Drug Regulatory Authority of Pakistan
T.F. Complex, Mauve Area, G-9/4
Islamabad

324th meeting of Registration Board was held on 24th to 26th January, 2023 in the Committee Room, Drug Regulatory Authority of Pakistan, G-9/4, Islamabad.

The meeting was chaired by Dr. Obaidullah, Chairman Registration Board DRAP. The meeting started with recitation of the Holy Verses.

Chairman, Registration Board inform the Board that Dr. Noor us Saba, Director, Biological Division is going to be retired on 3rd February, 2023 and it is her last meeting as Director, Biological Division. Members of Registration Board appreciated the work done by Dr. Noor us Saba and wishes for her best future life.

Following members attended the meeting:

1.	Ch. Zeeshan Nazir Bajar, Additional Director (BE&R/PE&R), DRAP.	Member/ Secretary
2.	Lt. Gen.(R) Prof. Dr. Karamat A. Karamat (HI-M.SI-M), Former Surgeon General Pakistan.	Co-opted Member
3.	Mr. Iftikhar A. Chaudhary, Hospital Pharmacist, Lahore	Member
4.	Dr. Qurban Ali, Ex-Director General, National Veterinary Laboratories, Islamabad	Co-opted Member (online)
5.	Dr. Noor us Saba, Director, Biological Evaluation & Research Division, DRAP	Member
6.	Dr. Muhammad Akram, Animal Husbandry Commissioner, M/o NFS&R	Co-opted Member
7.	Mr. Muhammad Hafez Ur Rehman, Rep. of Director DTL Govt. of Punjab Rawalpindi	Member
8.	Mr. Muhammad Aslam, Deputy Draftsman-I, Ministry of law & Justice, Islamabad.	Member
9.	Mr. Ghulam Mujtaba, Deputy Director, Representative of IPO	Member
10.	Dr. Imran Khan, Director, DTL, Peshawar	Member (online)
11.	Mr. Ajmal Sohail Asif, Director, QA&LT Division	Member
12.	Mr. Babar Khan, Representative of Division of MD&MD	Member

Mr. Nadeem Alamgir (Pharma Bureau), Dr. Izhar Hussain, Mr. Hamid Raza, Mr. Uzair Nagra & Mr. Jalal-ud-Din (PPMA) and Mr. Ziaulhaq & Mr. Amir (PCDA) attended the meeting as observers.

Director, BE&R was assisted by respective Additional Director and Assistant Directors for presentation of the agenda.

Item No. I: Confirmation of Minutes of 322nd meetings of Registration Board.

322nd meeting of Registration Board was held on 8th & 10th November, 2022. Accordingly, draft minutes of 322nd meeting of Registration Board were circulated among the members on 9th December, 2022 for perusal/approval/comments (if any) by 14th December, 2022 at 10:00am. Mr. Iftikhar Ahmad, Member (Registration Board) thorough email dated 13th December, 2022 approved the minutes. Rest of the members did not pass any comment. Hence minutes of 322nd meeting of RB stand approved.

Accordingly, fair minutes of 322nd meeting of RB were processed for perusal/approval of Chairman, Registration Board. After approval from Chairman Registration Board, fair minutes of 323rd meeting of Registration Board were circulated among relevant Divisions / Sections for implementation / compliance of decisions.

Decision: Registration Board noted the information and unanimously confirmed the minutes of 322nd meeting of Registration Board.

Item No. II: Confirmation of Minutes of 323rd meetings of Registration Board.

323rd meeting of Registration Board was held on 6th to 8th December, 2022. Accordingly, draft minutes of 323rd meeting of Registration Board were circulated among the members on 04th January, 2023 for perusal/approval/comments (if any) by 09th January, 2023 at 10:00am. Mr. Hafeez ur Rehman, DTL, Rawalpindi through email on 07th January, 2023 responded and ***"Please proceed"***. Mr. Iftikhar Ahmed, Member Registration Board through email on 09th January2023 responded as ***"Approved"*** minutes of the meeting. Rest of the members did not give any comments. Rest of the members did not pass any comment. Hence minutes of 323rd meeting of RB stand approved.

Accordingly, fair minutes of 323rd meeting of RB were processed for perusal/approval of Chairman, Registration Board. After approval from Chairman Registration Board, fair minutes of 323rd meeting of Registration Board were circulated among relevant Divisions / Sections for implementation / compliance of decisions.

Decision: Registration Board noted the information and unanimously confirmed the minutes of 323rd meeting of Registration Board.

Item No. III Division of Pharmaceutical Evaluation & Registration

Pharmaceutical Evaluation Cell (PEC)

Sr. No	Name of Evaluator	Title
1.	Mr. Farooq Aslam	Evaluator PEC-I
2.	Mr. Ammar Ashraf Awan	Evaluator PEC-II
3.	Mr. Muhammad Haseeb Tariq	Evaluator PEC-III
4.	Mst.Farzana Raja	Evaluator PEC-IV
5.	Mst. Iqra Aftab	Evaluator PEC-V
6.	Mr. Ishtiaq Shafique	Evaluator PEC-VI
7.	Mr. Muhammad Usman	Evaluator PEC-VIII
8.	Mr. Adil Saeed	Evaluator PEC-IX
9.	Mst. Najia Saleem	Evaluator PEC-X
10.	Dr. Farhadullah	Evaluator PEC-XI
11.	Mr. Shahid Nawaz	Evaluator PEC-XIII
12.	Mst. Saima Hussain	Evaluator PEC-XV
13.	Mr. Akbar Ali	Evaluator PEC-XVI
14.	Mr. Zia Ullah	Evaluator PEC-XVII
15.	Mr. Muneeb Ahmed	Evaluator PEC-XVIII
16.	Mst. Sana Kanwal	Evaluator PEC-XX

Evaluator PEC-I (Farooq Aslam)

Case No. I: Registration applications submitted on Form 5F (Human Import):
Priority Applications:
As per Decision of 257th meeting of Registration Board the registration applications for New molecules / New formulations / Anticancer etc. will be considered out of queue.

1.	Name, address of Applicant / Importer	M/s Lab Diagnostic System (SMC) Pvt. Ltd. plot 36-A, PSIC Taxila, Rawalpindi.
	Details of Drug Sale License of importer	License No: 01-374-0006-96845D Address: Lab Diagnostic Systems Pvt. Ltd. 36-A, PSIC, SIE, Taxila Rawalpindi Godown: N/A Validity: 04/08/2024 Status: License to sell drugs as a distributor
	Name and address of marketing authorization holder (abroad)	M/s Naprod Life Sciences Pvt. Ltd. Plot No. G-17/1, MIDC Tarapur, Boisar, Dist Palghar 401506, Mahaashtra state, India
	Name, address of manufacturer(s)	M/s Naprod Life Sciences Pvt. Ltd. Plot No. G-17/1, MIDC Tarapur, Boisar, Dist Palghar 401506, Mahaashtra state, India
	Name of exporting country	India
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) • Copy GMP certificate no. New-WHO-GMp/CERT/KD/111021/11/40081 valid till 27/04/2025 issued by FDA M.H India. • Original legalized CoPP (No. COPPP/CERT/KD/114093/2022/11/41431/203265 dated 20/07/2022) issued by Food and Drug Administration M.H India. The applied product is available in the market of exporting country for free sale. The facilities and operations conform to WHO GMP. The certificate is valid till 27/04/2025. The certificate is issued for 10mL and 50mL filled volume (1mg/mL).	
	Details of letter of authorization / sole agency agreement: • Copy of letter of authorization is submitted from Naprod Life Sciences Pvt. Ltd. wherein M/s Lab Diagnostic Systems (SMC) is authorize for registration for 10mg/10mL cisplatin injection.	
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No.27755 : 30/09/2022
	Details of fee submitted	PKR 150,000/- : 12/09/2022
	The proposed proprietary name / brand name	Cisplab 10mg/10mL injection

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Cisplatin……1mg
	Pharmaceutical form of applied drug	Solution for IV injection
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	BP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cisplatin 1mg/mL Sterile Concentrate (10mg/10mL, 50mg/50mL, 100mg/100mL), PL 04515/0026, MHRA Approved.
	For generic drugs (me-too status)	Cisplatin Injection 10mg by M/s Highnoon
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, detail of impurities and validations studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and product.
	Name, address of drug substance manufacturer	M/s Sun Pharmaceutical Industris Ltd., A-7/A-8, MIDC, Industrial Area, Ahmednagar, 414111, Maharashtra, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• Real time stability studies have been conducted at 25oC±2 and 60%RH±5% for 72 months of 3 batches • Accelerated stability study is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: (AH-3-08013, AH-3-08014, AH-3-08015)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, compatibility studies of excipients with drug substance manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, detail of impurities and the validation studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not submitted.
	Analytical method validation/verification of product	The firm has submitted analytical method verification / validation studies for drug substance and drug product including linearity, accuracy, specificity, force degradation, precision etc.
	Container closure system of the drug product	Type I amber colored glass vial
	Stability study data of drug product, shelf life and storage conditions	• Real time stability studies have been conducted at 30oC±2 and65%RH±5% for 24 months of 3 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: (NN7282, NN7287, NN7297)
Evaluation by PEC-I:		
Observations		**Response**
Please provide evidence of approval of the applied formulation by the reference regulatory authorities as specified by Registration Board in its 275th meeting and same strength and filled volume.		Cisplatin 1mg/mL Sterile Concentrate (10mg/10mL, 50mg/50mL, 100mg/100mL), PL 04515/0026, MHRA Approved.
Provide pharmaceutical equivalence studies against the reference / innovator's product (same strength and same filled volume) by performing the quality tests along with the detail of batch number, expiry, date of manufacturing, name of manufacturer etc.		*Please note that the pharmaceutical equivalence of 50mg/50mL is same for 10mg/10mL as the basic strength of product is 1mg/mL, only filled volume is different.*
Please provide detail of method of administration along with the accompanying diluents used for preparation of solution for IV administration. Provide compatibility studies of diluents with the applied formulation as well.		Submitted. Compatibility studies is submitted in 1000mL 0.9%Sodium chloride (after 12 hour storage at room temperature), 1000mL mixture of 0.9% sodium chloride (after 12 hour storage at room temperature), and 5% glucose (1:1), 1000mL 0.9% Sodium Chloride and Mannitol 5% (1:1) (after 12 hour storage at room temperature).
Decision: Approved as per Policy for inspection of manufacturer abroad. Registration letter will be issued upon submission of Pharmaceutical equivalence studies against the innovator/reference product of same fill volume and strength. • **Furthermore, Registration Board was apprised regarding an e. mail received to Director PE&R Division from M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.** • **In context of above cited e.mail Registration Board decided that firm shall submit afresh notarized "Sole Agency Agreement" between M/s Lab Diagnostic System & M/s Naprod Life Sciences Pvt. Ltd before issuance of registration letter.**		
2.	Name, address of Applicant / Importer	M/s Lab Diagnostic System (SMC) Pvt. Ltd. plot 36-A, PSIC Taxila, Rawalpindi.

3.	Name, address of Applicant / Importer	M/s Himmel Pharmaceuticals (Pvt) Ltd. 793-D, Block "C", Faisal Town Lahore.
	Details of Drug Sale License of importer	**License No:** 05-352-0065-016174D **Address:** 793-D, Block C, Faisal Town District Lahore. **Validity:** 06-02-2022 **Status:** License to sell drugs as a distributor **Address of Go-down:** NA
	Name and address of marketing authorization holder (abroad)	M/s AqVia GmbH Kaiser-Wilhelm Str. 89 20355 Hamburg Germany.
	Name, address of manufacturer(s)	M/s AqVia GmbH Werkstr.21 23942 Dassow Germany.
	Name of exporting country	Germany
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate) **CoPP:** Firm has submitted Original, Legalized CoPP (Certificate# AQV/230720/34) issued on 23-07-2020 by Behörde für Justiz und Verbraucherschutz der Freien und Hansestadt Hamburg Abteilung V4 Pharmaziewesen und Medizinprodukte Billstraße 80 20539 Hamburg Germany. The CoPP confirms the free sale status of the applied product and GMP status of the manufacturer through periodic inspections every 2 years.	
	Details of letter of authorization / sole agency agreement Firm has submitted copy of letter of authorization dated 17-07-2020 from AqVida GmbH Kaiser-Wilhelm Str-89 20355 Hamburg Germany. The letter specifies irinotecan HCl AqVida 20mg/ml concentrate for solution for infusion with filling size of 0mg/2ml, 100mg.5ml and 300mg/15ml.	
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP)

		☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy No 10480: 25-04-2022
	Details of fee submitted	PKR 150,000/-: 25-06-2021
	The proposed proprietary name / brand name	IRINOTECAN HCl AqVida 100mg/5mL concentrate for solution for infusion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Irinotecan hydrochloride as trihydrate ……..20mg
	Pharmaceutical form of applied drug	Clear yellow solution not more coloured than GT3, free of visible particles
	Pharmacotherapeutic Group of (API)	Other Antineoplastic agents
	Reference to Finished product specifications	In-House
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved.
	For generic drugs (me-too status)	Irinotel 100mg Injection by Atco pharma International (Reg#045763)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Laurus Labs Limited Plot No. 21, Jawaharlal Nehru Pharma City, Parawada, Visakhpatnam Andhra Pradesh India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC / 60% RH. The stability study data is till 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of

		specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Type I Amber Glass vial
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted long term stability data of 3 batches for 36 months at 30±2°C, 75±5%RH and 6 months at 40°C±75%RH for three batches.
Evaluation by PEC-I:		
Sr. No.	**Observations**	**Response**
1	Submit valid copy of Drug Sale License.	The firm has submitted revised Form 5F with change of address of the applicant which is as follows; **Name and address of applicant:** M/s Himmel Pharmaceuticals (pvt) Ltd., ground floor, 6-Judicial colony Phase-1 (ext), Shahrah Nazaria e Paksitan Lahore. **Details of new DSL:** **License No:** 05-352-0065-016174D **Address:** ground floor, 6-Judicial colony Phase-1 (ext), Shahrah Nazaria e Paksitan Lahore. **Validity:** 06-02-2024 **Status:** License to sell drugs as a distributor **Address of Go-down:** NA
2	Submit complete label claim as per the innovator's product in section 1.5.2 along with submission of requisite fee since you have only mentioned 100mg/5ml which does not correspond with the label claim of innovator's product.	The submitted label claim is different from the innovator's product. Each ml contains: Irinotecan as hydrochloride trihydrate ……..20mg Innovator's label claim: Each ml contains: Irinotecan hydrochloride trihydrate ……..20mg
3	Since Irinotecan HCl injection is diluted preferably in 5% Dextrose injection or 0.9% Sodium chloride Injection prior to IV Infusion, therefore, compatibility studies of the drug product with the diluents are required.	Submitted.
4	Submit pharmaceutical equivalence against the innovator's / reference product.	Pharmaceutical equivalence is submitted against reference product Campto 100mg/5mL Mfg by Pfizer Germany by performing quality tests. Batch number: D6A167
5	Provide reference of the specifications of drug product since you have not provided any reference while the drug product monograph is available in USP as well as JP pharmacopoeia. The firm has submitted comparison of USP and In-House specifications.	

Comparison			
Sr#	**Parameters**	**USP Specs**	**Manufacturer's Specs**
1	Appearance	-	Clear yellow solution not more colored than GY3, free of visible particles
2	pH	3.0–3.8	3.0–3.8
3	Extractable volume	≥ nominal volume	≥ nominal volume
4	Identity of irinotecan (HPLC)*	-	Positive
6	Assay of irinotecan hydrochloride, trihydrate [mg/ml] (HPLC)	90.0%-110.0%	95.0–105.0 %
7	Sub visible particles ≥ 10 µm ≥ 25 µm	-	≤ 6000/container ≤ 600/container
8	Related substances (HPLC) [%] 7-Ethyl-10-hydroxy-camptothecin	NMT 0.2	NMT 0.2
	Individual unknown	NMT 0.2	NMT 0.2
	Total unknown	NMT 0.2	NMT 0.2
	Total impurities	NMT1.0	NMT1.0
9	Sterility	Sterile	Complies with Ph. Eur
10	Bacterial endotoxins	≤ 0.83 Units/mg	≤ 11.00 EU/ml

Decision: Approved as per Policy for inspection of manufacturer abroad with following label claim:
"Each ml contains:
Irinotecan hydrochloride trihydrate ……. 20mg"

- **Registration letter will be issued upon submission of full fee for correction/pre-approval change in product label claim and DSL address, as per notification No.F.7-11/2012B&A/DRAP dated 07-05-2021.**
- **Furthermore Board decided that drug product specifications will be granted on the basis of comparison between manufacturer specifications and pharmacopoeial specifications, presented at the time of issuance registration letter.**

4.	Name, address of Applicant / Importer	M/s Al-Habib Pharmaceutical Plot # 81, Block B, SMCHS, Karachi.
	Details of Drug Sale License of importer	License No: 1245 Address: Al-Habib Pharmaceuticals 81-B Block SMCHS, Karachi Validity: 18/05/2022 Godown: 1. Plot no. 10 sector 25 KIA, Karachi 2. HT-8, Landhi Industrial Area, Karachi. Status: Drug License by way of Wholesale
	Name and address of marketing authorization holder (abroad)	M/s Qilu Pharmaceutical (Hainan) Co., Ltd., No. 273-A, Nanhai Avenue, National High-Tech Zone, Haikou, 570314, China.
	Name, address of manufacturer(s)	M/s Qilu Pharmaceutical (Hainan) Co., Ltd., No. 273-A, Nanhai Avenue, National High-Tech Zone, Haikou, 570314, China.
	Name of exporting country	China
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) • Copy of DML No. Qiong20150030 valid till 22/1/2025 issued by National Medical Products Administration China is submitted. • Copy of GMP certificate no. HI20170029 valid till 22/10/2022 issued by Hainan provincial Food and Drug Administration. • Firm has submitted original, legalized COPP certificate (No. 20210042) dated 02-02-2021 valid till 02/03/2023 issued by Hainan Medical Product Administration, China. The applied product is available for free sale in the market of exporting country. The facilities and operations conform to WHO-GMP. The COPP is valid till 02-03-2023.	
	Details of letter of authorization / sole agency agreement:	

	• Legalized letter of authorization is submitted whereby M/s Qilu Pharmaceutical (Hainan) Co., Ltd., Has authorized M/s Al-Habib Pharmacueticlas as a sole agent and distributor of differnet product including the applied product.	
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 5510 : 28-02-2022
	Details of fee submitted	PKR 150,000/-: 15-02-2022
	The proposed proprietary name / brand name	Iriton Injection 100mg/5mL
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Irinotecan Hydrochloride trihydrate……. 20mg
	Pharmaceutical form of applied drug	Sterile, pale yellow, clear aqueous solution for further dilution in recommended diluents for IV administration.
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	AS per SRO
	The status in reference regulatory authorities	MHRA Approved.
	For generic drugs (me-too status)	EFIXANO 100MG by M/s Ghani Brothers
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and product.
	Name, address of drug substance manufacturer	M/s Qilu Pharmaceutical Co., Ltd., No. 243 Gongyebei road, Jinan China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• Real time stability studies have been conducted at 40oC±2 RH 75%±5 for 36 months of 3 batches • Accelerated stability study is conducted at 25oC±2 and 60%RH±5% for 24 months of 3 batches Batches: 307001GV, 30700GV, 307003GV
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. The qualitative composition of the applied product is similar to the reference product therefore, the firm has not submitted compatibility studies of excipients with the drug substance.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence is established against the reference product Camptosar by M/s Pfizer USFDA approved (including physical and chemical tests). Batch number: HM60A (100mg/5mL) against the applied strength (batch number: 2B4E10309004) Batch number: obay1 (40mg/2mL) against applied strengths (Batch number : 1001003, 1010014, E1103001)
	Analytical method validation/verification of product	The firm has submitted analytical method validations/ verification studies for the drug substance as well as for the drug product including specificity, accuracy, precision, linearity, LOD / LOQ (for impurities), system suitability etc.
	Container closure system of the drug product	Brown colored type I glass vial with butyl rubber stopper and aluminium-Plastic cap.
	Stability study data of drug product, shelf life and storage conditions	• Real time stability studies have been conducted at 30oC±2 and 65%RH±5% for 36 months of 3 batches • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: EB3E7001, EB3E7001, EB3E7001 (40mg/2mL) EB4E7005, EB4E7006, EB4E7007 (100mg/5mL)

Evaluation by PEC:

•

Sr. No.	Observations	Response
1	Please submit Quality over all summary for the applied product as per WHO-PD template.	Submitted.
2	Since Irinotecan HCl injection is diluted preferably in 5% Dextrose injection or 0.9% Sodium chloride Injection prior to IV Infusion, therefore, compatibility studies of the drug product with the diluents are required.	Compatibility studies are submitted for 5% Dextrose as well as 0.9% Sodium Chloride by making final dilution equal to 0.12mg/ml to 2.8mg/ml. The solution is stable for 24 hours when stored at room temperature. At refrigerated condition, the solution is stable for 48 hours when dilute with Dextrose 5%. However, refrigerated storage is not recommended when the product is diluted with 0.9% Sodium Chloride. Since the product does not contain any antibacterial preservative therefore the product preferably, be used immediately after reconstitution.

3	Provide detail of process validation for the applied strength of drug product.	The firm has submitted process validation protocol and process validation report for the applied strengths.
4	Provide pharmaceutical equivalence studies for the applied product against the innovator's / reference product by performing the quality tests along with the details of mfg date, expiry, batch number etc of the reference product.	Pharmaceutical equivalence is established against the reference product Camptosar by M/s Pfizer USFDA approved (including physical and chemical tests). Batch number: HM60A (100mg/5mL) against the applied strength (batch number: 2B4E10309004) Batch number: obay1 (40mg/2mL) against applied strengths (Batch number : 1001003, 1010014, E1103001)
5	Please provide complete protocol and method of terminal sterilization for the applied product.	Submitted. (By HP).
6	Provide detail method and preparation of dilution for conducting the tests for specificity parameter of analytical method verification / validation studies along with the acceptance criteria.	Report for specificity testing along with the acceptance criteria is submitted.
Decision: Registration Board approved the product subject to compliance of current Import Policy for Finished Drugs.

	The proposed proprietary name / brand name	**Vestrant Injection 250mg/5mL**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml pre-filled syringe contains: Fulvestrant ……..250mg
	Pharmaceutical form of applied drug	Clear colourless to yellow liquid for IM injection
	Pharmacotherapeutic Group of (API)	Estrogen receptor antagonist
	Reference to Finished product specifications	Not mentioned
	Proposed Pack size	250mg/5ml (2 syringes in a carton)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Not submitted
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Jiangsu Hansoh Pharmaceutical Group Co. Ltd. Kaiti Road, Dapu Industrial Park, Economic and Technical Development Zone, Lianyungang Jiangsu China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 2 - 8°C. The stability study data is till 24 months. Batches: 2019051, 20190502, 20190503

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence against the reference product Faslodex Injection. Batch number: NX027
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	5ml type I clear glass barrel with PRTC luer-lock adaptor.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted long term stability data of 3 batches for 12 months at 2 – 8°C and 6 months at 25°C±60%RH for three batches. The storage conditions for the innovator's product is 2 to 8ºC.
Evaluation by PEC-I:		
1	Submit valid copy of Drug Sale License.	**License No:** DHODSK(Drugs)/-587 **Address:** 1st Floor, Shafi Court, Civil Lines, Merewether Road, Karachi, Pakistan. **Address of Godown:** 2nd floor Shafi Court, Civil lines Merewether road, Karachi. **Validity:** 22/12/2022* **Status: B**y way of whole sale *The firm has submitted copy of receipt for renewal of DSL dated 09/12/2022.
2	Specify the proposed brand name since you have mentioned "NA".	Vestrant Injection 250mg/5mL
3	Submit complete stability study data of 3 batches of the drug product till claimed shelf life according to the conditions of Zone-IVA.	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 2 - 8°C. The stability study data is till 24 months. Batches: 2019051, 20190502, 20190503
4	Provide reference of the specifications of drug product since you have not provided any reference along with the copy of monograph if available.	In-House
5	Provide pharmaceutical equivalence studies against the reference / innovator's product along with the detail of manufacturer, expiry, date of manufacturing, approval status in reference regulatory authorities etc.	Firm has submitted pharmaceutical equivalence against the reference product Faslodex Injection. Batch number: NX027
6	Terminal sterilization has not been adopted for manufacturing of the applied product and sterile filtration followed by aseptic filling have been selected as sterilization method, please justify with experimental data.	The firm has referred EMA public assessment report of the reference product that is Faslodex. *The manufacturing process for the finished product follows conventional pharmaceutical practices which include a solution compounding step, sterile filtration and aseptic filling into syringes followed by steering. Process is carried out under an inert gas overlay, which*

		has been shown to minimize formation of the oxidative degradation. Sterility is assured by filtration and aseptic filling. Terminal sterilization by heat or irradiation has been shown to be unsuitable for this product. Detail of filter: Material: Polytetrafluoroethylene (PTFE) Pore diameter: 0.2um Ref: EMA Public assessment report https://www.ema.europa.eu/en/documents/assessment-report/faslodex-epar-public-assessment-report_en.pdf
Decision: Approved as per Policy for inspection of manufacturer abroad with innovator's specifications. The Board further decided that the firm shall submit Rs. 7,500/- for as pre-registration variation fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

	Name and address of marketing authorization holder (abroad)	M/s Hebei Tiancheng Pharmaceutcal Co.,Ltd., No. 18, Jinguang street, Economic &Technological Development zone, Changzhou City, Hebei Province, China. (Headd Office)
	Name, address of manufacturer(s)	M/s Hebei Tiancheng Pharmaceutcal Co.,Ltd., No. 51, Jinguang street, Economic &Technological Development zone, Changzhou City, Hebei Province, China.
	Name of exporting country	China

	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) • Copy of DML No. HEBEI20150098 valid till 12/11/2025 issued by Hebei Medicla Products Administrtaion is submitted. • Copy of GMP certificate no. HE20180059 valid till 16/07/2023 issued Hebei FDA.	
	Details of letter of authorization / sole agency agreement:	
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 30343 : 26-10-2022
	Details of fee submitted	PKR 150,000/-: 19-06-2022
	The proposed proprietary name / brand name	Movtin Injection 1g IV Powder for injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Creatine Phsphate Injection……1g
	Pharmaceutical form of applied drug	
	Pharmacotherapeutic Group of (API)	
	Reference to Finished product specifications	
	Proposed Pack size	1’s
	Proposed unit price	Rs. 1200/- for 1’s
	The status in reference regulatory authorities	
	For generic drugs (me-too status)	
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and product.
	Name, address of drug substance manufacturer	M/s Hebei Tiancheng Pharmaceutcal Co.,Ltd., east of Jingsi street, west area of Lingang economic & technological development zone, Canghzhou, Hebei province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general

		properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• Real time stability studies have been conducted at 40oC±2 RH 75%±5 for 36 months of 3 batches • Accelerated stability study is conducted at 30oC±2 and 65%RH±5% for 24 months of 3 batches Batches: 20171102, 20171103, 20171104
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, detail of impurities analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	The firm has submitted analytical method validations/ verification studies for the drug substance as well as for the drug product including specificity, accuracy, precision, linearity, LOD / LOQ (for impurities), system suitability etc.
	Container closure system of the drug product	Low borosilicate glass vial s with Halogenated butyl rubber stopper
	Stability study data of drug product, shelf life and storage conditions	• Real time stability studies have been conducted at 30oC±2 and 65%RH±5% for 24 months of 3 batches Batch numbers: F11812091, F11812101, F11812111 • Accelerated stability studies is conducted at 40oC±2 and 75%RH±5% for 6 months of 3 batches Batches: 110331, 1103311, 1104011

Evaluation by PEC:

•

Sr. No.	Observations
1	Please provide evidence of approval of the applied in same strength is reference regulatory authorities as approved in 275th meeting of Registration Board.
2	Provide pharmaceutical equivalence studies for the applied product against the innovator's / reference product along with the detail of batch number, expiry, date of manufacturing, approval status if reference country etc.
3	Compatibility study of excipient with the drug substance are required.
4	Since the product is powder for injection and the detail of accompanying reconstitution diluents have not been provided. Please detail of method of administration along with the detail of all the diluents used for reconstitution along with the compatibility studies of the formulation with the diluents.
5	As per submitted dossier, the specifications for the drug product are BP while the product is not present in BP, please clarify and submit Rs. 7,500/- fee for revision of specifications as per notification number No.F.7-11/2021-B&A/DRAP dated 07-05-2021.
6	Provide product specific sole agency agreement for the applied product.

7	Provide evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.	
8	Provide original, legalized and valid CoPP confirming the free sale of the applied product in exporting country and GMP status of the manufacturing facility.	
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

2	Provide evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.
3	Provide relevant details of the product including batch number, expiry, date of manufacturing, approval status in reference country against which the pharmaceutical equivalence studies have been performed.
4	Compatibility study of excipient with the drug substance are required.
5	Provide product specific sole agency agreement for the applied product.
6	Provide analytical method validation studies for the applied product.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Case No. II: Registration applications submitted on Form 5F (Human, local manufacturing)
Priority Applications (New molecules / New Formulations / Anti-Cancer):

10.	Name, address of Applicant / Marketing Authorization Holder	M/s Novamed Pharmaceuticals (pvt) Ltd. 28-km Ferozepur rod, Lahore.
	Name, address of Manufacturing site.	M/s Novamed Pharmaceuticals (pvt) Ltd. 28-km Ferozepur rod, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22878 dated 12/08/2022
	Details of fee submitted	PKR 75,000/-: dated 27/07/2022

	The proposed proprietary name / brand name	Manidlow tablet 20mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Manidipine hydrochloride…..20mg
	Pharmaceutical form of applied drug	Uncoated immediate release Oral tablet
	Pharmacotherapeutic Group of (API)	Anti-hypertensive
	Reference to Finished product specifications	JP
	Proposed Pack size	10;s, 20's, 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	PMDA Japan Approved.
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 68/2021-DRAP(FID-385689549774-222) issued on the basis of inspection conducted on 06/08/2021.
	Section approval	Tablet general section (revised)
	Name and address of API manufacturer.	M/s Xuchang Hensheng Pharmaceutical Co., Ltd., Jian an Fine Chemical Industry Park, Xuchang City, Henan Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30˚C ± 2˚C / 75% ± 5%RH for 42 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (20160701, 20161001, 20161002)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product. Excipients used in applied product are same as used in the innovator's product therefore, compatibility

		studies of excipients with the drug substance are not required.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence is established against the innovator's product that is Calslot 20mg tablet, PMDA Approved by performing assay, content uniformity, dissolution identification etc. (Batch number: FD021). Comparative dissolution profile is submitted against the innovator's product in all the three recommended dissolution media. The value of f2 are well within the limits.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy/recovery, precision, specificity, Robustness, system suitability etc.

STABILITY STUDY DATA			
Manufacturer of API	M/s Xuchang Hensheng Pharmaceutical Co., Ltd., Jian an Fine Chemical Industry Park, Xuchang City, Henan Province, China.		
API Lot No.	20210601 (99.76)		
Description of Pack (Container closure system)	Alu-Alu blister packed in hardcard secondary unit cartom		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD/PR21-106/T1/S1	RD/PR21-106/T1/S2	RD/PR21-106/T1/S3
Batch Size	2000 tab	2000 tab	2000 tab
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	23-12-2021	23-12-2021	23-12-2021
No. of Batches	03		

Administrative Portion		
1	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has not submitted any response
2	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate no. HA20180002 valid till 12/01/2023 issued by Henan Province Food and Drug Administration.
3	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of DRAP attested invoice no. HS20210801 dated 14/09/2021 issued vide Dy. No. 14689 dated 30/09/2021 is submitted.
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator-I:

This is a dihydropyridine-based calcium antagonist that specifically binds to membrane voltage-gated L-type calcium channels and reduces the influx of calcium into cells, thereby relaxing coronary and peripheral smooth muscle results in lowering of blood pressure.

The usual adult dosage is 10 to 20 mg of manidipine hydrochloride orally administered once daily after breakfast. However, administration should be started at 5 mg daily, and the dose should be increased gradually as necessary. The firm has not applied for 5mg strength.

Sr. No.	Observations	Response
1	Provide detailed method of analysis for drug substance for routine analysis along with the analytical method verification studies performed by drug product manufacturer including specificity, accuracy and precision.	Detailed method of analysis and analytical method verification studies for drug substance performed by drug product manufacturer are submitted.
2	As per submitted stability studies of drug substance from drug substance manufacturer, tests for heavy metals and Arsenic content have not been including in stability testing, please clarify.	The firm has submitted revised stability summary sheets of the same batches as submitted with initially submitted dossier containing the results of Arsenic content an heavy metal test without any clarification.
3	Provide complete batch manufacturing record for the applied product along with the justification for the dispensed quantity of the drug substance.	The firm has submitted complete batch manufacturing record.
4	Documents confirming import of the drug substance endorsed from DRAP field office are required.	Copy of DRAP attested invoice no. HS20210801 dated 14/09/2021 issued vide Dy. No. 14689 dated 30/09/2021 is submitted.
5	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin is required.	Copy of GMP certificate no. HA20180002 valid till 12/01/2023 issued by Henan Province Food and Drug Administration.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Atelec tablets (5mg, 10mg, 20mg), PMDA Japan approved.
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 68/2021-DRAP(FID-385689549774-222) issued on the basis of inspection conducted on 06/08/2021.
	Section approval	Tablet general section (revised)
	Name and address of API manufacturer.	M/s Pure chemical Private limited, Plot no. 4717 GIDC estate, Ankleshwar 393002, Gujarat India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CLD150501P2. CLD150602P2, CLD150603P2)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug product. Excipients used in applied product are same as used in the innovator's product therefore, compatibility studies of excipients with the drug substance are not required.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence is established against the innovator's product that is Atelec 10mg tablet, PMDA Approved by performing assay, content uniformity, dissolution identification etc. (Batch number: K837). Comparative dissolution profile is submitted against the innovator's product in all the three recommended dissolution media. The value of f2 are well within the limits.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy/recovery, precision, specificity, Robustness, system suitability etc.

STABILITY STUDY DATA			
Manufacturer of API	M/s Pure chemical Private limited, Plot no. 4717 GIDC estate, Ankleshwar 393002, Gujarat India.		
API Lot No.	CLD201703P8E (99.59)		
Description of Pack (Container closure system)	Alu-Alu blister packed in hard cardboard unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD/PR21-092/T1/S1	RD/PR21-092/T1/S2	RD/PR21-092/T1/S3
Batch Size	2000 tab	2000 tab	2000 tab
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	20-09-2021	20-09-2021	20-09-2021
No. of Batches	03		

Administrative Portion		
1	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has not submitted any response
2	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 21012385 valid till 03/01/2024 issued by Food and Drug Control Administration Gujarat India.
3	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice number EXP/015/21-22 dated 09/07/2021 cleared on 02/08/2021vide dy. No. 11436/2021.
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator-I:

Antihypertensive effect with once-daily administration. This drug is a dual-action type Ca antagonist that blocks not only L-type Ca channels but also N-type Ca channels. It is thought that the increase in heart rate, suppression of stress-induced hypertension, and dilation of renal arterioles are exhibited.

Sr. No.	Observations	Response
1	The analytical method used for analysis of drug substance is in-house while the official monograph is available in JP, clarification is required. Moreover, the dilution prepared for analysis of drug substance is 0.02mg/mL as per analytical method verification studies the range is established from 0.08mg/mL to 0.12mg/mL concentration. The concentration of the dilution used for analysis is outside the established range, please clarify. Moreover, in the testing of accuracy parameter for analytical method verification studies of drug substance, the recovery of the dilution having concentration 80%, is out of acceptable limits, please justify.	• *Drug substance has been tested as per JP specs. There was a typo error of reference in shared analytical method, which has been amended and reference copy is attached.* • *LOD and LOQ is calculated for the method used in testing of substance. Our method is verified / validated to detect upto a limit of LOD 0.00317mg/mL and quantity limit LOQ 0.00962mg/mL. Dilution is prepared as 0.02mg/mL which is within the range of LOD and LOQ.* The firm has submitted method verification report. • The firm has submitted analytical method verification report wherein the out of specs results of accuracy parameter for 80% dilution have not been addressed.
2	Please provide analytical method verification studies considering the analytical method provided in JP along with the detail of all the dilutions prepared for drug product.	Submitted. Linearity is established from 0.08mg/mL to 0.12mg/mL and the dilution used for assay determination is outside the range (i.e upper limit).
3	Provide complete batch manufacturing record for the applied product along with the justification for the dispensed quantity of the drug substance.	Submitted.
4	Documents confirming import of the drug substance endorsed from DRAP field office are required.	Copy of invoice number EXP/015/21-22 dated 09/07/2021 cleared on 02/08/2021vide dy. No. 11436/2021.
5	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin is required.	Copy of GMP certificate No. 21012385 valid till 03/01/2024 issued by Food and Drug Control Administration Gujarat India.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The Board further decided that the applicant shall submit analytical method verification / validation studies for drug substance as well as for drug product according to relevant JP monograph before the issuance of registration letter.**

Remarks of Evaluator-I:

The product is indicated for the relief of signs and symptoms of rheumatoid arthritis and osteoarthritis and to decrease the risk of developing upper gastrointestinal ulcers who require the use of Ibuprofen.

Sr. No.	**Observations**	**Response**
1	Provide analytical method verification studies including specificity, accuracy and precision performed by drug product manufacturer for Ibuprofen drug substance.	The analytical method verification report for Ibuprofen drug substance is provided performed by M/s Horizon Pharmacaeuticals.
2	Justify the selection of dissolution specification / parameters for the applied product since as per the available literature of the reference product, change in the dissolution specifications is proposed.	*Our dissolution parameters and specification meet the FDA reference ID 2909903 of FDA approved reference product DUEXIS Tablet. As the FDA recommendation the change of dissolution sampling time point. Hence, we taken the changed time point of dissolution as per FDA.*
3	Provide complete batch manufacturing record of the applied product along with the justification of the dispensed quantity of the drug substances considering the assay values.	The firm has submitted complete batch manufacturing record for the applied productis submitted along with the calcualtions.
4	The strengths of the dilutions prepared for analytical method validation studies (for Linearity), do not correspond to the strength of dilution as described in analytical method of the applied product that is 0.2mg/mL and 0.0066mg/mL for Ibuprofen and Famotidine respectively. Moreover, clarification is required regarding the final column load for concentration 01 to concentration 06 since the calculated strength of the concentration is different than the provided final column load. Furthermore, clarify the terms mentioned in validation report Target concentration and Load.	*The procedure for dilution preparation in analytical method validation report of linearity test was unintentionally written wrong. Therefore, we corrected the procedure of linearity test in report. The detailed corrected report analytical method validation has been attached.* *The Target concentration is the concentration that which we use for quantification for our analyte of interest with accuracy and precision while column load is amount of analyte which is injected to column.*
5	Provide detail of accuracy testing along with the acceptance criteria and preparation of dilutions.	Submitted.
6	Provide GMP certificate of Ibuprofen D.S manufacturer.	Copy of GMP certificate no. 75/2021-DRAP(AD-2027105-531) dated 24/09/2021 issued on the basis of inspection conducted on 14/07/2021.
7	Submitted stability data is till 3rd month time point, provide 06 months stability data of the applied product.	Submitted.

Decision: Deferred for consideration on its turn since applied formulation is already registered in name of M/s Global Pharmaceuticals vide registration no. 109397 and brand name Famoprofen tablet, hence instant application do not qualify for the prioriy consideration as new drug product.		
15.	Name, address of Applicant / Marketing Authorization Holder	M/s Horizon Healthcare Pvt., Ltd., Plot # 33, Sundar Industrial Estate Lahore.

Date of Initiation	17-02-2022	18-02-2022	19 -02-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of Drug Production License no. Yu20150031 valid till 31/12/2025 issued by FDA Henan Province is submitted. Copy of GMP certificate no. HA20190069 valid till 2/09/2024 issued by CFDA.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice number CIN20220101L01 dated 20/01/2022 cleared on 25/01/2022 vide dy. No. 1328/2022-DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator-I:

The applied product is indicated for the treatment of adults with community acquired bacterial pneumonia (CABP) caused by susceptible microorganisms.

Sr. No.	**Observations**	**Response**
1	Provide detail of preparation of final dilution for assay of drug substance and correlate the strength of the final dilution with the established linearity range.	*The details of preparation of the final dilution of assay of drug substance are provided in method validation detailed report. Our target concentration correlate with linearity range at 2nd concentration for linearity preparations.* Range: 0.15mg/mL, 0.30mg/mL, 0.45mg/mL, 0.60mg/mL, 0.75mg/mL, 0.90mg/mL, 1.05mg/mL,
2	Submitted stability data is till 3rd month time point, provide 06 months stability data of the applied product.	Submitted.
3	Provide complete batch manufacturing record for the applied product.	Submitted.
4	Dissolution medium selected for the applied product is 0.1N HCl and as per submitted CDP results the drug product gives more than 80% release in 45 minutes while in the final product dissolution specification, drug release should be more than 80% in 60 minutes. Justify the selection of 60 minutes time point for sampling instead of fixing it at 45 minutes.	*Our specification of dissolution is NLT 80% (Q) at 60 minutes. The results provided in CDP report are not meet the USP criteria of dissolution at S_1 stage. Thus, the results of CDP are the average of 12 units and meets the criteria of S_2 stage. Also, the FDA provided sampling time point is 60 minutes. Hence, we followed the FDA approved reference product time point.*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. III: Export facilitation

In Pursuance od decision of 133rd meeting of the Authroity held on 13th April, 2022, wherein it was decided that for each 100,000/- USD worth of export of medicine during a fiscal year, one molecule will be considered on prority.

a. Registration applications submitted on Form 5F:

16.	Name, address of Applicant / Marketing Authorization Holder	M/s Genix Pharma Private Limited 44-45B Korangi creek road Karachi
	Name, address of Manufacturing site.	M/s Genix Pharma Private Limited 44-45B Korangi creek road Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 20205 dated 15/07/2022
	Details of fee submitted	PKR 75,000/-: dated 04/07/2022
	The proposed proprietary name / brand name	**MOXETIN Oral solution 4mg/ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml of oral solution contains: Atomoxetine as hydrochloride…….4mg
	Pharmaceutical form of applied drug	Clear colourless solution
	Pharmacotherapeutic Group of (API)	Psychoanaleptic.
	Reference to Finished product specifications	Innovator specification
	Proposed Pack size	30ml & 100ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	STRATTERA 4mg/ml Oral solution by Eli Lilly and Company Limited, Austria Approved MHRA Approved.
	For generic drugs (me-too status)	Not available
	GMP status of the Finished product manufacturer	New GMP granted on 07/10/2021
	Section approval	Syrup/ suspension oral (General antibiotic) approved.
	Name and address of API manufacturer.	M/s ZCL Chemicals Limited Plot No. 3102/B, GIDC Estate Ankleshwar-393002, Dist.-Bharuch, Gujarat, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure

		system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Atomoxetine HCL is tested on USP specifications. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ATOP150214, ATOP150314 & ATOP150414)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure, its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator's product that is STRATTERA 4mg/ml Oral solution (Batch No: A473913A) by Eli Lilly and Company Limited by performing quality tests (Appearance, Identification, pH, Assay,)
	Analytical method validation/verification of product	Method validation studies have been submitted including specificity, linearity, accuracy, precision, repeatability, intermediate precision, robustness, range and justification of system suitability

Remarks of Evaluator-I:

Indications:

Strattera is used to treat Attention Deficit Hyperactivity Disorder (ADHD) in children from 6 years of age, adolescents and adults as part of a comprehensive treatment program.

Sr. No.	Observations	Firm's response
1	• Submitted drug substance analytical procedure for Assay test from drug substance manufacturer is not as per USP monograph. • Submitted drug substance analytical procedure for Assay test from drug product manufacturer is different from that applied by drug substance manufacturer. • Analytical method verification studies performed by M/s Genix Pharma shall be submitted.	Drug product manufacturer has adopted USP method for analysis of drug substance and analytical method verifications studies from drug product manufacturer according to USP are submitted.
2	Submit valid working standard COA applied for the drug substance analysis by M/s Genix Pharma.	The analytical report from M/s Genix pharma is Submitted. Report no. AMV-RR-003/01/23
3	Test for content of antimicrobial preservative & efficacy of preservative, as recommended by ICH Q1 (R2) guidelines & USP chapter <51>, has not been included in the finished product specifications. You are required to submit justification in this regard. Test for content of antimicrobial preservative & efficacy of preservative, as recommended by ICH Q1 (R2) guidelines, has not been performed during stability studies, justify.	*We conducted this test in development stage initially and not a part of routine analysis, that is why it is not included in finished product SOP. Although we have separate SOP of antimicrobial preservative test.* Sop No. QC/SOP/SY/032 dated 14-06-2022 is submitted. M/s Genix Pharma has stated that thy had performed the preservative test at initial time point and will be performed at final time point htat is 24th month. Moreover, M/s Genix Pharma has submitted preservative efficacy test report for Moxetine Oral solution for

		all the three batches at initial time point. Document no. QC/RFT/077
4	Please provide detail of batch size of the stability batches in terms of number of units / bottles.	66 bottles (2000 mL)

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any response.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of drug manufacturing certificate (no. Yue20160016) issued on 24/12/2020 valid till 23/12/2025 issued by NMPA. Copy of GMP certificate (No.20210620) issued Guangdong Pharmaceutical Industry Association is submitted valid till 19/06/2026.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted Copy of form 6, license to import drugs for clinical trial, examination, test or analysis. copy of invoice number EAC20210220017 dated 17/02/2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator-I:

Sr. No.	Observations	Response
1	Provide analytical method verification studies performed by drug product manufacturer.	Analytical method verification / validation report is submitted including accuracy, precision, specificity etc.
2	Please provide document confirming import of drug substance (invoice etc) endorsed from DRAP field office.	The firm has submitted Copy of form 6, license to import drugs for clinical trial, examination, test or analysis.

		copy of invoice number EAC20210220017 dated 17/02/2021.
3	Justify the selection of Phosphate buffer as dissolution media for dissolution testing since innovator has used different media.	0.05M Acetate Buffer (pH 4.5) has been used by the innovator for dissolution testing while the firm has selected Phosphate buffer (pH 6.8). The firm has stated that initially they had conducted dissolution studies in all the three media that is 0.1N HCl, acetate buffer and phosphate buffer and the applied product was found to be least soluble in 6.8 pH medium. Therefore, they had selected the Phosphate Buffer as dissolution media. The firm has stated that they had revised the dissolution specifications and conducted dissolution testing according to revised dissolution specs as per innovator (Acetate Buffer as dissolution media). The results of dissolution testing on stability batches are submitted.
4	Provide valid GMP certificate of drug substance manufacturer issued by relevant authority.	Copy of drug manufacturing certificate (no. Yue20160016) issued on 24/12/2020 valid till 23/12/2025 issued by NMPA. Copy of GMP certificate (No.20210620) issued Guangdong Pharmaceutical Industry Association is submitted valid till 19/06/2026.
5	As per submitted specifications, Disintegration time for the applied product is 30 minutes while the dissolution limits are NLT 75% in 15 minutes, please revise the specification for D.T along with the submission of applicable fee.	The firm has not revise the specifications for disintegration (D.T) and has referred to USP general chapter <701>.
6	Provide batch size of trial batches.	1200 tablets
7	Please justify the dispensed quantity of drug substance considering the assay on As-is basis.	The quantity of drug substance dispensed on the basis of 100 percent potency while it should have been calculated on As-is based assay value.
8	Since pharmaceutical equivalence and CDP studies are required to be performed against the reference / innovator's product while you have submitted the said studies against Voniza tablet, please clarify.	*The innovator's product was not available at the time of product development stage therefore, the said studies were conducted against comparator's product.*

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer shall consider potency adjustment on basis of Assay results of drug substance on "as is basis" for dispensing of commercial batches.**
- **Registration letter will be issued upon submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

	Details of fee submitted	PKR 30,000/-: dated 22/06/2022
	The proposed proprietary name / brand name	**Vozan 10mg tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Vonoprazan as Fumarate……10mg
	Pharmaceutical form of applied drug	Film coated immediate release tablet
	Pharmacotherapeutic Group of (API)	Potassium competitive acid blocker/anti-ulcer
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	7's, 14's, 28's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	PMDA Japan approved.

	For generic drugs (me-too status)	Vonozan by Getz Pharma
	GMP status of the Finished product manufacturer	Inspection date: 26-03-2020 & 13-04-2020 Based on the areas inspected, people met, processes observed and intention of the firm for continuous improvement at the time of inspection it is concluded that the firm is operating at a Good level of GMP compliance.
	Section approval	Tablet Section (General/General Antibiotic)
	Name and address of API manufacturer.	M/s Ami life Sciences private limited, block no. 82/B, ECP road,AT & Post, Karakhadi-391450, Taluka, Padra, District Vadodara. Gujarat India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30°C ± 2°C / 65% ± 5%RH for 18 months • Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (VPF/30051020, VPF/30031020, VPF/30041020)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Comparative dissolution profile is submitted against Vonozan 10mg tablet mfg by Getz Pharma, (Batch number 003FF8) in all thre recommended media that is 0.1N HCL, acetate buffer and phosphate buffer. F2 values have not been calculated since more than 85% release is observed within 15 minutes. Pharmaceutical equivalence is established against the same brand by performing all the quality tests.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy/recovery, precision, specificity, LOD/LOQ, Robustness, Solution stability, system suitability
STABILITY STUDY DATA		

Manufacturer of API	M/s Ami life Sciences private limited, block no. 82/B, ECP road,AT & Post, Karakhadi-391450, Taluka, Padra, District Vadodara. Gujarat India.		
API Lot No.	VPF/30021020

Date of Initiation	25-11-2021	25-11-2021	25-11-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate no. S-GMP & GLP/21032496 valid till 04/03/2023 issued by Food & Drugs Control Administration.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice no. EXP/I/21-22/0168 dated 06/07/2021 cleared on 16/01/2021 vide dy. No. 2275/21.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator-I:

Sr. No.	Observations	Response
1	Provide documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice no. EXP/I/21-22/0168 dated 06/07/2021 cleared on 16/01/2021 vide dy. No. 2275/21.
2	Please justify the selection of dissolution parameters for the applied product. Specifications of Tripak tablets (USFDA approved): USP II, 50rpm, 900mL, 37^0C, 0.05M Acetate Buffer (4.5), 15minutes) Applied product:	The firm has stated that the dissolution specifications of the innovator's product approved by PMDA Japan are not revealed therefore, the specifications were developed In-House. The dissolution specifications of Tripak are revealed in the literature. The firm has submitted test results of 3 batches according to

	USP II, 50rpm, 900mL, 37^0C, Phosphate Buffer, 30 minutes	dissolution specification as revealed in the literature.
3	Provide valid GMP certificate of drug substance manufacturer.	Copy of GMP certificate no. S-GMP & GLP/21032496 valid till 04/03/2023 issued by Food & Drugs Control Administration.
4	Provide complete BMR of the applied product along with the justification of the dispensed quantity of drug substance.	Submitted.
5	Since pharmaceutical equivalence and CDP studies are required to be performed against the reference / innovator's product while you have submitted the said studies against Vonozan tablet, please clarify.	The firm has stated that the innovator product was not available in Pakistan and due to failure in arranging the product, they had conducted comparative analysis with the comparator's product.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued upon submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

Administrative Portion

1	Reference of previous approval of applications with stability study data of the firm (if any)	Another strength of the same formulation that is 12.5mg/850mg was approved in 322nd meeting.
2	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Copy of GMP certificate valid till 14/01/2024 issued by Huai'an Pharmaceutical Industry association, China. Copy of drug manufacturing license number Su20160324 valid till 06/12/2025 issued by Jiangsu Medical Producs Administration China. **Metformin HCl;** Copy of GMP certificate No. SD20190888 valid till 12/03/2024 issued by CFDA.
3	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Copy of attested invoice number ZY19100801G/W dated 18/10/2019 cleared on 22/10/2019 vide dy. No. 11623. **Metformin HCl;**

		Copy of attested invoice number 419FK08Z092-2 dated 10/10/2019 dy. No. 11552 dated 21/10/2019.
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator-I:

Sr. No.	Observations	Response
1	The submitted analytical method verifications studies for Empagliflozin drug substance are from drug substance manufacturer while the said studies by drug product manufacturer are required.	Submitted.
2	Titration method is adopted for analysis of Metformin HCl while HPLC method has been described for the estimation of Metformin in latest edition of USP, please clarify. Moreover, analytical method verification studies are required for Metformin drug substance according to latest USP monograph performed by drug product manufacturer.	The firm has submitted that they had used the method available in USP at the time of development of the applied product. Now the firm has submitted revised methof for assay estimation of Metformin according to latest edition of USP and performed the verification studies.
3	Provide results of pharmaceutical equivalence studies against the reference / innovator's product by performing all the quality tests along with the results of comparative dissolution profile against reference / innovator's product. Moreover, provide batch number, expiry and date of manufacturing of the innovator's / reference product.	Pharmaceutical equivalence is submitted against the innovator's product that is Synjardy 5/850mg EMA approved, by performing all the quality tests including the tests for impurities (batch number: 905509). Comparative dissolution profile is submitted against the same innovator's product in all the three recommended media. F2 values have not been calculated since 85% drugs have been release within 15 minutes.
4	Justify the dissolution parameters since the selected RPM is 75 while as per USFDA dissolution data base, the RPM should be 50 for the applied formulation.	The firm has referred to Empagliflozin tablet's literature review where the speed 75rpm is selected while as per the assessment report of Synjardy tablet, the rotational speed is 50 RPM.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer shall adopt dissolution specifications (i.e., paddle speed of 50rpm) as per the innovator product for the commercial batches.**
- **Registration letter will be issued upon submission of analytical method verification studies**

for Metformin HCl drug substance according to latest edition of USP monograph along with fee of Rs. 7,500/- for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT			
1.	Reference of previous approval of applications with stability study data of the firm		
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Submitted	
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Firm has submitted copy of method used for analysis of API from both API Manufacturer and Finished Product manufacturer	

4.	Stability study data of API from API manufacturer	**Empagliflozin:** • Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (130701, 130702, 130801) **Metformin:** • Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (A-72611405016, A-72611405017, A-72611405018)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Copy of GMP certificate valid till 14/01/2024 issued by Huai'an Pharmaceutical Industry association, China. Copy of drug manufacturing license number Su20160324 valid till 06/12/2025 issued by Jiangsu Medical Producs Administration China. **Metformin HCl;** Copy of GMP certificate No. SD20190888 valid till 12/03/2024 issued by CFDA.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Copy of attested invoice number ZY19100801G/W dated 18/10/2019 cleared on 22/10/2019 vide dy. No. 11623. **Metformin HCl;** Copy of attested invoice number 419FK08Z092-2 dated 10/10/2019 dy. No. 11552 dated 21/10/2019.
7.	Protocols followed for conduction of stability study	Firm has submitted protocols followed for conduction of stability study
8.	Method used for analysis of FPP	Firm has provided detailed method for analysis of finished product (In-House).
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required
10.	Complete batch manufacturing record of three stability batches.	Firm has provided Batch Manufacturing Record for all the batches of applied products.
11.	Record of comparative dissolution data (where applicable)	**Erli Plus 5/500mg tablet** CDP is submitted against Xenglu-Met 5/500mg (batch number 136760) tablet mfg by M/s Hilton Pharmaceutical in all the three recommended media. F2 values have not been calculated since more than 85% of drug has been released within 15 minutes. **Erli Plus 5/1000mg tablet** CDP is submitted against Diampa-M 5/1000 5 (batch number 001FD8) tablet mfg by M/s Getz Pharma in all the three recommended media. F2 values have not been calculated since more than 85% of drug has been released within 15 minutes. **Erli Plus 12.5/500mg tablet** CDP is submitted against Xenglu-Met 12.5/500mg (batch number 137089) tablet mfg by M/s Hilton Pharmaceutical in all the three recommended media. F2 values have not been calculated since more than 85% of drug has been released within 15 minutes

		Erli Plus 12.5/1000mg tablet CDP is submitted against Diampa-M 12.5/1000 5 (batch number 0797D2) tablet mfg by M/s Getz Pharma in all the three recommended media. F2 values have not been calculated since more than 85% of drug has been released within 15 minutes.
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted documents like chromatograms, raw data sheets, COA, summary data sheets for the stability studies
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm has submitted certificate of compliance and audit trail reports for HPLC analysis for all the three batches .
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for both stability chambers for accelerated as well as real time stability studies.

Evaluation by PEC:

Sr. no.	Shortcomings communicated	Response by the firm
1	The submitted analytical method verifications studies for Empagliflozin drug substance are from drug substance manufacturer while the said studies by drug product manufacturer are required.	Submitted.
2	Titration method is adopted for analysis of Metformin HCl drug substance while HPLC method has been described for the estimation of Metformin in latest edition of USP, please clarify. Moreover, analytical method verification studies are required for Metformin drug substance according to latest USP monograph performed by drug product manufacturer.	The firm has submitted that they had used the method available in USP at the time of development of the applied product. Now the firm has submitted revised meth of for assay estimation of Metformin according to latest edition of USP and performed the verification studies.
3	Comparative dissolution profile is submitted against comparator's brands while the studies should be performed against the innovator's / reference product.	The firm has stated that the reference brand was not readily available at the time of development therefore, the pharmaceutical studies have been performed against comparator's product.
4	Justify the dissolution parameters since the selected RPM is 75 while as per USFDA dissolution data base, the RPM should be 50 for the applied formulation.	The firm has referred to Empagliflozin tablet's literature review where the speed 75rpm is selected while as per the assessment report of Synjardy tablet, the rotational speed is 50 RPM.

Decision: Registration Board approved the applications of Erli Plus 5/500mg tablet, Erli Plus 5/1000mg tablet, Erli Plus 12.5/500mg & Erli Plus 12.5/1000mg tablet with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufacturer shall adopt dissolution specifications (i.e., paddle speed of 50rpm) as per the innovator product for the commercial batches.**
- **Registration letter will be issued upon submission of analytical method verification studies for Metformin HCl drug substance according to latest edition of USP monograph along with fee of Rs. 7,500/- for each strength for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

Remarks of Evaluator-I:

Sr. No.	Observations
1	As per submitted analytical method for Tapentadol HCl drug substance, the HPLC method is used for assay while analytical method validation report shows UV-performance for validation/verification studies. Please clarify and submit protocol and complete validation/verification studies for analytical method of drug substance. Moreover, correlate the strengths of dilution prepared for calculation of assay with the strengths of dilutions prepared for performing testing of linearity parameter in analytical method verification studies. Furthermore, please state that whether you have used same method of analysis as used by the manufacturer of drug substance or otherwise. Provide method of analysis of drug substance from drug substance manufacturer.
2	Provide certificate of analysis of the batch of drug substance used for product development from drug substance manufacturer as well as from the drug product manufacturer.
3	Provide pharmaceutical equivalence data against innovator's / reference product. The submitted data is against the comparator's product.
4	Justification is required for selection of dissolution parameters including dissolution medium (0.1N HCl), RPM, time etc.
5	Justify the amount of drug substance that is 87.375/tablet dispensed for potency adjustment by providing detail of calculations along considering the assay value i.e 99.8%.

Decision of 321st meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months of issuance of minutes of 322nd meeting. In case Pharmaceutical Evaluation Cell doses not receive any response from the firm within the given time, the case will be placed before Registration Board for decision.

Sr. No.	Observations	Response
1	As per submitted analytical method for Tapentadol HCl drug substance, the HPLC method is used for assay while analytical method validation report shows UV-performance for validation/verification studies. Please clarify and submit protocol and complete validation/verification studies for analytical method of drug substance.	The firm has stated that the analysis and analytical validation / verifications have been performed by using HPLC. Complete protocol and results have been submitted. *We prepared stock solution, then we furhter diluted the concentration. The concentration for assay method is 0.2mg/mL and the linearity range is from 0.24, 0.2, 0.16, 0.12, 0.1, 0.08, 0.04, 0.02mg/mL respectively.*

	Moreover, correlate the strengths of dilution prepared for calculation of assay with the strengths of dilutions prepared for performing testing of linearity parameter in analytical method verification studies. Furthermore, please state that whether you have used same method of analysis as used by the manufacturer of drug substance or otherwise. Provide method of analysis of drug substance from drug substance manufacturer.	The method of analysis is used by drug product manufacturer is different from the method used by drug substance mnafuatcruer for estimation of Tapentadol D.S. The drug substance manufacturer has used titration method for analysis of drug substance while the applicant has developed HPLC method for analysis of D.S. The firm has submitted analytical method validation report.
2	Provide certificate of analysis of the batch of drug substance used for product development from drug substance manufacturer as well as from the drug product manufacturer.	COAs from drug product and drug substance manufacturer are submitted for the batch used for product development. Batch number: 060034102019 Mfg date: Oct, 2019 Expiry: Sep, 2022
3	Provide pharmaceutical equivalence data against innovator's / reference product. The submitted data is against the comparator's product.	The firm has stated that during the pandemic, the innovator's product pack was not available due to closure of international flights and shipments so the sad studies were performed against the comparator's product with the detail given in the following. Pharmaceutical equivalence data is submitted against the comparator's product that is Tapento IR 75mg Tablet by M/s Sami Pharmaceuticals by performing all the quality tests. (Batch number: 003F) Comparative dissolution profile is submitted against the same product that is Tapento IR 75mg tablet by M/s Sami Pharmaceuticals. The values of F2 are within the acceptable range.
4	Justification is required for selection of dissolution parameters including dissolution medium (0.1N HCl), RPM, time etc.	The firm has referred FDA's dissolution guidance, 2018 document and stated that in-house method was developed for dissolution testing.
5	Justify the amount of drug substance that is 87.375/tablet dispensed for potency adjustment by providing detail of calculations along considering the assay value i.e 99.8%.	The dispensed quantity is according to 100% assay (As-Is) value while 99.8% assay (As-is) should have been considered. However, the firm has submitted revised calculations for potency adjustment considering the assay on as-is 99.8%.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Furthermore, the firm shall submit revised calculations for potency adjustment considering the assay value on As-Is basis for commercial batches.**

	102.8	100.53	105.53	101.21	101.48	102.41

Decision of 323rd meeting:
The Board was apprised as under:

- As per submitted stability data, the assay results of accelerated and real time stability studies at initial time points are different while the results should be the same for all the three batches.
- The results of assay for all the three batches are exactly same on respective time points throughout the stability studies which is not practically possible.

The Board decided to defer the case for clarification / scientific justification of the above mentioned observations along with the submission of Pharmaceutical Equivalence studies against the reference / innovator's product.

Submission by the firm:

The firm has submitted revised stability summary sheet along with raw data sheets and has stated that in previously submitted data there was a printing error.

