	The proposed proprietary name / brand name	TEMOREL CAPSULES 20mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Hard Gelatin Capsule contains: Temozolomide (USP)…….20mg
	Pharmaceutical form of applied drug	Capsules
	Pharmacotherapeutic Group of (API)	Anti-cancerous (Alkylating agents)

	Reference to Finished product specifications	Manufacturer's Specifications
	Proposed Pack size	5's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	TEMODAR (Temozolomide) 20mg Capsules (FDA Approved)
	For generic drugs (me-too status)	Temoside Capsules 20mg of AJM Pharma Private Limited. (Reg # 066112)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s RELIANCE LIFE SCIENCES PVT. LTD Dhirubhai Ambani Life Sciences Centre (DALC), Plat No. 3,5,6 and 9. Plot No. R-282 Thane – Belapur Road, Rabale, Thane-400701, Maharashtra State, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API TMCI2001, TMCI2002, TMCI2003 at accelerated (40°C/ 75% RH) as well as real time conditions. The real time stability data is conducted at 25oC ± 2oC and 60% RH The stability study data is till 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Comparative Dissolution Profile for the applied product as follows Test Product Temozolomide 20mg capsule B.No RLTL0112 Reference product Temodol 20mg capsule B.No 1CAPA04010 Medium

		Dearated water,Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The Average % release of both Drug substances in all four mediums is more than 85% at 15 minutes hence there is no need to calculate f2 value
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Amber coloured USP type III glass bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of drug product. The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 75% ± 5% RH. The real time stability study data of all 3 batches is submitted till 24 months. Batch size 5000 capsules Batch No RLTL 0215, RLTL 0315 and RLTL 0715

Remarks by Assessor (AD PECXX):

Firm has adopted manufacturer's specification being more stringent than USP.

S No	Test/parameter	Acceptance criteria as per USP	Acceptance criteria as adopted by the firm
1.	Assay limit	90-110	95-105%
2.	Impurity testing Total impurity Any unspecified impurity	 NMT 1.2% NMT 0.2%	 NMT 1.0% NMT 0.1%
3.	water content	N.A	NMT 2%w/w

Firm has provided BMR of all three stability batches:
RLTL 0215, RLTL 0315 and RLTL 0715

Sr.#	Observation	Reply	Remarks
1.	The active substance specification which is required to be tested by the finished product manufacturer includes tests for color index, pH, sulphate ash, chloride and sulphate (as per Public assessment report, EMA) https://www.ema.europa.eu/en/documents/assessment-report/temozolomide-sun-epar-public-assessment-report_en.pdf The above mentioned tests have not been performed by finished product manufacturer. Justify it	The submitted specification of Temozolomide API is as per USP. The EPAR which has been shared was published in the year 2011 & Ph. Eur. monograph for Temozolomide was not available at that time. The	Justified

		Ph. Eur. monograph became official in January 2017 & it does not have these tests.	
2.	The following parameters are required to be controlled/tested during the stability studies: identification (HPLC) and uniformity of dosage (Ph.Eur), as per Public assessment report, EMA https://www.ema.europa.eu/en/documents/assessment-report/temozolomide-sun-epar-public-assessment-report_en.pdf	Uniformity of the dosage Unit is not a stability-indicating parameter. Hence it is not tested during stability, however, it was performed at the time of batch release. Also, Identification test by HPLC was performed at the time of batch release. Under 3.2.P.5.4 COAs are attached.	Justified
3.	Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters of developed formulation against reference product.	Firm has submitted Comparative Dissolution Profile for the applied products against Reference product Temodal 250mg capsule by SP Euorope B.No ILTAA05001 The quality parameters compared were identification by HPLC, Assay, related substances, water content	Complied

		and dissolution.	
4.	In CDP report difference factor (f1) has not been calculated	CDP report has been submitted wherein f1 and f2 values were calculated which was within acceptable range	Complied
5.	Submit valid license to sell drugs. Details of already submitted license are as under: License to sell Drugs by way of Wholesale (License No: 507 Validity: 17-06-2020 to 16-06-2022	Firm has submitted copy of valid DSL as follows: License No: 565 Address: Martin Dow Limited, Plot no. 37, Sector 19, Korangi Industrial Area, Karachi. 	GMP status of the Finished product manufacturer	Updated GMP status is not provided. Evidence for section approval Tablet (General) dated 07.02.2014
	Name and address of API manufacturer.	Tofacitinib M/s Glenmark Lifesciences Ltd. Address: Plot No. 3109, GIDC, Industrial estate, Ankleshwar, 393 002. District Bharuch, Gujarat state, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph is not present in any pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its validation, batch analysis and

		justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: AD11014001, AD11014002, AD11014003,
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Xeljanz 10mg Tablet by M/s Pfizer by performing quality tests (Identification, Assay, Dissolution, disintegration, microbial examination, and Assay CDP has been performed against the same brand that is Xeljanz 10mg Tablet by M/s Pfizer in Acid media (0.1 N HCL) & Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). F2value calculation is not required as reference and test products released more than 85% within 15 minutes.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	Tofacitinib M/s Glenmark Lifesciences Ltd. Address: Plot No. 3109, GIDC, Industrial estate, Ankleshwar, 393 002. District Bharuch, Gujarat state, India.		
API Lot No.	Tofacitinib citrate 82190846		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×10's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TF-120220	TF-130220	TF-140220
Batch Size	2500 tablets	2500 tablets	2500 tablets
Manufacturing Date	02-2020	02-2020	02-2020
Date of Initiation	20-02-2020	20-02-2020	20-02-2020
No. of Batches	03		

Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	Etoxib 90mg Tablet Etoxib 120mg Tablet Approved in 294th minutes of meeting of DRB
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 19061427 issued by Food & Drug Control Administration, Gandhinagar, Gujrat state, India. valid till 17/06/2022.
	Documents for the procurement of API with approval from DRAP (in case of import).	Attested invoice (No. AAACZ5212B) from DRAP for import of 0.2Kg Tofacitinib citrate (batch no 82190846). License to import drug for clinical trials (No 382/20 DRAP dated 29.01.2020
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (AD-PEC [xx]):

USFDA approved Box warning for Xeljanz 10mg Tablet (Tofacitinib citrate) as follows:

WARNING: SERIOUS INFECTIONS AND MALIGNANCY
See full prescribing information for complete boxed warning.

- **Serious infections leading to hospitalization or death, including tuberculosis and bacterial, invasive fungal, viral, and other opportunistic infections, have occurred in patients receiving XELJANZ. (5.1)**
- **If a serious infection develops, interrupt XELJANZ/XELJANZ XR until the infection is controlled. (5.1)**
- **Prior to starting XELJANZ/XELJANZ XR, perform a test for latent tuberculosis; if it is positive, start treatment for tuberculosis prior to starting XELJANZ/XELJANZ XR. (5.1)**
- **Monitor all patients for active tuberculosis during treatment, even if the initial latent tuberculosis test is negative. (5.1)**
- **Lymphoma and other malignancies have been observed in patients treated with XELJANZ. Epstein Barr Virus-associated post-transplant lymphoproliferative disorder has been observed at an increased rate in renal transplant patients treated with XELJANZ and concomitant immunosuppressive medications. (5.2)**

Remarks of Assesor (AD-PEC[XX])

Sr.#	Observation	Reply	Remarks
1.	Updated GMP status of finished product manufacturer is required	Updated GMP certificate of Drug product manufacturer is submitted dated 12.11.2021	complied
2.	The active substance specification includes tests for description, identification (IR, Chiral LC), particle size, assay (LC), counterion of citric acid (LC), impurities (LC), residue on ignition (USP), heavy metals (USP),	Manufacturer performed LOD rather than moisture content	Justified Tofacitinib citrate falls under BCS-

	residual solvents (GC), water content, palladium (ICP-OES). https://www.ema.europa.eu/en/documents/assessment-report/xeljanz-epar-public-assessment-report_en.pdf Tests such as Heavy metals, particle size and water content have not been mentioned in CoA of Drug Substance.	However, particle size is critical attribute for poorly soluble drugs while instant drug substance is highly soluble. Heavy metals ae controlled during process validation however it is not included under specification/CoA of drug substance.	class III (highly soluble and low permeability) However, firm is required to submit performance of **Heavy metals, particle size and water content tests** of drug substance.
3.	Water content test has not been performed in finished product specifications as well as stability testing (as mentioned in public assessment report of innovator product published on EMA website)	Water content test is not included in finished product specification in assessment report of innovator product published on USFDA website We have reviewed innovator assessment report on USFDA website rather than EMA.	Justified
4.	Batch no of innovator product and test product has not been mentioned under CDP	Reference product: Xeljanz 10mg Tablet by M/s Pfizer Batch No:CR4619 Test product: Tofacitinib citrate Batch No: TF-120220	Complied
5.	CoA at each time interval is required in stability data	Stability protocol and specifications of stability batches are provided.	Not complied CoA at Each time interval is not provided Later on firm submitted CoA at each time

			interval of all 3 batches.
6.	COA of primary / secondary reference standard including source and lot number to be provided	Provided	Complied
7.	Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards	Provided	Complied

Decision: Approved with innovator's specifications. The firm shall submit, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submisison of following:

- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021**
- **COA for Drug substance analysis from the drug substance manufacturer including the tests of heavy metals, particle size and water content.**

Priority consideration on account of Export Facilitation:

In pursuance of decision of 133rd meeting of the Authority held on 13th April 2022, wherein it was decided that for each 100,000 USD worth of export of medicine during a fiscal year, one molecule will be considered on priority subject to fulfilment of all prescribed requirements

Following registration application of firms may be considered on priority in light of Export Facilitation Policy as communicated vide letter No.F.1-6/2019-PR-I (EFD) dated 29.12.2022:

597.	Name, address of Applicant / Marketing Authorization Holder	M/s. Surge Laboratories (Pvt.) Ltd., 10th Km, Faisalabad road, Bikhi, District Sheikhupura - Pakistan
	Name, address of Manufacturing site.	M/s. Surge Laboratories (Pvt.) Ltd., 10th Km, Faisalabad road, Bikhi, District Sheikhupura - Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22062 dated 03 / 08 / 2022
	Details of fee submitted	PKR 30,000/-: dated 24/06/2022
	The proposed proprietary name / brand name	Carbifer Injection 500mg/10ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 10ml contains: Iron as ferric carboxymaltose ……..500mg

	Pharmaceutical form of applied drug	I.V Injection
	Pharmacotherapeutic Group of (API)	Iron trivalent, parental preparation
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ferinject Injection 10ml (Ferric Carboxymaltose) is registered and being marketed by Vifor Pharma UK limited. France (Approved by EMA).
	For generic drugs (me-too status)	FCM Injection 500mg/10ml by M/s. Genix Pharma (Pvt.) Ltd., Reg. No. 108583
	GMP status of the Finished product manufacturer	GMP Certificate granted on 05/04/2022 based on inspection dated 05.10.2021 (valid for two years) Renewal of DML granted on 11.01.2022 wherein following sections are mentioned: Liquid Injection (Including Blow Fill Seal Area) (General) Dry Powder Injection & Sterile Dry Powder Injectable section.
	Name and address of API manufacturer.	M/s. Chongqing Carelife Pharmaceutical Co., Ltd. Address: No. 2, the Third Branch Road, Huanan Road, Yan jia, Changshou District, Chongqing 401221, People's Republic of China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Specifications of Ferric Carboxymaltose is not present in any official monograph. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (FCM-202103001V, FCM-202103002V, FCM-202103003V)
	Module-III (Drug Product):	The firm has submitted detail of manufacturing, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Innovator Product that is Ferinject Injection

		by Vifor Pharma, UK Batch No. 0091122EA by performing quality tests (Description, Identification, Assay, Ph, Bacterial Endotoxins & Sterility Test) against Test product Batch No. FCM-10-003		
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy/recovery, specificity, precision.

Remarks of Assessor AD-PECXX:				

Sr.#	Observation	Reply	Remarks
1.	% Potency as mentioned in CoA of Drug Substance from DS manufacturer is 28.4%, % Potency as mentioned in CoA of Drug Substance from Drug Product manufacturer is 25.41% while quantity of Drug substance calculated under Batch formula and composition in accordance to 24.08%. Justify it	The Percentage potency of Iron in Ferric Carboxymaltose in the Manufacturer's COA of Drug Substance is 28.4% as mentioned. After testing this API here at Surge Laboratories, the Percentage potency of Iron obtained is 25.41% on anhydrous basis or 24.08% on as is basis. Normally the potency of API used for trials or manufacturing is "On as is basis" so the Potency of 24.08% (which is on as is basis has been used) not anhydrous basis of the substance.	Justified
2.	Proposed container closure system (Glass ampoule USP Type 1) suitability testing/Quality testing (as per pharmacopeia) to be submitted	CoA of Packaging material is submitted comprising specifications regarding physical dimensions only.	Not complied. Quality testing of (Glass ampoule USP Type 1) to be submitted as per USP General-chapter-660-glass-containers. Either performed by supplier or Finished product manufacturer.
3.	Data of stability batches supported by attested respective documents like, Raw data sheets, COA, summary data sheets etc to be submitted at 6th month and onward.	6th month Data of stability batches supported by attested respective documents like Raw data sheets, COA, summary data sheet was already submitted on 05.10.2022	Complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Assessor (AD-PECXX):

Sr.#	Observation	Reply	Remarks
1.	Submit valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of License retention certificate issued by DCA Telangana dated 29.05.2020 valid till 02/06/2025 submitted.	Complied
2.	Evidence for section approval of FPP manufacturer (by CLB) to be submitted.	Approval of "Dry powder suspension (General)" dated 26.01.2022 is provided, approved in 226th meeting of CLB	Complied
3.	Batch no of innovator product and test product has not been mentioned under	Batch no of innovator product and test product are provided as follows: Reference product:	Complied

		Barizold Dry Suspension 100mg/5ml by Barret Hodgson Pharma Batch No C5021 Test product: Zolincid Dry Suspension 100mg/5ml Batch No: 21KT08	
4.	Compatibility of the Drug Substance(s) with excipients (Avicel and Aerosil) to be provided, being different from innovator's formulation.	Avicel is also known as Microcrystalline cellulose and Aerosil is also called colloidal anhydrous silica both ingredients are used in innovator's formulation	Justified
5.	Specify type of glass bottle and provide suitability testing/quality testing (as per pharmacopeia) of container closure system	USP type III bottle, specifications including hydrolytic resistance test are provided.	Complied.
6.	Provide details regarding volume of diluent to be used for reconstitution to achieve label claim 100mg/5ml along with weight/ml calculation with reference to innovator's product	The volume of diluent to be used is 50ml for reconstitution of 18g powder filled in bottle	Complied.
7.	Sampling interval as mentioned in US FDA Dissolution database is 10,20,30 and 45 while dissolution time mentioned by finished product manufacturer is 30 min, moreover sampling interval to be clarified.	Dissolution parameters (apparatus, rpm, medium etc) are selected as per innovator product (USFDA approved) However, dissolution time of 30min are adopted from USFDA guidance document for immediate release dosage form. Aforementioned sampling interval are used for	Justified

		comparison of dissolution profile however for routine dissolution testing single time point is used.	
8.	In use stability data (reconstituted form) to be provided as per guidance document by EMA.(https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products_en.pdf)	In use stability data (reconstituted form) provided with frequency of 0, 1st week, 2nd week, 3rd week and 4th week. Batch No 21KT08 21KT09 21KT10	Complied
9.	Documents for the procurement of API with approval from DRAP is required. Only commercial invoices are provided under this section.	Clearance certificate No 2547 from DRAP office is provided Dated 16.07.2021	Complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing

		process and controls, impurities, specifications, analytical procedure (including dissolution testing phosphate buffer 6.8) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.		
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against comparator product that is Barizold Tablets 600mg Barret Hodgson Pharma (Batch No C7229) by performing quality tests (Identification, Assay, Dissolution, DT and Uniformity of dosage form) against Test product (Batch No 21KT05) CDP has been performed against the same brand that is Barizold Tablet 600mg by Barret Hodgson Pharma in acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.		
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.		
STABILITY STUDY DATA				
Manufacturer of API		M/s Optrix Laboratories Private Limited SURVEY NO. 145/A, 145/AA & 147 Ramalingampally (V) Bommalaramaram (M) Yadadri-Bhuvangiri (D), Telangana 508126, India.		
API Lot No.		OT-LIU/05//21/005		
Description of Pack (Container closure system)		Alu-Alu blister packed in unit carton (2×6's)		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch Size		1200 tab	1200 tab	1200 tab
Manufacturing Date		10-2021	10-2021	10-2021
Date of Initiation		08-10-2021	08-10-2021	08-10-2021
No. of Batches		03		
Administrative Portion				
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 45207/TS/2020 issued by DCA Telangana dated 14.09.2020 valid till 14/09/2021 submitted.		

	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of ADC approved invoice No. 2122OT074/EXP, dated 17-06-2021 for 3.0Kg linezolid imported from Optrix laboratories, Clearance from DRAP office is not provided
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Stability studies data, supported with Chromatograms and raw data sheets for three batches i.e. 21KT05, 21KT06, 21KT07 submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
S	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (AD-PECXX):

Sr.#	Observation	Reply	Remarks
1.	Dissolution parameters as per FDA guidance document for dissolution 2018 are as follows: **B. Paddle Method (USP apparatus 2)** • Stirring rate = 50 RPM • 500 mL of 0.1N HCl in aqueous medium • No surfactant in medium • 37±0.5°C While firm adopted dissolution parameters as follows, clarify it. RPM= 50 Medium= Phosphate buffer Ph 6.8 Volume= 900ml Time=30min	USP pending monograph was adopted (will be official from May,2023) Wherein dissolution parameters are mentioned as: RPM= 50 Medium= Phosphate buffer Ph 6.8 Volume= 900ml Time=30min	Justified
2.	Submit valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of License retention certificate issued by DCA Telangana dated 29.05.2020 valid till 02/06/2025 submitted.	Complied
3.	Evidence for section approval of FPP manufacturer (by CLB) to be submitted.	Approval of "Dry powder suspension (General)" dated 26.01.2022 is provided, approved in 226th meeting of CLB	Available

4.	Compatibility of the Drug Substance(s) with excipients (Avicel and Primojel) to be provided, being different from innovator's formulation.	Avicel is also known as Microcrystalline cellulose and Primojel is also called sodium starch glycolate, both ingredients are used in innovator's formulation	Justified
5.	Documents for the procurement of API with approval from DRAP is required. Only commercial invoices are provided under this section.	Clearance certificate No 2547 from DRAP office is provided Dated 16.07.2021	Complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

API Lot No.	Empagliflozin: EPG20211101 Linagliptin: 21102401 Metformin HCl: MEF/11030675		
Description of Pack (Container closure system)	Alu-Alu blister 10's, 14's, 20's & 28's tablets packed in unit carton.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3,6 (Months) Real Time: 0, 3,6 (Months)		
Batch No.	534DS01	534DS02	534DS03
Batch Size	5000 tablets	5000 tablets	5000 tablets
Manufacturing Date	02-2022	02-2022	02-2022
Date of Initiation	11-03-2022	11-03-2022	11-03-2022
No. of Batches	03		
Administrative Portion			
	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided	
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Empagliflozin: Copy of License issued by Zhejiang Food and Drug Administration, China valid till 31/01/2024. License No. Zhe20090508 dated 14.01.2019 Copy of GMP issued by China Food and Drug Administration No ZJ20180032 dated 15.03.2018 valid till 14.03.2023 Linagliptin: Copy of License issued by Anhui Provincial Drug Administration, China valid till 31/12/2025. License No. 20190399 dated 01.01.2021 Metformin HCl: Copy of GMP certificate No 20031933 issued by Food & Drugs Control Administration, Gujarat State, India dated 20.03.2020 valid till 19/03/2023.	
	Documents for the procurement of API with approval from DRAP (in case of import).	Empagliflozin: Copy of invoice no. HHSC-211025-1 dated 08th Dec, 2021 duly attested by Assistant Director, DRAP, Karachi on 17-12-2021 was provided. Batch No EPG20211101	

		Quantity 30Kg Linagliptin: Copy of invoice no. WD202105073 dated 29-10-2021 duly attested by Assistant Director, DRAP, Karachi on 12-11-2021 was provided. Batch No 21102401 Quantity 1Kg Metformin HCl: Copy of invoice no. EXP/844/21-22 dated 11-06-2021 duly attested by Assistant Director, DRAP, Karachi on 16-07-2021 was provided. Batch No MEF/11030675 Quantity 2000 Kg
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (AD-PECXX):

Sr.#	Observation	Reply	Remarks
1.	The specification of Empagliflozin includes tests for appearance, identity (IR, HPLC), impurities (HPLC), diastereomer (chiral HPLC), assay (HPLC), residual solvents (GC), water content (KF), residue on ignition (Ph. Eur.), and particle size (laser diffraction) https://www.ema.europa.eu/en/documents/assessment-report/synjardy-epar-public-assessment-report_en.pdf Particle size (laser diffraction) has not been performed in analysis of Drug Substances. Mainly Empagliflozin and Linagliptin both Drug Substances of specific particle size (d 90) has been used in innovator product. file:///D:/PEC%20Working/212614Orig1s000ChemR.pdf	Both Empagliflozin and Linagliptin are highly soluble Drug Substances hence particle size is neither critical quality attribute nor affect bioavailability However firm has submitted result of particle size distribution study of both Drug substances performed on 25.02.2022 wherein particle size of Empagliflozin is 6.22µm (d 90) and	Justified Empagliflozin and Linagliptin belongs to BCS Class III i.e highly soluble

		Linagliptin is 12.1 µm (d 90)	
2.	Water content test has not been performed in analysis of finished product as mentioned in finished product specification of innovator product. file:///D:/PEC%20Working/212614Orig1s000ChemR.pdf	Firm has submitted results of water content test as performed on 04.01.2023 as follows: 5/2.5/1000 =1.07% 10/5/1000 =1.29% 12.5/2.5/1000 =1.37% 25/5/1000 =1.57%	Complied

Metformin (extended release) core is surrounded by seal coat, followed by coating of Empagliflozin and Linagliptin containing solution over seal coat, which is further surrounded by film coating.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Remarks of Assessor (AD-PECXX):

USFDA approved Box warning for Metformin HCl is as follows:

WARNING: LACTIC ACIDOSIS

Postmarketing cases of metformin-associated lactic acidosis have resulted in death, hypothermia, hypotension, and resistant bradyarrhythmias. The onset of metformin-associated lactic acidosis is often subtle, accompanied only by nonspecific symptoms such as malaise, myalgias, respiratory distress, somnolence, and abdominal pain. Metformin-associated lactic acidosis was characterized by elevated blood lactate levels (>5 mmol/Liter), anion gap acidosis (without evidence of ketonuria or ketonemia), an increased lactate/pyruvate ratio; and metformin plasma levels generally >5 mcg/mL *[see WARNINGS AND PRECAUTIONS (5.1)]*.

Risk factors for metformin-associated lactic acidosis include renal impairment, concomitant use of certain drugs (e.g., carbonic anhydrase inhibitors such as topiramate), age 65 years old or greater, having a radiological study with contrast, surgery and other procedures, hypoxic states (e.g., acute congestive heart failure), excessive alcohol intake, and hepatic impairment.

Steps to reduce the risk of and manage metformin-associated lactic acidosis in these high risk groups are provided in the full prescribing information *[see DOSAGE AND ADMINISTRATION (2.3), CONTRAINDICATIONS (4), WARNINGS AND PRECAUTIONS (5.1), DRUG INTERACTIONS (7), and USE IN SPECIFIC POPULATIONS (8.6, 8.7)]*.

If metformin-associated lactic acidosis is suspected, immediately discontinue TRIJARDY XR and institute general supportive measures in a hospital setting. Prompt hemodialysis is recommended *[see WARNINGS AND PRECAUTIONS (5.1)]*.

	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (AD-PECXX):

USFDA approved Box warning for Metformin HCl is as follows:

WARNING: LACTIC ACIDOSIS

Postmarketing cases of metformin-associated lactic acidosis have resulted in death, hypothermia, hypotension, and resistant bradyarrhythmias. The onset of metformin-associated lactic acidosis is often subtle, accompanied only by nonspecific symptoms such as malaise, myalgias, respiratory distress, somnolence, and abdominal pain. Metformin-associated lactic acidosis was characterized by elevated blood lactate levels (>5 mmol/Liter), anion gap acidosis (without evidence of ketonuria or ketonemia), an increased lactate/pyruvate ratio; and metformin plasma levels generally >5 mcg/mL *[see WARNINGS AND PRECAUTIONS (5.1)]*.

Risk factors for metformin-associated lactic acidosis include renal impairment, concomitant use of certain drugs (e.g., carbonic anhydrase inhibitors such as topiramate), age 65 years old or greater, having a radiological study with contrast, surgery and other procedures, hypoxic states (e.g., acute congestive heart failure), excessive alcohol intake, and hepatic impairment.

Steps to reduce the risk of and manage metformin-associated lactic acidosis in these high risk groups are provided in the full prescribing information *[see DOSAGE AND ADMINISTRATION (2.3), CONTRAINDICATIONS (4), WARNINGS AND PRECAUTIONS (5.1), DRUG INTERACTIONS (7), and USE IN SPECIFIC POPULATIONS (8.6, 8.7)]*.

If metformin-associated lactic acidosis is suspected, immediately discontinue TRIJARDY XR and institute general supportive measures in a hospital setting. Prompt hemodialysis is recommended *[see WARNINGS AND PRECAUTIONS (5.1)]*.

CLOSE

Sr.#	Observation	Reply	Remarks
1.	The specification of Empagliflozin includes tests for appearance, identity (IR, HPLC), impurities (HPLC), diastereomer (chiral HPLC), assay (HPLC), residual solvents (GC), water content (KF), residue on ignition (Ph. Eur.), and particle size (laser diffraction) https://www.ema.europa.eu/en/documents/assessment-report/synjardy-epar-public-assessment-report_en.pdf Particle size (laser diffraction) has not been performed in analysis of Drug Substances. Mainly Empagliflozin and Linagliptin both Drug Substances of specific particle size (d 90) has been used in innovator product. file:///D:/PEC%20Working/212614Orig1s000ChemR.pdf	Both Empagliflozin and Linagliptin are highly soluble Drug Substances hence particle size is neither critical quality attribute nor affect bioavailability However firm has submitted result of particle size distribution study of both Drug substances performed on 25.02.2022 wherein particle size of Empagliflozin is 6.22µm (d 90) and Linagliptin is 12.1 µm (d 90)	Justified Empagliflozin and Linagliptin belongs to BCS Class III i.e highly soluble
2.	Water content test has not been performed in analysis of finished product as mentioned in finished product specification of innovator product. file:///D:/PEC%20Working/212614Orig1s000ChemR.pdf	Firm has submitted results of water content test as performed on 04.01.2023 as follows: 5/2.5/1000 =1.07% 10/5/1000 =1.29% 12.5/2.5/1000 =1.37% 25/5/1000 =1.57%	Complied

Metformin (extended release) core is surrounded by seal coat, followed by coating of Empagliflozin and Linagliptin containing solution over seal coat, which is further surrounded by film coating.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	TRIJARDY XR Tablet 25mg/5mg/1000mg (Empagliflozin 25mg + Linagliptin 5mg + Metformin 1000mg) is being marketed by Boehringer Ingelheim Pharmaceuticals, Inc. and Eli Lilly and Company. (US FDA Approved)
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	GMP Certificate granted on 28/05/2022. Section approval letter issued dated 27.04.2022 Tablet (General) section is approved.
	Name and address of API manufacturer.	Empagliflozin: Zhejiang Hongyuan Pharmaceuticals Co., Ltd. Chem & API's Industrial Zone, Linhai, Zhejiang Province, China. Linagliptin: Anhui Haikang Pharmaceutical Co., Ltd.

		21 Huancheng West Road, Anqing Anhui Province 246000, China. Metformin Hydrochloride: Aarti Drugs Limited. Plot No. 211 – 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification / validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Empagliflozin: Official Monograph of Empagliflozin is not available. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for related substances (Impurity A, Impurity C, Any single unknown impurity, Total impurities, Heavy metal, Chiral purity R-isomer), Residual solvents, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Linagliptin: Official Monograph of Linagliptin is not available. The firm as submitted details of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for related substances (Single Impurity, Total impurity), residual solvents, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Metformin: USP Monograph was adopted for Metformin HCl. The firm as submitted details of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for related substances (Metformin Related compound, Any Other Impurity, Total Impurity), residual solvents, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability studies	Empagliflozin: Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (Z1215-170601, Z1215-170602, Z1215-170603) Linagliptin: Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (20150901, 20150902, 20150903) Metformin HCl: Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (MEF/1410027, MEF/1410028, MEF/1410029)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is TRIJARDY XR Tablet 25mg/5mg/1000mg (Empagliflozin 25mg + Linagliptin 5mg + Metformin 1000mg) is being marketed by Boehringer Ingelheim Pharmaceuticals, Inc. and Eli Lilly and Company (Germany), by performing quality tests (Description, Identification, Dissolution and Assay). CDP has been performed against the same brand that is TRIJARDY XR Tablet 25mg/5mg/1000mg (Empagliflozin 25mg + Linagliptin 5mg + Metformin 1000mg) (Batch No. 3204436) by Boehringer Ingelheim Pharmaceuticals, Inc. and Eli Lilly and Company (Germany), in Acid media (0.1N) (pH 1.2), Acetate Buffer (4.5) & Phosphate Buffer (6.8) against Test product (Batch No 537DS01). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product for Tapendol (Tapentadol) Tablets 75mg & 100mg on 11th March, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019. The case was approved and the inspection report confirms following points: The HPLC software is 21CFR Compliant as per record available with the firm. Audit trail on the testing reports is available. Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software. Related manufacturing area, equipment, personnel and utilities are GMP compliant.	

2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Diclofenac sodium MR pellets 35%: Firm has submitted COA of Diclofenac sodium MR pellets 35% (Batch No. RD0149-017) from M/s ALPHAMED FORMULATIONS PRIVATE LIMITED. COA (Batch No. RD0149-017)) from M/s The Searle Company Limited is also submitted. Omeprazole Delayed release pellets 20%w/w: Firm has submitted COA of Omeprazole Delayed release pellets 20%w/w (Batch No. 8000201-010.) from M/s ALPHAMED FORMULATIONS PRIVATE LIMITED. COA (Batch No. 8000201-010.)) from M/s The Searle Company Limited is also submitted
3.	Method used for analysis of API from both API Manufacturer & Finished Product manufacturer	Submitted
4.	Stability study data of API from API manufacturer	Diclofenac sodium MR pellets 35%: The firm has submitted copy of accelerated, 06 Months (40°C ± 2°C & 75±5%RH) & long term, 36 Months (30°C ± 2°C & 65±5%RH) stability study reports of 03 batches Omeprazole Delayed release pellets 20%w/w: The firm has submitted copy of accelerated, 06 Months (40°C ± 2°C & 75±5%RH) & long term, 36 Months (30°C ± 2°C & 65±5%RH) stability study reports of 03 batches
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. L.Dis.No:93420/TS/2022 by M/s ALPHAMED FORMULATIONS PRIVATE LIMITED issued by Drugs Control Administration Government of Telangana. The certificate is valid till 15-08-2023. ..
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Diclofenac sodium pellets 35%: Firm has submitted import License dated 02-12-2019 confirming import of 5Kg Diclofenac sodium MR pellets 35% w/w from M/s ALPHAMED FORMULATIONS PRIVATE LIMITED for Batch # RD0149-017. Omeprazole Delayed release pellets 20%w/w Firm has submitted import License dated 02-12-2019 confirming import of 1.8Kg Omeprazole Delayed release pellets 20%w/w from M/s ALPHAMED FORMULATIONS PRIVATE LIMITED for Batch # 8000201-010.
7.	Protocols followed for conduction of stability study	Submitted
8.	Method used for analysis of FPP	Submitted
9.	Drug-excipients compatibility studies (where applicable)	Since there is only encapsulation of pellets carried out at FPP mfg site, no additional excipients are required hence compatibility studies are not performed.

<table>
<tr><td>10.</td><td>Complete batch manufacturing record of three stability batches.</td><td>The firm has manufactured three stability batches of Anzo D MR Capsule and has submitted copy of complete batch manufacturing. Details are as under:
<table>
<tr><td colspan="3">Anzo D MR Capsule (75mg+20mg)</td></tr>
<tr><td>Batch No.</td><td>Bach size</td><td>Mfg. Date</td></tr>
<tr><td>20PD-271</td><td>2500 capsules</td><td>October 2020</td></tr>
<tr><td>20PD-272</td><td>2500 capsules</td><td>October 2020</td></tr>
<tr><td>20PD-273</td><td>2500 capsules</td><td>October 2020</td></tr>
</table></td></tr>
<tr><td>11.</td><td>Record of comparative dissolution data (where applicable)</td><td>Firm has submitted Comparative dissolution study of their product against Aristo 75/20 capsule :
<table>
<tr><td>Feature</td><td>Reference product</td><td>Product of M/s The Searle Company</td></tr>
<tr><td>Brand name</td><td>Aristo capsule 75mg + 20mg</td><td>Anzo D MR capsule</td></tr>
<tr><td>Batch No.</td><td>1394180100</td><td>20PD-271</td></tr>
</table>
Comparative dissolution studies have been performed in following mediums:

1. pH 1.2 HCl buffer (omeprazole)
2. pH 4.5 Acetate buffer (diclofenac sodium)
3. pH 6.8 Phosphate buffer (both API)
4. purified water (diclofenac sodium)

on the basis of similarity factor (f2) result i.e NLT 50 of dissolution profile of both API in test product and reference product, both products are similar.</td></tr>
<tr><td>12.</td><td>Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td><td>Submitted</td></tr>
<tr><td>13.</td><td>Compliance Record of HPLC software 21CFR & audit trail reports on product testing.</td><td>Submitted</td></tr>
<tr><td>14.</td><td>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)</td><td>Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers.</td></tr>
<tr><td colspan="3">Remarks of Evaluator:</td></tr>
<tr><td colspan="3">Permission/approval for manufacturing omeprazole delayed release pellets from relevant DCA.
Analytical Method Validation studies to be submitted by the firm.
Justify selection of Aristo 75/20 capsule for conducting comparative dissolution profile. Give details of aforementioned brand i.e manufacturer, approval status etc
Whether omeprazole pellets are tested in acetate medium or not, its not clear in profile. Clarify the results/release profile of each API tested in different mediums and conclude results accordingly, in CDP report
Innovator (EMA approved) product is Each modified release capsule contains 75 mg diclofenac sodium (25 mg as gastro resistant pellets and 50 mg as prolonged release pellets) and 20 mg of omeprazole (gastro-resistant pellets) however MR pellets of diclofenac sodium used by the firm has to be clarified in this regard.
Method of analytical testing to be submitted from pellets manufacturer.
Drug excipient computability (carried out by pellets manufacturer) to be submitted.</td></tr>
</table>

Justification to be provided for selection of acceptance criteria of dissolution (Q value, dissolution time, sampling time and medium etc)

Firm has submitted reply against above mentioned shortcomings (dated 08.11.2022) which is found unsatisfactory.

Decision: Registration Board deferred the application for above mentioned shortcomings.

Sr.#	Observation	Reply	Remarks
	Permission/approval for manufacturing omeprazole delayed release pellets from relevant DCA.	Firm has submitted copy of GMP certificate No. L.Dis.No. 4073/stores/2020 to M/s ALPHAMED FORMULATIONS PRIVATE LIMITED dated 20.11.2020 issued by Drugs Control Administration Government of Telangana. The certificate is valid till 20-11-2023.	Complied
	Analytical Method Validation studies to be submitted by the firm.	submitted	Complied
	Justify selection of Aristo 75/20 capsule for conducting comparative dissolution profile. Give details of aforementioned brand i.e manufacturer, approval status etc	Aristo 75/20 capsule is enlisted in Nationally Authorized Medicinal Product by EMA , member state where product is authorized is Germany (DE).	Complied
	Whether omeprazole pellets are tested in acetate medium or not, its not clear in profile. Clarify the results/release profile of each API tested in different mediums and conclude results accordingly, in CDP report	We have performed CDP in guidance of WHO technical report series No 992, 2015 as follows: "for delayed-release product dissolution test in acid medium (pH 1.2) for 2 hours followed by dissolution in pH 6.8. Regarding CDP of MR diclofenac sodium pellets, firm clarified that due to enteric coated and prolonged release nature of pellets there is no significant release in Ph 1.2 therefore they used purified water instead fas per WHO technical report series No 992, 2015 as under: "Water may be considered as an additional medium, especially when the API is unstable in the buffered media to the extent that the data are unusable."	Complied

	Innovator (EMA approved) product is Each modified release capsule contains 75 mg diclofenac sodium (25 mg as gastro resistant pellets and 50 mg as prolonged release pellets) and 20 mg of omeprazole (gastro-resistant pellets) however MR pellets of diclofenac sodium used by the firm has to be clarified in this regard.	MR pellets of diclofenac sodium used by the firm are same as innovator product i.e: Each modified release capsule contains 75 mg diclofenac sodium (25 mg as gastro resistant pellets and 50 mg as prolonged release pellets)	Complied
	Method of analytical testing to be submitted from pellets manufacturer.	Submitted	Complied
	Drug excipient computability (carried out by pellets manufacturer) to be submitted.	Drug excipient computability studies submitted for both pellets (Diclofenac sodium and omeprazole) from pellets manufacturer	Complied
	Justification to be provided for selection of acceptance criteria of dissolution (Q value, dissolution time, sampling time and medium etc)	As described below	Complied

Reply:

This is in reference to query regarding "Justification to be provided for selection of acceptance criteria of dissolution (Q value, dissolution time, Sampling time and medium etc.,".

As the product is not available in any pharmacopoeia that is why We, The Searle Company Limited combine the both monographs available for different pellets i.e. Diclofenac delayed released pellets and Diclofenac Extended released pellets and design a criteria to make assure that the dissolution criteria should be able to quantify the release of delayed released pellets along with the prolong released pellets simultaneously. For further elaboration please find below the details in the table;

Time	Delayed Released Pellets (i.e., 25mg)	Extended Released Pellets (i.e., 50mg)	Total (Delayed Released Pellets + Extended Released Pellets) (i.e., 75mg)	Proposed Limit
1 Hr	75% (Q) of 25mg = 18.75mg	Minimum 10% of 50mg = 5mg	23.75 mg of 75mg = 31.6%	NLT 25%
5 Hr	75% (Q) of 25mg = 18.75mg	55% of 50mg = 27.5mg	46.25mg of 75mg = 61%	60%±10% i.e.(50 – 70)%

Time	Delayed Released Pellets (i.e., 25mg)	Extended Released Pellets (i.e., 50mg)	Total (Delayed Released Pellets + Extended Released Pellets) (i.e., 75mg)	Proposed Limit
10 Hr	75% (Q) of 25mg = 18.75mg	75% of 50mg = 37.5mg	56.25mg of 75mg = 75%	75%±10% (65 – 85)%
16 Hr	75% (Q) of 25mg = 18.75mg	85% of 50mg = 42.5mg	61.25mg of 75mg = 81%	NLT 75%
24 Hr	75% (Q) of 25mg = 18.75mg	-	-	NLT 80%

Decision: Deferred for following:

- **Review of applied formulation against the innovator product for clarification regarding the Diclofenac sodium pellets, whether both modified and delayed release pellets were used or only modified release pellets.**
- **Justification for the applied pharmacological group.**

Deferred case of 322nd meeting:

Administrative Portion

	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Summary data sheet to be provided
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Evaluator

Sr.#	Observation	Reply
	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided (for both Esomeprazole and Naproxen)	Firm has submitted copy of GMP certificate of Metrochem API Private Ltd. India No L.Dis.No 4084/A3/2019 dated 20.05.2020 Valid till three years GMP certificate of Divis laboratories Limited India No L.Dis.No 816/DCA/AP/2018 dated 24.07.2018

		Valid till three years
2.	Characterization, Elucidation of Structure and other Characteristics of Naproxen to be provided.	As naproxen is officially recognized and available in USP hence this section is not required. Drug substance (APIs) that are described in an officially recognized pharmacopoeia it is generally sufficient to provide copies of the IR spectrum. Same to be provided by the firm.
3.	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Not complied Firm has submitted analytical procedure of testing finished product rather than drug substance moreover only brief assay methods for both drug substances are submitted from DS manufacturer.
4.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non compendial drug substance(s) to be provided	complied
5.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	Not complied Later on firm has submitted CoA of relevant batch by Drug Product manufacturer and Drug Substance manufacturer, also documents regarding procurement of relevant batch of Drug Substances.
6.	COA of primary / secondary reference standard for Naproxen including source and lot number to be provided.	Not complied Later on firm has submitted CoA of primary / secondary reference standard for Naproxen including source and lot number.
7.	For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, justify use of working standard for Esomeprazole magnesium	We have used working standard from Drug substances manufacturer which is qualified against primary standard.
8.	Stability data of Naproxen to be provided.	Firm has submitted stability data of naproxen as follows: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (2-M5L003, 2-M5L004 and 2M5L005)
9.	Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters of developed formulation against reference product	Not complied Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all

		quality parameters while firm has submitted comparison of assay only. Furthermore selection of following mediums in CDP to be justified Esomeprazole: In water, Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8). Naproxen: Phosphate Buffer (pH 6.8).
10.	The dissolution of naproxen was evaluated in two different pH media, pH 1.2 and 6.8 and dissolution of Esomeprazole has been performed at pH medium 7.4. Justify dissolution parameters adopted by firm.	Firm has selected dissolution parameters as per USFDA dissolution method database.
11.	Uniformity of dose and microbial attributes are not provided in finished product specification	Firm has provided Uniformity of dose and microbial attributes for 3 batches EN-01, EN-02 and EN-03.
12.	Provide summary data sheets for all 3 batches. EN-01, EN-02. EN-03	Complied.
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product and Record of Digital data logger for temperature and humidity monitoring of stability chambers to be provided.	We use water HPLC (USA made) with Empower2 software which is not 21CFR compliant. Manual record of temp and humidity control maintained in log book will be presented at the time of inspection.
14.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Wnsodex 60mg and 30mg DDR capsule (dexlansoprazole) on 1st September, 2020. Further, the said panel inspection report was discussed in 297th Drug Registration Board meeting. The case was approved and the inspection report confirms following points: The HPLC software is 21CFR Compliant as per record available with the firm. Audit trail on the testing reports is available. Adequate monitoring and control are available for stability chamber. Related manufacturing area, equipment, personnel and Related manufacturing area, equipment, personnel and utilities are GMP compliant.
Decision of 322nd meeting : Deferred for following observations:		

• Valid GMP certificate of Drug Substance manufacturer i.e M/s Divis laboratories Limited India.
• Details of analytical procedures for the testing of drug substances by both Drug Substance and Drug Product manufacturer including characterization for Naproxen.
• Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters. Furthermore, selection of mediums in CDP studies has be justified

Updated status:

S.No	Observation	Reply	Remarks
	Valid GMP certificate of Drug Substance manufacturer i.e M/s Divis laboratories Limited India.	Firm provided GMP certificate of Divis laboratories Limited India No L.Dis.No HMF07-14051/927/2021/ TECH/DCA Inspection dated 16.02.2021 to 17.02.2021 Valid till three years issued by DCA Andhra Pradesh	Complied
	Details of analytical procedures for the testing of drug substances by both Drug Substance and Drug Product manufacturer including characterization for Naproxen	Detailed analytical procedures for the testing of drug substances by both Drug Substance and Drug Product manufacturer is submitted IR spectrum of Naproxen is provided	Complied
	Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters. Furthermore, selection of mediums in CDP studies has to be justified	Pharmaceutical equivalence has been performed against the same brand that is Glomov 20/375mg tablet Batch No 21G111 by Global Pharmaceutical (Pakistan), quality parameters such as description, DT, Dissolution, assay.	**Selection of following mediums in CDP yet to be justified** **Esomeprazole: In water, Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8).** **Naproxen: Only Phosphate Buffer (pH 6.8).**
As per PAR (Vimovo) more than 80% Esomeprazole is degraded in acidic medium hence there is no need to study dissolution in acidic medium however			

Naproxen being enteric coated it does not release in pH 4.5 and below so mediums used for CDP are: pH 4.5, pH 6.8 and pH 7.4
Decision: Approved. Registration letter will be issued upon submission of CDP studies against the innovator/reference product as per guidelines applicable for applied dosage form. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Sr.#	Observations	Reply
1.	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided (for both Esomeprazole and Naproxen)	Firm has submitted copy of GMP certificate of Metrochem API Private Ltd. India No L.Dis.No 4084/A3/2019 dated 20.05.2020 Valid till three years GMP certificate of Divis laboratories Limited India No L.Dis.No 816/DCA/AP/2018 dated 24.07.2018 Valid till three years
2.	Characterization, Elucidation of Structure and other Characteristics of Naproxen to be provided.	As naproxen is officially recognized and available in USP hence this section is not required. Drug substance (APIs) that are described in an officially recognized pharmacopoeia it is generally sufficient to provide copies of the IR spectrum. Same to be provided by the firm.
3.	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Not complied Firm has submitted analytical procedure of testing finished product rather than drug substance moreover only brief assay methods for both drug substances are submitted from DS manufacturer.
4.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product	complied

	manufacturer for both compendial as well as non compendial drug substance(s) to be provided	
5.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	Not complied Later on firm has submitted CoA of relevant batch by Drug Product manufacturer and Drug Substance manufacturer, also documents regarding procurement of relevant batch of Drug Substances.
6.	COA of primary / secondary reference standard for Naproxen including source and lot number to be provided.	Not complied Later on firm has submitted CoA of primary / secondary reference standard for Naproxen including source and lot number
7.	For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, justify use of working standard for Esomeprazole magnesium	We have used working standard from Drug substances manufacturer which is qualified against primary standard.
8.	Stability data of Naproxen to be provided.	Firm has submitted stability data of naproxen as follows: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (2-M5L003, 2-M5L004 and 2M5L005)
9.	Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters of developed formulation against reference product	Not complied Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters while firm has submitted comparison of assay only.
10.	Similarity factor f2 has not been calculated and result has not been concluded accordingly	Not complied. Later on firm has submitted calculation of f2 (similarity factor). Furthermore, selection of following mediums in CDP to be justified Esomeprazole: In water, Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8). Naproxen: Phosphate Buffer (pH 6.8).
10.	The dissolution of naproxen was evaluated in two different pH media, pH 1.2 and 6.8 and dissolution of Esomeprazole has been performed at pH medium 7.4. Justify dissolution parameters adopted by firm.	Firm has selected dissolution parameters as per USFDA dissolution method database.
11.	Uniformity of dose and microbial attributes are not provided in finished product specification	Firm has provided Uniformity of dose and microbial attributes for 3 batches EN-04, EN-05 and EN-06.

12.	Stability data particularly chromatograms , CoA and raw data sheets (both accelerated and real time) for batch No EN-06 is not provided for each time point	complied.
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product and Record of Digital data logger for temperature and humidity monitoring of stability chambers to be provided.	We use water HPLC (USA made) with Empower2 software which is not 21CFR compliant. Manual record of temp and humidity control maintained in log book will be presented at the time of inspection.
14.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Wnsodex 60mg and 30mg DDR capsule (dexlansoprazole) on 1st September, 2020. Further, the said panel inspection report was discussed in 297th Drug Registration Board meeting. The case was approved and the inspection report confirms following points: The HPLC software is 21CFR Compliant as per record available with the firm. Audit trail on the testing reports is available. Adequate monitoring and control are available for stability chamber. Related manufacturing area, equipment, personnel and utilities are GMP compliant.

Decision of 322nd meeting: Deferred for following observations:
• Valid GMP certificate of Drug Substance manufacturer i.e M/s Divis laboratories Limited India.
• Details of analytical procedures for the testing of drug substances by both Drug Substance and Drug Product manufacturer including characterisation for Naproxen.
• Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters. Furthermore, selection of mediums in CDP shall be justified

S.No	Observation	Reply	Remarks
	Valid GMP certificate of Drug Substance manufacturer i.e M/s Divis laboratories Limited India.	Firm provided GMP certificate of Divis laboratories Limited India No L.Dis.No HMF07-14051/927/2021/ TECH/DCA Inspection dated 16.02.2021 to 17.02.2021 Valid till three years issued by DCA Andhra Pradesh	Complied
	Details of analytical procedures for the testing of drug substances by both Drug Substance and Drug Product manufacturer including characterization for Naproxen	Detailed analytical procedures for the testing of drug substances by both Drug Substance and Drug Product manufacturer is submitted IR spectrum of Naproxen is provided	Complied
	Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters. Furthermore, selection of mediums in CDP studies has to be justified	Pharmaceutical equivalence has been performed against the same brand that is Glomov 20/375mg tablet Batch No Batch No 21G115 by Global Pharmaceutical (Pakistan), quality parameters such as description, DT, Dissolution, assay.	**Selection of following mediums in CDP yet to be justified** **Esomeprazole: In water, Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8).** **Naproxen: Only Phosphate Buffer (pH 6.8**).
As per PAR (Vimovo) more than 80% Esomeprazole is degraded in acidic medium hence there is no need to study dissolution in acidic medium however Naproxen being enteric coated it does not release in pH 4.5 and below so mediums used for CDP are: pH 4.5, pH 6.8 and pH 7.4			

Decision: Approved. Registration letter will be issued upon submission of CDP studies against the innovator/reference product as per guidelines applicable for applied dosage form.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deferred case of 322nd meeting:

	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. EMPOLI (Empagliflozin) 10mg & 25mg Tablets which was presented in 290th meeting of the registration board & hence approved & registered by registration board Date of inspection: 13th June 2019. The inspection report confirms following points • The HPLC software is 21CFR Compliant		

		• Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Sodium alginate: Copy of GMP certificate No. SD20180790 issued to Qingdao Bright moon Seaweed Group Co., Ltd valid till 23/10/2023. Sodium bicarbonate: Copy of GMP certificate No. 1-2-07-17-20-00013 issued to Solvay Peroxythai Limited valid till 25/08/2022 Calcium carbonate: Copy of GMP certificate No. 20051985 issued to Sudeep Pharma Private Limited valid till 17/05/2023
	Documents for the procurement of API with approval from DRAP (in case of import).	Sodium Alginate: Attached copy of commercial invoice (Invoice# BMM20080 dated 27th March 2020, with received quantity i.e. 5000Kgs) for the purchase of Sodium Alginate from Qingdao Bright Moon Seaweed Group Co. Ltd. with attestation of DRAP dated 19th May 2020 Sodium Bicarbonate: Attached copy of commercial invoice (with received quantity i.e. 24Kgs) for the purchase of Sodium Bicarbonate from Solvay Peroxythai Limited with courier slip dated 14th March 2020 Calcium Carbonate: Attached copy of commercial invoice (Invoice# SPPL/EX021/18-19 dated 17th April 2018, with received quantity i.e. 12 Kg for the purchase of Calcium Carbonate from Sundeep Pharma PrivateLimited with attestation of DRAP dated 30th April 2018
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets and summary data sheets. Chromatograms are not applicable since spectroscopic method are used for analysis of drugs.
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Assessor (AD PEC-XX):

Sr.#	Observation	Reply
	Good Manufacturing Practice (GMP) certificate of the Drug Substance / API (sodium	Copy of GMP certificate No. 1-2-07-17-20-00013 issued to Solvay Peroxythai

	bicarbonate) manufacturer with valid period of time.	Limited valid till 25/08/2022 is provided. Firm has submitted notification from Food and Drug Administration, Thailand Wherein it is stated that GMP certificate of manufacturer issued by FDA that expires before 31st Dec,2022 are considered valid till 31st Dec,2022 due to ongoing threat of COVI-19 pandemic.
	Updated GMP status of FPP manufacturer to be submitted.	Firm has submitted GMP certificate dated 03.08.2022 valid till 2 years.
	The information on tablet hardness and disintegration is not provided (as recommended by USFDA guidance document on quality attributes of chewable tablet). Justify it	Firm has submitted specification of hardness and disintegration as follows Disintegration time 35 min Hardness NLT 7Kp and NMT 15Kp While USFDA recommends that hardness for chewable tablets be kept low (<12 kp). A higher hardness value (>12 kp) may be considered if justified.
	Detailed analytical procedures used for testing the drug product should be provided.	Complied
	Documents for the procurement of API with approval from DRAP is required. Only commercial invoices are provided under this section.	Not complied. Firm has submitted commercial invoice (of sodium bicarbonate) only. Batch No/Lot No is not verifiable. Clearance from DRAP is also required for all three drug substances. Furthermore, CoA of relevant batch from DS manufacturer and FPP manufacturer is required for all three drug substances.
	CoA at each time interval is required in stability data.	Complied

Decision 322nd meeting: The Registration Board considered the case deferred the request for following observations:
Specification of hardness i.e NLT 7Kp and NMT 15Kp to be justified. Since USFDA recommends hardness for chewable tablets as <12 kp.
Commercial invoices and DRAP clearance certificate of all drug substances along with CoA of relevant batches (from both Drug Substance and Finished Product manufacturer).
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin

S.No	Observation	Reply	Remarks
1.	Specification of hardness i.e NLT 7Kp and NMT 15Kp to be justified. Since USFDA recommends hardness for chewable tablets as <12 kp.	With reference to above FDA guideline, we comparatively analyze the hardness of SAMI product (Lagita Double Action Tablet) and Reference product (Gaviscon Double Action tablets), after exposure of 1ml with simulated salivary fluid for 30 seconds. Significant reduction observed in the Hardness of both SAMI (Lagita Double	Justified

		Action Tablet) and reference listed drug (Gaviscon Double Action Tablets, from 11.96 Kp to 8.52Kp and 11.6Kp to 8.7Kp respectively. And both products meeting the requirement of FDA guideline and higher value of Hardness (>12 Kp) is justified please see below the data of hardness before and after exposure with simulated salivary fluid for 30 seconds.	
2.	Commercial invoices and DRAP clearance certificate of all drug substances along with CoA of relevant batches (from both Drug Substance and Finished Product manufacturer).	Commercial invoices and DRAP clearance certificate of all drug substances is provided along with CoA of relevant batches: Sodium alginate: H052002087 Sodium bicarbonate: MTP01820 Calcium carbonate: 18C/CP/080 from both Drug Substance and Finished Product manufacturer	Commercial invoice of Sodium bicarbonate batch No MTP01820 (from Solvay Peroxythai Limited) is not DRAP attested. According to firm they are importing **Sodium bicarbonate,** free of cost.
3.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Copy of GMP certificate No. 1-2-07-17-20-00013 issued to Solvay Peroxythai Limited valid till 25/08/2022 is provided. Copy of GMP certificate No. 20051985 issued to Sudeep Pharma Private Limited valid till 17/05/2023 is provided. Copy of GMP certificate No. SD20180790 issued to Qingdao Bright Moon Seaweed Group Co. Ltd valid till 23/10/2023 is provided.	Complied

Remarks of Assessor:

Sr.#	Observation	Reply

	Formulation approved in RRA is mentioned as "oral solution" while dosage form mentioned by the firm in instant application is "syrup" hence dosage form should be standardized on line with RRA along with fee.	Firm has revised dosage form as per RRA (from syrup to oral solution) without fee.
	Stability data (real time) of Drug Substance has been submitted with 25°C ± 2°C / 65% ± 5% RH condition which is not as per WHO zone IV-A. Submit real time stability study data of drug substance as per zone IV-A or else submit the following as per the decision of 290th meeting of Registration Board: Record of data logger for the storage conditions throughout the transportation. Real term stability studies data of the product for at least 1 year along with degradation studies in the finished pharmaceutical product	Firm has submitted stability data of drug substance as per zone IV-A conditions as follows: Batch No: LVU-P/19001 LVU-P/19002 LVU-P/19003 40°C ± 2°C / 75% ± 5% RH for 36 months 30°C ± 2°C / 65% ± 5% RH for 36months
	Proposed container closure system (PET) suitability testing to be submitted as per pharmacopeia. Moreover, description is required regarding suitability of the container closure system for the storage, transportation (shipping) and use of the FPP (e.g. choice of materials, protection from moisture and light, compatibility of the materials with the FPP)	Firm has submitted suitability testing of PET bottle as per USP general monograph <661> Including thermal analysis, heavy metals testing and IR spectroscopic analysis.
	Documents for the procurement of API with approval from DRAP is required. Only commercial invoices are provided under this section.	Not complied Firm has again submitted invoice no. DE/20/104 Dated:31.10.2020 is attached as proof of procurement of API (10Kg) Batch No LVHPC20280 from Metrochem API Pvt. Ltd India. Approval from DRAP is required.
	For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, justify use of working standard for Levocetirizine Dihydrochloride.	Firm has submitted USP reference standard of Levocetirizine Dihydrochloride 200mg (lot No R170Q0) which is used in API testing and for batch release.
	Compatibility of the Drug Substance(s) with excipients is not provided (mainly alpha tocopherol and mannitol) which are not used in reference product.	Firm has submitted compatibility testing of alpha tocopherol and mannitol with drug substance using HPLC method. There was no significant change in % quantity of drug at storage condition 60°C ± 2°C
	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
Decision 322nd meeting: Deferred for following observations:		

• DRAP clearance certificate of drug substance (Levocetirizine Dihydrochloride) along with commercial invoice, CoA (from both Drug Substance/Drug Product manufacturer) of relevant batch no. is required
• Submission of applicable fee that is Rs. 7,500/- for revision of dosage form (from syrup to oral solution) as per notification No.F.7-11/2021-B&A/DRAP dated 13-07- 2021

S. No	Observation	Reply	Remarks
1.	DRAP clearance certificate of drug substance (Levocetirizine Dihydrochloride) along with commercial invoice, CoA (from both Drug Substance/Drug Product manufacturer) of relevant batch no. is required	Firm submitted invoice no. DE/20/104 Dated:31.10.2020 is attached as proof of procurement of API (10Kg) Batch No LVHPC20280 from Metrochem API Pvt. Ltd India.and DRAP clearance dated 26.11.2020 Since applied dosage mentioned on DRAP clearance certificate was Tablet Firm clarified consumption of 10Kg Levocetirizine Dihydrochloride over the years 2021 to 2022. Out of 10Kg imported API, 8.75Kg was consumed for Licide tablet (250,000 tab) and 0.033Kg was consumed for Licide oral solution trial batches (250 bottles) in year 2021, yet 1.22 Kg quantity is left.	Justified
2.	Submission of applicable fee that is Rs. 7,500/- for revision of dosage form (from syrup to oral solution) as per notification No.F.7-11/2021-B&A/DRAP dated 13-07- 2021	Firm will submit fee of Rs 7,500/- before issuance of registration letter	

Firm will submit fee (Rs 7,500/-) for revision of dosage form (from syrup to oral solution) as per notification No.F.7-11/2021-B&A/DRAP dated 13-07- 2021before issuance of registration letter

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product description to oral solution as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deferred case of 322nd meeting:

612.	Name, address of Applicant / Marketing Authorization Holder	M/s WnsFeild Pharmaceutical Industrial Estate Hattar Haripur Kpk Pakistan.

	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22379 dated 05/08/2022
	Details of fee submitted	PKR 75,000/- dated 13/06/2022
	The proposed proprietary name / brand name	Venospa 10/100mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Vonoprazan as Fumarate (outer immediate release layer)……..…10mg Aspirin (as enteric coated inner core) ……..…..100mg
	Pharmaceutical form of applied drug	White to off-white color Aspirin round shape enteric coated tablet surrounded by film coated Vonoprazan tablets.
	Pharmacotherapeutic Group of (API)	Vonoprazan: Potassium-Competitive Acid Blocker Aspirin: Antithrombotic Agents
	Reference to Finished product specifications	Innovator's specification
	Proposed Pack size	3×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cabpirin 10/100mg tablet by M/s Takeda Pharmaceutical (Japan)
	For generic drugs (me-too status)	Not available
	GMP status of the Finished product manufacturer	GMP inspection conducted on 10/12/2020 Tablet (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	Vonoprazan: Guangdong Xianqiang Pharmaceutical Pvt Ltd, No. 6, industrial Avenue, Conghua, Economical Development zone, Guangzhou city, Guangdong province, China Aspirin JQC (HUAYIN) Pharmaceutical Co, Ltd/ Yuquan Road, Huayin city, Shanxi province, P.R of China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and

		justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted
	Module III (Drug Substance)	Vonoprazan and Aspirin: The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, batch analysis and justification of specification, container closure system and stability studies of drug substance
	Stability studies	Vonoprazan: Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: TAK09R150701, TAK09R150702, TAK09R150703 Aspirin: Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: A201104081, A201104082 A201104083
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence not performed. CDP has been performed against Cabpirin 10/100mg tablet by Takeda Pharma (Japan), in Acid media (pH 1.0-1.2) acetate buffer (Ph 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range. Release profile of aspirin has not been compared.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	07-01-2022	07-01-2022	07-01-2022
No. of Batches	03		

Administrative Portion

	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
	Documents for the procurement of API with approval from DRAP (in case of import).	Vonoprazan: Firm has submitted import License No. 00169/2021-DRAP CPS/650 dated 16-02-2021 confirming import of 200g VONOPRAZAN from M/s Guangdong Xianqiang Pharmaceutical Pvt Ltd, China for Batch No. TAK09R210101 Aspirin: Firm has submitted import License No. 00138/2021-DRAP 1PS/650 dated 10-02-2021 confirming import of 2Kg ASPIRIN from M/s JQC (HUAYIN) Pharmaceutical Co, Ltd China for Batch No. A2012041
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Inadequate
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks OF Evaluator:

Sr.#	Observation	Reply (dated 30.10.2022)
	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API	Firm has submitted GMP certificate of M/s Guangdong Xianqiang Pharmaceutical Pvt Ltd, China

<table>
<tr><td></td><td>manufacturer issued by concerned regulatory authority of country of origin to be provided</td><td>(GD20150397) issued by China Food and Drug Administration valid till 06.09.2020

GMP certificate of M/s JQC (HUAYIN) Pharmaceutical Co, Ltd is not submitted</td></tr>
<tr><td></td><td>Detailed analytical procedures for the testing of drug substance Aspirin to be provided by both Drug Substance and Drug Product manufacturer</td><td>Complied</td></tr>
<tr><td></td><td>Provide results of analysis of relevant batch(es) of Drug Substance Aspirin performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture</td><td>Complied</td></tr>
<tr><td></td><td>Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non compendial drug substance(s) to be provided</td><td>Not complied

Analytical method verification studies submitted for vonoprazan fumarate only.</td></tr>
<tr><td></td><td>COA of primary / secondary reference standard for Vonoprazan Fumarate and Aspirin including source and lot number to be provided</td><td>Not complied</td></tr>
<tr><td></td><td>Dissolution medium used in USFDA approved formulation VOQUEZNA for evaluation of release profile of vonoprazan tablet was 0.05M acetate buffer (pH 4.5) with 50rpm while dissolution medium used by the firm is 0.1NHCl and 75 rpm. .Justification to be provided for selection of dissolution medium and rpm for USP type II apparatus.</td><td>To avoid dissolution of enteric coated core of aspirin 0.1NHCl is used to affect only vonoprazan in film coating and further to check the enteric coating. 75rpm is selected as per general guideline of dissolution given in BP 2022 and USP.

Not justified since release profile of aspirin has been monitored separately by using acid stage (0.1N HCl) and buffer stage (phosphate buffer) dissolution.</td></tr>
<tr><td></td><td>Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters of developed formulation against reference product</td><td>Not complied

Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters while firm has submitted comparison of assay only.</td></tr>
<tr><td></td><td>CDP for Aspirin has not been performed. Moreover, batch no of innovator product has not been mentioned in CDP of Vonoprazan</td><td>CDP for Aspirin has been provided as per following details:
<table>
<tr><td>Feature</td><td>Reference product (Takeda pharma)</td><td>Product of M/s Wnsfeild</td></tr>
<tr><td>Brand name</td><td>Cabiprin 10/100mg tablet</td><td>Venospa 10/100mg tablet</td></tr>
<tr><td>Batch No.</td><td>521559</td><td>19PD-219</td></tr>
</table></td></tr>
</table>

		Comparative dissolution studies have been performed in following mediums: 1. pH 4.5 Acetate buffer 2. pH 6.8 Phosphate buffer The values for f1 and f2 are in the acceptable range. CDP has not been assessed in acid medium (Ph 1.2)
	Hardness, LOD and microbial attributes are not provided in finished product specification.	Hardness, LOD and microbial attributes are missed from finished product specification due to typographic error, now the firm has submitted results of aforementioned quality parameters.
	Stability data particularly chromatograms , CoA and raw data sheets (both accelerated and real time) is not provided for each time point (particularly 6th month for all 3 batches)	Complied
	There is a tendency for loss on drying to increase and hardness to decrease under high temperature and high humidity hence LOD and hardness test results to be submitted, performed during stability studies	Not complied
	Compliance Record of HPLC software 21CFR & audit trail reports on product and Record of Digital data logger for temperature and humidity monitoring of stability chambers to be	We use water HPLC (USA made) with Empower2 software which is not 21CFR compliant. Manual record of temp and humidity control maintained in log book will be presented at the time of inspection.
	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Wnsodex 60mg and 30mg DDR capsule (dexlansoprazole) on 1st September, 2020. Further, the said panel inspection report was discussed in 297th Drug Registration Board meeting. The case was approved and the inspection report confirms following points: The HPLC software is 21CFR Compliant as per record available with the firm. Audit trail on the testing reports is available. Adequate monitoring and control are available for stability chamber. Related manufacturing area, equipment, personnel and utilities are GMP compliant.

Decision: Deferred for submission of following:

• Pharmaceutical equivalence studies against the innovator/reference product by comparing the results of all quality parameters.

• Justification for selection of dissolution mediums in CDP studies, since CDP of Aspirin has not been performed in acidic medium of pH 1.2

• Justification for selection of dissolution medium for batch release test since already submitted justification of applying 0.1N HCl dissolution medium is not satisfactory.

• Complete method of analysis for dissolution test.
• Clarification of the formulation of innovator product, whether it is bilayer by way of compression or by way of active coating of Vonoprazan.
• Justification of the variation in chromatographic conditions mentioned in drug product analytical method and those reflected in the submitted HPLC chromatograms.
• Compliance Record of HPLC software 21CFR & audit trail reports on product and Record of Digital data logger for temperature and humidity monitoring of stability chambers.

