	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (PRG/P0904005, PRG/P0904006, PRG/P0904007)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator Lyrica CR 330mg Tablet distributed by M/s Parke-Davis Division of Pfizer Inc. NY, NY 10017, by performing quality tests (Description, Identification, Assay, Dissolution). CDP has been performed against the same brand that is Lyrica CR 330mg Tablet distributed by M/s Parke-Davis Division of Pfizer Inc. NY, NY 10017 in Acid media pH 1.2, acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Analytical method validation report is not submitted

STABILITY STUDY DATA

Manufacturer of API	M/s Kopran Research Laboratories Limited., K4/4, Additional MIDC, Post Birwadi, Tal. Mahad, District: Raigad, Raigad 402302, Maharashtra India.		
API Lot No.	PRGH/P2012004D		
Description of Pack (Container closure system)	Printed Alu-Alu blister packed in bleach board unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	PGC T2-21	PGC T3-21	PGC T4-21
Batch Size	1000 tab	1000 tab	1000 tab
Manufacturing Date	04-2021	04-2021	04-2021

Date of Initiation	05-2021	05-2021	05-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted License retention certificate dated 29-02-2020 of M/s Kopran Research Laboratories Limited., India., issued by Food & Drugs Administration Maharashtra State India valid upto 31-03-2025. Firm has submitted cGMP certificate dated 20-10-2020 of M/s Kopran Research Laboratories Limited., India., issued by Commissioner, Food & Drugs Administration Maharashtra State India valid upto 19-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. EXP-393 dated 28-12-2020 for import of 100kg of Pregabalin (Batch# PRGH/P2012004D) in name of M/s CCL Pharmaceuticals (Pvt.) Ltd., attested by AD (I&E) DRAP Lahore dated 04-01-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted DML renewal Inspection report conducted on 14.09.2020, 15.09.2020 and 21.10.2020 and panel has recommended renewal of DML for following sections; Tablet (General), Capsule (General), Oral Liquid, Dry Powder Suspension, Liquid Injectable & Capsule section (Steroid). • Firm has submitted Letter No. 8194/2022-DRAP (Addl.Dire) dated 07.07.2022 from Additional Director DRAP Lahore which states that; "The Firm has applied for GMP Inspection. The application is under process at DRAP Office and inspection will be done as per availability of Area FID. The firm's last GMP status is Compliant / Good.
1.5.2	• Clarification is required as you have applied for film coated tablets while the reference formulation is film coated extended release tablets or revise your label claim as per reference formulation along with submission of applicable fee.	The firm submitted that applied formulation is as per reference formulation i.e., film coated extended release that is evident from dissolution results. Label claim for products is: Each film coated extended-release tablet contain: Pregabalin…….330mg.
3.2.S.4	• Justification is required for claiming in-house specifications for drug substance by drug substance manufacturer and drug product manufacturer as the monograph for	• The firm submitted that Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why API manufacturer used in house specs. Moreover,

	applied drug substance is available in pharmacopeia (BP, USP) • Justification is required for using in-house analytical method for drug substance by drug substance manufacturer and drug product manufacturer as the analytical method for applied drug substance is available in pharmacopeia (BP, USP) • Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug substance as the COA of Reference Standards or Materials states that it is to be used before 19-03-2016, while manufacturing date of drug substance as per submitted COA is Dec 2020.	Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and drug product manufacturer are in process of shifting the specification as per USP Monograph. • The firm submitted that Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why API manufacturer used in house analytical method. Moreover, Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and Drug product manufacturer are in process of shifting the analytical method as per USP Monograph. • The firm submitted that provided COA of reference standard was taken from DMF. COA of working standard used for the analysis of drug substance is submitted which states that it is to be used before 11-07-2021**.**
3.2.P.2	• Submit evidence for storing samples prepared for compatibility study at 60˚C ± 3˚C / 75% ± 5%RH for 10 days	***The firm submitted record of data logger for temperature and humidity monitoring for sample prepared for compatibility study***
3.2.P.5	• Justification is required for changing wavelength during assay procedure in analytical method from 300nm to 210nm after 4.5 minutes • Submit analytical method validation report for the applied product	• The firm submitted that in product test method 300nm is used to suppress blank peak and the principal peak of pregabalin is around 5.1 that's why wavelength is changed at 210nm from 4.5min to onward. • Firm has submitted analytical method validation studies including specificity, linearity and range, accuracy, precision, LOD & LOQ, robustness and solution stability and system suitability studies.
3.2.P.6	• Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug product as the COA of Reference Standards or Materials states that it is to be used before 11-07-2021, while manufacturing date of drug product as per submitted COA is April 2021 and 3rd month time point and 6th month time stability study are due on July 2021 (07-2021) and October 2021 (10-2021).	• The firm submitted that same reference standard was used for analysis of drug product as the sequence / chromatograms against this standard was saved during trial analysis and same sequence / chromatograms of standard was used at 3rd and 6th Month stability study time point for analysis of drug product. It is to submit that the Reference Standards or Materials used for test and analysis of drug product was expired at 6th month time point (October 2021 (10-2021)) of stability study.
3.2.P.8	• The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required • Clarification is required for not including the results and calculation details for content uniformity test in raw data sheet at initial time point of stability study • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula shall be submitted • Submit Record of Digital data logger for temperature and humidity	• The firm submitted that in product test method wavelength started from 300nm and then changed to 210nm after 4.5min. So in chromatogram starting wavelength is mentioned which is 300nm. • Content uniformity for Gablin CR Tablet 330mg is performed by weight variation as per <USP 905>. • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula is submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

monitoring of stability chambers (real time and accelerated)

Previous Decision (324-DRB): Deferred for scientific justification of following points:

- Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.
- Use of dual wavelengths for the analysis of single drug substance containing formulation.
- The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required

Response of firm:

Sr#	Observations	Response
01	Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.	The firm submitted that we have also used the reference standard submitted as Annex-1 for the analysis of Drug product at 6th Month Stability study time point. Moreover, as we were in phase of shifting the Specs of Raw Material from In-house to USP so we have also used the Reference standard involved in Specification shifting attached as Annex-1. We are submitting the following Supporting documents. 1) Raw Material Test Method 2) COA of Raw Material 3) Verification of Analytical Method 4) COA of Reference Standard used in shifting the specification.
02	Use of dual wavelengths for the analysis of single drug substance containing formulation.	The firm submitted that in dissolution chromatograms you can see at 210nm is the main peak of pregabalin, 300nm wavelength is not interfaring with pregabalin response, specificity chromatogram is submitted in AMV report. Method trail is also attached.
03	The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required	The firm submitted that as already communicated that in product test method wavelength started from 300nm and then changed to 210nm after 4.5min. Method trail is also submitted. In Chromatograms starting wavelength is mentioned which is 300nm.

Decision: Deferred for scientific justification of following points:

- **Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.**
- **Use of dual wavelengths for the analysis of single drug substance containing formulation.**
- **The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required**

	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt.) Ltd., Plot No. 145 Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted cGMP certificate issued on 21-05-2019 based on inspection conducted on 23-04-2019
	Evidence of approval of manufacturing facility	Firm has submitted copy of grant of additional section letter No.F.1-12/98-Lic(Vol. II) dated 24-03-2007 which specifies Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale

		☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 154 dated 03-01-2022
	Details of fee submitted	PKR 30,000/-: dated 23-11-2021 (Deposit slip#148278185261)
	The proposed proprietary name / brand name	Dapa-Met 5/1000mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Dapagliflozin propanediol monohydrate equivalent to Dapagliflozin…….5mg Metformin HCl……1000mg
	Pharmaceutical form of applied drug	Tablets
	Pharmacotherapeutic Group of (API)	Dapagliflozin; Sodium-glucose co-transporter 2 (SGLT2) inhibitors Metformin; Biguanides
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	2 x 7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	XIGDUO (5mg/850mg; 5mg/1000mg) film coated tablet EMA Approved
	For generic drugs (me-too status)	Daplozmet 5mg/1000mg Tablets by M/s Highnoon Laboratories (Reg#96589)
	Name and address of API manufacturer.	**Dapagliflozin:** M/s Jiangsu Yungan Pharmaceutical CO., Ltd., No. 18, 237 Provincial Road, Economic Development Zone, Huaian, Jiangsu China **Metformin HCl:** Aarti Drugs Limited., Plot No. 211 - 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Dapagliflozin propanediol monohydrate:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40 O ± 2 O C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30OC ± 2 O C / 65% ± 5% RH for 36 months (Batches: 130401, 130402, 130501) **Metformin Hydrochloride;**

		Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40 O ± 2 O C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30OC ± 2 O C / 65% ± 5% RH for 48 months (Batches; MEF/1410027, MEF/1410028, MEF/1410029)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against innovator product Xigduo 5/1000mg Tablet of M/s AstraZeneca AB SE-151 85 Sodertalje - Sweden by performing quality tests (Description, identification, uniformity of dosage unit, Dissolution and Assay). CDP has been performed against the same brand that is Xigduo 5/1000mg Tablet of M/s AstraZeneca AB SE-151 85 Sodertalje - Sweden in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values of f2 are in acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including specificity, accuracy, precision, linearity & range, system suitability, ruggedness, LOD, LOQ.

01	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
02	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dapagliflozin propanediol monohydrate:** The firm has submitted cGMP certificate to M/s Jiangsu Yongan Pharmaceutical Co., Ltd., China issued by Jiangsu Food and Drug Administration valid upto 03-03-2021 **Metformin HCl:** The firm has submitted GMP certificate for Aarti Drugs Limited India issued by Food & Drug Maharashtra State India. The certificate is valid till 01-11-2021
03	Documents for the procurement of API with approval from DRAP (in case of import).	**Dapagliflozin propanediol monohydrate:** Firm has submitted copy of Form 6 for import of 200g of Dapagliflozin propanediol Monohydrate in name of M/s Bio-Labs (Pvt.) Ltd. attested by AD (I&E) DRAP Islamabad dated 01-04-2019. Firm has submitted copy of invoice for import of 200g of Dapagliflozin propanediol Monohydrate (Batch No. DGF-201902001) in name of M/s Bio-Labs (Pvt.) Ltd. attested by AD (I&E) DRAP Islamabad dated 01-04-2019. Firm has also submitted copy of clearance certificate for import of 200g of Dapagliflozin propanediol Monohydrate in name of M/s Bio-Labs (Pvt.) Ltd. attested by AD (I&E) DRAP Islamabad dated 01-04-2019. **Metformin HCl:** Firm has submitted copy of invoice No. EXP/2411/18-19 dated 21-02-2019 for import of 25kg of Metformin HCl (Batch No. MEF/18122462) in name of M/s Bio-Labs (Pvt.) Ltd., attested by AD (I&E) DRAP Islamabad dated 27-03-2019. Firm has submitted copy of clearance certificate for import of 25kg of Metformin HCl in name of M/s Bio-Labs (Pvt.) Ltd., attested by AD (I&E) DRAP Islamabad dated 27-03-2019.
04	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
05	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports on product testing.
06	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator PEC[XI]:

Section	Observations
1.3.5	Submit GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years
1.6.5	Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for dapagliflozin propanediol monohydrate and Metformin HCl issued by relevant regulatory authority of country of origin
3.2.S.4	• Justification is required for including assay test for metformin on titration method by drug product manufacturer and potentiometric method by drug substance manufacturer in analytical procedure instead of HPLC as recommended by USP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) Metformin HCl for titration method is submitted.

	• Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC as recommended by USP.
3.2.P.2	Justification is required for not considering one time-point after 85% dissolution has been reached in CDP studies or the dissolution should be conducted until an asymptote (plateau) has been reached
3.2.P.5	• Justification is required for not including test for disintegration test in finished product specification as recommended by innovator product review document. • Submit numerical results for uniformity of dosage unit test in batch analysis for dapagliflozin and metformin. • Clarification is required as you have mentioned innovator specification in module 1 section 1.5.6 while bio labs specification in module 3 section 3.2.P.5 drug product specification

Previous Decision (324-DRB): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response:

Section	Observations	Response of firm
1.3.5	Submit GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years	Firm has submitted cGMP certificate issued on 28-02-2022 based on inspection conducted on 03-08-2021
1.6.5	Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for dapagliflozin propanediol monohydrate and Metformin HCl issued by relevant regulatory authority of country of origin	**Dapagliflozin propanediol monohydrate:** The firm has submitted copy of DML # (Su 20160324) of M/s Jiangsu Yongan Pharmaceutical CO., Ltd., No. 18, 237 Provincial Road, Economic Development Zone, Huaian, Jiangsu China valid upto December 06, 2025. **Metformin HCl:** The firm has submitted cGMP certificate in name of M/s Aarti Drugs Limited India issued by Food & Drug Administration Gujarat State India. The certificate is valid till 19-03-2023
3.2.S.4	• Justification is required for including assay test for metformin on titration method by drug product manufacturer and potentiometric method by drug substance manufacturer in analytical procedure instead of HPLC as recommended by USP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) Metformin HCl for titration method is submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC as recommended by USP.	• The firm submitted that in USP 41, potentiometric method was described and hence both drug substance manufacturer and drug product manufacturer used this method. HPLC method was published by USP 43 and accordingly we have revised standard analytical procedure and submitted revised analytical method. • Potentiometric method is type of titration and hence word titration was written by typographic mistake and test was performed by potentiometric method. • In USP 41, potentiometric method was described and hence method verification was performed accordingly. Updated method verification studies for drug substance as per USP 43 is submitted • The firm submitted that in USP 41, potentiometric method was described and hence drug substance manufacturer used this method. Now testing method is revised as per USP 43 monograph. New COA from API manufacturer is submitted
3.2.P.2	Justification is required for not considering one time-point after 85% dissolution has been reached in CDP studies or the dissolution should be conducted until an asymptote (plateau) has been reached	In previous practice, CDP was performed till 85% dissolution, now onward one time point after 85% dissolution will be considered for CDP studies.
3.2.P.5	• Justification is required for not including test for disintegration test in finished product specification as recommended by innovator product review document.	• The firm submitted that Disintegration test is now added in finished product specifications and in standard analytical procedure and revised specifications and standard analytical procedure is submitted

	• Submit numerical results for uniformity of dosage unit test in batch analysis for dapagliflozin and metformin. • Clarification is required as you have mentioned innovator specification in module 1 section 1.5.6 while bio labs specification in module 3 section 3.2.P.5 drug product specification	• Numerical results for uniformity of dosage unit test in batch analysis for dapagliflozin and metformin are added and new reports are submitted. • The firm has submitted revised finished product specifications indicting innovator's specifications

Decision: Approved with innovator's specifications. Registration letter will be issued after submission of Fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The accelerated stability data is conducted at 40 O ± 2 O C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30OC ± 2 O C / 65% ± 5% RH for 48 months (Batches; MEF/1410027, MEF/1410028, MEF/1410029)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against innovator product Xigduo 5/850mg Tablet of M/s AstraZeneca AB SE-151 85 Sodertalje - Sweden by performing quality tests (Description, identification, uniformity of dosage unit, Dissolution and Assay). CDP has been performed against the same brand that is Xigduo 5/850mg Tablet of M/s AstraZeneca AB

		SE-151 85 Sodertalje - Sweden in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values of f2 are in acceptable range.
	Analytical method validation/verification of product	Firm has submitted method validation studies including specificity, accuracy, precision, linearity & range, system suitability, ruggedness, LOD, LOQ.

STABILITY STUDY DATA

Manufacturer of API	**Dapagliflozin:** M/s Jiangsu Yungan Pharmaceutical CO., Ltd., No. 18, 237 Provincial Road, Economic Development Zone, Huaian, Jiangsu China **Metformin HCl:** Aarti Drugs Limited., Plot No. 211 - 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat India.		
API Lot No.	**Dapagliflozin Propanediol Monohydrate:** DGF-201902001 **Metformin Hydrochloride:** MEF/18122462		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 12 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12 (Months)		
Batch No.	DAP-20-016	DAP-20-017	DAP-20-018
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	04-2020	04-2020	04-2020
Date of Initiation	26-04-2020	26-04-2020	26-04-2020
No. of Batches	03		

Administrative Portion

01	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
02	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Dapagliflozin propanediol monohydrate:** The firm has submitted cGMP certificate to M/s Jiangsu Yongan Pharmaceutical Co., Ltd., China issued by Jiangsu Food and Drug Administration valid upto 03-03-2021 **Metformin HCl:** The firm has submitted GMP certificate for M/s Aarti Drugs Limited India issued by Food & Drug Maharashtra State India. The certificate is valid till 01-11-2021
03	Documents for the procurement of API with approval from DRAP (in case of import).	**Dapagliflozin propanediol monohydrate:** Firm has submitted copy of Form 6 for import of 200g of Dapagliflozin propanediol Monohydrate in name of M/s Bio-Labs (Pvt.) Ltd. attested by AD (I&E) DRAP Islamabad dated 01-04-2019. Firm has submitted copy of invoice for import of 200g of Dapagliflozin propanediol Monohydrate (Batch No. DGF-201902001) in name of M/s Bio-Labs (Pvt.) Ltd. attested by AD (I&E) DRAP Islamabad dated 01-04-2019. Firm has also submitted copy of clearance certificate for import of 200g of Dapagliflozin propanediol Monohydrate in name of M/s Bio-Labs (Pvt.) Ltd.

		attested by AD (I&E) DRAP Islamabad dated 01-04-2019. **Metformin HCl:** Firm has submitted copy of invoice No. EXP/2411/18-19 dated 21-02-2019 for import of 25kg of Metformin HCl (Batch No. MEF/18122462) in name of M/s Bio-Labs (Pvt.) Ltd., attested by AD (I&E) DRAP Islamabad dated 27-03-2019. Firm has submitted copy of clearance certificate for import of 25kg of Metformin HCl in name of M/s Bio-Labs (Pvt.) Ltd., attested by AD (I&E) DRAP Islamabad dated 27-03-2019.
04	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
05	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports on product testing.
06	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator PEC[XI]:

Section	Observations
1.3.5	Submit GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years
1.6.5	Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for dapagliflozin propanediol monohydrate and Metformin HCl issued by relevant regulatory authority of country of origin
3.2.S.4	• Justification is required for including assay test for metformin on titration method by drug product manufacturer and potentiometric method by drug substance manufacturer in analytical procedure instead of HPLC as recommended by USP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) Metformin HCl for titration method is submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC as recommended by USP.
3.2.P.2	Justification is required for not considering one time-point after 85% dissolution has been reached in CDP studies or the dissolution should be conducted until an asymptote (plateau) has been reached
3.2.P.5	• Justification is required for not including test for disintegration test in finished product specification as recommended by innovator product review document. • Submit numerical results for uniformity of dosage unit test in batch analysis for dapagliflozin and metformin. • Clarification is required as you have mentioned innovator specification in module 1 section 1.5.6 while bio labs specification in module 3 section 3.2.P.5 drug product specification

Previous Decision (324-DRB): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response:

Section	Observations	Response of firm
1.3.5	Submit GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years	Firm has submitted cGMP certificate issued on 28-02-2022 based on inspection conducted on 03-08-2021
1.6.5	Submit valid GMP certificate / Drug Manufacturing License of the Drug Substance manufacturer for dapagliflozin propanediol monohydrate and Metformin HCl issued by relevant regulatory authority of country of origin	**Dapagliflozin propanediol monohydrate:** The firm has submitted copy of DML # (Su 20160324) of M/s Jiangsu Yongan Pharmaceutical CO., Ltd., No. 18, 237 Provincial Road, Economic Development Zone, Huaian, Jiangsu China valid upto December 06, 2025.