Batch No.	TRL01	TRL02	TRL03

	Section approval	Dry Powder Vial Section (General)
	Name and address of API manufacturer.	M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd., No. 8. Nangang road Jiangyin Industrial Concentration zone, Fuqing, Fuzhou city, Fujian province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CMS1707001, CMS1707002, CMS1707003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	
	Analytical method validation/verification of product	Method validation / verification studies have submitted including accuracy/recovery, precision, specificity, , etc for drug substance and drug product.
STABILITY STUDY DATA		

Manufacturer of API	M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd., No. 8. Nangang road Jiangyin Industrial Concentration zone, Fuqing, Fuzhou city, Fujian province, China.		
API Lot No.	CMS2106002		
Description of Pack (Container closure system)	Type I glass vial packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.			
Batch Size			
Manufacturing Date			
Date of Initiation			
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No response is submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate no. FJ200003 valid till 21/09/2022 issued by Fujian Food and Drug Administration China..
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of clearance certificate no. 2761/2021-ADC(I&E) dated 16/08/2021 issued for M/s Vision Pharmaceuticals Islamabad. The material has been borrowed from M/s Vision Pharmaceuticals. **The firm has not provided any document related to borrowing of API.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Not submitted**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator-I:

Sr. No.	Observations	Response
1	Provide documents of approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate no. FJ200003 valid till 21/09/2022 issued by Fujian Food and Drug Administration China..

2	Provide analytical method verification studies (including accuracy, specificity and precision) for drug substance performed by drug product manufacturer.	Submitted. Test results for specificity is not provided.
3	Provide pharmaceutical equivalence studies against innovator's / reference product by performing all the quality tests.	Pharmaceutical equivalence study report is submitted without providing other details, batch numbers, expiry etc.
4	Provide documents confirming import of drug substance (invoice, clearance certificate etc) attested from DRAP.	Copy of clearance certificate no. 2761/2021-ADC(I&E) dated 16/08/2021 issued for M/s Vision Pharmaceuticals Islamabad. The material has been borrowed from M/s Vision Pharmaceuticals. **The firm has not provided any document related to borrowing of API.
5	Provide exact date of initiation of stability studies and detail of batch sizes.	Submitted.
6	Provide stability summary sheets containing results till 6 months along with the all the chromatograms along with raw data sheets for accelerated and real time stability for all the 3 strengths of the applied product.	• The firm has not submitted the stability summary sheets. • The firm has not provided chromatograms. • The data submitted is not comprehendible.

Decision of 323rd meeting:

The Board was apprised as under:

- As per submitted stability data, the assay results of accelerated and real time stability studies at initial time points are different while the results should be the same for all the three batches.
- The results of assay for all the three batches are exactly same on respective time points throughout the stability studies which is not practically possible.

The Board decided to defer the case for clarification / scientific justification of the above mentioned observations along with the submission of Pharmaceutical Equivalence studies against the reference / innovator's product.

Submission by the firm:

The firm has submitted revised stability summary sheet along with raw data sheets and has stated that in previously submitted data there was a printing error.

Batch No.	TRL01	TRL02	TRL03
Batch Size	1000 vials	1000 vials	1000 vials
Manufacturing Date	03-2022	03-2022	03-2022
Date of Initiation	09-03-2022	09-03-2022	09-03-2022
No. of Batches	03		

The firm has submitted Pharmaceutical equivalence against Colistim Powder for Injection 2MIU MFG by M/s Xellia Pharmaceuticals marketed by M/s Mukhtar Enterprises by performing quality tests.
Batch number: 3155427
Mfg date: 08/2021
ExP: 07/2023

Decision of 324th meeting: Approved with label claim for USP specifications as decided in 323rd meeting of Registration Board.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

29.	Name, address of Applicant / Marketing Authorization Holder	M/s May & Baker (pvt) Ltd., 45km, Dina Nath, Multan road, Lahore.

	Name, address of Manufacturing site.	M/s May & Baker (pvt) Ltd., 45km, Dina Nath, Multan road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30039 dated 24/10/2022
	Details of fee submitted	PKR 30,000/-: dated 18/10/2022
	The proposed proprietary name / brand name	**Colmate 1 MIU powder for injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Colistimethate as sodium……..1 MIU
	Pharmaceutical form of applied drug	White Lyophilized Powder for solution for IV injection
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	Colistim 1MIU by Biocare Pharmaceutica,
	GMP status of the Finished product manufacturer	DML issued vide letter No.F.1-10/2019-Lic dated 29/04/2022.
	Section approval	Dry Powder Vial Section (General)
	Name and address of API manufacturer.	M/s Livzon Group Fuzhou Fuxing Pharmaceutical Co., Ltd., No. 8. Nangang road Jiangyin Industrial Concentration zone, Fuqing, Fuzhou city, Fujian province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, residual solvents, specifications, analytical procedures

		and its complete validation studies, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	• Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months • Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CMS1707001, CMS1707002, CMS1707003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	
	Analytical method validation/verification of product	Method validation / verification studies have submitted including accuracy/recovery, precision, specificity, , system suitability etc for drug substance and drug product.

	GMP Status	The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated07-06-202. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.
	Remark of the Evaluator-I: The firm was asked for evidence of approval of required manufacturing facility vide shortcoming letter dated 06-03-2020. The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated07-06-202. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.	
	The firm has applied for In-House specifications while Clindamycin Phosphate Vaginal Cream is present in USP.	
Decision: Approved with USP specifications. Frim shall submit fee of Rs. 7500/- revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.		
39.	Name and address of manufacture / Applicant	M/s Wimits Pharmaceuticals (Pvt.) Ltd., Plot No. 129, Sunder Industrial Estate, Raiwind Road, Lahore
	Brand Name + Dosage Form and Strength	Valacin-T 1% Lotion

	Composition	Each ml contains: Clindamycin (as Phosphate)……10 mg (1%w/v)
	Dairy No. date of R &I fee	Dy. No. 44266 dated 28-12-2018 Rs. 20,000 Dated 27-12-2018
	Pharmacological Group	Anti-Bacterial
	Type of form	Form-5
	Finished product specifications	In-House
	Pack size and Demand Price	30ml, 60ml; As per SRO
	Approval status of product in Reference Regulatory Authorities	Dalacin T Topical Lotion MHRA Approved
	Me-too-status	Dalacin T Lotion 1%, Reg. No. 13582
	GMP Status	The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated07-06-202. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.
	Remark of the Evaluator-I: The firm was asked for evidence of approval of required manufacturing facility vide shortcoming letter dated 06-03-2020. The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated07-06-202. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.	
Decision: Approved.		
40.	Name and address of manufacture / Applicant	M/s Wimits Pharmaceuticals (Pvt.) Ltd., Plot No. 129, Sunder Industrial Estate, Raiwind Road, Lahore
	Brand Name + Dosage Form and Strength	Diclowim 1% W/W Gel
	Composition	Each gram of gel Contains: Diclofenac diethylamine 11.6mg equivalent to Diclofenac sodium…10mg
	Dairy No. date of R &I fee	Dy. No. 44285 dated 28-12-2018 Rs. 20,000 Dated 27-12-2018
	Pharmacological Group	NSAIDS
	Type of form	Form-5
	Finished product specifications	BP
	Pack size and Demand Price	25g, 50g; As per SRO
	Approval status of product in Reference Regulatory Authorities	Voltarol 1.16% Emulgel, Gel MHRA Approved.
	Me-too-status	Ronset Gel, Reg. No. 33012
	GMP Status	The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated07-06-202. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.
	Remark of the Evaluator-I: The firm was asked for evidence of approval of required manufacturing facility vide shortcoming letter dated 06-03-2020. The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated 07-06-2022. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.	
Decision: Approved.		
41.	Name and address of manufacture / Applicant	M/s Wimits Pharmaceuticals (Pvt.) Ltd., Plot No. 129, Sunder Industrial Estate, Raiwind Road, Lahore
	Brand Name + Dosage Form and Strength	Ketowit 2.5% W/W Gel
	Composition	Each gram contains: Ketoprofen…25mg (2.5%w/w)
	Dairy No. date of R &I fee	Dy. No. 44275 dated 28-12-2018 Rs. 20,000 Dated 27-12-2018
	Pharmacological Group	NSAIDs
	Type of form	Form-5
	Finished product specifications	BP

	Pack size and Demand Price	15g, 20g, 30g; as per SRO
	Approval status of product in Reference Regulatory Authorities	Ketoprofen 2.5% w/w (25mg Ketoprofen per gram) Gel MHRA Approved.
	Me-too-status	Ketoflex Gel 2.5%, Re. No. 18518
	GMP Status	The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated07-06-202. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.
	Remark of the Evaluator-I: The firm was asked for evidence of approval of required manufacturing facility vide shortcoming letter dated 06-03-2020. The firm has submitted renewal letter for DML no. F.1-10/2012-Lic dated07-06-202. The firm his granted Cream / Ointment / Lotion / Gel (General) NEW section.	
Decision: Approved.		

Case No. V: Registration applications submitted on Form 5F

42.	Name, address of Applicant / Marketing Authorization Holder	M/s Jaskan Pharmaceuticals (Pvt) Ltd. 50-Sundar Industrial Estate, Lahore.
	Name, address of Manufacturing site.	M/s Jaskan Pharmaceuticals (Pvt) Ltd. 50-Sundar Industrial Estate, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of dated 18-02-2021 based on the inspection dated 26-10-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for grant of additional section dated 12-03-2021 specifying Injectable Ampoule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30256: 05-11-2021
	Details of fee submitted	PKR 30,000/-: 08-10-2021
	The proposed proprietary name / brand name	**MECOKAN Injection 500mcg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 1 ml ampoule Contains: Mecobalamin……500mcg
	Pharmaceutical form of applied drug	Almost red colour solution filled in amber glass ampoule.
	Pharmacotherapeutic Group of (API)	Vitamin B12
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	1ml x 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Mecobalamin 500mcg Injection **(PMDA** Japan Approved)

	For generic drugs (me-too status)	Mecomax Injection by Global Pharma
	Name and address of API manufacturer.	Mahima Life Sciences Pvt Ltd. BST Road, Ganaur-131101, Distt. Sonepat (Haryana)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40^{o}C ± 2^{o}C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{o}C ± 2^{o}C / 65% ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has performed pharmaceutical equivalence against the product Mabil 500 mcg injection by Sami Pharma
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and validation studies of the drug product.

STABILITY STUDY DATA	
Manufacturer of API	Mahima Life Sciences Pvt Ltd. BST Road, Ganaur-131101, Distt. Sonepat (Haryana)
API Lot No.	MLMCB-040121
Description of Pack (Container closure system)	Glass ampoule
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months)

	Real Time: 0, 3, 6 (Months)		
Batch No.	OG-01	OG-02	OG-03
Batch Size	1000 Ampoules	1000 Ampoules	1000 Ampoules
Manufacturing Date	05-2021	05-2021	05-2021
Date of Initiation	18-05-2021	18-05-2021	18-05-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/55-2Drug1-2020/7030 dated 26-10-2020 issued by Haryana Food and Drug Administration. The certificate is valid till 12-09-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice number EP/21-22/032 dated 15/04/2021 cleared on 24/04/2021 vide dy. No. 6205/2021-DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

1	Justify Japanese pharmacopoeia specifications as mentioned in module 1 since no monograph for the mecobalamin injection is available in JP pharmacopoeia. Revise your specifications along with submission of requisite fee.	The firm has revised the specification to innovator's spec along with the submission of Rs. 7,500/- vide challan number 0673860677 dated 18/02/2022.
2	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Submitted.
3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted*	The firm has submitted analytical method verification report of drug substance performed by drug product manufacturer.
4	Justify the use of reference standard from Vital labs which is neither the drug substance manufacturer nor any reference lab.	*M/s Vital Laboratories Pvt. Ltd. is manufacturer of Mecobalamin reference standard.*

5	Justify your master formulation in which sodium chloride, sodium dihydrogen phosphate, acetic acid and water for injection is used as excipient, since the innovator has only used D-mannitol and pH regulator.	The firm has stated that results from stability studies show that the formulation is stable. The firm has provided method of tonicity determination for the applied formulation in response.
6	Justify why complete tests as mentioned in general monographs for such preparations are not performed during pharmaceutical; equivalence studies.	The firm has submitted pharmaceutical equivalence by performing quality test using HPLC method against comparator's product that is Methycobal injection 500 mcg injection by Hilton Pharma.
7	Submit detailed process validation protocols which are to be based on critical quality attributes identified during product development studies to optimize your manufacturing process.	Process validation protocol is submitted by M/s Jaskan Pharmaceuticals for the applied product. Batch number: 40762
8	Provide specifications of the excipients in section 3.2.P.4.	The applicant has submitted specifications for all the excipients used in the formulation.
9	Justify your drug product specifications in the light of recommendations of general monographs of official pharmacopoeia, since you have not included important tests like particulate matter, uniformity of dosage unit etc which are recommended in general monograph of USP.	The firm has revised the specifications which includes pH of solution, filled volume, leakage test, BET, sterility tets, particulate matter, assay but have not performed the test on finished product.
10	Justify the use of UV method for assay testing in pharmaceutical equivalence studies, since HPLC method is used by drug substance manufacturer as well as innovator's product. Justify the analytical method for assay and identification test based on UV method, since the drug substance manufacturer's method as well as the innovator product analytical method is based on HPLC testing.	The firm has developed HPLC method for analysis of drug substance along with the analytical method validation studies.
11	Provide detailed method of analysis of the drug product in section 3.2.P.5.2.	Submitted.
12	Justify how three batches having batch size of 100 ampoule is manufactured. Also provide the specifications of the equipment including maximum and minimum capacity to justify the manufacturing of sterile product.	The firm has submitted that the batch size for stability batches is 1000 ampoules.
13	Provide COA of reference standard actually used in the analysis of drug product.	Submitted.
14	Justify why photostability studies are not performed for the drug product.	The firm has performed photo stability studies of the drug substance and submitted the results.
15	Provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. 12/55-2Drug1-2020/7030 dated 26-10-2020 issued by Haryana Food and Drug Administration. The certificate is valid till 12-09-2022.
16	Provide Documents for the procurement of API with approval from DRAP.	Copy of invoice number EP/21-22/032 dated 15/04/2021 cleared on 24/04/2021 vide dy. No. 6205/2021-DRAP.

17	Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing instead of mentioning NA.	The firm has stated tha the testing is done at HPLC by using EZ Chrom Elite but has not submitted the compliance report.
18	Specify the details how the manufacturing and analysis of the product was carried out without exposure to light. Further also provide evidence of light resistant vessels to carry out analysis as recommended in JP monograph.	Manufacturing is done in light resistant SS vessels, all the operations are done in red diffused light havig 4-8 Ix, for optical checking Ix may be increase to 40-60 IX after sterility tests. Ampoules are packed in light resistant plastic. For testing in Qc lab amber colored glass ware wrapped with aluminium foil are used.
Decision: Approved. Registration letter will be issued upon submission of Pharmaceutical equivalence studies against the innovator/reference product. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

Case No, VI: Deferred cases (Import):

43.	Name and address of Applicant	M/s Himmel Pharmaceuticals Pvt. Limited 793-D Block C Faisal Town Lahore Pakistan
	Product License Holder & Manufacturer	M/s BEACON Pharmaceuticals Limited Plant address: Kathali, Bhaluka, Mymensingh Bangladesh Office Address: 9/B/2, Toyenbee Circular Road, Motijheel Dhaka, Bangladesh
	Name of exporting country	Bangladesh
	Type of Form	Form 5-A
	Diary No. & Date of R& I	Dy. No 7363 Dated 20-02-2019
	Fee including differential fee	Rs. 100,000/- Dated 20-02-2019
	Brand Name +Dosage Form + Strength	**Lapanix 250mg Tablet**
	Composition	Each film coated tablet contains: Lapatinib Ditosylate INN 398mg eq. to Lapatinib….250mg
	Finished Product Specification	In-house
	Pharmacological Group	Anti-cancer
	Shelf life	24 Months
	Pack size & Demanded Price	150's & As per SRO
	International availability	Tyverb® 250 mg film-coated tablets (UK)
	Me-too status	TYKERB TABLETS 250MG of M/s Gsk Karachi
	Stability studies	Firm has submitted long term (24 months) at 30+2oC, 65+5%RH & accelerated (06 months) stability data at 40+ 2oC, 75+ 5% RH for three batches.
	Detail of certificates attached	Original Legalized CoPP (Certificate#. DA/6-110/2016/22466 issued on 14-10-2018 by Govt. of the people's republic of Bangladesh, Ministry of Health & Family welfare, Directorate General of Drug Administration declaring the free sale of applied product and GMP compliant status of the manufacturer i.e., M/s BEACON Pharmaceuticals Limited. Original product specific letter of authorization from product license holder is submitted.

	Remarks of the Evaluator.	Reference formulation Each film-coated tablet contains lapatinib ditosylate monohydrate, equivalent to 250 mg lapatinib while applied Each film coated tablet contains: Lapatinib Ditosylate INN 398mg eq. to Lapatinib….250mg
	Decision of 293rd meeting: Deferred for revision of composition as per reference product along with submission of requisite fee for the revision. Submission by the firm: The firm has submitted several references from RRAs confirming the monohydrate for of the salt of the applied product that is Lapatinib Ditosylate monhydrtae. Hoever, the API used for manufacturing of the applied product is Lpatinib Ditosylate.	
	Decision of 308th meeting: The Board deferred the case for clarification since the reference product contains Lapatinib Ditosylate Monohydrate while the applied product is manufactured by using Lapatinib Ditosylate. Submission by the firm: The firm has submitted attested copy of declaration from the API manufacturer stating that the API manufacturer had provided the API as Lapatinib Ditosylate to M/s Beacon Pharmaceuticals ltd Bangladesh (the drug product manufacturer).	
	Decision of 312th meeting: The Board deferred the case for further deliberation since the API used for manufacturing of reference product is lapatinib ditosylate monohydrate while the applied product is manufactured by using lapatinib ditosylate. Submission by the firm: The firm has submitted that the drug substance used for the manufacturing of the applied product is Lapatinib Ditosylate. A declaration letter from Drug Substance manufacturer is also submitted stating that the drug substance which has been supplied to finished product manufacturer is Lapatinib Ditosylate. It is worthy to bring the fact before the Board that the drug substance falls in BCS Class II (low solubility/high permeability) (Sourse: USFDA Biopharamceutical review of the innovator's product). Decision of 313th meeting: The Board deferred the case for further deliberation since the API used for manufacturing of reference product is lapatinib ditosylate monohydrate while the applied product is manufactured by using lapatinib ditosylate. Submission by the firm: The firm has submitted the General information on drug substance from drug substance manfuactruer that is M/s Qilu AntiBiotic (Linyi) Pharmaceuticals Ltd, China. The firm has stated that the API used in the manufacturing of the applied product is Lapatinib Ditosylate monohydrate as per the structure of the API from DMf.	
	Decision of 324th meeting: Deferred for submission of scientific evidence regarding the salt form of the drug substance used in the manufacturing of stability batches since the applicant in previous submission had claimed that they had used "Lapatinib ditosylate" for manufacturing of drug product whereas innovator product is of "Lapatinib ditosylate monohydrate."	

Item No. 2: Agenda of Evaluator PEC-II (Mr. Ammar Ashraf)

Case no. 01 Priority registration of Isoflurane Inhalational Solution

DRAP in its 143rd meeting of Authority held on 05th August, 2022, keeping in view of essentiality, criticality of isoflurane and pursuance from Government of Punjab to ensure its availability in Pakistan decided that registration application of Isoflurane shall be considered "out of queue" by the Registration Board.

PHARMA LIMITED. Sy. Nos. 7-70, 70/1 & 70/2, Digwal (D), Kohir (M), SANGAREDDY (D), Telangana State, India.

Available applications of Isoflurane 100ml & 250ml liquid for inhalation, are presented below:

44.	**Name, address of Applicant / Importer**	**M/s Highsea pharmaceuticals. 2nd floor, 39 commercial cavalry ground, Lahore**
	Details of Drug Sale License of importer	**License No:** 05-352-0058-100282D **Address:** 2nd floor,39-commercial area, cavalary ground Lahore. **Address of Godown:** NA **Validity:** 01-12-2027 **Status:** Drug Licence by way of Distributor.
	Name and address of marketing authorization holder (abroad)	M/s Fujian Highsea United Pharmaceutical Co., Ltd No. 15, Zone D, Mingxi Economic Development Zone, Mingxi Country, Fujian Province, 365200 China
	Name, address of manufacturer(s)	M/s Fujian Highsea United Pharmaceutical Co., Ltd No. 15, Zone D, Mingxi Economic Development Zone, Mingxi Country, Fujian Province, 365200 China
	Name of exporting country	China
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate) • Copy of COPP (Certificate# Fujian20220009) issued by Fujian Medical Products Administration valid till 15-06-2024. • Free Sale status: The COPP endorses the free sale status of the applied product in exporting country • GMP: The COPP declares GMP compliant status of the manufacturer on bais of periodic inspections conducted on yearly basis.	
	Details of letter of authorization / sole agency agreement Copy "Confidentiality agreement" dated 10-8-2022, issued between M/s Fujian Highsea United Pharmaceutical Co., Ltd., and of M/s Highsea Pharmaceutica for the applied product of "Isoflurane 100ml & Sevoflurane 250ml".	
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy.No 25071 dated 05-09-2022	Dy. No 25071 dated 05-09-2022
	Details of fee submitted	Rs.150,000/- dated 23-08-2022
	The proposed proprietary name / brand name	**Alslar inhalation solution 100ml**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Isoflurane …… 100% v/v
	Pharmaceutical form of applied drug	Liquid for Inhalation
	Pharmacotherapeutic Group of (API)	General Anaesthetic
	Reference to Finished product specifications	USP
	Proposed Pack size	100ml
	Proposed unit price	M.R.P. 3990/100ml bottle
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	Forane of M/s Getz Pharma.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Name: Fujian Highsea United Pharmaceutical Co., Ltd Address: No. 15, Zone D, Mingxi Economic Development Zone, Mingxi, Fujian 365200 China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Submitted.
	Module-III Drug Product:	Firm has submitted data of drug product, including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence Studies	Not submitted
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Soda lime glass moulded pharmaceutical bottle (brown), medicinal polypropylene cap lined with low density polyethylene gasket

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The Long term stability study data is conducted at 25ºC ±2ºC / 60% ± 5% RH for 36 months.
	Claimed shelf life	36 months.

Remarks of Evaluator:

Section#	Observations	Firm's response
1.4.2	Notarized copy of letter of authorization/Sole agency agreement from the market authorization holder shall be submitted for applied product	It is under process in the Pakistan embassy in Beijing China and will be submitted on receipt. Firm has submitted undertaking in this regard.
3.2.P.2.2.1	Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted	Pharmaceutical equivalence studies against the product of M/s Baxter (Batch#N063M522) has been submitted.
3.2.P.3.5	Submit process validation reports including the protocols and results for critical process steps shall be provided	Submitted.
3.2.P.8.3	Submitted long term stability studies data of drug product is not as per Zone IVa conditions.	Firm has submitted long term stability studies data as per Zone IVa conditions for 24 months.

Decision: Approved as per Policy for inspection of Manufacturer abroad. Registration letter will be issued upon submission of legalized Original CoPP & Noatrized copy of letter of authorisation.

Case no. 02 Registration applications on Form 5F (Human)

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Drug substances is tested at in-house specifications. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	--

	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.		
STABILITY STUDY DATA				
Manufacturer of API	M/s Vision Pharmaceuticals (Pvt) Ltd. Plot No. 22-23, industrial Triangle, kahuta Road, Islamabad-Pakistan			
API Lot No.	ABC082021001/B			
Description of Pack (Container closure system)	Glass vial			
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH			
Time Period	Real time: 24 months Accelerated: 6 months

Administrative Portion				
7.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable		
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate submitted		
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Purchase invoice: GE035/2018 , attested by DRAP, dated 03/07/2018 is submitted		
10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted		
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted		

Remarks of Evaluator:

Section#	Observations
1.3	Form 5F has been submitted from the *M/s* Fynk Pharmaceuticals instead of M/s Enzon.
3.2.S	• Role of Mannitol in the "Omeprazole sodium/Lyophilized powder shall be justified against the innovator product composition. • Submitted drug substance details are of "Omeprazole sodium lyophiliized powder (38%w/w) whereas drug product composition declares the use of • Omeprazole sodium lyophilized powder (35%w/w).
3.2.P.1	• Equivalency of Omeprazole sodium lyophilized powder (35%) to the claimed strength of 40 mg of Omeprazole is not correct. • Details of accompanying reconstitution diluent are not as per innovator product.
3.2.P.2.2.1	Pharmaceutical equivalence studies against the reference product shall be submitted.

3.2.P.2.5	The said section declares the "Sterile water for injection" as compatible diluent for reconstitution which is contrary to the recommendations of innovator product literature.
3.2.P.2.5	The said section declares the "Sterile water for injection" as compatible diluent for reconstitution which is contrary to the recommendations of innovator product literature.
3.2.P.3.2	Declaration of "Sterile water of injection" as ingredient in the composition table shall be justified.
3.2.P.3.5	Justification shall be submitted for not including test of "Filled weight per vial" in the process validation studies.
3.2.P.5.1	Limits of pH test in drug product specifications are not as per innovator product. Limits of Assay test shall be justified.
3.2.P.5.4	Batch release COAs of stability batches shall be submitted.
3.2.P.8.3	• Documents confirming procurement of drug substance shall be submitted. • Justification shall be submitted for not performing sterility testing at the last time point of accelerated stability studies. • Results of pH test during stability studies are out of the range recommended by the innovator drug product. • Submit complete analytical record for the performance of stability studies of drug product. • Record digital data logger of stability chambers shall be submitted. • Complete batch manufacturing record of stability batches shall be submitted.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

46.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore**
	Name, address of Manufacturing site.	M/s Pacific Pharmaceuticals Ltd. Plot No. 384, Sunder Industrial Estate, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	GMP certificate issued on 17-07-2020
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 24-06-2019 which specifies Ophthalmic general section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 6373 dated 08-03-2022
	Details of fee submitted	Rs.30,000/- dated 03-02-2022
	The proposed proprietary name / brand name	**Latano-T Eye Drops**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml Contains: Latanoprost …… 50mcg Timolol Maleate 6.8mg Eq. to Timolol …… 5mg
	Pharmaceutical form of applied drug	Ophthalmic Drops
	Pharmacotherapeutic Group of (API)	Ophthalmologicals, antiglaucoma preparations and miotics, prostaglandin analogues. ATC code: S01EE01.
	Reference to Finished product specifications	In-House specification
	Proposed Pack size	1 x 2.5 ml

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Xalacom Approved by US FDA
	For generic drugs (me-too status)	Xalatan Eye Drop 2.5ml by Pfizer Laboratories (Pvt) Ltd.
	Name and address of API manufacturer.	Cayman Pharma s r.o. ul. Práce 657, 277 11 Neratovice Czech Republic FDC limited
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	**Latanoprost:** Long-term stability studies were performed at a storage temperature of -18°C for 24 months. Accelerated stability studies were performed at a temperature of +5 °C for 6 months. **Timolol maleate:** Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The Long term stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies s against the reference product of "Xalatan Eye Drop" 2.5ml by Pfizer Laboratories (Pvt) Ltd.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long term conditions.

STABILITY STUDY DATA	
Manufacturer of APIs	Cayman Pharma s r.o. ul. Práce 657, 277 11 Neratovice Czech Republic
API Lot No.	Batch # 2008S004
Description of Pack (Container closure system)	Eye Drops is available as 2.5 mL sterile solution in 5 mL LDPE bottle with polypropylene dropping nozzle with HDPE Cap

Manufacturing Date		07/2021	07/2021	07/2021
DOCUMENTS / DATA PROVIDED BY THE APPLICANT				
#	**Documents To Be Provided**	**Status**		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of EUDRA GMP certificate (Certificate Ref. No. ***016/2021/API***) valid upto 19-10-2021.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	N/A		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data pf stability batches along with batch manufacturing record and analytical record.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted.		
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)		

Remarks of Evaluator:

Section#	**Observations**	**Firm's response**
3.2. S.4	The specifications submitted from drug substance manufacturer are not as per USP monograph of "Latanoprost" for the test of Optical rotation & water content, Latanoprost related compound E test missing. Specifications different between API & Product manufacturer.	Specifications as per USP Kindly see the attachment **Optical Rotation:** **USP:** 31 º – 38º **Manufacturer:** 31º – 38 º Manufacturer's COA as per USP-42, It may be typo mistake in the lower limit of Optical Rotation, but the results are within limits of USP-42. **Water Contents:** **USP:** 2% **Manufacturer:** 0.5% USP-42 gives the wide range of Water Contents while Manufacturer is following the narrow range and results fall in the USP-42 Limits. **Latanoprost Related Compound E:** Manufacturer performed the test of related Compound E as in COA **(e) Latanoprost Free Acid** but the range is narrow.

		USP: NMT 0.2% **Manufacturer:** NMT 0.15% USP-42 gives the wide range for Assay Determination while Manufacturer is following narrow range which falls in the range of USP-42.	
3.2.S.5	COA of working standard of Timolol maleate declares validity date as 08-01-2021.	The updated COA of Working Standard For Timolol Maleate is submitted, valid till October, 2025.	
3.2.P.2.1	Finish product specifications for pH and Osmolarity are not as per reference product	Finish product specifications for pH and Osmolarity are as per reference product	
3.2.P.3.2	Manufacturing process includes step of terminal sterilization, which is not recommended by the reference product.	No terminal sterilization, Aseptic area manufacturing tank under LAF and aseptic Blowing, filling/Sealing multiple filtration cartage assembling 0.65um+ 0.45um +0.22um in manufacturing for filtration of solution and 0.22 in filling BFS machine which already mention in BMR so our product are sterile by filtration and aseptic process.	
3.2.3.5	Process validation protocol is missing.	Submitted.	
3.2.P.5.3	• Clarification shall be submitted for applying same chromatographic conditions except UV detector wavelength for the method validation studies of both APIs in the product.	• Because both APIs are very soluble in same diluent that why the diluent and other chromatographic conditions are same like flow rate, injection volume and column. So, both APIs can be detected in single injection.	
3.2.P.6	• COAs of primary/working standards shall be submitted.	Submitted.	
3.2.P.8	• Documents confirming import of APIs shall be submitted. • Complete analytical record for the performance of stability studies shall be submitted including chromatograms, raw data sheets etc..	Firm has submitted following: Copy of commercial invoice# FOZ-11/2021 attested by AD I&E, DRAP, Lahore dated 24-02-2021 for import of 7gm of Latanoprost. Copy of commercial invoice# 9510004244 attested by AD I&E, DRAP dated 15-06-2021 for import of 0.5Kg of Timolol maleate. Analytical record for stability studies.	

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 75,00/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the Zezot injection
	Analytical method validation/verification of product	Method verification studies have submitted

STABILITY STUDY DATA

Manufacturer of API	M/s Zhejiang Guobong Pharmaceutical Co., Ltd. No. 6, Weiwu Road, Hangzhou Gulf Shangyuu Economic and Technological Development Zone, Zheijnag, China.		
API Lot No.	103-200642-21		
Description of Pack (Container closure system)	Glass Vial with rubber stopper sealed with flip off seal and packed in unit carton (1×1's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	394DS01	394DS02	394DS03
Batch Size	300 vials	300 vials	300 vials
Manufacturing Date	01-2021	01-2021	01-2021
No. of Batches	03		

Documents submitted along with stability data.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	--
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. ZJ20180112 issued by Shandong Food and Drug Administration valid till 04/09/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice GBPH2020 attested by AD DRAP I&E, Karachi dated 07-09-2020 for import of 100Kg of Azithromycin dihydrate (batch# 103-200642-21)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	N/A

Remarks of Evaluator[II]:
Firm had initially submitted trial batches data, while subsequently firm has submitted stability studies data of three commercial batches detailed as below:

Description of Pack (Container closure system)	Glass Vial with rubber stopper sealed with flip off seal and packed in unit carton (1×1's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RYD001	RYD002	
Batch Size	20,300 vials	20,300 vials	
Manufacturing Date	04-2021	10-2021	
No. of Batches	03		

- Firm has not submitted following for new stability studies data:
  i. Fee for revision of stability studies data.
  ii. COA of relevant batch of API used for preparation of newly submitted stability batches.
  iii. Complete batch manufacturing record.
  iv. Details of drug substance used for the preparation of stability batches including evidence of procurement of Drug substance.
  v. Digital data logger record for stability chambers.

Decision of 321st meeting: Deferred for submission of following:

i. Full fee of Rs. 75,000/- for revision of stability studies data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021
ii. COA of relevant batch of API used for preparation of newly submitted stability batches.
iii. Complete batch manufacturing record.
iv. Details of drug substance used for the preparation of stability batches including evidence of procurement of Drug substance.

Firms response: Firm has submitted following:

- Fee of RS. 75,000/- vide deposit slip#25218030.
- COA of "Azithromycin (as dihydrate powder) of two batches from M/s Nabiqasim (Batch# 2010-6091-FP023 & 129-210516-1).
- Batch Manufacturing Record of Stability Batches i.e., batch# RYD001 & RYD002.
- Commercial invoice# NSK20PK128 for import of 100Kgs of Azithromycin attested y AD FDRAP I&E Karachi dated 10-12-2020.

Decision of 324th meeting: Approved. Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Nabiqasim Industries Pvt Ltd. 17/24, Korangi Industrial Area, Karachi, Pakistan.

48.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Indus Pharma (Pvt.) Ltd. Plot No. 26,27 & 63-67, Sector 27, Korangi Industrial Area, Karachi**

	Name and address of API manufacturer.	M/s Shandong / (Previously Qilu Pharmaceuticals Co. Ltd) Anxin Pharmaceutical Co., Ltd. 849, Dongjia Town, Licheng District, Jinan, Shandong, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and

		justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand leader that is Tanzo 4.5 g Injection by M/s Bosch Pharma by performing quality tests (Identification, Assay and Uniformity of dosage form).
	Analytical method validation/verification of product	Method verification studies have submitted

STABILITY STUDY DATA			
Manufacturer of API	M/s Shandong / (Previously Qilu Tianhe Pharmaceuticals Co. Ltd) Anxin Pharmaceutical Co., Ltd. 849, Dongjia Town, Licheng District, Jinan, Shandong, China		
API Lot No.	KA1007150016		
Description of Pack (Container closure system)	Glass Vial with rubber stopper sealed with flip off seal and packed in unit carton (1×1's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	P5001	P5002	P5003
Batch Size	8,600 vials	8,600 vials	10,630 vials
Manufacturing Date	03-2015	03-2015	04-2015
Date of Initiation	16-04-2015	16-04-2015	04-06-2015
No. of Batches	03		

Documents submitted along with stability data.		
	Reference of previous approval of applications with stability study data of the firm (if any)	--
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 2018001 issued by Shandong Food and Drug Administration valid till 24/07/2023.
	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice attested by AD DRAP I&E, Lahore dated 11-02-2015 for import of 100Kg of Piperacillin sodium: Tazobactam sodium (8:1)

	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	N/A

Remarks of EvaluatorII:

Section#	**Observation**	**Firm's response**
3.2. S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer shall be submitted.	Submitted.
3.2.S.4.3	Analytical method verification studies from the drug product manufacturer shall be submitted.	Submitted.
3.2. S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	Submitted.
3.2.P.2.2.1	Pharmaceutical equivalence studies against the innovator product shall be submitted.	Pharmaceutical equivalence has been submitted against the Tanzo Injection of M/s Bosch.
3.2.P.2.6	Compatibility studies with the reconstitution diluent shall be submitted.	Compatibility studies with water for injection have been submitted.
3.2.P.5.3	Test of specificity parameter has not been submitted in the analytical method verification studies.	Submitted.
3.2.P.8.3	Significant change i.e., more than 5% in the Assay results of Tazobactam has been reported in the accelerated stability studies data of batch# N5001 & N5002 of "2.25gm Injection." Firm has submitted following justification: We placed three consecutive batches of Talzon Sterile Dry Powder Injection 2.25g N500 I, N5002 and N5003 in 2015 from the respective supplier Shandlong, Pharmaceutical Co. Ltd. (Previously Qilu) for accelerated stability study at 40°C ± 2°C temperature and 75% ± 5% humidity and shelf life stability study at 30°C ± 2°C temperature and 65% ± 5%, humidity in which a slightly significant change was observed in N5001 and N5002 which might vary from analyst to analyst etc. Due to this significant change, we re-placed three consecutive batches of Talzon Sterile Dry Powder Injection 2.25g N900 I, N9002 and 1 9003 in 2019 from Shandong, Pharmaceutical Co. Ltd. (Previously Qilu) in which the results of the accelerated stability study and the shelf life stability are within limits and were found to be satisfactory. In addition, we are then placed one batch from the same supplier each year and-the results of all batches are within limits and deemed satisfactory. The details of new stability studies data submitted by firm for 2.25gm strength is as under:	

Description of Pack (Container closure system)	Glass Vial with rubber stopper sealed with flip off seal and packed in unit carton (1×1's)
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 24 months

	Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	N9001	N9002	N9003
Batch Size	8,330 vials	8,330 vials	12,500 vials
Manufacturing Date	01-2019	04-2019	10-2019
Date of Initiation	23-01-2019	23-04-2019	08-11-2019

Documents submitted along with stability data.	
Reference of previous approval of applications with stability study data of the firm (if any)	--
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 2018001 issued by Shandong Food and Drug Administration valid till 24/07/2023.
Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted for the relevant batch of API used for preparation of newly submitted drub product stability batches.
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted for time duration of newly submitted stability batches.

- Firm has not submitted following for new stability studies data:
    i. Fee for revision of stability studies data.
    ii. COA of relevant batch of API used for preparation of newly submitted stability batches.
    iii. Complete batch manufacturing record.
    iv. Submitted stability studies record does not show performance of sterility testing.

Decision of 321st meeting: Registration Board deferred the applications of Tazit 2.25gm Sterile Dry Powder for Injection & Tazit 4.5gm Sterile Dry Powder for Injection for submission of following:

i. Full fee of Rs. 75,000/- for revision of stability studies data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021
ii. COA of relevant batch of API used for preparation of newly submitted stability batches.
iii. Complete batch manufacturing record.
iv. Microbial reports for performance of sterility testing during stability studies.

Firms response: Firm has submitted following:

- Fee of RS. 75,000/- vide deposit slip#4303205195
- COA of "Piperacillin sodium & Tazobactum sodium sterile powder from M/s Qilu Antibiotics & M/s Stallion of two batches (Batch# HF8086D2 & HF8116D1).
- Batch Manufacturing Record of revised Stability Batches.
- Microbial reports for performance of sterility testing

Decision of 324th meeting: Registration Board approved the applications of Tazit 2.25gm Sterile Dry Powder for Injection & Tazit 4.5gm Sterile Dry Powder for Injection. Registration Board further authorized its Chairman for issuance of registration letter upon capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals (Pvt.) Ltd.

Case no. 03 Deferred cases Registration applications on Form 5F (Human)

50.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Pacific Pharmaceuticals Limited 30 km, Multan Road, Lahore, Pakistan**

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Trijardy® XR Tablets 12.5mg/2.5mg/1000mg by M/s Boehringer Ingelheim, FDA Approved.
	For generic drugs (me-too status)	Not Available
	Evidence of manufacturing facility	GMP certificate granted on basis of inspection conducted don 07-03-02019 declares availability of tablet general section.
	GMP status of the Finished product manufacturer	GMP certificate granted on basis of inspection conducted don 07-03-02019.
	Name and address of API manufacturer.	**Linagliptin:** M/s Fuxin Long Rui Pharmaceutical Co., Ltd., Flouride Industrial park, Fuxin City, Liaoning province, China **Empagliflozin:** M/s Fuxin Long Rui Pharmaceutical Co., Ltd., Flouride Industrial park, Fuxin City, Liaoning province, China **Metformin Hydrochloride:** M/s Auro Laboratories Ltd., K-56, MIDC tarapur, Boiser, Dist, Thane, Maharashtra, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies of Drug substance	**Empagliflozin:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months

		Linagliptin: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months **Metformin HCl:** Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Trijardy XR Tablets 12.5/2.5/1000mg approved by US-FDA. CDP has been performed against the same brand that is Trijardy XR Tablets 12.5/2.5/1000mg approved by US-FDA inAcid media (pH 1.2) , Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8)
	Analytical method validation/verification of product	Method validation studies have submitted including, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.

STABILITY STUDY DATA

Manufacturer of API	**Linagliptin:** M/s Fuxin Long Rui Pharmaceutical Co., Ltd., Flouride Industrial park, Fuxin City, Liaoning province, China **Empagliflozin:** M/s Fuxin Long Rui Pharmaceutical Co., Ltd., Flouride Industrial park, Fuxin City, Liaoning province, China **Metformin Hydrochloride:** M/s Auro Laboratories Ltd., K-56, MIDC tarapur, Boiser, Dist, Thane, Maharashtra, India.		
API Lot No.	**Empagliflozin:** L-E-202000409-D01-E06-01 **Linagliptin:** L-20200219-D01-L09-01 **Metformin HCl:** 2018NPC0633		
Description of Pack (Container closure system)	Alu-Alu. Blisters with aluminum foil having leaflet and packed in unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

	Product manufacturer shall be submitted for Empagliflozin & Linagliptin.	
3.2.P.2.1	• Innovator product has used Polyethylene oxide as extended release polymer, whereas you have used HPMC 15000 for the same purpose. Justification shall be submitted for this variation along with drug excipient compatibility study. • Dissolution limits defined in the "Quality Target product Profile" are different from that recommended by US FDA for the Innovator product i.e., Trijardy XR tablets.	• Composition is according to innovator, Product is stable, no variations in result observed were found during all study. • Compatibility study report has been submitted. • Dissolution Limits in CDP are updated according to USFDA and updated Protocol, Report has been submitted.
3.2.P.5.1	• Submitted drug product specifications does not include test for "Uniformity of Dosage Unit" by way of content uniformity for Empagliflozin & Linagliptin. • Dissolution time points for metformin HCl & Linagliptin are not as recommended by US FDA for the innovator product i.e., Trijardy XR tablets.	Firm has submitted revised drug product specification including test of content uniformity whereas the dissolution specifications for Empagliflozin & Linagliptin are still not as recommended by US FDA for innovator product. Firm has proposed dissolution limits of NLT Q in 60 minutes for both Empagliflozin & Linagliptin whereas US FDA has recommended 45 minutes & 30 minutes time point for Empagliflozin & Linagliptin respectively.
3.2.P.5.2	• Submitted analytical procedure for dissolution test does not mention details for standard solution preparation. • Standard concentration for each API does not equate with the sample concentrations in the analytical procedure of Assay test.	Firm has revised analytical procedure for the details of standard solution preparation and concentration of standard and sample solution, whereas the stability data had been submitted as per previous method.
3.2.P.5.3	The concentration range applied for the linearity test of Linagliptin, does not cover the specified concertation for Assay test.	Revised method validation report has been submitted.
3.2.P.5.4	Submitted Batch analysis COA does not include test of content uniformity for Empagliflozin & Linagliptin. Dissolution time points for Linagliptin & Metformin HCl are not as recommended by US FDA for the innovator product i.e., Trijardy XR tablets.	Firm has submitted revised drug product specification including test of content uniformity whereas the dissolution specifications for Empagliflozin & Linagliptin are still not as recommended by US FDA for innovator product. Firm has proposed dissolution limits of NLT Q in 60 minutes for both Empagliflozin & Linagliptin whereas US FDA has recommended 45 minutes & 30 minutes time point for Empagliflozin & Linagliptin respectively.
3.2.P.6	• Submitted COA of working standard of Metformin HCl declares retest date as May 2021, whereas stability studies have also been performed subsequent to this date. • Submitted COA of working standard of Empagliflozin declares retest date as March 2021, whereas stability studies have also been performed subsequent to this date.	No justification has been submitted.
3.2.P.8.3	• Documents confirming import of Metformin HCl shall be submitted. • Analytical record i.e., raw data sheets, chromatograms & COAs shall be submitted for complete stability studies at both accelerated and long-term conditions.	• Firm has submitted commercial invoice attested by AD DRAP I&E, Lahore 11-12-2018 for import of 1000Kg Metformin HCl. • Firm has submitted raw data sheet for the stability studies. • Audit trail reports on product testing have not been submitted.

	• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	• Details of data logger have been submitted.
• Submit clarification regarding not ensuring the dissolution profile at in-process stage of Metformin HCl extended release core prior to proceeding for Active coating of other drug substances. • Submitted BMR declare dispensing of Empagliflozin & Linagliptin as per 100% content of desired label claim. Justification shall be submitted that how dispensed quantity will produce 100% content of Empagliflozin & Linagliptin, when both APIs are being included by way of Active coating and how the wastage of coating solution will be compensated.		Not replied. Firm has submitted a document titled "Additional Raw/Packaging materials Requisition Form" 01-10-2020 wherein dispensing of Empagliflozin & Linagliptin for batch# 00110P,00210P,003 has been declared with the reason as "To produce 100% content of Empagliflozin & Linagliptin, overages required for coating solution.

Decision of 321st meeting: Registration Board deferred the applications of Trilin 12.5/2.5/1000 mg Tablet, Trilin 25/5/1000 mg Tablet, Trilin 10/5/1000 mg Tablet & Trilin 5/2.5/1000 mg Tablet for following:

- Valid GMP certificate of M/s Auro Laboratories Ltd., K-56, MIDC tarapur, Boiser, Dist, Thane, Maharashtra, India, shall be submitted.
- Dissolution specifications for Empagliflozin & Linagliptin are not as recommended by US FDA for innovator product. Firm has proposed dissolution limits of NLT Q in 60 minutes for both Empagliflozin & Linagliptin whereas US FDA has recommended 45 minutes & 30 minutes time point for Empagliflozin & Linagliptin respectively. Justification shall be submitted in this regard.
- Submitted COA of working standard of Metformin HCl declares retest date as May 2021, whereas stability studies have also been performed subsequent to this date. Justification shall be submitted in this regard.
- Submitted COA of working standard of Empagliflozin declares retest date as March 2021, whereas stability studies have also been performed subsequent to this date. Justification shall be submitted in this regard.
- Submit clarification regarding not ensuring the dissolution profile at in-process stage of Metformin HCl extended release core prior to proceeding for Active coating of other drug substances.
- Submit batch wise details of each strength for the dispensing of Linagliptin & Empagliflozin for ensuring the 100% content as per label claim.
- HPLC chromatograms shall be submitted for complete stability studies of each strength.
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.

Response by Firm:

Sr.#	Deficiency	Firm's response
1.	Valid GMP certificate of M/s Auro Laboratories Ltd., K-56, MIDC Tarapur, Boiser, Dist., Thane, Maharashtra, India, shall be submitted.	**GMP certificate#** NEW-WHO-GMP/CERT/KD/10938212021/11/38620 valid till 26-12-2024 issued by FDA Maharashtra has been submitted.
2.	Dissolution specifications for Empagliflozin & Linagliptin are not as recommended by US FDA for innovator product. Firm has proposed dissolution limits of NLT Q in 60 minutes for both Empagliflozin & Linagliptin whereas US FDA has recommended 45 minutes & 30 minutes time point for Empagliflozin & Linagliptin respectively. Justification shall be submitted in this regard.	Firm has referred to the US FDA Dissolution database for setting the dissolution limits initially and has now submitted revised drug product test methods for each strength wherein dissolution limits of 45 minutes & 30 minutes time point have been declared for Empagliflozin & Linagliptin respectively.
3.	Submitted COA of working standard of Metformin HCl declares retest date	

		as May 2021, whereas stability studies have also been performed subsequent to this date. Justification shall be submitted in this regard.	The subsequent stability testing is performed using a valid working standard, which was standardized on May 2021. Firm has submitted valid COAs of working standard.
	4.	Submitted COA of working standard of Empagliflozin declares retest date as March 2021, whereas stability studies have also been performed subsequent to this date. Justification shall be submitted in this regard.	
	5.	Submit clarification regarding not ensuring the dissolution profile at in-process stage of Metformin HCl extended release core prior to proceeding for Active coating of other drug substances.	Pacific has already registered product with same formulation of core and have its history data that is sufficient to ensure dissolution profile of Metformin HCl. In case of Trilin, BMR will be revised for commercial batches.
	6.	Submit batch wise details of each strength for the dispensing of Linagliptin & Empagliflozin for ensuring the 100% content as per label claim.	Firm has submitted "Additional Raw material requisite Form" against which additional quantity of Empagliflozin and Linagliptin has been issued for coating solution of each batch of every strength.
	7.	HPLC chromatograms shall be submitted for complete stability studies of each strength.	Submitted.
	8.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Submitted.

Decision: Registration Board approved the applications of Trilin 5/2.5/1000 mg Tablet, Trilin 10/5/1000 mg Tablet, Trilin 25/5/1000 mg Tablet & Trilin 12.5/2.5/1000 mg Tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 04 Registration Applications on Form 5.

a. Deferred cases:

54.	**Name and address of manufacturer / Applicant**	**M/s Wellborne Pharmachem and Biologicals, Plot No.51/1 – 52/1, Phase-II, Industrial Estate, Hattar**
	Brand Name + Dosage Form + Strength	**Bromep 40mg capsules**
	Composition	Each capsule contains: Omeprazole (as 22.5%w/w enteric coated pellets) …….. 40mg Source of pellets: M/s Spansules Formulations, India
	Diary No. Date of R& I & fee	Dy. No. 359; 23-12-2015; Rs.20,000/- (23-12-2015)
	Pharmacological Group	Antacid
	Type of Form	Form 5
	Finished product Specifications	USP
	Pack size & Demanded Price	As fixed by government
	Approval status of product in Reference Regulatory Authorities	Approved by MHRA
	Me-too status (with strength and dosage form)	Acizole Capsule 40mg by M/s Cirin Pharmaceuticals, (Reg# 034369)
	GMP status	Last GMP inspection was conducted on 27-6-2018 concluded good GMP.
	Remarks of Evaluator II: Fee of Rs. 80,000/- for import of pellets shall be submitted.	

	Decision of 285th meeting: Deferred for submission of fee of Rs. 80,000/- for import of pellets.	
	Firm's reply: Firm has requested for change of source of pellets to M/s Vision Pharmaceuticals, Islamabad along with fee of Rs. 30,000/- vide deposit slip#845065420513.	
	Decision of 324th meeting: Approved with source of pellets from M/s Vision Pharmaceuticals, Islamabad.	
55.	**Name and address of manufacturer / Applicant**	**M/s Jinnah Pharmaceuticals Pvt Ltd. 13 km, Lahore Road, Multan**
	Brand Name + Dosage Form + Strength	**Jaydallin Syrup**
	Composition	Each 5ml Contains: Aminophylline…….32mg Diphenhydramine…….8mg Ammonium Chloride……30mg Menthol……0.98mg
	Diary No. Date of R& I & fee	Dy.No 16225 dated 06-03-2019 Rs. 20,000/- 07-03-2019
	Pharmacological Group	bronchodilator
	Type of Form	Form 5
	Finished product Specifications	Mfg
	Pack size & Demanded Price	Rs.69 for 120ml,
	Approval status of product in Reference Regulatory Authorities	Could not be confirmed
	Me-too status (with strength and dosage form)	Hydryllin Syrup by M/s Searle, Pakistan
	GMP status	The panel recommended renewal of DML, inspection date 03/05/2019.
	Remarks of Evaluator II: RRA Status could not be confirmed	
	Decision of 290th meeting: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting.	
	Firm's reply: Firm has submitted following revised composition along with fee of Rs. 30,000/- vide deposit slip#399998694: Each 5ml Contains: Aminophylline…….32mg Diphenhydramine…….8mg Ammonium Chloride……30mg	
	Decision of 324th meeting: Deferred for evidence of approval of revised formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.	
56.	**Name and address of manufacturer / Applicant**	**M/s Evolution Pharmaceuticals (Pvt.) Ltd. Plot #: 25 & 26, Street No. S-3, RCCI, National Industrial Zone, Rawat, Islamabad**
	Brand Name + Dosage Form + Strength	Vofen Sachet 600mg
	Composition	Each sachet contains: Ibuprofen…….600mg
	Diary No. Date of R& I & fee	Dy No. 9332: 13.03.2018 PKR 20,000/-: 13.03.2018
	Pharmacological Group	Propionic acid derivatives
	Type of Form	Form 5
	Finished product Specifications	Manufaturer's specifications
	Pack size & Demanded Price	20's; As per SRO
	Approval status of product in Reference Regulatory Authorities	Brufen® 600mg Effervescent Granules. **MHRA** approved
	Me-too status (with strength and dosage form)	Brufen 600mg Sachet Reg. No. 44414
	GMP status	Last GMP inspection report dated 25.102.2018 declaring following recommendations: As the operations have not started as of yet at M/s Evolution Pharmaceuticals, Rawat GMP status can only be ascertained upon

		the start of active production, however: Keeping in view the facility inspected the firm has requisite for manufacturing of pharmaceuticals.
	Remarks of Evaluator II:	
	Decision of 289th meeting: Deferred for further deliberation.	
	Firm's reply: Firm has submitted that me-too product is effervescent granules. The me too product available is Radifen effervescent granules 600mg in sachet form registered by M/s Radiant Pharma, Lahore (Reg.#088775)	
	Decision of 324th meeting: Approved with Innovator's specifications as per following label claim: **"Each sachet contains:** **Ibuprofen (as effervescent granules) ……. 600mg"** **The firm shall submit fee for correction/pre-approval change in product composition as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**	
57.	**Name and address of manufacturer / Applicant**	**M/s Evolution Pharmaceuticals (Pvt.) Ltd. Plot #: 25 & 26, Street No. S-3, RCCI, National Industrial Zone, Rawat, Islamabad**
	Brand Name + Dosage Form + Strength	Meconic Capsule 500mcg
	Composition	Each capsule contains: Mecobalamin …….500mcg
	Diary No. Date of R& I & fee	Dy No. 9102: 12.03.2018 PKR 20,000/-: 12.03.2018
	Pharmacological Group	Vitamin B12 (cyanocobalamin and analogues)
	Type of Form	Form 5
	Finished product Specifications	The firm has claimed innovator's specifications
	Pack size & Demanded Price	20's, 30's, 50's, 100's; As per SRO
	Approval status of product in Reference Regulatory Authorities	**Could not be confirmed**
	Me-too status (with strength and dosage form)	Cobamin capsules. Reg. No. 22643
	GMP status	Last GMP inspection report dated 25.102.2018 declaring following recommendations: As the operations have not started as of yet at M/s Evolution Pharmaceuticals, Rawat GMP status can only be ascertained upon the start of active production, however: Keeping in view the facility inspected the firm has requisite for manufacturing of pharmaceuticals.
	Remarks of Evaluator II:	
	Decision of 289th meeting: Deferred for Proof of International availability of same dosage form with same strength in reference regulatory authority as defined in 275th meeting of the Registration Board.	
	Firm's reply: Firm has submitted requested for revision of dosage form and has submitted following revised composition along with fee of Form 5 and fee of Rs. 30,000/- vide deposit slip# 03235098: "Each sugar coated tablet contains: Mecobalamin ……. 500mcg"	
	Decision of 324th meeting: Approved as per following label claim with JP specifications: **"Meconic tablet 500mcg** **Each sugar coated tablet contains:** **Mecobalamin ……. 500mcg"**	
58.	**Name and address of manufacturer / Applicant**	**M/s Evolution Pharmaceuticals (Pvt.) Ltd.** Plot #: 25/26, St.#S-3, RCCI, Industrial Estate, Rawat,Islamabad
	Brand Name + Dosage Form + Strength	**Movate Lotion 0.1% w/w**
	Composition	Each gram contains: Mometasone furoate…1mg
	Diary No. Date of R& I & fee	Diary No:14569, 11/09/2017, Rs: 20,000/-
	Pharmacological Group	Corticosteroid, potent (group III)
	Type of Form	Form 5
	Finished product Specifications	BP

	Pack size & Demanded Price	20ml/ As per SRO
	Approval status of product in Reference Regulatory Authorities	Elocon Scalp Lotion 0.1% w/w by M/s Merck Sharp & Dohme (MHRA Approved)
	Me-too status (with strength and dosage form)	Hivate Lotion 0.1% by M/s Saffron (Reg#046430)
	GMP status	Last GMP inspection report dated 25.102.2018 declaring following recommendations: As the operations have not started as of yet at M/s Evolution Pharmaceuticals, Rawat GMP status can only be ascertained upon the start of active production, however: Keeping in view the facility inspected the firm has requisite for manufacturing of pharmaceuticals.
	Remarks of Evaluator: • Confirmed as w/w formulation in MHRA. • Firm has also applied in w/w composition.	
	Decision of 281st meeting: Registration Board deferred the case in the light of decision of 248th meeting of Registration Board, for confirmation and verification of segregated dispensing booths, cleaning validation and controls studies for processes and adequate system to minimize the potential risk of cross contamination.	
	Firm's reply: Firm has referred to the GMP inspection report conducted on 06-08-2020 & 19-08-2020 wherein availability of two dispensing booths has been confirmed. Frim has also the section approval for "Topical section general (Cream/ointment, gel , Solution/Lotion) section" vide letter No. F.1-14/2008-Lic dated 10-7-2017.	
	Decision of 324th meeting: Approved.	
59.	**Name and address of manufacturer / Applicant**	**M/s Evolution Pharmaceuticals (Pvt.) Ltd.** Plot #: 25/26, St.#S-3, RCCI, Industrial Estate, Rawat,Islamabad
	Brand Name + Dosage Form + Strength	**Betanex Lotion 0.1% w/w**
	Composition	Each gram contains: Betamethasone (as valerate) …1mg
	Diary No. Date of R& I & fee	Diary No:14565, 11/09/2017, Rs: 20,000/-
	Pharmacological Group	Corticosteroids, potent (group III)
	Type of Form	Form 5
	Finished product Specifications	BP
	Pack size & Demanded Price	60ml/ As per SRO
	Approval status of product in Reference Regulatory Authorities	Betnovate Lotion 0.1% w/w by M/s Glaxo Wellcome UK Limited (MHRA Approved)
	Me-too status (with strength and dosage form)	Betnovate Lotion 0.1% by M/s GSK (Reg#000253)
	GMP status	Last GMP inspection report dated 25.102.2018 declaring following recommendations: As the operations have not started as of yet at M/s Evolution Pharmaceuticals, Rawat GMP status can only be ascertained upon the start of active production, however: Keeping in view the facility inspected the firm has requisite for manufacturing of pharmaceuticals.
	Remarks of Evaluator: • Confirmed as w/w formulation in MHRA. • Firm has also applied in w/w composition.	
	Decision of 281st meeting: Registration Board deferred the case referring to the decision of 248th meeting of Registration Board stating as under: "Products containing steroidal topical preparations like eye/ear drops, sterile eye ointment, external preparations i.e. cream/ointment/gel, lotions, spray/aerosols, suppositories, vaginal preparation, intra oral preparations, nasal drops etc. shall be permitted for manufacturing in general facility/area provided that manufacturers shall have segregated dispensing booths, cleaning validation and controls studies for processes and adequate system to minimize the potential risk of cross contamination." Registration Board directed the firm to submit clarification regarding confirmation of separate dispensing booth for applied product.	

	Firm's reply: Firm has referred to the GMP inspection report conducted on 06-08-2020 & 19-08-2020 wherein availability of two dispensing booths have been confirmed.	
	Decision of 324th meeting: Approved.	
60.	Name and address of manufacturer / Applicant	M/s Usawa Pharmaceuticals. 146 S.I.Z. Risalpur, KPK, Pakistan By M/s Bio Labs Pvt Ltd. Plot # 145, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Usven 500mg Injection
	Composition	Each Vial Contains: Vancomycin as HCl ……500mg
	Diary No. Date of R& I & fee	Dy. No.12456 dated 06.03.2019 Rs. 50,000/- dated 05.03.2019
	Pharmacological Group	Tricyclic Glycopeptide
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed USP specifications.
	Pack size & Demanded Price	1's; As per SRO
	Approval status of product in Reference Regulatory Authorities.	VANCOCIN CP vancomycin 500mg (as hydrochloride) powder for injection vial. TGA approved
	Me-too status	Vanzy 500mg Injection. Reg. No. 81901
	GMP status	M/s Usawa Pharmaceuticals was inspected on 08.01.2019, wherein satisfactory level of GMP was reported M/s Bio-lab was inspected on 08.07.2021, 15.07.2021, 30.07.2021 and 03.08.2021 wherein renewal of DML / regularization of layout plan, grant of additional section as well as change in section was recommended
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Had adjusted the weight of API as per salt factor in the master formula. Revised Vancomycin as HCl to Vancomycin HCl in the master formula. • Mentioned the excipients in the master formula/ composition. • Submitted complete manufacturing outlines. • Enclosure of Form 5 from point 16 onwards was missing. Submitted it. • Submitted Rs. 75000 (challan- 3626024049)
	Decision of 321st meeting: Deferred for the following; • Confirmation of manufacturing method for the applied formulation whether through lyophilization process or otherwise. • Latest GMP certificate/last inspection report conducted within last three years for contract acceptor.	
	Firm's response: • Firm has submitted Lyophilisation is being performed at M/s Bio-Labs and has also submitted manufacturing method by way of Lyophilisation. • Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The GMP certificate specifies Lyophilized vial (General) section.	
	Decision of 324th meeting: Approved as per following label claim: **"Each lyophilized vial contains:** **Vancomycin as HCl ……500mg"** **The firm shall submit fee for correction/pre-approval change in product manufacturing method as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**	
61.	Name and address of manufacturer / Applicant	M/s Usawa Pharmaceuticals. 146 S.I.Z. Risalpur, KPK, Pakistan By

		M/s Bio Labs Pvt Ltd. Plot # 145, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Usven 1g Injection
	Composition	Each Vial Contains: Vancomycin as HCl ……..…1g
	Diary No. Date of R& I & fee	Dy. No.12454 dated 06.03.2019 Rs. 50,000/- dated 05.03.2019
	Pharmacological Group	Tricyclic Glycopeptide
	Type of Form	Form 5
	Finished Product Specification	The firm has claimed USP specifications.
	Pack size & Demanded Price	1's; As per SRO
	Approval status of product in Reference Regulatory Authorities.	VANCOCIN CP vancomycin 1g (1,000,000IU as hydrochloride) powder for injection vial. TGA approved
	Me-too status	Vanzy 1g Injection. Reg. No. 81902
	GMP status	M/s Usawa Pharmaceuticals was inspected on 08.01.2019, wherein satisfactory level of GMP was reported M/s M/s Bio-lab was inspected on 08.07.2021, 15.07.2021, 30.07.2021 and 03.08.2021 wherein renewal of DML / regularization of layout plan, grant of additional section as well as change in section was recommended
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Had adjusted the weight of API as per salt factor in the master formula. Revised Vancomycin as HCl to Vancomycin HCl in the master formula. • Mentioned the excipients in the master formula/ composition. • Submitted Rs. 75000 (challan- 6159809290)
	Decision of 321st meeting: Deferred for the following; • Confirmation of manufacturing method for the applied formulation whether through lyophilization process or otherwise. • Latest GMP certificate/last inspection report conducted within last three years for contract acceptor.	
	Firm's response: • Firm has submitted Lyophilisation is being performed at M/s Bio-Labs and has also submitted manufacturing method by way of Lyophilisation. • Firm has submitted copy of GMP certificate of M/s Bio-Labs dated 21-05-2019 based on the inspection dated 23-04-2019. The GMP certificate specifies Lyophilized vial (General) section.