Updated status:

S.No	Observation	Reply	Remarks
1.	Pharmaceutical equivalence studies against the innovator/reference product by comparing the results of all quality parameters	Pharmaceutical equivalence studies have been submitted as follows: Feature: Reference product (Takeda pharma) / Product of M/s Wnsfeild Brand name: Cabiprin 10/100mg tablet / Venospa 10/100mg tablet by comparing the results of all quality parameters such as description, dissolution. Assay etc	Complied
2.	Justification for selection of dissolution mediums in CDP studies, since CDP of Aspirin has not been performed in acidic medium of pH 1.2	Dissolution of Aspirin enteric coated core is performed in 0.1NHCl (pH 1.2) as routine test because in acid stage the release profile of aspirin is NMT 10%. CDP is performed in other media (acetate buffer pH 4.5 and phosphate buffer pH 6.8)	
3.	Justification for selection of dissolution medium for batch release test since already submitted justification of applying 0.1N HCl dissolution medium is not satisfactory.	Vonoprazan as immediate release dissolution is performed in 0.1N HCl. Dissolution parameters are selected as per USFDA guidance document for immediate release solid dosage form	Justified
4.	Provide complete method of analysis for dissolution test.	Complete method of analysis for dissolution test is provided for both aspirin and Vonoprazan	Complied
5.	Clarification of the formulation of innovator product, whether it is bilayer by way of compression or by way of active coating of Vonoprazan.	Formulation of Innovator product is bilayer by way of active coating of Vonoprazan on enteric coated Aspirin.	Complied
6.	Justification of the variation in chromatographic conditions mentioned in drug product analytical method and those reflected in the submitted HPLC chromatograms.	Analytical method of Drug Product applied throughout the stability is same without any variation which is reflected in chromatogram	Verified
7.	Compliance Record of HPLC software 21CFR &	Provided	Complied

	audit trail reports on product and Record of Digital data logger for temperature and humidity monitoring of stability chambers.		
Firm will submit unit carton of innovator product (Cabpirin 10/100mg tablet by Takeda pharma) against which CDP was performed.			

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

No. of Batches	03		

Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice FXIN2002021A dated 25-02-2020 wherein specifying the import of vancomycin hydrochloride (lyophilized) 30 Kg (batch no HAF 1912013) in the name of M/s Vision pharmaceuticals Islamabad, DRAP clearance certificate and license to import has also been issued in the name of M/s vision pharmaceuticals Islamabad
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has recently installed HPLC software 21CFR, in future stability studies shall be performed using HPLC software 21CFR.

	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr.#	Observation	Reply	Remarks
1.	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	Firm has submitted GMP certificate No FJ200003 dated 22.09.2020 valid till 21.09.2022 issued by China Food and Drug Administration	Not complied Valid GMP certificate to be submitted
2.	Regulatory status of diluent (WFI) in Pakistan is required with details of manufacturer and Registration No.	Gee H20 (5ml) by M/s Gallop Water Sciences.	Not complied Registration No. not provided
3.	CoA from Drug Product manufacturer is not as per USP. The Assay limit as per USP (44) is ≥ 900ug/mg while assay limit mentioned in CoA of Drug product manufacturer is 90-115%. Clarify it	It was a drafting error updated CoA as per USP (44) is submitted.	Complied
4.	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Firm has submitted analytical testing method of Vancomycin HCl by Drug substance manufacturer only	Not complied
5.	In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products en.pdf)	Not applicable as the product is immediately used after reconstitution	Not complied In use stability studies are required despite of the fact that formulation is intended to be used immediately after reconstitution
6.	Documents for the procurement of API (commercial invoice FXIN2002021A dated 25-02-2020, DRAP clearance certificate and license to import) has been issued in the name of M/s vision pharmaceuticals Islamabad. Clarify it.	We are borrowing the material from M/s Vision Pharma. The borrowing undertaking is submitted	Not complied Firm has submitted acknowledgement /loan letter from M/s Global pharma rather than M/s vision pharmaceuticals Islamabad.
7.	Proposed container closure system (Glass vial Type 1) suitability testing to be submitted as per pharmacopeia.	Product is as per innovator so suitability testing of Container closure system is not required	Not complied Quality testing of container closure system is required as per USP to

			assess whether container closure system meets proclaimed criteria i.e USP glass vial type I or not
8.	Details of manufacturer and batch no of comparator product has not been mentioned under pharmaceutical equivalence study. Also justify selection of that particular comparator product	Vancomycin 1g & 500mg By Getz pharma	Not complied Batch no of comparator products are not provided
9.	Compatibility studies of drug product with container closure system is not provided.	As the material is ready to fill hence compatibility studies with container closure has been performed by drug substance manufacturer	Not complied Compatibility of the container closure system with the FPP is required as under 2.3.P.2.4 and 3.2.P.2
10.	Calculation regarding potency adjustment (salt factor and assay result of drug substance) has not been provided in Batch formula/ master formula.	Updated batch formula/master formula wherein calculation regarding potency adjustment (salt factor and assay result of drug substance) is provided	Complied

Decision 323rd meeting: Deferred for submission of following:
Valid GMP certificate of Drug Substance manufacturer i.e Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China.
Registration status/ registration number of diluent i.e Gee H20 (5ml) water for injection by M/s Gallop Water Sciences.
Detailed analytical procedures for the testing of drug substance by Drug Product manufacturer.
In use stability data (reconstituted form) to be provided as per guidance document by EMA.
Acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad.
Suitability testing/Quality testing of Proposed container closure system (Glass vial Type 1) as per pharmacopeia
Batch no of comparator product vancomycin 500mg injection to be provided
Compatibility studies of drug product with container closure system is not provided as required under 2.3.P.2.4 and 3.2.P.2

S.No	Observation	Reply	Remarks
1	Valid GMP certificate of Drug Substance manufacturer i.e Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China	Firm has submitted copy of License No 20160089 dated valid till 21.09.2025 issued by China Food and Drug Administration	Complied
2	Registration status/ registration number of diluent i.e Gee H20 (5ml) water for injection by M/s Gallop Water Sciences.	Firm has submitted registration no. of diluent Gee H20 (5ml) water for injection by M/s Gallop Water Sciences as 076881	The provided registration status of diluent is not verifiable from available record Later on firm provided registration status of diluent as follows: Gee H20 (5ml) water for injection by M/s Gallop Water Sciences as 080476, which was verifiable from database.
3	Detailed analytical procedures for the testing of drug substance by Drug Product manufacturer.	Detailed analytical procedures for the testing of drug substance by Drug Product manufacturer is provided.	Complied
4	In use stability data (reconstituted form) to be provided as per guidance document by EMA.	Not applicable as the product is immediately used after reconstitution, furthermore it is a single dose vial.	Justified
5	Acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad.	Acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad is provided along with documents regarding import of API/DRAP clearance.	Complied
6	Suitability testing/Quality testing of Proposed container closure system (Glass vial Type 1) as per pharmacopeia	Quality testing of proposed container closure system as performed by supplier Shandong pharmaceutical Glass Co Ltd. Is provided	Complied
7.	Batch no of comparator product vancomycin 500mg injection to be provided	Vancomycin 500mg injection: Batch No: 320685XW Abbott pharma	Complied
8.	Compatibility studies of drug product with container closure system is not provided as required under 2.3.P.2.4 and 3.2.P.2	Applied formulation is as per innovator, which is found stable during stability studies hence Compatibility studies are not required	Justified
Firm will submit in use stability data (reconstituted form) before issuance of registration letter.			

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

		specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (HAS1507001, HAS1507002, HAS1507003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	The firm has submitted results of pharmaceutical equivalence for all the quality tests for their product as per specification and comparative study against the comparator product i.e. Vancomycin Dry powder vial 1g by performing quality tests (appearance, volume after reconstitution, identification, Ph after reconstitution, filled volume color, water content, Assay on anhydrous basis, BET, sterility test).
	Analytical method validation/verification of product	Firm has submitted report of validation of analytical method for the drug product including system suitability, specificity, accuracy, repeatability, intermediate precision, linearity, range & robustness.

STABILITY STUDY DATA			
Manufacturer of API	Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China		
API Lot No.	HAF 1912013		
Description of Pack (Container closure system)	Glass vial type I with one 20ml glass ampoule of WFI		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trail-01	Trail-02	Trail-03
Batch Size	1000 packs	1000 packs	1000 packs
Manufacturing Date	03 – 2022	03 – 2022	03 – 2022
Date of Initiation	01-03-2022	01-03-2022	01-03-2022
No. of Batches	03		
Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice FXIN2002021A dated 25-02-2020 wherein specifying the import of vancomycin hydrochloride (lyophilized) 30 Kg (batch no HAF 1912013) in the name of M/s Vision pharmaceuticals Islamabad, DRAP clearance certificate and license to import has also been issued in the name of M/s vision pharmaceuticals Islamabad
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has recently installed HPLC software 21CFR, in future stability studies shall be performed using HPLC software 21CFR.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr.#	Observation	Reply	Remarks
1.	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	Firm has submitted GMP certificate No FJ200003 dated 22.09.2020 valid till 21.09.2022 issued by China Food and Drug Administration	Not complied Valid GMP certificate to be submitted
2.	Regulatory status of diluent (WFI) in Pakistan is required with details of manufacturer and Registration No.	Gee H20 (5ml) by M/s Gallop Water Sciences.	Not complied Registration No. not provided
3.	CoA from Drug Product manufacturer is not as per USP. The Assay limit as per USP (44) is ≥ 900ug/mg while assay limit mentioned in CoA of Drug product manufacturer is 90-115%. Clarify it	It was a drafting error updated CoA as per USP (44) is submitted.	Complied
4.	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Firm has submitted analytical testing method of Vancomycin HCl by Drug substance manufacturer only	Not complied

5.	In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products en.pdf)	Not applicable as the product is immediately used after reconstitution	Not complied In use stability studies are required despite of the fact that formulation is intended to be used immediately after reconstitution
6	Documents for the procurement of API (commercial invoice FXIN2002021A dated 25-02-2020, DRAP clearance certificate and license to import) has been issued in the name of M/s vision pharmaceuticals Islamabad. Clarify it.	We are borrowing the material from M/s Vision Pharma. The borrowing undertaking is submitted	Not complied Firm has submitted acknowledgement /loan letter from M/s Global pharma rather than M/s vision pharmaceuticals Islamabad.
7.	Proposed container closure system (Glass vial Type 1) suitability testing to be submitted as per pharmacopeia.	Product is as per innovator so suitability testing of Container closure system is not required	Not complied Quality testing of container closure system is required as per USP to assess whether container closure system meets proclaimed criteria i.e USP glass vial type I or not
8.	Details of manufacturer and batch no of comparator product has not been mentioned under pharmaceutical equivalence study. Also justify selection of that particular comparator product	Vancomycin 1g & 500mg By Getz pharma	Not complied Batch no of comparator products are not provided
9.	Compatibility studies of drug product with container closure system is not provided.	As the material is ready to fill hence compatibility studies with container closure has been performed by drug substance manufacturer	Not complied Compatibility of the container closure system with the FPP is required as under 2.3.P.2.4 and 3.2.P.2
10.	Calculation regarding potency adjustment (salt factor and assay result of drug substance) has not been provided in Batch formula/ master formula.	Updated batch formula/master formula wherein calculation regarding	Complied

		potency adjustment (salt factor and assay result of drug substance) is provided	

Decision 323rd meeting: Deferred for submission of following:
Valid GMP certificate of Drug Substance manufacturer i.e Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China.
Registration status/ registration number of diluent i.e Gee H20 (5ml) water for injection by M/s Gallop Water Sciences.
Detailed analytical procedures for the testing of drug substance by Drug Product manufacturer.
In use stability data (reconstituted form) to be provided as per guidance document by EMA.
Acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad.
Suitability testing/Quality testing of Proposed container closure system (Glass vial Type 1) as per pharmacopeia
Batch no of comparator product vancomycin 1g injection to be provided
Compatibility studies of drug product with container closure system is not provided as required under 2.3.P.2.4 and 3.2.P.2

S.No	Observation	Reply	Remarks
1	Valid GMP certificate of Drug Substance manufacturer i.e Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd China	Firm has submitted copy of License No 20160089 dated valid till 21.09.2025 issued by China Food and Drug Administration	Complied
2	Registration status/ registration number of diluent i.e Gee H20 (5ml) water for injection by M/s Gallop Water Sciences.	Firm has submitted registration no. of diluent Gee H20 (5ml) water for injection by M/s Gallop Water Sciences as 076881	Gee H20 (5ml) water for injection by M/s Gallop Water Sciences as 080476, which was verifiable from database.
3	Detailed analytical procedures for the testing of drug substance by Drug Product manufacturer.	Detailed analytical procedures for the testing of drug substance by Drug Product manufacturer is provided.	Complied
4	In use stability data (reconstituted form) to be provided as per guidance document by EMA.	Not applicable as the product is immediately used after reconstitution, furthermore it is a single dose vial.	Justified
5	Acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad.	Acknowledgement /loan letter from M/s Vision pharmaceuticals Islamabad is provided along with documents regarding import of API/DRAP clearance.	Complied
6	Suitability testing/Quality testing of Proposed container closure system (Glass vial Type 1) as per pharmacopeia	Quality testing of proposed container closure system as performed by supplier Shandong pharmaceutical Glass Co Ltd. Is provided	Complied
7.	Batch no of comparator product vancomycin 500mg injection to be provided	Vancomycin 1g injection: Batch No: 402685XV Abbott pharma	Complied

8.	Compatibility studies of drug product with container closure system is not provided as required under 2.3.P.2.4 and 3.2.P.2	Applied formulation is as per innovator, which is found stable during stability studies hence Compatibility studies are not required	Justified
Gee H20 (5ml) water for injection by M/s Gallop Water Sciences as 080476, which was verifiable from database.			

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

e) Cases evaluated by Dr. Sidra Khalid (AD PEC-VII):

Deferred case of 296th meeting:

615. Name and address of manufacturer / Applicant	M/s. Synchro Pharma, 77 Industrial Estate Kot Lakhpat, Lahore
Brand Name +Dosage Form + Strength	**Duset oral dispersible tablet 4 mg**
Diary No. Date of R& I & fee	Form-5 Dy.No 14073 dated 7-3-2019 Rs. 20,000 Dated 6-3-2019 (#0800704)
Composition	Each orodispersible Tablet Contains: Ondansetron as HCL Dihydrate…4mg
Pharmacological Group	Serotonin 5-HT3 receptor antagonist
Type of Form	Form-5
Finished Product Specification	USP
Pack Size & Demanded Price	As per SRO
Approval Status of Product in Reference Regulatory Authorities.	Zofran tablet of Novartis (MHRA)
Me-too Status	Zofran tablet of Glaxo lab (020667)
GMP status	Last GMP inspection Date: 12-6-2019 and 04-7-2019, with acceptable cGMP compliance
Remarks of the Evaluator.	The firm revised there form 5 and method of manufacturer from orodispersible Tablet Contains: Ondansetron as HCL Dihydrate…4mg to Each film coated Tablet Contains: Ondansetron as HCL Dihydrate…4mg which is according to the reference product with fee of 5000/- (#0800720) dated 11/8/2020

Decision 296th meeting: Deferred for consideration on its turn	
Now firm has requested to consider it by Registration Board.	
Full fee to be submitted for change of formulation from oro dispersible tablet to film coated tablet	
Decision of 324th meeting: Approved as per following label claim: **Each film coated Tablet Contains:** **Ondansetron as HCl dihydrate …… .4mg** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product description to film coated tablet as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, along with latest GMP inspection report conducted within last three years, before issuance of registration letter.**	
616. Name and address of manufacturer / Applicant	M/s. Synchro Pharma, 77 Industrial Estate KotLakhpat, Lahore
Brand Name +Dosage Form + Strength	Duset oral dispersible tablet 8 mg
Diary No. Date of R& I & fee	Form-5 Dy. No 14073 dated 7-3-2019 Rs. 20,000 Dated 6-3-2019 (#0800705)
Composition	Each orodispersible Tablet Contains: Ondansetron as HCL Dihydrate…8mg
Pharmacological Group	Serotonin 5-HT3 receptor antagonist
Type of Form	Form-5
Finished Product Specification	USP
Pack Size & Demanded Price	As per SRO
Approval Status of Product in Reference Regulatory Authorities.	Zofran tablet of Novartis (MHRA)
Me-too Status	Zofran tablet of Glaxo lab (020668)
GMP status	Last GMP inspection Date: 12-6-2019 and 04-7-2019, with acceptable cGMP compliance
Remarks of the Evaluator.	The firm revised there form 5 and method of manufacturer from orodispersible Tablet Contains: Ondansetron as HCL Dihydrate… to Each film coated Tablet Contains: Ondansetron as HCL Dihydrate…which is according to the reference product with fee of 5000/- (#0800720) dated 11/8/2020
Decision 296th meeting: Deferred for consideration on its turn	
Now firm has requested to consider it by Registration Board.	
Full fee to be submitted for change of formulation from orodispersible tablet to film coated tablet.	
Decision of 324th meeting: Approved as per following label claim: **Each film coated Tablet Contains:** **Ondansetron as HCl dihydrate …… .8mg** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product description to film coated tablet as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, along with latest GMP inspection report conducted within last three years, before issuance of registration letter.**	

ii) Following Cases were evaluated, found deficient and communicated by (AD PEC-VII), now firms have submitted replies:

617.	Name, address of Applicant / Marketing Authorization Holder	M/s Pharmasol (Pvt) Ltd., Plot No. 549, Sundar Industrial Estate, Raiwind Road, Lahore.
	Name, address of Manufacturing site.	M/s Pharmasol (Pvt) Ltd. , Plot No. 549, Sundar Industrial Estate, Raiwind Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 34236 dated : 31-12-2021
	Details of fee submitted	PKR 30,000/-: dated : 19-06-2021
	The proposed proprietary name / brand name	Apixasol 2.5mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Apixaban……2.5mg
	Pharmaceutical form of applied drug	Round, white to Off-white color, film coated tablet, plain on both sides (Oral tablet)
	Pharmacotherapeutic Group of (API)	Antithrombotic agents, direct factor Xa inhibitors
	Reference to Finished product specifications	As per Innovator's Specifications
	Proposed Pack size	3×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Eliquis 2.5mg film coated Tablet manufactured by Bristol-Myers Squibb-Pfizer UK, USFDA MHRA Approved .
	For generic drugs (me-too status)	Ixaban tablet 2.5mg by Martin Dow approved in meeting 295 Xaby 2.5mg tablet by M/S SAMI approved in meeting 296 Apixaget 2.5mg by Getz pharma
	GMP status of the Finished product manufacturer	GMP certificate granted on 26-8-20222
	Name and address of API manufacturer.	M/s Changzhou Pharmaceutical Factory No.518 Laodong East Road, Changzhou, Jiangsu Province 213018, P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Apixaban is non-compendial API. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, related

		substances, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 6 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ZSAP171104, ZSAP171105, ZSAP171106)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, process validation protocol, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Eliquis 2.5mg tablet by Pfizer by performing CDP against Eliquis Batch No: DR5724 Exp Date: 05/2022 in three BCS media across the physiological pH range i.e. 0.1N HCl Media, 4.5 pH Buffer Media and 6.8 pH Buffer Media. The values are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have been submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

	For generic drugs (me-too status)	Apixaget 2.5 mg Tablet by M/s Getz Pharma, Karachi.
	GMP status of the Finished product manufacturer	GMP inspection dated 13-9-22 concludes good level of GMP compliance.
	Name and address of API manufacturer.	M/s Jiangxi Synergy Pharmaceutical Co., Ltd. Jiangxi Fengxin Industrial Park, Jiangxi Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.

	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30ºC ± 2ºC; 65% ± 5% RH for 24 months Accelerated: 40ºC ± 2ºC; 75% ± 5% RH for 6 months Batches:(20180201Y, 20180202Y , 20180203Y)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Eliquis 2.5mg tablet by BRISTOL MYERS SQUIBB by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Eliquis 2.5mg tablet by BRISTOL MYERS SQUIBB in 0.1N HCl, Phosphate Buffer (pH 4.5), Sod. Phosphate Buffer with 0.05% SLS (pH 6.8). The values are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s Jiangxi Synergy Pharmaceutical Co., Ltd. Jiangxi Fengxin Industrial Park, Jiangxi Province, China.
API Lot No.	20200301Y
Description of Pack (Container closure system)	2x7's Alu Alu blister pack
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	T001	T002	T003
Batch Size	2000 Tablets	2000 Tablets	2000 Tablets
Manufacturing Date	07-2020	07-2020	07-2020
Date of Initiation	07-07-2020	07-07-2020	07-07-2020
No. of Batches	03		
Administrative Portion			
	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has also submitted a request to DRAP that as per decision of 312 DRB Meeting, they have submitted all the required documents mentioned in minutes. So, Firm requested to please interimly extend the exemption from onsite inspection to 05 years for all dosage forms on behalf of submitted required data and inspection done on 21st May 2019 and wherein the registration of that product was accorded in 292 DRB meeting.	
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate No. 2020002 is issued by Jiangxi API Engineering Technology Research Centre. Valid till 11-03-2025.	
	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice HH-900-06-221 dated 05-06-2020 is submitted wherein the permission to import different APIs including Apixaban for the purpose of test/analysis and stability studies is granted vide No. 5601/2021-DRAP dated 14-04-2021.	
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.	
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.	
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.	

Remarks OF Evaluator:
Dissolution conditions of innovator as per Biopharmaceutics Review:
Apparatus: USP II
Spindle rotation: 75 rpm
Medium volume: 900ml
Temperature: 37oC
Medium: pH 6.8 phosphate buffer, 0.05% SLS
Acceptance criteria: NLT Q at 30 min
Inactive ingredients:
anhydrous lactose, microcrystalline cellulose, croscarmellose sodium, sodium lauryl sulfate, and magnesium stearate. The film coating contains lactose monohydrate, hypromellose, titanium dioxide, triacetin, and yellow iron oxide

S No	Observations	Reply	Remarks

	Justify the dissolution specification NLT 80% (Q) after 45 minutes, since the USFDA Biopharmaceutics review document of the innovator product specifies dissolution specifications i.e. NLT (Q) in 30 minutes	The dissolution parameters adopted by EMA approved product i.e Apixaban by Accord were as follows: 80% dissolved in 45 minutes, 50 rpm in 0.1N HCl, pH 4.5 acetate buffer and phosphate buffer pH 6.8, and 75 rpm in phosphate buffer pH 6.8 phosphate buffer. https://www.ema.europa.eu/en/documents/assessment-report/apixaban-accord-epar-public-assessment-report_en.pdf	Justified
	Summary of batch analyses release results of the drug product manufacturer for relevant batch needs to be submitted as per 2.3.S.4.4 (b).	CoA/Batch analysis results of batch No. 20200301Y is submitted by drug product manufacturer	Complied

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Firm shall submit following before issuance of registration letter:

- **Analytical validation studies for both drug substance and drug product manufacturer performed by the drug product manufacturer.**
- **Performance of particle size distribution of the drug substance by either drug substance manufacturer or drug product manufacturer.**

	The proposed proprietary name / brand name	**Barib 4 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Baricitinib…4mg
	Pharmaceutical form of applied drug	Film Coated Tablet
	Pharmacotherapeutic Group of (API)	Janus Kinase (JAK) inhibitor(ATC code L04AA37)
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	7´s, 14 ´s,28´s

	Proposed unit price	As per innovator
	The status in reference regulatory authorities	Olumiant tablet 4 mg, Eli Lilly(USFDA Approved)
	For generic drugs (me-too status)	Olumiant 4 mg tablet , Eli Lilly, Pakistan (R.no. 110529) (imported from Eli llilly,, Netherland)
	Name and address of API manufacturer.	M/s Zhejiang Hongyuan Pharmaceutical co., ltd, Chem and industrial Zone, Linhai, Zhejiang , China.
	Module-II (Quality Overall Summary)	Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 24 months. Batch no. BRCT20181001, BRCT20181002, BRCT20181003.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of the developed formulation Barib 4 mg tablet (batch no. T01) and Olumiant 4 mg tablet(Eli lilly) (B # D385031). Quality tests of both products including Dosage form, Description, Identification, Dissolution, Assay were compared. CDP has been performed against the same brand that is Olumiant 4 mg tablet(Eli lilly) (B # D385031in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range
	Analytical method validation/verification of product	Firm has submitted analytical method verification report of drug substance.

		Firm has submitted analytical method validation report of applied product.

STABILITY STUDY DATA

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has provided Manufacturing license, valid till 13-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted Assistant Director, DRAP, Lahore attested invoice specifying import of 25.0 g of Baricitinib(Batch no. BRCT 20181203),(Invoice no. HY19021401, dated 20-03-2019).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail on testing reports of product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

S. No.	Section	Observation	Response of the firm
1.	1.6.5	Upon online verification of manufacturing license of drug substance manufacturer, address of manufacturer is different. Furthermore, Baricitinib is not present in scope of license.	The address of drug substance manufacturer is same, but the online address has more details. The complete details of scope of license are present in GMP certificate that is issued by local authority, and Baricitinib is mentioned under scope of Inspection. *However, provided GMP certificate is not traceable.*

2.	1.3.5	Please provide GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	Our GMP Inspection has been conducted on 03-11-2022, and we are waiting for the signed report and GMP certificate, we will submit that ASA we will receive it. However, we are submitting our DML renewal inspection report that has been conducted within last three years(date of inspection 13-07-2020.)
3.	1.4.3	Justification required for contract manufacturing application. Whereas M/s. CCL Pharmaceuticals (Pvt.) Ltd., 62 Industrial Estate, Kot Lakhpat Lahore 54770 has its own tablet section in light of S.R.O. 1347(I)/2021, dated 15th October, 2021. Please provide notarized copy of Contract Manufacturing Agreement in accordance with S.R.O. 1347(I)/2021, dated 15th October, 2021	CCL is already working on the development of many Drug products which are not available in the market of Pakistan, for the best of public interest. As Baricitinib was already developed by Dyson and they don't require the developmental studies for CCL's Registration application, CCL according to its mission of providing the quality health care products to the public and business strategy, opted for the contract manufacturing application from Dyson. Notarized copy of agreement is provided
4.	3.2.S.4.1	Justification required for not including heavy metals test in specification of drug substance of M/s Dyson Research Laboratories.Whereas Drug substance manufacturer CoA depicting this test.	We have revised the CoA (added heavy metals test) as per Drug substance manufacturer. However fee for revision of specification has not submitted.
5.	3.2.P.2	In comparative dissolution profile results are not in accordance with provided chromatograms and raw data sheets. Justification required.	In CDP report of Buffer 4.5, it was a typographic error, we have revised the results as per provided chromatograms.
6.	3.2.P.4	Control of Excipients **Specifications** The specifications for excipients shall be provided. If the excipient(s) are in pharmacopoeia there is no need to provide detailed specifications or its analytical procedures. However, for excipients of non-compendial standards, specifications as well as analytical procedures shall be provided. The colors permitted for use are limited to those listed in the FDA "Inactive ingredient guide", "Japanese Pharmaceutical excipients" or the European Union (EU) "List of permitted food colors". For proprietary mixtures, the composition sheet provided by the supplier shall be submitted. **Analytical procedures** Copies of analytical procedures of non-compendial excipient shall be submitted. **Validation of analytical procedures** Validation information for the analytical procedures for in-house standard excipients shall be submitted. **Justification of specifications** Justification of the specifications for the analytical procedures for in-house standard excipients shall be provided. **Excipients of Human or Animal Origin** For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. **Novel Excipients** For excipient(s) used for the first time in a drug product or by a new route of administration, full details of specification and testing method shall be provided.	All the excipients used in formulation are pharmacopoeial except Ponchue 4R lake color and New coat White. The Ponchue 4R lake color is present in EU list of permitted food colors under code E124. Copy of Specifications & Analytical procedure of Ponchue 4R lake color and New coat White is provided. The submission against this point is exempted. The in-house standard excipients are tested as per manufacturer guidelines and both complies with established specifications. None of the excipient is of Human or Animal origin. Not applicable as the product is generic formulation.
7.	3.2.P.6	Provided working standard batch no. BRCT WRS, is Valid up to 21-11-2019. Justification	We have standardized the available raw material (Baricitinib) against the provided WRS, and used it as

		required for onward testing of the product and drug substance.	secondary WS for onward testing of the product. *COA of secondary working standard not provided.*
8.	3.2.P.8	Justification required for record of Digital data logger for temperature and humidity monitoring of stability chambers indicating relative humidity and temperature out of specification (outlier).	The outlier for relative humidity and temperature in data logger data are due to take samples, or to add samples, or to change water reservoir, or to rearrange samples, etc.

WARNING: SERIOUS INFECTIONS, MALIGNANCY, AND THROMBOSIS

See full prescribing information for complete boxed warning.

- **Serious infections leading to hospitalization or death, including tuberculosis and bacterial, invasive fungal, viral, and other opportunistic infections, have occurred in patients receiving OLUMIANT. (5.1)**
- **If a serious infection develops, interrupt OLUMIANT until the infection is controlled. (5.1)**
- **Prior to starting OLUMIANT, perform a test for latent tuberculosis; if it is positive, start treatment for tuberculosis prior to starting OLUMIANT. (5.1)**
- **Monitor all patients for active tuberculosis during treatment, even if the initial latent tuberculosis test is negative. (5.1)**
- **Lymphoma and other malignancies have been observed in patients treated with OLUMIANT. (5.2)**
- **Thrombosis, including deep venous thrombosis, pulmonary embolism, and arterial thrombosis, some fatal, have occurred in patients treated with OLUMIANT. Patients with symptoms of thrombosis should be evaluated promptly. (5.3)**

Box warning of Olumiant tablet, USFDA.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Proposed Pack size	7´s, 14 ´s,28´s
	Proposed unit price	As per innovator
	The status in reference regulatory authorities	Olumiant tablet 2 mg, Eli Lilly(USFDA Approved)
	For generic drugs (me-too status)	Olumiant 2 mg tablet , Eli Lilly, Pakistan (R.no. 110528) (imported from Eli llilly,, Netherland)
	Name and address of API manufacturer.	M/s Zhejiang Hongyuan Pharmaceutical co., ltd, Chem and industrial Zone, Linhai, Zhejiang , China.
	Module-II (Quality Overall Summary)	Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5% RH for 24 months. Batch no. BRCT20181001, BRCT20181002, BRCT20181003.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of the developed formulation Barib 2 mg tablet (batch no. T01) and Olumiant 2 mg tablet (Eli lilly) (B # D384977) Quality tests of both products including Dosage form, Description, Identification, Dissolution, Assay were compared. CDP has been performed against the same brand that is Olumiant 4 mg tablet (Eli lilly) (B # D385031in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range
	Analytical method validation/verification of product	Firm has submitted analytical method verification report of drug substance. Firm has submitted analytical method validation report of applied product.

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Hongyuan Pharmaceutical co., ltd, Chem and industrial Zone, Linhai, Zhejiang , China.
API Lot No.	BRCT201801203
Description of Pack (Container closure system)	Alu-Alu Blister (2x10s) packed in printed unit carton, further packed in a master shipper.
Stability Storage Condition	Real Time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	T01	T02	T03
Batch Size	1000 tablets	1000 tablets	1000 tablets
Manufacturing Date	05-2019	05-2019	05-2019
Date of Initiation	02-06-2019	02-06-2019	02-06-2019
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of Manufacturing license issued state food and drug administration, China, with validity of 13-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted Assistant Director, DRAP, Lahore attested invoice specifying import of 25.0 g of Baricitinib(Batch no. BRCT 20181203),(Invoice no. HY19021401, dated 20-03-2019).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail on testing reports of product.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

S. No.	Section	Observation	Response of the firm
1.	1.6.5	Upon online verification of manufacturing license of drug substance manufacturer, address of manufacturer is different. Furthermore, Baricitinib is not present in scope of license.	The address of drug substance manufacturer is same, but the online address has more details. The complete details of scope of license are present in GMP certificate that is issued by local authority, and Baricitinib is mentioned under scope of Inspection. *However, provided GMP certificate is not traceable.*
2.	1.3.5	Please provide GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	Our GMP Inspection has been conducted on 03-11-2022, and we are waiting for the signed report and GMP certificate, we will submit that ASA we will receive it. However, we are submitting our DML renewal inspection report that has been conducted within last three years(date of inspection 13-07-2020.)
3.	1.4.3	Justification required for contract manufacturing application. Whereas M/s. CCL Pharmaceuticals (Pvt.) Ltd., 62 Industrial Estate, Kot Lakhpat Lahore 54770 has its own tablet section in light of S.R.O. 1347(I)/2021, dated 15th October, 2021. Please provide notarized copy of Contract Manufacturing Agreement in accordance with S.R.O. 1347(I)/2021, dated 15th October, 2021	CCL is already working on the development of many Drug products which are not available in the market of Pakistan, for the best of public interest. As Baricitinib was already developed by Dyson and they don't require the developmental studies for CCL's Registration application, CCL according to its mission of providing the quality health care products to the public and business strategy, opted for the contract manufacturing application from Dyson. Notarized copy of agreement is provided
4.	3.2.S.4.1	Justification required for not including heavy metals test in specification of drug substance of M/s Dyson Research Laboratories.Whereas Drug substance manufacturer CoA depicting this test.	We have revised the CoA (added heavy metals test) as per Drug substance manufacturer. However fee for revision of specification has not submitted.
5.	3.2.P.2	In comparative dissolution profile results are not in accordance with provided chromatograms and raw data sheets. Justification required.	In CDP report of Buffer 4.5, it was a typographic error, we have revised the results as per provided chromatograms.
6.	3.2.P.4	Control of Excipients **Specifications** The specifications for excipients shall be provided. If the excipient(s) are in pharmacopoeia there is no need to provide detailed specifications or its analytical procedures. However, for excipients of non-compendial standards, specifications as well as analytical procedures shall be provided. The colors permitted for use are limited to those listed in the FDA "Inactive ingredient guide", "Japanese Pharmaceutical excipients" or the European Union (EU) "List of permitted food colors". For proprietary mixtures, the composition sheet provided by the supplier shall be submitted. **Analytical procedures** Copies of analytical procedures of non-compendial excipient shall be submitted. **Validation of analytical procedures** Validation information for the analytical procedures for in-house standard excipients shall be submitted. **Justification of specifications** Justification of the specifications for the analytical procedures for in-house standard excipients shall be provided.	All the excipients used in formulation are pharmacopoeial except Ponchue 4R lake color and New coat White. The Ponchue 4R lake color is present in EU list of permitted food colors under code E124. Copy of Specifications & Analytical procedure of Ponchue 4R lake color and New coat White is provided. The submission against this point is exempted. The in-house standard excipients are tested as per manufacturer guidelines and both complies with established specifications.

		Excipients of Human or Animal Origin For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. **Novel Excipients** For excipient(s) used for the first time in a drug product or by a new route of administration, full details of specification and testing method shall be provided.	None of the excipient is of Human or Animal origin. Not applicable as the product is generic formulation.
7.	3.2.P.6	Provided working standard batch no. BRCT WRS, is Valid up to 21-11-2019. Justification required for onward testing of the product and drug substance.	We have standardized the available raw material (Baricitinib) against the provided WRS, and used it as secondary WS for onward testing of the product. *COA of secondary working standard not provided.*
8.	3.2.P.8	Justification required for record of Digital data logger for temperature and humidity monitoring of stability chambers indicating relative humidity and temperature out of specification (outlier).	The outlier for relative humidity and temperature in data logger data are due to take samples, or to add samples, or to change water reservoir, or to rearrange samples, etc.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

However fee for revision of specification has not submitted.
5.	3.2.P.2	In comparative dissolution profile results are not in accordance with provided chromatograms and raw data sheets. Justification required.	In CDP report of Buffer 4.5, it was a typographic error, we have revised the results as per provided chromatograms.
6.	3.2.P.4	Control of Excipients **Specifications** The specifications for excipients shall be provided. If the excipient(s) are in pharmacopoeia there is no need to provide detailed specifications or its analytical procedures. However, for excipients of non-compendial standards, specifications as well as analytical procedures shall be provided. The colors permitted for use are limited to those listed in the FDA "Inactive ingredient guide", "Japanese Pharmaceutical excipients" or the European Union (EU) "List of permitted food colors". For proprietary mixtures, the composition sheet provided by the supplier shall be submitted. **Analytical procedures** Copies of analytical procedures of non-compendial excipient shall be submitted. **Validation of analytical procedures** Validation information for the analytical procedures for in-house standard excipients shall be submitted. **Justification of specifications** Justification of the specifications for the analytical procedures for in-house standard excipients shall be provided. **Excipients of Human or Animal Origin** For excipients of human or animal origin, a certificate shall be provided, confirming that the excipient(s) are free from BSE and TSE. **Novel Excipients** For excipient(s) used for the first time in a drug product or by a new route of administration, full details of specification and testing method shall be provided.	All the excipients used in formulation are pharmacopoeial except Ponchue 4R lake color and New coat White. The Ponchue 4R lake color is present in EU list of permitted food colors under code E124. Copy of Specifications & Analytical procedure of Ponchue 4R lake color and New coat White is provided. The submission against this point is exempted. The in-house standard excipients are tested as per manufacturer guidelines and both complies with established specifications. None of the excipient is of Human or Animal origin. Not applicable as the product is generic formulation.
7.	3.2.P.6	Provided working standard batch no. BRCT WRS, is Valid up to 21-11-2019. Justification required for onward testing of the product and drug substance.	We have standardized the available raw material (Baricitinib) against the provided WRS, and used it as secondary WS for onward testing of the product. *COA of secondary working standard not provided.*
8.	3.2.P.8	Justification required for record of Digital data logger for temperature and humidity monitoring of stability chambers indicating relative humidity and temperature out of specification (outlier).	The outlier for relative humidity and temperature in data logger data are due to take samples, or to add samples, or to change water reservoir, or to rearrange samples, etc.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has provided Manufacturing license, valid till 13-01-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has provided invoice specifying import of 500g g of Baricitinib(Batch no. BRCT 210502),(Invoice no. HY19021401, dated 20-03-2019).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail on testing reports of product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

S.no.	Section	Observation	Responses
1	1.6.5	Upon online verification of manufacturing license of drug substance manufacturer, address of manufacturer is different. Furthermore, Baricitinib is not present in scope of license.	We have received the following response from manufacture of API M/s Zhejiang Hongyan Pharmaceutical China. **"Our DML does not show all products.** **Baricitinib is patented product in China. It cannot be sold commercially in China. So no manufacturer registered it in Chinese NMPA now.** **But GMP is one certificate which is connected with quality control. Our local organization issue us this certificate for exporting products purpose.** **It is same address. This address has more details.** **No.6, Donghai Fourth Avenue is our house number. Duqiao is town name"** Further, we herewith attached once again the GMP Certificate of above manufacturer for the ready reference. As Annexure Moreover, it is bring in your good knowledge that the following products have already been approved in the following DRB minutes using the similar source of API i.e. M/s Zhejiang Hongyan Pharmaceutical China. 1. M/s. Jenner Pharmaceuticals Pvt. Ltd. brand name "Olumijent Tablet 2mg and 4mg" APPROVED in 316th DRB minutes of meeting using the similar API's source i.e. M/s Zhejiang Hongyan Pharmaceutical China 2. M/s. MCOLSAN brand name "Olumac 2mg & 4mg" APPROVED in 316th DRB minutes of meeting using the similar API's source i.e. M/s Zhejiang Hongyan Pharmaceutical China
2	3.2.S.7	Submit supporting data of stability studies of drug substance manufacturer.	It is respectfully submitted that the manufacturer of API M/s Zhejiang Hongyan Pharmaceutical China have already provided the complete Drug Master File of the active ingredient "Baricitinib", and they didn't agree to share any further confidential information except the DMF with us. Further, refer to DRAP guidelines we have already submitted Manufacturer API's Stability data on Zone IVA and there is no further requirement is mentioned for submission. Moreover, it is bring in your good knowledge that the following products have already been approved in the following DRB minutes using the similar source of API i.e. M/s Zhejiang Hongyan Pharmaceutical China. 1. M/s. Jenner Pharmaceuticals Pvt. Ltd. brand name "Olumijent Tablet 2mg and 4mg" APPROVED in 316th DRB minutes of meeting using the similar API's source i.e. M/s Zhejiang Hongyan Pharmaceutical China 2. M/s. MCOLSAN brand name "Olumac 2mg & 4mg" APPROVED in 316th DRB minutes of meeting using the

			similar API's source i.e. M/s Zhejiang Hongyan Pharmaceutical China
3	3.2.P.4	3.2.P.4 Control of Excipients **Specifications** The specifications for excipients shall be provided. If the excipient(s) are in pharmacopoeia there is no need to provide detailed specifications or its analytical procedures. However, for excipients of non-compendial standards, specifications as well as analytical procedures shall be provided. The colors permitted for use are limited to those listed in the FDA "Inactive ingredient guide", "Japanese pharmaceutical excipients" or the European Union (EU) "List of permitted food colors". For proprietary mixtures, the composition sheet provided by the supplier shall be submitted. **Analytical procedures** Copies of analytical procedures of non-compendial excipient shall be submitted. **Validation of analytical procedures** Validation information for the analytical procedures for in-house standard excipients shall be submitted. **Justification of specifications** Justification of the specifications for the analytical procedures for in-house standard excipients shall be provided.	submitted
4	3.2.P.8	a. Documents for the procurement of API with approval from DRAP (in case of import). b. Submit form 3 and Form 7 (Batch certificate) under drug import and export rules, 1976. c. Justification required for different assay results (2 mg tablet) in initial testing of same batch in accelerated and real time stability studies. d. Justification required for different results (2 mg tablet) in raw data sheets and stability data in accelerated and real time stability studies.	a. It is respectfully submitted that since the Courier Details /Shipment Details are not attested by DRAP therefore Form 3 and Form 7 is not required. b. Same as above. c. Firm has stated that its typographic mistake. d. We have reviewed the stability data sheet and their respective raw data sheets and no difference of values observed. On further evaluation it was found that in tests of unspecified impurities few peak area values in HPLC chromatogram & raw data sheet are differ. Firm has submitted revised stability data sheets.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration Board further advised the firm to adopt formal procedure through approval from DRAP I&E for import of drug substance, in future.

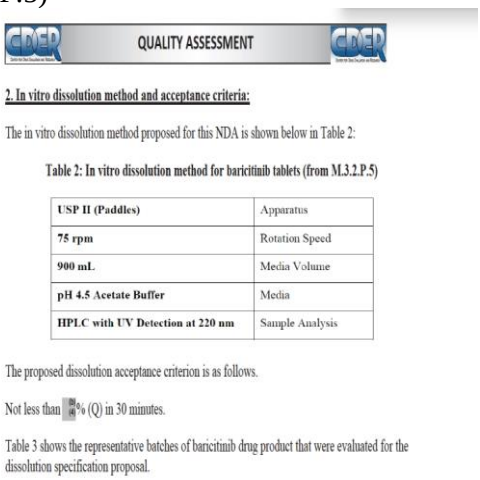
		process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2 °C / 65% ± 5 RH for 24 months. Batch no. 150522,150718,150825.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of the developed formulation against Olumiant 4 mg tablet (Eli lilly) (B#D351131). Quality tests of both products including Dosage form, Description, Identification, Disintegration, Dissolution, Assay were compared. CDP has been performed against the same brand that is Unamity 4 mg tablet (Eli lilly) (B#D369688) in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range
	Analytical method validation/verification of product	Firm has submitted analytical method verification report of drug substance. Firm has submitted analytical method validation report of applied product.



STABILITY STUDY DATA	
Manufacturer of API	M/S Kaifeng Pharmaceutical (group) co., ltd, no. 1, yunan street, kaifeng city China.
API Lot No.	HF20201203
Description of Pack (Container closure system)	Alu-Alu Blister (2x7s) packed in printed unit carton.
Stability Storage Condition	Real Time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Baricitinib 4 mg Tablet			
Batch No.	AU324C	AU325C	AU326C
Batch Size	2500 tablets	2500 tablets	2500 tablets
Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	08-09-2021	08-09-2021	08-09-2021
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has provided minutes of 277th meeting of registration Board, wherein product Roflumilast 500 mcg tablet were approved based on report of panel for Product specific inspection(PSI)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has provided GMP certificate of M/S Kaifeng Pharmaceutical (group) co., ltd, no. 1, yunan street, kaifeng city China, valid till 28-09-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has provided invoice attested by Assistant Director, DRAP, Karachi specifying import of 0.15 kgs of Baricitinib(Batch no. HF20201203, HF20201113),(Invoice no. 210111A03, dated 11-01-2021).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The firm has submitted audit trail on testing reports of product.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

S.no.	Section	Question	Response of firm.
1	**1.3.5**	GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	M/s Atco Laboratories Limited, B-18, S.I.T.E. Karachi (DML No. 000188)has GMP certificate based on evaluation conducted on 03-11-2022
2	**3.2.S.4**	**a**. Justification required for not inclusion of heavy metals, pb testing in specifications of drug substance than drug substance manufacturer.	Heavy metals and Lead (Pb) Content is not a part of release and shelf life specifications of Baricitinib Drug Substance, it was only a part of development and validation testing of drug substance Baricitinib. Declaration Letter for Heavy metals and Lead Content in Baricitinib by drug substance manufacturer is provided. (Section 3.2.S.4)
3	**3.2.S.4**	**b.** In justification of specifications, specification of Tedizolid phosphate mentioned. Justification required.	Drug substance manufacturer has regretted for inconvenience, as it was a typographical error in relevant section of DMF which has been rectified by drug substance manufacturer. Updated DMF is being submitted for your ready reference. (Section 3.2.S.4)
4	**3.2.S.4**	**c.** Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	Missing
5	**3.2.P.2**	Justification required for using USP Apparatus I in Comparative dissolution profile (CDP). While innovator has used USP Apparatus -II (Paddle)	According to "In vitro Dissolution" defined in Biopharmaceutics Classification System-Based Biowaivers, M9, Final version Adopted on 20 November 2019, both USP Apparatus I (basket apparatus) and USP Apparatus –II (paddle apparatus) are allowed. Dissolution method for Baricitinib Tablets is not available at FDA Dissolution database. Similar conditions established through "Procedure for Setting Dissolution Specifications of Baricitinib Tablets" employed in the comparative dissolution studies to characterize the dissolution profile of the test product and reference product for comparative in vitro dissolution tests. The results of Baricitinib in our product Baricitinib 4mg Tablets observed from the comparative dissolution profile in all the three media are similar to the reference profile and the product is considered to be similar. Respective section of guideline is attached here for your reference. (Section 3.2.P.2)
6	**3.2.P.5**	Justification required for using USP Apparatus I for dissolution testing in analytical method of drug product. While innovator has used USP Apparatus -II (Paddle).	Dissolution method for Baricitinib Tablets is not available at FDA Dissolution database. We have established the dissolution specification and method in line with the procedure of Setting Dissolution Release Specifications in 293rd Meeting minutes for Implementation of Common Technical

			Document (CTD) by using the dissolution Method A of Standard Dissolution Testing Conditions defined in "Guidance Document, Dissolution Testing and Acceptance Criteria for Immediate-Release Solid Oral Dosage Form Drug Products Containing High Solubility Drug Substances Guidance for Industry, August 2018". Baricitinib Tablet is categorized as very rapidly dissolving (>85% dissolved in 15 min) and same specifications has been adopted for routine release specifications. "Procedure for Setting Dissolution Specifications of Baricitinib Tablets" is also attached for your ready reference. Furthermore, we have also performed dissolution testing on our stability batches at current time point (15 months) using USP Apparatus - II (Paddle) and results found equivalent. Dissolution Summary Report is also attached. (Section 3.2.P.5)  QUALITY ASSESSMENT 2. In vitro dissolution method and acceptance criteria: The in vitro dissolution method proposed for this NDA is shown below in Table 2: Table 2: In vitro dissolution method for baricitinib tablets (from M.3.2.P.5) USP II (Paddles) — Apparatus 75 rpm — Rotation Speed 900 mL — Media Volume pH 4.5 Acetate Buffer — Media HPLC with UV Detection at 220 nm — Sample Analysis The proposed dissolution acceptance criterion is as follows. Not less than % (Q) in 30 minutes. Table 3 shows the representative batches of baricitinib drug product that were evaluated for the dissolution specification proposal.
7	**3.2.P.8**	**a**. Data of stability batches, supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches, supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
8	**3.2.P.8**	**b.** Justification required regarding data logger data depicting relative humidity out of limits (outliers).	We would like to inform you that when we are using climatic controlled stability chambers for placement of stability samples and collection of stability samples at each testing interval in both real time and accelerated stability conditions, there is a sudden change in set temperature and relative humidity for the time being and which recovers to its initial set value rapidly after closing the door of chamber. Furthermore, according to ICH Topic Q 1 A (R2) Stability Testing of new Drug Substances and Products, Storage condition tolerances, short term spikes due to opening of doors of the storage facility are accepted as unavoidable. While we have a very well controlled procedure established for Excursions that exceed the defined tolerances for more than 24 hours.

			Respective section of guideline is attached here for your reference. (Section 3.2.P.8)

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Analytical Method Verification studies for drug substance including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer.**
- **Performance of dissolution test at next time point of long term stability studies and CDP studies against the innovator/reference product using the "Dissolution apparatus II" i.e., Paddle, as recommended by the innovator product literature.**

- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**

628.	**Name, address of Applicant / Importer**	**M/s GRATON PHARMA, Karachi.**
	Details of Drug Sale License of importer	**License No. 160** **Address:** Office no. 501 & 502 ,5th floor Plot no 42C/2 Lane-08, Bukhari Commercial Phase-VI, D.H.A Karachi, Pakistan. **Address of Godown:** NA **Validity:** 21-10-2023 **Status:** License to sell drugs as distributor **Renewal:** Firm has submitted for renewal
	Name and address of marketing authorization holder (abroad)	**M/s Jodas Expoim Pvt. Ltd.** Plot No. 55, Phase-III, Biotech Park, Karakapatla (V), Markook (M), Siddipet (D) Telangana - 502279, India.
	Name, address of manufacturer(s)	**M/s Jodas Expoim Pvt. Ltd.** Plot No. 55, Phase-III, Biotech Park, Karakapatla (V), Markook (M), Siddipet (D) Telangana - 502279, India.
	Name of exporting country	India
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No: 1985348/TS/2021) (valid upto 22-12-2023) issued by Drug Control Administration Telangana, India for Azacitadine injection 100mg. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. **The name of importing country on CoPP is mentioned.**
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from Jodas Expoim pvt ltd. The letter specifies that the manufacturer appoints M/s Graton Pharma. to register, market and sell their products in Pakistan. The authorization letter is valid till **31-12-2025**.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 23966 , dated 24-08-2022

	Details of fee submitted	PKR 50,000/-: 26 March 2021. PKR 25,000:-13 Sep, 2021.
	The proposed proprietary name / brand name	**Graza Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Azacitadine …….100mg
	Pharmaceutical form of applied drug	Injection.
	Pharmacotherapeutic Group of (API)	Antineoplastic agents(L01BC07)
	Reference to Finished product specifications	In house Specification
	Proposed Pack size	1 VIAL
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Vidaza100MG/vial (Celgene Europe B.V. Winthontlaan 6 N3526 KV Utrecht, Netherlands
	For generic drugs (me-too status)	
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s MSN Laboratories Private limited, Sy. No. 50, Karadanur(village) Patancheru (mandal), Sangareddy District, Telanagana, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at $5^{o}C \pm 3^{o}C$. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.

	Container closure system of the drug product	Clear molded type-I glass vial with 20 mm grey bromobutyl double slotted rubber stopper along with 20 mm aluminium flip of seal.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 75% ± 5% RH. The real time stability study data of batches is for 12 months. Batch No. ON-E19031, ON-E19032, ON-E19033

Evaluation by PEC:

S.no.	Section	OBSERVATION
1	1.3.3	a. Free sale Certificate is expired b. Original GMP certificate missing. Provided copy of GMP certificate expired. c. Original authorization letter is missing
2.	3.2.S.4	a. Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.
4.	3.2.P.5	a. Detailed analytical procedures used for testing the drug product shall be provided.
5.	3.2.P.8	a. Firm has provided 12th Months real time stability data of finished product. Complete stability data as per claimed shelf life is required. b. Summary of additional stability studies e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided. c. GMP certificate of drug substance manufacturer is expired. Please provide valid GGMP certificate of drug substance manufacturer.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

629.	Name, address of Applicant / Marketing Authorization Holder	**M/s The Searle Company Limited** **F-319, S.I.T.E., Karachi, Pakistan.(DML No. 000016)**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Bilastine……20 mg (As per Innovator's Specifications)
	Pharmaceutical form of applied drug	Off white color, biconvex, round shaped tablets, plain from both sides

	Pharmacotherapeutic Group of (API)	Anti-Histamine
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**Ilaxten 20mg Tablet (**Each tablet contains 20 mg of bilastine) MHRA Approved.
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	Firm has submitted GMP Certificate of M/s The Searle Company Limited, F-319, S.I.T.E., Karachi, Pakistan.(DML No. 000016) based on evaluation conducted on19-07-2022 Firm has provided approval of following sections vide letter (2-6/2018-Lic(Vol-IV), dated 29-10-2020): 1) Tablet (General & General Antibiotic) 2) Capsule General, 3) Sachet (General), 4) Injection Ampoule (general), 5) Oral liquid(General).
	Name and address of API manufacturer.	**BILASTINE:** **Manufacturer:** Lee Pharma Limited **Address:** Survey No. 10/G-1, Gaddapotharam (Village) Jinnaram (Mandal), Sangareddy (District) Telangana State - 502319, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for specifications, analytical procedures and its validation, impurities & related substances, residual solvents, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: **BILASTINE:** Real time: 30°C ± 2°C / 75% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: BS0219002(MN), BS0219003(MN), BS0219004(MN)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence: Formulation of Bilaxten 20mg Tablet is developed by using commonly used excipients that are being widely used for dosage forms. Most of the excipients are kept constant as that of the Innovator's formulation therefore, it is presumed that inactive ingredients are compatible with the actives (Bilastine) & also with each other and this is ensured by

		satisfactory results from formal stability studies. Each of the excipient present in formulation plays significant role for the integrity of formulation. The Comparative dissolution profile is performed against Bilaxten 20mg Tablet show equivalence. F2 value 50 or greater (50-100) reflects sameness or equivalence of two curves and this equivalence of In-vitro performance of two products
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity, robustness and system suitability

Administrative Portion		
31.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted documents for Reference of Previous Approval
32.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**BILASTINE:** GMP Certificate of Lee Pharma Limited **Address:** Survey No. 10/G-1, Gaddapotharam (Village) Jinnaram (Mandal), Sangareddy (District) Telangana State - 502319, India Valid till: 08-05-2023
33.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted documents of import duly attested by Assistant Director, DRAP, Karachi, vide invoice no. 1325/LP/2020-21, dated 27.01.2021. Batch: BIFP21001
34.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

35.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
36.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Remarks of evaluator	Response of the firm
2.3.R.1.1	**Executed Production Documents** Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Firm has Provided the copy of Batch Manufacturing Record (BMR) for 3 batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
3.2.P.2	Justification required for performing Pharmaceutical equivalence and CDP against 2 different brands.	Firm has stated that the Searle company limited performed the comparative dissolution profile and pharmaceutical equivalence of bilastine tablets 20 mg against Bilaxten tablets 20 mg having batch 2004015.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

CASE NO. 2: M/S AGP LIMITED, B-23-C, S.I.T.E., KARACHI

Assistant Director PR-I / EFD vide its letter No. F.1-6/2019-PR-I (EFD) dated 6th October 2022 informed that as per decision of 133rd meeting of DRAP Authority wherein it was decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicine (to a maximum of 15 such molecules) during a financial year.
In compliance to the above decision M/s AGP Limited, B-23-C, S.I.T.E., Karachi have achieved benchmark of more than 100,000 USD and submitted their applications for priority consideration including following application:

630.	Name, address of Applicant / Marketing Authorization Holder	M/s AGP Limited B-23-C, S.I.T.E., Karachi
	Name, address of Manufacturing site.	M/s AGP Limited B-23-C, S.I.T.E., Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 12288 dated 20/03/2022
	Details of fee submitted	PKR 30,000/-: dated 28/03/2022(363304043)
	The proposed proprietary name / brand name	Spasler Neo MR Capsules 200mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains Mebeverine HCl SR 80% Pellets……200mg
	Pharmaceutical form of applied drug	Capsule

	Pharmacotherapeutic Group of (API)	Synthetic anticholinergics, esters with tertiary amino group (ATC code A03AA04)
	Reference to Finished product specifications	Manufacturer's Specifications
	Proposed Pack size	1×10's
	Proposed unit price	As per DRAP approved price
	The status in reference regulatory authorities	Duspatal 200 mg retard by M/s Orifarm GmbH (Germany)
	For generic drugs (me-too status)	Mebever MR 200mg Capsule by M/s Getz Pharma Pakistan (Pvt.) Ltd (Reg. No: 050747)
	GMP status of the Finished product manufacturer	Firm has GMP Certificate based on evaluation conducted on 03rd June 2021(valid for 3 years). Firm has provided renewal of DML of vide 2-4/2010-Lic(Vol-I), dated 30-06-2020 of following sections: Tablet General, **Capsule (General)**, Sachet (general), Oral Liquid(General), Semi-solid (Cream/ Ointment, Liquid Ampoule.
	Name and address of API manufacturer.	M/s Surge Laboratories (Pvt) Ltd, 10th Km, Faisalabad Road Bikhi, District Sheikhupura –Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and finished product.
	Module III (Drug Substance)	Official monograph of Mebeverine HCl is not present in pharmacopeia. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 09 months Batches: (MBV-80-SR-001, MBV-80-SR-002, MBV-80-SR-003) Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (MBV-SR-028, MBV-SR-029, MBV-SR-030)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Mebever MR 200mg Capsule by M/s Getz Pharma Pakistan (Pvt.) Ltd by performing quality tests

		(Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Mebever MR 200mg Capsule by M/s Getz Pharma Pakistan (Pvt.) Ltd in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). on the basis of factor range the result of dissolution profile of both are similar.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, system suitability, specificity range, accuracy, precision, LoD, LoQ, Robustness & range.

			March-2021. (Batch Manufacturing Records are submitted
		c. Justification required regarding data accelerated stability chambers logger data depicting temperature and humidity out of limits (outliers).	c. Firm has stated that: these depicting data are during sampling withdrawal from stability chambers observed within 30min.

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

CASE NO. 3: M/S MACTER INTERNATIONAL LIMITED., KARACHI

Assistant Director PR-I / EFD vide its letter No. F.1-6/2019-PR-I (EFD) dated 6th October 2022 informed that as per decision of 133rd meeting of DRAP Authority wherein it was decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicine (to a maximum of 15 such molecules) during a financial year.
In compliance to the above decision **M/s Macter International limited.**, Karachi have achieved benchmark of more than 100,000 USD and submitted their applications for priority consideration including following application:

631.	**Name, address of Applicant / Importer**	**M/s Macter International limited.**
	Details of Drug Sale License of importer	**License No: 037(No. DHOKW(Drugs)/-252/-** **Address:** F-216 S.I.T.E Karachi Pakistan. **Address of Godown: N/A**. **Validity:** 07-08-2023. **Status:** Drug license by way of wolesale. **Renewal: N/A.**
	Name and address of marketing authorization holder (abroad)	**TTY Biopharm Company Limited 3f., No. 3-1, Park St., Nangang Dist., Taipei City 11503, Taiwan, R.O.C.**
	Name, address of manufacturer(s)	**Name: TTY Biopharm Company Limited Chungli Factory.** **Address**: 838, chung Hwa Rd., Sec.1,Chungli Dist., Taoyuan City,32069,Taiwan.
	Name of exporting country	Taiwan, R.O.C
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized **copy** of CoPP certificate (No.077168) dated 17-09-2019 issued by Food and Drug Administration Ministry of Health and Welfare, Republic of China (Taiwan). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every two years.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of distribution agreement from TTY Biopharm Company Limited. The letter species that the manufacturer

		appoints M/s Macter International Limited., to register their products in Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	
	Details of fee submitted	PKR 100000/ Date: 20-04-2020 PKR 50,000/ Date: 25-04-2022(15000869732)
	The proposed proprietary name / brand name	**Mac-Doxilip Injection 2MG/ML**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Pegylated Liposomal Doxorubicin HCl…….2mg/ml
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	**Antineoplastic Agent** L01DB01
	Reference to Finished product specifications	In house
	Proposed Pack size	10ml x1's
	Proposed unit price	As per SRO & DPC
	The status in reference regulatory authorities	Caelyx pegylated liposomal **(EMA Approved).**
	For generic drugs (me-too status)	Doxopeg **(Ferozsons Lab.Pkaistan)(R.no. 52205)**
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**DMF Holder:** Teva Pharmaceutical Industries Ltd. 5 Basel Street, P.O Box 3190 Petah Tiqva 4951033, Israel. **Manufacturing site:** Sicor S.r.l., Santhia site, Tenuta S. Alessandro 13048 Santhia(VC), Italy
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities,

		physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC and 60± 5% RH. The stability study data is till 72 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not applicable.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	USP type-I glass
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 25ºC ±2ºC / 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5ºC ±3ºC. The real time stability study data of 3 batches is for 24 months.

Evaluation by PEC:

</table>

Remarks of Evaluator

Observation	**Response of Firm**
i. GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	M/s Genix Pharma Private Limited,44-45B Korangi creek road Karachi has submitted the GMP certificate based on evaluation conducted on 15th June, 2021, valid till 14-06-2023.
ii. Submit renewal of DML and section approval letter of tablet and oral liquid section.	Firm has submitted renewal letter no. 2-12/93-Lic(Vol-V), dated 20-09-2021, wherein **Liquid Injection** (Ampoule, Vial, Infusion)(General) , **Oral liquid** (General) sections are approved. Firm has provided 2-12/93(Vol-V), dated 30-09-2021, wherein **Tablet (General**)-Revised section is approved.
iii. Provided GMP certificate of Drug substance manufacturer is expired.	Firm has provided GMP certificate of Ruyuan HEC Pharm Co. Ltd, Xiaba Dvelopmetn zone, Ruyuan Country, Shaoguan city, 512721, Guangdong , China., However it is valid till 28-11-2022, issued by Germany.

iv. Justification required for not including particle size and crystal form in specification of drug substance in accordance with drug substance manufacturer.	We followed the supplier results during the product development stage.
v. Justification required for usage of different RPM (i.e. 75 rpm) whereas innovator is using 50 rpm in comparative dissolution profile of tablet dosage form.	We followed HO Guidelines to perform CDP. As per WHO guidelines technical report series, No. 937, 2006, Annex 7. A paddle apparatus at 75 rpm is used for tablets.
vi. Comparative dissolution profile is submitted against comparator's brands while the studies should be performed against the innovator's / reference product.	CDP of Bripsy tablet 10 , 25 , 50, 75, and 100mg are submitted against competitor brand because of the absence of an innovator sample.
vii. Provide calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies. In calculation of stability studies average value of standard area is not in accordance with chromatograms.	Firm has submitted calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies.
viii. Firm has provided 9 months real time stability data of drug substance manufacturer. Whereas shelf life of the drug substance is 2 years. Complete stability data as per claim shelf life required.	Firm has provided 12 months real time stability data of drug substance manufacturer
ix. Qualitative master formulation composition of liquid injection and oral solution are not similar as per innovator.	In initial dossier of form 5 D formulation of the product was different. However, in stability studies batches firm has used same qualitative composition. Requisite fee for change in formulation not submitted.
x. Finished product specifications of liquid injection are not in accordance with innovator and pharmacopoeia i.e. Osmolality, Container Closure Integrity Test and extractable volume etc.	The product Bripsy injection is tested as per developed specification including test appearance, identification, pH, Assay, particulate matter, sterility, BET and related substances. other test container closure integrity and extractable volume test are conducted at development stage
xi. Firm has submitted copy of Purchase Invoice No. WIS210021 dated 25-03-2021, specifying the import of 1 kg of Brivaracetam, duly attested by Assistant Director, DRAP, Karachi. Justification required. As total theoretical value of Brivaracetam consumed in stability batches is more than imported quantity. Furthermore, evidence is required regarding import of Injectable grade material for manufacturing of liquid injection.	Material was procured from 02 invoices (wis210021 & wis210022) duly endorsed by respective Assistant Director, DRAP, Karachi.

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

<tr><td>i. GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.</td><td>M/s Genix Pharma Private Limited,44-45B Korangi creek road Karachi has submitted the GMP certificate based on evaluation conducted on 15th June, 2021, valid till 14-06-2023.</td></tr>
<tr><td>ii. Submit renewal of DML and section approval letter of tablet and oral liquid section.</td><td>Firm has submitted renewal letter no. 2-12/93-Lic(Vol-V), dated 20-09-2021, wherein Liquid Injection (Ampoule, Vial, Infusion)(General) , Oral liquid (General) sections are approved.</td></tr>
</table>

	Firm has provided 2-12/93(Vol-V), dated 30-09-2021, wherein **Tablet (Genera**l)-Revised section is approved.
iii. Provided GMP certificate of Drug substance manufacturer is expired.	Firm has provided GMP certificate of Ruyuan HEC Pharm Co. Ltd, Xiaba Dvelopmetn zone, Ruyuan Country, Shaoguan city, 512721, Guangdong , China., However it is valid till 28-11-2022, issued by Germany.
iv. Justification required for not including particle size and crystal form in specification of drug substance in accordance with drug substance manufacturer.	We followed the supplier results during the product development stage.
v. Justification required for usage of different RPM (i.e. 75 rpm) whereas innovator is using 50 rpm in comparative dissolution profile of tablet dosage form.	We followed HO Guidelines to perform CDP. As per WHO guidelines technical report series, No. 937, 2006, Annex 7. A paddle apparatus at 75 rpm is used for tablets.
vi. Comparative dissolution profile is submitted against comparator's brands while the studies should be performed against the innovator's / reference product.	CDP of Bripsy tablet 10 , 25 , 50, 75, and 100mg are submitted against competitor brand because of the absence of an innovator sample.
vii. Provide calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies. In calculation of stability studies average value of standard area is not in accordance with chromatograms.	Firm has submitted calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies.
viii. Firm has provided 9 months real time stability data of drug substance manufacturer. Whereas shelf life of the drug substance is 2 years. Complete stability data as per claim shelf life required.	Firm has provided 12 months real time stability data of drug substance manufacturer
ix. Qualitative master formulation composition of liquid injection and oral solution are not similar as per innovator.	In initial dossier of form 5 D formulation of the product was different. However, in stability studies batches firm has used same qualitative composition. Requisite fee for change in formulation not submitted.
x. Finished product specifications of liquid injection are not in accordance with innovator and pharmacopoeia i.e. Osmolality, Container Closure Integrity Test and extractable volume etc.	The product Bripsy injection is tested as per developed specification including test appearance, identification, pH, Assay, particulate matter, sterility, BET and related substances. other test container closure integrity and extractable volume test are conducted at development stage
xi. Firm has submitted copy of Purchase Invoice No. WIS210021 dated 25-03-2021, specifying the import of 1 kg of Brivaracetam, duly attested by Assistant Director, DRAP, Karachi. Justification required. As total theoretical value of Brivaracetam consumed in stability batches is more than imported quantity. Furthermore, evidence is required regarding import of Injectable grade material for manufacturing of liquid injection.	Material was procured from 02 invoices (wis210021 & wis210022) duly endorsed by respective Assistant Director, DRAP, Karachi.

