C /75% ± 5% RH for 6 months Batches: (LCZ/A/200801001, LCZ/A/200801002, LCZ/A/200801003)
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against comparator product **T-day 5 mg tablet** by GSK consumer healthcare by performing quality tests (Identification, assay, dissolution, uniformity of dosage form). CDP has been performed against the same in acidic media (pH 1.0-1.2) and pH 4.5 & phosphate buffer (pH 6.8). The values for f_1 and f_2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have been submitted including linearity, range, accuracy, precision, specificity.

Date of Initiation	12-05-2021	12-05-2021	12-05-2021
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate No. 1296/DD/DCA/VSP/2020 issued by Deputy Director & Certifying Authority drugs control administration Visakhapatnam Region India valid up to 28-09-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levocetirizine Dihydrochloride for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches including raw data sheets, COAs, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	The submitted COA from drug product manufacturer shows pH of sample solution as 4.42 which is not within the limit of 1.2 to 1.8.	The firm has submitted fresh certificate of analysis with revised result of pH as 1.5 and document does not contain date of analysis.
2.	Analytical method verification reports of parameters like specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of standard and sample preparation methods alongwith chromatograms of different tested parameters were not provided.*
3.	Details of batch numbers of applicant and comparator product in pharmaceutical equivalence are required to be provided	Applicant batch No: T-01 **Comparator product:** T-day 5mg Tablet of M/s GSK Batch No: HH9T
4.	The submitted CDP data showed less than 75% release in 30 min in all media, therefore, justify CDP data in the light of WHO Recommendations for conducting and assessing CDP wherein it is stated: "*In the case where 85% dissolution cannot be reached due to poor solubility of the API, the dissolution should be conducted until an asymptote (plateau) has been reached*".	The firm has revised comparative dissolution studies by adding 45 min time point in the studied dissolution media. The results show initial release of 50% at 30 min while the drug release occurred more than 90% at 45 min time point in all media. *Moreover, dissolution studies are not conducted until asymptote as per WHO recommendations.*
5.	Analytical method verification reports of each parameter like specificity, accuracy and	The firm has submitted analytical method verification reports of drug substance performed by drug product manufacturer. *However, details of*

	repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	*standard and sample preparation methods alongwith their concentrations in different tested parameters were not provided.*
6.	The submitted copy of GMP certificate of API manufacturer is expired on 28-09-2021. Updated copy of GMP certificate shall be submitted.	The firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Telangana India valid up to 20-05-2023.
7.	Submitted invoice for the procurement of drug substance is not attested by AD (I & E). Clarification is required.	The firm has submitted copy of letter No.17133/2019/DRAP-AD-CD(I&E) dated 26/12/2019 is submitted wherein the permission to import different APIs including Levocetirizine Dihydrochloride for the purpose of test/analysis and stability studies is granted. However, invoice is not cleared by AD (I&E) DRAP of field office.
8.	The submitted chromatograms do not differentiate between real time or accelerated stability studies time points of different batches.	Not submitted
9.	UV spectra alongwith raw data sheets for dissolution tests in stability study data are required to be submitted.	Not submitted.
10.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not submitted.

Decision of 317th meeting: Deferred for submission of following:

- Analytical method verification report of drug substance performed by drug product manufacturer as
- per requirement of section 3.2.S.4.3 of Form-5F.
- Performance of pharmaceutical equivalence and CDP studies with innovator/reference product.
- Justify comparative dissolution studies in the light of WHO recommendations which recommend conduction of dissolution studies until asymptote if 85% dissolution could not be reached due to poor solubility of API.
- HPLC chromatograms of all time points of real time and accelerated stability studies.
- UV spectra alongwith raw data sheets for dissolution tests in stability study data.
- Analytical method verification reports for testing of drug product as per requirements of section 3.2.P.5.3 of Form-5F.

Firm's response: Firm has submitted following:

- Pharmaceutical equivalence & CDP studies in three dissolution mediums against the Xyzal tablet 5mg till the time point where 85% release is achieved.
- HPLC chromatograms & UV spectrums along with raw data sheets for stability studies.
- Analytical method verification report for drug product

Decision of 323rd meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**Tramacet 75mg/650mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Tramadol HCl ……... 75mg Paracetamol …… 650mg
	Pharmaceutical form of applied drug	Blue colored, oblong plain film coated tablet
	Pharmacotherapeutic Group of (API)	Opiate analgesic & NSAIDS
	Reference to Finished product specifications	USP
	Proposed Pack size	1×10's, 2x10's, 3x10's, As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Tramadol/Paracetamol 75 mg / 650 mg Tablets by M/s Aspire Pharma Ltd. UK.
	For generic drugs (me-too status)	Tonoflex-P Forte tablet by M/s Sami Pharmaceuticals, Reg. No. 094798
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 70/2021-DRAP (FID/2061717-540) dated 08-09-2021.
	Name and address of API manufacturer.	**For Tramadol** M/s Proto Chemicals AG Tschachen 2,8756 Mitlödi (Glarus Süd), Switzerland. **For Paracetamol** M/s Carry For Pharmaceutical Private limited Plot. #: E-81, North Western industrial Zone. Port Qasim,Karachi, Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Tramadol & paracetamol is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	**For Tramadol HCl** Stability study conditions: Real time: 30°C ± 2°C/75% ± 5%RH for 60 months

		Accelerated: 40°C ± 2°C/75% ± 5%RH for 6 months Batches: (E5846, E5861, E5862) **For Paracetamol** Stability study conditions: Real time: 30°C ± 2°C/65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C/75% ± 5%RH for 6 months Batches: (CPCM1908-001, CPCM1908-002, CPCM19010-003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure (including dissolution testing at acidic, acetate and buffer media), batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand Tonoflex-P Forte of M/s Sami Pharmaceuticals by performing only Identification and Assay tests. CDP has been performed against the same brand that is Tonoflex-P Forte tablet by Sami Pharmaceuticals in Acidic media (pH-1.2), Acetate Buffer(pH-4.5) & Phosphate Buffer (pH 6.8). The values for f_2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	**For Tramadol** M/s Proto Chemicals AG, Tschachen 2, 8756 Mitlödi (Glarus Süd), Switzerland. **For Paracetamol** M/s Carryfor Pharmaceuticals (Pvt) limited, Plot. #: E-81, North Western Industrial Zone, Port Qasim, Karachi.

Date of Initiation	16-11-2021	17-11-2021	18-11-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**For Tramadol HCl** Copy of GMP certificate No. 20-0286 issued by Swiss agency for Therapeutic Products. **For Paracetamol** Copy of GMP certificate No.149/2020-Drap (K) dated 16-11-2020 issued by Drug Regulatory authority of Pakistan.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of DRAP attested invoice no. CS-21/02668 dated 01/04/2021 for Tramadol HCl 150kg is submitted. • Copy of local sales tax invoice No. 378 dated 10-10-2021 for Paracetamol 1000kg is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted the audit trail of 03 days for HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Observations Communicated	Response by the applicant on WhatsApp
i.	Submit copy of valid DML	Copy of DML No. 000789 renewed w.e.f. 03-02-2019 is submitted. However, the name of manufacturer in previous DML was **M/s Wimits Pharmaceuticals** while in new DML, it is **M/s Wimits Pharmaceuticals (Pvt.) Ltd.**
ii.	Submit clarification regarding out of limit Relative Standard Deviation RSD of Accuracy testing in verification of analytical procedures for Tramadol HCl.	The firm has submitted the revised RSD limits for verification of analytical procedures.
iii.	Submit clarification as Assay specification limits used in drug substance analysis of Paracetamol performed by drug product manufacturer are in accordance with BP monograph (99-101%) while in stability study data Assay specification limits are as per USP monograph (98-102%).	The firm submitted that the supplier complies with both BP & USP monograph and they had followed more stringent limit for the analysis i.e. 99-101%.
iv.	Clarification of not submitting compatibility studies as there is difference in qualitative formulation of applied product and Innovator product.	The firm has submitted the tabulated results of compatibility studies.
v.	Submit Pharmaceutical Equivalence as per pharmacopoeia monograph of the product.	The submitted Pharmaceutical Equivalence does not include Uniformity of Dosage Unit Test.
vi.	Maximum holding time of bulk before final packing is not submitted.	The firm submitted that the batch is processed right after dispensing and the bulk is not held for too long and batch is completed in 24hrs.
vii.	APIs lot no. is not indicated in stability study data.	The firm has submitted the revised stability data sheet indicating API Lot No. However, the mentioned lot of Tramadol HCL is different from the lot tested by drug product manufacturer.
viii.	Submitted DRAP attested invoice of Tramadol HCl is from Chemo S.A. Lugano Branch, Via F. Pelli 17, P.O. Box 6901, Lugano, Switzerland while the manufacturer of Tramadol HCl as per dossier is M/s Proto Chemicals AG, Tschachen 2, 8756 Mitlödi (Glarus Süd), Switzerland.	The firm submitted that Chemo S.A. Lugano is trader while Proto Chemicals is API manufacturer.
ix.	API lot numbers are not mentioned on local sales invoice of Paracetamol.	The firm has submitted the revised sales tax invoice indicating batch number of API. However, the invoice indicates the manufacturing date of API as **09-12-2021** while the record of trial batch of drug product manufactured from this API indicates the manufacturing date as **November, 2021**.

x.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing are not submitted.	The firm has submitted the audit trail of 03 days for HPLC.

Decision: The Board deferred the case for following points;

- Clarification since the firm has submitted the invoice indicating batch number of Paracetamol, however, the invoice indicates the manufacturing date of Paracetamol (drug substance) as 09-12-2021 while the record of trial batch of drug product manufactured from this lot indicates that the manufacturing date is November, 2021.
- Clarification since the firm has submitted the revised stability data sheet indicating the Lot No of Tramadol HCl, however, the mentioned lot of Tramadol HCl is different from the lot used for the product development.

Firm's response: Firm has sumitted declaration from the M/s Carryfor Pharmaceutical Pvt. Ltd., as under:
"We M/s Carryfor Pharmaceutical Pvt. Ltd., hereby undertake that there are some clerical mistakes in mentioning invoice date, manufacturing date, manufacturing date and expiry date of paracetamol batch# CPCM2112-058 issue toM/s Wimits PharmaceuticalPvt. Ltd. The correct details are as under:
Batch# CPCM2112-058
Mfg. date: 09-10-2021
Exp. Date: 0-10-2025
Invoice date: 31-10-2021

Decision of 323rd meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Estine (Ebastine) Tablets 10mg & 20mg on 6th May, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.

<table>
<tr><td>2.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>Firm has submitted copy of certificate of Good Manufacturing Practices (GMP) issued by Hebei Food and Drug Administration. (valid till 08-07-2023).</td></tr>
<tr><td>3.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Copy of commercial invoice attested by AD I&E DRAP, Karachi, has been submitted.
<table>
<tr><th>Batch No.</th><th>Invoice No.</th><th>Quantity Imported</th><th>Date of approval by DRAP</th></tr>

</table></td></tr>
<tr><td>4.</td><td>Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td><td>Firm has submitted data of stability batches along with batch manufacturing record, analytical record and attested documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td></tr>
<tr><td>5.</td><td>Compliance Record of HPLC software 21CFR & audit trail reports on product testing</td><td>Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.</td></tr>
<tr><td>6.</td><td>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)</td><td>Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)</td></tr>
</table>

Remarks of Evaluator:

Section #.	Deficiencies	Firm's response
3.2.S.4	• Chromatographic conditions for the performance of Assay test, in the analytical procedure submitted from drug substance manufacturer, are different form that recommended by USP monograph of "Acetaminophen". • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for shall be submitted.	This is to bring to your kind attention that API manufacturer has made minor adjustment in the test procedure for Assay as described in USP monograph. The adjustment is made to make analytical method simpler and efficient. The analytical method is further validated that confirms that proposed method is suitable for intended use. Moreover, M/s Getz Pharma has developed test procedure for Acetaminophen in accordance with USP monograph and Analytical Method Verification studies have been performed accordingly. Please refer to Annex 1 for Analytical Method Verification studies including specificity, linearity, repeatability and range performed by the Drug Product manufacturer. This is to bring to your kind attention that we have used 100% API without any placebo in Analytical Method Verification Studies of Acetaminophen; therefore, requirement of accuracy is not applicable. Further, we have performed linearity to check area response of the sample as the concentration

		of the sample raised within working range of sample i.e., 50% - 150%.
3.2.S.5	COA of reference/working standard shall be submitted, used for the analysis of drug substance by M/s Getz pharma.	COA of reference/working standard used for the analysis of drug substance by M/s Getz Pharma has been submitted.
3.2.P.5	Submitted drug product specifications refer to USP, whereas the analytical procedure for Assay test is not as per USP monograph of "Acetaminophen tablets". Justification shall be submitted in this regard. Analytical method verification studies are not for the Assay method as recommended by USP monograph of "Acetaminophen tablets".	This is to inform you that the concentration of standard and sample solution preparation are exactly same as recommended in USP monograph of "Acetaminophen Tablets. However, we have modified chromatographic conditions for Assay method using chromatographic conditions for Related Substances since USP allows the use of alternate methods like in case of ease of testing. Therefore, we have adopted different chromatographic condition for Assay method. Further we have completely validated said Assay method and found to be accurate and precise that will produce equivalent results as USP. • In contrary to the claim of firm the alternate method adopted for Assay test is not as per method of related substances.
3.2.P.8.3	Assay test in the submitted stability studies have not been conducted as per analytical procedure recommended by "Acetaminophen tablets". Justification shall be submitted in this regard.	This is to inform you that for stability studies we have followed different Assay method from USP as discussed in point 3.2.P.5. Further, we have completely validated said Assay method and found to be accurate and precise that will produce equivalent results as USP.

Decision of 320th meeting: The Board Deferred the case for scientific justification for performing assay testing during the stability studies using a different method than described by USP.

Firm's response: This is to bring to your kind attention that we have developed the Assay method as per USP monograph of "Acetaminophen tablets" along with performance of analytical method verification studies of Assay method as per USP monograph. Please refer to Annex 1 for Updated Specification, Analytical Method and Assay Method verification report of Acetaget Tablets 500mg as per USP monograph.

This is to bring to your kind information that next interval of Long term stability studies i.e., 24 Months will be due in October 2022 Therefore, we have performed Assay Method testing as per USP monograph on stability batches and reports with chromatograms are attached.

Decision of 323rd meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 04 Registration applications of Import (Human) drugs

a. New cases

1405.	Name, address of Applicant / Importer	M/s Bristol Mayer Biotech Pakistan, 73-B, Guldasht town, Zarrar Shaheed road, Lahore cantt.
	Details of Drug Sale License of importer	License No: 05-352-0068-029407D Address: 73-B, Guldasht Town, Zarrar Shaheed Road, Lahore Cantt. Address of Godown: NA Validity: 07-04-2022 Status: License to sell drugs as a distributor Renewal: Applied for renewal. Receipt is attached.
	Name and address of marketing authorization holder (abroad)	M/s VEM İLAÇ San. ve Tic. A.Ş. TURKEY Söğütözü Mahallesi 2177. Cadde No: 10B/49 Cankaya/Ankara/Turkey.
	Name, address of manufacturer(s)	M/s VEM İLAÇ San. ve Tic. A.Ş. TURKEY Çerkezköy Organize Sanayi Bölgesi Karaağaç Mahallesi Fatih Bulvarı No:38 Kapaklı/TEKİRDAĞ/TURKEY.
	Name of exporting country	Turkey
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** The **f**irm has submitted original, legalized copy of CoPP certificate (No. 2021/464) dated 11-02-2021 issued by Turkish Medicines and Medical Devices Agency, Republic of Turkey for Coplanin 200mg. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. **Validity:** 11-02-2023. Firm has submitted legalized copy of GMP certificate (No. TR/GMP/2020/215) **Validity:** 09-09-2022.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of authorization from M/s Vem ilac Turkey. The authorization letter is valid till 19-03-2026.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 17864 Dated: 18-09-2019

		Dy. No. 33079 Dated: 17-12-2021
	Details of fee submitted	PKR 50,000/- Dated: 16-09-2019 PKR 50,000/- Dated: 05-01-2019
	The proposed proprietary name / brand name	**Coplanin 200mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Teicoplanin…….200mg and ampoule containing 3 ml water for injection.
	Pharmaceutical form of applied drug	Lyophilized powder for solution for injection
	Pharmacotherapeutic Group of (API)	Antibiotic Class: Glycopeptide
	Reference to Finished product specifications	Current EP
	Proposed Pack size	1's
	Proposed unit price	Rs 2500 per vial
	The status in reference regulatory authorities	Targocid 200mg powder for solution for injection/infusion (MHRA approved)
	For generic drugs (me-too status)	Ticozid 200mg Injection of Bosch pharma (Reg # 050514).
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co; Ltd. China. Address: Jiangyin Industrial Concentration zone, Fuzhou city, Fujian province, P.R. China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 5°C ± 3°C. The stability study data is till 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification

		of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence	The firm has submitted pharmaceutical equivalence study with reference product Targocid 200mg IV/IM lyophilized powder for injection (batch # A3367).
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	10 ml nominal Volume, Type I (USP) colorless glass vial. Water for injection is filled to 3 ml volumetric type 1 colorless glass ampoule. Gray bromobutyl lyophilized stopper and green flip-off cap.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability study data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ± 2°C / 75% ± 5% RH. The real time stability study data of 3 batches is for 24 months. Batch # 708001 Batch # 710002 Batch # 710003

Evaluation by PEC:

Sr.#	Section	Observation	Firm's response
1.		Differential fee of PKR 50,000/- shall be submitted since the applied formulation is already registered in Pakistan.	Submitted
2.	**1.3.4**	Submit copy of valid drug sale license by respective licensing authority.	Firm has submitted copy of Valid DSL as per following details: License No: 05-352-0068-029407D Address: 73-B, Guldasht Town, Zarrar Shaheed Road, Lahore Cantt.

			Address of Godown: NA Validity: 07-04-2027 Status: License to sell drugs as a distributor
3.	**1.5.6**	Mention the reference specifications of finished drug product since the applied drug product is not present in available EP.	Firm has stated that the specifications in section 1.5.6 were erroneously mentioned for drug substance.
4.	**3.2.S.4.1 & 3.2.S.4.2**	Provide copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.	Submitted.
5.	**3.2.S.4.3**	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Submitted
6.	**3.2.P.2.**	• Submit pharmaceutical equivalence of the applied drug with the reference product by comparing results of all the quality tests of the developed formulation and the reference product. • Compatibility studies for the dry powder for injections shall be performed as per the instructions provided in individual label of the drug product.	• Submitted
7.	**3.2P.5.1**	You have mentioned reference of finished product specifications as current EP while the product monograph is not present in available pharmacopoeia.	The product complies with in house specifications, the EP monograph was referred for drug substance
8.	**3.2.P.8**	• There is also a significant change in the accelerated stability data of drug product (Coplanin 400mg Injection, batch number 806002) at 6th month time point in the assay of teicoplanin. Justification is required.	• The firm has stated that saccelerated stability study results were within acceptable limits and also referred to the long term stability studies.

Decision: Registration Board approved the applications of Coplanin 200mg Injection & Coplanin 400mg Injectionwith Innovator's specifications as per policy for inspection sof manufacturer abroad. The firm shall submit fee of Rs. 7500/- for each strength for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Anqing World Chemical Company Limited No.21 Huancheng west road AnQing County, AnHui Province China
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product of Zejula 100mg Capsule (GlaxoSmithKline limited) has been submitted has been submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies of the drug product.
	Container closure system of the drug product	White HDPE bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submiited stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months.

		Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Remarks of Evaluator[II]:

Section #.	Deficiencies	Firm's response
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studiesjasm, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture	Drug product manufacturer has submitted, specifications, analytical procedure, analytical method verification studies & COAs for drug substance.
3.2.P.1	• Qualitative composition of applied product is not same as per that of the innovator product.	• The excipients used complies with current pharmacopoeial monographs. These excipients are pharmaceutically inert substance and we have used these excipients below the IIG limit of FDA database as well as we have done extensive analysis of the product afer formulation and found satisfactory result of assay, dissolution results & impurity profile. Also w have done stability study during developmeht stage and found satisfactory result of the product. So we can conclude that these excipients are not incompatible with the API.
3.2.P.2	Compatibility studies of the Drug Substance(s) with excipients shall be submitted, since the qualitative composition of the formulation is not similar to innovator / reference product.	• The excipients used complies with current pharmacopoeial monographs. These excipients are pharmaceutically inert

		substance and we have used these excipients below the IIG limit of FDA database as well as we have done extensive analysis of the product afer formulation and found satisfactory result of assay, dissolution results & impurity profile. Also w have done stability study during developmeht stage and found satisfactory result of the product. So we can conclude that these excipients are not incompatible with the API.
3.2.P.2.2.1	• Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed.	• Firm has referred to the Bio equivalence studies of applied prodyuct performed as an open label, balanced, randomized, two-treatment, two sequence, two-period, crossover oral bioequivalence study of single dose of Niraparix capsule against Zejula capsule of m/s tesaro UK ltd.
3.2.P.5.1	• US FDA review document of the Innovator product i.e., Zejula, specifies the dissolution limit as "NLT Q in 45 minutes", whereas submitted specifications declare the dissolution limits as "NLT 70% in 60 minutes". Justify the variation in time point of dissolution.	• For dissolution method, we have used US FD Adatabase for medium, apparatus, volume and time point. However, please note tha, for dissolution time point we slected as 60 minutes. Based n the US FDA databse, dissolution tim endpoint covered 60 minutes in method of analysis.
3.2.P.8	• Accelerated stability studies of batch# 3830004, reflect significant change of in Assay results. • Following shall be submitted: i. Analytical record for stability studies including raw data sheets, chromatograms etc. ii. Complete batch manufacturing record. iii. GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority.	• Not replied against this point. • Analytical record for stability data not submitted. • BMRs have been submitted. • Submitted GMP certificate (No. NP122019) is not verifiable form the NMPA web site.

Decision: Deferred for following:

- Scientific justification for difference in dissolution limits in terms of %age released and time point from that recommended by the US FDA for innovator product along with comparison of disintegration & release profile of the applied product & innovator product.
- Submission of valid GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority.

Firm's response: Regarding dissolution testing FDA provide harmonized database for dissolution parameter and innovator develop their product as in-house parameter. Disintegration of the product is maximum 6 minutes, so active availability in the solution is fast and we perform the comparative dissolution study (release profile) with innovator product and found similar with the innovator.
Firm has submitted results of disintegration test of 6 batches wherein all results are within 5 minutes. Firm has stated that the disintegration of Niraparix Capsule is maximum 5 minutes, so the active is able to reach in absorption site very fast which is required for Bioavailability.

Decision of 323rd meeting: Approved with Innovator's specificatiosn as per policy for inspection of manufacturers abroad. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Registration letter will be issued upon submission of performance of dissolution testing as per revised specifications according to that recommended by innovator drug product.**

1408	**Name, address of Applicant / Importer**	**M/s Himmel Pharmaceuticals (Pvt) Ltd. 793-D, Block ''C'', Faisal Town Lahore.**
	Details of Drug Sale License of importer	**License No:** 05-352-0065-016174-D **Address:** 793-D, Block -C, Faisal Town Lahore **Address of Godown:** NA **Validity:** 06-02-2022 **Status:** License to sell drugs as distributor
	Name and address of marketing authorization holder (abroad)	M/s Beacon Pharmaceuticals Limited Plant address: Kathali Bhaluka Mymensingh Bangladesh Office Address: 9/A Toyenbee Circular Road Motijheel Dhaka Bangladesh
	Name, address of manufacturer(s)	M/s Beacon Pharmaceuticals Limited Plant address: Kathali Bhaluka Mymensingh Bangladesh Office Address: 9/A Toyenbee Circular Road Motijheel Dhaka Bangladesh
	Name of exporting country	Bangladesh
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) Firm has submitted original legalized COPP (DA/6-110/2016/3292) issued on 01-June-2020 Government of the people's republic of Bangladesh, Ministry of Health & Family welfare, Directorate General of Drug Administration Oushad Bhaban, Mohkhali Dhaka-1212, Bangladesh. **GMP:** Firm has submitted Legalized GMP certificate (Certificate No. DA/6-110/06/10002) issued by M/s Beacon Pharmaceuticals limited. Also Renewal certificate is submitted.	
	Details of letter of authorization / sole agency agreement • Firm has submitted copy of letter of distribution certificate from Beacon Pharmaceuticals limited. The letter specifies that the manufacturer appoints M/s Himmel Pharmaceuticals Pvt. Ltd. to register their products in Pakistan. The authorization letter is valid till June, 2025.	