		Metformin HCl: The firm has submitted cGMP certificate in name of M/s Aarti Drugs Limited India issued by Food & Drug Administration Gujarat State India. The certificate is valid till 19-03-2023
3.2.S.4	• Justification is required for including assay test for metformin on titration method by drug product manufacturer and potentiometric method by drug substance manufacturer in analytical procedure instead of HPLC as recommended by USP. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) Metformin HCl for titration method is submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC as recommended by USP.	• The firm submitted that in USP 41, potentiometric method was described and hence both drug substance manufacturer and drug product manufacturer used this method. HPLC method was published by USP 43 and accordingly we have revised standard analytical procedure and submitted revised analytical method. • Potentiometric method is type of titration and hence word titration was written by typographic mistake and test was performed by potentiometric method. • In USP 41, potentiometric method was described and hence method verification was performed accordingly. Updated method verification studies for drug substance as per USP 43 is submitted • The firm submitted that in USP 41, potentiometric method was described and hence drug substance manufacturer used this method. Now testing method is revised as per USP 43 monograph. New COA from API manufacturer is submitted
3.2.P.2	Justification is required for not considering one time-point after 85% dissolution has been reached in CDP studies or the dissolution should be conducted until an asymptote (plateau) has been reached	In previous practice, CDP was performed till 85% dissolution, now onward one time point after 85% dissolution will be considered for CDP studies.
3.2.P.5	• Justification is required for not including test for disintegration test in finished product specification as recommended by innovator product review document. • Submit numerical results for uniformity of dosage unit test in batch analysis for dapagliflozin and metformin. • Clarification is required as you have mentioned innovator specification in module 1 section 1.5.6 while bio labs specification in module 3 section 3.2.P.5 drug product specification	• The firm submitted that Disintegration test is now added in finished product specifications and in standard analytical procedure and revised specifications and standard analytical procedure is submitted • Numerical results for uniformity of dosage unit test in batch analysis for dapagliflozin and metformin are added and new reports are submitted. • The firm has submitted revised finished product specifications indicting innovator's specifications

Decision: Approved with innovator's specifications. Registration letter will be issued after submission of Fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 06; Deferred Registration Application of Human Drugs on form 5:

911.	Name and address of manufacturer / Applicant	M/s Radiant Pharma Pvt Ltd., 43-E, Sundar Industrial Estate, Lahore
	Brand Name + Dosage Form and Strength	Lesart 10/40mg Tablet
	Composition	Each Film Coated Tablet Contains: Telmisartan……40mg Amlodipine as Besylate……10mg

	Dairy No. date of R &I fee	Form-5 Dy.No 11213 dated 05-03-2019 Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Calcium channel blockers and Angiotensin II receptor blockers (ARBs)
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	TWYNSTA (40/5mg, 40/10mg, 80/5mg, 80/10mg) Tablets USFDA Approved
	Me-too-status	Cresar AM Tablet 10mg/40mg by M/s Tabros Pharma (Reg#094851)
	GMP Status	
	Previous Remark of the Evaluator [XI]	• You have applied for film coated tablets while the reference formulation is bilayered tablets. Revise your label claim, formulation and manufacturing outline as per reference formulation along with submission of applicable fee. • Provide evidence of availability of bilayered compression tablet facility • Submit latest GMP inspection report conducted within last three years
	Previous Decision (DRB-322)	• Registration Board deferred the case for submission of reply to the above cited shortcomings within six months of issuance of minutes of 322nd meeting. In case Pharmaceutical Evaluation Cell does not receive any response from firm within the given time, the case will be placed before Registration Board for decision.
	Response of the firm	• The firm has revised the label claim, formulation and manufacturing outline as per reference formulation along with submission of Rs. 7500/- on deposit slip No#86422725476. The revised label claim is as under: Each Bilayered Tablet Contains: Telmisartan……40mg Amlodipine as Besylate……10mg • Evidence of availability of bilayered compression tablet facility and latest GMP inspection report conducted within last three years is not submitted
	Decision: Deferred for submission of following: • **Evidence of availability of bilayer compression tablet facility and latest GMP inspection report conducted within last three years** • **Differential Fee of Rs. 22,500/- for pre-approval correction/change in product composition (correction/change of formulation) as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.**	
912.	Name and address of manufacturer / Applicant	M/s Radiant Pharma Pvt Ltd., 43-E, Sundar Industrial Estate, Lahore
	Brand Name + Dosage Form and Strength	Lesart 10/80mg Tablet
	Composition	Each Film Coated Tablet Contains: Telmisartan……..80mg Amlodipine as Besylate……..10mg
	Dairy No. date of R &I fee	Form-5 Dy.No 11215 dated 05-03-2019 Rs.20,000/- dated 05-03-2019
	Pharmacological Group	Calcium channel blockers and Angiotensin II receptor blockers (ARBs)
	Type of form	Form 5
	Finished product specifications	USP

Case No. 07; Deferred Registration Application of Human Drugs on form 5F (cases of Dr. Akbar Ali): Priority applications as per 257th meeting of RB

915.	Name, address of Applicant / Importer	M/s BF Biosciences Ltd 5-KM Sunder Raiwind Road, Raiwind, District Lahore – Pakistan, Pakistan
	Details of Drug Sale License of importer	License No:05-352-0066-034461D Address: 5-KM Sunder Raiwind Road, Raiwind, District Lahore – Pakistan. Address of Godown: NA Validity: 29-06-2027. Status: License to sell drugs as distributor Renewal: NA
	Name and address of marketing authorization holder (abroad)	Bioprofarma Bagó S.A. Terrada 1270 - Autonomous City of Buenos Aires, Argentine Republic.
	Name, address of manufacturer(s)	Laboratorio Kemex S.A. Nazarre 3446/54 - Autonomous City of Buenos Aires, Argentine Republic.
	Name of exporting country	Argentine Republic
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	CoPP: Firm has submitted original, legalized copy of CoPP certificate (No. IF-2022-09064835-APN-DFYGR#ANMAT) dated 04-01-2022 issued by National Institute of Drugs Avenida Caseros 2161 Ciudad Autonoma de Buenos Aires-Republica Argentina for Fulvestrant injection 250mg. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from Bioprofarma Bagó S.A. The letter species that the manufacturer appoints M/s BF Biosciences Ltd. to register their products in Pakistan. The authorization letter is valid till 31-01-2023.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy.31009 dated No 01-11-2022
	Details of fee submitted	PKR 75,000/-:slip No. 04893286804 dated 25-04-2022
	The proposed proprietary name / brand name	DIMERE injection 250mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5 ml vial contains: Fulvestrant ……..….250mg
	Pharmaceutical form of applied drug	Solution for Injection
	Pharmacotherapeutic Group of (API)	oestrogen receptor antagonists (L02BA03)
	Reference to Finished product specifications	In house
	Proposed Pack size	2’s

	Proposed unit price	Rs 45,000 /- single dose vial
	The status in reference regulatory authorities	FASLODEX 250mg Injection (AstraZeneca UK Limited). (Pre Filled Syringe of 5 ml)
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Farmabios S.p.A. Via Pavia, 1 27027 Gropello Cairoli, (PV) – Italy
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 5oC ± 3oC. The stability study data is till 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	USP type-I glass
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 25 °C ± 2ºC/ 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5 °C ± 3ºC. The real time stability study data of 3 batches is for 24 months

Evaluation by PEC:

Sr. No	Observations
01	DSL of Importer /applicant is expired till 29-06-2022.
02	Provided copy of GMP certificate of API/Drug substance manufacturer, I-e M/s Farmabiosa S.P.A Italy, issued by AIFA, Italy vide certificate No. IT-API/167/H/2020 based on inspection conducted on 20-09-2019 was valid for 30 months, which has been expired.
03	Justification of applied container closer system of finished drug product as glass vial whereas the innovator product Faslodox is prefilled syringe.
04	Justification of overage of 0.4 ml excess filling in vial during filling process in line with innovator product which is prefilled syringe.

Previous Decision (M-324DRB): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of firm:

Sr#	Observations	Response of Firm
01	DSL of Importer /applicant is expired till 29-06-2022.	Firm has submitted valid copy of DSL. Details of DSL are; License No:05-352-0066-034461D Address: 5-KM Sunder Raiwind Road, Raiwind, District Lahore – Pakistan. Address of Godown: NA Validity: 29-06-2027. Status: License to sell drugs as distributor Renewal: NA
02	Provided copy of GMP certificate of API/Drug substance manufacturer, I-e M/s Farmabiosa S.P.A Italy, issued by AIFA, Italy vide certificate No. IT-API/167/H/2020 based on inspection conducted on 20-09-2019 was valid for 30 months, which has been expired.	Firm has submitted valid copy of GMP certificate of API/Drug substance manufacturer, i.e. M/s Farmabios S.P.A Italy, issued by AIFA, Italy vide certificate No. IT-API/167/H/2020 based on inspection conducted on 2020-06-12 was valid for three years from date of inspection.
03	Justification of applied container closer system of finished drug product as glass vial whereas the innovator product Faslodox is prefilled syringe.	Dimere 250mg solution for injection is a generic drug product whose formulation, strength, pharmaceutical form and dosage form are the same as innovator product Falsodex 250mg (Lab. Astra Zeneca) Dimere container closure system differs from Faslodex finished product which is a pre-filled syringe. It consists of vials appropriately closed with stoppers and flip-off aluminium seals evidencing the same quality on materials as pre-filled syringe. Stability studies performed on Dimere dosage form confirms compatibility and that the finished product keeps the original attributes without alteration. Selecting the right primary container presentation for a product is important decision. Dimere is packed in glass vials despite pre-filled syringes advantages due to cost / benefit analysis and unavailability to access to required technology facilities to use that container.
04	Justification of overage of 0.4 ml excess filling in vial during filling process in line with innovator product which is prefilled syringe.	The firm submitted explanation as: 0.4ml (0.8%) in excess is added per vial during the filling process to ensure the deliverable volume and administration of the labelled doses. The final volume overage was empirically decided during pilot batches evaluation and compliance is confirmed batch to batch by analysis extractable volume

Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting in glass vial

916.	Name, address of Applicant / Importer	M/s Martin Dow Limited., Plot No. 37, Sector 19, Korangi Industrial Area, Karachi-74900, Pakistan.

Firm has submitted second original, legalized copy of CoPP certificate (No. 5.8.1-2022-64806) dated 22-08-2022 issued by Swedish Medical Products Agency. The CoPP confirms free sale status of the product in Sweden with different marketing authorization holder. The name of importing country on CoPPs is mentioned as Pakistan.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of authorization from Chemo SA, Lugano branch. The letter specifies that Chemo SA, Lugano branch appoints M/s. Martin Dow Limited to register their products in Pakistan. The authorization letter is valid. Firm has also submitted a letter clarifying that Chemo has been entitled by the manufacturer and license holder to promote and distribute their product.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 31354 : 02-11-2022
	Details of fee submitted	PKR 150,000/-: 31-12-2021 ,Slip No.43533251754
	The proposed proprietary name / brand name	Vestant Solution for Injection in pre-filled syringe 250mg/5ml
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Fulvestrant……50mg
	Pharmaceutical form of applied drug	Solution for Injection
	Pharmacotherapeutic Group of (API)	Anti-estrogens (ATC code: L02BA03)
	Reference to Finished product specifications	As per innovator

	Proposed Pack size	1's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	FASLODEX Injection of ASTRAZENECA (USFDA Approved).
	For generic drugs (me-too status)	Not available
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Industriale Chimica s.r.l. Address: Via E. H. Grieg 13, 21047 Saronno (Varese), Italy
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 5oC ± 3oC and accelerated at 25°C ± 2°C. The real time stability study data is till 5 years.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence has been established with reference product FASLODEX Pre filled syringe 250mg/5ml by establishing comparative study of critical quality attributes.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Syringe 5mL Glass Type – I and Plunger Stopper
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 25oC ±2oC / 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5oC ±3oC. The real time stability study data of 3 batches is for 36 months.

Remarks of Evaluator:

Sr. No	Observations
01	COPP section 1.4 mentioned that this product is not actually on the market in the exporting country ,i-e Spain, please clarify.

02	Sole Agency agreement between Marketing Authorization Holder of Country of Export and Applicant, is required.
03	GMP certificate of API /Drug Substance manufacturer was granted by AIFA based on GMP inspection dated 21-09-2018 valid for 3 years, which is expired, valid copy is required please.

Previous Decision (M-324-DRB): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response against letter No. F.1-1/2020/PEC-DRAP(DD PE&R/PEC):

Sr#	Observations	Response of firm
01	COPP section 1.4 mentioned that this product is not actually on the market in the exporting country, i.e. Spain, please clarify.	The product from this same manufacturer is marketed in Sweden, for which a copy of COPP from Swedish Medical Products Agency, Box 26, Dag Hammarskjolds vag 42, 751 03 Uppsala, Sweden for Pakistan has been submitted in the dossier.
02	Sole Agency agreement between Marketing Authorization Holder of Country of Export and Applicant, is required.	Sole agency agreement between the distributor i.e., Chemo SA, Lugano branch and applicant i.e., Martin Dow Limited has been submitted along with a clarification letter that Chemo SA, Lugano Branch (Distributor), Exeltis (MA Holder) and Laboratorio Farmalan (manufacturer) belong to one Insudpharma group.
03	GMP certificate of API /Drug Substance manufacturer was granted by AIFA based on GMP inspection dated 21-09-2018 valid for 3 years, which is expired, valid copy is required please.	Firm has submitted valid copy of GMP certificate of API/Drug substance manufacturer, i.e. Industriale Chimica s.r.l. Address: Via Edvard Hangerup Grieg 13, 21047 Saronno, Italy vide certificate No. NBF /2/2022/V based on inspection conducted on 2020-12-15 was valid for three years from date of inspection.
04	Finished Product analytical method validation report conducted by Finished Product manufacturer is required.	The methods of analysis of Fulvestrant 250 mg / 5 mL Solution for Injection prefilled syringe has been validated by Ricon Pharma and then transferred to Laboratorios Farmalan. Validation transfer reports of the analytical methods used for the control of Fulvestrant 250 mg / 5 mL Solution for Injection prefilled syringe are submitted
05	Stability study data revealed that batch no. 180002 at Accelerated condition of 25 degree Celsius with 60% relative humidity have significant deviation of Assay results more than 5%. Moreover, the same batch at real time stability study at 5 degree Celsius also revealed significant change in Assay results more than 5%. Please clarify.	No clarification is submitted

Decision: Deferred for submission of following:

- **Sole Agency agreement between Marketing Authorization Holder of Country of Export and Applicant**
- **Finished Product analytical method validation report conducted by Finished Product manufacturer**
- **Clarification as stability study data revealed that batch no. 180002 at Accelerated condition of 25ºC with 60% relative humidity have significant change of Assay results i.e., more than 5%.**

Administrative Portion

1	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP Certificate No: DCD/SPL-1/CR-1733/2021/02 Valid up to 30.01.2023 Issued BY: Govt. of Karnataka, Drug Control Department, India DML License No: KTK/25/549/2008 Valid up to: 13/02/2025 Issued BY: Govt. of Karnataka, Drug Control Department, India
3	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted

4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr#	Section	Observations
01	3.2.S.3.1	The Molecular weight of Drug substance (Ondansetron Hcl dehydrate) is mentioned as 329.82 g/mol whereas USP has mentioned molecular weight as 365.85. Clarification is required.
02	3.2.S.4	Drug substance analytical method verification studied conducted by drug substance manufacturer and Finished product manufacturer are missing, which are required. Provided copy of COA of Drug Substance Batch No AOND-21015 mentioned Ondansetron Hcl (Tablet grade) .please clarify.
03	3.2.P.1	Finished manufacturer has mentioned Glycerin and poly sucralose as excipients in their formulation which are not present in Reference product, Syp Zofran 4gm/5ml approved by MHRA. Please clarify.
04	3.2.P.8.3	Stability study data of 3 batches for real time and accelerated conditions for 6-month time point is missing which is required. Documents for the procurement of API with approval from DRAP (in case of import).

Previous Decision (M-324-DRB): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of Firm:

Sr#	Observations	Response of firm
01	The Molecular weight of Drug substance (Ondansetron Hcl dehydrate) is mentioned as 329.82 g/mol whereas USP has mentioned molecular weight as 365.85. Clarification is required.	Molecular weight of substance has been corrected as 365.85 g/mol.
02	• Drug substance analytical method verification studied conducted by drug substance manufacturer and Finished product manufacturer are missing, which are required. • Provided copy of COA of Drug Substance Batch No AOND-21015 mentioned Ondansetron Hcl (Tablet grade) please clarify.	• Analytical method verification studies for drug substance by finished product manufacturer have been submitted. • Drug substance manufacturer is manufacturing API for injection as well. That's why uses this identification. COA with revised identification as Ondansetron HCl has been provided. The firm further submitted declaration from drug substance manufacturer that same API can be used to product both Tablets and Syrup
03	Finished manufacturer has mentioned Glycerin and poly sucralose as excipients in their formulation which are not present in Reference product, Syp Zofran 4gm/5ml approved by MHRA. Please clarify.	The firm has submitted evidence of ondansetron hydrochloride solution by M/s Chartwell RX, LLC wherein Glycerin and sucrose has been used along with other excipients. Justification for poly sucralose is not submitted
04	• Stability study data of 3 batches for real time and accelerated conditions for 6-month time point is missing which is required. • Documents for the procurement of API with approval from DRAP (in case of import).	• Stability study for the 6th month time point has been submitted. • Firm has submitted copy of invoice No. EXP-35 dated 17-12-2021 for import of 20Kg of Ondansetron Hydrochloride USP

		Tablet grade (Batch No# AOND-21015) in name of M/s Sharooq Pharmaceutical Pvt. Ltd., attested by AD (I&E) DRAP Lahore dated 23-12-2021.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued after submission of:

- **Fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Compatibility studies of the Drug Substance with excipients**
- **Pharmaceutical equivalence and CDP studies against the innovator product.**

Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Shrooq Pharmaceuticals (Pvt.) Ltd., 21-km Ferozpur Road, Lahore.

Remarks of Evaluator:

Sr#	Section	Observations
01	2.3.S.3.1.2	API manufacturer has mentioned that "Acotiamide Hcl Hydrate exhibits polymorphism". However, the data of Innovator product registered with PDMA mentions that" The drug substance is a trihydrate and has a single crystal form. No crystalline polymorphism is observed." Please clarify .

02	3.2.S.4.2	Substance manufacturer has mentioned Identification testing of Acotiamide Hcl hydrate through Infrared Absorption spectroscopy following USP 197 K by using Kbr pellets, however the drug substance testing specifications provided by finished product manufacturer in 3.2.S.4.4.1 mentioned Identification through FTIR. Clarification is required.
03	3.2.S.4	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted. Please provide.
04	2.3.P.5.1	HPLC Retention time of Acotiamide Hcl hydrate mentioned by substance manufacturer is 11.83 whereas on same chromatographic conditions the retention time of Acotiamide Hcl hydrate in Drug product is mentioned as 8.3 minutes, please clarify. HPLC Run time of sample in drug substance assay testing specification is different from drug product run time , Clarification is required.
05	3.2.P.8	Legible/readable copy of DRAP attested copy if import invoice of API from source is required.

Previous Decision (DRB-324): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of firm:

Sr#	Observations	Response of firm
01	API manufacturer has mentioned that "Acotiamide Hcl Hydrate exhibits polymorphism". However, the data of Innovator product registered with PDMA mentions that" The drug substance is a trihydrate and has a single crystal form. No crystalline polymorphism is observed." Please clarify .	The firm submitted that upon query, API manufacturer admit that it was a typographical error; and only one crystal form of Acotiamide Hydrochloride exists. The XRD data and other relevant documents also assure that the Manufacturer's Acotiamide Hydrochloride Trihydrate is same as the innovator. Furthermore, manufacturer also correct the mistake and shared the revised DMF.
02	Substance manufacturer has mentioned Identification testing of Acotiamide Hcl hydrate through Infrared Absorption spectroscopy following USP 197 K by using Kbr pellets, however the drug substance testing specifications provided by finished product manufacturer in 3.2.S.4.4.1 mentioned Identification through FTIR. Clarification is required.	The firm submitted that we, The Searle Company Limited followed the USP general monograph having title " <197> Spectroscopic Identification Test" for identification via IR spectrophotometer which suggest Seven methods for analysis by infrared spectroscopy in which each of the method can be used as alternative method and we adopted <197A> test for identification which is the latest identification technique.
03	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted. Please provide.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision), linearity, range, system suitability performed by the Drug Product manufacturer for drug substance is submitted.
04	HPLC Retention time of Acotiamide Hcl hydrate mentioned by substance manufacturer is 11.83 whereas on same chromatographic conditions the retention time of Acotiamide Hcl hydrate in Drug product is mentioned as 8.3 minutes, please clarify. HPLC Run time of sample in drug substance assay testing specification is different from drug product run time , Clarification is required.	The firm submitted that we, The Searle Company Limited took the drug substance manufacture method i.e. Mobile Phase A, Mobile Phase B, Diluent, Chromatographic condition, for assay analysis of drug product in which further optimization of Gradient elution has been done by converting in to Isocratic elution to enhance accuracy and precision, improved (Shortened) run time which reduce the testing time and resources. Furthermore the method has been validated and the same has been submitted that is why run time of drug product is differ from drug substance method.
05	Legible/readable copy of DRAP attested copy if import invoice of API from source is required.	Firm has submitted copy of invoice No. 210018 dated 07-10-2020 for import of 1.5kg of Acotiamide Hydrochloride Hydrate (Batch No# ACT2M-20004) in name of The Searle Company

	Limited attested by AD (I&E) DRAP Karachi dated 22-10-2020. Firm has also submitted copy of form 6 dated 22-10-2020 for import of 1.5kg of Acotiamide Hydrochloride Hydrate in name of The Searle Company Limited attested by AD (I&E) DRAP Karachi dated 22-10-2020.
Decision: Approved with innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**	

Agenda of Evaluator PEC-XIII.

Case 01; Registration applications of New DML/New section (Human) drugs on Form 5F.