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

vii. Provide calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies. In calculation of stability studies average value of standard area is not in accordance with chromatograms.	Firm has submitted calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies.
viii. Firm has provided 9 months real time stability data of drug substance manufacturer. Whereas shelf life of the drug substance is 2 years. Complete stability data as per claim shelf life required.	Firm has provided 12 months real time stability data of drug substance manufacturer
ix. Qualitative master formulation composition of liquid injection and oral solution are not similar as per innovator.	In initial dossier of form 5 D formulation of the product was different. However, in stability studies batches firm has used same qualitative composition. Requisite fee for change in formulation not submitted.
x. Finished product specifications of liquid injection are not in accordance with innovator and pharmacopoeia i.e. Osmolality, Container Closure Integrity Test and extractable volume etc.	The product Bripsy injection is tested as per developed specification including test appearance, identification, pH, Assay, particulate matter, sterility, BET and related substances. other test

	container closure integrity and extractable volume test are conducted at development stage
xi. Firm has submitted copy of Purchase Invoice No. WIS210021 dated 25-03-2021, specifying the import of 1 kg of Brivaracetam, duly attested by Assistant Director, DRAP, Karachi. Justification required. As total theoretical value of Brivaracetam consumed in stability batches is more than imported quantity. Furthermore, evidence is required regarding import of Injectable grade material for manufacturing of liquid injection.	Material was procured from 02 invoices (wis210021 & wis210022) duly endorsed by respective Assistant Director, DRAP, Karachi.
Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**	

637.	Name and address of manufacturer / Applicant	M/s Genix Pharma Private Limited 44-45B Korangi creek road Karachi
	Brand Name +Dosage Form + Strength	Bripsy Injection
	Composition	Each ml contains: Brivaracetam….10mg (Innovator's Specifications)
	Diary No. Date of R& I & fee	Dy. No.3539 dated 18-04-2017, Fee Rs: 50,000/- dated 17-04-2017 vide deposit slip No. 0515339.
	Pharmacological Group	Anti-epileptic
	Type of Form	Form 5D
	Finished product Specifications	(Innovator's specifications)
	Pack size & Demanded Price	5mlx1's & 5mlx10's. As per PRC
	Approval status of product in Reference Regulator Authorities	Briviact Injection by UCB Inc. USFDA Approved
	Me-too status	N/A

Date of Submission	21-06-2022		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Submitted
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Submitted
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of APIs from both API Manufacturers and Finished Product Manufacturer are provided by the firm.
4.	Stability study data of API from API manufacturer	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 9 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches (BVC-201909103F1, BVC-201909102F1, BVC-201909101F1)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate valid till 28-11-2022
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Purchase invoice No. WIS210021 dated 25-03-2021, specifying the import of 1 kg of Brivaracetam, duly attested by Assistant Director , DRAP, Karachi.
7.	Protocols followed for conduction of stability study	Submitted
8.	Method used for analysis of FPP	Submitted
9.	Drug-excipients compatibility studies (where applicable)	Composition of liquid injection is not similar as per innovator.
10.	Complete batch manufacturing record of three stability batches.	The firm has submitted Batch Manufacturing record of following 03 Batches: **Batch No.** / **Batch Size** / **Mfg. Date** 21SB(B)-031-01 / 2250ml (450 vials) / 08-2021 21SB(B)-032-02 / 2250ml (450 vials) / 08-2021 21SB(B)-033-03 / 2250ml (450 vials) / 08-2021
11.	Record of comparative dissolution data (where applicable)	N/A

12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of evaluator

Observation	**Response of Firm**
i. GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	M/s Genix Pharma Private Limited,44-45B Korangi creek road Karachi has submitted the GMP certificate based on evaluation conducted on 15th June, 2021, valid till 14-06-2023.
ii. Submit renewal of DML and section approval letter of tablet and oral liquid section.	Firm has submitted renewal letter no. 2-12/93-Lic(Vol-V), dated 20-09-2021, wherein **Liquid Injection** (Ampoule, Vial, Infusion)(General) , **Oral liquid** (General) sections are approved. Firm has provided 2-12/93(Vol-V), dated 30-09-2021, wherein **Tablet (Genera**l)-Revised section is approved.
iii. Provided GMP certificate of Drug substance manufacturer is expired.	Firm has provided GMP certificate of Ruyuan HEC Pharm Co. Ltd, Xiaba Dvelopmetn zone, Ruyuan Country, Shaoguan city, 512721, Guangdong , China., However it is valid till 28-11-2022, issued by Germany.
iv. Justification required for not including particle size and crystal form in specification of drug substance in accordance with drug substance manufacturer.	We followed the supplier results during the product development stage.
v. Justification required for usage of different RPM (i.e. 75 rpm) whereas innovator is using 50 rpm in comparative dissolution profile of tablet dosage form.	We followed HO Guidelines to perform CDP. As per WHO guidelines technical report series, No. 937, 2006, Annex 7. A paddle apparatus at 75 rpm is used for tablets.
vi. Comparative dissolution profile is submitted against comparator's brands while the studies should be performed against the innovator's / reference product.	CDP of Bripsy tablet 10 , 25 , 50, 75, and 100mg are submitted against competitor brand because of the absence of an innovator sample.
vii. Provide calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies. In calculation of stability studies average value of standard area is not in accordance with chromatograms.	Firm has submitted calculation of system suitability i.e. RSD in raw data of accelerated and real time stability studies.
viii. Firm has provided 9 months real time stability data of drug substance manufacturer. Whereas shelf life of the drug substance is 2 years. Complete stability data as per claim shelf life required.	Firm has provided 12 months real time stability data of drug substance manufacturer
ix. Qualitative master formulation composition of liquid injection and oral solution are not similar as per innovator.	In initial dossier of form 5 D formulation of the product was different. However, in stability studies batches firm has used same qualitative composition. Requisite fee for change in formulation not submitted.
x. Finished product specifications of liquid injection are not in accordance with innovator and pharmacopoeia i.e. Osmolality, Container Closure Integrity Test and extractable volume etc.	The product Bripsy injection is tested as per developed specification including test appearance, identification, pH, Assay, particulate matter, sterility, BET and related

	substances. other test container closure integrity and extractable volume test are conducted at development stage
xi. Firm has submitted copy of Purchase Invoice No. WIS210021 dated 25-03-2021, specifying the import of 1 kg of Brivaracetam, duly attested by Assistant Director, DRAP, Karachi. Justification required. As total theoretical value of Brivaracetam consumed in stability batches is more than imported quantity. Furthermore, evidence is required regarding import of Injectable grade material for manufacturing of liquid injection.	Material was procured from 02 invoices (wis210021 & wis210022) duly endorsed by respective Assistant Director, DRAP, Karachi.

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Remarks OF Evaluator:

Sr.#	Section#	Observation
1.	**1.3.5**	Firm has provided GMP Certificate which is valid until 07-03-2022 based on evaluation conducted on 08-03-2019.GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.
2.	**1.6.5**	Provide valid GMP Certificate of drug substance manufacturer.
3.	**3.2.S.4**	• In Analytical Method drug substance manufacturer water limit is not more than 3 %. Whereas in Japanese Pharmacopoeia it is not more than 1.0 %. Justification required. Analytical procedure of drug substance manufacturer is in complete. • Analytical Method validation studies for drug substance are missing.
4.	**3.2.S.7**	In stability studies of Drug substance manufacturer data for 2-year real time stability studies has been provided. However as per COA DS manufacturer is claiming 3 years shelf life. 3 years real time stability data is required.

5.	**2.3.P.1**	Justification of overages in the formulation(s) described in 2.3.P.1
6.	**3.2.P.2.2.1**	Justification shall be submitted for not performing Pharmaceutical equivalence studies against the innovator product.
7.	**3.2.P.7**	• In Section 3.2.P.1. Type of Container Closure System is Type 1. Whereas in Section 3.2.P.8 T Is Mentioned USP Type III vials mentioned. Justification required. • Justification required for usage of USP Type- III glass for injectable.
8.	**3.2.P.8.**	• Justification required for not including sterility and bacterial Endotoxin testing in stability studies. • Justification required regarding batch size of 120 vials in stability studies. • Submit clear/readable copies of chromatograms, Raw data sheets.
Decision of 322nd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.		

Sr.#	Section#	Observation	Response of firm
1.	**1.3.5**	Firm has provided GMP Certificate which is valid until 07-03-2022 based on evaluation conducted on 08-03-2019.GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	Firm has submitted valid GMP certificate of M/s Daneen Pharma Private Limited27-Sundar Industrial Estate, Sundar Raiwind Road, Lahore, based on evaluation conducted on27-10-2021 valid till 26-10-2024.
2.	**1.6.5**	Provide valid GMP Certificate of drug substance manufacturer.	Firm has submitted manufacturing license of M/s Shandong Luoxin Pharmaceutical Group Hengxin Pharmaceutical Co., Ltd., valid till 26-10-2025.
3.	**3.2.S.4**	• In Analytical Method drug substance manufacturer water limit is not more than 3 %. Whereas in Japanese Pharmacopoeia it is not more than 1.0 %. Justification required. Analytical procedure of drug substance manufacturer is in complete. • Analytical Method verification studies for drug substance are missing.	• Firm has submitted revised analytical method with water limit NMT 1 %. However fee for revision of specification has not submitted. Missing
4.	**3.2.S.7**	In stability studies of Drug substance manufacturer data for 2-year real time stability studies has been provided. However as per COA DS manufacturer is claiming 3 years shelf life. 3 years real time stability data is required.	Submitted
5.	**2.3.P.1**	Justification of overages in the formulation(s) described in 2.3.P.1	
6.	**3.2.P.2.2.1**	Justification shall be submitted for not performing Pharmaceutical equivalence studies against the innovator product.	Due to non availability of innovator brand firm has performed Pharmaceutical equivalence Xorbact Injection (B#2080197) by M/s Curexa Health (Pvt.) Limited
7.	**3.2.P.7**	• In Section 3.2.P.1. Type of Container Closure System is Type 1. Whereas in Section 3.2.P.8 T Is Mentioned USP Type III vials mentioned. Justification required. • Justification required for usage of USP Type- III glass for injectable.	Zalpaz 500mg Injection Containing Cefoperazone Sodium Eq. To Cefoperazone ….250mg Sulbactam Sodium Eq. To Sulbactam….250mg is Packed In Type-III Glass Vials as its compatibility has been practically established by accelerated stability studies for reference USP<660> container-glass "suitable stability test data indicate that type iii glass is satisfactory."
8.	**3.2.P.8.**	a. Justification required for not including sterility and bacterial Endotoxin testing in stability studies. b. Justification required regarding batch size of 120 vials in stability studies. c. Submit clear/readable copies of chromatograms, Raw data sheets.	a. Stability studies of zalpaz injection 500 mg were performed as per ICH guidelines (ICH Harmonized tripartite guidelines stability testing of new drug substances and products Q1A(R2) current step 4 version dated 06 February 2003). In section 2.15 regarding the selection of the specification for stability study it states that stability studies should include testing of those attributes of the drug substance that are susceptible to change during storage. As the used container closure system is well established for its compatibility for sterile products, hence the sterility and endotoxin are not susceptible during storage. b. submitted C. submitted

Approved with container closure as Type I glass vial for drug product.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.17785: Dated 25-06-2021
	Details of fee submitted	PKR 30,000/-: Dated 10-06-2021
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 23-04-2019.
	The proposed proprietary name / brand name	Colicraft Injection I.V 2MIU
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Colistimethate Sodium……..2MIU
	Pharmaceutical form of applied drug	Glass vial filled with almost white to off-white colored Lyophilized Powder for Injection.
	Pharmacotherapeutic Group of (API)	Antibacterial agent
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Colistimethate sodium for injection of M/s Mukhtar Enterprises Lahore (Reg#094757).
	For generic drugs (me-too status)	Colistimethate sodium 2 MIU, powder for solution for injection by M/s PANMEDICA (MHRA Approved).
	Name and address of API manufacturer.	M/s Mac-Chem Products (India) Pvt. Ltd., N-211/2/10, MIDC. Boisar, District –Thane, Pin – 401 506, Maharashtra, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	The firm has submitted detailed data for drug substance related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing

		process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2 °C / /65% ± 5%RH RH for 12 months Accelerated: 40°C ± 2°C /75% ± 5%RH for 6 months Batches: (CLS0219006, CLS0219008, CLS0219009).
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence of trial formulation (Batch # T001) against reference product Colistimethate Sodium 2MIU Injection (Lot No. 3056579) of M/s Xellia Pharmaceuticals by performing Biological assay by zone of inhibition method.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Mac-Chem Products (India) Pvt. Ltd., N-211/2/10, MIDC. Boisar, District –Thane, Pin – 401 506, Maharashtra, India.		
API Lot No.	CLS0218009		
Description of Pack (Container closure system)	Glass vial

Batch Size	1000 Vials	1000 Vials	1000 vials
Manufacturing Date	08-2018	08-2018	08-2018
Date of Initiation	12-08-2018	14-08-2018	16-08-2018
No. of Batches	03		

DOCUMENTS / DATA REQUIRED ALONGWITH APPLICATION

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. NEW-WHO-GMP/CERT/KD/74238/2018/11/24897 issued by Food and Drug Administration, Maharashtra State, India valid till 10-09-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice # 67533/2020 dated 27-01-2020 with received quantity of 5Kg) for the purchase of Colistimethate sodium for Injection. The invoice is cleared by Assistant director (I & E), DRAP, Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N.A.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Observations communicated	Response by the firm
1.	Analytical method verification studies including specificity, accuracy and repeatability (method precision) performed by the drug product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted.	The firm has submitted Bioassay test method validation protocol and reports for the determination of colistimethate sodium by performing accuracy, precision, Linearity, range, ruggedness and specificity parameters.
2.	Valid copy of GMP certificate of drug substance manufacturer issued by country of origin.	
3.	COA of primary / secondary reference standard including source and lot number shall be provided.	The firm has submitted certificate of analysis showing working standard calibration report.
4.	Submit master formulation including theoretical fill weight per vial.	The firm has submitted master formulation showing quantity of fill weight per vial.
5.	Justify why pharmaceutical equivalence studies do not include all the tests as recommended by USP. Instead the test for microbiological has been performed only.	Firm has submitted revised pharmaceutical equivalence against reference product Colistimethate Sodium 2MIU Injection (Lot No. 3056579) of M/s Xellia Pharmaceuticals by performing identification, pH, uniformity of dosage unit, particulate matter, Biological assay, sterility and Endotoxin.
6.	Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized Colistimethate for Injection from M/s Mac-Chem Products (India) Pvt. Ltd.	The firm has submitted that the bulk and raw material of colistimethate sodium was available in lyophilized powder form. The raw material is then formulated into solution which is filled and lyophilized.
7.	Provide detailed method of analysis of the drug product instead of providing copy of USP monograph.	The firm has submitted method of analysis of the drug product.

8.	Provide detailed protocols how validation of analytical procedures of the drug product was carried out and further justify how the recovered concentration (mg/ml) was calculated in accuracy and recovery.	The firm has submitted Bioassay test method validation protocol and reports for the determination of colistimethate sodium. Accuracy is determined by standard addition method, previously analyzed sample with concentration of 0.2mg/ml were spiked with 50, 100, and 150% API and the mixtures were analyzed by the proposed method.
9.	Provide COA of reference standard actually used in the analysis of drug product.	The firm has submitted copy of USP primary reference standard with lot no. H3J047.
10.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	The firm has submitted copies of batch manufacturing records for all the batches of drug product for which stability studies data is provided.

Decision of 321st meeting of Registration Board: Deferred for following submissions:

- Valid GMP certificate or DML of drug substance manufacturer issued by relevant regulatory authority of the country of origin since submitted GMP certificate was valid till 10-9-2021.
- Scientific justification for using prelyophilized drug substance for formulation of the finished drug product by way of lyophilization.

S.no.	Observation	Response of the firm
1.	Valid GMP certificate or DML of drug substance manufacturer issued by relevant regulatory authority of the country of origin since submitted GMP certificate was valid till 10-9-2021.	Firm has submitted valid GMP Certificcate of M/s Mac-Chem Products (India) Pvt. Ltd., N-211/2/10, MIDC. Boisar, District –Thane, Pin – 401 506, Maharashtra, India, valid till 30-04-2023.
2.	Scientific justification for using prelyophilized drug substance for formulation of the finished drug product by way of lyophilization.	Firm has stated that we do not purchase the pre-lyophilized drug substance but the sterile only. Relevant ADC is provided. COA submitted initially was wrong which was given by supplier. We are submitting again the corrected COA for your kind review and approval of product registration.

Decision of 323rd meeting of registration Board regarding Colistimethate Sodium:

Registration Board deliberated the matter in details and after through discussion, decided as under;

1. The concerned label claim of existing registrations of Injection of Colistimethate sodium shall be updated according to approved pharmacopoeial specifications as per following details:

- For U.S.P specification the revised label claim shall be,
  Each vial/lyophilized vial Contains:
  Colistimethate sodium (equivalent to) …… (Relative strength of) mg colistin base activity

  For example for 1MIU:
  Each vial Contains:
  Colistimethate sodium equivalent to 34mg Colistin base activity

- For B.P specification the revised label claim shall be,
  Each vial/ lyophilized vial contains:
  Colistimethate sodium…… (Relative strength of) million IU

  For example, for 1MIU:
  Each vial Contains:
  Colistimethate sodium ……1MIU

2. Registration Board has further decided to advise registration holders to also mention equivalency of "Colistimetahte sodium (IU)" with "Colistin base activity" in miligrams, on unit carton and label according to relevant strength as the case may be, for examples, as under.

"Potency of Colistimethate sodium:

1 Million IU	equivalent to	34 mg Colistin base Activity (approximately)
4.5 Million IU	equivalent to	150 mg Colistin base Activity (approximately)
9 Million IU	equivalent to	300 mg Colistin Base Activity (approximately)"

Pharmaceutical firms having already registration of "Colistimethate sodium injection" shall apply to PE&R Division with requisite documents and fee for harmonization of the label claim as per point 1 of above decision.
Decision of 324th meeting: Approved with label claim for USP specifications as decided in 323rd meeting of Registration Board. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	Femipla-Ject Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 1mL ampoule contains: Norethisterone Enanthate……..50mg Estradiol Valerate……..5mg
	Pharmaceutical form of applied drug	Oily solution for Injection (IM)
	Pharmacotherapeutic Group of (API)	Progestogens (Contraceptive) ATC Code: G03AC
	Reference to Finished product specifications	Hansel Specifications
	Proposed Pack size	1ml × 1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Estradiol valerate/Norethisterone enantate Solution for injection 5mg/50mg/mL (WHO prequalified product).
	For generic drugs (me-too status)	FEMI-JECT Injection by M/s Bayer pharma (Pvt.) Ltd. Lahore, (Reg # 022372).
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 15-05-2019. The firm has provided Liquid Injectable Hormone section.
	Name and address of API manufacturer.	**Norethisterone Enanthate:** M/s Zhejiang Xianju Junye Pharmaceutical Co., Ltd., No.1 Lingxiu Road, Modern Industrial Centralization zone, Xianju, Taizhou, Zhejiang, China.

		Estradiol Valerate: M/s ASG. Biochem Pvt. Ltd., Ganganagar, 24 Parganas, West Bengal India.
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted details of nomenclature, structure, general properties, solubility, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substances (Norethisterone Enanthate+ Estradiol Valerate).
	Stability studies	**Norethisterone Enanthate:** Stability study conditions: Real time: 30°C±2°C/65% ± 5%RH for 24 months. Accelerated: 40°C±2°C/75%±5%RH for 6 months. Batches: (30761308001, 30761308002, 30761308003). **Estradiol Valerate**: Stability study conditions: Real time: 30°C±2°C/65% ± 5%RH for 48 months. Accelerated: 40°C±2°C/75%±5%RH for 6 months. Batches: (ESVZ01A002, ESVZ01A005, ESVZ01A006).
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence has been established against the comparator product Femi-Ject by Bayer Pharma by performing quality tests (Identification, Assay, pH, Particulate matter, Sterility). Dissolution profile in not applicable in Femipla-Ject Injection.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	It is the submission of first dossier on CTD format, thus no inspection conducted regarding stability studies of the applied product.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Norethisterone Enanthate:** The firm has submitted copy of GMP certificate for M/s Zhejiang Xianju Junye Pharmaceutical Co. issued by national medical products administration valid till 29-11-2024. **Estradiol valerate:** The firm has submitted copy of GMP certificate for M/s ASG Biochem Pvt. Ltd. issued by Director of Drugs Control, Govt. of West Bangal. The license is valid till 24-10-2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Norethisterone Enanthate**: The firm has submitted copy of invoice specifying import of Norethisterone enanthate 20gm (Batch # 3076190701M) attested by Assistant Director (I & E) Lahore dated 30-09-2019. **Estradiol Valerate:** The firm has submitted copy of invoice specifying import of estradiol valerate 20gm (Batch # 190401) attested by Assistant Director (I & E) Lahore dated 01-08-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable.
6.	Record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

Sr. No.	Observations	Response by the firm
1.	Provide copies of the Drug substance specifications and analytical procedures used for	The firm has provided copies of drug substance specifications and analytical procedures.

	routine testing of the Drug substance by both Drug substance & Drug Product manufacturer.	
2.	Provide certificate of Analysis (CoA) of the drug substance (Estradiol valerate) from drug substance manufacturer.	The firm has submitted certificate of analysis of Estradiol valerate from drug substance manufacturer.
3.	Provide the details of the reference product including batch number, manufacturing date and expiry date.	The firm has submitted details of reference product: Name: FEMI-JECT Injection Batch number: MP06249 Mfg date: 09-2019 Expiry date: 09-2024
4.	Justify why you have not performed the tests of clarity of solution and bacterial endotoxin in the pharmaceutical equivalence study.	Not submitted
5.	Justify why tests of pH and ampoule sealing are included in specifications under analytical procedures (3.2.P.5.2). Moreover, provide the pharmacopoeial reference where the test of "ampoule sealing" is mentioned	Not submitted
6.	Justify the test of pH throughout stability studies for development batches of oily injection.	Not submitted
7.	Reference of previous approval of applications with stability study data of the firm (if any).	The firm has submitted previous approvals of products in this section.
8.	Submit compliance Record of HPLC software 21CFR. The submitted audit trail reports do not specify the software used in HPLC and further clarify the demo version of software.	The firm has not submitted audit trail record of HPLC software 21 CFR.

Decision of 321st meeting of registration board: Deferred for following:

- Evidence of required manufacturing facility / section from Licensing Division.
- Scientific justification for not performing the tests of clarity of solution and bacterial endotoxin in the pharmaceutical equivalence study.
- Scientific justification for the test and limits of pH and ampoule sealing test for oily injection.
- Scientific justification for performing the test of pH throughout stability studies for development batches of oily injection.

Sr. No.	Observations	Response by the firm
1.	Evidence of required manufacturing facility / section from Licensing Division.	Firm has provided approval of revised section namely Liquid Injectable (Hormone) (Reallocated from list floor to ground floor), vide letter no. F. 1-9/2001-Lic(Vol-II), dated 03-10-2019
2	Scientific justification for not performing the tests of clarity of solution and bacterial endotoxin in the pharmaceutical equivalence study.	Firm has provided Pharmaceutical equivalence study with test of clarity of solution and Bacterial endotoxin tests.
3	Scientific justification for the test and limits of pH and ampoule sealing test for oily injection.	pH & ampoule sealing are included in specifications under analytical procedure (3.2.P.5.2) Because product is non-pharmacopoeial, so in-house specifications are used for pH to control process of manufacturing. Whereas ampoules sealing test is used to verify sealing integrity of container closure to maintain sterility of product.
4	Scientific justification for performing the test of pH throughout stability studies for development batches of oily injection.	The product is non-pharmacopoeial so in-house specifications are used for pH throughout stability studies for development batches of oily injection to control process of manufacturing.

Decision of 322nd meeting of registration board: Registration Board decided to defer the case for further deliberation against the quality parameters and specifications of innovator's drug product.

Firm has submitted reply in light of 322nd meeting:

We would like to omit the parameter of pH from the FPP specifications. For this purpose, we have also submitted fee for pre-registration variation i.e. change in FPP specification(30811229193).

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

S.no.	Section	Observations
1.	**3.2.S.4**	• In analytical method conditions for HPLC testing are not in accordance with the conditions of Drug Substance manufacturer. • In analytical testing penicillanse are not used in sterility testing, in accordance with Pharmacopoeia and analytical method of drug substance manufacturer.
2.	**3.2.P.2.2.1**	Justification shall be submitted for not performing Pharmaceutical equivalence studies against the innovator product.
3.	**3.2.P.5.2**	In official pharmacopoeia (BP) reference standard are lithium clavulante and amoxicillin trihydrate. Whereas in analytical method of drug product manufacturer amoxicillin and clavulanic acid are used as working standard. justification required**.**
4.	**3.2.P.5.2**	In analytical method validation of drug product justification is required regarding limits of Mean recovery %age in accuracy, repeatability and intermediate precision etc. (i.e. limit of Mean recovery %age for 120 % concentration is 108-144.0%).
5.	**3.2.P.7**	• A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials. • In BMR it is mentioned that 20 cc glass vials have been used. However, innovator is using 25 or 50 ml vial. Furthermore, Co Amoxiclave 1000 mg/200 mg should be dissolved in 20 ml of solvent. This yields approximately 20.9 ml of solution for single-dose use. Justification required. • In BMR of Co-amoxiclave 600 mg Glass Vials Type III (10cc) are mentioned). Whereas in Section 3.2.P.1 it is Type-II Glass vials. Justification required.
6.	**3.2.P.8**	• Firm has provided stability data for only 03 months for accelerated stability studies and real time stability studies. • Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Sterility testing is not included in stability data and Pharmaceutical equivalence studies. • Stability record of T-002 Batch of Co-amoxiclave 600 mg injection missing.

		• In stability data sheets resolution has not been calculated as per the official pharmacopeia i.e. BP. • Record of Digital data logger for temperature and humidity monitoring of stability chambers and audit trail reports on product testing for complete testing periods are missing.

Decision of 322nd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

S.no.	Section	Observations	Response of firm
1.	**3.2.S.4**	• In analytical method conditions for HPLC testing are not in accordance with the conditions of Drug Substance manufacturer. • In analytical testing penicillanse are not used in sterility testing, in accordance with Pharmacopoeia and analytical method of drug substance manufacturer.	• As drug substance is in mixture form Amoxicillin: clavulanic acid(5:1) and monograph in BP available for analyzing the drug product combination of Amoxicillin: clavulanic acid with ratio (5:1) . So we have used the same method in drug substance and method is verified. • Not submitted
2.	**3.2.P.2.2.1**	Justification shall be submitted for not performing Pharmaceutical equivalence studies against the innovator product.	Firm has submitted Pharmaceutical equivalence studies against Augmentin (GSK) injection
3.	**3.2.P.5.2**	In official pharmacopoeia (BP) reference standard are lithium clavulante and amoxicillin trihydrate. Whereas in analytical method of drug product manufacturer amoxicillin and clavulanic acid are used as working standard. justification required**.**	Firm has stated that we have used the same reference standard (working standards provided by API manufacturer)
4.	**3.2.P.5.2**	In analytical method validation of drug product justification is required regarding limits of Mean recovery %age in accuracy, repeatability and intermediate precision etc. (i.e. limit of Mean recovery %age for 120 % concentration is 108-144.0%).	It was typographic mistake. Firm has submitted revised method validation report with revised limits.
5.	**3.2.P.7**	• A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided. Please also provide USP type of glass vials. • In BMR it is mentioned that 20 cc glass vials have been used. However, innovator is using 25 or 50 ml vial. Furthermore, Co Amoxiclave 1000 mg/200 mg should be dissolved in 20 ml of solvent. This yields approximately 20.9 ml of solution for single-dose use. Justification required. • In BMR of Co-amoxiclave 600 mg Glass Vials Type III (10cc) are mentioned). Whereas in Section 3.2.P.1 it is Type-II Glass vials. Justification required.	We are using 25cc glass vials type- II.
6.	**3.2.P.8**	• Firm has provided stability data for only 03 months for accelerated stability studies and real time stability studies. • Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Sterility testing is not included in stability data and Pharmaceutical equivalence studies. • Stability record of T-002 Batch of Co-amoxiclave 600 mg injection missing.	Submitted Submitted Submitted Firm has provided revised stability data

		• In stability data sheets resolution has not been calculated as per the official pharmacopeia i.e. BP. • Record of Digital data logger for temperature and humidity monitoring of stability chambers and audit trail reports on product testing for complete testing periods are missing.	Not calculated Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	For generic drugs (me-too status)	Articaine 4% with Epinephrine 1:200000 of continental Chemical Company Islamabad. Reg. No: 052239
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**ARTICAINE HCL:** i. **Name of Holder**: Moehs Iberica S.L Cesar MArtinell Brunet No., 12 A Poligono Industrial rubi Sur Apain 08191 Rubi Barcelona **Sites of Production**: Benechim S.P.R.L Rue Rene Magritte, 163 Begium 7860 Lessines ii. **Name of Holder:** SIEGFRIED EVIONNAZ SA, Route du Simplon 1, 36 Switzerlan-1902 Evuibbaz

		Sites of Production:SIEGFRIED ST. VULBAS SAS Parc Industrial de la plaine de I'Ain France-01150 Saint-Vulbas **Siegfried Evionnaz SA** Route du Simplon 1, 36 Switzerlan-1902 Evuibbaz **ADERNALINE TARTRATE:** **Name of Holder**: CAMBREX PROFARMACO MILANO S.R.L. Via Curiel, 34 Italy-20067 Paullo, Milano **Site of Production:-** CAMBREX PROFARMACO MILANO S.R.L. Via Curiel, 34 Italy-20067 Paullo, Milano
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC. The stability study data is provided till 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has submitted the Pharmaceutical equivalence with reference products.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	The Primary container consists of a 1.8ml glass cartridge made of neutral glass type closed with bromobutyl rubber plunger and bromobutyl rubber seal with an aluminium cap.
	Stability study data of drug product, shelf life and storage conditions	Stability testing results of 3 batches of formulation are reported at 25ºC RH 60% for 24 months, **30ºC / 65%RH for 12 months** and 40ºC RH 75% for 6 months. The only impurity detected whose concentration varies with time and temperature is Articaine acid (Hydrolysis products of Articaine) which although reaches maximum concentration of 0.35% after 6 months at 40ºC (stressed condition) still remains within the set specification of NMT 0.4% in area with respect to Articaine. Articaine Acid is the main metabolite of Articaine and the concentrations found in the drug product, even at the end of shelf life does not pose any potential heal concern. The formulation is quite stable and remains within specifications after 24 months at 25ºC, consequently a shelf life storage condition of 24 months at 25ºC is proposed for the drug product stored in its commercial packaging.
Query		**Reply**

i. Valid Drug Sale License because the submitted copy indicates validity till 19.02.2022.	The firm has submitted new drug sale license issued vide No. 0129 No. DHO (East) Drug-786 dated 18.06.2021 valid till 10.06.2023. having address Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi. The address mentioned on the aforesaid new DSL is different from the address of the DSL submitted initially with the application.
Differential fee of 50,000/- is required w.r.t. revised fee SRO because registration application was submitted on 07.10.2021.	The firm has now submitted the differential fee of 50000/- vide Slip No. 17375740 dated 03.08.2022.
Proposed Price needs to be submitted being requirement of application i.e. Form-5F.	The firm submitted price of Rs. 7000/- for 50 Cartridges of 1.8ml.
Reference of other similar approved medicines with information pertaining to Manufacturer name, brand name, strength, composition, registration number & dosage form, Pack size and Price as required under 1.5.8.	Articaine 4% with Epinephrine 1:200000 of continental Chemical Company Islamabad. Reg. No: 052239.
Long term stability study data need to be submitted as per Zone IV-A i.e. (30ºC/65%RH).	The firm has attached intermediate study of 30ºC / 65%RH for 12 months of three batches which has already been provided.
Evaluation by PEC: Registration Board in 321st meeting deferred for following and accordingly the reply is tabulated against each:	
Clarification whether the sole agency agreement is with M/s. Glisten Pharma, Plot No. 520 Sector 7/A Korangi Industrial Area Karachi or with M/s Glisten Pharma Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi.	The firm has submitted the new agency agreement indicating DSL: M/s Glisten Pharma Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi as warehouse of the firm and head office as M/s. Glisten Pharma, Plot No. 520 Sector 7/A Korangi Industrial Area Karachi
Clarification of the address of DSL since two DSL with different address have been submitted	The firm informed that we have change wareghouse due to safety reasons, hence DSL M/s Glisten Pharma Office No. 403 4th Floor Al Reef Tower, Plot No. 391/3 BYCHS Alamgir Road Karachi will be the ware house of the firm.
Submission of long term stability studies data as per Zone IV a conditions till claimed shelf life.	The storage conditions of the product is below 25C therefore stability studies for the Zone IV A are not conducted. Intermediate studies at 30C/65% RH have been performed.
Remarks: Registration Board in its 323rd meeting approved ORABLOC 1:100,000 as per following details: *"Approved with Innovators specifications as per policy of inspections of manufacturer abroad with shelf life as per available data of long term stability studies on Zone IV conditions. The firm shall also submit following before issuance of registration letter:* ***i.*** *New agency agreement in name of address as mentioned on the DSL because the earlier letter indicates DSL address as warehouse.* **ii.** *Full fee as address of Importer is changed as per submitted new DSL".*	
Decision: Approved with Innovators specifications as per policy of inspections of manufacturer abroad with shelf life as per available data of long term stability studies on Zone IV conditions. The firm shall also submit full fee of registration as address of Importer is changed as per submitted new DSL.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Lianyungang Jari Pharmaceutical Co., ltd No. 18 Zhenhua Road, Lianyungang China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Iclusig 45mg tablet , Incyte Biosciences UK limited has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Background of the case:

Decision in 321st meeting of Registration Board:

Deferred for following points:

i. Justification for conducting Comparative Dissolution studies at "M/s Alpha laboratories India", instead of M/s Beacon Pharmaceuticals Bangladesh.

ii. Regulatory status of Alpha Laboratories India, whether it is licensed entity or otherwise.

In response to the above decision of the Board the firm has submitted the reply on 04.011.2022 which is as under:

The firm has again submitted copy of business agreement dated 04.06.2018 b/w M/s Beacon Pharmaceuticals Bangladesh and M/s Alpha Laboratories India wherein the M/s Alpha Laboratories India shall provide the services being expert in Bioequivalence studies of generic molecules to M/s Beacon Pharmaceuticals Bangladesh.

Decision in 323rd meeting of Registration Board:

Deferred for submission of evidence of License/Approval of M/s Alpha Laboratories India, from the relevant regulatory authority of India.

Remarks:

The firm has now submitted letter from manufacturer i.e. M/s Beacon Pharmaceuticals Limited indicating a website link of M/s Alpha laboratories India (www.alphalaboratories.in). The website states that **Alpha Laboratories** is a unique and leading **Contract Research Organization (CRO)** in India with its own in-house laboratory facilities for undertaking **Bioequivalence / Bioavailability Studies, Clinical Trial Studies (Phase I, Phase II, Phase III and Phase IV), Animal Toxicity Study, Dossier and DMF preparation, PSUR (Periodic Safety Update Reports), Medical Writing, Stability Studies, Analytical Method Development and Validation**

Decision: Deferred for the evidence of approval for conducting Bioequivalence / Bioavailability Studies in name of M/s Alpha Laboratories India from the relevant regulatory authority of India.

	Name, address of drug substance manufacturer	M/s Shanghai Qingsong Pharmaceutical co., Ltd Suite No. 505 Building No. 2 No. 3377 Kangxin Rd, Pudong New Area Shanghai China 201318
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Iclusig 45mg tablet , Incyte Biosciences UK limited has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months
Background of the case: Deferred for clarification/ submission of following documents in 321st meeting of Registration Board		
You have submitted that drug substance is white to off white powder and no polymorphic form exists, however the as per innovator data the Olaparib exists as crystalline powder in four polymorphic forms.		Copy of letter from API manufacturer stating that Polymorphic form of Olaparib is Form-A and is synthesized at their site.
API is characterized by HNMR study only, characterization of the active substance, polymorphic forms/ impurities are required to be performed as per innovator product.		The firm submitted again the HNMR study only.
Particle size (being critical quality attribute) and residual solvents are not specified.		The CoA has been submitted by the manufacturer of API indicating particle size being specified and along with data of residual solvents.
The firm was requested to clarify that drug substance specifications by drug product manufacturer are required (3.2.S.4)) along with results of analysis of relevant batch(es) of drug substance performed by drug product manufacturer used during product		CoA of the FPP manufacturer is submitted

developmentand stability studies, along with Certificate of Analysis (CoA).		
Comparative dissolution profile is conducted by Alpha Laboratories Mumbai India, as the submitted justification is not relevant.		The firm has submitted copy of agreement between Alpha Laboratories Mumbai India and Beacon Pharmaceuticals Bangladesh. The firm has now submitted letter from manufacturer i.e. M/s Beacon Pharmaceuticals Limited indicating a website link of M/s Alpha laboratories India (www.alphalaboratories.in). The website states that **Alpha Laboratories** is a unique and leading **Contract Research Organization (CRO)** in India with its own in-house laboratory facilities for undertaking **Bioequivalence / Bioavailability Studies, Clinical Trial Studies (Phase I, Phase II, Phase III and Phase IV), Animal Toxicity Study, Dossier and DMF preparation, PSUR (Periodic Safety Update Reports), Medical Writing, Stability Studies, Analytical Method Development and Validation**
Stability data of Drug Product indicates same test results/ value for the parameters like moisture content, dissolution and assay, hence raw data needs to be submitted for verification		The firm has submitted the previous stability data.
Decision: Deferred for the evidence of approval for conducting Bioequivalence / Bioavailability Studies in name of M/s Alpha Laboratories India from the relevant regulatory authority of India.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5%

		RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Iclusig 45mg tablet , Incyte Biosciences UK limited has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months
Background of the case: Deferred for clarification/ submission of following documents in 321st meeting of Registration Board		
You have submitted that drug substance is white to off white powder and no polymorphic form exists, however the as per innovator data the Olaparib exists as crystalline powder in four polymorphic forms.		Copy of letter from API manufacturer stating that Polymorphic form of Olaparib is Form-A and is synthesized at their site.
API is characterized by HNMR study only, characterization of the active substance, polymorphic forms/ impurities are required to be performed as per innovator product.		The firm submitted again the HNMR study only.
Particle size (being critical quality attribute) and residual solvents are not specified.		The CoA has been submitted by the manufacturer of API indicating particle size being specified along with data of residual solvents
The firm was requested to clarify that drug substance specifications by drug product manufacturer are required (3.2.S.4)) along with results of analysis of relevant batch(es) of drug substance performed by drug product manufacturer used during product developmentand stability studies, along with Certificate of Analysis (CoA).		CoA of the FPP manufacturer is submitted
Comparative dissolution profile is conducted by Alpha Laboratories Mumbai India, as the submitted justification is not relevant.		The firm has submitted copy of agreement between Alpha Laboratories Mumbai India and Beacon Pharmaceuticals Bangladesh. The firm has now submitted letter from manufacturer i.e. M/s Beacon Pharmaceuticals Limited indicating a website link of M/s Alpha laboratories India (www.alphalaboratories.in). The website states that **Alpha Laboratories** is a unique and leading **Contract Research Organization (CRO)** in India with its own in-house laboratory facilities for undertaking **Bioequivalence / Bioavailability Studies, Clinical Trial Studies (Phase I, Phase II,**

		Phase III and Phase IV), Animal Toxicity Study, Dossier and DMF preparation, PSUR (Periodic Safety Update Reports), Medical Writing, Stability Studies, Analytical Method Development and Validation
Stability data of Drug Product indicates same test results/ value for the parameters like moisture content, dissolution and assay, hence raw data needs to be submitted for verification		The firm has submitted the previous stability data.
Decision: Deferred for the evidence of approval for conducting Bioequivalence / Bioavailability Studies in name of M/s Alpha Laboratories India from the relevant regulatory authority of India.		
889.	**Name, address of Applicant / Importer**	**M/s Sohail Corporation Plot No. 474 Siraj Colony Moosa Lane Karachi.**

	The proposed proprietary name / brand name	**LINCOMYCIN HYDROCHLORIDE INJECTION 600MG/2ML**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ampoule of 2ml contains: Lincomycin HCl USP equivalent to Lincomycin …..600mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Antibiotic (Lincosamide antibacterial)
	Reference to Finished product specifications	BP 2013

	Proposed Pack size	Not submitted
	Proposed unit price	Not submitted
	The status in reference regulatory authorities	Lincomycin SXP manufactured by Southern XP IP Pty Ltd Australia (TGA Approved)
	For generic drugs (me-too status)	
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Xinyu Pharmaceutical Co., Ltd No. 158 Jintai 5th Road Economic development Zone Suzhou Anhui Province China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API (17081041, 17081042, 17081043) conducted at accelerated conditions 40ºC ±2ºC / 75% ± 5% RH for 6 months as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC / 60 ± 5% RH & 30ºC ± 2ºC / 75 ± 5% RH. The stability study data is for 9 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence with 5 chines manufactured products is submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Low Borosilicate glass
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches (W170513, W170422 & W170722). The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 75% ± 5% RH. The real time stability study data of 3 batches is for 34 months

Remarks: The product was deferred in 321st meeting of registration Board for submission of valid legalized CoPP issued by the regulatory authority of country of origin. The firm has now submitted Legalized CoPP vide No. Anuhi 20210023 issued by Anhui Medical Products Administration China dated 28.01.2021 valid till 23.01.2023.
Decision: Approved as per policy of inspection of manufacturer abroad.

ii. Priority consideration based on Export.

a. Form-5F Cases

Below mentioned products have been referred by PR section vide letter No. 1-6/2019-PR (EFD) dated 06.10.2022 for consideration on priority as per direction of Authority in its 133rd meeting for the firms who have achieved benchmark f export of more than 100000USD. Accordingly, the details are as under:

890.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Getz Pharma (Pvt.) Limited 29-30/27, Korangi Industrial Area, Karachi.**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Estine (Ebastine) Tablets 10mg & 20mg on 6th May, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Copy of Drug Manufacturing License no. LIAO 20150233 issued by Liaoning Medical Products Administration valid till 17-01-2022. **Linagliptin:** Copy of Drug Manufacturing License no. LIAO 20150233 issued by Liaoning Medical Products Administration valid till 17-01-2022. **Metformin HCl:** Copy of GMP Certificate No. SD20190888 issued by CFDA, China valid till 12-03-2024.

<tr><td colspan="2">Shortcomings</td><td>Response</td></tr>
<tr><td colspan="2">As Linagliptin is R-enantiomer, clarification is required for performing identification test by HPLC rather chiral HPLC by API manufacturer and FPP manufacturer. Further, clarification is also required for not including enantiomeric impurity test (S-isomer) in specification by the API manufacturer and by FPP manufacturer.
Justification for not performing test for water content by the API manufacturer and FPP manufacturer.</td><td>This is to inform you that the identification by HPLC has the advantages of high accuracy, high automation, simple sample pretreatment etc. It is usually completed under the item of content determination by HPLC, which is the preferred method for identification in many official pharmacopoeias.
Further, test for Enantiomeric Purity can ensure that the content of S-enantiomer in the product which should be less than 0.15%.
Further, it is evident from literature that interconversion of Linagliptin to S-Linagliptin does not showed meaningful amounts of S-enantiomer in the drug substance (Please refer to Annex-1). Hence, there is no need to perform Identification by chiral HPLC.
Moreover, both API manufacturer and FPP manufacturer has performed Identification by 02 different methods i.e., HPLC and IR as per ICH Q6A recommendations.
This is to bring to your kind information that both API manufacturer and FPP manufacturer has incorporated test for ‘Loss on Drying’ in the Testing Specification of</td></tr>
</table>

<table>
<tr><td></td><td>Linagliptin API in accordance with USP General Chapter Loss on Drying ⟨731⟩ which states:
Test for "Loss on Drying" determines the amount of volatile matter of any kind that is present in any specimen under consideration.
It is obvious from the above statement, determining Loss on Drying also encompasses the amount of water present. Therefore, test parameter "Loss on Drying" has been incorporated.
Please refer to Annex-2 for the revised Raw Material Specification of Linagliptin including test for Enantiomeric Purity.</td></tr>
<tr><td>Detailed analytical method needs to be submitted for comparative dissolution profile.</td><td>Please refer to Annex-3 for the detailed analytical method for conducting comparative dissolution profile.</td></tr>
<tr><td>Justification of setting Q value NLT 75% in 30 minutes for Empagliflozin and Linagliptin but as per dissolution data of pharmaceutical development more than 80% of both aforesaid API released at 20 minutes.
Clarification required regarding the difference in dissolution criteria proposed by you and innovator.

Justification for not proposing specification for water content, arginine content and microbial purity as the aforesaid specification are proposed by innovator.</td><td>This is to bring to your information that the innovator "Trijardy XR" is targeting 45 minutes time point for Empagliflozin and 30 minutes for Linagliptin Dissolution Sampling (Please refer to Annex-4).
However, we have taken 30 minutes Dissolution Time Point for both Empagliflozin and Linagliptin which is more stringent than the Innovator.
Further, innovator has not provided acceptance criteria for dissolution, therefore we have used generalized criteria for immediate release dosage form i.e., NLT 75.0%(Q) (NLT 80%) in 30 minutes for both APIs.
This is to bring to your kind attention Microbial Parameters and Loss on Drying are part of our Finished Product Specifications.
Microbial Parameters:
In Microbial Parameters, we are testing following:
<table>
<tr><td><u>TAMC</u></td><td>NMT 10^3 cfu/g</td></tr>
<tr><td><u>TYMC</u></td><td>NMT 10^2 cfu/g</td></tr>
<tr><td><u>E. coli</u></td><td>Must be absent/10g</td></tr>
<tr><td><u>Salmonella specie</u></td><td>Must be absent/10g</td></tr>
<tr><td><u>Pseudomonas aeruginosa</u></td><td>Must be absent/10g</td></tr>
<tr><td><u>Staphylococcus aureus</u></td><td>Must be absent/10g</td></tr>
</table>
Loss on Drying:
As per USP general chapter Loss on Drying ⟨731⟩, Test for "Loss on Drying" determines the amount of volatile matter of any kind that is present in any specimen under consideration. As it is obvious from the above statement, determining Loss on Drying also encompasses the amount of water present. Therefore, test parameter "Loss on Drying" has been incorporated in Finished Product Specification by FPP manufacturer.
Arginine Content:
Please refer to Annex-5 for the revised Finished Product Specification including test for Arginine Content. We hereby commit that said test will be part of our next Stability Study Testing Interval as well as said test will be part of our QC Release Specifications before commercialization.</td></tr>
<tr><td colspan="2">Remarks of Evaluator:</td></tr>
<tr><td colspan="2">Decision: Approved.</td></tr>
</table>

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product that is **Trijardy XR Tablets 12.5mg + 2.5mg + 1000mg** by **M/s Boehringer Ingelheim Pharmaceuticals, USA**. by performing quality tests (Appearance, Assay, Dissolution). CDP has been performed against the same innovator product that is **Trijardy XR Tablets 12.5mg + 2.5mg + 1000mg** by **M/s Boehringer Ingelheim Pharmaceuticals, USA**., in Acidic media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have been submitted including system suitability, specificity, linearity, accuracy, precision repeatability, intermediate precision, robustness, stability of solution and range.

STABILITY STUDY DATA	
Manufacturer of API	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co., Ltd. Manufacturing Date	26.08.2021		26.08.2021
Date of Initiation	07.09.2021		07.09.2021
No. of Batches	02		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Estine (Ebastine) Tablets 10mg & 20mg on 6th May, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Copy of Drug Manufacturing License no. LIAO 20150233 issued by Liaoning Medical Products Administration valid till 17.01.2027. **Linagliptin:** Copy of Drug Manufacturing License no. LIAO 20150233 issued by Liaoning Medical Products Administration valid till 17.01.2027. **Metformin HCl:** Copy of GMP Certificate No. SD20190888 issued by CFDA, China valid till 12-03-2024.

<tr><td colspan="2">As Linagliptin is R-enantiomer, clarification is required for performing identification test by HPLC rather chiral HPLC by API manufacturer and FPP manufacturer. Further, clarification is also required for not including enantiomeric impurity test (S-isomer) in specification by the API manufacturer and by FPP manufacturer.
Justification for not performing test for water content by the API manufacturer and FPP manufacturer.</td><td>This is to inform you that the identification by HPLC has the advantages of high accuracy, high automation, simple sample pretreatment etc. It is usually completed under the item of content determination by HPLC, which is the preferred method for identification in many official pharmacopoeias.
Further, test for Enantiomeric Purity can ensure that the content of S-enantiomer in the product which should be less than 0.15%.
Further, it is evident from literature that interconversion of Linagliptin to S-Linagliptin does not showed meaningful amounts of S-enantiomer in the drug substance (Please refer to Annex-1). Hence, there is no need to perform Identification by chiral HPLC.
Moreover, both API manufacturer and FPP manufacturer has performed Identification by 02 different methods i.e., HPLC and IR as per ICH Q6A recommendations.
This is to bring to your kind information that both API manufacturer and FPP manufacturer has incorporated test for</td></tr>
</table>

<table>
<tr><td></td><td>‘Loss on Drying’ in the Testing Specification of Linagliptin API in accordance with USP General Chapter Loss on Drying ⟨731⟩ which states:
Test for “Loss on Drying” determines the amount of volatile matter of any kind that is present in any specimen under consideration.
It is obvious from the above statement, determining Loss on Drying also encompasses the amount of water present. Therefore, test parameter “Loss on Drying” has been incorporated.
Please refer to Annex-2 for the revised Raw Material Specification of Linagliptin including test for Enantiomeric Purity.</td></tr>
<tr><td>Detailed analytical method needs to be submitted for comparative dissolution profile.</td><td>Please refer to Annex-3 for the detailed analytical method for conducting comparative dissolution profile.</td></tr>
<tr><td>Justification of setting Q value NLT 75% in 30 minutes for Empagliflozin and Linagliptin but as per dissolution data of pharmaceutical development more than 80% of both aforesaid API released at 20 minutes.
Clarification required regarding the difference in dissolution criteria proposed by you and innovator.

Justification for not proposing specification for water content, arginine content and microbial purity as the aforesaid specification are proposed by innovator.</td><td>This is to bring to your information that the innovator “Trijardy XR” is targeting 45 minutes time point for Empagliflozin and 30 minutes for Linagliptin Dissolution Sampling (Please refer to Annex-4).
However, we have taken 30 minutes Dissolution Time Point for both Empagliflozin and Linagliptin which is more stringent than the Innovator.
Further, innovator has not provided acceptance criteria for dissolution, therefore we have used generalized criteria for immediate release dosage form i.e., NLT 75.0%(Q) (NLT 80%) in 30 minutes for both APIs.
This is to bring to your kind attention Microbial Parameters and Loss on Drying are part of our Finished Product Specifications.
Microbial Parameters:
In Microbial Parameters, we are testing following:
<table>
<tr><td><u>TAMC</u></td><td>NMT 10^3 cfu/g</td></tr>
<tr><td><u>TYMC</u></td><td>NMT 10^2 cfu/g</td></tr>
<tr><td><u>E. coli</u></td><td>Must be absent/10g</td></tr>
<tr><td><u>Salmonella specie</u></td><td>Must be absent/10g</td></tr>
<tr><td><u>Pseudomonas aeruginosa</u></td><td>Must be absent/10g</td></tr>
<tr><td><u>Staphylococcus aureus</u></td><td>Must be absent/10g</td></tr>
</table>
Loss on Drying:
As per USP general chapter Loss on Drying ⟨731⟩, Test for “Loss on Drying” determines the amount of volatile matter of any kind that is present in any specimen under consideration. As it is obvious from the above statement, determining Loss on Drying also encompasses the amount of water present. Therefore, test parameter “Loss on Drying” has been incorporated in Finished Product Specification by FPP manufacturer.
Arginine Content:
Please refer to Annex-5 for the revised Finished Product Specification including test for Arginine Content. We hereby commit that said test will be part of our next Stability Study Testing Interval as well as said test will be part of our QC Release Specifications before commercialization.</td></tr>

The firm has submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance **Metformin HCl:** Official monograph of Metformin HCl is present in USP. The firm has submitted details of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: **Empagliflozin:** Real time: 30°C ± 2°C / 65% ± 5%RH for 18 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (L-E-20200409-D01-E06-02, L-E-20200409-D01-E06-03, L-E-20200409-D01-E06-04) **Linagliptin:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (L-2017049-D01-L9-01, L-2017049-D01-L9-02, L-2017049-D01-L9-03) **Metformin HCl:** Real time: 30°C ± 2°C / 75% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months

		Batches: (A-72611405016, A-72611405017, A-72611405018)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product that is **Trijardy XR Tablets 25mg + 5mg + 1000mg** by **M/s Boehringer Ingelheim Pharmaceuticals, USA**. by performing quality tests (Appearance, Assay, Dissolution). CDP has been performed against the same innovator product that is **Trijardy XR Tablets 25mg + 5mg + 1000mg** by **M/s Boehringer Ingelheim Pharmaceuticals, USA**., in Acidic media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have been submitted including system suitability, specificity, linearity, accuracy, precision repeatability, intermediate precision, robustness, stability of solution and range.

STABILITY STUDY DATA

Manufacturer of API	**Empagliflozin:** Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China **Linagliptin:** Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd. 4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with batch manufacturing record, analytical record and attested documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated).
Shortcomings		**Response**
As Linagliptin is R-enantiomer, clarification is required for performing identification test by HPLC rather chiral HPLC by API manufacturer and FPP manufacturer. Further, clarification is also required for not including enantiomeric impurity test (S-isomer) in specification by the API manufacturer and by FPP manufacturer. Justification for not performing test for water content by the API manufacturer and FPP manufacturer.		This is to inform you that the identification by HPLC has the advantages of high accuracy, high automation, simple sample pretreatment etc. It is usually completed under the item of content determination by HPLC, which is the preferred method for identification in many official pharmacopoeias. Further, test for Enantiomeric Purity can ensure that the content of S-enantiomer in the product which should be less than 0.15%. Further, it is evident from literature that interconversion of Linagliptin to S-Linagliptin does not showed meaningful amounts of S-enantiomer in the drug substance (Please refer to Annex-1). Hence, there is no need to perform Identification by chiral HPLC. Moreover, both API manufacturer and FPP manufacturer has performed Identification by 02 different methods i.e., HPLC and IR as per ICH Q6A recommendations. This is to bring to your kind information that both API manufacturer and FPP manufacturer has incorporated test for 'Loss on Drying' in the Testing Specification of Linagliptin API in accordance with USP General Chapter Loss on Drying ⟨731⟩ which states: *Test for "Loss on Drying" determines the amount of volatile matter of any kind that is present in any specimen under consideration.* It is obvious from the above statement, determining Loss on Drying also encompasses the amount of water present. Therefore, test parameter "Loss on Drying" has been incorporated. Please refer to Annex-2 for the revised Raw Material Specification of Linagliptin including test for Enantiomeric Purity.
Detailed analytical method needs to be submitted for comparative dissolution profile.		Please refer to Annex-3 for the detailed analytical method for conducting comparative dissolution profile.
Justification of setting Q value NLT 75% in 30 minutes for Empagliflozin and Linagliptin but as per dissolution data of pharmaceutical development more than 80% of both aforesaid API released at 20 minutes. Clarification required regarding the difference in dissolution criteria proposed by you and innovator. Justification for not proposing specification for water content, arginine content and microbial purity as the aforesaid specification are proposed by innovator.		This is to bring to your information that the innovator "Trijardy XR" is targeting 45 minutes time point for Empagliflozin and 30 minutes for Linagliptin Dissolution Sampling (Please refer to Annex-4). However, we have taken 30 minutes Dissolution Time Point for both Empagliflozin and Linagliptin which is more stringent than the Innovator. Further, innovator has not provided acceptance criteria for dissolution, therefore we have used generalized criteria for immediate release dosage form i.e., NLT 75.0%(Q) (NLT 80%) in 30 minutes for both APIs. This is to bring to your kind attention Microbial Parameters and Loss on Drying are part of our Finished Product Specifications. ***Microbial Parameters:***

	In Microbial Parameters, we are testing following: **TAMC** NMT 10^3 cfu/g **TYMC** NMT 10^2 cfu/g ***E. coli*** Must be absent/10g ***Salmonella specie*** Must be absent/10g ***Pseudomonas aeruginosa*** Must be absent/10g **Staphylococcus aureus** Must be absent/10g ***Loss on Drying:*** As per USP general chapter Loss on Drying ⟨731⟩, Test for "Loss on Drying" determines the amount of volatile matter of any kind that is present in any specimen under consideration. As it is obvious from the above statement, determining Loss on Drying also encompasses the amount of water present. Therefore, test parameter "Loss on Drying" has been incorporated in Finished Product Specification by FPP manufacturer. ***Arginine Content:*** Please refer to Annex-5 for the revised Finished Product Specification including test for Arginine Content. We hereby commit that said test will be part of our next Stability Study Testing Interval as well as said test will be part of our QC Release Specifications before commercialization.
Remarks of Evaluator:	
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REMARKS OF THE EVALUATOR

Deferred in minutes of 321st meeting of registration board, held on 20-22nd September, 2022

GMP certificate/inspection conducted within last 3 years.	Firm submitted latest GMP inspection report conducted on 22-June-2022, GMP certificate grant on 22-August 2022.
Label Claim does not mention extended release dosage form which needs clarification.	The subject product has been developed in accordance with the formulation of innovator product i.e. extended release, however we are submitting the revised Form 5-D and requisite fees along with this letter for your perusal (Slip Number: 5666653995)
Submission of Stability study data as per the guidelines approved in 293rd meeting of Registration Board.	Firm submitted the Stability study data as per the guidelines approved in 293rd meeting of Registration Board on 04-Nov-2022.

Remarks:

i) Stability data of commercial batches needs has been submitted for Dapagliflozin (API) which includes tests of optical rotation and related substances.

ii) Copy of DMLno. Su 20160324 in respect of Dapagliflozin issued by Jiangsu Medical Product administration has been submitted.

Decision: Approved with Innovator's specifications. Registration letter will be issued upon submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Drug		**DAPAMET-XR 5/1000MG TABLET**		
Name of Manufacturer		M/s PharmEvo Private Limited., Plot # A-29, North Western Industrial Zone, Port Qasim, Karachi.		
Manufacturer of API		**Dapagliflozin:** M/s Jiangsu Yongan Pharmaceutical Co., Ltd., l8, 237 Provincial Road, Economic Development Zone, Huai'an, Jiangsu,China. **Metformin HCl:** M/s Smruthi Organics Limited A-27, MIDC-Chincholi, Solapur, India.		
API Lot No.		Dapagliflozin: 7100-202106001 Metformin HCl: MET-0782/21		
Description of Pack (Container closure system)		Alu-Alu Blister		
Stability Storage Condition		Real time : 30°C ± 2° C / 75% ± 5% RH Accelerated: 40°C ± 2°C / 75% ± 5% RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated:0,1,2,3,4,6 (month) Real Time: 0,3,6, (month)		
Batch No.		**21PD-4028-07-T**	**21PD-4029-08-T**	**21PD-4030-09-T**
Batch Size		2500 tab	2500 tab	2500 tab
Manufacturing Date		12-2021	12-2021	12-2021
Date of Initiation		01-2022	01-2022	01-2022
No. of Batches		03		
Date of Submission		08-11-2022 (Dy. No 32123)		
DOCUMENTS / DATA PROVIDED BY THE APPLICANT				
Documents To Be Provided		**Status**		

<table>
<tr><td>1</td><td>Reference of previous approval of applications with stability study data of the firm</td><td>Firm has referred to onsite inspection report of their product Erli Plus XR Tablet 5/1000mg, 10/1000mg, 12.5/1000mg & 25/1000mg (Empagliflozin + Metformin HCl XR) which was conducted on 05th December, 2019 and were presented in 293rd meeting of Registration Board held on 6th -8th Jan, 2020. According to the report following points were confirmed.
Firm has 21 CFR compliant HPLC software.
Firm has audit trail reports available.
Firm possesses stability chambers with digital data loggers.</td></tr>
<tr><td>2</td><td>Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.</td><td>Dapagliflozin:
Copy of COA of Dapagliflozin: (Batch# 7100-202106001) from M/s. Jiangsu Yongan Pharmaceutical Co. Ltd. Copy of COA (Batch#17749) from M/s PharmEvo (private) Limited is submitted.
Metformin HCl:
Copy of COA of Metformin HCl (Batch# MET-0782/21) from M/s Smruthi Organics Limited A-27, MIDC-Chincholi, Solapur, India. Copy of COA (Batch#18490) from M/s PharmEvo (private) Limited is submitted.</td></tr>
<tr><td>3</td><td>Method used for analysis of API from both API Manufacturer and Finished Product manufacturer</td><td>Yes</td></tr>
<tr><td>4</td><td>Stability study data of API from API manufacturer</td><td>Stability study conditions:
Dapagliflozin:
Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months
Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
Batches: (130401, 130402, 130501)
Metformin HCl:
Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months
Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
Batches: (DMFH-026/10, DMFH-027/10, DMFH-028/10)</td></tr>
<tr><td>5</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>Dapagliflozin: Copy of GMP certificate issued by Huai’an Pharmaceutical Industrial Association valid till 14/01/2024.
Metformin HCl: Copy of GMP certificate No. NEW-WHO-GMP/CERT/PD/86368/2019/11/30111issued by Food & Drug Administration India.</td></tr>
<tr><td>6</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Dapagliflozin:
• Copy of letter No.2042/19/DRAP/K dated 22/10/2019 is submitted wherein the permission to import API for the purpose of test/analysis and stability studies is granted.
Metformin HCl:
• Copy of letter No.263/19/DRAP/K dated 02/10/2019 is submitted wherein the permission to import API for the purpose of test/analysis and stability studies is granted.</td></tr>
<tr><td>7</td><td>Protocols followed for conduction of stability study</td><td>Yes</td></tr>
<tr><td>8</td><td>Method used for analysis of FPP</td><td>Yes</td></tr>
<tr><td>9</td><td>Drug-excipients compatibility studies (where applicable)</td><td>Same excipients used as used by innovator.</td></tr>
<tr><td>10</td><td>Complete batch manufacturing record of three stability batches.</td><td>The firm has submitted copy of Trial batch manufacturing record. <tr><td>14</td><td>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)</td><td colspan="3">Yes</td></tr>
<tr><td colspan="5">REMARKS OF THE EVALUATOR
Deferred in minutes of 321st meeting of registration board, held on 20-22nd September, 2022</td></tr>
<tr><td colspan="2">GMP certificate/inspection conducted within last 3 years.</td><td colspan="3">Firm submitted latest GMP inspection report conducted on 22-June-2022, GMP certificate grant on 22-August 2022.</td></tr>
<tr><td colspan="2">Label Claim does not mention extended release dosage form which needs clarification.</td><td colspan="3">The subject product has been developed in accordance with the formulation of innovator product i.e. extended release, however we are submitting the revised Form 5-D and requisite fees along with this letter for your perusal
(Slip Number: 04110889697)</td></tr>
<tr><td colspan="2">Submission of Stability study data as per the guidelines approved in 293rd meeting of Registration Board.</td><td colspan="3">Firm submitted the Stability study data as per the guidelines approved in 293rd meeting of Registration Board on 08-Nov-2022.</td></tr>
<tr><td colspan="5">Decision: Approved with Innovator’s specifications. Registration letter will be issued upon submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.
Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.</td></tr>
</table>

i. Routine Cases

900.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Wilshire Laboratories Pvt Limited, 124/1-Quiad-eAzam Industrial Estate Kot Lakhpat Lahore**
	Name, address of Manufacturing site.	M/s Wilshire Laboratories Pvt Limited, 124/1-Quiad-eAzam Industrial Estate Kot Lakhpat Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30775 dated 10.11.2021
	Details of fee submitted	PKR 30000/- dated 20.05.2021
	The proposed proprietary name / brand name	Oxeto Tablet 10mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Vortioxetine HBr eq. to Vortioxetine….10mg
	Pharmaceutical form of applied drug	Yellow Round Biconvex Film coated Tablet
	Pharmacotherapeutic Group of (API)	Anti-Depressant
	Reference to Finished product specifications	In-House
	Proposed Pack size	3×10's Alu Alu
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Brintillex Tablets EMA Approved
	For generic drugs (me-too status)	Brintillex Tablets of Lundbeck Pakistan
	GMP status of the Finished product manufacturer	GMP certificate issued to the firm by DRAP Lahore dated 05.09.2019.
	Name and address of API manufacturer.	M/s Lianyungang Jari Pharmaceuticals Co., Ltd Room No. 1216 Shimao Plaza Xinbei District Changzhou China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Paroxetine Hydrochloride is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (5320-09-001, 5320-09-002, 5320-09-003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer

		medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is ABC 37.5mg tablet by … Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is ABC 37.5mg tablet Tablet by ….. Pharma in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA			
Manufacturer of API	M/s Lianyungang Jari Pharmaceuticals Co., Ltd Room No. 1216 Shimao Plaza Xinbei District Changzhou China		
API Lot No.	20191101		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0,1,2,3,4,5,6 (Months) Real Time: 0, 3, 6, 9, 12, 24 (Months)		
Batch No.	T-001	T-002	T-003
Batch Size	2000 Tablets	2000 Tablets	2000 Tablets
Manufacturing Date	08-2020	08-2020	08-2020
Date of Initiation	13.08.2022	13.08.2022	13.08.2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of DRAP Lahore attested invoice vide No. HH-991-02-725. As per aforesaid invoice 0.3386Kg of API is imported (value of 5USD). Mfg Date: 13.12.2019 Exp Date: 12.12.2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Remarks of Evaluator:

MODULE I	
1.6.5	Certificate of GMP compliance of API manufacturing site./ Valid manufacturing authorization issued by regulatory authority of country of origin as the submitted evidence is not satisfactory.
MODULE II & III	
2.3.S.1.3	Quantitative aqueous pH solubility profile (e.g. pH 1.2–6.8, dose/solubility volume) is required as submitted information is incomplete.
3.2..S.1.3	You have submitted that no polymorphic form exists, however as per innovator/ literature, the API exhibits polymorphisms. This requires clarification.
2.3.S.3.1	List has been submitted regarding the studies performed however conclusion needs to be submitted that whether whether the results support the proposed structure Polymorphic & Particle size distribution studies are required.
3.2.S.3.1	QA certified copies of spectra, peak assignments and detailed interpretation of the data in from the studies performed to elucidate and/or confirm the structure of the API are required because submitted data in insufficient for confirmation of API. Further aforesaid data needs to be submitted in English language. As API exhibits polymorphism hence polymorphic characterization details needs to be submitted with confirmation studies of preferred polymorphic form. Particle size distribution studies are not performed. This requires clarification.
2.3.S.4.1	Justification for not including test for polymorphic confirmation and particle size distribution in API specifications being critical quality attributes by the API manufacturer. API specifications (tests, acceptance criteria and type of analytical procedure) by the finished product manufacturer are required .
3.2.S.4.1	Copies of the API specifications, dated and signed by authorized personnel by the API manufacturer (e.g. the person in charge of the quality control or quality assurance department). API specifications, dated and signed by authorized personnel by the drug product manufacturer (e.g. the person in charge of the quality control or quality assurance department).
2.3.S.4.3	Justification for not performing specificity under validation studies.
3.2.S.4.3	Detailed validation studies/ reports need to be submitted as same is not provided in the dossier. Details needs to be submitted regarding size of batch for commercial scale.
3.2.S.4.4	Copies of certificate of analysis of batches by API manufacturer do not indicate the batch size. Details regarding scale of commercial batch is required.
2.3.S.5 & 3.2.S.5	Certificate of analysis of reference standard is required.
2.3.S.7	Batch size needs to ne mentioned in stability summary
3.2.S.7	The stability summary indicates that the study is performed at lab scale batches. Data of commercial scale batches needs to be submitted indicating batch size and date of manufacturing.
3.2.P.1	Description of the tablet is mentioned as film coated however composition is submitted is of plain tablet.
3.2.P.2.1.2	Justification of not using magnesium stearate being used in innovator product. Further quantities of excipients need to be justified with suitable references.
3.2.P.2.2	Under manufacturing process development, you have used mag stearate however the same is not reflected in the composition. This needs clarification.
3.2.P.4	Specification of Tab coat TC 117-2200001 Yellow/Red/ needs to be submitted.
3.2.P.5.1	Under finished product specification you have proposed identification by HPLC and IR. The method of IR needs to be submitted. Justification of proposing weight variation rather than content uniformity test. Justification of performing dissolution by UV rather than HPLC.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)		
	Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
	Time Period	Real time: 24 months Accelerated: 6 months		
	Frequency	Accelerated: 0,1,2,3,4,5,6 (Months) Real Time: 0, 3, 6, 9, 12, 24 (Months)		
	Batch No.	T-001	T-002	T-003
	Batch Size	2000 Tablets	2000 Tablets	2000 Tablets
	Manufacturing Date	08-2020	08-2020	08-2020
	Date of Initiation	13.08.2022	13.08.2022	13.08.2022
	No. of Batches	03		
	Administrative Portion			
	Reference of previous approval of applications with stability study data of the firm (if any)			
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.			
	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of DRAP Lahore attested invoice vide No. HH-991-02-725. As per aforesaid invoice 0.3386Kg of API is imported (value of 5USD). Mfg Date: 13.12.2019 Exp Date: 12.12.2021		
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.			