62.	Name and address of manufacturer / Applicant	M/s Usawa Pharmaceuticals. 146 S.I.Z. Risalpur, KPK, Pakistan By M/s Bio Labs Pvt Ltd. Plot # 145, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Awacol 11MU IV Injection
	Composition	Each Vial Contains: Colistimethate Sodium (Lyophilized Powder) ……1MIU
	Diary No. Date of R& I & fee	Dy. No.12455 dated 06.03.2019 Rs. 50,000/- dated 05.03.2019
	Pharmacological Group	Antibiotic (polymyxin)

	Type of Form	Form 5
	Finished Product Specification	The firm has claimed USP specifications.
	Pack size & Demanded Price	1's; As per SRO
	Approval status of product in Reference Regulatory Authorities.	Colistimethate Sodium 1 Million I.U. Powder for Solution for Injection (lyophilized powder in glass vial). Approved by **MHRA**
	Me-too status	Colistat powder for Injection. Reg. No. 76160
	GMP status	M/s Usawa Pharmaceuticals was inspected on 08.01.2019, wherein satisfactory level of GMP was reported M/s Usawa Pharmaceuticals was inspected on 08.07.2021, 15.07.2021, 30.07.2021 and 03.08.2021 wherein renewal of DML / regularization of layout plan, grant of additional section as well as change in section was recommended
	Remarks of the Evaluator.	• The drug product specifications have not been evaluated.
		• Did not provide chemical name of the API at serial No. 03. Later on, submitted it. • Had mentioned Colistimethate Sodium eq. to Colistimethate and mentioned its weight as 85.68mg in master formula. Then, mentioned Colistimethate Sodium…1MIU and revised 85.68mg to 90mg (for 7% water contents and 4%overage). Then, revised Colistimethate Sodium…90mg (for 7% water contents and 4%overage to Colistimethate Sodium…80mg. But the label claim in the revised documents is Colistimethate Sodium eq. to Colistimethate….1MIU. Then, once again submitted the label claim "Each Vial Contains: Colistimethate Sodium (Lyophilized Powder)…1MIU" shall be considered. • Also mentioned water for injection, and lyophilization process. • Added packing process to the manufacturing outlines. • Revised brand Awacol 11MU to Awacol 1MIU. • Submitted Rs. 7500 (challan- 557752858924)
	Decision of 321st meeting: Registration Board deferred the case for submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.	
	Firm's response: Firm has submitted BMR of three production batches i.e., batch# 22B041, 22E032, 22J104 with manufacturing date 02-2022, 05-2022 & 09-2022 respectively.	
	Decision of 324th meeting: Deferred for the submission of data by M/s Bio-Labs against the Form 5F applications of applied formulation, presented in instant meeting.	
63.	Name and address of manufacturer / Applicant	M/s MBL Pharma. B-77-A, H.I.T.E, Hub, Pakistan

	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	--
	Me-too status (with strength and dosage form)	Itoride SR Tablets of Amarant Karachi (Reg # 073484)
	GMP status	Last inspection report conducted on 31-5-2022 recommends renewal of DML.
	Remarks of the Evaluator [II]: • Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.	

	Decision of 323rd meeting: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.	
	Reply by the firm: The firm has revised the formulation from Itopride 150mg ER tablet to Itorpride 50mg film coated tablet as per the reference product. Each film coated tablet contains: Itopride HCl……50mg **Me-too:** ITP of M/s Sami Pharmaceuticals **RRA:** Ganaton film coated tablet 50mg of M/s Abbott Laboratories (PMDA) Japan Approved. The firm has not submitted any fee for the revision.	
	Decision of 324th meeting: Approved as per following label claim: **"Each film coated tablet contains:** **Itopride HCl……50mg"** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product composition as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**	
65.	Name and address of manufacturer / Applicant	M/s MBL Pharma. B-77-A, H.I.T.E, Hub, Pakistan
	Brand Name + Dosage Form + Strength	Kerolac 30mg/ml Injection
	Composition	Each ml Contains: Ketorolac Tromethamine……30mg
	Diary No. Date of R& I & fee	Dy.No 14174 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	NSAID
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	US-FDA Approved.
	Me-too status (with strength and dosage form)	Tromit Injection of Standpharm (Reg.# 049960)
	GMP status	Last inspection report conducted on 31-5-2022 recommends renewal of DML.
	Remarks of the Evaluator II: • Submit reference for drug product specifications. • Firm has not mentioned terminal sterilization step in the manufacturing process. • Firm has submitted revised specifications as USP without submission of fee.	
	Decision of 323rd meeting: Deferred for clarification regarding method of sterilisation proposed for applied formulation along with fee of Rs. 7500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	
	Reply by firm: The firm has stated that terminal sterilization will not be method of sterilization for the applied product. The product will be sterilized by way of filtration followed by aseptic filling.	
	Decision of 324th meeting: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product manufacturing procedure as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.	

b. Applications on Form 5 with Stability studies data:

66.	**Name and address of manufacturer / Applicant**	**M/s The Schazoo Zaka Pvt Ltd. Lahore Kalalwala, Zaka ur Rehman State, Plot No.1, 20-km Lahore-Jaranwala Road, Shikhupura**
	Brand Name +Dosage Form + Strength	Dexlanz 30mg Capsule

	Composition	Each Capsule Contains: Dual Delayed Release Pellets of Dexlansoprazole Eq. to Dexlansoprazole…30mg
	Diary No. Date of R& I & fee	Dy.No 929 dated 08-01-2019 Rs.20,000/- Dated 07-01-2019
	Pharmacological Group	Proton Pump inhibitor
	Type of Form	Form 5
	Finished product Specifications	Manufacturers specifications
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulator Authorities	Dexilant Delayed Release Capsule 30mg of USFDA approved
	Me-too status	Lansodex Capsule 30mg of M/S Getz Pharma
	GMP status	Last GMP inspection conducted on 05-01-2018 and report concludes that firm had maintained conformance to cGMP.
	Remarks of the Evaluator.	Source of pellets (In case of imported source remaining Rs: 80000/- fee) Submit Stability studies along with requisite documents. Submit complete manufacturing method.
	Previous Registration Board deferred the case for submission of stability study data as per the guidelines provided in 278th meeting of Registration Board**. (M-295).**

1.	In analytical testing method of FPP, Assay is conducted by UV method while drug substance and innovator conducted assay by HPLC Clarification is required.	Approved assay method of Dexlanz contains assay testing by both methods (HPLC& UV spectrophotometric). UV spectrophotometric In-house method has been validated so this approved method is being used for assay testing of Dexlanz capsule. ***(Analytical testing method include only UV spectrophotometric method)***
2.	Reference of previous approval of applications with stability study data of the firm (if available).	
3.	Method used for analysis of API by Finished Product manufacturer does not include dissolution testing of delayed release pellets. Clarification is required.	For dissolution testing of API, manufacturer method was used by finished product manufacturer as it is integral test.
4.	Record of comparative dissolution.	Protocols and report of Pharmaceutical equivalence of Dexlanz 30mg Capsule Batch # DXC-T1-19 with Razodex capsule Batch # 070C47 of M/s GETS Pharma submitted. (***Finished product dissolution is two pH Acid stage 0.1N HCl and buffer stage pH 7.0 but comparative dissolution not separately submitted.)***
5.	Raw data sheets, COA are not submitted.	
6.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Not applicable as the API and finished product is tested by UV spectrophotometric method.

Decision: Registration Board discussed the fact that the applied formulation is non-pharacopoeial hence the drug product Assay method shall primarily be based upon the analytical method proposed by the drug substance manufacturer therefore Board deferred the case for submission of afresh stability studies data wherein Assay analysis of drug product shall be performed with analytical procedure based upon HPLC.

The facilities and operations conform WHO-GMP as per CoPP as well as GMP status of the manufacturing site through periodic inspection every year.
	Details of letter of authorization / sole agency agreement	Copy of Letter of Authorization is attached. M/s Cipla Ltd. Cipla house, Peninsula Business Park, Gantaptrao Kadam Marg, Lower Parel, Mumbai India authorizes M/s A.J. Miza Pharma (Pvt) Ltd., 1st Floor Shafi Court, Merewether Road, Civil Lines Karachi to register, Import & Distribute IMATIB 400mg Capsule. The authorization letter is valid till 13-06-2023.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale

		☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy.No 33135 dated 18-11-2022
	Details of fee submitted	Rs.75,000/- dated 15-11-2022
	The proposed proprietary name / brand name	**IMATIB 400mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Hard Gelatin capsule contains: Imatinib Mesylate Ph. Eur. equivalent to Imatinib 400mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	As per Innovator's Specs.
	Proposed Pack size	30's / Unit Pack
	Proposed unit price	As Per Current SRO
	The status in reference regulatory authorities	IMATINIB 400mg Hard Gelatin Capsule (AS MESILATE), • Denmark By Denish Medicine Agency, • Germany by Federal Institute for Drugs and Medical Devices • MHRA of UK
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	NA
	Name, address of drug substance manufacturer	M/s Cipla Limited-Bommasandra Plot No. 285, 286 and 287 Bommasandra – Jigani Link Road Industrial Area,KIADB 4th Phase, Bommasandra Bangalore 560 105, INDIA
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30°C ± 2°C. The stability study data is till 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of

		specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	CDP studies have been submitted against reference product i.e., Glivec 400mg tablet in three dissolution mediums of pH 1.2, 4.5 & 6.8 Firm has aslo ssubmitted bioequivalence studies against the same product
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	PVC/PE/PVDC film - Blister foil
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 75% ± 5% RH. The real time stability study data of 3 batches is for 24 months.

Evaluation by PEC:

Section#	Observations	Firm's response
1.3.1	Copy of valid DSL shall be submitted as the submitted DSL was valid till 22-12-2022 .	Firm has submitted copy of receiving of renewal application of DSL.
1.3.3	• Original legalized and valid COPP shall be submitted as submitted COPP was valid till 19-05-2022. • Valid GMP certificate/DML of the drug product manufacturer declaring the approval of required manufacturing facility of "Hard Gelatin Capsule (Cytotoxic) section", shall be submitted.	• Firm has submitted legalized valid COPP (No. 789/MFG/WHO-GMP/DFDA/2022/58) valid up to 13-06-2025 issued by Directorate of Food & Drug Administration, Govt. of Goa. • Firm has legalized GMP certificate issued dated 22-06-2022 by Directorate of Food & Drug Administration, Govt. of Goa in the name of M/s Cipla Ltd, S-103 to S-105 S-107 to S-112, L-138 L-147, L-147/1 to L-147/3, & L-147/A, & L-147/A, L-150 Verna Industrial Estate Verna declaring availability of hard Gelatin capsule section (Cytotoxic).
1.6.5	Valid GMP certificate/DML of the drug substance manufacturer shall be submitted.	Firm has referred to the US FDA database of Drug Establishment Current Registration Site, declaring expiration date of 31-12-2023 for M/s Cipla Limited-Bommasandra Plot No. 285, 286 and 287 Bommasandra – Jigani Link Road Industrial Area,KIADB 4th Phase, Bommasandra Bangalore 560 105, India
3.2.P.2.2.1	Justification shall be submitted for performing Pharmaceutical equivalence and CDP studies against the "Glivec 400mg tablets", whereas applied formulation is in capsule dosage form.	Firm has submitted that our applied product is already registered in Norway, Denmark & Germany based upon the similar comparison between tablet vs capsule for CDP and Bioequivalence studies as provided for registration in Pakistan.

ASSESSMENT REPORT OF BIOEQUIVALENCE STUDY OF IMATINIB MESILATE CAPSULES 400 MG

M/s AJ Mirza Pharma (Pvt.) Ltd., 1st Floor, Shafi Court, Merewether Road, Civil Lines, Karachi. Pakistan have applied for marketing authorization of **IMATIB 400mg Capsule** (Imatinib Mesylate equivalent to 400mg Imatinib). The applied product is manufactured by M/s Cipla Ltd, S-103 to S-105 S-107 to S-112, L- 138 L-147, L-147/1 to L-147/3, & L-147/A, & L-147/A, L-150 Verna Industrial Estate Verna Goa, India. The application was submitted on Form 5-F along with requisite data in module 3 along with Bioequivalence study reports. The assessment report of Bioequivalence study is provided below:

DETAILS OF THE MA APPLICATION:

Name, address of Applicant / Importer	M/s AJ Mirza Pharma (Pvt.) Ltd., 1st Floor, Shafi Court, Merewether Road, Civil Lines, Karachi. Pakistan.

Name, address of manufacturer(s) abroad	M/s Cipla Ltd, S-103 to S-105 S-107 to S-112, L- 138 L-147, L-147/1 to L-147/3, & L-147/A, & L-147/A, L-150 Verna Industrial Estate Verna Goa.
Name of exporting country	India
The proposed proprietary name / brand name	IMATIB 400mg Capsule
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Hard Gelatin capsule contains: Imatinib Mesylate equivalent to Imatinib 400mg
Pharmaceutical form of applied drug	Hard Gelatin Capsule
Pharmacotherapeutic Group of (API)	Anti-cancer (L01EA01)

DETAILS OF THE BIOEQUIVALENCE STUDY DESIGN:

Study Design:	Open-label, randomized, single-dose, two-treatment, two-sequence, two-period, two-way cross-over bioequivalence study
Study Population:	healthy male and/or post- menopausal and/or surgically sterile female volunteers
Type of Study:	Fed
Sample size:	30
Test Product (Treatment A):	**Imatinib Mesilate Capsules 400 mg** *Lot No: J35336*; (Cipla Ltd., India)
Dose:	1 x 400 mg
Mode of Administration:	Oral under fed conditions
Reference Product (Treatment B):	**GLIVEC® 400 mg Tablets** *Lot No: S0094*; (Novartis Europharm Limited, U.K.)
Dose:	1 x 400 mg
Mode of Administration:	Oral under fed conditions
Duration of treatment:	Single dose of 400mg of either the test product or the reference product was administered and plasma samples were collected over a 72-hour interval after dosing.
Washout period	22 days between each drug administration
Dosing dates:	Period 1: August 25, 2013 Period 2: September 16, 2013
Analyte:	Imatinib, N-desmethyl imatinib
Bioanalytical method:	The bioanalytical method used to measure concentrations of imatinib in human plasma were sensitive, selective, accurate and reproducible. Stability of the analytes were demonstrated during sample processing and long-term storage
Criteria for Evaluation:	**Bioequivalence:** To establish bioequivalence, the calculated 90% CI for the ratio of geometric means for AUC_t and C_{max} for imatinib should fall within 80.00%-125.00%. **Safety:** Safety was evaluated by vital signs measurement, clinical laboratory tests (including hematology, urine analysis, and serum chemistry tests), physical examinations and adverse events reported by subjects who received a drug treatment.
Statistical Methods:	Descriptive statistics (min, max, median, mean, standard deviation and coefficient of variability) of all pharmacokinetic parameters were provided for the test and reference products.

DETAILS OF BIOEQUIVALENCE STUDY SITES:

Clinical Facility:	Bio Pharma Services Inc. 4000 Weston Road Toronto, Ontario, Canada, M9L 3A2
Clinical Laboratory:	Gamma-Dynacare Medical Laboratories 115 Midair Court Brampton, Ontario, Canada, L6T 5M3
Analytical Laboratory:	inVentivHealth Clinical 2500 rue Einstein Quebec, QC, Canada G1P 0A2
Pharmacokinetic, Statistical and Report Issuing Facility:	Bio Pharma Services Inc. 4000 Weston Road Toronto, Ontario, Canada, M9L 3A2

BRIEF OF THE BIOEQUIVALENCE:

Title of Study:
A Single-Dose, Randomized, Open-Label, Crossover, Pivotal, Comparative Bioavailability Study of Imatinib Mesilate 400 mg Capsules (Cipla Ltd., India) and GLIVEC® 400 mg Film-Coated Tablets (Novartis Europharm Limited, U.K.) in Healthy Male and/or Post-Menopausal and/or Surgically Sterile Female Volunteers under Fed Conditions

Objectives:
This study is aimed to determine bioequivalence between the test (imatinib mesylate 400 mg capsules of Cipla Limited, India) and the reference (GLIVEC® 400 mg film-coated tablets (Novartis Europharm Limited, U.K) products at single dose in healthy, male and/or postmenopausal and/or surgically sterile female subjects under fed conditions (high-fat-high-calorie meal).

Methodology:
This study was an open-label, randomized, single-dose, two-treatment, two-sequence, two-period, two-way cross-over bioequivalence study was conducted in 30 healthy, male and/or postmenopausal and/or surgically sterile female subjects. After an overnight fast of at least 10 hours prior to dosing, subjects were given high-fat, high-calorie breakfast 30 minutes after the start of breakfast, as per randomization sequence the subjects were administered single oral dose of either test or reference product with 240 mL of water on each occasion. The dosing of 28 subjects were done for period I and for period II as per the randomization schedule. The two treatment days were separated with a washout period of 22 days. A total of 26 blood samples (6 mL each) were collected from the subjects per period during the study.

Number of Subjects (planned and analyzed):
Thirty (30) subjects were enrolled and dosed in Period 1. Twenty-six (26) subjects completed the study in its entirety. Samples from twenty-eight (28) subjects were analyzed by the bioanalytical laboratory. Data from twenty-six (26) subjects was included in the pharmacokinetic and statistical analysis

Diagnosis and main criteria for inclusion:
Subjects met the following inclusion criteria within 21 days prior to Period 1 dosing:

1. Healthy, non-smoking (for at least 6 months prior to first drug administration), male and/or postmenopausal and/or surgically sterile female (Refer to inclusion criteria number 12 for additional female inclusion criteria requirements) volunteers, 18-55 years of age.
2. BMI that is within 18.5-30.0 kg/m², inclusive.
3. Healthy, according to the medical history, ECG, vital signs, laboratory results and physical examination as determined by the Principal Investigator/Sub-Investigator.
4. Systolic blood pressure between 95-140 mmHg, inclusive, diastolic blood pressure between 55-90 mmHg, inclusive, and heart rate between 50-100 bpm, inclusive, unless deemed otherwise by the Principal Investigator/Sub-Investigator.
5. Clinical laboratory values within BPSI's acceptable range, unless values are deemed by the Principal Investigator/Sub-Investigator as "Not Clinically Significant".
6. Ability to comprehend and be informed of the nature of the study, as assessed by BPSI staff. Capable of giving written informed consent prior to receiving any study medication. Must be able to communicate effectively with clinic staff.

7. Ability to fast for at least 10 hours and consume a high-fat, high-calorie meal, as well as standard meals.
8. Availability to volunteer for the entire study duration and willing to adhere to all protocol requirements.
9. Agree not to have a tattoo or body piercing until the end of the study.
10. Agree not to drive or operate heavy machinery if feeling dizzy or drowsy following drug administration until full mental alertness is regained.
11. Agree to limit exposure to sunlight and UV light by wearing protective clothing and using a sunscreen with a high protection factor during the study.
12. Female subjects must fulfill at least one of the following:
    - Be surgically sterile (total hysterectomy, bilateral oophorectomy, bilateral salpingooophorectomy, or bilateral tubal ligation/coagulation) for at least 6 months [confirmed by medical/operative report].
    - Post-menopausal for a minimum of 1 year, confirmed by FSH and 17β-estradiol tests.
13. Men who are able to father children must agree to use medically acceptable methods of contraception during the study and for 30 days after the end of the study.

SUMMARY – CONCLUSIONS:

Bioequivalence Results:

The calculated 90% confidence interval for the ratio of geometric means for AUCt and Cmax for imatinib fell within 80.00%-125.00%.

Table 3: Comparative Bioequivalence Data of Test and Reference formulations of Imatinib

Pharmacokinetic Parameter	Test/Reference Ratio of Geometric Means (90% Confidence Interval)	Intra-Subject CV (%)
AUC_t	98.81% (93.52% – 104.39%)	11.64%
AUC_{inf}	99.39% (94.03% – 105.07%)	11.76%
C_{max}	89.04% (81.73% – 97.00%)	18.22%

Test: Imatinib 400 mg capsules
Reference: GLIVEC® 400 mg film-coated tablets

Therefore, in this study, bioequivalence was demonstrated between Imatinib Mesilate Capsules 400 mg (Cipla Ltd., India) and GLIVEC® 400 mg Film-Coated Tablets (Novartis Europharm Limited, U.K.) when administered in normal, healthy, male and/or post-menopausal and/or surgically sterile female volunteers under fed conditions.

Safety Results:

A total of 5 mild and 1 moderate AEs were experienced by the subjects after taking the Test product A. A total of 7 mild and 1 moderate AEs were experienced by the subjects after taking the Reference product B. A total of 10 mild AEs associated with clinical laboratory tests were experienced by the subjects at post-study. No serious adverse events were reported during the conduct of this study. Both the Test product and Reference product were well tolerated by all subjects.

Therefore; it has been concluded that the test: Imatinib mesylate 400 mg capsule of Cipla Ltd., India, is bioequivalent to the reference: GLIVEC® 400 mg film-coated tablets (Novartis Europharm Limited, U.K, in healthy, male and/or post- menopausal and/or surgically sterile female subjects under fed conditions.

Decision: Registration Board deliberated and considered the following points:

- **Firm has submitted Bioequivalence studies of applied formulation against the referenc product i.e., GLIVEC® 400 mg film-coated tablets.**
- **The applied formulatin was approved by reference regulatory authorities e.g., MHRA of UK, Danish Medicine Agency of Denmark, on the basis of same "Bioequivalence studies" as cited in instant case.**
- **The presented Bioequivalence study is acceptable considering the international guidelines of "Bioequivalence studies" for the pharmaceutical alternatives.**

Based upon above cited considerations Registration Board decided to approve the instant application as per policy of inspection of manufacturer abroad.

Case No. XIII: Cases related to Import Policy Order

Federal Government has issued Import Policy Order, 2020 vide S.R.O. 902 (I)/2020 dated 25th September, 2020 wherein it has been mentioned in APPENDIX-G as below:

"LIST OF ITEMS NOT IMPORTABLE FROM INDIA
(Omitted vide SRO 927(I)/2019 dated 9th August, 2019)"

Drug Regulatory Authority of Pakistan in its 70th meeting held on 5th September, 2019 decided as under:

Decision:-

The Authority decided as follows:

1. Clearance certificate will be issued by DRAP for those consignments, for which contracts / LCs / bill of ladings were established prior to revised Import Policy Orders dated 09-08-2019.

2. Division of Legal Affairs will issue clarification of revised order dated 02-09-2019 that:-
a. The word "therapeutic products" and "therapeutic good" carry the same meaning.
b. Conditions & requirements for import from India shall remain same as were in practice prior to 09-8-2019.

3. Division of Legal Affairs will recommend to the Ministry of Commerce to re-instate the clause (ii) Appendix-G in Paragraph 5, sub-paragraph (B), of Import Policy Order.

	International availability	Abelcet 5mg/mL Concentrate for Suspension for Infusion by M/s Teva Pharma B.V., MHRA Approved
	Me-too status	Amphogen 50 by Ms Ferozsons, (Reg # 045800) (Imported)

	Detail of certificates attached	Original legalized CoPP (certificate No.COPP/CERT/ KD/ 16842/ 2014/11/6613/29059) certified by food and Drug Administration Maharashtra state, Mumbai, India Valid till 01/04/2016 confirms that the facilities and operations conform to GMP as recommended by WHO at the time of inspection as per CoPP.
	Remarks of the Evaluator.	• Storage conditions: 2-8°C • The firm has claimed In House manufacturing specifications while the product is present in USP/BP.
	Decision of 289th meeting: The Registration Board deferred the case for clarification whether Anti-Fungals are importable from India or otherwise.	
	Decision of 308th meeting: The Board decided to refer the case to DRAP's Authority in light of its decision regarding importability from India.	
	Evaluation by PEC: The Authority in its 128th meeting held on 14-12-2021, while considering the agenda item of "**IMPORT OF ANTI-FUNGAL DRUGS FROM INDIA",** decided as under: "The Authority noted that antimicrobials is a broader category which includes antibiotics, antifungals, antiprotozoals, and antivirals. While, antibiotics are antibacterial substance and are used to treat or prevent bacterial infections, therefore, clarified that anti-fungal products do not fall under definition of antibiotics and are importable from India as per Import Policy Order, 2016 subject to other conditions and requirements as per aforesaid order."	
	Decision of 324th meeting: Deferred for clarification of the dosage form for applied formulation whether liposomal or otherwise .

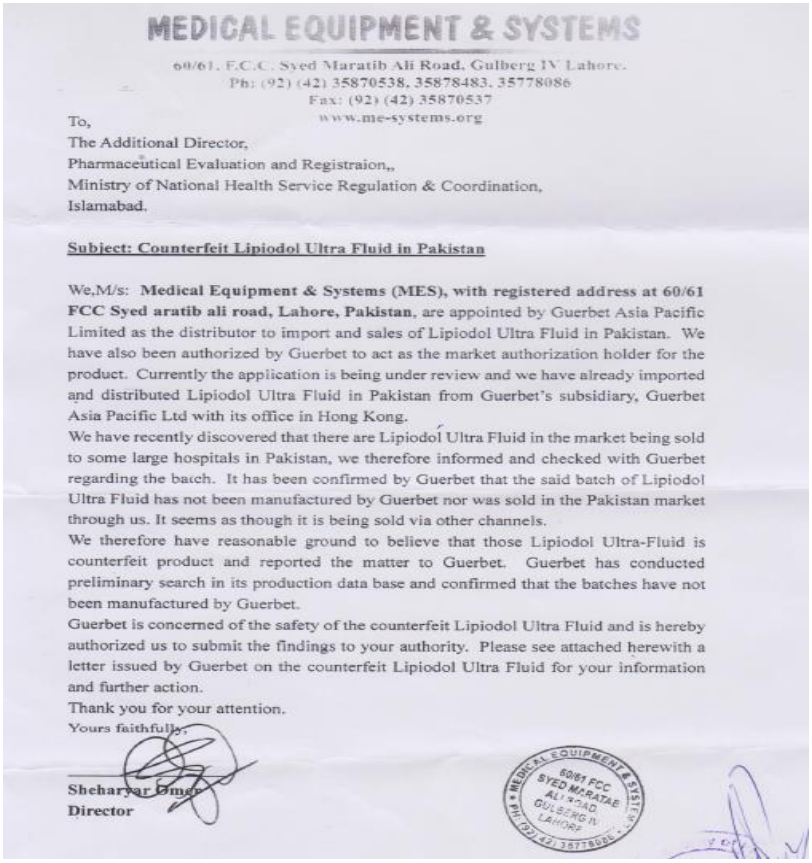
(*) According to EP chapter 1 "General Notices", "the statements under the heading Characters are not to be interpreted in a strict sense and are not requirements".
Therefore, solubility is not routinely tested as it is under the heading Characters.

Decision of 316th: Deferred for clarification regarding sole agency agreement of applied product since same product was considered in 291st meeting of Registration Board from applicant M/s A & Z Health Services. Suit No. 2, Block 27, Industrial & Trade Center, G-9/4, Islamabad, Pakistan."



Evaluation by PEC VI: M/s Medical equipment and systems has submitted NOC from M/s A & Z. The NOC states "We M/s : A&Z health services, Suit #2, Block 27 I&T center, G-9/4 Islamabad do hereby state and undertake that we have no objection if the product LIPIDOL ULTRA FLUID register on the name M/s Medical Equipment & Systems 60/61, FCC Syed Maratib Ali Road, Gulberg IV Lahore."

Decision of 320th meeting: Deferred for further deliberation upon marketing status of the applied product.

Firm's response: Firm has submitted following:

- Letter from M/s Guerbet in name of M/s A&Z Health services, declaring "termination of purchase, distribution and marketing of contrast media agreemen" weith effect from 03-03-2020.
- NOC from M/s A & Z. The NOC states "We M/s A&Z health services, Suit #2, Block 27 I&T Center, G-9/4 Islamabad do hereby state and undertake that we have no objection if the product LIPIDOL ULTRA FLUID register on the name M/s Medical Equipment & Systems 60/61, FCC Syed Maratib Ali Road, Gulberg IV Lahore. We further undertake that to withdraw our all rights and claim on this registration that was discussed in 249th meeting."

M/s Medical Equipment & System has also submitted a letter with subject "Counterfeit Lipiodol Ultra Fluid in Pakistan", which is reproduced as under:

MEDICAL EQUIPMENT & SYSTEMS

60/61, F.C.C. Syed Maratib Ali Road, Gulberg IV Lahore.
Ph: (92) (42) 35870538, 35878483, 35778086
Fax: (92) (42) 35870537
www.me-systems.org

To,
The Additional Director,
Pharmaceutical Evaluation and Registraion,,
Ministry of National Health Service Regulation & Coordination,
Islamabad.

Subject: Counterfeit Lipiodol Ultra Fluid in Pakistan

We,M/s: **Medical Equipment & Systems (MES), with registered address at 60/61 FCC Syed aratib ali road, Lahore, Pakistan**, are appointed by Guerbet Asia Pacific Limited as the distributor to import and sales of Lipiodol Ultra Fluid in Pakistan. We have also been authorized by Guerbet to act as the market authorization holder for the product. Currently the application is being under review and we have already imported and distributed Lipiodol Ultra Fluid in Pakistan from Guerbet's subsidiary, Guerbet Asia Pacific Ltd with its office in Hong Kong.

We have recently discovered that there are Lipiodol Ultra Fluid in the market being sold to some large hospitals in Pakistan, we therefore informed and checked with Guerbet regarding the batch. It has been confirmed by Guerbet that the said batch of Lipiodol Ultra Fluid has not been manufactured by Guerbet nor was sold in the Pakistan market through us. It seems as though it is being sold via other channels.

We therefore have reasonable ground to believe that those Lipiodol Ultra-Fluid is counterfeit product and reported the matter to Guerbet. Guerbet has conducted preliminary search in its production data base and confirmed that the batches have not been manufactured by Guerbet.

Guerbet is concerned of the safety of the counterfeit Lipiodol Ultra Fluid and is hereby authorized us to submit the findings to your authority. Please see attached herewith a letter issued by Guerbet on the counterfeit Lipiodol Ultra Fluid for your information and further action.

Thank you for your attention.

Yours faithfully,

Sheharyar Umer
Director

Decision of 324th meeting: Registration Board approved the instant application of "LIPIODOL Injection 10ml" of M/s Medical Equipment & Systems, as per policy of inspection of manufacturer abroad.

Furthermore, Registration Board acceded with the request for withdrawal of registration application of "Lipiodol Ultra-Fluide (480mg I/ml) Solution for Injection" from M/s A&Z health services submitted vide Dy. No 38087 dated 19-11-2018 and declared it as disposed of.

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40^{o}C ±2^{o}C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30^{o}C ±2^{o}C / 65% ± 5% RH for 36 months

Evaluation by PEC:

Initially the application was submitted from M/s Sitech Pharmaceuticals Pvt Ltd. dated 04-03-2021, while subsequently M/s Angelini Pharmaceuticals (Pvt) Ltd. has submitted the new Form 5F of same product to be imported from the same principal along with the documents detailed below:

Name, address of Applicant / Importer	M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon City Barki Road, Lahore, Pakistan
Details of Drug Sale License of importer	License No: 05-352-0068-047191D Address: 44 Commercial Imperial Block, Paragon City, Barki Road, Lahore, Pakistan Address of Godown: Same as above Validity: 16 November 2023

	Status: License to sell drugs as distributor
Dy. No. and date of submission	Dy.No 31443 dated 15-11-2021
Details of fee submitted	Rs.75,000/- dated 22-10-2021
Details of Letter of Withdrawal from M/s Sitech	Firm has submitted copy of letter from M/s Sitech Pharmaceutical Pvt. Ltd., dated 11-10-2021 stating that "We SiTech Pharmaceuticals (Pvt.) Ltd withdrew from our application of registration of Dedrogyl 10ml oral drops in favor of Angelini Pharmaceuticals (Pvt} Ltd."
Details of NOC from M/s Sitech	Firm has submitted copy of letter from M/s Sitech Pharmaceutical Pvt. Ltd., dated 06-05-2021 stating that "We have submitted our application for registration of drug Dedrogyl 10ml oral drops (Calcifediol l5mg/l00ml) to DRAP Pharma Evaluation Cell on February 24, 2021. Now the exporter and our principal M/s Medexport Italia Rome, Italy has requested to withdraw the application, and instead will be resubmitted by their new distributor/importer M/s. Angelini Pharmaceuticals (Pvt) Ltd. having office at 44 Commercial Imperial Block, Paragon City, Barki Road Lahore. This decision is with our mutual understanding and consent. We have no objection for this and DRAP may process the registration application of drug Dedrogyl 10ml oral drops (Calcifediol 15mg/100ml) submitted by new distributor. We would be grateful, if you please consider & process application of above product submitted by M/s. Angelini Pharmaceuticals (Pvt) Ltd."
Details of letter of authorization / sole agency agreement from Exporter	Letter of authorization issued by Laboratorio Farmeceutico SIT Specialita Igienico terapeuti S.r.l Italy in name of M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon City Barki Road, Lahore, Pakistan for the import of marketing of Dedrogyl 15mg/100mml oral soulton drops in Pakistan, being exported from M/s Medexport italia. An authorization letter from M/s Med Export Italia has also been submitted stating as under: "We hereby confirm that our previous authorization to M/s SiTech Pharmaceuticals (Pvt) Ltd. located at SF - 07, 4th Floor, Shahnaz Arcade 158, Shaheed-e-Millat Road, BYJCHS, Karachi Pakistan is no longer valid and now M/s Angelini Pharmaceuticals (Pvt}

	Ltd. having office at 44 Commercial Imperial Block, Paragon City, Barki Road, Lahore, Pakistan is authorized to import, distribute, market and also handle regulatory matters of this product in the territory of Pakistan."

The letter of authorizations has been issued form the drug product manufacturer i.e., Laboratorio Farmaceutico S.I.T S.r.l Via Cavour 70, 27035 Mede (PV), Italy and Exporter i.e., M/s Medexport Italia Via Alcide De Gasperi 35, 00165 Rome (RM), Italy while submitted COPP mentions Market Authorization holder as Derma Pharma S.A.R.L. 25, Rue la Boetie, 75008 Paris – France.

Decision of 320th meeting: Registration Board decided as follows:

a. Acceded the request of M/s Sitech Pharmaceutical Pvt. Ltd. for withdrawal of their submitted application of Dedrogyl 10 ml oral drops dated 04-03-2021 vide Dy. No 7174 and declared it as disposed of.

b. Deferred the application of M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon City Barki Road, Lahore, Pakistan for submission of complete dossier of applied product.

Response by firm: M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon City Barki Road, Lahore has submitted complete dossier on Form 5F details of which are as under:

	Name, address of Applicant / Importer	M/s Angelini Pharmaceuticals (Pvt) Ltd. 44 Commercial Imperial Block, Paragon C Barki Road, Lahore, Pakistan
	Details of Drug Sale License of importer	License No: 05-352-0068-047191D Address: 44 Commercial Imperial Block, Paragon City, Barki Road, Lahore, Pakistan Address of Godown: Same as above Validity: 16 November 2023 Status: License to sell drugs as distributor
	Name and address of marketing authorization holder (abroad)	Derma Pharma S.A.R.L. 25, Rue la Boetie, 75008 Paris – France
	Name, address of manufacturer(s)	**Manufacturer:** Laboratorio Farmaceutico S.I.T S.r.l Via Cavour 70, 27035 Mede (PV), Italy **Exporter:** Medexport Italia Via Alcide De Gasperi 35, 00165 Rome (RM), Italy
	Name of exporting country	Italy
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted copy of legalized CoPP certificate (No. 036387) issued by Chamber de Commerce et d Industrie de Region paris Iie-de-France dated 06-August-2020**.** The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspections. The name of importing country on CoPP is mentioned as Pakistan.

		Applicant of Certificate: DB-Pharma -1 Bis, rue du Commandant Riviere-94210 La Varenne Saint -Hilaire.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. S-GMP/21092927 issued by Food and Drug Control Administration Gujrat State India valid till 19-09-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 21-12-2020 specifying purchase of 1000 Kg cetirizine hydrochloride by M/s AGP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record and raw data sheets, HPLC chromatograms etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted by the firm
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted by the firm

Evaluation by PEC:

Sr. No	Shortcomings communicated	Response by the firm
1.	Submit complete label claim in module 1 as per the reference product.	Complete label claim as per reference/ innovator product is provided by the firm.
2.	Verification studies of analytical method of drug substances from drug product manufacturer is required.	Verification studies of analytical method of drug substance from drug product manufacturer is provided by the firm.
3.	Submit COA of reference standard actually used in the analysis of drug substance and drug product.	CoA of reference standard (Batch No. MK40120032) used in analysis is provided by the firm.
4.	Justify why the pharmaceutical equivalence studies does not include complete tests as recommended by the innovator's product.	Revised pharmaceutical equivalence study report is submitted by the firm.
5.	Justify why pharmaceutical equivalence studies are not performed against innovator / reference product.	As already mentioned in PE report (Page No. 324 of Volume 2) due to unavailability of innovator's product Zerviate Ophthalmic Solution in Pakistan, however, the study is conducted on generic product Trizin Ophthalmic Solution manufactured by Navana Pharmaceuticals Ltd., Bangladesh.
6.	Submit image / picture of the outer pack and primary container of the comparator product revealing the details of brand name, manufacturer, batch# and expiry date as per the decision of 322nd meeting of Registration Board and notified vide notification No. 14-1/2022-PEC dated 16th January 2023.	Firm has submitted the picture of pack of the comparator product against which PE studies were conducted.
7.	Submit preservative effectiveness studies.	Data of preservative effectiveness study is provided by the firm
8.	Justify why terminal sterilization is not performed for the applied drug product.	Sante private limited has a qualified Aseptic facility, and as our primary containers are sterile LDPE plastic bottles along with sterile LDPE

		nozzle and sterile HDPE caps so the terminal sterilization is not required. Batch has been sterilized aseptically via 0.22 micron filter under the LAF into the sanitized filling tank.
9.	Justify the process validation protocols without any step for validation of method of sterilization.	Revised validation protocol is submitted by the firm
10.	Justify the drug product specifications submitted in section 3.2.P.5.1 which does not contains the test of assay of benzalkonium chloride, EDTA, particulate appearance, specific gravity and viscosity as performed by the innovator's product.	Specification has been revised including tests: Assay of Benzalkonium Chloride, Particulate Appearance, Particulate Matter, Specific Gravity and Viscosity. Test will be performed on next station (24th Month APR-2023). However no fee is submitted by the firm.
11.	Justify the wide pH limit of 4.0 – 8.0 since the innovator's product recommends that pH should be approximately 7.0 and your batch analaysis results also depicts results between 6.9 to 7.1.	As per <USP 771>, normal tears have a pH about 7.4. the eye can tolerate products over a range of pH values from 3.0 – 8.6. This justification is already provided in Section 3.2.P.5.6 (Justification of Specifications).
12.	You have mentioned that for stability batches the API used is of lot number MK40120123 while in section 3.2.S.4.4 you have submitted COA of batch MK40120056.	The API used in stability batches is of lot number MK40120123. The CoA of the said batch is provided by the firm.
13.	Justify why water loss test is not performed during stability studies.	Data of water loss test is submitted by the firm
14.	Submit stability study data of three batches along with raw data sheets showing calculation of results of assay coupled with relevant chromtaograms with proper sequence and tagging so that further evaluation could be carried out.	Stability study data of three batches along with raw data sheets showing calculation of results of assay coupled with relevant chromatograms with proper sequence and tagging is submitted by the firm
15.	Submit stability study data in section 3.2.P.8.3 as per the 6 points checklist as mentioned in the CTD guidance document, since you have randomly submitted the data without following the recommendations of guidance document.	Data as per CTD guidance document is is now submitted by the firm
16.	Submit batch size in terms of number of units.	Batch Size: 1,132 packs (6.0 liter), Pack Size: 5mL

Decision: Approved with innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Reference to Finished product specifications	USP
	Proposed Pack size	60ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**Registration Board in its 269th meeting decided as under:** Keeping in view the following statement written in Qualitative and quantitative composition "2.5 mL suspension after reconstitution (1/2 measuring spoon) contains 125 mg ciprofloxacin" and domestic conditions for difficulties in dispensing 250mg/5ml suspension for children under 2 years of age, Registration Board decided to approve the formulation of ciprofloxacin 125mg/5ml granules and solvent for oral suspension as per reference product approved by USFDA and MHRA.
	For generic drugs (me-too status)	Novidat suspension by Sami
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot# 22-23, Industrial triangle, Kahuta road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications,

		analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product Novidat suspension of Sami Pharmaceuticals. Firm has submitted results of CDP for their product against the comparator product Novidat suspension of Sami Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA	
Manufacturer of API	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot# 22-23, Industrial triangle, Kahuta road, Islamabad
API Lot No.	CPX1279
Description of Pack (Container closure system)	Amber color glass bottle
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months)

	Real Time: 0, 3, 6 (Months)		
Batch No.	CP-03	CP-04	CP-05
Batch Size	100 Bottles	100 Bottles	100 Bottles
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	27-11-2021	27-11-2021	27-11-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Vision Pharmaceuticals dated 25-02-2019 based on the inspection dated 11-02-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- The label claim of the applied product is not in line with the reference product in terms of salt form as well as equivalency, revise the label claim along with submission of full fee of registration.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.
- Provide verification studies of drug substance from drug product manufacturer.
- Justify the assay testing of drug substance using UV method contrary to that recommended by the innovator's product.
- Submmit COA of relevant batch of API i.e. Lot No. CPX1279 from Vision pharmaceuticals in section 3.2.S.4.4.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance.
- Justify the stability study data of ciprofloxacin micro-pellets from Vision pharmaceuticals initiated in 2013 and completed in 2016 in which ciprofloxacin base is mentioned, while M/s Vision pharmaceuticals was manufacturing ciprofloxacin pellets using ciprofloxacin HCl before Registration Board took the decision to revise the salt form to ciprofloxacin base in its 290th meeting which was held on 3rd - 4th July, 2019. Justify how the salt form in stability study data of previous batches was changed.
- Justify the use of sugar and poly succar ultra DM as sweetner while you are already using taste masked granules in your formulation.
- Justify the use of xanthan gum as suspending agent along with granules in the formulation while the reference product contains no suspending agent.
- Justify how 71.429mg/1ml of ciprofloxacin granules is equivalent to 25mg ciprofloxacin base per ml.

- Justify the use of sodium benzoate anhydrous in your formulation while the pH is already controlled by the drug substance manufacturer at pellets stage and pH test is specified in COA of drug substance. Furthermore, the reference product contains oil based diluent for which pH is not required to be controlled.
- Justify the use of citric acid in your formulation as buffering agent which is not used by the reference product and the reference product contains oil based diluent for which pH is not required to be controlled.
- Justify the use of flavour in your formulation while you are already using taste masked granules.
- Justify the use of aerosil in your formulation.
- Provide details about the diluent which to be used with the applied product in section 3.2.P.1.
- Provide complete module 3.2.P for the diluent which will be used in the administration of applied product as per the decision of 290th and 313th meeting of Registration Board.
- Justify why the qualitative composition of applied product is different from that of innovator's product, and also provide compatibility studies.
- Justify why pharmaceutical equivalence studies are not conducted against the innovator's product.
- Provide microbiological attributes of the applied product in section 3.2.P.2.5 as per USP monograph.
- Submit preservative effectiveness studies in section 3.2.P.2.5.
- Submit compatibility studies of the applied product along with recommended diluent.
- Justify the pH test in your specification since no such test is recommended in USP monograph.
- Justify why Microbial Enumeration Tests is not mentioned in your specifications while it is recommended by USP.
- Justify the analytical method of assay and dissolution test in which initial reconstitution with water is mentioned while USP recommends to use the particular diluent for this purpose. Justify how your analytical method complies USP monograph.
- Justify why identification test using diode array detector is not performed and mentioned in analytical method.
- Justify why you are using different column in assay test as that recommended by USP.
- Submit evidence of diode array detector which is required for identification test as per USP monograph.
- Submit evidence of column oven which is required to maintain column temperature at 40° and 30° for assay and dissolution test.
- Submit evidence of autosampler with HPLC having capacity to maintain 10° which is required to perform assay and dissolution test as per USP monograph.
- Provide details of the exact concentrations of the solutions and its preparation method which are used to perform accuracy, and precision studies in analytical method verification studies.
- Justify how you are using ciprofloxacin HCl manufactured by Shangyu Jingxin pharmaceuticals for the testing of your product.
- The stability chromatograms for assay testing depicts that ciprofloxacin HCl is tested while the applied product contains ciprofloxacin base. Clarification is required in this regard.
- Justify the manufacturing of stability batches in November 2021 while your section was approved on 10-05-2022.
- Provide stability study data in a proper sequence using separators to segregate the data of each time point and each batch along with relevant raw data sheets.
- Clarification regarding reconstitution diluent used for the product development and stability studies.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

- Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision of 323rd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	The label claim of the applied product is not line with the reference product in terms of salt form as well as an equivalency, revise the label claim along with submission of full fee of registration.	We revised the label claim as per innovator i.e. Ciprolis 125mg/5ml Dry Powder Suspension Each 1 ml suspension after reconstitution contains 25 mg ciprofloxacin Each 5 ml suspension after reconstitution (1 measuring spoon) contains 125 mg ciprofloxacin
2.	Submit data in section 3.2.S.4.1 as per guidance document approved in Registration Board which specifies that ''Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance/ Active Pharmaceutical Ingredient by both Drug Substance & Drug Product manufacturer is required.*you have only submitted the specifications of API from the drug product manufacturer.	Firm has submitted copies of the Drug substance specifications and analytical procedures from drug product manufacturer as well.
3.	Provide verification studies of drug substance from drug product manufacturer	Frim has submitted verification studies of the drug substance from drug product manufacturer
4.	Justify the assay testing of drug substance using UV method contrary to that recommended by the innovator's product.	Our API manufacturer (Vision Pharmaceuticals) have performed analytical method validation for Ciprofloxacin TM Micro pellets 35% including the parameters specificity, Accuracy and Recovery, Linearity and Range, Ruggedness, Robustness, Precision, and Repeatability. Moreover, we have also performed analytical verification of our API manufacturer, the testing method including the parameters specificity, Accuracy, and recovery, and repeatability. As the testing method (UV based) is a completely reliable and validated method. So, we used the said method for our API testing,
5.	Submit COA of relevant batch of API i.e. Lot No. CPX1279 from Vision pharmaceuticals in section 3.2.S.4.4.	Submitted by the firm.
6.	Submit COA of reference standard/working standard actually used in the analysis of drug substance.	Previously, we were using reference standard/working standard of Ciprofloxacin HCL manufactured by Shangyu Jingxin pharmaceuticals for the testing of our product by applying correction factor, the calculation is as followed: Working Standard for Ciprofloxacin Suspension Molecular weight of Ciprofloxacin HCL = 367.81

		Molecular weight of Ciprofloxacin Base = 331.34 Factor= 331.34/367.81 = 0.901 1mg of Ciprofloxacin HCL is equivalent to 0.901mg of ciprofloxacin base We hereby confirmed that currently we are using working standard of Ciprofloxacin Base from Vision Pharma (Pvt) Limited (COA Copy attached) Moreover, we have also manufactured 3 new batches (Batch numbers: CP-10, CP-11, and CP-12) along with diluent and performed all the analysis by using the working standard of ciprofloxacin base (by Vision Pharmaceuticals (Pvt) Ltd, Batch no 200973). We have performed complete stability testing of "0" month and accelerated stability testing of "1.5" month after reconstitution with diluent: as per innovator's specifications / dissolution parameters.
7.	Justification for changed salt form in stability study data of previous batch as the stability study data of ciprofloxacin micro-pellets from Vision Pharmaceuticals initiated in 2013 and completed in 2016 in which ciprofloxacin base is mentioned, while M/s Vision pharmaceuticals was manufacturing ciprofloxacin pellets using ciprofloxacin HCL before Registration Board took the decision to revise the salt form to ciprofloxacin base in its 290th meeting which was held on 3rd-4th July, 2019.	''Vision Pharmaceuticals got registration for both Ciprofloxacin base and Ciprofloxacin HCL in 2014 and started manufacturing of Ciprofloxacin base after registration for its market demand. Later on Drug Registration Board in its 290th meeting instructed all manufacturers to manufacturer Ciprofloxacin Dry powder suspension using Ciprofloxacin Base. As Vision Pharma was already manufacturing Ciprofloxacin Base. Therefore, Ciprofloxacin base is mentioned in given stability study data which was used in our product development'' Registration Certificated and stability study reports of most recent batch are enclosed for your reference.
8.	Justify the use of sugar and poly Succar ultra DM as sweetner while you are already used taste masked granules in your formulation.	Coating material of granules is not enough to mask the bitterness of ciprofloxacin completely. As suspension form is developed for children; therefore, it is necessary to mask the bitterness as well as to produce a sweet taste to make it palatable. As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 125/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
9.	Justify the for use of Xanthan gum as suspending agent along with the granules	The coating material used in the granulation of Ciprofloxacin is not enough to suspend the active ingredient in the product when reconstituted,

	in the formulation while reference product contains no suspending agent.	therefore we used Xanthan Gum for equal dispersion of active material after reconstitution to avoid unequal dose. As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 125/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
10.	Justify for how 71.429mg/ml of ciprofloxacin granules is equivalent to 25mg Ciprofloxacin base per ml.	We are using 35% TM Pellets which mean: 100mg of pellets contains 35mg of Ciprofloxacin base 1mg pellets = 35/100 = 0.35mg of ciprofloxacin base 71.429mg pellets = 25mg of Ciprofloxacin Base Therefore, it is justified that 71.429 mg/ml of ciprofloxacin granules is equivalent to 25mg of ciprofloxacin base per ml.
11.	Justification for use of sodium benzoate anhydrous in formulation while the pH is already controlled by the drug substance manufacturer at pellets stage and pH in COA of drug substance. Furthermore, the reference product contains oil based diluent for which pH test is not required to be controlled.	As product has to keep for five days after reconstitution, we used Sodium Benzoate as antifungal preservative in the product to avoid any contamination in the liquid form ➢ As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 125/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. ➢ Moreover, it is remarkable that we have developed the diluent as per 290th & 313 minutes of meeting of Drug Registration Board/Innovators formulation, kept it on stability and after reconstitution it was observed that our pH is stable as per the prescribed range which is 7.0-9.5%
12.	Justify the use of citric acid in formulation as buffering agent which is not used by the reference product and the reference product contains oil based diluent for which pH is not required to be controlled.	Citric acid was used in the formulation as buffering agent to maintain the pH range 7.0-9.5. We have performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability (Reports are attached). It is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Ciprolis 125mg/5ml suspension. Moreover it is remarkable that we have developed the diluent as per 290th & 313 minutes of meeting of Drug Registration Board/Innovators formulation, kept it on stability and after reconstitution it was

		observed that our pH is stable as per the prescribed range which is 7.0-9.5%
13.	Justify the use of flavor in formulation while you are already used taste masked granules.	Taste masking ingredients don't impart any flavor, they are used just to mask the bitterness, Moreover, use of flavor makes the product more palatable. Whereas, as per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 125/5ML Dry Powder suspension. Their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
14.	Justify the use of aerosil in formulation.	As aerosil is glidant which is used as anti-caking agent in dry powder suspension. Aerosil keep the granules in free-flowing form throughout its shelf life. This is an inert material which doesn't impart any change in our formulation. Whereas, as per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 125/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
15.	Provide details about the diluent which is to be used with the applied product in section 3.2.P.1	We have developed a diluent as per 290th & 313 minutes of meeting of Drug Registration Board; truly according to Innovators composition; which is as followed; 1. Sugar 2.5 gm (1%) 2. Sodium Benzoate 250mg (0.001%) 3. Soya Lecithin Powder 250mg (0.001%) 4. Triglyceride 250mg (0.001%) Procedure: Heat the water upto 60℃ and add the sugar with continuous stirring until sugar is dissolved Cook the above solution till boiled to prepare the sugar solution till boiled to prepared the sugar solution, then off the flame. Add Soya Lecithin powder in above solution and stir for 30 minutes

		Add triglyceride in step 4 and stir for one hour Firm has Liquid Syrup (General) Section in which this diluent is manufactured.
16.	Provide Complete module 3.2.P for the diluent which will be used in the administration of the applied product as per the decision of 290th and 313th meeting of Registration Board.	We have developed a diluent after receiving deficiency letter of Ciprolis 125mg/5ml Dry Powder Suspension on 22nd November 2022 as per 290th & 313th minutes of the meeting of Drug Registration Board; truly according to Innovators composition along with 3 new batches of Ciprolis 125mg/5ml Dry Powder Suspension (Batch numbers: CP-10, CP-11 and CP-12) for performance of stability studies. We have performed complete stability testing of "0" month and accelerated stability testing of "1.5" month on these 3 new batches as per innovator's specifications / dissolution parameters. Results are complying with innovator's specifications. Moreover, we have also performed long-run stability testing of 12th month of previous batches (Batch numbers: CP-03, CP-04, and CP-05) after reconstitution with the diluent as per innovator's specifications / dissolution parameters and results are complying with innovator's specifications. Complete BMRs of new batches along with diluent, complete testing along with COA and stability study Reports and chromatograms are provided by the firm.
17.	Justify why the qualitative composition of applied product is different from that of innovator's product.	All the excipients used in our formulation are **inert** and compatible. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
18.	Justify why the pharmaceutical equivalence studies are not conducted against the innovator's product	We have performed Pharmaceutical equivalence studies of Ciprolis (Ciprofloxacin) 125mg/5ml Suspension against the reference product Novidat Dry Powder Suspension 125mg/5ml manufactured by Sami Pharmaceuticals As the innovator product is not available in Pakistan therefore, pharmaceutical equivalence of Ciprolis (Ciprofloxacin) 125mg/5ml Suspension was performed against the reference product Novidat Dry Powder Suspension 125mg/5ml manufactured by Sami Pharmaceuticals.
19.	Provide Microbial attributes of applied Drug product in section 3.2.P.2.5	Submitted by the firm
20.	Submit Preservative effectiveness studies in section 3.2.P.2.5.	Submitted by the firm
21.	Submit Compatibility study of applied product along with recommended diluent.	Submitted by the firm

22.	Justify the pH test in your specification since no such test is recommended in USP monograph.	We are performing all the test as per USP monograph and truly followed USP monograph However, we are also performing additional test for pH as a quality attributes in order to be more stringent
23.	Justify why Microbial Enumeration Tests is not mentioned in specification while it is recommended by USP	We have revised our method and test for Microbial Enumeration has been performed as recommended by USP (COA and revised method are enclosed) We have performed our finished product method as per USP which covers Microbial Enumeration Test Moreover, we have also performed Microbial Preservative test, which shows that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Ciprolis 125mg/5ml. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. (Complete method and Microbial Preservative test are enclosed)
24.	Justify the analytical method of assay and dissolution test in which initial reconstitution with water is mentioned while USP recommends to use the particular diluent for this purpose. Justify how your analytical method complies USP monograph.	We have developed a diluent as per 290th & 313 minutes of meeting of Drug Registration Board; which is truly according to Innovators composition and performed finished product test as per USP method after reconstitution with diluent and found that results are fully comply with USP requirements (Revised method of analysis and finished product COA after reconstitution with diluent are attached) Stability studies of CIPROLIS 125MG/5ML after reconstitution with diluent are also provided by the firm.
25.	Justify why the identification test using diode array detector is not performed and mentioned in analytical method.	Sample and standard were analyzed under same chromatographic conditions and found that the results were closely comparable. It is remarkable that we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification, Linearity, Accuracy and Recovery. Results of above said validation parameters complied with the Relative Standard Deviation limits.
26.	Justify why you are using different column in assay test as that recommended by USP	The column used for analysis of Ciprofloxacin suspension have chemically same specification i.e. packing L1 with same particle size, the difference is only the length of column, USP require 15cm while we are using 25cm, remaining specifications are same as USP requirements. Sample and standard were analyzed under same chromatographic conditions and found that the results were closely comparable. It is remarkable that we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification,

<table>
<tr><td></td><td></td><td>Linearity, Accuracy and Recovery. Results of above said validation parameters complied with the Relative Standard Deviation limits.
Column oven invoice along with specifications is provided by the firm.</td></tr>
<tr><td>27.</td><td>Submit evidence of diode array detector which is required for identification test as per USP monograph.</td><td>Sample and standard were analyzed under same chromatographic conditions found that the results were closely comparable.
It is remarkable that we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification, Linearity, Accuracy and Recovery. Results of above said validation parameters complied with the Relative Standard Deviation limits.</td></tr>
<tr><td>28.</td><td>Submit evidence of column oven which is required to maintain column temperature to 40℃ and 30℃ for assay and dissolution test.</td><td>Sample and standard were analyzed under same chromatographic conditions (including the same injection volume) and found that the results were closely comparable.
It is remarkable that we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification, Linearity, Accuracy and Recovery. Results of above said validation parameters complied with the Relative Standard Deviation limits.
Moreover, we have capacity to maintain column temperature t 40℃ and 30℃ for assay and dissolution test
Column oven invoice along with specifications is provided by the firm.</td></tr>
<tr><td>29.</td><td>Submit evidence of auto sampler with HPLC having capacity to maintain 10° which is required to perform assay and dissolution test as per USP monograph.</td><td>We don’t have auto sampler with HPLC but still we have capacity to maintain 10° which is required to perform assay and dissolution test as per USP monograph.</td></tr>
<tr><td>30.</td><td>Details about the exact concentrations of the solutions and its preparation method which are used for perform accuracy, and precision studies in analytical method verification studies.</td><td>The exact concentrations of the solutions and its preparation method is as followed:

31.	Justify how you are using Ciprofloxacin HCl Manufactured by Shangyu Jingxin Pharmaceuticals for the testing of your product.	Previously, we were using Ciprofloxacin HCL manufactured by Shangyu Jingxin pharmaceuticals for the testing of our product by applying correction factor, the calculation is as followed: Working Standard for Ciprofloxacin Suspension Molecular weight of Ciprofloxacin HCL= 367.81 Molecular weight of Ciprofloxacin Base = 331.34 Factor= 331.34/367.81 = 0.901 1mg of Ciprofloxacin HCL is equivalent to 0.901mg of ciprofloxacin base

<table>
<tr><td></td><td></td><td>We hereby confirmed that currently we are using Ciprofloxacin Base from Vision Pharma (Pvt) Limited (COA Copy attached)
Moreover, we have also manufactured 3 new batches (Batch numbers: CP-10, CP-11, and CP-12) along with diluent and performed all the analysis by using the working standard of ciprofloxacin base (by Vision Pharmaceuticals (Pvt) Ltd, Batch no 200973). We have performed complete stability testing of “0” month and accelerated stability testing of “1.5” month after reconstitution with diluent: as per innovator’s specifications / dissolution parameters.
Reports and stability chromatograms are provided by the firm.</td></tr>
<tr><td>32.</td><td>The stability chromatograms for assay testing depicts that ciprofloxacin HCl is tested while the applied product contains ciprofloxacin base. Clarification is required in this regard.</td><td>Previously, we were using Ciprofloxacin HCL manufactured by Shangyu Jingxin pharmaceuticals for the testing of our product by applying correction factor, the calculation is as followed:
Working Standard for Ciprofloxacin Suspension
Molecular weight of Ciprofloxacin HCL = 367.81
Molecular weight of Ciprofloxacin Base = 331.34
Factor= 331.34/367.81 = 0.901
1mg of Ciprofloxacin HCL is equivalent to 0.901mg of ciprofloxacin base
We hereby confirmed that currently we are using Ciprofloxacin Base from Vision Pharma (Pvt) Limited (COA Copy attached)
Moreover, we have also manufactured 3 new batches (Batch numbers: CP-10, CP-11, and CP-12) along with diluent and performed all the analysis by using the working standard of ciprofloxacin base (by Vision Pharmaceuticals (Pvt) Ltd, Batch no 200973). We have performed complete stability testing of “0” month and accelerated stability testing of “1.5” month after reconstitution with diluent: as per innovator’s specifications / dissolution parameters.
Reports and stability chromatograms are provided by the firm.</td></tr>
<tr><td>33.</td><td>Justify the manufacturing of stability batches in November 2021 while your section was approved on 10-05-2022</td><td>Development of Trial Batches of Ciprolis 125mg/5ml suspension was performed in our product development (R & D) section.
Our R&D Lab has been inspected/ endorsed by the DRAP Panel of Inspectors; with following remarks
<table><tr><th>Q #</th><th>Question</th><th>Observation by Panel</th></tr><tr><td>17.</td><td>Do You have Product development (R&D) Section?</td><td>Yes, The Firm has product development (R&D) section for product development, manufacturing &</td></tr></table></td></tr>

		testing facility for trial Batches.

The above stated report was based on PSI conducted for Delanso Capsule where the inspection was carried out on 02-05-2019 and the PSI report was discussed in the Board in 289th meeting.

34.	Provide stability study data in a proper sequence using separators along with relevant raw data sheet	Firm has submitted data with proper sequence
35.	Stability study data in section 3.2.P.8.3 as per the checklist approved by registration Board in its 296th meeting and the CTD guidance document, which includes the following; Reference of previous approval of applications with stability study data of the firm (if any) Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. Documents for the procurement of API with the approval from DRAP (in case of import) Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. Compliance Record of HPLC software 21CFR & audit trail reports on product testing Record of digital data logger for temperature and humidity monitoring of both stability chamber	Firm has submitted data as per checklist

Decision of 324th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufcaturer shall declare the shelf life of the diluent, to be used with commercial batches.**

Registration letter will be issued upon submission of following:

- **Fee of Rs. 30,000/- for submission of revised stability studies data, as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**
- **Accelerated and long term stability studies data till third month time point of newl manufactured stability batches i.e., (**Batch numbers: CP-10, CP-11, and CP-12**) as per USP**

	monograph along with in-use stability data with the reconstituioton diluent as recommended by Innovator.	
74.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Titlis Pharma (Pvt) Ltd. 528-A, Sundar Industrial Estate, Raiwind Road, Lahore.**
	Name, address of Manufacturing site.	M/s Titlis Pharma (Pvt) Ltd. 528-A, Sundar Industrial Estate, Raiwind Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 05-11-2020 issued on the basis of inspection dated 30-09-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of additionall section under Drug Manufacturing License (DML No. 000779) dated 10-05-2022. The letter specifies following section: 1. Tablet Section-II (General) 2. Dry powder suspension (General) 3. Dry powder sachet section (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22072: 03-08-2022
	Details of fee submitted	PKR 30,000/- : 15-07-2022
	The proposed proprietary name / brand name	**CIPROLIS 250mg/5ml Dry Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml of reconstituted suspension contains: Ciprofloxacin HCl……..250mg
	Pharmaceutical form of applied drug	Light pinkgranular powder with strawberry flavoured filled in 60ml amber color glass bottle
	Pharmacotherapeutic Group of (API)	Fluoroquinolones
	Reference to Finished product specifications	USP
	Proposed Pack size	60ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**MHRA** Approved
	For generic drugs (me-too status)	Novidat suspension by Sami
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot# 22-23, Industrial triangle, Kahuta road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and

		stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the comparator product Novidat suspension of Sami Pharmaceuticals. Firm has submitted results of CDP for their product against the comparator product Novidat suspension of Sami Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot# 22-23, Industrial triangle, Kahuta road, Islamabad		
API Lot No.	CPX1279		
Description of Pack (Container closure system)	Amber color glass bottle		
Stability Storage Condition	Real time : 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	27-11-2021	27-11-2021	27-11-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate of M/s Vision Pharmaceuticals dated 25-02-2019 based on the inspection dated 11-02-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Evaluation by PEC:

- The label claim of the applied product is not in line with the reference product in terms of salt form as well as equivalency, revise the label claim along with submission of full fee of registration.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required." You have only submitted the specifications of API from the drug product manufacturer.
- Provide verification studies of drug substance from drug product manufacturer.
- Justify the assay testing of drug substance using UV method contrary to that recommended by the innovator's product.
- Submmit COA of relevant batch of API i.e. Lot No. CPX1279 from Vision pharmaceuticals in section 3.2.S.4.4.
- Submit COA of reference standard / working standard actually used in the analysis of drug substance.
- Justify the stability study data of ciprofloxacin micro-pellets from Vision pharmaceuticals initiated in 2013 and completed in 2016 in which ciprofloxacin base is mentioned, while M/s Vision pharmaceuticals was manufacturing ciprofloxacin pellets using ciprofloxacin HCl before Registration Board took the decision to revise the salt form to ciprofloxacin base in its 290th meeting which was held on 3rd - 4th July, 2019. Justify how the salt form in stability study data of previous batches was changed.
- Justify the use of sugar and poly succar ultra DM as sweetner while you are already using taste masked granules in your formulation.
- Justify the use of xanthan gum as suspending agent along with granules in the formulation while the reference product contains no suspending agent.
- Justify how 71.429mg/1ml of ciprofloxacin granules is equivalent to 25mg ciprofloxacin base per ml.
- Justify the use of sodium benzoate anhydrous in your formulation while the pH is already controlled by the drug substance manufacturer at pellets stage and pH test is specified in COA of drug substance. Furthermore, the reference product contains oil based diluent for which pH is not required to be controlled.