	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No 7092 dated 03-03-2021
	Details of fee submitted	Rs.50,000/- dated 01-02-2021
	The proposed proprietary name / brand name	**Hernix 40mg tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Neratinib Maleate equivalent to Neratinib ……. 40mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	In house
	Proposed Pack size	180's in HDPE bottle
	Proposed unit price	As per current pricing policy of DRAP
	The status in reference regulatory authorities	Nerlynx 40mg (Pierre Fabre Medicament , France)
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance..
	Name, address of drug substance manufacturer	Beijing Mesochem Technology Co., Ltd. Floor 23, Building 9, Lippo Plaza Economic and Technological Development Zone Beijing
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure,

		general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25±2ºC, 60%±5%RH. The stability study data is till 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Nerlynx 40mg (Pierre Fabre Medicament, France) has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months.

Remarks of Evaluator[II]:

Section #.	Deficiencies	Firm's response
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	• Drug product manufacturer has submitted, specifications, analytical procedure, analytical method verification studies & COAs for drug substance.

	• Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studiesjasm, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture	
3.2.P.1	• Qualitative composition of applied product is not same as that of the innovator product.	• The excipients used complies with current pharmacopoeial monographs. These excipients are pharmaceutically inert substance and we have used these excipients below the IIG limit of FDA database as well as we have done extensive analysis of the product afer formulation and found satisfactory result of assay, dissolution results & impurity profile. Also w have done stability study during developmeht stage and found satisfactory result of the product. So we can conclude that these excipients are not incompatible with the API.
3.2.P.2	Compatibility studies of the Drug Substance(s) with excipients shall be submitted, since the qualitative composition of the formulation is not similar to innovator / reference product.	• The excipients used complies with current pharmacopoeial monographs. These excipients are pharmaceutically inert substance and we have used these excipients below the IIG limit of FDA database as well as we have done extensive analysis of the product afer formulation and found satisfactory result of assay, dissolution results & impurity profile. Also w have done stability study during developmeht stage and found satisfactory result of the product. So we can conclude that these excipients are not incompatible with the API.
3.2.P.5.1	• US FDA review document of the Innovator product i.e., Nerlynx,	• The dissolution time for hernix tablet ha sbeen slected

	specifies the dissolution limit as "NLT Q in 30 minutes", whereas submitted specifications declare the dissolution limits as "NLT 75% in 45 minutes". Justify the variation in time point of dissolution. • Submitted specifications does not include test of content uniformity by way of Assay.	45 minutes as perthe british Pharmacopeoia guidline, reference chapter monographof the BP in the dissolution tests for tablets & capsules, Appendix XII B1. I nthe reference chapter it I smentioned that , "Unless otherwise indicated in th emongraph, withdraw samples at 45 minutes". Hence, we have selected 45 minutes as a sungle time point.
3.2.P.5.4	• Test of content uniformity by way of Assay has not been performed at the time of batch release.	• Firm has submitted revised finished product specifications including test of content uniformity and committed to provide COA from next commercial batches as per revised specifications.
3.2.P.8	• Following shall be submitted: i. Analytical record for stability studies including raw data sheets, chromatograms etc. ii. Complete batch manufacturing record.	• Submitted.

Decision of 320th meeting: Deferred for following:

- Scientific jusytification for difference in dissolution limits in terms of %age released and time point from that recommended by the US FDA for innovator product along with comparison of disintegration & release profile of the applied product & innovator product.

Firm's response: Regarding dissolution testing FDA provide harmonized database for dissolution parameter and innovator develop their product as in-house parameter. Disintegration of the product is maximum 3 minutes, so active availability in the solution is fast and we perform the comparative dissolution study (release profile) with innovator product and found similar with the innovator.
Firm has submitted results of disintegration test of 10 batches wherein all results arewithin 2 minutes.Firm has stated that the disintegration of Hernix Tablet is maximum 2 minutes, so the active is able to reach in absorption site very fast which is required for Bioavailability.

Decision of 323rd meeting: Approved with Innovator's specificatiosn as per policy for inspection of manufacturers abroad. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

- **Registration letter will be issued upon submission of performance of dissolution testing as per revised specifications according to that recommended by innovator drug product.**

	Details of fee submitted	PKR 75,000/-:Slip # 944857553239 10-08-2021
	The proposed proprietary name / brand name	**TAD 600mg dry powder injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Glutathione as sodium …….600mg

	Pharmaceutical form of applied drug	White lyophilized powder packed in moulded clear type-3 vials along with 4ml solvent
	Pharmacotherapeutic Group of (API)	Antidote ATC Code: V03AB32
	Reference to Finished product specifications	European Pharmacopoeia
	Proposed Pack size	10 vials with 10 (4ml) solvent ampoules (WFI)
	Proposed unit price	As per pricing committee.
	The status in reference regulatory authorities	TAD **(AIFA** Approved) complies EU Pharmacopoeia.
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Biomedica Foscama Industria Chimico-Farmaceutica S.P.A (Italy)
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API for accelerated at $40^{o}C \pm 2^{o}C$ / 75% ± 5% RH for 6 months as well as Long term testing which is conducted at $25^{o}C \pm 2^{o}C$ / 65% ± 5% RH. The stability study data is till 36 months at $\leq 25°C$.
	Module-III Drug Product:	Firm has submitted data of drug product and solvent (WFI) separately, including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not applicable being the innovator product

	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	API: Type III glass vials with chlorobutyl stoppers Aluminium oversealed Solvent: Type-I glass ampoules
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The Long-term stability study data is conducted at 25°C ±2°C / 65% ± 5% RH for 36 months. Now the firm has submitted 18 months long term stability studies data as per Zone IVb conditions, detailed as under: **Batch# / Initial date / Duration** 201007 / 07-2020 / 18 months 201008 / 07-2020 / 18 months 201009 / 07-2020 / 18 months Firm has claimed 36 months shelf life on basis of above submitted data.
	Details of diluent:	**Composition:** Water for injection **Container closure:** 4ml Type I glass ampoule. **Manufacturer:** BIOMEDICA FOSCAMA Industria Chimico-Farmaceutica, S.p.A. Via Morolense n.87, 03013 Ferentino (FR) Italy. **Stability data:** Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The Long-term stability study data at 30°C ±2°C / 75% ± 5% RH has been submitted for 9 months only.

Evaluation by PEC[II]:
Clinical profile of the applied product is as under:

- **Therapeutic indications:**

Prophylaxis of neuropathy following chemotherapy treatment with cisplatin or analogue.

- **Pharmacotherapy category:**

Antidotes, ATC code: V03AB32

- **Dosage:**

The generally recommended daily dose of TAD in patients receiving cisplatin or analogue chemotherapy is 1.5 g / m2 (corresponding to 2.5 g) administered slowly intravenously.

- **Contraindications:**

Hypersensitivity to the active ingredient.

- **Pharmaceutical description:**

The drug substance is lyophilised in bulk form and then the bulk lyophilised powder is filled in glass vials.

Section#	Observation	Firm's response
1.5.2	Strength per unit is mentioned as Glutathione powder 600mg instead of Glutathione sodium.	Firm has corrected label claim without submission of fee.

1.5.6	Pharmacopoeial reference for applied product is stated as European Pharmacopeia, whereas European monograph is not available for applied product.	Firm has submitted statement from M/s Biomedica Foscama that the TAD 600mg/4ml powder and solvent for infusion state that the product is contained in packaging in compliance with European Pharmacopoeia.
3.2.P.2.6	Compatibility studies shall be performed with the diluent specified in individual label of the drug product.	Firm has submitted stability study of 8hours after reconstitutiton at 25±2ºC.
Diluent		
3.2.P.3.1	Details of the manufacturer of diluent shall be submitted.	
3.2.P.8.3	Long term stability studies data of diluent shall be submitted as per Zone Iva conditions till claimed shelf life i.e., 60 months.	Firm has submitted long term stability studies data of three batches as per Zone IVa for 18 months.

Decision of 320th meeting: Deferred for regulatory status of applied formulation in other reference regulatory authorities alongwith its indications, precautions, contra indications etc.

Frim's response:

1- Attached summary of product characteristics (SmPC) authorized by AIFA (Italian medicine agency) and that you can find on the official website of AIFA

Link: farmaci.agenziafarmaco.gov.it/bancadatifarmaci/farmaco?farmaco=027154

2- Being sold in Europe upon physician's prescription as TAD is registered in AIFA

a. Attached relevant section of Official Gazette of the Italian Republic in which decrees and laws are published which are effective from date of publication

b. Excerpt according to MHRA Section 9: Unlicensed medicines and sub section 9.3 "Expanded Access/ Compassionate Use/ Named patient supply programmes – Guidance notes"

c. Evidence of sales in Europe are attached (Delivery note and CMR – Transport documents)

d. Attached Periodic safety update reports (PSUR) submitted to AIFA, according to the European Union Reference Dates (EURD) list published on European Medicine Agency (EMA) website

3- Registration letters of TAD in countries, Kyrgyztan, O'zbekiston, Georgia, Azerbaijan, Kazakhstan, Laos, Philippines, China & Kuwait.

Proceedings & Decision: The Board was appriosed that in 291st meeting application of M/s Friends Pharma, Lahore was approved on basis of international reference of AIFA of Italy. The application was submitted on Form 5D, whereas the firm didn't submit product development and stability studies data as required by the Board for such applications.Moreover, reference was also forwarded to the pricing division for MRP fixation. The Board deliberated the matter in detail and decided as follows:

- **To refer the case to "Society of Oncology, Pakistan" for expert opinon regarding therapeutic use and need of applied formulation.**
- **To advise M/s Friends Pharma, Lahore to submit the stability studies data as per checklist approved by Board in its 293rd meeting and case will be considered by the Board after above opinion.**

1410. Tiofix Discair (Tiotropium Bromide anhydrous 18mcg) Inhalation Powder by M/s The Searle company Limited Karachi

MODULE 1: ADMINISTRATIVE

	1.4.2	For imported products, please specify one of following: □ Finished Pharmaceutical Product Import
1.5		Detailed Information of Drug, Dosage From & Labelling Claims Submitted
	1.5.1	Generic name with chemical name & synonyms of the applied drug. Tiofix Discair (Tiotropium Bromide anhydrous 18mcg) Inhalation Powder
	1.5.2	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit Tiotropium Bromide anhydrous 18mcg
	1.5.3	The proposed proprietary name / brand name under which the drug is intended to be sold with trademark certification / clearance. Tiofix
	1.5.4	Proposed Pack size and Proposed unit price of drug e.g., per tablet / capsule. Maximum Retail Price (MRP) per pack shall also be mentioned. 1's (60 Doses)
	1.5.5	Pharmacotherapeutic Group of Active Pharmaceutical Ingredient (API) antimuscarinic Bronchodilator
	1.5.6	Pharmacopoeial reference / Status of applied formulation In-house
	1.5.7	Route of administration Oral Inhalation
	1.5.8	For Generic Drug Product, reference of other similar approved medicines with information pertaining to Manufacturer name, brand name, strength, composition, registration number & dosage form, Pack size and Price. Tioflow 18mcg (Tiotropium as Bromide monohydrate 18mcg) Capsule of M/s The Searle Company Limited Karachi
	1.5.9	The registration status of applied drug in same molecule and salt, strength, dosage form, container closure system, indications and route of administration etc. in other countries. The status in reference regulatory authorities is mandatory to mention. SPIRIVA® 18 microgram, inhalation powder, hard capsule (Germany)
	1.5.10	Dosage form of applied drug Oral Inhaler
	1.5.11	Proposed label (outer (secondary) & inner (primary)) & colour scheme in accordance with Drug (Labelling & Packing) Rules, 1986 along with specimens Submitted

	1.5.12	Description of Batch numbering system
	1.5.14	Summary of Product Characteristics (SmPC) including Prescribing Information (PI) along with Patient information Leaflet (PIL) of the Finished Pharmaceuticals Product (FPP). Submitted
	1.5.15	Commitment / Undertaking that after registration of applied drug, the Pharmacovigilance department of the applicant / manufacture is liable to impose similar restrictions, addition of any clinical information (like in Indications, Contra-indications, Side effects, Precautions, Dosage & A0dverse Drug Reactions etc. in Summary of Product Characteristics (SmPC), Labelling & Promotional material) or withdraw the drug from market in Pakistan within fourteen days after knowing that such information (which was not available or approved by the DRAP at the time of registration) / actions taken (for safety reasons) by any reference / stringent drug regulatory agency / authority & also inform the DRAP (Drug Regulatory Authority of Pakistan) for further action in this regard. Submitted
	1.5.16	Commitment / Undertaking that the applicant shall recall the defective Finished Pharmaceutical Products (FPP) and notify the compliance to the authority along with detail of actions taken by him as soon as possible but not more than ten days. The level of recall shall also be defined. Submitted
	1.5.17	Commitment / Undertaking that in case of any false claim / concealing of information, the DRAP has the right to reject the application at any time, before and even after approval or registration of the product in case if proved so. Submitted
	1.5.18	Commitment / Undertaking that the firm shall follow the official pharmacopoeia specifications for product / substance as published in the latest edition & shall update its specification as per latest editions of the same. In case, the specifications of product / substance not present in any official pharmacopoeia the firm shall establish the specifications. In both cases, the validation of specifications shall be done by the applicant. Submitted
	1.5.19	Commitment / Undertaking that in case of any post approval change, the applicant shall ensure that the product with both approvals shall not be available in the market at the same time. And the product with new approvals shall be marketed only after consumption / withdrawal of stock with previous approvals. The company shall be liable to inform the same regarding marketing status of product to the DRAP after getting such post-registration approvals. Submitted
	1.5.20	Other commitment e.g., regarding stability studies etc.
	1.5.21	Protocols along with the commitment to follow Good Laboratory Practices (GLP) by the Manufacturer.
	1.5.22	Protocols to implement Good Pharmacovigilance Practice by the Pharmacovigilance department/section of the Manufacturer / Company.
1.6		Miscellaneous Information Submitted
	1.6.1	Information on Prior-related Applications
	1.6.2	Appendix
	1.6.3	Electronic Review Package
	1.6.4	QIS (Quality Information Summary)
	1.6.5	Drug Substance related Document including following: Name and address of API manufacturer. Approval of manufacturing facility of API by regulatory body of country and validity. M/s Teva Pharmaceutical Industries Ltd. Petah Tikva, Israel
	Original Legalized CoPP (Certificate#. 2018/3142) issued on 10-09-2018 by Republic of Turkey Ministry of Health Turkish Medicines and Medical Devices Agency declaring the free sale of applied product and GMP compliant status of the manufacturer i.e., M/s Neutec Inhaler Ilac San. Ve Tic. A.S, Sakarya 1. Organize sanayo Bolgesi 2. Yol No.3 Artifiyes/ Sakarya/ Turkey valid until 10/09/2020. Original Notarized "Product specific Letter of Authorization" from M/s Neutec Inhaler Ilac San. Ve Tic. A.S,, Turkey declaring M/s The Searle company Limited authorized for registration approval. Dated 16.10.2018 Authorization valid for three years.

3.2.P.6		Reference Standards or Materials Submitted
3.2.P.7		CONTAINER CLOSURE SYSTEM Submitted
3.2.P.8	STABILITY	
	3.2.P.8.1	Stability summary and conclusion (Finished Dosage Form) Submitted Stability protocol submitted
	3.2.P.8.2	Post-approval Stability Protocol and Stability Commitment Submitted
	3.2.P.8.3	Stability Submitted
		Firm has submitted three batches long term stability data 3 batches 24 months at 30±20C,75%RH and 6 months at 400C±75%RH for three batches.

Remarks of evaluator:
Applied formulation is Tiotropium Bromide Anhydrous while reference formulation is tiotropium bromide monohydrate.
Applied formulation is differ in Primary packaging material, secondary packaging material, unit dose and device design as well, clarify how it is generic of Spirivia that is reference product.
Same molecule Tioflow 18mcg (Tiotropium as Bromide monohydrate 18mcg) Capsule already registered in the name of importer M/s The Searle Company Limited Karachi
Decision of 293rd meeting: Deferred for submission of applied dosage form drug delivery data.

Firm's response:
Firm has submitted results of deleivered dose uniformity test, also comparative study with the reference product Spiriva Handihaler.

Remarks	Justification
Applied formulation is Tiotropium Bromide Anhydrous while reference formulation is Tiotropium Bromide Monohydrate.	Manufacturer Comments: Crystalline monohydrate of tiotropium bromide is protected with TR2004/02579T4-EP1326862B1-W00230928A1 in TR until 28.09.2021. Therefore, we use Tiotropium bromide anhydrous as active Substance. https:/ /data.epo.org/ publication-server/pdf-document?on=1326862&ki=B1&cc=EP&PD=20040915
Applied formulation is different in Primary packaging material, secondary packaging material, unit dose and device design as well, clarify how it is generic of Spirivia that is reference product.	Please note that primary packaging, secondary packaging material and device design can vary from innovator. According to USP Chapter <601> Aerosol, Nasal Sprays, metered dose inhaler and dry powder Inhaler – Specifies two tests for DPIs i.e, Delivered-Dose Uniformity & Aerodynamic Size Distribution. With reference to DRB 293 Meeting minutes, The equivalency of applied product with the reference product, in terms of –Target Delivered Dose, must be established. The compatibility of Tiofix Discair Inhalation Powder with reference product Spiriva Handihaler hard gelatin capsules must be established. Aerodynamic particle size Distribution (APSD) & Delivered Dose Uniformity (DDU) Tests were performed for both the innovator Spiriva (Tiotropium Bromide) and Tiofix (Tiotropium Bromide) to establish such equivalency. Comparable results were obtained and thus test product has in vitro bioequivalence to the reference Spiriva Handihaler Product. ***Documents Attached for Reference.***

	Same molecule Tioflow 18mcg (Tiotropium as Bromide monohydrate 18mcg) Capsule already registered in the name of importer M/s The Searle Company Limited Karachi	Tioflow 18mcg Capsule is locally registered in the name of The Searle Company Limited, F-319 SITE area Karachi, used traditionally while Tiofix (Finished Import) is under modern technique pre Dispensed device, so in order to increase patient compliance and maintain good Hygiene of patients Tiofix Discair 18mcg Inhalation powder is imported.

Decision of 323rd meeting: Approved with innovator's specification as per policy of inspections of manufacturer abroad. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 before issuance of registration letter.

Case no. 05 Registration applications of Form 5 with stability studies data.

1411.	**Name and address of manufacturer / Applicant**	**M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A Sundar Industrial Estate, Lahore**
	Brand Name + Dosage Form + Strength	DIBIAN 10mg Tablets
	Composition	Each Film Coated Tablet contains: Empagliflozin……..10 mg
	Diary No. Date of R& I & fee	Dy No. 437 17-11-2016 PKR 50,000/- 9-11-2016

	The status in reference regulatory authorities	Approved by MHRA of UK
	For generic drugs (me-too status)	Penro Injection of M/s Bosch Pharma.
	GMP status of the Finished product manufacturer	GMP certificate issued on basis of inspection conducted on 22-09-2020.
	Name and address of API manufacturer.	M/s Aurobindo Pharma ltd., Unit-V, Plot. No. 79-91, I.D.A, Chemical Zone, pashamylarm, Ptancheru Mandal, Medak Dist, Telangana, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and

		stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Meronem 500mg Injection of Pfizer Pakistan Ltd.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

Documents submitted along with stability data.				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s Aurobindo Pharma ltd., Unit-V, Plot. No. 79-91, I.D.A, Chemical Zone, pashamylarm, Ptancheru Mandal, Medak Dist, Telangana, India issued by Drugs Control Administration, Telangana, India dated 02-03-2017		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice attested by AD DRAP I&E Lahore dated 19-10-2017 for the import of Meropenem 20Kg from M/s Aurobindo Pharma ltd., Unit-V, Plot. No. 79-91, I.D.A, Chemical Zone, pashamylarm, Ptancheru Mandal, Medak Dist, Telangana, India		
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	--		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted.		

Remarks of Evaluator[II]:

Section#	Shortcomings communicated	Firm's response
1.1	Differential fee for Rs. 25,000/- shall be submitted.	
1.5.3	As recommended by the USP monograph of "Meropenem for injection", the label claim shall state the quantity, in mg, of sodium (Na) in a given dosage of meropenem.	
1.6.5	Valid GMP certificate of the drug substance manufacturer shall be submitted.	
3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required."	
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted".	
3.2.S.4.4	• Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification). • Submitted COA of drug substance from M.s Stallion does not reflect performance of test of	

	"sodium, carbonate content", sterility and endotoxin.	
3.2.S.5	Submit COA of reference standard / working standard including source and lot number which is actually used in the testing of drug substance and drug product.	
3.2.P.1	• Sodium content in terms of sodium carbonate shall be declared in composition. • Details of reconstitution diluent shall be submitted.	
3.2.P.2.2.1	• Justify the proposed quantity of drug substance per unit vial since the drug substance contains meropenem blended with 15.10 to 16.50% w/w of sodium carbonate. • Submitted pharmaceutical equivalence report does not include test of sodium content.	
3.2.P.2.2.2	Justify the 5% age overage in the master formulation.	
3.2.P.2.6	Justification shall be submitted for the declared pH range of 5 – 7 in Compatibility study report.	
3.2.P.5.1	Submitted drug product specifications does not include test of Sodium content & Particulate matter.	
3.2.P.5.2	• Submitted limits and procedure for the test of "Content of Sodium" is not as per USP monograph. • Provide detailed method of sample stock solution preparation instead of mentioning the general statement "Constitute a container of Meropenem for Injection with a volume of water, corresponding to the quantity of solvent specified in the labelling". • Justify why the formula for calculation of assay contents of meropenem is different than that mentioned in USP monograph.	
3.2.P.5.3	Performance of Accuracy & precision parameter shall be submitted in Analytical method verification report studies.	
3.2.P.5.4	Drug product batch release COA does not include performance of test of "Content of Sodium", as recommended by USP monograph. Justification shall be submitted in this regard. Batch analysis COA of the relevant batches for which stability data has been submitted shall be provided.	
3.2.P.6	Submit COA of reference standard / working standard including source and lot number which is actually used in the testing of drug product stability batches.	
3.2.P.8.3	• It is evident from the submitted raw data sheets that sample and standard concentrations for the performance of Assay test was not as recommended by USP monograph. Justification shall be submitted din this regard. • Provide details that which lot number of drug substance has been used in manufacturing of each stability batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product. • Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point, since the submitted	

	chromatograms and analytical reports are without any proper sequence. • Provide Reference of previous approval of applications with stability study data of the firm (if any) • Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Submitted stability study summary sheets reflect that tests of particulate matter, sterility tests, endotoxin test & Content of sodium have not been performed during stability studies. • Complete batch manufacturing record of the stability batches of drug product shall be submitted.	