	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	
	Remarks OF Evaluator:	

MODULE I	
1.6.5	Certificate of GMP compliance of API manufacturing site./ Valid manufacturing authorization issued by regulatory authority of country of origin as the submitted evidence is not satisfactory.
MODULE II & III	
2.3.S.1.3	Quantitative aqueous pH solubility profile (e.g. pH 1.2–6.8, dose/solubility volume) is required as submitted information is incomplete.
3.2..S.1.3	You have submitted that no polymorphic form exists, however as per innovator/ literature, the API exhibits polymorphisms. This requires clarification.
2.3.S.3.1	List has been submitted regarding the studies performed however conclusion needs to be submitted that whether whether the results support the proposed structure Polymorphic & Particle size distribution studies are required.
3.2.S.3.1	QA certified copies of spectra, peak assignments and detailed interpretation of the data in from the studies performed to elucidate and/or confirm the structure of the API are required because submitted data in insufficient for confirmation of API. Further aforesaid data needs to be submitted in English language. As API exhibits polymorphism hence polymorphic characterization details needs to be submitted with confirmation studies of preferred polymorphic form. Particle size distribution studies are not performed. This requires clarification.
2.3.S.4.1	Justification for not including test for polymorphic confirmation and particle size distribution in API specifications being critical quality attributes by the API manufacturer. API specifications (tests, acceptance criteria and type of analytical procedure) by the finished product manufacturer are required .
3.2.S.4.1	Copies of the API specifications, dated and signed by authorized personnel by the API manufacturer (e.g. the person in charge of the quality control or quality assurance department). API specifications, dated and signed by authorized personnel by the drug product manufacturer (e.g. the person in charge of the quality control or quality assurance department).
2.3.S.4.3	Justification for not performing specificity under validation studies.
3.2.S.4.3	Detailed validation studies/ reports need to be submitted as same is not provided in the dossier. Details needs to be submitted regarding size of batch for commercial scale.
3.2.S.4.4	Copies of certificate of analysis of batches by API manufacturer do not indicate the batch size. Details regarding scale of commercial batch is required.
2.3.S.5 & 3.2.S.5	Certificate of analysis of reference standard is required.
2.3.S.7	Batch size needs to ne mentioned in stability summary
3.2.S.7	The stability summary indicates that the study is performed at lab scale batches. Data of commercial scale batches needs to be submitted indicating batch size and date of manufacturing.
3.2.P.1	Description of the tablet is mentioned as film coated however composition is submitted is of plain tablet.
3.2.P.2.1.2	Justification of not using magnesium stearate being used in innovator product. Further quantities of excipients need to be justified with suitable references.
3.2.P.2.2	Under manufacturing process development, you have used mag stearate however the same is not reflected in the composition. This needs clarification.
3.2.P.4	Specification of Tab coat TC 117-2200001 Yellow/Red/ needs to be submitted.
3.2.P.5.1	Under finished product specification you have proposed identification by HPLC and IR. The method of IR needs to be submitted. Justification of proposing weight variation rather than content uniformity test. Justification of performing dissolution by UV rather than HPLC.
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Batch No.	TF-03	TF-04	TF-05
Batch Size	1L	1L	1L
Manufacturing Date	Aug/2018	Aug/2018	Aug/2018
Date of Initiation	01.09.2018	01.09.2018	01.09.2018
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Rofair 500mcg Tablet", which was conducted on 25th June, 2019, and was presented in 290th meeting of Registration Board. The report confirms: □ The HPLC software is 21CFR Compliant.

		☐ Audit trail on testing reports is available ☐ Firm has adequate monitoring and controls for stability chambers. Chambers are controlled and monitored through software having alarm system for alerts as well
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. L.Dis.No:54409/TS/2021 issued by Drug Control Administration Telangana India valid till 16/02/2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	DHL No.XMLPI6.2/90-1604 dated 21/03/2017
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks:

3.2. S.4.4 Batch analysis of API by the FPP manufacturer for the batch used for manufacturing of finished product for stability testing.

3.2.S.4.5 CoA of reference standard.

3.2. P.2 Pharmaceutical equivalence studies needs to be submitted with reference product having details of brand name, batch No, manufacturer.

3.2. P.3 Batch size does not reflect the Pack size/ filled volume per pack. This needs to be clarified as the same is not mentioned in manufacturing process and not on the CoA of three batches placed on stability.

3.2. P.7 The quantity of the units produced needs to be justified w.r.t stability testing.

There CoAs submitted for API (Flurbiprofen) which indicates Mfg date of November 2018 however stability testing was initiated in Sep. 2018. This needs clarification.

Justification for not importing API with permission of DRAP. Further Copy of DHL does not reflect the date of import of API. Complete import documentation of API needs to be submitted.

Evidence of Approval of formulation in RRA.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.
Remarks of Evaluator:		
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

Agenda of Evaluator PEC-XVII

Export Facilitation cases:

The following applications were received vide letter No.F.1-6/2019-PR-I (EFD) dated 06th October, 2022 from Assistant Director (PR-I/EFD), PE & R, Division for evaluation on priority basis in pursuance of decision in 133rd meeting of DRAP Authority held on 13th April 2022, regarding export facilitation (Grant of registration on priority basis to the *pharmaceutical* i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year).

Case No.I Registration applications of locally manufactured (Human) drugs on Form 5F.

The firm M/s. Hilton Pharma (Pvt.) Ltd. Plot No. 13-14 & 43, Sector-15, Korangi, Industrial Area, Karachi applied for registration of their following products vide **R & I Diary No.16315 dated 03-05-2018 on Form-5 D with fee of Rs: 50,000/- (Challan No.0719472) for Erithril 5mg tablet** and **Vide R & I Diary No. 16314 dated 03-05-2018 with fee of Rs: 50,000/- (Challan No. 0719467) for Erithril 15mg tablet** and subsequently submitted 06-months stability studies data vide R & I Diary No.31861 dated 19-11-2021. However, the firm also submitted registration applications for the same products on Form 5F on 06-05-2022. The firm then vide letter dated 30-12-2022, addressed to In-Charge PEC requested to consider the registration applications submitted on Form 5F and withdrawn those submitted on Form 5D. Accordingly, the following applications submitted on Form 5F are placed for consideration of the Registration Board.

Decision: Registration Board acceded the request of withdrawal of frim and decided to dispose the application submitted on Form 5D as per following details:

Erithril 5mg tablet: R & I Diary No.16315 dated 03-05-2018 on Form-5 D with fee of Rs: 50,000/- (Challan No.0719472)

Erithril 15mg tablet: Vide R & I Diary No. 16314 dated 03-05-2018 with fee of Rs: 50,000/- (Challan No. 0719467)

905.	Name, address of Applicant / Marketing Authorization Holder	M/s. Hilton Pharma (Pvt.) Ltd. 8th & 9th floor, progressive plaza, Beaumont Road, Karachi, Pakistan.
	Name, address of Manufacturing site.	M/s. Hilton Pharma (Pvt.) Ltd. Plot No. 13-14 & 43, Sector-15, Korangi, Industrial Area, Karachi. (DML No. 000136)
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 11036 dated 06-05-2022
	Details of fee submitted	PKR: 30,000/- vide online deposit slip No.0730898759 dated 17-03-2022.
	The proposed proprietary name / brand name	Ertihil Tablets 5mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film-Coated Tablet Contains: Ertugliflozin L-Pyroglutamic acid equivalent to Ertugliflozin ……5 mg
	Pharmaceutical form of applied drug	Film coated tablets
	Pharmacotherapeutic Group of (API)	Antidiabetic
	Reference to Finished product specifications	Innovator's Specifications

	Proposed Pack size	7's, 10's, 14's, 28's & 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	STEGLATRO® 5 mg film-coated tablets by M/s Merck Sharp & Dohme Corp. (FDA Approved).
	For generic drugs (me-too status)	Tab. Ertuvia 5mg of M/s Ferozson's Laboratories, Nowshera. Registration No.110362
	GMP status of the Finished product manufacturer	Tablet Section (General) mentioned in DML renewal letter No.F. 2-14/85-Lic (Vol-V), Dated 30/06/2020
	Name and address of API manufacturer.	**Ertugliflozin L-Pyroglutamic acid** M/s. Chifeng Arker Pharmaceutical Technology Co., Ltd. No. 8 Mysun Street, Hongshan Economic Development Zone, Chifeng, Inner Mongolia, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Ertugliflozin L-Pyroglutamic acid:** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 months Batches: (D84-161201, D84-161202, D84-170101)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence studies for higher strength that is Erithril 15mg tablet submitted. Comparative dissolution was performed against Steglatro 5mg tablet, Batch No. V019753 in HCl buffer (pH 1.2), Acetate buffer (pH 4.5) &

		Phosphate buffer (pH 6.8). The dissolution profile similarity factor, F2 found greater than 50 and the product is comparable with innovator.	
	Analytical method validation/verification of product	Method validation studies have submitted including, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.	
STABILITY STUDY DATA			
Manufacturer of API	Ertugliflozin L-Pyroglutamic acid M/s. Chifeng Arker Pharmaceutical Technology Co., Ltd. No. 8 Mysun Street, Hongshan Economic Development Zone, Chifeng, Inner Mongolia, China.		
API Lot No.	As per invoice attested by DRAP, Karachi for Ertugliflozin L-Pyroglutamic acid, Batch no. D84-201101.

Manufacturing Date	02.2021	02.2021	02.2021
Date of Initiation	05.03.2021	05.03.2021	05.03.2021
No. of Batches	03		
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product **"HILVEL 400mg + 100mg** (Sofosbuvir +Velpatasvir)", which was conducted on 14th December, 2017 and was presented in 277th meeting of Registration Board held on 27-29th December, 2017. Registration Board decided to approve registration of "HILVEL 400mg / 100mg (Sofosbuvir + Velpatasvir" by M/s. Hilton Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Following two observations were reported in the report: i. The HPLC software is 21 CFR compliant. ii. Audit trail on the testing reports of Hilvel Tablets 400mg+100mg is available. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.	

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of Drug Production License No. 20160053 & 91150400720172660N issued by Inner Mongolia Drug Administration valid till 28.12.2025. The firm has also submitted US FDA letter dated 12-03-2019, wherein compliance of the firm to current good manufacturing practices is communicated to the firm.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has imported Ertugliflozin L-PGA, Batch No. D84-201101, quantity 01kg vide invoice No. PSPW-201113 dated 13-11-2020, attested by Assistant Director (I & E), DRAP Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator: (PEC-XVII)

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.5	Revision of pharmacological group from antidiabetic to Sodium-glucose co-transporter 2 (SGLT2) inhibitors as per WHO ATC/DDD index along with submission of fee of Rs. 7,500 for variation in registration application i.e., correction/change of pharmacological group, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm revised pharmacological group from antidiabetic to Sodium-glucose co-transporter 2 (SGLT2) inhibitors as per WHO ATC/DDD index and submitted fee of Rs: 7,500/- vide online deposit slip No.259665987395 for revision of pharmacological group.
2.		The API Ertugliflozin L-PGA is not mentioned in Production Scope of Drug Production License of API manufacturer.	Firm re-submit same Drug Production License of API manufacturer.
3.	3.2.P.8.3	The peak areas and chromatograms of initial and 3rd month points for all the three batches are significantly different than that submitted for 06-month time point of all the three batches. Although the dissolution results are consistent. Clarification is required from the firm.	The difference in peak areas is due to two separate HPLCs system used in different days and note that standards were applied before samples and therefore no impact on results. Initial and 3rd month dissolution samples were tested on Shimadzu HPLC LC20 DB having lab solution software and 6th month dissolution samples were tested on Agilent HPLC 1260 infinity II, having open lab CDF software.
4.		Pharmaceutical equivalence studies submitted for Steglatro tablets 15mg instead of Steglatro tablet 5mg.	Pharmaceutical equivalence has been carried out for the highest strength i.e., Erithril tablet 15mg as both strengths Erithril Tablets 15mg and 5mg have same excipients and qualitative formulation, enclosed for your ready reference.
5.		As per submitted drug substance CoA, the content of L-PGA has been declared between a range of 22% – 25%, by the drug substance manufacturer. Hence it could be inferred that for achieving the desired	Ertugliflozin quantity per tablet is calculated based on actual content of L-PGA as is basis 5 × 1.3 = 6.5. Ertugliflozin quantity per tablet is calculated based on molecular weight that is 5 × 1.29 = 6.45.

		label claim of "Ertugliflozin", the amount of Ertugliflozin L-PGA dispensed must be calculated on the basis of actual %age content of L-PGA declared in the COA of the drug substance rather than the applying the theoretical factor of 1.295 on the basis of molecular weight. The submitted batch records reflect that the to achieve the desired label claim of "Ertugliflozin", the amount of Ertugliflozin L-PGA was dispensed by applying the theoretical factor of 1.295 on the basis of molecular weight instead of actual %age content of L-PGA. Clarification is required in this regard as to how the dispensed quantity of Ertugliflozin L-PGA for formulation development and trail batch manufacturing without considering the actual %age content of L-PGA declared in the COA of the drug substance corresponds/meets the desired label claim.	The difference is insignificant and no impact on the label claim. However, for commercial batches, Ertugliflozin quantity per mg tablet will be calculated on actual L-PGA content as is basis.

Approved. Firm shall submit Pharmaceutical equivalence studies against the relevant strength of innovator/reference product before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued with following additive condition of registration:**
  "During production of commercial batches, for achieving the desired label claim of "Ertugliflozin", instead of applying the theoretical factor on the basis of molecular weight, the amount of Ertugliflozin L-PGA dispensed must be calculated on the basis of actual %age content of L-PGA declared in the COA of the drug substance"

	The proposed proprietary name / brand name	Ertihil Tablets 15mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film-Coated Tablet Contains: Ertugliflozin L-Pyroglutamic acid equivalent to Ertugliflozin ……15 mg
	Pharmaceutical form of applied drug	Film coated tablets
	Pharmacotherapeutic Group of (API)	Antidiabetic
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	7's, 10's, 14's, 28's & 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	STEGLATRO® 15 mg film-coated tablets by M/s Merck Sharp & Dohme Corp. (FDA Approved).
	For generic drugs (me-too status)	Tab. Ertuvia 15mg of M/s Ferozson's Laboratories, Nowshera. Registration No.110363
	GMP status of the Finished product manufacturer	Tablet Section (General) mentioned in DML renewal letter No.F. 2-14/85-Lic (Vol-V), Dated 30/06/2020
	Name and address of API manufacturer.	**Ertugliflozin L-Pyroglutamic acid** M/s. Chifeng Arker Pharmaceutical Technology Co., Ltd. No. 8 Mysun Street, Hongshan Economic Development Zone, Chifeng, Inner Mongolia, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Ertugliflozin L-Pyroglutamic acid:** Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months Batches: (D84-161201, D84-161202, D84-170101)

	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence studies performed with reference product that is Steglatro tablets 15mg (Batch No. U0197768). The firm has submitted the comparative dissolution with innovator product and dissolution profile similarity factor, F2 found greater than 50 and the product is comparable with innovator.
	Analytical method validation/verification of product	Method validation studies have submitted including, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product **"HILVEL 400mg + 100mg** (Sofosbuvir +Velpatasvir)", which was conducted on 14th December, 2017 and was presented in 277th meeting of Registration Board held on 27-29th December, 2017. Registration Board decided to approve registration of "HILVEL 400mg / 100mg (Sofosbuvir + Velpatasvir" by M/s. Hilton Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies

		throughout proposed shelf life and on accelerated studies for six months. Following two observations were reported in the report: iii. The HPLC software is 21 CFR compliant. iv. Audit trail on the testing reports of Hilvel Tablets 400mg+100mg is available. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of Drug Production License No. 20160053 & 91150400720172660N issued by Inner Mongolia Drug Administration valid till 28.12.2025. The firm has also submitted US FDA letter dated 12-03-2019, wherein compliance of the firm to current good manufacturing practices is communicated to the firm.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has imported Ertugliflozin L-PGA, Batch No. D84-201101, quantity 01kg vide invoice No. PSPW-201113 dated 13-11-2020, attested by Assistant Director (I & E), DRAP Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator: **(PEC-XVII)**

Sr. No.	Section	Observation	Reply by the firm
1.	2.3	The firm has not provided details about available literature references for the Drug Substance and Drug Product.	Literature references for the drug substance and drug product submitted (Australian Public Assessment Report on Ertugliflozin (Steglatro tablet).
2.	1.5.5	Revision of pharmacological group from antidiabetic to Sodium-glucose co-transporter 2 (SGLT2) inhibitors as per WHO ATC/DDD index along with submission of fee of Rs. 7,500 for variation in registration application i.e., correction/change of pharmacological group, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm revised pharmacological group from antidiabetic to Sodium-glucose co-transporter 2 (SGLT2) inhibitors as per WHO ATC/DDD index and submitted fee of Rs: 7,500/- vide online deposit slip No.68558470289 for revision of pharmacological group.
3.		The API Ertugliflozin L-PGA is not mentioned in Production Scope of Drug Production License of API manufacturer.	Firm re-submit same Drug Production License of API manufacturer.
4.	3.2.P.8.3	The peak areas and chromatograms of initial testing for all the three batches are significantly different than that submitted for 03-months & 06-month time point of all the three batches. Although the	The difference in peak areas is due to two separate HPLCs system used in different days and note that standards were applied before samples and therefore no impact on results. Initial dissolution samples were

		dissolution results are consistent. Clarification is required from the firm.	tested on Shimadzu HPLC LC20 DB having lab solution software while 3rd & 6th month dissolution samples were tested on Agilent HPLC 1260 infinity II, having open lab CDF software.
5.		As per submitted drug substance CoA, the content of L-PGA has been declared between a range of 22% – 25%, by the drug substance manufacturer. Hence it could be inferred that for achieving the desired label claim of "Ertugliflozin", the amount of Ertugliflozin L-PGA dispensed must be calculated on the basis of actual %age content of L-PGA declared in the COA of the drug substance rather than the applying the theoretical factor of 1.295 on the basis of molecular weight. The submitted batch records reflect that the to achieve the desired label claim of "Ertugliflozin", the amount of Ertugliflozin L-PGA was dispensed by applying the theoretical factor of 1.295 on the basis of molecular weight instead of actual %age content of L-PGA. Clarification is required in this regard as to how the dispensed quantity of Ertugliflozin L-PGA for formulation development and trail batch manufacturing without considering the actual %age content of L-PGA declared in the COA of the drug substance corresponds/meets the desired label claim.	Ertugliflozin quantity per tablet is calculated based on actual content of L-PGA as is basis 15 × 1.3 = 19.5. Ertugliflozin quantity per tablet is calculated based on molecular weight that is 15 × 1.29 = 19.35. The difference is insignificant and no impact on the label claim. However, for commercial batches, Ertugliflozin quantity per mg tablet will be calculated on actual L-PGA content as is basis.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued with following additive condition of registration:**

"During production of commercial batches, for achieving the desired label claim of "Ertugliflozin", instead of applying the theoretical factor on the basis of molecular weight, the amount of Ertugliflozin L-PGA dispensed must be calculated on the basis of actual %age content of L-PGA declared in the COA of the drug substance".

Remarks of Evaluator:-(PEC-XVII)

Sr. No.	Section	Observation	Reply by the firm
1.	3.2.S.4.4	Peak areas given for replicates 2-5 of standard injections for assay determination of Sacubitril sodium are different than those mentioned in corresponding chromatograms (sample information).	
2.		The assay calculation formula as given in the analytical procedure by the drug product manufacturer is different than that given in analytical method validation protocol/data of the drug product manufacturer. Moreover, the assay calculation formula as mentioned in the analytical method of the drug substance manufacturer and that given in the analytical method of the drug product manufacture are not the same.	
3.	3.2.P.2.2.1	In the procedure for CDP, the time point for sample withdrawal mentioned as 45 minutes, while in dissolution parameters for CDP and raw data sheets, the time points mentioned as 10, 15, 20, 30, 45 and 60 minutes.	
4.	3.2.P.5.2	Wavelength mentioned as 267nm under chromatographic conditions, however, as per reference/innovator's product dissolution method/parameters, the detection wavelength (HPLC/UV) given as 255 nm.	
5.		The flow rate in analytical method of drug product given as 1ml/min however, in method validation protocol for the drug product the flow rate given as 0.8ml/min.	
6.		As per various documents such as CoA of APIs from substance manufacturer and drug product manufacturer, import invoice, AD (I & E) clearance certificate, product development data, trial batch manufacturing record and separate stability summary data sheets for Sacubitril sodium and Valsartan by the drug substance manufacturer reflect that Sacubitril sodium and Valsartan used as separate materials, while the innovator product is designed as a combination of sacubitril and valsartan in a co-crystal, is a salt complex comprising LCZ696 (Sacubitril/Valsartan anionic moieties), sodium cations, and water molecules. Please justify how the applied formulation is in line with innovator's product.	
7.		Most recent GMP compliance inspection report conducted within last three years.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 201904044 issued by Zhejiang Medicine Center for Economic Development valid till 02/06/2022. Scope of inspection include (Sacubitril Sodium Valsartan).

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. TY121266 dated 19-03-2021 for import of 1.6kg Sacubitril Sodium and 1.7kg Valsartan USP from Zhejiang Tianyu Pharmaceutical Co., Ltd. Jiangkou Development Zone Huangyan Taizhou, Zhejiang, China, attested by AD (I & E), DRAP Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:-(PEC-XVII)

Sr. No.	Section	Observation	Reply by the firm
1.	3.2.S.4.4	Peak areas given for replicates 2-5 of standard injections for assay determination of Sacubitril sodium are different than those mentioned in corresponding chromatograms (sample information).	
2.		The assay calculation formula as given in the analytical procedure by the drug product manufacturer is different than that given in analytical method validation protocol/data of the drug product manufacturer. Moreover, the assay calculation formula as mentioned in the analytical method of the drug substance manufacturer and that given in the analytical method of the drug product manufacture are not the same.	
3.	3.2.P.2.2.1	In the procedure for CDP, the time point for sample withdrawal mentioned as 45 minutes, while in dissolution parameters for CDP and raw data sheets, the time points mentioned as 10, 15, 20, 30, 45 and 60 minutes.	
4.	3.2.P.5.2	Wavelength mentioned as 267nm under chromatographic conditions, however, as per reference/innovator's product dissolution method/parameters, the detection wavelength (HPLC/UV) given as 255 nm.	
5.		The flow rate in analytical method of drug product given as 1ml/min however, in method validation protocol for the drug product the flow rate given as 0.8ml/min.	
6.		As per various documents such as CoA of APIs from substance manufacturer and drug product manufacturer, import invoice, AD (I & E) clearance certificate, product development data, trial batch manufacturing record and separate stability summary data sheets for Sacubitril sodium and Valsartan by the	

		drug substance manufacturer reflect that Sacubitril sodium and Valsartan used as separate materials, while the innovator product is designed as a combination of sacubitril and valsartan in a co-crystal, is a salt complex comprising LCZ696 (Sacubitril/Valsartan anionic moieties), sodium cations, and water molecules. Please justify how the applied formulation is in line with innovator's product.	
7.		Most recent GMP compliance inspection report conducted within last three years.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	The proposed proprietary name / brand name	Estresto 200 mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Sacubitril ---------- 97 mg Valsartan ----------103 mg
	Pharmaceutical form of applied drug	Oblong shaped, light-pink colored, film coated tablet, break-line on one side, other side plain, no irregularity.
	Pharmacotherapeutic Group of (API)	Sacubitril, a neprilysin inhibitor, and valsartan, an angiotensin II receptor blocker indicated: to reduce the risk of cardiovascular death and hospitalization for heart failure in patients with chronic heart failure (NYHA Class II-IV) and reduced ejection frac
	Reference to Finished product specifications	As per Innovator's specifications
	Proposed Pack size	1* 14's (14's) 2*14's (28's)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Entresto tablets 200 mg Novartis Pharmaceuticals (FDA Approved)

	For generic drugs (me-too status)	Savesto 97/103mg tablet of M/s Getz Parma, Karachi. Registration No.093112
	GMP status of the Finished product manufacturer	Most recent GMP inspection report conducted within last three years required.
	Name and address of API manufacturer.	**Sacubitril Sodium & Valsartan:** Zhejiang Tianyu Pharmaceutical Co., Ltd. Address No.15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Sacubitril sodium:** Official monograph of sacubitril sodium does not exist so firm has followed in house specifications. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity SCB-4-Imp-1, SCB-5-Imp-2, SCB-5-I Sodium (chiral isomer, SCB-5-II Sodium (chiral isomer SCB-5-III Sodium (chiral isomer) specifications, analytical procedures and its validation , batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance **Valsartan:** Official monograph of valsartan exists in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity Valsartan Related Compound A: Not more than (NMT) 1.0% Valsartan Related Compound B: Not more than (NMT) 0.2% Valsartan Related Compound C: Not more than (NMT) 0.1% Any other individual impurity: Not more than (NMT) 0.1% Total impurities: Not more than (NMT) 0.3%, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Sacubitril Sodium:** Stability study conditions (Zone IVb). Real time: 30˚C ± 2˚C / 75% ± 5%RH for 24 months 0, 3, 6, 9, 12, 18, 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months at 0, 1, 2, 3, 6 months

		Batches: (13700-181001, 13700 -181002, 13700-181003) **Valsartan:** Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months 0, 3, 6, 9, 12, 18, 24, 36 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches: (201207301, 201207302, 201207303)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Uperio 200mg tablet (Batch No. THU47) of Novartis Pharma (Pakistan), Karachi by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand in Acid media (pH 1.0-1.2), Acetate buffer (PH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	**Sacubitril Sodium:** Method validation studies including linearity, range, accuracy, precision, intermediate precision, repeatability, robustness, specificity, LOD and LOQ. **Valsartan:** Verification studies for valsartan including Linearity, range, accuracy, precision (repeatability) and specificity along with chromatograms and raw data sheets submitted.

Date of Submission	28-11-2022 (34264)		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	The firm has referred to previous inspection for authenticity of stability data of their products conducted by the panel, on the basis of which Registration Board in its 294th meeting dated 04th April,2020, decided to approve registration of Xetine (Vortioxetine as hydrobromide) 10mg and Xetine 20mg tablet. Inspection date: 03-03-2020.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	1. Copies of COAs (ZPAR17-337) of API (Paracetamol) from M/s Zenith Chemical Industries (Pvt.) Ltd. 16 Km off Ferozepur

		Road behind Wapda Grid Station, 1 Kilometer of Chandra Road, Lahore and M/s Werrick pharmaceuticals, Islamabad are submitted. 2. Copies of COAs (PEH-180101Y1) of API (Phenylephrine HCl) from M/s Shenzhen Oriental Pharmaceutical Co., Ltd. No.43, Dakeng Road, Tongla village, Longgang District, Shenzhen, China and M/s Werrick pharmaceuticals, Islamabad are submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of APIs from both API Manufacturers and Finished Product Manufacturer are provided by the firm. For Paracetamol as per BP monograph and for Phenylephrine as per USP monograph.
4.	Stability study data of API from API manufacturer	**Paracetamol:** Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 65% ± 5%RH for 48 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 12, 18, 24, 30, 36, 42, 48 & 0, 1, 2, 3 & 6 months respectively. Batches:(P11-001, P11-002, P11-003) Phenylephrine hydrochloride: Firm has submitted stability study data of API as per zone IV-A. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 65% ± 5%RH for 48 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5%RH for 6 months at intervals 0, 3, 6, 9, 12, 18, 24, 36, 48 & 0, 1, 2, 3 & 6 months respectively. Batches:(PEH-160404, PEH-160405, PEH-160406)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**For Paracetamol:** Firm has submitted copy of GMP certificate dated 24-09-2021 in the name of M/s Zenith Chemical Industries (Pvt.) Ltd. Moza Dondey, Jia Baga, Raiwind Road, Lahore issued by DRAP Lahore, on the basis of evaluation conducted on 14-07-2021. The certificate is valid for two years from the date of inspection. **For Phenylephrine hydrochloride:** The firm has submitted copy of Drug Manufacturing Certificate No.Y20160118 valid till 23-12-2025 of M/s Shenzhen Oriental Pharmaceutical Co., Ltd. No.43, Dakeng road, Tongle village, Longgang District Shenzhen, China.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**For Paracetamol:** The firm has submitted copy of invoice No. 00023/1117 dated 13-11-2017 for purchase of Paracetamol 8000kgs (Batch No's. ZPAR17-333, ZPAR17-336 & ZPAR17-337 from M/s Zenith Pharmaceuticals, 16-Km Ferozepur Road, Lahore. **For Phenylephrine Hydrochloride:** The firm has submitted copy of invoice No. SZ-PH-1803040 dated 12-04-2018 from exporter M/s Shenzhen Oriental Pharmaceutical Co., Ltd. No.43, Dakeng road, Tongle village, Longgang District Shenzhen, China., for import of 0.5kg of

		Phenylephrine HCl USP (Batch No. PEH-180101Y1) in name of M/s Werrick Pharmaceuticals, Indusrial area, Islamabad attested by AD (I&E) DRAP Islamabad dated 28-05-2018.
7.	Protocols followed for conduction of stability study	Submitted
8.	Method used for analysis of FPP	Submitted
9.	Drug-excipients compatibility studies (where applicable)	Not provided. However, the formulation is qualitatively similar to Demazin Cold + Flu relief tablet of iNova pharmaceuticals (Australia) Pvt. Ltd. (TGA approved)
10.	Complete batch manufacturing record of three stability batches.	The firm has submitted Batch Manufacturing record of following 03 Batches: **Batch No.** / **Batch Size** / **Mfg. Date** T-01 / 1500 tablets / 02-2019 T-02 / 1500 tablets / 02-2019 T-03 / 1500 tablets / 02-2019
11.	Record of comparative dissolution data (where applicable)	Comparative dissolution studies performed against Panadol CF day caplet (Batch No. KU8B) of M/s GSK (Pakistan) Karachi in Acid media (0.1N HCl pH 1.0-1.2), Acetate buffer (PH 4.5) & Phosphate Buffer (pH 6.8) at 05, 15 & 30 minutes time points.
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

REMARKS OF EVALUATOR (**PEC**-XVII)

Deficiency/Observation	**Response by Pharma.**
In stability protocols, test parameters are mentioned for Werinta tablet 60mg.	Firm re-submit stability protocols and rectified the typo error.
Submit Raw data sheets/analysis reports of chromatograms for the comparative dissolution profile/studies, along with F2 value calculation. Also provide dissolution media preparations methods/procedures.	Firm submit raw data sheets/analysis reports for comparative dissolution data at pH 1.2, pH 4.5 and pH 6.8, along with calculation of f2 values for the same.
Justify the applied product finished drug product specifications comply innovator's product specifications (dissolution parameters, dissolution limits etc).	Firm submitted as follow: 1. The dissolution method of innovator/reference product is not available in any official pharmacopoeia or reference regulatory authority. The firm has established it dissolution method and parameters as per USP Chapter <1092> THE DISSOLUTION PROCEDURE. 2. The firm has established its pharmaceutical equivalence against Panadol CF Day Caplet, Batch No.

	KU8B, manufactured by GSK, Karachi. The determined f2 values are more than 50, which showed similarity between two profiles. The drug substances are found to be highly soluble in all physiological p H range i.e., it shows more than 85% release within 15 minutes in all three media. Furthermore, all the results observed during stability studies are within limits.
In the stability study summary data sheets for all the three trial batches, physical description of the drug product given as "film-coated tablet", while the applied formulation is "un-coated" tablet.	Firm re-submit stability study summary data sheets, with physical description as "compressed tablet" and terms it as typo error.
Submit most recent GMP compliance inspection report conducted within last three years.	Firm submitted GMP certificate issued on 22-08-2022, based on inspection and evaluation conducted on 12-08-2022.
Submit fee of Rs. 7,500 for correction/pre-approval change/ in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm submitted fee of Rs: 7500/- vide online deposit slip No.538489911 for pre-registration variations in application.

Decision: Approved with Innovator's specification.
Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.

Deferred cases:

Registration applications for local manufacturing of (Human) drugs submitted on Form 5: (Differential Fee cases)

911.	Name and address of manufacturer/ Applicant	M/s Dyson Research Laboratories (Pvt.) Ltd., 28-Km, Ferozepur Road, Lahore.
	Brand Name + Dosage Form + Strength	DICLOSTOL tablet (75mg/200mcg)
	Composition	Each modified-release tablet contains: Diclofenac Sodium…….75 mg Misoprostol…….200mcg
	Diary No. Date of R & I & fee	Dy. No. 230 dated 25-05-2011, Rs. 8,000/- dated 25-05-2011. Dy. No. dated 21-06-2016 Differential fee Rs. 12,000/- dated 21-06-2016 vide challan No. dated. "Duplicate dossier, R & I verified".
	Pharmacological Group	Anti-rheumatic, NSAID
	Type of Form	Form 5
	Finished product Specification	USP specifications
	Pack size & Demanded Price	2 × 10's, As per SRO
	Approval status of product in Reference Regulatory Authorities	(MHRA approved) Arthrotec 75 modified-release tablets (Each tablet consists of a gastro-resistant core containing 75 mg diclofenac sodium surrounded by an outer mantle containing 200 micrograms misoprostol).
	Me-too status	Dolact Tablet 75mg/200mcg of M/s Hiranis Pharmaceuticals, Karachi. Registration No. 103169
	GMP status	Updated GMP compliance status required
	Remarks of the Evaluator (PEC-XVII)	• As per master formulation submitted, the tablet consists of an enteric inner core of Diclofenac Sodium and a film-coated outer core of Misoprostol 1% dispersion. • Provide most recent/last GMP inspection report conducted within last 03 years.

		• Revise label claim as: Each delayed release tablet contains: Diclofenac Sodium (as gastro-resistant inner core) …...75mg Misoprostol 1% dispersion (as outer core) ……...200mcg • Provide evidence of double layer/core tablet (tablet within tablet) manufacturing facility. • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021.
	Decision of 323rd RB meeting:	• Deferred for: • Revision of label claim as per reference product as: Each delayed release tablet contains: Diclofenac Sodium (as gastro-resistant inner core) …...75mg Misoprostol 1% dispersion (as outer core) ……...200mcg • Confirmation of required manufacturing equipment i.e. tablet biayered machine for tablet within tablet manufacturing. • Most recent GMP audit report from QA & LT Division, valid within last three years. • Firm shall submit the fee of Rs. 30,000 for correction/pre-approval change in composition (correction/change of formulation), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021. • Registration Board further decided to verify fee challans as per decision of 285th meeting.
	Remarks of the Evaluator (PEC-XVII)	• Firm revised label as: Each delayed release tablet contains: Diclofenac Sodium (as gastro-resistant inner core) …...75mg Misoprostol 1% dispersion (as outer core) ……...200mcg • Firm submitted panel inspection report for renewal of DML conducted on 14-10-2015 & 03-11-2015 as evidence of availability of required manufacturing equipment i.e, tablet bilayered machine for tablet within tablet manufacturing. In the submitted report, installation of double core compression machine in tablet general section has been mentioned. However, the report is unsigned. • Firm submitted fee of Rs: 7500/- vide online deposit slip No.748905593 for label claim revision/change in composition. • The firm shall submit remaining fee of Rs: 22,500/- for change in composition/label claim as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021. • Firm shall submit most recent GMP audit report conducted within last three years.
Decision: Approved as per following label claim: **Each delayed release tablet contains:** **Diclofenac Sodium (as gastro-resistant inner core) …...75mg** **Misoprostol 1% dispersion (as outer core) ……...200mcg**		

Item No. 11: Agenda of Evaluator PEC-XIII (Mr. Shahid Nawaz)

a. Priority Registration applications of Imported Human Drugs on form 5F as per decision of 257th meeting of Registration Board.

Registration Board in its 257th meeting held on 24-25th March, 2016 deliberated that drugs for treatment of chronic ailments and drugs which are in short availability should have priority review process and consideration by the Board to ensure their free availability. The Board decided that drugs for treatment of cancer, viral diseases, thalassemia, immunosuppressant's, vaccine and sera, new molecules / formulations, blood factors and bags will be given priority consideration.
Following applications are placed before the Board for consideration in light of decision of 257th meeting of the registration Board.

912.	Name, address of Applicant / Importer	Biocare Pharmaceutica, 807-Shadman 1, Lahore-Pakistan.
	Details of Drug Sale License of importer	DSL NO. 05-352-0063-032069D. Address: M/s Biocare Pharmaceutica, 807-Shadman 1, District Lahore. Go-down address: 8-C, Street No.3, Near LGS School, Shah Jamal, District Lahore. Valid up to 17-04-2022.
	Name and address of marketing authorization holder (abroad)	Dexa Medica, Jalan Jenderal Bambang Utoyo No. 138,Palembang 30115, Indonesia.
	Name, address of manufacturer(s)	PT Ferron Par Pharmaceuticals, (Dexa Group) - Dexa Medica manufacturer Jababeka Industrial Estate I, Jl. Jababeka VI Blok J-3 Cikarang Bekasi 17520, INDONESIA.
	Name of exporting country	Indonesia.
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	Detail of certificates attached (CoPP, GMP certificate) **CoPP:** Legalized copy of CoPP (certificate No. RG.01.05.32.321.05.21.2865) dated 26-05-2021 issued by National Agency of Drug and Food Control, Indonesia is submitted. Certificate confirms that the product is actually on the market of the exporting country. Certificate has also mentioned the name of product license holder and manufacturer of the product. Name of the importing country mentioned on the certificate is Pakistan. **GMP:** Legalized copy of GMP certificate No. ST.03.05.33.0331.03.21.000513 dated 08-03-2021 issued by the Indonesian Food and Drug Authority is submitted. Certificate has mentioned that PT Ferron Par Pharmaceuticals, located at Jababeka Industrial Estate I, Jl. Jababeka VI Blok J-3 Cikarang Bekasi 17520, Indonesia manufactures pharmaceutical product under the establishment license No. FP.01.03/IV/0044-e/2020 issued in Jakarta on 26-06-2020 and manufacturing activities are subject to periodic inspections. The standards used for inspection is Indonesian GMP Code which is equivalent to PIC/S and WHO standards. Certificate has validity of 04-03-2023.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of supply and distribution agreement between PT Dexa Medica, Jalan Jenderal Bambang Utoyo No. 138, Palembang 30115, Indonesia (Product license holder) wherein the product license holder Dexa Medica grants an exclusive right to (Biocare

		Pharmaceutica) for market, sell, distribute the product in the territory using the trade mark including the rights to use the registration documents of the product provided by Dexa for the sole purpose of registering the products in the territory.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 2944: dated 31-01-2022.
	Details of fee submitted	PKR 75,000/-: vide slip No. 951976140721 dated 05-01-2022.
	The proposed proprietary name / brand name	Nicardex 10mg/10ml Solution for Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 10ml ampoule contains: Nicardipine hydrochloride …… 10mg.
	Pharmaceutical form of applied drug	Solution for Injection.
	Pharmacotherapeutic Group of (API)	Selective Calcium Channel Blockers with mainly Vascular effects. ATC Code: C08C
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	1's and box of 05 ampoules.
	Proposed unit price	PKR 508/ampoule and 2540/box of 05 ampoules.
	The status in reference regulatory authorities	Nicardipine 10 mg/10 ml solution for injection, Laboratoire Aguettant 1 rue Alexander Fleming 69007 LYON FRANCE, MHRA approved.
	For generic drugs (me-too status)	Could not be confirmed.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
	Name, address of drug substance manufacturer	Name: Lusochimica S.p.A. Address: Via Giotto, 9 - 23871 Lomagna (LC), Italy.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification studies, batch analysis (NIC2114, NIC1717 & NIC619) and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 48 months' real time stability data at 25°± 2°C / 60% RH ± 5% RH of 03 batches (2705, 2805 & 2905). • 06 month accelerated stability data 40°C ± 2°C / 70% RH ± 5% RH of 03 batches (2705, 2805 & 2905).
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturer, batch formula, manufacturing process and process control, process validation protocols/report, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (4210382, 5201583 & 5201584), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence is established against Perdipine injection 10mg/10ml manufactured by Astellas Pharma Japan, Batch No. NY68Y011 by performing quality tests including identification, pH, Osmolarity, Particulate matter, Related substances, Assay, sterility, content of Sorbitol & bacterial endotoxin.
	Analytical method validation/verification of product	Submitted.
	Container closure system of the drug product	10ml type I amber glass ampoule.
	Stability study data of drug product, shelf life and storage conditions	• 36-months real time stability data at 30°C ± 2°C / 65% ± 5% RH of 03 batches (K-10290-01-F-PSC-1, K-10290-01-F-PSC-2 & K-10290-01-F-PSC-3). • 06-month accelerated stability data 40°C ± 2°C / 75% ± 5% RH of 03 batches (K-10290-01-F-PSC-1, K-10290-01-F-PSC-2 & K-10290-01-F-PSC-3).
	Therapeutic indications in MHRA.	Nicardipine 10 mg/10 ml solution for injection is indicated for the treatment of acute life-threatening hypertension, particularly in the event of: • Malignant arterial hypertension/Hypertensive encephalopathy. • Aortic dissection, when short acting beta-blocker therapy is not suitable, or in combination with a beta-blocker when beta-blockade alone is not effective. • Severe pre-eclampsia, when other intravenous antihypertensive agents are not recommended or are contra-indicated. • Nicardipine is also indicated for the treatment of post-operative hypertension

Evaluation by PEC:

Sr. No.	Section	Observations	Reply by the firm.
72.	1.1	Submitted fee is in the head of Biological drug division and for biological drug. Clarification shall be submitted.	
73.		Notarized supply and distribution agreement shall be submitted.	
74.	1.4.3	Valid copy of Drug Sale License of the applicant shall be submitted as the submitted DSL is valid up to 17-04-2022.	
75.	1.6.5	Valid copy of GMP certificate of Drug Substance shall be submitted.	

76.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	
77.	3.2.S.4.2	Analytical procedures used for the drug substance by the drug substance manufacturer shall be submitted.	
78.	3.2.S.4.4	• COA of the drug substance manufacturer has loss on drying of NMT 0.5% while the COA of the drug product manufacturer has Loss on drying limit of less than or equal to 1%. Justify. • COAs of the drug product manufacturer has assay test performed by the titration method while the analytical procedure has mentioned USP specification by HPLC method for assay test. Justify.	
79.	3.2.P.8	Accelerated stability data of batch No. K-10290-01-F-PSC-1 & K-10290-01-F-PSC-2 at six-month time point has total impurities out of specifications. Justification shall be submitted.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

913.	**Name, address of Applicant / Importer**	M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi.
	Details of Drug Sale License of importer	**License No**: 521 **Address**: Martin Dow Limited, Plot no. 37, Sector 19, Korangi Industrial Area, Karachi. Address of Godown: (a) 1st floor, Plot no. 211, Sector 23 Korangi Industrial Area, Karachi (b) Plot No 32, Sector 16, Korangi Industrial Area, Karachi **Validity**: 16-06-2022 **Status**: License to sell Drugs by way of Wholesale.
	Name and address of marketing authorization holder (abroad)	Nano Daru Pajuhan Pardis Address: No. 4&8, Northern Tak Ave., Attar St., Vanak Sq., Tehran, Iran.
	Name, address of manufacturer(s)	**Nano Daru Pajuhan Pardis** Address: Behnood Pharmed Incubation Center, No. 110, Bahman St., Karafarinan Blvd., Sepehr Industrial Zone, Nazarabad City, Alborz Province, Iran.
	Name of exporting country	Iran
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized CoPP certificate (No. 665/68759) dated 28-02-2022 issued by the Division of Pharmaceutical and Narcotic Affairs of Ministry of Health Food and Drug Adm. MOH. Name and dosage form on the CoPP certificate mentioned is "Exopio 380mg (Naltrexone extended release powder and diluent for suspension for injection)" and name of the product license holder is Nano Daru Pajuhan Pardis, No. 4&8, Northern Tak Ave., Attar St., Vanak Sq., Tehran, Iran. The certificate also confirms that the applied formulation is actually on the market in the exporting country.

		The name of importing country on CoPP is mentioned in Annexures as Pakistan. Furthermore, the CoPP is valid till 28-02-2023. **GMP:** Applicant has submitted legalized copy of GMP certificate No. 665/60857 dated 19-01-2022 issued by Iran Food and Drug Administration the name of M/s Nano Daru Pajuhan Pardis, No. 4&8, Northern Tak Ave., Attar St., Vanak Sq., Tehran, Iran having its manufacturing site at Behnood Pharmed Incubation Center, No. 110, Bahman St., Karafarinan Blvd., Sepehr Industrial Zone, Nazarabad City, Alborz Province, Iran and the certificate confirms that Hazardous aseptic injectable vials of the firm is in compliance with the cGMP/GMP standards and relevant principals and regulation and complies with the Good Manufacturing Practices requirements of the PIC/S Guidelines.
	Details of letter of authorization / sole agency agreement	Firm has submitted original and legalized sole agency agreement. The agreement specifies that product license holder i.e. M/s Nano Daru Pajuhan Pardis, No. 4&8, Northern Tak Ave., Attar St., Vanak Sq., Tehran, Iran appoints M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi to import below mentioned product. The document also emphasized that M/s Martin Dow Limited is the sole authorized importer of the below mentioned products in Pakistan; *Exopio 380mg (Powder and diluent for suspension for injection) Naltrexone extended-release 380mg.*
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 26860 dated 22-09-2022.
	Details of fee submitted	PKR 150,000/- vide slip No. 592742515 Dated: 31-12-2021
	The proposed proprietary name / brand name	EXOPIO 380 mg.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	**Each vial contains:** Naltrexone extended-release powder for suspension for injection ……..…380 mg **Each vial of Diluent contains:** Carboxy methylcellulose Sodium ……150mg Sodium Chloride……36mg Polysorbate……...……4mg Water for Injections……..…up to 4ml

	Pharmaceutical form of applied drug	Powder for suspension for injection.
	Pharmacotherapeutic Group of (API)	Drugs used in alcohol dependence.
	Reference to Finished product specifications	Innovator's Specifications.
	Proposed Pack size	1's.
	Proposed unit price	As per DPC.
	The status in reference regulatory authorities	VIVITROL (naltrexone for extended-release injectable suspension), USFDA Approved.
	For generic drugs (me-too status)	Not Available
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Temad Co. Active Pharmaceutical Ingredients Address: 28th km of Karaj Makhsous Road, Tehran, Iran.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches for drug substance at accelerated as well as real time conditions. The real time stability data is conducted at 30°C ± 2°C & 65% RH The stability study data is till 24 months and accelerated stability study data is conducted at 40°C ± 2°C & 75% ± 5% RH for six months. Batch No. NAB5058001, NAB5058002 & NAB5058003.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (21002, 21003, 20003), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence for the applied product against the reference product i.e. Vivitrol manufactured by Alkermes, Inc. by performing following tests; Appearance before preparation of suspension, Dispersion time, Appearance after preparation of

		suspension, pH, Osmolarity, Water content, Identification, Assay and In-vitro release.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type – I clear colourless glass vial with lyophilized bromobutyl rubber stopper.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 4 batches of drug product. The real time stability study data is conducted at 5°C ±3° C for 24 months. Batch No. 19003 24 months, 20001 18 months, 20002 18 months & 20003 12 months.
	Therapeutic indications in USFDA.	VIVITROL contains naltrexone, an opioid antagonist, and is indicated for the treatment of alcohol dependence in patients who are able to abstain from alcohol in an outpatient setting prior to initiation of treatment with VIVITROL. Patients should not be actively drinking at the time of initial VIVITROL administration (1.1). • VIVITROL is indicated for the prevention of relapse to opioid dependence, following opioid detoxification (1.2). • VIVITROL should be part of a comprehensive management program that includes psychosocial support (1).

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.	**1.3.4**	Valid copy of Drug Sale License of the applicant shall be submitted.	Firm has submitted copy of DSL No. 565 dated 13-06-2022 in the name of M/s Martin Dow limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi valid till 16-06-2024.
2.	**1.6.5**	Valid copy of GMP certificate of drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 665/18253 dated 17-05-2020 issued by Iran Food and Drug Administration in the name of Temad Co. Active Pharmaceutical Ingredients, 28th km of Karaj Makhsous Road, Tehran, Iran valid for three years.
3.	**1.5.5**	Pharmacotherapeutic Group of (API) shall be revised.	Firm has submitted that Pharmacotherapeutic group of Naltrexone is Narcotic/Opiate antagonist.
4.	**3.2.S.4.1**	Specification provided by the drug substance manufacturer has water content of NMT 2.0% while FPP has mentioned NMT 6.0%. Clarification shall be submitted.	Firm has submitted revised/corrected specification of the drug substance by providing a new COA for the drug substance from drug substance manufacturer. They also provided COA of the drug substance from both the drug substance and drug product manufacturer and both the COA's are having NMT 6% limit of water content.
5.	**3.2.S.4.3**	Analytical method verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
6.	**3.2.S.5**	The submitted COA of the working standard used for analysis is of Naltrexone Hydrochloride. However, USP describes the reference standard for Naltrexone base (Cat. No. 1453504) only. Clarify.	Firm has submitted that same material was reported in section 3.2.S.5 as USP codes in drug substance and drug product. However, method of analysis which was reported in USP was for Naltrexone HCl. The method analysis of Naltrexone base was also the same. Because in the sample solution media & mobile phase, both forms become base form because of the pH conditions

7.	**3.2.P.2.2**	Justification of 12.9% of overage of naltrexone in the formulation shall be submitted.	Firm has submitted that Exopio has been prepared according to the data from originator product, Vivitrol, which applies 12.9% excess Naltrexone. Firm has also submitted a document confirming 12.9% of an excess quantity of naltrexone. ***However, the authenticity of the document could not be confirmed.*** ***Furthermore, the review of the reference product in USFDA has also not mentioned any overage of the active substance.***
8.	**3.2.P.8**	• Complete real time stability data of the product shall be submitted. • In use stability studies for the applied drug product shall be submitted. • Accelerated stability data for the applied drug product shall be submitted.	Firm has submitted complete real time stability data for all the three batches i.e. 20001, 20002 & 20003 for which initially 18 months and 12-month data was submitted. Firm has submitted that the drug product should be used immediately after reconstitution process, and it should not remain unused after reconstitution. Also, it was mentioned in the booklet and guide card too. Firm has referred to the ICH Topic Q1A (R2) wherein for drug products intended for storage in a refrigerator, accelerated stability condition is 25ºC ± 2º C / 60% ± 5% RH. Failure to meet the acceptance criteria for appearance, physical attributes, and functionality test (e.g. colour, phase separation, suspensibility, caking, hardness, dose delivery per actuation) If significant change occurs between 3 and 6 months' testing at the accelerated storage condition, the proposed re-test period should be based on the real time data available at the long term storage condition. If significant change occurs within the first 3 months' testing at the accelerated storage condition, a discussion should be provided to address the effect of short term excursions outside the label storage condition, e.g., during shipping or handling. Firm has further submitted that both Exopio and RLD samples had colour change and phenotype change after one in 25ºC ± 2º C / 60% ± 5% RH. The accelerated studies were stopped and the storage condition (2 ºC - 8 ºC) noted on vial packaging of drug product.

Decision: Deferred for submission of following;

- **Scientific justification of using 12.9% overage of drug substance i.e., Naltrexone in the applied formulation.**
- **Justification for use of Naltrexone Hydrochloride as working standard in the analysis while USP monograph recommends Naltrexone base as reference standard.**

914.	Name, address of Applicant / Importer	M/s Bayer Pakistan (Private) Limited, Plot No.23, Sector 22, Korangi Industrial Area, Karachi, Pakistan.

	The proposed proprietary name / brand name	Firialta 10mg Tablet

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Finerenone ……..…. 10mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Nonsteroidal Mineralocorticoid Receptor (MR) Antagonist (C03D) Aldosterone Antagonists and other Potassium-Sparing Agents.
	Reference to Finished product specifications	Bayer's specification (Innovator).
	Proposed Pack size	14's and 28's.
	Proposed unit price	MRP will be submitted later.
	The status in reference regulatory authorities	Kerendia 10mg & 20mg tablets by Bayer Healthcare, USFDA Approved.
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Bayer AG, Friedrich-Ebert-Str. 217-333 42117 Wuppertal, Germany (Synthesis of Finerenone). & Bayer AG, Kaiser-Wilhelm-Allee 51368 Leverkusen, Germany (Micronization, Packaging & Quality control testing).
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (UN80490, UN8048Z & UN8049R) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance for accelerated as well as real time conditions. The real time stability data is conducted at 30 ^{o}C / 75% RH while accelerated stability is conducted at 40 ^{o}C / 75% RH. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability data.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equillance is not submitted by the applicant as it is an innovator product.

	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Foil 250 µm PVC with 40 g/m² PVDC colourless transparent (0107) sealed with Foil 20 µm Al sealable to PVC/PVDC (0201)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 6 batches. The accelerated stability study data is conducted at 40ºC / 75% RH for 6 months. The real time stability study data is conducted at 30ºC / 75% RH for 36 months. Batch No. BXHRUE1, 10704004, BXRHUE2, 10704004, BXRHUE3 & 10704006.
	Indications and Usage USFDA. MHRA/EMA. TGA.	Kerendia is indicated to reduce the risk of sustained eGFR decline, end-stage kidney disease, cardiovascular death, nonfatal myocardial infarction, and hospitalization for heart failure in adult patients with chronic kidney disease (CKD) associated with type 2 diabetes (T2D) Kerendia is indicated for the treatment of chronic kidney disease (stage 3 and 4 with albuminuria) associated with type 2 diabetes in adults. KERENDIA is indicated to delay progressive decline of kidney function in adults with chronic kidney disease associated with Type 2 diabetes (with albuminuria), in addition to standard of care.

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of Drug Sale License shall be submitted.	Firm has submitted notarized copy of DSL No. 575 dated 12-09-2022 in the name of M/s Bayer Pakistan (Pvt.) Ltd., Plot No.23, Sector 22, Korangi Industrial Area, Karachi valid till 05-07-2024.
2.		Original/notarized agency agreement shall be submitted.	Firm has submitted notarized copy of the sole agency declaration.
3.	3.2.S.4.4	COAs of the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted that the drug substance Finerenone is synthesized in house in Bayer's long time drug substance facility i.e. Bayer AG Wuppertal. As the manufacturing sites work under the same quality system and use one corporate IT system for quality data, in which the analytical results of active substances batches are uploaded for release, there are no COAs of the drug substance by the drug product manufacturer for commercial batches. Instead, the results are visible in the system and taken from the drug substance site. Bayer AG's drug product unit for finished goods i.e. the supply centre Leverkusen, as the drug product manufacturer performs identity test for the drug substance if micronized at other site of Bayer AG as it arrives from a different location in Germany per Truck, even as of the same legal entity. We confirm each batch of Finerenone drug substance is tested against the specifications and by analytical methods as presented in this

			Marketing Authorization Application, independently which site is performing he test.
4.	3.2.P.8.3	Shelf life specifications for assay test are 95% - 105% while in stability study data specifications for assay test are 93% - 105%. Clarification shall be submitted.	Firm has submitted that Firialta tablets were developed by Bayer more than 10 years agoand formulations made for clinical studies were put on stability. At that time, at that time shelf life specifications limit for assay were wide, to take into consideration the possibility that tablets, which could have been released close to the release limit (95% - 105%) might decompose slightly during the time of stability testing. A wider limit therefore is common for shelf life specifications in all projects and was submitted for clinical studies of Finerenone. Stability studies at 25ºC / 60% RH or 30 ºC / 75% RH have shown stability for 60-months real time. After that, for the planned marketing authorization, NDA stability studies were conducted. The studies used batches manufactured in 2017 already and the stability limits for the study were at this time 93% - 1055 as depicted in the stability reports. After submission in different countries prior to Pakistan, a few Health authorities requested for tightening of limits, because of excellent stability and low amounts of decomposition products found. Furthermore they have also provided reports of ongoing stability studies on commercial batches that confirm the updated limits of shelf life specifications i.e. for assay test 95% - 105%.

Decision: Approved as per policy of inspection of manufacturer abroad.

915.	Name, address of Applicant / Importer	M/s Bayer Pakistan (Private) Limited, Plot No.23, Sector 22, Korangi Industrial Area, Karachi, Pakistan.
	Details of Drug Sale License of importer	License No: 01 Address: Plot No.23, Sector 22, Korangi Industrial Area, Karachi. Address of Godown: Plot No. l -D-22 & 1-D-23, Sector 30, Korangi Industrial Area, Karachi. Validity: 05-07-2022. Status: License to sell, stock & exhibit for sale, distribute and sell drugs by way of wholesale by of manufacturer, importer or indenter.
	Name and address of marketing authorization holder (abroad)	M/s Bayer AG, Kaiser-Wilhelm-Allee 51368 Leverkusen, Germany.
	Name, address of manufacturer(s)	M/s Bayer AG, Kaiser-Wilhelm-Allee 1, Wiesdorf, Leverkusen North Rhine-Westphalia, Germany.
	Name of exporting country	Germany.
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized copy of CoPP certificate (No. 07/22/169222) dated 28-03-2022 issued by European Medicines Agency for Firialta 10mg (28 tablets). The CoPP certificate confirms that the product is actually on the market in the exporting region. The CoPP certificate also confirms the GMP status of the manufacturing site through periodic inspection. **GMP:**

		Firm has also submitted copy of Eudra GMP certificate No. DE-NW-03-GMP-2022-0022 dated 02-05-2022 issued on the basis of inspection conducted on 23-01-2022. The certificate confirms that the manufacturer M/s Bayer AG, Kaiser-Wilhelm-Allee 1, Wiesdorf, Leverkusen North Rhine-Westphalia, Germany complies with the principles and guidelines of Good Manufacturing Practice laid down in Directive 2003/94/EC.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of Letter of Authorization (Sole Agency Declaration) from Bayer AG, Kaiser-Wilhelm-Allee 51368 Leverkusen, Germany dated 22-06-2022. The letter species that the marketing authorization / license holder abroad (Bayer AG, Kaiser-Wilhelm-Allee 51368 Leverkusen, Germany) authorize/appoints M/s Bayer Pakistan (Private) Limited as a sole importer of the Firialta 20 mg Tablets. The product license holder also M/s Bayer Pakistan (Private) Limited to be the marketing authorization holder and will be responsible for all matters pertaining to the registration and life cycle management of Firialta 10 mg Tablets.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)

	Details of fee submitted	PKR 75,000/-: vide slip No. 6032727502 dated 18-05-2022.
	The proposed proprietary name / brand name	Firialta 20mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Finerenone ……..…. 20mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Nonsteroidal Mineralocorticoid Receptor (MR) Antagonist (C03D) Aldosterone Antagonists and other Potassium-Sparing Agents.
	Reference to Finished product specifications	Bayer's specification (Innovator).
	Proposed Pack size	14's and 28's.
	Proposed unit price	MRP will be submitted later.

	The status in reference regulatory authorities	Kerendia 10mg & 20mg tablets by Bayer Healthcare, USFDA Approved.
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Bayer AG, Friedrich-Ebert-Str. 217-333 42117 Wuppertal, Germany. & Bayer AG, Kaiser-Wilhelm-Allee 51368 Leverkusen, Germany.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (UN80490, UN8048Z & UN8049R) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance for accelerated as well as real time conditions. The real time stability data is conducted at 30 ^{o}C / 75% RH while accelerated stability is conducted at 40 ^{o}C / 75% RH. The stability study data is till 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, batch formula, manufacturing process and process control, process validation, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability data.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equillance is not submitted by the applicant as it is an innovator product.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Foil 250 µm PVC with 40 g/m² PVDC colourless transparent (0107) sealed with Foil 20 µm Al sealable to PVC/PVDC (0201)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 6 batches. The accelerated stability study data is conducted at 40^{o}C / 75% 6 months. The real time stability study data is conducted at 30^{o}C / 75% RH for 36 months. Batch No. BXHRUG1, 10704007, BXRHUG2, 10704008, BXRHUG3 & 10704009.
	Indications and Usage USFDA.	Kerendia is indicated to reduce the risk of sustained eGFR decline, end-stage kidney disease, cardiovascular death, nonfatal myocardial infarction, and hospitalization for

		heart failure in adult patients with chronic kidney disease (CKD) associated with type 2 diabetes (T2D)
	MHRA/EMA.	Kerendia is indicated for the treatment of chronic kidney disease (stage 3 and 4 with albuminuria) associated with type 2 diabetes in adults.
	TGA.	KERENDIA is indicated to delay progressive decline of kidney function in adults with chronic kidney disease associated with Type 2 diabetes (with albuminuria), in addition to standard of care.

Batch No. OX11202, OX11203 & OX11605.

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.		• Original, legalized copy of GMP certificate of the manufacturer shall be submitted. • Original/notarized authorization letter shall be submitted.	Firm has once again submitted coloured copy of GMP certificate. ***Legalized and notarized GMP certificate shall be submitted.*** Firm has submitted notarized letter of authorization.

2.	1.4.1.1	Authorization letter has mentioned the territory of Pakistan only, while in module one section 1.4.1.1 has mentioned domestic and export sales. Clarification shall be submitted.	Firm has submitted revised Form 5F wherein they have made change in section 1.4.1.1 from **domestic and export sales** to **domestic sales.** ***Fee required for pre-registration variation is not submitted.***
3.	1.5.6	Finished product specification for the finished product shall be mentioned.	***No specification is submitted for the finished drug product by the applicant.***
4.	3.2.S.4.1	Specification of the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted two tables of specifications for both the drug substance manufacturers and stated that each lot of Oxaliplatin is tested and must meet the specifications listed in the provided table.
5.	3.2.S.4.2	Analytical method for drug substance by the finished product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Analytical method verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has provided validation report completed at Mulgrave, Victoria, Australia (Mulgrave) site. They further submitted that they have provided the method transfer report demonstrating successful transfer of the determination of Identification and Assay by HPLC, Impurity B, Impurity E, Impurity C, Unspecified Impurities, residual solvents (for Heraeus API only) and silver contents of Oxaliplatin method from the Mulgrave to Zydus Hospira Oncology Private Limited (ZHOPL) manufacturing sites.
7.	3.2.P.2.2	The comparison of the developed formulation with innovator product with applied strength including the results of all the quality tests (pharmaceutical equivalence) shall be submitted and discussed.	Firm has submitted pharmaceutical equivalence of their product against the innovator product i.e Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden for Appearance of Solution, pH, Assay and Related substance. Results provided has shown that Mayne Pharma's Oxaliplatin Injection and the competitor product, Sanofi Synthelabo's Eloxatin™ Injection marketed in UK(50mg/10mL;100mg/20mL), Germany (50mg/10mL; 100mg/20mL) and Sweden (50mg/10mL) were similar with respect to Appearance of solution, pH, potency and related substances. Therefore, Mayne Pharma's Oxaliplatin Injection is considered equivalent to Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden. ***Pharmaceutical equivalence provided by the applicant is Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.***
8.	3.2.P.5.1	This section has mentioned In-house specifications for the Assay test of the drug product while official monograph is available in USP. Justify.	Firm has submitted that the specifications and acceptance criteria for Oxaliplatin Injection 5 mg/mL comply with the USP monograph for Oxaliplatin Injection requirements. The compendial analytical procedures have been verified suitable for their intended use and comply with compendia. Assay and Related Substances tests are performed according to validated in-house analytical procedures. Validation reports are provided in dossier section 3.2.P.5.3. Justification of specifications is provided in dossier section 3.2.P.5.6.

9.	3.2.P.5.3	Submitted Validation of analytical procedure is by Hospira Australia since the drug product manufacturer responsible for manufacture & quality control of drug product is in India. Clarification is required.	Firm has submitted that Validation of the in-house analytical procedures was performed by the Hospira Australia development site. As the product was subsequently transferred for commercial manufacture to the ZHOPL facility located in India, the method transfer study from Hospira Australia to ZHOPL was completed demonstrating the ability of the receiving site to perform testing. They also refer to Report QCC-008-TMR-005 submitted previously.

Decision: Deferred for following;

- **Valid, legalized and original GMP certificate of the finished product manufacturer shall be submitted.**
- **Justification shall be submitted for providing pharmaceutical equivalence of the product from M/s Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.**
- **Current regulatory status with respect to the market authorization and manufacturing sites for the applied formulation of both the firms i.e. M/s Mayne Pharma Limited Australia and M/s Hospira Australia shall be submitted from where the Pharmaceutical equivalence and Validation of analytical procedures are provided respectively.**

The real time stability data is conducted at 25ºC ± 2ºC & 60% ± 05% RH. The stability study data is till 60 months and accelerated stability study data is conducted at 40ºC ± 2ºC & 75% ± 5% RH for six months. **Heraeus Deutschland GmbH & Co.** Batch No. 10902, 11002 & 11102. **UMICORE Argentina S.A.** Batch No. OX12011, OX12012 & OX12013.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, batch formula, pharmaceutical development, manufacturer, manufacturing process and process control, process validation report, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (OX21202, OX21203, OX21605), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Type – I clear glass vial, with elastomeric closure, and aluminum seal with plastic flip-off top.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches of drug product. Accelerated stability study data is conducted at 40ºC ±2ºC & 75% ± 5% RH for 06 months.

		The real time stability study data is conducted at 30ºC ±2º C & 75% ± 5% RH for 24 months. Batch No. OX21202, OX21203 & OX21605.