- Justify the use of citric acid in your formulation as buffering agent which is not used by the reference product and the reference product contains oil based diluent for which pH is not required to be controlled.
- Justify the use of flavour in your formulation while you are already using taste masked granules.
- Justify the use of aerosil in your formulation.
- Provide details about the diluent which to be used with the applied product in section 3.2.P.1.
- Provide complete module 3.2.P for the diluent which will be used in the administration of applied product as per the decision of 290th and 313th meeting of Registration Board.
- Justify why the qualitative composition of applied product is different from that of innovator's product, and also provide compatibility studies.
- Justify why pharmaceutical equivalence studies are not conducted against the innovator's product.
- Provide microbiological attributes of the applied product in section 3.2.P.2.5 as per USP monograph.
- Submit preservative effectiveness studies in section 3.2.P.2.5.
- Submit compatibility studies of the applied product along with recommended diluent.
- Justify the pH test in your specification since no such test is recommended in USP monograph.
- Justify why Microbial Enumeration Tests is not mentioned in your specifications while it is recommended by USP.
- Justify the analytical method of assay and dissolution test in which initial reconstitution with water is mentioned while USP recommends to use the particular diluent for this purpose. Justify how your analytical method complies USP monograph.
- Justify why identification test using diode array detector is not performed and mentioned in analytical method.
- Justify why you are using different column in assay test as that recommended by USP.
- Submit evidence of diode array detector which is required for identification test as per USP monograph.
- Submit evidence of column oven which is required to maintain column temperature at 40° and 30° for assay and dissolution test.
- Submit evidence of autosampler with HPLC having capacity to maintain 10° which is required to perform assay and dissolution test as per USP monograph.
- Provide details of the exact concentrations of the solutions and its preparation method which are used to perform accuracy, and precision studies in analytical method verification studies.
- Justify how you are using ciprofloxacin HCl manufactured by Shangyu Jingxin pharmaceuticals for the testing of your product.
- The stability chromatograms for assay testing depicts that ciprofloxacin HCl is tested while the applied product contains ciprofloxacin base. Clarification is required in this regard.
- Justify the manufacturing of stability batches in November 2021 while your section was approved on 10-05-2022.
- Provide stability study data in a proper sequence using separators to segregate the data of each time point and each batch along with relevant raw data sheets.
- Clarification regarding reconstitution diluent used for the product development and stability studies.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision of 323rd meeting of Registration Board: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	The label claim of the applied product is not line with the reference product in terms of salt form as well as an equivalency, revise the label claim along with submission of full fee of registration.	We revised the label claim as per innovator i.e. Ciprolis 250mg/5ml Dry Powder Suspension Each 1 ml suspension after reconstitution contains 50 mg ciprofloxacin Each 5 ml suspension after reconstitution (1 measuring spoon) contains 250 mg ciprofloxacin
2.	Submit data in section 3.2.S.4.1 as per guidance document approved in Registration Board which specifies that ''Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance/ Active Pharmaceutical Ingredient by both Drug Substance & Drug Product manufacturer is required.*you have only submitted the specifications of API from the drug product manufacturer.	Firm has submitted copies of the Drug substance specifications and analytical procedures from drug product manufacturer as well.
3.	Provide verification studies of drug substance from drug product manufacturer	Frim has submitted verification studies of the drug substance from drug product manufacturer
4.	Justify the assay testing of drug substance using UV method contrary to that recommended by the innovator's product.	Our API manufacturer (Vision Pharmaceuticals) have performed analytical method validation for Ciprofloxacin TM Micro pellets 35% including the parameters specificity, Accuracy and Recovery, Linearity and Range, Ruggedness, Robustness, Precision, and Repeatability. Moreover, we have also performed analytical verification of our API manufacturer, the testing method including the parameters specificity, Accuracy, and recovery, and repeatability. As the testing method (UV based) is a completely reliable and validated method. So, we used the said method for our API testing,
5.	Submit COA of relevant batch of API i.e. Lot No. CPX1279 from Vision pharmaceuticals in section 3.2.S.4.4.	Submitted by the firm
6.	Submit COA of reference standard/working standard actually used in the analysis of drug substance.	Previously, we were using reference standard/working standard of Ciprofloxacin HCL manufactured by Shangyu Jingxin pharmaceuticals for the testing of our product by applying correction factor, the calculation is as followed: Working Standard for Ciprofloxacin Suspension Molecular weight of Ciprofloxacin HCL = 367.81 Molecular weight of Ciprofloxacin Base = 331.34 Factor= 331.34/367.81 = 0.901

		1mg of Ciprofloxacin HCL is equivalent to 0.901mg of ciprofloxacin base We hereby confirmed that currently we are using working standard of Ciprofloxacin Base from Vision Pharma (Pvt) Limited (COA Copy attached) Moreover, we have also manufactured 3 new batches (Batch numbers: CP-13, CP-14, and CP-15) along with diluent and performed all the analysis by using the working standard of ciprofloxacin base (by Vision Pharmaceuticals (Pvt) Ltd, Batch no 200973). We have performed complete stability testing of "0" month and accelerated stability testing of "1.5" month after reconstitution with diluent: as per innovator's specifications / dissolution parameters. Reports and stability chromatograms are provided by the firm.
7.	Justification for changed salt form in stability study data of previous batch as the stability study data of ciprofloxacin micro-pellets from Vision Pharmaceuticals initiated in 2013 and completed in 2016 in which ciprofloxacin base is mentioned, while M/s Vision pharmaceuticals was manufacturing ciprofloxacin pellets using ciprofloxacin HCL before Registration Board took the decision to revise the salt form to ciprofloxacin base in its 290th meeting which was held on 3rd-4th July, 2019.	''Vision Pharmaceuticals got registration for both Ciprofloxacin base and Ciprofloxacin HCL in 2014 and started manufacturing of Ciprofloxacin base after registration for its market demand. Later on Drug Registration Board in its 290th meeting instructed all manufacturers to manufacturer Ciprofloxacin Dry powder suspension using Ciprofloxacin Base. As Vision Pharma was already manufacturing Ciprofloxacin Base. Therefore, Ciprofloxacin base is mentioned in given stability study data which was used in our product development'' Registration Certificated and stability study reports of most recent batch are enclosed for your reference.
8.	Justify the use of sugar and poly Succar ultra DM as sweetner while you are already used taste masked granules in your formulation.	Coating material of granules is not enough to mask the bitterness of ciprofloxacin completely. As suspension form is developed for children; therefore, it is necessary to mask the bitterness as well as to produce a sweet taste to make it palatable. As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are **inert**, and are compatible with active pharmaceutical ingredient of CIPROLIS 250/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
9.	Justify the for use of Xanthan gum as suspending agent along with the granules in the formulation while reference product contain no suspending agent.	The coating material used in the granulation of Ciprofloxacin is not enough to suspend the active ingredient in the product when reconstituted, therefore we used Xanthan Gum for equal dispersion of active material after reconstitution to avoid unequal dose.

		As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 250/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
10.	Justify for how 142.857mg/ml of ciprofloxacin granules is equivalent to 50mg Ciprofloxacin base per ml.	We are using 35% TM Pellets which mean: 100mg of pellets contains 35mg of Ciprofloxacin base 1mg pellets = 35/100 = 0.35mg of ciprofloxacin base 142.857 mg pellets = 50mg of Ciprofloxacin Base Therefore, it is justified that 142.857 mg/ml of ciprofloxacin granules is equivalent to 50mg of ciprofloxacin base per ml.
11.	Justification for use of sodium benzoate anhydrous in formulation while the pH is already controlled by the drug substance manufacturer at pellets stage and pH in COA of drug substance. Furthermore, the reference product contains oil based diluent for which pH test is not required to be controlled.	As product has to keep for five days after reconstitution, we used Sodium Benzoate as antifungal preservative in the product to avoid any contamination in the liquid form As per literature review and study of Hand Book for Pharmaceutical Excipients, it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 250/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. Moreover, it is remarkable that we have developed the diluent as per 290th & 313 minutes of meeting of Drug Registration Board/Innovators formulation, kept it on stability and after reconstitution it was observed that our pH is stable as per the prescribed range which is 7.0-9.5%
12.	Justify the use of citric acid in formulation as buffering agent which is not used by the reference product and the reference product contains oil based diluent for which pH is not required to be controlled.	Citric acid was used in the formulation as buffering agent to maintain the pH range 7.0-9.5. We have performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability (Reports are attached). It is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Ciprolis 250mg/5ml suspension. Moreover it is remarkable that we have developed the diluent as per 290th & 313 minutes of meeting of Drug Registration Board/Innovators formulation, kept it on stability and after reconstitution it was observed that our pH is stable as per the prescribed range which is 7.0-9.5%
13.	Justify the use of flavor in formulation while you are already used taste masked granules.	Taste masking ingredients don't impart any flavor, they are used just to mask the bitterness,

		Moreover, use of flavor makes the product more palatable. Whereas, as per literature review and study of Hand Book for Pharmaceutical Excipients , it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 250/5ML Dry Powder suspension. Their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
14.	Justify the use of aerosil in formulation.	As aerosil is glidant which is used as anti-caking agent in dry powder suspension. Aerosil keep the granules in free-flowing form throughout its shelf life. This is an inert material which doesn't impart any change in our formulation. Whereas, as per literature review and study of Hand Book for Pharmaceutical Excipients , it is notable that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of CIPROLIS 250/5ML Dry Powder suspension. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
15.	Provide details about the diluent which is to be used with the applied product in section 3.2.P.1	We have developed a diluent as per 290th & 313 minutes of meeting of Drug Registration Board; truly according to Innovators composition; which is as followed; 1. Sugar 2.5 gm (1%) 2. Sodium Benzoate 250mg (0.001%) 3. Soya Lecithin Powder 250mg (0.001%) 4. Triglyceride 250mg (0.001%) Procedure: Heat the water upto 60℃ and add the sugar with continuous stirring until sugar is dissolved Cook the above solution till boiled to prepare the sugar solution till boiled to prepared the sugar solution, then off the flame. Add Soya Lecithin powder in above solution and stir for 30 minutes Add triglyceride in step 4 and stir for one hour Firm has Liquid Syrup (General) section in which this diluent was manufactured.

16.	Provide Complete module 3.2.P for the diluent which will be used in the administration of the applied product as per the decision of 290th and 313th meeting of Registration Board.	We have developed a diluent after receiving deficiency letter of Ciprolis 250mg/5ml Dry Powder Suspension on 22nd November 2022 as per 290th & 313th minutes of the meeting of Drug Registration Board; truly according to Innovators composition along with 3 new batches of Ciprolis 250mg/5ml Dry Powder Suspension (Batch numbers: CP-13, CP-14 and CP-15) for performance of stability studies. We have performed complete stability testing of "0" month and accelerated stability testing of "1.5" month on these 3 new batches as per innovator's specifications / dissolution parameters. Results are complying with innovator's specifications. Moreover, we have also performed long-run stability testing of 12th month of previous batches (Batch numbers: CP-06, CP-07, and CP-08) after reconstitution with the diluent as per innovator's specifications / dissolution parameters and results are complying with innovator's specifications. Complete BMRs of new batches along with diluent, complete testing along with COA and stability study Reports and chromatograms are provided by the firm.
17.	Justify why the qualitative composition of applied product is different from that of innovator's product.	All the excipients used in our formulation are inert and compatible. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. We have also performed Drug Excipients Compatibility studies concluded that all the excipients are inert and has no harsh effect on product stability.
18.	Justify why the pharmaceutical equivalence studies are not conducted against the innovator's product	We have performed Pharmaceutical equivalence studies of Ciprolis (Ciprofloxacin) 250mg/5ml Suspension against the reference product Novidat Dry Powder Suspension 250mg/5ml manufactured by Sami Pharmaceuticals As the innovator product is not available in Pakistan therefore, pharmaceutical equivalence of Ciprolis (Ciprofloxacin) 250mg/5ml Suspension was performed against the reference product Novidat Dry Powder Suspension 250mg/5ml manufactured by Sami Pharmaceuticals.
19.	Provide Microbial attributes of applied Drug product in section 3.2.P.2.5	Submitted by the firm
20.	Submit Preservative effectiveness studies in section 3.2.P.2.5.	Submitted by the firm
21.	Submit Compatibility study of applied product along with recommended diluent.	Submitted by the firm
22.	Justify the pH test in your specification since no such test is recommended in USP monograph.	We are performing all the test as per USP monograph and truly followed USP monograph

		However, we are also performing additional test for pH as a quality attributes in order to be more stringent
23.	Justify why Microbial Enumeration Tests is not mentioned in specification while it is recommended by USP	We have revised our method and test for Microbial Enumeration has been performed as recommended by USP (COA and revised method are enclosed) We have performed our finished product method as per USP which covers Microbial Enumeration Test Moreover, we have also performed Microbial Preservative test, which shows that all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Ciprolis 250mg/5ml. Moreover, their safety and compatibility have also been established as no harsh / adverse effect has been observed in our stability studies. Complete method and Microbial Preservative test are provided by the firm.
24.	Justify the analytical method of assay and dissolution test in which initial reconstitution with water is mentioned while USP recommends to use the particular diluent for this purpose. Justify how your analytical method complies USP monograph.	We have developed a diluent as per 290th & 313 minutes of meeting of Drug Registration Board; which is truly according to Innovators composition and performed finished product test as per USP method after reconstitution with diluent and found that results are fully comply with USP requirements (Revised method of analysis and finished product COA after reconstitution with diluent are attached) Stability studies of CIPROLIS 250MG/5ML after reconstitution with diluent are also provided by the firm.
25.	Justify why the identification test using diode array detector is not performed and mentioned in analytical method.	Sample and standard were analyzed under same chromatographic conditions and found that the results were closely comparable. It is remarkable that we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification, Linearity, Accuracy and Recovery. Results of above said validation parameters complied with the Relative Standard Deviation limits.
26.	Justify why you are using different column in assay test as that recommended by USP	The column used for analysis of Ciprofloxacin suspension have chemically same specification i.e. packing L1 with same particle size, the difference is only the length of column, USP require 15cm while we are using 25cm, remaining specifications are same as USP requirements. Sample and standard were analyzed under same chromatographic conditions and found that the results were closely comparable. It is remarkable that we have performed analytical method validation in which we did extensive testing taking different concentrations under heading of Limit of Detection, Limit of Quantification, Linearity, Accuracy and Recovery. Results of above

<table>
<tr><td></td><td></td><td>said validation parameters complied with the Relative Standard Deviation limits.
Column oven invoice along with specifications is provided by the firm.</td></tr>
<tr><td>27.</td><td>Submit evidence of diode array detector which is required for identification test as per USP monograph.</td><td>Sample and standard were analyzed under same chromatographic conditions found that the results were closely comparable.

31.	Justify how you are using Ciprofloxacin HCl Manufactured by Shangyu Jingxin Pharmaceuticals for the testing of your product.	Previously, we were using Ciprofloxacin HCL manufactured by Shangyu Jingxin pharmaceuticals for the testing of our product by applying correction factor, the calculation is as followed: Working Standard for Ciprofloxacin Suspension Molecular weight of Ciprofloxacin HCL = 367.81 Molecular weight of Ciprofloxacin Base = 331.34 Factor= 331.34/367.81 = 0.901 1mg of Ciprofloxacin HCL is equivalent to 0.901mg of ciprofloxacin base

<table>
<tr><td></td><td></td><td>We hereby confirmed that currently we are using Ciprofloxacin Base from Vision Pharma (Pvt) Limited (COA Copy attached)
Moreover, we have also manufactured 3 new batches (Batch numbers: CP-13, CP-14, and CP-15) along with diluent and performed all the analysis by using the working standard of ciprofloxacin base (by Vision Pharmaceuticals (Pvt) Ltd, Batch no 200973). We have performed complete stability testing of “0” month and accelerated stability testing of “1.5” month after reconstitution with diluent: as per innovator’s specifications / dissolution parameters.
Reports and stability chromatograms are provided by the firm.</td></tr>
<tr><td>32.</td><td>The stability chromatograms for assay testing depicts that ciprofloxacin HCl is tested while the applied product contains ciprofloxacin base. Clarification is required in this regard.</td><td>Previously, we were using Ciprofloxacin HCL manufactured by Shangyu Jingxin pharmaceuticals for the testing of our product by applying correction factor, the calculation is as followed:
Working Standard for Ciprofloxacin Suspension
Molecular weight of Ciprofloxacin HCL = 367.81
Molecular weight of Ciprofloxacin Base = 331.34
Factor= 331.34/367.81 = 0.901
1mg of Ciprofloxacin HCL is equivalent to 0.901mg of ciprofloxacin base
We hereby confirmed that currently we are using Ciprofloxacin Base from Vision Pharma (Pvt) Limited.
Moreover, we have also manufactured 3 new batches (Batch numbers: CP-13, CP-14, and CP-15) along with diluent and performed all the analysis by using the working standard of ciprofloxacin base (by Vision Pharmaceuticals (Pvt) Ltd, Batch no 200973). We have performed complete stability testing of “0” month and accelerated stability testing of “1.5” month after reconstitution with diluent: as per innovator’s specifications / dissolution parameters.
Reports and stability chromatograms are provided by the firm.</td></tr>
<tr><td>33.</td><td>Justify the manufacturing of stability batches in November 2021 while your section was approved on 10-05-2022</td><td>Development of Trial Batches of Ciprolis 250mg/5ml suspension was performed in our product development (R & D) section.
Our R&D Lab has been inspected/ endorsed by the DRAP Panel of Inspectors; with following remarks
<table><tr><th>Q #</th><th>Question</th><th>OBSERVATION BY PANEL</th></tr><tr><td>17.</td><td>Do You have Product development (R&D) Section?</td><td>Yes, The Firm has product development (R&D) section for product development, manufacturing &</td></tr></table></td></tr>

		testing facility for trial Batches.

The above stated report was based on PSI conducted for Delanso Capsule where the inspection was carried out on 02-05-2019 and the PSI report was discussed in the Board in 289th meeting.

34.	Provide stability study data in a proper sequence using separators along with relevant raw data sheet	Firm has submitted data with proper sequence
35.	Stability study data in section 3.2.P.8.3 as per the checklist approved by registration Board in its 296th meeting and the CTD guidance document, which includes the following; Reference of previous approval of applications with stability study data of the firm (if any) Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. Documents for the procurement of API with the approval from DRAP (in case of import) Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. Compliance Record of HPLC software 21CFR & audit trail reports on product testing Record of digital data logger for temperature and humidity monitoring of both stability chamber	Firm has submitted data as per checklist

Decision of 324th meeting: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Manufcaturer shall declare the shelf life of the diluent, to be used with commercial batches.**

Registration letter will be issued upon submission of following:

- **Fee of Rs. 30,000/- for submission of revised stability studies data, as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**
- **Accelerated and long term stability studies data till third month time point of newl manufactured stability batches i.e., (Batch numbers: CP-13, CP-14, and CP-15) as per USP monograph along with in-use stability data with the reconstituioton diluent as recommended by Innovator.**

Case No. 03 Registration applications of Form 5F cases

a. New cases of local manufacturing

75.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad**
	Name, address of Manufacturing site.	M/s Gray's Pharmaceutical Plot # 2, Street # N-3, National Industrial Zone, Rawat Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate of issued on the basis of inspection dated 05-05-2017.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License of M/s Gray's Pharmaceuticals dated 22-06-2011 specifying Dry powder injection (Ceph) section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26125: 21-09-2021
	Details of fee submitted	PKR 30,000/-: 12-07-2021
	The proposed proprietary name / brand name	**Nezone Injection 2g**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone sodium eq. to Ceftriaxone… 2g
	Pharmaceutical form of applied drug	Almost white to off white colored powder filled in glass vial.
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved
	For generic drugs (me-too status)	Oxidil Injection by Sami
	Name and address of API manufacturer.	M/s. Qilu Antibiotics Pharmaceutical CO. Ltd. No. 849 Dongjia Town Licheng District Jinan Shanding Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications,

		analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence against Cefxone 2g Injection by Bosch Pharmaceuticals.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. SD20170590) issued by China Food and Drug Administration, valid till 30-07-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 09-02-2021 specifying import of 20Kg ceftriaxone. The invoice is cleared by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record of stability testing of 3 batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted by the firm

Evaluation by PEC[3]:

- Capacity assessment of the firm was conducted by the panel on 31-10-2022 wherein panel concluded that firm has sufficient manufvaturing capacity for manufacturing of Dry powder injection (Cephalosporin), Dry powder for suspension (Cephalosporin) & Capsule (Cephalosporin).
- Firm has not performed pharmaceutical equivalence studies against the innovator's / reference product since it is not registered in Pakistan..

Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
79.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Genetics Pharmaceuticals (Private) Limited** **539-A Sunder Industrial Estate, Lahore Pakistan**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt.) Limited, Plot No. 81- Sundar Industrial Estate, Raiwind road, Lahore
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 25692 dated 15-09-2021
	Details of fee submitted	PKR 75,000/-: dated 08-06-2021
	The proposed proprietary name / brand name	GENXONE Dry Powder Injection 500mg (IM)
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Ceftriaxone (as Sodium)…….500mg
	Pharmaceutical form of applied drug	white to yellowish orange crystalline powder for solution for injection
	Pharmacotherapeutic Group of (API)	Semi- synthetic Broad spectrum Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's (1 vial)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ROCEPHIN 5OOmg IM Injection F-Hoffmann-La Roche Ltd. Basel, Switzerland
	For generic drugs (me-too status)	CEFZONE Injection 500mg by M/s Bosch Pharmaceuticals (Pvt.) Ltd. Reg. No. 017656
	GMP status of the Finished product manufacturer	01-04-2019
	Name and address of API manufacturer.	M/s Zhuhai United Laboratories Trading Company Limited. (No.2428 Anji Road, Sanzao Town, Jinwan District, Zhuhai, Guangdong-519090, P.R. China).
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container

		closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ceftriaxone as Sodium is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity D, G & related substances (impurity A & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (180004, 180019, 180040)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is ROCEPHIN 500mg Injection by Bosch Pharmaceuticals (Pvt.) Ltd. by performing quality tests (Identification, Assay by HPLC, Average Weight, Weight Variation, Particulate matter in injection, Water Content, pH , Endotoxin Test, Sterility Test).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA

Manufacturer of API	Zhuhai United Laboratories Trading Company Limited. (No.2428 Anji Road, Sanzao Town, Jinwan District, Zhuhai, Guangdong-519090, P.R. China).		
API Lot No.	3051807878		
Description of Pack (Container closure system)	Clear Glass vial with rubber stopper having pilfered proof aluminium seal and orange plastic top Packed in unit Carton with 2ml Lidocaine HCl.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 3, 6 (Months) Real Time: 0, 1, 3, 6, 9, 12, 18, 24 (Months)

Batch Size	16666 vials	16666 vials	16666 vials

Manufacturing Date	11-2018	12-2018	12-2018
Date of Initiation	23-11-2018	24-12-2018	24-12-2018
No. of Batches	03		

Administrative Portion

13.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by CFDA China. The certificate is valid till 05-12-2023
15.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 15-10-2018 vide dy. No. 13295/2018-DRAP specifying import of 96Kg ceftriaxone sodium sterile (USP). The invoice is cleared by AD (I&E) DRAP.
16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system is not 21 CFR compliant.
18.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

Submit module 1 as per the CTD guidance document approved by Registration Board by providing all the information and documents in relevant sections / sub-sections instead of referring to annexures.	Module I is submitted as per CTD guidance document.
Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of drug substance by both drug product and drug substance manufacturer in the relevant sections as per guidance document for Form 5F.
Provide details of the analytical method and concentrations in terms of mg/ml used to test the parameters in verification / validation studies of the drug substance. Further justify significant difference in peak areas value at same concentration during different tests like precision and accuracy/linearity.	The firm has submitted analytical method verification studies (including specificity, precision and accuracy etc) with the detail of concentrations of different dilutions used to test the parameters of required studies.
Justify why the test of specificity is not performed during the verification / validation studies of the drug substance.	The firm has submitted analytical method verification report mentioning the results of the test for specificity parameter for analytical method verification studies for dug substance performed by drug product manufacturer.
Submit COA of reference standard actually used in the analysis of drug substance in section 3.2.S.5.	Certificate of analysis of reference standard actually used in the development of the applied product is provided.
Justify how compatibility studies of IV injection can be used for ceftriaxone IM injection as well	The firm has submitted compatibility studies for 500mg IM injection with the recommended diluent. The data is presented in the relevant section (0H, 4H, 8H & 16H).

Provide details of sample solution 2 preparation i.e. exact volume of water required for initial constitution of the ceftriaxone for injection.	Detail of preparation of sample solution II is provided in the relevant section which is in-lined with USP for 500mg IM injection.
Your analytical method for drug product specifies two different sample solutions as well as two different analysis, calculation formula and acceptance criteria as per USP monograph, while your specifications does not specify two different tests and acceptance criteria for assay and you have released your batches with only 1 type of assay results. Justify why your specifications, analytical method and practices of batch release are not aligned with USP monograph recommendations.	Specifications of finished product has been revised with addition of acceptance criteria for assay as per USP monograph. Revised specifications are submitted which are in-lined with USP. The firm has stated that they have performed one test at the stage of drug substance analysis and the other test is performed at the drug product stage. "*as we are dealing with the toll manufacturing in order for better understanding on COA we opted the 90-115% assay specifications. However, we have revised the SOP along with the specifications and would update and align all the practices and documents".*
Justify how you are releasing commercial batches of ceftriaxone 500mg IM and IV as a single batch by producing two COA having exactly same results for each test.	The firm has submitted separate COAs for 500mg IM injection. Certificate of Analysis of finished products are also attached in executed BMRS of three batches enclosed in module 3 section 3.2.R.
Justify how single BMR can be used for a single batch of two separately registered products like ceftriaxone 500mg IM and 500mg IV Injection.	Separate BMRs for 500mg ceftriaxone IM injection is submitted in section 3.2.R.1.2 along with the blank template of BM. The firm has submitted that the BMR were placed in 500mg IM injection mistakenly in the dossier on 500mg IV injection.
Submit product development and stability study data of 3 batches of ceftriaxone 250mg IM injection for further evaluation.	The firm has submitted product development and stability study data of 3 batches of Ceftriaxone 500mg IM Injection along with the raw data sheets chromatograms, COAs etc.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**G-Perium Injection 500mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem trihydrate eq to meropenem……500mg
	Pharmaceutical form of applied drug	White to off white powder filled in clear glass vials with sea green color flip off seal along with 10ml WFI ampoule.
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture,

		manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Merrem 500mg Injection manufactured by Boehringer Ingelheim.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20180065) issued by China Food and Drugs Administration dated 17-08-2018. The certificate is valid till 16-08-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared dated 13-09-2021 specifying import of 200Kg Meropenem for Batch No. 682107002 and

		682107003. The commercial invoice is attested by AD (I&E) DRAP field office.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- Firm has initially submitted stability data of batches manufactured using drug substance from M/s Sterile India Pvt Ltd. Plot No. 100& 118-G, Phase-IV, Sector-56, HSIIDC, Industrial Estate Kundli District Sonepat Haryana India. Later on the firm revised the stability data as well as source of API without submission of fee.
- The applied formulation to be manufactured by M/s Global Pharmaceuticals, Islamabad have already been granted approval by Registration Board in its 320th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already considered product in 320th meeting are as follows:

Applicant firm	M/s Reliance Pharma. Plot No 8, Street No. S-8, Industrial Estate, Rawat, Islamabad
Manufacturer firm	M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.
Brand Name	RELEM 500mg Injection
Batch No. of drug product	22A169, 22A363, 22A364
Case No.	201
Registration Board meeting	320th meeting of Registration Board

Decision: Approved. Registration letter shall be issued after submission of fee Rs. 75,000/- for revision of source of drug substance, as per Notification No. 7-11/2012-B&A dated 07.05.2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Firm shall state the quantity, in mg, of sodium (Na) in a given dosage of Meropenem, on the label claim, as recommended by the USP monograph of "Meropenem for injection".**
- **Registration Board further authorized its Chairman for issuance of registration letter upon consideration of satisfactory capacity assessment of manufacturing and testing facility of M/s Global Pharmaceuticals.**

81.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Rogen Pharmaceuticals Plot No. 30, Street # S-4, National Industrial Zone, Rawat, Islamabad**

	Reference to Finished product specifications	USP
	Proposed Pack size	10’s, 20’s, 30’s, 50’s and 100’s.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Panadol ActiFast 500mg Tablet by GlaxoSmithKline Consumer Healthcare (**MHRA** Approved)
	For generic drugs (me-too status)	NA
	Name and address of API manufacturer.	Hebei Jiheng (Group) Pharmaceutical Co. Ltd. Shenzhou Plant Southeast Xijingming Village Donganzhuang Township, Shenzhou County Henshui City, Hebei Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 75% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against the reference product i.e. PANADOL Actifast tablet of GSK Ireland. Firm has submitted results of CDP in three dissolution medium for their product against the reference product i.e. PANADOL Actifast tablet of GSK Ireland.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	Hebei Jiheng (Group) Pharmaceutical Co. Ltd. Shenzhou Plant Southeast Xijingming Village Donganzhuang Township, Shenzhou County Henshui City, Hebei Province, China.		
API Lot No.	31709016		
Description of Pack (Container closure system)	Alu-PVC blister		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Lab-01	Lab-02	Lab-03
Batch Size	1000 Tablet	1000 Tablet	1000 Tablet
Manufacturing Date	11-2020	11-2020	11-2020
Date of Initiation	21-12-2020	21-12-2020	21-12-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. EMPOLI (Empagliflozin) 10mg & 25mg Tablets which was presented in 290th meeting of the registration board & hence approved & registered by registration board Date of inspection: 13th June 2019. The inspection report confirms following points • The HPLC software is 21CFR Compliant. • Audit trail on the testing reports is available.

		• Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. HE20180054 issued by China Food And Drug Administration valid till 08/07/2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice (Invoice# 1708ZP03 dated 19th October 2017 with received quantity i.e. 5000 kgs) for the purchase of Paracetamol from M/s Hebei Jiheng Shenzhou Pharmaceutical Co., Ltd. China with attestation of DRAP dated 01-11-2017
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete analytical record of product testing of all batches.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Qualitative composition is different from the reference product, since reference product has not used potassium sorbate and pregelatinized starch.
- Justify the use of preservative i.e. potassium sorbate in the applied formulation as tablet.
- Dissolution acceptance in USP is NLT 80% in 30 minutes while the firm has set acceptance criteria NLT 80% in 10 minutes.
- Disintegration test acceptance criteria is NMT 30 minutes, while dissolution criteria is NLT 80% in 10 minutes.

Decision of 320th meeting of Registration Board:

Deferred for the following;

- Qualitative composition is different from the reference product, since reference product has not used potassium sorbate and pregelatinized starch.
- Justify the use of preservative i.e. potassium sorbate in the applied formulation as tablet.
- Dissolution acceptance in USP is NLT 80% in 30 minutes while the firm has set acceptance criteria NLT 80% in 10 minutes.
- Disintegration test acceptance criteria is NMT 30 minutes, while dissolution criteria is NLT 80% in 10 minutes.

Response by the firm:

Firm vide its letter dated 13-09-2022 has submitted a request as follows:
Kindly note that we applied the dossier initially with the brand name of PROVAS ACTIFAST which was later on changed to PROVAS FASTIV vide our letter dated 03-05-2022.

Sr. No	Reason for deferment	Response by the firm
1.	Qualitative composition is different from the reference product, since reference product has not used potassium sorbate and pregelatinized starch.	We have used potassium sorbate and pregelatinized starch same as of innovator formulation. Firm has also submitted PIL of Panadol Actifast Tablets manufactured by GSK Ireland. However we have already submitted API-Excipient compatibility in our dossier for difference in other excipients, API –Excipient compatibility studies attached
2.	Justify the use of preservative i.e. potassium sorbate in the applied formulation as tablet.	We have used potassium sorbate in our formulation same as of innovator formulation
3.	Dissolution acceptance in USP is NLT 80% in 30 minutes while the firm has set acceptance criteria NLT 80% in 10 minutes.	With reference to our letter dated 22nd August 2022 is attached, we have revised our specifications from USP to Innovator's. Our specifications confirms to the Innovator's

		(GSK) specifications which are more stringent than USP specifications. Revised specifications and testing method (SPTM) and Pharmaceutical Equivalence is provided by the firm
4.	Disintegration test acceptance criteria is NMT 30 minutes, while dissolution criteria is NLT 80% in 10 minutes.	We set the disintegration specification according to USP general monograph for Disintegration <701> which specifies NMT 30 minutes for film coated tablets. Our product is fast dissolving with a dissolution specs of NLT 80% (Q) in 10 minutes and disintegration time of our product is also found within 01 minute which correlates with dissolution. We have revised the specification of DT from NMT 30 minutes to NMT 10 minutes. Revised specifications and testing method (SPTM) is provided by the firm.

Decision of 321st meeting of Registration Board: Registration Board discussed that the applicant already has the registration of formulation containing Paracetamol 500mg as immediate release tablet whereas the firm has applied for the same formulation having different excipients and there is no change in strength, dosage form, salt form, drug delivery system etc. Considering the fact that different excipients are used in the applied product and already approved formulation, the Board deferred the case for clarification from applicant and then further deliberation.

Response by the firm:

Firm vide its reply Dy No. 1302 dated 16-01-2023 submitted as under:

Our applied product PROVAS ACTIFAST was deferred in Registration Board Meeting no. M-321 for which we would like to respectfully submit as under:

Keeping in line with the International developments for new & innovative drug therapies in Pain Management, and as per DRAP's Vision to ensure access to safe, quality assured and efficacious therapeutic drugs in line with the national laws and international best practices, we have developed this formulation

Paracetamol is considered as a safe and efficacious drug from the time of its first introduction in 1950. Since then, in order to improve over its limitations while providing innovative therapies to healthcare professionals as well as the patients, the innovator / Research Company, M/s. GSK introduced a new and improved formulation in 2001 under the name of PANADOL ACITIFAST. This formulation, besides Conventional Paracetamol, is available in many countries worldwide as detailed below:

Reference Regulatory Authority (RRA) /PICs Member States	**Conventional formulation**	**Actifast formulation**
EMA	PANADOL Original	PANADOL ACTIFAST
United Kingdom	PANADOL Original	PANADOL ACTIFAST
Australia	PANADOL	PANADOL RAPID
Belgium	PANADOL	PANADOL ZAPP
Ireland	PANADOL Original	PANADOL ACTIFAST
Netherland	PANADOL	PANADOL ZAPP
Denmark	PANADOL	PANADOL ZAPP
Belgium	PANADOL	PANADOL ZAPP
Lebanon	PANADOL	PANADOL ACTIFAST
Malaysia	PANADOL	PANADOL ACTIFAST
Greece	Plain not available	PANADOL ACTIFAST
Hong Kong	PANADOL	PANADOL ACTIFAST
United Arab Emirates	PANADOL	PANADOL ACTIFAST

Reference pages from respective RRA are provided by the firm

Comparison of various parameters between "Conventional Paracetamol Tablets" viz. a viz. newly applied ACTIFAST formulation is mentioned as under; our applied formulation is comparable with the Innovator brand – PANADOL ACTIFAST

Parameters	**Conventional Panadol / Provas Tablets**	**PANADOL ACTIFAST / PROVAS FASTIV**
Disintegration	Within 15 minutes	Within 10 minutes

		Gamma scintigraphic images of the stomach showed 2 times faster disintegration against Conventional Paracetamol tablets
Absorption	Paracetamol is poorly absorbed in the stomach but well absorbed in the small intestine due to the greater surface area and absorptive capacity. Conventional Paracetamol tablets have no such ingredient(s) to increase the rate of absorption	It is absorbed into the bloodstream at least twice as fast as against conventional (Conventional) Paracetamol Tablets Following administration, Paracetamol has a median time to peak plasma concentrations (t_{max}) of 25 minutes in fasted subjects and 45 minutes in the fed subjects Maximum plasma concentrations were reached at least twice as fast than Conventional Paracetamol Tablets in both the fed and fasted state
Dissolution	NLT 80% (Q) in 30 minutes	NLT 80% (Q) in 10 minutes
Gastric safety	-	It does not compromise the stomach's protective lining and can be taken even in an empty stomach or by those at risk of stomach ulcers
Onset of action	Onset of action is slow, as peak plasma concentrations occur about 30 minutes to 2 hours after ingestion	Due to a combination of faster disintegration and gastric emptying, this new formulation is responsible for the faster rate of absorption of Paracetamol than Conventional Paracetamol formulation
Other attributes	Round conventional shape Uncoated tablets and hence a bitter taste	Oblong shape makes it easy to swallow. The bitter taste of Paracetamol is masked through film coating Product specifications conform to the Innovator's Specifications, being more stringent than USP Specifications
Formulation detail	Each tablet contains Paracetamol Maize starch Povidone Potassium sorbate Soluble starch Purified talc Stearic acid	Each film coated tablet contains: Paracetamol Maize starch Povidone Potassium sorbate Pre-gelatinized starch Silicon dioxide Magnesium stearate Sodium starch glycolate Sodium Bicarbonate Microcrystalline cellulose Hydroxypropylmethyl cellulose E15 Polyethylene glycol 6000 Titanium Dioxide Talcum Powder

Above references taken from SmPC & Official website of PANADOL ACTIFAST are provided by the firm

A study comparing the rates of disintegration, gastric emptying and drug absorption of PANADOL ACTIFAST Tablet and Conventional Paracetamol Tablet was published in Pharmaceutical Research (Volume 20, issue 10, October 2003), an official journal of the American Association of Pharmaceutical Scientists. According to the study, the pharmacokinetics of PANADOL ACTIFAST showed significantly shorter time to maximum serum concentration (T_{max}) (in both fed and fasted state) and a significantly higher maximum serum concentration (C_{max}) (in the fasted state) as compared to conventional Paracetamol tablet, which is due to faster disintegration and gastric emptying; copy of article is enclosed

Conventional Paracetamol Tablet is available in Pharmacopeia, whereas under applied PROVAS FASTIV having different specifications which is more stringent than the Pharmacopeal specifications, for which we have already submitted our revised Finished Product specifications, vide our two letters dated 22-08-2022 & 31-08-2022 respectively, complying with that of the Innovator brand

While considering the difference in various parameters between the two formulations i.e. Conventional Paracetamol & PROVAS FASTIV Tablets and its availability in many RRA countries besides conventional Paracetamol Tablets, we hope you will find the above explanation in order and grant us registration of this novel formulation		
Decision of 324th meeting: Registration Board while deliberating the instant case recalled its decision of 262nd meeting, wherein while discussing the case of "Price fixation under the Drug Pricing Policy-2015", decided that "generic drug product means same molecule and its salt, same strength and dosage form, otherwise it will be considered as new drug product and same is being practiced by Registration Board. Moreover, drug product has 04 main components i.e. drug substance, dosage form, formulation and container-closure and delievery system." **In context of the above cited decision, Registration Board decided to approve instant application of "PROVAS ACTIFAST 500mg Tablet" as generic drug product.** • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
83.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat**
	Name, address of Manufacturing site.	M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat

	GMP status of the firm	
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of additional section dated 30-12-2020 for following 4 sections. • Tablet (General) • Capsule (General) • Sachet (General) • Oinment / Cream / Gel (General)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7362: 16-03-2022
	Details of fee submitted	PKR 30,000/-: 14-01-2022
	The proposed proprietary name / brand name	**DEXZEN 30mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Dexlansoprazole (as dual delayed release pellets)…….30mg
	Pharmaceutical form of applied drug	Small white round enteric coated pellets encapsulated in hard gelatin capsule
	Pharmacotherapeutic Group of (API)	PPI
	Reference to Finished product specifications	Manufacturer's specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Dexilant capsule **USFDA** Approved
	For generic drugs (me-too status)	Razodex Capsule by Getz Pharma
	Name and address of API manufacturer.	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 23-02-2021 specifying purchase of 2Kg dexlansoprazole pellets 22.5%.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm submitted that their HPLC system is not 21 CFR compliant therefore the audit trail reports are not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- GMP certificate / inspection report of the firm conducted within a period of last three years.
- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any method and procedures for preparation of each type of solution. Furthermore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.
- Section 3.2.S.6 specifies that the API manufacturer is using food grade double polyethylene bag for storing these pellets which are highly sensitive to moisture and light. Justification is required in this regard.
- Provide information in section 3.2.S.7.1 amd 3.2.S.7.2 as per CTD guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.
- The stability study of dexlansoprazole pellets performed by Vision Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging

material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.

- Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of dexlansoprazole pellets wherein the representative from the pellets manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarification is required in this regard.
- Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.
- Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be perfomed, since you have mentioned that pharmaceutical equivaelence is not required and then you have also provided a brief report of dexlansoprazole tablet in which all tests are not performed.
- Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter.
- Submit information in section 3.2.P.3 as per the guidance document which specifies that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified".
- Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1.
- Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data to support this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified".
- Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."
- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established.
- Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.
- Provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarification is required in this regard.
- Provide validation studies of the analytical method of drug product in section 3.2.P.5.3.
- Provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.
- Provide COA of the reference standard / working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard.
- Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."
- You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard.
- Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.

- Justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets.
- Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.
- Justify the dissolution test in which the acceptance criteria is NLT 75% in 5 hours which is against the specificatiosn of innovator's product.
- Justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter <711> as well as defined by Registration Board in its 293rd meeting.
- Provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule.
- Provide stability study data in a proper sequence by providing stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and sperators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision of 323rd meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm:

Sr. No	Short coming	Annexure
01	GMP certificate /inspection report of the firm conducted within a period of last three years.	Firm has not submitted GMP certificate / inspection report.
02	Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.	Firm has **not** submitted QOS as per WHO template.
03	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer
04	Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.	Firm has **not** submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.
05	Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of	Firm has submitted COA of batch number DLP664.

	batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.	
06	Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of hese pellets or any other source of reference standard manufacturing.	Firm has **not** sumitted COA of reference / working standard.
07	Section 3.2.S.6 specifies that the API food grade double manufacturer is using polyethylene bag for storing these which are pellets highly sensitive to moisture and light. Justification is required in this regard.	Three polyethylene bag used for packing of pellets. Two transparent and one black color bags along with silica gel.
08	Provide information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.	Firm has submitted information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document.
09	The stability study of Vision Dexlansoprazole pellets performed by Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.	Study performed at lab scale and in chamber they placed sample in pet bottle and for commercial they provide polythene bags and drum which is not possible in pet bottle.
10	Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of Dexlansoprazole pellets wherein the manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarifications required in this regard.	DMF provided by vision pharma
11	Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.	Submitted by the firm.
12	Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be performed, since you have mentioned that pharmaceutical equivalence is not required and then you have also provided a brief report of Dexlansoprazole tablet in which all tests are not performed.	Firm has submitted pharmaceutical equivalence studies against the comparator product manufactured by Weatherfolds pharma.
13	Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter	Firm has submitted results of comparative dissolution profile against the brand leader.
14	submit information in section 3.2.P.3 as per the guidance document which specifies that The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified"	Firm has submitted information in section 3.2.P.3 as per the guidance document.
15	Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch	Firm has submitted information in section 3.2.P.3.2 as per the guidance document.

	formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1	
16	Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data t supports this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified"	Firm has submitted information in section 3.2.P.3.3 as per the guidance document.
17	Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."	Firm has submitted information in section 3.2.P.3.4 as per the guidance document.
18	Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established	Firm has **not** submitted process validation protocols.
19	Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.	Firm has submitted specifications of the drug product in section 3.2.P.5.1.
20	provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarifications required in this regard	Firm has submitted specifications of the drug product in section 3.2.P.5.2.
21	Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.	Firm has **not** submitted complete validation studies of the analytical method of drug product in section 3.2. P.5.3.
22	provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of Dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.	Firm has submitted Batch analysis report of 3 stability batches.
23	Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard	Firm has **not** submitted COA of reference standard / working standard.
24	Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."	Firm has submitted details of container closure system.

25	You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard	Written mistakenly, revised and correct submitted.
26	Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.	Firm has submitted information in section 3.2.P.8.1 and 3.2.P.8.2.
27	justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets	Firm has now submitted dissolution test results at different medium in stability studies.
28	Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.	Firm has submitted specifications and analytical method of drug product.
29	justify the dissolution test in which the acceptance criteria NLT 75% in 5 hours which is against the specifications of innovator's product	Typo mistake Revised COA attached
30	justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter as well as defined by Registration Board in its 293d meeting	Corrected and resubmitted by the firm
31	provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule	Revised COA are submitted by the firm.
32	provide stability study data in a proper se stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and separators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out	Firm has submitted stability data in a proper sequence.
33	submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: • Reference of previous approval of applications with stability study data of the firm (if any) • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin • Documents for the procurement of APl with approval from DRAP (in case of import). • Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of both stability chambers	Firm has submitted response against the 6 points checklist as per CTD guidance document.

Decision: Deferred for following observations:

- **Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.**

• **Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.** • **Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of hese pellets or any other source of reference standard manufacturing.** • **Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established** • **Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.** • **Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

No. of Batches	03	
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 23-02-2021 specifying purchase of 2Kg dexlansoprazole pellets 22.5%.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm submitted that their HPLC system is not 21 CFR compliant therefore the audit trail reports are not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- GMP certificate / inspection report of the firm conducted within a period of last three years.
- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any method and procedures for preparation of each type of solution. Furthermore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.
- Section 3.2.S.6 specifies that the API manufacturer is using food grade double polyethylene bag for storing these pellets which are highly sensitive to moisture and light. Justification is required in this regard.
- Provide information in section 3.2.S.7.1 amd 3.2.S.7.2 as per CTD guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.
- The stability study of dexlansoprazole pellets performed by Vision Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.
- Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of dexlansoprazole pellets wherein the representative from the pellets manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The

submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarification is required in this regard.

- Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.
- Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be perfomed, since you have mentioned that pharmaceutical equivaelence is not required and then you have also provided a brief report of dexlansoprazole tablet in which all tests are not performed.
- Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter.
- Submit information in section 3.2.P.3 as per the guidance document which specifies that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified".
- Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1.
- Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data to support this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified".
- Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."
- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established.
- Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.
- Provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarification is required in this regard.
- Provide validation studies of the analytical method of drug product in section 3.2.P.5.3.
- Provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.
- Provide COA of the reference standard / working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard.
- Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."
- You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard.
- Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.
- Justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets.
- Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.
- Justify the dissolution test in which the acceptance criteria is NLT 75% in 5 hours which is against the specificatiosn of innovator's product.

- Justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter <711> as well as defined by Registration Board in its 293rd meeting.
- Provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule.
- Provide stability study data in a proper sequence by providing stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and sperators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision of 323rd meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm:

Sr. No	Short coming	Annexure
01	GMP certificate /inspection report of the firm conducted within a period of last three years.	Firm has not submitted GMP certificate / inspection report.
02	Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.	Firm has **not** submitted QOS as per WHO template.
03	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer
04	Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.	Firm has **not** submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.
05	Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.	Firm has submitted COA of batch number DLP664.
06	Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in	Firm has **not** sumitted COA of reference / working standard.

	section 3.2.S.1 of your application and is neither the manufacturer of hese pellets or any other source of reference standard manufacturing.	
07	Section 3.2.S.6 specifies that the API food grade double manufacturer is using polyethylene bag for storing these which are pellets highly sensitive to moisture and light. Justification is required in this regard.	Three polyethylene bag used for packing of pellets. Two transparent and one black color bags along with silica gel.
08	Provide information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.	Firm has submitted information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document.
09	The stability study of Vision Dexlansoprazole pellets performed by Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.	Study performed at lab scale and in chamber they placed sample in pet bottle and for commercial they provide polythene bags and drum which is not possible in pet bottle.
10	Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of Dexlansoprazole pellets wherein the manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarifications required in this regard.	DMF provided by vision pharma
11	Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.	Submitted by the firm.
12	Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be performed, since you have mentioned that pharmaceutical equivalence is not required and then you have also provided a brief report of Dexlansoprazole tablet in which all tests are not performed.	Firm has submitted pharmaceutical equivalence studies against the comparator product manufactured by Weatherfolds pharma.
13	Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter	Firm has submitted results of comparative dissolution profile against the brand leader.
14	submit information in section 3.2.P.3 as per the guidance document which specifies that The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified"	Firm has submitted information in section 3.2.P.3 as per the guidance document.
15	Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1	Firm has submitted information in section 3.2.P.3.2 as per the guidance document.
16	Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow	Firm has submitted information in section 3.2.P.3.3 as per the guidance document.

	diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data t supports this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified"	
17	Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."	Firm has submitted information in section 3.2.P.3.4 as per the guidance document.
18	Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established	Firm has **not** submitted process validation protocols.
19	Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.	Firm has submitted specifications of the drug product in section 3.2.P.5.1.
20	provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarifications required in this regard	Firm has submitted specifications of the drug product in section 3.2.P.5.2.
21	Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.	Firm has **not** submitted complete validation studies of the analytical method of drug product in section 3.2. P.5.3.
22	provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of Dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.	Firm has submitted Batch analysis report of 3 stability batches.
23	Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard	Firm has **not** submitted COA of reference standard / working standard.
24	Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."	Firm has submitted details of container closure system.
25	You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard	Written mistakenly, revised and correct submitted.
26	Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.	Firm has submitted information in section 3.2.P.8.1 and 3.2.P.8.2.

27	justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets	Firm has now submitted dissolution test results at different medium in stability studies.
28	Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.	Firm has submitted specifications and analytical method of drug product.
29	justify the dissolution test in which the acceptance criteria NLT 75% in 5 hours which is against the specifications of innovator's product	Typo mistake Revised COA attached
30	justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter as well as defined by Registration Board in its 293d meeting	Corrected and resubmitted by the firm
31	provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule	Revised COA are submitted by the firm.
32	provide stability study data in a proper se stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and separators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out	Firm has submitted stability data in a proper sequence.
33	submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: • Reference of previous approval of applications with stability study data of the firm (if any) • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin • Documents for the procurement of APl with approval from DRAP (in case of import). • Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of both stability chambers	Firm has submitted response against the 6 points checklist as per CTD guidance document.

Decision: Deferred for following observations:

- **Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.**
- **Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.**
- **Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary**

standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of hese pellets or any other source of reference standard manufacturing.

- **Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established**
- **Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.**
- **Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard**

85.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Nawan Laboratories (Pvt) Ltd, 136, Sector 15, Korangi Industrial Area, Karachi**

	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) The firm has submitted copy of agreement between M/s Nawan Laboratories (Pvt) Ltd and M/s Bio-Labs (Pvt.) Ltd, Islamabad made on 21-01-2020.
	GMP status of the firm	**M/s Nawan laboratories:** The firm is granted GMP certificate based on inspection conducted on 01-02-2020. **M/s Bio-Labs:** The firm is granted GMP certificate based on inspection conducted on 23-04-2019.
	Evidence of approval of manufacturing facility	The manufacturer has provided Lyophilized vial (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 6957: 02-03-2021
	Details of fee submitted	PKR 50,000/-: 15-02-2021
	The proposed proprietary name / brand name	Oltrix Injection 40mg IV
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Omeprazole sodium eq. to Omeprazole…….40mg
	Pharmaceutical form of applied drug	Lyophilized Powder for injection
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Omeprazole powder for solution for infusion of M/s Sandoz Novartis (MHRA approved)
	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd., Plot no A-619 & 630, Rico Industrial Area Bhiwadi-301019 Rajasthan, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The firm has submitted stability study data of 6 months accelerated and 36 months real time data of 3 batches of API as per Zone-IV A.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications,

		reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of their developed formulation Delka 40mg IV Injection (B # L 289) with comparator product Risek 40mg Injection IV (B # 788P06) of M/s GETZ Pharma, Karachi. Quality tests of both products including description, identification, pH, assay, Sterility and bacterial endotoxins were performed and compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted

3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of Omeprazole sodium.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of product submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

S.#	Observations communicated	Response by the firm
1.	Provide results of analysis of relevant batch(es) of Drug Substance used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	The firm has submitted that API lot used in stability studies procured from Rajasthan Antibiotics while provided DMF was from Metrochem. We are submitting DMF from Rajasthan antibiotics and COAs accordingly.
2.	Details of applicant batch number and comparator product batch number used for pharmaceutical equivalence studies are required.	Revised pharmaceutical equivalence report has been submitted.
3.	Data of commercial batches with different batch numbers was given in process validation reports, batch analysis of finished product and stability studies.	We do not perform process validation on all manufactured batches. We performed stability study and process validation on different batches however we are submitting revised batch analysis of stability batches.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator product should be submitted and discussed as per requirements of section 3.2.P.2.	The firm has submitted we used market leader product (Risek 40mg Injection) of GETZ pharma which was approved by DRAP.
5.	Justification is required for using UV spectrophotometric method in place of HPLC method for assay testing of Delka 40mg Injection IV.	The firm has submitted that since product is of in-house specifications and in-house validated method is applied for testing which is UV-visible spectrophotometer. Validation of analytical method is provided in module 3.
6.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Response not submitted against this point.
7.	Evidence of procurement of drug substance with approval from DRAP is required.	Response not submitted against this point.

Decision of 313th meeting of Registration Board:

Deferred for following submissions:

- Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized omeprazole sodium from M/s Rajasthan Antibiotics, India.
- Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.

- Approval of API/ DML/GMP certificate of API manufacturer (Rajasthan antibiotics) issued by concerned regulatory authority of country of origin.
- Evidence of procurement of drug substance with approval from DRAP.

Response by the firm:
Firm has submitted stability study data of newly manufactured batches in which firm has procured sterile non-lyophilized drug substance from the same source and have performed lyophilisation after vial filling in Bio-Labs. Firm has also submitted copy of BMR of three stability batches.
Firm has also revised its specifications and adopted HPLC method for assay testing of the drug product.
Firm has also submitted record of stability data including HPLC testing.
However, firm has not submitted any fee for revision of data of stability study batches.
The details of the newly submitted stability batches are as under:

STABILITY STUDY DATA

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has refered to their previous inspection of M/s Bio-Labs conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet which was considered by the Board in its 296th meeting and the product was approved based on the inspection report. Following points were noted during the inspection: • All the stability study of EMPAGLIF (10mg &

		25mg) Tablets has been conduct on Shimadzu HPLC (Model SPD-20) operated via LABSOLUTION software version 6.5 (complying FDA 21 CFR part 11) • Audit trail reports for Testing of Empaglif 10mg & 25mg Tablets are available. • Proper and continuous monitoring record for stability chamber is available, along with 5KV backup generator with ATS.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (2020/1961) issued by Drug Control Organization, Government of Rajasthan dated 09-12-2020 and was valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice and clearance certificate issued by AD (I&E) specifying import of 15kg Omeprazole sodium sterile (Batch number AOSS18021) dated 01-06-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

- The firm has submitted GMP certificate for drug substance manufacturer issued on 10-03-2022 by the Drug Controller Rajhastan.

Registration Board in its 293rd meeting on basis of capacity assessment inspection, decided to allow contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Plot No.145 Industrial Triangle, Kahuta Road, Islamabad for following sections:

- Dry Suspension (Cephalosporin)
- Capsule (Cephalosporin)
- Dry vial injectable (Cephalosporin)
- Lyophilized vial injectable (General)

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** **Registration letter will be issued upon submission of following:** • **Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.** • **Fee of Rs. 75,000/- for pre-approval change in stability studies data as per Notification No. 7-11/2012-B&A dated 07.05.2021.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The firm has submitted stability study data of 6 months accelerated and 36 months real time data of 3 batches of API as per Zone-IV A.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of their developed formulation Delka 40mg IV Injection (B # L 289) with comparator product Risek 40mg Injection IV (B # 788P06) of M/s GETZ Pharma, Karachi. Quality tests of both products including description, identification, pH, assay, Sterility and bacterial endotoxins were performed and compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of Omeprazole sodium.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of product submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

S.#	Observations communicated	Response by the firm
1.	Provide results of analysis of relevant batch(es) of Drug Substance used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	The firm has submitted that API lot used in stability studies procured from Rajasthan Antibiotics while provided DMF was from Metrochem. We are submitting DMF from Rajasthan antibiotics and COAs accordingly.
2.	Details of applicant batch number and comparator product batch number used for pharmaceutical equivalence studies are required.	Revised pharmaceutical equivalence report has been submitted.

3.	Data of commercial batches with different batch numbers was given in process validation reports, batch analysis of finished product and stability studies.	We do not perform process validation on all manufactured batches. We performed stability study and process validation on different batches however we are submitting revised batch analysis of stability batches.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator product should be submitted and discussed as per requirements of section 3.2.P.2.	The firm has submitted we used market leader product (Risek 40mg Injection) of GETZ pharma which was approved by DRAP.
5.	Justification is required for using UV spectrophotometric method in place of HPLC method for assay testing of Delka 40mg Injection IV.	The firm has submitted that since product is of in-house specifications and in-house validated method is applied for testing which is UV-visible spectrophotometer. Validation of analytical method is provided in module 3.
6.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Response not submitted against this point.
7.	Evidence of procurement of drug substance with approval from DRAP is required.	Response not submitted against this point.

Decision of 313th meeting of Registration Board:

Deferred for following submissions:

- Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized omeprazole sodium from M/s Rajasthan Antibiotics, India.
- Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.
- Approval of API/ DML/GMP certificate of API manufacturer (Rajasthan antibiotics) issued by concerned regulatory authority of country of origin.
- Evidence of procurement of drug substance with approval from DRAP.

Response by the firm:

Firm has submitted stability study data of newly manufactured batches in which firm has procured sterile non-lyophilized drug substance from the same source and have performed lyophilisation after vial filling in Bio-Labs. Firm has also submitted copy of BMR of three stability batches.
Firm has also revised its specifications and adopted HPLC method for assay testing of the drug product.
Firm has also submitted record of stability data including HPLC testing.
However, firm has not submitted any fee for revision of data of stability study batches.
The details of the newly submitted stability batches are as under:

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has refered to their previous inspection of M/s Bio-Labs conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet which was considered by the Board in its 296th meeting and the product was approved based on the inspection report. Following points were noted during the inspection: • All the stability study of EMPAGLIF (10mg & 25mg) Tablets has been conduct on Shimadzu HPLC (Model SPD-20) operated via LABSOLUTION software version 6.5 (complying FDA 21 CFR part 11) • Audit trail reports for Testing of Empaglif 10mg & 25mg Tablets are available. • Proper and continuous monitoring record for stability chamber is available, along with 5KV backup generator with ATS.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (2020/1961) issued by Drug Control Organization, Government of Rajasthan dated 09-12-2020 and was valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice and clearance certificate issued by AD (I&E) specifying import of 15kg Omeprazole sodium sterile (Batch number AOSS18021) dated 01-06-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	NA

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

Registration Board in its 293rd meeting on basis of capacity assessment inspection, decided to allow contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Plot No.145 Industrial Triangle, Kahuta Road, Islamabad for following sections:

- Dry Suspension (Cephalosporin)
- Capsule (Cephalosporin)
- Dry vial injectable (Cephalosporin)
- Lyophilized vial injectable (General)

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.**
- **Fee of Rs. 75,000/- for pre-approval changein stabilitystudies data as per Notification No. 7-11/2012-B&A dated 07.05.2021.**

87.	Name, address of Applicant / Marketing Authorization Holder	M/s Bio-Next Pharmaceuticals., Plot No. 50, Street No. S-10, RCCI, Rawat
	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt.) Ltd., Plot # 145 Industrial Triangles, kahuta Road, Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) The firm has submitted copy of agreement between M/s Islam Pharmaceuticals and M/s Bio-Labs (Pvt.) Ltd, Islamabad made on 21-01-2020.
	GMP status of the firm	**M/s Bio-Next Pharmaceuticals:** The firm is granted GMP certificate based on inspection conducted on 01-02-2020. **M/s Bio-Labs Pvt Ltd:** The firm is granted GMP certificate based on inspection conducted on 23-04-2019.
	Evidence of approval of manufacturing facility	The manufacturer has provided Lyophilized vial (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7097: 03-03-2021
	Details of fee submitted	PKR 50,000/-: 19-11-2020
	The proposed proprietary name / brand name	**Omepranext Injection 40mg IV**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Omeprazole sodium eq. to Omeprazole…….40mg
	Pharmaceutical form of applied drug	Lyophilized Powder for injection
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole powder for solution for infusion of M/s Sandoza Novartis (MHRA approved)
	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd., Plot no A-619 & 630, Rico Industrial Area Bhiwadi-301019 Rajasthan, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The firm has submitted stability study data of 6 months accelerated and 36 months real time data of 3 batches of API as per Zone-IV A.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control

		of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of their developed formulation Delka 40mg IV Injection (B # L 289) with comparator product Risek 40mg Injection IV (B # 788P06) of M/s GETZ Pharma, Karachi. Quality tests of both products including description, identification, pH, assay, Sterility and bacterial endotoxins were performed and compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

STABILITY STUDY DATA

Manufacturer of API	M/s Rajasthan Antibiotics Ltd., Plot no A-619 & 630, RICO Industrial Area Bhiwadi-301019 Rajasthan, India

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	--
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s Metrochem API (Pvt) Ltd, India issued by Food & Drugs administration, Maharashtra state, India. The certificate is valid till 13 April, 2023.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of Omeprazole sodium.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of product submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time & accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Sr.#	Observations communicated	Response by the firm
1.	Provide results of analysis of relevant batch(es) of Drug Substance used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	The firm has submitted that API lot used i studies procured from Rajasthan Antibiot provided DMF was from Metrochem. submitting DMF from Rajasthan antibi COAs accordingly.
2.	Details of applicant batch number and comparator product batch number used for pharmaceutical equivalence studies are required.	Revised pharmaceutical equivalence repor submitted.
3.	Data of commercial batches with different batch numbers was given in process validation reports, batch analysis of finished product and stability studies.	We do not perform process validatio manufactured batches. We performed stabi and process validation on different batches we are submitting revised batch analysis o batches.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator product should be submitted and discussed as per requirements of section 3.2.P.2.	The firm has submitted we used mark product (Risek 40mg Injection) of GET which was approved by DRAP.
5.	Justification is required for using UV spectrophotometric method in place of HPLC method for assay testing of Delka 40mg Injection IV.	The firm has submitted that since produc house specifications and in-house validate is applied for testing which is U spectrophotometer. Validation of analytica is provided in module 3.
6.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Response not submitted against this point.
7.	Evidence of procurement of drug substance with approval from DRAP is required.	Response not submitted against this point.