Proceedings & Decision: Registration Board was apprised that the applied formulation has already been approved in 312th meeting of Registration Board for contract manufacturing from M/s Stallion Pharmaceuticals Pvt Ltd. on basis of Form 5F (CTD) of M/s Healthtek (Pvt) Ltd., Karachi as applicant, wherein following submission had also been made by the firm and above mentioned points have been addressed and responded:

1. **Evidence for purchase of atomic absorption spectrophotometer in the form of purchase order dated 14-06-2021, deliver challan dated 19-06-2021 & invoice No. 06/3029 dated 18-06-2021.**
2. **Installation and operational qualification reports of atomic absorption spectrophotometer**
3. **Analysis report of Sodium Content in Mopen (Meropenem) Injection by M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore.**

On basis of above cited reference Registration Board decided to approve applications of "Neutopenem Sterile Dry Powder 1g Injection" & "Neutopenem Sterile Dry Powder 500mg Injection". Registration Board further authorized its Chairman for issuance of registration letters upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**
- **Firm shall submit differential fee fo Rs. 25,000/- for each strength for contract manufcaturing application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

Proceedings & Decision: Registration Board was apprised that the applied formulation has already been approved in 312th meeting of Registration Board for contract manufacturing from M/s Stallion Pharmaceuticals Pvt Ltd on basis of Form 5F (CTD) of M/s Healthtek (Pvt) Ltd., Karachi as applicant,

wherein following submission had also been made by the firm and above mentioned points have been addressed and responded:

1. **Evidence for purchase of atomic absorption spectrophotometer in the form of purchase order dated 14-06-2021, deliver challan dated 19-06-2021 & invoice No. 06/3029 dated 18-06-2021.**
2. **Installation and operational qualification reports of atomic absorption spectrophotometer**
3. **Analysis report of Sodium Content in Mopen (Meropenem) Injection by M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore.**

On basis of above cited reference Registration Board decided to approve applications of "Penem Sterile Dry Powder 1g Injection" & "Penem Sterile Dry Powder 500mg Injection". Registration Board further authorized its Chairman for issuance of registration letters upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd., 581- Sundar Industrial Estate, Lahore wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**
- **Firm shall submit differential fee fo Rs. 25,000/- for each strength for contract manufcaturing application as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

1418.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Radiant Pharma Pvt Ltd. 43-E, Sundar Industrial Estate, Lahore**
	Name, address of Manufacturing site.	M/s Neutro Pharma (Pvt) Ltd. Sheikhupura Road, Lahore
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm (manufcaturer)	GMP certificate issued on basis of inspection conducted on 31-12-2018 & 28-02-2019.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate of M/s Neutro Pharma, declaring the availability of Capsule cephalosporin section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 32858 dated 02-12-2021
	Details of fee submitted	Rs.50,000/- dated 05-11-2020
	The proposed proprietary name / brand name	**C-FIX 200 mg Capsules**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains Cefixime trihydrate as cefixime …..200 mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	Third-Generation Cephalosporin ANTIBIOTIC CEPHALOSPORIN

	Reference to Finished product specifications	JP specification
	Proposed Pack size	1x10's
	Proposed unit price	As per DRAP policy.
	The status in reference regulatory authorities	Cefixima normon 200mg capsules M/s Laboratories Normon, S.A., Spain approved by AEMPS of Spain
	For generic drugs (me-too status)	Maxpan capsule 200mg/ M/s Indus pharma
	Name and address of API manufacturer.	Saakh Pharma (Pvt) Ltd C-7/1, North Western Industrial Zone, Port Qasim Karachi – 75020, Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies against the reference product of "Cebosh Capsule 200mg" of M/s Bosch Pharmaceutical (Pvt.) Ltd. has been submitted.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long-term conditions.
STABILITY STUDY DATA		

Manufacturer of APIs	M/s Saakh Pharma (Pvt) Ltd C-7/1, North Western Industrial Zone, Port Qasim Karachi – 75020, Pakistan		
API Lot No.	19CF10020		
Description of Pack (Container closure system)	Alu-Alu foil		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	002	003
Batch Size	50,000 Capsule	50,000 Capsule	50,000 Capsule
Manufacturing Date	09/2018	09/2018	09/2018

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr.#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued on basis of inspection conducted on 18-06-2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (CFX/2019/2372) for procurement of 20Kg of Cefixime (micronized).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with batch manufacturing record and analytical record.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not submitted.
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	--

Remarks of Evaluator:

Section	Observation	Firm's response
1.1	Submit differential fee of Rs. 25,000/- for each strength as per Notification No. F.7-11f2012-B&A/DRAP dated 07th May, 2021.	
1.6.5	Valid GMP certificate issued by the relevant regulatory authority shall be submitted for the drug substance manufacturer.	
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by M/s Neutro Pharma shall be submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. • Commercial invoice form M/s Saakh Pharma declare Cefixime of micronized grade whereas	

	the COA of drug substance from M/s Neutro pharma declare it of Compacted grade. Clarification shall besubmitted in this regard.		
3.2.S.7.3	• It is not evident form the submitted stability reports that whether the stability data is for Cefixime micronized grade or Cefixime compacted grade.		
3.2.P.1	• List of all components of the dosage form, and their amount on a per unit basis shall be submitted.		
3.2.P.2.2.1	• Justification shall be submitted for performing CDP studies with one sampling time point only.		
3.2.P.5.1	• Justify the drug product specifications in which the assay and dissolution test analytical method and acceptance criteria is completely different from JP monograph as well as innovator's product. • Justification shall be submitted for proposed limits of Disntegration test.		
3.2.P.5.3	Analytical method verification studies shall be submitted as per the monograph of cefixime capsule approved by registration board in its 313rd meeting.		
3.2.P.8.3	• Complete raw data sheets wherein detail of sample & standard solution preparation along with calculation formula shall be submitted. • Justification shall be submitted for not performing dissolution test during stability studies. • Complete Batch manufacturing records for the stability batches shall be submitted. • Submitted stability studies reveal that test for Assay has not been performed as per the JP monograph of Cefixime capsule or the monograph approved by registration board in its 313rd meeting. Clarification shall be submitted in this regard.		

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH..
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies against the reference product of "Livlong infusion" of M/s English Pharma has been submitted.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long-term conditions.

STABILITY STUDY DATA

Manufacturer of APIs	M/s Kopran Research Labs. Ltd., Mahad Dist., Maharashtra State. India		
API Lot No.	DC-004-2004008		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	004	005	006
Batch Size	7000 vials	7000 vials	7000 vials
Manufacturing Date	03-19	03-2019	03-2019

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr.#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (BEXP-1718-429) attested by AD I&E DRAP Lahore dated 07-03-2018 for import of 20Kg of Cefotaxime sodium.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted data of stability batches along with batch manufacturing record and analytical record.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not submitted.
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	--

Remarks of Evaluator:

Section	Observation	Firm's response
1.1	Submit differential fee of Rs. 25,000/- for each strength as per Notification No. F.7-11f2012-B&A/DRAP dated 07th May, 2021.	
1.6.5	Valid GMP certificate issued by the relevant regulatory authority shall be submitted for the drug substance manufacturer.	
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by M/s Neutro Pharma shall be submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. • Submitted COA of drug substance from M/s Neutro does not include test if sterility. • Evidence of availability of HPLC system equipped with Auto-sampler able to maintain temperature of 4°C, as required by USP monograph, shall be submitted.	
3.2.P.1	Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) for the diluent which is to be provided along with the applied drug.	
3.2.P.2.2	The section declares "an overage 0.2% of Cefotaxime sodium is added to compensate inactive moiety." Scientific justification shall be submitted for this declaration.	
3.2.P.2.2.1	The limits of pH test are different from that specified in USP monograph.	
3.2.P.2.6	Compatibility studies shall be performed as per the instructions provided in individual label of the drug product.	
3.2.P.5	• Justification shall be submitted for the limit of average fill weight per vial. • Drug product specifications have been referred to as per USP, whereas analytical procedure for Assay method is not as per the USP monograph of "Cefotaxime for injection." • Analytical method verification studies have	

	not been performed as per USP monograph	
3.2.P.5.2	Submitted drug analytical procedure describes UV spectrophotometric method for Assay test. Justification shall be submitted for not adopting HPLC method for the performance of Assay test.	
3.2.P.5.3	Performance of specificity parameter has not been done in the analytical method validation studies.	
3.2.P.8.3	• Details of batch# and batch size are different between data submitted in section 3.2.P.5.4, 3.2.P.8.1 & 3.2.P.8.3. Clarification shall be submitted in this regard. • Submitted analytical record of stability studies for Assay reflect that in contradiction to the specification claimed in section 3.2.P.5.1, Assay test has not been performed as per the USP monograph of "Cefotaxime for injection". • Complete raw data sheets wherein detail of sample & standard solution preparation along with calculation formula shall be submitted. • Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Complete Batch manufacturing records for the stability batches shall be submitted. • Clarification shall be submitted whether submitted stability data is of trial batches or commercial batches. • Microbiological Reports for sterility testing & Bacterial Endotoxin testing.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of Evaluator:

Section	Observation	Firm's response
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by M/s Neutro Pharma shall be submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	
3.2.S.4.4	Provided drug substance analysis method from M/s Saakh pharma declare Assay method as per USP monograph, whereas COA of drug substance from M/s Neutreo Pharma declare it as of BP standard. Justification shall be submitted in this regard.	
3.2.S.7	Accelerated stability studies have been submitted till 12-month time point. Clarification shall be submitted in this regard. Same stability data has been submitted for both accelerated & long term conditions for batch# 18GN60002.	
3.2.P.2.1	• Role of "Sodium metabisulfite" as preservative shall be justified in the proposed formulation. • Scientific justification is required for not using antioxidant in the applied formulation since the innovator brand used cysteine as an antioxidant because paracetamol is susceptible to degradation by oxidation.	
3.2.P.2.2.2	The section declares "an overage 2.5% of paracetamol is added to compensate inactive moiety." Scientific justification shall be submitted for this declaration.	
3.2.P.3.2	Justify the proposed quantity of 1025mg per vial of Paracetamol against the label claim of 1000mg per vial.	

3.2.P.5.1	Scientific justification is required for not performing test of osmolality while batch release of trial batches of drug product, since the test has included in drug product specification of innovator brand. Justification shall be submitted for the limits of pH test.		
3.2.P.5.2	Submitted drug analytical procedure describes Assay test for Paracetamol tablet instead of Paracetamol infusion.		
3.2.P.5.3	Performance of specificity parameter has not been done in the analytical method validation studies.		
3.2.P.8.3	• Details of batch# and batch size are different between data submitted in section 3.2.P.5.4, 3.2.P.8.1 & 3.2.P.8.3. Clarification shall be submitted in this regard. • Limits of pH test are different between those mentioned in stability sheet and that declared in the drug product specifications. • Limits of bacterial endotoxin test are different between those mentioned in stability sheet and that declared in the drug product specifications. • Complete raw data sheets wherein detail of sample & standard solution preparation along with calculation formula shall be submitted. • Documents confirming procurement of drug substance shall be submitted. • Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Complete Batch manufacturing records for the stability batches shall be submitted. • Clarification shall be submitted whether submitted stability data is of trial batches or commercial batches. • Microbiological Reports for sterility testing & Bacterial Endotoxin testing.		

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Valid GMP certificate issued by Drug control department, govt. of Karnataka valid upto 05-02-2022 has been submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice (invoice#CFC6503/21-22) approved by AD DRAP I&E Islamabad dated 23-04-2021 for the import of 2 Kg of Ondansetron HCl.
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Yes

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	
3.2.S.4.4	COAs of relevant batches of drug substance used for the formulation of submitted stability batches of drug product, shall be submitted from both drug substance manufacturer and drug product manufacturer.	
3.2.S.5	Submitted COA of working standard declare its validity as 15-03-2019, whereas drug substance analysis has been performed subsequent to this date.	
3.2.S.6	Justify the use of "polyethylene bags" as primary container closure, for the injectable grade drug substance.	
3.2.S.7	Submitted summary sheets for the long term stability studies does not declare the temperature humidity conditions.	
3.2.P.1	Proposed quantity of 10.07mg Ondansetron HCl dehydrate per dosage unit shall be justified.	
3.2.P.2.2.3	The section declares pH between 4.6-4.7, which is not as per USP monograph.	
3.2.P.2.3	The section declares manufacturing process for a dry powder injection whereas applied formulation is a liquid injection.	
3.2.P.2.6	A tale declaring study for appearance after reconstitution has been submitted. Justification shall be submitted in this regard.	
3.2.P.3.3	Submitted manufacturing procedure neither includes step of terminal sterilization nor the aseptic filtration prior to the ampoule filling. Justification shall be submitted regarding how the sterility of product is ensured.	
3.2.P.3.4	Control of critical steps and intermediates does not include any terminal sterilization process.	
3.2.P.3.5	Submitted process validation report neither include any process of sterilization nor any test of sterility at any stage of manufacturing.	
3.2.P.5.1	• Formal controlled document for the drug product specifications and analytical procedure shale submitted form /s Bio-Labs.	
3.2.P.5.3	Concentration of sample solution declared in the analytical procedure is not as per USP monograph. Performance of precision parameter has not been included n the AMV report.	

	3.2.P.8.3	• Submit import documents attested by AD DRAP I&E, confirming import of relevant batches of drug substance used for the formulation of submitted stability batches of drug product. • Complete batch manufacturing record for the stability batches of drug product shall be submitted.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate issued on basis of inspection conducted on 23-04-2019, wherein Liquid Ampoule section is declared.
	Dy. No. and date of submission	Dy.No 27282 dated 01-10-2021
	Details of fee submitted	Rs.50,000/- dated 07-04-2021
	The proposed proprietary name / brand name	**Allo-D Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ampoule Contains: Cholecalciferol ……. 5mg
	Pharmaceutical form of applied drug	Liquid Injection
	Route of administration	Oral/IM
	Pharmacotherapeutic Group of (API)	Vitamin
	Reference to Finished product specifications	**Innovator specifications**
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	-----
	For generic drugs (me-too status)	Sunny D Injection of M/s Scotmann Pharma (Reg.#063450)
	GMP status of the Finished product manufacturer	GMP certificate issued on basis of inspection conducted on 23-04-2019.
	Name and address of API manufacturer.	M/s FERMENTA BIOTECH LIMITED, Village Takoli, P.O. Nagwain, Dist. Mandi-175121, Himachal Pradesh, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.

		Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $25^{O} \pm 2^{O}$ C /60% ± 5% RH for 6 months. The real time stability data is conducted at $5^{O}C \pm 3^{O}$ C.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed pharmaceutical equivalence studies against the Indrop-D injection.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s FERMENTA BIOTECH LIMITED, Village Takoli, P.O. Nagwain, Dist. Mandi-175121, Himachal Pradesh, India
API Lot No.	B-1-51-M180903
Description of Pack (Container closure system)	Amber glass ampoule
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 24 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18 & 24 (Months)

Batch No.	A-398	A-401	A-486
Batch Size	10,000 Packs	10,000 Packs	55 ltr
Manufacturing Date	02-2018	04-2018	08-2018
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate (Certificate# 2062043) of M/s FERMENTA BIOTECH LIMITED. Plot no. Z-109-B 7 C, SEZ-II, DAHEJ, TAL-VAGRA, Dahej, dist. Bharuch, Gujarat State, India issued BY Food 7 Drugs Control Administration, Gujarat, India valid up to 17-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice (invoice#RV2010020207) approved by AD DRAP I&E Islamabad dated 25-11-2020 for the import of Cholelcalciferol from M/s FERMENTA BIOTECH LIMITED. Plot no. Z-109-B 7 C, SEZ-II, DAHEJ, TAL-VAGRA, Dahej, dist. Bharuch, Gujarat State, India
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	--
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.5.9	Submitted evidence is of another reference product than for the formulation applied.	
2.3.R.1.1	Complete batch manufacturing record shall be submitted for the stability batches.	
3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	
3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	
3.2.P.3.3	Submitted manufacturing procedure neither includes step of terminal sterilization nor the aseptic filtration prior to the ampoule filling. Justification shall be submitted regarding how the sterility of product is ensured.	
3.2.P.3.4	Control of critical steps and intermediates does not include any sterilization process.	

3.2.P.3.5	Submitted process validation report neither include any process of sterilization nor any test of sterility at any stage of manufacturing.	
3.2.P.5.1	• Submitted drug product specifications does not include test of "Uniformity Of Dosage Units", "Foreign And Particulate Matter" & "Container content". • Justification shall be submitted for un-conventional Assay limits of "89.33% to 110.66%". • Test of sterility does not refer to any particular or general limits. • Submitted specification does not include test of endotoxin.	
3.2.P.5.3	Analytical method verification report of HPLC method of Assay test shall be submitted.	
3.2.P.5.4	Submitted COA does not include test of endotoxin, uniformity of dosage, container content. Submitted COA of batch# "A-978" declares manufacturing date as 11-2020, whereas the COA has been signed dated 19-03-2020.	
3.2.P.8.3	Submitted GMP certificate is of other drug substance manufacturer than that declared in section 1.6.5 & 3.2.S.2. Submitted commercial invoice is of date subsequent to the date of manufacturing of stability batches. Submitted commercial invoice is from other drug substance manufacturer than that declared in section 1.6.5 & 3.2.S.2. • Submitted COA of stability batches at all time points of stability studies does not include performance of tests of "Endotoxin test", "Uniformity Of Dosage Units", "Foreign And Particulate Matter" & "Container content". • Justification shall be submitted for performance of Assay analysis by "UV spectrophotometric method" during complete stability studies, whereas the drug substance manufacturer has applied HPLC method for drug substance analysis and also submitted drug product testing method in section 3.2.P.5.2 includes HPLC method for "Assay test".	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.1	Differential fee for Rs. 25,000/- shall be submitted.	
1.5.9	Submitted evidence is of Vitamin D3 drops while applied formulation is of Injection.	
2.3.R.1.1	Complete batch manufacturing record shall be submitted for the stability batches.	
3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	
3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	
3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	
3.2.P.3.3	Submitted manufacturing procedure neither includes step of terminal sterilization nor the aseptic filtration prior to the ampoule filling. Justification shall be submitted regarding how the sterility of product is ensured.	
3.2.P.3.4	Control of critical steps and intermediates does not include any sterilization process.	
3.2.P.3.5	Submitted process validation report neither include any process of sterilization nor any test of sterility at any stage of manufacturing.	
3.2.P.5.1	• Submitted drug product specifications does not include test of "Uniformity Of Dosage Units", "Foreign And Particulate Matter" & "Container content". • Justification shall be submitted for un-conventional Assay limits of "89.33% to 110.66%". • Test of sterility does not refer to any particular or general limits. • Submitted specification does not include test of endotoxin.	
3.2.P.5.3	Analytical method verification report of HPLC method of Assay test shall be submitted.	
3.2.P.5.4	Submitted COA does not include test of endotoxin, uniformity of dosage, container content. Submitted COA of batch# "A-978" declares manufacturing date as 11-2020, whereas the COA has been signed dated 19-03-2020.	
3.2.P.8.3	Submitted GMP certificate is of other drug substance manufacturer than that declared in section 1.6.5 & 3.2.S.2.	

		Submitted commercial invoice is of date subsequent to the date of manufacturing of stability batches. Submitted commercial invoice is from other drug substance manufacturer than that declared in section 1.6.5 & 3.2.S.2. • Submitted COA of stability batches at all time points of stability studies does not include performance of tests of "Endotoxin test", "Uniformity Of Dosage Units", "Foreign And Particulate Matter" & "Container content". • Justification shall be submitted for performance of Assay analysis by "UV spectrophotometric method" during complete stability studies, whereas the drug substance manufacturer has applied HPLC method for drug substance analysis and also submitted drug product testing method in section 3.2.P.5.2 includes HPLC method for "Assay test".	
Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.			

Case no. 07 Request for Change in Registration Status of Products from M/s Getz Pharma (Pvt) Ltd, 29-30, Sector 27, Korangi Industrial Area, Karachi to M/s Getz Pharma (Pvt) Ltd, Plot No.01, Sector 25, Korangi Industrial Area, Karachi

M/s Getz Pharma (Pvt) Ltd, Plot No.01, Sector 25, Korangi Industrial Area, Karachi **(DML No. 000933)** has requested for change in registration status of following products from M/s Getz Pharma (Pvt) Ltd, 29-30, Sector 27, Korangi Industrial Area, Karachi **(DML No. 000284)** to their name. Detail is given as under:

I	II	III	IV
S. No.	**Reg. No.**	**Name of Drug(s)**	**Dy. No./ Date/Fee/ Initial date of registration/ Remarks of RRR Section regarding Renewal Status**
1.	045372	Cipesta Tablets 250mg Each film coated tablet contains: Ciprofloxacin (as Hydrochloride)……..250mg (USP Specifications)	Dy.No.20510 19-07-2022 Rs. 30,000/- (Invoice # 49086104 dated: 19-05-22) **DOR: 22-05-2007** Remarks of RRR Section: Renewal application within time with respect to change of approval for brand name dated 14-02-2013.
2.	045373	Cipesta Tablets 500mg Each film coated tablet contains: Ciprofloxacin (as Hydrochloride)……..500mg (USP Specifications)	Dy.No.20509 19-07-2022 Rs. 30,000/- (Invoice # 07394202849 dated: 19-05-22) **DOR: 22-05-2007** Remarks of RRR Section: Renewal application within time with respect to change of approval for brand name dated 14-02-2013.
3.	061344	Nebil Tablets 2.5mg Each tablet contains: Nebivolol as HCl……..2.5mg (Manufacturer's Specifications)	Dy.No. 24413/R&I 29-08-2022 Rs. 30,000/- (Invoice # 92207746868) **DOR: 28-04-2010** Remarks of RRR Section: Renewal application is submitted within time with respect to mentioned date of registration.
4.	061345	Nebil Tablets 5mg Each tablet contains: Nebivolol as HCl……..5mg (Manufacturer's Specifications)	Dy.No. 24414/R&I 29-08-2022 Rs. 30,000/- (Invoice # 6710942721) **DOR: 28-04-2010** Remarks of RRR Section: Renewal application is submitted within time with respect to mentioned date of registration.
5.	034838	Montiget 10mg Tablets Each film coated tablet contains:	Dy.No. 25560/R&I 09-09-2022

		Montelukast (as Sodium Salt)……10mg	Rs. 30,000/- (Invoice # 9445603675) **DOR: 20-12-2004** Remarks of RRR Section: Renewal application is submitted within time with respect to mentioned date of registration.
6.	047117	Moxiget 400mg Tablets Each tablet contains: Moxifloxacin (as Hydrochloride)…400mg (Manufacturer's Specification)	Dy.No. 25990/R&I 14-09-2022 Rs. 30,000/- (Invoice # 02292182925) **DOR: 18-09-2007** Remarks of RRR Section: Renewal application is submitted within time with respect to mentioned date of registration.
7.	103094	Diampa-M Tablet 5mg + 1000mg Each film coated tablet contains:- Empagliflozin …….. 5mg Metformin Hydrochloride…….. 1000mg (As per *Innovator's Specifications)	Dy.No. 27685/R&I **29-09-2022** Rs.30,000/- (Invoice# 80951026261) **DOR: 21-05-2020**
8.	093084	Diampa-M Tablet 12.5mg + 1000mg Each film coated tablet contains:- Empagliflozin …….. 12.5mg Metformin Hydrochloride…… ….. 1000mg (As per *Innovator's Specifications)	Dy.No. 27684/R&I **29-09-2022** Rs. 30,000/- (Invoice# 3442319097) **DOR: 16-01-2019**

Administrative Documents in the light of SOP approved by the Registration Board in its 283rd meeting

i. Copy of DML No. 000933 issued w.e.f. 25-05-2021

ii. Copy of Last Inspection report dated 17-11-2021.

iii. Approved sections verified from Licensing Division's letter for issuance of DML (dated 07th June, 2021):
- Tablet (General)
- Capsule (General)
- Dry Powder Suspension (General)

iv. NOC from M/s Getz Pharma (Pvt) Ltd, 29-30, Sector 27, Korangi Industrial Area, Karachi dated 09-06-2022

v. Relevant undertakings & commitments.