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.		• Original, legalized copy of GMP certificate of the manufacturer shall be submitted. • Original/notarized authorization letter shall be submitted.	Firm has once again submitted coloured copy of GMP certificate. ***Legalized and notarized GMP certificate shall be submitted.*** Firm has submitted notarized letter of authorization.
2.	1.4.1.1	Authorization letter has mentioned the territory of Pakistan only, while in module one section 1.4.1.1 has mentioned domestic and export sales. Clarification shall be submitted.	Firm has submitted revised Form 5F wherein they have made change in section 1.4.1.1 from **domestic and export sales** to **domestic sales.** ***Fee required for pre-registration variation is not submitted.***
3.	1.5.6	Finished product specification for the finished product shall be mentioned.	***No specification is submitted for the finished drug product by the applicant.***
4.	3.2.S.4.1	Specification of the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted two tables of specifications for both the drug substance manufacturers and stated that each lot of Oxaliplatin is tested and must meet the specifications listed in the provided table.
5.	3.2.S.4.2	Analytical method for drug substance by the finished product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Analytical method verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has provided validation report completed at Mulgrave, Victoria, Australia (Mulgrave) site. They further submitted that they have provided the method transfer report demonstrating successful transfer of the determination of Identification and Assay by HPLC, Impurity B, Impurity E, Impurity C, Unspecified Impurities, residual solvents (for Heraeus API only) and silver contents of Oxaliplatin method from the Mulgrave to Zydus Hospira Oncology Private Limited (ZHOPL) manufacturing sites.
7.	3.2.P.2.2	The comparison of the developed formulation with innovator product with applied strength including the results of all the quality tests (pharmaceutical equivalence) shall be submitted and discussed.	Firm has submitted pharmaceutical equivalence of their product against the innovator product i.e Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden for Appearance of Solution, pH, Assay and Results provided has shown that Mayne Pharma's Oxaliplatin Injection and the competitor product, Sanofi Synthelabo's Eloxatin™ Injection marketed in UK(50mg/10mL;100mg/20mL), Germany (50mg/10mL; 100mg/20mL) and Sweden (50mg/10mL) were similar with respect to Appearance of solution, pH, potency and related substances. Therefore, Mayne Pharma's Oxaliplatin Injection is considered equivalent to Sanofi Synthelabo's Eloxatin™ Injection marketed in UK, Germany and Sweden. ***Pharmaceutical equivalence provided by the applicant is Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.***
8.	3.2.P.5.1	This section has mentioned In-house specifications for the Assay test of the drug product while official monograph is available in USP. Justify.	Firm has submitted that the specifications and acceptance criteria for Oxaliplatin Injection 5 mg/mL comply with the USP monograph for Oxaliplatin Injection requirements. The

			compendial analytical procedures have been verified suitable for their intended use and comply with compendia. Assay and Related Substances tests are performed according to validated in-house analytical procedures. Validation reports are provided in dossier section 3.2.P.5.3. Justification of specifications is provided in dossier section 3.2.P.5.6.
9.	3.2.P.5.3	Submitted Validation of analytical procedure is by Hospira Australia since the drug product manufacturer responsible for manufacture & quality control of drug product is in India. Clarification is required.	Firm has submitted that Validation of the in-house analytical procedures was performed by the Hospira Australia development site. As the product was subsequently transferred for commercial manufacture to the ZHOPL facility located in India, the method transfer study from Hospira Australia to ZHOPL was completed demonstrating the ability of the receiving site to perform testing. They also refer to Report QCC-008-TMR-005 submitted previously.

Decision: Deferred for following;

- **Valid, legalized and original GMP certificate of the finished product manufacturer shall be submitted.**
- **Justification shall be submitted for providing pharmaceutical equivalence of the product from M/s Mayne Pharma Limited Australia instead of M/s Zydus Hospira Oncology Pvt., Ltd., Plot No. 3, Pharmez-Special Economic Zone, Sarkhej Bavla Highway, N.H. No. 8A Matoda, Taluka Sanand, District Ahmadabad, Gujrat, India.**
- **Current regulatory status with respect to the market authorization and manufacturing sites for the applied formulation of both the firms i.e. M/s Mayne Pharma Limited Australia and M/s Hospira Australia shall be submitted from where the Pharmaceutical equivalence and Validation of analytical procedures are provided respectively.**

	Proposed Pack size	Pack of one injection.
	Proposed unit price	As per current pricing policy of DRAP.
	The status in reference regulatory authorities	TAXOTERE (docetaxel) injection 20mg/ml, USFDA Approved.
	For generic drugs (me-too status)	Taxotere 80mg, Sanofi Aventis, Reg. No. 066089.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Fresenius Kabi Oncology Limited, D-35, Industrial Area, Kalyani, District Nadia, West Bengal India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data including nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 02 batches of API at accelerated for 06 months, real time conditions for 24 months and intermediate studies for 12 months. The real time stability data is conducted at 25^{o}C ± 2^{o}C, RH 60% ± 5%, accelerated stability data is conducted at 40^{o}C ± 2^{o}C, RH 75% ± 5% and intermediate at 30^{o}C ± 2^{o}C, RH 65% ± 5%. (Batch No. 896EPU001, 896EPU002) and (897EPU002, 897EPU003)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, Packing, pharmaceutical development, manufacture, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has not submitted pharmaceutical equivalence with the innovator product by comparing the results of all the quality tests. However, they have provided blood bioavailability comparison of Docetaxel of Biolyse 20mg/ml (12J7D10) with innovator product Texotere 20mg of Sanofi Aventis (D9A429). Biolyse Docetaxel gave an AUC ratio of 103.17% when compared to Taxotere AUC.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	5ml type I tubular clear glass vial with Teflon coated grey bromobutyl rubber closures having Aluminium flip off over seal.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40^{o}C ±2^{o}C / 75% ± 5% RH for 6 months (Batch No. 17C01D, 17C02D & 19F10D/1). The real time stability study data is conducted at 30^{o}C ±2^{o}C / 75% ± 5% RH for 24 months (Batch No. 17C01D, 17C02D & 19F10D/1).

	Dy. No. and date of submission	Dy. No. 24210 dated 26/08/2022.
	Details of fee submitted	PKR 75,000/-: vide slip No. 8407333782 dated: 15/08/2022.
	The proposed proprietary name / brand name	Caripz 1.5mg capsules.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Cariprazine HCL eq.to Cariprazine……1.5mg.
	Pharmaceutical form of applied drug	White coloured powder filled in blue colour capsule & white colour body of Hard Gelatin capsule size # 03.
	Pharmacotherapeutic Group of (API)	Anti-Convulsant. Antipsychotics. ATC code N05A
	Reference to Finished product specifications	Innovator Specification
	Proposed Pack size	7's, 30's, 90's & 100's.
	Proposed unit price	As per SRO.

	The status in reference regulatory authorities	VRAYLAR (Cariprazine as HCl) Capsule 1.5mg, 3mg, 4.5mg & 6mg by Actavis Pharma, USFDA approved.
	For generic drugs (me-too status)	Not available.
	GMP status of the Finished product manufacturer	GMP certificate No. 46/2021-DRAP (K) dated 07-10-2021 issued on the basis of inspection conducted on 15-06-2021 is submitted.
	Evidence of approval of manufacturing facility.	Capsule (general section) approved vide letter No. F.2-12/93-Lic(Vol-V) dated 20-09-2021.
	Name and address of API manufacturer.	**Name and address of the DMF holder:** M/s Biophore India Pharmaceuticals Private Limited. Plot No. 92, Kavuri Hills, Phase II, Jubilee Hills, Hyderabad-500033, Telangana, INDIA. **Name and address of the manufacturing site:** M/s. Sionc Pharmaceuticals (Pvt.) Ltd., Plot.No:34A, Road No.1, JN Pharma City, IDA, Parawada, Visakhapatnam -531021, Andhra Pradesh, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its validation, batch analysis (2052/PDL001/3/001/21) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5% RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5% RH for 6 months. Batches:(2052/3/001/19, 2052/3/002/19 & 2052/3/003/19)
	Module-III (Drug Product):	The firm has submitted detail of the drug product regarding its description, composition, manufacturer, pharmaceutical development, manufacturing process and controls, process validation protocol, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the reference product that is Vraylar Capsule 1.5mg (Batch no: 1152230) manufactured by Forest Laboratories, Ireland Limited by performing quality tests (Identification, Disintegration Time, Assay, Dissolution)

		CDP is also performed against the same brand that is Vraylar Capsule 1.5mg **(**Batch no: 1152230) manufactured by Forest Laboratories, Ireland Limited in three different mediums i.e. 0.1N HCl, Acetate Buffer (pH 4.5) & Buffer 6.8. Both 0.1N HCl and acetate buffer shows more than 85% release within 15 minutes and F2 is not calculated while the Phosphate buffer has F2 value in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including Validation protocol, Validation report, Justification of system suitability, Specificity, Linearity, Accuracy, Precision Repeatability, Intermediate Precision, Robustness.

STABILITY STUDY DATA			
Manufacturer of API	M/s. Sionc Pharmaceuticals (Pvt.) Ltd., Plot.No:34A, Road No.1, JN Pharma City, IDA, Parawada, Visakhapatnam -531021, Andhra Pradesh, India.		
API Lot No.	6242 **(2052/PDL001/3/001/21)**		
Description of Pack (Container closure system)	Alu/Alu blister (2 x 7's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C /65%± 5%RH Accelerated: 40˚C ± 2˚C / 75%± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3 & 6 (Months) Real Time: 0, 3 & 6 (Months)		
Batch No.	21SB(B)-225-01	21SB(B)-226-02	21SB(B)-227-03
Batch Size	1500 capsules	1500 capsules	1500 capsules
Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	18-11-2021	18-11-2021	18-11-2021
No. of Batches	03		

Administrative Portion		
7.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate dated 22-03-2022 issued by Drugs Control Administration Government of Andhra Pradesh in the name of M/s. Sionc Pharmaceuticals (Pvt.) Ltd., Plot.No:34A, Road No.1, JN Pharma City, IDA, Parawada, Visakhapatnam -531021, Andhra Pradesh, India on the basis of inspection conducted on 30-12-2021 & 31-12-2021. The certificate is valid for three years from the date of issue and is meant for export of drugs only.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.5	Revise pharmacological group for the applied formulation as per WHO ATC with submission of applicable fee.	Firm has initially submitted Anti Convulsant as pharmacological group. However, they have revised it to Anti-psychotic. ***Fee required for pre-registration variation is not submitted.***
2.	1.6.5	This section has mentioned Biophore India Pharmaceuticals Private Limited as drug substance manufacturer while module 2 has mentioned Sonic Pharmaceuticals Pvt. Ltd., as drug substance manufacturer. Clarification shall be submitted.	Firm has submitted that it was typographic error. M/s Sonic pharmaceuticals is manufacturer while Biophore India Pharmaceuticals Private Limited is supplier.
3.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	Firm has submitted specifications for the drug substance as well as the analytical procedures from drug substance manufacturer.
4.	3.2.S.4.3	Method verification studies of drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted method verification studies for the drug substance including Specificity, linearity and accuracy. ***However, the date on the submitted chromatograms is January, 2023.***
5.	3.2.S.4.4	Specifications for the drug substance provided by the drug product manufacturer has assay limits (ODB) of 98.5% - 101% while submitted COA of the drug product manufacturer has assay limit (ODB) of 98% - 102%. Clarification shall be submitted.	Firm has submitted revised specification for the drug substance wherein they have changed assay limits for Cariprazine from 98.5% - 101% to 98% - 102%. ***However, fee required for pre-registration variation is not submitted.***
6.	3.2.S.7.3	Chloride content and residue on ignition tests are not performed in the stability studies of the drug substance. Clarify.	Firm has submitted that Chloride content and residue on ignition tests are not stability indicating test parameters. Hence, these tests are not conducted in stability.
7.	3.2.P.1.1	Applied formulation has SLS & Syloid 244FP while the reference product has no SLS& Syloid 244FP in the formulation. Justification shall be submitted.	Firm has submitted that in Cariprazine capsule range, the drug substance particle size distribution is non-micronized. The Cariprazine belongs to BCS II (Low solubility and high permeability). In order to improve the solubility and dissolution of Cariprazine, Sodium Lauryl Sulphate (SLS) used in the formulation. Secondly, in order to improve the flowability as well as bioavailability, Syloid 244FP was incorporated in the formulation. Firm further submitted that Cariprazine capsules were kept on stability and no changes observed in chemical and physical parameters throughout the shelf life. Stability studies demonstrated the compatibility of the formulation excipients Sodium Lauryl Sulphate (SLS) & Syloid 244FP with Cariprazine drug substance. Because stability studies is one of the technique for drug-excipients compatibility studies.
8.	3.2.P.2.2	Content uniformity test is not performed in the PE. Justification shall be submitted.	Firm has submitted results for pharmaceutical equivalence wherein they have included content uniformity test.
9.	3.2.P.5.4	Batch analysis of all the three trial batches shall be submitted.	Firm has submitted COA's for all the three trial batches.

10.	3.2.P.8	• Justification shall be submitted for not performing Content uniformity test in the stability summary sheets. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Documents for the procurement of API with approval from DRAP shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted revised stability summary sheets wherein they have added content uniformity test. Firm has submitted that this point is not applicable. Firm has submitted copy of commercial invoice No. BP/CI/21-22/07E dated 23-07-2021 mentioning 160gm quantity of Cariprazine HCl, B# 2052/PDL001/3/001/21 attested by Assistant Director, I&E, DRAP, Karachi dated 13-08-2021. Submitted.

Decision: Approved. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	stability chambers (real time and accelerated)	

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.5	Revise pharmacological group for the applied formulation as per WHO ATC with submission of applicable fee.	Firm has initially submitted Anti Convulsant as pharmacological group. However, they have revised it to Anti-psychotic. ***Fee required for pre-registration variation is not submitted.***
2.	1.6.5	This section has mentioned Biophore India Pharmaceuticals Private Limited as drug substance manufacturer while module 2 has mentioned Sonic Pharmaceuticals Pvt. Ltd., as drug substance manufacturer. Clarification shall be submitted.	Firm has submitted that it was typographic error. M/s Sonic pharmaceuticals is manufacturer while Biophore India Pharmaceuticals Private Limited is supplier.
3.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	Firm has submitted specifications for the drug substance as well as the analytical procedures from drug substance manufacturer.
4.	3.2.S.4.3	Method verification studies of drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted method verification studies for the drug substance including Specificity, linearity and accuracy. ***However, the date on the submitted chromatograms is January, 2023.***
5.	3.2.S.4.4	Specifications for the drug substance provided by the drug product manufacturer has assay limits (ODB) of 98.5% - 101% while submitted COA of the drug product manufacturer has assay limit (ODB) of 98% - 102%. Clarification shall be submitted.	Firm has submitted revised specification for the drug substance wherein they have changed assay limits for Cariprazine from 98.5% - 101% to 98% - 102%. ***However, fee required for pre-registration variation is not submitted.***
6.	3.2.S.7.3	Chloride content and residue on ignition tests are not performed in the stability studies of the drug substance. Clarify.	Firm has submitted that Chloride content and residue on ignition tests are not stability indicating test parameters. Hence, these tests are not conducted in stability.
7.	3.2.P.1.1	Applied formulation has SLS & Syloid 244FP while the reference product has no SLS& Syloid 244FP in the formulation. Justification shall be submitted.	Firm has submitted that in Cariprazine capsule range, the drug substance particle size distribution is non-micronized. The Cariprazine belongs to BCS II (Low solubility and high permeability). In order to improve the solubility and dissolution of Cariprazine, Sodium Lauryl Sulphate (SLS) used in the formulation. Secondly, in order to improve the flowability as well as bioavailability, Syloid 244FP was incorporated in the formulation. Firm further submitted that Cariprazine capsules were kept on stability and no changes observed in chemical and physical parameters throughout the shelf life. Stability studies demonstrated the compatibility of the formulation excipients Sodium Lauryl Sulphate (SLS) & Syloid 244FP with Cariprazine drug substance. Because stability studies is one of the technique for drug-excipients compatibility studies.
8.	3.2.P.2.2	Content uniformity test is not performed in the PE. Justification shall be submitted.	Firm has submitted results for pharmaceutical equivalence wherein they have included content uniformity test.
9.	3.2.P.5.4	Batch analysis of all the three trial batches shall be submitted.	Firm has submitted COA's for all the three trial batches.
10.	3.2.P.8	• Justification shall be submitted for not performing Content uniformity test in the stability summary sheets.	Firm has submitted revised stability summary sheets wherein they have added content uniformity test. Firm has submitted that this point is not applicable.

		• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Documents for the procurement of API with approval from DRAP shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted copy of commercial invoice No. BP/CI/21-22/07E dated 23-07-2021 mentioning 160gm quantity of Cariprazine HCl, B# 2052/PDL001/3/001/21 attested by Assistant Director, I&E, DRAP, Karachi dated 13-08-2021. Submitted.

Decision: Approved. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	Caripz 6mg capsules.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Cariprazine HCL eq.to Cariprazine……6mg.
	Pharmaceutical form of applied drug	White coloured powder filled in blue colour capsule & white colour body of Hard Gelatin capsule size # 03.
	Pharmacotherapeutic Group of (API)	Anti-Convulsant. Antipsychotics. ATC code N05A
	Reference to Finished product specifications	Innovator Specification.
	Proposed Pack size	7's, 30's, 90's & 100's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	VRAYLAR (Cariprazine as HCl) Capsule 1.5mg, 3mg, 4.5mg & 6mg by Actavis Pharma, USFDA approved.
	For generic drugs (me-too status)	Not available.

	GMP status of the Finished product manufacturer	GMP certificate No. 46/2021-DRAP (K) dated 07-10-2021 issued on the basis of inspection conducted on 15-06-2021 is submitted.
	Evidence of approval of manufacturing facility.	Capsule (general section) approved vide letter No. F.2-12/93-Lic(Vol-V) dated 20-09-2021.
	Name and address of API manufacturer.	**Name and address of the DMF holder:** M/s Biophore India Pharmaceuticals Private Limited. Plot No. 92, Kavuri Hills, Phase II, Jubilee Hills, Hyderabad-500033, Telangana, INDIA. **Name and address of the manufacturing site:** M/s. Sionc Pharmaceuticals (Pvt.) Ltd., Plot.No:34A, Road No.1, JN Pharma City, IDA, Parawada, Visakhapatnam -531021, Andhra Pradesh, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its validation, batch analysis (2052/PDL001/3/001/21) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5% RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5% RH for 6 months. Batches:(2052/3/001/19, 2052/3/002/19 & 2052/3/003/19)
	Module-III (Drug Product):	The firm has submitted detail of the drug product regarding its description, composition, manufacturer, pharmaceutical development, manufacturing process and controls, process validation protocol, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the reference product that is Vraylar Capsule 4.5mg (Batch no: 1159608) manufactured by Forest Laboratories, Ireland Limited by performing quality tests (Identification, Disintegration Time, Assay, Dissolution) CDP is also performed against the same brand that is Vraylar Capsule 1.5mg **(**Batch no: 1159608) manufactured by Forest Laboratories, Ireland Limited in three different mediums i.e. 0.1N HCl, Acetate Buffer (pH 4.5) & Buffer 6.8. Both 0.1N HCl and acetate buffer

		shows more than 85% release within 15 minutes and F2 is not calculated while the Phosphate buffer has F2 value in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including Validation protocol, Validation report, Justification of system suitability, Specificity, Linearity, Accuracy, Precision Repeatability, Intermediate Precision, Robustness.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their product Pirfedow Tablets 267mg which was approved in 297th Meeting of Registration Board held on 12th – 15th January 2021 Inspection was conducted on 04th January, 2020. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 203300CT110178 in the name of Industrias Quimicas Falcon de Mexico, S.A. de C.V Km. 4.5 Carretera Federal Cuernavaca-Cuautla 62578 Jiutepec, Morelos, México issued by Federal commission for the protection against Sanitary Risks (COFEPRIS); PIC/S member since 2018 is provided by the applicant & Valid up to 09-April-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice # OS3612273491 Dated: 13.09.2021 from Dr. Reddy's Laboratories Limited, 8-2-337, Road No. 3, Banjara Hills, Hyderabad, Telangana, India mentioning 1000kgs of Naproxen sodium with batch number of ANOA00653A cleared by DRAP Karachi office dated 15.11.2021 is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observations	Reply by the firm
1	1.5.2	Reference product has label claim of Naproxen sodium 220mg (Naproxen 200mg) while the applied formulation has label claim of Naproxen sodium 220mg only.	Firm has submitted that 220mg Naproxen sodium is the required dose which is used in the formulation as per innovator. Firm has further clarified that 220mg Naproxen sodium contains (equivalent to) 200 mg Naproxen.

2	2.3	• Table for literature references has mentioned that drug product is not available in any pharmacopoeia while the official monograph is available in USP. Clarification shall be submitted. • QOS has other introductory information for Synflex PM tablets. Clarification shall be submitted.	Firm has submitted revised table for literature references without submission of applicable fee. Firm has submitted that they have submitted Synflex PM 220 mg + 25mg tablets which was submitted prior to DRAP dated 07-04-2022 contains Naproxen sodium from same manufacturer/supplier as current dossier. Therefore, we have submitted the introductory information for Synflex PM tablets.
3	3.2.S.7.3	Stability studies of the drug substance has mentioned assay test by HPLC while the specification and analytical procedure has mentioned titration method. Clarification shall be submitted.	Firm has submitted that the drug substance manufacturer performed Assay test by Titration Method in the DMF but the provided stability data in DMF was on Zone-II i.e. 25°C ± 2°C, 60% ± 5% RH (attached herewith as reference) and tested according to Method No. CV0484. However, on our request the drug substance manufacturer provided the stability data on Zone-IV -B wherein the Assay is performed via HPLC method according to Method No. CV0694 which is more reliable and stringent than Titration. Also, we have requested the drug substance manufacturer to provide the Analytical Method with HPLC method No. CV0694 which will be subsequently submitted to your esteemed authority.
4	3.2.P.8.3	• Only 03-months stability data is submitted for the applied formulation. Complete six-months stability studies for all the three trial batches shall be submitted. • Clarification regarding the condition (30°C ± 2°C / 75% ± 5%RH) of real time stability data shall be submitted as conditions are not as per zone Iva.	Firm has submitted 06-month time point stability data for the applied product. Firm has submitted that ICH Q1 F explanatory note covers the scope for selection of storage condition of product as "Regulatory authorities in the ICH regions have agreed the use of more stringent humidity conditions such as 30°C/75% RH will be acceptable in place of 30°C/65% RH and it's up to the applicant who should decide to use them "

Decision: Approved with following label claim;

Each film coated tablet contains:

Naproxen Sodium 220mg eq. to Naproxen …… 200mg.

Registration letter will be issued after submission of full fee of Rs. 30,000/- for correction/pre-approval changes in label claim, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

c. Priority Registration applications on the basis of Export Facilitation of locally manufactured Human Drugs on form 5F.

Assistant Director PR-I/EFD vide letter No.F.1-6/2019-PR-I (EFD dated 06-10-2022 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm i.e **M/s Indus Pharma** have achieved the benchmark of more than 100,000 USD during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.,

925.	Name, address of Applicant / Marketing Authorization Holder	M/s Indus Pharma (Pvt.) Ltd., Plot No. 26-27, 63-67, Sector – 27, Korangi Industrial Area, Karachi.

	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Trijardy XR 5/2.5/1000mg Tablet, Boehringer Ingelheim Pharmaceuticals, Inc., USFDA Approved.
	For generic drugs (me-too status)	Trixen XR 5/2.5/1000mg Tablet by M/s Hilton Pharma (Pvt.) Ltd. Could not be confirmed.
	GMP status of the Finished product manufacturer	**M/s Indus Pharma:** Copy of GMP certificate No. 53/2021-DRAP (K)/54 dated 24-12-2021 issued on the basis of inspection conducted on 17-12-2021 is submitted. **M/s Dynatis Pharma:** Copy of GMP certificate No. 29/2021-DRAP (FID-2065251-174) dated 01-07-2021 issued on the basis of inspection conducted on 26-03-2021 is submitted.
	Evidence of approval of manufacturing facility.	Tablet section (general) is approved vide letter No. F. 1-22/2013-Lic dated 08-01-2019 of M/s Dynatis pharma.
	Name and address of API manufacturer.	**Empagliflozin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road, Daguan District, Anquing, Anhui, China. Copy of DML No. 20190399 is submitted valid till 31-12-2025. **Linagliptin:**

		M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road Daguan District, Anquing, Anhui, China. Copy of DML No. 20190399 is submitted valid till 31-12-2025. **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dongwaihuan Road, Dongcheng Industrial Area, Shouguang City, Shandong Province, China. Copy of DML No. Lu20160126 is submitted by the firm valid till 26-10-2025. Copy of GMP certificate No. SD20190888 dated 13-03-2019 issued by the Shandong Food and Drug Administration valid till 12-03-2024 is also submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Empagliflozin:** Firm has submitted detailed drug substance data of drug substance related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and process controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis (B#20060201, Mfg. date 02-06-2020) and justification of specification, reference standard, container closure system and stability studies of drug substance. **Linagliptin:** Firm has submitted detailed drug substance data of drug substance related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and process controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis (B#20062701, Mfg. date 27-06-2020) and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin HCl:** Firm has submitted detailed drug substance data of drug substance related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and process controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis (B#A-81411906039, Mfg. date 13-06-2019) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Empagliflozin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches: (20160301, 20160302, 20160303) **Linagliptin:**

		Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches: (20150901, 20150902, 20150903) **Metformin HCl:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (A-71411106004, A-71411106005, A-71411106006)
	Module-III (Drug Product):	Firm has submitted detail of drug product regarding its description, composition, formulation development, manufacturers, description of manufacturing process and controls, Process validation protocol, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Trijardy XR 5/2.5/1000mg Tablet (B#3188239) manufactured by Boehringer Ingelheim Pharmaceuticals, Inc., USFDA by performing quality tests (Appearance, Assay, Dissolution, Average weight). CDP has been performed against the same brand that is Trijardy XR 5/2.5/1000mg (B#3118239) Tablet manufactured by Boehringer Ingelheim Pharmaceuticals, Inc., USFDA Approved, in three different mediums i.e. 0.1N HCl pH 1.2, Acetate Buffer pH 4.5 and Phosphate buffer pH 6.8. The values of F2 are more than 50 and are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity & range, accuracy (recovery), specificity, precision (repeatability & intermediate precision), robustness, solution stability and system suitability.

STABILITY STUDY DATA			
Manufacturer of API	**Empagliflozin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road, Daguan District, Anquing, Anhui, China. **Linagliptin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road Daguan District, Anquing, Anhui, China. **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dongwaihuan Road, Dongcheng Industrial Area, Shouguang City, Shandong Province, China.		
API Lot No.	Empagliflozin: 20060201 Linagliptin: 20062701 Metformin HCl: A-81411906039		
Description of Pack (Container closure system)	The product is filled in Alu-Alu blister. Each blister contains seven tablets and each unit carton contains two blisters along with leaflet (2x7 tablets/pack).		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3 and 6 (Months) Real Time: 0, 3 and 6 (Months)		
Batch No.	TDG008	TDG009	-

Batch Size	5000 Tablets	5000 Tablets	-
Manufacturing Date	08-2021	09-2021	-
Date of Initiation	08-09-2021	05-10-2021	-
No. of Batches	02		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin & Linagliptin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road, Daguan District, Anquing, Anhui, China. Copy of DML No. 20190399 is submitted valid till 31-12-2025. **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dongwaihuan Road, Dongcheng Industrial Area, Shouguang City, Shandong Province, China. Copy of DML No. Lu20160126 is submitted by the firm valid till 26-10-2025. Copy of GMP certificate No. SD20190888 dated 13-03-2019 issued by the Shandong Food and Drug Administration valid till 12-03-2024 is also submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin & Linagliptin:** Firm has submitted copy of Invoice No. WD202003005 dated 28-06-2020 mentioning 03Kg quantity of Empagliflozin (B# 20060201) and 500gm of Linagliptin (20062701) attested by the Assistant Director I&E, DRAP, Lahore dated 13-08-2020. Firm has also submitted attested copy of form-6 dated 13-08-2020. **Metformin HCl:** Firm has submitted copy of commercial Invoice No. 419FK07Z057 dated 05-08-2019 mentioning 2000Kg, (B# A-81411906039) attested by the Assistant Director I&E, DRAP, Lahore dated 22-08-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.8	Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm shall be submitted.	Firm has once again submitted Trixen XR by M/s Hilton pharma as evidence of approval of registered by DRAP. ***However, the submitted evidence is not registered with DRAP.***

2.	3.2.S.4.1	Clarification shall be submitted for Assay limits of Linagliptin (98% to 101%) whether the limits are on dried basis or as is basis.	Firm has submitted that assay of Linagliptin is calculated on anhydrous basis. They also submitted revised specification for the drug substance from both drug substance manufacturer and finished product manufacturer wherein they have mentioned assay on anhydrous basis.
3.	3.2.S.4.1	• Limits of the single impurity in Linagliptin drug substance provided by drug product manufacturer is NMT 0.8% while that of the drug substance manufacturer is NMT 0.5%. justification shall be submitted. • Specifications provided by the drug substance manufacturer for Linagliptin has mentioned single impurity limits of NMT 0.5% while the drug substance stability data has single impurity limits of NMT 0.8%. justification shall be submitted.	Firm has submitted revised specifications for the drug substance from drug substance manufacturer wherein they have changed the limit of single impurity from NMT 0.5% to NMT 0.8%. They have also provided COA of the drug substance from drug substance manufacturer with revised specifications. ***However, fee required for pre-registration variation is not submitted.***
4.	3.2.S.4.2	Analytical procedures provided by the FPP for Linagliptin drug substance has mentioned Assay limits of 98% to 102% while the specification provided by both the DS and FPP has assay limits of 98% to 101%. Clarification shall be submitted.	Firm has submitted that it was a typographic error and they also provided revised analytical procedure with assay limit of 98% to 101%.
5.	3.2.P.2.1	Scientific justifications for 10% overage of 2 actives shall be submitted.	Firm has submitted that both the actives i.e. Empagliflozin and Linagliptin are part of the coating formulation which is applied to the tablet by coating process. Due to process wastage during the coating of both actives 10% overage has been considered to achieve desired label claim. However, this overage is not indicated in the finished product, and it will be further reduced after data from commercial batches is obtained.
6.	3.2.P.2.2	Batch number of the reference product in the CDP and PE are not same. Clarify.	Firm has submitted that it was a typo error. Correct batch No. is 3188239 and they also provided pictures of the innovator's pack.
7.		Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted data of their product approved on form 5F.
8.		Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**

	The status in reference regulatory authorities	Trijardy XR 10/5/1000mg Tablet, Boehringer Ingelheim Pharmaceuticals, Inc., USFDA Approved.
	For generic drugs (me-too status)	Trixen XR 10/5/1000mg Tablet by M/s Hilton Pharma (Pvt.) Ltd. Could not be confirmed.
	GMP status of the Finished product manufacturer	**M/s Indus Pharma:** Copy of GMP certificate No. 53/2021-DRAP (K)/54 dated 24-12-2021 issued on the basis of inspection conducted on 17-12-2021 is submitted. **M/s Dynatis Pharma:** Copy of GMP certificate No. 29/2021-DRAP (FID-2065251-174) dated 01-07-2021 issued on the basis of inspection conducted on 26-03-2021 is submitted.
	Evidence of approval of manufacturing facility.	Tablet section (general) is approved vide letter No. F. 1-22/2013-Lic dated 08-01-2019 of M/s Dynatis pharma.
	Name and address of API manufacturer.	**Empagliflozin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road, Daguan District, Anquing, Anhui, China. Copy of DML No. 20190399 is submitted valid till 31-12-2025. **Linagliptin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road Daguan District, Anquing, Anhui, China. Copy of DML No. 20190399 is submitted valid till 31-12-2025. **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dongwaihuan Road, Dongcheng Industrial Area, Shouguang City, Shandong Province, China. Copy of DML No. Lu20160126 is submitted by the firm valid till 26-10-2025. Copy of GMP certificate No. SD20190888 dated 13-03-2019 issued by the Shandong Food and Drug Administration valid till 12-03-2024 is also submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis and justification of specification, reference standard, container

		closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Empagliflozin:** Firm has submitted detailed drug substance data of drug substance related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and process controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis (B#20060201, Mfg. date 02-06-2020) and justification of specification, reference standard, container closure system and stability studies of drug substance. **Linagliptin:** Firm has submitted detailed drug substance data of drug substance related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and process controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis (B#20062701, Mfg. date 27-06-2020) and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin HCl:** Firm has submitted detailed drug substance data of drug substance related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and process controls, impurities, specifications, analytical procedures and its validation/verification, batch analysis (B#A-81411906039, Mfg. date 13-06-2019) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Empagliflozin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches: (20160301, 20160302, 20160303) **Linagliptin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches: (20150901, 20150902, 20150903) **Metformin HCl:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (A-71411106004, A-71411106005, A-71411106006)
	Module-III (Drug Product):	Firm has submitted detail of drug product regarding its description, composition, formulation development, manufacturers, description of manufacturing process and controls, Process validation protocol, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Trijardy XR 10/5/1000mg (B#3191446) manufactured by Boehringer Ingelheim

		Pharmaceuticals, Inc., USFDA by performing quality tests (Appearance, Assay, Dissolution, Average weight). CDP has is also performed against the same brand that is Trijardy XR 10/5/1000mg (B#3191446) Tablet manufactured by Boehringer Ingelheim Pharmaceuticals, Inc., USFDA Approved, in three different mediums i.e. 0.1N HCl pH 1.2, Acetate Buffer pH 4.5 and Phosphate buffer pH 6.8. The values of F2 are more than 50 and are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity & range, accuracy (recovery), specificity, precision (repeatability & intermediate precision), robustness, solution stability and system suitability.

STABILITY STUDY DATA			
Manufacturer of API	**Empagliflozin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road, Daguan District, Anquing, Anhui, China. **Linagliptin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road Daguan District, Anquing, Anhui, China. **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dongwaihuan Road, Dongcheng Industrial Area, Shouguang City, Shandong Province, China.		
API Lot No.	Empagliflozin: 20060201 Linagliptin: 20062701 Metformin HCl: A-81411906039		
Description of Pack (Container closure system)	The product is filled in Alu-Alu blister. Each blister contains seven tablets and each unit carton contains two blisters along with leaflet (2x7 tablets/pack).		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3 and 6 (Months) Real Time: 0, 3 and 6 (Months)		
Batch No.	TDH001	TDH002	-
Batch Size	5000 Tablets	5000 Tablets	-
Manufacturing Date	08-2021	08-2021	-
Date of Initiation	20-08-2021	20-08-2021	-
No. of Batches	02		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin & Linagliptin:** M/s Anhui Haikang Pharmaceutical Co., Ltd., No. 21 Huancheng West Road, Daguan District, Anquing, Anhui, China. Copy of DML No. 20190399 is submitted valid till 31-12-2025. **Metformin HCl:** Shouguang Fukang Pharmaceutical Co., Ltd., North-East of Dongwaihuan Road, Dongcheng Industrial Area, Shouguang City, Shandong Province, China.

		Copy of DML No. Lu20160126 is submitted by the firm valid till 26-10-2025. Copy of GMP certificate No. SD20190888 dated 13-03-2019 issued by the Shandong Food and Drug Administration valid till 12-03-2024 is also submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin & Linagliptin:** Firm has submitted copy of Invoice No. WD202003005 dated 28-06-2020 mentioning 03Kg quantity of Empagliflozin (B# 20060201) and 500gm of Linagliptin (20062701) attested by the Assistant Director I&E, DRAP, Lahore dated 13-08-2020. Firm has also submitted attested copy of form-6 dated 13-08-2020. **Metformin HCl:** Firm has submitted copy of commercial Invoice No. 419FK07Z057 dated 05-08-2019 mentioning 2000Kg, (B# A-81411906039) attested by the Assistant Director I&E, DRAP, Lahore dated 22-08-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.8	Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm shall be submitted.	Firm has once again submitted Trixen XR by M/s Hilton pharma as evidence of approval of registered by DRAP. ***However, the submitted evidence is not registered with DRAP.***
2.	3.2.S.4.1	Clarification shall be submitted for Assay limits of Linagliptin (98% to 101%) whether the limits are on dried basis or as is basis.	Firm has submitted that assay of Linagliptin is calculated on anhydrous basis. They also submitted revised specification for the drug substance from both drug substance manufacturer and finished product manufacturer wherein they have mentioned assay on anhydrous basis.
3.	3.2.S.4.1	• Limits of the single impurity in Linagliptin drug substance provided by drug product manufacturer is NMT 0.8% while that of the drug substance manufacturer is NMT 0.5%. justification shall be submitted. • Specifications provided by the drug substance manufacturer for Linagliptin has mentioned single impurity limits of NMT 0.5% while the drug substance stability data has single impurity limits of NMT 0.8%. justification shall be submitted.	Firm has submitted revised specifications for the drug substance from drug substance manufacturer wherein they have changed the limit of single impurity from NMT 0.5% to NMT 0.8%. They have also provided COA of the drug substance from drug substance manufacturer with revised specifications. ***However, fee required for pre-registration variation is not submitted.***
4.	3.2.S.4.2	Analytical procedures provided by the FPP for Linagliptin drug substance has mentioned Assay limits of 98% to 102%	Firm has submitted that it was a typographic error and they also provided revised analytical procedure with assay limit of 98% to 101%.

		while the specification provided by both the DS and FPP has assay limits of 98% to 101%. Clarification shall be submitted.	
5.	3.2.P.2.1	Scientific justifications for 10% overage of two actives shall be submitted.	Firm has submitted that both the actives i.e. Empagliflozin and Linagliptin are part of the coating formulation which is applied to the tablet by coating process. Due to process wastage during the coating of both actives 10% overage has been considered to achieve desired label claim. However, this overage is not indicated in the finished product, and it will be further reduced after data from commercial batches is obtained.
6.		Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted data of their product approved on form 5F.
7.		Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021**

928.	Name, address of Applicant / Marketing Authorization Holder	M/s Indus Pharma (Pvt.) Ltd., Plot No. 26-27, 63-67, Sector – 27, Korangi Industrial Area, Karachi.

Drug	Pyromal 180/60mg Tablets.
Name of Manufacturer	M/s Tabros Pharma Pvt. Ltd. L-20/B, Sector-22, Federal B Industrial Area, Karachi.
Manufacturer of API	**Artesunate:** M/s Huvepharma Italia s.r.l Co., Ltd. Stabilimento di Garessio Via R. Lepetit, 142-I-12075 Garessio (CN) Italy.
	<u>Pyronaridine Tetraphosphate</u>:

	M/s Mangalam Drugs and Organics Ltd., Unit 2: Plot No. 1203 3rd Phase, G.I.D.C., Vapi-396195, Dist.-Valsad, Gujarat, India.		
API Lot No.	**Artesunate:** 200001	**Pyronaridine Tetraphosphate:** PTP-V/210201	
Description of Pack (Container closure system)	Alu-Alu blister pack in unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Real time: 0,3,6 (months) Accelerated: 0,3,6 (months)		
Batch No.	TR001-1/PYR	TR002-1/PYR	TR003-1/PYR
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	08-2021	08-2021	08-2021
Date of Initiation	14-09-2021	14-09-2021	14-09-2021
No. of Batches	03		
Date of Submission	27-12-2021 (Dy. No. 33741) for initial and 03rd months and 29-03-2022 (Dy. No. 8235) for 06th month.		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT FOR EXEMPTION

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

S. No.	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Firm has submitted copy of minutes of 297th meeting of Registration Board wherein panel inspection report for their product BAXIB (Apixaban) 2.5mg & 5mg Tablets conducted on 5th January, 2021 by following panel is presented: 1. Prof. Dr. Rafeeq Alam Khan, Dean, Faculty of Pharmacy, Zia Uddin University, Karachi. (Member Registration Board). 2. Dr. Saif-ur-Rehman Khattak, Director / FGA, CDL, DRAP, Karachi. The inspection report also confirms that HPLC software is 21 CFR compliant and audit trials on the testing reports of Baxib tablets were available.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Artesunate:** Firm has submitted Copy of COA (Batch#200001, Mfg. date 20-07-2020) of drug substance Artesunate from M/s Huvepharma Italia s.r.l Co., Ltd. Stabilimento di Garessio Via R. Lepetit, 142-I-12075 Garessio (CN) Italy and copy of COA for the same drug substance with same batch No. from M/s Tabros Pharma Pvt. Ltd. L-20/B, Sector-22, Federal B Industrial Area, Karachi. **Pyronaridine Tetraphosphate** Firm has submitted Copy of COA (Batch # PTP-V/210201, Mfg. date 02-2021) of drug substance Pyronaridine tetra phosphate from M/s Mangalam Drugs and Organics Ltd., Unit 2: Plot No. 1203 3rd Phase, G.I.D.C., Vapi-396195, Dist.-Valsad, Gujarat, India and copy of COA for the same drug substance with same batch No. M/s Tabros Pharma Pvt. Ltd. L-20/B, Sector-22, Federal B Industrial Area, Karachi. are submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted analytical procedures for both the drug substances from drug substance manufacturer and also from the drug product manufacturer.
4.	Stability study data of API from API manufacturer	**Artesunate:** Firm has submitted stability study data of drug substance for both real time and accelerated stability. Stability study is

<table>
<tr><td></td><td></td><td>conducted at Real time conditions; 30˚C / 65% RH for 60 months and at Accelerated conditions; 40˚C / 75% RH for 6 months at intervals 0, 1, 3, 6, 9, 12, 18, 24, 36, 48 & 60 & 0, 1, 3 & 6 months respectively.
Batches:(120001,120002,120003)
<u>Pyronaridine Tetraphosphate:</u>
Firm has submitted stability study data of drug substance for both real time and accelerated stability. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 75% ± 5%RH for 24 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5%RH for 6 months at intervals 0, 1, 3, 6, 9, 12, 18, 24 & 0, 1, 3 & 6 months respectively.
Batches:(PTD-PL-185001, PTD-PL-185002, PTD-PL-185003)</td></tr>
<tr><td>5.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td><u>Artesunate:</u>
Firm has submitted copy of Eudra GMP certificate No. IT-API/37/H/2020 issued by the competent authority of Italy in the name of M/s Huvepharma Italia s.r.l Co., Ltd. Via Roberto Lepetit, 142-12075 Garessio (CN) Italy on the basis of inspection conducted on 17-10-2019. The GMP certificate is valid till 17.10.2022.
<u>Pyronaridine Tetraphosphate:</u>
firm has submitted copy of GMP certificate No. 19111699 dated 18-11-2019 in the name of M/s Mangalam Drugs and Organics Ltd. Unit 2: Plot No. 1203 Phase-III, G.I.D.C., Vapi-396195, Dist-Valsad, Gujarat State, India issued by Food & Drugs Control Administration, Block No. 8, 1st Floor, Dr. Jivraj Mehtabhavan, Gandhinagar, Gujarat State, India.
This certificate is valid till 17-11-2022.</td></tr>
<tr><td>6.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td><u>Artesunate</u>:
Firm has submitted copy of invoice No. 6211000071 dated 13-04-2021 from M/s Huvepharma Italia s.r.l Co., Ltd. Via Roberto Lepetit, 142-12075 Garessio (CN) Italy, for import of 0.5kg of Artesunate in name of M/s Tabros Pharma Pvt. Ltd. L-20/B, Sector-22, Federal B Industrial Area, Karachi attested by AD DRAP Karachi dated 30-04-2021.
AD signed Form 6 is attached while Form 3 and Form 7 are also available.
<u>Pyronaridine Tetraphosphate</u>:
Firm has submitted copy of invoice No. EX/2116/20-21 dated 04.03.2021 from M/s Mangalam Drugs and Organics Ltd., India. for import of 1.3kg Pyronaridine Tetraphosphate with batch No. of PTP-V/210201 in the name of M/s Tabros Pharma Pvt. Ltd., Karachi attested by AD DRAP Karachi, dated 24-03-2021.
AD signed Form 6 is attached while Form 3 and Form 7 are also available.</td></tr>

11.	Record of comparative dissolution data (where applicable)	Firm has submitted Comparative dissolution profile of the applied formulation against Pyramax Tablet 180/60mg (B#PYRATA008) manufactured by Shin Poong Pharm. Co., Ltd., in different mediums of pH 4.0, Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of the Evaluator:

Sr. No.	Observation	Reply by the firm
1.	Revise Pharmacological group as per WHO ATC shall be submitted with submission of applicable fee.	Firm has submitted revised pharmacological group as per WHO ATC code with submission of 7500/- fee vide slip No. 128450447 dated 12-01-2023.
2.	Stability summary sheets for drug substance Artesunate from the concerned drug substance manufacturer shall be submitted.	Stability summary sheets for drug substance Artesunate from the drug substance manufacturer is provided.
3.	Justification shall be submitted for not performing pH and heavy metals test during stability studies of Artesunate drug substance.	Firm has submitted that Drug manufacturer of Artesunate has already performed pH and heavy metals analysis on drug substance during disposition of material, they also provided COA from drug substance manufacturer. They further submitted that since, this material is being used for oral solid dosage form and we had procured this material tablet grade, therefore, based on tablet grade material manufacturer did not consider pH and heavy metal as a stability parameter.
4.	Valid copy of GMP certificate of drug substance manufacturer i.e. Artesunate issued by concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No.IT-API/37/H/2020 in the name of M/s Huvepharma Italia s.r.l, Via R. Lepetit, 142-I-12075 Garessio (CN) Italy issued by the AIFA Italy. Certificate confirms the latest inspection which was conducted on 17-10-2019 and has also mentioned that it should not be relied upon to reflect the compliance status if more than three years have elapsed since the last inspection date. However, last page of the certificate has mentioned that "the inspectorate adopted a risk based approach for planning of inspections, therefore the validity of the GMP certificate for this manufacturing site is not more than 48 months from the last general GMP inspection, which was conducted on 17-10-2019."
+- .	Valid copy of GMP certificate of drug substance manufacturer i.e. Pyronaridine Tetraphosphate issued by concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. 23013542 dated 23-01-20239 in the name of M/s Mangalam Drugs and Organics Ltd. Unit 2: Plot No. 1203 Phase-III, G.I.D.C., Vapi-396195, Dist-Valsad, Gujarat State, India issued by Food & Drugs Control Administration, Block No. 8, 1st Floor, Dr. Jivraj Mehtabhavan, Gandhinagar, Gujarat State, India. This certificate is valid till 22-01-2026.

Product is available in the WHO pre-qualification list with Ref. No. EMA Art 58 H-W-2319-2 and the applicant mentioned is Shin Poong Pharmaceutical Co Ltd, 748-31 Yoksam-Dong, Gangnam-Gu, Seoul, 135-925, Republic of Korea.
Firm has also provided a page (Gazette Notification) No.F.8-43/2021-DD(PS) of MoNHSR&C dated 21-12-2021 "WHO Model List of Essential Medicines 2021 – 2022nd List" Wherein the same formulation is available in Granules and Tablet form.
Granules: 20mg + 60mg
Tablets: 60mg + 180mg.

Indications:
Indicated in the treatment of acute, uncomplicated malaria infection caused by Plasmodium falciparum or by Plasmodium vivax in adults and children weighing 20 kg or more
Contra indications:

- Known hypersensitivity to pyronaridine or artesunate or any component of the formulation.
- Patients with clinical signs or symptoms of hepatic injury (such as nausea and/or abdominal pain associated with jaundice) or known severe liver disease (i.e. decompensated cirrhosis, Child-Pugh stage B or C).
- Severe renal impairment

Decision: Approved with innovator specifications. Firm will submit valid copy of GMP certificate of the drug substance manufacturer before issuance of the registration letter.

- **Manufacturer will place first three production batches on long term stability studiesthroughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

e. Registration applications of locally manufactured Human Drugs applied on form 5F (Routine applications).

930.	Name, address of Applicant / Marketing Authorization Holder	M/s Platinum Pharmaceuticals (Pvt.) Ltd., A-20 North Western Industrial Zone, Bin Qasim Karachi.

	Details of fee submitted	PKR 50,000/- vide old slip No. 1914653 dated 01-03-2021. 25,000/-: vide slip No. 760014090484 dated 25/10/2021.
	The proposed proprietary name / brand name	Dolonap EC Tablet 250mg.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each enteric coated tablet contains; Naproxen ……. 250mg.
	Pharmaceutical form of applied drug	Enteric coated tablet.
	Pharmacotherapeutic Group of (API)	Non-steroidal anti-inflammatory drug (NSAID)
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	1 x10's, 2 x 10's, 3 x 10's, & 5 x 10's.

	Proposed unit price	As per PRC.
	The status in reference regulatory authorities	Naprosyn EC 250 mg Gastro-Resistant Tablets, Atnahs Pharma UK Limited, MHRA approved.
	For generic drugs (me-too status)	Not provided.
	GMP status of the Finished product manufacturer	Not provided.
	Evidence of section approval.	Tablet general section is approved vide letter No. F. 2-3/94-Lic (Vol-I) dated 19-07-2016.
	Name and address of API manufacturer.	M/s Divis Laboratory, Unit-2, Chippada (V), Annavaram (Post) Bheemunipatnam (M) Visakhapatnam District, Andhra Pradesh, India.
	Module-II (Quality Overall Summary)	Firm has nor submitted QOS as per WHO QOS-PD template.
	Module III (Drug Substance)	Firm has submitted detail of nomenclature, structure, general properties, physical form, solubility, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 60 months. Batches:(2-M5L003, 2-M5L004 & 2-M5L005).
	Module-III (Drug Product):	Firm has submitted detail of drug product including its description, composition, pharmaceutical development, manufacturers, description of manufacturing process and controls, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Naprosyn EC 250 mg Gastro-Resistant Tablets by M/s Atnahs Pharma UK by performing quality tests (Identification, disintegration, Dissolution in both acidic and alkaline medium & Assay. Uniformity of dosage form). CDP has been performed against Naprosyn tablets 250mg, batch No. NC6F12 manufactured by Ricordati Industria, Italy in Acid media (pH 1.2) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.

	Analytical method validation/verification of product.	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.3.4	• Valid copy of DML of the drug product manufacturer shall be submitted. As submitted one is w.e.f. 07-08-2015. • Valid copy of GMP certificate/ last inspection report conducted within last three years of the finished product manufacturer shall be submitted.	Firm has submitted copy of DML No. 000415 in the name M/s Platinum Pharmaceuticals w.e.f. 07-08-2020. Firm has submitted copy of GMP certificate No. 40/2021-DRAP (K)/39 dated 09-09-2021 issued on the basis of inspection conducted on 07-09-2021.

2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by relevant regulatory authority shall be submitted.	Firm has submitted copy of document with file No.HMF07-14051/927/2021-TECH_DCA issued by Drug Control Administration Government of Andhra Pradesh wherein the DCA has forward WHO GMP certificate to M/s Divis Laboratory, Unit-2, Chippada (V), Annavaram (Post) Bheemunipatnam (M) Visakhapatnam District, Andhra Pradesh, India on the basis of inspection conducted on 16-02-2021 to 17-02-2021 valid for a period of three years.
3.	2.3	Table for literature references has mentioned only USP for the drug substance as well as drug product. However, both the drug substance and drug product are available in different pharmacopoeia. Clarification shall be submitted.	Firm has submitted revised table for literature references wherein they have mentioned different pharmacopoeias for both the drug substance and drug product.
4.	2.3.R	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3 along with blank master production document/ batch manufacturing record to be used during the commercial manufacturing of the applied product.	Firm has submitted complete batch manufacturing record for all the three trial batches.
5.	3.2.S.4.1	Specification for drug substance by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.2	• Analytical procedures for drug substance by the drug product manufacturer shall be submitted. • USP monograph has mentioned assay test by titration method while the analytical procedures and stability data sheets have mentioned HPLC procedure for assay. Clarification is required.	Submitted. Firm has submitted that Drug substance manufacturer (Divi's) has performed stability testing by using validated HPLC method for specificity, precision, linearity, accuracy, robustness, solution stability and system suitability.
7.	3.2.S.4.3	• Verification studies of the drug substance by the drug product manufacturer shall be submitted.	***Not submitted.***
8.	3.2.S.7.3	• Assay limits in the official monograph is from 98.5% to 101.5% while stability data sheets have assay limits of 98% to 102%. Clarification is required.	Firm has submitted that Drug substance manufacturer (Divi's) has performed stability testing by using HPLC which is more robust technique so supplier established the assay limits of 90% to 102%.
9.	3.2.P.2.1	• Qualitative composition is changed from the reference product. Clarify.	Firm has submitted that qualitative composition of the applied product is similar to their already approved and registered product Dolonap 500mg. Dolonap 500mg stability was also found satisfactory.
10.	3.2.P.2.2.1	• In CDP, buffer stage has mentioned 60minutes time points	Firm has submitted that as per WHO guidelines TRS#1003, 2017 Annex 6, 10.3 it is recommended to take below mentioned sampling point while performing CDP.
11.	3.2.P.6	• COA of the reference standard used or details shall be provided.	Submitted.
12.	3.2.P.8	• Stability data sheets shall be as per decision of 293rd meeting of RB with inclusion of API lot number and batch size manufactured. • Initial time point accelerated stability data shall be submitted.	Firm has submitted new stability summary data sheets as. per decision of 293rd meeting of Registration Board. Batch size of 3000 tablets in each trial batch with API lot No. 2-M-B1830619. Firm has also included initial time point results in the newly submitted stability summary data sheets.

		• Content of uniformity test is not included in the stability data while official monograph has mentioned it.	Firm has submitted that content uniformity test is not recommended in stability testing as per ICH guideline Q1A (R2), 2.2.5 which states that "Stability studies should include testing of those attributes of the drug product that are susceptible to change during "
13.		COA provided for the finished product has stability starting date of 15-02-2021 while the stability data sheets have mentioned some other date. Justification shall be submitted.	Firm as submitted new COA for the finished product wherein they have changed the starting date from 15-02-2021 to 06-07-2020.
14.		• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted commercial invoice No.5319500289 dated 17-07-2019 mentioning 1000kg of Naproxen B. No. 2-M-B-1830619 attested by Assistant Director I&E, DRAP, Karachi dated 2607-2019. Submitted. Not submitted. Submitted. Submitted.

Decision: Approved. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021 along with analytical method verification studies of the drug substance performed by the drug product manufacturer.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	Ticafold 90mg Tablet.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains; Ticagrelor …… 90mg.

	Pharmaceutical form of applied drug	Film coated tablets.
	Pharmacotherapeutic Group of (API)	Farnesoid X Receptor Agonists. Platelet aggregation inhibitors excl. heparin.
	Reference to Finished product specifications	Innovator's specifications.
	Proposed Pack size	2 x 10's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Brilinta 90 mg film coated tablets, USFDA approved.
	For generic drugs (me-too status)	Anplag 90mg, PharmEvo (Pvt.) Ltd., Reg. No.089382.
	GMP status of the Finished product manufacturer	Not provided.
	Evidence of section approval.	Could not be confirmed.
	Name and address of API manufacturer.	M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road, Yangkou Chemical Industrial park, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China. Firm has submitted copy of GMP certificate for M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical industry association valid till 05-05-2022.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of the drug substance regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (RD-TG-202101041) and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (140901, 141001 & 141101)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its description and composition, formulation development, manufacturer, description of manufacturing process and controls, batch formula, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against Anplag 90mg tablets, Batch No. 0N118, manufactured by PharmEvo by performing quality tests (Disintegration, Assay, Dissolution).

		CDP is performed in four BCS media across the physiological pH range i.e. 0.1 N HCl, pH 4.5 Acetate buffer, pH 6.8 Phosphate buffer and Tween 80 in water. The values are in the acceptable range.
	Analytical method validation/verification of product	Method Validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	Nantong Chanyoo Pharmatech Co. Ltd., No. 2 Tonghai Si Road, Rudong Coastal Economic Development Zone, Nantong, Jiangsu Province China.		
API Lot No.	RD-TG-201911211.		
Description of Pack (Container closure system)	Alu-Alu blister of 2 x 10's further packed in a bleech card unit carton along with leaflet.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	1200 tablets	1200 tablets	1200 tablets
Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	21-04-2021	21-04-2021	21-04-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice number CY121078 dated 04-03-2021 mentioning 0.5kg quantity of ticagrelor, Batch No. RD-TG-202101041 attested by Assistant Director DRAP, Peshawar vide No. 812/12-03-2021 dated 12-03-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks OF Evaluator:		

Sr. No.	Section	Observations.	Response by the firm.
1.	1.3.4	• Valid copy of DML of the drug product manufacturer shall be submitted. • Valid copy of GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Firm has submitted copy of receiving dating 18-09-2018 wherein they have applied for renewal of their DML. ***Submitted copy of DM: has renewal w.e.f. 27-09-2013.*** Firm has submitted copy of GMP certificate No.F.3-12/2021-DRAP-II dated 17-02-2022 issued on the basis of inspection conducted on 27-01-2022.
2.	1.3.5	Evidence of approval of manufacturing facility/approved section from licensing authority shall be submitted.	Firm has submitted copy of letter No. F. 3-8/2007-Lic dated 05-05-2010 wherein they changed their Tablet (Psychotropic) section to Tablet (General) section. GMP certificate has also mentioned Tablet (General) section.
3.	1.5.5	Revise Pharmacotherapeutic Group to Platelet aggregation inhibitors excl. heparin as per WHO ATC code with submission of applicable fee.	Firm has initially submitted Farnesoid X Receptor Agonists pharmacological group. Now they have provided that Ticagrelor is P2Y12 platelet inhibitor. ***Firm has revised pharmacological group without submission of applicable fee.***
4.	1.5.6	This section has mentioned innovator specifications while the official monograph is available in BP. Clarification is required.	Firm has submitted that ticagrelor was not added in 2021 addition of BP while they have performed stability studies in 2021.
5.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate for M/s Nantong Chanyoo Pharmatech Co., Ltd., issued by Nantong chemical and Medical industry association valid till 22-03-2025. ***GMP certificate is not from relevant/concerned authority.***
6.	2..3	Table for literature references has not mentioned any pharmacopoeia neither for the drug substance nor for the drug product while the official monograph for both the drug substance as well as drug product is available in BP. Justification shall be submitted.	Firm has submitted that ticagrelor was not added in 2021 addition of BP while they have performed stability studies in 2021. ***However, they have not provided revised table for literature references for the applied formulation.***
7.	3.2.S.2 & 3.2.S.3	Clear and readable copy of the information related to the drug substance shall be submitted. From section 3.2.S.2.2 to 3.2.S.3 as provided one is not in readable form.	Submitted.
8.	3.2.S.4.1	• Specification of the drug substance by the finished product manufacturer shall be submitted. • Specifications provided by the drug substance manufacturer for the drug substance has assay limit of 98% - 102% while BP has mentioned 97.5% - 102%. Clarification shall be submitted.	**Not submitted.** Firm has submitted that the limits of assay test provided by the drug substance manufacturer (98% - 102%) are within the limits of pharmacopoeia (97.5% - 102%).
9.	3.2.S.4.2	Analytical procedures for the drug substance from both the drug substance manufacturer and finished product manufacturer shall be submitted.	Analytical procedures for drug substance by the drug substance manufacturer ae submitted. ***However, analytical procedures by the drug product manufacturer are not provided. Provided analytical procedures by the drug substance manufacturer has also mentioned "For Crystolite pharmaceutical only."***
10.	3.2.S.4.3	Complete validation studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
11.	3.2.S.4.4	The reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.	Firm has submitted that IN DMF they provided details of the isomeric form. ***However, no details are provided while the annexure G is the COA's of the finished product.***

12.	3.2.S.4.5	Justification of specifications shall be submitted drug substance.	Firm has submitted that at the time of file preparation, product was in house and not added in any pharmacopoeia, now added in pharmacopoeia.
13.	3.2.S.5	CoA of primary / secondary reference standard including source and lot number shall be submitted.	Submitted.
14.	3.2.P.2.2	• Justification for not performing CDP against the innovator product. • Details of the product including brand name, batch number manufacturing & expiry date and name of the manufacturer for the product used in CDP shall be submitted. • In pharmaceutical equivalence dissolution studies of the finished trial batch shall be submitted instead of giving the results of CDP. • Assay results of the both products shall be submitted in pharmaceutical equivalence.	Firm has submitted that they have performed CDP against the brand leader i.e Anplag 90mg, B. No. 0N118, mfg. date 12-2020. Submitted. Submitted.
15.	3.2.P.5.1	• This section has mentioned in-house specifications while the official monograph of the applied formulation is available in BP. • Dissolution limits provided by the drug product manufacturer (NLT 75% after 75 minutes) are different from official monograph (Q = 70% after 45 minutes). Justification shall be submitted.	Firm has submitted that at the time of development, this product was not included in any of the pharmacopoeia. Firm has submitted revised specifications for the drug product wherein they have revised dissolution specification from NLT 75% after 75 minutes to NLT 70% of the labeled amount of ticagrelor is dissolved in 45 minutes. ***Firm has not submitted any fee for revision of specifications.***
16.	3.2.P.5.2	Analytical method for assay test is also different from official monograph.	Firm has submitted that they have adopted manufacturer method of analysis as the product was not included in any pharmacopoeia. They also submitted revised SAP according to the pharmacopoeia.
17.		• Reference of previous approval of applications with stability study data shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	***Firm has not submitted any reference.*** ***No reply is submitted by the firm against this point.*** ***No record of digital data logger is for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted by the firm.***

Decision: Deferred for following;

- **Submission of fee of Rs. 7500/- for correction/pre-approval changes in specification (Revision of pharmacological group), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Valid copy of GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted.**
- **Revised table of literature references for both drug substance and drug product shall submitted.**
- **Specification of the drug substance by the finished product manufacturer shall be submitted.**
- **Analytical procedures for the drug substance by the finished product manufacturer shall be submitted.**
- **Justification shall be submitted for submitted analytical procedures by the drug substance manufacturer as it has mentioned "For Crystolite pharmaceutical only."**
- **Justification shall be submitted regarding the polymorphic form of the drug substance as the reference product literature specifies polymorphic form II for ticagrelor tablets whereas no such declaration has been made in the COA of drug substance.**
- **Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.**

- **Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.**

f. Registration applications of locally manufactured Deferred drugs on form 5F.

Firm has submitted copy of Acknowledgment of receipt of application for grant of additional section under DML No. 000465 (Formulations) to M/s Well Care Pharmaceuticals (Pvt.) Ltd., dated 24-11-2021 from Secretary Central Licensing Board. The letter specifies that CLB in its 283rd meeting held on 28-10-2021 has approved the grant of following additional section to M/s Well Care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha:

1. Capsule (General) New.

932.	Name, address of Applicant / Marketing Authorization Holder	M/s Well care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha.
	Name, address of Manufacturing site.	M/s Well care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 12631: dated 24-03-2022.
	Details of fee submitted	PKR 30,000/-: dated 21/02/2022.
	The proposed proprietary name / brand name	**Tzole 20mg Capsule.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Omeprazole (as enteric coated pellets) …….. 20mg
	Pharmaceutical form of applied drug	Oral capsule
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor.
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	14’s.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Omeprazole 20mg delayed release capsule, USFDA Approved.
	For generic drugs (me-too status)	Helezol 20mg Capsule, Focus & Rulz, Reg. No. 027104.
	GMP status of the Finished product manufacturer	Not submitted.
	Evidence of section approval.	Capsule (general) - New section approved vide No.F.1-12/97-Lic (Vol-II) dated 24-11-2021.
	Name and address of API manufacturer.	Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months. Batches: (OEC-8.5-001, OEC-8.5-002 & OEC-8.5-003)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for quality tests (Description, identification, Average weight, dissolution & assay) for their product against Omega 20mg Capsule. Firm has submitted CDP against the same brand i.e. Omega 20mg Capsule manufactured by the Ferozesons. However, no strength, Batch number, manufacturing date, Expiry date etc. are mentioned.
	Analytical method validation/verification of product	Not submitted.