Decision of 313th meeting of Registration Board:

Deferred for following submissions:

- Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized omeprazole sodium from M/s Rajasthan Antibiotics, India.
- Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.
- Approval of API/ DML/GMP certificate of API manufacturer (Rajasthan antibiotics) issued by concerned regulatory authority of country of origin.
- Evidence of procurement of drug substance with approval from DRAP.

Response by the firm:

Firm has submitted stability study data of newly manufactured batches in which firm has procured sterile non-lyophilized drug substance from the same source and have performed lyophilisation after vial filling in Bio-Labs. Firm has also submitted copy of BMR of three stability batches.
Firm has also revised its specifications and adopted HPLC method for assay testing of the drug product.
Firm has also submitted record of stability data including HPLC testing.
However, firm has not submitted any fee for revision of data of stability study batches.
The details of the newly submitted stability batches are as under:

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has refered to their previous inspection of M/s Bio-Labs conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet which was considered by the Board in its 296th meeting and the product was approved based on the inspection report. Following points were noted during the inspection: • All the stability study of EMPAGLIF (10mg & 25mg) Tablets has been conduct on Shimadzu HPLC (Model SPD-20) operated via LABSOLUTION

		software version 6.5 (complying FDA 21 CFR part 11) • Audit trail reports for Testing of Empaglif 10mg & 25mg Tablets are available. • Proper and continuous monitoring record for stability chamber is available, along with 5KV backup generator with ATS.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (2020/1961) issued by Drug Control Organization, Government of Rajasthan dated 09-12-2020 and was valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice and clearance certificate issued by AD (I&E) specifying import of 15kg Omeprazole sodium sterile (Batch number AOSS18021) dated 01-06-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

- The firm has submitted GMP certificate for drug substance manufacturer issued on 10-03-2022 by the Drug Controller Rajhastan.

Registration Board in its 293rd meeting on basis of capacity assessment inspection, decided to allow contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Plot No.145 Industrial Triangle, Kahuta Road, Islamabad for following sections:

- Dry Suspension (Cephalosporin)
- Capsule (Cephalosporin)
- Dry vial injectable (Cephalosporin)
- Lyophilized vial injectable (General)

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued upon submission of following:

- **Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.**

• **Fee of Rs. 75,000/- for pre-approval changein stabilitystudies data as per Notification No. 7-11/2012-B&A dated 07.05.2021.**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

S.#	Observations communicated	Response by the firm
1.	Provide results of analysis of relevant batch(es) of Drug Substance used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	The firm has submitted that API lot used in stability studies procured from Rajasthan Antibiotics while provided DMF was from Metrochem. We are submitting DMF from Rajasthan antibiotics and COAs accordingly.
2.	Details of applicant batch number and comparator product batch number used for pharmaceutical equivalence studies are required.	Revised pharmaceutical equivalence report has been submitted.
3.	Data of commercial batches with different batch numbers was given in process validation reports, batch analysis of finished product and stability studies.	We do not perform process validation on all manufactured batches. We performed stability study and process validation on different batches however we are submitting revised batch analysis of stability batches.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator product should be submitted and discussed as per requirements of section 3.2.P.2.	The firm has submitted we used market leader product (Risek 40mg Injection) of GETZ pharma which was approved by DRAP.
5.	Justification is required for using UV spectrophotometric method in place of HPLC method for assay testing of Delka 40mg Injection IV.	The firm has submitted that since product is of in-house specifications and in-house validated method is applied for testing which is UV-visible spectrophotometer. Validation of analytical method is provided in module 3.
6.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Response not submitted against this point.
7.	Evidence of procurement of drug substance with approval from DRAP is required.	Response not submitted against this point.

Decision of 313th meeting of Registration Board:

Deferred for following submissions:

- Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized omeprazole sodium from M/s Rajasthan Antibiotics, India.

- Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.
- Approval of API/ DML/GMP certificate of API manufacturer (Rajasthan antibiotics) issued by concerned regulatory authority of country of origin.
- Evidence of procurement of drug substance with approval from DRAP.

Response by the firm:
Firm has submitted stability study data of newly manufactured batches in which firm has procured sterile non-lyophilized drug substance from the same source and have performed lyophilisation after vial filling in Bio-Labs. Firm has also submitted copy of BMR of three stability batches.
Firm has also revised its specifications and adopted HPLC method for assay testing of the drug product.
Firm has also submitted record of stability data including HPLC testing.
However, firm has not submitted any fee for revision of data of stability study batches.
The details of the newly submitted stability batches are as under:

	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd., Plot no A-619 & 630, Rico Industrial Area Bhiwadi-301019 Rajasthan, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

		The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The firm has submitted stability study data of 6 months accelerated and 36 months real time data of 3 batches of API as per Zone-IV A.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of their developed formulation Delka 40mg IV Injection (B # L 289) with comparator product Risek 40mg Injection IV (B # 788P06) of M/s GETZ Pharma, Karachi. Quality tests of both products including description, identification, pH, assay, Sterility and bacterial endotoxins were performed and compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Rajasthan Antibiotics Ltd., Plot no A-619 & 630, Rico Industrial Area Bhiwadi-301019 Rajesthan, India		
API Lot No.	AOSS19032		
Description of Pack (Container closure system)	Glass vial		
Stability Storage Condition	Real Time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Delka 40mg IV Injection			
Batch No.	L-140	L-163	L-197
Batch Size	25000 vials	20,000 vials	15,000 vials
Manufacturing Date	03-2018	06-2018	11-2018
Date of Initiation	10-03-2018	15-06-2018	13-12-2018
No. of Batches	03		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of M/s Metrochem API (Pvt) Ltd, India issued by Food & Drugs administration, Maharashtra state, India. The certificate is valid till 13 April, 2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of Omeprazole sodium.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Audit trail on testing reports of product submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

S.#	Observations communicated	Response by the firm
1.	Provide results of analysis of relevant batch(es) of Drug Substance used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer.	The firm has submitted that API lot used i studies procured from Rajasthan Antibiot provided DMF was from Metrochem. submitting DMF from Rajasthan antibi COAs accordingly.

2.	Details of applicant batch number and comparator product batch number used for pharmaceutical equivalence studies are required.	Revised pharmaceutical equivalence report has been submitted.
3.	Data of commercial batches with different batch numbers was given in process validation reports, batch analysis of finished product and stability studies.	We do not perform process validation on all manufactured batches. We performed stability study and process validation on different batches however we are submitting revised batch analysis of stability batches.
4.	Pharmaceutical equivalence of the applied drug shall be established with the innovator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator product should be submitted and discussed as per requirements of section 3.2.P.2.	The firm has submitted we used market leader product (Risek 40mg Injection) of GETZ pharma which was approved by DRAP.
5.	Justification is required for using UV spectrophotometric method in place of HPLC method for assay testing of Delka 40mg Injection IV.	The firm has submitted that since product is of in-house specifications and in-house validated method is applied for testing which is UV-visible spectrophotometer. Validation of analytical method is provided in module 3.
6.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Response not submitted against this point.
7.	Evidence of procurement of drug substance with approval from DRAP is required.	Response not submitted against this point.

Decision of 313th meeting of Registration Board:

Deferred for following submissions:

- Scientific justification of manufacturing of applied formulation by way of lyophilization using pre-lyophilized omeprazole sodium from M/s Rajasthan Antibiotics, India.
- Justification of adopting UV-visible spectrophotometric method for assay testing of applied formulation.
- Approval of API/ DML/GMP certificate of API manufacturer (Rajasthan antibiotics) issued by concerned regulatory authority of country of origin.
- Evidence of procurement of drug substance with approval from DRAP.

Response by the firm:

Firm has submitted stability study data of newly manufactured batches in which firm has procured sterile non-lyophilized drug substance from the same source and have performed lyophilisation after vial filling in Bio-Labs. Firm has also submitted copy of BMR of three stability batches.
Firm has also revised its specifications and adopted HPLC method for assay testing of the drug product.
Firm has also submitted record of stability data including HPLC testing.
However, firm has not submitted any fee for revision of data of stability study batches.
The details of the newly submitted stability batches are as under:

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has refered to their previous inspection of M/s Bio-Labs conducted for Empaglif 10mg Tablet (Empagliflozin) & Empaglif 25mg Tablet which was considered by the Board in its 296th meeting and the product was approved based on the inspection report. Following points were noted during the inspection: • All the stability study of EMPAGLIF (10mg & 25mg) Tablets has been conduct on Shimadzu HPLC (Model SPD-20) operated via LABSOLUTION software version 6.5 (complying FDA 21 CFR part 11) • Audit trail reports for Testing of Empaglif 10mg & 25mg Tablets are available. • Proper and continuous monitoring record for stability chamber is available, along with 5KV backup generator with ATS.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (2020/1961) issued by Drug Control Organization, Government of Rajasthan dated 09-12-2020 and was valid till 26-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice and clearance certificate issued by AD (I&E) specifying import of 15kg Omeprazole sodium sterile (Batch number AOSS18021) dated 01-06-2019.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of evaluator:

- The firm has submitted GMP certificate for drug substance manufacturer issued on 10-03-2022 by the Drug Controller Rajhastan.

Registration Board in its 293rd meeting on basis of capacity assessment inspection, decided to allow contract manufacturing from M/s Bio-Labs (Pvt) Ltd. Plot No.145 Industrial Triangle, Kahuta Road, Islamabad for following sections:

- Dry Suspension (Cephalosporin)
- Capsule (Cephalosporin)
- Dry vial injectable (Cephalosporin)

• Lyophilized vial injectable (General)		
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** **Registration letter will be issued upon submission of following:** • **Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.** • **Fee of Rs. 75,000/- for pre-approval changein stabilitystudies data as per Notification No. 7-11/2012-B&A dated 07.05.2021.**		
90.	Name, address of Applicant / Marketing Authorization Holder	M/s Novartana Pharmaceuticals Pvt Ltd. Plot No. 87-B, Sundar Industrial Estate, Lahore
	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt.) Ltd., Plot # 145 Industrial Triangles, kahuta Road, Islamabad.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) The firm has submitted copy of agreement between M/s Islam Pharmaceuticals and M/s Bio-Labs (Pvt.) Ltd, Islamabad made on 21-01-2020.
	GMP status of the firm	**M/s Novartana Pharmaceuticals:** The firm is granted GMP certificate **M/s Bio-Labs Pvt Ltd:** The firm is granted GMP certificate based on inspection conducted on 23-04-2019.
	Evidence of approval of manufacturing facility	The manufacturer has provided Lyophilized vial (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13166: 18-05-2021

	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Omeprazole powder for solution for infusion of M/s Sandoza Novartis (MHRA approved)
	For generic drugs (me-too status)	Risek Injection 40mg of M/s Getz Pharma Pakistan
	Name and address of API manufacturer.	M/s Rajasthan Antibiotics Ltd., Plot no A-619 & 630, Rico Industrial Area Bhiwadi-301019 Rajasthan, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, Characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module-III Drug Substance:	The firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The firm has submitted stability study data of 6 months accelerated and 36 months real time data of 3 batches of API as per Zone-IV A.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols and report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or

		materials, container closure system and stability.
	Pharmaceutical Equivalence	The firm has performed pharmaceutical equivalence of their developed formulation Delka 40mg IV Injection (B # L 289) with comparator product Risek 40mg Injection IV (B # 788P06) of M/s GETZ Pharma, Karachi. Quality tests of both products including description, identification, pH, assay, Sterility and bacterial endotoxins were performed and compared.
	Analytical method validation/verification of product	Firm has submitted analytical method validation report of drug substance. Firm has submitted analytical method validation report of applied product.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT	
Documents To Be Provided	**Status**
Certificate of analysis of API.	Yes
Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate for M/s Industriale Chimica s.r.l., Via E. H. Grieg 13 – SARONNO (VA), Italy issued by AIFA, Italy valid upto 20-10-2020.
Protocols followed for conduction of stability	Yes

study and details of tests.	
Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
Documents confirming import of API etc.	**Budesonide micronized**: The firm has submitted copy of invoice for the purchase of Budesonide (175gm), attested by Assistant Director (I & E) DRAP, Karachi dated 05-10-2016 has been submitted. **Formoterol Fumarate dihydrate micronized:** The firm has submitted copy of invoice for the purchase of Formoterol fumarate micronized (2.00gm), attested by Assistant Director (I & E) DRAP, Karachi dated 05-10-2016 has been submitted.
All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
Commitment to continue real time stability study till assigned shelf life of the product.	Yes
Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

- The firm has submitted 06 months Accelerated and 06 months Real Time Stability Data for 03 Batches.

Sr. No.	Observations	Response of the firm
•	The submitted GMP certificate mentions name of API manufacturer as M/s Industriale Chimica s.r.l., via E. H. Grieg 13 – Saronno (VA), Italy while that mentioned on COA and invoice are M/s CHEMO S.A., Lugano Branch, Via F. Pelli 17, P.O. Bo, 6901, Lugano, Switzerland. Clarification is required.	The firm has submitted that both APIs are manufactured by Industriale Chimica s.r.l., vial E.H Grieg 13- Saronno (VA), Italy and also mentioned in COA. Whereas chemo serves as the supplier of both the APIs.
•	GMP certificate submitted is issued by *Directorate General for Animal Health and Veterinary Medicinal Products* while applied formulation is for human use. Clarification needs to be submitted in this regard.	The firm has submitted copy of GMP certificate for issued by AIFA, Italy valid till 20-10-2020.
•	Details of stability studies indicate that you have not performed tests of Aerodynamic particle size and uniformity of delivered dose required for Dry Powder inhalers (DPIs) as per decision of 290th meeting of Registration Board. Clarification/ justification is required.	The firm has submitted that we had initiated stability studies for our stability batches SB01, SB02 and SB03 on 1st October 2018. Prior to the board guidance on the DPI we were performing the content uniformity test only. Once the guidance was issued in DRB 290 held in July 2019 we performed DDU on month 9, 12, 18 and 24 and APSD on month 12, 18 and 24 on stability batches placed on ambient conditions. Additionally, we are working on conducting comparative studies of our product with innovator brand "Symbicort". Since we are in process of procuring the innovator product alongwith other items necessary to conduct comparative study at the time of stability audit.

		Proof of equipment to perform DDU and APSD tests by virtue of FID report is attached.
•	Performance of the test of content uniformity in addition to the test of DDU needs to be submitted.	The firm has submitted results of content uniformity tests.
•	Submit the label claim for "Target Delivery Dose" based upon the studies with the intended delivery system under defined test conditions.	The firm submitted label claim of Target delivery dose without performance of test.
•	Description of the delivery device (inhaler) intended to be marketed along with the applied formulation shall be submitted.	The firm replied that, "The said application is for the registration of DPI capsules only. We don't market any delivery device with the product. In order to make it convenient for ailing masses of Pakistan, we make the product compatible with most of the delivery devices available in Pakistan by extensive testing before commercial release of the product. The firm has now submitted that we are using a DPI device also known as "ROBUST-H03" manufactured by Rizwan associate. Product code: *HALER-H03*
•	Submitted finished product specifications declare the assay limits as 90% - 120% of label claim for both APIs. Justification should be submitted in this regard.	The firm submitted that the stated product is not a pharmacopoeial product and therefore the assay limit (80%-120%) is set according to the other pharmacopoeial product which are mentioned in BP. The limits of Budesonide and Formoterol for APSD were computed as per the limits provided in the USP for Fluticasone + Salmeterol inhalation powder. No other guidance was available in any general chapter.
•	Analytical record for the test of Uniformity of delivered dose, Aerodynamic particle size distribution and foreign particulate matter has not been submitted.	The firm has submitted that tests for uniformity of delivered dose and aerodynamic particle size distribution has been performed and all were submitted.
•	Submitted specifications does not include test for Particle size distribution since reference product literature states that the particle size distribution is crucial to achieving the required delivered dose and lung deposition characteristics.	Performance of APSD provides details of particle size distribution as per CQA developed in house. Also, the active pharmaceutical ingredients used have particle size in the range required for DPI products. Details of particle size for the active used is given below: **Budesonide:** Particle size **Test: D99 (Indicates 99% of particle size)** Specification: Not more than 5 µm Result: 3.49 µm (indicates 99% of particles are less than 3.49 µm. **Test: D90 (Indicates 99% of particle size)** Specification: Not more than 2.8 µm Result: 2.25 µm (indicates 90% of particles are less than 2.25 µm. **Formoterol:** Particle size Test: D90 (Indicates 90% of particle size) Specification: Not more than 4.3 µm

		Result: 3.0 µm (indicates 90% of particles are less than 3.0 µm. **Test: D50 (Indicates 50% of particle size)** Specification: Not more than 2.3 µm Result: 1.6 µm (indicates 50% of particles are less than 1.6 µm). **Test: D10 (Indicates 10% of particle size)** Specification: Not more than 1.0 µm Result: 0.8 µm (indicates 10% of particles are less than 0.8 µm).

- The case was processed for panel inspection for product specific inspection, however till date no inspection report has been received.

Further submission by the firm:

The firm in its response vide Dy no. 2853 dated 05-10-2022 has submitted that they got inspection letter on 04-11-2021 and that the inspection was conducted on 01-12-2021 and the panel guided us to manufacture new batches using high shear mixer and again perform stability studies and submit to DRAP. However, no inspection report is received in PEC.

Firm has submitted stability study data of newly manufactured batches and the product specific inspection report is not yet received. The detailed summary of newly submitted data is as under:

STABILITY STUDY DATA

14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator:

- Firm has submitted tests of delivered dose uniformity and aerodynamic particle size distribution apart from other routine tests as per specifications during stability studies.
- Firm has not submitted the details of the device used with the DPIs.
- Firm has not submitted stability data of both APIs
- The GMP certificate of budesonide is not valid.

Decision: Approved with Innovator's specifications.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided that following details of "Accompanyiing Delivery device" shall be declared on registration letter:**

  "Device Name: ROBUST-H03
  Model No: HALER-H03
  Manufacturer: Rizwan Associate".

Registration letter will be issued upon submission of following:

- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**
- **Evidence of availability of separate dispensing booth for steroidal formulations,**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

#	Documents To Be Provided	Status
1.	COA of API	Firm has submitted COA of nepafenac Batch # 161101 manufactured by Jinan Kehui Pharmaceutical Sci & Tech Co. Ltd.
2.	Approval of API by regulatory authority of country of origin or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	**Submitted GMP certificate is in Chinese language**
3.	Protocols followed for conduction of stability study and details of tests.	Yes
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	Firm has submitted ADC commercial invoice provided by Hangzhou Rainbow Import and Export Co. Ltd. The invoice was cleared on 14-12-2017.
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	Yes
8.	Commitment to follow Drug Specification Rules, 1978.	Yes

REMARKS OF EVALUATOR

After initial evaluation firm was communicated with shortcomings on 24-4-2018, the response of the firm was received, which is still deficient for following observations.

Shortcomings communicated to the firm after evaluation	Reply of the firm
• Master formulation and method of manufacturing required to be submitted for verification of stability studies.	Firm has submitted master formulation without any overage. The amount of nepafenac added is exactly as per the label claim i.e. 3mg/ml.
• GMP Certificate issued by relevant reference regulatory authority of the country / state of origin as per the decision of Registration Board in its 274th meeting, since the submitted GMP certificate is in Chinese language instead of English.	Firm has submitted that they have requested the API manufacturer to provide GMP certificate.
• The assay values above 100% at accelerated and real time conditions for all the three batches need scientific justification.	Firm has submitted that their **in-house** specification for assay has limit 90-110%, overage is added to compensate the process loss and to maintain the product quality during shelf life. **While addressing to point 1, the master formulation submitted by the firm do not contain any overage.**
• Specify the density of the product, which is also used in calculation of assay results.	Firm has submitted that the density of the product is calculated as 1.0401 g/ml.
• Justify the manufacturing of stability batches on 15-08-2017, 16-08-2017 and 18-09-2017 while the API was cleared by ADC on 14-12-2017.	Firm has submitted copy of ADC attested invoice of batch 161101 which was cleared on 3-3-2017. Firm has submitted that they have used this batch of API for manufacturing of all the three batches.
Justify the complete stability data of Batch RD-17163, since this batch was manufactured on 18-9-2017 and the stability was initiated on 26-9-2017. Justify the submission of 6th month stability data on 2nd April 2018.	Firm has submitted that the analytical work was started on 02-04-2018, although the six month interval was completed on 26-3-2018. The analytical work was delayed by one week due to work load in QC and this delay has no impact on quality of the stability testing. **As per the submission of firm, the analytical work was started on 02-04-2018 and the firm has submitted result of all analysis (including sterility test) conducted in Lahore, on the same day in DRAP office Islamabad. Furthermore Firm has specified BP specifications for sterility testing in their "finished product specification" which specify 14 days for the samples to be kept for stability testing.**

Decision of 284th meeting of Registration Board:

Registration Board deferred the case for following submission:

- Justification and scientific rational regarding the assay values above 100% in all batches at accelerated and real time conditions while the master formulation do not contains any overage.
- Submission of GMP Certificate of the API manufacturer issued by relevant (i.e. provincial or federal) reference regulatory authority of China.
- Justification of submission of complete stability study data along with analytical results (including sterility test) on 02-04-2018, since the analytical work including stability test of Batch RD-17163 was also initiated on the same day i.e. 02-04-2018 and the firm has specified BP specifications for sterility testing in their "finished product specification" which specify 14 days for the samples to be kept for stability testing.

Submission by the firm:

Firm has submitted stability study data of newly manufactured batches. The detailed summary of newly submitted data is as under:

STABILITY STUDY DATA

Manufacturer of API	M/s Pioneer Agro Industries, Plot No. 8, 6, 7, 20, MIDC Industrial Area, Post Kulgaon, Badlapur District, Thane, Maharashtra State India.

REMARKS OF EVALUATOR

Shortcoming communicated	Response received by the firm
Justify the acceptance criteria of dissolution test i.e. NLT 75% after 30 minutes without defining the value of "Q" since the value of Q at level S1 is defined between 75 to 80 in various guidance documents of EDQM, FDA guidance documents and USP and the overall acceptance criteria for level S1 is set as Q+5.	Firm has submitted that we have set the dissolution specification NLT 75% as per USFDA and USP general chapter 1092. As per the revised specifications provided by the firm the value of "Q" is 75% and the overall acceptance criteria at S1 level is NLT 80% in 30 minutes.
Justify the difference in initial testing conducted at 23-01-2018 and initiation of stability studies at 26-04-2018.	Firm has submitted that *"the initial testing of edoxaban was carried out on 23-01-2018 and then initial testing report was provided to product development department, but delayed due to delay in blistering of this product due to other priority products"* **The firm has performed initial testing on 23-01-2018 and the samples were placed in stability chambers on 26-04-2018, the impact of delay in initiation of stability studies on the outcomes of stability results needs to be determined.**
Provide the detail of quantities of API used in the development and testing of Doxab 15, 30 and 60mg strengths, since the same material (imported vide invoice No. ZY16050503G/W) has been used for the development of all strengths of Doxab.	Firm has submitted material stock record for edoxaban which specifis that 28.865gm API is still remaining. **According to the submitted stock record, the manufacturer of API is Suzhou Biotechnology Co. Ltd, while as per the rest of documents API manufacturer is Jiangsu Yongan Pharmaceutical Co. Ltd**
Justify the finished product specification without the test for content uniformity	Firm has submitted that they are not performing content uniformity test on new drug product at initial stage but after getting registration from DRAP after inspection on commercial batches we include the test of content uniformity as per guidelines.

Decision of 291st meeting of Registration Board:

Deferred for following:

- Scientific justification for initiation of stability studies 3 months after the initial testing of the applied product.
- Clarification since the manufacturer of API mentioned on submitted stock report is Suzhou Biotechnology Co. Ltd, while as per the rest of documents along with stability data the API manufacturer is Jiangsu Yongan Pharmaceutical Co. Ltd. China.

Response by the firm:

Sr. No	Reason for deferment	Response by the firm
1.	Scientific justification for initiation of stability studies 3 months after the initial testing of the applied product.	Product was manufactured on January, 2018, tested initially on January 2018 and blistered on April, 2018. Though there was a noticeable time period between the date of initial testing and date of 3rd month testing stability studies but it is important to mention here that even after considerable gap between initial testing and 3rd month testing of stability studies, product found to be compliance as per the defined specifications.

		Furthermore stability study results at both conditions i.e. long term and accelerated, are well within specification, showing that the product was properly stored and no effect was occurred due to this delay in stability testing initiation.
2.	Clarification since the manufacturer of API mentioned on submitted stock report is Suzhou Biotechnology Co. Ltd, while as per the rest of documents along with stability data the API manufacturer is Jiangsu Yongan Pharmaceutical Co. Ltd. China.	The API has been manufactured by Jiangsu Yongan Pharmaceutical Co. Ltd. may be confirmed by the submitted cGMP whereas Suzhou Biotechnology Co. Ltd. as an exporter of Edoxaban, declaration letter is also attached.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 04 Registration applications of Form-5 cases

a) New cases

	Me-too status	Razodex Capsule of Getz
	GMP status	Copy of last GMP inspection report dated 14/12/2020, Satisfactory level of GMP compliance.
	Remarks	Stability study data is required
	Decision: Deferred for submission of stability study data of three batches as per the guidelines and checklist approved by Registration Board in its 312th meeting.	
452.	Name and address of manufacturer / Applicant	M/s Medicon Pharmaceuticals Pvt Ltd. Industrial Estate, Jamrud Road, Peshawar, Pakistan
	Brand Name +Dosage Form + Strength	Dexazole 30mg Capsule
	Composition	Each Capsule Contains: Dexlansoprazole Dual Delayaed Release Pellets Eq To Dexlansoprazole…30mg
	Diary No. Date of R& I & fee	Dy.No 13465 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	PPI
	Type of Form	Form 5
	Finished Product Specification	Firm has claimed in house specification
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	USFDA Approved
	Me-too status	Razodex Capsule of Getz
	GMP status	Copy of last GMP inspection report dated 14/12/2020, Satisfactory level of GMP compliance.
	Remarks	Stability study data is required
	Decision: Deferred for submission of stability study data of three batches as per the guidelines and checklist approved by Registration Board in its 312th meeting.	
453.	Name and address of manufacturer / Applicant	M/s Medicon Pharmaceuticals Pvt Ltd. Industrial Estate, Jamrud Road, Peshawar, Pakistan
	Brand Name +Dosage Form + Strength	Flumaxi 100mg Tablet
	Composition	Each Film Coated Tablet Contains: Fluvoxamine Maleate…100mg
	Diary No. Date of R& I & fee	Dy.No 13461 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	SSRIs
	Type of Form	Form-5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	MHRA Approved
	Me-too status	Meduxa 100mg Tablet by M/s Mediate Pharma (Reg. No. 61960)
	GMP status	Copy of last GMP inspection report dated 14/12/2020, Satisfactory level of GMP compliance.
	Decision: Approved.	
454.	Name and address of manufacturer / Applicant	M/s Medicon Pharmaceuticals Pvt Ltd. Industrial Estate, Jamrud Road, Peshawar, Pakistan
	Brand Name +Dosage Form + Strength	Qutamax 100mg Tablet
	Composition	Each Film Coated Tablet Contains: Quetiapine as Fumarate…100mg

	Diary No. Date of R& I & fee	Dy.No 13463 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	Antipsychotic
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	MHRA Approved
	Me-too status	Q-Par Tablet by Helix
	GMP status	Copy of last GMP inspection report dated 14/12/2020, Satisfactory level of GMP compliance.
	Decision: Approved.	
455.	Name and address of manufacturer / Applicant	M/s Medicon Pharmaceuticals Pvt Ltd. Industrial Estate, Jamrud Road, Peshawar, Pakistan
	Brand Name +Dosage Form + Strength	Medisol Plus Tablet
	Composition	Each Film Coated Tablet Contains: Tramadol HCl…37.5mg Paracetamol…325mg
	Diary No. Date of R& I & fee	Dy.No 13462 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	Analgesic/antipyretic
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	as per SRO
	Approval status of product in Reference Regulatory Authorities.	Ultraset film coated tablet by M/s Janssen Pharms, USFDA Approved
	Me-too status	Tramal Plus tablet by M/s Searle Company limited, Reg No.77129
	GMP status	Copy of last GMP inspection report dated 14/12/2020, Satisfactory level of GMP compliance.
	Decision: Approved.	
456.	Name and address of manufacturer / Applicant	M/s Medicon Pharmaceuticals Pvt Ltd. Industrial Estate, Jamrud Road, Peshawar, Pakistan
	Brand Name +Dosage Form + Strength	Zolpicon 10mg Tablet
	Composition	Each Film Coated Tablet Contains: Zolpidem Tartrate…10mg
	Diary No. Date of R& I & fee	Dy.No 13466 dated 07-03-2019 Rs.20,000/- dated 07-03-2019
	Pharmacological Group	Benzodiazepine related drugs
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	MHRA Approved
	Me-too status	Stilnox Tablet by Sanofi Aventis
	GMP status	
	Remarks	Firm has submitted section approval letter no. F.3-7/91-Lic (Vol-II) dated 11-08-2015 for the Tablet (Psychotropic) section.
	Decision: Approved.	

Item No. 4: Agenda of Evaluator PEC-IV (Mst. Farzana Raja)

Case no. 01 Registration applications for local manufacturing of (Human) drugs Form 5F

a. New cases

457.	Name, address of Applicant / Marketing Authorization Holder	M/s W.WoodWard Pakistan(Pvt) Ltd F-275 S.I.T.E Karachi,Pakistan
	Name, address of Manufacturing site.	M/s W.WoodWard Pakistan(Pvt) Ltd F-275 S.I.T.E Karachi,Pakistan

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 8859: 18-03-2021
	Details of fee submitted	PKR 20,000/-: 30-06-2020
	The proposed proprietary name / brand name	Dapawood 10mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Tablet Contains: Dapagliflozin as Propanediol monohydrate……10mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Antidiabetics
	Reference to Finished product specifications	Manufacturer specifications
	Proposed Pack size	14's
	Proposed unit price	Rs:400/pack
	The status in reference regulatory authorities	FARXIGA of Bristol-MayersUSFDA approved
	For generic drugs (me-too status)	Dapa 10mg tablet of M/S Hilton Pharma (Reg # 089368)
	GMP status of the Finished product manufacturer	Last inspection conducted on 02-07-2020 and concludes that firm is found to be maintain at Good level of compliance
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceuticals Co.,Ltd Address:Fluoride Industrial Park, FumengCounty (Yi Ma Tu),Fuxin City, Liaoning Province, China
	Module-II (Quality Overall Summary)	Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of

		manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substances.
	Stability studies of Drug substance	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has performed comparative dissolution profile against the product i.e Dapa 10mg by M/s Hilton pharma Batch No# 132035, and the results are within acceptable limit
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, accuracy, precision, robustness, specificity.

STABILITY STUDY DATA			
Manufacturer of API	Fuxin Long Rui Pharmaceuticals Co.,Ltd Address: Fluoride Industrial Park, Fumeng County (Yi Ma Tu),Fuxin City, Liaoning Province, China		
API Lot No.	DG-20190116-D01-DG06-01		
Description of Pack (Container closure system)	Alu-Alu		
Stability Storage Condition	Real time : 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 9 months Accelerated: 6 months		
Frequency	Accelerated: 0,3, 6 (Months) Real Time: 0, 3, 6, 9 (Months)		
Batch No.	PD-155	PD-158	PD-159
Batch Size	700 Tablets	700 Tablets	700 Tablets
Manufacturing Date	04.2019	04.2019	04.2019
Date of Initiation	17-04-2019	17-04-2019	17-04-2019
No. of Batches	03		

Administrative Portion		
19.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
20.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of Drug manufacturing license (License no. Liao 20150233) for M/s Fuxin Long Rui Pharmaceutical Co. Ltd, Fluoride Industrial park, Fuxin City, Liaoning

		Province issued by Liaoning Food and Drug Administration of the People's Republic of China is submitted, valid upto 20-12-2022
21.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
22.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
23.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
24.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated
1.	1.3.4.	Valid Drug Manufacturing License (DML) of manufacturer / Applicant shall be submitted as submitted DML was valid up to 13-02-2021
2.	3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.
3.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer of drug substance(s) shall be submitted
4.	3.2. P.2.2.1	• Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed • As per relevant guidelines & structure of Form 5F, Comparative Dissolution profile shall be established with the innovator / reference / comparator product at the time of formulation development, while according to your submitted data, Comparative Dissolution profile have been performed after commencing stability studies.i.e 04-04-2020 Justification shall be submitted. • In CDP batch no of Dapawood tablet 10mg is PD145. Clarification is required in this regard.
5.	3.2.P.3.5	Submitted process validation protocol are general. Product related process validation protocol
6.	3.2.P.5.1	• Justify the dissolution acceptance criteria of value of Q = 80% in 30 min while the innovator product (Farxiga) has specified the dissolution specifications of NLT 85% in 15 min. • Submit dissolution testing data with specifications of "NLT Q within 15 minutes" at initial and one month time point at both accelerated and real time stability conditions for 2 batches.
7.	3.2.P.5.3	• As per relevant guidelines & structure of Form 5F Analytical test method validation has to be performed at the time of formulation development, while according to your submitted data, Analytical test method validation have been performed on 09-01-2020 while stability studies started on 17-04-2019. Justification shall be submitted in this regard.

		• Submit Analytical test method validation protocols
8.	3.2.P.5.4	Content uniformity not performed at initial testing of three batches
9.	3.2.P.6	Submitted COA of Reference standard shows Expiry date of 10-06-2017. Justification is required in this regard.
10.	3.2.P.8	Documents for the procurement of API with approval from DRAP (in case of import). In Dissolution testing on raw data sheets, date mentioned of 2017 and 2007 while batch No PD -155,PD -158 and PD-159 manufactured in 04.2019. Clarification is required.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

458.	Name, address of Applicant / Marketing Authorization Holder	M/s Novamed Pharmaceuticals(Pvt.)Ltd Lahore

Date of Initiation	29-09-2020	29-09-2020	29-09-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dapagliflozin:** Firm has submitted copy of GMP certificate No # JS2020921 of M/s Jiangsu Yongan Pharmaceutical Co. Ltd., China issued by Jiangsu Drugs Administration, China. The certificate is valid till 20-09-2025 **Metformin:** Copy of GMP certificate No. 20031933 issued by Food & Drug Control administration Gujrat state India valid till 19-03-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Dapagliflozin:** Firm has submitted copy of Commercial Invoice (Invoice #ZY20061201G/W) Dated: 12-06-2020 attested by DRAP Lahore office dated 16-06-2020 of Dapagliflozin (Batch# 7100-202006001). **Metformin:** Firm has submitted copy of Commercial Invoice (Invoice #2387/19-20-25) Dated: 25-12-2019 attested by DRAP Lahore office dated 08-01-2020 Metformin (Batch# MEF/19123234).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.S.4.4	Certificate of analysis of dapagliflozin Propanediol Monohydrate by drug substance manufacturer and drug product manufacturer are of different batch.	Certificate of analysis of the same batch of dapagliflozin Propanediol Monohydrate from both drug substance manufacturer and drug product manufacturer are submitted.
2.	3.2.P.5.4	Specifications for dissolution testing claimed in section 3.2.P.5.1 are NLT 80% (Q) in 30 minutes while in COA's it is mentioned as NLT 75% (Q)	There was a typo error in the dissolution specification in COA's of which has been amended. Revised COA's are attached.

		in 30 minutes. Clarification is required	
3.	3.2.P.8	Documents for the procurement of API with approval from DRAP.	Submitted.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate (Certificate No.INS-480019-0063-011) for M/s Fresenius Kabi Austria GmbH Estermannstraße 17 4020 Linz issued by Austria on the basis of Inspection conducted on 24-09-2018 and, valid for three Year.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Evaluation:

S.No	Section	Shortcomings Communicated
1.	1.1	In covering letter label claim is 33.5 gm. Clarification is required in this regard.
2.	1.5.2.	Strength of API is 3.35mg. Clarification is required in this regard.
3.	3.2.S.4	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer of drug substance before initiation of stability studies and manufacturing however you are performing after completion of 6 month of stability studies. Clarification is required.
4.	3.2.P.3	A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified shall be submitted by Drug product manufacturer.
5.	3.2.P.3.3	Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled , shall be submitted by Drug product manufacturer.
6.	3.2.P.5	Provide Evidence of RI detector
7.	3.2.P.5	As per relevant guidelines & structure of Form 5F Analytical test method validation has to be performed at the time of formulation development, while according to your submitted data, Analytical test method validation protocols has been approved after commencement of stability studies as well as Analytical test method validation have been performed on 29-10-2020 while stability studies started on 02-2020. Justification shall be submitted in this regard.
8.	3.2.P.8	• Documents for the procurement of API with approval from DRAP. • Stability initiation date mentioned is 02-2020 while initial testing conducted in march

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

No. of Batches	03		
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Calador 400mg/100ml Infusion which was conducted on 24-08-2021 and was presented in 312th meeting of Registration Board held on 14-16th September, 2021. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. The firm possesses stability chambers with digital data loggers.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP Certificate for Zhuhai Rundu Pharmaceutical Co., Ltd (Certificate#. HB20170363) issued by China Food and Drug Control Administration, valid upto 28-08-2022 is submitted	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 from & invoice (invoice# GIB19057275) cleared by DRAP Islamabad office dated 19-07-2019 specifying import 25Kg Ibuprofen (Batch# C100-190427M).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted	

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated
1.	1.1	Differential fee of Rs: 10000/-
2.	1.5.9	Evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form, with same container closure system in one of the reference regulatory authority specified by Registration Board.
3.	2.3.R.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
4.	2.3.R.2	Analytical Procedures and Validation Information for Drug Product does not match with details provided in 3.2.P. 5.3. Clarification is required.
5.	3.2.P.2.1.2	Firm claimed that excipients were selected for the development of Calador as used by USFDA innovator product, but excipients are different. Clarify
6.	3.2.P.2.2.1	Justification is required that Pharmaceutical Equivalence was established against comparator product instead of Innovator Product.
7.	3.2.P.3.3	Terminal sterilization mentioned for vials 121˚C 15 PSI for 15 minutes while in 3.2.P.2.5 LDPE ampoules are mentioned and autoclaved at 106 ˚C for 85 minutes. Clarification is required
8.	3.2.P.3.5	• In Process validation vials and LDPE Ampoules both are mentioned Clarification is required • In Terminal sterilization LDPE Ampoules autoclaved at 121˚C 15 PSI for 15 minutes and LDPE Ampoules autoclaved at 106 ˚C for 85 minutes mentioned. Clarify which temperature is used for Terminal sterilization.
9.	3.2.P.5.4	The copies of complete analysis of at least two batches shall be provided
10.	3.2.P.7.1	Primary packaging system is LDPE Ampules . Provide evidence in reference Regulatory Authority.
11.	3.2.8	• Scientific justification is required regarding the performance of stability studies at 30°C ± 2°C / 65% ± 5%RH and 40°C ± 2°C / 75% ± 5%RH being a product packed in LDPE (semi permeable) container, while ICH guidelines recommend performing stability studies at 30°C ± 2°C / 35% ± 5%RH and 40°C ± 2°C / NMT 25% RH for products packed in semi permeable containers. • Justification is required that water loss test performed after 13 months of initiation of stability studies. • Ampoules which are kept for water loss test in incubator on 20-01-2021. What are storage conditions before this after manufacturing. • In water loss test in Accelerated condition factor used is 1.9 while according to ICH for 75% factor is 3.0. clarification is required.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Module III (Drug Substance)	Official monograph of Paracetamol and Caffeine is present in BP. The firm as submitted detail of

		nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, , specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Paracetamol: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (PGP14-37, PGP14-38, PGP14-39) Caffeine: Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (C-3011 C-3076, C-3115)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Panadol Extra Tablets by M/s GSK (GlaxosmithKline). Pakistan performing quality tests (Identification, Weight variation, Disintegration, Assay, Dissolution). CDP has been performed against the same brand that is Panadol Extra Tablets by M/s GSK (GlaxosmithKline). Pakistan in Acid media (pH-1.2),Acetate Buffer(pH-4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	

STABILITY STUDY DATA			
Manufacturer of API	Paracetamol: M/s Citi Pharma Private Limited Lahore. Caffeine: Aarti Industries Limited		
API Lot No.	Caffeine: CF/1520147 Paracetamol: PGP21-183		
Description of Pack (Container closure system)	10X10's Blistered in ALU-PVC packed in standard unit carton provided with leaflet inside.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TRA-PE001	TRA-PE002	TRA-PE003
Batch Size	10,000 Tablets	10,000 Tablets	10,000 Tablets

Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	01-2022	01-2022	01-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Paracetamol: Copy of cGMP certificate on the basis of evaluation conducted on 17-12-2020 and valid for 2 years Caffeine: Copy of GMP certificate No. 6101335 for Aarti Industries Limited (K-17/18/19, M.I.D.C, tararpur, Distict, Thane zone 4) issued by Food and Drug Administration Mahrashtra India-valid for 12-08-2022
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Paracetamol: Purchase documents Invoice No# F20-34 Dated: 11-08-2021 of Batch No # PGP21-513. Caffeine: Form 6 for Caffeine submitted of dated: 15-07-21 by Lahore office
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Remarks of Evaluator: Firm submitted NOC as follows:

M/s GlaxoSmithKline Consumer health Pakistan Limited 35-Dockyard Road, West Whraf –Karachi-Pakistan has provided no objection certificate for utilization of Panadol brand name as under :-
"We, owners of the **"Panadol"** brand name since may decades globally and in Pakistan for last 45 years, would like to manufacture our following products at **"Citi Pharma Private Limited"** under the DRAP's Contract manufacturing policy:

S.No.	**Brand Name**
1.	Panadol Extra Tablets
2.	Panadol Migraine tablets
3.	Panadol Muscle Relaxant tablets

Further to this, Please note that we have no objection to the use of the brand Name **"Panadol"** for the aforementioned products, applied by Citi Pharma for the registration on contract manufacturing on behalf of GlaxoSmithKline consumer Healthcare Limited Pakistan."

S.No	**Section**	**Shortcomings Communicated**
1.	1.6.5	Submitted GMP certificate of different site than documents submitted for drug substance (Caffeine)
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
3.	3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active (Caffeine)Pharmaceutical Ingredient by Drug Product manufacturer is required.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) (Paracetamol and Caffeine)shall be submitted.

5.	3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / Active Pharmaceutical Ingredient (Paracetamol and Caffeine) manufacture.
6.	3.2.S.5	COA of primary / secondary reference standard including source and lot number for Caffeine shall be provided.
7.	3.2.P.2.2.1	6 units are used for CDP. Clarification is required in the light of FDA guidance for industry and EMA guidelines of Comparative dissolution. F2 calculations for paracetamol and caffeine not submitted.
8.	3.2.P.3.5	Submitted Process validation protocol are general not product related. Clarification is required.
9.	3.2.P.5.1	Specification claimed are USP while in section 1.5.6 applied as B.P. Clarification is required. Justify your acceptance criteria for dissolution test as NLT 75% after 60 minutes of the labeled amount of paracetamol and caffeine while USP has specified as NLT 75% (Q) of the labelled amounts of acetaminophen and caffeine is dissolved.
10.	3.2.P.5.3	Analytical Method Verification studies performed by the Drug Product manufacturer for drug product shall be submitted.
11.	3.2.P.8	Stability studies of three (03) months submitted. Documents for the procurement of API (Caffeine) with approval from DRAP Compliance Record of HPLC software 21CFR & audit trail reports on product testing. Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Previous Decision (M-321): Deferred for following:

Submitted GMP certificate of different site than documents submitted for drug substance (Caffeine)

Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3

Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active (Caffeine) Pharmaceutical Ingredient by Drug Product manufacturer is required.

Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) (Paracetamol and Caffeine) shall be submitted.

Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / Active Pharmaceutical Ingredient (Paracetamol and Caffeine) manufacture.

COA of primary / secondary reference standard including source and lot number for Caffeine shall be provided.

6 units are used for CDP. Clarification is required in the light of FDA guidance for industry and EMA guidelines of Comparative dissolution.

F2 calculations for paracetamol and caffeine not submitted.

Submitted Process validation protocol are general not product related. Clarification is required.

Specification claimed are USP while in section 1.5.6 applied as B.P. Clarification is required.

Justify your acceptance criteria for dissolution test as NLT 75% after 60 minutes of the labeled amount of paracetamol and caffeine while USP has specified as NLT 75% (Q) of the labelled amounts of acetaminophen and caffeine is dissolved.

Analytical Method Verification studies performed by the Drug Product manufacturer for drug product shall be submitted.

Stability studies of three (03) months submitted.

Documents for the procurement of API (Caffeine) with approval from DRAP Compliance Record of HPLC software 21CFR & audit trail reports on product testing.

Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

1.	1.6.5	Submitted GMP certificate of different site than documents submitted for drug substance (Caffeine).	Caffeine: Firm submitted now GMP certificate # 6101335 valid upto 12-08-2022 of Aarti Industries Limited Address: K-17/18/19, M.I.D.C, tararpur, District, Thane zone 4.(mentioned on all documents)

		Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Aspirin manufacturer issued by relevant regulatory authority of country of origin.	In Chinese submitted which can not be read.
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Submitted.
3.	3.2.S.4.1	Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active (Caffeine)Pharmaceutical Ingredient by Drug Product manufacturer is required.	Copies of the Drug substance specifications (BP) and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient (Caffeine) by Drug Product manufacturer is submitted.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) (Paracetamol and Caffeine and Aspirine)shall be submitted.	Analytical method verification of tablet (Drug Product) submitted instead of drug substance.
5.	3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / Active Pharmaceutical Ingredient (Paracetamol and Caffeine) manufacture.	COA of paracetamol and Aspirin submitted while, COA of drug substance for Caffeine of a different Drug substance supplier (Kores India limited submitted.
6.	3.2.S.5	COA of primary / secondary reference standard including source and lot number for Caffeine and Aspirin shall be provided.	Submitted.
7.	3.2.P.1	Composition of tablet is different from reference product in terms of excipients. Applied formulation is film coated however it is not evident from composition in section 3.2.P.1 and 3.2.P.3.2 as there are no excipients for coating.	Correct formulation as per reference product attached. Revised section 3.2.P.1 and 3.2.P.3 are attached.

8.	3.2.P.2.3	Manufacturing process Coating step is not included however applied product is film coated.	Correct manufacturing method submitted.
9.	3.2.P.2.2.1	Submitted CDP data for paracetamol and Caffeine is same as in Panadol Extra tablet. Clarification s is required.	Correct CDP with F2 calculations submitted.
10.	3.2.P.3.5	Submitted Process validation protocol are general not product related. Clarification is required.	Submitted.
11.	3.2.P.5.1	Justify your acceptance criteria for dissolution test as NLT 75% after 60 minutes of the labeled amount of paracetamol ,caffeine and Aspirin while USP has specified as NLT 75% (Q) of the labelled amounts of acetaminophen , Aspirin and caffeine is dissolved	Correction is done and revised specifications
12.	3.2.P.5.3	Analytical Method Verification studies performed by the Drug Product manufacturer for drug product shall be submitted.	Not submitted.
13.	3.2.P.6	COA of primary / secondary reference standard including source and lot number for paracetamol, Aspirin and Caffeine shall be provided	Submitted.
14.	3.2.P.8	Manufacturing of batches was done in Dec, 2021 than how stability studies started in September 2021. Stability studies of three (03) months submitted. Documents for the procurement of API (Caffeine and Aspirin) with approval from DRAP	Not submitted.

Previous Decision (M-322): Deferred for following:

Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) (Paracetamol and Caffeine and Aspirine) shall be submitted.

Analytical Method Verification studies performed by the Drug Product manufacturer for drug product shall be submitted.

Justification for initiating stability studies in Se [ptember 2021, whereas manufacturing of batches was done in Dec, 2021.

Documents for the procurement of API (Caffeine and Aspirin) with approval from DRAP.

Stability studies of three (03) months submitted.

Documents for the procurement of API (Caffeine and Aspirin) with approval from DRAP

Clarity regarding drug substance manufacturer since COA of drug substance for Caffeine of two different Drug substance manufacturers has been submitted.

Since the submitted dossier does not reflect any details for contract manufacturing while annexed NOC from M/s GlaxoSmithKline Consumer Health declare it by way of cntract manufacturing hence firm shall submit clarity regarding the status of registration application whether it's for self-manufacturing with registration in name of M/s Citi Pharma Private Limited or for contract manufacturing with registration in name of M/s GlaxoSmithKline Consumer health Pakistan Limited. In case of contract manufacturing for M/s GlaxoSmithKline Consumer health Pakistan Limited, the application shall be re submitted as per relevant SRO of contract manufacturing policy.
Clarification for using of Panadol brand name as per Rule 20A of Drugs (L,R &A) Rules, 1976.

S.NO	Reason of deferment	Reply Evaluation
1.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) (Paracetamol and Caffeine and Aspirine) shall be submitted.	Analytical Method Verification studies performed by the Drug Product manufacturer for drug substance(s) (Paracetamol and Caffeine and Aspirine) submitted.
2.	Analytical Method Verification studies performed by the Drug Product manufacturer for drug product shall be submitted.	Analytical Method Verification studies performed by the Drug Product manufacturer for drug product submitted.
3.	Justification for initiating stability studies in September 2021, whereas manufacturing of batches was done in Dec, 2021.	It was typographical error . Correct data is submitted that stability studies initiated in December 2021.
4.	Documents for the procurement of API (Caffeine and Aspirin) with approval from DRAP.	Form 6 for caffeine dated: 15-07-2021 Aspirin form 6 dated: 03-06-2021 submitted
5.	Stability studies of three (03) months submitted.	06 month stability summary sheets submitted
6.	Clarity regarding drug substance manufacturer since COA of drug substance for Caffeine of two different Drug substance manufacturers has been submitted.	COA of Caffeine by Aarti Industries Limited and by drug product manufacturer of Batch No# CF/1520147 submitted
7.	• Since the submitted dossier does not reflect any details for contract manufacturing while annexed NOC from M/s GlaxoSmithKline Consumer Health declare it by way of cntract manufacturing hence firm shall submit clarity regarding the status of registration application whether it's for self-manufacturing with registration in name of M/s Citi Pharma Private Limited or for contract manufacturing with registration in name of M/s GlaxoSmithKline Consumer health Pakistan Limited. In case of contract manufacturing for M/s GlaxoSmithKline Consumer health	Withdrawn Our submitted NOC and request to convert the name with Askprol ACF tablet

	Pakistan Limited, the application shall be re submitted as per relevant SRO of contract manufacturing policy. • Clarification for using of Panadol brand name as per Rule 20A of Drugs (L,R &A) Rules, 1976.	

Decision: Approved with change of brand name.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**Teno 25mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Tenofovir Alafenamide Fumarate eq to Tenofovir Alafenamide……25mg
	Pharmaceutical form of applied drug	Brown red color 8mm round shaped bisected one side and other plain film coated tablet.
	Pharmacotherapeutic Group of (API)	Antiviral for systemic use, nucleoside and nucleotide reverse transcriptase inhibitors.
	Reference to Finished product specifications	Manufacturer specifications
	Proposed Pack size	30’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Vemlidy Tablet 25mg by Gilead Sciences Ltd. U.S.A.., USFDA Approved.
	For generic drugs (me-too status)	Tenofomide Tablet 25mg by M/s. Getz pharma ., Reg. No. 093109
	GMP status of the Finished product manufacturer	Not submitted.
	Name and address of API manufacturer.	Shandong Haiyo Freda Pharmaceutical Co Ltd Address: 666 Bianhai West Road Linshu West Industrial Zone, Shandong Province.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Monograph of Tenofovir Alafenamide Fumarate is present is as per In-house (Manufacturer's) specifications. The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for related substances (Impurity A, PMPA, Unspecified impurity and Total impurities), specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (180702, 180713, 180725)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Tenofomide 25mg Tablets (Batch No. 004FB1, Mfg date 04-2020) by Getz Pharmaceuticals Karachi. Firm has submitted results of CDP for their product against Tenofomide 25mg Tablets (Batch No. 004FB1, Mfg date 04-2020). Firm has tested CDP in three dissolutions medium ie. (0.1N Hcl pH 1.2, Acetate Buffer pH 4.5, Phosphate Buffer pH 6.8 and the results of f1, f2 factor are within the acceptable limit.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SD20160495 issued by NMPA valid till 08-08-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 3, form 7 , invoice (invoice# JNXKYY20030302) dated 03-03-2020 specifying import of Tenofovir Alafenamide Fumarate 2 Kg (Batch# 20021701). But Not attested.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.1	Differential fee of Rs: 10000/-	Fee of Rs: 10000/- Deposit slip #0874644724055 submitted.
2.	1.3.5.	GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	Not submitted.
3.	1.6.5	• Drug substance manufacturer mentioned in this section is M/s Jinan Xinke Pharmaceuticals Sci & Tech. C0., Ltd , . While certificate of analysis an import documents are from Shandong Haiyo Freda Pharmaceutical Co Ltd . Clarification is required amongst them which one is drug substance manufacturer.	• The drug substance manufacturer is Shandong Haiyo Freda Pharmaceuticals Co Ltd. Documents submitted • Submitted GMP certificate is valid upto 08-08-2021 (Submitted again same GMP certificate which is not valid)

		• Valid Drug Manufacturing License issued by the relevant regulatory authority of country of origin. Or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	
4.	3.2.S.4.1	Copies of the Drug substance Specifications by Drug Product manufacturer is required.	Submitted
5.	3.2.S.4.2	Detailed analytical procedures used for routine testing of the Drug substance by drug product manufacturer shall be provided.	Submitted
6.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Submitted
7.	3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	Submitted
8.	3.2.P.2.3	Manufacturing process by Innovator is dry granulation while your method is Wet granulation. Clarify.	We are following innovators manufacturing process and our method is dry granulation.
9.	3.2.P.5.1	US FDA review document of the Innovator product, specifies the dissolution limit as "NLT Q in 15 minutes" whereas submitted specifications declare the dissolution limits as "NLT 75% in 30 minutes" .	That was a typographic mistake, we are following innovators specification and dissolution limit is NLT Q in 15 minutes.
10.	3.2.P.5.2	Submit complete analytical method for testing of drug product.	Submitted
11.		• Documents for the procurement of API with approval from DRAP. • US FDA review document of the Innovator product, specifies the dissolution limit as "NLT Q in 15	• Not Submitted • We are following innovator specifications i.e. dissolution limit is NLT Q in 15 minutes in 50mM Sodium Acetate buffer pH 4.5. • Compliance record of HPLC software 21CFR & audit trail reports on product testing submitted.

		minutes" in 50mM Sodium Acetate buffer pH 4.5. whereas submitted specifications declare the dissolution limits as "NLT 75% in 30 minutes with Phosphate Buffer pH 6.8". • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	

Previous Decision (M-322): Deferred for following:

- Valid Drug Manufacturing License issued by the relevant regulatory authority of country of origin or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Documents for the procurement of API with approval from DRAP.
- Analytical record for the dissolution test for stability studies as per Innovator product.

S.NO	Reason of deferment	Reply
1.	Valid Drug Manufacturing License issued by the relevant regulatory authority of country of origin or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Copy of GMP certificate # Lu20200438 issued on 14-04-2020 and valid till 15-046-2025 Submitted.
2.	Documents for the procurement of API with approval from DRAP.	Commercial Invoice # JNXKYY20030302 Dated: 03-03-2020 Attested by DRAP Peshawar office Dated:12-03-2020 for Tenofovir Alafenamide Fumarate Batch # 20021701
3.	Analytical record for the dissolution test for stability studies as per Innovator product.	Analytical record for the dissolution test for stability studies Submitted with Acetate buffer pH 4.5 with 15 minutes.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Pack size & Demanded Price	30ml, As per SRO
	Approval status of product in Reference Regulatory Authorities	Not found
	Me-too status	Not found
	GMP status	GMP certificate issued on the basis of inspection dated 12.08.2020
	Remarks of the Evaluator [IV]	• Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.
	Decision: Deferred for following: • **Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.** • **Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.**	
515.	Name and address of manufacturer / Applicant	M/s Rotex Pharma Pvt Ltd. Plot No. 206 & 207. Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Calrol 0.005% w/v Lotion
	Composition	Each ml Contains: Calcipotriol monohydrate eq to Calcipotriol…50mcg
	Diary No. Date of R& I & fee	Dy.No. 14061 dated 07-03-2019 Rs.20,000/-

		Dated 07-03-2019
	Pharmacological Group	Vitami D analogue
	Type of Form	Form-5
	Finished product Specifications	Manufacturer specifications
	Pack size & Demanded Price	30ml ; As per SRO
	Approval status of product in Reference Regulatory Authorities	Daivonex solution 50mcg/ml of TGA Austraila approved
	Me-too status	Not found
	GMP status	GMP certificate issued on the basis of inspection dated 12.08.2020
	Remarks of the Evaluator [IV]	• Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.
	Decision: Deferred applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm or else application on Form 5D along with differential fee and stability study data of three batches as per the guidelines and checklist approved by Registration Board in its 312th meeting.	
516.	Name and address of manufacturer / Applicant	M/s Rotex Pharma Pvt Ltd. Plot No. 206 & 207 Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Stigo 100mg/ml Injection
	Composition	Each 1ml Contains: Sodium Stibogluconate…100mg
	Diary No. Date of R& I & fee	Dy.No. 14255 dated 07-03-2019, Rs. 20,000/- Dated 07-03-2019
	Pharmacological Group	Antidopaminergic
	Type of Form	Form 5
	Finished product Specifications	Manufacturer's specifications
	Pack size & Demanded Price	6ml x 5'Ampoule: As per SRO
	Approval status of product in Reference Regulatory Authorities	Not found
	Me-too status	Not found
	GMP status	GMP certificate issued on the basis of inspection dated 12.08.2020
	Remarks of the Evaluator [IV]	• Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm
	Decision: Deferred for following: • **Evidence of approval of applied formulation in reference regulatory authorities/agencies which were declared/approved by the Registration Board in its 275th meeting.** • **Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm**	
517.	Name and address of manufacturer / Applicant	M/s Rotex Pharma Pvt Ltd. Plot No. 206 & 207. Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Novaclop Plus 75/75 mg Tablet
	Composition	Each Film Coated Tablet Contains: Clopidogrel as Bisulphate…75mg Aspirin…75mg
	Diary No. Date of R& I & fee	Dy.No. 12696 dated 06-03-2019 Rs.20,000/- Dated 05-03-2019

	Pharmacological Group	Antiplatelet and Nonsteriodal Anti-inflammatory Drug
	Type of Form	Form 5
	Finished product Specifications	Manufacturer specification
	Pack size & Demanded Price	10's:As per SRO
	Approval status of product in Reference Regulatory Authorities	CoPlavix Tablet Of (TGA Approved)
	Me-too status	Clodril Plus Tablet M/s Macter International
	GMP status	GMP certificate issued on the basis of inspection dated 12.08.2020
	Remarks of the Evaluator [IV]	• Applied formulation is film coated tablet while innovator product is bilayered film coated tablet Clarify, otherwise revise your formulation to bilayered film coated tablet with submission of requisite fee & also submit evidence of bilayered tablet machine. • Submit manufacturing method in line with reference product
	Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.	

b. Deferred cases

518.	Name and address of manufacturer / Applicant	Well care Pharmaceuticals A/7 P.S.I.E. Lahore Road Sargodha
	Brand Name +Dosage Form + Strength	Wellfer-F Syrup
	Composition	Each 5ml contains:- Iron III Hydroxide Polymaltose Complex……50mg
	Diary No. Date of R& I & fee	Dy.No 558 dated 05-06-2014
	Pharmacological Group	Haematinic
	Type of Form	Form 5
	Finished product Specifications	Manufacturer specification
	Pack size & Demanded Price	60ml : Rs :160/ 60ml
	Approval status of product in Reference Regulatory Authorities	Not found
	Me-too status (with strength and dosage form)	Luberon 50mg/5ml Syrup of M/s Ankaz Pharmaceuticals
	GMP status	
	Previous remarks of the Evaluator.	• 1st Letter: 24th April , 2018 • Reminder Letter: 16th May , 2018 .Latest GMP inspection report (which should have been conducted within the period of last one year).
	Previous decision(s)	**Deferred for following reasons:** Registration Board deferred the case for further deliberation. **(M-284)**
	Evaluation by PEC	Last GMP inspection of conducted on 10th -09-2021 and the report concludes that the firm is operating at satisfactory level of GMP compliance as of today, suggestion for improvement have been agreed upon by management.
	Decision: Approved as per following label claim: **"Each 5ml contains:** **Iron (III) Hydroxide Polymaltose Complex eq. to elemental Iron …… 50mg"**	

	The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

	The proposed proprietary name / brand name	Tyno 156.25mg/5ml Suspension
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	**Each reconstituted 5ml contains:** Amoxicillin Trihydrate eq. to Amoxicillin ……. 125mg Potassium Clavulanate Eq to Clavulanic Acid…..31.25mg
	Pharmaceutical form of applied drug	Powder for Reconstitution for Oral use (Suspension)
	Pharmacotherapeutic Group of (API)	Penicillin antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Augmentin 125/31 Suspension M/s GlaxoSmithKline UK of MHRA approved
	For generic drugs (me-too status)	Augmentin 156.25mg/5ml Suspension by M/s GSK, Reg# 009264
	GMP status of the Finished product manufacturer	GMP certificate issued on basis of inspection conducted on 18-11-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 22-12-2020, wherein approval for "Sterile dry powder for injection (Penicillin)", Capsule (Penicillin), Dry powder for suspension (Penicillin)."
	Name and address of API manufacturer.	**Amoxicillin Trihydrate:**

		Pharmagen Limited. Kot Nabi Bukshwala, 34 Km Ferozepur Road, Lahore. **Potassium Clavulanate:** Sinopharm Weiqida Pharmaceuticals Co., Ltd Economic & Technologies Develpoment Zone, First Zone, Datong, Shanxi, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Amoxicillin Trihydrate & Potassium Clavulanate is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: **Amoxicillin Trihydrate:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months **Potassium Clavulanate:** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Augmentin 156.25mg/5ml suspension by GSK Pakistan by performing quality tests (Identification, Assay, pH). CDP has not been performed because it is not applicable in this case.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA	
Manufacturer of API	**Amoxicillin Trihydrate:** Pharmagen Limited. Kot Nabi Bukshwala, 34 Km Ferozepur Road, Lahore. **Potassium Clavulanate:** Sinopharm Weiqida Pharmaceuticals Co., Ltd Economic & Technologies Develpoment Zone, First Zone, Datong, Shanxi, China.
API Lot No.	**Amoxicillin Trihydrate:**00078/522/2021 **Potassium Clavulanate:**04NB2104013
Description of Pack	Glass bottle with PP cap (1's)

(Container closure system)

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Amoxicillin Trihydrate:** Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) issued by DRAP on he basis if evaluation conducted on 08-01-2019 **Potassium Clavulanate:** Copy of GMP certificate No (SX20180229) issued by China Food and Drug Administration valid until 05-06-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Amoxicillin Trihydrate:** Copy commercial invoice (Invoice# 321) Dated: 03-02-2021 with received quantity i.e. 16 Kg) of Amoxicillin Trihydrate Batch No# 00078/522/2021 without attestation as local source. **Potassium Clavulanate:** Copy commercial invoice (Invoice# EX/3198577) Dated: 18-12-2020 with received quantity i.e. 4Kg gm) of **Potassium Clavulanate** Batch No# 04NB2104013 with attestation of DRAP Karachi dated:01-12-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	We have maintained manual logs of all tests.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.5.2.	In Label Claim SiO2 mentioned. Clarify.	Innovator also used the silicon dioxide but mentioned as excipients rather than relate with Drug substance. **(but label claim not revised)**

2.	2.3.R.1.1	Submit complete calculations for Drug substance's quantity dispensed for manufacturing	Submitted.
3.	2.3.R.1.2	For applications of locally manufactured drug product(s), provide blank master production document / batch manufacturing record to be used during the commercial manufacturing of the applied product	Blank master production document / batch manufacturing record to be used during the commercial manufacturing of the applied product submitted.
4.	3.2.S.4.1	• Copies of the Drug substance (Amoxicillin) specifications Drug Product manufacturer is required. • Submitted specification of Potassium clavulanate are from USP while Potassium Clavulanate diluted with Syloid 1:1. Clarification is required how on diluted Potassium Clavulanate USP monograph applied.	• Drug substance (Amoxicillin) specifications by Drug Product manufacturer are submitted. • Diluted Potassium Clavulanate is present in BP and the corrected specifications is attached.
5.	3.2.S.4.2	• Detailed analytical procedures for the testing of drug substance used for routine testing of the Drug substance /Active Pharmaceutical Ingredient (Amoxicillin) by Drug product manufacturer is required. • Submitted testing method of Potassium clavulanate are from USP while Potassium Clavulanate diluted with Syloid 1:1. Clarification is required.	• Detailed analytical procedures for the testing of drug substance used for routine testing of the Drug substance /Active Pharmaceutical Ingredient Amoxicillin)by Drug product manufacture submitted. • Testing method of potassium Clavulanate according to BP monograph submitted**.**
6.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) (Amoxicillin & Potassium clavulanate) shall be submitted.	Submitted
7.	3.2.S.4.4	• COA of Amoxicillin trihydrate by Drug product manufacturer mentioned Dry powder	• Corrected COA of Amoxicillin trihydrate by Drug product manufacturer attached. • Corrected COA of Potassium Clavulanate by Drug product manufacturer attached.

		injection. Clarification is required. • COA of drug substance Potassium Clavulanate by drug product manufacturer claims USP specification while Potassium Clavulanate is diluted with Syloid 1:1. Clarification is required.	
8.	3.2.P.1	Quantity of Amoxicillin trihydrate and Potassium clavulanate is not according to label claim.	It was typographical error made the actual quantity in the formulation. Corrected quantity is attached.
9.	3.2.P.2.1.2	• Compatibility studies with excipients as excipients are different than innovator. • Innovator product does not contain preservative while you are adding Sodium benzoate as preservative. Clarification is required.	• Not submitted • No reply submitted
10.	3.2.P.2.3	Complete manufacturing method of stability batches is required.	Complete manufacturing method is submitted.
11.	3.2.P.5.1	Claimed specification is USP while Deliverable volume and • microbial enumeration tests and Tests for specified microorganism not performed mentioned in USP monograph	Testing according to USP monograph submitted.
12.	3.2.P.5.2	Detailed analytical procedures used for testing the drug product shall be provided.	Detailed analytical procedures used for testing the drug product is submitted.
13.	3.2.P.5.3	• Verification studies of Amoxicillin trihydrate is not in line with USP monograph Assay method. Clarification is required. • Verification studies of Clavulanic acid not submitted.	Submitted.
14.	3.2.P.5.4	The COA of Drug product mentioned Dry Powder injection mentioned. Clarification is required.	Corrected COA of drug product are attached.
15.	3.2.P.8	• In stability summary sheets 6th month mentioned 26-08-2020 while on other months mentioned 2021. Clarification is required.	• The year was written as 2020 by typing error. The corrected stability data sheets are attached. • The supporting chromatograms are attached. • Compatibility studies with diluent not submitted.