In the light of SOP approved by the Board in it 283rd meeting, after screening for administrative documents, the applications were forwarded to Pharmaceutical Evaluation Cell for scrutinization/evaluation. Detail of submitted documents & remarks of evaluator have been mentioned as under:

1428.	Name, address of Applicant / Marketing Authorization Holder.	M/s Getz Pharma (Pvt.) Ltd. Plot No. 01, Sector 25, Korangi Industrial Area, Karachi Pakistan
	Name, address of Manufacturing site.	M/s Getz Pharma (Pvt.) Ltd. Plot No. 01, Sector 25, Korangi Industrial Area, Karachi Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP Status of the firm	Firm has been granted Drug Manufacturing License (DML 000933) by way of formulation dated 25-05-2021.
	Evidence of approval of manufacturing facility	Firm has been granted Drug Manufacturing License (DML 000933) by way of formulation dated 25-05-2021, with approved Tablet, Capsules & Dry Powder Suspension sections.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Details of fee submitted	PKR 30,000/-: 28-07-2022
	The proposed proprietary name / brand name	**Montiget Tablets 10mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Montelukast as sodium ….10mg
	Pharmaceutical form of applied drug	Film-coated Tablets
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonists
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	14's
	Proposed unit price	Rs. 525.40/- for 14's
	The status in reference regulatory authorities	Singulair Tablets 10mg approved by US-FDA manufactured by Merck Sharp and Dohme Limited.
	For generic drugs (me-too status)	Montiget Tablets 10mg (Reg. No.:034838) manufactured by M/s Getz Pharma (Pvt.) Limited Plot No. 29 -30, Sector 27, Korangi Industrial Area, Karachi
	Name and address of API manufacturer.	**M/s. Zhejiang Tianyu Pharmaceutical Co., Ltd.** located at No. 15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	**Getz Pharma (Pvt) Limited Plot no. 29 – 30, sector 27 Korangi Industrial Area, Karachi (Existing Facility)** Pharmaceutical Equivalence Studies & Comparative Dissolution Profile studies of Montiget Tablets 10mg against the reference product Singulair Tablets 10mg, in three dissolution mediums has been submitted with acceptable level of f2 results. **Getz Pharma (Pvt) Limited** **Plot No. 01, Sector 25 Korangi Industrial Area, Karachi (New Facility)** Firm has also submitted the Comparative Dissolution Profile studies of Montiget Tablets 10mg against the reference product Singulair

		Tablets 10mg in routine release Medium with acceptable level of f2 results.
	Analytical method validation/ verification of product	Firm has submitted verification studies of the drug substance and drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions from existing site and stability studies data of two batches at initial, 3rd month and 6th month time interval (both accelerated and long term conditions) from new site.

STABILITY STUDY DATA (Plot No. 29-30, Sector 27, Korangi Industrial Area, Karachi)

Manufacturer of APIs	M/s. Morepen Laboratories Limited located at Village Masulkhana, Parwanoo, Distt. Solan [H.P.] India. M/s. Zhejiang Tianyu Pharmaceutical Co., Ltd. located at No. 15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China.		
API Lot No.	0000112011, 0000113262		
Description of Pack (Container closure system)	Alu-Alu blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 48 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24, 36, 48 (Months)		
Batch No.	**157F13**	**158F13**	**159F13**
Batch Size	1,100,000 Tablets	1,100,000 Tablets	1,100,000 Tablets
Manufacturing Date	23-12-2015	20-02-2016	20.02.2016

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Onsite inspection report of Getz Pharma product Emclide (Empagliflozin & Linagliptin) Tablets 10mg + 5mg was discussed and approved in 316th RB Meeting held on March 15-18, 2022. The inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. The firm have number of HPLC with Empower 3 and DB software having following features: ✓ Have Audit trail ✓ Have backup system ✓ Have Data traceability ✓ Have Data achieving system ✓ Have data integrity ✓ Have Data security ✓ System Security Policy
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Zhejiang Tianyu Pharmaceutical Co., Ltd. issued by China Food and Drug Administration valid till 03-14-2023. Firm has also submitted copy of GMP certificate of M/s Morepen Laboratories Limited issued by Licensing Authority cum Drug Controller, Himachal Pradesh valid till 31.12.2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD I&E DRAP, Karachi, has been submitted.

Batch No.	Invoice No.	Quantity Imported	Date of approval by DRAP

Remarks of the Evaluator:

The firm has submitted the following documents as per WHO TRS 981,2013 (47th report, Annex 3) and SOP guidelines stated in 283rd DRB meeting minutes:

- Stability Data of 3 batches till shelf life manufactured at their existing facility located at Plot No. 29 – 30, Sector 27, Korangi Industrial Area.

- Stability Data of 2 stability batches at initial time point, 3rd Month & 6th Month interval have also been submitted by manufacturer from new facility located at Plot No. 01, Sector 25, Korangi Industrial Area as per Guidance Document for Submission of Application on Form 5-F (CTD) for registration of pharmaceutical drug products for human use issued in October, 2021.
- Comparative Dissolution Profile and Pharmaceutical Equivalence studies of the product with the innovator from existing manufacturing facility & also submitted Comparative Dissolution Profile against innovator from new manufacturing facility.
- Comparative batch analysis data on two batches from the new facility and comparative data on the last three batches from the existing facility.
- Firm has submitted Executed Production document of stability batch.
- Firm has submitted Process Validation Protocol.
- Firm has submitted undertakings that process validation, accelerated and real time stability studies on 03 commercial batches at new manufacturing facility will be conducted & in case of any quality complaint / OOS result as a result of this change, the same shall be reported to registration board and all the stock shall be recalled from the market immediately.
- Analytical Method Verification / validation studies of API & Finished product.
- Valid GMP/DML of the API manufacturer submitted.

Section#	Observations	Firm's response
3.2.S.4.3	Performance of accuracy parameter shall be submitted for drug substance analytical method verification studies.	This is to bring to your kind attention that in ICH Guidelines "VALIDATION OF ANALYTICAL PROCEDURES: TEXT AND METHODOLOGY Q2 (R1)" it is mentioned in section 4.1.1 Drug Substance *"accuracy may be inferred once precision, linearity and specificity have been established".* This is bring to your kind attention that since we have performed method verification studies as per ICH Q2 (R1) including system suitability, specificity, linearity, repeatability and range. Therefore, requirement of accuracy is not applicable. However, as per requirement of your good office we have performed accuracy parameter for drug substance analytical method verification studies.
3.2.S.4.4	Submitted COA is form Morepen Laboratories whereas section 1.6.5 & section 3.2.S.2.1 declares drug substance manufacturer as M/s Zheijiang Tianyu Pharmaceutical Co., Ltd., China	This is to bring to your kind attention that submitted COAs from Morepen Laboratories Limited are COAs of relevant batch(es) of Drug Substance used during stability studies. Note: M/s Zhejiang Tianyu Pharmaceutical Co., Ltd., China is our current manufacturer of Montelukast Sodium for which we have submitted Drug Master File. However, stability batches on existing site have been manufactured by using Montelukast Sodium manufactured by M/s Morepen Laboratories Limited India. Please note that M/s Morepen Laboratories Limited India is our alternate approved manufacturer of Montelukast Sodium.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of both drug substances.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability studies.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	**Getz Pharma (Pvt) Limited** **Plot no. 29 – 30, sector 27 Korangi Industrial Area, Karachi** Pharmaceutical Equivalence Studies & Comparative Dissolution Profile studies of Moxiget Tablets 400mg against the reference product Avelox Tablets 400mg, in three dissolution mediums has been submitted with acceptable level of f2 results.

Details of documents submitted:

The firm has submitted the following documents as per WHO TRS 981,2013 (47th report, Annex 3) and SOP for approval of post-registration variations approved in 283rd DRB meeting:

- Stability Data of 3 batches till shelf life manufactured at their existing facility located at Plot No. 29 – 30, Sector 27, Korangi Industrial Area.
- Stability Data of 2 stability batches (till 6 month time point) from new facility located at Plot No. 01, Sector 25, Korangi Industrial Area as per Guidance Document for Submission of Application on Form 5-F (CTD) for registration of pharmaceutical drug products for human use issued in October, 2020.

- Comparative Dissolution Profile and Pharmaceutical Equivalence studies of the product with the innovator from existing manufacturing facility & also submitted Comparative Dissolution Profile against innovator from new manufacturing facility.
- Comparative batch analysis data on two batches from the new facility and comparative data on the last three batches from the existing facility.
- Executed Production document of stability batch.
- Process Validation Protocol from new site.
- Undertakings in accordance with SOP for approval of post-registration variations by DRAP.
- Analytical Method Verification studies of API & Finished product.
- Valid GMP Certificate of the API manufacturer.

Remarks of Evaluator:

- Dissolution test in International Pharmacopoeia recommends analysis of samples at 295nm wavelength of UV spectrophotometer, whereas firm has applied wavelength 294nm for dissolution test.
- Firm's response:
  Firm has referred to the following text of general chapter no. **1.6 Spectrophotometry in the visible and ultraviolet regions** of International Pharmacopoeia:
  "Good practice demands that use be made of the peak wavelength actually found in the individual instrument, rather than the specific wavelength given in the monograph, provided the two do not differ by more than ± 0.5 nm in the 240-280 nm range, by more than ± 1 nm in the 280-320nm range, and by more than ± 2 nm above 320 nm. If the difference is greater, recalibration of the instrument may be indicated."

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	--		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by State Food and Drug Administration valid till 04-09-2023.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD I&E DRAP, Karachi, has been submitted.		

Batch No.	Invoice No.	Quantity Imported	Date of approval by DRAP
105-211025-1	GBPH2021-2766	500kg	01.12.2021

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted compliance certificate of HPLC software.
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Remarks of the Evaluator:

The firm has submitted the following documents as per WHO TRS 981,2013 (47th report, Annex 3) and SOP guidelines stated in 283rd DRB meeting minutes:

- Stability Data of 3 batches till shelf life manufactured at their existing facility located at Plot No. 29 – 30, Sector 27, Korangi Industrial Area.
- Stability Data of 2 stability batches at initial and 3rd month time point have also been submitted by manufacturer from new facility located at Plot No. 01, Sector 25, Korangi Industrial Area as per Guidance Document for Submission of Application on Form 5-F (CTD) for registration of pharmaceutical drug products for human use issued in October, 2021.
- Comparative Dissolution Profile and Pharmaceutical Equivalence studies of the product with the innovator from existing manufacturing facility & also submitted Comparative Dissolution Profile against innovator from new manufacturing facility.
- Comparative batch analysis data on two batches from the new facility and comparative data on the last three batches from the existing facility.
- Firm has submitted Executed Production document of stability batch.
- Firm has submitted Process Validation Protocol.
- Firm has submitted undertakings that process validation, accelerated and real time stability studies on 03 commercial batches at new manufacturing facility will be conducted & in case of any quality complaint / OOS result as a result of this change, the same shall be reported to registration board and all the stock shall be recalled from the market immediately.
- Analytical Method Verification / validation studies of API & Finished product.
- Valid GMP of the API manufacturer submitted.

1431.	Name, address of Applicant / Marketing Authorization Holder.	M/s Getz Pharma (Pvt.) Ltd. Plot No. 01, Sector 25, Korangi Industrial Area, Karachi Pakistan
	Name, address of Manufacturing site.	M/s Getz Pharma (Pvt.) Ltd. Plot No. 01, Sector 25, Korangi Industrial Area, Karachi Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP Status of the firm	Firm has been granted Drug Manufacturing License (DML 000933) by way of formulation dated 25-05-2021.

	Evidence of approval of manufacturing facility	Firm has been granted Drug Manufacturing License (DML 000933) by way of formulation dated 25-05-2021, with approved Tablets, Capsules & Dry Powder Suspension sections.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Details of fee submitted	PKR 30,000/-: 19-05-2022
	The proposed proprietary name / brand name	**Cipesta Tablets 500mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Ciprofloxacin USP….500mg (as hydrochloride)
	Pharmaceutical form of applied drug	Film-coated Tablets
	Pharmacotherapeutic Group of (API)	Anti-infective for systemic use
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	10's
	Proposed unit price	Rs. 406.73/- for 10's
	The status in reference regulatory authorities	Cipro Tablets 500mg approved by US-FDA manufactured by Bayer Healthcare Pharmaceutical Inc., USA
	For generic drugs (me-too status)	Cipesta Tablets 500mg (Reg. No.:045373) manufactured by M/s Getz Pharma (Pvt.) Limited Plot No. 29 -30, Sector 27, Korangi Industrial Area, Karachi
	Name and address of API manufacturer.	**M/s. Zhejiang Guobang Pharmaceutical Co., Ltd.** located at No. 6, Weiwu Road, Hangzhou Gulf Shangyu Economic and Technological Development Zone, Zhejiang, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 75 ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	**Getz Pharma (Pvt) Limited** **Plot no. 29 – 30, sector 27 Korangi Industrial Area, Karachi (Existing Facility)** Pharmaceutical Equivalence Studies of Cipesta Tablets 500mg against the reference product Ciproxin Tablets 500mg & Comparative Dissolution Profile studies of Cipesta Tablets 500mg against the reference product Cipro Tablets 500mg, in three dissolution mediums has been submitted with acceptable level of f2 results.

		Getz Pharma (Pvt) Limited **Plot No. 01, Sector 25 Korangi Industrial Area, Karachi (New Facility)** Firm has also submitted the Comparative Dissolution Profile studies of Cipesta Tablets 500mg against the reference product Ciproxin Tablets 500mg in routine release medium wherein more than 85% of drug is released in 15 minutes.
	Analytical method validation/ verification of product	Firm has submitted verification studies of the drug substance and drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions and 3 batches at long term condition from Existing manufacturing site and stability studies of two batches at long term condition from new manufacturing site.
	Shelf life	36 months

Miscellaneous documents:

The firm has submitted the following documents as per WHO TRS 981,2013 (47th report, Annex 3) and SOP guidelines stated in 283rd DRB meeting minutes:

- Stability Data of 3 batches till shelf life manufactured at their existing facility located at Plot No. 29-30, Sector 27, Korangi Industrial Area.
- Stability Data of 2 stability batches till 6 month time point have also been submitted by manufacturer from new facility located at Plot No. 01, Sector 25, Korangi Industrial Area as per Guidance Document for Submission of Application on Form 5-F (CTD) for registration of pharmaceutical drug products for human use issued in October, 2021.
- Comparative Dissolution Profile and Pharmaceutical Equivalence studies of the product with the innovator from existing manufacturing facility & also submitted Comparative Dissolution Profile against comparator from new manufacturing facility.
- Comparative batch analysis data on two batches from the new facility and comparative data on the last three batches from the existing facility.
- Firm has submitted Executed Production document of stability batch.
- Firm has submitted Process Validation Protocol.
- Firm has submitted undertakings that process validation, accelerated and real time stability studies on 03 commercial batches at new manufacturing facility will be conducted & in case of any quality complaint / OOS result as a result of this change, the same shall be reported to registration board and all the stock shall be recalled from the market immediately.
- Analytical Method Verification / validation studies of API & Finished product.
- Valid GMP of the API manufacturer submitted.

Remarks of Evaluator:

Firm has submitted following set of data from old site:

Batch No.	Date	Stability Duration	Batch No.	Date	Stability Duration
Without Chromatograms, Raw Data and Calculation Sheets			With Chromatograms, Raw Data and Calculation Sheets

	Name and address of API manufacturer.	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd. North-East of Dongwaihuan Road, Dongcheng Industrial Area, Shouguang, Shandong, China.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	**Empagliflozin:** Official monograph of Empagliflozin is not present in any pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin HCl:** Official monograph of Metformin HCl is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Empagliflozin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 18 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (L-E-20200409-D01-E06-02, L-E-20200409-D01-E06-03, L-E-20200409-D01-E06-04) **Metformin HCl:** Real time: 30°C ± 2°C / 75% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (A-72611405016, A-72611405017, A-72611405018)
	Module-III Drug Product:	Firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	**Getz Pharma (Pvt) Limited** **Plot no. 29-30, sector 27 Korangi Industrial Area, Karachi (Existing Facility)** Comparative Dissolution Profile studies of Diampa-M Tablets 5mg + 1000mg against the reference product Jardiance Duo Tablets 5mg/1mg (M/s Boehringer Ingelheim Pharma GmbH & Co., Germany) in three dissolution mediums has been submitted wherein more than 85% of drug is released in 15 minutes. Pharmaceutical Equivalence Studies of Diampa-M Tablets 5mg + 1000mg against the reference product Jardiance Duo Tablets 5mg/1mg (M/s Boehringer Ingelheim Pharma GmbH & Co., Germany), by performing quality tests (Appearance, Average weight, Assay and Dissolution). **Getz Pharma (Pvt) Limited** **Plot No. 01, Sector 25 Korangi Industrial Area, Karachi (New Facility)**

		Firm has also submitted the Comparative Dissolution Profile studies of Diampa-M Tablets 5mg + 1000mg (new site) against the reference product Diampa-M Tablets 5mg + 1000mg (existing site) in Routine Release Medium wherein more than 85% of drug is released in 15 minutes.		
	Analytical method validation / verification of product	Firm has submitted verification / validation studies of the drug substance and drug product.		
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long-term conditions.

Decision **Registration Board decided as under:**

i. Cancelled registration of following products from the name of M/s Getz Pharma (Pvt) Ltd, 29-30, Sector 27, Korangi Industrial Area, Karachi (DML No. 000284).

S. No.	Reg. No.	Product Name & Composition
1.	045372	Cipesta Tablets 250mg Each film coated tablet contains: Ciprofloxacin (as Hydrochloride)……..250mg (USP Specifications)
2.	045373	Cipesta Tablets 500mg Each film coated tablet contains: Ciprofloxacin (as Hydrochloride)……..500mg (USP Specifications)
3.	061344	Nebil Tablets 2.5mg Each tablet contains: Nebivolol as HCl……..2.5mg (Manufacturer's Specifications)
4.	061345	Nebil Tablets 5mg Each tablet contains: Nebivolol as HCl……..5mg (Manufacturer's Specifications)
5.	034838	Montiget 10mg Tablets Each film coated tablet contains: Montelukast (as Sodium Salt)……10mg
6.	047117	Moxiget 400mg Tablets Each tablet contains: Moxifloxacin (as Hydrochloride)…400mg (Manufacturer's Specification)
7.	103094	Diampa-M Tablet 5mg + 1000mg Each film coated tablet contains:- Empagliflozin ……..….. 5mg Metformin Hydrochloride…….. 1000mg (As per *Innovator's Specifications)
8.	093084	Diampa-M Tablet 12.5mg + 1000mg Each film coated tablet contains:- Empagliflozin …….. 12.5mg Metformin Hydrochloride…… ….. 1000mg (As per *Innovator's Specifications)

ii. Approved registration of following products in the name of M/s Getz Pharma (Pvt) Ltd, Plot No.01, Sector 25, Korangi Industrial Area, Karachi (DML No. 000933) with same registration numbers in the light of legal opinion furnished by Legal Affairs Division, DRAP vide letter F.No. 11-1/2018/DD(LA)-Vol-I dated 05-10-2021.

a) Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

b) Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

S. No.	Product Name, Composition, FPP Specifications & Shelf Life
1.	Cipesta Tablets 250mg Each film coated tablet contains: Ciprofloxacin (as Hydrochloride)……..…..250mg (USP Specifications) (Shelf life: 24 Months)

2.	**Cipesta Tablets 500mg** **Each film coated tablet contains:** **Ciprofloxacin (as Hydrochloride)……..500mg** **(USP Specifications)** **(Shelf life: 24 Months)**
3.	**Nebil Tablets 2.5mg** **Each tablet contains:** **Nebivolol Hydrochloride Eq. to Nebivolol……..2.5mg** **(As per Innovator's Specifications)** **(Shelf life: 24 Months)**
4.	**Nebil Tablets 5mg** **Each tablet contains:** **Nebivolol Hydrochloride Eq. to Nebivolol……..5mg** **(As per Innovator's Specifications)** **(Shelf life: 24 Months)**
5.	**Montiget 10mg Tablets** **Each film coated tablet contains:** **Montelukast as Sodium…….……10mg** **(USP Specifications)** **(Shelf life: 24 Months)**
6.	**Moxiget 400mg Tablets** **Each film coated tablet contains:** **Moxifloxacin as Hydrochloride……..…400mg** **(IP Specifications)** **(Shelf life: 24 Months)**
7.	**Diampa-M Tablet 5mg + 1000mg** **Each film coated tablet contains:-** **Empagliflozin ……..….. 5mg** **Metformin Hydrochloride…….. 1000mg** **(As per *Innovator's Specifications)** **(Shelf life: 24 Months)**
8.	**Diampa-M Tablet 12.5mg + 1000mg** **Each film coated tablet contains:-** **Empagliflozin ……..….. 12.5mg** **Metformin Hydrochloride…… ……..….. 1000mg** **(As per *Innovator's Specifications)** **(Shelf life: 24 Months)**

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP).

Case No I- Previous Agenda of 316th Meeting of CLB regarding Colistimethate Sodium:

Review of Colistimethate for Injection:

The product label of innovator product Coly-Mycin® M Parenteral (Colistimethate for Injection, USP) approved in USFDA is as below:

Each vial contains:

Colistimethate Sodium (150 mg colistin base activity).

In the EU, the dose of Colistimethate sodium (CMS) is prescribed and administered as International Units (IU). The product label states the number of IU per vial.

In the US, the dose is expressed as milligrams of colistin base activity (mg CBA). The relationship between IU and CBA is as follows wherein the values are taken approximate only.

CMS conversion table

Potency ≈		**mass of CMS (mg)***
IU	**≈ mg CBA**	
12,500	0.4	1
150,000	5	12
1,000,000	34	85
4,500,000	150	360
9,000,000	300	720

*Nominal potency of the drug substance = 12,500 IU/mg

USP monograph states the following label claim for Colistimethate for Injection.

"Colistimethate for Injection contains an amount of Colistimethate sodium equivalent to not less than 90.0 percent and not more than120.0 percent of the labeled amount of Colistin".

According to **BP monograph**, the label of sealed container states the total number of IU (units) contained in it.

Previous Decision of 316th meeting:

Registration Board decided to defer the case for further deliberation and advised PE&R Division to present the case in forthcoming meeting along with details of already registered products along with its label claim and specifications.