	The proposed proprietary name / brand name	Sinocef 125mg Suspension.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Cephradine ……..…… 125mg
	Pharmaceutical form of applied drug	Oral Suspension.
	Pharmacotherapeutic Group of (API)	First generation cephalosporin.
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	1 x 60ml and 1 x 90ml.
	Proposed unit price	As per approved price.
	The status in reference regulatory authorities	Suprax 100mg /5ml Dry Suspension by M/s Lupin Pharma, USFDA Approved. **Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons**
	For generic drugs (me-too status)	Caricef 100mg /5ml Dry Suspension, M/s Sami Pharmaceuticals, Reg. No. 022415.
	GMP status of the Finished product manufacturer	New license granted on 18/02/2021 Tablet (General & General Antibiotic) section, General Capsule Section, Cream Ointment & Gel and

		Cephalosporin (Capsule & Dry Suspension) Section approved.
	Evidence of section approval.	Oral Dry Powder Suspension (Cephalosporin) section vide No.F.1-43/2006-Lic (Vol-I) dated 10-06-2021.
	Name and address of API manufacturer.	M/s Pharmagen Limited. Kot Nabi Bukshwala, 34 km Ferozepur Road Lahore. Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis (B. No. 00243/081/22 date of analysis 12-05-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted stability study data of 03 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 b months. Batches: (00244/135/2010, 00244/136/2010 & 00244/137/2010)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence against the brand Caricef 100mg/5ml Dry Suspension, manufactured by M/s Sami, by performing quality tests (Identification, Assay, and Uniformity of dosage form).
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Pharmagen Limited. Kot Nabi Bukshwala, 34 km Ferozepur Road Lahore.
API Lot No.	00243/081/2022
Description of Pack (Container closure system)	Amber colour PET Bottle with white cap 60ml.
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 3 months Accelerated: 3 months

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TR-007	TR-008	TR-009
Batch Size	275 Bottle	275 Bottle	275 Bottle
Manufacturing Date	06-2022	06-2022	06-2022
Date of Initiation	30-06-2022	30-06-2022	30-06-2022
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Response by the firm.
1.	1.5.9	Provide evidence of approval of applied formulation in reference regulatory authorities as defined by the registration Board in its 275th meeting for further processing of your case as the submitted reference of USFDA is discontinued"	

Decision: Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting.

920.	Name, address of Applicant / Marketing Authorization Holder	M/s Safina Pharmaceuticals (Pvt.) Ltd., 17 Km, Lahore Sheikhupura Road, Lahore.

	The proposed proprietary name / brand name	Sinocef 250mg Suspension.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Cephradine …….…… 250mg
	Pharmaceutical form of applied drug	Oral Suspension.
	Pharmacotherapeutic Group of (API)	First generation cephalosporin.
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	1 x 60ml and 1 x 90ml.
	Proposed unit price	As per approved price.
	The status in reference regulatory authorities	Nicef Syrup 250mg/5ml / Cefradine Syrup 250mg/5ml MHRA approved. Active Ingredient Per 5ml Cefradine 250 mg
	For generic drugs (me-too status)	Velosef 250mg Suspension, GSK Pakistan, Reg. No. 001868.
	GMP status of the Finished product manufacturer	New license granted on 18/02/2021 Tablet (General & General Antibiotic) section, General Capsule Section, Cream Ointment & Gel and Cephalosporin (Capsule & Dry Suspension) Section approved.
	Evidence of section approval.	Oral Dry Powder Suspension (Cephalosporin) section vide No.F.1-43/2006-Lic (Vol-I) dated 10-06-2021.
	Name and address of API manufacturer.	M/s Pharmagen Limited. Kot Nabi Bukshwala, 34 km Ferozepur Road Lahore. Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cephradine is available in USP & BP. Firm has submitted detail of the drug substance regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis (B. No. 00203/038/2022, mfg. date 03-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted both real time and accelerated stability study data for the drug substance. Stability study conditions: Real time: 5˚C ± 3˚C %RH for 36 months Accelerated: 25˚C ± 2˚C / 60% ± 5%RH for 6 months Batch No. (00202/001/2008, 00202/050/2008 & 00202/100/2008)

	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted Pharmaceutical Equivalence against the cephradine suspension 250mg/5ml, manufactured by M/s Sami, by performing quality tests (Identification, Assay, and Uniformity of dosage form).
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Response by the firm.
1.	1.5.2	Justification shall be submitted regarding the label claim of the applied formulation as the label claim has only cephradine while the executed BMR's, Batch formula and COA for the finished product has Cephradine as monohydrate.	
2.	3.2.S.4.1	• Specification for the drug substance by the drug product manufacturer shall be submitted. • Firm has submitted BP and USP specifications for the drug substance wherein no limits for 4,5 dihydrocefradine are given while BP has mentioned the same. Clarify.	
3.	3.2.S.4.2	• Analytical procedures for the drug substance by the drug product manufacturer shall be submitted. • Concentration of the standard and test samples in analytical procedures from the drug substance manufacturer are different from BP. Justification shall be submitted.	
4.	3.2.S.4.3	Verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	
5.	3.2.S.4.4	• Justify the physical form of the drug substance whether monohydrate or otherwise. • COAs from both the drug substance manufacturer and drug product manufacturer having same batch number shall be submitted. • COA submitted by the drug substance manufacturer has mentioned that it complies with BP specifications while submitted COA have no limits for 4,5 dihydrocepfradine and BP has mentioned it. Justify.	
6.	3.2.S.5.	• Specifications has mentioned BP specifications for the drug substance while the reference standard provided is that of the USP. Clarification shall be submitted. • Working standard standardized against the reference standard has mentioned that use before 26, October 2016. Clarify.	
7.	3.2.P.1	Qualitative composition of the applied formulation is different from reference product. Justification shall be submitted.	
8.	3.2.P.2	• Justification for not performing Pharmaceutical Equivalence against the innovator brand shall be submitted. • In one page PE against Sami pharma product is established while on another page PE against Velosef suspension by GSK pharma is submitted. Calrify. • Justification shall be submitted for using UV method in assay test for PE while the official method has assay test on HPLC method.	

		• No details of mfg. date, Exp. Date & batch numbers are provided in pharmaceutical equivalence studies.	
9.	3.2.P.5.1	Specification provided for drug product by the drug product manufacturer has different pH limits from pharmacopoeia and also not mentioned cephalexin in assay test.	
10.	3.2.P.5.4	COA for the finished product has only mentioned cephradine while the USP has mentioned sum of Cephradine and cephalexin. Clarification shall be submitted.	•
11.	3.2.P.5.3	• Method verification protocol shall be submitted. • Sample and standard solution preparation used in method verification studies shall be submitted. • Provide justification for accuracy range i.e 90% - 110%.	•
12.	3.2.P.8	• Justify the label claim of the applied formulation in the assay calculation of submitted chromatograms as 25mg is claimed while the actual value is 50mg. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • API lot number used during the development studies shall be mentioned in the stability data sheets. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Complete six months stability study data shall be submitted.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02/09/2020 issued on the basis of inspection conducted on 22-06-2020 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section number	Observation	Response by the firm.
1.	3.2.S.4.1	Specification for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
2.	3.2.S.4.2	Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
3.	3.2.S.4.3	Verification studies for the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted verification studies of the drug substance including specificity, accuracy and precision. Linearity and range are not verified.
4.	3.2.S.4.4	COAs from both the drug substance manufacturer and drug product manufacturer having same batch number shall be submitted.	COAs of the drug substance from both drug substance manufacturer and finished product manufacturer are submitted.
5.	3.2.S.7.3	Justification shall be submitted for performing only few tests in the stability studies of drug substance.	Firm has submitted that stability studies are conducted on stability specifications which are different from the release or shelf life specifications. Usually those tests are performed in stability studies which are expected to be affected by temperature and humidity conditions over the period of time. Pharmagen is a DRAP approved API manufacturer and its stability study data for Cefixime has been accepted by Registration Board in various meetings.
6.	3.2.P.2	• Justification shall be submitted for using UV method in assay test for PE while the official method has assay test on HPLC method.	Firm has submitted that they perform pharmaceutical equivalence studies using the same method provided in 3.2.P.5.1 & 3.2.P.5.2 and there was some typographical mistake while compiling dossier and by mistake some UV method was attached. *Submitted raw data in the originally submitted dossier is from UV method and no data of HPLC is submitted by the firm.*

		• No details of mfg. date, Exp. Date & batch numbers are provided in pharmaceutical equivalence studies.	Firm has submitted details of the innovator product as follows; Batch No. D1836, Mfg. date 06-2022, Exp. Date 05, 2024
7.	3.2.P.3.2.	Batch formula has mentioned Cefixime trihydrate 100 instead of Cefixime as trihydrate 100. Revised batch formula along with applicable fee shall be submitted.	Firm has submitted revised batch formula for the applied formulation without submission of applicable fee.
8.	3.2.P.5.3	• Method verification protocol shall be submitted.	**Not submitted.**
		• Sample and standard solution preparation used in method verification studies shall be submitted.	Firm has submitted that sample and standard preparation method used in verification studies are exactly same as defined in the analytical procedures of drug product. However, dilution prepared for the verification studies are not provided.
		• Provide justification for accuracy range i.e 90% - 110%.	Firm has submitted that accuracy range was mistakenly written as 90% - 110%, now we have corrected the range and our results were within the limit of ±2% as defined by ICH guidelines.
9.	3.2.P.8	• Official pharmacopoeia has mentioned that Adjust flow rate so that the retention time of Cefixime is about 10 min while all the submitted chromatograms has run time of 6 to 7 minutes and retention time is about 3 minutes.	Firm has submitted that they have performed verification studies and system suitability studies as defined by USP. During verifications studies they have performed HPLC analysis for run time greater than 10 minutes, but our analyte peak was observed from 3 to 4 minutes so as per USP recommendations they adjusted the HPLC run time to 07 minutes. Both standard as well as sample analysis show similar retention time which justify the identification as well as other analytical tests. Conditions applied are similar to USP however, retention time is not in line with USP.
		• Submitted chromatograms does not reveal system suitability parameters as required by the USP monograph. Justify.	Firm has submitted that their default software for HPLC show limited options while printing HPLC chromatograms however, all parameters related to system suitability like number of theoretical plates, tailing factor, column efficiency etc. are recorded and saved within the system for each chromatograms.
		• Submitted chromatograms does not column efficiency as required by the USP monograph. Justify.	
		• API lot number is not mentioned in stability data sheets.	Firm has stated that API lot number is 00243/081/22. ***However, the Purchase invoice has some other batch number of the raw material.*** Firm has submitted copy of invoice No. 2645 dated 10-05-2022 mentioning Cefixime micronized with batch No. 00243-04/081/2022 with 2kg quantity.
		• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	Firm has submitted that their HPLC system is not 21 CFR compliant however they have maintained all relevant logs as per the GMP requirements. Submitted.
		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	
		• Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Firm has submitted that they have recently been granted with manufacturing license and till date they have not received any approval of application with stability data. Submitted.

	• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Complete six months stability study data shall be submitted.	
Decision: Deferred for the following; • **Performance of Assay test in Pharmaceutical equivalence studies, as per USP monograph.** • **Justification shall be submitted for retention time of Cefixime with respect to the USP which states that "Adjust flow rate so that the retention time of Cefixime is about 10 min" while all the submitted chromatograms has "run time" of 6 to 7 minutes and retention time is about 3 minutes.** • **Justification shall be submitted for difference in the API lot number in stability summary data sheets and purchase invoice.** • **Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**		
CLB in its 284th meeting held on 16th December 2021 has considered and approved the grant of following four (04) additional section to M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura; • Capsule (Penicillin). – New. • Oral Dry Powder Suspension (Penicillin). – New. • Dry Powder Injectable (Penicillin). – New. • Dry Powder Injectable (Carbapenem). – New. Following applications of M/s Fynk Pharma are placed before the Board for consideration.		
923.	Name, address of Applicant / Marketing Authorization Holder	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Name, address of Manufacturing site.	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 477 dated 05-01-2023.
	Details of fee submitted	PKR 30,000/-, vide slip No. 3316253310, Dated 12/12/2022.
	The proposed proprietary name / brand name	**FAXCIL 125 mg/5ml suspension.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Amoxicillin as Trihydrate ……..……. 125 mg.
	Pharmaceutical form of applied drug	Powder for oral suspension.
	Pharmacotherapeutic Group of (API)	Beta-Lactam Antibacterial, Penicillin.
	Reference to Finished product specifications	BP Specifications.
	Proposed Pack size	1's
	Proposed unit price	100/-
	The status in reference regulatory authorities	Amoxil-125mg/5ml, 250mg/5ml, USFDA approved. 125mg/5ml **Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons**

	For generic drugs (me-too status)	Amoxil 125mg/5ml dry suspension, GSK Karachi, Reg. No. 000508.
	GMP status of the Finished product manufacturer	New license for additional sections granted on 16/12/2021.
	Evidence of section approval	Oral dry powder suspension (Penicillin) section - New approved vide letter No. F. 1-63/84-Lic (Vol-III) dated 27-12-2021.
	Name and address of API manufacturer.	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore. Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Amoxicillin trihydrate is present in BP. The firm has submitted detail of drug substance regarding its nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis (B. No. 000120/841/2021, mfg. date 12-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (00013/210/2009, 00013/211/2009, 00013/212/2009)
	Module-III (Drug Product):	Firm has submitted detail of the drug product including its description and composition, manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Amoxil 125 mg Suspension manufactured by GSK Pharma by performing quality tests (Identification, Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Pharmagen Limited, Kot Nabi buksh wala, 34 K.M. Ferozpur Road, Lahore.
API Lot No.	000120/841/2021.
Description of Pack (Container closure system)	Faxcil Suspension 125mg/5ml is packed in Amber colored Glass bottle packaging that is further packed in cardboard unit carton along with patient leaflet insert.
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 06 months

	Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	FX-125(TR-001)	FX-125(TR-002)	FX-125(TR-003)
Batch Size	100 bottle	100 bottle	100 bottle
Manufacturing Date	02-2022	02-2022	02-2022
Date of Initiation	20-02-2022	20-02-2022	20-02-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product D-Lazol 30mg capsules which was conducted on 07-09-2021 and was presented in 312th meeting of Registration Board (14 - 16 September, 2021). Report has confirmed that HPLC used in the analysis has HPLC software that is 21 CFR compliant and compliance certificate from the vendor was available. Audit trial of the system on which testing was reviewed.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Performa invoice No. PL/P-INV/HO /866 dated 03-01-2022 mentioning 5kg of the active ingredient is submitted. *However, no batch number is mentioned on the invoice.*
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of GMP certificate of the finished product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 198/2022-DRAP (AD-9405944056-789) dated 17-11-2022 issued on the basis of inspection conducted on 14-11-2022.
2.	1.6.5	Valid copy of the GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted. *GMP certificate of the drug substance manufacturer is not valid.*
3.	3.2.S.4.1	Specification of the drug substance by the drug product manufacturer shall be submitted.	Submitted.
4.	3.2.S.4.2	Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
5.	3.2..4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Firm has submitted method verification studies of the drug substance performed by the drug product

			manufacturer including Specificity, accuracy and precision.
6.	3.2.S.5	Details and COA of the working standard used shall be submitted.	Submitted.
7.	3.2.P.1	Qualitative composition of the applied formulation is different from the reference product. Clarification shall be submitted.	*No justification is submitted by the firm.*
8.	3.2.P.2.2	No details of the reference product are provided in Pharmaceutical Equivalence.	*Still no details are provided by the firm.* *Only the name of the manufacturer is provided while Batch number, manufacturing date, expiry date and evidence of the pack used for CDP and pharmaceutical equivalence is not provided.*
9.	3.2.P.5.4	COAs of all the three trial batches shall be submitted.	Submitted.
10.	3.2.P.8	Justify the standard preparation in batch analysis record with respect to the analytical procedure.	Firm has submitted that as in analytical procedure standard preparation is 0.070% as per BP, that is equivalent to 0.70mg/ml. In batch analysis record, during bulk analysis standard was 0.50mg/ml that was approximate to sample preparation (0.60mg/ml). but from finished product to all stability testing it was 0.70mg/ml.

Decision: Deferred for the following;

- **Valid copy of the GMP certificate of the drug substance manufacturer shall be submitted.**
- **Justification shall be submitted for difference in qualitative composition of the applied formulation from Innovator product.**
- **Details of the reference product used for Pharmaceutical Equivalence studies i.e. Batch number, manufacturing date, expiry date shall be submitted.**
- **Scientific justification shall be submitted for using 0.50mg/ml standard solution in batch analysis while BP has mentioned 0.70mg/ml concentration for the standard solution.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of drug substance related to its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis (B. No. DLP864, mfg. date 24-02-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted both real time and accelerated stability data sheets for drug substance. Stability data conditions are as follows: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 months. Batch No. (DLP260, DLP252 & DLP253)
	Module-III (Drug Product):	Firm has submitted detail of the drug product regarding its description & composition, pharmaceutical development, manufacturers, description of manufacturing process and controls, impurities, Process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Razodex 30mg Capsules, B. No.

		064C47, mfg. date 08-2021 manufactured by M/s Getz Pharma, by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP is also performed against the same brand that is Razodex 30mg Capsules, B. No. 064C47, mfg. date 08-2021 manufactured by M/s Getz Pharma, in Acid media of 0.1N, Buffer (pH 5.5) and Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including Accuracy, Precision (Repeatability), specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals (Pvt.) Ltd. Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad- Pakistan.

Date of Initiation	17-06-2022	17-06-2022	17-06-2022
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. F. 3-26/2019-Addl. Dir. (QA&LT-I)-56 dated 22-08-2022 on the basis of inspection conducted on 14-06-2022 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 30's as proposed pack size for the applied formulation.

2.	3.2.S.4.1	Neither drug substance manufacturer nor drug product manufacturer has mentioned that assay in on anhydrous basis or as is basis.	Firm has submitted that drug pellets manufacturer has claimed assay of drug substance on as is basis and same is from finished product manufacturer.
3.	3.2.S.4.4	COA from drug substance manufacturer potency is on anhydrous basis or as is basis.	Firm has submitted COA from the drug substance manufacturer wherein the potency is on as is basis.
4.	3.2.S.5	Details and COA of the working standard used during formulation development shall be submitted.	Submitted.
5.	3.2.S.6	Justification shall be submitted regarding packaging material used during the stability studies of the drug substance as section 3.2.S.6 has mentioned LDPE and HDPE while the stability data sheets has mentioned PET bottles.	Firm has submitted that stability samples are filled in polybags and finally packed in HDPE bottles, they also submitted corrected and updated stability data for the drug substance.
6.	3.2.P.2.2	• Justification for not performing CDP & PE against the innovator product shall be submitted.	Firm has submitted that Dexilant is innovator product and at the time of studies the innovator sample was not available in the local market and we performed CDP & PE against razodex 30mg capsules manufactured by Getz pharma.
		• Comparison of CDP in all the three mediums separately shall be submitted.	Firm has submitted revised CDP results for the applied formulation in acidic medium pH 1.2 and buffer pH 6.8.
7.	3.2.P.5.1	Drug product specifications has mentioned assay as BP specifications. Clarify.	Firm has submitted revised specifications for the drug product wherein they have changed BP specifications to Innovator's specifications. ***Fee required for pre-registration variation is not submitted.***
8.	3.2.P.5.2	• Analytical procedures for assay test of the finished product has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.05mg/ml strength of standard solution. Clarification shall be submitted.	Firm has submitted that it was typo error and concentration of both sample and standard preparation 0.01mg/ml. they also submitted corrected and revised testing method.
		• Similarly, sample solution has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.025mg/ml strength of sample solution. Clarification shall be submitted.	
		• Calculation formula for assay test is also different from the analytical procedure. Justify.	Firm has also submitted calculation formula.
9.	3.2.P.8	• Justify the weight of standard in assay test with respect to the analytical procedure for assay test.	Firm has submitted that this mistake was due to typo error in the testing method which has now been rectified.
		• Justify the weight of standard in dissolution test with respect to the analytical procedure for dissolution test.	Firm has submitted rectified testing method wherein the standard preparation in the dissolution test has mentioned that "take accurately weighed Dexlansoprazole working standard (on anhydrous basis) equivalent to 50mg" *However, the raw data sheets have clearly mentioned 30mg which is not justified by the firm.*
		• 92.56% potency used in assay and dissolution test shall be justified.	Firm has submitted COA of the working standard used in the trial batches and has potency of 92.56.
		• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets.	Firm has submitted revised stability data sheets with inclusion of API lot number.

	• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	***Not submitted.*** ***Not submitted.*** ***Not submitted.***

Decision: Deferred for following:

- **Justification for variation in the standard solution concentration as declared n raw data sheets from that mentione din the drug oridyct analytical oricedure for Assay & Dissolution test.**
- **Justification for variation in calculation formula applied in the raw data sheet from that mentioned in the drug product analytical procedure for Assay test.**
- **Clarification for variation in the API lot# mentioned in the stability summary sheet from that declared on the drug substance COA.**
- **Submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. F. 3-26/2019-Addl. Dir. (QA&LT-I)-56 dated 22-08-2022 on the basis of inspection conducted on 14-06-2022 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 30's as proposed pack size for the applied formulation.
2.	2.3.R	Table for literature references has mentioned USP for drug substance and drug product while there is no official monograph for dexlansoprazole pellets. Revised table for literature references with applicable fee shall be submitted.	Firm has submitted revised table for literature references wherein they have not mentioned anything against the drug substance and drug product with submission of 7500/- fee vide slip No. 1377271048 dated 02-03-2023.
3.	3.2.S.4.1	Neither drug substance manufacturer nor drug product manufacturer has mentioned that assay in on anhydrous basis or as is basis.	Firm has submitted that drug pellets manufacturer has claimed assay of drug substance on as is basis and same is from finished product manufacturer.
4.	3.2.S.4.4	COA from drug substance manufacturer potency is on anhydrous basis or as is basis.	Firm has submitted COA from the drug substance manufacturer wherein the potency is on as is basis.
5.	3.2.S.5	Details and COA of the working standard used during formulation development shall be submitted.	Submitted.
6.	3.2.S.6	Justification shall be submitted regarding packaging material used during the stability studies of the drug substance as	Firm has submitted that stability samples are filled in polybags and finally packed in HDPE bottles, they

		section 3.2.S.6 has mentioned LDPE and HDPE while the stability data sheets has mentioned PET bottles.	also submitted corrected and updated stability data for the drug substance.
7.	3.2.S.7.3	• Specifications has mentioned release in buffer pH 5.5 of 15-40% in one hour while the stability data sheet has mentioned NMT 30%. Clarification shall be submitted. • Similarly, the release in pH 7 medium has different values than mentioned in specifications. Justify.	Firm has submitted that previously submitted stability data was of trial batches and testing performed on stringent specifications, to get confidence on formulation prior to commercialize. But from very first commercial consignment, specifications were same as mentioned in shared COA and recently provided stability data is of commercial lots and on the same specifications.
8.	3.2.P.2.2	• Justification for not performing CDP & PE against the innovator product shall be submitted. • Comparison of CDP in all the three mediums separately shall be submitted.	Firm has submitted that Dexilant is innovator product and at the time of studies the innovator sample was not available in the local market and we performed CDP & PE against razodex 60mg capsules manufactured by Getz pharma. Firm has submitted revised CDP results for the applied formulation in acidic medium pH 1.2 and buffer pH 6.8.
9.	3.2.P.5.1	Drug product specifications has mentioned assay as BP specifications. Clarify.	Firm has submitted revised specifications for the drug product wherein they have changed BP specifications to Innovator's specifications.
10.	3.2.P.5.2	• Analytical procedures for assay test of the finished product has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.05mg/ml strength of standard solution. Clarification shall be submitted. • Similarly, sample solution has mentioned 0.01mg/ml standard solution while the descriptive procedure has strength of 0.025mg/ml strength of sample solution. Clarification shall be submitted. • Calculation formula for assay test is also different from the analytical procedure. Justify.	Firm has submitted that it was typo error and concentration of both sample and standard preparation 0.01mg/ml. they also submitted corrected and revised testing method. Firm has also submitted calculation formula.
11.	3.2.P.8	• Justify the weight of standard in assay test with respect to the analytical procedure for assay test. • Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted that this mistake was due to typo error in the testing method which has now been rectified. Firm has submitted rectified testing method wherein the standard preparation in the dissolution test has mentioned that "take accurately weighed Dexlansoprazole working standard (on anhydrous basis) equivalent to 50mg" ***However, the raw data sheets have clearly mentioned 30mg which is not justified by the firm.*** Firm has submitted revised stability data sheets with inclusion of API lot number. ***Not submitted.*** ***Not submitted.***

	• Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.	***Not submitted.***
Decision: Deferred for following: • **Justification for variation in the standard solution concentration as declared n raw data sheets from that mentione din the drug oridyct analytical oricedure for Assay & Dissolution test.** • **Justification for variation in calculation formula applied in the raw data sheet from that mentioned in the drug product analytical procedure for Assay test.** • **Clarification for variation in the API lot# mentioned in the stability summary sheet from that declared on the drug substance COA.** • **Submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021**

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 10's, 14's, 20's, 30's as proposed pack sizes for the applied formulation.
2.	1.5.5	Revise pharmacological group as per WHO ATC classifications with applicable fee shall be submitted.	Firm has revised pharmacological group as per WHO ATC classifications with submission of 7500/- fee vide slip No. 17180803563 dated 23-02-2023.
3.	1.6.5	• Address of the drug substance manufacturer mentioned in section this section, Clearance certificate and on DMF is completely different from that mentioned on GMP certificate. Justification shall be submitted.	Firm has submitted that they have mistakenly attached GMP certificate having different address in our dossier. They also provided copy of GMP certificate No. L. Dis. No: 92502/TS/2022 Dated:11/07/2022 issued by Drugs Control Administration Government of

		• Furthermore, valid copy of GMP certificate of M/s Almelo Private Limited., Unit-II Survey No. 227, 228 & 136, 137 Shabashpally(V), Shivampet(M) Medak District, Telangana- 502334 India.	Telangana in the name of M/s Almelo Private Limited Unit Ii Situated at Address Survey Nos. 227, 228 & 137, 136, Shabashpally Village, Shivampet Mandal, Medak District, Pin code 502334, Telangana State, India. Valid till 10/07/2023.
4.	2.3.R	Table for literature references has mentioned USP for drug substance only. However, it is also available in BP and other. Revised table for literature references with applicable fee shall be submitted.	Firm has submitted correct table for literature references.
5.	3.2.S.4.3	Verification of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.4	COA of the drug substance from both the drug substance manufacturer and finished product manufacturer with same batch number shall be submitted.	*Firm has once again submitted the same COA with different batch number from that of the drug substance manufacturer.*
7.	3.2.P.1.3	This section has mentioned Alu/Alu Blister strips of 2x7 Tablets packed in unit carton. Clarify.	Firm has submitted that It was Typographic mistake and they also submitted revised copy of Section 3.2.P.1.3. wherein they have replaced tablets with capsules.
8.	3.2.P.2.2	Justification for not performing CDP & PE against the innovator product shall be submitted.	Firm has submitted that Lyrica is an innovator of pregabalin capsule. In local market at the time of study only Lyrica 75mg capsule is available so we have chosen another market leader for performing CDP that is Gabica 50mg capsule manufactured by Getz Pharma.
9.	3.2.P.5.1	Specifications and stability data sheets have not mentioned any dissolution time. Justify.	Firm has submitted that dissolution time is mentioned on testing method and they also submitted revised specification & Stability Summary sheets wherein they have added dissolution time.
10.	3.2.P.8	• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets. • Complete six-month stability data shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted revised stability data sheets wherein they have included API lot number. Complete six-month stability data is submitted by the firm. Firm has submitted that in DRB 323 Meeting our 8 Products of tablet section was approved. Submitted.
11.		Justification shall be submitted for using 2 different volumes in sample one and two for preparation of test solution in calculation of assay of trial batches.	Firm has submitted that It was typo graphical error, as per testing method it is 250 instead of 100 correction made revised reports are also submitted.

Decision: Deferred for justification for variation in batch no. of COAs provided from drug substance manufacturer and drug product manufacturer.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. L. Dis. No. 101460/TS/2022 dated 04-11-2022 issued by the DCA, Telangana State in the name of M/s Almelo Private Limited, Plot No. A-38 & 39, Road No.7, IDA Kukatpally, Gandhi Nagar, Hyderabad-500037., Balangar Village, Balangar Mandal, Medchal-Malkajgri District, Telangana State, India. Valid till 03/11/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted computerized certificate No. K-399471413819 dated 28/04/2022 wherein they have imported 2kg of Pregabalin USP from M/s Almelo Private Limited., Unit-II Survey No. 227, 228 & 136, 137 Shabashpally(V), Shivampet(M) Medak District, Telangana- 502334 India.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 10's, 14's, 20's, 30's as proposed pack sizes for the applied formulation.
2.	1.5.5	Revise pharmacological group as per WHO ATC classifications with applicable fee shall be submitted.	Firm has revised pharmacological group as per WHO ATC classifications with submission of 7500/- fee vide slip No. 306443220047 dated 23-02-2023.
3.	1.6.5	• Address of the drug substance manufacturer mentioned in section this section, Clearance certificate and on DMF is completely different from that mentioned on GMP certificate. Justification shall be submitted. • Furthermore, valid copy of GMP certificate of M/s Almelo Private Limited., Unit-II Survey No. 227, 228 & 136, 137 Shabashpally(V), Shivampet(M) Medak District, Telangana- 502334 India.	Firm has submitted that they have mistakenly attached GMP certificate having different address in our dossier. They also provided copy of GMP certificate No. L. Dis. No: 92502/TS/2022 Dated:11/07/2022 issued by Drugs Control Administration Government of Telangana in the name of M/s Almelo Private Limited Unit Ii Situated at Address Survey Nos. 227, 228 & 137, 136, Shabashpally Village, Shivampet Mandal, Medak District, Pin code 502334, Telangana State, India. Valid till 10/07/2023.
4.	2.3.R	Table for literature references has mentioned USP for drug substance only. However, it is also available in BP and other. Revised table for literature references with applicable fee shall be submitted.	Firm has submitted correct table for literature references.
5.	3.2.S.4.3	Verification of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.4	COA of the drug substance from both the drug substance manufacturer and finished product manufacturer with same batch number shall be submitted.	*Firm has once again submitted the same COA with different batch number from that of the drug substance manufacturer.*
7.	3.2.P.1.3	This section has mentioned Alu/Alu Blister strips of 2x7 Tablets packed in unit carton. Clarify.	Firm has submitted that It was Typographic mistake and they also submitted revised copy of Section 3.2.P.1.3. wherein they have replaced tablets with capsules.

8.	3.2.P.2.2	Evidence of the pack of the innovator product shall be submitted.	Firm has submitted evidence of the innovator product with same batch number and manufacturing date as mentioned in CDP and PE.
9.	3.2.P.5.1	Specifications and stability data sheets have not mentioned any dissolution time. Justify.	Firm has submitted that dissolution time is mentioned on testing method and they also submitted revised specification & Stability Summary sheets wherein they have added dissolution time.
10.	3.2.P.8	• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets. • Complete six-month stability data shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted revised stability data sheets wherein they have included API lot number. Complete six-month stability data is submitted by the firm. Firm has submitted that in DRB 323 Meeting our 8 Products of tablet section was approved. Submitted.
11.		Justification shall be submitted for using 2 different volumes in sample one and two for preparation of test solution in calculation of assay of trial batches.	Firm has submitted that It was typo graphical error, as per testing method it is 250 instead of 100 correction made revised reports are also submitted.

- **Decision: Deferred for justification for variation in batch no. of COAs provided from drug substance manufacturer and drug product manufacturer.**

Remarks by the Evaluator:				

Sr. No.	Section	Observation	Response by the firm
1.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted 10's, 14's, 20's, 30's as proposed pack sizes for the applied formulation.
2.	1.5.5	Revise pharmacological group as per WHO ATC classifications with applicable fee shall be submitted.	Firm has revised pharmacological group as per WHO ATC classifications with submission of 7500/- fee vide slip No. 061760215445 dated 23-02-2023.
3.	1.6.5	• Address of the drug substance manufacturer mentioned in section this section, Clearance certificate and on DMF is completely different from that mentioned on GMP certificate. Justification shall be submitted. • Furthermore, valid copy of GMP certificate of M/s Almelo Private Limited., Unit-II Survey No. 227, 228 & 136, 137 Shabashpally(V), Shivampet(M) Medak District, Telangana- 502334 India.	Firm has submitted that they have mistakenly attached GMP certificate having different address in our dossier. They also provided copy of GMP certificate No. L. Dis. No: 92502/TS/2022 Dated:11/07/2022 issued by Drugs Control Administration Government of Telangana in the name of M/s Almelo Private Limited Unit Ii Situated at Address Survey Nos. 227, 228 & 137, 136, Shabashpally Village, Shivampet Mandal, Medak District, Pin code 502334, Telangana State, India. Valid till 10/07/2023.
4.	2.3.R	Table for literature references has mentioned USP for drug substance only. However, it is also available in BP and other. Revised table for literature references with applicable fee shall be submitted.	Firm has submitted correct table for literature references.
5.	3.2.S.4.3	Verification of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.4	COA of the drug substance from both the drug substance manufacturer and finished product manufacturer with same batch number shall be submitted.	*Firm has once again submitted the same COA with different batch number from that of the drug substance manufacturer.*
7.	3.2.P.1.3	This section has mentioned Alu/Alu Blister strips of 2x7 Tablets packed in unit carton. Clarify.	Firm has submitted that It was Typographic mistake and they also submitted revised copy of Section 3.2.P.1.3. wherein they have replaced tablets with capsules.
8.	3.2.P.2.2	Justification for not performing CDP & PE against the innovator product shall be submitted.	Firm has submitted that Lyrica is an innovator of pregabalin capsule. In local market at the time of study only Lyrica 75mg capsule is available so we have chosen another market leader for performing CDP that is Gabica 50mg capsule manufactured by Getz Pharma.
9.	3.2.P.5.1	Specifications and stability data sheets have not mentioned any dissolution time. Justify.	Firm has submitted that dissolution time is mentioned on testing method and they also submitted revised specification & Stability Summary sheets wherein they have added dissolution time.
10.	3.2.P.8	• Stability data shall be as per decision of 293rd meeting with inclusion of API lot number in the stability data sheets. • Complete six-month stability data shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted revised stability data sheets wherein they have included API lot number. Complete six-month stability data is submitted by the firm. Firm has submitted that in DRB 323 Meeting our 8 Products of tablet section was approved. Submitted.
11.		Justification shall be submitted for using 2 different volumes in sample one and two for preparation of test solution in calculation of assay of trial batches.	Firm has submitted that It was typo graphical error, as per testing method it is 250 instead of 100 correction made revised reports are also submitted.

Decision: Deferred for justification for variation in batch no. of COAs provided from drug substance manufacturer and drug product manufacturer.		
On the recommendations of panel of experts, the CLB in its 273rd meeting held on 15th January, 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following four sections: i. Tablet Section (General) ii. Capsule Section (General) iii. Sachet Section (General) iv. Dry powder injection section (pre-lyophilized) vial

	For generic drugs (me-too status)	Flagyl 500mg/100ml Infusion by M/s Sanofi-aventis Pakistan Ltd., Reg. No. 005102.
	GMP status of the Finished product manufacturer	New license granted on 13/02/2020. General Tablet, General Capsule, General Sachet and General dry powder injectable (pre-lyophilized) Vial.
	Evidence of approval of manufacturing facility/ approved section from Licensing Authority.	Liquid injectable – Ampoule & Vial (General) section is approved vide letter No. F.1-1/2016/Lic. Dated 22-09-2021.
	Name and address of API manufacturer.	AARTI drugs Limited., Plot # 2902-2904 to 2605-2509 GIDC., Sarigam city, Dist. Valsad, Gujrat State, India. Copy of GMP certificate No. 19021202 dated 15-02-2019 issued on the basis of inspection conducted on 14-02-2019 by Food and Drug Control Administration, Gujrat State India is submitted. Valid till 14-02-2022.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility,

		physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Metronidazole is present in USP/BP. Firm has submitted detail of the drug substance including its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (Batch No. MTZ/1030410, mfg. date 02-2021), justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months. Batches (MTZ/6010028, MTZ/6010029 & MTZ/6010030)
	Module-III (Drug Product):	Firm has submitted detail of the drug product including its description, composition, manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Flagyl 500mg/100ml Infusion batch No. AW132 manufactured by M/s Sanofi-aventis Pakistan Ltd., by performing quality tests (pH, endotoxin test, sterility, assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	AARTI drugs Limited., Plot # 2902-2904 to 2605-2509 GIDC., Sarigam city, Dist. Valsad, Gujrat State, India.		
API Lot No.	MTZ/1030410.		
Description of Pack (Container closure system)	100ml glass Vial containing clear solution.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch Size	500	500	500
Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	02-02-2022	02-02-2022	02-02-2022
No. of Batches	03		
REQUEST OF EXEMPTION FROM ON SITE INSPECTION			

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.		
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 19021202 dated 15-02-2019 issued on the basis of inspection conducted on 14-02-2019 by Food and Drug Control Administration, Gujrat State India is submitted. Valid till 14-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.17796/2021/DRAP dated 23/11/2021 is submitted wherein the permission to import different APIs including Paracetamol and Metronidazole BP for the purpose of test/analysis and stability studies is granted. Certificate is attested by the Assistant Director I&E, DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of GMP certificate of drug product manufacturer shall be submitted.	Copy of GMP certificate No. 248/2022-DRAP (AD-0835218-1099) dated 13-12-2022 issued on the basis of inspection conducted on 05-12-2022.
2.	1.5.6	This section has mentioned USP specifications for the drug product while 3.2.P.1 has mentioned BP specifications. Justification shall be submitted.	Firm has submitted revised 3.2.P.1 wherein they have mentioned USP specifications.
3.	1.6.5	Valid copy of GMP certificate of drug substance manufacturer issued by concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. 22023147 issued by Food and drug Control Administration, Gujrat State India in the name of M/s AARTI drugs Limited., Plot # 2902-2904 to 2605-2509 GIDC., Sarigam city, Dist. Valsad, Gujrat State, India on the basis of inspection conducted on 02-02-2022 valid till 17-02-2025.
4.	2.3.R	Revised table for literature references with correct information regarding both the drug substance and drug product with applicable fee shall be submitted.	Firm has submitted revised table for literature references with correct information along with submission of applicable fee of 7500/- vide slip No. 98333729655 dated 06-03-2023.
5.	3.2.S.4.1	Specification of the drug substance by the drug product manufacturer shall be submitted.	Submitted. *However, the drug substance manufacturer has provided BP specifications while drug product manufacturer has provided USP specifications.*
6.	3.2.S.4.2	Analytical procedures of the drug substance by the drug product manufacturer shall be submitted.	Submitted. *Analytical procedures as per USP monograph are provided while the drug substance is having BP specifications.*
7.	3.2.S.4.3	Justification shall be submitted for using USP method for the verification studies of the drug substance while the drug substance has BP specifications.	Firm has submitted that BP method used UV method for assay determination while USP use HPLC for assay determination. Since HPLC is more advanced and comprehensive instrument therefore we use USP

			method and specifications for assay determination and other tests.
8.	3.2.S.4.4	Neither the drug substance manufacturer nor the finished product manufacturer has performed bacterial endotoxin test and total aerobic count test. Justify.	Firm has submitted that BP and USP does not include BET and total aerobic test at raw material stage. Both tests are included at the finished product and both tests are performed by us at finished product stage.
9.	3.2.S.5	COA and details of the working standard used in the development studies shall be submitted.	Submitted.
10.	3.2.P.5.1	• Specification has mentioned assay as per innovator specifications. Clarify. • Specification of the finished product has not mentioned identification test. Clarify.	Firm has submitted that it was typographic error and also submitted revised specifications. Revised specifications has also mentioned identification test.
11.	3.2.P.3.3	Justification shall be submitted for not performing terminal sterilization of the applied formulation.	Firm has submitted that BMR of the product has description of terminal sterilization @ 121˚C at 15 PSI. *However, the standard manufacturing process provided by the firm has mentioned that sterilize the rubber plugs, machine parts, Uniforms, S Gloves & dusters in autoclave at 121˚C for half hour followed by one-hour dry cycle as per SOP. Sterilize the glass vials in dry heat sterilizer at 250˚C for two hours as per SOP.* *No terminal sterilization is mentioned in the standard manufacturing process.*
12.	3.2.P.5.2	Analytical procedure for all the test of finished product shall be submitted.	*Firm has once again submitted analytical procedure for assay test in details while no details for other tests are provided.*
13.	3.2.P.8	Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted audit trial reports for the applied formulation.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm shall submit comlete batch manufacturing records fo first three commercial batches including the process of terminal sterilisation.**

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. New-WHO-GMP/Cert/KD/89275/2020/11/33788 dated 20-10-2020 issued on the basis of inspection conducted on 06-03-2020 valid till 19-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate No. E-897164883689 dated 19-04-2022 for 50Kg of Cefepime HCl and L-Arginine sterile USP having Batch No. CEIV/B2201004 with manufacturing date of 01-11-2021 issued in name of M/s Medisave attested by AD I&E DRAP, Lahore. Firm has also submitted copy of loan letter from M/s Medisave Pharmaceutical for 05kg.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Latest GMP certificate/last inspection report conducted within last three years for the Finished Product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 70/2021-DRAP (FID/2061717-540) dated 08-09-2021 issued on the basis of inspection conducted on 08-09-2021.
2.	2.3.R	Table for literature references shall be revised with inclusion of status of both drug substance and finished product in pharmacopoeia with applicable fee.	*Not submitted.*
3.	3.2.S.4.1	Drug Substance manufacturer has mentioned L-arginine quantity (on as is basis) between 34% - 44% while FPP has mentioned 37.1% - 44%. Clarify.	Firm has submitted that it was typographic error and also submitted corrected specification and corrected COA for the drug substance. *However, fee applicable to pre-registration variation is not submitted.*
4.	3.2.S.4.2	Calculation formula for assay of drug substance shall be provided.	Submitted.
5.	3.2.S.4.4	• Justification shall be submitted regarding the COA of the drug substance provided by the drug product manufacturer as assay of Cefepime base on as is basis in the same is 50.19% while the specification provided by the drug substance manufacturer has assay limit of Cefepime on as is basis of NLT 50.5%. • COA of the drug substance by the drug product manufacturer has manufacturing date of 11-2022 while that of the drug substance manufacturer has manufacturing date of 11-2021. Clarify.	Firm has only submitted COA of the drug substance from supplier. *However, initially submitted specification provided by the drug substance manufacturer has assay limit of Cefepime on as is basis of NLT 50.5% while the COA of the finished product manufacturer has assay of Cefepime on as is basis of 50.19 which is out of specifications.* Firm has submitted that it was typo error and they also provided corrected COA.
6.	3.2.P.2.2	• Justification shall be submitted for not performing Pharmaceutical Equivalence against the innovator product. • Details of the reference product used in the Pharmaceutical Equivalence shall be submitted. • pH test is not performed. • Justification shall be submitted for not performing most of the quality test applicable on powder for injection.	Firm has submitted that due to easy availability of market sample Cefstar injection was used in PE. CefStar 500mg Injection, Batch No. C7100, Mfg. date 03-2021 is submitted. Firm has submitted revised results for pharmaceutical equivalence wherein they have added pH test. Not submitted.
7.	3.2.P.8	In use stability data shall be submitted.	Firm has submitted that its ready to use injection.