STABILITY STUDY DATA	
Manufacturer of API	Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore.
API Lot No.	OEC-08-040.
Description of Pack (Container closure system)	14 capsules are packed in Alu-Alu plain in packing box.
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5% RH Accelerated: 40°C ± 2°C / 75% ± 5% RH
Time Period	Real time: 06 months Accelerated: 06 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	T1/21	T2/21	T3/21
Batch Size	4100 capsules	4100 capsules	4100 capsules
Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	15-10-2021	15-10-2021	15-10-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No.43/2022-DRAP (AD-00196339815-153) dated 07-04-2022 on the basis of inspection conducted on 30-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. 0571 dated 01-10-2021 of pharma zone chemical (Pvt.) Limited with buyer's name of Well care pharmaceuticals mentioning 1kg quantity of each 8.5% Omeprazole pellets & 22.5% pellets of Omeprazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Submission by the firm.
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted. • GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Copy of DML is submitted which is not in readable form. One page of inspection report is submitted conducted on 10-09-2021 signed by only one member out the three panel members wherein following is recommended; "Panel recommended resumption of production and grant of new capsule section. Detailed report was prepared on prescribed format and copy was handed over to the firm for record and reference."
2.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised table for literature references has been submitted by the firm.***
3.	3.2.S.1.3	General properties, solubilities and physical form related data for the drug substance shall be submitted.	Submitted.
4.	3.2.S.4.1	• Finished product manufacturer has submitted Specification as per USP for drug substance while there is no monograph for the pellets in the USP.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised specifications are provided/submitted by the firm.***
5.	3.2.S.4.2	Analytical procedures submitted by the drug product manufacturer are completely	Firm has submitted that drug substance analytical procedure is manufacturer specifications because

		different from drug substance manufacturer. Clarification is required.	Omeprazole EC pellets is not available in any pharmacopoeia. ***However, new* analytical procedure *for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.***
6.	3.2.S.4.3	Verification studies of the drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
7.	.2.S.4.5.	Justification of specifications has declared USP specification. Clarification is required.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error.
8.	3.2.S.5	COA of the reference standard used shall be submitted.	Firm has submitted COA for the working standard for omeprazole. ***However, the drug substance source as per submitted dossier is M/s Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore while the submitted COA is for M/s Vision Pharmaceuticals, Islamabad.***
9.	3.2.P.2	• Justification shall be submitted regarding dissolution and assay of the applied formulation in the pharmaceutical equivalence studies. As the medium of the dissolution and time are not in accordance with the monograph. • Justification shall be submitted for not performing CDP against the innovator product. • Justify the condition of dissolution used in comparative dissolution studies. • Justification shall be submitted for carrying dissolution studies up to 30 minutes time point only in 0.1N HCl in Comparative Dissolution studies. • No data for the comparator product for CDP has been submitted.	Firm has submitted that test is performed according to the monograph but this time is typographical mistake. Firm has submitted new CDP results of the applied formulation with Risek 20mg capsules in three mediums and the f2 values are in acceptable range. ***However, submitted results are for Tzole 40mg capsule instead of 20mg & at acidic medium pH 1.2, results for only 45 minutes time points are submitted instead of 2 hours.*** ***Furthermore, pH of the medium is not mentioned with the submitted results.*** Firm has submitted that dissolution studies are performed according to monograph; we have 5 sampling intervals in 0.1 N HCl and phosphate buffer pH 4.5 and phosphate buffer pH 6.5. Firm has submitted that it is a typographic error while the dissolution in 0.1 N HCl is performing 120minutes. ***Initially submitted results have shown more than 10% release in 30 minutes while actually there should be NMT 10% in initial 2 hours.*** ***No details of the comparator product are submitted.***
10.	3.2.P.3.2	Justification shall be submitted for use of Omeprazole powder in the master formulation.	Firm has submitted that they have used Omeprazole 8.5% Ec pellets in the formulation. Omeprazole powder was typographical error.
11.	3.2.P.5.1	• Specification provided for the drug product has not mentioned dissolution at acidic stage. • Dissolution test shall be specified whether test I or any of the other test is followed by the drug product manufacturer or otherwise.	***No reply/justification is submitted against this point.*** ***No reply/justification is submitted against this point.***
12.	3.2.P.5.2	Analytical procedures for the drug product are completely different from the official monograph. Clarification is required.	Firm has submitted that all stability studies performed according to USP monograph. ***However, the conditions for dissolution test and conditions for assay test applied by the drug product manufacturer are completely different from that of the USP monograph. Standard solution, test soltion, wavelength applied & injection volume etc. all are different from USP.***

13.	3.2.P.5.2	Analytical method validation/verification of product shall be submitted.	Submitted.
14.	3.2.P.5.4	• Specification of dissolution test in the batch analysis are without time for buffer stage and without percentage for acid stage. • Batch analysis has only buffer stage dissolution results.	Firm has submitted that all limits are mentioned in analytical procedures but mistakenly not mentioned in batch analysis. ***No reply submitted against this point.***
15.	3.2.P.8.1	• Stability summary and conclusion has manufacturing date of Jan-2022 with batch No. of RLE-001, RLE-002 & RLE-003 while the stability data sheets have mentioned manufacturing date of 10-2021 with batch No. of T1/21, T2/21 & T3/21. Clarification is required.	Firm has submitted that manufacturing date of their batches is October, 2021 but the January 2021 is testing interval date.
16.	3.2.P.8.3	• Stability data sheets have no dissolution at acidic stage. Clarification is required. • Justification shall be submitted regarding the run time, injection volume and wavelength used for the assay of finished product as the applied run time, injection volume and wavelength are different from that of the official monograph. • Stability data sheets have mentioned weight of capsule as 295 while the raw data has mentioned 235mg. Clarification is required. • Dates in the submitted chromatograms have been over written by hand. Clarification shall be submitted.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** Firm has submitted that testing of the product is performed as per USP. The run time is about 10 minutes and injection volume are 20µl and flow rate is 1ml/min. column used is 4.6 mm x 15cm; 5µm packing L1 and detector is 302nm. ***However, in the submitted chromatograms the conditions are different from that mentioned in the official pharmacopoeia. Official monograph has mentioned wavelength of 305nm while firm has applied 302nm.*** Firm has submitted that stability raw data sheets have two different weights one is content weight of pellets and second weight is gross weight with capsule shell. ***No reply submitted against this point.***
17.	3.2.P.8.3	Justification shall be submitted regarding the retention time of the omeprazole in the provided chromatograms as two different retention time are mentioned for the same omeprazole.	Firm has submitted that during stability studies they have used two different companies HPLC column in which one of that have minimum 5000 number of theoretical plates and other have less than 5000 plates due to which retention time have some difference. ***Submitted chromatograph have shown two different retention times for the omeprazole i.e. 5minutes and 10 minutes.***
18.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used. • Justification shall be submitted for the stability of both drug substance and finished product that the values at both	Only one-page Esomeprazole capsule 06 standard injection is provided. ***Not complete.*** Submitted. Only specifications of HPLC are provided while 21 CFR compliant certificate is not provided. Raw data sheets for dissolution and assay tests are not provided by the firm.

		accelerated and real time are exactly similar at same time points.	Firm has submitted that they have performed only drug product stability studies accelerated and real time in different intervals but we take print out at same time after completion of stability studies. ***Real time and accelerated stability studies of both the drug substance and drug product of all three batches have exact similar values.***
19.		• Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Tzole 20mg capsule.	Firm has submitted that they purchased Omeprazole 8.5% and 22% each 1kg for three trial batches. Total material use in trial batches for testing. ***Executed BMR's have shown that in Tzole 20 mg capsules 8.5% of pellets have been used. Stability data sheets have three different batches each with 4100 capsules batch size.*** ***In this regard total number of capsules manufactured are;*** ***5600 x 3 = 12,300*** ***Each 20mg capsule will have 235mg of Omeprazole EC pellets.*** ***12300 x 235 = 2,890,500 mg of pellets*** ***2.89 kg pellets are required to fill the three trial batches while firm has purchased only 1kg.***

Previous Decision: Registration Board decided to defer the case for onsite verification and authenticity of the submitted t stability data due to following observations:

- Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.
- Submitted COA of working standard is from M/s Vision Pharmaceuticals whereas drug substance has been procured from M/s Pharmazone Chemicals.
- Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours.
- The analytical method for dissolution test and for assay test applied by the drug product manufacturer are completely different in terms of run time, injection volume, wavelength, standard solution preparation etc.., from that of the USP monograph as also evident from the submitted HPLC chromatograms.
- Submitted HPLC chromatograms reflect two different retention time for 20mg and 40 mg Omeprazole EC pellets. i.e. 5minutes and 10 minutes.
- Quantity of Omeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size.
- Both accelerated and real time stability data sheets are having exactly similar values at same time points.
- Drug product Batch analysis has only buffer stage dissolution results.
- Stability data sheets have mentioned weight of capsule as 295 while the raw data has mentioned 235mg. Clarification is required.
- Dates in the submitted chromatograms have been over written by hand.
- Raw data sheets for dissolution and assay tests are not provided by the firm.
- Stability data sheets have mentioned weight of capsule as 295 while the raw data has mentioned 235mg.

	The status in reference regulatory authorities	Omeprazole 40mg delayed release capsule, USFDA Approved.
	For generic drugs (me-too status)	Omega 40mg Capsule, Ferozsons Laboratories, Reg. No. 050818.
	GMP status of the Finished product manufacturer	Not submitted.
	Evidence of section approval.	Capsule (general) - New section approved vide No.F.1-12/97-Lic (Vol-II) dated 24-11-2021.
	Name and address of API manufacturer.	Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months. Batches: (OEC-22-001, OEC-22-002 & OEC-22-003)

	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for quality tests (Description, identification, Average weight, dissolution & assay) for their product against Omega 40mg Capsule. Firm has submitted CDP against the brand i.e. Risek 40mg Capsule manufactured by the Getz pharma. Results of the f2 values are in acceptable range.
	Analytical method validation/verification of product	Not submitted.

STABILITY STUDY DATA			
Manufacturer of API	Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore.		
API Lot No.	OEC-22-015.		
Description of Pack (Container closure system)	2 blisters of 7's capsules of Alu-Alu in single unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5% RH Accelerated: 40˚C ± 2˚C / 75% ± 5% RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RLE001	RLE002	RLE001
Batch Size	5600 capsules	5600 capsules	5600 capsules
Manufacturing Date	10-2021	10-2021	10-2021
Date of Initiation	29-10-2021	29-10-2021	29-10-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No.43/2022-DRAP (AD-00196339815-153) dated 07-04-2022 on the basis of inspection conducted on 30-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. 0571 dated 01-10-2021 of pharma zone chemical (Pvt.) Limited with buyer's name of Well care pharmaceuticals mentioning 1kg quantity of each

		8.5% Omeprazole pellets & 22.5% pellets of Omeprazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Submission by the firm.
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted. • GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Copy of DML is submitted which is not in readable form. One page of inspection report is submitted conducted on 10-09-2021 signed by only one member out the three panel members wherein following is recommended; "Panel recommended resumption of production and grant of new capsule section. Detailed report was prepared on prescribed format and copy was handed over to the firm for record and reference."
2.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised table for literature references has been submitted by the firm.***
3.	3.2.S.1.3	General properties, solubilities and physical form related data for the drug substance shall be submitted.	Submitted.
4.	3.2.S.4.1	• Finished product manufacturer has submitted Specification as per USP for drug substance while there is no monograph for the omeprazole pellets in the USP.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised specifications are provided/submitted by the firm.***
5.	3.2.S.4.2	Analytical procedures submitted by the drug product manufacturer are different from drug substance manufacturer. Clarification is required.	Firm has submitted that drug substance analytical procedure is manufacturer specifications because Omeprazole EC pellets is not available in any pharmacopoeia. ***However, new* analytical procedure *for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.***
6.	3.2.S.4.3	Verification studies of the drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
7.	.2.S.4.5.	Justification of specifications has declared USP specification. Clarification is required.	Firm has submitted that omeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error.
8.	3.2.S.5	COA of the reference standard used shall be submitted.	Firm has submitted COA for the working standard for omeprazole. ***However, the drug substance source as per submitted dossier is M/s Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore while the submitted COA is for M/s Vision Pharmaceuticals, Islamabad.***

9.	3.2.P.2	• Pharmaceutical equivalence studies are performed with Risek 40mg by Getz pharma while the results are given for Omega 40mg by Ferozsons laboratories. Clarification is required. • Justification shall be submitted for not performing CDP against the innovator product. • Justification shall be submitted regarding dissolution and assay of the applied formulation in the pharmaceutical equivalence studies. As the medium of the dissolution and time are not in accordance with the monograph. • Justify the condition of dissolution used in comparative dissolution studies. • Justification shall be submitted for carrying dissolution studies up to 30 minutes time point only in 0.1N HCl in Comparative Dissolution studies.	Firm has submitted that it was typographic error and pharmaceutical equivalence studies are performed with Risek. ***No reply submitted.*** Firm has submitted that test is performed according to the monograph but this time is typographical mistake. Firm has submitted that dissolution studies are performed according to monograph; we have 5 sampling intervals in 0.1 N HCl and phosphate buffer pH 4.5 and phosphate buffer pH 6.5. Firm has submitted that it is a typographic error while the dissolution in 0.1 N HCl is performing 120minutes.
10.	3.2.P.5.2	• Analytical procedures for the drug product are different from the official monograph. Clarification is required. • Assay in the official monograph is through HPLC while applicant has mentioned UV spectroscopy in its analytical procedures. Clarification shall be submitted.	***No reply/justification submitted.*** ***No reply/justification submitted.***
11.	3.2.P.5.2	Analytical method validation/verification of product shall be submitted.	
12.	3.2.P.5.4	• Specification of dissolution test in the batch analysis are without time for buffer stage and without percentage for acid stage. • Batch analysis has only buffer stage dissolution results.	***No reply/justification submitted.*** ***No reply/justification submitted.***
13.	3.2.P.8.3	• Stability data sheets have no dissolution at acidic stage. Clarification is required. • Weight/10 capsule in the stability data sheets is 268mg ± 10%. Clarification shall be submitted in this regard. • Raw data sheets for stability has mentioned label claim of 20mg. clarification shall be submitted. • Justification shall be submitted regarding the run time for the assay of finished product as the applied run time is different from that of the official monograph. • Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Rezole 40mg capsule.	***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.***
14.	3.2.P.8.3	Justification shall be submitted regarding the retention time of the omeprazole in the provided chromatograms as two different	***No reply/justification submitted.***

		retention time are mentioned for the same omeprazole.	
15.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used. • Justification shall be submitted for the stability of both drug substance and finished product that the values at both accelerated and real time are exactly similar at same time points.	***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.*** ***No reply/justification submitted.***

Previous Decision: Registration Board decided to defer the case for onsite verification and authenticity of the submitted stability data due to following observations:

- Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.
- Submitted COA of working standard is from M/s Vision Pharmaceuticals whereas drug substance has been procured from M/s Pharmazone Chemicals.
- Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours.
- Assay in the official monograph is through HPLC while applicant has mentioned UV spectroscopy in its analytical procedures.
- The analytical method for dissolution test and for assay test applied by the drug product manufacturer are completely different in terms of run time, injection volume, wavelength, standard solution preparation etc.., from that of the USP monograph as also evident from the submitted HPLC chromatograms.
- Submitted HPLC chromatograms reflect two different retention time for 20mg and 40 mg Omeprazole capsule.
- Quantity of Omeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size.
- Drug product Batch analysis has only buffer stage dissolution results.
- Dates in the submitted chromatograms have been over written by hand.
- Raw data sheets for dissolution and assay tests are not provided by the firm.
- Stability data sheets have no dissolution at acidic stage. Clarification is required.
- Raw data sheets for stability has mentioned label claim of 20mg.
- In performance of Assay test the applied run time is different from that of the official monograph.

934.	Name, address of Applicant / Marketing Authorization Holder	M/s Well care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha.

		☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 19735: dated 06-07-2022.
	Details of fee submitted	PKR 30,000/-: dated 31/05/2022.
	The proposed proprietary name / brand name	**ESOWELL 20mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Esomeprazole magnesium trihydrate enteric coated pellets Eq. to Esomeprazole …….. 20mg
	Pharmaceutical form of applied drug	Blue & Transparent colored Delayed Release Capsules
	Pharmacotherapeutic Group of (API)	PPI (Proton Pump Inhibitors).
	Reference to Finished product specifications	USP
	Proposed Pack size	2×7
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Nexium 40mg & 40mg delayed release capsule, USFDA Approved.
	For generic drugs (me-too status)	Nexum 20mg Capsule, Getz Pharma, Reg. No. 033890.
	GMP status of the Finished product manufacturer	Not submitted.
	Evidence of section approval.	Capsule (general) - New section approved vide No.F.1-12/97-Lic (Vol-II) dated 24-11-2021.
	Name and address of API manufacturer.	Pharmazone Chemicals (Pvt.) Ltd., Plot No. 37, Sundar Industrial Estate, Lahore.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.

		Batches: (EEC-22-002, EEC-22-003 & EEC-22-004)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for quality tests (Description, identification, Weight variation, Loss on drying, Uniformity of dosage unit, dissolution & assay) for their product against Nexum 20mg capsules manufactured by Getz Pharma. Firm has submitted CDP against the same brand i.e. Nexum 20mg capsules (B. No. 384C12) manufactured by Getz Pharma.
	Analytical method validation/verification of product	Not submitted.

No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No.43/2022-DRAP (AD-00196339815-153) dated 07-04-2022 on the basis of inspection conducted on 30-03-2022.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. 0571 dated 01-10-2021 of pharma zone chemical (Pvt.) Limited with buyer's name of Well care pharmaceuticals mentioning 1kg quantity of each 8.5% Omeprazole pellets & 22.5% pellets of Esomeprazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Submission by the firm.
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted. • GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Copy of DML is submitted which is not in readable form. One page of inspection report is submitted conducted on 10-09-2021 signed by only one member out the three panel members wherein following is recommended; "Panel recommended resumption of production and grant of new capsule section. Detailed report was prepared on prescribed format and copy was handed over to the firm for record and reference."
2.	1.5.15 – 1.5.19	All the commitments submitted are unsigned. Signed commitments shall be submitted.	Signed commitments are submitted by the firm.
3.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted.	Firm has submitted that esomeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error. ***No revised table for literature references has been submitted by the firm.***
4.	3.2.S.4.1	Finished product manufacturer has submitted Specification as per USP for drug substance while there is no monograph for the pellets in the USP. Clarification is required.	Firm has submitted that it was typographical error while the specifications of the Esomeprazole pellets are manufacturer specifications. ***However, new specifications for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.***
5.	3.2.S.4.2	• Analytical procedure for drug substance provided by the finished product manufacturer is completely different from that of drug substance manufacturer. Clarification shall be submitted. • Drug substance has mentioned assay by HPLC while finished product manufacturer has mentioned UV spectroscopy. Clarification shall be submitted. • Justify the preparation of standard solution and sample solution in dissolution test of analytical procedure with respect to the drug substance manufacturer.	Firm has submitted that drug substance analytical procedure is manufacturer specifications. ***However, new* analytical procedure *for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.*** Firm has submitted that manufacturer have two testing methods one that on HPLC & other on UV and we have used HPLC method of testing for the drug substance testing. Firm has submitted that manufacturer has used omeprazole working standard against Esomeprazole test in assay and dissolution but we have used esomeprazole working standard for the testing of Esomeprazole EC pellets. ***Completely different from manufacturer of drug substance.***

6.	3.2.S.4.3	Verification studies of the drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.5.	Justification of specifications for the drug substance shall be submitted.	Submitted.
8.	3.2.S.5	COA of the reference standard used shall be submitted.	Submitted.
9.	3.2.P.2	• Standard Operating procedure for product design and development is for syrup and suspension dosage form. • Justification shall be submitted for not performing CDP against the innovator product. • Justify the condition of dissolution used in comparative dissolution studies. • Justify the analytical procedure for CDP as it has mentioned Phosphate buffer of pH7.3, pH 11. • Justify the results of CDP at acid stage as more than 10% of the drug is released in 30 minutes.	***No reply submitted.*** Firm has submitted new CDP results of the applied formulation with Nexum 20mg capsules in three mediums and the f2 values are in acceptable range. ***However, at acidic medium pH 1.2, results for only 45 minutes time points are submitted instead of 2 hours. Furthermore, submitted CDP results for Esowell 20mg capsules are having 100% similar results and values as that of submitted results for Esocare 40mg.*** ***No justification is submitted against this point. pH 7.3 and pH 11 are used in the method.*** ***No justification is submitted against this point.*** ***No justification is submitted against this point.***
10.	3.2.P.5.1	• Specification provided for the drug product has not mentioned dissolution at acidic stage. • Dissolution test shall be specified whether test I or any of the other test is followed by the drug product manufacturer or otherwise.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** ***No justification is submitted against this point.***
11.	3.2.P.5.2	• Calculation formula for assay test of the finished product is different from USP. Clarification is required. • Standard solution in dissolution test is different from USP. Clarification is required.	***No justification is submitted against this point.*** The manufacturer is using Omeprazole working standard against Esomeprazole test in assay and dissolution but we have used Esomeprazole working standard for the testing of Esomeprazole EC pellets. ***Official monograph has mentioned Omeprazole RS for preparation of standard solution in the assay of Esomeprazole delayed release capsule.***
12.	3.2.P.5.2	Analytical method validation/verification of product shall be submitted.	Submitted.
13.	3.2.P.5.4	• Specification of dissolution test in the batch analysis are without time for buffer stage and without percentage for acid stage. • Batch analysis has only buffer stage dissolution results.	Firm has submitted that all limits are mentioned in analytical procedures but mistakenly not mentioned in batch analysis. Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.***

14.	3.2.P.8.3	• Stability data sheets have no dissolution at acidic stage. Clarification is required. • Stability raw data sheets provided for EW1 & EW2 have two different weight for the sample. Clarification shall be submitted. • Justification shall be submitted regarding the run time and injection volume used for the assay of finished product as the applied conditions are different from that of the official monograph.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** Firm has submitted that stability raw data sheets of EC1 & EC2 have two different weights one is content weight of pellets and second weight is gross weight with capsule shell. Firm has submitted that testing of the product is performed as per USP. The run time is about 10 minutes and injection volume are 20µl and flow rate is 1ml/min. column used is 4.6 mm x 15cm; 5µmpacking L1 and detector is 302nm. ***Conditions are different from official monograph.***
15.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used. • Justification shall be submitted for the stability of finished product that the values at both accelerated and real time are exactly similar at same time points.	Only one-page Esomeprazole capsule 06 standard injection is provided. ***Not complete.*** Submitted. Only specifications of HPLC are provided while 21 CFR compliant certificate is not provided. ***Raw data sheets for dissolution and assay tests are not provided by the firm.*** ***No reply is submitted against this point.***
16.		Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Esowell 20mg capsule.	Firm has submitted that they purchased Esomeprazole 8.5% and 22% each 1kg for three trial batches. Total material use in trial batches for testing. ***However, firm has not provided any document for purchase of 8.5% Esomeprazole EC pellets.*** ***Executed BMR's have shown that in Esowell 20 mg capsules 22.5% of pellets have been used. Stability data sheets have three different batches each with 5600 capsules batch size.*** ***In this regard total number of capsules manufactured are;*** ***5600 x 3 = 16800*** ***Each 20mg capsule will have 88.8 mg of Esomeprazole EC pellets.*** ***16800 x 88.8 = 1,491,840 mg of pellets*** ***1.49 kg pellets are required to fill the three trial batches while firm has purchased only 1kg.***
17.		Justification shall be submitted regarding the chromatograms provided for Esowell 20mg and Esocare 40 mg capsules as chromatograms for both the products have same time and exact values in respect of everything.	Firm has submitted that the chromatograph of Esowell 20mg and Esocare 40mg are print on same date but the test is performed in different dates. ***Chromatographs of both the 20mg and 40mg Esomeprazole are complete copies in respect of time, Areas of the sample and standards, retentions time etc.***

Previous Decision: Registration Board decided to defer the case for onsite verification and authenticity of the submitted stability data due to following observations:

- Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.

• Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours. • The results of CDP at acid stage of different samples were more than 10% of the drug is released in 30 minutes. • Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the dissolution test of Esomeprazole delayed release capsule. • Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the assay test of Esomeprazole delayed release capsule. • Verification of chromatographic conditions used in the dissolution and assay test of the Esomeprazole delayed release capsule from chromatograms in the HPLC software with reference to official monograph. • Quantity of Esomeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size. • Both accelerated and real time stability data sheets are having exactly similar values at same time points. • The chromatograms for both Esomeprazole 20mg and 40mg capsules have same time and exact values in respect of everything.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No.43/2022-DRAP (AD-00196339815-153) dated 07-04-2022 on the basis of inspection conducted on 30-03-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted commercial invoice No. 0571 dated 28-12-2021 of pharma zone chemical (Pvt.) Limited with buyer's name of Well care pharmaceuticals mentioning 1kg quantity of each 8.5% Omeprazole pellets & 22.5% pellets of Esomeprazole.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Submission by the firm.
1.	1.3.4	• Valid copy of DML of the manufacturer shall be submitted. • GMP certificate/last inspection report of the drug product manufacturer shall be submitted.	Copy of DML is submitted which is not in readable form. One page of inspection report is submitted conducted on 10-09-2021 signed by only one member out the three panel members wherein following is recommended; "Panel recommended resumption of production and grant of new capsule section. Detailed report was prepared on prescribed format and copy was handed over to the firm for record and reference."
2.	1.5.15 – 1.5.19	All the commitments submitted are unsigned. Signed commitments shall be submitted.	Signed commitments are submitted by the firm.
3.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted.	Firm has submitted that esomeprazole pellets specification is manufacturer specifications and pharmacopoeial specifications were typographical error.

			No revised table for literature references has been submitted by the firm.
4.	3.2.S.4.2	• Analytical procedures for drug substance provided by the finished product manufacturer is completely different from that of drug substance manufacturer. Clarification shall be submitted. • Justify the preparation of standard solution and sample solution in dissolution test of analytical procedure with respect to the drug substance manufacturer.	Firm has submitted that drug substance analytical procedure is manufacturer specifications (In-house method). ***However, new* analytical procedure *for the drug substance as per manufacturer specifications are not provided by the drug product manufacturer.*** Firm has submitted that manufacturer has used omeprazole working standard against Esomeprazole test in assay and dissolution but we have used esomeprazole working standard for the testing of Esomeprazole EC pellets. ***Completely different from manufacturer of drug substance.***
5.	3.2.S.4.3	Verification studies of the drug substance performed by the finished product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.5.	Justification of specifications for the drug substance shall be submitted.	Submitted.
7.	3.2.P.2	• Standard Operating procedure for product design and development is for syrup and suspension dosage form. • Justification shall be submitted for not performing CDP against the innovator product. • Justify the condition of dissolution used in comparative dissolution studies. • Justify the analytical procedure for CDP as it has mentioned Phosphate buffer of pH7.3, pH 11. • Justify the results of CDP at acid stage as more than 10% of the drug is released in 30 minutes.	***No reply submitted.*** Firm has submitted new CDP results of the applied formulation with Nexum 20mg capsules in three mediums and the f2 values are in acceptable range. ***However, at acidic medium pH 1.2, results for only 45 minutes time points are submitted instead of 2 hours. Furthermore, submitted CDP results for Esocare 40mg capsules are having 100% similar results and values as that of submitted results for Esowel 20mg.*** ***No justification is submitted against this point.*** ***No justification is submitted against this point.*** ***No justification is submitted against this point***
8.	3.2.P.5.1	• Specification provided for the drug product has not mentioned dissolution at acidic stage. • Dissolution test shall be specified whether test I or any of the other test is followed by the drug product manufacturer or otherwise.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** ***No justification is submitted against this point.***
9.	3.2.P.5.2	• Calculation formula for assay test of the finished product is different from USP. Clarification is required. • Standard solution preparation in dissolution test is different from USP. Clarification is required.	***No justification is submitted against this point.*** The manufacturer is using Omeprazole working standard against Esomeprazole test in assay and dissolution but we have used Esomeprazole working standard for the testing of Esomeprazole EC pellets. ***Official monograph has mentioned Omeprazole RS for preparation of standard solution in the assay of Esomeprazole delayed release capsule.***

10.	3.2.P.5.2	Analytical method validation/verification of product shall be submitted.	Submitted.
11.	3.2.P.5.4	• Specification of dissolution test in the batch analysis are without time for buffer stage and without percentage for acid stage. • Batch analysis has only buffer stage dissolution results.	Firm has submitted that all limits are mentioned in analytical procedures but mistakenly not mentioned in batch analysis. Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.***
12.	3.2.P.8.1	Stability summary and conclusion has manufacturing date of Jan-2022 with batch No. of RLE-001, RLE-002 & RLE-003 while the stability data sheets have mentioned manufacturing date of 10-2021 with batch No. of T1/21, T2/21 & T3/21. Clarification is required.	Firm has submitted that manufacturing date of their batches is October, 2021 but the January, 2021 is a testing interval date.
13.	3.2.P.8.3	• Stability data sheets have no dissolution at acidic stage. Clarification is required. • Stability raw data sheets provided for EC1 & EC2 have two different weight for the sample. Clarification shall be submitted. • Justification shall be submitted regarding the run time and injection volume used for the assay of finished product as the applied conditions are different from that of the official monograph.	Firm has submitted that details of dissolution at acidic and buffer stage are described in stability summary data sheets. ***Stability summary sheets have only buffer stage dissolution results dissolution stage results are missing in stability summary data sheets.*** Firm has submitted that stability raw data sheets of EC1 & EC2 have two different weights one is content weight of pellets and second weight is gross weight with capsule shell. Firm has submitted that testing of the product is performed as per USP. The run time is about 10 minutes and injection volume are 20µl and flow rate is 1ml/min. column used is 4.6 mm x 15cm; 5µm packing L1 and detector is 302nm. ***Conditions are different from official monograph.***
14.		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Complete Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated). • Provide specifications of HPLC system with its model including information whether gradient or isocratic column, 21 CFR compliance system. • Raw data sheets for dissolution and assay test of the finished product shall be submitted with calculation formula used.	Only one-page Esomeprazole capsule 06 standard injection is provided. ***Not complete.*** Submitted. Only specifications of HPLC are provided while 21 CFR compliant certificate is not provided. ***Raw data sheets for dissolution and assay tests are not provided by the firm.***
15.		Justification regarding the drug substance shall be submitted with respect to the total quantity of the drug substance purchased and total quantity used in manufacturing and testing of all the three trial batches of Esocare 40mg capsule.	Firm has submitted that they purchased Esomeprazole 8.5% and 22% each 1kg for three trial batches. Total material use in trial batches for testing. ***However, firm has provided the documents for 22.5% esomeprazole only for 1kg quantity. Executed BMR's have shown that in Esocare 40 mg capsules 22.5% of pellets have been used. Stability data sheets have three different batches each with 5600 capsules batch size. In this regard total number of capsules manufactured are;*** ***5600 x 3 = 16800***

			Each 40mg capsule will have 177.7mg of Esomeprazole EC pellets. ***16800 x 177.7 = 2,985,360 mg of pellets*** ***2.9 kg pellets are required to fill the three trial batches while firm has purchased only 1kg.***
16.		Justification shall be submitted regarding the chromatograms provided for Esowell 20mg and Esocare 40 mg capsules as chromatograms for both the products have same time and exact values in respect of everything.	Firm has submitted that the chromatograph of Esowell 20mg and Esocare 40mg are print on same date but the test is performed in different dates. ***Chromatographs of both the 20mg and 40mg Esomeprazole are complete copies in respect of time, Areas of the sample and standards, retentions time etc.***

Previous Decision: Registration Board decided to defer the case for onsite verification and authenticity of the submitted stability data due to following observations:

- Drug substance analytical procedure applied by the drug product manufacturer is different from that applied by the drug substance manufacturer.
- Submitted analytical record of CDP reflects that for pH 1.2, comparative dissolution studies have been conducted for 45 minutes only while the limits are NMT 10% release in pH 1.2 for two hours.
- The results of CDP at acid stage of different samples were more than 10% of the drug is released in 30 minutes.
- Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the dissolution test of Esomeprazole delayed release capsule.
- Firm has used Esomeprazole reference standard while Official monograph has mentioned Omeprazole RS for preparation of standard solution in the assay test of Esomeprazole delayed release capsule.
- Verification of chromatographic conditions used in the dissolution and assay test of the Esomeprazole delayed release capsule from chromatograms in the HPLC software with reference to official monograph.
- Quantity of Esomeprazole pellets procured, as evident from submitted invoice is not justified for the manufacturing of trial batches of submitted batch size.
- Both accelerated and real time stability data sheets are having exactly similar values at same time points.

The chromatograms for both Esomeprazole 20mg and 40mg capsules have same time and exact values in respect of everything.

M/s Well Care Pharmaceuticals, A/7 P.S.I.E. Sargodha vide their reference No. WC/1213/22 dated 20-12-2022 submitted an application with subject of "Withdrawal request of our applications for registration" wherein they have submitted that that would like to withdraw their below mentioned submitted applications for registrations on their own reasons;

Sr. No.	Generic with strength	Brand name	Fee date	Submission date
1.	Omeprazole 20mg capsule	Tzole 20mg capsule	21-03-2022	12-08-2022
2.	Omeprazole 40mg capsule	Tzole 40mg capsule	21-03-2022	12-08-2022
3.	Esomeprazole 20mg capsule	Esowell 20mg capsule	21-03-2022	12-08-2022
4.	Esomeprazole 40mg capsule	Esowell 40mg capsule	21-03-2022	12-08-2022

They further requested to please accommodate them and approve their withdrawal request.

Decision: Registration Board decided to acceded the request of M/s Well Care Pharmaceuticals, A/7 P.S.I.E. Sargodha regarding withdrawal of their registration applications i.e., Tzole 20mg Capsule. , Tzole 20mg Capsule. ESOWELL 20mg Capsule ESOWELL 20mg Capsule, Esocare 40mg Capsule & Tzole 40mg capsule and declared them as disposed of.

	Details of fee submitted	PKR 75,000/-: dated 20-09-2021.
	The proposed proprietary name / brand name	Coldenol Sinus Severe Caplets (day).
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Caplet contains; Paracetamol …… 325mg Phenylephrine HCl …… 5mg Guaifenesin …… 200mg
	Pharmaceutical form of applied drug	Oral tablet.
	Pharmacotherapeutic Group of (API)	Paracetamol, combinations excl. Psycholeptics. (N02BE51)
	Reference to Finished product specifications	Manufacturer specifications.
	Proposed Pack size	10's, 20's & 30's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Tylenol Sinus Severe (day), USFDA is provided by the firm. However, the same could not be found in USFDA data. Daily med has the same product as OTC product with the following disclaimer: *Most OTC drugs are not reviewed and approved by FDA, however they may be marketed if they comply with applicable regulations and policies. FDA has not evaluated whether this product complies.*
	For generic drugs (me-too status)	Could not be confirmed.
	GMP status of the Finished product manufacturer	Inspection report of 24-01-2018. Not valid.
	Evidence of section approval.	Tablet (general) section approved vide No. F. 1-19/92-Lic (P1) dated 27-07-2015.
	Name and address of API manufacturer.	Paracetamol: Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi. Guaifenesin: Zhejiang Haizhou Pharmaceutical Co., Ltd., linhai Industrial Zone, Linhai Zhejiang China. Phenylephrine Hydrochloride. M/s Shenzhen Oriental Pharmaceutical Co., Ltd., No. 43, Dakeng Road, Tongle village, Longgang District, Shenzhen China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, analytical procedures and its validation, batch analyses and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Paracetamol (USP/BP), Guaifenesin (USP) and Phenylephrine HCl (USP/BP) is present respectively. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description

		of manufacturing process and controls, tests impurities B,C,D, Individual Impurity I & any unspecified for Paracetamol, Impurities A,B,C and D for Guaifenesin and Impurities A,C,D,E and unspecified impurity for Phenylephrine HCl, specifications, analytical procedures and its validation, batch analyses and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of the following drug substances as per Zone IV-a for both accelerated as well as real time conditions: Paracetamol: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 12 months. (Batch No. 18GN60001, 18GN60002, and 18GN60003) Guaifenesin: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months. (Batch No. 08GF04156, 08GF04157, and 08GF04158) Phenylephrine hydrochloride. Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months. (Batch No. PEH-160404, PEH-160405, and PEH-160406)
	Module-III (Drug Product):	The firm has submitted detail of description, composition, pharmaceutical development, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against Tylenol Sinus Severe Caplets DAY by performing quality tests (Assay, Dissolution, Disintegration Time test). CDP has been performed against the same product that is Tylenol Sinus Severe Caplets DAY, Lot No. 485556 made in Italy, distributed by M/s Johnson & Johnson Consumer Inc., Mc Neil Consumer Healthcare Division USA in 0.1 N HCl, Acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have been submitted including: system suitability, accuracy, and precision.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has submitted Reference of previous approval of applications with stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificates of: Paracetamol: Copy of GMP certificate No. 83/2020-DRAP(K) of M/s Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi issued by DRAP Karachi valid till 18/06/2022. Guaifenesin: Copy of GMP certificate No. ZJ20180122 of Zhejiang Haizhou Pharmaceutical Co., Ltd., Linhai Industrial Zone, Linhai city Zhejiang China issued by China food & Drug Administration valid until 09-25-2023. Phenylephrine Hydrochloride. Not provided.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Paracetamol Copy of commercial invoice No. PRT/2019/0191 dated 18/03/2019 is submitted. Copy of commercial invoice No. PRT/2019/0197 dated 25/03/2019 is submitted. • Guaifenesin Copy of clearance certificate attested by AD (I&E) DRAP, Islamabad dated 16/07/2018 along with commercial invoice No.130128 dated 22/06/2018 with quantity of 0.75Kg is submitted. • Phenylephrine HCl Copy of clearance certificate attested by AD (I&E) DRAP, Islamabad dated 10/05/2018 along with

		commercial invoice No. SZ-1803039 dated 12/04/2018 with quantity of 308.25 Gram is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section No.	Observation	Response by the firm
1.	1.3	Valid copy of DML and latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be provided.	Firm has not provided any renewal of DML. Firm has submitted GMP inspection report dated 24-01-2018. *Provided GMP inspection report is not within last three years.*
2.	1.5.9	Evidence of approval of applied formulation in reference regulatory authorities as decided by the registration board shall be submitted as the provided reference could not be confirmed.	Tylenol Sinus Severe (day), USFDA is provided by the firm. However, the same could not be found in USFDA data. Daily med has the same product as OTC product with the following disclaimer: *Most OTC drugs are not reviewed and approved by FDA, however they may be marketed if they comply with applicable regulations and policies. FDA has not evaluated whether this product complies.*
3.	1.6.5	• Address of the API manufacturer for guaifenesin provided in section 1.6.5 is different from that of mentioned in GMP certificate. Clarification is required. • Valid GMP certificate of the drug substance manufacturer (phenylephrine HCL) issued by the concerned / relevant regulatory authority shall be submitted.	• Firm has submitted that due to typographical error, the address of the drug substance manufacturer mentioned in section 1.6.5 was written wrong. *Firm has submitted a document "Announcement of the state drug administration on matters concerning the implementation of the Drug Administration Law of the People's Republic of China" wherein under the heading of drug GMP & GSP management requirements following is stated.* *'starting from December 1, 2019 the pharmaceutical GMP and GSP certifications will be cancelled, GMP and GSP certificates will no longer be accepted and pharmaceutical GMP and GSP certificates will no longer be issued. Where current regulation require on site inspection, on-site inspection shall be continued after December 1, 2019 and the company shall be notified of the on-site inspection results. '*
4.	3.2.S.4.2	Guaifenesin: • Analytical method used for drug substance (guaifenesin) by the drug substance manufacturer shall be submitted. • Analytical method provided by the drug product manufacturer for drug substance (guaifenesin) has mentioned 40g/ml while the pharmacopoeia has mentioned 40mcg/ml in Identification test. Clarification is required.	Submitted. Firm has submitted that due typographic error 40g/ml was written instead of 40mcg/ml. However, finished product manufacturer has followed USP method for drug substance.

		Phenylephrine HCL: • Analytical method used for drug substance (phenylephrine HCL) by drug substance manufacturer shall be submitted.	Submitted.
5.	3.2.S.4.3	Verification studies of all the three drug substances performed by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.4	Batch analysis of paracetamol from Wilson pharma has not mentioned whether USP specifications or BP. Clarification is required.	Firm has submitted COA's wherein it is mentioned that the samples complies with both USP and BP.
7.	3.2.S.7.3	Both real time and accelerated stability study data for phenylephrine HCl from drug substance manufacturer shall be submitted.	Firm has submitted real time and accelerated stability study data for Phenylephrine HCl.
8.	3.2.P.2.	Qualitative composition of the applied formulation is different from reference product. Clarification is required.	• Firm has submitted that they used PVP K30 instead of HPC as binder in their formulation as both the materials are safely used in pharmaceutical industry for granulation purpose can be used interchangeably because of their excellent binding profiles, as mentioned in the hand book of pharmaceutical excipients. • Triacetin is used as plasticizer in the formulation and is used in the film coating to add plasticity to the film. Our film coating yields excellent film without use of plasticizer, so we didn't add triacetin in the formulation. • Carnauba wax is used to polish the caplet which is not necessarily required in our formulation. • Sucralose is not added in the formulation as it is used as sweetener and our formulation is neither chewable nor dispersible.
9.	3.2.P.2.2.1	Average weight of 10 tablets in pharmaceutical equivalence is 776.7gm. clarification is required.	Firm submitted that due to typographic error average weight of 10 tablets was mentioned 776.7 gm rather than 7.767gm.
10.	3.2.P.3.2	Batch formula has mentioned innovator's specification for paracetamol. clarification is required.	Firm has submitted new batch formula wherein USP specification is mentioned against paracetamol.
11.		Clearance certificate for Guaifenesin provided by the firm has mentioned 750Gm (0.75 Kg) quantity. While the firm has manufactured three trial batches of 1500 tablets each. With this respect only 900gm is required for the manufacturing of the said three trial batches. Clarification is required.	Firm has submitted that drug substance B. No. 18GF03204, quantity 750Gm was used in the manufacturing of trial 01, 02 trial batches. While B. No. 18GF03204 750gm & B. No. 18GF09667, 03 Kg respectively were used in the manufacturing of trial 03. We had submitted the clearance certificate of one batch 18GF03204 at the time of registration application submission, whereas the clearance certificate of the second batch was unintentionally overlooked. They also submitted the clearance certificate of the second batch. *However, there is no record of the second batch in the submitted application nor any verification studies of the said batch.*
12.	2.3.R	Dispensing of active materials without potency adjustment for Guaifenesin and Phenylephrine HCl. Justification is required.	Firm has submitted that potency was not adjusted for trial manufacturing batches (pilot scale) due to small batch size (1500 caplets) the adjustment amount was very low and does not affect the quality, efficacy and safety of the drug product. It is pertinent to mention here, that the finished drug product release limit is 90% - 110%. They also undertake that they will adjust the potency of drug substance at commercial batch for said drug product.

Decision of 321st meeting of Registration Board:
Deferred for further deliberation regarding regulatory status of applied formulation in reference regulatory authorities adopted by Registration Board in its 275th meeting.
Reply by the firm;
Firm has stated that that, they have applied for drug registration of our product namely Conofen 10/200mg tablet having composition (Phenylephrine HCl…..10mg, Ibuprofen…..200mg) on Form 5F (CTD) and submitted the dailymed reference i.e. Advil Congestion Relief Tablet 200mg/10mg https://dailymed.nlm.nih.gov/ dailymed/ drugInfo.cfm?setid=b1e29c19-fe03-4d2b-9660adf4eb4b4cf which was considered and no objection raised by Drug Registration Board in its 313th meeting of held on 16th -18th Nov, 2021 regarding dailymed reference.
They also submitted copy of that decision. Wherein the product is deferred for following submissions:

- *Pharmaceutical equivalence data of the applied product along with innovator / reference or comparator product.*
- *Comparative Dissolution Profile (CDP) data of the applied product along with innovator / reference or comparator product.*

Moreover, the firm M/s Vision Pharmaceuticals, Islamabad had applied for drug registration of their product namely, Mensodol Tablet 500/25mg with composition: Paracetamol 500mg and Pamabrom 25mg and provided "Proof of International availability of same formulation with same strength in RRA": https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=fb9a5647-b7c9-4820-b148-91060e34cb83 which was approved in 296th meeting of Drug registration Board held on 8-10th September, 2020. The product is approved.
In the light of above, it is requested to kindly registration of our aforementioned applied drug product Colynol Multi Symptom Severe Cold sachet may please be granted in the upcoming meeting of Drug Registration Board.

Decision of 322nd meeting of Registration Board: Deferred for deliberation regarding approval of applied formulation by reference regulatory authorities.

Reply by the firm;
Firm has once again submitted the link of dailymed for Tylenol sinus severe as international reference for the applied formulation.
https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=7a60184f-91a9-4b85-b243-871deca63450
They further requested to kindly grant them registration for the above mentioned formulation in the upcoming meeting of Registration Board.

Decision: Approved with innovator Specifications. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Details of fee submitted	PKR 75,000/-: dated 07-01-2022.

	The proposed proprietary name / brand name	Colynol Multi Symptom Severe Cold Sachet.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Sachet contains; Paracetamol …….. 500mg Phenylephrine HCl …… 10mg Dextromethorphan HBr ……. 20mg
	Pharmaceutical form of applied drug	Sachet.
	Pharmacotherapeutic Group of (API)	Cough Suppressants and expectorants. (R05FB02)
	Reference to Finished product specifications	Manufacturer specifications.
	Proposed Pack size	10's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Theraflu Multi Symptom Severe Cold Sachet. However, the same could not be found in USFDA data. Daily med has the same product as OTC product with the following disclaimer: *Most OTC drugs are not reviewed and approved by FDA, however they may be marketed if they comply with applicable regulations and policies. FDA has not evaluated whether this product complies.*
	For generic drugs (me-too status)	Could not be confirmed.
	GMP status of the Finished product manufacturer	Inspection report of 24-01-2018. Not valid.
	Evidence of section approval.	Tablet (general) section approved vide No. F. 1-19/92-Lic (P1) dated 27-07-2015.
	Name and address of API manufacturer.	**Paracetamol:** Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi. Copy of GMP certificate No. 83/2020-DRAP(K) of M/s Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi issued by DRAP Karachi valid till 18/06/2022. **Dextromethorphan hydro bromide:** Onerio Chemicals (Pvt.) Limited, S. No. 475/P, At & Po Ekalbara – 391 440, Ta. Padra, Distt. Vadodara, Gujrat, India. Firm has submitted license to manufacture for sale of drugs in the name of M/s Onerio Chemicals (Pvt.) Limited, issued by the Food & Drug Administration Gujrat State India valid till 13-07-2022. **Phenylephrine Hydrochloride.** M/s Shenzhen Oriental Pharmaceutical Co., Ltd., No. 43, Dakeng Road, Tongle village, Longgang District, Shenzhen China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, analytical procedures and its validation, batch analyses and justification of specification, reference standard, container closure system and stability studies of all the three drug substances and drug product is submitted.

	Module III (Drug Substance)	Official monograph of Paracetamol (USP/BP/EP), Dextromethorphan HBr (USP/BP/EP) and Phenylephrine HCl (USP/BP/EP) is present respectively. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests impurities, specifications, analytical procedures and its validation, batch analyses and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of the following drug substances as per Zone IV-a for both accelerated as well as real time conditions: **Paracetamol:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 12 months. (Batch No. 18GN60001, 18GN60002, and 18GN60003) **Dextromethorphan hydro bromide:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months. (Batch No. DX/B/054/12, DX/B/055/12 and DX/B/056/12) **Phenylephrine hydrochloride.** Not provided.
	Module-III (Drug Product):	The firm has submitted detail of description, composition, pharmaceutical development, manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established again the innovator product that is Theraflu Multi symptom Severe Cold Sachet by performing quality tests (Assay) Assay of both the products are in acceptable range. CDP has not been performed because our applied dosage form is powder (sachet).
	Analytical method validation/verification of product	Method validation studies have been submitted including: system suitability, accuracy, and precision.

STABILITY STUDY DATA	
Manufacturer of API	**Paracetamol:** Copy of GMP certificate No. 83/2020-DRAP(K) of M/s Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi issued by DRAP Karachi valid till 18/06/2022. **Dextromethorphan hydro bromide:** Firm has submitted copy of license to manufacture for sale of drugs in the name of M/s Onerio Chemicals (Pvt.) Limited, issued by the Food & Drug Administration Gujrat State India valid till 13-07-2022. **Phenylephrine Hydrochloride.** Not provided.
API Lot No.	**Paracetamol** (Batch No.19GN60228, Batch No. 19GN60222) **Dextromethorphan HBr** (Batch No. DX/L/017/18) **Phenylephrine HCl** (Batch No.PEH-180101Y1)

Description of Pack (Container closure system)	Peach colored flavored powder packed in aluminum foil.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Trial 01	Trial 02	Trial 03
Batch Size	1200 sachet	1200 sachet	1200 sachet
Manufacturing Date	04-2020	05-2020	05-2020
Date of Initiation	22-05-2020	22-05-2020	22-05-2020
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificates of: Paracetamol: Copy of GMP certificate No. 83/2020-DRAP(K) of M/s Saakh Pharma (Pvt.) Ltd., C-7/1, North Western Industrial Zone. Port Qasim, Karachi issued by DRAP Karachi valid till 18/06/2022. Guaifenesin: Copy of GMP certificate No. ZJ20180122 of Zhejiang Haizhou Pharmaceutical Co., Ltd., Linhai Industrial Zone, Linhai city Zhejiang China issued by China food & Drug Administration valid until 09-25-2023. Phenylephrine Hydrochloride. Not provided.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• **Paracetamol;** Copy of commercial invoice No. PRT/2019/0208 dated 30/03/2019 is submitted. Copy of commercial invoice No. PRT/2019/0197 dated 25/03/2019 is submitted. • **Dextromethorphan HBr;** Clearance certificate No. 794 dated 14-03-2019 mentioning 300 gm quantity of Dextromethorphan HBr EP, batch No. DX/L/017/18 attested by Assistant Director I&E is submitted by the firm. • **Phenylephrine HCl** Copy of clearance certificate attested by AD (I&E) DRAP, Islamabad dated 10/05/2018 along with commercial invoice No. SZ-1803039 dated 12/04/2018 with quantity of 308.25 Gram is submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section No.	Observation	Response by the firm
1.	1.3	Valid copy of DML and latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be provided.	
2.	1.6.5	• Valid copy of GMP certificate for drug substance manufacturer (Paracetamol) shall be submitted. • Valid copy of GMP certificate drug substance manufacturer (Phenylephrine Hydrochloride) shall be submitted. • Valid copy of manufacturing license or GMP certificate for the drug substance manufacturer (Dextromethorphan HBr) issued by concerned regulatory authority shall be submitted.	
3.	2.3.R.1	• Provide blank master production document/batch manufacturing record to be used during the commercial manufacturing of the applied product. • Provide copy of Batch manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	
4.	3.2.S.4.2	• Analytical method used for drug substance (Paracetamol) used by the drug Product manufacturer shall be submitted. • Analytical method used for drug substance (Dextromethorphan HBr) used by the drug Product manufacturer shall be submitted. • Analytical method used for drug substance (Phenylephrine hydrochloride) used by both the drug substance manufacturer and drug Product manufacturer shall be submitted.	
5.	3.2.S.4.3	• Verification studies of the drug substance (Paracetamol) performed by the drug product manufacturer shall be submitted. • Verification studies of the drug substance (Dextromethorphan HBr) performed by the drug product manufacturer shall be submitted. • Verification studies of the drug substance (Phenylephrine hydrochloride) performed by the drug product manufacturer shall be submitted.	
6.	3.2.S.4.4	Provide results of analysis of relevant batch(es) of all the three Drug Substances (Paracetamol, Dextromethorphan HBr &	

		Phenylephrine hydrochloride) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture.	
7.	3.2.S.8.3	Stability study data for the drug substance (Phenylephrine hydrochloride) from concerned manufacturer shall be submitted.	
8.	3.2.P.8.	Reference of previous approval of applications with stability study data of the firm shall be submitted.	

Decision of 321st meeting of Registration Board;

The Board deferred the case for the following:

- Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.
- Submission of valid copy of DML and latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be provided.
- Submission of valid copy of GMP certificate for drug substance manufacturer (Paracetamol) shall be submitted.
- Submission of valid copy of GMP certificate drug substance manufacturer (Phenylephrine Hydrochloride) shall be submitted.
- Submission of valid copy of manufacturing license or GMP certificate for the drug substance manufacturer (Dextromethorphan HBr) issued by concerned regulatory authority shall be submitted.
- Submission of blank master production document/batch manufacturing record to be used during the commercial manufacturing of the applied product.
- Submission of copy of Batch manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.
- Submission of analytical method used for drug substance (Paracetamol) used by the drug Product manufacturer shall be submitted.
- Submission of analytical method used for drug substance (Dextromethorphan HBr) used by the drug Product manufacturer shall be submitted.
- Submission of analytical method used for drug substance (Phenylephrine hydrochloride) used by both the drug substance manufacturer and drug Product manufacturer shall be submitted.
- Verification studies of the drug substance (Paracetamol) performed by the drug product manufacturer shall be submitted.
- Verification studies of the drug substance (Dextromethorphan HBr) performed by the drug product manufacturer shall be submitted.
- Verification studies of the drug substance (Phenylephrine hydrochloride) performed by the drug product manufacturer shall be submitted.
- Submission of results of analysis of relevant batch(es) of all the three Drug Substances (Paracetamol, Dextromethorphan HBr & Phenylephrine hydrochloride) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture.
- Submission of stability study data for the drug substance (Phenylephrine hydrochloride) from concerned manufacturer shall be submitted.
- Reference of previous approval of applications with stability study data of the firm shall be submitted.

Reply submitted by the firm;

Sr. No.	Observation	Reply by the firm
1.	Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.	Firm has stated that that, they have applied for drug registration of our product namely Conofen 10/200mg tablet having composition (Phenylephrine HCl…..10mg, Ibuprofen…..200mg) on Form 5F (CTD) and submitted the dailymed reference i.e. Advil Congestion Relief Tablet 200mg/10mg https://dailymed.nlm.nih.gov/ dailymed/ drugInfo.cfm?setid=b1e29c19-fe03-4d2b-9660adf4eb4b4cf which was considered and no objection raised by Drug Registration Board in its 313th meeting of held on 16th -18th Nov, 2021 regarding dailymed reference.

		They also submitted copy of that decision. Wherein the product is deferred for following submissions: • ***Pharmaceutical equivalence data of the applied product along with innovator / reference or comparator product.*** • ***Comparative Dissolution Profile (CDP) data of the applied product along with innovator / reference or comparator product.*** Moreover, the firm M/s Vision Pharmaceuticals, Islamabad had applied for drug registration of their product namely, Mensodol Tablet 500/25mg with composition: Paracetamol 500mg and Pamabrom 25mg and provided "Proof of International availability of same formulation with same strength in RRA": https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=fb9a5647-b7c9-4820-b148-91060e34cb83 which was approved in 296th meeting of Drug registration Board held on 8-10th September, 2020. The product is approved. In the light of above, it is requested to kindly registration of our aforementioned applied drug product Colynol Multi Symptom Severe Cold sachet may please be granted in the upcoming meeting of Drug Registration Board.
2.	Submission of valid copy of DML and latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be provided.	GMP certificate No.F.3-96/2022-Addl.Dir. (QA&LT-I) dated August, 2022 on the basis of inspection conducted on 28-07-2022 is submitted by the applicant.
3.	Submission of valid copy of GMP certificate for drug substance manufacturer (Paracetamol) shall be submitted.	Copy of GMP certificate No.83/2020-DRAP (K) dated 23-06-2020 issued on the basis of inspection conducted on 18-06-2020 in the name of M/s Saakh pharma is submitted.
4.	Submission of valid copy of GMP certificate drug substance manufacturer (Phenylephrine Hydrochloride) shall be submitted.	Firm has submitted copy of License No. Y.20160118 issued in the name of M/s Shenzhen Oriental Pharmaceutical Co., Ltd., No. 43, Dakeng Road, Tongle village, Longgang District, Shenzhen China by Guangdong Food & Drug Administration valid till December, 2025.
5.	Submission of valid copy of manufacturing license or GMP certificate for the drug substance manufacturer (Dextromethorphan HBr) issued by concerned regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. S-GMP/22023157 issued in the name of M/s Onerio Chemicals (Pvt.) Ltd., valid till 22-02-2024.
6.	Submission of blank master production document/batch manufacturing record to be used during the commercial manufacturing of the applied product.	Submitted.
7.	Submission of copy of Batch manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3.	Submitted.
8.	Submission of analytical method used for drug substance (Paracetamol) used by the drug Product manufacturer shall be submitted.	Submitted.
9.	Submission of analytical method used for drug substance (Dextromethorphan HBr) used by the drug Product manufacturer shall be submitted.	Submitted.
10.	Submission of analytical method used for drug substance (Phenylephrine hydrochloride)	Submitted.

	used by both the drug substance manufacturer and drug Product manufacturer shall be submitted.	
11.	Verification studies of the drug substance (Paracetamol) performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies for the drug substance including Accuracy, Specificity and precision.
12.	Verification studies of the drug substance (Dextromethorphan HBr) performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies for the drug substance including Accuracy, Specificity and precision.
13.	Verification studies of the drug substance (Phenylephrine hydrochloride) performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies for the drug substance including Accuracy, Specificity and precision.
14.	Submission of results of analysis of relevant batch(es) of all the three Drug Substances (Paracetamol, Dextromethorphan HBr & Phenylephrine hydrochloride) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance /Active Pharmaceutical Ingredient manufacture.	Firm has submitted COA's for all the three drug substances used in the trial batches both from the drug substance manufacturer and the finished product manufacturer with same batch numbers.
15.	Submission of stability study data for the drug substance (Phenylephrine hydrochloride) from concerned manufacturer shall be submitted.	Submitted.
16.	Reference of previous approval of applications with stability study data of the firm shall be submitted.	Firm has submitted that no application of powder for oral solution (Sachet) was submitted with stability studies to DRAP.
Decision of 322nd meeting of Registration Board: Deferred for deliberation regrading approval of applied formulation by reference regulatory authorities.		
Reply by the firm; Firm has once again submitted the link of dailymed for Theraflu Multi symptoms severe cold sachet as international reference for the applied formulation. https://dailymed.nlm.nih.gov/dailymed/drugInfo.cfm?setid=a4c56ca0-7785-404b-996d-137cc135f270 They further requested to kindly grant them registration for the above mentioned formulation in the upcoming meeting of Registration Board.		

Decision: Approved with innovator Specifications. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

CLB in its 282nd meeting held on 31st August 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following one (01) sections to M/s World Biz Pharmaceutical Company Plot No. 340, Multan Industrial Estate, Multan.

- Oral liquid syrup section (General).

Accordingly following two products of the firm are placed before the Board for consideration.

938.	Name, address of Applicant / Marketing Authorization Holder	World Biz Pharmaceutical Company Plot No. 340, Multan Industrial Estate, Multan.
	Name, address of Manufacturing site.	World Biz Pharmaceutical Company Plot No. 340, Multan Industrial Estate, Multan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22535: dated 10-08-2022.
	Details of fee submitted	PKR 30,000/- vide slip No. 39078566893 dated 09-06-2022.
	The proposed proprietary name / brand name	Ibubiz 100mg/5ml suspension.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains; Ibuprofen ……. ….. 100mg.
	Pharmaceutical form of applied drug	Oral suspension.
	Pharmacotherapeutic Group of (API)	M01A Anti-inflammatory And Anti-rheumatic Products, Non-Steroids.
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	As per DPC.
	Proposed unit price	As per DPC.
	The status in reference regulatory authorities	Tesco Health Ibuprofen 100 mg/5ml Oral Suspension, MHRA Approved.
	For generic drugs (me-too status)	Brufen Suspension, Abbot laboratories, Reg. No. 004595.
	GMP status of the Finished product manufacturer	New license issued dated 14-09-2021 w.e.f. 13-09-2021.
	Evidence of section approval.	Oral liquid syrup section (general) is approved vide letter No. F. 1-25/2008-Lic dated 17-09-2021.
	Name and address of API manufacturer.	Zenith Chemical Industries (Pvt.) Limited, 16 Km off Ferozpur-Road, Behind Wapda Grid Station, 1 Km of Chandrai Road, Lahore.
	Module-II (Quality Overall Summary)	Firm has nor submitted QOS as per WHO QOS-PD template.
	Module III (Drug Substance)	Firm has submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions.

		The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months. Batches:(ZIBU11-001, ZIBU11-002, & ZIBU11-003).
	Module-III (Drug Product):	Firm has submitted detail of drug product including its description, composition, pharmaceutical development, manufacturer, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, analytical method verification studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand Ibuprofen manufactured by Abbott Laboratories by performing quality tests (Identification, pH and Assay). Results of both the products are similar.
	Analytical method validation/verification of product.	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Zenith Chemical Industries (Pvt.) Limited, 16 Km off Ferozpur-Road, Behind Wapda Grid Station, 1 Km of Chandrai Road, Lahore.		
API Lot No.			
Description of Pack (Container closure system)	Orange colour viscous liquid suspension filled in amber colour bottle.		
Stability Storage Condition	Long term: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Long term: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Long term: 0, 3, 6 (Months)		
Batch No.	RD-IS-001	RD-IS-002	RD-IS-003
Batch Size	2000 bottles.	2000 bottles.	2000 bottles.
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	11-11-2021.	11-11-2021.	11-11-2021.
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 75/2021-DRAP (AD-2027105-531) dated 24-09-2021 issued on the basis of inspection conducted on 14-07-2021 is submitted by the firm.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.1	Fee slip is for syrup Ibubiz while applied formulation is Ibubiz suspension. Clarification shall be submitted.	Firm has submitted that applied formulation is Ibubiz suspension. Due to typographic error, word syrup was written.
2.	1.5.2	Section 1.5.2 has mentioned BP specifications while 1.5.6 has mentioned USP specifications. Clarification shall be submitted regarding the specifications of the finished product.	Firm has submitted that we applied BP specifications so we mentioned on BP monograph. As per CTD requirements, the table is revised and document is attached. ***However, no revised document is attached. Same document is again submitted wherein USP specification are still written.***
3.	2.3	Table for literature references has mentioned only BP pharmacopoeia for both the drug substance and drug product. However, official monograph is available in other pharmacopoeias also. Clarification shall be submitted.	Firm has submitted that we applied BP specifications so we mentioned on BP monograph. As per CTD requirements, the table is revised and document is attached. Revised document is attached.
4.	3.2.S.4.3	Verification studies of drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies for the drug substance including Linearity, Precision, Accuracy, Range, Specificity etc.
5.	3.2.P.5.1	• This section has mentioned USP specification while the limits for test are of BP. Clarification shall be submitted regarding specifications of the drug product. • Dissolution test is not mentioned in the specification. However, both the USP and BP monograph has mentioned dissolution test. Clarification shall be submitted.	Firm has revised their specifications to BP. Firm has submitted that they applied BP specifications and dissolution test parameter was not available in BP 2020 monograph.
6.	3.2.P.5.2	• Analytical procedure has mentioned dissolution for the drug product while specification has no dissolution. • Assay test in the analytical procedure has no formula for calculation of the content.	Firm has submitted that as the analysis of stability samples was performed as per BP monograph so the procedure is revised and attached. Formula for calculation of the content is added in the revised analytical procedures.
7.	3.2.P.5.8	• Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number. • Official monograph of the applied formulation has dissolution test while the drug product manufacturer has not performed any dissolution. Justification shall be submitted.	Revised stability data sheets as per decision of 293rd meeting of RB are provided. API lot No. ZIBU21-029 is used in stability data and COA of the same has already been submitted. Firm has submitted that applied product was developed as per BP 2020 specifications and BP 2020 was not having dissolution test. Stability studies for the applied formulation were started in November, 2021 while monograph of BP 2022 was available after January, 2022. They further submitted that after registration of their product, they will perform stability of first

		• Justification shall be submitted regarding the retention time of Ibuprofen in the submitted chromatograms as the monograph has mentioned that under the prescribed condition the retention time of ibuprofen is about 21 minutes.	three commercial batches as per new monograph and will perform dissolution studies. Firm has submitted that we are new DML, so due to limited resources and column unavailability, we used Column of 15cm x 4.6mm and 5µm, C18 that's why peak obtained earlier than prescribed retention time. ***Chromatograms submitted by the firm are revealing all the conditions mentioned in the pharmacopoeia, while the retention time in the chromatograms is 2.1 to 2.2 minutes while BP monograph has mentioned that under the prescribed condition the retention time of ibuprofen is about 21 minutes.***
8.		• Documents for the procurement of API used in the development of trial batches shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted Sales tax invoice No. 00014/1021 dated 29-10-2021 mentioning 12 kg quantity of Ibuprofen. ***No batch number and manufacturing date is mentioned.*** ***Not submitted.***

Decision of 322nd meeting of Registration Board: Deferred for justification regarding the retention time of Ibuprofen in the submitted chromatograms as the monograph has mentioned that under the prescribed condition the retention time of ibuprofen is about 21 minutes whereas submitted chromatograms reflect retention time of about 2 minutes.

- Firm will also submit revised 1.5.2 section and fee of Rs. 7,500/- for correction/pre-approval change in the table for literature references, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Reply by the firm;

- Firm has submitted revised section 1.5.2 with applicable fee of 7500/- vide slip No. 09900702 dated 19-12-2022.
- Firm has submitted that because of new DML, due to limited resources, they initially used column of specs with 15cmx4.6mm, 5µm that's why peak obtained earlier than the prescribed time. They further clarified that they purchased the column as specified in product monograph and tested the product as per mentioned parameters and requirements of monograph. They also submitted testing record of 09th month interval of 3 batches.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**
- **Firm shall adopt USP monograph for drug product specifications and analytical method for the batch release of commercial batches.**

In pursuance of decision of 133rd meeting of DRAP Authority held on 13th April 2022, wherein it was decided to grant registration on priority basis to the *pharmaceutical* i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year.

In compliance to the aforementioned decision of the Authority, Assistant Director (PR-I/EFD) vide letter No. F.1-6/2019-PR-I (EFD) dated 06th October, 2022 has informed that **M/s Pharmedic Laboratories (Pvt.) Ltd, Lahore** has achieved the benchmark of more than **100,000 USD (1576776.335 USD)** during the fiscal Year 2019-2020 and submitted their applications for priority consideration/ evaluation.

Following products are presented before the Board in light of the decision of the 133rd meeting of DRAP Authority held on 13th April 2022 for consideration.

939.	Name, address of Applicant / Marketing Authorization Holder	Pharmedic Laboratories (Pvt.) Ltd., 16Km Multan Road, Lahore.
	Name, address of Manufacturing site.	Pharmedic Laboratories (Pvt.) Ltd., 16Km Multan Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13722: dated 07-06-2022.
	Details of fee submitted	PKR 30,000/- vide slip No. 4235445044 dated 11-05-2022.
	The proposed proprietary name / brand name	Rovastin 5mg Tablet.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains; Rosuvastatin as Calcium ……..5mg
	Pharmaceutical form of applied drug	Light yellow color, round, biconvex film coated tablets.
	Pharmacotherapeutic Group of (API)	HMG CoA reductase inhibitors.
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	10's.
	Proposed unit price	As per DPC.
	The status in reference regulatory authorities	CRESTOR (rosuvastatin as calcium) 5mg, 10mg, 20 mg & 40 mg coated tablets, USFDA approved.
	For generic drugs (me-too status)	Rovista tablet 5mg, Getz Pharma, Reg. No. 044043.
	GMP status of the Finished product manufacturer	GMP certificate No. 93/2020-DRAP (AD-2003099-790) dated 09-06-2020 issued on the basis of inspection conducted on 04-02-2020 is submitted.
	Evidence of section approval.	Tablet Non antibiotic, Antibiotic, Psychotropic, Cephalosporin & Anit-Cancer are mentioned in the above submitted GMP certificate.
	Name and address of API manufacturer.	Holder; M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China. GMP certificate No. JS20180848 issued by the Jiangsu Food and Drug Administration valid till 09-07-2023 is provided. Manufacturer; M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China. Copy of License for drug production in the name of Nantong Chanyoo Pharmatech., Co., Ltd., with license No. Su20160512 issued by Jiangsu Food and Drug Administration dated 03-12-2020 is submitted.
	Module-II (Quality Overall Summary)	Firm has nor submitted QOS as per WHO QOS-PD template.

	Module III (Drug Substance)	Firm has submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months. Batches:(RS-190308, RS-190309 & RS-109311).
	Module-III (Drug Product):	Firm has submitted detail of drug product including its description, composition, pharmaceutical development, manufacturer, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, analytical method verification studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the competitor product i.e. Rovista 5mg tablets manufactured by M/s Getz Pharma having batch No. 293F17, Exp. Date 10-2023 by performing quality tests (Disintegration, Dissolution, and Assay). CDP has been performed against the same brand Rovista 5mg tablets manufactured by M/s Getz Pharma having batch No. 293F17, Exp. Date 10-2023 in three different mediums. F2 values for all the three mediums are in acceptable range.
	Analytical method validation/verification of product.	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
STABILITY STUDY DATA		
Manufacturer of API	**Holder;** M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China. GMP certificate No. JS20180848 issued by the Jiangsu Food and Drug Administration valid till 09-07-2023 is provided. **Manufacturer;** M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China. Copy of License for drug production in the name of Nantong Chanyoo Pharmatech., Co., Ltd., with license No. Su20160512 issued by Jiangsu Food and Drug Administration dated 03-12-2020 is submitted.	