Details of registered imported products

REG. NO.	DRUGS NAME	COMPOSITION OF THE DRUG	MANUFACTURER	COUNTRY NAME	IMPORTER NAME
093937	COLISTIMETHATE SODIUM POWDER FOR SOLUTION FOR IV INJECTION/ INFUSION	EACH VIAL 10ML CONTAINS:- COLISTIMETHATE SODIUM…….. 1MIU **(USP SPECIFICATION)**	M/S. XELLIA PHARMACEUTICALS APS DALSLANDSGADE11, 2300 COPENHAGEN S DENMARK.	DENMARK	M/S. MUKHTAR ENTERPRISES, LAHORE.
094751	COLICRAFT 2MIU LYPHOLIZED POWDER FOR SOLUTION FOR INJECTION	EACH VIAL CONTAINS:- COLISTIMETHATE SODIUM…2,000,000 U.I **(USP SPECIFICATIONS)**	MANUFACTURER: - M/S. GENFARMA LABORATORIO, S.L. Details of registered Local manufacturing products

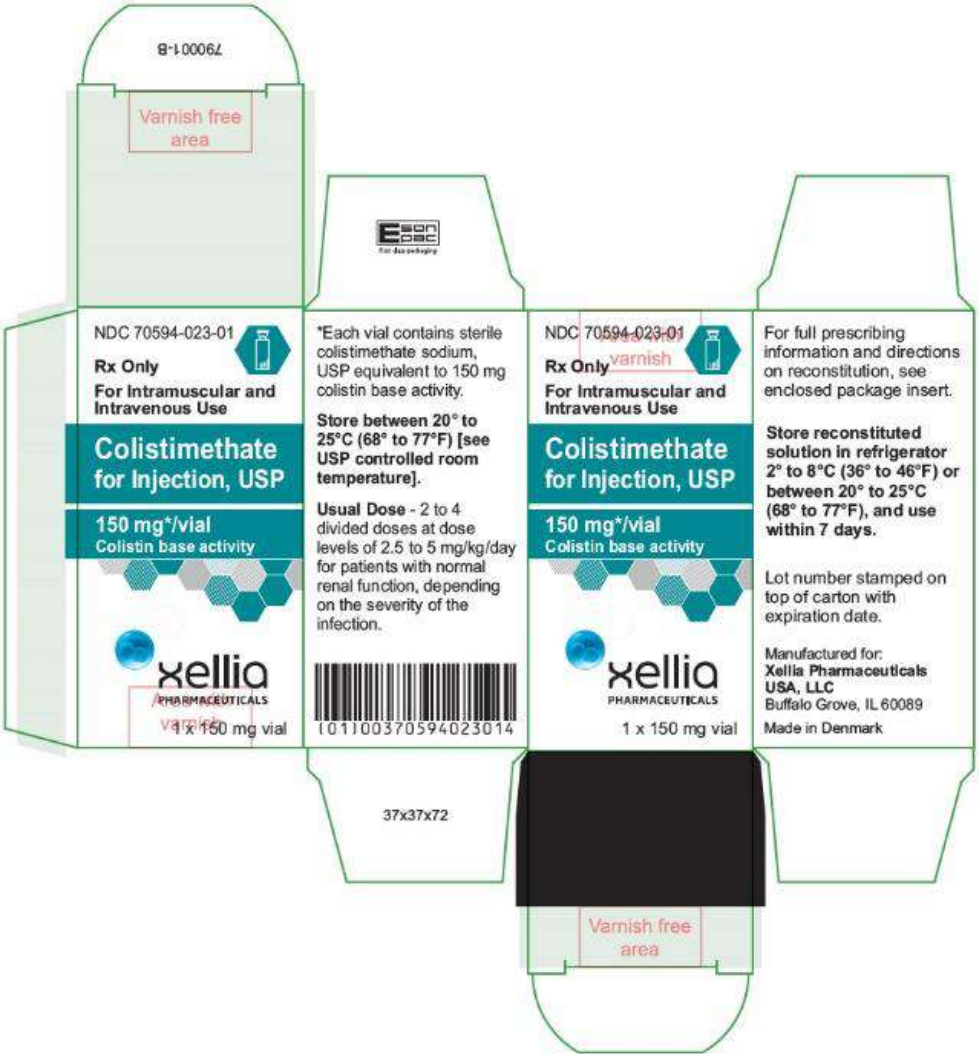
Registration No	Approved Brand Name	Ref Unit	Composition	Specification	Company Name
76160	Colistat powder for Injection	Each vial contains	Colistimethate Sodium_ 1 million I.U-	BP	Medisure Laboratories Pakistan (Pvt)Ltd.
82407	Colicraft Injection	Each vial contains	Colistimethate sodium (lyophilized powder)_ 1 MIU-	USP	Bio-Labs(Pvt) Ltd
89922	Colistim Injection 80mg	Each vial contains	Colistimethate Sodium powder for reconstitution_ 80 mg-	USP	Pharmasol (Pvt) Ltd, Lahore
92316	Colitec 1MIU Injection	Each vial contains	Colistimethate Sodium_ 1 MIU-	USP	Rotex Pharma (Pvt) Ltd.Islamabad
92529	Coliate IV Injection	Each vial contains	Colistimethate Sodium_ 1 MIU-	USP	English Pharmaceutical Indsutries,Lahore.
97779	Colimate 100,0000 IU Injection	Each lyophilized vial contains	Colistimethate Sodium_ 1000000 IU-	USP	MTI Medical (Pvt) Ltd , Lahore
103512	Closmat Injection 1 Million IU Lyophilized Powder for solution for Injection/ Infusion	Each vial contains	Colistimethate Sodium_ 1 Million IU-	BP	CCL Pharmaceuticals (Pvt.) Ltd.Lahore
104498	Colistitek Injection 1M IU	Each vial contains	Colistimethate Sodium Powder 1million International Units _ 80 mg-	USP	Wellborne pharmachem&biologicals
105370	Colybid Injection 1M IU	Each vial contains	Colistimethate Sodium_ 1 Million IU-	USP	SAFE PHARMACEUTICAL (PVT) LTD
106475	Stacolmi 1MIU Injection	Each vial contains	Colistimethate Sodium_ 1 MIU-	USP	STALLION PHARMACEUTICALS PVT LTD
106889	Cricolist Dry powder for Injection	Each vial contains	Colistimethate Sodium_ 1 MIU-	USP	FYNK Pharmaceuticals,Lahore
107383	Mellistin Injection 1Million IU	Each vial contains	Colistimethate Sodium_ 1 Million IU-	USP	Macter International Ltd.Karachi
107472	Nogotex Injection 1 Million IU	Each vial contains	Colistimethate sodium (lyophilized powder)_ 1 MIU-	USP	Nabi Qasim Industries Pvt Ltd,Karachi
107596	Cmyate Powder For Solution For Injection 1MIU (IV)	Each vial contains	Colistimethate Sodium 1million International Units eq. to_ 80 mg-	USP	Aulton Pharmaceuticals , Hattar
107612	Colmixin Powder For Solution For Injection 1MIU (IV)	Each vial contains	Colistimethate Sodium 1million International Units eq. to_ 80 mg-	USP	Genix Pharma (Pvt) Ltd., Karachi
107733	Colimethate Powder for Solution for Injection/Infusion **2MIU** IV	Each vial contains	Colistimethate Sodium 2 Million International Units (IU) Eq. to_ 160 mg-	USP	TABROS PHARMA (PVT). LTD.
108054	Genthate Injection 1MIU (IV)	Each vial contains	Colistimethate Sodium_ 1 MIU-	USP	Biogen Pharma
108055	Genthate Injection **2MIU** (IV)	Each vial contains	Colistimethate Sodium_ 2 MIU eq. to 160mg-	USP	Biogen Pharma
108414	Colmat Dry Powder Injection 1 million IU	Each vial contains	Colistimethate Sodium 1million International Units eq. to_ 80 mg-	USP	Vision Pharmaceuticals Pvt Ltd
108905	Colimethate Powder for Solution for Injection / Infusion 3MIU IV	Each vial contains	Colistimethate Sodium_ 3 MIU eq. to 240mg-	USP Specification	TABROS PHARMA (PVT). LTD.
110206	Nogotex Injection 2MIU IV (Lyophilized Powder for Solution for Injection / Infusion)	Each vial contains	Colistimethate Sodium 2 Million International Units (IU) Eq. to_ 160 mg-	USP Specification	Nabiqasim Industries (Pvt) Ltd.Karachi
110207	Nogotex Injection 3MIU IV (Lyophilized Powder for Solution for Injection / Infusion)	Each vial contains	Colistimethate Sodium 2 Million International Units (IU) Eq. to_ 240 mg-	USP Specification	Nabiqasim Industries (Pvt) Ltd., 17/24 Korangi Industrial Area Karachi., Karachi

Label Claim of same Product Registered in Import:



Innovator Product Label specification and Label Claim USFDA:
Coly-Mycin M Parenteral is supplied in vials containing colistimethate sodium (equivalent to 150 mg colistin base activity per vial) as a white to slightly yellow lyophilized cake.
International Practices:
Specifications and label claims of various product registered world widely has been review and found that those products whose claimed specifications are B.P specifications, their label claim is present in terms of International Units of Colistimethate sodium.as under;
Each vial/ lyophilized vial contains:
colistimethate sodium……. 4.5 million IU
Those products whose claimed specifications are USP, their label claim is presented in terms of Colistin base Activity.as under;
Each vial/lyophilized vial Contains:
Colistimethate sodium (equivalent to) ……150 mg colistin base activity
MHRA in SmPC of Colistimethate Sodium Injection mentions that confusion and medication errors may occur because different expression of dose in term of potency. In TGA, both presentations in terms of International units and Colistin base activity are mentioned (https://www.tga.gov.au/resources/artg/14667.)
COLISTIN LINK colistimethate sodium (equivalent to colistin 150 mg, 4,500,000 IU) powder for injection vial.
Submitted for consideration of Board, Please.

Decision: Registration Board deliberated the matter in details and after through discussion, decided as under;

1. **The concerned label claim of existing registrations of Injection of Colistimethate sodium shall be updated according to approved pharmacopoeial specifications as per following details:**

   - **For U.S.P specification the revised label claim shall be,**

Each vial/lyophilized vial Contains:
Colistimethate sodium (equivalent to) …… (Relative strength of) mg colistin base activity

For example for 1MIU:
Each vial Contains:
Colistimethate sodium equivalent to 34mg Colistin base activity

- **For B.P specification the revised label claim shall be,**
  Each vial/ lyophilized vial contains:
  Colistimethate sodium……. (Relative strength of) million IU

  For example for 1MIU:
  Each vial Contains:
  Colistimethate sodium ……1MIU

2. **Registration Board has further decided to advise registration holders to also mention equivalency of "Colistimetahte sodium (IU)" with "Colistin base activity" in miligrams, on unit carton and label according to relevant strength as the case may be, for examples, as under.**

"Potency of Colistimethate sodium:

1 Million IU	**equivalent to**	**34 mg Colistin base Activity (approximately)**
4.5 Million IU	**equivalent to**	**150 mg Colistin base Activity (approximately)**
9 Million IU	**equivalent to**	**300 mg Colistin Base Activity (approximately)"**

3. **Pharmaceutical firms having already registration of "Colistimethate sodium injection" shall apply to PE&R Division with requisite documents and fee for harmonization of the label claim as per point 1 of above decision.**

Agenda of Evaluator PEC-I

Registration application submitted on form 5F for New Drug Manufacturing License:

Case of New License:

1436.	Name, address of Applicant / Marketing Authorization Holder	M/s Fortune Pharma Private Limited Plot # K/201,S.I.T.E (SHW) Phase-II, Karachi
	Name, address of Manufacturing site.	M/s Fortune Pharma Private Limited Plot # K/201,S.I.T.E (SHW) Phase-II, Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30772 dated 31/10/2022
	Details of fee submitted	PKR 30,000/-: dated 21/07/2022
	The proposed proprietary name / brand name	Throtsin 250mg Tablet

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet contains: Azithromycin as dihydrate …….250 mg
	Pharmaceutical form of applied drug	Immediate release film coated tablet (Oral)
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved.
	For generic drugs (me-too status)	Zithromax 250mg Tablet by M/s Pfizer Pharma.
	GMP status of the Finished product manufacturer	New license granted on 22/02/2021 vide letter No.F.2-3/2016-Lic.
	Section approval	Tablet General Section
	Name and address of API manufacturer.	M/s Hebei Guolong Pharmaceuticals Co., LTD, No.9 xingye street, Shijiazzhuang economic and technological development zone, Hebei province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Azithromycin is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (200407021,200407022,200407023)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity etc for drug product and drug susbatnce.

STABILITY STUDY DATA

Manufacturer of API	M/s Hebei Guolong Pharmaceuticals Co., LTD China		
API Lot No.	220207001		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-61	T-62	T-63
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	20-08-2021	20-08-2021	20-08-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1	Provide analytical method verification studies including specificity, precision and accuracy for drug substance performed by drug product manufacturer.	
2	Since the excipients used in the formulation are different from the innovator's / reference product, therefor compatibility studies of excipients with drug substance are required along with the relevant documents.	
3	Details of section 3.2.P.4 have not been provided in the submitted dossier.	
4	Justification is required since you have not performed UNIFORMITY OF DOSAGE UNITS as described in official monograph of USP. Therefore, you are required to submit revised specifications along with the applicable fee.	
5	Submit detail analytical method used for drug product instead of submitted copy of USP monograph.	
6	Provide complete protocols for analytical method verification studies for drug product including details of preparations and concentrations of all the standard solutions in mg/mL used in accuracy and repeatability studies.	
7	Provide COA of reference standard actually used in the product development.	
8	Submit stability study data along with raw data sheets in a proper sequence with separators to segregate the stability data for each time point for all the three batches.	
9	Justification is required since at 3rd month time point of stability studies (accelerated) for batch number T61 and T62 and T63, the retention time and peak of chromatogram is exactly same for sample analysis.	
10	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Record of Digital data logger for temperature and humidity monitoring of both stability chambers.	
10	Provide complete batch manufacturing record along with the calculations for potency adjustment considering the assay value of Azithromycin Dihydrate as per submitted COA.	
11	Provide data of pharmaceutical equivalence and comparative dissolution profile against reference / innovator's product along with the relevant documents.	
12	Scientific justification is required since as per USP monograph of Azithromycin Tablet, the injection volume is 100uL while as per submitted dossier the injection volume Is 20uL. Moreover, provide evidence of use of column oven having capacity to maintain the column temperature at 50°C as per USP requirement.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Manufacturer of API	Pharmagen Ltd. Kot Nabi Buksh Wala 34-Km, Ferozepur Road, Lahore.		
API Lot No.	00243/068/2021		
Description of Pack (Container closure system)	Amber coloured glass bottle closed with aluminium cap.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	002	003
Batch Size	500 bottles	500 bottles	500 bottles
Manufacturing Date	10/21	10/21	10/21

Date of Initiation	08/10/2021	08/10/2021	08/10/2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020-DRAP(AD/1998630-530) issued on the basis of inspection conducted on 22/06/2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Locally purchased. Invoice no. 3625 dated 28/09/2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	The submitted analytical method validations studies for drug substance are performed by drug substance manufacturer, please provide the analytical method verification studies including accuracy, specificity and precision performed by drug product manufacturer.	The firm has submitted analytical method verification report wherein the results for accuracy & recovery, precision and specificity parameters are presented.
2.	Provide in-use stability studies for the applied product.	In-use stability study report is submitted till 14 days after reconstituting the applied product with the diluent. The assay results are within the limits.
3.	Submitted pharmaceutical equivalence studies have been performed against comparator's product while the said studies are required against reference / innovator's product.	The firm has stated that due to easy access of Cefspan dry suspension mfg by Barret Hodgson the pharmaceutical equivalence is performed with the comparator.
4.	Provide reconstitution directions for obtaining the desired dilution that is 200mg/5mL considering total quantity of Cefixime Trihydrate in bottle, since in the submitted dossier the relevant information is not provided. Provide calculation for potency adjustment and final quantity to be dispensed.	Number of doses: 06 Water for reconstitution: 20mL Total volume: 30mL Assay: 99.88% Quantity to be dispensed: 1342
5.	The submitted stability data is till 3rd month time point, please submit stability study data including accelerated and real time stability till 6 months.	submitted.
6	Provide complete batch manufacturing record for the applied product.	Submitted
7	It is not clear whether the stability study data of drug substance is for micronized form or compacted form. Please submit stability study	As per the submitted stability data, it is not evident whether the stability is for micronized or compacted form.

	data of micronized form of Cefixime trihydrate along with the relevant chromatograms.	

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The Board directed the firm to submit stability studies of drug substance according to the conditions of Zone IV-A of 03 batches for micronized Cefixime trihydrate before issuance of registration letter.**

	Details of fee submitted	PKR 30,000/-: dated 31/10/2022
	The proposed proprietary name / brand name	Colmate 4.5 MIU powder for injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Colistimethate as sodium ……..4.5 MIU
	Pharmaceutical form of applied drug	White Lyophilized Powder for solution for IV injection
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Colitin Link 4,500,000 IU powder for injection vial, TGA Australia approved.
	For generic drugs (me-too status)	Colistim 4.5MIU by Biocare Pharmaceutica,
	GMP status of the Finished product manufacturer	DML issued vide letter No.F.1-10/2019-Lic dated 29/04/2022.
	Section approval	Dry Powder Vial Section (General)
	Name and address of API manufacturer.	M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd., No. 8. Nangang road Jiangyin Industrial Concentration zone, Fuqing, Fuzhou city, Fujian province, China. Copy of GMP certificate no. FJ200003 valid till 21/09/2022 issued by Fujian Food and Drug Administration China..
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls,

		impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CMS1707001, CMS1707002, CMS1707003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	
	Analytical method validation/verification of product	Method validation / verification studies have submitted including accuracy/recovery, precision, specificity, , system suitability etc for drug substance and drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd., No. 8. Nangang road Jiangyin Industrial Concentration zone, Fuqing, Fuzhou city, Fujian province, China.		
API Lot No.	CMS2106002		
Description of Pack (Container closure system)	Type I glass vial packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TRL01	TRL02	TRL03
Batch Size	1000 vials	1000 vials	1000 vials
Manufacturing Date	03-2022	03	2022
Date of Initiation	10-03-2022	10	03
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate no. FJ200003 valid till 21/09/2022 issued by Fujian Food and Drug Administration China..
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of clearance certificate no. 2761/2021-ADC(I&E) dated 16/08/2021 issued for M/s Vision Pharmaceuticals Islamabad. The material has been borrowed from M/s Vision Pharmaceuticals.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**N/A**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator-I:

Sr. No.	Observations	Response
1	Provide documents of approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate no. FJ200003 valid till 21/09/2022 issued by Fujian Food and Drug Administration China..
2	Provide analytical method verification studies (including accuracy, specificity and precision) for drug substance performed by drug product manufacturer.	Submitted. Test results for specificity is not provided.
3	Provide pharmaceutical equivalence studies against innovator's / reference product by performing all the quality tests.	Not submitted
4	Provide documents confirming import of drug substance (invoice, clearance certificate etc) attested from DRAP.	Copy of clearance certificate no. 2761/2021-ADC(I&E) dated 16/08/2021 issued for M/s Vision Pharmaceuticals Islamabad. The material has been borrowed from M/s Vision Pharmaceuticals. The firm has submitted loan letter for the API (Colistimethate Sdoium) from M/s Vision Pharmaceuticals ref. no. V/2022/787 dated 14/03/2022.
5	Provide exact date of initiation of stability studies and detail of batch sizes.	Submitted.
6	Provide stability summary sheets containing results till 6 months along with raw data sheets for accelerated and real time stability. • The firm has not submitted the stability summary sheets. • The data submitted is not comprehendible.	

Strength	Accelerated (%)			Real time (%)		
	0	3	6	0	3	6
1 MIU	103.78	102.2	102.07	102.19	102.4	103.01

		103.33	100.53	101.42	105.55	101.48	102.81
		102.8	100.53	105.53	101.21	101.48	102.41
	2 MIU	103.78	102.2	102.07	102.19	102.4	103.01
		103.33	100.53	101.42	105.55	101.48	102.81
		102.8	100.53	105.53	101.21	101.48	102.41
	4.5 MIU	103.78	102.2	102.07	102.19	102.4	103.01
		103.33	100.53	101.42	105.55	101.48	102.81
		102.8	100.53	105.53	101.21	101.48	102.41

Decision: The Board was apprised as under:

- **As per submitted stability data, the assay results of accelerated and real time stability studies at initial time points are different while the results should be the same for all the three batches.**
- **The results of assay for all the three batches are exactly same on respective time points throughout the stability studies which is not practically possible.**

The Board decided to defer the case for clarification / scientific justification of the above mentioned observations along with the submission of Pharmaceutical Equivalence studies against the reference / innovator's product.

Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	**Amlodipine:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH 6 months Batches: (AMB/002/01/14, AMB/003/02/14, AMB/004/02/14) **Valsartan:** Real time: 30˚C ± 2˚C / 75% ± 5%RH 18 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH 6 months Batches: (67819030611, 67819030612, 67819030613)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence is established against Exforge Tablet 10-160mg by M/s Novartis Pharmaceutical, USFDA Approved by performing all the quality tests (Batch number: BAUR9). Comparative dissolution profile is submitted against the same brand in all the three media that is 0.1N HCl, Phosphate Buffer and Acetate Buffer.
	Analytical method validation/verification of product	Method validation studies have submitted including System Suitability, Linearity, Accuracy, precision, Specificity, Limit of Quantification, Limit of Detection, Robustness.
STABILITY STUDY DATA		
Manufacturer of API	**Amlodipine:** M/s Prudence Pharma Chem. Plot no. 7407, Behind Lyka Lab, GIDC Ind. Estate, Ankleshwar-393 002, Dist. Bharuch Gujarat, India. **Valsartan:**	

	M/s Zhuhai Rundu Pharmaceutical Co., Ltd., No. 6, North Airport road, Sanzo town, Jinwan district, Zhuhai City, Guangdong Province-519041, China.		
API Lot No.	Amlodipine: AMB/143/09/21 Valsartan: 67821040608		
Description of Pack (Container closure system)	Alu-alu blister packed in secondary unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5% Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T012	T019	T020
Batch Size	1500 tab	1500 tab	1500 tab
Manufacturing Date	01/04/2022	01/04/2022	01/04/2022
Date of Initiation	26/04/2022	26/04/2022	26/04/2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Amlodipine:** Copy of GMP certificate No. S-GMP & GLP/22053332 valid till 26/05/2024 issued by Food & Drugs Control Administration, India. **Valsartan:** Copy of GMP certificate no. GD20190988 valid till 10/04/2024 issued by CFDA, China.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Amlodipine (AMB/143/09/21: Copy of invoice number EP/21-22/397 dated 04/12/2021 cleared on 28/12/2021. Valsartan (67821040608): Copy of invoice number RD2021102509-1 dated 09/11/2021 cleared on 29/11/2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator-I:

Observations	**Response**

The submitted stability data is till 3rd month time point, please submit stability studies till 6 months for 3 batches.	Stability data till 6th month time point is submitted.
Provide documents confirming import of API (Amlodipine and Valsartan) endorsed from DRAP.	Amlodipine (AMB/143/09/21): Copy of invoice number EP/21-22/397 dated 04/12/2021 cleared on 28/12/2021. Valsartan (67821040608): Copy of invoice number RD2021102509-1 dated 09/11/2021 cleared on 29/11/2021
Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	submitted
Compliance Record of HPLC software 21CFR & audit trail reports on product testing is required.	submitted
COAs of Valsartan and Amlodipine for the batches used for the product development from drug product manufacturer as well as from drug substance manufacturer are required.	Submitted. Amlodipine: AMB/143/09/21 Valsartan: 67821040608
Submit detail of primary container closure for the applied product.	Alu-Alu foil blister and secondary container closure is unit carton with pack size of 3×7's.
Provide complete batch manufacturing record for the applied product with the calculations for potency adjustment.	The firm has submitted complete batch manufacturing record.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Batch Size	1666 bottles	1666 bottles	1666 Bottles
Manufacturing Date	03-2022	03-2022	03-2022
Date of Initiation	04-04-2022	04-04-2022	04-04-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML Granted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate no. 129/2020-DRAP(AD/1998630-530) issued on the basis of inspection conducted on 22/06/2020.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Local purchased. Invoice submitted. Invoice number 698 dated 11/10/2021.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator-I:

Sr. No.	Observations	Response
1	Provide COA of relevant batch on Amoxicillin which is used for product development from drug substance and drug product manufacturer.	The firm has submitted COA of relevant batch used for development of the applied product is submitted. Batch number : 000120/390/2021
2	Analytical method verification studies for drug substance including specificity, accuracy and precision performed by drug product manufacturer are required.	Submitted. System suitability, specificity, accuracy, precision.
3	Excipients used in the applied formulation are different from the excipient used by the innovator, therefore, you are required to submit compatibility studies of excipients with the drug substance. The reference product that is Amoxil Suspension MHRA Approved has different excipient as that of the applied product. Therefore, compatibility studies of excipient are required.	The firm has stated that the excipients of the applied formulation are similar to the generic products approved by MHRA of M/s Cheliona Healthcare Limited.
3	Provide in-use stability study of the applied product.	In-use stability after reconstitution is submitted till 14 days.
4	Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted.
5	Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted.
6	Submit complete batch manufacturing record for the applied product.	The firm has submitted complete batch manufacturing record for the applied product.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1449.	Name, address of Applicant / Marketing Authorization Holder	M/s Fleming Pharmaceutical. 23- Km Lahore- Sheikhupura Road, Lahore.
	Name, address of Manufacturing site.	M/s Fleming Pharmaceutical. 23- Km Lahore- Sheikhupura Road, Lahore.
	Status of the applicant	☒ Manufacturer

		☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30340 dated 26/10/2022
	Details of fee submitted	PKR 30,000/-: dated 17-10-2022
	The proposed proprietary name / brand name	**Flemox Suspension 125**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml (reconstituted) contains: Amoxicillin (as trihydrate)……. 125mg
	Pharmaceutical form of applied drug	Powder for oral suspension
	Pharmacotherapeutic Group of (API)	Penicillin
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	1's (60ml, 90ml, 100ml, 120ml)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved.
	For generic drugs (me-too status)	Amoxilite oral suspension by M/s PDH Laboratories Oximox suspension by CSH
	GMP status of the Finished product manufacturer	New license granted on 14/09/2021.
	Section approval	Oral Dry Powder for Suspension (penicillin)
	Name and address of API manufacturer.	Pharmagen Limited Address: Kot Nabi Bukshwala 34 Km-Ferozpur Road, Lahore, Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference

		standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (00013/210/2009, 00013/211/2009, 00013/212/2009)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader by M/s GSK (Batch # SM6W) by performing quality tests.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice number HBGL-2012031429 dated 03/12/2020 cleared on 18/12/2020 vide diary number 18587/2020DRAP for Aminophylline Anhydrous. Copy of invoice number E013/21-22 dated 25/04/2021 cleared on 05/05/2021 vide diary number 6809/2021DRAP dated 05/05/2021 for Ammonium Chloride. Copy of invoice number 21A-010 dated 02/02/2021 cleared on 11/02/2021 vide diary number 2287/2021-DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**N/A**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator-I:

Sr. No.	Observations	Response
1	Provide COA of Diphenhydramine HCl drug substance for the batch which has been used for product development from drug product manufacturer.	The firm has submitted COA of Batch Number: DH-202101203 of Diphenhydramine HCl from drug substance and drug product manufacturer.
2	Provide analytical method verification studies (including accuracy, specificity and precision) for drug substance performed by drug product manufacturer of Diphenhydramine HCL drug substance performed by drug product manufacturer.	Submitted.
3	Provide pharmaceutical equivalence studies against innovator's / reference product by performing all the quality tests.	The firm has submitted pharmaceutical equivalence studies against:

		Brand: Hydyllin Syrup 120mL Mfg by M/s Searle Batch: AW061 By performing quality tests.
4	Provide complete batch manufacturing record along with the detail of quantity dispensed for manufacturing.	The firm has submitted complete batch manufacturing record for the applied product.
5	Provide documents for the procurement of API with approval from DRAP (in case of import) for all the three drug substances.	Copy of invoice number HBGL-2012031429 dated 03/12/2020 cleared on 18/12/2020 vide diary number 18587/2020DRAP for Aminophylline Anhydrous. Copy of invoice number E013/21-22 dated 25/04/2021 cleared on 05/05/2021 vide diary number 6809/2021DRAP dated 05/05/2021 for Ammonium Chloride. Copy of invoice number 21A-010 dated 02/02/2021 cleared on 11/02/2021 vide diary number 2287/2021-DRAP.
6	Please provide compatibility studies of excipients with drug substance.	Compatibility studies of excipients with the drug substances have been submitted.
7	Provide evidence of approval of the applied product in reference regulatory authorities as provided in 275th meeting of Registration Board.	Could not be confirmed
8	Justification is required since the trial batches have been manufactured before the grant of "Oral Liquid Section (General)'.	*Please be informed that all trial batches are developed in R&D lab.*

Decision: Deferred for evidence of approval of the applied formulation in reference regulatory authorities which were declared/approved by the Registration Board in its 275th meeting.

	of stability chambers (real time and accelerated)	

Remarks OF Evaluator-I:

Sr. No.	Observations	Response
1	As per Section 1.6.5 the drug substance manufacturer is M/s Suzhou Homesun Pharmaceutical Co., Ltd., while as per Module II and III and as per the submitted documents the manufacturer is M/s Fleming Laboratories Limited, India, Please clarify. Moreover, provide GMP certificate of drug substance manufacturer along with the correct name and address of drug substance manufacturer in-lined with the name and address mentioned in GMP certificate.	The manufacturer of API is M/s Suzhou Homesun Pharmaceutical Co., Ltd., No. 12 West Xiexin road, Taicang Port Development Zone, Taicang City, Jiangsu Province China. The firm has provided relevant documents including GMP certificate. Stability study of API is submitted already with the initial application. Copy of GMP certificate no. JS20170699 valid till 03/09/2022 issued by Jiangsu Food and Drug Administration
2	Please provide detail of specifications of the drug substance along with the submission of detail of analytical procedures.	Submitted.
3	Please provide detail of reference standard along with the COAs in relevant section since the information is not provide din the submitted dossier.	Submitted. Batch number: 20201105
4	Provide analytical method verification studies including accuracy, specificity and precision for drug substance performed by drug product manufacturer.	The firm has submitted analytical method verification studies including specificity, accuracy and precision from drug product manufacturer long with the protocol.
5	Detail of container closure system for the drug substance.	Submitted.
5	Provide Pharmaceutical Equivalence studies against reference / innovator's product by performing all the quality tests.	The firm has submitted pharmaceutical equivalence against Zatofen Syrup 60mL Mfg by M/s Novarits by performing quality tests. Batch number: JLRAAH
6	Provide COA of relevant batch used for the product development of the applied product from drug substance as well as from the drug product manufacturer.	COA is submitted from drug product manufacturer and drug substance manufacturer. Batch number: 20201005
7	The excipients used in the applied formulation are different from the excipients used by the innovator, therefore, you are required to submit compatibility studies of excipients with the drug substance.	Drug-excipient compatibility studies have been submitted.
8	UV method has been developed for analysis of the drug product instead of HPLC method, please justify.	*The product is developed according to In-House specifications. At the time of product development phase, we have developed the analytical method of Ketis Syrup on UV spectrophotometer for performance of assay test along with the performance of analytical method validation studies.*
9	Please provide detail of reference standard along with the relevant COAs.	Submitted.

10	Stability summary sheets for batch number T002 for 3rd month time point of accelerated stability studies are not provided.	The firm has submitted stability summary sheets for batch number T002 for 3rd month time point of accelerated stability studies.
11	Provide documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice number 01005SLT2012401-2 dated 08/01/2021 cleared vide diary number 1439/2021-DRAP dated 26/01/2021.
12	Provide complete batch manufacturing record.	Submitted.
13	Justification is required since the trial batches have been manufactured before the grant of "Oral Liquid Section (General)'.	*Please be informed that all trial batches are developed in R&D lab.*

Decision: Registration Board deferred the case for submission of complete testing including Assay test using HPLC method on the next time point of long term stability studies along with analytical method validation studies.

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 27906 dated 03/10/2022
	Details of fee submitted	PKR 30,000/-: dated 05/04/2022
	The proposed proprietary name / brand name	PD-Ron Syrup 50mg/5mL
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5mL contains: Iron as Iron (III) Hydroxide Polymaltose Complex……50mg
	Pharmaceutical form of applied drug	Dark brown slightly viscous but clear uniform solution (chocolate flavour)
	Pharmacotherapeutic Group of (API)	Anti-anemic
	Reference to Finished product specifications	Manufacturer's specifications
	Proposed Pack size	1's (120mL)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	
	For generic drugs (me-too status)	Rubifer Syrup by M/s AGP, Reg. No. 028123
	GMP status of the Finished product manufacturer	Inspection report dated 03/01/2022 & 04/01/2022 is submitted. The panel recommended renewal of DML.
	Section approval	Oral Liquid Section (General) vide letter no.F.1-1/86-Lic(Vol-V) dated 7th June, 2022.

	Name and address of API manufacturer.	M/s Chemiworld Private Limited, plot no. 97, J-Industrial Estate Jamrud, Peshawar.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30˚C ± 2˚C / 75% ± 5%RH for 60 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (F06-IPC-211, G06-IPC-221, G06-IPC-223)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalene studies have been submitted against Rubifer Syrup 120mL mfg by M/s AGP. Batch number: B5032
	Analytical method validation/verification of product	Method validation / verification studies have submitted including accuracy/recovery, precision, specificity, , system suitability etc for drug substance and drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Chemiworld Private Limited, plot no. 97, J-Industrial Estate Jamrud, Peshawar.

Date of Initiation	10/07/2021	10/07/2021	10/07/2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML no. 000579 issued on 19/07/2017 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Locally purchased.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**N/A**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator-I:

Sr. No.	Observations	Response
1	Provide GMP certificate of drug substance manufacturer.	Copy of GMP certificate no. F.3-20/2017-DRAP-90 issued on the basis of inspection conducted on 29/11/2016. Copy of DML issued on 19/07/2017 is submitted.
2	Justification is required regarding the selection of titration method for estimation of elemental Iron in the applied formulation, please.	*The applied product is non-pharmacopoeial and the analytical method used for analysis is in-house and validated. Validation studies have been submitted.*
3	Provide analytical method verification studies including accuracy, specificity and precision for drug substance performed by drug product manufacturer.	Submitted. Results of Accuracy, precision and specificity are submitted.
4	Provide COAs of the batch of drug substance which has been used for product development from drug product manufacturer as well as from drug substance manufacturer.	COAs of relevant batch from drug product manufacturer and drug substance manufacturer are submitted. Batch number: F21-IPC-530
5	Detail of container closure system for the drug substance.	Submitted,

6	Provide Pharmaceutical Equivalence studies against reference / innovator's product by performing all the quality tests.	Pharmaceutical equivalene studies have been submitted against Rubifer Syrup 120mL mfg by M/s AGP. Batch number: B5032
7	Provide COA of relevant batch used for the product development of the applied product from drug substance as well as from the drug product manufacturer.	COAs of relevant batch from drug product manufacturer and drug substance manufacturer are submitted. Batch number: F21-IPC-530
8	Compatibility studies of excipients with drug substance is required.	Submitted,
9	Detail of analytical method for finished product is required.	Submitted.
10	Justification is required since the trial batches have been manufactured before the grant of "Oral Liquid Section (General)'.	*Please be informed that all trial batches are developed in R&D lab.*
11	Provide stability study data for drug substance (including accelerated and real time stability) conducted under the conditions of Zone IV-A.	• Real time: 30˚C ± 2˚C / 75% ± 5%RH for 60 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (F06-IPC-211, G06-IPC-221, G06-IPC-223)

Decision: Approved with innovator's specifications. Registration Board further decided that registration letter will be issued after submission of fee Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Routine application submitted on form 5 (Local manufacturing):

1453.	Name and address of manufacturer / Applicant	M/s Akson Pharmaceuticals (PVT) Ltd, plot no.9-B 1&2, old industrial estate, Mirpur Azad Kashmir.
	Brand Name +Dosage Form + Strength	DAMBOX 10mg tablets
	Diary No. Date of R& I & fee	Dy.No. 35580 dated 26/10/2018 PKR 20,000/-
	Composition	Each Film Coated Tablet contains: Bambuterol ……10mg
	Pharmacological Group	Beta adrenoceptor agonist
	Type of Form	Form 5
	Finished Product Specification	MFg specs
	Pack Size & Demanded Price	1×10's & 1×30's, Price as per SRO
	Approval Status of Product in Reference Regulatory Authorities	Bambec tablets 10mg of M/s AstraZeneca UK Limited (MHRA Approved)
	Me-too Status	Pulmitac 10mg tablet of M/s Platinum Pharmaceuticals (Reg.# 026684)
	GMP Status	**LAST INSPECTION REPORT DATED 16/06/2017 AND 25/07/2017, THE PANEL RECOMMENDED THE RENEWAL OF LICENSE BY THE WAY OF FORMULATION.**
	Remarks of the Evaluator-I:	
	The composition of the applied formulation is not according to the reference product. The reference product contains Bambuterol	The firm has revised master formulation from "each film coated tablet contains Bambuterol 10mg" to "each tablet contains Bambuterol HCl 10mg" as per the innovator's product.

	Hydrochloride while the applied product contains Bambuterol. Moreover, the reference product is uncoated while the applied product is film coated. Clarification is required or otherwise the formulation should be revised along with the submission of requisite fee.	The firm has submitted Rs. 30,000/- fee for revision of formulation vide challan number 123973765306 dated 22/08/2022. Each Tablet contains: Bambuterol hydrochloride……10mg
	Decision: Approved with innovator's specifications. Registration letter will be issued after submission of latest GMP inspection report valid within the last three years.

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 33172 Dated 21-12-2021
	Details of fee submitted	PKR 20,000/-: Dated 11-03-2020
	The proposed proprietary name / brand name	NU-ORS Sachet (Orange Flavor)
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each sachet Contains: Sodium chloride……...2.60gm Potassium chloride……..….1.50gm Tri-sodium citrate dihydrate…....2.90gm Dextrose anhydrous……..13.50gm
	Pharmaceutical form of applied drug	Granule to be reconstituted for oral administration

	Pharmacotherapeutic Group of (API)	Oral Rehydration Salts
	Reference to Finished product specifications	BP specifications
	Proposed Pack size	1 x 20's Sachets
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	WHO Approved.
	For generic drugs (me-too status)	OEM Orange Flavour, Indus Pharma Karachi (Reg # 067312)
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 01-04-2019. The firm has provided sachet section.
	Name and address of API manufacturer.	**Sodium Chloride:** M/s Dominion salt Ltd., Totara street, Mount Maunganui, New Zealand. **Potassium Chloride:** M/s K+S KALI GmbH Germany, Am Kaliwerk 6, 36119 Neuhof, Germany **Trisodium Citrate:** M/s. Weifang Ensign Industry Co., Ltd. No. 1567, Changsheng Street, Changle, Weifang, shandong province, China. **Dextrose Anhydrous:** M/s Xiwang pharmaceutical., No. 237, Tongfu Road, Handian Town, Zouping Country, Binzhou city, Shandong Province, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance is submitted. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Official monograph of oral rehydration salts is present in BP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, analytical procedures and its verification, batch analysis and justification of specification, reference

		standard, container closure system and stability studies of drug substances.
	Stability studies	**Sodium chloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months. **Potassium chloride:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months. **Trisodium citrate dihydrate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months. **Glucose anhydrous:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III (Drug Product):	The firm has submitted details of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product OEM (ORS) orange flavour (Batch # OR-4043) by M/s Indus Pharma, Karachi by performing quality tests (Description, LOD, Average weight and Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, accuracy, precision and specificity.

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sodium Chloride:** The firm has submitted copy of GMP certificate (No. TT60-565-16-3) of M/s Dominion Salt Limited, New Zealand issued by Ministry of health, New Zealand. The certificate is valid till 29-07-2021. **Potassium Chloride:** The firm has submitted copy of GMP certificate of M/s K+S Kali GmbH issued by Regierungsprasidium, Darmstadt Germany. The certificate is valid till 06-03-2021. **Tri Sodium Citrate:** The firm has submitted document of verification of compliance certificate of M/s Weifang Ensign Industry Co., Ltd., China issued by SGS-CSTC Standards Technical services Co. ltd. The certificate is valid till 28-06-2024. **Dextrose Anhydrous:** Firm has submitted copy of GMP certificate (No. SD2020170644) of M/s Xiwang Pharmaceutical Co., ltd. China issued by China Food and Drug Administration. The certificate is valid till 11-01-2023.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Sodium Chloride:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium chloride dated 17-09-2019. **Potassium Chloride:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of potassium chloride dated 17-09-2019. **Tri Sodium Citrate:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium citrate dated 17-09-2019. **Dextrose Anhydrous:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of Dextrose anhydrous dated 17-09-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	**Observations**	**Response by the Firm**
1.	Copy of GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	The firm has submitted request for renewal of GMP certificate to Director General (E & M), Lahore.
2.	Submit data of verification of analytical procedure of each drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted."*	The firm has submitted analytical method verification studies for each drug substance.
3.	Submit evidence of availability of atomic emission spectroscopy / flame photometer which is required in the testing of the drug product as per BP monograph.	The firm has submitted copy of invoice for the purchase of Flame photometer (Model: PFP7) from Western Analytical services dated 06-11-2019 (Invoice # 01119/097).
4.	Submit evidence of purchase / import documents of each drug substance.	**Sodium Chloride:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium chloride dated 17-09-2019. **Potassium Chloride:**

		Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of potassium chloride dated 17-09-2019. **Tri Sodium Citrate:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of sodium citrate dated 17-09-2019. **Dextrose Anhydrous:** Firm has submitted copy of invoice from Mak Kemikal, Karachi specifying purchase of 25Kg of Dextrose anhydrous dated 17-09-2019.

Decision of 321st meeting: Registration Board referred the case to QA & LT division seeking opinion regarding use of API imported by the indenter not having valid DML.

Evaluation by PEC:

The case was forwarded to QA & LT division through file number 7-1/2019-PEC dated 18/11/2022. QA&LT division has opined that;

"As per Drugs (Import & Export) Rules, 1976 ad Drugs (LR&A) Rules, 1976 only Licensed Manufacturer can import the API for manufacture of registered products or products for the purpose of test or analysis etc. In the light of above it is submitted that purchase of API from and indenter not having DML is not legitimate".

Submission by the firm:

The firm has stated that:

- It is to be informed that we had purchased all of API's for our product ORS from an authorized vendor/indenter and all of these had been purchased by our vendor from licensed manufacturers as GD's attached.
- All of the API's used in ORS i-e. Dextrose, Sodium Chloride, Potassium Chloride, Tri-Sodium Citrate are also used as excipients that's why we had purchased all these from authorized vendor.
- All of the API's used in ORS are Pharmaceutical Grade
- The firm has submitted GDs
- Relevant certificate of Analysis from the drug substance manufacturers have been submitted.

Decision: Registration Board after thorough discussion regarding the purchase of drug substances from an unauthorized intender not having Drug Manufacturing License and considering the opinion from QA & LT Division, decided to reject the application.

Applications for Withdrawal:

1464. M/s May & Baker (PVT) Ltd.45km, Dina Nath, Multan road Lahore.

Product:
Ketaro 100mg/2mL Ampoule
Each mL contains:
Ketamine as Hydrochloride…….50mg

Dy. No.: 26381 dated 19/09/2022

Submission by the firm:

The firm has stated vide their letter dated 24/10/2022 that they had decided to develop the product using new source of drug substance therefore we want to withdraw the application for registration of the product Ketaro 100mg/2mL Ampoule.

Decision: Registration Board acceded to request of the applicant and rejected the case.

1465. M/s Bio Labs Pvt. Ltd. Plot # 145, Industrial Triangle, Kahuta Road, Islamabad has applied for registration of the following products in new section / new license:

A. Orizec 40mg Injection

Each Vial Contains:
Omeprazole Sodium Eq. to Omeprazole…40mg
Type of form: Form-5F
Dy.No 8917 dated 07-04-2022
Rs.30,000/- dated 03-02-2022

B. Esozek 40mg Injection

Each Vial Contains:
Esomeprazole Sodium Eq. to Esomeprazole…40mg
Type of form: Form-5F
Dy.No 11099 dated 07-05-2022
Rs.75,000/- dated 03-02-2022

C. Pantozek 40mg Injection

Each Vial Contains:
Pantoprazole Sodium Eq. to Pantoprazole…40mg
Type of for: Form-5F
Dy.No 19956 dated 07-07-2022
Rs.30,000/- dated 03-02-2022

Remarks:
The applicant, M/s Bio Labs Pvt. Ltd. Plot # 145, Industrial Triangle, Kahuta Road, Islamabad is already granted with the above mentioned formulations with the following details;

1. B-Cap 40mg
Each vial contains:
Omeprazole (as Sodium)……..40mg
Lyophilized Powder
Registration number: 075061

2. E-Zole 40mg
Each vial contains:
Esomeprazole (as Sodium)…….40mg
Lyophilized Powder
Registration number: 075062

3. Pancap 40mg
Each vial contains:
Pantoprazole (as Sodium)…….40mg
Lyophilized Powder
Registration number: 075060

*The registrations of the above mentioned products were granted vide letter No.F.8-6/2012Reg.III(M-236) dated 19th December, 2012.

The case is hereby placed before the Board.

Decision: Registration Board was apprised that the applicant already hold registration of the above mentioned finished products manufactured by way of lyophilisation which is being carried out in lyophilisation section. The Board discussed that the new applied products contain same formulation as that of already registered products thus the Board decided to reject the applications for Orizec 40mg Injection, Esozek 40mg Injection and Pantozek 40mg Injection.

Agenda of Evaluator PEC-II:

Case no. 01 New Registration applications on Form 5F (Human)

a. New Cases (Human)

1466.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Shawan Pharmaceuticals. Plot No. 37, Road: Ns-01, National Industrial Zone, Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences. 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry vial section (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 31772 dated 18-11-2021
	Details of fee submitted	Rs.75,000/- dated 21-10-2021
	The proposed proprietary name / brand name	**Colist 1 MIU Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial Contains: Colistimethate sodium……1 MIU
	Pharmaceutical form of applied drug	Sterile white to yellowish fine powder filled in transparent glass vials with grey rubber stopper with an aluminium cap
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	COLOMYCIN 1 million International Units (IU) Injection **(MHRA** Approved)
	For generic drugs (me-too status)	Colistimethate injection 1 MIU by Mukhtar Enterprises (Reg #093937)
	Name and address of API manufacturer.	Hebei Shengxue Dacheng Co. Ltd. No. 50, Shengxue Road No. 17 Fuqiangxi Road, Luacheng County, Hebei Province P.R China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator Colistimethate sodium 2 MIU Injection.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	Hebei Shengxue Dacheng Co. Ltd. No. 50, Shengxue Road No. 17 Fuqiangxi Road, Luacheng County, Hebei Province P.R China.		
API Lot No.	HN190202		
Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T010	T011	T012
Batch Size	500 vials	500 vials	500 vials
Manufacturing Date	02-2020	02-2020	02-2020
Date of Initiation	16-02-2020	17-02-2020	18-02-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20190058) issued by CFDA China. The certificate is valid till 14-08-2024.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 02-02-2020 specifying import of 0.5Kg Colistimethate. The invoice is not attested by AD (I&E) DRAP Field office. The firm has submitted copy of DHL invoice (Invoice No. 20HS-091) for the import of drug substance.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, and pictures of the petri dishes showing zone of inhibitions following the microbial assay.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied formulation to be manufactured by M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi have already been granted approval by Registration Board in its 297th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 297th meeting are as follows:

Applicant firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Manufacturer firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Brand Name	**LISTIM Injection 1 MIU (IV)**
Batch No. of drug product	T010 T011 T012
Case No.	188
Registration Board meeting	297th meeting of Registration Board held on 12th, 13th, 14th & 15th January, 2021

Decision: Approved. Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding "Review of Colistimethate for Injection" along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi.**

1467.	Name, address of Applicant / Marketing Authorization Holder	M/s Shawan Pharmaceuticals. Plot No. 37, Road: Ns-01, National Industrial Zone, Rawat, Rawalpindi
	Name, address of Manufacturing site.	M/s Biogen Life Sciences. 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	GMP status of the firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry vial section (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 31773 dated 18-11-2021

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Biogen Pharmaceutical is a new License facility hence no such inspection has been conducted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20190058) issued by CFDA China. The certificate is valid till 14-08-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 02-02-2020 specifying import of 0.5Kg Colistimethate. The invoice is not attested by AD (I&E) DRAP Field office. Firm has submitted copy of DHL invoice for the import of drug substance.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, and pictures of the petri dishes showing zone of inhibitions following the microbial assay.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied formulation to be manufactured by M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi have already been granted approval by Registration Board in its 297th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 297th meeting are as follows:

Applicant firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Manufacturer firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Brand Name	**LISTIM Injection 2 MIU (IV)**
Batch No. of drug product	T013 T014 T015
Case No.	236
Registration Board meeting	297th meeting of Registration Board held on 12th, 13th, 14th & 15th January, 2021

Decision: Approved. Firm will revise the label claim as per the decision taken by the Board in instant meeting regarding "Review of Colistimethate for Injection" along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Biogen Life Sciences, 8Km, Chakbeli Road Rawat, Rawalpindi.**

1468.	Name, address of Applicant / Marketing Authorization Holder	M/s Swiss Pharmaceuticals Pvt Ltd. A-159, S.I.T.E Super Highway, Karachi, Pakistan
	Name, address of Manufacturing site.	M/s Biogen Life Sciences. 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the manufacturer firm	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Hydrocortisone injection section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 32572 dated 13-12-2021
	Details of fee submitted	Rs.75,000/- dated 14-10-2021

	The proposed proprietary name / brand name	**Cortef-Zone 100mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Hydrocortisone Sodium Succinate equivalent to hydrocortisone…… 100 mg
	Pharmaceutical form of applied drug	White to off White color, Lyophilized, Sterile Powder filled in Glass Vial as 1's Injection with 2mL Water for Injection further packed in Card board Unit Carton along with Leaflet.
	Pharmacotherapeutic Group of (API)	Corticosteroid, Glucocorticosteroid
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Cortizone injection by Global pharma
	Name and address of API manufacturer.	Symbiotec Pharmalab Private Limited 385/2 Pigdamber, Near Hotel Mashal, Off A. B. Road, Rau, Indore 453331 (M.P) India And Symbiotec Pharmalab Private Limited Plot no.5, 6, 7 & 8, Special Economic Zone, Phase-II, Pharma Zone, Pithampur, Dist. Dhar-454774, (M.P.), India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Solucortef 100mg injection.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