Decision: Deferred for following:

- **Revised table for literature references with inclusion of status of the both drug substance and finished product in different pharmacopoeias shall be submitted.**
- **Justification shall be submitted for use of out of specifications drug substance in the trial batches.**
- **Submission of Pharmaceutical Equivalence against the innovator product.**
- **Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

	The status in reference regulatory authorities	MAXIPIME 500mg & 1gm (Cefepime hydrochloride) for injection, USFDA Approved.
	For generic drugs (me-too status)	CefStar for injection 1000mg IV/IM, Barret Hodgson Pakistan (Pvt.) Ltd., Registration No: 030954.
	GMP status of the Finished product manufacturer	GMP Certificate No.70/2021-DRAP(FID/2061717-540) Dated 08-09-21
	Evidence of section approval.	Dry Powder Injection (Cephalosporin) - New section vide No.F.1-10/2012-Lic dated 07-06-2022 is approved.
	Name and address of API manufacturer.	M/s Kopran Research Laboratories Limited, K4/4, Additional MIDC, At & Post Birwadi, Taluka Mahad, District Raigad - 402 302 Maharashtra, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefepime HCl and L-Arginine is present in USP. Firm has submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis (CEIV/B2201004, mfg. date 11-2022) and justification of specification, reference standard, container closure system and stability studies of drug

		substance.
	Stability studies (Drug substance.)	Firm has submitted both real time and accelerated stability study data for the drug substance for three batches. Stability study conditions: Real time: 30˚C ± 2˚C /65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (CEIV/B1203011, CEIV/B1203012, CEIV/B1203013)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its description & composition, Pharmaceutical equivalence, manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Cefstar 1000mg IV/IM injection by performing quality tests (Identification, Average weight content & Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Kopran Research Laboratories Limited, K4/4, Additional MIDC, At & Post Birwadi, Taluka Mahad, District Raigad - 402 302 Maharashtra, India.		
API Lot No.	CEIV/B2201004.		
Description of Pack (Container closure system)	1x10ml vial containing Cefepime HCl with L-Arginine with reconstituent Diluent (WFI).		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TCP001	TCP002	TCP001
Batch Size	500Vials	500Vials	500Vials
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	28-04-22	29-04-22	30-04-22
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. New-WHO-GMP/Cert/KD/89275/2020/11/33788 dated 20-10-2020 issued on the basis of inspection conducted on 06-03-2020 valid till 19-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate No. E-897164883689 dated 19-04-2022 for 50Kg of Cefepime HCl and L-Arginine sterile USP having Batch No. CEIV/B2201004 with manufacturing date of 01-11-2021

		issued in name of M/s Medisave attested by AD I&E DRAP, Lahore. Firm has also submitted copy of loan letter from M/s Medisave Pharmaceutical for 05kg.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Latest GMP certificate/last inspection report conducted within last three years for the Finished Product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 70/2021-DRAP (FID/2061717-540) dated 08-09-2021 issued on the basis of inspection conducted on 08-09-2021.
2.	2.3.R	Table for literature references shall be revised with inclusion of status of both drug substance and finished product in pharmacopoeia with applicable fee.	*Not submitted.*
3.	3.2.S.4.1	Drug Substance manufacturer has mentioned L-arginine quantity (on as is basis) between 34% - 44% while FPP has mentioned 37.1% - 44%. Clarify.	Firm has submitted that it was typographic error and also submitted corrected specification and corrected COA for the drug substance. *However, fee applicable to pre-registration variation is not submitted.*
4.	3.2.S.4.2	Calculation formula for assay of drug substance shall be provided.	Submitted.
5.	3.2.S.4.4	• Justification shall be submitted regarding the COA of the drug substance provided by the drug product manufacturer as assay of Cefepime base on as is basis in the same is 50.19% while the specification provided by the drug substance manufacturer has assay limit of Cefepime on as is basis of NLT 50.5%. • COA of the drug substance by the drug product manufacturer has manufacturing date of 11-2022 while that of the drug substance manufacturer has manufacturing date of 11-2021. Clarify.	Firm has only submitted COA of the drug substance from supplier. *However, initially submitted specification provided by the drug substance manufacturer has assay limit of Cefepime on as is basis of NLT 50.5% while the COA of the finished product manufacturer has assay of Cefepime on as is basis of 50.19 which is out of specifications.* Firm has submitted that it was typo error and they also provided corrected COA.
6.	3.2.P.2.2	• Justification shall be submitted for not performing Pharmaceutical Equivalence against the innovator product. • Details of the reference product used in the Pharmaceutical Equivalence shall be submitted. • pH test is not performed. • Justification shall be submitted for not performing most of the quality test applicable on powder for injection.	Firm has submitted that due to easy availability of market sample Cefstar injection was used in PE. CefStar 500mg Injection, Batch No. C7100, Mfg. date 03-2021 is submitted. Firm has submitted revised results for pharmaceutical equivalence wherein they have added pH test. Not submitted.
7.	3.2.P.8	In use stability data shall be submitted.	Firm has submitted that its ready to use injection.

Decision: Deferred for following:

- **Revised table for literature references with inclusion of status of the both drug substance and finished product in different pharmacopoeias shall be submitted.**
- **Justification shall be submitted for use of out of specifications drug substance in the trial batches.**
- **Submission of Pharmaceutical Equivalence against the innovator product.**
- **Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

934.	Name, address of Applicant / Marketing Authorization Holder	M/s Biogen life Sciences, 8-KM chekbeli Road Rawat Rawalpindi.
	Name, address of Manufacturing site.	M/s Biogen life Sciences, 8-KM chekbeli Road Rawat Rawalpindi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has submitted that their manufacturing facility is newly licensed hence no such inspection has been conducted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Betamethasone dipropionate;** Mahima Life Sciences Pvt. Ltd., BST Road, Ganaur District Sonepat, Haryana, India. Copy of GMP certificate No. 12/55-2Drug1-2020/7030 dated 26-10-2020 issued by the FDA, Haryana, Panchkula valid till 12-09-2022 is submitted. **Gentamicin Sulfate:** Sichuan Long March Pharmaceutical Co., Ltd., No. 448 Changqing Road, Central city district, Leshan Sichuan, Province, People's Republic of China. Copy of GMP certificate No. SC20160076 issued by CFDA, dated 23-02-2017 valid till 22-02-2022 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

- Documents for the procurement of API with approval from DRAP for both the drug substances shall be submitted.
- Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.
- Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	• Valid copy of DML for Biogen life sciences shall be submitted.	Firm has submitted copy of DML No. 000911 in the name of M/s Biogen Pharmaceuticals w.e.f. 13-02-2020and also provided change of title vide letter No. F. 1-2/2019-Lic. Dated 18-03-2021 from M/s

			Biogen Pharmaceuticals to M/s Biogen Life Sciences.
		• Valid copy of GMP certificate/last inspection report conducted within last three years of Biogen life sciences shall be submitted.	***Not submitted.***
2.	1.3.5	Evidence of section approval letter of Biogen Life Sciences shall be submitted.	Firm has submitted copy of section approval vide letter No. F. 1-2/2019-Lic. Dated 14-02-2020 wherein they have cream general section.
3.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	Firm has submitted that proposed pack size is 1's.
4.	1.6.5	Valid copy of GMP certificate of both the Drug Substance manufacturer shall be submitted.	**Gentamicin Sulfate:** Firm has once again submitted the same copy of GMP certificate No. SC20160076 issued by CFDA, dated 23-02-2017 valid till 22-02-2022. *Valid copy of GMP certificate shall be submitted.* **Betamethasone dipropionate:** No GMP certificate is submitted.
5.	3.2.S.4.1	• Specification of drug substance i.e. betamethasone by drug product manufacturer shall be submitted.	Submitted.
		• Specification of drug substance i.e. Gentamicin Sulfate by drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.2	• Analytical procedures of drug substance i.e. betamethasone by drug product manufacturer shall be submitted.	Firm has submitted analytical procedures for both the drug substances i.e. betamethasone dipropionate and gentamicin sulfate as per USP specifications.
		• Analytical procedures of drug substance i.e. Gentamicin Sulfate by drug product manufacturer shall be submitted.	
7.	3.2.S.4.3	• Verification studies of the drug substance i.e. betamethasone performed by drug product manufacturer shall be submitted.	Submitted.
		• Verification studies of the drug substance i.e. Gentamicin Sulfate performed by drug product manufacturer shall be submitted.	Submitted.
8.	3.2.S.4.4	• Batch analysis of the drug substance i.e. betamethasone provided by the drug substance manufacturer has assay test on UV while official monograph has mentioned HPLC. Clarification shall be submitted.	*No justification submitted.*
		• COA for the drug substance Gentamicin Sulfate provided by the finished product manufacturer has not performed water content, Sulfate content and optical rotation test on the drug substance. Clarification shall be submitted.	Firm has submitted new COA from both the drug substance manufacturer and drug product manufacturer for gentamicin sulfate (B. No. SC-GM-20200202, mfg. date 08-02-2020). *However, the batch No. and manufacturing date of the submitted COA are different from initially submitted COA.*
		• COA for drug substance i.e. Gentamicin Sulfate from drug substance manufacturer is overwritten with respect to mfg. date, release date & expiration date. Justification shall be submitted for this overwriting of COA.	*No justification is submitted by the firm against this point.*
9.	3.2.S.4.5	Details and COA of the working standard of both the drug substances shall be submitted.	Firm has only submitted COA of the working standard for Betamethasone dipropionate. *No details and COA of the working standard for gentamicin sulfate is provided.*
10.	3.2.S.7.3	Stability for the drug substance i.e. Gentamicin Sulfate from concerned	*Firm has once again submitted the same stability data.*

		manufacturer shall be submitted as the submitted one is from Long March Pharm.	
11.	3.2.P.5.1	Qualitative composition of the applied formulation is different from reference product.	Firm has submitted that formulation mentioned in CTD trial base. The actual formulation is mentioned in BMR. *However, no clear justification is provided by the firm.*
12.	3.2.P.2.2	• Justification for not performing PE against the innovator product	Firm has submitted that Gentanix cream manufactured by Biogen pharma was easily available that's why they used the same in PE. Batch No. 2374, Mfg. date 11-2021 & Exp. date 11-2023.
		• No details of the comparator product are submitted in PE.	
13.	3.2.P.5.3	Complete validation/verification studies of the drug product performed by the drug product manufacturer shall be submitted.	Submitted.
14.	3.2.P.5.4	Submitted COAs have no pH test on the finished product. Justify.	*No justification is submitted by the firm.*
15.	3.2.P.8	• Stability data sheets shall be as per decision of 293rd meeting with inclusion of API lot number and batch size.	Firm has submitted stability data sheets as per decision of 293rd meeting with submission of batch size and API lot number (500 tubes each & 200507FB for betamethasone dipropionate & SC-GM-20200202 for gentamicin sulfate). *However, the newly provided stability data sheets have different values than the originally submitted. Furthermore, the API lot members mentioned are also different from the batch analysis provided in original dossiers.*
		• Justify the wave length applied in the submitted chromatograms with respect to the analytical procedures. Analytical procedures have mentioned 254nm while submitted chromatograms reflects 240nm.	*No justification submitted against this point.*
16.		• Documents for the procurement of API with approval from DRAP for both the drug substances shall be submitted.	Firm has submitted copy of commercial invoice No. M/21-22/132 dated 03-03-2021 wherein M/s Biogen Life Sciences have imported 0.020kg of betamethasone dipropionate with batch No. 2005207 FB, mfg. date 12-2020. *However, in the submitted document invoice date, Consignee/buyer name, Batch number manufacturing date etc. all are over written and changed from original ones. Furthermore, DRAP attested clearance is not provided for the same.* Copy of commercial invoice No. 21584234 dated 12-24-2021 mentioning 0.5kg quantity of gentamicin Sulfate, batch No. SC-GM-20200202, mfg. date 02-08-2020 is submitted. *Similar to the above mentioned document, this document is also over written and no clearance certificate from DRAP is submitted.*
			Not submitted.
		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	*Submitted.*
		• Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	
17.	3.2.R	Blank master production document /batch manufacturing record to be used during the commercial manufacturing of the applied	Submitted.

	product along with copies of executed BMRs shall be submitted.

Decision: Deferred for following;

- **Valid copy of GMP certificate/last inspection report conducted within last three years of Biogen life sciences.**
- **Valid copy of GMP certificate of both the Drug Substance manufacturer shall be submitted.**
- **Justification for the batch analysis of the drug substance i.e. betamethasone shall be submitted as drug substance manufacturer has assay test on UV while official monograph has mentioned HPLC.**
- **Justification shall be submitted regarding the batch number and manufacturing date of the COA submitted initially and COA submitted in replies as both are different from each other.**
- **Details and COA of the working standard i.e. Gentamicin sulfate drug substances shall be submitted.**
- **Justification shall be submitted for difference in qualitative composition of the applied formulation from innovator product.**
- **Pharmaceutical equivalence against the innovator product shall be submitted.**
- **Justification shall be submitted regarding the change in results of tests in stability data sheets that were initially submitted and that submitted in reply.**
- **Justification shall be submitted regarding the API lot number as the batch analysis has mentioned some other batch number while the newly submitted stability data sheets have some other lot number.**
- **Justify the wave length applied in the submitted chromatograms with respect to the analytical procedures. Analytical procedures have mentioned 254nm while submitted chromatograms reflects 240nm.**
- **Documents for the procurement of API with approval from DRAP for betamethasone dipropionate drug substances shall be submitted.**
- **Documents for the procurement of API with approval from DRAP for gentamicin Sulfate drug substances shall be submitted.**

No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. SOK/EXP1920/0059 dated 19-11-2019 mentioning 5kg of Montelukast sodium USP, Batch No. MTS/1907004, mfg. date 07-2019 attested bi Assistant Director, I&E, DRAP, Islamabad. Invoice has mentioned Seraph pharmaceuticals as importer of the material.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	• Valid copy of DML for Biogen life sciences shall be submitted. • Valid copy of GMP certificate/last inspection report conducted within last three years of Biogen life sciences shall be submitted.	
2.	1.3.5	Evidence of section approval letter of Biogen Life Sciences shall be submitted.	
3.	1.5.4	Proposed pack size for the applied formulation shall be submitted.	
4.	1.6.5	Valid copy of GMP certificate of the Drug Substance manufacturer shall be submitted.	
5.	2.3.R	• Table for literature references has not mentioned status of drug substance in all pharmacopoeias i.e.JP. Revised table for literature references with applicable fee shall be submitted.	

6.	3.2.S.4.1	Specification of drug substance by drug substance manufacturer shall be submitted.
7.	3.2.S.4.2	Analytical procedures in USP has mentioned up to 16 minutes' time for assay of drug substance and in enantiomeric purity while the analytical procedure provided by the drug substance manufacturer has mentioned up to 25 minutes. Clarification shall be submitted.
8.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.
9.	3.2.S.5	Details and COA of the working standard used in the development of trial batches shall be submitted.
10.	3.2.P.2.2	• Justification shall be submitted for not performing identification test Pharmaceutical Equivalence. • Tabulated CDP results with all the time points in different medias shall be submitted. • Justification shall be submitted for the provided graphical results of CDP as it has mentioned some other brand names. • Raw data sheets for the CDP results shall be submitted.
11.	3.2.P.5.1	Standard solution in the analytical procedures for the finished drug product in identification, dissolution & assay test is different from official pharmacopoeia. Clarification shall be submitted.
12.	3.2.P.5.3	Complete validation/verification studies of the drug product performed by the drug product manufacturer shall be submitted.
13.	3.2.P.8	• Raw data sheets for both the assay test and dissolution test at each time point with chromatograms shall be submitted. Furthermore, each time point raw data sheets shall be accompanied with calculation formula. • Justification shall be submitted regarding the submitted chromatograms as it does not mention wave length of detector. • Justification shall be submitted regarding submitted chromatograms as it also does not reflect the resolution factor as required by the official monograph. • Complete six-month stability data shall be submitted. • Justification for manufacturing only two batches shall be submitted.
14.		• Clear and readable copy of the clearance certificate for import of raw material shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Log of HPLC run showing change in concentration of mobile phase is required.

	• Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	
15.	3.2.R Blank master production document /batch manufacturing record to be used during the commercial manufacturing of the applied product along with copies of executed BMRs shall be submitted.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Case No. 02 Priority Registration applications on the basis of Export Facilitation of locally manufactured Human Drugs applied on form 5F.

Deputy Director PRV/EFD vide letter No.F.1-6/2019-PR-I (EFD dated 28-02-2023 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm i.e. **M/s Atco Laboratories Limited** have achieved the benchmark of more than 100,000 USD **(542854.81 USD)** during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

Following products are presented before the Board in light of the decision of the 133rd meeting of DRAP Authority held on 13th April 2022 for consideration.

936.	Name, address of Applicant / Marketing Authorization Holder	M/s Atco Laboratories Limited., B-18, S.I.T.E. Karachi.
	Name, address of Manufacturing site.	M/s Atco Laboratories Limited., B-18, S.I.T.E. Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 5219 dated 24/02/2022.
	Details of fee submitted	PKR 30,000/-: vide slip No. 3813214571 dated 27/01/2022.
	The proposed proprietary name / brand name	Silodosin 4mg Capsule.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Silodosin ……4mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	Urological, alpha-adrenoreceptor antagonists. ATC Code: G04CA04
	Reference to Finished product specifications	Innovator's specifications.
	Proposed Pack size	7's, 10's, 14's, 20's, 28's, 30's, 60's, 90's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	RAPAFLO® 4mg & 8mg (silodosin) capsules, USFDA approved.
	For generic drugs (me-too status)	Sildat 4mg Capsule, Sami Pharmaceutical, Reg. No. 105264.
	GMP status of the Finished product manufacturer	DML Renewal receipt, dated 17-03-2021 submitted along with previous copy DML w.e.f. 11-04-2016.

		Copy of GMP certificate No. 160/2020-DRAP (K) dated 24-12-2020 on the basis of inspection conducted on 06-11-2020 is submitted by the firm.
	Evidence of section approval.	Capsule general section approved vide letter No. F. No.F.2-5/85-Lic (Vol-VI) dated 23-01-2019.
	Name and address of API manufacturer.	Anhui Haikang Pharmaceutical Co., Ltd. No.21 Huancheng West Road, Daguan District, Anqing, Anhui, 246000 China. Copy of GMP certificate issued by Anhui Anqing Daguan Economy Development Area Management Committee Environmental Protection Agency in the name of M/s Anhui Haikang Pharmaceutical Co., Ltd., dated 09-11-2018. Valid till 07-11-2022.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of drug substance regarding its manufacturers, structure, general properties, manufacturer, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis (Batch No. 20092102, mfg. date 21-09-2020) and justification of specification, reference standard, container closure system and stability studies of drug product.
	Stability studies (Drug substance.)	Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5% RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (20170218, 20170205, 20170212)
	Module-III (Drug Product):	Firm has submitted detail of the drug product including its description, composition, manufacturers, description of manufacturing process and controls, Batch formula, process validation protocol, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against innovator product that is Rapaflo 4mg Capsule, Batch No. K58138 manufactured by Allergan Inc. Markham by performing quality tests (Identification, disintegration, Dissolution & Assay). Comparative Dissolution is also performed against the same brand in Acid media 0.1 N HCl, Acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. Both applied formulation and reference product shows more than 85% release within 15 minutes hence F2 is not calculated.
	Analytical method validation/verification of product	Method validation studies are submitted including specificity, linearity, accuracy, range, precision and robustness.
STABILITY STUDY DATA		
Manufacturer of API		Anhui Haikang Pharmaceutical Co., Ltd. No.21 Huancheng West Road, Daguan District, Anqing, Anhui, 246000 China.