		• Data of stability batches will be supported by attested respective documents like Raw data sheets, COA, • Submit Compatibility studies with diluent	

Previous Decision (M_317): Deferred for following:

- Revised label claim without Sio2 with submission of applicable fee.
- Compatibility studies with excipients as excipients are different than innovator.
- Innovator product does not contain preservative while firm is adding Sodium benzoate as preservative. Clarification is required.
- Compatibility studies with diluent**.**

Reply by firm		
1.	Revised label claim without Sio2 with submission of applicable fee.	Revised label claim without SiO2 submitted with submission of fee of Rs: 7500/- Deposit slip # 5462502434 Dated: 17-05-2022
2.	Compatibility studies with excipients as excipients are different than innovator.	Submitted for Sodium CMC and Aeorsil.
3.	Innovator product does not contain preservative while firm is adding Sodium benzoate as preservative. Clarification is required.	After reconstitution of dry powder for Oral suspension, the risk of microbial contamination and subsequent product spoilage is much increased during use y the patient. For these reason, Pharmaceutical suspensions formulations contain antimicrobial preservatives. Preservatives are required in most suspensions because the suspending agents and sweetner are good growth media for microorganism. Sodium benzoate is approved as first of all preservative by the Food and drug administration (FDA) Morever Co-amoxiclav 125/31 Oral Suspension Sugar-Free of Bristol Laboratories Limited approved in MHRA also contain sodium benzoate.
4.	Compatibility studies with diluent**.**	Compatibility studies with diluent submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	3.2.P.2.3	Complete manufacturing method of stability batches is required.	Complete manufacturing method is submitted.
	3.2.P.5.1	Claimed specification is USP while Deliverable volume and • microbial enumeration tests and Tests for specified microorganism not performed mentioned in USP monograph	Testing according to USP monograph submitted.
	3.2.P.5.2	Detailed analytical procedures used for testing	Detailed analytical procedures used for testing the drug product is submitted.

		the drug product shall be provided.	
	3.2.P.5.3	Verification studies of Amoxicillin trihydrate is not in line with USP monograph Assay method. Clarification is required. Verification studies of Clavulanic acid not submitted.	Submitted.
	3.2.P.5.4	The COA of Drug product mentioned Dry Powder injection mentioned. Clarification is required.	Corrected COA of drug product are attached.
	3.2.P.8	In stability summary sheets 6th month mentioned 26-08-2020 while on other months mentioned 2021. Clarification is required. Data of stability batches will be supported by attested respective documents like Raw data sheets, COA, Submit Compatibility studies with diluent	The year was written as 2020 by typing error. The corrected stability data sheets are attached. The supporting chromatograms are attached. Compatibility studies with diluent not submitted.

Previous Decision (M_317): Deferred for following:
Revised label claim without Sio2 with submission of applicable fee.
Compatibility studies with excipients as excipients are different than innovator.
Innovator product does not contain preservative while firm is adding Sodium benzoate as preservative. Clarification is required.
Compatibility studies with diluent.

Reply by firm		
	Revised label claim without Sio2 with submission of applicable fee.	Revised label claim without SiO2 submitted with submission of fee of Rs: 7500/- Deposit slip # 4942746179 Dated: 17-05-2022
	Compatibility studies with excipients as excipients are different than innovator.	Submitted for Sodium CMC and Aeorsil.
	Innovator product does not contain preservative while firm is adding Sodium benzoate as preservative. Clarification is required.	After reconstitution of dry powder for Oral suspension, the risk of microbial contamination and subsequent product spoilage is much increased during use y the patient. For these reason, Pharmaceutical suspensions formulations contain antimicrobial preservatives. Preservatives are required in most suspensions because the suspending agents and sweetner are good growth media for microorganism. Sodium benzoate is approved as first of all preservative by the Food and drug administration (FDA) Morever Co-amoxiclav 125/31 Oral Suspension Sugar-Free of Bristol Laboratories Limited approved in MHRA also contain sodium benzoate.
	Compatibility studies with diluent.	Compatibility studies with diluent submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 03 Registration applications for local manufacturing of (veterinary) drugs

a. New Cases

521.	Name and address of manufacturer / Applicant	MYLAB Pvt. Ltd, Khankah Shariff Bahawalpur.
	Brand Name +Dosage Form + Strength	Ibamec Injection
	Composition	Each 100ml Contains: Abamectin…20gm
	Diary No. Date of R& I & fee	Dy.No 40624 dated 06-12-2018 Rs.20,000/- Dated 04-12-2018
	Pharmacological Group	Anthelmintic
	Type of Form	Form 5
	Finished product Specification	Manufacturer's specifications
	Pack size & Demanded Price	20ml: Decontrolled
	Me-too status	Not found
	GMP status	Panel inspection conducted on 13-09-2018 to 14-09-2018 recommends renewal of DML and grant of additional sections.
	Remarks of the Evaluator [IV]	Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm. Master formulation and Method of manufacturing not submitted
	Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.	

Case no. 04 Registration applications of categories to be considered on priority

a. Local manufacturing applications of priority categories defined by Registration Board in its 257th meeting

522.	Name, address of Applicant / Marketing Authorization Holder	M/s The Schazoo Pharmaceuticals Laboratories (Pvt) Ltd., Seikhupura
	Name, address of Manufacturing site.	M/s Ophth Pharma (Pvt) Ltd. Plot No. 24L,Sector-Z4, Korangi lndustrial Area, Karachi-Pakistan
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 5750 dated 02/03/2022
	Details of fee submitted	PKR 75,000/-: Deposit slip # 54759534479
	The proposed proprietary name / brand name	Meso-Steride 0.01% Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Dutasteride (Mfg spec).....0.1mg

	Pharmaceutical form of applied drug	Clear, colorless aqueous solution filled in sterile glass vials and packed in unit carton along with Leaflet.
	Pharmacotherapeutic Group of (API)	**5-alpha reductase inhibitors**
	Reference to Finished product specifications	Manufacturer's specification
	Proposed Pack size	8mL
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Not found
	For generic drugs (me-too status)	Not applicable
	GMP status of the Finished product manufacturer	M/s Ophth Pharma: cGMP certificate on the basis of Evaluation conducted 0n 27 -09-2021 and valid for 2 years.

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.5.9	Evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form (injection) in any one of the reference regulatory authority specified by Registration Board in its 275th meeting for further evaluation of application.	

Decision: Deferred for evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form (injection) in any one of the reference regulatory authority specified by Registration Board in its 275th meeting for further evaluation of application.

523.	Name, address of Applicant / Marketing Authorization Holder	M/s Vision Pharmaceuticals (Pvt) Ltd Plot # 22-23, Industrial Triangle, Kahuta Road, Islamabad
	Name, address of Manufacturing site.	M/s Vision Pharmaceuticals (Pvt) Ltd Plot # 22-23, Industrial Triangle, Kahuta Road, Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No 29747 dated 20/10/2022
	Details of fee submitted	PKR 75,000/-: Deposit slip # 5994448166
	The proposed proprietary name / brand name	Ornid 500mg Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 3ml Ampoules contains: Ornidazole 500mg
	Pharmaceutical form of applied drug	Parenteral (IV)

	Pharmacotherapeutic Group of (API)	Agents Against Amoebiasis And Other Protozoal Diseases AATC code:P01AB03
	Reference to Finished product specifications	Innovator specifications
	Proposed Pack size	1's, 5's, 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Tiberal® (Concentrate for the preparation of an infusion solution for iv use) of Swissmedic approved
	For generic drugs (me-too status)	**N/A**
	GMP status of the Finished product manufacturer	cGMP certificate on the basis of Evaluation conducted 0n 11-02-2019 and valid for 3 years.
	Name and address of API manufacturer.	M/s Hunan Jiudian Pharmaceuticals Co., Ltd. Tongguan Circular Economy Industrial Base, Wang Cheng Economic and Technological Development Zone, Hunan, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ornidazole is not present in any Pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (201803A01, 201803A02 & 201803A03)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Tiberal 500mg/3ml Injection of Orpha Swiss GmbH by performing quality tests (Appearance, pH, Liquid particle count, BET, Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, accuracy, precision, specificity, robustness.
alidation	**STABILITY STUDY DATA**	

Manufacturer of API	M/s Hunan Jiudian Pharmaceuticals Co., Ltd. Tongguan Circular Economy Industrial Base, Wang Cheng Economic and Technological Development Zone, Hunan, China

Date of Initiation	14-02-2022	14-02-2022	14-02-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product Baxib 2.5mg and 5mg (Apixaban) which was conducted on 05-0-2021 and was presented in 297th meeting of Registration Board held on 12-15th January, 2021. According to the report following points were confirmed. • The firm has 21 CFR compliant HPLC software. • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Nebivolol HCl:** Copy of GMP certificate No. ZJ200047 in the name of Zhejiang Huahai Pharmaceutical Co., Ltd. Chuannan, Duqiao, Linhai, Zhejiang, 317016, China issued by Zhejiang Medical Product Administration valid till 28-06-2023 is submitted. Copy of DML No#2000031 valid till 12-01-2025 **Hydrochlorothiazide:** Copy of GMP certificate No. 22063346 issued by Food & Drugs Control Administration, Gujrat valid till 29/09/2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Nebivolol HCl: Firm has submitted copy of form 3, 5, 7 and invoice (invoice# HH20211623) dated: 03-08-2021 cleared by DRAP Karachi office dated 16-08-2021 specifying import of 5Kg Nebivolol HCl (Batch# D5304-20-001). Hydrochlorothiazide: Firm has submitted copy of form 3, 5, 7 and invoice (invoice# EI/3012100356) dated: 20-08-2021 cleared by DRAP Karachi office dated 02-09-2021 specifying import of 50Kg of Hydrochlorothiazide (Batch# 21HZ00051).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.S.5	Submit COA of reference standard Chlorothiazid and Benzothiazidine related compound A.	COA's of Chlorothiazide, Benzothiazidine and related compound A, reference standards are being attached along with invoice and form 6, by the signature of ADC.
2.	3.2.P.2.1	In composition Crosscarmellose Sodium . two times separately mentioned. Clarification is required.	Since this formulation was developed with wet granulation, At this point, Crosscarmellose sodium (Intra – and extra granularly used), so that the wicking and swelling ability of the disintegrate is best utilized.
3.	3.2.P.5.2	You have applied Paddle speed = 100 rpm in dissolution parameters. You are advised to justify the speed of paddle apparatus with reference to USP general chapter <1092>	• Nebivol-H tablets is not a compendia product. Its dissolution method is also not available in any pharmacopeia as well as in any reference literature, so there was no limitation of any specified fixed RPM, Initially, we have been selected the method of Hydrochlorothiazide tablets as per USP compendia, where 100 rpm given while in basket method, on the other hand we have paddle method. Primarily, we applied the method 75rpm

			on trial batch activity, on 75 rpm we have been found some challenges in dissolution results, in other ingredient that is Nabivolol which was marginally satisfactory, therefore, based on trial batches dissolution results we have been selected 100rpm.. • USP general chapter <1092> also allows 100rpm for paddle apparatus with sufficient justification, i-e, aforementioned text is self-explanatory. • USP also recommends 100rpm with apparatus II in some monographs of tablets.(Ethinyl Estradion tablets., Letrozole tablets, Methenamine Hippurate tablets)
4.	3.2.P.5.3	• In Linearity and Range for Theoretical concentration is in mcg/ml while practical concentration is in mg/ml. • In Linearity and Range for Hydrocholorothiazide concentration on page No# 553 and concentration on page No# 555 are change.	• It is a typographical error in linearity document of analytical test method validation. Corrected copy is being attached. • It is also typographical error in range document. Corrected copy is being attached.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289 meeting of Registration Board decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: • The HPLC software is 21 CFR compliant. • The firm has provided data loggers with stability chambers.	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. HE20180065) issued by China Food and Drugs Administration dated 17-08-2018. The certificate is valid till 16-08-2023.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Clearance certificate by DRAP Islamabad office dated 11-03-2021 specifying Invoice No # 2021ZN-0008A dated: 24-02-2021, import of 5Kg of Meropenem with Sodium Carbonate Sterile USP (Batch# 2103R0073).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms,	Submitted	

	Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	2.3.A.1	Provide evidence of Atomic absorption spectrometer.	Firm submitted calibration certificate.
2.	3.2.P.2.6	Innovator product does not mentioned ringer lactate as a diluent while you have mentioned with other diluents ringer lactate as a diluent. Clarify.	We have performed compatibility study in recommended diluent as specified by Innovator e.g Water for Injection, o.9% Sodium Chloride and Dextrose 5% but additionally we added Ringer lactate in compatibility study in order to get clear picture of the product in the study
3.	3.2.P.8	Submit stability data for 6th months.	Stability data for 6th months submitted.

Decision: Regsitration Board deferred the application for further deliberation regarding pharmaceutical and clinical fetaures of the innovator product approved by the reference regulatory authorities adopted by Registration Board in its 275th meeting.

Remarks of Evaluator

There was a typographical error in fee mentioned in agenda in RB-321 that is Rs: 50000/- It was actually Rs: 20000/- of Challan No 0828775 dated:05-03-2019. Now firm submitted differential fee of Rs: 10000/- Deposit slip # 16642980656 Dated: 30-12-2022

S.NO	Shortcomings communicated	Reply
1.	Which polymorphic form of Vortioxetine Hydrobromide is used in stability batches as polymorphic confirmation is not done by both Drug substance manufacturer and drug product manufacturer.	This is to inform you that Vortioxetine appears in four polymorphs and the most thermodynamically stable polymorphic form is β-Form. The same polymorphic form of Vortioxetine is used in manufacturing of innovator's product "BRINTELLIX Tablets 10mg". Please Refer to for extract of Australian Public Assessment Report for Vortioxetine hydrobromide. Further, our drug substance manufacturer that is Zhejiang Lepu Pharmaceutical Co., Ltd china has confirmed that polymorphic form of Vortioxetine produced by Zhejiang Lepu Pharmaceutical Co., Ltd is β-Form. Please Refer documents provided by Zhejiang Lepu Pharmaceutical Co., Ltd for the confirmation of polymorphic form.
2.	Submit details of product against which CDP was conducted.	This is to inform you that we have conducted CDP of Vortiget tablet 10mg against innovator product BRINTELLIX Tablets 10mg. Details are as follows: Batch No.: 2631816 Mfg. Date: 08.2019 Exp. Date: 02-2022 Manufactured by: H. Lundbeck Denmark.
3.	Submit CDP data in detail.	Firm submitted CDP of Vortiget tablet 10mg Batch No # 567DS01 against innovator product BRINTELLIX Tablets 10mg Batch No# 2631816.

		Comparative dissolution studies have been performed in following mediums: 1. pH 1.2 HCl buffer 2. pH 4.5 Acetate buffer 3. pH 6.8 Phosphate buffer

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

	substance manufacturer and drug product manufacturer.	form of Vortioxetine is used in manufacturing of innovator's product "BRINTELLIX Tablets 10mg". Please Refer to for extract of Australian Public Assessment Report for Vortioxetine hydrobromide. Further, our drug substance manufacturer that is Zhejiang Lepu Pharmaceutical Co., Ltd china has confirmed that polymorphic form of Vortioxetine produced by Zhejiang Lepu Pharmaceutical Co., Ltd is β-Form. Please Refer documents provided by Zhejiang Lepu Pharmaceutical Co., Ltd for the confirmation of polymorphic form.
2.	Submit details of product against which CDP was conducted.	This is to inform you that we have conducted CDP of Vortiget tablet 10mg against innovator product BRINTELLIX Tablets 10mg. Details are as follows: Batch No.: 2633476 Mfg. Date: 08.2019 Exp. Date: 02-2022 Manufactured by: H. Lundbeck Denmark.
3.	Submit CDP data in detail.	Firm submitted CDP of Vortiget tablet 20mg Batch No # 568DS01 against innovator product BRINTELLIX Tablets 20mg Batch No# 2633476. Comparative dissolution studies have been performed in following mediums: 1. pH 1.2 HCl buffer 2. pH 4.5 Acetate buffer 3. pH 6.8 Phosphate buffer

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

Export Facilitation: Applications was received through letter No.F.1-76/2019-PR-I (EFD)
"M/s Seraph Pharmaceuticals, Islamabad have achieved benchmark OF USD 548,766 as defined in the Board's decision during fiscal year 2021-2022. In this regard, please find the (1 molecule) 05 products applications submitted by the firm."

DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents To Be Provided**	**Status**
1.	Reference of previous approval of applications with stability study data of the firm (if available)	Firm has referred to onsite inspection report of their product for **Neovel (Sevelamer Carbonate) tablets 800mg** on 27th December, 2018. Further, the said panel inspection report was discussed in 288th Drug Registration Board meeting held on 14th – 15th February 2019. The case was approved and the inspection report confirms following points: • The firm has 21 CFR compliant HPLC software • The firm has audit trail reports available. • The firm possesses stability chambers with digital data loggers.

2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Empagliflozin:** Copies of COAs (Batch#20201201) of API from M/s HuaiNan Shunglong Pharmaceutical co. Ltd. are submitted. Copies of COAs (Batch#20201201) of API from M/s M/s Seraph Pharmaceuticals are not submitted. **Metformin HCl** : Copies of COAs (Batch# MEF/19071360) of API from Aarti Drugs Limited (Unit-II) are submitted. Copies of COAs (Batch# MEF/19071360) of API from M/s Seraph Pharmaceuticals are not submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product manufacturer	Methods used for analysis of API from both API Manufacturer and Finished Product Manufacturer are provided by the firm
4.	Stability study data of API from API manufacturer	**Empagliflozin:** The firm has submitted copy of **accelerated, 06 Months** (40°C ± 2°C & 75±5%RH) & **long term, 18 Months** (30°C ± 2°C & 60±5%RH) stability study reports of 03 batches. Batches: (20190101, 20190102, 20190103) **Metformin HCl :** The firm has submitted copy of **accelerated, 06 Months** (40°C ± 2°C & 75±5%RH) & **long term, 60 Months** (30°C ± 2°C & 60±5%RH) stability study reports of 03 batches. Batches: (MET/10040109, MET/10040110, MET/10040111)
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:**Firm has submitted copy of DML certificate (Anhui 20160342) issued by Anhui Food and Drug Administration, China. The certificate is valid till 31-12-2025. **Metformin HCl:** Firm has submitted copy of GMP certificate (20031933) issued by Food & Drugs Control Adminstration, Block No. 8, 1st floor, dr. Jivraj Mehta Bhavan, Gandhinagar, Gujarat state, India – Pin 382010. Valid till 19-03-2023
6.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Copy of Clearance certificate and Commercial Invoice No:CF20210208 Dated: 08-02-2021 from M/s Hefei Corn Field Biotechnology Co., Ltd. attested by AD DRAP (Islamabad) dated ; 02-04-2021 for Empagliflozin batch No# # 20201201 **Metformin HCl:** Copy of Clearance certificate and Commercial Invoice No:EXP/1968/19-20 Dated: 12-11-2019 from M/s Aari drugs Limited, Mahendra Industrail Estate, GR Floor India.. attested by AD DRAP (Islamabad) dated ; 04-02-2019 for Metformin HCl batch No# # MEF/19071360

Section of Tablet Cytotoxic mentioned in Eudra GMP certificate
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of authorization certificate from M/s BDR Pharmaceuticals International Private Limited 407/408, Sharda Chambers, New Marine Lines Mumbai., Maharashtra, India. The letter specifies that the manufacturer appoints M/s Schazoo Pharmaceuticals Laboratories (Pvt) Ltd., Sheikhupura to register their products in Pakistan. Issued on 23-08-2021
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 10475 dated: 25-04-2022
	Details of fee submitted	PKR 150,000/- deposit Slip # 81027502940
	The proposed proprietary name / brand name	**Kapcitabine Tablet 500mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated Tablet contains: Capecitabine USP…… 500mg
	Pharmaceutical form of applied drug	Film coated Tablet
	Pharmacotherapeutic Group of (API)	Anti-Neoplastic (Colorectal) WHO ATC code: (L01BC06) (capecitabine) is a nucleoside metabolic inhibitor with antineoplastic activity indicated for:

		• Adjuvant Colon Cancer – Patients with Dukes' C colon cancer. • Metastatic Colorectal Cancer– First-line as monotherapy when treatment with fluoropyrimidine therapy alone is preferred • Metastatic Breast Cancer– In combination with docetaxel after failure of prior anthracyclinecontaining therapy – As monotherapy in patients resistant to both paclitaxel and an anthracycline-containing regimen
	Reference to Finished product specifications	USP
	Proposed Pack size	12 Alu PVC blisters of 10 tablets each packed in a monocarton along with pack insert.
	Proposed unit price	30,000/Pack
	The status in reference regulatory authorities	XELODA® 500mg of USFDA approved.
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance..
	Name, address of drug substance manufacturer	BDR Life Sciences Private Limited Address: R.S.No.578, Near Effluent Channel At & post- Luna, Taluka-padra, City- Luna 391 440 Dist. Vadodara, Gujrat Stat, India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 30°C ± 2°C / 75 ± 5% RH for 12 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months Batches: (CPZO17001M, CPZO17002M, CPZO17003M)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has submitted CDP wit of XELODA (Reference Drug Product)
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Alu-PVC blister
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 75% ± 5% for 12 months. Batches:((ECKAN2117, ECKAN2217, ECKAN0418)

Remarks of Evaluator: Fee submitted on DML

S.No	Section	Shortcomings Communicated
1.	1.3.4	• Address on DSL mentioned is M/s Schazoo Pharmaceuticals (Pvt) Ltd., Sheikhupura while, address in section 1.3.1 and on letter of Authorization, M/s Schazoo Pharmaceuticals Laboratories (Pvt) Ltd mentioned. Clarification is required. • Submit Valid DSL.
2.	3.2.P.2.2.1	• Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed. • Submit CDP in details with details of Reference product against which CDP was conducted and its origin.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of Evaluator: Fee submitted on DML

S.No	Section	Shortcomings Communicated	Reply
1.	1.3.4	Submit Valid DSL.	Valid DSL is attached
2.	1.3.5	Evidence of approval of manufacturing facility / Approved Section of relevant dosage form	GMP Certificate issued from Icelandic Medicines Agency and GMP Certificate issued from Ministry of Health and Welfare Republic of China (Taiwan) is attached in the following pages having details of **Capsule Section** GMP certificate No# IS/GMP/5/22
3.	3.2.P.2.2.1	• Pharmaceutical equivalence of the applied drug shall be established with same strength of the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or	1) We would like to clarify that the Sunitinib Capsules 12.5mg, 25mg and 50mg developed and manufactured by Lotus Pharmaceutical Co., Ltd., have the same active substance, same dosage form, same route of administration and identical in strength

		section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed. • Comparative dissolution profile of same strength of applied formulation and innovator / reference / comparator product conducted in three BCS media across the physiological pH range along with calculation of similarity factor f2 shall be submitted and discussed, along details of Reference product against which CDP was conducted and its origin.	as reference product, Sutent 12.5mg, 25mg and 50mg capsules. Please find attached in the following pages, the Comparison Chart (Pharmaceutical Equivalence) and COA's for the Lotus Sunitinib Capsules 50mg and Sutent capsules 50mg. It is demonstrated that Sunitinib Capsules developed by Lotus Pharmaceutical Co., Ltd., have the same the quality compared to the reference product. Hence, it is considered that physical and chemical properties are similar with reference product, Sutent Capsules. Moreover, according to the EMA Guidance, CPMP/EWP/QWP/1401/98 Rev.1/Corr**, the bioequivalence study in general be conducted at the highest strength. For Sunitinib Capsules, the in-vivo and in-vitro similarities are also demonstrated through BE and CDP studies. For 12.5mg and 25mg, there is no compared to the reference products that have the same strengths; however, as Sunitinib capsules are manufactured as common blend and then split and encapsulated into the 4 strengths, which the strength 50mg is the highest and considered as representative strength. They are manufactured by the similar process as 50mg and are controlled by the equivalent specifications. 2) We would like to clarify that Sunitinib Capsules are manufactured as common blend and then split and encapsulated into the 4 strengths, the strength 50mg is considered as representative strength at the development stage. Hence, the CDP study against reference product is performed on 50mg only. Please refer to page 70 to 72 of 88 of Section 3.2.P.2 for the CDP between Lotus Sunitinib Capsules 50mg and Sutent Capsules 50mg. Moreover, as per section 4.2.2 In vitro dissolution tests in support of biowaiver of strengths of EMA guidance CPMP/EWP/QWP/1401/98 Rev.1/Corr**, the biowaiver of additional strength is performed between additional strength (12.5/25) and batches used in the bioequivalence testing. Please refer to the page 54 to 65 of 88 of Section 3.2.P.2 for the CDP between 50mg and 12.5/25mg. It is

			confirmed that 12.5/25mg show similar dissolution profile in 3 pH's. Also, please refer in the attached pages for the RLD information (Packaging insert and packaging photo), invoice for the BE RLD, and for the RLD COA from Pfizer Italia S.R.L. RLD used in the CDP study was manufactured by Pfizer Italia S.R.L.(MAH Pfizer Europe) and purchased from Latvia Batch No# T93732

Decision: Deferred for submission of Pharmaceutical equivalence & Comparative dissolution profile of the applied formulation against the same strength of innovator/reference product.

Lotus Pharmaceutical Co., Ltd., have the same active substance, same dosage form, same route of administration and identical in strength as reference product, Sutent 12.5mg, 25mg and 50mg capsules. Please find attached in the following pages, the Comparison Chart (Pharmaceutical Equivalence) and COA's for the Lotus Sunitinib Capsules 50mg and Sutent capsules 50mg. It is demonstrated that Sunitinib Capsules developed by Lotus Pharmaceutical Co., Ltd., have the same the quality compared to the reference product. Hence, it is considered that physical and chemical properties are similar with reference product, Sutent Capsules. Moreover, according to the EMA Guidance, CPMP/EWP/QWP/1401/98 Rev.1/Corr**, the bioequivalence study in general be conducted at the highest strength. For Sunitinib Capsules, the in-vivo and in-vitro similarities are also demonstrated through BE and CDP studies. For 12.5mg and 25mg, there is no compared to the reference products that have the same strengths; however, as Sunitinib capsules are manufactured as common blend and then split and encapsulated into the 4 strengths, which the strength 50mg is the highest and considered as representative strength. They are manufactured by the similar process as 50mg and are controlled by the equivalent specifications. 3) We would like to clarify that Sunitinib Capsules are manufactured as common blend and then split and encapsulated into the 4 strengths, the strength 50mg is considered as representative strength at the development stage. Hence, the CDP study against reference product is performed on 50mg only. Please refer to page 70 to 72 of 88 of Section 3.2.P.2 for the CDP between Lotus Sunitinib Capsules 50mg and Sutent Capsules 50mg. Moreover, as per section 4.2.2 In vitro dissolution tests in support of biowaiver of strengths of EMA guidance CPMP/EWP/QWP/1401/98 Rev.1/Corr**, the biowaiver of additional strength is performed between additional strength (12.5/25)

			and batches used in the bioequivalence testing. Please refer to the page 54 to 65 of 88 of Section 3.2.P.2 for the CDP between 50mg and 12.5/25mg. It is confirmed that 12.5/25mg show similar dissolution profile in 3 pH's. Also, please refer in the attached pages for the RLD information (Packaging insert and packaging photo), invoice for the BE RLD, and for the RLD COA from Pfizer Italia S.R.L. RLD used in the CDP study was manufactured by Pfizer Italia S.R.L.(MAH Pfizer Europe) and purchased from Latvia Batch No# T93732

Decision: Deferred for submission of Pharmaceutical equivalence & Comparative dissolution profile of the applied formulation against the same strength of innovator/reference product.

539.	Name, address of Applicant / Importer	M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan.

	The proposed proprietary name / brand name	ALVOSUNI CAPSULES 50mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Sunitinib Malate equivalent to Sunitinib……50mg
	Pharmaceutical form of applied drug	Capsules
	Pharmacotherapeutic Group of (API)	Antineoplastic (Chemotherapeutic agent) ATC Code : L01EX01 kinase inhibitor indicated for: • Treatment of adult patients with gastrointestinal stromal tumor (GIST) after disease progression on or intolerance to imatinib mesylate. • Treatment of adult patients with advanced renal cell carcinoma (RCC). • Adjuvant treatment of adult patients at high risk of recurrent RCC following nephrectomy. • Treatment of progressive, well-differentiated pancreatic neuroendocrine tumors (pNET) in adult patients with unresectable locally advanced or metastatic disease
	Reference to Finished product specifications	Innovator Specifications
	Proposed Pack size	10's, 28's & 30's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	SUTENT® (Sunitinib) 50mg Capsules (FDA Approved)
	For generic drugs (me-too status)	SUTENT® of Pfizer Laboratories. Ltd. (Reg # 052227)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance..

	Name, address of drug substance manufacturer	M/s Hetero Labs Limited. Unit-I, Survey No.10, I.D.A., Gaddapotharam Village, Jinnaram Mandal, Sangareddy District-502319 Telangana State, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 48 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months Batches: (SU0010715, SU0020715, SU0030715)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Sutent Capsule 50mg manufactured by Pfizer Italia S.R.L.(MAH Pfizer Europe) by performing quality tests (Description, Identification, Assay, Dissolution, Uniformity of dosage units). The firm has submitted CDP of Sunitinib 50mg (Batch No# 8055P1) of Lotus Pharmaceuticals Co., Ltd with Sutent Capsule 50mg (batch No# T93732) of manufactured by Pfizer Italia S.R.L.(MAH Pfizer Europe), (Reference Drug Product) in in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	White PVC/Aclar-Alu blisters
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 75% ± 5% for 36months. Batches:(8054P1, 8055P1, 8056P1)
Remarks of Evaluator: Fee submitted on DML		

S.No	Section	Shortcomings Communicated	Reply
1.	1.3.4	Submit Valid DSL.	Valid DSL is attached
2.	1.3.5	Evidence of approval of manufacturing facility / Approved Section of relevant dosage form	GMP Certificate issued from Icelandic Medicines Agency and GMP Certificate issued from Ministry of Health and Welfare Republic of China (Taiwan) is attached in the following pages having details of **Capsule Section** GMP certificate No# IS/GMP/5/22
3.	3.2.P.2.2.1	2) Details of Reference product against which CDP was conducted and its origin. Remarks of Evaluator: On COPP 5ml, 15ml and 45 ml mentioned.		

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.P.2.2.1	• Pharmaceutical equivalence of the applied drug of same strength/fill volume shall be established with same strength of the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed. • Details and origin of Reference product against which Pharmaceutical Equivalence was established and.	We, Naprod Life Sciences Pvt Ltd hereby declare that Pharmaceutical Equivalenc of Carboplatin 150mg/15ml is same as Carboplatin Injection 450mg/45ml and the basic strength of product is 10mg/ml. the change is only in the fill volume, which is as follows. The fill volume for 150mg/15ml is 15.5ml ±0.1 ml The fill volume for 450mg/45ml is 45.5ml ±0.1 ml The product development was performed on higher strength & therefore are requested to consider the same.
2.	3.2.P.5.4	Specifications of applied filled volume as extractable volume of 45ml mentioned.	Revised specifications submitted.
3.	3.2.P.5.4	Certificate of analysis of applied fill volume is required.	Certificate of analysis of applied fill volume is submitted.
4.	3.2.P.8	Submit stability studies of applied fill volume.	We, Naprod life sciences Pvt. Ltd, hereby declare that the carboplatin injection 150mg/15ml & carboplatin injection 450mg/45ml, the bulk solution is of uniform concentration where in each ml contains 10mg of active ingredient, i.e. 10mg/ml. The change is only in the fill volume, which is as follows: The fill volume for 150mg/15ml is 15.5ml± 0.1ml The fill volume for 450mg/45ml is 45.5ml ± 0.1ml The stability studies are performed on higher strength, only filled volume is different.

Registration Board was apprised regarding an e. mail received to Director PE&R Division from M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.

Decision: Deferred for submission of following:

- **Stability studies (both accelerated and long term) as per Zone IVa conditions for the applied strength and fill volume.**
- **Pharmaceutical equivalence studies against the innovator/reference product of relevant strength and fill volume as applied.**
- **Afresh notarized "Sole Agency Agreement" between M/s Lab Diagnostic System & M/s Naprod Life Sciences Pvt. Ltd before issuance of registration letter**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Epirubicin Hydrochloride …….... 10mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Antineoplastic Agents , Anthracycline ATC Code:L01DB03 Epirubicin hydrochloride has produced responses in a wide spectrum of neoplastic diseases, and is indicated for the treatment of breast cancer, gastric cancer, ovarian cancer, small-cell lung cancer, lymphoma (non-Hodgkin's lymphoma), advanced/metastatic soft tissue sarcoma and superficial bladder cancer (Tis, Ta). In bladder cancer, epirubicin hydrochloride is also indicated in the prophylaxis of recurrence after transurethral resection of stage T1 papillary cancers and stage Ta multifocal papillary cancers
	Reference to Finished product specifications	BP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Epirubicin Actavis 10mg Powder for Injection (type I glass vial) by M/s Medis Pharma, TGA Australia Approved.
	For generic drugs (me-too status)	Ciazil Injection 10mg vial (5ml) by M/s Rotexmedica (R#063978)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance..
	Name, address of drug substance manufacturer	INTAS PHARMACEUTICALS LIMITED. 2702/A, GIDC Estate,Ankleshwar 393 002, District: Bharuch, India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 5°C ± 3°C for 60 months. The accelerated stability data is conducted at 25°C ± 2°C / 60 ± 5% RH for 6 months Batches: (71400611, 71400711, 71400811)

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Innorubicin 10mg/Vial Injection) manufactured by BDR Pharmaceuticals pvt Ltd. India by performing quality tests (Description, Identification, pH, Assay, Sterility,).
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	20mm neck size 5ml, Tubular, Flint vial made up of USP type-I glass.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 75% ± 5% for 36months. Batches: NN8494: 36 months, (batch size is 11040 vials) NN9143; 36 months, (batch size is 11040 vials) NN1039-B, 12 months, (batch size is 11040 vials)

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	1.5.5	Pharmacological group is not mentioned.	Antineoplastic Agents , Anthracycline
2.	1.5.6	Specification claimed are B.P while in section 3.2.P.5.1 in-house mentioned/. Clarification is required	The reference product is with in-house specifications and not BP See attached pharmaceutical Equivalence. Submitted product by Naprod Epirubicin Hydrochloride for injection is lyophilized Injection where as Epirubicin Injection in Pharmacopia is Liquid injection.
3.	3.2.P.5.1	Pharmacopeial reference mentioned is in-house while Epirubicin injection is pharmacopeial product. Clarification is required.	The reference/Innovator product and Naprod's (Epicin 10mg) product has in-house specifications. See attached pharmaceutical Equivalence.

Decision: Approved as per policy of inspection of manufacturer abroad with shelf life as per long term stability studies data available at the time of issuance of registration letter.

- **Furthermore, Registration Board was apprised regarding an e. mail received to Director PE&R Division from M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.**
- **In context of above cited e.mail Registration Board decided that firm shall submit afresh notarized "Sole Agency Agreement" between M/s Lab Diagnostic System & M/s Naprod Life Sciences Pvt. Ltd before issuance of registration letter.**

Uniformity of dosage units set by Anfarm are in accordance to the USP monograph.
Anfarm Hellas S.A has set extra specifications for the finished product which include "Time of reconstitution" and "Container / closure integrity'' which shows that the overall specifications of Anfarm are stringent than U
Kindly refer to attachment herewith, where you may find the comparison between the specifications mentioned in the USP monograph and the specifications set by Anfarm, both at release and during shelf life.
It should be noted that based on the comparison, it is evident that:
- The limit for Assay set by Anfarm is stricter to the one set by USP.
- The limit for Impurities set by Anfarm is in accordance to USP monograph at shelf life and stricter at the release.
- The limits for Bacterial endotoxins, Loss on drying, pH, Sterility test, Particulate contamination, and Uniformity of dosage units set by Anfarm are in accordance to the USP monograph.
Anfarm Hellas S.A has set extra specifications for the finished product which include "Time of reconstitution" and "Container / closure integrity'' which shows that the overall specifications of Anfarm are stringent than USP.
Firm claimed that in-house specifications are more stringent than USP specifications.

Controls	**USP monograph of Meropenem Injection**	**Anafarm's Release specification**
Assay	90%-120%	95%-105%
Content of sodium	80%-120%	…

		Sodium carbonate content	….	14.7%-16.1%
		Bacterial Endotoxin	NMT 0.12 EU/mg	NMT 0.12 EU/mg
		Loss on Drying	9.0%-12.0%	9.0%-12.0%
		pH	7.3-8.3	7.3-8.3
		Sterility test	Sterile	Sterile
		Particulate contaminants	Meets the requirements for SVP injections	Meets the requirements for SVP injections
		Uniformity of dosage unit	Meets the requirement	Meets the requirement
2.	Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.	Kindly note that Anfarm Hellas S.A. has performed test for Sodium Carbonate Content, instead of Sodium Content. However, the following should be taken into account: As per the finished product composition, the % content of sodium carbonate is calculated to be equal to 15.4%; i.e. equal to 6.7% (w/w) sodium. ➢ USP limit of Sodium content = 80-120%; i.e. 80-120% of 6.7% sodium = (5.3-8.0%) w/w ➢ Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%) w/w. Thus, Anfarm's limit of sodium content is 6.4-7.0%, which is stricter to USP limit 5.3-8.0%.	
3.	Submit Analytical method verification studies of drug substance performed by M/s Anfarm.	The analytical methods for Assay, Related substances, Sodium carbonate content, Sterility and Bacterial Endotoxins have been validated, confirming their suitability for its intended purpose. The validation studies were performed at the manufacturing site of Anfarm Hellas. Also, please note that the validation studies are the same for the Drug Substance (Meropenem Sterile Bulk) and the Final Product (Meropenem Sterile Vials), as the limit is the same and the final product is the active substance (Meropenem Sterile Bulk) filled in vials.	
4.	Details of Diluent is not submitted.	According to MERREM FDA approved label, the concentration of solution for IV infusion ranges from 1mg/ml to 20mg/ml and there is limited safety data available to support use of a 40mg/kg (maximum of 2g) **bolus dose.** Therefore, for 2g Meropenem, at least 100ml of solution for IV infusion (0.9% NS or 5% Dextrose) should be used and drug should be administered by IV infusion over a period of 15-30 minutes. The Summary of Product Characteristics of MHRA Approved product Meropenem 2g powder for solution for infusion (Attached herewith) also claims that "***There is limited safety data available to support the***	

		administration of a 2g dose in adults as an intravenous bolus injection." Considering that Meropenem Injection 2g is not recommended to be given as bolus dose, hence it can only be administered in In-Patient/Hospital Setups. So, the diluent is not required to be provided along with the product.
5.	Submit details and origin of product against which Pharmaceutical equivalence have been established.	The Pharmaceutical equivalence have been established against the Reference Product **MEROPENEM DR. EBERTH 2g** by **Dr. Friedrich Eberth Arzneimittel GmbH, Am Bahnhof 2, 92289 Ursensollen, Germany** (Approved by Federal Institute for Drugs and Medical Devices, Germany).

Decision: Regsitration Board deferred the application for further deliberation regarding pharmaceutical and clinical features of the innovator product approved by the reference regulatory authorities adopted byRegustration Board in its 275th meeting along with clarification of "Manufacturing Authorization in country of origin i.e., Greece" for Export only purpose..

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 30°C ± 2°C / 75 ± 5% RH for 12 months. The accelerated stability data is conducted at 40°C±2°C and 75%±5% for 6 months Batches: (EZZN170001, EZZN170002, EZZN170003)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparsion have been established against **XTANDI 40mg Soft Gelatin Capsule** by performing quality tests (Identification, Assay, Uniformity of dosage units, Dissolution, , Disintegration Time).
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu-Pvc Blisters
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 75% ± 5% for 36months. Batches: (BENAN0217, BENAN0317, BENAN0417)

<tr><td>6.</td><td>Stability studies provided by drug product manufacturer ANFARM HELLAS S.A while product will</td><td>Firm submit commitment that stability studies for the final product packaged by Global Pharmaceuticals</td></tr>
</table>

	be imported as labelled vials and final packaging will be done by Global Pharmaceuticals. Justify.	will be performed for the first three consecutive batches of commercial scale.
7.	Please specify final quality control release site.	Firm claimed that final quality release site will be Global Pharmaceuticals and the finished product specification are according to USP.
8.	Steps of packaging not mentioned performed in the global pharmaceuticals.	Submitted

Previous Decision (M-322): Deferred for following:

- Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.
- Analytical method verification studies of drug substance performed by M/s Anfarm.
- Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals**.**

S.No	Reason of deferment	Reply
1.	Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.	Kindly refer to table attached herewith, where you may find the comparison between the specifications mentioned in the USP monograph and the specifications set by Anfarm, both at release and during shelf life. Based on the provided table, please take into account the following: Anfarm has performed test for Sodium Carbonate Content instead of Sodium Content for which equivalency is provided below: As per the finished product composition, the % content of sodium carbonate is calculated to be equal to 15.4% i.e., equal to 6.7% (w/w) sodium. • USP limit of Sodium Content = 80-120%; i.e., 80-120% of 6.7% sodium = (5.3-8.0%) w/w. • Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%) w/w. Thus, Anfarm's limit of sodium content is **6.4-7.0%** which is stringent than USP limit **5.3-8.0%**.
2.	Analytical method verification studies of drug substance performed by M/s Anfarm	The analytical methods for Assay, Related substances, Sodium carbonate content, Sterility and Bacterial Endotoxins have been validated, confirming their suitability for its intended purpose. The validation studies were performed at the manufacturing site of Anfarm Hellas. Also, please note that the validation studies are the same for the Drug Substance (Meropenem Sterile Bulk) and the Final Product (Meropenem Sterile Vials), as the limit is the same and the final product is the active substance (Meropenem Sterile Bulk) filled in vials. For reference, Analytical Method Validation is attached.
3.	Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals.	Please note that Quality Control Analysis and Batch Release activities of products **Dowpenem Injection 500mg and 1g** will be conducted by **M/s Global Pharmaceuticals (Pvt.) Ltd.** on the basis of specifications given by the manufacturer

		"Anfarm Hellas" for which Undertaking from M/s Global Pharmaceuticals (Pvt.) Ltd. is attached herewith. Also please find attached herewith, the steps of packaging and handling performed by M/s Global Pharmaceuticals (Pvt.) Ltd.

Decision: Deferred for following:

- **Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formuation .**
- **Details of the manufacturing steps (including packaging and batch release) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad.**

	For generic drugs (me-too status)	Meroget Injection of Getz Pharma Pvt. Ltd. (Reg # 083175)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Name, address of drug substance manufacturer	ACS DOBFAR SpA 2: Addetta Site, Viale Addetta, 2a/12-3/5 20067 Tribiano, Milano - Italy

	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API. Stability study conditions: Real time: 25oC ± 2oC and 60% RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Accelerated Batches: (330772 023 0, 330772 025 0, 330772 027 0) Real time Batches: (330772 8001 8, 330772 8001 0, 330772 8038 1)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical Equivalence against the innovator product Meronem 500mg by AstraZeneca Batch no # 14047 C. Firm submitted justification "The manufacturer of Meropenem injection 500mg and 1g ha performed the pharmaceutical Equivalence on the same Powder of Merpenem trihydrate that is filled in the vials of both 500mg and 1g. Hence, Pharmaceutical equivalence of one strength (500mg) with the Innovator brand shall be considered as as pharmaceutical equivalence of the other strength (1g) That is why the manufacturer has covered the same pharmaceutical equivalence under the heading of both strengths. Moreover, the parameters covering in pharmaceutical equivalence of Meropenm injection 500mg are general and can be used for bulk powder testing. Hence confirming the point of equivalence for meropenem injection"
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Colourless glass Vial type III sealed with rubber stopper and aluminium cap with Plastic flip-off seal
	Stability study data of drug product, shelf life and storage conditions	Accelerated stability studies have been conducted at 40oC ±2oC / 75%±5% RH for 06 months. Real time stability studies conducted at 30 oC±2oC / 65% ± 5% RH for one batch for 36 months (317121) and two batches 24 months (31523, 31813) Batches of stability studies : (317121, 31523, 31813)

Further firm stated that Anafarm do not test sodium content ,however the percentage of sodium carbonate is calculated to be equal to 15.4% i.e. equal to 6.7% (w/w) sodium, so the limits are between 6.7-7.0%.</td></tr>
<tr><td>3.</td><td>Certificate of analysis by both drug substance manufacturer and drug product manufacturer not submitted.</td><td>Firm submitted a declaration letter from ANFARM HELLAS S.A in which it is stated that we,Anafarm S.A. receives Meropenem sterile bulk and not the API Meropenem trihydrate.Thus no analysis on the API is performed and thus no method verification is performed.</td></tr>
<tr><td>4.</td><td>Manufacturing process does not show blending of Sodium carbonate with meropenem trihydrate neither by API manufacturer nor by ANFARM HELLAS S.A</td><td>Firm submitted the reply in which it is stated that the mixing of the excipient Sodium carbonate lyophilized sterile with the API meropenem trihydrate sterile is considered as the first step of the manufacturing process of the sterile bulk.</td></tr>
<tr><td>5.</td><td>Data of compatibility studies has been submitted with ANFARM HELLAS S.A diluent while in this case diluent will be locally purchased and no compatibility studies conducted. Justify.</td><td>Firm submit commitment that they perform compatibility studies of the product with the locally purchased diluent before marketing of the product.</td></tr>
<tr><td>6.</td><td>Stability studies provided by drug product manufacturer ANFARM HELLAS S.A while product will be imported as labelled vials and final packaging will be done by Global Pharmaceuticals. Justify.</td><td>Firm submit commitment that stability studies for the final product packaged by Global Pharmaceuticals will be performed for the first three consecutive batches of commercial scale.</td></tr>
</table>

7.	Please specify final quality control release site.	Firm claimed that final quality release site will be Global Pharmaceuticals and the finished product specification are according to USP.
8.	Steps of packaging not mentioned performed in the global pharmaceuticals.	Submitted

Previous Decision (M-322): Deferred for following:

- Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.
- Analytical method verification studies of drug substance performed by M/s Anfarm.
- Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals**.**

S.No	Reason of deferment	Reply
1.	Justification of not performing test of Sodium content test by M/s Anfarm as recommended by USP monograph.	Kindly refer to table attached herewith, where you may find the comparison between the specifications mentioned in the USP monograph and the specifications set by Anfarm, both at release and during shelf life. Based on the provided table, please take into account the following: Anfarm has performed test for Sodium Carbonate Content instead of Sodium Content for which equivalency is provided below: As per the finished product composition, the % content of sodium carbonate is calculated to be equal to 15.4% i.e., equal to 6.7% (w/w) sodium. • USP limit of Sodium Content = 80-120%; i.e., 80-120% of 6.7% sodium = (5.3-8.0%) w/w. • Anfarm's Limit of 14.7-16.1% of Sodium carbonate corresponds to sodium (6.4-7.0%) w/w. Thus, Anfarm's limit of sodium content is **6.4-7.0%** which is stringent than USP limit **5.3-8.0%.**
2.	Analytical method verification studies of drug substance performed by M/s Anfarm	The analytical methods for Assay, Related substances, Sodium carbonate content, Sterility and Bacterial Endotoxins have been validated, confirming their suitability for its intended purpose. The validation studies were performed at the manufacturing site of Anfarm Hellas. Also, please note that the validation studies are the same for the Drug Substance (Meropenem Sterile Bulk) and the Final Product (Meropenem Sterile Vials), as the limit is the same and the final product is the active substance (Meropenem Sterile Bulk) filled in vials. For reference, Analytical Method Validation is attached.
3.	Details regarding Packaging, Quality control analysis and batch release activities to be conducted by M/s Global pharmaceuticals.	Please note that Quality Control Analysis and Batch Release activities of products **Dowpenem Injection 500mg and 1g** will be conducted by **M/s Global Pharmaceuticals (Pvt.) Ltd.** on the basis of specifications given by the manufacturer "Anfarm Hellas" for which Undertaking from M/s Global Pharmaceuticals (Pvt.) Ltd. is attached herewith.

		Also please find attached herewith, the steps of packaging and handling performed by M/s Global Pharmaceuticals (Pvt.) Ltd.

Decision: Deferred for following:

- **Submission of stability data including performance of test for "Sodium content" as recommended by USP monograph for applied formuation .**
- **Details of the manufacturing steps (including packaging and batch analysis) to be conducted at the site of M/s Global Pharmaceuticals (Pvt.) Ltd. Islamabad.**

Case no. 07 Registration applications of drugs for which stability study data is submitted

Remarks of Evaluator

First letter Dated: 22-10-2020

- You have conducted stability studies before approval of DPI' section as specialized manufacturing and testing are required for manufacturing of DPI . Justify.
- Two different stability data has been submitted with same batch no i.e with different manufacturing dates and analysis dates . Clarify.
- Aerodynamic Particle Size Distribution and "Uniformity of Delivered Dose has not been performed in stability data submitted for first time, hence these testes has been conducted in later submitted data. Justify

Second letter after submission of Rearranged Data
Dated:28-05-2021

S.NO	Shortcomings	Reply
1.	Stability data of Batch No# SB01 manufacturing date:05-05-2018, Stability initiation date 05-05-2018, initial testing date: 08-05-2018, Batch No# SB02 manufacturing date:03-09-2018, Stability initiation date 10-09-2018 initial testing date: 20-09-2018 and Batch No# SB03 manufacturing date:03-09-2018, Stability initiation date 10-09-2018, initial testing date: 20-09-2018 was submitted on 21-07-2020. On reply of letter dated: 22-10-2020 you have submitted data of same batches however in Batch No# SB01 manufacturing date changed as 27-02-2018 and testing dates also changed in each time point in all 03 batches.	There was just typographical error in manufacturing dates of previous data because of which we updated and recompiled the stability data . Furthermore, the reason behind the difference between the dates of all 3 batches is that Batch # SB01 was manufactured on 27-02-2018 while Batch# SB02 and SB03 were manufactured on 03-09-2018
2.	Certificate of Analysis of API from Finished Product manufacturer of Fluticasone Propionate, Salmeterol Xinafoate	Fluticasone Propionate submitted Salmeterol xinafoate with batch No# Sx-0030617 submitted by both API manufacturer and drug product manufacturer while initially submitted COA by API manufacturer and commercial invoice is of Batch No# SX-0071116.
3.	Stability study data of both API from API manufacturer	Fluticasone Propionate, Real time not according to zoneIV-A/B Salmeterol Xinafoate: Submitted
4.	Provide details of device used.	We are using device manufactured by Rizwan Associates, DPI Device (Dry Powder Inhaler Device)
5.	Provide evidence of equipment's used for Delivered dose Uniformity and Aerodynamic size distribution	Pictorial evidence is attached

6.	Scientific justifications of overage of Fluticasone Propionate ,Salmeterol Xinafoate used in manufacturing of stability batches.	As API is present in micro quantities in the product ,powder loss during manufacturing is there hence additional amount of API is added as an overage. **(50% overage is added)**
7.	Aerodynamic size distribution should be performed at each time point while you have not performed between initial and 12 months in real time stability while in accelerated only initial time point performed.. Justification is required	We performed Aerodynamic size distribution studies initially in order to assure the desired quality. DRAP advised us to perform and submit this study at every testing interval, at that time 12 months testing was due we started performing the test at every time point.

Third letter After submission of reply
Dated:18-06-2021

S.No	Shortcoming communicated	Reply
1.	The batch No mentioned on submitted COA's by both API manufacturer and drug product manufacturer (Hudson) is different from that mentioned on commercial Invoice. Clarification is required in this regard	COA of Salmeterol Xinafoate from API manufacturer and Drug product manufacturer submitted in line with invoice
2.	Storage condition for Real time stability studies of API (Fluticasone Propionate) are not according to zone IV-A/B. Clarification is required.	Stability studies of API (Fluticasone Propionate) according to zone IV-B. of 3 batches Submitted
3.	Provide performance based evidence of Loss of API's during manufacturing process as 50% overage is used.	Initially we added 25% overage due to API loss during manufacturing as the API is added in very small quantities. We performed assay of this trial batch and observed that assay results found out of specification. On the basis of this testing we manufactured another trial batch with an overage of 50% and the assay results were found within specification
4.	Performance of test of content uniformity in addition to test of Delivered dose uniformity required to be submitted.	We performed content uniformity tests at time points 0 Month, 1 Month, 3 Month, 6 Month and 9 Month while we started to perform Delivered Dose Uniformity test from time point 12 Month and onwards
5.	Description of the delivery device (inhaler) intended to be marketed along with the applied formulation.	We are using the device manufactured by Rizwan Associates
6.	Provide evidence of equipment used for Delivered dose Uniformity and Aerodynamic size distribution	As per routine cGMP inspection report of Area FID dated 13-12-2019 in which there remarks is QC lab is well equipped with all necessary equipment including Cascade impactor.

4th letter Dated: 06-12-2021

- Provide details of manufacturing Loss of API's during manufacturing process as 50% overage is used.

Decision: Deferred for submission of details of manufacturing loss of drug substance during drug product manufacturing process, as 50% overage of drug substance is included in formulation.

Item No. 5: Agenda of Evaluator PEC-XV (Mst. Saima Hussain)

(a) Import applications of priority categories defined by Registration Board in its 257th meeting

553.	Name, address of Applicant / Importer	**M/s FRESENIUS KABI PAKISTAN PVT LTD**
	Details of Drug Sale License of importer	**License No:** 05-352-0065-019525d **Address:** Tanwir Ahmed Medical Centre (TAMC), First Floor MM Alam Road, 27-C/3, Gulberg III, District Lahore. **Address of Go down:** Agility Logistics, RLC-2 26-Km Multan Road **Validity:** 21-12-2023. **Status:** License to sell drugs as distributor **Renewal: 21-12-2021**
	Name and address of marketing authorization holder (abroad)	Fresenius Kabi AB Rapsgatan 751 74 Uppsala Sweden.
	Name, address of manufacturer(s)	Fresenius Kabi AB Rapsgatan 751 74 Uppsala Sweden.
	Name of exporting country	Sweden
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized CoPP certificate (No. **5.8.1-2021-58760**) dated 13-07-2021 issued by ***Swedish Medical Products Agency*** for Smofkabiven Emulsion for infusion. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. **The name of importing country on CoPP is mentioned as Pakistan. Furthermore the CoPP was valid till 13-08-2022.**
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from Fresenius Kabi AB. The letter species that the manufacturer appoints M/s Fresenius Kabi Pakistan Pvt Ltd. to register their products in Pakistan. The authorization letter is valid until revoke my MAH.

Evaluation by PEC:

CEP no. Certification of suitability of all above-mentioned API is as under:

Sr.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Module-1	Submit the valid cGMP certificate of Manufacturer abroad, since the submitted certificate was based on inspection dated 17-04-2017, more than three years had elapsed since the date of inspection.	Firm submitted the GMP certificate of Manufacturer Abroad certificate number :6.2.1-2020-002243 based on inspection dated 15-10-2020.
2.	1.3.4	Submit valid drug sale license of M/s. Fresenius Kabi, Pakistan, since the submitted DSL was expired on 21-12-2021.	Firm submitted the copy of valid DSL valid till 21-12-2023.
3.	1.5.4	Submit separate application for each individual volume of infusion on Form-5F along with the requisite fee and all the required data/documents as per CTD guidance document, since you have applied for four different volumes of infusion in a single application.	Firm replied that "We would like to go with the following volume/pack size; **For Smofkabiven; 1477ml** **For Smofkabiven Peripheral; 1448 ml** **Later firm changed the volume/pack size as per the available stability data of drug product i.e.** **Smofkabiven: 986ml** **Smofkabiven Peripheral: 1206ml**
4.	3.2.S.4.2	Submit data in section 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "*Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required*."	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore, being an innovator of a product, we have submitted the CEPs for all the APIs.
5.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore, being an innovator of a product, we have submitted the CEPs for all the APIs.
6.	3.2.S.7	Justify for not performing the microbiological testing during the stability studies of following drug substance despite the test is included in the specification of that drug substance: Alanine L-arginine	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore,

		L-histidine L-Isoleucine L-leucine L-lysine acetate L-Methionine L-valine L-Tryptophan L-threonine Potassium Chloride	being an innovator of a product, we have submitted the CEPs for all the APIs.
7.	3.2.S.7	Submit stability summary of three batches of following drug substances performed both at accelerated and long term stability conditions till claimed re-test period. Serine Calcium chloride dihydrate Magnesium Sulfate heptahydrate Potassium Chloride Zinc Sulfate heptahydrate Glucose Monohydrate Olive oil Soybean oil (6 month accelerated study of three batches require)	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore, being an innovator of a product, we have submitted the CEPs for all the APIs.
8.	3.2.P.5.4	Justify for not including the pH determination test in the release specification Mixed three chamber bag to evaluate the final pH of three chambers mixture.	Firm replied that "The justification for not including the analysis of pH in the mixed bag, is that the amino acid solution functions as a buffer. The pH limit for the amino acid solution is 5.4 - 5.8. Due to the buffering capacity of the amino acid solution, the pH of the mixture will take on the same pH as the amino acid solution. Measuring the pH in the mixed bag will therefore not give any additional information and the pH is already controlled in the amino acid solution. In Table 1 and Table 2 the pH in the amino acid solution and in the mixed bag is listed for 10 SmofKabiven batches and 10 SmofKabiven Peripheral batches, respectively.
9.	3.2.P.8	Submit stability data of drug product as per zone IV-a conditions since the submitted data is not in accordance with zone-IV-a conditions.	Firm replied that We wish to inform you that the product SmofKabiven and SmofKabiven Peripheral is three chamber bag Biofine (Semi-permeable) system and the inner bag is separated into three chambers by peelable seal. Each bag contains amino acid solution with addition of electrolytes, Glucose and Lipid emulsion (SmofLipid 20% - Soya Bean Oil, medium chain triglycerides, Olive Oil and Fish Oil). Lipid emulsion consist of triglycerides dispersed in water together with emulsifiers to stabilize the system. SmofKabiven contains 42 % Glucose while SmofKabiven Peripheral contains 13% Glucose strength. **Product has storage condition below 25°C.**

			For the product, stability studies are conducted as per ICH guidelines - Q1A(R2) at below said condition for 24 months • Long term stability conditions: 25 °C ± 2°C/40 % RH ± 5% RH • Accelerated stability conditions: 40 °C ± 2°C/25 % RH ± 5% RH • Intermediate stability conditions: 30 °C ± 2°C/25 % RH ± 5% RH In order to meet the demands from countries in Climatic Zones III and IV, the batches were tested at 30°C/25% RH in addition to 25°C real time studies. The lower relative humidity at 30°C is more critical with regard to weight loss for aqueous based products in semi permeable containers. The results after 24 months storage at 25°C/40% RH and 6 months at 40°C/NMT 25% RH respectively, were all within specification. However, all results after 24 months storage at 30°C/25% RH, were out of specification. This was expected as the amount of free fatty acids will increase as the rate of hydrolysis increases with temperature. Conclusion: At 30°C, all results are out of specification after 24 months and hence Stability studies at Zone IVB condition (30°C/75% RH) for 24 months is not applicable for SmofKabiven products. Also the Lipid Emulsion is not stable at higher temperature since The rate of the hydrolysis and amount of free fatty acids will increase with temperature. Stability studies are conducted as per the ICH guidelines - Q1A(R2) for semipermeable packaging products. The results after up to 24 months of storage at 25°C/40% RH, and 6 months at 40°C/NMT 25% RH, respectively, show that the stability of the separate chambers and the individual mixtures of SmofKabiven fulfil the specification, verifying the quality and shelf life of SmofKabiven when stored at the labelled condition, 25°C for 24 months. Product is already approved and marketed in zone IV ASEAN countries with the storage condition below 25°C.
10	3.2.P.8.1	Please elaborate the procedure of weight loss study, since you have not incorporate the data of initial weight of pack which has been measured/marked initially at the zero-time point. How you have compare the weight loss of individual pack at the	Firm replied that, they have mentioned the initial weight of each bag used in the stability studies at the start of the table i.e. 960ml, 1477ml. Secondly, we have used the same pack for the all the time intervals, and compare the weight loss accordingly.

		next time point, either the same pack was used upto 24 months.	