Manufacturing Date	05 – 2021	05 – 2021	05 – 2021
Date of Initiation	20-05-2021	20-05-2021	20-05-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Terbinafine HCl: The firm has submitted copy of DML# Lu20160312 of Shandong Boyuan Pharmaceutical Co., Ltd. Issued by CFDA, valid till 25-04-2026
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Terbinafine-HCl: The firm has submitted copy of attested commercial invoice by AD (I&E) DRAP field office dated 26-02-2021 specifying import of 4.70 Kg of API.
4.	Data of stability batches will be supported by attested respective documents like chromatograms,	Submitted

	Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1472.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals Pvt. Ltd. 539-A, Sundar Industrial Estate, Raiwind, Lahore**
	Name, address of Manufacturing site.	M/s Stallion Pharmaceuticals, PVT, LTD. 581-Sundar Industrial Estate, Raiwind Road Lahore, Punjab 54000.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 27957 dated 11-10-2021
	Details of fee submitted	Rs.50,000/- dated 20-11-2020
	The proposed proprietary name / brand name	**Imastin 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Imipenem ……. 500mg Cilastatin Sodium Eq. to Cilastatin …… 500mg
	Pharmaceutical form of applied drug	Intravenous Sterile Dry Powder for Injection
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Primaxin Injection (USFDA Approved)
	For generic drugs (me-too status)	Onem Injection of Global Pharmaceuticals
	GMP status of the Finished product manufacturer	Firm has submitted copy of GMP certificate issued on basis of inspection conducted on 22-09-2020, wherein Dry powder injectable Carbapenem section is declared.
	Name and address of API manufacturer.	M/s Aurobindo Pharma ltd., Unit-V, Plot. No. 79-91, I.D.A, Chemical Zone, pashamylarm, Ptancheru Mandal, Medak Dist, Telangana, India

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the Cilapen Injection by M/s Bosch Pharma by performing quality tests.
	Analytical method validation/verification of product	Method verification studies have submitted

STABILITY STUDY DATA			
Manufacturer of API	M/s Aurobindo Pharma ltd., Unit-V, Plot. No. 79-91, I.D.A, Chemical Zone, pashamylarm, Ptancheru Mandal, Medak Dist, Telangana, India		
API Lot No.	KA1007150016		
Description of Pack (Container closure system)	Type II clear Glass Vials.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time:24 months Accelerated: 6 months		
Frequency	Accelerated: 0,3,6 (Months) Real Time: 0, 3, 6,9,12,18,24 (Months)		
Batch No.	V6001	V7001	V8001
Batch Size	17,600 vials	8700 vials	4400 vials
Manufacturing Date	10-2016	08-2017	02-2018
No. of Batches	03		
Documents submitted along with stability data.			
	Reference of previous approval of applications with stability study data of the firm (if any)	--	

	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s Aurobindo Pharma ltd., Unit-V, Plot. No. 79-91, I.D.A, Chemical Zone, pashamylarm, Ptancheru Mandal, Medak Dist, Telangana, India issued by Drugs Control Administration, Telangana, India valid up to 13-10-2017.
	Documents for the procurement of API with approval from DRAP (in case of import).	---
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	N/A

Remarks of Evaluator[II]:

Section#	**Observation**	**Firm's response**
1.1	Differential fee o Rs. 25,000/- shall be submitted.	Firm ha submitted differential fee of Rs. 25000/- vide deposit slip# 98796611724
3.2.S.1	Submitted information does not include details of any buffering agent present in the drug substance.	Firm has referred to section 3.2.S.2.2 of DMF wherein blending with sodium bicarbonate sterile is declared in manufacturing process.
3.2. S.4.1	• Submitted specifications form drug substance manufacturer does not declare content of any buffering agent. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer shall be submitted.	• Not given in DMF part & not recommended by USP as well. • Submitted
3.2.S.4.3	Analytical method verification studies from the drug product manufacturer shall be submitted.	Submitted.
3.2. S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used for the formulation of submitted batches of drug product stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	Firm has submitted COAs from both drug susbtacne manufacturer and drug product manufacturer for the batch# 1605204528, 1705202345, 1705208644 along with commercial invoices attested by AD DRAP I&E Lahore, dated 08-9-2016, 28-07-2017 & 09-02-2018 respectively.
3.2.S.5	Submit COA of reference standard / working standard including source and lot number which is actually used in the testing of batches of drug substance and drug product submitted in the dossier.	Firm has submitted COAs of USP primary reference standards.
3.2.P.1	Details of reconstitution diluent shall be submitted.	Submitted as Zee-Inject (WFI) of M/s Shazeb pharmaceuticals.

3.2.P.2.2.1	Justification shall be submitted for not performing Pharmaceutical equivalence studies against the innovator product shall be submitted.	Due to unavailability of innovator product of Imipenem and Cilastatin injection in the market, we did our comparative studies with the Cilapen 500 mg Injection of Bosch Pharma which is our brand competitor of Imipenem and Cilastatin.
3.2.P.2.6	Compatibility studies with reconstitution diluent shall be submitted.	Firm has submitted compatibility study with WFI as diluent.
3.2.P.3.2	Relevant information shall be submitted.	Submitted
3.2.P.5.1	Submit drug product specification including limit for filled weight per vial. Justify why the test of "constituted solution" and "particulate matter in injection" is not included in your product specification since these tests are recommended by USP.	Firm has submitted revised drug product analytical procedure as per USP monograph.
3.2.P.5.2	• Submitted details of "Standard preparation" & Sample preparation" in the Assay test are not as per USP monograph. • Details of reference standard of Cilastatin mentioned in the Assay test are not as per USP monograph. • Justify the test of pH in section 3.2.P.5.2 which specifies that reconstitute the sample in 100ml carbon di oxide free distilled water, however USP specifies that reconstitute as directed in the labelling. The labelling of the innovator / reference product does not recommend reconstitution in water. • Justify the use of imipenem + Cilastatin working standard solution for the assay since USP has recommended separate standard preparation for Imipenem as well as Cilastatin for the assay test. • Justify why the calculation formula used for the assay test is different from that specified in USP monograph.	
3.2.P.5.3	Submit analytical method verification studies wherein standard and solution preparation method as recommended by USP monograph, shall be applied.	Firm has submitted revised analytical procedure only
3.2.P.6	Submit details along with COAs of working standard used for the analysis of stability batches of drug product, provided in the dossier.	Firm has submitted COAs of USP primary reference standards.

	3.2.P.8.3	• Documents for the procurement of drug substance with approval from DRAP, for relevant batches used in the formulation of drug product stability batches submitted along with dossier, shall be provided. • Justify non-performance of test of particulate matter during stability studies, as evident from the submitted data. • Justify the performance of Assay test using single standard solution of Impinem+Cilastatin working standard, since USP monograph recommends use of separate standard solution of Imipenem reference standard & Cilastatin ammonium reference standard. • Sample preparation details as evident from submitted raw data sheets of complete stability studies is not asper USP monograph, since firm has diluted the sample vial with 5ml distilled water whereas USP monograph recommends reconstitution of sample vial with in a volume of saline TS, accurately measured, corresponding to the volume of solvent specified in the labelling. • Justify the performance of Assay analysis on different UV detector wavelengths than that recommended by USP monograph i.e., 254nm. • Complete batch manufacturing record for the stability batches of drug product shall be submitted.	We placed three consecutive batches of Primaxin Sterile Dry Powder lnjection 500 mg V6001, V7001 and V8001 in 2016, 2017 and 2018 for accelerated stability study at 40°C ± 2°C / 75% ± 5%RH and Real time at 30°C ± 2°C / 65% ± 5%RH in which the analyst performs the tests with different method of preparation of sample and standard solutions and at different wavelength, which is not according to the USP monograph Due to this reason, we re-placed three consecutive batches of Primaxin Sterile Dry Powder lnjection 500mg V2001, V2002 and V2003 in 2022 for the accelerated stability study which will be completed in October 2022 and for shelf life stability which will be completed in April 2024 and their testing is according to the latest USP monograph. The Results of these ongoing stabilities are submitted.

Decision: Deferred for following:

- **Justification for proposing "Water for injection" WFI as reconstitution diluent for applied formulation.**
- **Submission of analytical method verification studies of drug product as per USP monograph.**
- **Evaluation of revised stability data of drug product along with submission of complete details of drug substance i.e., COAs, documents confirming import of dug substance, for the relevant batch no. used to manufacture recently submitted drug product stability batches, full fee of Rs. 75,000/- for revision of stability studies data as per notification No.F.7-11/2012- B&A/DRAP dated 13-07-2021.**

1473.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals Pvt. Ltd. 539-A, Sundar Industrial Estate,Raiwind,Lahore**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) Firm has submitted copy of contract manufacturing agreement with applicant firm dated 01-04-2021.

	GMP status of the firm	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 19-04-2019 based on the inspection dated 01-04-2019. The GMP certificate specifies Capsule (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML of M/s Cunningham Pharmaceuticals (Pvt) Ltd dated 13-06-2016 specifying capsule (cephalosporin) section.

	Details of fee submitted	Rs.50,000/- dated 19-05-2021 & Rs.25,000/- dated 26-05-2021
	The proposed proprietary name / brand name	**Genfixim 400mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule Contains: Cefixime as trihydrate……400mg
	Pharmaceutical form of applied drug	Hard gelatin capsule size # 0 with blue colored body and cap having white to yellow colored powder
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	JP specification
	Proposed Pack size	1x5's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cefixime 400mg capsule **(MHRA** Approved)
	For generic drugs (me-too status)	Cefim Capsule by Hilton
	Name and address of API manufacturer.	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real

		time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Cebosh capsule.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP dated 11-01-2019 based on the inspection dated 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 09-01-2018 specifying purchase of 7Kg Cefixime (compacted) Lot No. 00244-11/322/2017 and 43 Kg cefixime (compacted) Lot No. 00244-11/344/2017. Firm has submitted copy of commercial invoice dated 31-08-2018 specifying purchase of 50Kg Cefixime (compacted) Lot No. 00244-07/146/2018.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted report of stability batches however it is not depicting the audit trail for the analysis of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC: Registration Board in its 316th meeting while considering the applied formulation to be manufactured by M/s Cunningham Pharmaceuticals against the applicant of M/s PDH laboratories has decided as under:

Deferred for following:

- Submission of stability study data of three commercial batches of the drug product in which product testing has been conducted as per the product specification approved by Registration Board in its 313rd meeting and notified vide No.F.14-1/2022-PEC dated 14th March 2022.
- Firm shall submit the fee of Rs. 30,000 for revision in stability data, as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021.

Response by the firm:

Firm has submitted stability study data of 3 newly manufactured batches in which product testing has been performed as per the monograph for cefixime capsule approved by Registration Board for 6 months. The details of the newly manufactured batches is as under:

Manufacturer of API	Pharmagen Limited. Kot Nabi Bukshwala, 34 Km, Ferozepur Road, Lahore.

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	Fenbro suspension of M/s Stanley Pharmaceuticals
	GMP status of the Finished product manufacturer	New license granted on 29/09/2020 Tablet, Capsule, Dry Powder, Liquid Syrup , Cream Ointment (General Sections) Approved
	Name and address of API manufacturer.	M/s **Zenith Chemical Industries (Pvt) Limited.** Moza Dhonday, Jia Baga Raiwind Kahna Road Raiwind Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Brufen DS Suspension .
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
STABILITY STUDY DATA		

Manufacturer of API	M/s **Zenith Chemical Industries (Pvt) Limited.** Moza Dhonday, Jia Baga Raiwind Kahna Road Raiwind Pakistan.		
API Lot No.	ZIBU20-032		
Description of Pack (Container closure system)	90 ml / bottle packed in a Unit Carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3 & 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	P09	P22	P37
Batch Size	500 Bottles	500 Bottles	500 Bottles
Manufacturing Date	04-2021	05-2021	05-2021
Date of Initiation	29-04-2021	01-05-2021	03-05-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate Ref No. 141/2019-Drap(AD-813875--228) issued by DRAP.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	NA
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Manual record has been submitted with one reading in a day

Firm's response:
Remarks of Evaluator:

Section#	Observation	Firm's response
3.2.S.4.2	• Analytical procedure applied by the drug substance manufacturer shall be submitted.	Submitted.
3.2.P.1	• Justify the types & quantities of preservatives used in the proposed formulation.	Firm has stated that the selection of excipient was based upon the innovator product & the quantity of each excipient was justified within the allowable limits for the desired function of the excipient as declared in the Handbook of pharmaceutical excipients. Whereas the reference product does not contain methyl paraben & propyl paraben as proposed in the applied formulation.
3.2.P.2	Submit drug excipient compatibility studies data since, the innovator	Not submitted.

	product referred by firm does not contain the excipients proposed in the applied formulation.	
3.2.P.5.2	• Procedure for sample dilution preparation is not as per the BP monograph for "Ibuprofen oral suspension."	Firm has submitted revised analytical procedure as per BP monograph.
3.2.P.8.3	• The calculation formula applied for the Assay calculation is not as per that recommended by BP monograph of "Ibuprofen oral suspension" • Complete raw data sheets, wherein details of sample and standard dilution making is evident, shall be submitted. • Test of preservative effectiveness has not been performed during stability studies.	• Firm has submitted the calculation formula wherein determination of "weight per ml" as recommended by the BP monograph is not evident. • Submitted raw data sheet still not declare the actual quantities of standard and sample weighed for the preparation of relevant solutions. • Firm has submitted preservative effectiveness studies at the most recent time point (October 2021) of accelerated & long-term stability studies, which is earlier to the communication of this observation.

Decision of 316th meeting: Registration Board deferred both the applications of "Adovel Suspension 200 mg/5ml" & "Adovel Suspension 100 mg/5ml" for submission of Assay results at the next time point of long-term stability studies, as per the method & calculation formula recommended by the BP monograph of "Ibuprofen suspension".

Firm's response: Firm has submitted results of 12th month time point of long term stability studies for stability batches for both Adovel suspension 100mg/5ml & Adovel suspension 200mg/5ml as per BP monograph.

Decision: Registration Board approved th applications of Adovel Suspension 100 mg/5ml & Adovel Suspension 200 mg/5ml.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 02 Registration applications of newly granted DML or New section (Human)

a. New Section

M/s Wimits Pharmaceuticals (Pvt.) Ltd. Lahore. Plot #129 Sundar Industrial Estate, Raiwind road, Lahore
The Central Licensing Board in its 286th meeting held on 11th May, 2022 has considered and approved the grant of Drug Manufacturing License to M/s Wimits Pharmaceuticals (Pvt.) Ltd. Lahore. Plot #129 Sundar Industrial Estate, Raiwind road, Lahore by way of Formulation vide approval letter No. F. 1-10/2012-Lic dated 7th June, 2022 with following (06) sections.

S No.	Section
1	Dry Powder Suspension (Cephalosporin) Section
2	Capsule (Cephalosporin) Section
3	Dry Powder Injection (Cephalosporin) Section

1476.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Wimits Pharmaceuticals (Pvt.) Ltd. Lahore. Plot #129 Sundar Industrial Estate, Raiwind road, Lahore**
	Name, address of Manufacturing site.	M/s Wimits Pharmaceuticals (Pvt.) Ltd. Plot #129 Sundar Industrial Estate, Raiwind road, Lahore

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TCA001	TCA002	TCA003
Batch Size	500Vials	500Vials	500Vials
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	12-04-22	13-04-22	14-04-22
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SX20180229 issued by NMPA of China valid till 05/06/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of letter from M/s Medisave Pharmaceuticals in name of M/s Wimits Pharmaceuticals for "Approval of Loan" of Ceftriaxone Sodium. • Copy of letter No. 3855/2022/DRAP dated 29/March/2022 is submitted where in the permission to import different APIs including Ceftriaxone sodium for the purpose of test/analysis and stability studies is granted. • Invoice # W220222, DATE: 14-March-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4.1	Justification shall be submitted for difference in specifications of Assay test between the drug substance manufacturer and drug product manufacturer for Ceftriaxone sodium.	Firm has submitted revised specifications as per drug substance manufacturer.
3.2.S.5	COA of reference/working standard used for the drug substance analysis shall be submitted.	Submitted
3.2.S.7.3	Long term stability studies data shall be submitted as per Zone IVA.	Submitted from M/s Sinopharm, as per Zone IVa.
3.2.P.1	• Proposed Quantity of Ceftriaxone sodium per unit vial shall be justified against the label claim for Ceftriaxone. • Details of accompanying reconstitution diluent shall be submitted.	• Firm has justified the weight per unit vial according to the potency of Ceftriaxone determined during drug substance analysis. • Firm has referred WFI as diluent for applied formulation.
3.2.P.2.2.1	Justification shall be submitted for performing Pharmaceutical equivalence studies against the Oxidil injection instead of the innovator product i.e., Rocephin Injection.	Frim has submitted Pharmaceutical equivalence studies against the Rocephin Injection 500mg.
3.2.P.2.6	Compatibility studies with reconstitution diluent shall be submitted.	Firm has submitted compatibility study with water for injection as diluent.
3.2.P.5.1	Drug product specifications does not include limits for Assay test for sample solution 1.	Firm has referred to drug substance analysis for the results of sample solution 1.
3.2.P.5.2	Complete method of sample solution preparation shall be submitted for the Assay test.	Firm has submitted drug product analytical method with details of sample solution preparation.
3.2.P.6	COA of reference/working standard used for analysis of stability batches shall be submitted	Submitted.
3.2.P.8.3	• Documents confirming import of drug substance approved by DRAP shall be submitted. • Dispensed quantity of Ceftriaxone sodium shall be justified against the label claim.	• Firm has submitted clearance no. E-533464883684 for 500Kg of Ceftriaxone sodium issued in name of M.s Medisave by AD I&E DRAP, Lahore. • Firm has justified the weight per unit vial according to the potency of Ceftriaxone determined during drug substance analysis.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The status in reference regulatory authorities	Venofer 100mg/5ml by M/s Vifor Pharma, approved by TGA Australia
	For generic drugs (me-too status)	Venofer 100 mg/5ml by M/s OBS Reg. No. 085031
	GMP status of the Finished product manufacturer	Issuance of DML vide letter no. F.1-10/2019-Lic. Dated 29-04-2022 for sections of Injectable ampoule (General), Capsule section (general), Dry powder suspension section (general), Dry powder vial section (general)
	Name and address of API manufacturer.	M/s SYMED LABS LIMITED, UNIT-II, Plot No. 25/B, Phase-III, IDA, Jeedimetla (Village), Quthbullapur (Mandal) Medchal- Malkajgiri (Dist)-500 055, Telangana, INDIA.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Venofer injection
	Analytical method validation/verification of product	Method validation studies have been submitted.

STABILITY STUDY DATA

Manufacturer of API	M/s SYMED LABS LIMITED, UNIT-II, Plot No. 25/B, Phase-III, IDA, Jeedimetla (Village), Quthbullapur (Mandal) Medchal- Malkajgiri (Dist)-500 055, Telangana, INDIA.		
API Lot No.	21P (B) 0100718		
Description of Pack (Container closure system)	Glass ampoules		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 03 months Accelerated: 03 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trial 01	Trial 02	Trial 03
Batch Size	1000 ampoules	1000 ampoules	1000 ampoules
Manufacturing Date	02-2022	02-2022	02-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted

Remarks of Evaluator:

Section#	Observations	Firm's response
3.2. S.4.1	Drug Substance Specifications, Analytical Procedure & Analytical Method Verification Studies Shall Be Submitted from M/s May & Baker.	Submitted.
3.2.S.4.4	COA of relevant batch of API from drug substance manufacturer shall be submitted used for manufacturing of drug product trial batches declaring the potency in terms of iron content	Firm has submitted COA of batch#21P (B) 0100718 from M/s Symed Labs Limited.
3.2.P.1	Justify the quantity of Iron sucrose complex per ampoule against the label claim of elemental iron.	Firm has stated that each ampoule contains 1984mg of iron sucrose complex eq. to 100mg elemental iron, based upon the potency of drug substance.
3.2.P.5.1	Submitted drug product specifications does not include test of sucrose content.	Firm has submitted revised drug product specifications including test of sucrose content.
3.2.P.8	• Complete batch manufacturing record of three stability batches shall be submitted. • GMP certificate of the drug substance manufacturer shall be submitted. • Documents confirming procurement of drug substance shall be submitted.	• Firm has submitted trial batch manufacturing record for three stability batches. • Firm has submitted copy of GMP certificate# 84086/TS/2022 issued by DCA Telangana, valid till 24-03-2023. • Frim has submitted copy of letter from M/s Global Pharmaceuticals, for the grant of loan of API's including Iron sucrose complex for stability and registration purpose. • Firm has submitted copy of commercial invoice in name of M/s Global Pharmaceuticals for import of 300Kg of Iron sucrose, attested by AD I&E DRAP, Islamabad dated 07-05-2018.

Decision: Approved. Registration letter will be issued after verification of the loan letter by M/s Global Pharmaceuticals.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator[II]:

Sr.#	Observations	Firm's response
1.5.6	The said section mentions the drug product specifications as "In-house" whereas section 3.2.P.5.1 declares the drug product specifications as per JP monograph. Clarification shall be submitted in this regard.	Firm has submitted revised section 1.5.6 declaring drug product specifications as per JP for both strengths.
1.6.5	Valid copy of GMP certificate/DML of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate no. SD20180660 issued by CFDA valid till 008-02-2023
3.2.P.1	Details of accompanying reconstitution diluent shall be submitted.	Firm has referred to WFI as reconstitution diluent.
3.2.P.2.2.1	Justification shall be submitted for not performing test of pH and water Content in Pharmaceutical equivalence studies.	Firm has submitted performance of test of pH and water content in Pharmaceutical equivalence studies.
3.2.P.2.6	Compatibility studies with reconstitution diluent shall be submitted.	Compatibility studies with WFI has been submitted for both strengths.
3.2.P.5.2	The submitted analytical procedure does not mention use of internal standard solution in Assay test as recommended by JP monograph. Clarification shall be submitted in this regard.	It is submitted that the system suitability test has been performed during analytical method verification studies as per JP monograph wherein internal standard solution was used along with standard and sample solutions. Firm has also submitted revised analytical procedure.
3.2.P.6	COA of reference/working standard of "Sulbactam" shall be submitted.	Submitted.
3.2.P.8	Justification shall be submitted for manufacturing of trial batches sin April 2022, whereas section approval was granted on 07-06-2022.	Inspection was conducted on 21st March 2022 and sections were approved as per inspection report.

Decision: Registration Board approved the applications of MAGNIX 2gm IV/IM injection & MAGNIX 1gm IV/IM injection. Registration letter will be issued after verification of the loan letter by M/s Medisave Pharmaceuticals and submission of fee of Rs. 75,000/- for each strength for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Evaluator:

Section#	Observations	Firm's response
1.5.3	Submit the strength/concentration of applied formulation as per innovator product in terms of mg/ml and considering the equivalency factor for hydrogen malate along with submission of fee for correction/pre-approval change in label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm has submitted revised label claim: "Each 5ml contains: Pizotifen as hydrogen malate ……. 0.25mg"
3.2. S.4.3	Drug Substance Analytical Method Verification Studies shall include performance of specificity and accuracy parameter.	Submitted.
3.2.P.1	Justify the prosed quantity of Pizotifen malate per unit considering equivalency factor for hydrogen malate	Firm has submitted justification based upon the theoretical factor for the malate salt form calculated on basis of molecular weight.
3.2.P.5.2	Submit drug product analytical procedure.	Submitted.
3.2.P.5.4	Submit signed batch analysis certificates for the trial batches.	Submitted.
3.2.P.5.6	Justification/reference shall be submitted for the limits of test of pH and viscosity.	It is submitted that during the product development phase, we have developed the testing specifications of PD-Fen (Pizotifen) Syrup by comparing it with Competitor product (Mosegor (Pizotifen) Syrup),

		manufactured by Novartis Pharmaceuticals. The test limits of pH and viscosity are established by keeping in view the nature of the excipients and also with respect to the competitor product, available in the market. The pharmaceutical equivalence is submitted.
3.2.P.8	• Submitted invoice is of different batch no. of drug substance from that submitted in section 3.2. S.4.4. • Submit batch manufacturing record for stability batches. • Justification shall be submitted for applying UV spectrophotometric method for the performance of Assay test. • Justification shall be submitted for the production of trial batches before the grant of "Oral liquid section."	• Firm has submitted commercial invoice of relevant batch#20201026 attested by AD I&E DRAP Lahore dated 26-01-2021. • Firm has submitted trial batch manufacturing record for three stability batches. • It is submitted that the product is developed on In-house specifications. At the time of product development phase, we have developed the analytical method of PD-Fen Syrup 0.25mg/5ml on UV spectrophotometer for the performance of assay test. The compliance of this method is ensured through analytical method validation (provided with the dossier). The developed method has been validated statistically for their specificity, linearity, accuracy and precision as per guidelines. • Please be informed that all trial batches are developed in R&D Lab (Batch size: 2.40 Liters).