API Lot No.	20092102.		
Description of Pack (Container closure system)	Size "3" hard gelatin capsules with white body and purple cap filled with white to off white granular powder packed in Alu-Alu blister further packed in printed carton (1 x 7's).		
Stability Storage Condition	Real time: 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated:06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	FE038C.	MA113C.	MA114C.
Batch Size	2500 capsules.	2500 capsules.	2500 capsules.
Manufacturing Date	03-2021.	03-2021.	03-2021.
Date of Initiation	24-03-2021.	24-03-2021.	24-03-2021.
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Rofl 500mcg Tablets" which was conducted on 10-10-2017, and was presented in 277th meeting of Registration Board (27 - 29 December, 2017). Following observations were reported in the report: ✓ The HPLC software is 21CFR Compliant. ✓ Audit trail reports on the testing were verifiable. Firm has adequate monitoring and controls for stability chambers.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Anhui Anqing Daguan Economy Development Area Management Committee Environmental Protection Agency in the name of M/s Anhui Haikang Pharmaceutical Co., Ltd., dated 09-11-2018. Valid till 07-11-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Invoice No. WD20201020 dated 20-10-2020 mentioning 400gm of Silodosin, Batch No. 20092102, mfg. date 21-09-2020 attested by Assistant Director I&E, DRAP, Karachi dated 07-11-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of DML of the applicant shall be submitted.	Firm has submitted copy of DML No. 000188 w.e.f. 11-04-2021.
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of License No. 20190399 for Anhui Haikang Pharmaceutical Co., Ltd. No.21 Huancheng West Road, Daguan District, Anqing, Anhui, 246000 China valid till 31-12-2025.

			License is verified from official website of NMPA and they also have scope of production of silodosin.
3.	2.3.R	Revised table for literature references with correct information regarding the drug substance with applicable fee shall be submitted.	Firm has submitted revised table for literature references wherein they have updated pharmacopoeial status of the drug substance. ***However, fee applicable for pre-registration variation is not submitted.***
4.	3.2.S.4.1	• Specifications of the drug substance from drug substance manufacturer shall be submitted. • Justification shall be submitted regarding most of the specifications of the drug substance provided by both the drug substance manufacturer and finished product manufacturer as they are different from Japanese pharmacopoeia.	Submitted. Firm has submitted revised specifications and COA from both the drug substance and finished product manufacturer as per Japanese pharmacopoeia.
5.	3.2.S.4.2	• Justify the standard preparation and sample preparation in assay test with respect to that of the drug substance standard and test preparation. • Justification shall be submitted regarding the standard preparation and sample preparation in assay test with respect to that of the Japanese pharmacopoeia as final concentration is different.	Firm has submitted that analytical method according to Japanese pharmacopoeia has been adopted and applied on the drug substance analysis. They also submitted analytical methods from both drug substance and finished product manufacturer. ***However, the submitted analytical procedures in the initial dossier the standard and test preparation both are different from drug substance manufacturer and Japanese pharmacopoeia.***
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.7	Justification shall be submitted regarding the container closure system of the drug substance as it is mentioned to be packed in LLDPE while the official monograph has mentioned Well-closed containers. Storage—Light-resistant.	Firm has submitted that drug substance manufacturer has performed stability studies in the same container closure system as marketed previously and now they have adopted Japanese pharmacopoeia specifications. They will provide upcoming consignment according to updated specifications using the same container closure system as recommended by the JP monograph.
8.	3.2.S.7.3	Most of the specifications of the drug substance provided in 3.2.S.4.1 are changed in the stability data sheets. Clarification shall be submitted.	Firm has submitted that drug substance was comply with in house specifications in which critical test required in stability studies were covered and already adopted from Japanese pharmacopoeia. Further relevant section of drug substance part will be updated as attached letter from drug substance manufacturer in section 3.2.S.7.3.
9.	3.2.P.2.2	Justification shall be submitted for not performing Uniformity of dosage units in pharmaceutical equillance.	Firm has submitted that uniformity of dosage unit is a parameter to ensure the consistency of the dosage form. We have performed this test on all stability batches of both applied strength in initial stages to comply with the release requirements and found complies with the established criteria.
10.	3.2.P.8	Silodosin is a light sensitive material therefore the whole analytical procedures should avoid exposure to light using brown volumetric flask and sampler vials. Justify the performance of analytical procedures in volumetric flasks and other glassware without taking this precaution.	Firm has submitted that precaution as recommended for drug substance by JP monograph has been adopted for analysis of drug product and applied the same throughout the development studies of applied product. They also provided updated analytical procedures.
Decision: Deferred for following:			

• **Justification shall be submitted regarding the standard preparation and sample preparation in assay test of the drug substance as it is different from both the drug substance manufacturer method and Japanese pharmacopoeia.** • **Submission of updated stability data for drug substance with revised specifications as recommended by the JP monograph.** • **Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 37579; dated 23/12/2022.
	Details of fee submitted	PKR 30,000/-: vide slip No.265291594 dated 30/11/2022.
	The proposed proprietary name / brand name	**Trio-Haler DPI Capsule 150mcg + 50mcg + 160mcg.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each DPI Capsule Contains: Indacaterol as acetate ……..……...…...150mcg Glycopyrronium (as bromide) …...……50mcg Mometasone Furoate ……160mcg Each delivered dose (the dose that leaves the mouthpiece of the inhaler) contains: Indacaterol (as acetate) ….....…….114mcg Glycopyrronium (as Bromide) ……...…46mcg Mometasone Furoate…….136mcg
	Pharmaceutical form of applied drug	**Transparent cap and body, Hypromellose capsule size No. 3 containing white to off white powder.**
	Pharmacotherapeutic Group of (API)	**Adrenergic in combination with anticholinergics incl. triple combinations with corticosteroids (ATC code: R03AL12).**
	Reference to Finished product specifications	Innovators Specifications.
	Proposed Pack size	**30's.**
	Proposed unit price	**As per SRO.**
	The status in reference regulatory authorities	Enerzair Breezhaler 114 micrograms/46 micrograms/136 micrograms inhalation powder, hard capsules (150 mcg of indacaterol (as acetate), 63 mcg of glycopyrronium bromide equivalent to 50 mcg of glycopyrronium and 160 mcg of mometasone furoate) **Novartis Euro pharm Limited,** Ireland, **(EMA Approved).**
	For generic drugs (me-too status)	**INDIBRO-M 150/50/160 mcg DPI Capsule** By **M/s Martin Dow Limited, Plot No. 37, Sector 19, Korangi Industrial Area Karachi. (DRB 320 approved) Could not be confirmed.**
	GMP status of the Finished product manufacturer	Copy of GMP certificate No. 113/2022-DRAP (K) dated 5th August 2022 issued on the basis of inspection conducted on 04-08-2022 is submitted.
	Evidence of section approval.	Encapsulation (Steroid) Including DPI section approved vide letter No. F. 2-13/95-Lic (Vol-VII) dated 10-12-2019.
	Name and address of API manufacturer.	Indacaterol Acetate: **M/s. Melody Healthcare, Plot No. J73 MIDC Tarapur, Boisar Palghar 401506 Maharashtra, India.** **Glycopyrronium Bromide:** M/s Harman Finochem limited, Plot no: E-7, E-8, E-9, MIDC Indl. Area, Chikalthana, Aurangabad-431 006, India. Mometasone Furoate: M/s Aurisco Pharmaceutical Co, Limited, Badu Industrial Park Zone, Tiantai County, Zhejiang Province 317200 P.R. China.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Indacaterol Acetate: Firm has submitted details of the drug substance including its nomenclature, structure, general properties, solubility, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (ICA/21001M3, mfg. date 10-2021) and justification of specification, reference/working standard, container closure system and stability studies of drug substance. Glycopyrronium Bromide: Firm has submitted details of the drug substance including its nomenclature, structure, general properties, solubility, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (GCP/003/2018-2019/A, mfg. date 05, 2018) and justification of specification, reference/working standard, container closure system and stability studies of drug substance. Mometasone Furoate: Firm has submitted details of the drug substance including its nomenclature, structure, general properties, solubility, physical form, manufacturer, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (A3-211101, mfg. date 11, 2021) and justification of specification, reference/working standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Stability study conditions: Indacaterol Acetate: Real time: 30°C ± 2°C / 75% ± 5%RH for 9 months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months. Batches: (ICA/01/21, ICA/02/21 & ICA/03/21) Glycopyrronium Bromide: Real time: 30°C ± 2°C / 65% ± 5% RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5% RH for 6 months Batches: (GCP/002/2005-2006, GCP/002/2007-2008 & GCP/008/ 2008-2009) Mometasone Furoate: Real time: 30°C ± 2°C / 75% ± 5% RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5% RH for 6 months Batches: (A3-111001, A3-111002 & A3-111003)
	Module-III (Drug Product):	Firm has submitted detail of the drug product including its description, composition, manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	**Pharmaceutical Equivalence is established against Innovator Product i.e. Enezair 150/50/160mcg DPI capsule Batch No: BUL36 manufactured by Novartis**

		Pharma by performing identification, particle size distribution by cascade impaction and assay test.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
	DPI Device:	**DPI device:** Monodose Inhaler RS01 Mod. 7 (Catalogue Code: "239700001AB"). **Manufacturer:** Berry Plastiape S.p.A **Shelf Life:** 03 years.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Indacaterol acetate:** **Firm has submitted copy of GMP certificate (No. 6100560 dated 09-07-2021 for M/s Melody Healthcare Pvt. Ltd. Plot No. J-73, M.I.D.C, Tarapur, Boisar, Dist. Palghar 401506, Thane- Zone4.Maharashtra State, India issued by Food & Drugs Administration (Maharashtra State). The Certificate is valid till 08-07-2022.** **Glycopyrronium Bromide:** **Not submitted.** **Mometasone Furoate:** Not Submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Indacaterol acetate:** **Not submitted.** **Glycopyrronium Bromide:**

		Not submitted. **Mometasone Furoate:** **Not submitted.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observations	Reply by the firm
1.	1.5	Section 1.5 has mentioned solution for injection. Clarification shall be submitted.	Firm has submitted that there was a Typo error in mentioning the proper dosage form i.e., Dry Powder for inhalation in Capsule. They also submitted revised section 1.5 with correct information.
2.	1.5.8	Evidence of approval of applied formulation by DRAP along with brand name, registration number, name of the manufacturer shall be submitted otherwise fee for new drug product shall be submitted.	Firm has submitted differential fee of 45000/- vide slip No. 178703086 dated 10-03-2023.
3.	1.6.5	• Valid copy of the GMP certificate for drug substance Indacaterol acetate issued by concerned/relevant regulatory authority shall be submitted. Further justify how drug substance was procured from a manufacturer which holds Licence to manufacture drugs for purposes of examination, test or analysis.	Firm has submitted copy of GMP certificate No. 6107483 dated 27-06-2022 **for M/s Melody Healthcare Pvt. Ltd. Plot No. J-73, M.I.D.C, Tarapur, Boisar, Dist. Palghar 401506, Thane- Zone4.Maharashtra State, India issued by Food & Drugs Administration (Maharashtra State). The Certificate is valid till 26-06-2023.**
		• Valid copy of the GMP certificate issued by concerned/relevant regulatory authority for drug substance **Glycopyrronium Bromide** shall be submitted.	Firm has submitted copy of GMP certificate No. WHO-GMP /CERT/AD/82606/2020 /11/31613 dated 14-04-2020 **for** M/s Harman Finochem limited, Plot No: E-7, E-8, E-9, MIDC Indl. Area, Chikalthana, Aurangabad-431 006, India **issued by Food & Drugs Administration, M.S. Bandra (E) Mumbai, India. The Certificate is valid till 13-04-2023.**
		• Valid copy of the GMP certificate issued by concerned/relevant regulatory authority for drug substance **Mometasone Furoate** shall be submitted.	**Firm has submitted copy of written confirmation for active substances exported to EU for M/s** Aurisco Pharmaceutical Co, Limited, Badu Industrial Park Zone, Tiantai County, Zhejiang Province 317200 P.R. China issued by Zhejiang Medical product administration. ***Not issued by relevant authority.***
4.	1.5.14 to 1.5.20	All the commitment/undertaking signed by authorized personnel shall be submitted.	Submitted.
5.	2.3.R	Table for literature references has not mentioned status in different pharmacopoeias for the drug substances. Revised table for literature references for each drug substance with complete pharmacopoeial status with applicable fee shall be submitted.	Firm has submitted revised table for literature references without submission of applicable fee.

6.	3.2.S.4.1	• Specification for the drug substance Indacaterol acetate by the finished product manufacturer shall be submitted.	***Not submitted.***
		• Specification has mentioned assay of Glycopyrronium Bromide 98 – 102% while the stability data sheets has mentioned 98 – 100.5%. Clarify.	Firm has submitted that Glycopyrronium Complies the USP specifications, stability sheets with USP specification are also provided. ***However, no stability sheets are provided.***
		• EP has mentioned 99 – 101% content for Glycopyrronium Bromide while both the drug substance manufacturer and drug product manufacturer has 98 – 102%. Clarification shall be submitted.	Firm has submitted that Glycopyrronium bromide Complies the USP specifications, Raw material monograph for Glycopyrronium Bromide in USP specifies limit for assay between 98 to 102%.
		• Specification of the drug substance Mometasone furoate by the drug substance manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.2	Analytical procedures of the drug substance Mometasone furoate by the drug substance manufacturer shall be submitted.	Submitted.
8.	3.2.S.5	• Details and COA of reference standard/working standard of Mometasone Furoate shall be submitted.	Submitted.
		• Details and COA of reference standard/working standard of Glycopyrronium Bromide shall be submitted.	Submitted.
9.	3.2.S.7	• Complete real time stability data for indacterol acetate shall be submitted.	Firm has submitted 12-months real time and 06 months accelerated stability data for indacterol acetate.
		• Stability data for the drug substance Mometasone Furoate from concerned manufacturer shall be submitted.	Firm has submitted 06-months accelerated and 36-months real time stability for three batches.
10.	3.2.P.1	• Qualitative composition is different from the innovator product as innovator product contains magnesium stearate while applied formulation has no magnesium stearate. Justify.	Firm has submitted that magnesium stearate is used as lubricant in any of the formulation, however in our case no lubricant was used as our particle size was defined and there was no issue pertaining to flow ability.
		• Label claim of each delivered dose in line with the reference product shall also be submitted.	Submitted.
11.	3.2.P.2.2	DDU delivered dose uniformity and uniformity of dosage units are not performed in PE. Justify.	Firm has submitted that invitro Comparative Delivered Dose Uniformity and uniformity of dosage units' study between Enerzair & Trio-Haler was performed and is established in P.2.2.3, unfortunately it was not mentioned in PE Report. They also provided updated pharmaceutical equivalence report wherein they included both the tests.
12.	3.2.P.3.2	Quantities of the active substances in batch formula shall be justified.	Firm has submitted that each capsule contains 150 mcg of indacaterol (as acetate), 63 mcg of glycopyrronium bromide equivalent to 50 mcg of glycopyrronium and 160 mcg of mometasone furoate, whereas there is mistake in typing the document however actual quantity of material been dispensed and processed can be traced through Batch manufacturing record and dispensing sheet, also the results for all batched depicts the result within limits.
13.	3.2.P.5.4	Batch analysis has mentioned 2000 capsules each batch while the stability data sheets	Firm has submitted that there was a typo error in mentioning the batch size in stability data

		have mentioned 1000 capsules each batch. Clarification shall be submitted.	sheets. Actual batch size for all 3 batches are 1000 capsules.
14.	3.2.P.8	• Documents for the procurement of all the three drug substances with approval from DRAP shall be submitted.	Firm has submitted copy of commercial invoice No. MBR2223/GE dated 07-06-2022 mentioning 0.003kg of Indacaterol acetate, Batch No. ICA/21001M3, mfg. date 10-2021. Firm has also submitted computerized clearance certificate No. K-619772283976 with Date of issue: 23-Jun-2022. Firm has submitted copy of commercial invoice No. P/E9/145/2018-19 dated 10-07-2018 mentioning 0.035kg quantity of Glycopyrrolate USP, batch No. GCP/003/2018-2019/A, mfg. date 05-2018, Exp. date 04-2021 attested by Assistant Director I&E, DRAP, Karachi dated 31-07-2018. Firm has submitted copy of commercial invoice No. 22T-075 dated 04-01-2022 mentioning 10kg quantity of Mometasone Furoate, batch No. A3-211101, mfg. date 11-2021. Invoice has mentioned name of M/s Saffron Pharmaceutical as consignee. Firm has also submitted loan letter of API for development purpose from M/s Saffron pharmaceuticals. Submitted.
		• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued upon submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

Case No. 03 Priority Registration applications on the basis of Export Facilitation of locally manufactured Human Drugs applied on form 5D.

Deputy Director PRV/EFD vide letter No.F.1-6/2019-PR-I (EFD dated 28-02-2023 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm i.e. **M/s Tabros Pharma** have achieved the benchmark of more than 100,000 USD **(575683.20 USD)** during the fiscal Year 2021-2022 and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

939.	Name and address of manufacturer / Applicant	M/s Tabros Pharma Pvt. Ltd., L-20/B, Sector-22, Federal B Industrial Area, Karachi.
	Brand Name +Dosage Form + Strength	ELZA/Plafor 10mg Tablet.
	Composition	Each film coated tablet contains: Empagliflozin ……..…… 10mg.

	Diary No. Date of R& I & fee	Dy. No. 15649 dated 20-09-2017, Fee Rs: 50,000/- dated 16.09.2017 vide deposit slip No. 0275713. (Duplicate dossier verified by R&I section.)
	Pharmacological Group	Antidiabetic (Sodium/glucose co transporter 2 (SGLT2) inhibitor.
	Type of Form	Form 5D.
	Finished product Specifications	Innovator's Specifications.
	Pack size & Demanded Price	Proposed Pack Sizes: 7's, 10's, 14's, 28's, 30's Proposed Price: As per SRO.
	Approval status of product in Reference Regulator Authorities	JARDIANCE® 10mg and 25mg (Empagliflozin film coated tablets), USFDA approved.
	Me-too status	Diampa Tablets 10mg, Getz Pharma, Reg. No. 093073.
	GMP status	Not submitted.
	Remarks of the Evaluator	

STABILITY STUDY DATA

Drug	Elza 10mg tablets.		
Manufacturer of API	(Empagliflozin) M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng Country (Yi Ma Tu), Fuxing City, Liaoning Province, China.

No. of Batches	03		
Date of Submission	Dy. No. 9448 dated 26-03-2021.		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred last onsite panel inspection for instant dosage form conducted during last two years BAXIB (Apixaban) 2.5mg & 5mg Tablets on 5th January, 2021 by following panel: 1. Prof. Dr. Rafeeq Alam Khan, Dean, Faculty of Pharmacy, Zia Uddin University, Karachi. (Member Registration Board). 2. Dr. Saif-ur-Rehman Khattak, Director / FGA, CDL, DRAP, Karachi.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted Copy of COA (Batch No. E-20190920-D02-E06-01 Mfg. date 09-11-2019) of the drug substance (Empagliflozin) from M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Liaoning Province, China. Firm has also submitted copy of COA with same batch number and manufacturing date.

3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Analytical procedures for the drug substance from both drug substance manufacturers and Finished Product Manufacturer are provided by the firm.
4.	Stability study data of API from API manufacturer	Firm has submitted stability study data of drug substance as per zone IV-A. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 65% ± 5% RH for 24 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5% RH for 6 months. Batches:(20160606, 20161017 & 20161219).
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate dated 24-08-2020 in the name of M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fuxin City, Liaoning Province, China issued by Liaoning Fuxin Management committee, Fluoride Industrial Development Zone. Valid till 24.08.2023.
6.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. HN200424-L dated 01-12-2019 from exporter M/s Beijing Sino Hanson Import & Export Co., Ltd. No.3, Zhonghe road, Fengtai District, Beijing China, for import of 0.4Kg of Empagliflozin (Batch No. E-20190920-D02-E06-01) in name of M/s Tabros Pharma (Pvt). Ltd., Karachi attested by Assistant Director, DRAP, Karachi dated 21-05-2020. Copy of Form 6 attested by Assistant Director, DRAP, Karachi is attached while Form 3 and Form 7 are also provided.
7.	Protocols followed for conduction of stability study	Submitted.
8.	Method used for analysis of FPP	Submitted.
9.	Drug-excipients compatibility studies (where applicable)	Firm has used same ingredients as that of the innovator product, so compatibility studies with excipients are not required.
10.	Complete batch manufacturing record of three stability batches.	The firm has submitted Batch Manufacturing record of following 03 Batches: **Batch No.** / **Batch Size** / **Mfg. Date** TR001-1/ELZ / 1500 Tablets / 15-06.2020 TR002-1/ELZ / 1500 Tablets / 15-06.2020 TR003-1/ELZ / 1500 Tablets / 15-06.2020
11.	Record of comparative dissolution data (where applicable)	Firm has submitted comparative dissolution of their applied formulation i.e. Elza (Empagliflozin) 10mg Tablet against Jardiance tablet 10mg, Batch No. 905545, Mfg. date 08-2019 manufactured by Boehringer Ingelheim, Germany in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr. No.	Observation	Reply by the firm
1.	Latest GMP certificate/last inspection report of the finished product manufacturer conducted within last three years shall be submitted.	Firm has submitted copy of GMP certificate No. 53/2022-DRAP (K) dated 15-04-2022 issued on the basis of inspection conducted on 07-04-2022.