Decision: Approved as per policy of inspection of manufacturer abroad. Registration Board further decided to approve the storage condition as "Store below 25ºC" with shelf life of two years.

- **Firm shall select only one fill volume before issuance of registration letter.**

1.	Module-1	Submit the valid cGMP certificate of Manufacturer abroad, since the submitted certificate was based on inspection dated 17-04-2017, more than three years had elapsed since the date of inspection.	Firm submitted the GMP certificate of Manufacturer Abroad certificate number :6.2.1-2020-002243 based on inspection dated 15-10-2020.
2.	1.3.4	Submit valid drug sale license of M/s. Fresenius Kabi, Pakistan, since the submitted DSL was expired on 21-12-2021.	Firm submitted the copy of valid DSL valid till 21-12-2023.
3.	1.5.4	Submit separate application for each individual volume of infusion on Form-5F along with the requisite fee and all the required data/documents as per CTD guidance document, since you have applied for four different volumes of infusion in a single application.	Firm replied that "We would like to go with the following volume/pack size; **For Smofkabiven; 1477ml** **For Smofkabiven Peripheral; 1448 ml** **Later firm changed the volume/pack size as per the available stability data of drug product i.e.** **Smofkabiven: 986ml** **Smofkabiven Peripheral: 1206ml**
4.	3.2.S.4.2	Submit data in section 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "*Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required*."	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore, being an innovator of a product, we have submitted the CEPs for all the APIs.
5.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore, being an innovator of a product, we have submitted the CEPs for all the APIs.
6.	3.2.S.7	Justify for not performing the microbiological testing during the stability studies of following drug substance despite the test is included in the specification of that drug substance: Alanine L-arginine L-histidine L-Isoleucine L-leucine L-lysine acetate L-Methionine L-valine L-Tryptophan L-threonine Potassium Chloride	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore, being an innovator of a product, we have submitted the CEPs for all the APIs.
7.	3.2.S.7	Submit stability summary of three batches of following drug substances performed	Firm replied that The Certification of Suitability (CEP) is a certificate that certifies

		both at accelerated and long term stability conditions till claimed re-test period. Serine Calcium chloride dihydrate Magnesium Sulfate heptahydrate Potassium Chloride Zinc Sulfate heptahydrate Glucose Monohydrate Olive oil Soybean oil (6 month accelerated study of three batches require)	compliance of the active pharmaceutical ingredients (API) or pharmaceutical ingredients with that of the rules laid down in the monograph of the European Pharmacopoeia (EP). Therefore, being an innovator of a product, we have submitted the CEPs for all the APIs.
8.	3.2.P.5.4	Justify for not including the pH determination test in the release specification Mixed three chamber bag to evaluate the final pH of three chambers mixture.	Firm replied that "The justification for not including the analysis of pH in the mixed bag, is that the amino acid solution functions as a buffer. The pH limit for the amino acid solution is 5.4 - 5.8. Due to the buffering capacity of the amino acid solution, the pH of the mixture will take on the same pH as the amino acid solution. Measuring the pH in the mixed bag will therefore not give any additional information and the pH is already controlled in the amino acid solution. In Table 1 and Table 2 the pH in the amino acid solution and in the mixed bag is listed for 10 SmofKabiven batches and 10 SmofKabiven Peripheral batches, respectively.
9.	3.2.P.8	Submit stability data of drug product as per zone IV-a conditions since the submitted data is not in accordance with zone-IV-a conditions.	Firm replied that We wish to inform you that the product SmofKabiven and SmofKabiven Peripheral is three chamber bag Biofine (Semi-permeable) system and the inner bag is separated into three chambers by peelable seal. Each bag contains amino acid solution with addition of electrolytes, Glucose and Lipid emulsion (SmofLipid 20% - Soya Bean Oil, medium chain triglycerides, Olive Oil and Fish Oil). Lipid emulsion consist of triglycerides dispersed in water together with emulsifiers to stabilize the system. SmofKabiven contains 42 % Glucose while SmofKabiven Peripheral contains 13% Glucose strength. **Product has storage condition below 25°C.** For the product, stability studies are conducted as per ICH guidelines - Q1A(R2) at below said condition for 24 months • Long term stability conditions: 25 °C ± 2°C/40 % RH ± 5% RH • Accelerated stability conditions: 40 °C ± 2°C/25 % RH ± 5% RH • Intermediate stability conditions: 30 °C ± 2°C/25 % RH ± 5% RH In order to meet the demands from countries in Climatic Zones III and IV, the batches were tested at 30°C/25% RH in addition to 25°C real time studies. The lower relative humidity at 30°C is more critical with regard to weight loss for aqueous based products in semi permeable containers.

			The results after 24 months storage at 25°C/40% RH and 6 months at 40°C/NMT 25% RH respectively, were all within specification. However, all results after 24 months storage at 30°C/25% RH, were out of specification. This was expected as the amount of free fatty acids will increase as the rate of hydrolysis increases with temperature. Conclusion: At 30°C, all results are out of specification after 24 months and hence Stability studies at Zone IVB condition (30°C/75% RH) for 24 months is not applicable for SmofKabiven products. Also the Lipid Emulsion is not stable at higher temperature since The rate of the hydrolysis and amount of free fatty acids will increase with temperature. Stability studies are conducted as per the ICH guidelines - Q1A(R2) for semipermeable packaging products. The results after up to 24 months of storage at 25°C/40% RH, and 6 months at 40°C/NMT 25% RH, respectively, show that the stability of the separate chambers and the individual mixtures of SmofKabiven fulfil the specification, verifying the quality and shelf life of SmofKabiven when stored at the labelled condition, 25°C for 24 months. Product is already approved and marketed in zone IV ASEAN countries with the storage condition below 25°C.
10	3.2.P.8.1	Please elaborate the procedure of weight loss study, since you have not incorporate the data of initial weight of pack which has been measured/marked initially at the zero-time point. How you have compare the weight loss of individual pack at the next time point, either the same pack was used uptill 24 months.	Firm replied that, they have mentioned the initial weight of each bag used in the stability studies at the start of the table i.e. 960ml, 1477ml. Secondly, we have used the same pack for the all the time intervals, and compare the weight loss accordingly.

Decision: Approved as per policy of inspection of manufacturer abroad. Registration Board further decided to approve the storage condition as "Store below 25°C" with shelf life of two years.

- **Firm shall select only one fill volume before issuance of registration letter.**

555.	**Name, address of Applicant / Importer**	**M/s Al Habib Pharmaceuticals**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to

		nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s. Mac Chem Products (India) Pvt. Ltd. N-211/2/10.Tarapur MIDC,Biosar,District Thane, India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 30ºC ± 2ºC,60%±5% RH (60 months) and accelerated time stability study conducted at 40°C±2°C,75%±5% RH (6 months) of following batches: BCL0211001,BCL0211002,BCL0211003
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has established against the innovator product casodex 50mg Tablet (M/s. AstraZeneca Pvt. Ltd.) Batch no. 60022647. Comparative dissolution has performed in all three recommended physiological medium against the innovator brand.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu foil & PVC film coated with PVDC Blister foil.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of 10,000 tablets batch size. The accelerated stability study is conducted at 40°C/75%RH and data of 6 months has submitted. The real time stability study is conducted at 30°C±2°C/75%±5%RH. The real time stability study data of 24 months has been submitted. Batch no. NT1160,NT1161,NT1162

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Drug substance Bicalutamide is a racemate mixture, please provide the detail along with quantitative results, that which enantiomeric	Bicalutamide is racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers.as single enantiomeric form is not used, enantiomeric purity is not applicable.

	form of API has been used in the manufacturing of drug product.	*CASODEX is a racemate with its antiandrogenic activity being almost exclusively exhibited by the R-enantiomer of bicalutamide; the S-enantiomer is essentially inactive.*
2.	Justify for keeping the water content limit NMT 7.0% comparing the water content of active ingredient NMT 0.2%.	Firm replied that our product complies with the current USP monograph of bicalutamide tablet 50mg ,drug product monograph in USP does not contain water content test ,hence the limit of water content was given in-house based on the water content of API ,excipients and manufacturing process.
3.	justify, for submitting the validation report of 150mg strength instead of applied 50mg strength.	Submitted
Registration Board was apprised regarding an e. mail received to Director PE&R Division form M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.		

Decision: Deferred for following:

- **Verification of "Sole Agency Agreement" between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.**
- **Scientific justification regarding declaration of Bicalutamide as racemic mixture i.e. a mixture of equal quantities (50:50) of two enantiomers**

	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25ºC ± 2ºC,60%±5% RH (24 months) and accelerated time stability study conducted at 40°C±2°C,75%±5% RH (6 months) of following batches: 20200901,20200919,20201009
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu-Alu Bottom Foil- 234 mm
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of 100,000 capsules batch size. The accelerated stability study data is conducted at 40°C/75%RH and data of 54 days has submitted. The real time stability study data is conducted at 25°C±2°C/60%±5%RH. The real time stability study data of only 2 points has been submitted includes initial and 54 days' time points.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	**1.5.9**	Submit regulatory status of approval of applied formulation by reference regulatory authority by way of routine procedure of market authorisation.
2.	**3.2.S.4.2**	Submit data in section 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "*Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required*."Since you have only submitted the requisite information provided by drug substance manufacturer.
3.	**3.2.S.4.3**	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have only submitted the requisite information provided by drug substance manufacturer.

4.	**3.2.P.2.2.1**	• Submit the comparative dissolution profile data as per the guidance document approved by Registration Board which specifies that "*Where applicable the results of comparative dissolution profile conducted in three BCS media against the reference product across the physiological pH range along with calculation of similarity factor f2 should be submitted and discussed."* Since you have only submitted the data of test product, which did not fulfill the requirement of comparative dissolution profiling. • Submit data in section 3.2.P.2.2.1 as per the guidance document approved by Registration Board which specifies that "*Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference / comparator product and results of all the quality tests (mentioned in any official pharmacopoe ia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed*."
5.	**3.2.P.5.2**	• According to the assay method given in respective section, for preparation of sample solution weight of powder taken should be equivalent to 250mg of molnupiravir, justify, for taking powder eq. to 250 mg of molnupiravir for the assay of capsule of 200mg strength. • Scientifc justification for including the sample of intermediate blend in the assay of finished drug product along with the supported reference from the international literature,pharmacoepias and international regulatory guidelines.
6.	**3.2.P.5.4**	• Justify for adapting the broader dissolution criteria i.e. NLT 75% (Q) within 45 minutes when the drug dissolved more than 90% at 45 minutes, further the dissolution profiling submitted in section 3.2.P.2.2.1 also revealed that drug shows more than 95% dissolution at 45 minutes. • Justify for selecting 0.1N HCL as a dissolution medium ,when the drug dissolution behavior was similar in all three dissolution mediums after 30 minutes as per the dissolution profiling submit in section 3.2.P.2.2.1.
7.	**3.2.P.6**	Submit COA of reference standard / working standard used for the testing of the stability batches in section 3.2.P.6.
8.	**3.2.P.8**	Submit stability study data of drug product conducted as per zone IV-a conditions till the claimed shelf life, since the stability data of only 1 month has been submitted in the concerned section which was also not conducted at zone IV-a condition.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

04WC021A	01/06/2004	Type II colourless glass bottle, closed by an elastomeric (chlorobutyl rubber) stopper	768
04WC022A	01/06/2004		1020
04WC023A	01/06/2004		2400

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings
1.	Submit original legalized CoPP of Xenetix 300mg Iodine/ml (50ml),since you have submitted the copy of CoPP of product Xenetin 350mg Iodine /ml Injection.
2.	Submit original legalized letter of authorization from Guerbet, France mentioning the product alongwith the applied volume, since you have submitted the copy of letter without any details of applied product.
3.	Submit the legal agreement letter between Hong Kong site and the Guerbet, France since you have mentioned that the product will be exported from Hong Kong to Pakistan. Further,you have mentioned in Form-5F that secondary packaging of applied product will be performed in Pharmtech(HongKong Limited) for Pakistan, so, please clarify the final QC release site of applied product for Pakistan and why the secondary packaging site has not mentioned in the submitted copy of CoPP.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

558.	**Name, address of Applicant / Importer**	**M/s. Medical Equipment & Systems**
	Details of Drug Sale License of importer	**Address:** 60/61 F.C.C. Syed Maratib Ali Road, Gulberg IV, Lahore **Validity:** **Status:** License to sell drugs as distributor

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature,

		structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**Dolutegravir** Mylan Laboratories Limited (Unit-9) Plot No. 5, Road No. 12, J.N. Pharma City, Tadi Village, Parawada Mandal, Visakhapatnam – 531021, Andhra Pradesh, India. **Lamivudine** Mylan Laboratories Limited (Unit-2) Survey No. 10/42, Gaddapotharam, Kazipally Industrial Area Sangareddy District-502319 Telangana, India **Tenofovir Disoproxil Fumarate** Mytan Laboratories Limited (Unit-10) Plot No. 86, Ramky Pharma City (India) Ltd, SEZ, JN Pharma City, Parawada Mandal, Visakhapatnam – 531019 Andhra Pradesh, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of all API **Dolutegravir** 3 batches (25510775, 25510776 & 25510777) 6 months Accelerated (40°C±2°C /75%RH±5%) 24 months Long Term (30°C±2°C /75%RH±5%) **Lamivudine** 3 batches (22103288, 22103289 & 22103290) 6 months Accelerated (40°C±2°C /75%RH±5%) 60 months Long Term (30°C±2°C /75%RH±5%) **Tenofovir Disoproxil Fumarate** 3 batches (25502774, 25502808, 25502828) 6 months Accelerated (30°C±2°C /65%RH±5%) 24 months Long Term (25°C±2°C /60%RH±5%)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted CDP and bioequivalence studies of Acriptega Tablet against its innovator brand ViiV's EPIVIR® Tablets, 300 mg, Gilead's

		VIREAD® Tablets, 300 mg and ViiV's TIVICAY® Tablets, 50 mg.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE bottle pack (30's)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches (2011638, 2011639, 2011640). The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 75% ± 5% RH. The real time stability study data of 3 batches is for 36 months Storage condition: Do not store above 30°C, store in original container. Shelf life: 36 months

Evaluation by PEC:

Section#	Observation	Firm's response
3.2.S.4.1	Justification shall be submitted for applying in-house specifications for the "Tenofovir Disoproxil Fumarate", whereas Pharmacopoeial monograph is available for it.	In CDP study, an Incomplete release of Dolutegravir sodium in all three dissolution mediums (Without surfactant) was observed whereas all other API released completely. FDA dissolution test of Dolutegravir in 0.01M pH 6.8 phosphate buffer showing the use of surfactant 0.25% w/v sodium dodecyl sulfate (SDS) at 45min. The released enhancement was checked with different concentrations of sodium dodecyl sulfate (SDS), the optimized complete release was achieved with 1% w/v sodium dodecyl sulfate (SDS) at 15min.The results showed that the release profile of other APIs had no major impact. After dissolution development surfactant with 1% concentration is used in CDP study.
3.2.P.2.2.1	• The rationale for the choice and concentration of surfactant in dissolution mediums for performance of CDP studies should be provided as mandated by Annex 4 of WHO TRS 970, 2012. • Clarification shall be submitted for non-comparable results of in-vitro drug release for "Tenofovir Disoproxil fumarate" and "Dolutegravir" between reference and test product, although the test product has been declared bio-equivalent with reference product.	The Disintegration time of Acriptega Tablets is little higher (11 mins) compared to single relative API products. Therefore, the initial release of Tenofovir Disoproxil fumarate and Dolutegravir is little low in initial 15 mins compared with single relative reference Products (DT : 1-2 mins). The peak plasma level (Cmax) of Dolutegravir sodium reached in 1 to 3hr The peak plasma level (Cmax) of Tenofovir Disoproxil fumarate reached in 1.0 ± 0.4hr Therefore, initial slow dissolution rate of Acriptega is unlikely to affect the pharmacokinetics. However, The Acriptega is Bioequivalent against combination individual reference product and it is also a WHO Prequalified product.

Decision: Approved as per policy of inspection of manufacturer abroad.

a) <u>Local manufacturing applications of priority categories defined by Registration Board in its 257th meeting</u>

560.	Name, address of Applicant / Marketing Authorization Holder	M/s Hiranis Pharmaceuticals (Pvt.) Ltd

	GMP status of the Finished product manufacturer	DML by way of formulation No. 000785 dated 03-02-2019
	Name and address of API manufacturer.	**Upadacitinib** M/s Zhejiang Hongyuan Pharmaceutical Co. Ltd. **Address:** Chem & API Industrial Zone, Linhai Zhejiang, China, 317016.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification,

		reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph is not present in any pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: **Upadacitinib:** **Real time:** 30˚C ± 2˚C / 65% ± 5%RH for 24 months **Accelerated:** 40˚C ± 2˚C / 75% ± 5%RH for 6 months **Batches:** UPDT190501, UPDT190502 & UPDT190503
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Rinvoq 15mg Tablet** by **M/s AbbVie S.r.l.** by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage form). CDP has been performed against the same brand that is **Rinvoq 15mg Tablet by M/s AbbVie S.r.l.** in Acid media (0.1 N HCL) & Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8): • It was found that both reference & test product shows similar release profile in 0.1N HCl till 24 hours. Therefore, both reference & test product is comparable & the f_2 value was observed to be 83. • It was found that both reference & test product shows similar release profile in pH 4.5 Acetate Buffer till 24 hours. Therefore, both reference & test product is comparable & the f_2 value was observed to be 83. • It was found that both reference & test product shows similar release profile in pH 6.8 Phosphate Buffer till 24 hours. Therefore both reference & test product are comparable & the f_2 value was observed to be 80.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Etoxib 90mg Tablet Etoxib 120mg Tablet Approved in 294th minutes of meeting of DRB
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Upadacitinib:** Copy of GMP certificate No. 213300B0/008106 issued by Linhai Medical & Chemical Industry Administration valid till 31/01/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Attested invoice from ADC attached for Upadacitinib Invoice No. 0405/2021 with courier details
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Observations/Deficiencies/Short-comings	Reply
1.	Justify for setting the recommended sampling time points of dissolution till 12hours comparing the time point recommended by the innovator product i.e. 1, 2, 4, 6, 8, 10, 12, 16, 20, 24 Hours.	Firm submitted the reply that they have chosen three time points until 12 hours (with dissolution >80%) based on the guidelines of USP general chapter <1092>, Ema guidelines and FDA guidance for Industry Extended release oral dosage forms and according to these guidelines "Minimum of three points should be included in the where at least 80% of drug has dissolved."
2.	Dissolution testing data of trial batch no. TF-170521A and TF-170521C at initial time point and 6th month time point respectively, revealed that individual value of dissolution lies outside the specification, justify for not proceeding toward level 2 as recommended by USP general chapter <711> for interpretation of results.	Firm submitted the raw data sheet of trial batch no. TF-170521A in which two units were out of specification and according to the firm difference of values from specification is insignificant, if we apply rounding rule on above values, all values will be within specification. Furthermore, above batch number also used in Pharmaceutical equivalence studies, therefore requirement of L2 stage already met.

		Further, the individual unit data at 6th month time point of trial batch TF-170521C reveals that one unit is out of specification on which firm replied that "*The difference is less than 1%, which is insignificant. As concerned for not proceeding to level 2 of dissolution test under USP <711>. We did not proceed for the L2 stage due to the reasons discussed in details in the submitted response. Furthermore, we have continued the stability studies further to 18months and found the results to be satisfactory*".
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm replied that It is respectfully submitted that Since the Courier Details /Shipment Details are not attested by DRAP therefore, we herewith attached complete Shipment Details for the import of API (Upadacitinib) in this case for your kind perusal. Firm has submitted detailsof courier as follows: • UPS Express receipt (Track# 1Z73AW280403735055). • Copy of Commercial invoice nO. 0405/2021.

Therapeutic indications:

Rheumatoid arthritis

RINVOQ is indicated for the treatment of moderate to severe active rheumatoid arthritis in adult patients who have responded inadequately to, or who are intolerant to one or more disease-modifying anti-rheumatic drugs (DMARDs). RINVOQ may be used as monotherapy or in combination with methotrexate.

Psoriatic arthritis

RINVOQ is indicated for the treatment of active psoriatic arthritis in adult patients who have responded inadequately to, or who are intolerant to one or more DMARDs. RINVOQ may be used as monotherapy or in combination with methotrexate.

Axial spondyloarthritis

Non-radiographic axial spondyloarthritis (nr-axSpA) RINVOQ is indicated for the treatment of active non-radiographic axial spondyloarthritis in adult patients with objective signs of inflammation as indicated by elevated C-reactive protein (CRP) and/or magnetic resonance imaging (MRI), who have responded inadequately to nonsteroidal anti-inflammatory drugs (NSAIDs).

Ankylosing spondylitis (AS, radiographic axial spondyloarthritis)

RINVOQ is indicated for the treatment of active ankylosing spondylitis in adult patients who have responded inadequately to conventional therapy. Atopic dermatitis RINVOQ is indicated for the treatment of moderate to severe atopic dermatitis in adults and adolescents 12 years and older who are candidates for systemic therapy.

Ulcerative colitis

RINVOQ is indicated for the treatment of adult patients with moderately to severely active ulcerative colitis who have had an inadequate response, lost response or were intolerant to either conventional therapy or a biologic agent.

WARNING: SERIOUS INFECTIONS, MALIGNANCY, AND THROMBOSIS

See full prescribing information for complete boxed warning.

• Serious infections leading to hospitalization or death, including tuberculosis and bacterial, invasive fungal, viral, and other opportunistic infections, have occurred in patients receiving RINVOQ.

• If a serious infection develops, interrupt RINVOQ until the infection is controlled.

• Prior to starting RINVOQ, perform a test for latent tuberculosis; if it is positive, start treatment for tuberculosis prior to starting RINVOQ.

• Monitor all patients for active tuberculosis during treatment, even if the initial latent tuberculosis test is negative.

• Lymphoma and other malignancies have been observed in patients treated with RINVOQ.

• Thrombosis, including deep vein thrombosis, pulmonary embolism, and arterial thrombosis, have occurred in patients treated with Janus kinase inhibitors used to treat inflammatory conditions.

DOSAGE AND ADMINISTRATION

• The recommended dose of RINVOQ is 15 mg once daily.

• RINVOQ may be used as monotherapy or in combination with methotrexate or other nonbiologic DMARDs. • Avoid initiation or interrupt RINVOQ if absolute lymphocyte count is less than 500 cells/mm3, absolute neutrophil count is less than 1000 cells/mm3, or haemoglobin level is less than 8 g/dL.		
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** **Registration Board further advised the firm to adopt formal procedure through approval from DRAP I&E for import of drug substance, in future.**

No. of Batches	03 Batches		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred the DRB 312th meeting Minutes for approval of new molecule "ZALPO (VONOPRAZAN) TABLETS 10mg & 20mg which were approved on basis of onsite inspection for another product of same dosage form. The said DRB Meeting minutes has mentioned that: • The HPLC is 21CFR Compliant. • Audit trail on the testing reports of "ZALPO Tablet 10mg & 20mg" were available. • Adequate monitoring & control are available for stability chamber. The firm has installed software for recording temperature/Humidity of the chamber (for real time stability software V5.7T Thermo, India & Accelerated Stability studies, software is Logit Chrt Technoman; Pakistan) & the data can been verified for 01 year.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. JS20180878 issued by CFDA valid till 03/09/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm submitted the Form-6 & invoice dully attested by AD DRAP Karachi on 01/04/2020, confirming the import of API "Bicalutamide USP grade" Qty: 0.24 Kgs ; Batch # BKL-191201 ; Invoice # 20YX2007B ; dated: 02/03/2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all stability batches along with chromatograms , raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted complete compliance record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	submitted

Remarks of Evaluator:

S.no.	**Observations/Deficiencies/ Short-comings**	**Reply of the Firm**
1.	Drug substance Bicalutamide is a racemate mixture, please provide the detail along with quantitative results, that which enantiomeric form of API has been imported and used in the manufacturing of drug product.	Firm replied that they imported API "Bicalutamide" USP grade and there is no enantiomeric purity test in the USP monograph of bicalutamide.
2.	Submit data for both drug substances in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted" Further specify how the testing of drug substance was carried out without performing verification studies.	Firm submitted the analytical method verification studies of drug substance by drug product manufacturer.

3.	Provide COA of valid working standard, since the submitted COA was expired on 12-2021.	Firm submitted the COA of reference standard imported from drug substance manufacturer with the retest date 09-10-2023.
4.	Submit stability data of drug substance as per zone-IV-a condition, since the submitted stability was performed at 25±2°C and 60±5%.	Firm submitted the stability data of 24 months performed both at accelerated and long stability condition: 30°C±2°C,65±5% RH & 40°C ± 2°C / 75% ± 5%RH of following batches: 2013 1004,20131005,20131006
5.	Provide COA of primary / secondary reference standard including source and lot number used for testing of drug product.	submitted
6.	Clarify the acceptance criteria of dissolution in term of time point at which NLT 80% should be achieved, as the time point has not mentioned on stability data sheet. Further set the acceptance criteria of dissolution in term of Q, since the USP monograph specify the limit with Q value i.e. NLT 80% (Q) of the labelled amount of BICALUTAMIDE dissolved.	Firm submitted the correct dissolution acceptance criteria in accordance with USP monograph i.e. NLT 80% (Q) within 45 minutes.
7.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm submitted the reference of 312th meeting of Registration Board in which their product Tranz Tablet approved with stability data.
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Firm submitted the GMP certificate of M/s. JARI Pharmaceuticals Co. Ltd. Lianyungang certificate no. JS20180878 valid till 03-09-2023.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted the copy of Form-6 as an evidence of import of bicalutamide USP grade.

Decision: Registration Board deliberated that since firm has performed the drug substance analysis as per USP monograph including test of related substances hence no further testing for establishing enantiomeric purity of the drug substance is required. Therefore, Registration Board approved the applied formulation.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:
Clinical Indication:
Rheumatoid Arthritis

Approved with the warning box:

Warning

In an overseas clinical trial, pancytopenia leading to a fatal outcome was observed in patients administered 125 mg/day. This drug should be used by physicians with sufficient knowledge of this drug and experience in treating rheumatoid arthritis at medical facilities where adequate measures can be taken in an emergency.

S.no.	**Observations/Deficiencies/ Short-comings**	**Response of the Firm**
1.	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by drug product manufacturer as per the guidance document approved by Registration Board.	Firm submit specification of drug substance and analytical procedure used for routine testing of drug substance by drug product manufacturer.
2.	Submit analytical method verification studies including specificity, accuracy and repeatability (method precision) of drug substance performed by the Drug Product manufacturer under section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board. Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.	Firm submit analytical method validation report of drug substance by drug product manufacturer.
3.	Justify for not performing the comparative dissolution testing at pH 6.8, since it is the recommended medium in which the dissolution studies should be conducted. Further, you have to performed the comparative dissolution testing using test and innovator /reference products under a variety of test conditions as recommended in 293rd meeting of Registration Board. The test conditions may include different dissolution media (pH 1 to 6.8), addition of surfactant, and use of apparatus 1 and 2 with varying agitation. In all cases, dissolution profiles in comparison with the innovator / reference product should be generated. Submit the data in accordance with the said guidance of Registration Board.	Firm replied that Comparative dissolution studies were performed on multiple dissolution buffers including the phosphate buffer pH 6.8 as per USFDA guidelines (mentioned in 293rd meeting of Registration Board), no results were obtained in buffer pH 6.8 as tablet remained intact in this buffer. That's why calculation was not done. Tablet showed more than 90% dissolution in another buffer pH 8.0 as shown in the CDP.For reference we can enclose calculation sheet of CDP in phosphate buffer pH 6.8.
4.	Composition of applied product submitted in respective section is not qualitatively similar to the composition of innovator product, so, in this case please submit the compatibility study of active with the excipients.	Firm submitted the compatibility study of drug substance with excipient.
5.	Justify for selecting the pH 8.0 for the dissolution medium in the light of international literature, review literature of innovator drug, Pharmacopeial recommendations and BCS classification of drug substance.	Iguratimod belong to BCS class-II drug, dissolution of these drugs are obtained in intestinal pH range. Comparative drug profile performed with the dissolution medium pH 6.8 in which tablet remain intact. That's why its result were not included in CDP.
6.	Justify for adapting the broader acceptance criteria i.e. NLT 75% within 60 minutes, since the drug shows more than 90% drug dissolution within 60 minutes as evident from the stability data. Further, justify the adapted dissolution acceptance criteria in the light of guidance "for setting dissolution release	Firm replied that the dissolution studies were performed in phosphate buffer pH 8.0 according to the Chinese Journal of Pharmaceutical Analysis that is a Professional Journal administrated by China Association for Science & Technology sponsored by China Association held by National Institute for Food and Drug control. For BCS-II drugs

	specification" approved in 293rd meeting of Registration Board.	the time points can be taken 30,45 and 60minutes for NLT 75%. But our product attains dissolution more than 85% at 45 minutes so we can take dissolution limit 75% Q at 45 minutes. We have changed the limits in Finished product specification. According to USFDA guidance document for dissolution "For slowly dissolving or poorly water soluble drugs (BCS class 2), a two-point dissolution specification, one at 15 minutes to include a dissolution range (a dissolution window) and the other at a later point (30, 45, or 60 minutes) to ensure 85% dissolution, is recommended to characterize the quality of the product".
7.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted the invoice receipt, which is not attested from DRAP.
8.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted.

Decision: Deferred for following:

- **Documents for the procurement of API with approval from DRAP.**
- **Scientific justifications for the adopted parameters and specifications for dissolution test, while referring to the guidelines from reference regulatory authorities.**

	The proposed proprietary name / brand name	Molvir Capsule 200mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Molnupiravir……200mg (As per innovator Specification)
	Pharmaceutical form of applied drug	White color cap and blue color body, size # 0 having white color powder
	Pharmacotherapeutic Group of (API)	Antiviral
	Reference to Finished product specifications	Manufacturer's Specification
	Proposed Pack size	30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Lagevrio Capsule by Merck sharp & Dohme, UK.
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	GMP granted on 07/10/2021 Capsule (General) approved.
	Name and address of API manufacturer.	**OPTIMUS DRUGS PRIVATE LIMITED** Survey No. 239 & 240 Dothigudem (V), Pochampally (M),Yadadri-Bhuvanagiri (Dist)-508 284.Telangana, INDIA.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Molnupiravir is non-pharmacopeial, so firm has to developed manufacturer's specification. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance

	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (OP-VICTR-A1-001/21, OP-VICTR-A1-002/21 & OP-VICTR-A1-003/21)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Lagevrio Capsule (Batch no: C0021) by Merck, Sharp & Dohme UK Limited by performing quality tests (Appearance, Identification, weight, disintegration, assay & dissolution test). CDP has been performed against the same brand that is Lagevrio Capsule (Batch no: C0021) by Merck, Sharp & Dohme in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer (pH 6.8). The f2 value was in acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	**OPTIMUS DRUGS PRIVATE LIMITED** Dothigudem (V), Pochampally (M),Yadadri-Bhuvanagiri (Dist)-508 284.Telangana, INDIA		
API Lot No.	OP-VICTR-A1-034/21		
Description of Pack (Container closure system)	Alu/alu blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 3 & 6(Months) Real Time: 3, 6, 9, 12,18 & 24 (Months)		
Batch No.	21SB(B)-338-01	21SB(B)-339-02	21SB(B)-340-03
Batch Size	800 Capsules	800 Capsules	800 Capsules
Manufacturing Date	12-2021	12-2021	12-2021
Date of Initiation	18-01-2022	18-01-2022	18-01-2022
No. of Batches	03		
Administrative Portion			
25.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A	
26.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. L.Dis.No: 60996/TS/2021 valid till 24/05/2022.	

27.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Purchase Order No.PO-00010484 for batch no: OP-VICTR-A1-034/21 dated 30.10.2021 is submitted which is without DRAP attestation.
28.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
29.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
30.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Observations/Deficiencies/ Short-comings	Reply
1.	Submit regulatory status of approval of applied formulation by reference regulatory authority by way of routine procedure of market authorization.	Firm submitted the reference of EUA letter of USFDA dated 27th October, 2022 in which it was written that that revising this EUA is appropriate to protect the public health or safety under section 564(g)(2) of the Act, FDA is reissuing the August 5, 2022 letter in its entirety, to incorporate clarifying revisions to Condition BB of this letter.
2.	Submit data in section 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "*Copies of the Drug substance analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required*." Since you have only submitted the requisite information provided by drug substance manufacturer.	Submitted
3.	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have only submitted the requisite information provided by drug substance manufacturer.	Submitted
4.	Submit results of batch analysis in section 3.2.S.4.4 as per the decision of 293rd meeting of Registration Board, which states that "*Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture*".	Submitted
5.	Submit complete stability data of drug substance till the claimed retest date as per zone IV-a conditions.	Firm submitted the stability data of 18 month performed at real time condition as per zone IV-a condition, while the claimed retest date is 60 month.

6.	Justify for selecting 0.1N HCL as a dissolution medium ,when the drug dissolution behavior was similar in all three dissolution mediums as per the comparative dissolution profile submitted in section 3.2.P.2.2.1.	Firm replied that solubility of molnupiravir is greater in 0.1N HCl other two buffers medium that's why we preferred 0.1N HCl as dissolution medium.
7.	Submit the remaining stability data of drug product, since you have submitted only three-month stability data. Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP.	Submitted the stability data of 6 month time point.

Decision: Deferred for following:

- **Documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP.**
- **Regulatory status of approval of applied formulation by reference regulatory authority by way of routine procedure of market authorisation.**

Manufacturing Date	Feb-2022	Feb-2022	Feb-2022

Date of Initiation	08-Feb-2022	08-Feb-2022	08-Feb-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Fortez Injection 2g IV CTD Dossier approved in 317th DRB Meeting held on 16th-17th May-2022
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SD20170569 issued by CFDA & Copy of DML certificate No. Lu 20160006 issued by CFDA valid till 03/11/2025 has been provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	DRAP Approved Commercial Invoice No. A21229J dated 14/10/2021 is enclosed (DRAP Approval Ref. No. 17934/2021-DRAP dated 24-11-2021) (Approval letter No. F.08-10/2021-I&E (QA&LT) is also provided)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

- CAS NO. of starting material used in the applied product is 229016-73-3 i.e. sterile Ceftaroline fosamil monoacetate
- CAS no. of starting material used in the manufacturing of innovator brand is 866021-48-9 i.e. Ceftaroline Fosamil monoacetate monohydrate with the statement that Ceftaroline Fosamil is not stable in the anhydrous form

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	According to the review literature of innovator brand salt form of drug substance is Ceftaroline fosamil acetic acid solvate monohydrate, while the drug substance used in the applied drug product is Ceftaroline fosamil monoacetate as per the information submitted in substance part. Justification is required for variation in the drug substance against the innovator product.	Firm replied that the drug substance used in the applied drug product is same as used by the innovator brand i.e. Ceftaroline fosamil monoacetate monohydrate. However, the CAS number of starting material mentioned in the documents of drug substance manufacturer is different from the CAS no. specified in the review documents of innovator brands.
2.	Please provide complete composition of drug product, specifiy the composition of ceftaroline fosamil monoacetone and L-arginine separately.	Firm replied that Ceftaroline fosamil and arginine are mixed in ratio of 1:0.66 so as per ratio quantity used for injection is Ceftaroline fosamil monoacetate monohydrate eq. to ceftaroline fosamil…400mg Arginine eq. to….264mg
3.	As per the assay results of pharmaceutical equivalence report ceftaroline is quantify instead of ceftaroline fosamil, justification is required in this regard.	Firm replied that it was a typographical error and in pharmaceutical equivalence report in assay ceftaroline fosamil was quantified.
4.	• Justify for not including the test of Constitution Time, Content Uniformity (by Assay) and extractable volume test in the release specification of drug product, since these test are included in the specification of innovator brand.	Firm replied that product is dry powder injection so extractable volume is not applicable and content uniformity test is applicable at the blending stage. However, the test of Constitution Time, Content Uniformity (by Assay) and extractable volume test is

	• Elaborate the calculation formula for determination of potency of ceftaroline fosamil.	included in the release specification of innovator product. Firm submitted the following calculation formula: Assay = 99.2% (on anhydrous,acetic acid & arginine free basis) Potency = {(100-water-arginine-acetic acid)/100}xassay
5.	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Submitted
6.	Justify the dispensed quantity of ceftaroline fosamil injection comparing the potency of active (ceftaroline fosamil).	Filled weight = (Label claim/Potency) x 100 Ceflaro 400mg Injection= (400/56.8416)x100= 703.7mg per vial.

Decision: Deferred for scientific justification for the drug substance used for the formulation of the applied product since as evident from the submitted data drug substance used in applied formulation i.e., Ceftaroline fosamil monoacetate (229016-73-3) is different from that used in the innovator drug product i.e., Ceftaroline fosamil monoacetate monohydrate (866021-48-9).

566.	Name, address of Applicant / Marketing Authorization Holder	M/s High-Q Pharmaceuticals.
	Name, address of Manufacturing site.	M/s High-Q Pharmaceuticals. Plot No.224 & 225/1 Sector 23, Korangi Industrial Area, Karachi-Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 29842 dated 21-10-2022
	Details of fee submitted	PKR 30,000/-: dated 05-10-2022
	The proposed proprietary name / brand name	Daytef 400mg Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: 400mg Ceftaroline fosamil (equivalent to 466mg of ceftaroline fosamil monoacetate monohydrate) powder for intravenous infusion
	Pharmaceutical form of applied drug	Yellow white to light yellow powder for intravenous infusion
	Pharmacotherapeutic Group of (API)	Antibacterial for systemic use
	Reference to Finished product specifications	Manufacturer's Specification
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Teflaro 400mg/vial for Injection, USFDA Approved.
	For generic drugs (me-too status)	Not applicable since the product is New drug
	GMP status of the Finished product manufacturer	GMP issuance date: 21st Dec, 2021 Dry Powder Injectable (Cephalosporin) section is approved

	Name and address of API manufacturer.	M/s Qilu Antibiotics Pharmaceutical Co., Ltd. No.849 Dongjia Town, Licheng District, PC-250105 Jinan, Shandong Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Ceftaroline fosamil is not present in any monograph. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurities specifications, analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 25˚C ± 2˚C / 60% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (60001EJ87Z-A, 60002EJ87Z-A, 60003EJ87Z-A)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, force degradation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator that is Teflaro 400mg/vial for Injection by performing quality tests (Identification, Assay, completeness & clarity of solution, Particulate matter, pH, Water content, Fill weight variation, Related substances, bacterial endotoxin and Sterility test.) CDP is not applicable
	Analytical method validation/verification of product	Method validation studies are submitted including linearity, accuracy, precision, LOD, LOQ, Robustness and Force degradation studies

STABILITY STUDY DATA	
Manufacturer of API	M/s Qilu Antibiotics Pharmaceutical Co., Ltd. No.849 Dongjia Town, Licheng District, PC-250105 Jinan, Shandong Province, China

Date of Initiation	29-03-2022	29-03-2022	29-03-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Inspection dated 12th July, 2018 for verification of authenticity of stability data of Vesoft 400mg/100mg tablet (Approved in 284th meeting minute of Registration Board)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. SD20170569 issued by Shandong Food & Drug Administration valid till 25/06/2023. According to the latest Drug Administration Law of the People's Republic of China, GMP certification program for all the Chinese pharmaceutical manufacturers is cancelled and won't be issued since Dec 1st, 2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Form 6 license No. 2556/21, DRAP/K dated 13/8/2021 is submitted wherein the permission to import for the purpose of test/analysis and stability studies is granted. Commercial Invoice No.A21176J attested by AD I&E DRAP, Karachi dated: 13th Aug, 2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms,Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

- CAS NO. of starting material used in the applied product is 229016-73-3 i.e. sterile ceftaroline fosamil monoacetate
- CAS no. of starting material used in the manufacturing of innovator brand is 866021-48-9 i.e. Ceftaroline Fosamil monoacetate monohydrate with the statement that Ceftaroline Fosamil is not stable in the anhydrous form

S.no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Submit differential fee for the registration of applied new drug product as per the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA dated 7th May 2021.	Firm submit Rs. 45,000/- differential fee vide Challan No.786519557 dated: 09-01-2023
2.	According to the review literature of innovator brand salt form of drug substance is ceftaroline fosamil acetic acid solvate monohydrate, while the drug substance used in the applied drug product is ceftaroline fosamil monoacetate as per	Firm replied that "Molecular formula and structure submitted by the manufacturer (Qilu Antibiotics Pharmaceutical Co., Ltd. China) did not reflect the solvate hydrate. The reason being that they are using USAN (synonym) chemical name of the molecule as the title of the USAN monograph for this drug

	the information submitted in substance part.Justification is required for variation in the drug substance against the innovator product.	substance is Ceftaroline fosamil according to the current USAN dictionary. The USAN monograph currently lists this as monoacetate monohydrate as the chemical name. However, the CAS number of starting material mentioned in the documents of drug substance manufacturer is different from the CAS no. specified in the review documents of innovator brands.
3.	Submit stability data of drug substance as per zone-IV-A condition **OR** In case where the real time stability data of drug substance is not conducted at zone IV-A conditions (e.g 30°C ± 2°C/65% RH ± 5% RH), the drug product manufacturer shall have to submit long term stability studies data of the product for 6 months along with degradation studies in the finished pharmaceutical product.	Firm in their reply submit the validation report of forced degradation studies while the Registration Board in its decision stated that the drug product manufacturer shall have to submit long term stability studies data of the product for 6 months along with degradation studies in the finished pharmaceutical product.
4.	• Justify for not including the test of Constitution Time and extractable volume test in the release specification of drug product, since these test are included in the specification of innovator brand. •	Firm replied that Since we do not have access to innovation's specification, therefore we have performed universal tests (related to dry powder injection) and some specific tests on the finished product. However, considering the importance of these two tests (constitution time & extractable volume), we have performed the tests on retention samples of trial batches of Daytef 400 mg Injection to know the compliance level of our product in comparison with the innovator's product. The results are attached. We have also included these tests in the following documents: Specification and Testing Methods of Daytef 400 mg Injection • Stability Protocol for Commercial batches • Certificate of Analysis format for Finished Product Copies of revised documents, as above, enclosed for your reference.
5.	Elaborate the calculation formula for determination of potency of ceftaroline fosamil.	Firm submitted the following calculation formula: Calculation formula as provided in Doc # API/STM-093 (Raw Material Specification and Control methods): **% of Ceftaroline Fosamil in the sample=(ru/rs) x (Cs/Cu) x P** Where: ru= Peak area of sample solution rs= Peak area of standard solution Cu= Concentration of sample solution in mg/ml = Weight of sample x 10 / Dilution (100 ml) 100 Cs= Concentration of working standard in mg/ml = Weight of standard (Ceftaroline fosamil) / Dilution (100 ml) P= Potency of Ceftaroline Fosamil working standard

		= Taken from the respective CoA from the supplier (ru/rs) = Peak area of Sample / Peak area of Standard
6.	Justify, how ceftaroline fosamil separately eluted using the reference standard of ceftaroline fosamil with arginine.	Firm replied that "Prior to analyzing API mix (Ceftaroline fosamil monoacetate monohydrate + L-arginine) we had run working standard of Ceftaroline fosamil and Reference standard of L-Arginine separately, following exactly the same method as to be used for API mix analysis, in order to identify the peaks and to ensure proper resolution (Certificate of Analysis of both these standards are enclosed in **Annexure 3**). As you would see from the chromatograms of API mix and the reference standard; the peak due to Ceftaroline fosamil and L-arginine are completely separate and reproducible.
7.	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Firm submit the stability data of drug product till 6 month.
8.	Justify the dispensed quantity of ceftaroline fosamil injection with respect to the potency of active.	Firm replied that Ceftaroline fosamil with L-arginine is received as sterile powder, in ready to fill form, therefore the sealed container, of known net weight, is dispensed as such to maintain the sterility. The potency of ceftaroline fosamil is adjusted while calculating the fill weight of powder in vials. % Potency of Ceftaroline fosamil (as monoacetate, monohydrate) = _____% Factor (Ceftaroline fosamil to Ceftaroline fosamil monoacetate monohydrate) = 1.114* Label Claim = Ceftaroline fosamil 400 mg (as Ceftaroline fosamil monoacetate monohydrate) and 264 mg L-arginine per vial Target Fill Weight (Ceftaroline fosamil monoacetate monohydrate) = Label claim x F x 100 / % Potency of Ceftaroline fosamil = 400 x 1.114 x 100 / % Potency of Ceftaroline fosamil = _____ mg/vial (A) Total Fill Weight (Ceftaroline fosamil monoacetate monohydrate + L-arginine) = A + 264 mg = _____ mg / vial * calculated from the molecular weights of Ceftaroline fosamil and Ceftaroline fosamil monoacetate monohydrate: Molecular weight of ceftaroline fosamil monoacetate monohydrate =762.8 Molecular weight of ceftaroline fosamil = 684.7 or 1 mg of ceftaroline fosamil = 1.114 mg of ceftaroline fosamil monoacetate monohydrate

Decision: Deferred for scientific justification for the drug substance used for the formulation of the applied product since as evident from the submitted data drug substance used in applied formulation i.e., Ceftaroline fosamil monoacetate (229016-73-3) is different from that used in the innovator drug product i.e., Ceftaroline fosamil monoacetate monohydrate (866021-48-9).

b) Export facilitation

Export Facilitation: Applications was received through letter No.F.1-76/2019-PR-I (EFD) "M/s Pharmedic Laboratories (Pvt.) Ltd. have achieved benchmark OF USD 1576776.335 as defined in the Board's decision during fiscal year 2020-2021. In this regard, please find the (1 molecule) 05 products applications submitted by the firm."

567.	Name, address of Applicant / Marketing Authorization Holder	**Name:** Pharmedic Laboratories (Pvt.) Ltd. **Address:** 16km Multan Road, Lahore-Pakistan
	Name, address of Manufacturing site.	**Name:** Pharmedic Laboratories (Pvt.) Ltd. **Address:** 16km Multan Road, Lahore-Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.no.2629 dated 27/01/2022
	Details of fee submitted	PKR 30,000/-: dated 24/11/2021
	The proposed proprietary name / brand name	Nevol 2.5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Nebivolol HCl equivalent to Nebivolol…..2.5mg
	Pharmaceutical form of applied drug	White colored, round shaped, biconvex uncoated tablets with both sides plain.
	Pharmacotherapeutic Group of (API)	Beta blocking agent, selective
	Reference to Finished product specifications	Manufacturer's Specification
	Proposed Pack size	1×10's , 3x 10's and 2x 7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Bystolic tablets, Allergen, USA
	For generic drugs (me-too status)	Nabil 2.5mg Tablet by M/s Getz Pharma, Reg. No. 061344
	GMP status of the Finished product manufacturer	Last GMP was granted on 09/06/2020 GMP is in Renewal Process
	Name and address of API manufacturer.	**Name:** Jiangsu Weiqida Pharmaceutical Co., Ltd. **Old Name**: Shanghai Shyndec Pharmaceutical (Haimen) Co., Ltd **Address:** No.1, Linjiang Avenue, Nantong, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures

		and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Nebivolol HCl is not present in any pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, Test for Impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (NBB-1711001-1M, NBB-1711002-1M, NBB-1711003-1M)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Nebil 2.5mg tablet by Getz Pharma (Pvt) Ltd. by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Nebil 2.5mg tablet by Getz Pharma (Pvt) Ltd.in Acid media (pH 1.2), pH 4.5 & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including Specificity, linearity, accuracy, precision (repeatability and Intermediate), Limit of Detection, Limit of Quantification, Robustness.

STABILITY STUDY DATA

Manufacturer of API	Jiangsu Weiqida Pharmaceutical Co., Ltd.		
API Lot No.	NBB-19070031M		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×10's , 3x 10's and 2x 7's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 12 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24, 36 (Months)

Batch Size	1000 tab	1000 tab	1000 tab
Manufacturing Date	09-2020	09-2020	09-2020
Date of Initiation	09-2020	09-2020	09-2020

No. of Batches		03
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by DCA valid till 17/01/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.759/2020DRAP-AD (I&E) dated 13/01/2020 is submitted wherein the permission to import Nebivolol HCl for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	**3.2.S.4.2**	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have only submitted the requisite information provided by drug substance manufacturer.
2.	**3.2.S.4.4**	Justify how you have calculate the potency of nebivolol without HCl as mentioned in the COA of drug substance comparing the COA of drug substance by drug substance manufacturer calculated the assay on anhydrous basis only.
3.	**3.2.P.2.2.1**	• Justify for not performing the test of content uniformity by HPLC and water content test while establishing the pharmaceutical equivalence aginst the reference product, since these test are included in the specification of innovator brand of USFDA. • Justify for not performing the pharmaceutical equivalence and comparative dissolution against the innovator brand/brand leador approved in Pakistan.
4.	**3.2.P.5.1**	• Justify for not including the test of water conent in the release specification of drug product, since these test are included in the specification of innovator brand. • Clarification is required that in assay either you have quantified the nebivolol or nebivolol HCl, since the calculated % is of nebivolol HCl, while the main peak in the chromatogram represent the nebivolol without HCl. • Sample preparation for assay is more general rather than specific, without the clarity that transfer quantity of the sample equivalent to 50mg represent either the quantity of nebivolol or nebivolol HCl. • Justify for adapting the acceptance criteria of dissolution NLT 80% within 45 minutes comparing the results of CDP in 0.01N HCl medium

		which was more than 80% within 15minutes and the acceptance criteria of innovator brand approved in USFDA.
5.	**3.2.R.1.1**	Justify for taking the strength of tablet with HCl factor for calculation of dispensed quantity of powder as revealed from the batch manufacturing record since you have taken the potency of drug substance without HCl on as is basis.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Description of Pack (Container closure system)	Aluminium and Cold forming foil (CFF) which are sealed together and packed in Unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	10000 Tablets	10000 Tablets	10000 Tablets
Manufacturing Date	08-2020	08-2020	08-2020
Date of Initiation	12-2020	12-2020	12-2020

No. of Batches	03	
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**M/s Zhejiang Huahai Pharmaceutical Co. Ltd China:** GMP Certificate No 201907047 issued by CFDA valid till 15-1-2023. **M/s Prudence Pharmachem:** GMP Certificate No S-GMP & GLP/22053332 issued by Food & Drug Control Administration Gujrat India valid till 26-05-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**M/s Zhejiang Huahai Pharmaceutical Co. Ltd China:** ADC Invoice No: HH20201167, 03-June-2020 is submitted wherein the permission to import API (Candesartan) for the purpose of test/analysis and stability studies is granted. **M/s Prudence Pharmachem:** ADC Invoice No: PPC/030/20-21, 30-May-2020 is submitted wherein the permission to import API (Amlodipine) for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	**Sections**	**Observations/Deficiencies/ Short-comings**	**Response of the Firm**
1.	**3.2.S.4.2 (Candesartan Cilexetil)**	Analytical procedure given in section 3.2.S.4.2 exhibited the assay method via HPLC while the assay method which has verified in section 3.2.S.4.3 performed via titration method, clarification is required in this regard.	Firm replied that, to address above mentioned query, we have revised the analytical procedure of Candesartan Cilexetil as per USP monograph and method verification has also been performed accordingly via HPLC
2.	**3.2.P.1**	Composition of applied product submitted in respective section is not qualitatively similar to the composition of innovator product, so, in this case please submit the compatibility study of active with the excipients.	Submitted
3.	**3.2.P.1**	Justify the quantity of amlodipine besylate used in the composition of applied product i.e. 7mg comparing the quantity mentioned in the composition of reference product i.e.6.93mg.	Firm replied that amlodipine besylate 6.93mg is equivalent to about 5mg of amlodipine as per innovator product. The concentration of API 7mg is used in master formulation as 6.93 values are rounded off to 7mg.
4.	**3.2.P.2.2.1**	Justify for not performing all the quality test mentioned in specification of finished product while establishing the pharmaceutical against reference product.	Firm replied that Only significant quality tests including assay and dissolution were performed for establishing pharmaceutical equivalence. Other less critical tests including

			disintegration and average weight tests were not performed at this stage.
5.	**3.2.P.5.1**	Justify for not including loss on drying/water determination test in the specification of finished product.	Firm replied that "As loss on drying/water determination is not included in USP monographs of both Candesartan Cilexetil Tablets and Amlodipine Tablets and proposed packing of product is alu-alu blister , therefore, these tests not included in the specification of finished product".
6.	**3.2.P.5.2**	Scientific justification for setting the UV detector limit at 238nm, since the USP recommended the UV detection limit at 282nm for candesartan cilexetil both in individual and in combination product.	Firm replied that "With respect to selection of 238nm wavelength, please note that combination product having candesartan and Amlodipine is not present in USP, therefore, if we followed individual monographs of Candesartan and Amlodipine product as per USP monograph, we need to perform testing for both API is using different HPLC procedures which was more time consuming. To resolve this Issue, we followed a research article to develop and validate the analytical procedure for simultaneous determination of candesartan and Amlodipine via HPLC using 238nm wavelength".
7.	**3.2.P.5.2**	Justify the selection of Buffer pH 6.8 medium for dissolution from the international literature and pharmacoepial reference, further provide the percentile quantity of polysorbate 80 used in the dissolution medium.	Firm replied that "Preparation of buffer solution for dissolution test has been taken form USP monograph of candesartan Cilexetil Tablets and polysorbate 20 is used as per USP monograph which is mentioned in provided finished product testing method. However, as this product is a non-pharmacopeial product and according to CDP study against comparator product, dissolution results found comparable with comparator product in pH 6.8 buffer, therefore, we selected pH 6.8 for release testing as well".
8.	**3.2.P.8**	Justify for using different method for preparation of sample solution as evident from the raw data sheet from that specified in analytical procedure given in section 3.2. P.5.2.	Firm replied that "Deviation from specified analytical procedure only observed in initial testing of product because at this stage method has been developed and under review if required any improvement. Once method has been finalized including method of preparation of sample solution, no deviation was observed from 3rd. month stability data".
9.	**3.2.P.8**	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted
10	**3.2.P.8**	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted
Decision: Deferred for submission of scientific justification for:			

• **Applying different analytical procedure for the drug substance of "Candesartan cilexetil" analysis than that recommended by the USP monograph.** • **Applied wavelength for Assay analysis of drug product in deviation to that recommended by pharmacopoeial monographs for candesartan cilexetil formulations.**		
571.	Name, address of Applicant / Marketing Authorization Holder	M/s Martin Dow Marker Limited, 7-Jail Road, Quetta
	Name, address of Manufacturing site.	M/s Martin Dow Marker Limited, 7-Jail Road, Quetta
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy.no.2525 dated 26-01-2022
	Details of fee submitted	PKR 75,000/-: dated 10/12/2021
	The proposed proprietary name / brand name	**Canrec AM 8mg+5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Candesartan Cilexetil…...8mg Amlodipine Besilate, BP eq to Amlodipine…...5mg
	Pharmaceutical form of applied drug	Off white, Round Biconvex tablets having break line on one side and other side plain
	Pharmacotherapeutic Group of (API)	Candesartan belongs to a class of drugs called angiotensin receptor blockers (ARBs) Amlodipine belongs to a class of drugs called calcium channel blockers
	Reference to Finished product specifications	Specifications as per Innovator's product.
	Proposed Pack size	As per DPC
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Product Name: Unisia Combination Tablets LD 8mg+ 5mg RRA: Pharmaceuticals and Medical Devices Agency (PMDA) Japan Approved in Austria (Candeblo/Amlo 8mg/5mg Table)
	For generic drugs (me-too status)	Not Applicable
	GMP status of the Finished product manufacturer	Certificate No:015/2021-DRAP (Q)/K issued on 10th September 2021 Tablet (General & Psychotropic), Capsule (General), Oral Liquid Syrup (General), Sterile Liquid Injection/Ampoule, Ointment/Cream, Dry Powder Sachet (General), Dry Powder Suspension (General) section approved.
	Name and address of API manufacturer.	**Candesartan:** M/s Zhejiang Huahai Pharmaceutical Co., Ltd.-Xunqiao site Xuqiao, Linhai, Zhejiang 317024, China. **Amlodipine:** M/s Prudence Pharmachem, Gujarat (India)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities,

		specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: **(Candesartan Cilexetil)** Real time: 30˚C ± 2˚C / 75% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: 5258-12-208,5258-12-209,5258-12-210 Stability study conditions: **(Amlodipine Besylate)** Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: AMB/002/01/14,AMB/003/02/14,AMB/004/02/14
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Innovator product Unisia Tablet 8mg + 5mg Tablet (Innovator product) PMDA Japan by performing quality tests (Identification, Assay, Dissolution). CDP has been performed against the same brand that is Innovator product Unisia Tablet 8mg + 5mg Tablet (Innovator product) PMDA Japan, Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Manufacturing Date		05-2018	09-2018	12-2018
Date of Initiation		29-05-18	03-10-18	21-12-2018
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empaglif 10mg & 25mg tablet in 296th meeting (Bio-Labs (Pvt). Ltd, Islamabad).		

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (NEW-WHO GMP/CERT/KD/74238/2018/11/24897) issued by Maharashtra food and drug administration dated 11-09-2018. The certificate is valid till 10-09-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Colistimethate sodium 5kg from Mac-Chem Products (India)Pvt. Ltd N-211/2/10, MIDC, Boisar District –Thane. The license was issued on 14-02-2020. • Firm has submitted copy of commercial invoice dated 14-02-2020 specifying import of Colistimethate sodium 5Kg. The invoice is signed by AD (I&E) DRAP.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches including COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The product specifications of colistimethate sodium injection based on USP and there is no application of HPLC in testing method because the assay method based on microbial assay therefore compliance record of HPLC is not applicable here.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Observations	**Firm's response**
• Provide detailed analytical procedures for the testing of drug substance by the drug product manufacturer. • Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Firm submitted the analytical method verification studies. Verification has been done on assay procedure which is also not as per the USP.
Justify 90.1mg filled weight of colistimethate sodium per vial against the labelled claim of colistin activity as per the USP monograph of "colistimethate for injection".	Nominal potency of colistimethate sodium used for calculation of filled weight is not correct, according to the innovator product of Colistimethate sodium 1MIU the nominal potency of the drug substance =12,500 IU/mg. So, using of 90.1 filled weight is still not scientifically rationale.
All quality test as per USP monograph has not been performed while establishing the pharmaceutical equivalence against the reference product. Provide results of all quality test of applied and reference product as per USP to establish pharmaceutical equivalence.	Test for uniformity of dosage unit, loss on drying, and free colistin under Colistimethate Sodium are not performed while establishing pharmaceutical equivalence with the reference product, while these tests are included in the USP monograph of colistimethate sodium injection.
Details of type and quantity of diluents used for reconstitution for of applied product is required.	According to the submitted information, to reconstitute the injection, use 3ml 0.9% sodium chloride solution. While the international reference product including the innovator, use the range of 7ml-10ml of water

	for injection or 0.9% sodium chloride for reconstitution of colistimethate injection.
Provide detailed analytical procedures used to evaluate the quality of drug product by the Manufacturer M/s. Bio-Lab Pvt. Ltd.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Further, the test for uniformity of dosage unit, loss on drying, heavy metals, and free Colistin under Colistimethate Sodium are not included in finished product specification, since these tests are included in the USP monograph.
According to the filled BMR batch size of Batch L-159, L-199 and L-182 is 11090vials, 11,000 vials and 11050 vials respectively. While according to the stability data sheet batch size of all three batches are L-159 18,200 vials, L-199 30,000 vials and L-182 28,000 vials. Justification is required regarding the disparity observed in the batch sizes of the same batch.	Firm submitted the reply that "Batch sizes mentioned on stability was written mistakenly. Please consider BMR batch sizes (11,111 packs) as valid batch size. Correct stability data has been submitted.

Decision of 316th meeting of Registration Board:

Deferred for the submission of following:

- Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
- Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:

Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.

Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.

Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.

Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.

Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.

Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included.

Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.

Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.

Decision of 321st meeting of Registration Board:
Registration Board deferred the case for following points:

1. Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
2. Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
3. Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
4. Performance of loss on drying test for drug product as per USP monograph of colistimethate injection**.**

Response of the Firm:

Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.

Firm submitted the Batch manufacturing record of three commercial batches of colicraft 1MIU Injection from M/s. Bio Labs Pvt. Ltd., from which it is evident that sterile colistimethate sodium has been used in the formulation of colicraft and lyophilization has done in the premises of M/s. Bio-Labs Pvt. Ltd.

Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.

Firm has submitted only the microbial assay procedure of drug product without any performance data.

Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.

Firm has submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasole Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay).

Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.

Firm has submitted the revised stability data sheets of batches L-159, L-199 and L-182 in which results of loss on drying test were included.

Decision: Deferred for submission of following:

- **Analytical data for the performance of microbial assay of drug substance and drug product for complete stability studies, in accordance with USP general chapter of microbial assay <81>.**
- **Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.**

573.	Name, Address of Applicant / Marketing Authorization Holder	M/s. Benson Pharmaceuticals Plot #3 Mai Road National Industrial Zone RCCI Rawat Pakistan.

	Status of the applicant	☐Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 9700 dated 02/04/2021
	Details of fee submitted	PKR 50,000/-: vide slip no. 1913592 dated 08/03/2021
	The proposed proprietary name / brand name	Coliben 1MIU Injection IV
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Colistimethate Sodium……...…….1MIU
	Pharmaceutical form of applied drug	Glass vial filled with almost white to off-white colored Lyophilized Powder.
	Pharmacotherapeutic Group of (API)	Antibiotics

	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	Colistim Injection by Pharmasol (Pvt) Ltd
	GMP status of the Finished product manufacturer	GMP certificate issued based upon inspection conduct 23-4-2019, valid upto 22-4-2022.
	Name and address of API manufacturer.	Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc, Boisar District –Thane.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5% RH for 12 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches:(CLS0219006, CLS0219008, CLS0219009)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator i.e. Colistim Injection by Pharmasol (Pvt) Ltd.
	Analytical method validation/verification of product	Firm has submitted report of verification of analytical method for the drug product.
STABILITY STUDY DATA		
Manufacturer of API		Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc, Boisar District –Thane.