Decision: Deferred for following:

- **Revision of drug product analytical procedure for assay test on basis of HPLC method and submission of performance of next time point of long term stability studies as per revised HPLC method along with analytical metghod validation studies.**
- **Evidence of approval of R&D lab from CLB.**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Sinopharma:** Copy of DML No. Jin 20160008 issued by CFDA valid till 17-11-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Invoice # EX/3198498 Dated 21-10-2020 is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have maintained manual logs of all tests.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4	• Submit drug substance specifications, analytical procedure and analytical method verification studies from M/s City Pharmaceuticals. • Submitted analytical method for Assay test from drug substance manufacturer is not as per BP monograph. Justification shall be submitted in this regard.	Although drug substance manufacturer has not used the method of testing in accordance to BP but we at City Pharmaceuticals have used BP method of testing for releasing the material and has submitted drug substance specifications, analytical procedure and analytical method verification studies as per BP monograph.
3.2.S.4.4	Results of water content test are out of limits in the COA of drug substance submitted from M/s City Pharmaceuticals.	It was a typo error and firm has submitted revised COA for drug substance analysis from M/s City Pharmaceuticals.
3.2.P.1	• Justify the proposed weight of drug substance per unit vial against the label claim. • Description of the reconstitution diluent shall be submitted.	Firm has submitted fill weight calculations based upon percentage potency of Drug substance. Water for injection has been referred as reconstitution diluent.
3.2.P.2.6	Compatibility study with reconstitution diluent shall be submitted.	Submitted with WFI
3.2.P.5.2	Justification shall be submitted for mentioning Potassium clavulanate working standard in Assay test	Firm has submitted COA of USP reference standard of Clavulanate Lithium.

	whereas BP monograph has recommended reference standard of Lithium clavulanate.	
3.2.P.8.3	• Documents confirming import of drug substance with the approval of DRAP I&E shall be submitted. • Dispensed quantity of the drug substance shall be justified against the potency determined during drug substance analysis. • HPLC chromatograms and raw data sheets shall be submitted for complete stability studies of both accelerated and long term conditions till 6 month time point.	• Firm has submitted copy of commercial Invoice # EX/3198498 attested by AD DRAP I&E Karachi dated 24-11-2020 for import of "Amoxicllin + Potassium Clavulanate sterile". • Firm has submitted fill weight calculations based upon percentage potency of Drug substance. • Firm has submitted analytical record for complete stability studies.

Decision: Registration Board approved the applications of Tyno 600mg IV Injection & Tyno 1.2gm IV injection with change of brand name.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

- **M/s Caraway Pharmaceuticals. Plot # 12, Street N-3, National industrial Zone, Rawat, Islamabad**

The Central Licensing Board in its 287th meeting held on 24th June, 2022 has considered and approved the grant of additional section of "Liquid Syrup (General)" to M/s Caraway Pharmaceuticals. Plot # 12, Street N-3, National industrial Zone, Rawat, Islamabad.

1486	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Caraway Pharmaceuticals. Plot # 12, Street N-3, National industrial Zone, Rawat, Islamabad**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.4.3	Analytical method verification studies have been performed for HPLC method whereas BP monograph mentions titration method for assay analysis.	For titration method, there is a requirement of a banned/controlled reagent of acetic anhydride for which we do not have authorization/stock at Seatle, so therefore an alternate method by HPLC was adapted for estimation of contents which is more stringent and specific and same has been validated & submitted with dossier application.
3.2.P.8.3	Copy of commercial invoice attested by AD I&E DRAP, shall be submitted for the import of Bromazepam batch# 880110 Justification shall be submitted for performance of Assay test by UV Spectrophotometric method.	Firm has submitted copy of commercial invoice no. 1000001874 attested by AD I&E DRAP Lahore dated 07-05-2021 stating that the NOC is for Bromazepam working standard only. As the product is not available in USP/BP/JP, an In-House method (By UV) for Bromazepam Tablets for assay was adopted and same has been validated & submitted with dossier. Moreover, specificity test was performed in validation studies, wherein it was found that there is no interference of blank (diluent) & placebo sample matrices with API (Bromazepam).

Decision: Deferred for submission of scientific justification for applying UV spectrophotometric method for drug product Assay test since drug substance assay has been performed by HPLC method.

	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	Rocephin Injection 1G IM of M/S F.Hoffmann-La Roche Ltd. Packed by Martin Dow Limited, Reg # 008436
	Name and address of API manufacturer.	M/s HENAN KANGDA PHARMACEUTICAL CO.,LTD.Block no.66 Jing wu Road, Xiang cheng City, Henan, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance(Conditions duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies against the reference product of "Rocephin Injection 1gm IM".
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions.

STABILITY STUDY DATA	
Manufacturer of APIs	M/S. Henan kangda pharmaceutical co.,ltd. Block no.66 Jing wu Road, Xiang cheng City, Henan, China.
API Lot No.	2022009013
Description of Pack	Glass vial

Case no. 03 Registration applications of import cases

a. New Cases (Human)

1489	**Name, address of Applicant / Importer**	**M/s Excel Medical Devices. Office No.3, 12th Floor, Jas Trade Centre Plot No. 39-A-1 Block 6, PECHS, Jamsh Town, Karachi, Pakistan**
	Details of Drug Sale License of importer	**License No:** 1774 **Address: Office No.3, 12th Floor, Jason Trade Centre Plot N 39-A-1 Block 6, Karachi** **Validity:** 22/08/2021 **Status:** by way of wholesale
	Name and address of marketing authorization holder (abroad)	M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-r Danwon-gu, Ansan-si, Gyeonggi-do, Republic of Korea
	Name, address of manufacturer(s)	M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro, Danwo gu, Ansan-si, Gyeonggi-do, Republic of Korea
	Name of exporting country	Republic of Korea
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) • Original legalized COPP (Certificate# 2019-D1-0007) issued by Ministry of Food & Drug Safety. • Free Sale status: The COPP endorses the free sale status of the applied product in Republic of Korea. • Firm has submitted Legalized copy of GMP certificate (Certificate No. 2018-D1-2931) issued by "Ministry Food & Drug Safety, in the name of M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro, Danwon-gu, Ansa si, Gyeonggi-do, Republic of Korea, issued on 31-08-2018.	
	Details of letter of authorization / sole agency agreement • Original Legalized "Letter of Authorization" issued by M/s Shin Poong Pharmaceutical Co., Ltd. 7, Won ro, Danwon-gu, Ansan-si, Gyeonggi-do, Republic of Korea in the name of M/s Excel Medical Devic Office No.3, 12th Floor, Jason Trade Centre Plot No. 39-A-1 Block 6, PECHS, Jamshed Town, Karac Pakistan for the applied product of "**Breta (letrozole) 2.5mg Tablet "**	
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No 26799 dated 12-10-2020
	Details of fee submitted	Rs. 100,000/-: 24-02-2020
	The proposed proprietary name / brand name	**Breta 2.5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet Contain Letrozole ……. 2.5mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Aromatase inhibitor ATC code: L02BG04
	Reference to Finished product specifications	In-House
	Proposed Pack size	30 tablets per pack
	Proposed unit price	PKR 7400/box.
	The status in reference regulatory authorities	Approved by MHRA of UK

	For generic drugs (me-too status)	Femara tablet of M/s Novartis (Reg.#021129)
	Module-II (Quality Overall Summary)	Submitted as per WHO-PD template
	Name, address of drug substance manufacturer	M/s Shin Poong Pharmaceutical Co., Ltd. 7, Wonsi-ro, Danwo gu, Ansan-si, Gyeonggi-do, Republic of Korea
	Module-III Drug Substance:	The firm has submitted verification studies of assay method f API as well as for related substances.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Real time stability studies have been conducted at 25°C±2°C a 60%±5% RH for 36 months. Accelerated stability studies is conducted at 40°C±2°C and 75%±5% RH for 6 months.
	Module-III Drug Product:	All the relevant details are submitted by the firm.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has comparative dissolution studies against the referen product Femara with acceptable values f2 values.
	Process Validation	Firm has submitted process validation studies of three batches f the applied product
	Analytical method validation/verification of product	Analytical method verification studies for drug product has n been submitted.
	Container closure system of the drug product	Pre-filled syringe: Barrel: Borosilicate glass Tip cap: Elastomer Plunger stopper: Bromobutyl rubber. Needle tube: Stainless steel 304
	Stability study data of drug product, shelf life and storage conditions	Real time stability studies have been conducted at 30°C±2°C a 65%±5% RH for 36 months. Accelerated stability studies is conducted at 40°C±2°C a 75%±5% RH for 6 months.

Evaluation by PEC[II]:

Section	Observation	Firm's response
2.3.P.2	Relevant information against this section shall be submitted**.**	Submitted.
3.2. S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.	Firm has submitted analytical method verification report for drug product.

Decision: Approved as per policy of inspections of manufacturer abroad.

b. Deferred cases

1490.	**Name, address of Applicant / Importer**	**M/s Seatle Private Limited, 45-KM Multan Road, Lahore.**
	Details of Drug Sale License of importer	**License No:** 05-351-0073-029396P **Address:** Seatle Private Limited, 45-KM Multan Road, Lahore. **Address of Godown:** NA **Validity:** 19-03-2022 (Renewal applied) **Status:** License to sell drugs in a Pharmacy **Renewal:** yes

	Name and address of marketing authorization holder (abroad)	LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona - Spain.
	Name, address of manufacturer(s)	**Drug product manufacturer:** LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain. **Water for injection 10ml:** Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France
	Name of exporting country	Spain
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No. 2020/01561) dated 20/06/2020 issued by Spanish Agency for Medicines and Health Products, Spain for Fratazid 1g powder and 10ml solvent for solution for injection (IV). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. Submitted COPP does not reflect any detail regarding manufacturer of the accompanying diluent i.e., 10ml WFI. **GMP:** Firm has submitted Legalized "Manufacturing authorization certificate no. 2279E" dated 26-11-2018, issued to LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain., wherein manufacturing facility for sterile products of B-lactam antibiotics" is confirmed. Firm has submitted Legalized "Manufacturing authorization certificate no. M 19/112" dated 13-06-2019, issued to Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France, wherein manufacturing facility for sterile products of Small Volume Parenteral" is confirmed. Copy of GMP certificate no. NCF/2024/001/CAT hs also been submitted for LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain valid upto 20-06-2020. Copy of Eudra GMP certificate no. 2020/HPF/FR/081 for Haut Pharma Livron

		SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France, valid upto 13-02-2023.
	Details of letter of authorization / sole agency agreement	Firm has submitted original legalized sole agency agreement. The agreement specifies that the manufacturer appoints M/s Seatle Private Ltd. to register their products in Pakistan as sole importer. A manufacturing agreement has also been submitted wherein M/s LDP-LABORATORIOS TORLAN, S.A. has declared Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France as manufacturer of the diluents i.e., Lidocaine HCl 1% ampoule & WFI ampoules for Ceftriaxone formulations to be imported by M/s Seatle.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No 17398 dated 22-06-2021
	Details of fee submitted	For Ceftriaxone: PKR 100,000/-: 18-8-2020 For WFI: PKR 100,000/-: 15-06-2020
	The proposed proprietary name / brand name	**FRATAZID INJECTION 1g IV**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial of powder contains: Ceftriaxone (as Sodium) …….. 1g Each Ampoule contains: Sterile Water for Injection ……10ml
	Pharmaceutical form of applied drug	Powder and solvent for solution for Injection
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	Drug product: USP

		Diluent WFI: European Pharmacopoeia
	Proposed Pack size	1's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Rocephin Injection 1g **(USFDA** Approved).
	For generic drugs (me-too status)	Oxidil of SAMI Pharma Pvt. Ltd. (Reg # 022422)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Qilu Antibiotics Pharmaceutical Co., Ltd. No. 849 Dongjia Town, Licheng District, Jinan, Shandong Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25°C ± 2°C and 60% RH The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence studies have been submitted against the Rocephin 1gm Injection.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.

	Container closure system of the drug product	Type II glass vial for Powder Type I glass ampoule for WFI
	Stability study data of drug product, shelf life and storage conditions	**Drug product:** Firm has submitted stability study data of 3 batches of drug powder vial. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of all 3 batches is completed till 36 months. **Diluent WFI:** Firm has submitted stability study data of 3 batches of 10ml WFI. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of all 3 batches is completed till 60 months.

	Details of fee submitted	For Ceftriaxone: PKR 100,000/-: 18-8-2020 For WFI: PKR 100,000/-: 15-06-2020
	The proposed proprietary name / brand name	**Fratazid 500mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial of powder contains: Ceftriaxone (as Sodium) …….. 500mg Each Ampoule contains: Sterile Water for Injection ……5ml
	Pharmaceutical form of applied drug	Powder and solvent for solution for Injection
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotic
	Reference to Finished product specifications	European Pharmacopoeia
	Proposed Pack size	1's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Rocephin Injection 500mg **(USFDA** Approved).
	For generic drugs (me-too status)	Oxidil of SAMI Pharma Pvt. Ltd. (Reg # 022422)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general

		properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Qilu Antibiotics Pharmaceutical Co., Ltd. No. 849 Dongjia Town, Licheng District, Jinan, Shandong Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC and 60% RH The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence study has been submitted against Rocephin Injection 500mg IV
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type II glass vial for Powder Type I glass ampoule for WFI
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of drug powder vial and WFI ampoule. The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of all 3 batches is completed till 36 months.
Evaluation by PEC:		

Section#	Observations	Firm's response
1.3.4	Copy of valid Drug Sale License (DSL) issued by relevant licensing authority shall be submitted. Sole agency agreement / letter of authorization between applicant and marketing authorization holder shall be submitted.	Firm has submitted copy of DSL valid till 19-03-2022 along with receipt of renewal application. Copy of sole agency agreement from M/s LDP-Laboratorios TORLAN, S.A., Ctra Barcelona, Spain in the name of M.s Seatle Provate Ltd., Lahore, Pakistan has been submitted.
1.5.6	The said section declares Pharmacopoeial reference as European Pharmacopoeia specifications, monograph of applied product is not available in European Pharmacopoeia.	Firm has revise specifications to USP , without submission of fee.
2.3	Table for literature references for the drug substance & drug product has not been submitted.	Submitted.
2.3.P.5.1	Assay limits are not as per the Pharmacopoeial monograph.	Revised Specification and Analytical Procedure as per USP is submitted
2.3.R.1.1	Submitted BMR declare the calculation of drug substance fill weight per vial on the basis of "Assay of anhydrous active substance" instead of "Assay of as is active substance"	Firm has submitted revised BMRs.
3.2.S.4.2	• Copy of drug substance specifications and analytical procedure applied by Drug product manufacturer shall be submitted. • The USP monograph of Ceftriaxone sodium, recommends the potency of Ceftriaxone in USP Ceftriaxone Sodium RS (µg/mg) for the calculation of Assay, whereas submitted drug substance analytical procedure applies the potency of Ceftriaxone sodium in %age.	• Revised Specification and Analytical Procedure applied by Drug Product Manufacturer as per USP is submitted
3.2.S.4.3	• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted.	• AMV report is submitted form Drug product manufacturer.
3.2.S.4.4	• The specifications for Assay test mentioned in the batch analysis certificate from drug product manufacturer are different from	• Revised COA, according to USP monograph and section 3.2.S.4.1 from Drug Product Manufacturer is submitted

	that submitted in section 3.2.S.4.1. • The drug substance COA from the M/s Qilu Pharma is as per USP monograph whereas COA from M/s LDP Laboratories Torlan S.A. is as per the BP monograph. Justification shall be submitted in this regard.	
3.2.P.2	• A brief information on the pharmaceutical development shall be included. This information specifies the justification of formulation and method of manufacturing. It is also important that critical quality attributes (CQAs) and Critical Process Parameters (CPP) shall be discussed. • Compatibility studies for the applied product shall be performed as per the instructions provided in individual label of the drug product.	• Submitted. • Compatibility study has been submitted for 1gm injection only with water for injection.
3.2. P.5.1	• Submitted drug product specifications does not include Assay limit for the content of dry powder injection i.e., an amount of Ceftriaxone Sodium equivalent to NLT 776 µg/mg of ceftriaxone • Test of crystallinity ha sot been included the drug product specifications.	• Revised Specifications according to USP including the test for crystallinity, are submitted.
3.2.P.5.2	• Sample preparation procedure mentioned in analytical method, does not include sample preparation for "Sample solution 2", as defined in the USP monograph of "Ceftriaxone for injection."	• Firm has submitted revised analytical procedure as per USP monograph
3.2.P.5.4	• Submitted COAs of drug product does not include Assay test for sample solution 2 as recommended by USP monograph of "Ceftriaxone for injection".	• Firm has submitted COA of recent batch of the drug product manufactured in May, 2022 wherein Assay analysis has been performed as per USP monograph.
3.2.P.6	• COA of primary / secondary reference standard including source and lot number shall be provided.	• Submitted.
3.2.P.8	• Submitted stability data does not reflect the performance of Assay test for sample solution 2 as	• Please note that the Sample Preparation Method mentioned in Analytical Method does not

	recommended by USP monograph of "Ceftriaxone for injection". • Data of stability batches shall be supported by respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	include sample preparation for "Sample Solution 2" and only the preparation of Sample Solution 1"is included. However, we will include both the preparation of Sample Solution 1 and Sample Solution 2 by revising the specifications and analytical procedures according to the USP Monograph. • Submitted.

Decision of 320th meeting: Registration Board deferred the applications of FRATAZID INJECTION 1g IV & FRATAZID INJECTION 500g IM for submission of CoPP with details of the composition and manufacturer of accompanying diluent.

Firm's response:
Firm has submitted revised original Legalized CoPPs of all three strengths issued by AEMPS Spain, detailed as below:

Product	**CoPP details**
Fratazid Injection 500mg IM	Firm has submitted original, legalized CoPP certificate (No. 2022/03010) dated 04-11-2022 issued by Spanish Agency for Medicines and Health Products, Spain for Fratazid 500mg powder and 2ml solvent for solution for injection (IM). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. Details of manufacturer as per COPP are as under: **Vials manufacturer:** LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain. **Solvent ampoules manufacturer:** Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France
Fratazid Injection 500mg IV	Firm has submitted original, legalized CoPP certificate (No. 2022/03009) dated 04-11-2022 issued by Spanish Agency for Medicines and Health Products, Spain for Fratazid 500mg powder and 5ml solvent for solution for injection (IV). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. Details of manufacturer as per COPP are as under: **Vials manufacturer:** LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain. **Solvent ampoules manufacturer:** Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France

	Fratazid Injection 1gm IV	Firm has submitted original, legalized CoPP certificate (No. 2022/03010) dated 04-11-2022 issued by Spanish Agency for Medicines and Health Products, Spain for Fratazid 500mg powder and 10ml solvent for solution for injection (IV). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 years. Details of manufacturer as per COPP are as under: **Vials manufacturer:** LDP-LABORATORIOS TORLAN, S.A. Ctra. de Barcelona, 135-B 08290 Cerdanyola del Valles Barcelona – Spain. **Solvent ampoules manufacturer:** Haut Pharma Livron SAS, 1 rue Comte de sinard, 26250, Livron sur Drome. France
Decision: Registration Board approved the applications of Fratazid Injection 1g IV, Fratazid Injection 500g IM & Fratazid 500mg IV Injection with "Type I glass vial" as primary container, as per policy of inspections of manufacturer abroad.		

Case no. 04 Registration applications of priority consideration against manufacturing of Paracetamol tablets

1493.	Name and address of manufacturer / Applicant	M/s Tabros Pharma Pvt. Ltd. L-20/B, Sector-22, Federal B Industrial Area, Karachi.
	Brand Name +Dosage Form + Strength	**Fenomol 200mg/500mg Tablet**
	Composition	Each film coated tablet contains: Ibuprofen……. 200mg Paracetamol ……. 500mg
	Diary No. Date of R& I & fee	Dy. No. dated 09-02-2020, Fee Rs: 20,000/- dated 17-09-2014 vide deposit slip No.0143487. Fee Rs:30,000/- dated 08-07-2017 vide deposit slip No. 0275689.
	Pharmacological Group	Ibuprofen: NSAIDs Paracetamol: Antipyretic
	Type of Form	Form 5D
	Finished product Specifications	Tabros Specifications
	Pack size & Demanded Price	2x10's As per SRO
	Approval status of product in Reference Regulator Authorities	Nuromol Double Action Pain Relief 200mg/500mg Tablets (MHRA Approved)
	Me-too status	Provas Duo Tablets Sami Pharmaceuticals (Pvt). Ltd. Reg. No. 108579
	GMP status	GMP certificate issued based upon inspection conducted on 07-04-2022.
	Remarks of the Evaluator

39.	Record of comparative dissolution data (where applicable)	Provided CDP has been performed against the NUROMOL 200mg/500mg Tablet by Reckitt Benckiser Healthcare in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
40.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
41.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
42.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Sr.#	Observation	Firm's response
1.	Justification shall be submitted for the selection of dissolution parameters i.e., dissolution medium, apparatus, volume, rpm.	Initially, we have been reviewed the dissolution method of Ibuprofen Tablets in USP monograph, and followed the same parameters like, Volume, elapsed time and apparatus Type, apart from this dissolution medium and rpm was established by In-House method.
2.	Justification shall be submitted for the dissolution limits of NLT 80% (Q) in 60 minutes in phosphate buffer of pH 6.8 whereas the review literature of US FDA for another strength of same formulation i.e., "Advil Dual Action with Acetaminophen" of M/s Pfizer recommends following dissolution parameters and limits: "NLT Q in 15 minutes for both Ibuprofen and Acetaminophen in phosphate buffer of pH 7.2."	The implemented dissolution method reviewed and found acceptable based on comparative dissolution profile at 6.8pH Buffer, we obtained Dissolution results in 6.8pH buffer (QC Medium) of Ibuprofen and Paracetamol more than 80% at 15 minutes, However, we have the yard stick USP compendia for Ibuprofen, where sample elapsed time is 60 minutes, Therefore, we kept sample Elapsed time is 60 minutes similar to USP compendia. Since, Competent Authority compared the dissolution with our product to Advil Dual action tablets as a reference product where the limit is NL T Qin 15 minutes, subsequently, we have noticed that Advil Dual action tablets excipients are entirely different as per our suggested reference product of NUROMOL. (Reckitt Benckiser Healthcare UK)

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Case no. 05 Priority as per Authority Decision of 129th meeting for Invalid Registration

1494.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Libra Pvt aLtd. 77-Peshawar Industrial Estate, Hayatabad Peshawar**
	Name, address of Manufacturing site.	M/s Libra Pvt Ltd. 77-Peshawar Industrial Estate, Hayatabad Peshawar
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	GMP status of the firm	GMP certificate issued on basis of inspection conducted on 18-11-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 28-09-2004, declaring grant following additional sections: "Dry powder suspension (Cephalosporin)"
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 22874 dated 12-08-2022
	Details of fee submitted	Rs.30,000/- dated 07-01-2022
	The proposed proprietary name / brand name	**Libroxime DS 200mg/5ml Dry Powder for Oral Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension contains: Cefixime as Trihydrate …… 200mg
	Pharmaceutical form of applied drug	Dry suspension oral
	Pharmacotherapeutic Group of (API)	Third-Generation Cephalosporin's
	Reference to Finished product specifications	USP specification
	Proposed Pack size	1's x 30ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	Cefspan DS dry suspension of M/s Barret Hodgson Karachi (Reg.#024634)
	Name and address of API manufacturer.	M/s Pharmagen Ltd., Ferozpur Road, Lahore
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies against the reference product of "Cefspan DS dry suspension of M/s Barret Hodgson Karachi" has been submitted.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long-term conditions.