2.	Justification shall be submitted for the difference of concentration of the reference solution and test solution in the assay test as the drug substance manufacturer has mentioned 0.02 mg/ml strength while drug product manufacturer has mentioned 0.1mg/ml.	Firm has submitted that they have followed the procedure of drug substance for the determination of assay as similar as manufacturer pertaining to chromatographic condition, wave length, flow rate and mobile phase, only concentration is changed 20mcg to 100 mcg/ml, but we kept same concentration of standard and sample comparable/ alike and validated the method as per ICH guideline, Hence it is acceptable.
3.	Valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of manufacturing license of M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fuxin City, Liaoning Province, China Valid till 27.11.2027.
4.	Justify dissolution parameters i.e. dissolution limits, dissolution medium, Volume of the medium, RPM and wave length applied for the applied formulation i.e., NLT 80% (Q) in 30 minutes and 0.1N HCL medium, medium volume (500ml) & Speed (50rpm) since innovator product (Jardiance) specifies NLT (Q) in 15 min in phosphate buffer 6.8 pH with medium volume of 900ml & speed of 75 rpm.	Firm has submitted that Clinical pharmacology and Biopharmaceutics Reviews report of innovator brand Jardiance tablet have been published in August 2014, in which the Dissolution parameter are 75 rpm, medium phosphate buffer 6.8 pH with medium volume 900ml and (Q) at 15 minutes, However, the latest dissolution method which was published on FDA website, dated 07 Feb 2020 for Empagliflozin tablets is recommended to follow FDA's dissolution guidance 2018 in which dissolution parameters at 50rpm, medium 0.1N HCl with the medium volume of 500ml and (Q) 80% in 30 minutes. We followed the latest FDA recommended dissolution parameters to harmonize the dissolution profile of our product with innovator's brand. ***Firm has referred to FDA dissolution guideline which are applicable when the parameters for dissolution of a specific product are not available in the reviews of the product. As in case of Empagliflozin tablets, data of the innovator product is revealed by the USFDA, so firm has to follow the revealed specifications.*** Firm has now submitted another document wherein they sent an Email to USFDA regarding the adaptation of dissolution method of Empagliflozin and reply of USFDA is reproduced as under; "*We suggest you follow the dissolution method as recommended in the FDA-recommended dissolution database. If you wish to deviate from the posted dissolution method that would be a review that will be evaluated after you submitted your ANDA."* They further submitted revised specification for the dissolution as per innovator product i.e. NLT 80% (Q) in 15 min in phosphate buffer 6.8 pH with medium volume of 900ml & speed of 75 rpm. They further submitted dissolution of all the three trial batches as per new specifications. ***Fee applicable for pre-registration variation is not submitted.***

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued upon submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

940.	Name and address of manufacturer / Applicant	M/s Tabros Pharma Pvt. Ltd., L-20/B, Sector-22, Federal B Industrial Area, Karachi.
	Brand Name +Dosage Form + Strength	ELZA/Plafor 25mg Tablet.

	Composition	Each film coated tablet contains: Empagliflozin ……..……. 25mg.
	Diary No. Date of R& I & fee	Dy. No. 15648 dated 20-09-2017, Fee Rs: 50,000/- dated 16.09.2017 vide deposit slip No. 0275710. (Duplicate dossier verified by R&I section.)
	Pharmacological Group	Antidiabetic (Sodium/glucose co transporter 2 (SGLT2) inhibitor.
	Type of Form	Form 5D.
	Finished product Specifications	Innovator's Specifications.
	Pack size & Demanded Price	Proposed Pack Sizes: 7's, 10's, 14's, 28's, 30's Proposed Price: As per SRO.
	Approval status of product in Reference Regulator Authorities	JARDIANCE® 10mg and 25mg (Empagliflozin film coated tablets), USFDA approved.
	Me-too status	Diampa Tablets 10mg, Getz Pharma, Reg. No. 093074.
	GMP status	Not submitted.
	Remarks of the Evaluator	

STABILITY STUDY DATA

Drug	Elza 25mg tablets.		
Manufacturer of API	(Empagliflozin) M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng Country (Yi Ma Tu), Fuxing City, Liaoning Province, China.		
API Lot No.	Empagliflozin: E-20190920-D02-E06-01.		
Description of Pack (Container closure system)	Light yellow colour, oblong, film coated tablets plain on both sides blistered in Alu-Alu foil packed in unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚ C / 65% ± 5% RH Accelerated: 40 °C ± 2 °C / 75% ± 5%		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (months) Real Time: 0, 3, 6 (months)		
Batch No.	TR001-2/ELZ	TR002-2/ELZ	TR003-2/ELZ
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	06-2020	06-2020	06-2020
Date of Initiation	01-07.2020	01-07.2020	01-07.2020
No. of Batches	03		
Date of Submission	Dy. No. 9449 dated 26-03-2021.		

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred last onsite panel inspection for instant dosage form conducted during last two years BAXIB (Apixaban) 2.5mg & 5mg Tablets on 5th January, 2021 by following panel: 1. Prof. Dr. Rafeeq Alam Khan, Dean, Faculty of Pharmacy, Zia Uddin University, Karachi. (Member Registration Board). 2. Dr. Saif-ur-Rehman Khattak, Director / FGA, CDL, DRAP, Karachi.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Firm has submitted Copy of COA (Batch No. E-20190920-D02-E06-01 Mfg. date 09-11-2019) of the drug substance (Empagliflozin) from M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Liaoning Province, China.

<table>
<tr><td></td><td></td><td>Firm has also submitted copy of COA with same batch number and manufacturing date.</td></tr>
<tr><td>3.</td><td>Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer</td><td>Analytical procedures for the drug substance from both drug substance manufacturers and Finished Product Manufacturer are provided by the firm.</td></tr>
<tr><td>4.</td><td>Stability study data of API from API manufacturer</td><td>Firm has submitted stability study data of drug substance as per zone IV-A. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 65% ± 5% RH for 24 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5% RH for 6 months.
Batches:(20160606, 20161017 & 20161219).</td></tr>
<tr><td>5.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>Firm has submitted copy of GMP certificate dated 24-08-2020 in the name of M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fuxin City, Liaoning Province, China issued by Liaoning Fuxin Management committee, Fluoride Industrial Development Zone.
Valid till 24.08.2023.</td></tr>
<tr><td>6.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Firm has submitted copy of invoice No. HN200424-L dated 01-12-2019 from exporter M/s Beijing Sino Hanson Import & Export Co., Ltd. No.3, Zhonghe road, Fengtai District, Beijing China, for import of 0.4Kg of Empagliflozin (Batch No. E-20190920-D02-E06-01) in name of M/s Tabros Pharma (Pvt). Ltd., Karachi attested by Assistant Director, DRAP, Karachi dated 21-05-2020. Copy of Form 6 attested by Assistant Director, DRAP, Karachi is attached while Form 3 and Form 7 are also provided.</td></tr>
<tr><td>7.</td><td>Protocols followed for conduction of stability study</td><td>Submitted.</td></tr>
<tr><td>8.</td><td>Method used for analysis of FPP</td><td>Submitted.</td></tr>
<tr><td>9.</td><td>Drug-excipients compatibility studies (where applicable)</td><td>Firm has used same ingredients as that of the innovator product, so compatibility studies with excipients are not required.</td></tr>
<tr><td>10.</td><td>Complete batch manufacturing record of three stability batches.</td><td>The firm has submitted Batch Manufacturing record of following 03 Batches:
<table>
<tr><th>Batch No.</th><th>Batch Size</th><th>Mfg. Date</th></tr>
<tr><td>TR001-2/ELZ</td><td>1500 Tablets</td><td>15-06.2020</td></tr>
<tr><td>TR002-2/ELZ</td><td>1500 Tablets</td><td>15-06.2020</td></tr>
<tr><td>TR003-2/ELZ</td><td>1500 Tablets</td><td>15-06.2020</td></tr>
</table></td></tr>
<tr><td>11.</td><td>Record of comparative dissolution data (where applicable)</td><td>Firm has submitted comparative dissolution of their applied formulation i.e. Elza (Empagliflozin) 25mg Tablet against Jardiance tablet 25mg, Batch No. 002218, Mfg. date 02-2020 manufactured by Boehringer Ingelheim, Germany in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.</td></tr>
<tr><td>12.</td><td>Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td><td>Submitted</td></tr>
<tr><td>13.</td><td>Compliance Record of HPLC software 21CFR & audit trail reports on product testing.</td><td>Submitted</td></tr>
<tr><td>14.</td><td>Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)</td><td>Submitted</td></tr>
<tr><td colspan="3">Remarks of Evaluator:
Sr. No. Observation Reply by the firm</td></tr>
</table>

1.	Latest GMP certificate/last inspection report of the finished product manufacturer conducted within last three years shall be submitted.	Firm has submitted copy of GMP certificate No. 53/2022-DRAP (K) dated 15-04-2022 issued on the basis of inspection conducted on 07-04-2022.
2.	Justification shall be submitted for the difference of concentration of the reference solution and test solution in the assay test as the drug substance manufacturer has mentioned 0.02 mg/ml strength while drug product manufacturer has mentioned 0.1mg/ml.	Firm has submitted that they have followed the procedure of drug substance for the determination of assay as similar as manufacturer pertaining to chromatographic condition, wave length, flow rate and mobile phase, only concentration is changed 20mcg to 100 mcg/ml, but we kept same concentration of standard and sample comparable/ alike and validated the method as per ICH guideline, Hence it is acceptable.
3.	Valid copy of GMP certificate of the drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of manufacturing license of M/s Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fuxin City, Liaoning Province, China Valid till 27.11.2027.
4.	Justify dissolution parameters i.e. dissolution limits, dissolution medium, Volume of the medium, RPM and wave length applied for the applied formulation i.e., NLT 80% (Q) in 30 minutes and 0.1N HCL medium, medium volume (500ml) & Speed (50rpm) since innovator product (Jardiance) specifies NLT (Q) in 15 min in phosphate buffer 6.8 pH with medium volume of 900ml & speed of 75 rpm.	Firm has submitted that Clinical pharmacology and Biopharmaceutics Reviews report of innovator brand Jardiance tablet have been published in August 2014, in which the Dissolution parameter are 75 rpm, medium phosphate buffer 6.8 pH with medium volume 900ml and (Q) at 15 minutes, However, the latest dissolution method which was published on FDA website, dated 07 Feb 2020 for Empagliflozin tablets is recommended to follow FDA's dissolution guidance 2018 in which dissolution parameters at 50rpm, medium 0.1N HCl with the medium volume of 500ml and (Q) 80% in 30 minutes. We followed the latest FDA recommended dissolution parameters to harmonize the dissolution profile of our product with innovator's brand. ***Firm has referred to FDA dissolution guideline which are applicable when the parameters for dissolution of a specific product are not available in the reviews of the product. As in case of Empagliflozin tablets, data of the innovator product is revealed by the USFDA, so firm has to follow the revealed specifications.*** Firm has now submitted another document wherein they sent an Email to USFDA regarding the adaptation of dissolution method of Empagliflozin and reply of USFDA is reproduced as under; "*We suggest you follow the dissolution method as recommended in the FDA-recommended dissolution database. If you wish to deviate from the posted dissolution method that would be a review that will be evaluated after you submitted your ANDA."* They further submitted revised specification for the dissolution as per innovator product i.e. NLT 80% (Q) in 15 min in phosphate buffer 6.8 pH with medium volume of 900ml & speed of 75 rpm. They further submitted dissolution of all the three trial batches as per new specifications. ***Fee applicable for pre-registration variation is not submitted.***

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration letter will be issued upon submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.**

Case No. 04. Deferred cases of Human import drugs applied on form 5F.

Registration Board in its 257th meeting held on 24-25th March, 2016 deliberated that drugs for treatment of chronic ailments and drugs which are in short availability should have priority review process and consideration by the Board to ensure their free availability. The Board decided that drugs for treatment of cancer, viral diseases, thalassemia, immunosuppressant's, vaccine and sera, new molecules / formulations, blood factors and bags will be given priority consideration.
Following applications are placed before the Board for consideration in light of decision of 257th meeting of the registration Board.

	The proposed proprietary name / brand name	Nicardex 10mg/10ml Solution for Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 10ml ampoule contains: Nicardipine hydrochloride …… 10mg.
	Pharmaceutical form of applied drug	Solution for Injection.
	Pharmacotherapeutic Group of (API)	Selective Calcium Channel Blockers with mainly Vascular effects. ATC Code: C08C
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	1's and box of 05 ampoules.
	Proposed unit price	PKR 508/ampoule and 2540/box of 05 ampoules.
	The status in reference regulatory authorities	Nicardipine 10 mg/10 ml solution for injection, Laboratoire Aguettant 1 rue Alexander Fleming 69007 LYON FRANCE, MHRA approved.
	For generic drugs (me-too status)	Could not be confirmed.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template.
	Name, address of drug substance manufacturer	Name: Lusochimica S.p.A. Address: Via Giotto, 9 - 23871 Lomagna (LC), Italy.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification studies, batch analysis (NIC2114, NIC1717 & NIC619) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 48 months' real time stability data at 25°± 2°C / 60% RH ± 5% RH of 03 batches (2705, 2805 & 2905). • 06 month accelerated stability data 40°C ± 2°C / 70% RH ± 5% RH of 03 batches (2705, 2805 & 2905).
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturer, batch formula, manufacturing process and process control, process validation protocols/report,

		control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (4210382, 5201583 & 5201584), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence is established against Perdipine injection 10mg/10ml manufactured by Astellas Pharma Japan, Batch No. NY68Y011 by performing quality tests including identification, pH, Osmolarity, Particulate matter, Related substances, Assay, sterility, content of Sorbitol & bacterial endotoxin.
	Analytical method validation/verification of product	Submitted.
	Container closure system of the drug product	10ml type I amber glass ampoule.
	Stability study data of drug product, shelf life and storage conditions	• 36-months real time stability data at 30°C ± 2°C / 65% ± 5% RH of 03 batches (K-10290-01-F-PSC-1, K-10290-01-F-PSC-2 & K-10290-01-F-PSC-3). • 06-month accelerated stability data 40°C ± 2°C / 75% ± 5% RH of 03 batches (K-10290-01-F-PSC-1, K-10290-01-F-PSC-2 & K-10290-01-F-PSC-3).
	Therapeutic indications in MHRA.	Nicardipine 10 mg/10 ml solution for injection is indicated for the treatment of acute life-threatening hypertension, particularly in the event of: • Malignant arterial hypertension/Hypertensive encephalopathy. • Aortic dissection, when short acting beta-blocker therapy is not suitable, or in combination with a beta-blocker when beta-blockade alone is not effective. • Severe pre-eclampsia, when other intravenous antihypertensive agents are not recommended or are contra-indicated. • Nicardipine is also indicated for the treatment of post-operative hypertension

Evaluation by PEC:

Sr. No.	Section	Observations	Reply by the firm.
1.	1.1	Submitted fee is in the head of Biological drug division and for biological drug. Clarification shall be submitted.	
2.		Notarized supply and distribution agreement shall be submitted.	
3.	1.4.3	Valid copy of Drug Sale License of the applicant shall be submitted as the submitted DSL is valid up to 17-04-2022.	
4.	1.6.5	Valid copy of GMP certificate of Drug Substance shall be submitted.	
5.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	
6.	3.2.S.4.2	Analytical procedures used for the drug substance by the drug substance manufacturer shall be submitted.	
7.	3.2.S.4.4	• COA of the drug substance manufacturer has loss on drying of NMT 0.5% while the COA of the drug product manufacturer has Loss on drying limit of less than or equal to 1%. Justify.	

	• COAs of the drug product manufacturer has assay test performed by the titration method while the analytical procedure has mentioned USP specification by HPLC method for assay test. Justify.	
8.	3.2.P.8 Accelerated stability data of batch No. K-10290-01-F-PSC-1 & K-10290-01-F-PSC-2 at six-month time point has total impurities out of specifications. Justification shall be submitted.	

Decision of 324th meeting of Registration Board.: Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Reply by the firm;

Sr. No.	Observations	Reply by the firm.
1.	Submitted fee is in the head of Biological drug division and for biological drug. Clarification shall be submitted.	Firm has submitted that their bank challan receipt clearly shows that they have selected/write registration of new drug for import (not locally manufactured) for Nicardex (Nicardipine HCl) 10mg/10ml and does not select or mention Biological drug division. They further submitted that due to mistake and human error from one of their personnel it was selected Biological drug division and for biological drug head online. They further requested to consider their registration fee for new drug for import (not locally manufactured) head instead of biological head.
2.	Notarized supply and distribution agreement shall be submitted.	Legalized and notarized copy is submitted.
3.	Valid copy of Drug Sale License of the applicant shall be submitted as the submitted DSL is valid up to 17-04-2022.	Copy of license No. 05-352-0063-032069D valid till 17-04-2027 is submitted by the frim.
4.	Valid copy of GMP certificate of Drug Substance shall be submitted.	Copy of GMP certificate No. IT-API/233/H/2022 dated 18-11-2022 is issued in the name of Lusochimica S.p.A. Address: Via Giotto, 9 - 23871 Lomagna by AIFA Italy on the basis of inspection conducted on 03-12-2021.
5.	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	Submitted.
6.	Analytical procedures used for the drug substance by the drug substance manufacturer shall be submitted.	Submitted.
7.	• COA of the drug substance manufacturer has loss on drying of NMT 0.5% while the COA of the drug product manufacturer has Loss on drying limit of less than or equal to 1%. Justify.	Firm has submitted two new COAs of the drug substance from both drug substance manufacturer and drug product manufacturer wherein they have changed the limits of loss on drying i.e. NMT 0.5%.
	• COAs of the drug product manufacturer has assay test performed by the titration method while the analytical procedure has mentioned USP specification by HPLC method for assay test. Justify.	COA from the drug product manufacturer has also assay test on HPLC.
8.	Accelerated stability data of batch No. K-10290-01-F-PSC-1 & K-10290-01-F-PSC-2 at six-month time point has total impurities out	Firm has submitted that results of total impurities during accelerated stability of Nicardipine HCl solution for injection did not meet the specifications. Results of Nicardipine pyridine analogue increased under

	of specifications. Justification shall be submitted.	accelerated conditions. They further referred to International Journal of Pharmaceutics 286 on Evaluation of photo stability of solid state of Nicardipine HCl polymorphs by using Fourier transformed reflection-absorption infrared spectroscopy – effect of grinding on the photo stability of crystal form (Teraoka, et al., 2004) it was proved that Nicardipine HCl in solid state decomposed to a pyridine analog after oxidation of dihydropyridine ring by the light irradiation. Heat could catalyze the degradation process of this degradant. Based on this study, increase of impurity was comparable to the temperature increment. The results of Nicardipine related compound 2 and any unspecified degradation impurity was also increased under accelerated condition. These impurity increment were due to high temperature exposure. They further referred to ICH guidelines: ICH Topic Q1A (R2) Stability testing of new drug substances and product, 2.1.7. Storage conditions "the long term testing should cover a minimum of 12 months" on at least three primary batches at the time of submission and should be constituted for a period of time sufficient to cover the proposed shelf life. Since the shelf life of the product was established based on long term stability study results and the product met the specification during the stability study at proposed storage condition, therefore, we do not rely on accelerated stability study.
Decision: Deferred for following: • **Submission of full fee for the applied product i.e. 75,000/-** • **Justification for out of specification results for the "Total impurities" in Accelerated stability data of batch No. K-10290-01-F-PSC-1 & K-10290-01-F-PSC-2 at six-month time point.**		

Agenda of Evaluator PEC-XV

Registration Application Received On Form 5-F (Imported Product):

942.	**Name, address of Applicant / Importer**	**M/s Grace Pharmaceuticals**
	Details of Drug Sale License of importer	**License No. 152** **Address:** Office no. 503, 5th floor Plot no 42C/2 Lane-08, Bukhari Commercial Phase-6, D.H.A Karachi, Pakistan. **Address of Go down:** NA **Validity:** 21-10-2023 **Status:** License to sell drugs as distributor **Renewal:** Firm has submitted for renewal
	Name and address of marketing authorization holder (abroad)	**Beijing Beilu Pharmaceutical Co., Ltd.** No. 3 Shuiyuan West Road, Miyun District, Beijing, China
	Name, address of manufacturer(s)	**Beijing Beilu Pharmaceutical Co., Ltd.** No. 3 Shuiyuan West Road, Miyun District, Beijing, China
	Name of exporting country	China
	Detail of certificates attached (CoPP, Freesale certificate, GMP certificate)	**CoPP:** Firm has submitted notarized (notarized by Beijing Fangyuan Notary Public Office) copy of CoPP certificate (No: 20210127) dated 23-03-2021 issued by Beijing Municipal Medical Product Administration CHINA for Iodixanol injection 50ml. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. **The name of importing country on CoPP is mentioned.**

		Furthermore the CoPP was valid till 31-10-2021.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of distribution certificate from Beijing Beilu Pharmaceutical Co., Ltd. The letter species that the manufacturer appoints M/s Grace Pharmaceuticals. To register their products in Pakistan. The authorization letter is valid till **30-04-2026**.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 153 : 03-01-2022
	Details of fee submitted	PKR 75,000/-: vide slip no. 5548215985
	The proposed proprietary name / brand name	**Intrapaque 50 mL : 16g I Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Iodixanol …….50ml (50ml:16g I)
	Pharmaceutical form of applied drug	Injection.
	Pharmacotherapeutic Group of (API)	Medical Imaging Drug
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	1 VIAL
	Proposed unit price	N/A
	The status in reference regulatory authorities	Visipaque® 320mg Iodine/ml GE Healthcare AS **USFDA APPROVED**
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**GE Healthcare As** Lindesnesveien208, N0-4551 Lindesnes, Norway

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Drug substance monograph is present in USP.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 three batches of IODIXANOL Injection instead of iodixanol API. The real time stability data is conducted at 30 ℃±2, RH 65%±5%.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm submitted the comparative study on quality of iodixanol injection (50ml:16mg(I) between reference preparation and self-made preparation.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Medium borosilicate glass infusion bottle, strength: 50ml Bottle Pack: Halogenated butyl rubber stopper for injection (chlorinated), strength: 32mm Aluminum-plastic composite cover for infusion bottle, strength: 32mm
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. Accelerated Stability batches: R200101, R200102, R200103 Real Time Stability Batches: R200102 (18 months) R200103 (36 months)

VISIPAQUE

is indicated in for: 1.1 Intra-arterial Procedures Adult and pediatric patients 12 years of age and older

• (270 and 320 mg Iodine/mL) intra-arterial digital subtraction angiography (IA-DSA).