API Lot No.	RS-701-200603.		
Description of Pack (Container closure system)	Alu-Alu blister sealed with Aluminum foil of 1×10's.		
Stability Storage Condition	Long term: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Long term: 6 months Accelerated: 12 months		
Frequency	Accelerated: 0, 3, 6 (Months) Long term: 0, 3, 6, 9, 12 (Months)		
Batch No.	ROS5-TR005	ROS5-TR006	ROS5-TR007
Batch Size	1000 Tablets.	1000 Tablets.	1000 Tablets.
Manufacturing Date	02-2021.	02-2021.	02-2021.
Date of Initiation	10-03-2021.	15-12-2021.	15-12-2021.
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Holder;** M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China. GMP certificate No. JS20180848 issued by the Jiangsu Food and Drug Administration valid till 09-07-2023 is provided. **Manufacturer;** M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China. Copy of License for drug production in the name of Nantong Chanyoo Pharmatech., Co., Ltd., with license No. Su20160512 issued by Jiangsu Food and Drug Administration dated 03-12-2020 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. CY120236 dated 10-06-2020 mentioning Rosuvastatin calcium with quantity of 625gm, Batch No. RS-701-200603 attested by Assistant Director I&E DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observations	Reply by the firm
1.	1.3.4	Valid copy of DML of the finished product manufacturer shall be submitted. As submitted one is w.e.f. 07-04-2010.	
2.	1.6.5	Valid copy of GMP certificate for the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	
3.	2.3	Table of literature references has not mention BP for drug substance. Table of literature references has also shown JP for the finished product. Clarification shall be submitted.	
4.	3.2.S.4.1	Drug substance manufacturer has used Ph. Eur. specification for the drug substance while drug product manufacturer has used USP specifications. Justification shall be submitted.	
5.	3.2.S.4.2	Analytical procedures provided by the drug substance manufacturer are different from that of the drug product manufacturer. Justification shall be submitted.	
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	
7.	3.2.S.4.4	• Clear and readable copies of COAs for the drug substance from drug substance manufacturer shall be submitted. • Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacturer shall also be submitted	
8.	3.2.S.5	Clear and readable copies of COAs for the reference/working standard shall be submitted.	
9.	3.2.P.2	Qualitative composition of the applied formulation is different from the innovator product. Justification shall be submitted.	
10.	3.2.P.2.2	Justification shall be submitted for not performing CDP and Pharmaceutical equivalence against the innovator product.	
11.	3.2.P.5.1	• Specifications has mentioned dissolution specification of NLT 75% Q while CDP has mentioned NLT 80% Q. Justification shall be submitted. • Value for weight variation in the specifications and stability data sheets are different from each other. Justify.	
12.	3.2.P.8.3	• 06th month time point accelerated stability study and real time stability study for Batch No. ROS5-006 and ROS5-007 shall be submitted. • Date of manufacture on BMR and stability data sheets are not similar. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	
13.		Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision of 322nd meeting of Registration Board;
Deferred for submission of above cited observations within six months.

Reply by the firm;

Sr. No.	Section	Observations	Reply by the firm

1.	1.3.4	Valid copy of DML of the finished product manufacturer shall be submitted. As submitted one is w.e.f. 07-04-2010.	Firm has submitted copies of receiving of dated 23-02-2015 & 29-01-2019 only. However, submitted copy of DML is w.e.f. 07-04-2010
2.	1.6.5	Valid copy of GMP certificate for the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of manufacturing license No. SU20160512 issued by Jiangsu Drug Administration in the name of M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China valid till 02-12-2025. Firm has also submitted a declaration wherein M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China has declare that M/s Nantong Chanyoo Pharmatech Co., Ltd., is their wholly owned subsidiary.
3.	2.3	Table of literature references has not mention BP for drug substance. Table of literature references has also shown JP for the finished product. Clarification shall be submitted.	***Neither revised document nor any justification is submitted against this point.***
4.	3.2.S.4.1	Drug substance manufacturer has used Ph. Eur. specification for the drug substance while drug product manufacturer has used USP specifications. Justification shall be submitted.	Firm has submitted that BP, USP and Ph. Eur. have same methods of testing for Rosuvastatin Calcium.
5.	3.2.S.4.2	Analytical procedures provided by the drug substance manufacturer are different from that of the drug product manufacturer. Justification shall be submitted.	Firm has submitted that drug substance manufacturer claims it's in house specifications as evident from COA & DMF but as rosuvastatin calcium monograph exist in pharmacopoeias so they have to follow the pharmacopoeial monograph.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies of the drug substance. ***However, date mentioned on the chromatograms is 23-11-2022.***
7.	3.2.S.4.4	• Clear and readable copies of COAs for the drug substance from drug substance manufacturer shall be submitted. • Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacturer shall also be submitted	Firm has submitted new COAs for the drug substance manufacturer. Firm has also submitted COA for the drug substance with same batch number used in the development of trial batches.
8.	3.2.S.5	Clear and readable copies of COAs for the reference/working standard shall be submitted.	Submitted.
9.	3.2.P.2	Qualitative composition of the applied formulation is different from the innovator product. Justification shall be submitted.	Firm has submitted that they have developed their product against the reference product of Zentiva Pharma UK limited, and their formulation is qualitatively similar to the reference product. They also provided qualitative composition of the reference product.
10.	3.2.P.2.2	Justification shall be submitted for not performing CDP and Pharmaceutical equivalence against the innovator product.	Firm has once again submitted CDP against the Rovista 5mg tablets manufactured by Getz pharma, Batch number 294F17 in three different dissolution medium and F2 values for all the three mediums are in acceptable range.
11.	3.2.P.5.1	• Specifications has mentioned dissolution specification of NLT 75% Q while CDP has mentioned NLT 80% Q. Justification shall be submitted. • • Value for weight variation in the specifications and stability data sheets are different from each other. Justify.	Firm has submitted revised document wherein they have provided dissolution specification of NLT 75% Q. Firm has submitted revised document wherein they have provided weight variation of 170mg ± 7.5%.

			Fee required for pre-registration variation is not submitted.
12.	3.2.P.8.3	• 06th month time point accelerated stability study and real time stability study for Batch No. ROS5-006 and ROS5-007 shall be submitted. • Date of manufacture on BMR and stability data sheets are not similar. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Submitted. No justification is submitted. Firm has once again submitted stability data sheets wherein manufacturing date for ROS5-TR005 is 02-2021 while manufacturing date for ROS5-TR006 is 10-2021 and date of initiation of stability data is 10-03-2021 & 15-12-2021 respectively. Not submitted.
13.		Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	No reply submitted against this point.

Decision: Approved. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	1.3.4	Valid copy of DML of the finished product manufacturer shall be submitted. As submitted one is w.e.f. 07-04-2010.	Firm has submitted copies of receiving of dated 23-02-2015 & 29-01-2019 only. However, submitted copy of DML is w.e.f. 07-04-2010.
2.	1.6.5	Valid copy of GMP certificate for the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of manufacturing license No. SU20160512 issued by Jiangsu Drug Administration in the name of M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China valid till 02-12-2025. Firm has also submitted a declaration wherein M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China has declare that M/s Nantong Chanyoo Pharmatech Co., Ltd., is their wholly owned subsidiary.
3.	2.3	Table of literature references has not mention BP for drug substance. Table of literature references has also shown JP for the finished product. Clarification shall be submitted.	***Neither revised document nor any justification is submitted against this point.***
4.	3.2.S.4.1	Drug substance manufacturer has used Ph. Eur. specification for the drug substance while drug product manufacturer has used USP specifications. Justification shall be submitted.	Firm has submitted that BP, USP and Ph. Eur. have same methods of testing for Rosuvastatin Calcium.
5.	3.2.S.4.2	Analytical procedures provided by the drug substance manufacturer are different from that of the drug product manufacturer. Justification shall be submitted.	Firm has submitted that drug substance manufacturer claims it's in house specifications as evident from COA & DMF but as rosuvastatin calcium monograph exist in

			pharmacopoeias so they have to follow the pharmacopoeial monograph.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies of the drug substance. ***However, date mentioned on the chromatograms is 23-11-2022.***
7.	3.2.S.4.4	• Clear and readable copies of COAs for the drug substance from drug substance manufacturer shall be submitted. • Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacturer shall also be submitted	Firm has submitted new COAs for the drug substance manufacturer. Firm has also submitted COA for the drug substance with same batch number used in the development of trial batches.
8.	3.2.S.5	Clear and readable copies of COAs for the reference/working standard shall be submitted.	Submitted.
9.	3.2.P.2	Qualitative composition of the applied formulation is different from the innovator product. Justification shall be submitted.	Firm has submitted that they have developed their product against the reference product of Zentiva Pharma UK limited, and their formulation is qualitatively similar to the reference product. They also provided qualitative composition of the reference product.
10.	3.2.P.2.2	• Justification shall be submitted for not performing CDP and Pharmaceutical equivalence against the innovator product. • F2 calculations for acetate buffer and phosphate buffer shall be submitted.	Firm has once again submitted CDP against the Rovista 10mg tablets manufactured by Getz pharma, Batch number 359F18 in three different dissolution medium and F2 values for all the three mediums are in acceptable range.
11.	3.2.P.5.1	• Specifications has mentioned dissolution specification of NLT 75% Q while CDP has mentioned NLT 80% Q. Justification shall be submitted. • Value for weight variation in the specifications and stability data sheets are different from each other. Justify.	Firm has submitted revised document wherein they have provided dissolution specification of NLT 75% Q. Firm has submitted revised document wherein they have provided weight variation of 154.5mg ± 7.5%. ***Fee required for pre-registration variation is not submitted.***
12.	3.2.P.8.3	• Weight variation test in the stability data is out of specification. Clarification shall be submitted. • Manufacturing date of batch No. ROS10-006 is December, 2021 and 06th month time point accelerated stability study and real time stability study shall be submitted. • 06th month time point accelerated stability study and real time stability study for Batch No. ROS10-007 shall be submitted. • Date of manufacture on BMR and stability data sheets are not similar. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted revised specifications for the drug product wherein they have changed their weight variation specification to 154.5mg ± 7.5%. Firm has submitted updated stability data sheets for B# ROS10-TR006 wherein they have mentioned manufacturing date of 10-2021 and also submitted 06th month time accelerated stability Firm has submitted 06th month time point accelerated and real time stability studies for B# ROS10-007. Firm has submitted new BMR with date of 18-10-2021. Not submitted.
13.		Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	No reply submitted against this point.

Decision: Approved. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13724: dated 07-06-2022.
	Details of fee submitted	PKR 30,000/- vide slip No. 41094042890 dated 11-05-2022.
	The proposed proprietary name / brand name	Rovastin 20mg Tablet.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains; Rosuvastatin as Calcium ……..20mg
	Pharmaceutical form of applied drug	White color, round shaped, biconvex core tablets.
	Pharmacotherapeutic Group of (API)	HMG CoA reductase inhibitors.
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	10’s.
	Proposed unit price	As per DPC.
	The status in reference regulatory authorities	CRESTOR (rosuvastatin as calcium) 5mg, 10mg, 20 mg & 40 mg coated tablets, USFDA approved.
	For generic drugs (me-too status)	Rovista tablet 20mg, Getz Pharma, Reg. No. 044045.
	GMP status of the Finished product manufacturer	GMP certificate No. 93/2020-DRAP (AD-2003099-790) dated 09-06-2020 issued on the basis of inspection conducted on 04-02-2020 is submitted.
	Evidence of section approval.	Tablet Non antibiotic, Antibiotic, Psychotropic, Cephalosporin & Anit-Cancer are mentioned in the above submitted GMP certificate.
	Name and address of API manufacturer.	Holder; M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China. GMP certificate No. JS20180848 issued by the Jiangsu Food and Drug Administration valid till 09-07-2023 is provided. Manufacturer; M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China.

		Copy of License for drug production in the name of Nantong Chanyoo Pharmatech., Co., Ltd., with license No. Su20160512 issued by Jiangsu Food and Drug Administration dated 03-12-2020 is submitted.
	Module-II (Quality Overall Summary)	Firm has nor submitted QOS as per WHO QOS-PD template.
	Module III (Drug Substance)	Firm has submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months. Batches:(RS-190308, RS-190309 & RS-109311).
	Module-III (Drug Product):	Firm has submitted detail of drug product including its description, composition, pharmaceutical development, manufacturer, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, analytical method verification studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the competitor product i.e. Rovista 20mg tablets manufactured by M/s Getz Pharma having batch No. 215F19, Exp. Date 01-2023 by performing quality tests (Disintegration, Dissolution, and Assay). CDP has been performed against the same brand Rovista 5mg tablets manufactured by M/s Getz Pharma having batch No. 215F19, Exp. Date 01-2023 in three different mediums. In all the three mediums more than 85% release is observer in 15minut time point and hence F2 values are not calculated.
	Analytical method validation/verification of product.	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
STABILITY STUDY DATA		
Manufacturer of API	**Holder;** M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China.	

	GMP certificate No. JS20180848 issued by the Jiangsu Food and Drug Administration valid till 09-07-2023 is provided. **Manufacturer;** M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China.		
API Lot No.	RS-701-200603.		
Description of Pack (Container closure system)	Alu-Alu blister sealed with Aluminum foil of 1×10's.		
Stability Storage Condition	Long term: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Long term: 03 months Accelerated: 03 months		
Frequency	Accelerated: 0, 3 (Months) Long term: 0, 3 (Months)		
Batch No.	ROS20-TR002	ROS20-TR003	ROS20-TR004
Batch Size	1000 Tablets.	1000 Tablets.	1000 Tablets.
Manufacturing Date	02-2021.	02-2021.	02-2021.
Date of Initiation	15-12-2021.	15-12-2021.	15-12-2021.
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Holder;** M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China. GMP certificate No. JS20180848 issued by the Jiangsu Food and Drug Administration valid till 09-07-2023 is provided. **Manufacturer;** M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China. Copy of License for drug production in the name of Nantong Chanyoo Pharmatech., Co., Ltd., with license No. Su20160512 issued by Jiangsu Food and Drug Administration dated 03-12-2020 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. CY120236 dated 10-06-2020 mentioning Rosuvastatin calcium with quantity of 625gm, Batch No. RS-701-200603 attested by Assistant Director I&E DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Decision of 322nd meeting of Registration Board;
Deferred for submission of above cited observations within six months.

Reply by the firm;

Sr. No.	Section	Observations	Reply by the firm
1.	1.3.4	Valid copy of DML of the finished product manufacturer shall be submitted. As submitted one is w.e.f. 07-04-2010.	Firm has submitted copies of receiving of dated 23-02-2015 & 29-01-2019 only. However, submitted copy of DML is w.e.f. 07-04-2010.
2.	1.6.5	Valid copy of GMP certificate for the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of manufacturing license No. SU20160512 issued by Jiangsu Drug Administration in the name of M/s Nantong Chanyoo Pharmatech Co., Ltd., No. 2 Tonghai Si Road,v Yangkou chemical industrial Park, Coastal Economic Development Zone, Nantong, Jiangsu Province 226407, China valid till 02-12-2025. Firm has also submitted a declaration wherein M/s Changzhou Pharmaceutical Factory, No. 518 East Laodong Road, Jiangsu Province China has declare that M/s Nantong Chanyoo Pharmatech Co., Ltd., is their wholly owned subsidiary.
3.	2.3	Table of literature references has not mention BP for drug substance. Table of literature references has also shown JP for the finished product. Clarification shall be submitted.	***Neither revised document nor any justification is submitted against this point.***
4.	3.2.S.4.1	Drug substance manufacturer has used Ph. Eur. specification for the drug substance while drug product manufacturer has used USP specifications. Justification shall be submitted.	Firm has submitted that BP, USP and Ph. Eur. have same methods of testing for Rosuvastatin Calcium.
5.	3.2.S.4.2	Analytical procedures provided by the drug substance manufacturer are different from that of the drug product manufacturer. Justification shall be submitted.	Firm has submitted that drug substance manufacturer claims it's in house specifications as evident from COA & DMF but as rosuvastatin calcium monograph exist in pharmacopoeias so they have to follow the pharmacopoeial monograph.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies of the drug substance. ***However, date mentioned on the chromatograms is 23-11-2022.***
7.	3.2.S.4.4	• Clear and readable copies of COAs for the drug substance from drug substance manufacturer shall be submitted. • Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacturer shall also be submitted	Firm has submitted new COAs for the drug substance manufacturer. Firm has also submitted COA for the drug substance with same batch number used in the development of trial batches.
8.	3.2.S.5	Clear and readable copies of COAs for the reference/working standard shall be submitted.	Submitted.
9.	3.2.P.2	Qualitative composition of the applied formulation is different from the innovator product. Justification shall be submitted.	Firm has submitted that they have developed their product against the reference product of Zentiva Pharma UK limited, and their formulation is qualitatively similar to the reference product. They also provided

			qualitative composition of the reference product.
10.	3.2.P.2.2	• Justification shall be submitted for not performing CDP and Pharmaceutical equivalence against the innovator product. • F2 calculations for acetate buffer and phosphate buffer shall be submitted.	Firm has once again submitted CDP against the Rovista 10mg tablets manufactured by Getz pharma, Batch number 215F19 in three different dissolution medium and F2 values for all the three mediums are in acceptable range.
11.	3.2.P.5.1	• Specifications has mentioned dissolution specification of NLT 75% Q while CDP has mentioned NLT 80% Q. Justification shall be submitted. • Value for weight variation in the specifications and stability data sheets are different from each other. Justify.	Firm has submitted revised document wherein they have provided dissolution specification of NLT 75% Q. Firm has submitted revised document wherein they have provided weight variation of 257.5mg ± 7.5%. ***Fee required for pre-registration variation is not submitted.***
12.	3.2.P.8.3	• 06th month time point accelerated stability study and real time stability study for all the batches shall be submitted. • Date of manufacture on BMR and stability data sheets are not similar. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted updated stability data sheets including 06th month time point stability study data for all the three trial batches with manufacturing date of 12-2021 and date of initiation of stability data as of 15-12-2021. Firm has submitted new BMR with date of 02-12-2021. Not submitted.
13.		Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	No reply submitted against this point.

Decision: Approved. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

g. Registration applications of Imported Human Deferred drugs on form 5F.

942.	Name, address of Applicant / Importer	M/s Al Habib Pharmaceuticals, Plot No. 81-B Block B, S.M.C.H.S, Karachi.
	Details of Drug Sale License of importer	License No: 1245. Address: 81-B Block B, S.M.C.H.S, Karachi. Address of Godown: 1. Plot No. 10 sector 25 KIA, Karachi. 2. HT – 8, Landhi Industrial Area, Karachi. Validity: 18-05-2022. Status: License to sell, stock & exhibit for sale, distribute and sell drugs by way of wholesale by of manufacturer, importer or indenter.
	Name and address of marketing authorization holder (abroad)	Hebei Dawn Pharmaceuticals Co., Ltd., Block 3 No. 51, Xingye Road, Economic Development Zone, Cangzhou China.
	Name, address of manufacturer(s)	Hebei Dawn Pharmaceuticals Co., Ltd., Block 3 No. 51, Xingye Road, Economic Development Zone, Cangzhou China.
	Name of exporting country	China.
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted original legalized CoPP certificate No. 202103082 dated 12-08-2021 issued by Hebei

		Province Drug Administration, No. 391 Hongqi Street, Shi Jiazhuang P.R. of China for Paclitaxel for injection (albumen bound). CoPP has mentioned Hebei Dawn Pharmaceuticals Co., Ltd., Block 3 No. 51, Xingye Road, Economic Development Zone, Cangzhou China as the manufacturer. The name of importing country on CoPP is mentioned as Pakistan. Furthermore, the CoPP was valid for one till 11-08-2023. *However, the certificate has mentioned that the above product is not registered in China and authorized to be placed in china. The exportation of the product is not restricted.* *The product has been reformulated with a view to improving its stability under specific conditions outside of china.* **GMP:** Firm has submitted copy of GMP certificate No. FT070/MH/001/2019 in the name of M/s Hebei Dawn Pharmaceuticals Co., Ltd., Block 3 No. 51, Xingye Road, Economic Development Zone, Cangzhou China issued by the National Authority of Medicines and Health Products, Portugal. Latest inspection was conducted on 20-07-2018 and the certificate reflects that the principles and guidelines of Good Manufacturing Practice laid down in the Directive 2003/94/EC are complied. The certificate is valid for three years. Furthermore, the certificate has mentioned that this certificate only covers the manufacturing activities in the building No. 1 (Injection workshop)
	Details of letter of authorization / sole agency agreement	**Letter of Authorization:** Firm has submitted original legalized and notarized letter of Authorization dated 11-04-2022 from Hebei Dawn Pharmaceuticals Co., Ltd., Block 3 No. 51, Xingye Road, Economic Development Zone, Cangzhou City, Hebei province China for Paclitaxel (Albumen bound) Injection 100mg wherein M/s Al Habib Pharmaceuticals, Plot No. 81-B Block B, S.M.C.H.S, Karachi is authorized as sole agent and distributor for the above said product.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 11265: 11-05-2022.

	Details of fee submitted	PKR 150,000/-: 13-04-2022.
	The proposed proprietary name / brand name	Albino 100 mg Lyophilized powder for injection.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains; Paclitaxel as albumen bound nanoparticles ……. 100mg
	Pharmaceutical form of applied drug	Lyophilized powder for injection.
	Pharmacotherapeutic Group of (API)	L01CD01 Antineoplastic Agents.
	Reference to Finished product specifications	In house specifications.
	Proposed Pack size	As per Policy.
	Proposed unit price	As per Policy.
	The status in reference regulatory authorities	Abraxane 100mg vial (paclitaxel protein-bound particles for injectable suspension) (albumin-bound)), USFDA Approved.
	For generic drugs (me-too status)	Nab-Xelpac Injection 100mg (Lyophilized powder), Himmel Pharmaceuticals, Reg. No. 106640.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Fujian South Pharmaceutical Co. Ltd. No.98, Dongxin Road, Xuefeng Town, Mingxi Country, Fuijian Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated for 06 months as well as real time conditions for 36 months. The real time stability data is conducted at 25 ^{o}C ± 2^{o}C, RH 60% ± 5% and accelerated stability data is conducted at 40^{o}C ± 2^{o}C, RH 75% ± 5%. (Batch No. 902-1612411, 902-1701401, 902-1701402)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of

		specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established against the reference product Abraxane 100mg (Paclitaxel Albumin Bound) by Abraxis Biosciences for the quality test i.e. Identification, pH, Water content, Particulate matter, Particle size & particle size distribution, Related substances, Human albumen content, Paclitaxel binding rate, sterility, Bacterial endotoxin and assay.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Borosilicate glass vial 50ml. Brominated butyl rubber stopper Aluminum plastic combination caps for injection vial.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months both upright and inverted orientation (Batch No. 1210101, 1210102 & 1210103). The real time stability study data is conducted at 30°C ±2°C / 75% ± 5% RH for 24 months (Batch No. 1210101, 1210102 & 1210103).

Evaluation by PEC:

Sr. No.	Section	Observation	Response by the firm
1	1.3.4	Valid and notarized copy of Drug Sale License of the applicant shall be submitted.	Attested copy of Drug Sale License No. 0230 dated 18-05-2022 in the name of Al Habib Pharmaceuticals 81-B Block B, S.M.C.H.S, Karachi is submitted by the firm. Validity is 18-05-2024. *However, the address of the Godown mentioned on the DSL is changed from the previously submitted.* *Plot no. 393/7 & 393/8 Sector 7A KIA, Karachi.*
2		Justification shall be submitted regarding the statement on the CoPP certificate that the product is not registered in China and not authorized to be placed in china.	Firm has submitted a document from M/s Hebei Dawn Pharmaceutical wherein they have declared the following; "We, Hebei Dawn Pharmaceutical Co., Ltd., hereby state that we are exporting Paclitaxel for injection (albumin bound) to following countries as our Plant is exclusively for export to Foreign Countries and EU GMP Certified. i. Austria. ii. Norway. iii. Iran. iv. South Korea. v. Vietnam *However, the firm has not produced any evidence of registration of their applied formulation in any of the Reference Regulatory Authorities as defined by the Registration Board.*
3		Valid, Notarized and legalized GMP certificate of the finished product manufacturer issued by the relevant regulatory authority shall be submitted.	Firm has submitted a copy of GMP certificate No. HE20170084 in the name of M/s Hebei Dawn Pharmaceutical Co., Ltd., Block 3 No. 51, Xingye Road, Economic Development Zone, Cangzhou China issued by the Hebei Drug Administration China dated 25-12-2017 valid till 24-12-2022.

4	3.2.P.1.1	• Innovator product has mentioned approximately 900 mg of human albumin while the applied formulation has mentioned 800 mg of Albumen. Justification shall be submitted. • Qualitative composition of the drug product is changed from the innovator product. Innovator product has used sodium caprylate and sodium acetyl tryptophanate while the applied formulation has chloroform, anhydrous ethanol and WFI. Compatibility studies shall be submitted.	Firm has submitted composition of formulation in different RRA as follows; • FDA 900 mg of Human Albumin. • NMPA 900 mg of Human Albumin. • PMDA 800mg of human albumin. • EMEA 800mg of human albumin. Firm has submitted that applied medicine is developed as per the innovator product following the PMDA and EMEA Abraxane and both are included in RRA. *However, the review report approved by Japan (Clinical Summary 2.7) has the following description;* *The dosage ratio of paclitaxel and human albumin in the original commercial batch prescription is 1:8 but due to the influence of the sterilization filtration process, the ratio of paclitaxel and human albumin become 1:9.* *While EPAR has not mentioned any ratio of paclitaxel and Albumin in the public assessment report.* Firm has submitted that other excipients used in the manufacturing of Paclitaxel albumin bound i.e. chloroform, anhydrous ethanol, WFI will be removed finally and the finished product does not contain these excipients that why the end product is same as reference product. Firm has also submitted new composition for the applied formulation wherein they have included sodium caprylate and sodium acetyl tryptophanate in the composition. *However, these excipients are not mentioned in the original submitted CoPP nor in original dossier submitted.*
5	3.2.P.1.3	Since the final product is lyophilized preparation, therefor, submit the details of reconstitution diluent along with the compatibility studies for the dry powder for injection.	Firm has submitted the following; "Aseptically, reconstitute each vial by injecting 20 mL of 0.9% Sodium Chloride Injection, USP. Slowly inject the 20 mL of 0.9% Sodium Chloride Injection, USP, over a minimum of 1 minute, using the sterile syringe to direct the solution flow onto the inside wall of the Vial. The reconstituted suspension should be milky and homogenous without visible particulates. If particulates or settling are visible, the vial should be gently inverted again to ensure complete resuspension prior to use. Discard the reconstituted suspension if precipitates are observed. Discard any unused portion".
	3.2.P.2.2.1	Details of the innovator product including batch number, manufacturing date & Expiry date shall be submitted.	Firm has submitted the following; Batch No. 0F028C Exp. Date. 06-2023.
	3.2.P.8	Submit in use stability studies for drug product along with proposed in -use storage statement and in-use shelf life.	***Not submitted.*** Firm has submitted again the real time and accelerated stability studies that were submitted in the original dossier.

Decision of 320th meeting:

The Board deferred the case for clarification of the following points;

- The applied product is not present in the market of exporting country for free sale.
- The qualitative composition of the applied product is different from the innovator's product.
- In-use stability of the applied product is not submitted.

Reply by the firm;

Firm has submitted their reply vide reference no. nil dated 08-09-2022 wherein they have submitted new composition for the applied formulation which is similar to the innovator's product. They have also provided in use stability studies for the applied formulation.
Furthermore, they also provided copy of CoPP certificate for the applied formulation wherein it is confirmed that ***"this is to certify that the above product(s) is registered in china and authorized to be placed in china. The exportation of the product is not restricted."***
However, upon evaluation of the CoPP document following is revealed.

- Submitted CoPP is neither notarized nor countersigned by the embassy of Pakistan.
- CoPP certificate is not as per format of WHO CoPP.
- New CoPP certificate submitted by the firm has same certificate number and same date of issuance, as that of the previously submitted CoPP in which following was mentioned

  "That the above product is not registered in China and authorized to be placed in china. The exportation of the product is not restricted. The product has been reformulated with a view to improving its stability under specific conditions outside of china".
- However, status of the applied formulation is only changed from the previously submitted certificate.
- Online data of the newly submitted CoPP is not available on the official website of China.

Decision of 322nd meeting of Registration Board: Registration Board decided to send an email to NMPA China for confirmation of free sale status of applied formulation in China.

Submission by the Firm:
Firm vide their reference No. Nil dated 20-12-2022 submitted that their inexperienced junior regulatory personnel submitted the shortcomings on the same date 30-08-2022 without their knowledge and taking advice from senior regulatory management. Therefore, we humbly request to withdraw/discard or remove those photocopy documents as the person didn't understand the query and submit the photocopy document due to lack of understanding immediately. They further requested to kindly discard or withdraw those photocopy documents for the above mentioned drug and give us some time to submit the proper original documents and justifications for the queries raised.

Decision: Registration Board rejected the application since firm could not establish the authenticity of the submitted CoPP declaring the free sale status in the country of origin.

h. Registration applications of locally manufactured Human Deferred drugs on form 5D.

In pursuance of decision of 133rd meeting of DRAP Authority held on 13th April 2022, wherein it was decided to grant registration on priority basis to the pharmaceutical i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year.
In compliance to the aforementioned decision of the Board, Assistant Director (PR-I/EFD) vide letter No. F.1-6/2019-PR-I (EFD) dated 06th October, 2022 has informed that M/s Surge Laboratories (Pvt.) Ltd, Sheikhupura has achieved the benchmark of more than 100,000 USD (790529.78 USD) during the fiscal Year 2019-2020 and submitted their applications for priority consideration/ evaluation.
Following products are presented before the Board in light of the decision of the 133rd meeting of DRAP Authority held on 13th April 2022 for consideration.

943.	Name and address of manufacturer / Applicant	M/s Surge Laboratories (Pvt.) Ltd, 10-Km, Faisalabad Road, Sheikhupura.
	Brand Name +Dosage Form + Strength	Neofen Injection 400mg/4ml.
	Diary No. Date of R& I & fee	Form-5D, 17-06-2010, diary #_____ **Photocopy**& 15-08-2013 diary No.____ **Photocopy** Rs.35000 Only Photocopies are attached.
	Composition	Each 4ml contains: - Ibuprofen…….400mg
	Pharmacological Group	Analgesic.
	Type of Form	Form 5D.
	Finished Product Specification	Manufacturers specification
	Pack size & Demanded Price	Rs.435 per ampoule
	Approval status of product in Reference Regulatory Authorities.	Caldolor 400mg/4ml, USFDA approved.
	Me-too status	N/A
	GMP status	
	Decision of 254th meeting of Registration Board.	As per the decision of RB in its 251st meeting following is required: -

		• Certificate of Analysis of API. • Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin. • Manufacturer will follow Drug Specification Rules, 1986. • Protocols followed for conduction of stability study and details of tests. • Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc. • Documents confirming import of API etc. • All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents. • Shelf life of two years shall be granted based upon the results 06 month accelerated and real time stability study data. • Commitment to continue real time stability study till assigned shelf life of the product.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT FOR EXEMPTION

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

S. No.	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Not submitted.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted copy of COA from SI group with Lot No. 4050-3070 for Ibuprofen. However, COA from the finished product manufacturer is not provided.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Not submitted.
4.	Stability study data of API from API manufacturer	Not submitted.

5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. MI-2015-CE-03496-1 dated 31-03-2020 issued to M/s SI Group Inc. 725 Cannon Bridge Road Orangeburg SC United State of America by TGA Australia. The certificate is valid till 16-04-2022.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided.
7.	Protocols followed for conduction of stability study	Submitted.
8.	Method used for analysis of FPP	Not Submitted.
9.	Drug-excipients compatibility studies (where applicable)	Not submitted.
10.	Complete batch manufacturing record of three stability batches.	Not submitted.
11.	Record of comparative dissolution data (where applicable)	N/A
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of the Evaluator:

Sr. No.	Observations	Submission by the firm.
1.	Valid copy of the DML and latest GMP certificate/inspection report conducted within last three years of the finished product manufacturer shall be submitted.	**M/s Surge Laboratories;** Copy of DML No. 000484 w.e.f. 19-12-2020 is submitted. Copy of GMP certificate No. 41/202-DRAP(Ad-9978029213) dated 05-04-2022 issued on the basis of inspection conducted on 05-10-2021 is submitted.
2.	Valid copy of GMP certificate of the drug substance manufacturer issued by concerned/relevant regulatory authority shall be submitted.	Firm has submitted a document with heading of "written confirmation for active substances exported to EU" issued by Hubei Medical Products Administration wherein the issuing authority confirms that the manufacturing plant i.e. Hubei Biocause Heilen Pharmaceutical Co. Ltd., complies with the requirements of Chinese Good Manufacturing Practices (GMP of EU, WHO/ICT Q7) and this written confirmation remains valid till 27-08-2023. ***However, initially submitted dossier has mentioned M/s SI Group Inc. 725 Cannon Bridge Road Orangeburg SC United State of America as drug substance manufacturer. While in reply they have changed it to Hubei Biocause Heilen Pharmaceutical Co. Ltd., China.***
3.	COA of the drug substance by the finished product manufacturer shall be submitted.	Firm has submitted copy of COA from M/s Surge Laboratories having name of supplier as Hubei Granules-Biocause Heilen Pharmaceutical Co. Ltd., Batch No. C100-1607094M.

		However, COA submitted in the initial dossier was from SI group Inc. 725 Cannon Bridge Road Orangeburg SC United State of America with Lot No. 4050-3070 for Ibuprofen. ***Furthermore, COA from the drug substance manufacturer of China is also not provided.***
4.	Stability study data of the drug substance for both accelerated and real time from drug substance manufacturer shall be submitted.	Firm has submitted stability study data of 03 batches for the drug substance from M/s Hubei Granules-Biocause Heilen Pharmaceutical Co. Ltd., China. Real time: 30˚C ± 2˚C / 75% ± 5%RH for 72 months. Batches; (C100-1305307M, C100-1305308M & C100-1305309M) Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months. Batches; (C100-1812264M, C100-1812265M & C100-1812266M). ***Both real time and accelerated stability studies of the drug substance are for different batches.***
5.	Specifications of drug substance from both drug substance manufacturer and Finished Product manufacturer shall be submitted.	Submitted. ***Specifications from Hubei Biocause Heilen Pharmaceutical Co. Ltd., China is submitted instead of SI group Inc. 725 Cannon Bridge Road Orangeburg SC United State of America***
6.	Analytical method used for analysis of drug substance from both drug substance manufacturer and Finished Product manufacturer shall be submitted.	Submitted. ***Analytical procedures from Hubei Biocause Heilen Pharmaceutical Co. Ltd., China is submitted instead of SI group Inc. 725 Cannon Bridge Road Orangeburg SC United State of America***
7.	Analytical method along with specifications used for analysis of Finished Product shall be submitted.	Submitted.
8.	Specifications has mentioned pH from 7.3 to 8.3 while COA has pH specifications from 7.3 to 7.8. clarification shall be submitted.	Firm has submitted that pH limit of this product is from 7.3 to 7.8 while the pH mentioned on the stability data sheets was 7.3 to 8.3 by typographic mistake which has been corrected and revised stability sheets have also been submitted by the firm.
9.	Complete formulation including the inactive used in the applied formulation shall be submitted.	Submitted.
10.	Complete batch manufacturing record of three stability batches shall be submitted.	Submitted.
11.	Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number, batch size etc.	Firm has submitted stability data summary sheets as per decision of 293rd meeting of Registration Board with inclusion of API lot number (C100-1607094M) and total batch size (121 ampoules). They have also included bacterial endotoxins and sterility test in the revised stability data sheets.
12.	Justification shall be submitted for not performing the sterility testing in the stability data for the applied formulation.	Firm has submitted that in routine they use to conduct the sterility testing of injectable products at each time point during stability, the reports were kept at microbiology section, and unfortunately we do not use to make them part of the final stability reports, since major focus were on potency degradation. They further submitted that they now collected the said reports from microbiology and

		make them part of the revised stability summary data sheets.
13.	Documents for the procurement of API with approval from DRAP with mentioning batch number of the drug substance shall be submitted.	Firm has submitted copy document having invoice No. W170217-035 dated 22-02-2017 mentioning 2kg of Ibuprofen, batch No. C100-1607094M attested by ADC, DRAP, Lahore dated 24-03-2017. ***In the initially submitted dossier copy of commercial invoice No. 434651 dated 29-03-2017 without any attestation from the DRAP.***
14.	Reference of previous approval of applications with stability study data of the firm shall be submitted.	Firm has submitted reference of their product Nervlok-Heavy Injection, approved in 313th meeting of the Registration Board. The applied product was on form 5F.
15.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Only compliance certificate is submitted however no audit trial is submitted.
16.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Hand written digital logger is submitted.

Decision of 322nd meeting of Registration Board: Deferred for following;

- Valid copy of GMP certificate/DML of the drug substance manufacturer issued by concerned/relevant regulatory authority.
- COA of the drug substance from drug substance manufacturer with lot number used in the development of the product shall be submitted.
- Justification for change of source of drug substance as initially drug substance source was from USA while afterward it was changed to China.
- Justification shall be submitted for the batch size as only 121 ampoules were manufactured in each trial batch while sterility is also claimed in the submitted data.
- Confirmation of submission of Form 5 application from R&I record.

Reply by the Firm:

Valid copy of GMP certificate/DML of the drug substance manufacturer issued by concerned/relevant regulatory authority.	Firm has submitted copy of license No. E20200154 in the name of M/s Hubei Biocause Helin Pharmaceutical Company Ltd., having registered address at 122 Yangwan Road, Jingmen City, Hubei Province China. Firm has also submitted copy of a certificate wherein Hubei Granules-Biocause Pharmaceutical Company Ltd., is merged into parent company M/s Hubei Biocause Helin Pharmaceutical Company Ltd., from May, 17, 2020.
COA of the drug substance from drug substance manufacturer with lot number used in the development of the product shall be submitted.	Firm has submitted COA for Ibuprofen having B3 C100-1607094M, Mfg. date 10-07-2016 from M/s Hubei Granules-Biocause Pharmaceutical Company Ltd.,
Justification for change of source of drug substance as initially drug substance source was from USA while afterward it was changed to China.	Firm has submitted that they have changed drug substance manufacturer from M/s *SI group Inc. 725 Cannon Bridge Road Orangeburg SC United State of America to* M/s Hubei Biocause Helin Pharmaceutical Company Ltd., China due to very high cost and continuous supply issue from SI Group Inc. these both factors compel us to find good alternate source. Then we conducted retrials and submitted fresh stability data by using Hubei Biocause Helin Pharmaceutical Company Ltd., China and found this source satisfactory.

Justification shall be submitted for the batch size as only 121 ampoules were manufactured in each trial batch while sterility is also claimed in the submitted data.	Firm has submitted that they have conducted trial batches of Neofen injection 400mg/4ml with batch size of 500ml (121 ampoules). The quantity of ampoules for sterility testing were 10 ampoules as per USP. According to USP, the minimum number of articles to be tested for parenteral preparation are 10 container for more than 100 containers.
Confirmation of submission of Form 5 application from R&I record.	Firm has submitted that the applied product was on Form 5D.

Decision: Deferred for following;

- **Scientific justification for justification of manufactured batch size against the no. of units required to complete stability studies till claimed shelf life while considering the fact that firm has reported performance of sterility testing at each time point.**
- **Confirmation of submission of Form 5D application from R&I record.**

944.	Name and address of manufacturer / Applicant	M/s Surge Laboratories (Pvt.) Ltd, 10-Km, Faisalabad Road, Sheikhupura.
	Brand Name +Dosage Form + Strength	Neofen Injection 800mg/8ml.
	Diary No. Date of R& I & fee	Form-5D, 17-06-2010, diary #_____ **Photocopy**& 15-08-2013 diary No.____ **Photocopy** Rs.35000 Only Photocopies are attached.
	Composition	Each 8ml contains: - Ibuprofen…….…….800mg
	Pharmacological Group	Analgesic.
	Type of Form	Form 5D.
	Finished Product Specification	Manufacturers specification
	Pack size & Demanded Price	Rs.540 per ampoule
	Approval status of product in Reference Regulatory Authorities.	Caldolor 800mg/8ml, USFDA approved.
	Me-too status	N/A
	GMP status	
	Decision of 254th meeting of Registration Board.	Deferred for completion of application as under:- As per the decision of RB in its 251st meeting following is required: - • Certificate of Analysis of API. • Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin. • Manufacturer will follow Drug Specification Rules, 1986. • Protocols followed for conduction of stability study and details of tests. • Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc. • Documents confirming import of API etc. • All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents. • Shelf life of two years shall be granted based upon the results 06 month accelerated and real time stability study data. • Commitment to continue real time stability study till assigned shelf life of the product.

STABILITY STUDY DATA	
Drug	Neofen Injection (Ibuprofen 800mg/8ml).
Name of Manufacturer	M/s Surge Laboratories (Pvt.) Ltd, 10-Km, Faisalabad Road, Sheikhupura.
Manufacturer of API	M/s SI Group Inc. 725 Cannon Bridge Road Orangeburg SC United State Of America.
API Lot No.	Initially not submitted. (C100-1607094M)
Description of Pack	Initially not submitted. (10ml clear glass ampoule USP type I)

(Container closure system)			
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Complies with the Good Manufacturing Practice for the dosage forms categories and activities listed in Table 1. Validity: Valid until 02-11-2021.
	Remark of the Evaluator [XIII]	**Deficiency letter was issued on 05-10-2021 with following observation but no reply received till to date.** • Form 5A has neither mentioned film coated tablets nor salt form of the active ingredients. Label claim in form 5 needs revision with submission of applicable fee. • Submit Original, valid & legalized COPP issued by concerned regulatory Authority • Submit Original, valid & legalized GMP certificate of manufacturer issued by concerned regulatory Authority • Submit Original and complete Letter of Authorization from Product License Holder

		• Submission of stability studies data of three batches as per zone IV-A as per Requirements of Registration Board decision of 293rd meeting.

Decision of 322nd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Reply by the firm:

Form 5A has neither mentioned film coated tablets nor salt form of the active ingredients. Label claim in form 5 needs revision with submission of applicable fee.	Firm has submitted revised Form 5A wherein they have revised their label claim by mentioning the film coating and salt form of Atazanavir with submission of 7500/- fee vide slip No. 28449585491 dated 18-11-2022 as follows; **Each film coated Tablet Contains:** **Atazanavir Sulphate eq. to Atazanavir…… 300mg** **Ritonavir ……..…100mg**
Submit Original, valid & legalized COPP issued by concerned regulatory Authority.	Firm has submitted copy of CoPP certificate No. COPP/CERT/PD/109188/2021/11/38484/188282 for Atazor R tablets. Certifying Authority: Food & Drug Administration, Maharashtra State Mumbai, M.S. Bandra-Kurla complex, Bandra (E), Mumbai-400 051 Maharashtra, India. Date: 17-12-2021. The certificate conforms to the format recommended by the WHO. Validity: 28-11-2024. Certificate also confirms that this product is also actually on the market in the exporting country. Firm further requested that please continue the registration process and approve our product in upcoming meeting of Board. They further added that Original valid COPP is under consulate attestation and we will submit valid consulate attested COPP as early as we receive from the manufacturer and will submit to DRAP before receiving of registration letter.
Submit Original, valid & legalized GMP certificate of manufacturer issued by concerned regulatory Authority.	Firm has submitted copy of Certificate No: NEW-WHO-GMP/CERT/PD/108736/2021/11/38283 dated 29-11-2021. Certifying Authority: Food & Drug Administration, M.S. Bandra-Kurla complex, Bandra (E), Mumbai-400051 Maharashtra, India. Complies with the Good Manufacturing Practice for the dosage forms categories and activities listed in Table 1. Validity: Valid until 28-11-2024. Firm further requested that please continue the registration process and approve our product in upcoming meeting of Board. They further added that Original valid GMP is under consulate attestation and we will submit valid consulate attested GMP as early as we receive from the manufacturer and will submit to DRAP before receiving of registration letter.
Submit Original and complete Letter of Authorization from Product License Holder.	Firm has submitted notarized authorization letter from M/s Emcure Pharmaceuticals Limited, wherein they have authorized M/s Revive Healthcare, Office 503, 5th Floor, 6 Main Gulberg, Jail Road, Lahore for import, market, distribution and sale of the 08 products namely; Atazor-R Tablets, Tavin-EM Tablets, Instgra Tablets, Viropil Tablets, Spegra Tablets, Vonavir tablets, Inbec tablets and Vonday tablets.
Submission of stability studies data of three batches as per zone IV-A as per Requirements of Registration Board decision of 293rd meeting.	Firm has submitted stability study data of 03 batches. The accelerated stability study data is conducted at 40°C ± 2 °C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ± 2 °C / 75% ± 5% RH for 36 months. Batch No. EM28258, EM2X088A & EM2Y131A. *Firm has also clarified regarding the condition of real time stability data that Zone IVb conditions (30°C ± 2 °C / 75% ± 5% RH) are more stringent than Zone Iva (30°C ± 2 °C / 65% ± 5% RH) and we provided stability on Zone IVb condition so it can be considered as the worst case scenario.*

		However, in Accelerated stability data dissolution limit of both the active substances mentioned is NLT 75% Q while in real time stability data it is NLT 80% Q of the labelled amount.
	Decision: Approved as per policy of inspection of manufacturer abroad with innovator's specifications and following label claim; **Each film coated Tablet Contains:** **Atazanavir Sulphate eq. to Atazanavir…… 300mg** **Ritonavir ……..…100mg** • **Registration letter will be issued after submission of full fee of for correction/pre-approval change in the label claim as per reference product, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Firm will also submit and original, valid & legalized COPP certificate for the applied formulation issued by concerned regulatory Authority before issuance of registration letter.**

j. Registration applications of locally manufactured deferred veterinary drugs on form 5.

949.	Name and address of manufacturer / Applicant	M/s Selmore Pharmaceuticals Pvt Ltd. 36-Km, Multan Road Lahore.
	Brand Name +Dosage Form + Strength	Vital 4 Solution
	Composition	Each 1000ml Contains: Vitamin A……30,000,000 IU Vitamin D3……1,000,000 IU Vitamin E……..…5,000mg Vitamin K3……6,000mg
	Diary No. Date of R& I & fee	Dy. No. 12782 dated 06.03.2019 Rs. 20,000/- dated 06.03.2019
	Pharmacological Group	Multivitamins
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed in-house specifications.
	Pack size & Demanded Price	500ml, 1000ml, 5000ml; decontrolled.
	Reference / Me-too status	Adekbar Oral Liquid. Reg. No. 73950
	GMP status	The firm was inspected on 05-03-2018,17-08-2018 & 16-10-2018, where renewal of DML was recommended.
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Justify the capacity of one-liter water to accommodate Vitamin A…30,000,000 IU, Vitamin D3…1,000,000 IU, Vitamin

		E…5,000mg and Vitamin K3…6,000mg. the firm submitted the quantity to be Vitamin A…17.64g, Vitamin D3…25mg, Vitamin E…5,000mg and Vitamin K3…6,000mg • You have applied for solution. Justify the solubility of water insoluble vitamins in water. The firm submitted that these are emulsified with tween-80. • The quantity of APIs in master formula are not in line with the label claim. The firm revised the master formula accordingly. • Submitted Rs. (challan-70559611534)
	Decision of 321st meeting of Registration Board.	Deferred for following; • Justification of applied strength of formulation considering the solubility of each drug substance in terms of mg/ml. • Justification for the proposing formulation of water insoluble vitamins in water.
	Submission by the firm.	Firm has submitted master formulation and batch formula for the applied formulation wherein they have shown that total of 1.764 Kg of Vitamin A will be used in 100 Liter. 2.5Gm of Vitamin Din 100 liter, 0.5Kg of Vitamin E and 1.85kg of Vitamin K3 in 100 liters. They further showed the inactive ingredients of the formulation which contain tween 80 as emulsifying agent, Isopropyl alcohol as solubilizing agent, Propylene glycol as solubilizing agent, sorbitol as sweetening agent and purified water as vehicle.
	Evaluation by PEC- XIII	• However, upon evaluation of the initial dossier, Inactive mentioned are benzyle alcohol as preservative, Polysorbate 80 as solubilizing agent, Sodium metabisulphate as anti-oxidant, Sorbitol and purified water as solvent. • Furthermore, initial applied formulation is solution while after submission of reply it becomes as emulsion. • Also the quantities mentioned in the initially submitted dossier and in reply for batch are different from each other.
	Decision of 322nd meeting of Registration Board.	Deferred for following clarifications: • Change of formulation from solution to emulsion. • Change of inactive in the applied formulation. • Change of quantities of the active ingredients mentioned in the initially submitted dossier and in reply.
	Submission by the firm.	• Firm has submitted that their formulation is still in solution form as Vitamin A, Vitamin E and Vitamin D3 are dissolved in isopropyl alcohol (IPA), then, Tween-80 is added and finally volume is make with water (WFI). • Firm has submitted that they have replaced benzyl alcohol and sodium metabisulfite of initial formulation with isopropyl alcohol and propylene glycol for the solubility of Vitamin A, Vitamin E and Vitamin K3. • Firm has submitted that inn place of Vitamin K3 (Menadion), its water soluble form Menadin Sodium Phosphate is used. So, the increase in

		quantity of Vitamin K3 is because of factor of sodium phosphate.
	Evaluation by PEC- XIII	Firm has also submitted full fee for change of their in actives in the applied formulation vide slip No. 01550927664 dated 13-01-2023.
	Decision: Approved.	
950.	Name and address of manufacturer/ Applicant	M/s Elko Organization Pvt Ltd, Plot No.27 & 28, Sector 12-B, North Karachi, Industrial Area, Karachi
	Brand Name + Dosage Form + Strength	X20 Injection 20IU/ml
	Composition	Each ml contains: Oxytocin ……..…20IU
	Diary No. Date of R & I & fee	Dy. No 1876 dated 15-01-2019 Rs. 20,000/- Dated 14-01-2019.
	Pharmacological Group	Peptide hormone
	Type of Form	Form-5
	Finished product Specification	Manufacturers
	Pack size & Demanded Price	250ml & Decontrolled
	Me-too status	X20 Injection 100ml of M/s Elko 085466.
	GMP status	Last GMP inspection was conducted on 06-07-2017 and the report concludes good level of GMP compliance with advice of some improvements of some minor observations.
	Remarks of the Evaluator	Firm has General vial/ ampoule liquid vet section as mentioned in the submitted GMP inspection report.
	Decision of 295th meeting of registration Board.	Deferred for confirmation of manufacturing facility.
	Submission by the firm.	Firm has submitted that they have already registrations of Hormonal drugs namely; 1. Oxytocin 5 IU injection, Reg. No. 011121 with pack size of 1ml ampoule. 2. Oxytocin 10 IU injection, Reg. No. 011122 with pack size of 1ml ampoule, 50ml, 100ml & 250ml. 3. X20 injection (Oxytocin 20 IU), Reg. No. 085466 with pack size of 100ml. Furthermore, firm has submitted copy of DML renewal report conducted on 22-08-2022 wherein the panel unanimously recommends the grant of renewal of DML (000245) (Formulation) for the next five years for following sections and also recommends the regularization of existing layout plan. Report has also mentioned liquid injection Ampoule/vial (Hormone) Veterinary.
	Evaluation by PEC- XIII	• Submitted DML renewal report has only first page and last page. • Furthermore, the me too mentioned has not the same fill volume as that of the applied formulation.
	Decision of 322nd meeting of registration Board.	Deferred for Submission of evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm with same fill volume.
	Submission by the firm.	Firm has submitted an appeal wherein they have stated that in 295th meeting it was decided to get verification of the manufacturing facility. We have submitted report of panel inspection mentioning that firm has manufacturing facility of liquid injection ampoule/vial

		(Hormone) Veterinary. And also LVP veterinary injectable (Hormone). Firm further submitted that at this stage we would like to mention that the permission of Oxytocin 10 IU in 500ml Pack was given to M/s Vitz Pharmaceuticals, Reg. No. 111471 and they are the only manufacturer in Pakistan manufacturing this pack. They further submitted that question arise that from where he has provided me too products? And with same fill volume…? Definitely not, but Board has granted this pack to vitz pharma. Considering Elko request of X20 Injection (Oxytocin ……. 20 I.U.) in 250ml pack, Board is asking to provide me too and same fill volume. In 322nd meeting, DRAP has deferred our case again. We therefore, request to please consider our case on merit basis and grant us registration of the said drug.
	Evaluation by PEC- XIII	
	Decision: Registration Board decide do defer the instant application while referring to its 313th meeting wherein Board endorsed the following recommendations of Expert Working group on Veterinary Drugs: **"*The Expert Working Group on Veterinary Drugs deliberate the case and decided to allow for granting multidose vials for Oxytocin as per following details:*** ***Oxytocin .... 10 UI upto 500ml as per Spanish authority approval or any pack size available in any other RRA.*** ***Oxytocin .... 20 UI upto 50ml as per Australian Pesticides and Veterinary medicine Authority approval or any pack size available in any other RRA.*"**	
951.	Name and address of manufacturer/ Applicant	M/s Eterna Pharma (Pvt.) Ltd., Plot # (99,100,101,198) C, Sector D1, Old Industrial Estate, Mirpur, AJ&K (Liquid Injection section (Veterinary) General).
	Brand Name + Dosage Form + Strength	Fenik Plus Injection.
	Composition	Each ml contains: Meloxicam ……. 20%
	Diary No. Date of R & I & fee	Dy. No. 121 dated: 01-01-2021 Rs.20,000/- 01-01-2021.
	Pharmacological Group	NSAID's.
	Type of Form	Form 5.
	Finished product Specification	BP Specification
	Pack size & Demanded Price	50ml / Decontrolled
	Me-too status	Could not be confirmed.
	GMP status	Same as above.
	Remarks of the Evaluator	• Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm. • Official monograph of the applied formulation is not available in pharmacopoeias.
	Decision of 307th meeting of Registration Board;	Deferred for Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.
	Reply by the firm;	Firm has submitted revised formulation of their formulation and also provided me too for the new/ revised label claim. Camrold 20 liquid Injection, Harrolds Pharma AJK, Reg. No. 109006.

		Revised label claim is as under; Each ml Contains: Meloxicam ……. 20mg.
	Remarks of the Evaluator PEC XIII.	• Firm has neither submitted revised form 5 nor any fee for revision of label claim of the applied formulation. • Current GMP status of the firm could not be confirmed. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm and same fill volume.
	Decision of 323rd meeting of registration Board.	Deferred for following; • Submission of full fee of 30,000/- for correction/pre-approval change in the label claim, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021 along with Current GMP certificate/last inspection report conducted within last three years. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm and same fill volume.
	Reply by the firm;	Firm has submitted revised Form 5 with submission of fee of 30,000/- vide slip No. 76507722295 dated 18-01-2023. Firm has also submitted GMP certificate No. F. 3-88/2022-Addl. Dir. (QA&LT-I) dated 31-08-2022 issued on the basis of inspection conducted on 14-10-2021. GMP certificate is export to Nigeria.
	Remarks of the Evaluator PEC XIII.	Fee submitted by the firm is for Fenik Plus Injection. (Meloxicam 20 %) Change of Label Claim. However, the correct label claim is 20mg instead of 20%. Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm and same fill volume.
	Decision: Deferred for submission of evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm and same fill volume.	
952.	Name and address of manufacturer/ Applicant	M/s Eterna Pharma (Pvt.) Ltd., Plot # (99,100,101,198) C, Sector D1, Old Industrial Estate, Mirpur, AJ&K (Liquid Injection section (Veterinary) General).
	Brand Name + Dosage Form + Strength	Melo 10 Injection.
	Composition	Each ml contains: Meloxicam ……. 10%

	The proposed proprietary name / brand name	Sopra-Praz D 30mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Dual Delayed release pellets of Dexlansoprazole equivalent to Dexlansoprazole: ------- 30mg
	Pharmaceutical form of applied drug	Hard gelatin Capsule filled with white to off white dual delayed release pellets.
	Pharmacotherapeutic Group of (API)	PPIs (Proton Pump Inhibitors)
	Reference to Finished product specifications	Manufacturer Specifications
	Proposed Pack size	1×30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Dexilant 30mg Capsule Takeda Pharmaceuticals USA Inc (Innovator)
	For generic drugs (me-too status)	Razodex 30mg Capsule by Getz Pharma Reg. # 086976
	GMP status of the Finished product manufacturer	GMP inspection was conducted on 11/06/2021 and report satisfactory. Capsule (General & General Antibiotic) section approved.
	Name and address of API manufacturer.	Vision Pharmaceuticals Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad- Pakistan Tel: (92-51) 4493587-88-89-90, Fax: (92-51) 4493591 Email: contact@visionpharmapk.com Web: www.visionpharmapk.com
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container

		closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Monograph of Dexlansoprazole is not present in Pharmacopoeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities/related substances (Sulphone Impurity Sulphide Impurity Total Impurities), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (SP-T40, SP-T41, SP-T42)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against Razodex 30mg Capsule (B # 039C47) by Getz Pharma by performing quality tests (Identification, Dissolution, Disintegration, Assay, Total Impurity, Microbial contamination). CDP has been performed against the same brand that is Razodex 30mg Capsule (B # 039C47) by Getz Pharma in Acid media (pH 1.0-1.2) & (pH 5.5 & 7). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad- Pakistan

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 4, 6 (Months) Real Time: 0, 1, 2, 3, 4, 6 (Months)		
Batch No.	SP-T40	SP-T41	SP-T42

Batch Size	2500 Capsule	2500 Capsule	2500 Capsule
Manufacturing Date	09-2020	09-2020	09-2020
Date of Initiation	23/09/2020	23/09/2020	23/09/2020
No. of Batches	03		

Administrative Portion

13.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate F. 3-26/20 19-Addl. Dir. (QA & LT-I) issued by DRAP valid till 10/02/2022.
15.	Documents for the procurement of API with approval from DRAP (in case of import).	• Purchase order No PO-9-20-7 is submitted. Purchased from Vision Pharmaceuticals, Islamabad- Pakistan hence DRAP approval is not required.
16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
18.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Section#	Observation
1.	**1.3.5.**	Evidence of approval of manufacturing facility / Approved Section from Licensing Authority
2.	**3.2.S.2.3**	Firm has not mentioned sucrose as part of their master formulation for manufacturing control of inactive material however firm has mentioned sucrose in section 2.3.S.2.5, i-e Manufacturing process development. which needs clarification.
3.	**3.2.S.2.6**	The specification of dual release pellets at enteric coating stage is mentioned as soluble at 6.7 PH , whereas QA release specification for IPQC is mentioned as dissolution at P.H.7, which needs clarification.
4.	**3.2.S.4.4**	• The submitted COA of source of API, (Dexlansoprazole) M/s Everest Organics Limited, India, has mentioned Identification /Assay through Chiral HPLC, however same is not depicted through COA of API by local pellets manufacturer. i-e M/s Vision pharmaceuticals, Islamabad • Dexlansoprazole is a racemic enantiomer of Lansoprazole, Optical rotation test is performed by API manufacturer , however as per COA of Pellets , same is not performed by Pellet manufacturer , as well as finished product manufacturer which needs clarification.
5.	**3.2.S.7**	• API (Pellet) Manufacturer has not mentioned/conducted degradation product test while conducting stability study data of API(pellets) , which needs clarification.
6.	**3.2.P.2.2.1**	• Finished product manufacturer has submitted comparative dissolution Profile performance with Capsule Razodex ,Getz Pharma , However firm has not submitted non Model dependent Cohen's F2(Similarity factor) calculation to establish comparable dissolution with comparator .which needs clarification.

Previous Decision of 322nd Meeting: Registration Board has deferred the case for submission of the reply for above cited shortcomings within six (6) months.

Reply of Firm:

4.	**3.2.S.4.4**	• The submitted COA of the source of API, (Dexlansoprazole) M/s Everst Organics Limited, India, has mentioned Identification/Assay through chiral HPLC, however same is not depicted through COA of API by local pellet manufacturer i.e. M/s Vision Pharmaceuticals, Islamabad. • Dexlansoprazole is a racemic enantiomer of Lansoprazole, optical rotation test is performed by API manufacturer, however as per COA of the pellets, same is not performed by pellets manufacturer, as well as finish product manufacturer, which needs clarification.	Assay for chiral content (Lansoprazole) is performed at Dexlansoprazole API stage testing, not at Dexlansoprazole DDR Pellets yet. Now from onward API manufacturer will perform this test, updated testing method is attached.
5.	**3.2.S.7**	• API (pellets) manufacturer has not mentioned/conducted degradation product test while conducting stability study data of API (pellets), which need clarifications.	New stability study data is attached.
6.	**3.3.P.2.2.1**	Finish product manufacturer has submitted comparative dissolution profile performance with capsule Razodex, Getz Pharma, however firm has not submitted non-model dependent Cohen's F2(similarity factor) calculation to establish comparable dissolution with comparator,	Comparative dissolution profile with submitted non-model dependent Cohen's F2 (similarity factor) was already submitted with the dossier under section 3.2.P.2.2, same is again attached under here.

Sr. No	Section #	Observation	Company reply
1.	**1.3.5**	Evidence of approval of manufacturing facility/approval of section from licensing authority.	Approval letter (F.1-20/2005-Lic) of manufacturing facility/approval of section from licensing authority is attached.
2.	**3.2.S.2.3**	Firm has not mentioned sucrose as a part of their master formulation for manufacturing control of inactive material however firm has mentioned sucrose in Section 2.3.S.2.5, i.e. manufacturing process development, which need clarification.	Sucrose is not part of formulation; this is typographic error. In actual it is starch not sucrose. Corrected section is attached.
3.	**3.2.S.2.6**	The specification of dual release pellets is at enteric coating stage is mentioned as soluble at 6.7 PH, whereas QA released specification for IPQC is mentioned as dissolution at PH 7, which need clarification.	The specification of dual release pellets are at enteric coating stage is mentioned as soluble **6 to 7 PH not 6.7**, relevant section 3.2.S.2.6 (enteric coating stage) is attached for your reference.

Remarks of Evaluator :

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

6.	**3.2.P.2.2.1**	• Finished product manufacturer has submitted comparative dissolution Profile performance with Capsule Razodex ,Getz Pharma , However firm has not submitted non Model dependent Cohen's F2(Similarity factor) calculation to establish comparable dissolution with comparator .which needs clarification.

Previous Decision of 322nd Meeting: Registration Board has deferred the case for submission of the reply for above cited shortcomings within six (6) months.

4.	**3.2.S.4.4**	• The submitted COA of the source of API, (Dexlansoprazole) M/s Everst Organics Limited, India, has mentioned Identification/Assay through chiral HPLC, however same is not depicted through COA of API by local pellet manufacturer i.e. M/s Vision Pharmaceuticals, Islamabad. • Dexlansoprazole is a racemic enantiomer of Lansoprazole, optical rotation test is performed by API manufacturer, however as per COA of the pellets, same is not performed by pellets manufacturer, as well as finish product manufacturer, which needs clarification.	Assay for chiral content (Lansoprazole) is performed at Dexlansoprazole API stage testing not at Dexlansoprazole DDR Pellets yet. Now from onward API manufacturer will perform this test, updated testing method is attached.
5.	**3.2.S.7**	• API (pellets) manufacturer has not mentioned/conducted degradation product test while conducting stability study data of API (pellets), which need clarifications.	New stability study data is attached.
6.	**3.3.P.2.2.1**	Finish product manufacturer has submitted comparative dissolution profile performance with capsule Razodex, Getz Pharma, however firm has not submitted non-model dependent Cohen's F2(similarity factor) calculation to establish comparable dissolution with comparator,	Comparative dissolution profile with submitted non-model dependent Cohen's F2 (similarity factor) was already submitted with the dossier under section 3.2.P.2.2, same is again attached under here.

Reply of Firm:

Sr. No	Section	Observation	Company reply
1.	**1.3.5**	Evidence of approval of manufacturing facility/approval of section from licensing authority.	Approval letter (F.1-20/2005-Lic) of manufacturing facility/approval of section from licensing authority is attached.
2.	**3.2.S.2.3**	Firm has not mentioned sucrose as a part of their master formulation for manufacturing control of inactive material however firm has mentioned sucrose in Section 2.3.S.2.5, i.e. manufacturing process development, which need clarification.	Sucrose is not part of formulation; this is typographic error. In actual it is starch not sucrose. Corrected section is attached.
3.	**3.2.S.2.6**	The specification of dual release pellets are at enteric coating stage is mentioned as soluble at 6.7 PH, whereas QA released specification for IPQC is mentioned as dissolution at PH 7, which need clarification.	The specification of dual release pellets are at enteric coating stage is mentioned as soluble **6 to 7 PH not 6.7**, relevant section 3.2.S.2.6 (enteric coating stage) is attached for your reference.

Remarks of Evaluator :

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted copy of Last inspection Report conducted on 24/01/2018 (Daclatasvir), 06/03/2017 (Sofosbuvir)

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Emphagliflozin**: Copy of GMP certificate issued by CFDA,People's republic of china HUAI'AN JIANGSU valid till 14/01/2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Emphagliflozin** AD Attested invoice ZY20052001G/W Dated.09/06/2020 and
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	Section#	Observation
1.	1.1.5	Legible copy of GMP certificate of manufacturing Site of API ,(Empagliflozin).
2.	3.2.S.2.1	The system suitability conditions set my API manufacturer is detection of API through HPLC with UV detector at 224 nm , same as innovator product , i-e Jardiance whereas under 3.2.S.4.3 validation /verification of analytical procedure by drug product manufacturer significantly varied , including UV detection at 205 nm, which needs clarification.
3.	3.2.S.2.1	Content Uniformity test conducted to establish pharmaceutical equivalence during comparative dissolution ,L1 value is not calculated to meet the specifications as per Pharmacopeia General chapter for content uniformity testing.
4.	3.2.P.2.2.1	• Justification for setting of Dissolution time specification while conducting Comparative dissolution with reference product was set as 30 minutes whereas the innovator product has mentioned specification for dissolution time as 15 minutes. • In comparative dissolution the RPM for USP type 2 (Paddle Apparatus) is set to be 50 RPM whereas innovator Tab Jardiance has conducted same at 75 RPM which needs clarification.
5.	3.2.P.5.3	• The specificity test for conducting validation of analytical method is conducted without the presence of other components like impurities, excipients and matrix compounds which is necessary to establish the specificity of testing method. • Intermediate precision is conducting without comparing the result of separate or different analyst on same apparatus.
6.	3.2.P.8.3	• Stability data of three batches for 6th month for both accelerated and real time stability is missing which is required. • Content uniformity test for Empagliflozin 10 mg is not mentioned in finished product specification nor it is part of stability batches data / COA, which needs clarification. • Documents for the procurement of API with approval from DRAP (in case of import).

Previous Decision of 322nd Meeting: Registration Board has deferred the case for submission of the reply for above cited shortcomings within six (6) months.