Batch Size		18200 Vials	28000 Vials	30000vials
Manufacturing Date		05-2018	09-2018	12-2018
Date of Initiation		29-05-18	03-10-18	21-12-2018
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empaglif 10mg & 25mg tablet in 296th meeting (Bio-Labs (Pvt). Ltd, Islamabad).		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (NEW-WHO GMP/CERT/KD/74238/2018/11/24897) issued by Maharashtra food and drug administration dated 11-09-2018.The certificate is valid till 10-09-2021.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Colistimethate sodium 5Kg from Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc, Boisar District –Thane. The license was issued on 14-02-2020. • Firm has submitted copy of commercial invoice dated 14-02-2020 specifying import of Colistimethate sodium 5Kg. The invoice is signed by AD (I&E) DRAP.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches including COA and summary data sheets.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.		
Remarks of Evaluator:				
• Provide detailed analytical procedures for the testing of drug substance by the drug product manufacturer. • Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.		Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Firm submitted the analytical method verification studies. Verification has been done on assay procedure which is also not as per the USP.		
Justify 90.1mg filled weight of colistimethate sodium per vial against the labelled claim of colistin activity as per the USP monograph of "colistimethate for injection".		Nominal potency of colistimethate sodium used for calculation of filled weight is not correct, according to the innovator product of Colistimethate sodium 1MIU the nominal potency of the drug substance =12,500 IU/mg. So, using of 90.1 filled weight is still not scientifically rationale.		

All quality test as per USP monograph has not been performed while establishing the pharmaceutical equivalence against the reference product. Provide results of all quality test of applied and reference product as per USP to establish pharmaceutical equivalence.	Test for uniformity of dosage unit, loss on drying, and free colistin under Colistimethate Sodium are not performed while establishing pharmaceutical equivalence with the reference product, while these tests are included in the USP monograph of colistimethate sodium injection.
Details of type and quantity of diluents used for reconstitution for of applied product is required.	According to the submitted information, to reconstitute the injection, use 3ml 0.9% sodium chloride solution. While the international reference product including the innovator, use the range of 7ml-10ml of water for injection or 0.9% sodium chloride for reconstitution of colistimethate injection.
Provide detailed analytical procedures used to evaluate the quality of drug product by the Manufacturer M/s. Bio-Lab Pvt. Ltd.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Further, the test for uniformity of dosage unit, loss on drying, heavy metals, and free colistin under Colistimethate Sodium are not included in finished product specification, since these tests are included in the USP monograph.
According to the filled BMR batch size of Batch L-159, L-199 and L-182 is 11090 vials, 11,000 vials and 11050 vials respectively. While according to the stability data sheet batch size of all three batches are L-159 18,200 vials, L-199 30,000 vials and L-182 28,000 vials. Justification is required regarding the disparity observed in the batch sizes of the same batch.	Firm submitted the reply that "Batch sizes mentioned on stability was written mistakenly. Please consider BMR batch sizes (11,111 packs) as valid batch size. Correct stability data has been submitted.

Decision of 316th meeting of Registration Board:
Deferred for the submission of following:

- Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
- Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:
Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.
Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.

Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.

Decision of 321st meeting of Registration Board:
Registration Board deferred the case for following points:

5. Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
6. Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
7. Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
8. Performance of loss on drying test for drug product as per USP monograph of colistimethate injection**.**

Response of the Firm:

Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.

Firm submitted the Batch manufacturing record of three commercial batches of colicraft 1MIU Injection from M/s. Bio Labs Pvt. Ltd., from which it is evident that sterile colistimethate sodium has been used in the formulation of colicraft and lyophilization has done in the premises of M/s. Bio-Labs Pvt. Ltd.

Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.

Firm has submitted only the microbial assay procedure of drug product without any performance data.

Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.

Firm has submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasole Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay).

Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.

Firm has submitted the revised stability data sheets of batches L-159, L-199 and L-182 in which results of loss on drying test were included.

Decision: Deferred for submission of following:

- **Analytical data for the performance of microbial assay of drug substance and drug product for complete stability studies, in accordance with USP general chapter of microbial assay <81>.**
- **Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.**

Manufacturing Date	06-2021	06-2021	06-2021
Date of Initiation	08-07-2021	08-07-2021	08-07-2021
No. of Batches	03		
Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Reference of our last onsite panel inspection for instant dosage form conducted during last two years i.e. IBRUO (Ibuprofen) 800mg/100 ml injection which was presented in 289th meeting of the registration board & hence approved & registered by registration board Date of inspection: 28th January 2019 The inspection report confirms following points The HPLC software is 21CFR Compliant • Audit trail on the testing reports is availa • Adequate monitoring and control are ava chamber. Chambers are controlled and monitored having alarm system for alerts as well. • Related manufacturing area, equipmer utilities are GMP compliant.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate of M/s. Sun Pharmaceutical Industries Ltd., is valid until 31st December 2021and they have applied for further revalidation period from 01.01.2022to 31.12.2024 and their application is under process in this Directorate *(letter attached)*
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of Aramex Courier slip and declaration from API supplier regarding sending of Amisulpride (Quantity of 100gms) through Aramex Courier receipt No. 9155441378 dated 18-04-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Raw data sheets alongwith chromatograph of Amisulpride COA & Summary data sheet are attached
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance record of HPLC software 21CFR & Audit trail testing reports are attached
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Digital data logger for temperature and humidity monitoring of stability chambers are attached

Remarks of Evaluator:

S. no.	Observations/Deficiencies/ Short-comings	Reply of the Firm
1.	Justification is required for not using sterile drug substance for manufacturing of injection, as evident from the COA of drug substance by drug substance manufacturer.	Firm in their reply stated that The API *(Amisulpride)* used for development of our product Ampisol *(Amisulpride)* 5mg/2ml Injection is of injectable grade. API manufacturer has performed test for Bacterial Endotoxin test, Aerobic bacterial test, E. Coli, Salmonella, Pseudomonas & Staphylococcus aureus test to ensure the quality of injectable grade material. Certificate of Analysis of API manufacturer is enclosed for reference. Moreover it is not essential for the drug substance to be sterile for those drug products which are terminally sterilized/aseptically filled in their manufacturing process.
2.	As per the review literature of innovator brand, the drug product is subject to photo	Firm replied that Precautionary measure for photo degradation during manufacturing process from

	degradation within 12 hours, so there are no such precautionary measures included in the manufacturing procedure to protect the filled vials from light neither the step of packaging of filled vial in unit carton preferably within 12 hours after optical checking is included in the final stage. Clarification is required in this regard.	Bulk manufacturing to secondary packaging have been taken and also mentioned in batch Manufacturing record *(BMR)* which is enclosed for reference *(Annex-C, Page no.7, 12, 17)* It is also included in CTD dossier 3.2.P.2.3 Manufacturing process development and in 3.2.P.3.4. Controls of Critical steps and intermediates as a critical parameter, Reference enclosed in *(Annex-D, Page no.4 & 9)* As far duration from optical checking to secondary packaging is concerned, your suggestion is highly valuable for us and we will include this control for commercial production i.e. secondary packaging will be done within 12 hours after optical checking
3.	Submit valid GMP certificate of drug substance manufacturer, since the submitted certificate was valid until 31-12-2021.	Firm submitted the copy of GMP certificate of API manufacturer.
4.	Submit documents for the procurement of API including copy of commercial invoice attested by AD (I&E) DRAP	Firm submit the consignment receipt of API only.

Decision of 322nd meeting of Registration Board:
Deferred for justification of using non-injectable grade drug substance for preparation of parenteral solutions, along with submission of supporting reference from the ICH guidelines or other international stringent regulatory guidance documents.

Response of the Firm:
Firm replied that they have formulation the ampisol injection by using injectable grade API. All the microbiological testing has been performed including Bacterial Endotoxin test, Aerobic bacterial test, E-coli, Salmonella, Pseudomonas & Staphylococcus aureus test in accordance with USP general test <1211> sterility assurance, which assure that our product conforms with the microbiological critical quality attributes.
Reference of USP general test <1211> sterility assurance
The preparation of sterile products encompass a wide range of materials including active pharmaceutical ingredients (small and large molecules), excipients, solvents (usually water), process gases and processing aids, all of which contribute to the microbiological quality attributes of the product. Depending upon the product being manufactured, this can require consideration of bacterial, endotoxin, and particulate contamination. Specific microbiological quality testing requirements for inactive and active ingredients testing is often specified in a relevant USP–NF monograph. Requirements for microbiological testing for total aerobic bacteria, yeast and mold counts, and specified organisms are given in Microbial Enumeration Tests and Tests for Specified Microorganisms, and the recommended but non-mandatory enumeration targets for microbiological testing are given in Microbiological Examination of Nonsterile Products: Acceptance Criteria for Pharmaceutical Preparations and Substances for Pharmaceutical Use. Some specific products may require other testing for specified organisms, including viruses, as a requirement of their regulatory approval. Requirements for bacterial endotoxin testing in injectable products are covered, which describes qualification of Limulus amebocyte lysate testing for acceptable levels of bacterial endotoxin. Raw material specifications must be appropriate to ensure that the manufacturing process consistently results, as demonstrated through process validation, in products conforming to the microbiological critical quality attributes.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration Board further advised the firm to adopt formal procedure through approval from DRAP I&E for import of drug substance, in future.

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	S-GMP/1704043 issued by primal enterprises limited province FDA valid till 23-04-2019

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Form 6 license no. 0159 dated 12-01-2018
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.no.	Observations/Shortcoming	Reply of the Firm
1.	Submit differential fee for the registration of applied product, since the notification for revision of fee vide SRO No. F.7-11/2012-B&A/DRA was published on 7th May 2021 while this application was received in R&I section of DRAP on 20th Aug, 2021.	Firm submitted the fee of Rs.10,000/- vide slip no. 66093415 dated30-09-2022
2.	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by drug product manufacturer in section 3.2.S.4.1 as per the guidance document approved by Registration Board.	Firm submitted the analytical verification report of drug substance by drug product manufacturer.
3.	Submit stability data of drug substance till the claimed shelf life, since, according to the submitted data, study completion date is 16-09-2021.	Submitted
4.	Justify the dissolution acceptance criteria specified in section 3.2. P.5.1 i.e. "NLT 75% of labelled claim within 60 minutes" relative to the result of dissolution testing of three trial batches of drug product which revealed that more than 90% of drug release at each time point in all three batches. Further, justify, the setting of dissolution acceptance criteria in the light of general guidance of dissolution specification approved in 293rd meeting of Registration Board.	Firm replied that Dissolution of product specification is NLT 75% at 60min. This time point is verified in CDP in which 75%+Q dissolution is achieved at 60 min in all the 3 BCS dissolution medium while more than 90% of drug is released at only one time point i.e 60min and 75%+Q drug is also released in water AT 45 min that's why water was taken as dissolution medium which is in accordance with the 293rd meeting of the Registration Board.
5.	According to the procedure of dissolution test submitted in section 3.2. P.5.2 the dissolution medium is purified water, justify the choice of medium with the international reference/literature.	Firm replied that as Teneligliptin dissolution is not described in FDA guidelines then the dissolution parameters are selected using CDP criteria. CDP criteria were conducted in the 3 BCS dissolution medium (pH 1.2-6.8) and also in water. In the 3 BCS dissolution medium dissolution 75%+Q was attained in phosphate buffer 6.8 at 45 min time point but this was at border line. When we performed in water than dissolution was attained from 88.4% to 100.72% for test product at 45 min and 92.18% to 99.73% for innovator product. That's why CDP shows dissolution of both 27% at 15 min, 50% at 30 min, 75% at 45 min and more than 90% at 60 min.
6.	According the given procedure of assay in section 3.2.P.5.2, injection volume should be 10µl and the flow rate should be set at 1.4ml/min, while the chromatogram of analytical method validation studies reveals	Firm replied that It was a typographic error which is now corrected

	that the injection volume was 20µl and the flow rate maintained at 1.0ml/min. Justification is required for changing the chromatographic conditions while performing the analytical method validation studies of drug product from that specified in section 3.2. P.5.2.	
7.	Clarify, either the assay results mentioned in stability data sheets are the content of teneligliptin or the content of hydrobromide hydrate salt form of active. Similarly, dissolution results were mentioned without the time point at which the results are obtained and the acceptance limit were also mentioned without the acceptable time frame.	Firm replied that Results are of teneligliptin on as is basis.

Decision of 322nd meeting of Registration Board:
Deferred for justification of dissolution parameter considering USP general chapter 1092 and innovator product literature.

Response of the Firm:

- Firm replied that they revised the dissolution acceptance criteria from NLT 75% to NLT 80% (Q) within 45 minutes by keeping in view the dissolution profile of drug, where mean drug release is ≥85% in 45 minutes.
- Further firm informed that the average dissolution at 45 minutes is 92.51%, so we can adopt the dissolution criteria as NLT 80%(Q) in 45 minutes.

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **For commercial batches manufacturer shall adopt specifications of NLT 80% (Q) within 45 minutes for dissolution test,**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Shortcomings	Response of the Firm
The median concentration i.e. U3 of colistimethate sodium should be 1mcg/ml as per USP, while the submitted assay method indicate that the median concentration U3 was 5mcg/ml. Clarification is required in this regard. For assay of drug substance, sample has been prepared using reference standard of colistimethate sodium, so justification/clarification is required for using standard material for preparation of sample stock solution.	Firm Stated that USP allows to adjust the Median conc. To optimize the zone sizes if the data remain in the linear range (linearity has been verified), USP <81> chapter has been attached for reference. However, the method of analysis is not as per USP, For the cylinder-plate assay, each plate includes only two treatments, the reference treatment (median level standard, i.e., S3) and one of the other four concentrations of the standard (S1, S2, S4 and S5) or the sample (U3). Firm revised the method in accordance with USP.

	Firm has submitted the reply that "it is a typo error, for sample preparation we use the test sample, accordingly worksheet has been revised and attached.
Validation of analytical procedures Verification of analytical procedure has not been performed in accordance with recommended USP. How the specificity of method has been verified without comparing the results of sample with standard and placebo, as in the submitted data sample solution has not been prepared.	Firm has submitted the reply that "Specificity was done compartively with blank, standard and sample , results are compared, method found selective that was missed in the method verification report, method verification report has been revised and attached for ready reference"
Reference Standards or Materials COA of primary/secondary reference standard including source and lot no. is required.	Firm submitted the COA of working standard supplied by API Manufacturer i.e. M/s. Mac-Chem Products (India) Pvt. Limited batch no. CMS0217012.
Component of drug product: Formulation Development According to the product description, it is white to slightly yellow lyophilized cake of colistimethate sodium while the label claim of product mentioned in the pharmaceutical equivalence data is "sterile lyophilized powder of colistimethate sodium. Correction of label claim is required accordingly.	Firm clarified that it is lyophilized cake as per the innovator coly-Mycin but the label claim of product will be written as Sterile colistimethate sodium equivalent to colistin base ….150mg as per the innovator.
Provide detail of type and quantity of diluent used for reconstitution of applied product. Inform about quantity of diluent used for reconstitution when the product is used for inhalation as nebulizer solution. Compatibility Provide compatibility studies data with its diluent Provide compatibility study data of drug product with its suitable diluent, after reconstitution as per the instructions provided in individual label of the drug product	Firm submitted following reply: We have developed LISTIM 150mg/2ml Injection against the reference listed drug (RLD) i.e. Coly-Mycin M 150mg /2ml injection. Quantity and type of diluents used are as under; INTRAVENOUS OR INTRAMUSCULAR: 2ml of water for injection. Reference: Coly-Mycin M ® Parenteral (Colistimethate for Injection, USP) (Distributed by M/s. Par Pharmaceutical) - INHALATION AS NEBULIZER SOLUTION: LISTIM 150mg/2ml is Lyophilized powder for injection only and product is not used for inhalation as nebulizer solution. Compatibility Study data conducted with water for injection, 0.9% NaCl, 5% Dextrose in water, 10% inverted sugar solution, 5% Dextrose in 0.9% NaCl, 5% Dextrose in 0.45% NaCl, 5% Dextrose in 0.225% NaCl, Lactated Ringers Solution as per the instruction on individual label of drug product has been submitted by the firm.
Analytical procedure: Sample stock solution has been prepared in distilled water while as per the reference product, water for injection or 0.9% sodium chloride should be used as diluent for "colistimethate for injection". Justification is required for using distilled water for preparation of sample solution.	Firm has stated that "This is typo error and sample stock solution prepared using Water for Injection. Revised testing method has been submitted for ready reference"
The median concentration i.e. U3 colistimethate sodium should be 1mcg/ml as per USP, while the submitted assay method indicate that the median concentration U3 was 5mcg/ml. Clarification is required in this regard.	Firm Stated that USP allows to adjust the Median conc. To optimize the zone sizes if the data remain in the linear range (linearity has been verified), USP <81> chapter has been attached for reference. However, the method of analysis is not as per USP, For the cylinder-plate assay, each plate includes only two

	treatments, the reference treatment (median level standard, i.e., S3) and one of the other four concentrations of the standard (S1, S2, S4 and S5) or the sample (U3). While, according to the submitted assay procedure each plate contains three treatments (S3, STANDARD and U3) which is not in accordance to USP. Firm submitted the revised analytical method in accordance with USP.
Provide assay method for the infusion and inhalation route of administration, as the amount of diluent will be varying accordingly for the preparation of sample stock solution.	Firm has submitted that Colistimethate sodium 150mg injection will only be use for injection and same testing method will be used for the sample preparation. LISTIM 150mg/2ml is Lyophilized powder for injection only and product is not used for inhalation as nebulizer solution.
Justification is required for using ±5% acceptance criteria for weight variation, provide the calculation of acceptance value as per USP.	Firm has submitted that "Basis for the limit of weight Variation is BP General Monograph (Consistency of formulated Preparation, sub heading of Uniformity of Weight (Mass), which allows the 10% weight variation for powder for parenteral administration for more than 40mg dosage form. We set the stringent of 5% instead of 10%. For the calculation of weight variation as per USP, calculation sheet has been attached "
Analytical verification report reflects that weight of sample used for sample solution is 240mg instead of 360mg (content per vial) justification/clarification required in this regard. How the specificity of method has been verified without comparing the results of sample with standard and placebo, as in the submitted data sample solution has not been prepared.	Firm has replied that "It was typo error. For sample preparation we use the whole content of product. The revised analytical verification report has been attached for ready reference". Firm has submitted the reply that "Specificity was done comparatively with blank, standard and sample , results are compared, method found selective that was missed in the method verification report, method verification report has been revised and attached for ready reference"
Batch Analyses Appearance of lyophilized cake should be mentioned on batch analysis report rather the appearance of powder of colistimethate sodium for injection.	Firm has submitted that "appearance of lyophilized cake has been revised/amended in the batch analysis report. In the batch analysis report this is missed although available on raw data sheet. Batch analysis report amended and attached for ready reference".
Acceptance criteria of assay is not as per labelled claimed of USP monograph of "Colistimethate for Injection". It is not clear that the given percentage is of colistin or Colistimethate sodium.	Firm has stated that results obtained by our calculation is labelled amount of Colistin according to USP
Stability Appearance of lyophilized cake should be mentioned on stability data sheets rather the appearance of powder of Colistimethate sodium for injection. Provide in use stability data of reconstituted solution along with give the detail of proposed in-use storage statement and in-use shelf-life.	Firm submitted the reply that Appearance of lyophilized cake has been revised/amended in the batch analysis report. The amended stability data sheets have been attached for ready reference. Firm has submitted the in-use stability studies data at storage condition 2-8°c and 20-25°C for 7 days.

Decision of 316th meeting of Registration Board:
Deferred for further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Decision of 322nd meeting of Registration Board:
Deferred for following clarification:

- Manufacturing facility (lyophilized or dry powder filling) wherein the trial batches have been manufactured along with evidence of approval of required manufacturing facility from CLB.
- Applied label claim against the recommendations of USP monograph of Colistimethate for injection.

Response of the Firm:

- Firm replied that they have developed a well-equipped R&D Laboratory for developing formulations and analytical methods of sterile and non-sterile product. The R&D Lab has an efficient HVAC system to meet clean room specification and the R&D LAB has been duly approved by the CLB vide its letter no. F.2-9/2007-Lic (Vol-I) dated 22nd June,2018. Firm submitted the inspection report dated 16,17,20,23 and 24th may,2022 in which it was evident that firm has various LAB scale and pilot scale equipment including lyophilizer.
- Further the commercial batches of applied product will be manufacture in Freeze Dried Injectable section and firm has freeze dried injection section duly approved by CLB vide letter F.2-9/2007-Lic (Vol-I) dated 22-06-2018.
- Firm has submitted revised label claim in accordance with decision of 323rd meeting of Registration Board:
- Each Lyophilized vial contains:
  Colistimethate Sodium equivalent to …..150 mg of Colistin base activity.

Decision of 324th meeting: Approved with label claim for USP specifications as decided in 323rd meeting of Registration Board.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	For generic drugs (me-too status)	Panadol 500mg of M/ GSK
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Hebei Jiheng Pharmaceuticals Co., LTD Address: No. 1Weiwu Street, Hengshui Industrial Park, Hebei Province, China.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for

		48 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months. Batches: (011608001, 011608002, 011608003)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Paracetamol 500mg Tablet by GSK (190312) by performing quality tests (Identification, Average weight, related substances, microbial limit, Assay, Dissolution, Uniformity of weight). CDP has been performed against the same brand by in Acid media (pH 1.2) & Acetate buffer 4.5 pH and Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies of the drug product.
	Container closure system of the drug product	PVC and Aluminium foil
	Stability study data of drug product, shelf life and storage conditions	Accelerated stability studies have been conducted at 40 °C ±2 °C and 75%±5% RH for 06 months. Real time stability studies conducted at 30 °C±2 °C and 65% ± 5% RH for 36months. Batches: (180611, 180612, 180613)

Evaluation by PEC:

S.No	Section	Shortcoming communicated	Response of the Firm
1.	1.3.1	Name and address of marketing authorization holder (abroad)	Submitted
2.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Firm submitted analytical verification studies of drug substance.
3.	3.2.S.4.4	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active	Firm submitted Certificate of analysis by both drug substance manufacturer and drug product manufacturer.

		Pharmaceutical Ingredient manufacture	
4.	3.2.P.2.2.1	• Submit details of manufacturer, marketing authorization including country of origin of product against which pharmaceutical equivalence and Comparative dissolution profile conducted. • F1 or F2 calculation for comparative dissolution not submitted.	Paracetamol 500mg tablet manufactured by Accord Healthcare Ireland Ltd Batch No# 190312 Mfg date: 2019/04 Exp date: 2022/04 (In initial dossier firm submitted that pharmaceutical equivalence and CDP was conducted against Product of GSK in reply they submitted that pharmaceutical equivalence and CDP was conducted against Paracetamol 500mg tablet manufactured by Accord Healthcare Ireland Ltd) • F2 calculations submitted.

Decision of M-321:
The Board deferred the case for clarification since in initial dossier firm submitted that pharmaceutical equivalence and CDP was conducted against Product of GSK in reply they submitted that pharmaceutical equivalence and CDP was conducted against Paracetamol 500mg tablet manufactured by Accord Healthcare Ireland Ltd.

Firm submitted a clarification letter from the QC manager (name of manager was not written) of M/s. Shouguang Fukang Pharmaceuticals in which it was stated that " I, on behalf of Shouguang Fukang Pharmaceuticals would like to inform you here that the pharmaceutical equivalence and comparative dissolution profile which we have submitted has initially mentioned sample of GSK Ireland as the product against which our product paracetamol 500mg tablet has been tested, but it was subsequently corrected as paracetamol 500mg tablet manufactured by Accord Healthcare Ireland ,Batch no. 190312 we would like to confirm here that GSK Ireland was a typographical error which was subsequently corrected.

Decision of 322nd meeting: Deferred for submission of evidence of procurement of innovator drug product alongwith complete details regarding manufacturer and batch no of the innovator product for performance of Pharmaceutical equivalence studies.

Firm's response: Firm has replied as under:

- As the CDP and pharmaceutical equivalence test has been conducted 3.5 years ago and the innovator drug product has also been expired 9 months ago, due to this long time passed, the only evidence we could retrieve was the manufacturer's logbook record, which was also 3.5 years old. Firm has submitted extract of the **"Log book drugs for research purpose"**, declaring the date of delivery as 10-04-2019 for Paracetamol tablets (batch# 190312) of M/s Accord Healthcare Ireland.
- Nonetheless, the manufacturer has conducted a fresh Comparative Dissolution Profile and Pharmaceutical Equivalence test of Paracetamol 500mg tablet and this time the manufacturer has conducted Comparative Dissolution Profile and Pharmaceutical Equivalence test against Calpol 500mg tablet manufactured by GlaxoSmithKline Pakistan Ltd. Firm has submitted following in this regard:

	Sample product	**Reference product**
Batch#	220503	F75L
Expiry date	05/2025	09-2027
f2 factor value in pH 1.2 HCl	88.89	
f2 factor value in pH 4.5 Acetate buffer	86.1	
f2 factor value in pH 6.8 phosphate buffer	84.7	

- Firm has also submitted following:

	i. Pharmaceutical equivalence studies between applied product (Batch# 220503) and reference product i.e., Clapol tablet of GSK Pakistan (Batch# F75L). ii. NOC (No. A-779432715793) issued by AD I&E KDRAP, Karachi, dated 18-11-2022, in the name of M/s Inaya Traders for export of Calpol tablets of M/s GSK Pakistan (Batch#F75L) to M/s Shougang fukang pharmaceutical Co.s, ltd, China vide invoice# 001. iii. DHL shipment receipt (ay bill# 1873478821). iv. Tracking receipt from DHL declaring confirmation of delivery on 14-1-2022. v. Purchase invoice and screenshots of the pack of Calpol tablets of M/s GSK (Batch#F75L) of Reg.# 001612.	
Decision: Approved as per policy of inspection of manufacturer abroad.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Ace bright (India) Pharma Private Limited Address: No. 77D &116/117, KIADB Industrial Area Jigani, Bangalore - 560 105 Karnataka, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 12 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis,

		justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Votrient 200mg (Novartis) has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40ºC±2ºC and 75%±5% RH for 6 months. Real time stability studies conducted at 30ºC±2ºC and 65% ± 5% for 24 months

Evaluation by PEC:

Sr. no.	Shortcomings/Deficiencies	Response of the Firm
1.	Submit data of analytical Method verification studies including specificity, accuracy and repeatability (method precision).	Firm has submitted analytical method validation studies of drug substance performed by drug product manufacturer.
2.	Justify acceptance criteria set for dissolution test i.e. NLT 70% (Q) in 60 minutes, which is not as per the international guidelines as well as the decision of Registration Board i.e. "*For all type of drug products, the value of "Q" should not be less than 75% in any case as per the recommendations of United States Pharmacopoeia (USP) General Chapter <711> Dissolution, Dissolution testing in BP finished products monographs for solid oral dosage forms and The International Pharmacopoeia Ninth Edition, 2019 - Dissolution testing of tablets and capsules"*. As per the submitted data percentage of drug release at 30 minutes was 55.09% in the USFDA recommended release media. Justify, how your formulation can be considered equivalent to the innovator product which shows release more than Q+5% in 30 minutes.	Firm has submitted the reply, in which it is stated that "The dissolution time for pazonix 200mg tablet has been selected 60 minutes as per the FDA dissolution database. In the database, USP apparatus Type-II and 10,20,30,45 and 50 min has been mentioned for profiling. For the immediate release tablet, we have selected 60 mins as a single time point. Firm has not given any scientific justification for selecting the extreme time point i.e. 60 minutes for dissolution of drug product, while the FDA review document of innovator product reveals that the dissolution criteria should be Q= at 30 minutes using the following conditions. Apparatus: USP Apparatus 2 Volume: 900 mL Medium: 50 mM sodium acetate buffer, pH 4.5, containing 0.75% SDS Agitation: Paddle speed of 75 rpm. Analysis: UV at 270 nm with a background correction at 400 nm. Temperature: 37°C.
3.	• Justify how the results of all quality tests for every batch in stability studies are same at all-time points. • Justification is required regarding the out of specification assay results i.e. 46.5mg content of pazopanib per tablet at 6-month time interval during the accelerated stability studies of batch no. 3860003 and 3860004.	Firm has not provided any justification regarding these queries, instead submit the stability data of commercial batches. (batch no. 3860005,3860006,3860007)
4.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Firm has submitted the Batch Manufacturing Record of batch no. 3860002, 3860003 and 3860004.
5.	Firm has submitted the differential fee of Rs. 50,000 vide Challan no.78134245317 dated 22-08-2022 for finished import drug product, as per notification No.F.7-11/2021-B&A/DRAP dated 13-07-2021.	

Decision of M-321:

Deferred for Scientific justification regarding difference in dissolution limits in terms of %age released and time point from that recommended by the US FDA for innovator product.

Firm revised the Dissolution parameters as per the recommendation of USFDA approved innovator product, however the submitted document did not clarify the percentage release which should be achieved at 30 minutes.

Decision of 322nd meeting of Registration Board:
Deferred for submission of dissolution test in compliance to revised dissolution parameters as per innovator drug product.

Response of the Firm:
Firm submitted the stability data of two commercial batches of Pazonix 200 tablet of M/s. Beacon Pharmaceuticals in which the dissolution criteria is NLT 70%(Q) of the labelled amount of pazonib is dissolved within 30 minutes. Details of batches and dissolution results are as under;
Accelerated Stability Data (30 days)
Long Term Stability Data (30 days)

Batch no.	Manufacturing Date
3860019	28-Nov-2022
3860020	28-Nov-2022

Decision: Approved with Innovator's specifications as per policy of inspection of manufacturer abroad. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

	Pack Size & Demanded Price	As per S.R. O
	Approval Status of Product in Reference Regulatory Authorities	WHO prequalified (Zinc Sulphate Dispersible Tablet 20mg)
	Me-too Status	Zincat Dispersible Tablet 20mg of M/s. Atco Lab., Karachi (Reg.no. 070452)
	GMP Status	CAPA inspection report (Date of inspection:19/07/2021) in line with inspection conducted on 03/11/2020 concluded with the following remarks: "The firm was inspected on 19-07-2021 and improvement has been done by the firm and is satisfactory. Further improvement is a continuous process and firm is willing to improve further."
	Remarks of the Evaluator.	• Firm applied for the uncoated tablet while the reference product is dispersible tablet so revision of formulation as per reference is required. • Firm applied with USP specification while the official monograph of applied formulation is not present in USP, BP, JP and IP.
	Decision of 312th meeting of Registration Board	Deferred for either submission of evidence of approval of reference product as uncoated tablet or otherwise revision of applied formulation in line with reference product i.e. Dispersible tablet

		along with submission of requisite fee, master formulation & manufacturing method.
	Response of the Firm	Firm submitted the revised master formulation in line with WHO prequalified product and available registered Me-Too i.e. zinc sulphate dispersible tablet instead of simple zinc sulphate tablet. (without fee) Further firm claimed USP specification while the monograph of zinc sulphate dispersible tablet is not present in USP.
	Decision: Approved with Innovator's specifications as per following label claim: **"Each dispersible tablet contains:** **Zinc Sulphate Monohydrate eq. to elemental Zinc…20mg"** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product dosage form to dispersible tablet as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**	

Following case has been forwarded from Registration Section vide letter no.1-11/2019-Reg-II dated 28TH April,2021 with reference to the decision of 297th meeting of Registration Board regarding the registration application of following product i.e. "*Registration Board decided to refer the product to PEC for evaluation as this product has not been previously considered in any meeting of Registration Board".*
After evaluation the case is presented as follows:

584.	Name and address of manufacturer / Applicant	**M/s. Hansel Pharmaceuticals (Pvt.) Ltd. Plot no.02 Pharma city,30 km, Multan Road Sunder, Lahore**
	Brand Name +Dosage Form + Strength	Neurovit Injection (IM)
	Diary No. Date of R& I & fee	(Duplicate Dossier) Dy. No. nil dated 20/05/2011 Rs. 8,000/- (photocopy) (receipt of application has not verified from the record of R&I) Differential fee (photocopy) of Rs.12,000/- submitted on 05-08-2019 Dy.No. nil
	Composition	Each 3ml contains: - Vitamin B1 …… 100mg Vitamin B6 ……. 100mg Vitamin B12 ……. 1000mcg
	Pharmacological Group	Multivitamin Formulation
	Type of Form	Form 5
	Finished Product Specification	Manufacturer's Specification
	Pack Size & Demanded Price	As per S.R. O
	Approval Status of Product in Reference Regulatory Authorities	Product is approved in DMDI Germany neurobion Injection (intramascular use) Each 3ml contains: Thiamine Chloride HCl….100mg pyridoxine hydrochloride….100mg cyanocobalamin…….1000mcg
	Me-too Status	Neurobion Injection of M/s. Martin Dow (Reg.no. 001485) THIAMINE HCL (vitamin B1) 100MG, PYRIDOXOL HCL (Vitamin B6) 100MG, CYANOCABLAMIN (Vitamin B12) 1000MCG,
	GMP Status	Copy of last DML renewal inspection report dated 15-5-2019 alongwith GMP certificate of liquid injectable (General) dated 18-GMP certificate for liquid injectable (Hormone) is not .07-2019 granted till now due to reallocation of section from first floor to ground floor. In DML renewal inspection, penel also recommended .approval of reallocated areas
	Remarks of the Evaluator.	Registration application submitted in 2011 has send for verification in R&I Section of administration division and the section replied that the application has not been found in record of R&I section.s
	Decision: Deferred for submission of R&I receiving from DRAP for initial submission of registration application.	

Item No. 6: Agenda of Evaluator PEC-XX (Mst. Sana Kanwal)

Priority molecules:

Following firms have requested to consider their application(s) on priority as per decision of Registration Board 257th meeting:

585.	Name, address of Applicant / Importer	M/s Al-Habib Pharmaceuticals, Plot#81-B, block B, SMCHS, Karachi.
	Details of Drug Sale License of importer	DSL No.: 1245 Address: M/s Al-Habib Pharmaceuticals, Plot#81-B, block B, SMCHS, Karachi.. Godown: Plot No. 10 Sector 25, K I A Karachi HT-8, Landhi Industrial Area, Karachi. Validity: 18/05/2022 Status: Drug License by way of wholesale
	Name and address of marketing authorization holder (abroad)	NAPROD LIFE SCIENCES PVT. LTD. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, INDIA
	Name, address of manufacturer(s)	NAPROD LIFE SCIENCES PVT. LTD. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, INDIA
	Name of exporting country	India
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	CoPP: Original legalized CoPP (certificate No. CoPP/CERT/KD/83894/2019/11/27844/143353) valid till 03-04-2022 issued by Food and Drug Administration Mahrashtra Estate Mumbai for Methotrexate Tablets 2.5mg . The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. GMP: Firm has submitted GMP certificate No. NEW-WHO-GMP/CERT/KD/80691/2019/11/27530 issued by Food and Drug Administration Mahrashtra Estate Mumbai. Valid till 03.04.2022
	Details of letter of authorization / sole agency agreement	Firm has submitted Original Authorization letter from Naprod Life Sciences Pvt. Ltd. The letter species that the manufacturer appoints M/s Al-Habib Pharmaceuticals, Plot #81, block B, SMCHS, Karachi as a sole agent and distributor to register their products in Pakistan .
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale

		☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 5224: 24-02-2022
	Details of fee submitted	PKR 150,000/-: 26-01-2022
	The proposed proprietary name / brand name	ALLTREX (Methotrexate) 2.5mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet contains: Methotrexate ……. 2.5 mg
	Pharmaceutical form of applied drug	Tablets
	Pharmacotherapeutic Group of (API)	Anti-Metabolite (L04AX03)
	Reference to Finished product specifications	BP
	Proposed Pack size	As per Policy
	Proposed unit price	As per Policy
	The status in reference regulatory authorities	Methotrexate Orion 2.5 mg tablets by Orion Pharma UK MHRA approved
	For generic drugs (me-too status)	Methotrexate Tablet 2.5mg by Werrick Pharmaceuticals (025084)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Mac Chem Products (India) Pvt. Ltd. N-211/2/10. MIDC, Boisar Thane 401506 MAHARASHTRA state India. GMP: Firm has submitted GMP certificate No. NEW-WHO-GMP/CERT/KD/74238/2018/11/24897 by Food and Drug Administration Mahrashtra Estate Mumbai. Valid till 10.09.2021
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 60 months

		Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: MTX0213042, MTX0213043, MTX0213044,
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established against the reference product (Methotrexate Tabs 2.5mg Mfg. By Orion Pharma, UK). Quality parameters such as Disintegration time, hardness, dissolution, average weight, thickness etc were compared. Firm has submitted Comparative Dissolution Profile for the applied product as follows Test Product Naprod Methotrexate tablet 2.5mg Reference product Orion methotrexate tablet 2.5mg Medium Water,Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). On the basis of similarity factor (f2) result i.e NLT 50 of dissolution profile of API in test product and reference product, both products are similar.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu-Alu Blister
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches 24 months real time stability data at 30°C ± 2°C / 75% ± 5%RH of 03 batches 06 month accelerated stability data 40°C ± 2°C / 75% ± 5%RH of 03 batches NT8132. NT8133, NT8134
Remarks of AD (PECXX): USFDA approved Box warning for methotrexate tablet is as follows:		

METHOTREXATE tablets, for oral use
Initial U.S. Approval: 1953

WARNING: EMBRYO-FETAL TOXICITY, HYPERSENSITIVITY REACTIONS, and SEVERE ADVERSE REACTIONS

See full prescribing information for complete boxed warning.

- **Methotrexate Tablets can cause embryo-fetal toxicity, including fetal death. For non-neoplastic diseases, Methotrexate Tablets are contraindicated in pregnancy. For neoplastic diseases, advise patients of reproductive potential of the potential risk to a fetus and to use effective contraception. (4, 5.1, 8.1, 8.3)**
- **Methotrexate Tablets are contraindicated in patients with a history of severe hypersensitivity reactions to methotrexate, including anaphylaxis. (4, 5.2)**
- **Serious adverse reactions, including death, have been reported with methotrexate. Closely monitor for adverse reactions of the bone marrow, gastrointestinal tract, liver, lungs, skin, and kidneys. Withhold or discontinue Methotrexate Tablets as appropriate. (5.3, 5.4, 5.5, 5.6, 5.7, 5.8)**

Sr.#	Observation	Reply	Remarks
1.	RRA approved formulations are Methotrexate sodium/disodium (eq to Methotrexate) while applied product is in base form. Clarify it or provide reference regarding applied formulation (base form) in any reference country.	Relevant reference is provided by the firm as follows: MHRA approved product Methotrexate tablet 2.5mg by Sandoz Ltd	Verified MHRA approved product Methotrexate tablet 2.5mg by Sandoz Ltd is also approved in base form. Each tablet contains methotrexate 2.5 mg
2.	Compatibility of the Drug Substance(s) with excipients (Sodium Lauryl Sulphate, sodium starch glycolate, colloidal silicon dioxide) is not provided	Excipients used in formulation do not influence physicochemical property of Drug product and are routinely used in pharmaceutical industry	Sodium starch glycolate is found in RRA (MHRA) approved formulation By Cipla (EU) Limited **However Compatibility of the Drug Substance(s) with Sodium Lauryl Sulphate and colloidal silicon dioxide is required.**
	Registration Board was apprised regarding an e. mail received to Director PE&R Division form M/s Miles International India (authorized exclusive representative for the export of products manufactured by Naprod Life Sciences for the Pakistan region), wherein firm has requested to not consider any product registration applications made by any other party other than LDS as they will not be able to supply these products in the future.		

Decision: Deferred for verification of "Sole Agency Agreement" between M/s. Al Habib Pharmaceuticals, Plot # 81, Block B, SMCHS, Karachi & M/s Naprod Life Sciences Pvt. Ltd. Factory: G-17/1, M.I.D.C., Tarapur, Boisar, Dist. Thane-401 506, India.

586.	Name, address of Applicant / Importer	M/s Revive Health Care, 503, 5th floor, Eden heights, 6 main Gulberg, jail road, District Lahore

	Name of exporting country	Turkey
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP is not provided. Firm has submitted original, legalized GMP certificate (No. TR/GMP/2020/36) based on inspection dated 13th-15th.03.2019 issued by Republic of Turkey Ministry of Health (Turkish Medicines and Medical Devices Agency) valid till 03 years from the date of inspection.
	Details of letter of authorization / sole agency agreement	Firm has submitted original legalized letter of authorization distribution certificate from Biem İlaç San. ve Ticaret. A.Ş. The letter specifies that the manufacturer appoints M/s Revive Healthcare to register their product BUSLERA (Busulfan 60mg/10ml) in Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 3332 : 03-02-2022
	Details of fee submitted	PKR 75,000/-: 31-12-2021
	The proposed proprietary name / brand name	Buslera 60 mg/10 mL vial containing concentrated solution for IV infusion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 10 ml vial contains: Busulfan…….60 mg
	Pharmaceutical form of applied drug	Concentrated solution for IV infusion packed in type-I transparent glass vials.
	Pharmacotherapeutic Group of (API)	Cell cycle non-specific alkylating antineoplastic agent (L01AB01)
	Reference to Finished product specifications	In house
	Proposed Pack size	1’s
	Proposed unit price	As per SRO/PRC

	The status in reference regulatory authorities	Busulfan 6 mg/ml concentrate for solution for infusion by Accord Healthcare, UK (MHRA Approved).
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shilpa Medicare Limited, plot No 33, 33-A, 40 to 47 , Blocks C,D,E,H,I and AM Raichur Industrial Growth Center, Chicksugur-584 134, Dist Raichur, Karnataka, India Copy of GMP certificate No DCD/SPL.CL/CR-262/20-21 dated 06.07.2020 valid till 13/02/2023
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25oC ± 2oC/60%±5% RH for 24 months. The accelerated stability data is conducted at 40oC ± 2oC/75%±5% RH for 6 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Busilvex TM 6 mg/mL vial containing concentrated solution for IV infusion By M/s Pierre Fabre, France by performing quality tests (Appearance, pH, Identification, Density & Assay).

		CDP – Not applicable
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	USP type-I glass vial, Bromobutyl rubber stopper
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 2 pilot & 5 commercial batches. The accelerated stability study data is conducted at 25oC ±2oC / 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5oC ±3oC for 36 months. . The real time stability study data of 2 pilot & 5 commercial batches submitted for 36 months. In use stability report with 0.9% isotonic solution and 0.5% dextrose IV solution at 20oC ±5oC for 8 hours, at 2oC-8 oC for 12 hours and 20oC ±5oC for 3 hours.

Remarks by assessor (AD PECXX):

USFDA approved Box warning for BUSULFEX (busulfan) for injection as follows:

WARNING: MYELOSUPPRESSION

See full prescribing information for complete boxed warning.

- **Causes severe and prolonged myelosuppression.**
- **Hematopoietic progenitor cell transplantation is required to prevent potentially fatal complications of the prolonged myelosuppression. (5.1)**

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 commercial scale batches (B5FC1, B5FF2, B5FE1). The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 65% ± 5% RH for 24 months.

Remarks of Assessor (AD-PECXX):

Applied formulation has been approved in USFDA with box warning as follows:

WARNING

See full prescribing information for complete boxed warning.

- **Neutropenic deaths have been reported. Obtain frequent blood counts to monitor for neutropenia. Do not give JEVTANA if neutrophil counts are ≤1,500 cells/mm^3. (2.2)(4)**
- **Severe hypersensitivity can occur and may include generalized rash/erythema, hypotension and bronchospasm. Discontinue JEVTANA immediately if severe reactions occur and administer appropriate therapy. (2.3)(5.2)**
- **Contraindicated if history of severe hypersensitivity reactions to JEVTANA or to drugs formulated with polysorbate 80. (4)**

Innovator product is available as follows:

JEVTANA (cabazitaxel) Injection 60 mg/1.5 mL is supplied as a kit consisting of the following:
- JEVTANA Injection 60 mg/1.5 mL: contains 60 mg cabazitaxel in 1.5 mL polysorbate 80,
- Diluent for JEVTANA Injection 60 mg/1.5 mL: contains approximately 5.7 mL of 13% (w/w) ethanol in water for injection

Each vial of JEVTANA (cabazitaxel) 60 mg/1.5 mL must first be mixed with the entire contents of supplied diluent. Once reconstituted, the resultant solution contains 10 mg/mL of JEVTANA.

Applied formulation Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion is as follows:

Each vial of 6 ml of concentrate for solution for infusion contains cabazitaxel 60 mg

Each vial of 4.5 ml of concentrate for solution for infusion contains cabazitaxel 45 mg

S. No	Observations	Reply	Remarks
1.	Compatibility of the Drug Substance(s) with excipient (Macrogol 300) is not provided since said ingredient is not found in innovator product i.e Jevtana injection (USFDA approved)	Innovator drug is a two vial system where the user has to prepare an intermediate premix of the concentrate containing 60mg/1.5ml cabazetaxel together with solvent i.e Ethanol while instant formulation is ready to dilute, premixing is not required. PEG has been selected as co-solubilising agent to achieve intended drug concentration i.e 10mg/ml alongwith ethanol and polysorbate 80. Compatibility with Macrogol 300 has been shown in stability data submitted under section 3.2.P.8 wherein formulation is found stable	Justified
2.	Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters of developed formulation against reference product while instant application provided comparison regarding composition (qualitative/quantitative) against JEVTANA Injection	Micelle sizes of applied formulation was compared against innovator product using Dynamic Light Scattering method, the parameter D90 indicated that 90% of the total amount of particles are smaller or equal to this size. Critical Micelle concentration (CMC) prior to infusion, of applied formulation was compared against innovator product, which was found similar. Zeta potential of test drug product and innovator product was also assessed in 0.9% NaCl and 5% Glucose, which was found similar. Furthermore, difference in disassembly of micelles upon dilution in human plasma was studied between applied drug product and innovator product, no difference was observed.	Justified The In vitro /In vivo studies revealed that applied formulation is pharmaceutically equivalent to innovator product

3.	Provide reference of applied monograph i.e European Pharmacopeia adopted for finished product specification.	There is no monograph published for Cabazitaxel injection/infusion. the Drug Product specification was defined on the basis of QbD approach identifying CQA.	**Since proposed Finished product specification mentioned on Form5F were "European Pharmacopeia" hence correction in specification is required along with fee.**
4.	In-use stability data (after dilution in glucose 5% or sodium chloride 9 mg/ml (0.9%) solution for injection) has not been submitted.	Firm has submitted "In use stability data" (infusion solution stability study) at 15-25°C for 8 days and at refrigerated conditions (2-8°C) for 14 days (batch No B5TS1)	Complied

Decision: Approved with Innovator's specifications as per policy of inspection of manufacturer abroad. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

	Details of letter of authorization / sole agency agreement	Firm has submitted original letter of Authorization certificate from EVER Valinject GmbH, 4866 Unterach am Attersee, Oberburgau 3 Austria. The letter species that EVER Valinject GmbH appoints M/s Himmel Pharmaceuticals (Pvt.) Ltd. to register their product in Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 10483: 25.04.2022
	Details of fee submitted	PKR 150,000/-: 25.06.2021
	The proposed proprietary name / brand name	Cabazitaxel EVER Pharma 60mg/6ml concentrate solution for infusion
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Cabazitaxel …….10mg
	Pharmaceutical form of applied drug	concentrate solution for infusion
	Pharmacotherapeutic Group of (API)	Anticancer
	Reference to Finished product specifications	European Pharmacopeia
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Jevtana injection USFDA approved Cabazitaxel EVER Pharma 10mg/ml MHRA approved
	For generic drugs (me-too status)	Jevtana of Sanofi Aventis Reg No 078125
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form,

		manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	MSN Laboratories Private Limited Unit II , Sy No. 50 Kardanur Patancheru, Sangareddy District Telangana, India.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The accelerated study was performed at 40oC ± 2oC RH 75 ± 5% for 6 months. The real time stability data was conducted at 25oC ± 2oC RH 60 ± 5% for 72months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not provided
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Glass vial (hydrolytic class type I, Ph. Eur.) Fluoropolymer coated Bromobutyl Rubber stopper Ph. Eur
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 commercial scale batches (B5FC2, B5FF3, B5FE2). The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 65% ± 5% RH for 24 months.
Remarks of Assessor (AD-PEC XX)		
Applied formulation has been approved in USFDA with box warning as follows:		

WARNING

See full prescribing information for complete boxed warning.

- **Neutropenic deaths have been reported. Obtain frequent blood counts to monitor for neutropenia. Do not give JEVTANA if neutrophil counts are ≤1,500 cells/mm^3. (2.2)(4)**
- **Severe hypersensitivity can occur and may include generalized rash/erythema, hypotension and bronchospasm. Discontinue JEVTANA immediately if severe reactions occur and administer appropriate therapy. (2.3)(5.2)**
- **Contraindicated if history of severe hypersensitivity reactions to JEVTANA or to drugs formulated with polysorbate 80. (4)**

Innovator product is available as follows:

JEVTANA (cabazitaxel) Injection 60 mg/1.5 mL is supplied as a kit consisting of the following:
- JEVTANA Injection 60 mg/1.5 mL: contains 60 mg cabazitaxel in 1.5 mL polysorbate 80,
- Diluent for JEVTANA Injection 60 mg/1.5 mL: contains approximately 5.7 mL of 13% (w/w) ethanol in water for injection

Each vial of JEVTANA (cabazitaxel) 60 mg/1.5 mL must first be mixed with the entire contents of supplied diluent. Once reconstituted, the resultant solution contains 10 mg/mL of JEVTANA.

Applied formulation Cabazitaxel EVER Pharma 10 mg/ml concentrate for solution for infusion is as follows:

Each vial of 6 ml of concentrate for solution for infusion contains cabazitaxel 60 mg

Each vial of 4.5 ml of concentrate for solution for infusion contains cabazitaxel 45 mg

	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product for Rofl (Roflumilast) Tablets 500mcg on 10th October, 2017. Further, the said panel inspection report was discussed in 277th Drug Registration Board meeting held on 27th – 29th December 2017. The case was approved and the inspection report confirms following points: The HPLC software is 21CFR Compliant as per record available with the firm. Audit trail on the testing reports is available. Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software. Related manufacturing area, equipment, personnel and utilities are GMP compliant.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by People Republic of CHINA XUZHOU, JIANGSU dated 01.12.2019 valid till 01.12.2024
	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of following invoice specifying: 75g of LETROZOLE (invoice #FW/IN 21N-003) attested by AD (I&E), Karachi dated 02.07.2021, License No 2099/21 DRAP is submitted
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Assessor (AD PECXX):

Sr.#	Observations	Reply	Remarks
1.	Documents for the procurement of API (invoice #FW/IN 21N-003) attested by AD (I&E), Karachi dated 02.07.2021 did not specify Batch / lot no. of API	Form 3 and Form 7 have been submitted for reference wherein Batch No 20210426 is mentioned.	Complied
2.	Elucidation of Structure and other Characteristics of Drug Substance has not been provided	Provided	Complied
3.	Analytical Method Verification studies including specificity, accuracy and repeatability (method	Provided	Complied

	precision) performed by the Drug Product manufacturer to be provided		
4.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	CoA of relevant batch (Batch No 20210426) of DS has been provided by both DS and FPP manufacturer	The Assay result mentioned in CoA from DS is 99.6% while assay result of letrozole mentioned in CoA from FPP manufacturer is 101.50%.
5.	COA of primary / secondary reference standard including source and lot number to be provided	Provided	Complied
6.	Suitability testing/quality testing of container closure system (Alu-Alu blister) is not provided	Suitability testing of Alu Alu blisters i.e protection from light and protection from moisture have been submitted	Complied
7.	Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards	Batch formula for proposed commercial batch size (60,000 tab) has been provided including list of all components of the drug product to be used in the manufacturing process	Complied
8.	Data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc to be submitted at 6th month and onward.	6th month Data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheet was already submitted on 29.03.2022	Complied

Decision: Registration Board approved registration of product in general manufacturing areas with condition that manufacturer shall provide safety and protective measures for workers and personnel which remain in direct contact or are involved in close handling of these drugs.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Progace 160mg tablet by M/s Medinet Pharmaceuticals, Rwp
	For generic drugs (me-too status)	Megace 160mg Tablets by Bausch Health Ireland Limited MHRA approved
	GMP status of the Finished product manufacturer	GMP inspection conducted on 10/12/2020 Tablet (steroidal hormonal) section is approved dated 18.01.2019 vide letter no. F.3-2/2006-Lic (Vol-II)
	Name and address of API manufacturer.	Zhejiang Xianju Yangguang Bioproduct Co. Ltd. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Megestrol Acetate is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (5042-1008002, 5042-132 and 5042- 133)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Progace 160mg tablet by M/s Laboratorio Varifarma S.A (Batch No IH124) Neither quality parameters have been compared against reference product nor CDP profile has been submitted
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Zhejiang Xianju Yangguang Bioproduct Co. Ltd. China		
API Lot No.	Not provided		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (3×10's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Strength	160mg/Tablet		
Batch No.	MG-01	MG-02	MG-03
Batch Size	1200 tab	1200 tab	1200 tab
Manufacturing Date	12-2020	12-2020	12-2020
Date of Initiation	11-12-2020	11-12-2020	11-12-2020
No. of Batches	03		

Administrative Portion

	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not provided
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided

	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor (AD-PEC XX):

Sr.#	Observation	Reply	Remarks
1.	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided. .	Not provided	Not complied Later on firm provided copy of GMP certificate valid till 19,05.2023 issued by Zhejiang Taizhou Drug and chemical Control Administration
2.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) of Drug Substance to be performed by the Drug Product manufacturer. Already submitted verification studies are not as per USP.	Firm provided analytical Analytical Method Verification studies of finished product rather than Drug substance	Firm provided Analytical Method Verification studies of Drug Substance
3.	Detailed analytical procedures for the testing of drug substance to be provided by both Drug Substance and Drug Product manufacturer	Provided	Complied
4.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	CoA of Drug substance Batch No 5042-190801 from both Drug substance and Drug product manufacturers is submitted	Complied
5.	COA of primary / secondary reference standard including source and lot number to be provided	CoA of in house reference standard Batch No RSS2101 as per USP standard is submitted	Complied
6.	Pharmaceutical equivalence to be established against innovator/reference product by comparing the results of all quality parameters of developed formulation against reference product, moreover detailed CDP report is not provided in different medium along with f1 and f2 calculation..	Pharmaceutical Equivalence have been established against the brand that is Progace 160mg tablet by M/s Laboratorio Varifarma S.A (Batch No IH124) The results of quality parameters such as Assay, DT, Dissolution, hardness, uniformity of dosage and average weight were compared	Later on firm provided CDP performed in phosphate buffer medium (pH 6.8),

		CDP profile is submitted wherein CDP was performed in 0.1NHCl and acetate buffer (pH 4.5), values of f1 and f2 were found satisfactory	
7.	Finished product specifications mentioned under section 3.2.P.5 as "In house" (instead of USP). The specifications/acceptance criteria mentioned are also different from USP. Clarify/justify it	There was typographic error under section 3.2.P.5. Finished product specifications are as per USP	The specifications of finished Drug product and its acceptance criteria are not as per USP. Later on firm revised relevant section of module 3.2.P.5. wherein finished product specifications were revised as per USP
8.	Analytical method and validation/verification studies provided are not in accordance to USP. While finished product specification claimed in Form5F as USP.	Analytical method and validation/verification studies provided are in accordance to USP	Firm submitted revised Analytical method and validation/verification studies, as per USP
9.	Documents for the procurement of API attested by DRAP, specifying Batch / lot no. of API and quantity, not provided.	Firm has submitted copies of commercial invoice No WXY1909017 dated 14.10.2019, confirming import of 3Kg API .	Firm provided DRAP (Peshawar) clearance certificate dated 08.11.2019 Batch No 5042-190801
10.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated), to be provided	Provided	Complied

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

592.	Name, address of Applicant / Importer	M/s Lab Diagnostic Systems Pvt. Ltd. Plot No 36-A, PSIC,SIE, Taxila, Rawalpindi Pakistan
	Details of Drug Sale License of importer	License No: 01-374-0006-049485D Address: Plot No 36-A, PSIC,SIE, Taxila, Rwp Address of Godown: NA Validity: 19-01-2022.

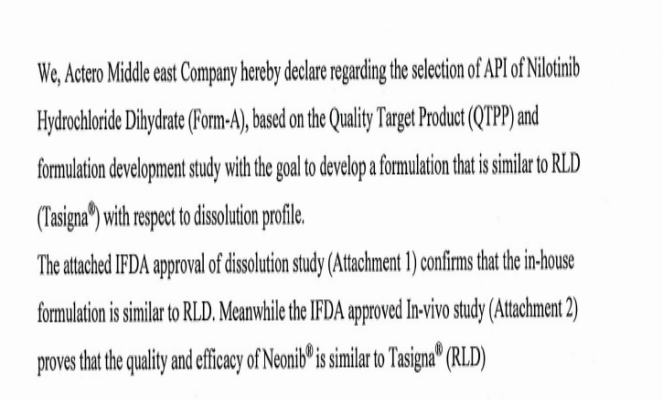
	Name, address of manufacturer(s)	Actero Middle East Address: on the corner of 8th Golestan, Sarvestan Blvd., Baharestan industrial zone, Karaj, Iran,
	Name of exporting country	Iran
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP: Firm has submitted original, legalized copy of CoPP certificate (No. 665/13174) dated 07/06/2021 issued by Food and Drug Administration Islamic Republic of Iran, for Nilotinib (as Hydrochloride Dihydrate) 200mg tablet. GMP certificate: Firm has submitted copy of GMP certificate No 665/12252 dated 1/6/2021 Grade A has been mentioned. Issued by Food and Drug Administration Islamic Republic of Iran
	Details of letter of authorization / sole agency agreement	Firm has submitted original letter of distribution certificate from Actero Middle East. The letter specifies that the manufacturer appoints M/s Lab Diagnostic Systems (SMC) Pvt Ltd. to register their product in Pakistan,
	Status of the applicant	☐ Manufacturer ☒ Importer ☐Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 2522 dated 26.01.2022
	Details of fee submitted	PKR 150,000/-: 26-01-2022
	The proposed proprietary name / brand name	Neonib 200mg capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Nilotinib (as Hydrochloride Dihydrate) …….... 200mg
	Pharmaceutical form of applied drug	Opaque, yellow cap and yellow body, size 0, hard gelatine capsule, filled with slightly yellow to yellowish granular powder
	Pharmacotherapeutic Group of (API)	N/A

	Reference to Finished product specifications	Inhouse
	Proposed Pack size	28's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Reference Product: TASIGNA FDA approved By M/s Novartis pharmaceuticals.
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	HETERO labs limited. 7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India
	Module-III Drug Substance:	Firm has submitted detailed of drug substance related to nomenclature, structure, Elucidation and characteristics, general properties, solubility , physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at Temperature 40 ± 2° Relative humidity 75 ±5% RH. The long-term stability study data at Temperature 25 ± 2° Relative humidity 60 ±5% RH. till 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Product development data has been submitted from HETERO labs limited. 7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India, product has been manufactured by technology transfer from HETERO labs limited.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Comparative Dissolution Profile for the applied product as follows Test Product Neonib 200mg capsule B.No NIL-H0200-F128 Reference product Tasigna 200mg capsule B.No F0034 Medium 0.1NHCl media (pH 1.0-1.2) f2 value has been calculated which was within acceptable range CDP has been performed by HETERO labs limited.7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies from HETERO labs limited.7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India
	Container closure system of the drug product	Container: High Density Polyethylene (HDPE) Container 60 cc Closure: Child resistant plastic caps with pulp liners 30mm
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches of drug product. The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 75% ± 5% RH. The real time stability study data of all 3 batches is submitted till 18 months. Batch size 50000 capsules Batch No C1905 C1906 C1903

Remarks by Assessor (AD-PECXX):
Product development data, CDP and analytical method validation studies has been performed by HETERO labs limited.7-2-A2 Industrial Estates Sanath Nagar, Hyderabad, Telangana, India, as submitted by manufacturer that product has been manufactured by technology transfer from HETERO labs limited hence all development research performed by this company.
USFDA approved box warning about Tasigna (Nilotinib) 200mg capsule as follows:

TASIGNA® (nilotinib) capsules, for oral use
Initial U.S. Approval: 2007



WARNING: QT PROLONGATION AND SUDDEN DEATHS

See full prescribing information for complete boxed warning.

- **Tasigna prolongs the QT interval. Prior to Tasigna administration and periodically, monitor for hypokalemia or hypomagnesemia and correct deficiencies (5.2). Obtain ECGs to monitor the QTc at baseline, seven days after initiation, and periodically thereafter, and following any dose adjustments (5.2, 5.3, 5.7, 5.15).**
- **Sudden deaths have been reported in patients receiving nilotinib (5.3). Do not administer Tasigna to patients with hypokalemia, hypomagnesemia, or long QT syndrome (4, 5.2).**
- **Avoid use of concomitant drugs known to prolong the QT interval and strong CYP3A4 inhibitors (5.8).**
- **Avoid food 2 hours before and 1 hour after taking the dose (5.9).**

----------RECENT MAJOR CHANGES----------

S.No	Observations	Reply	Remarks

1.	Firm has submitted DSL (License No: 01-374-0006-049485D) (Validity 19-01-2022). Submit valid DSL	Firm has submitted copy of valid DSL (License No: 01-374-0006-96845D) (Validity 04-08-2024)	Complied
2.	The title of importer mentioned on sole agency agreement mentioned as M/s Lab Diagnostic Systems (SMC) Pvt. Ltd while title mentioned on DSL as M/s Lab Diagnostic Systems Pvt. Ltd. Clarify it	Title mentioned on new DSL is M/s Lab Diagnostic Systems (SMC) Pvt. Ltd, same was mentioned in sole agency agreement	Verified
3.	Formulation approved in RRA (USFDA and MHRA) is Nilotinib (as Hydrochloride monohydrate) while applied formulation is Nilotinib (as Hydrochloride dihydrate). Provide reference of applied formulation.	Firm has provided declaration from Actero Middle East, Iran as follows:  We, Actero Middle east Company hereby declare regarding the selection of API of Nilotinib Hydrochloride Dihydrate (Form-A), based on the Quality Target Product (QTPP) and formulation development study with the goal to develop a formulation that is similar to RLD (Tasigna®) with respect to dissolution profile. The attached IFDA approval of dissolution study (Attachment 1) confirms that the in-house formulation is similar to RLD. Meanwhile the IFDA approved In-vivo study (Attachment 2) proves that the quality and efficacy of Neonib® is similar to Tasigna® (RLD)	The attachments referred as 1 and 2 were approval letters from Iran Food and Drug Administration (IFDA) for conducting in vitro and in vivo studies rather than study performed.
4.	Provide Compatibility of the Drug Substance(s) with excipients (Dibasic calcium phosphate and Povidone K90) being qualitatively	Compatibility of the Drug Substance(s) with excipients (Dibasic calcium phosphate and Povidone K90) has been provided	Complied

	different from innovator product Tasigna 200mg capsule		
5.	Since applied product has been manufactured by technology transfer from HETERO labs limited hence all development research was performed by this company. Agreement to be provided between HETERO labs limited and product manufacturer i.e Actero Middle East, Iran regarding technology transfer.	Agreement has been provided regarding technology transfer between HETERO labs limited, India and Actero Middle East, Iran.	Complied

Decision: Deferred for following:

- **Submission of product development and method validation data from the manufacturer site i.e., M/s Actero Middle East on the corner of 8th Golestan, Sarvestan Blvd., Baharestan industrial zone, Karaj, Iran.**
- **Scientific justicfication of variation of salt formof drug substance form that used in the innovator drug product formulation.**