Reply of Firm:

S. No	Sections	Observations/ Short-comings	Reply
1.	**1.1.5**	Legible copy of GMP certificate of manufacturing site of API, (Empagliflozin).	Valid copy of DML/GMP certificate of API manufacturer site is **attached.**

2.	**3.2.S.2.1**	The system suitability condition set by API manufacturer is detection of API through HPLC with UV detector at 224nm, same as innovator product , i.e. Jardience whereas under 3.2.S.4.3 Validation/verification of analytical procedure by drug product manufacturer significantly varied, including UV detection at 205nm, which needs clarification.	For testing Empagliflozin API, analytical method was developed by firm with INH Specification & same method has been validated & results are complied with validate Specification. **Analytical method & Validation are attached**
3.	**3.2.P.2 .1**	Content uniformity test conducted to establish pharmaceutical equivalence during comparative dissolution, L1 value is not calculated to meet the specification as per pharmacopeia general chapter for content uniformity testing.	Content uniformity test conducted to establish pharmaceutical equivalence during comparative dissolution. L1 value is calculated to meet the specification as per pharmacopeia. **revised Content uniformity Sheets are attached**
4.	**3.2.P.2.2. 1**	• Justification for setting of dissolution time specification while conducting comparative dissolution with reference product was set as 30 minutes whereas the innovator product has mentioned specification for dissolution time as 15 minutes.	After reviewing the dissolution release trend in CDP report it is evident that more than 80% drug is released in 15min so we have already revised our current acceptance specification limit to **NLT 80% in 15 mins** instead of 30mins. **Revised Method & Specification are attached.**
		• In comparative dissolution the RPM for USP type 2 (Paddle Apparatus) is set to be 50 RPM whereas innovator tab Jardience has Conducted same at 75 RPM which needs clarification	CDP has been performed as per innovator specification. However, 50rpm is mentioned erroneously in the report. revised CDP report **is attached**
5.	**3.2.P.5.3**	• The specificity test for conducting validation of analytical method is conducted without the presence of other component like impurities, excipients and matrix compound which is necessary to establish the specificity of testing method. • Intermediate precision is conducting without comparing the result of separate or different analyst on same apparatus.	According to ICH Q2R1 Specificity is the ability to assess unequivocally the analyte in the presence of components which may be expected to be present. Typically these might include impurities, degradants, matrix etc. We have run placebo containing matrix and there is no interference observed in Analytical method Validation of product, so the matrix is specific to analyte. Intermediate precision is conducting by using two different analyst and result are mentioned in the table **Attached.**

6.	**3.2.P.8.3**	• Stability data of three batches for 6th month for both accelerated and real time stability is missing which is required. • Content uniformity test for Empagliflozin 10mg is not mentioned in finished product specification nor it is part of stability batches data/ COA, which needs clarification. • Documents for the procurement of API with approval from DRAP (in case of import).	Stability data till 3rd Month has been submitted on 15-10-2021 and data against 6 month time point has been submitted on 13-01-2022. Copy of receiving is **attached.** Content Uniformity test for Empagliflozin has been performed and updated COAs of three stability batches **are attached** Documents for the procurements of API with approval from DRAP **are Attached**

Remarks of Evaluator :

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will adopt dissolution specifications of "NLT 80% in 15 minutes", for commercial batches.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	Form-5D application label claim does not mention film coated tablet instead applied label claim is mentioned as "each tablet contains: Empagliflozin …..25mg", whereas master formulation mention film coated tablet , moreover innovator product is also film coated tablet . Revised label claim on form 5-D is required as per innovator product label claim.	Product has been developed as per innovator product i:e film coated tablet **Revised form 5-D is attached**
2.	COA of API Empagliflozin Batch no : 4500-202003001 does not mentioned testing of organic impurity through chiral HPLC as required and tested for API of innovator brand.	Manufacturer has reported process related impurity as impurity A ,B and same has been tested for Batch Release as impurity A,B separately .Single impurity and total impurity range has also established and testing results are well in the establish range. Our testing is based on manufacturer COA. For reference **COA is attached.**
3.	Content uniformity test conducted to establish pharmaceutical equivalence during comparative dissolution, L1 value is not calculated to meet the specification as per pharmacopeia general chapter for content uniformity testing.	Content uniformity test conducted to establish pharmaceutical equivalence during comparative dissolution.L1 value is calculated to meet the specification as per pharmacopeia. **Revised Content uniformity Sheets are attached**
4.	• Dissolution time batch and stability specification of finished product are set as 30minutes whereas the innovator product has mentioned specification for dissolution time as 15minutes. Clarification is required. • Dissolution specification for RPM for USP type 2 (Paddle apparatus) is set to be 50RPM whereas innovator Tab Jardiance has conducted same at 75RPM which also needs clarification .	• After reviewing the dissolution release trend in CDP report it is evident that more than 80% drug is released in 15min so we have already revised our current acceptance specification limit to **NLT 80% in 15 mins** instead of 30mins. **Revised Specification are attached.** • CDP has been performed as per innovator specification. However 50rpm is mentioned erroneously in the report. revised **CDP report is attached.**
5.	• Justification for setting of dissolution time specification while conducting comparative dissolution with reference product was set as 30 minutes whereas the innovator product has mentioned specification for dissolution time as 15 minutes. • In Comparative dissolution the RPM for USP type 2 (Paddle apparatus) is set to be 50RPM whereas innovator Tab Jardiance has conducted same at 75RPM which also needs clarification.	• After reviewing the dissolution release trend in CDP report it is evident that more than 80% drug is released in 15min so we have already revised our current acceptance specification limit to **NLT 80% in 15 mins** instead of 30mins. **Revised Specification are attached.** • CDP has been performed as per innovator specification. However 50rpm is mentioned erroneously in the report. revised **CDP report is attached.**
6.	BMR of trial batch no: RD-PR20-016/T1/S1 mentioned PVP-K 30 and Sodium lauryl sulphate as part of master formulation of core tablet which are not present in master formulation /excipient list of innovator product , moreover the master formulation submitted along with form 5-D also does not mention these two excipients Clarification is required.	Formulation has been development as per innovator reference and same has been submitted for registration and marked correction In BMR has been revised.

7.	• Content uniformity test for Empagliflozin 25mg is not mentioned in finished product specification nor it is part of stability batches data/COA, which needs clarification. • Documents for the procurement of API with approval from DRAP (in case of import)	Content uniformity test has been already performed as mentioned on Stability COAs. For reference, **Content uniformity test sheets and COAs are attached.** Documents for the procurement of API with approval from DRAP **are Attached**

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.

- **Manufacturer will adopt dissolution specifications of "NLT 80% in 15 minutes", for commercial batches.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module III (Drug Substance)	Official monograph of Paroxetine Hydrochloride is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ACT2-1704002, ACT2-1704003, ACT2-1704004)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Acofide 100mg tablet, PMDA (Japan) approved by Zeria Pharmaceutical.Co., Ltd by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Acofide 100mg tablet, PMDA (Japan) approved by Zeria Pharmaceutical.Co., Ltd in

		Hydrochloric Acid Solution (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	**Manufacturer:.** Emmennar Pharma Private Limited **Address:** Plot No. A-4, Industrial Estate, Opposite Sanath Nagar Police Station, Sanath Nagar, Hyderabad, Telangana, India		
API Lot No.	ACT2M-20004		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×30's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	21PD-024	21PD-025	21PD-026
Batch Size	2500 tablets	2500 tablets	2500 tablets
Manufacturing Date	Feb-2021	Feb-2021	Feb-2021
Date of Initiation	March-2021	March-2021	March-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**GMP Certificate** Manufacturer: Emmennar Pharma Private Limited. Valid Till: 04-02-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Form 3:** Form of Undertaking to Accompany an Applicant for License to Import Drugs **Form 6:** License to import Raw material for manufacturing Trial Examination, test or Analysis **Form 7:** Batch Certification **Invoice** Invoice Num: 210018 Quantity: 1.5 kgs Batch: ACT2M-20004 Mfg Date: Feb-2020 Exp Date: Jan-2024 **Packing List** Invoice Num: 210018 Quantity: 1.5 kgs Batch: ACT2M-20004 Mfg Date: Feb-2020 Exp Date: Jan-2024 **COA of API** from drug substance and Drug product Manufacturer **Testing Method of API** from drug substance and Drug product Manufacturer

		Stability Data of API from API manufacturer
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr#	Section	Observations
01	**2.3.S.3.1.2**	API manufacturer has mentioned that "Acotiamide Hcl Hydrate exhibits polymorphism". However, the data of Innovator product registered with PDMA mentions that" The drug substance is a trihydrate and has a single crystal form. No crystalline polymorphism is observed." Please clarify .
02	**3.2.S.4.2**	Substance manufacturer has mentioned Identification testing of Acotiamide Hcl hydrate through Infrared Absorption spectroscopy following USP 197 K by using Kbr pellets, however the drug substance testing specifications provided by finished product manufacturer in 3.2.S.4.4.1 mentioned Identification through FTIR. Clarification is required.
03	**3.2.S.4**	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted. Please provide.
04	**2.3.P.5.1**	HPLC Retention time of Acotiamide Hcl hydrate mentioned by substance manufacturer is 11.83 whereas on same chromatographic conditions the retention time of Acotiamide Hcl hydrate in Drug product is mentioned as 8.3 minutes, please clarify. HPLC Run time of sample in drug substance assay testing specification is different from drug product run time , Clarification is required.
05	**3.2.P.8**	Legible/readable copy of DRAP attested copy if import invoice of API from source is required.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Assistant Director (EFD) vide letter No. F.1-6/2019-PR-1(EFD) dated 29-12-2022 has informed that M/s SURGE LABORATORIES (PVT.) LTD. Karachi,has achieved the benchmark of USD 1317092.75 during the fiscal Year 2020-2021 and requested for priority consideration of following molecules,

958.	Name, address of Applicant / Marketing Authorization Holder	SURGE LABORATORIES (PVT.) LTD. Head Office: 5th Floor, Commerce Centre, Hasrat Mohani Road, Karachi. Telephone: UAN 111-742-762 E-mail address: info@surgelaboratories.com
	Name, address of Manufacturing site.	M/s Stallion Pharmaceuticals PVT, LTD. 581-Sundar Industrial Estate, Lahore Tel: +92 42 35297647-48
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.23522 dated 19 / 08 / 2022
	Details of fee submitted	PKR 75,000/-: dated 16/06/2022 Slip No.52319875889
	The proposed proprietary name / brand name	Mapnem IV 500mg Sterile dry Powder for Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as Trihydrate) USP….500mg
	Pharmaceutical form of applied drug	White to Off-White crystalline powder filled in filled in Glass Vial 20 ml USP Type III Clear Transparent.
	Pharmacotherapeutic Group of (API)	Antibacterials for systemic use, Carbapenems
	Reference to Finished product specifications	USP
	Proposed Pack size	1's vial with 10ml sterile water for Injection
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MERREM IV** (Meropenem) and being marketed by Pfizer Inc., USA, USFDA Approved.
	For generic drugs (me-too status)	PENRO 500 mg Injection IV by M/s Bosch Pharmaceuticals Pvt. Ltd., Reg. No. 042106
	GMP status of the Finished product manufacturer	GMP Certificate granted on 02/10/2020. Capsule (Penicillin) (Mixing, Filling & Packaging etc.), Oral Dry Powder Suspension (Penicillin) (Mixing, Filling & Packaging etc.), Dry Powder Injectable (Penicillin, Carbapenem (Filling & Packaging etc.).
	Name and address of API manufacturer.	M/s Aurobindo Pharma Limited Sy.No 379, 385, 386, 388 to 396, (V), Hatnoora (M), Sanga Reddy District, Talenghana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Meropenem is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for related substances (Meropenemic acid, Meropenem Dimer), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (EMF0821004, EMF0821005, EMF0821006)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Meronem IV 500mg for Injection (Meropenem) is registered and being marketed by M/s Pfizer Pakistan Limited, by performing quality tests (Description, Identification, pH, Loss on drying, Reconstitution time, Endotoxin test, Sterility test and Assay.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Aurobindo Pharma Limited Sy.No 379, 385, 386, 388 to 396, (V), Hatnoora (M), Sanga Reddy District, Talenghana, India.		
API Lot No.	1705205135, 1705205096, 1705205623

No. of Batches	03		

Administrative Portion

7.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted.

8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 3298/E1/2019 issued by Drugs Control Administration, Government of Telangana, India valid till 11/02/2023.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice no U05/17-18/776 dated 10-10-2017 duly attested by Assistant Director, DRAP, Lahore on 19-10-2017 and Copy of invoice no U05/17-18/391 dated 28-08-2017 duly attested by Assistant Director, DRAP, Lahore on 12-09-2017, were provided.
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr#	Section	Observations/Deficiencies/ Short-comings	Reply of Firm Vide dairy No.3554 dated 18-01-2023
01	3.2.S.2.2	Drug substance manufacturer has only provided blending of drug substance, i.e. Meropenem with Sodium Carbonate which acts as an excipient, however the method of manufacturing / flow chart of manufacturing step involved in manufacturing of Meropenem are not provided.	The method of manufacturing, flow chart, along with control of materials, control of critical steps and intermediates, process validation, and manufacturing process development are all part of closed part of DMF.
02	3.2.S.4.2	The pharmacopoeial (USP) analytical method of testing Sodium contents is established by preforming tests on atomic absorption spectroscopy, whereas firm has used non pharmacopoeial method (inductive coupled plasma optical emission spectrometer), Clarification is required.	ICP-OES is the latest technique with the same principle as AAS, there is no difference in fact. ICP- OES analyze different metals in a sample simultaneously and AAS use individual lamps sequentially.
03	3.2.S.4.3	Analytical method validation of Drug substance conducted by Finished product manufacturer does not provide details of actual Assay method of analytical testing, which are required.	Details of actual assay method of analytical testing is enclosing as Standard Analytical Procedure (SAP) in **Annexure - I**
04	3.2.S.4.4	The COA of 3 batches (1705203623, 170525135, 1705205096), of drug substance conducted and performed by Finished product manufacturer does not mention tests for sterility and sub visible particles, Content of Sodium carbonate and Bacterial endotoxin test. Clarification is needed	Clarifications are enclosing in **Annexure - II**

05	3.2.P.2.2.1	Clarification and justification of taking 1.14 gm and 0.57 gm of Meropenem and sodium carbonate blended powder per vial of 1 gm and 500 gm of Finished product as mentioned in master formulation respectively.	Justification for the quantities of Meropenem and sodium carbonate blended powder is enclosing in **Annexure - III**
06	3.2.P.2.2.2	COA does not mentioned complete tests for conducting Pharmaceutical development as per tests mentioned in section 3.2.P.5.1	Clarification including Standard Analytical Procedure (SAP) are enclose in **Annexure - IV**
07	3.2.P.5.2	The claimed finished product specifications are USP, however the provided analytical method for determination of sodium contents is not in accordance with USP monograph as monograph stated Atomic Absorption spectroscopy test for determination sodium contents in finished product, and clarification is required. The complete analytical methods are not in accordance with USP monograph, clarification is required.	Justification and Standard Analytical Procedure (SAP) are enclose in **Annexure - V**

Firm has also submitted reply vide 1713 dated 18-01-2023 as under,

Cross reference regarding the approval of Meropenem Injection 500mg & 1000mg in 312 & 323 DRB Meetings respectively for the registration of our product "Mapnem Injection 500mg & Mapnem Injection 1000mg".

This is with reference to your Letter Vide No. F.1-1/2020/PEC-DRAP (DD PE&R/PEC) dated 06th January, 2023 regarding the Observations/Deficiencies/ Short-comings for our applied products **"Mapnem (Meropenem) Injection 500mg & Mapnem (Meropenem) Injection 1000mg".** The Finish products Batch Numbers of the above mentioned applied products Mapnem (Meropenem) Injection 500mg **(Batch Nos.: T7003, T7004 & T7005)** and Mapnem (Meropenem) Injection 1000mg **(Batch Nos: U7003, U7004 & U7005)** and also **API (Meropenem**) (Batch Nos. 1705205135, 1705205096 & 1705203623, manufactured by Aurobindo Phrama, India) given in the CTD dossiers are similar to the Meropnem Injections applied by **M/s Aspin Pharma (Pvt) Ltd.** (Refer attached Meeting minutes of DRB meeting 323) and **M/s Healthtek (Pvt.) Limited** (Refer attached Meeting minutes of DRB meeting 312), that is both the company got approval of the said products on the basis of similar Finish products samples / data manufactured by M/s Stallion Pharma, used in our dossiers. On the basis of the approval granted to M**/s** Aspin Pharma (Pvt) Ltd. and M/s Healthtek (Pvt.) Limited, we request you to kindly grant us registration of our said products at the earliest.

Applicant firm	M/s Aspin Pharma (Pvt) Ltd. Plot No. 10 & 25 Sector 20, Korangi Industrial Area Karachi
Manufacturer firm	M/s Stallion Pharmaceuticals (Pvt) Ltd. 581, Sundar Industrial Estate, Raiwind Road Lahore
Brand Name	ASPINEM 500 mg Injection
Batch No. of drug product	T7003,T7004,T7005
Source of API	M/s Aurobindo Pharma Ltd.India.
Case No.	747
Page number	620
Registration Board meeting	323rd meeting of DRB

Decision: Approved.

Registration Board further authorized its Chairman for issuance of registration letters upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd., 581-Sundar Industrial Estate, Lahore wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**

Registration Board meeting	323rd meeting of DRB

Decision: Approved.

Registration Board further authorized its Chairman for issuance of registration letters upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt) Ltd., 581-Sundar Industrial Estate, Lahore wherein panel shall also review the testing of drug substance and drug product of applied formulation as per pharmacopoeial requirements.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**

Assistant Director (EFD) vide letter No. F.1-6/2019-PR-1(EFD) dated 29-12-2022 has informed that M/s Highnoon Laboratories Limited of 17.5km, Multan Road, Lahore, Pakistan has achieved the benchmark of USD 415947.2/= during the fiscal Year 2021-2022 and requested for priority consideration of following molecules,

960.	Name, address of Applicant / Marketing Authorization Holder	Highnoon Laboratories Limited, Lahore
	Name, address of Manufacturing site.	Highnoon Laboratories Limited of 17.5km, Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.28652 dated 10/10/2022
	Details of fee submitted	PKR 75,000/-: dated 20/09/2022 Deposit Slip # 9560306224

	The proposed proprietary name / brand name	Empjardy XR 5mg/2.5mg/1000mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin…… …….….5mg Linagliptin…….2.5mg Metformin HCl (extended release) …….1000mg
	Pharmaceutical form of applied drug	Film coated extended- release tablet.
	Pharmacotherapeutic Group of (API)	**Empagliflozin:** Sodium glucose co-transporter 2 (SGLT2) inhibitors. **Linagliptin:** Dipeptidyl Peptidase-4 (DPP-4) Inhibitors. **Metformin HCl:** Antihyperglycemic drug.
	Reference to Finished product specifications	**Manufacturer's Specs/ Innovator**
	Proposed Pack size	5's, 7's, 10's, 14's, 20's, 28's, 30's, 50's, 60's, 100's, 120's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy XR Tablets by M/s Boehringer Ingelheim, FDA Approved.
	For generic drugs (me-too status)	Not Applicable
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 06/2022-DRAP (AD-334240006) issued by DRAP valid till 11/11/2023.
	Name and address of API manufacturer.	**Empagliflozin:** Fuxin Long Rui Pharmaceutical CO., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Linagliptin:** Fuxin Long Rui Pharmaceutical CO., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Metformin HCl:** Ipca Laboratories Limited H-4, M.I.D.C., Waluj Aurangabad (Maharashtra) Pin: 431136, India
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Metformin HCl is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Whereas Empagliflozin and Linagliptin complies Manufacturer's specifications. So, firm has submitted

		detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance as per inhouse specifications.
	Stability studies	Stability study conditions: **1. Empagliflozin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (L-E-20200409-D01-E06-02, L-E-20200409-D01-E06-03, L-E-20200409-D01-E06-04). **2. Linagliptin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (L-20170429-D01-L9-01, L-20170604-D01-L09-02, L-20170604-D01-L09-03). **3. Metformin HCl:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (9002ML2RMI, 9003ML2RMI, 9004ML2RMI).
	Module-III (Drug Product):	The firm has submitted detail of composition, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Trijardy XR Tablet 5/2.5/1000mg approved by US-FDA. CDP has been performed against the same brand that is Trijardy XR Tablet 5/2.5/1000mg approved by US-FDA in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method validation studies have submitted including Specificity, Linearity, range, accuracy, precision, Repeatability, Intermediate precision, Robustness, System Suitability.

STABILITY STUDY DATA

Manufacturer of API	**Empagliflozin:** Fuxin Long Rui Pharmaceutical CO., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Linagliptin:** Fuxin Long Rui Pharmaceutical CO., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Metformin HCl:** Ipca Laboratories Limited H-4, M.I.D.C., Waluj Aurangabad (Maharashtra) Pin: 431136, India

API Lot No.	**Empagliflozin:** E-20190920-D02-E06-01 **Linagliptin:** L-20210123-D01-L09-02 **Metformin HCl:** 21027ML2AJMI		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2 x 7's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD-22063	RD-22069	RD-22070
Batch Size	900 Tablets	900 Tablets	900 Tablets
Manufacturing Date	28-02-2022	28-02-2022	28-02-2022
Date of Initiation	04-04-2022	04-04-2022	04-04-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to previous approval of Ultivair 50mcg/ 110mcg rotacaps, which was presented in 320th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 16-Nov-2024.Firm has also provided Drug Manufacturing License of Manufacturer M/s Fuxin Long Rui,Co Ltd,Fluride Industrial Park,Femeny County,Fuxin city,Liaoning Province, China vide DML No .LIAO20150233 valid till 17-11-2027. **Linagliptin:** The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 16-Nov-2024. Firm has also provided Drug Manufacturing License of Manufacturer M/s Fuxin Long Rui,Co Ltd,Fluride Industrial Park,Femeny County,Fuxin city,Liaoning Province, China vide DML No .LIAO20150233 valid till 17-11-2027. **Metformin HCl:** The firm had provided Valid GMP certificate No. NEW-WHO-GMP/ CERT/AD/104179/2021/11/37725 issued by WHO valid till 27-Oct-2024 and DML No. 25-AD/070 issued by FDA Maharashtra valid till 31-March-2024 of M/s Ipca Laboratories Limited, India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice (invoice# HN200116-F) Dated 16-01-2020 cleared by DRAP Lahore office dated 28-01-2020 specifying import 50Kg of Empagliflozin (Batch# E-20190920-D02-E06-01). **Linagliptin:**

		Firm has submitted copy of invoice (invoice# HN21052801) Dated 14-07-2021 cleared by DRAP Lahore office dated 09-08-2021 specifying import 01 Kg of Linagliptin (Batch# L-20210123-D01-L09-02). **Metformin HCl:** Firm has submitted copy of invoice (invoice# MEG2122/1630495) Dated 10-05-2021 cleared by DRAP Lahore office dated 21-05-2021 specifying import 2000 Kg of Metformin HCl (Batch# 21027ML2AJMI).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observations	Reply of Firm
1.	**1.6.5**	Valid GMP certificate of M/s IPCA laboratories Ltd. India is expired and valid copy of GMP for Metformin HCl is required.	Valid GMP is attached as **Annexure-I**
2.	**2.3. S.5**	COA of Reference standard / working standards of Drugs substances from corresponding sources.	COA of Reference standards from corresponding sources are attached as **Annexure-II**
3.	**1.5.2**	Reference products mention the formulation with extended-release core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release outer core however same is not mentioned as label claim in instant applications.	Our formulation is same as the reference product formulation with core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release and verified by the provided manufacturing process. Please consider the below label claim **Each film-coated extended-release tablet contains:** **Empagliflozin …….. 5mg** **Linagliptin …… 2.5 mg** **(as immediate release coating)** **Metformin HCl …… 1000mg** **(as extended release core)**
4.	**2.3. P.2.1.2**	Applied composition of finished product excipients are significantly different from innovator product as innovator product contains polyethylene oxide, carnauba vax, n-butyl alcohol, ammonium hydroxide which are not present in applied formulation.	All these excipients are used only for printing mark on tablets as innovator's tablets have printing marks on them while applied products are without any printing mark on tablet. Due to this reason, these excipients are absent in our formulation.

		However, finished product formulation mentions simethicone 30% (emulsion (which is registered API as drug in Pakistan) which is not present in Innovator's product. Clarification and compatibility studies is required.	In applied product, Simethicone has been used as an excipient in coating. The main use of Simethicone as an excipient is as an antifoaming agent in pharmaceutical manufacturing processes, mentioned in Handbook of Pharmaceutical Excipients. Reference & compatibility studies are attached as Annexure-III
5.	**2.3. P.2.2.2**	Scientific Justification of 5% excess of Empagliflozin & Linagliptin is required.	We have used 5% excess of Linagliptin & Empagliflozin in trial batches because these API's are present in coating of the products. And there might be loss in coating process. However, We will assure that we will validate the contents of these API's in commercial batches & will reduce to 3%.
6.	**2.3.P.5.1**	The dissolution release time specification of Empagliflozin (30 min) is not as per innovator product. (45 min). Clarification is required.	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
		The dissolution release time specification of Metformin HCl (1hr, 4hr & 12hr) is not as per innovator product (2hr, 4hr & 12hr.). Clarification is required	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
7.	**2.3.P.5.4**	Uniformity of Dosage form test (content uniformity test) for empagliflozin & Linagliptin as less than 25% of total weight of tablet is not conducted by USP method. (L1 & L2 Method). Clarification is required.	Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity, while uniformity of dosage unit of Metformin HCl is performed by weight variation. Specifications & Testing method is attached for reference. Attached as **Annexure-IV**
8.	**3.2.S.4.2**	Chromatographic condition of Empagliflozin used by finished product manufacturer for analytical assay are different from the conditions provided by substance manufacturer (mobile phase (acetonitrile concentration), flow rate & column temperature). Dilution method and ingredients of sample & reference used by finished products manufacturer is different from substance manufacturer. Clarification is needed. Formula for calculation used by finished product manufacturer is different from substance manufacturer. Clarification is required. Isomer testing (chiral) as provided and conducted by substance manufacturer is not conducted by finished product manufacturer. Clarification is required.	Updated specification & testing method of API manufacturer & Finished Product manufacturer for Empagliflozin is attached as **Annexure-V**
9.	**3.2.S.4.1**	Linagliptin is R-Enantiomer, however substance & finished has not mentioned enantiomeric impurity test (s-isomer) in specification by API & finished product manufacturer. Clarification is required.	Updated specification & testing method including enantiomeric impurity test (s-isomer) of API manufacturer & Finished Product manufacturer for Linagliptin is attached as **Annexure-VI**
10.	**3.2.P.5.3**	Specificity studies shall be submitted for the analysis method of metformin in dissolution test, where in it could be	Specificity studies are attached as **Annexure-VII**

		established that the assay results for Metformin HCl are not interfered with the presence of other 2 drug substances in the sample aliquot.	
11.	**3.2.P.8.3**	The provided DRAP cleared invoice No. HN200116-F dated 16-01-2020 for import of Empagliflozin mentions remarks of clearance officer "conditional clearance, consumption restricted." Consumption / utilization resumption order are required. Stability study data of applied product testing specification for dissolution test as per 2.3.P.5.1 are not in accordance to innovator product. Uniformity of dosage form test is conducted by weight verification method, however content of Empagliflozin & Linagliptin is less than 25mg per tablet. Clarification is required to for conducting content uniformity test through weight variation method as per USP. Stability study data (accelerated & real time) at 6-month time interval is missing which is required.	API was conditionally released subject to provision of verifiable GMP certificate of API manufacturer. Required document was submitted on 18-02-2020. GMP status was verified accordingly and there were many lots of same API from the same manufacturer have been released for use in our already registered products contains empagliflozin. Dissolution Specification limits are selected based on comparative dissolution profile results of Reference & applied products. Where release of empagliflozin in both products are more than 90% in 30 minutes. We updated the specification as per Innovator's specification and will assure the stability in commercial batches as per updated specification. Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity and Metformin HCl by weight variation. Specification & Testing method is attached for reference. 6 months stability data (accelerated & real time) was submitted vide letter No HNL/RA-271/22 dated 10-Nov-2022, Acknowledgment letter is enclosed. Acknowledgment along with 6-month stability data is attached as **Annexure-VIII**

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Metformin HCl:** Ipca Laboratories Limited H-4, M.I.D.C., Waluj Aurangabad (Maharashtra) Pin: 431136, India
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Metformin HCl is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

		Whereas Empagliflozin and Linagliptin complies Manufacturer's specifications. So, firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance as per inhouse specifications.
	Stability studies	Stability study conditions: **3. Empagliflozin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (L-E-20200409-D01-E06-02, L-E-20200409-D01-E06-03, L-E-20200409-D01-E06-04). **4. Linagliptin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (L-20170429-D01-L9-01, L-20170604-D01-L09-02, L-20170604-D01-L09-03). **3. Metformin HCl:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (9002ML2RMI, 9003ML2RMI, 9004ML2RMI).
	Module-III (Drug Product):	The firm has submitted detail of composition, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Trijardy XR Tablet 10mg/5mg/1000mg approved by US-FDA. CDP has been performed against the same brand that is Trijardy XR Tablet 10mg/5mg/1000mg approved by US-FDA in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method validation studies have submitted including Specificity, Linearity, range, accuracy, precision, Repeatability, Intermediate precision, Robustness, System Suitability.

Remarks OF Evaluator:

Sr. No.	Section	Observations	Reply of firm
1.	**1.6.5**	Valid GMP certificate of M/s IPCA laboratories Ltd. India is expired and valid copy of GMP for Metformin HCl is required.	Valid GMP is attached as **Annexure-I**
2.	**2.3. S.5**	COA of Reference standard / working standards of Drugs substances from corresponding sources.	COA of Reference standards from corresponding sources are attached as **Annexure-II**
3.	**1.5.2**	Reference products mention the formulation with extended-release core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release outer core however same is not mentioned as label claim in instant applications.	Our formulation is same as the reference product formulation with core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release and verified by the provided manufacturing process. Please consider the below label claim **Each film-coated extended-release tablet contains:** **Empagliflozin …….. 10mg** **Linagliptin …… 5 mg** **(as immediate release coating)** **Metformin HCl …… 1000mg** **(as extended release core)**

4.	**2.3. P.2.1.2**	Applied composition of finished product excipients are significantly different from innovator product as innovator product contains polyethylene oxide, carnauba vax, n-butyl alcohol, ammonium hydroxide which are not present in applied formulation.	All these excipients are used only for printing mark on tablets as innovator's tablets have printing marks on them while applied products are without any printing mark on tablet. Due to this reason, these excipients are absent in our formulation.
		However, finished product formulation mentions simethicone 30% (emulsion (which is registered API as drug in Pakistan) which is not present in Innovator's product. Clarification and compatibility studies is required.	In applied product, Simethicone has been used as an excipient in coating. The main use of Simethicone as an excipient is as an antifoaming agent in pharmaceutical manufacturing processes, mentioned in Handbook of Pharmaceutical Excipients. Reference & compatibility studies are attached as Annexure-III
5.	**2.3. P.2.2.2**	Scientific Justification of 5% excess of Empagliflozin & Linagliptin is required.	We have used 5% excess of Linagliptin & Empagliflozin in trial batches because these API's are present in coating of the products. And there might be loss in coating process. However, We will assure that we will validate the contents of these API's in commercial batches & will reduce to 3%.
6.	**2.3.P.5.1**	The dissolution release time specification of Empagliflozin (30 min) is not as per innovator product. (45 min). Clarification is required.	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
		The dissolution release time specification of Metformin HCl (1hr, 4hr & 12hr) is not as per innovator product (2hr, 4hr & 12hr.). Clarification is required	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
7.	**2.3.P.5.4**	Uniformity of Dosage form test (content uniformity test) for empagliflozin & Linagliptin as less than 25% of total weight of tablet is not conducted by USP method. (L1 & L2 Method). Clarification is required.	Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity, while uniformity of dosage unit of Metformin HCl is performed by weight variation. Specifications & Testing method is attached for reference. Attached as **Annexure-IV**
8.	**3.2.S.4.2**	Chromatographic condition of Empagliflozin used by finished product manufacturer for analytical assay are different from the conditions provided by substance manufacturer (mobile phase (acetonitrile concentration), flow rate & column temperature). Dilution method and ingredients of sample & reference used by finished products manufacturer is different from substance manufacturer. Clarification is needed. Formula for calculation used by finished product manufacturer is different from substance manufacturer. Clarification is required. Isomer testing (chiral) as provided and conducted by substance manufacturer is not	Updated specification & testing method of API manufacturer & Finished Product manufacturer for Empagliflozin is attached as **Annexure-V**

		conducted by finished product manufacturer. Clarification is required.	
9.	**3.2.S.4.1**	Linagliptin is R-Enantiomer, however substance & finished has not mentioned enantiomeric impurity test (s-isomer) in specification by API & finished product manufacturer. Clarification is required.	Updated specification & testing method including enantiomeric impurity test (s-isomer) of API manufacturer & Finished Product manufacturer for Linagliptin is attached as **Annexure-VI**
10.	**3.2.P.5.3**	Specificity studies shall be submitted for the analysis method of metformin in dissolution test, where in it could be established that the assay results for Metformin HCl are not interfered with the presence of other 2 drug substances in the sample aliquot.	Specificity studies are attached as **Annexure-VII**
11.	**3.2.P.8.3**	The provided DRAP cleared invoice No. HN200116-F dated 16-01-2020 for import of Empagliflozin mentions remarks of clearance officer "conditional clearance, consumption restricted." Consumption / utilization resumption order are required. Stability study data of applied product testing specification for dissolution test as per 2.3.P.5.1 are not in accordance to innovator product. Uniformity of dosage form test is conducted by weight verification method, however content of Empagliflozin & Linagliptin is less than 25mg per tablet. Clarification is required to for conducting content uniformity test through weight variation method as per USP. Stability study data (accelerated & real time) at 6-month time interval is missing which is required.	API was conditionally released subject to provision of verifiable GMP certificate of API manufacturer. Required document was submitted on 18-02-2020.GMP status was verified accordingly and there were many lots of same API from the same manufacturer have been released for use in our already registered products contains empagliflozin. Dissolution Specification limits are selected based on comparative dissolution profile results of Reference & applied products. Where release of empagliflozin in both products are more than 90% in 30 minutes. We updated the specification as per Innovator's specification and will assure the stability in commercial batches as per updated specification. Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity and Metformin HCl by weight variation. Specification & Testing method is attached for reference. 6 months stability data (accelerated & real time) was submitted vide letter No HNL/RA-271/22 dated 10-Nov-2022, Acknowledgment letter is enclosed. Acknowledgment along with 6-month stability data is attached as **Annexure-VIII**

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

962.	Name, address of Applicant / Marketing Authorization Holder	Highnoon Laboratories Limited, Lahore

	The proposed proprietary name / brand name	Empjardy XR 12.5mg/2.5mg/1000mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin…… ……..….12.5mg Linagliptin……..2.5mg Metformin HCl (extended release) ……1000mg
	Pharmaceutical form of applied drug	Film coated extended- release tablet.
	Pharmacotherapeutic Group of (API)	**Empagliflozin:** Sodium glucose co-transporter 2 (SGLT2) inhibitors. **Linagliptin:** Dipeptidyl Peptidase-4 (DPP-4) Inhibitors. **Metformin HCl:** Antihyperglycemic drug.
	Reference to Finished product specifications	**Manufacturer's Specs/ Innovator**
	Proposed Pack size	5's, 7's, 10's, 14's, 20's, 28's, 30's, 50's, 60's, 100's, 120's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy XR Tablets by M/s Boehringer Ingelheim, FDA Approved.
	For generic drugs (me-too status)	Not Applicable
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 06/2022-DRAP (AD-334240006) issued by DRAP valid till 11/11/2023.
	Name and address of API manufacturer.	**Empagliflozin:** Fuxin Long Rui Pharmaceutical CO., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Linagliptin:** Fuxin Long Rui Pharmaceutical CO., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Metformin HCl:** Ipca Laboratories Limited H-4, M.I.D.C., Waluj Aurangabad (Maharashtra) Pin: 431136, India
	Module-II (Quality Overall Summary)	The firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.

	Module III (Drug Substance)	Official monograph of Metformin HCl is present in BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Whereas Empagliflozin and Linagliptin complies Manufacturer's specifications. So, firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance as per inhouse specifications.
	Stability studies	Stability study conditions: **5. Empagliflozin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (L-E-20200409-D01-E06-02, L-E-20200409-D01-E06-03, L-E-20200409-D01-E06-04). **6. Linagliptin:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (L-20170429-D01-L9-01, L-20170604-D01-L09-02, L-20170604-D01-L09-03). **3. Metformin HCl:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (9002ML2RMI, 9003ML2RMI, 9004ML2RMI).
	Module-III (Drug Product):	The firm has submitted detail of composition, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Trijardy XR Tablet 12.5mg/2.5mg/1000mg approved by US-FDA. CDP has been performed against the same brand that is Trijardy XR Tablet 12.5mg/2.5mg/1000mg approved by US-FDA in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method validation studies have submitted including Specificity, Linearity, range, accuracy, precision, Repeatability, Intermediate precision, Robustness, System Suitability.

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to previous approval of Ultivair 50mcg/ 110mcg rotacaps, which was presented in 320th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 16-Nov-2024. Firm has also provided Drug Manufacturing License of Manufacturer M/s Fuxin Long Rui,Co Ltd,Fluride Industrial Park,Femeny County,Fuxin city,Liaoning Province, China vide DML No .LIAO20150233 valid till 17-11-2027. **Linagliptin:** The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 16-Nov-2024..Firm has also provided Drug Manufacturing License of Manufacturer M/s Fuxin Long Rui,Co Ltd,Fluride Industrial Park,Femeny County,Fuxin city,Liaoning Province, China vide DML No .LIAO20150233 valid till 17-11-2027.

		Metformin HCl: The firm had provided Valid GMP certificate No. NEW-WHO-GMP/ CERT/AD/104179/2021/11/37725 issued by WHO valid till 27-Oct-2024 and DML No. 25-AD/070 issued by FDA Maharashtra valid till 31-March-2024 of M/s Ipca Laboratories Limited, India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice (invoice# HN200116-F) Dated 16-01-2020 cleared by DRAP Lahore office dated 28-01-2020 specifying import 50Kg of Empagliflozin (Batch# E-20190920-D02-E06-01). **Linagliptin:** Firm has submitted copy of invoice (invoice# HN21052801) Dated 14-07-2021 cleared by DRAP Lahore office dated 09-08-2021 specifying import 01 Kg of Linagliptin (Batch# L-20210123-D01-L09-02). **Metformin HCl:** Firm has submitted copy of invoice (invoice# MEG2122/1630495) Dated 10-05-2021 cleared by DRAP Lahore office dated 21-05-2021 specifying import 2000 Kg of Metformin HCl (Batch# 21027ML2AJMI).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observations	Reply of firm
1.	**1.6.5**	Valid GMP certificate of M/s IPCA laboratories Ltd. India is expired and valid copy of GMP for Metformin HCl is required.	Valid GMP is attached as **Annexure-I**
2.	**2.3. S.5**	COA of Reference standard / working standards of Drugs substances from corresponding sources.	COA of Reference standards from corresponding sources are attached as **Annexure-II**
3.	**1.5.2**	Reference products mention the formulation with extended-release core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release outer core however same is not mentioned as label claim in instant applications.	Our formulation is same as the reference product formulation with core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release and verified by the provided manufacturing process. Please consider the below label claim **Each film-coated extended-release tablet contains:** **Empagliflozin …….. 12.5mg** **Linagliptin …… 2.5 mg** **(as immediate release coating)**

			Metformin HCl …… 1000mg **(as extended release core**)
4.	**2.3. P.2.1.2**	Applied composition of finished product excipients are significantly different from innovator product as innovator product contains polyethylene oxide, carnauba vax, n-butyl alcohol, ammonium hydroxide which are not present in applied formulation.	All these excipients are used only for printing mark on tablets as innovator's tablets have printing marks on them while applied products are without any printing mark on tablet. Due to this reason, these excipients are absent in our formulation.
		However, finished product formulation mentions simethicone 30% (emulsion (which is registered API as drug in Pakistan) which is not present in Innovator's product. Clarification and compatibility studies is required.	In applied product, Simethicone has been used as an excipient in coating. The main use of Simethicone as an excipient is as an antifoaming agent in pharmaceutical manufacturing processes, mentioned in Handbook of Pharmaceutical Excipients. Reference & compatibility studies are attached as Annexure-III
5.	**2.3. P.2.2.2**	Scientific Justification of 5% excess of Empagliflozin & Linagliptin is required.	We have used 5% excess of Linagliptin & Empagliflozin in trial batches because these API's are present in coating of the products. And there might be loss in coating process. However, We will assure that we will validate the contents of these API's in commercial batches & will reduce to 3%.
6.	**2.3.P.5.1**	The dissolution release time specification of Empagliflozin (30 min) is not as per innovator product. (45 min). Clarification is required.	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
		The dissolution release time specification of Metformin HCl (1hr, 4hr & 12hr) is not as per innovator product (2hr, 4hr & 12hr.). Clarification is required	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
7.	**2.3.P.5.4**	Uniformity of Dosage form test (content uniformity test) for empagliflozin & Linagliptin as less than 25% of total weight of tablet is not conducted by USP method. (L1 & L2 Method). Clarification is required.	Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity, while uniformity of dosage unit of Metformin HCl is performed by weight variation. Specifications & Testing method is attached for reference. Attached as **Annexure-IV**
8.	**3.2.S.4.2**	Chromatographic condition of Empagliflozin used by finished product manufacturer for analytical assay are different from the conditions provided by substance manufacturer (mobile phase (acetonitrile concentration), flow rate & column temperature). Dilution method and ingredients of sample & reference used by finished products manufacturer is different from substance manufacturer. Clarification is needed. Formula for calculation used by finished product manufacturer is different from substance manufacturer. Clarification is required.	Updated specification & testing method of API manufacturer & Finished Product manufacturer for Empagliflozin is attached as **Annexure-V**

		Isomer testing (chiral) as provided and conducted by substance manufacturer is not conducted by finished product manufacturer. Clarification is required.	
9.	**3.2.S.4.1**	Linagliptin is R-Enantiomer, however substance & finished has not mentioned enantiomeric impurity test (s-isomer) in specification by API & finished product manufacturer. Clarification is required.	Updated specification & testing method including enantiomeric impurity test (s-isomer) of API manufacturer & Finished Product manufacturer for Linagliptin is attached as **Annexure-VI**
10.	**3.2.P.5.3**	Specificity studies shall be submitted for the analysis method of metformin in dissolution test, where in it could be established that the assay results for Metformin HCl are not interfered with the presence of other 2 drug substances in the sample aliquot.	Specificity studies are attached as **Annexure-VII**
11.	**3.2.P.8.3**	The provided DRAP cleared invoice No. HN200116-F dated 16-01-2020 for import of Empagliflozin mentions remarks of clearance officer "conditional clearance, consumption restricted." Consumption / utilization resumption order are required. Stability study data of applied product testing specification for dissolution test as per 2.3.P.5.1 are not in accordance to innovator product. Uniformity of dosage form test is conducted by weight verification method, however content of Empagliflozin & Linagliptin is less than 25mg per tablet. Clarification is required to for conducting content uniformity test through weight variation method as per USP. Stability study data (accelerated & real time) at 6-month time interval is missing which is required.	API was conditionally released subject to provision of verifiable GMP certificate of API manufacturer. Required document was submitted on 18-02-2020. GMP status was verified accordingly and there were many lots of same API from the same manufacturer have been released for use in our already registered products contains empagliflozin. Dissolution Specification limits are selected based on comparative dissolution profile results of Reference & applied products. Where release of empagliflozin in both products are more than 90% in 30 minutes. We updated the specification as per Innovator's specification and will assure the stability in commercial batches as per updated specification. Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity and Metformin HCl by weight variation. Specification & Testing method is attached for reference. 6 months stability data (accelerated & real time) was submitted vide letter No HNL/RA-271/22 dated 10-Nov-2022, Acknowledgment letter is enclosed. Acknowledgment along with 6-month stability data is attached as **Annexure-VIII**

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province -123000, China. **Metformin HCl:** Ipca Laboratories Limited H-4, M.I.D.C., Waluj Aurangabad (Maharashtra) Pin: 431136, India		
API Lot No.	**Empagliflozin:** E-20190920-D02-E06-01 **Linagliptin:** L-20210123-D01-L09-02 **Metformin HCl:** 21027ML2AJMI		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2 x 7's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD-22058	RD-22065	RD-22066
Batch Size	900 Tablets	900 Tablets	900 Tablets
Manufacturing Date	28-02-2022	28-02-2022	28-02-2022
Date of Initiation	04-04-2022	04-04-2022	04-04-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to previous approval of Ultivair 50mcg/ 110mcg rotacaps, which was presented in 320th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 16-Nov-2024..Firm has also provided Drug Manufacturing License of Manufacturer M/s Fuxin Long Rui,Co Ltd,Fluride Industrial Park,Femeny County,Fuxin city,Liaoning Province, China vide DML No .LIAO20150233 valid till 17-11-2027. **Linagliptin:** The firm has submitted copy of GMP certificate for M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China issued by Liaoning Fuxin Management Committee for Fluoride Industrial Development Zone The certificate is valid till 16-Nov-2024.Firm has also provided Drug Manufacturing License of Manufacturer M/s Fuxin Long Rui,Co Ltd,Fluride Industrial Park,Femeny County,Fuxin city,Liaoning Province, China vide DML No .LIAO20150233 valid till 17-11-2027.

		Metformin HCl: The firm had provided Valid GMP certificate No. NEW-WHO-GMP/ CERT/AD/104179/2021/11/37725 issued by WHO valid till 27-Oct-2024 and DML No. 25-AD/070 issued by FDA Maharashtra valid till 31-March-2024 of M/s Ipca Laboratories Limited, India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice (invoice# HN200116-F) Dated 16-01-2020 cleared by DRAP Lahore office dated 28-01-2020 specifying import 50Kg of Empagliflozin (Batch# E-20190920-D02-E06-01). **Linagliptin:** Firm has submitted copy of invoice (invoice# HN21052801) Dated 14-07-2021 cleared by DRAP Lahore office dated 09-08-2021 specifying import 01 Kg of Linagliptin (Batch# L-20210123-D01-L09-02). **Metformin HCl:** Firm has submitted copy of invoice (invoice# MEG2122/1630495) Dated 10-05-2021 cleared by DRAP Lahore office dated 21-05-2021 specifying import 2000 Kg of Metformin HCl (Batch# 21027ML2AJMI).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observations	Reply of firm
1.	**1.6.5**	Valid GMP certificate of M/s IPCA laboratories Ltd. India is expired and valid copy of GMP for Metformin HCl is required.	Valid GMP is attached as **Annexure-I**
2.	**2.3. S.5**	COA of Reference standard / working standards of Drugs substances from corresponding sources.	COA of Reference standards from corresponding sources are attached as **Annexure-II**
3.	**1.5.2**	Reference products mention the formulation with extended-release core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release outer core however same is not mentioned as label claim in instant applications.	Our formulation is same as the reference product formulation with core of Metformin HCl along with application of Empagliflozin & Linagliptin as immediate release and verified by the provided manufacturing process. Please consider the below label claim **Each film-coated extended-release tablet contains:** **Empagliflozin ……. 25mg** **Linagliptin …… 5 mg** **(as immediate release coating)**

			Metformin HCl …… 1000mg (as extended release core)
4.	**2.3. P.2.1.2**	Applied composition of finished product excipients are significantly different from innovator product as innovator product contains polyethylene oxide, carnauba vax, n-butyl alcohol, ammonium hydroxide which are not present in applied formulation.	All these excipients are used only for printing mark on tablets as innovator's tablets have printing marks on them while applied products are without any printing mark on tablet. Due to this reason, these excipients are absent in our formulation.
		However, finished product formulation mentions simethicone 30% (emulsion (which is registered API as drug in Pakistan) which is not present in Innovator's product. Clarification and compatibility studies is required.	In applied product, Simethicone has been used as an excipient in coating. The main use of Simethicone as an excipient is as an antifoaming agent in pharmaceutical manufacturing processes, mentioned in Handbook of Pharmaceutical Excipients. Reference & compatibility studies are attached as Annexure-III
5.	**2.3. P.2.2.2**	Scientific Justification of 5% excess of Empagliflozin & Linagliptin is required.	We have used 5% excess of Linagliptin & Empagliflozin in trial batches because these API's are present in coating of the products. And there might be loss in coating process. However, We will assure that we will validate the contents of these API's in commercial batches & will reduce to 3%.
6.	**2.3.P.5.1**	The dissolution release time specification of Empagliflozin (30 min) is not as per innovator product. (45 min). Clarification is required.	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
		The dissolution release time specification of Metformin HCl (1hr, 4hr & 12hr) is not as per innovator product (2hr, 4hr & 12hr.). Clarification is required	Updated specifications & testing method as per Innovator Specs are attached as **Annexure-IV**.
7.	**2.3.P.5.4**	Uniformity of Dosage form test (content uniformity test) for empagliflozin & Linagliptin as less than 25% of total weight of tablet is not conducted by USP method. (L1 & L2 Method). Clarification is required.	Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity, while uniformity of dosage unit of Metformin HCl is performed by weight variation. Specifications & Testing method is attached for reference. Attached as **Annexure-IV**
8.	**3.2.S.4.2**	Chromatographic condition of Empagliflozin used by finished product manufacturer for analytical assay are different from the conditions provided by substance manufacturer (mobile phase (acetonitrile concentration), flow rate & column temperature). Dilution method and ingredients of sample & reference used by finished products manufacturer is different from substance manufacturer. Clarification is needed.	Updated specification & testing method of API manufacturer & Finished Product manufacturer for Empagliflozin is attached as **Annexure-V**

		Formula for calculation used by finished product manufacturer is different from substance manufacturer. Clarification is required. Isomer testing (chiral) as provided and conducted by substance manufacturer is not conducted by finished product manufacturer. Clarification is required.	
9.	**3.2.S.4.1**	Linagliptin is R-Enantiomer, however substance & finished has not mentioned enantiomeric impurity test (s-isomer) in specification by API & finished product manufacturer. Clarification is required.	Updated specification & testing method including enantiomeric impurity test (s-isomer) of API manufacturer & Finished Product manufacturer for Linagliptin is attached as **Annexure-VI**
10.	**3.2.P.5.3**	Specificity studies shall be submitted for the analysis method of metformin in dissolution test, where in it could be established that the assay results for Metformin HCl are not interfered with the presence of other 2 drug substances in the sample aliquot.	Specificity studies are attached as **Annexure-VII**
11.	**3.2.P.8.3**	The provided DRAP cleared invoice No. HN200116-F dated 16-01-2020 for import of Empagliflozin mentions remarks of clearance officer "conditional clearance, consumption restricted." Consumption / utilization resumption order are required.	API was conditionally released subject to provision of verifiable GMP certificate of API manufacturer. Required document was submitted on 18-02-2020. GMP status was verified accordingly and there were many lots of same API from the same manufacturer have been released for use in our already registered products contains empagliflozin.
		Stability study data of applied product testing specification for dissolution test as per 2.3.P.5.1 are not in accordance to innovator product.	Dissolution Specification limits are selected based on comparative dissolution profile results of Reference & applied products. Where release of empagliflozin in both products are more than 90% in 30 minutes. We updated the specification as per Innovator's specification and will assure the stability in commercial batches as per updated specification.
		Uniformity of dosage form test is conducted by weight verification method, however content of Empagliflozin & Linagliptin is less than 25mg per tablet. Clarification is required to for conducting content uniformity test through weight variation method as per USP. Stability study data (accelerated & real time) at 6-month time interval is missing which is required.	Uniformity of Dosage Unit of Empagliflozin & Linagliptin is performed by content uniformity and Metformin HCl by weight variation. Specification & Testing method is attached for reference. 6 months stability data (accelerated & real time) was submitted vide letter No HNL/RA-271/22 dated 10-Nov-2022, Acknowledgment letter is enclosed. Acknowledgment along with 6-month stability data is attached as **Annexure-VIII**

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

C – HUMAN (Deferred) Form-5: -

964.	Name and address of manufacturer/ Applicant	M/S Shrooq Pharmaceuticals (Pvt)Ltd, Lahore,21-Km,Ferozpur Road,Lahore.
	Brand Name + Dosage Form + Strength	Piracet Injection IM/IV
	Composition	Each ml contains: Piracetam.....1gm/5ml
	Diary No. Date of R & I & fee	Dy. No 682 dated 11-04-2014; Rs.20,000/-
	Pharmacological Group	Nootropic and psychostimulant
	Type of Form	Form-5
	Finished product Specification	Manufacturer's specifications
	Pack size & Demanded Price	12's, as per SRO.
	Approval status of product in Reference Regulatory Authorities	Not verified during previous evaluation
	Me-too status	Cibrotam Injection 1gm of M/s Vision Pharmaceutical, Islamabad.
	GMP status	GMP certificate issued to M/s Shrooq Pharma based upon evaluationconducted on 29-10-2021.
	Previous Remarks of the Evaluator	1st letter: 09th March, 2018 Reminder letter:17th April, 2018● Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting
	Previous Decision of 282nd meeting:	The case was presented in 282nd meeting of DRB and Board decided to deferred the case for Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.
	Latest Firm Response:	Firm has submitted reply vide dairy No. 10008 dated 20-4-2022 and submitted international reference: Nootropil 1 g Injection of UCB Pharma S.P.A, Italy
	Remarks of Evaluator	
	Previous decision of 217th meeting :	Decision: Deferred for submission of evidence of approval of applied formulation in 5ml ampoule in reference regulatory authorities/agencies which were Adopted by the Registration Board in its 275th meeting as the applied formulation is authorized by AIFA Italy as 12g/60ml solution for infusion and 3g/15ml oral and injectable solution for intravenous use.
	Reply of the Firm	Firm has submitted reply vide dairy No 33794 dated 23-11-2022 and submitted revised label claim as " Each 60 ml Vial Contains (I/V) Piracetam……12 gm (Solution for Injection)." Firm has submitted revised formulation and Form -5 , however Preregistration variation fee is missing .
	Remarks of Evaluator	
	Decision: Deferred for evidence of approval of revised formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.	
965.	Name and address of manufacturer/ Applicant	M/S Shrooq Pharmaceuticals (Pvt)Ltd, Lahore,21-Km,Ferozpur Road,Lahore.
	Brand Name + Dosage Form + Strength	BONPAC Injection
	Composition	Each 3 ml Ampoule Contains: Ibandronate Sodium Eq. to Ibandronic Acid…….3mg

	Diary No. Date of R & I & fee	Dy. No 689 dated 11-04-2014; Rs. 20,000/- **Duplicate Dossier** Dy. No 28236 dated 05-10-2022	
	Pharmacological Group	Bisphosphonate	
	Type of Form	Form-5	
	Finished product Specification	Manufacturer's specifications	
	Pack size & Demanded Price	1's, as per SRO.	
	Approval status of product in Reference Regulatory Authorities	USFDA Approved Injection Boniva 3mg/3ml (prefilled syringe)	
	Me-too status	Adronil 3mg/3ml Injection of M/s Searle (Reg. # 075870)	
	GMP status	GMP certificate issued to M/s Shrooq Pharma based upon evaluation conducted on 29-10-2021.	
	Remarks of the Evaluator		
	Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021. **Registration Board further decided to verify fee challan as per decision of 285th meeting of Registration Board.**		
966.	Name and address of manufacturer/ Applicant	Sigma Pharma International (Pvt) Ltd.E-50, NWIZ Port Qasim, Karachi. (Capsule Section)	
	Brand Name + Dosage Form + Strength	MAYBE MR Capsule 200 mg	
	Composition	Each modified release capsule contains: Mebeverine Hydrochloride as extended release pellets eq to Mebeverine Hcl…….200 mg	
	Diary No. Date of R & I & fee	Dy. No 14775 dated 20-04-2018; Rs. 20,000/- dated 20-04-2018 Dy. No 31936 dated 22-11-2021 (Duplicate Dossier)	
	Pharmacological Group	Antispasmodics	
	Type of Form	Form-5	
	Finished product Specification	Manufacturer's Specifications	
	Pack size & Demanded Price	10's, As per SRO	
	Approval status of product in Reference Regulatory Authorities	Colofac MR Modified release capsule (MHRA Approved)	
	Me-too status	Mebro-MR 200mg Capsule by M/s Regal Pharmaceuticals (Reg# 083115)	
	GMP status	Firm has provided GMP certificate based on evaluation conducted on 12th November 2020 valid for two years.	
	Remark of the Evaluator [XVI]	Deficiency letter was issued to firm and asked to provide: 1.Form 5 mentions label claim as Each modified release capsule contains: "Mebeverine Hydrochloride as extended release pellets eq to Mebeverine Hcl…….200 mg," whereas per master formulation submitted mebeverine Hcl	Reply of the firm is awaited.

		250mg/capsule. You are required to clarify this anomaly in submitted documents along with preregistration variation fee challan. 2. Source of pellets is not provided, provide source of pellets along with GMP certificate of source, stability data and COA.In case of Imported source also provide source approval fee challan.	
	Pervious Decision of 316th meeting: Deferred for Following; • Source of pellets along with stability studies data, GMP certificate of supplier and differential fee in case of import of pellets. • Form 5 mentions label claim as Each modified release capsule contains: "Mebeverine Hydrochloride as extended release pellets eq to Mebeverine Hcl…….200 mg," whereas per master formulation submitted Mebeverine Hcl 250mg/capsule. You are required to clarify this anomaly in submitted documents along with preregistration variation fee challan.		
	Reply of Firm: Firm has submitted reply vide dairy No. 39558 dated 20-12-2022 and submitted revised Form-5 along with revised formulation with label claim as under, Each Capsule Contains: Mebeverine HCl as sustain release pellets Eq. to Mebeverine HCl …… 200 mg (Innovator specifications) Firm has also submitted source of pellets as M/s Vision Laboratories (Pvt.) ltd, along with COA of pellets , copy of GMP certificate and stability study data of pellets.		
	Remarks of Evaluator:		
	Decision: Approved as per following label claim with Innovator's specifications: **Each Capsule Contains:** **Mebeverine HCl as sustain release pellets Eq. to Mebeverine HCl …… 200 mg** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021, before issuance of registration letter.**		

E: - Veterinary (Deferred)

967.	Name and address of manufacturer/ Applicant	My Lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.
	Brand Name + Dosage Form + Strength	METABOLASE Injectable Solution
	Composition	Each 100 ml contains: L-Carnitine Hcl(613.3 mg)Equivalent to Carnitine….50 mg D.L Acetylmethionine ……200 mg Cyanocobalamin…….0.2 m A-Tocopherol Acetate(33.0mg) Equivalent to A-Tocopherol……30 mg
	Diary No. Date of R & I & fee	Dy. No 12318 dated 06-03-2019; Rs.20,000/- dated 06-03-2019.
	Pharmacological Group	Amino Acid and vitamins
	Type of Form	Form - 5
	Finished product Specification	Not provided

	Pack size & Demanded Price	100ml, Glass vials.
	Approval status of product in Reference Regulatory Authorities	Not applicable.
	Me-too status	METABOLASE FORTE INJECTABLE SOLUTION, 043109, PRIX PHARMACEUTICA, LAHORE, imported from ITALY
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as " In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing , machinery/equipment , material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab (pvt) Ltd. Khanqah sharif Bahawalpur , was found to be operating at a satisfactory level of GMP compliance for the following sections only, oral Liquid (General)II and Aerosol section were under maintenance and were not functional at time of inspection": Liquid Injection Section (General) Oral Powder Premix Section (General) Oral Liquid (General)(I) Liquid Injection (penicillin) Dry Powder Injection (penicillin) Oral Powder (penicillin) Liquid Injection (hormone) Liquid Injection (Steroid)
	Remarks of the Evaluator	• Master Formulation with Complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Pack Size, container and closure is not provided. • Form-5 cover letter dully signed by management. • Pre-registration variation fee challan.
	Previous Decision of 321th meeting: Deferred for following shortcomings: **1. Master Formulation with Complete Outline of manufacturing method is required.** **2. Complete finished good testing specifications mentioning assay of finished products.** **3. Pack Size, container and closure is not provided.** **4. Form-5 cover letter dully signed by management.** **5. Pre-registration variation fee challan**	
	Reply of Firm: Firm has submitted revised Form-5 along with preregistration fee challan of 30000/= vide slip No 97077652776 dated 07-11-2022. In revised form-5 firm has mentioned revised label claim as under: Each ml contains: L-Carnitine Hcl(61.3mg)Equivalent to L.Carnitine……...50 mg D.L Acetylmethionine ……..……200 mg Cyanocobalamin……0.2 mg Alpha-Tocopherol Acetate(33.0mg) Equivalent to Alpha-Tocopherol……30 mg Revised form-5 also mentioned innovator specifications and pack size of 100 ml in glass vial ,me too status , and revised master formulation along with outline of manufacturing method.	
	Remarks of Evaluator :	
	Previous Decision of 323rd meeting : Deferred the case for provision of evidence of testing facility along with drug analytical procedure for applied drug product.	
	Reply of Firm: Firm has submitted reply vide dairy No.3539 PEC /DRAP dated 18-01-2023 and attached pictures of HPLC and evidence of testing facility and attached assay testing method of above formulation including ,L-Carnitine Hcl ,Acetyle methionine and Alpha tocopherol through HPLC and Cyanocobalamin on UV spectrophotometer.	

	Remarks of evaluator :	
	Decision: Approved as per following label claim: **Each ml contains:** **L-Carnitine Hcl(61.3mg)Equivalent to L.Carnitine……...50 mg** **D.L Acetylmethionine ……..……200 mg** **Cyanocobalamin……0.2 mg** **Alpha-Tocopherol Acetate(33.0mg) Equivalent to Alpha-Tocopherol……30 mg**	
968.	Name and address of manufacturer/ Applicant	My lab (Pvt) Ltd. Khanqah sharif, Bahawalpur.
	Brand Name + Dosage Form + Strength	METABOLASE FORTE Injectable Solution
	Composition	Each ml Contains: DL-Acetyl methionine 200mg Eq To Cyanocobalamin……0.2mg Carnitine Hcl…61.3mg Eq To Carnitine……50mg A-Tocopherol Acetate……30mg
	Diary No. Date of R & I & fee	Dy. No12319 dated 06-03-2019; Rs.20,000/- dated 06-03-2019.
	Pharmacological Group	Vitamins & Amino acid
	Type of Form	Form - 5
	Finished product Specification	innovator
	Pack size & Demanded Price	50 ml glass vial
	Approval status of product in Reference Regulatory Authorities	Not Applicable
	Me-too status	METABOLASE FORTE INJECTABLE SOLUTION, 043109, PRIX PHARMACEUTICA, LAHORE, imported from ITALY
	GMP status	Panel GMP inspection was conducted on 24-02-2021 and 25-02-2021 and concluded as" In view of above inspection proceedings and facilities verified such as company profile, building ,production, in process controls, quality control testing, machinery/equipment, material management , air handling, water treatment system , personnel and documentation etc. the firm M/s Mylab (pvt) Ltd. Khanqah sharif Bahawalpur , was found to be operating at a satisfactory level of GMP compliance for the following sections only, oral Liquid (General)II and Aerosol section were under maintenance and were not functional at time of inspection" Liquid Injection Section (General) Oral Powder Premix Section (General) Oral Liquid (General)(I) Liquid Injection (penicillin) Dry Powder Injection (penicillin) Oral Powder (penicillin) Liquid Injection (hormone) Liquid Injection (Steroid)
	Remarks of the Evaluator	• Master Formulation with Complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Pack size, container and closure are not provided. • Undertaking at ending of Form-5 • The applied composition does not resemble to me to provided, i-e Metabolase Forte Injection. Submit revised label claim composition as per applied me to.
	Decision: Deferred for following shortcomings:	

	• Master Formulation with Complete Outline of manufacturing method is required. • Complete finished good testing specifications mentioning assay of finished products. • Pack size, container and closure are not provided. • Undertaking at ending of Form-5 • The applied composition does not resemble to me to provided, i-e Metabolase Forte Injection. Submit revised label claim composition as per applied me to
	Reply of Firm: Firm has submitted revised Form-5 along with preregistration fee challan of 30000/= vide slip No 94376926835 dated 16-11-2022. In revised form-5 firm has mentioned revised label claim as under: Each ml contains: L-Carnitine Hcl (61.3mg) Equivalent to L.Carnitine……...50 mg D.L Acetylmethionine ……..……200 mg Cyanocobalamin……0.2 mg Alpha-Tocopherol Acetate(33.0mg) Equivalent to Alpha-Tocopherol……30 mg Revised form-5 also mentioned innovator specifications and pack size of 50 ml in glass vial ,me too status , and revised master formulation along with outline of manufacturing method.
	Decision: Deferred the case for provision of evidence of testing facility along with drug analytical procedure for applied drug product.
	Reply of Firm: Firm has submitted reply vide dairy No.3539 PEC /DRAP dated 18-01-2023 and attached pictures of HPLC and evidence of testing facility and attached assay testing method of above formulation including ,L-Carnitine Hcl ,Acetyle methionine and Alpha tocopherol through HPLC and Cyanocobalamin on UV spectrophotometer.
	Remarks of Evaluator :

Item No. 13: Agenda of Evaluator PEC-X (Mst. Najia Saleem)

Case No. 01 Registration applications for local manufacturing of (veterinary) drugs

a. New Cases

969.	Name and address of manufacturer / Applicant	M/s Leads Pharma Pvt Ltd., Plot No. 81-A, Street # 6, I-10/3, Islamabad.
	Brand Name +Dosage Form + Strength	Top-NOC Powder
	Composition	Each Kg contains: Oxytetracycline HCl…250gm Colistin Sulphate…300MIU Neomycin Sulphate …250gm
	Diary No. Date of R& I & fee	Dy.No 5404 dated 06-05-2019 Rs.20,000/- dated 06-05-2019
	Pharmacological Group	Antibiotic
	Type of Form	Form 5
	Finished product Specification	Manufacturer's specifications
	Pack size & Demanded Price	100gm, 500gm,1Kg: Decontrolled
	Me-too status	Neochlor Powder of M/s Alina Combine Pharmaceuticals (Pvt) Karachi. (Reg. No. 058869)
	GMP status	GMP of relevant section
	Remarks of the Evaluator X	**Oral Powder (General-Vet) section** confirmed vide panel inspection report for grant of additional section based on inspection conducted on 17-02-2022. **Shortcomings:** • Latest GMP inspection report (conducted within the period of last three years).
	Decision: Approved.	
970.	Name and address of manufacturer / Applicant	M/s Leads Pharma Pvt Ltd., Plot No. 81-A, Street # 6, I-10/3, Islamabad.
	Brand Name +Dosage Form + Strength	Bovilex Injection 50mg/ml
	Composition	Each ml Contains: Buparvaquone…50mg
	Diary No. Date of R& I & fee	Dy.No 14644 dated 08-08-2019 Rs.20,000/- dated 07-08-2019
	Pharmacological Group	Antiprotozoal
	Type of Form	Form 5
	Finished product Specification	Manufacturer's specifications
	Pack size & Demanded Price	20ml, 50ml, 100ml: Decontrolled
	Me-too status	Bupralex Injection of M/s Star Laboratories (Pvt) Ltd., Lahore (Reg. No. 033264) 20ml, 50ml, 100ml.
	GMP status	GMP of relevant section
	Remarks of the Evaluator X	• **Injectable section** confirmed vide letter No. F.1-26/93-Lic (Vol. I)(M-205) dated 30-04-2007. • Firm has revised finished product specification from in-house to "**As per innovator's specifications**" along with the fee of Rs. 7,500/- via deposit slip no 695466498366. • Initially, multiple pack sizes (20ml, 50ml, and 100ml) of injectable dosage form were demanded in a single application. Now, the firm has demanded **20ml pack size**. **Shortcomings:**

		• Latest GMP inspection report (conducted within the period of last three years).
	Decision: Approved.	
971.	Name and address of manufacturer / Applicant	M/s Leads Pharma Pvt Ltd., Plot No. 81-A, Street # 6, I-10/3, Islamabad.
	Brand Name +Dosage Form + Strength	Avetonic Liquid