• (320 mg Iodine/mL) angiocardiography (left ventriculography and selective coronary arteriography), peripheral arteriography, visceral arteriography, and cerebral arteriography. Pediatric patients less than 12 years of age

• (320 mg Iodine/mL) angiocardiography, cerebral arteriography, and visceral arteriography. 1.2 Intravenous Procedures Adult and pediatric patients 12 years of age and older

• (270 and 320 mg Iodine/mL) CT imaging of the head and body.

• (270 and 320 mg Iodine/mL) excretory urography.

• (270 mg Iodine/mL) peripheral venography.

• (320 mg Iodine/mL) coronary computed tomography angiography (CCTA) to assist in the diagnostic evaluation of patients with suspected coronary artery disease. Pediatric patients less than 12 years of age

• (270 mg Iodine/mL) CT imaging of the head and body.

• (270 mg Iodine/mL) excretory urography.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued by relevant regulatory	

	authority in the country of origin and name of exporting country, since the submitted CoPP is invalid.	
2.	**3.2.S.4.1-3.2.S.4.2**	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".
3.	**3.2.S.4.3**	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*
4.	**3.2.S.4.3**	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".*
5.	**3.2.S.5**	Submit COA of reference standards in section 3.2.S.5 as per the guidance document approved by Registration Board which specifies that *"For testing of Pharmacopeial Drug Substance, the use of primary reference standard is recommended, however for non-pharmacopeial Drug Substance, a secondary reference standard provided by the Drug Substance manufacturer is acceptable. COA of primary / secondary reference standard including source and lot number shall be provided".*
6.	**3.2.S.6**	Submit details of container closure system of drug substance in section 3.2.S.6 as per the guidance document approved by Registration Board which specifies that "*Description of the container closure system(s) for the shipment and storage of the API including materials of construction of each primary packaging component. Other information on the container closure system(s) (e.g. suitability studies) may be submitted".*
7.	**3.2.S.7**	Submit data in section 3.2.S.7 as per the guidance document approved by Registration Board which specifies that "The protocols used and the results of the accelerated and long-term stability studies shall be summarized. Proposed storage conditions / statement and re-test period (or shelf-life, as appropriate) shall also be submitted". Since you have submitted the compatibility results of Iodixanol with excipient.
8.	**3.2.P.2.2.1**	Submit details regarding batch number, manufacturing and expiry date of your as well as the comparator product used in pharmaceutical equivalence studies.
9.	**3.2.P.5.3**	Submit data of verification of assay procedure of drug product in section 3.2.P.5.3 as per the guidance document approved by Registration Board which specifies that "*All the officially recognized compendial methods for assay, dissolution and impurities (as applicable) are required to be verified and verification shall include a demonstration of specificity, repeatability (method precision) and accuracy".*

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence established against Omnipaque 350mgI/ML Vial (Batch no. 14778967)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Colorless type I Glass vial (50ml), bromobutyl closure, blue tear off cap
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 24 month has submitted.

INDICATIONS AND USAGE:
OMNIPAQUE (iohexol) injection is a radiographic contrast agent indicated for intrathecal, intravascular, oral, rectal, intraarticular and body cavity use. OMNIPAQUE oral solution is indicated for oral use only in conjunction with OMNIPAQUE injection administered intravenously for computed tomography (CT) of the abdomen.

DOSAGE AND ADMINISTRATION:

The concentration and volume required will depend on the indication, size and condition of the patient, and the equipment and imaging technique used. For CT of the head and body, OMNIPAQUE may be used with an automated contrast injection system or contrast media management system cleared for use with OMNIPAQUE. See full prescribing information for complete dosing information.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit valid drug sale license of importer Hospital supply corporation ,since the submitted DSL was expired on 29-06-2022.	
2.	According to the composition table associated with CoPP of drug product,API iohexol comply USP specification while the submitted COA of both API vendors claimed that their material comply EP specification ,so clarification is required in this regard.	
3.	**3.2.S.4**	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".
4.	**3.2.S.4.3**	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer.
5.	**3.2.S.7**	Justify for not performing the test of sterility, bacterial endotoxin test, ionic compound test, free iodide test, ionic compound test, heavy metal test, residual solvent test and color of solution test during the stability studies of drug substance as evident from the data of both API suppliers.
6.	**3.2.P.2.2.1**	Justify for not performing the test of free iodine, particulate matter, sterility and bacterial endotoxin test while establishing the pharmaceutical equivalence against the reference product.
7.	**3.2.P.5.1**	Justify for not adopting the USP or BP specification for finished product, since the official monograph of iohexol injection is present in both BP and USP Pharmacopeia. Justify for adapting the wider assay limits i.e. from 90-110% comparing the assay limit recommended in USP monograph of iohexol injection i.e. 95-105%.
8.	**3.2.P.8**	Submit the batch size details of batches whose stability data has been submitted in section 3.2. P.8. Submit the complete data of long term stability studies performed at zone IV-a conditions, since you have claimed shelf life of 36months and provide the data of 24 months.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Name, address of drug substance manufacturer	M/s. CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No.88 Yangzi Road Economic & Technological Development Zone Shijiazhuang City Hebei Province China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25°C±2, 60% RH±5%. The stability study data is till 24 months. Batch no. 891805901, 891805901, 891805901 Claimed 48 months but provided data of 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	submitted. Pharmaceutical Equivalence established against the product of M/s. Shandong Lukang Pharmaceuticals Co. Ltd., China
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	7ml Type-II glass vial rubber stopper flip off cap.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 36 months has submitted.

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings
1.	Evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form in any one of the reference regulatory authority specified by Registration Board in its 275th meeting for further evaluation of your application.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Pharmaceutical Equivalence and Comparative Dissolution Profile	submitted. Pharmaceutical Equivalence established against the product of M/s. Shandong Lukang Pharmaceuticals Co. Ltd., China Benzyl penicillin Sodium for Injection (1mega)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	7ml Type-II glass vial rubber stopper flip off cap.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 36 months has submitted.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit evidence of approval status of applied formulation in the approved reference regulatory agencies in the same strength i.e. 1,000,000 IU.	
2.	Clarify the strength of applied formulation, since you have applied for benzyl penicillin sodium injection 1,000,000 IU while the CoPP is of benzyl penicillin sodium for injection 1 mega. Please submit the conversion/equivalent calculation from 1,000,000 IU to 1 mega.	
3.	**3.2.S.4.1-3.2.S.4.2**	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Analytical procedure of drug substance by drug substance manufacturer is different from the procedure specified in EP monogragh,Justify how the raw material comply EP specification as claimed in the batch analysis report.
4.	**3.2.S.4.3**	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer.
5.	**3.2.P.1**	According to the composition of finished product given in section 3.2.P.1 599mg equivalent to benzyl penicillin 1mega powder for injection is filled per vial while the reference product approved in MHRA claimed that Each vial contains Benzylpenicillin sodium 600 mg (1 mega unit). Comparing the label claim/ strength justify how the applied product is similar to the reference product.
6.	**3.2.P.1 (c)**	Provide details of type and quantity of diluents used for reconstitution for of applied product.
7.	**3.2.P.2.2.1**	According to the pharmaceutical equivalence report content of penicillin has calculated while the BP recommends quantification of benzypenicillin content, justification is required in this regard.
8.	**3.2.P.5.1**	Clarify the content of penicillin in term of benzyl penicillin as recommended by BP monograph.

9.	**3.2.P.5.3**	Assay procedure followed while performing the validation studies is different from the recommended assay procedure given in BP monograph of benzypenicillin sodium injection, justification is required in this regard.
10.	**3.2.P.8**	Justify for not including the bacterial endotoxin test in the stability studies of drug product since the BET is recommended in BP monograph.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Details of fee submitted	PKR 150,000 /-: Slip # 6700351198, Date:- 05/01/2022
	The proposed proprietary name / brand name	FARPRESIN
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	20 IU/mL. Each 1 mL contains Vasopressin.
	Pharmaceutical form of applied drug	Farpresin (Vasopressin) is a clear, colorless solution for intravenous administration available as 20 units/mL in 1-mL vial
	Pharmacotherapeutic Group of (API)	Vasopressin and analogues WHO ATC H01BA01
	Reference to Finished product specifications	USP43
	Proposed Pack size	5 Vials per Pack (Box 5 Vials)
	Proposed unit price	Rs 900/Vial. Rs. 4500 for 5 Vials Box
	The status in reference regulatory authorities	Vasopressin 20 IU/ml is US FDA & Health Canada approved drug. In USA it is manufacture/marketed by American Regent, Inc. & in Canada it is manufacture/marketed by Fresenius Kabi Canada.
	For generic drugs (me-too status)	M/s. Platinum Pharmaceuticals, Brand: - Vasopressin Injection, Strength: - 20units/ml, Composition: - Vasopressin, Reg. No. 015590, Dosage Form: - Injectable Solution in Vial for Intravenous (IV) Use
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Name: BCN Peptides S.A. Address: Pol. Ind. Els Vinyets-Els Fogars, II 08777 Sant Quinti de Mediona Barcelona, Spain
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches (VP0401, VP0501, VP0701) of API at accelerated (25 °C ± 2° C 60% ± 5%) as well as real time long term (5 °C ± 2° C) conditions. The 6 months accelerated study is complete for 3 batches. The real time 3 batches stability

		data are conducted till 36 months. [Reference:- Specifications according to the previous Vasopressin monograph USP31-NF26 in accelerated & long term API stability testing].
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established by conducting all the quality tests against the reference original brand Vasostrict (Vasopressin) 20 unit/ml Solution for Injection manufactured by (Par Pharmaceutical Chestnut Ridge, NY 10977), US., Lot: 36748 Exp Date: 12-2022. Based upon results comparison and details provided, Pharmaceutical equivalence is established between FARPRESIN and reference brand VASOSTRICT.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Farpresin (Vasopressin) 20 unit /ml Inj. is filled into glass type 1 vial-1ml with Bromobutyl rubber stopper.
	Stability study data of drug product, shelf life and storage conditions	24 months real time stability data (Long Term) at 30°C ± 2°C / 75% ± 5%RH of 03 batches (Zone IVB) is Submitted. 06 month accelerated stability data 40°C ± 2°C / 75% ± 5%RH of 03 batches is submitted.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Please provide legalized documents which established the link between Fahrenhite and PT. Partapa Nirmala,since all your legalized documents including CoPP, Free Sale certificate and GMP inspection report of Manufacturer Abroad revealed that the name of manufacturer is PT. Partapa Nirmala.	
2.	**1.3.4**	Justify for not having segregated manufacturing facility for preparation of hormones, since the Manufacturer Abroad have manufactured the vasopressin injection in non-betalactum Small volume injection section.
3.	**3.2.S.4.2**	Justify for not performing the identification test via Mass Spectral Analysis of drug substance by drug product manufacturer since the USP recommends identification test both via HPLC and Mass spectral analysis.
4.	**3.2.S.4.4**	Batch analysis report of batch no. VP-1803 by drug product manufacturer evident that result of bacterial endotoxin test was out of specification despite of keeping the acceptance limit <100IU/mg, while Limits of BET test recommends by the official Pharmacoepias and the acceptance limit adopted by the drug substance manufacturer (BCN Peptides) is <10IU/mg. Justify for accepting the batch of drug substance which is failed to pass the bacterial endotoxin test, further provide the Pharmaceopial/international literature which recommends the acceptance limit <100IU/mg.
5.	**3.2.S.7**	• Justify for not performing the test of water content, test for acetic acid in peptides, microbial enumeration test and test for specified microorganism while performing the stability study of drug substance despite these test are included in the USP monograph of vasopressin. • Justify for adapting the acceptance limit of assay NLT 300IU/mg in the stability studies comparing the acceptance criteria recommended in USP monograph i.e. NLT 95.0% and NMT 105.0% of vasopressin (C46H65N15O12S2), calculated on the anhydrous, acetic acid-free basis.

6.	**3.2.P.1**	• Please provide calculation along with equivalent factor to established link between 20 units /ml and 0.0667mg/ml along with evidence of reference product approved in Reference regulatory Agencies with the same composition. • Justify for using different excipient from that of 1ml composition of innovator product approved in USFDA, since 1ml of injection of innovator brand contains sodium acetate buffer and water for injection without any preservative.
7.	**3.2.P.2.2.3**	Justify for not performing the sterility test, Bacterial endotoxin test and particulate matter in injection test while performing the pharmaceutical equivalence against the innovator/reference product.
8.	**3.2.P.5.2**	Assay procedure specified in section 3.2.P.5.2 is not in accordance with USP monograph of vasopressin injection, justify for using different assay method from that recommended in USP.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Not confirmed
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s. Qinhuangdao Zizhu Pharmaceutical Co. Ltd. No.10 Longhai Road, Economic and Technological Development Zone, Qinhuangdao City, Hebei Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug product instead of stability data of drug substance.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	submitted. Pharmaceutical Equivalence established against the comparator product of Plan B One-Step (Levonorgestrel) Tablet 1.5mg of M/s. Gedeon Richter Ltd., Budapest , Hungary and comparative dissolution

		studies has also conduct against the same comparator product.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Alu-PVDC COATED PVC foil blisters
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. The real time stability study data of 60 months has submitted.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	Submit original ,valid and legalized CoPP of drug product, since you have submitted the copy of CoPP.	
2.	Submit valid Drug Sale License of ,since the submitted DSL was expired on 19-10-2022.	
3.	**3.2.S.4.2**	Justify for performance of assay using UV Spectrophotometer while the EP recommends Potentiometric titration method for assay testing of drug substance.
4.	**3.2.S.7**	Submit stability data of drug substance performed at accelerated and long term stability conditions till the claimed shelf life/re-test period, since the submitted data in section 3.2.S.7 is of drug product instead of drug substance.
5.	**3.2.P.1**	According to the WHO assessment report of applied product lactose monohydrate is of bovine origin. Please submit the details related to the originating source of lactose monohydrate .
6.	**3.2.P.5.2**	Justify for keeping the detection wavelength 243nm in the chromatographic condition of dissolution testing of drug product comparing the detection wavelength recommended in the BP monograph of levonorgestrel tablet i.e.220nm.
7.	**3.2.P.8**	Justify the variation observed in acceptance criteria of dissolution while performing the stability data of drug product. As evident from the submitted stability data, at certain time points the acceptance criteria of dissolution has set at **Qvalue-75% of the active substance release in 60 min** while at other time points dissolution criteria has kept at **NLT 80% in 30minutes**.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	The proposed proprietary name / brand name	**Elidel 1% Cream**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Gram Cream Contains: Pimecrolimus ……10mg
	Pharmaceutical form of applied drug	Topical Cream
	Pharmacotherapeutic Group of (API)	D11AH02 Other dermatological preparations. Agents for dermatitis, excluding corticosteroids
	Reference to Finished product specifications	In-house specification.
	Proposed Pack size	--
	Proposed unit price	--
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	NA
	Name, address of drug substance manufacturer	M/s Lek Pharmaceuticals d.d. Kolodvorska 27 1234 Mengeš Slovenia
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated (25ºC ± 2ºC/60%± 5% RH) as well as real time conditions (5ºC ± 3ºC).
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of

		analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not applicable since applied product is innovator.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Packaged in aluminium tubes sealed with a membrane (aluminium seal). The tubes are closed with a polypropylene screw cap which has a built-in point to pierce the aluminium seal.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 3 batches for different pack sizes is as under: 5gm tube = 12months 10g, 15g, 30g, 60g and 100g tubes = 18 months

Evaluation by PEC:

Section	Observations	Firm's response
1.3	• Copy of valid DSL shall be submitted. • Notarized copy of valid letter of authorization shall be shall be submitted.	• Valid DSL is submitted by the firm with the validity of 21-09-2023. • Firm replied that they have requested for the valid letter of authorization from our Principal Manufacturer and will provide as received.
1.5.4	Submit demand pack size and price for the applied formulation.	Firm demanded the pack size 15g and 10g with the proposed price of Rs.2000/- and 1500/- respectively.
3.2.P.5.2	Test for efficacy of preservative, as recommended by ICH Q1 (R2) guidelines & USP chapter <51>, has not been included in the finished product specifications. You are advised to submit justification in this regard.	Firm replied that the required data for efficacy of preservative provided in the dossier. According to the ICH Q1(R2) guidelines it is mentioned under point 2.2.5 that the specification for the preservative content should be included in specification 3.2. P.5.2. This requirement is fulfilled in module 3 section 3.2. P.5.2 (J. Benzyl Alcohol, identification and assay by GC). Furthermore, the ICH guidelines request that the "preservative effectiveness demonstrated during drug development in its final formulations" [ICH guidelines Q1 (R2) 2.2.5].
3.2.P.5.3	Analytical method validation studies for the "Assay" test of drug product shall be submitted.	Firm submitted the analytical method validation studies report for assay of drug product .
3.2.P.8.3	Clarification shall be submitted for the claimed shelf life against the applied pack size since submitted stability data declares different shelf life for different pack sizes.	Firm replied that the product will be imported in Pakistan in the pack size of 10g & 15g. The shelf life of 10g & 15g is 18 months. Therefore they requested to approved the pack size of 10g & 15g with the shelf life of 18months.

Decision: Approved as per policy of inspection of manufacturer abroad. Further, Registration Board decided to grant shelf life of shelf life of 18 months only for the pack size of 10g & 15g.

	Name of exporting country	China
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted copy of CoPP certificate (No: 20200029) dated 16-06-2020 issued by Shaanxi Provincial Drug Administration. The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every year. **The name of importing country on CoPP is mentioned. Furthermore, the CoPP was valid till 15-06-2022.** Copy of GMP certificate of M/s. Xi'an Wanlong Pharmaceutical Co. Ltd. is submitted which was valid till 22-09-2021.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of letter of Exclusive Marketing Agreement between M/s. VIZ Remedies Pakistan LLP and M/s. Xi'an Wanlong Pharmaceutical Co. Ltd. The letter specifies that the manufacturer appoints M/s. VIZ Remedies Pakistan LLP. Is their exclusive agent in Pakistan.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Bulk import and local repackaging ☐ Bulk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 24063 : dated 01-09-2021
	Details of fee submitted	PKR 100,000/-: dated 18-01-2021 (Differential fee of Rs. 50,000/- is to be submitted by the firm)
	The proposed proprietary name / brand name	**Tirofiban Hydrochloride Injection 5mg/100ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100mL contains: Tirofiban Hydrochloride (calculated based on Tirofiban)5mg
	Pharmaceutical form of applied drug	Injection.
	Pharmacotherapeutic Group of (API)	Anti-Platelet
	Reference to Finished product specifications	Innovator's Specification

	Proposed Pack size	1x100ml neutral borosilicate glass infusion bottle
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved (AGGRASTAT Injection)
	For generic drugs (me-too status)	Not confirmed in the applied volume i.e.100ml
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	**Xi'an Wanlong Pharmaceutical Co. Ltd.** No.2 Yongan Road, Yangling Agricultural Hi-tech Industrial Demonstration Zone Shaanxi China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. Drug substance monograph is present in USP.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 three batches of Tirofiban hydrochloride Injection instead of Tirofiban hydrochloride API.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence study has been performed against the innovator product AGGRASTAT Injection (Batch no. C856260) which includes quality test (Appearance, pH , Assay, Citric Acid and sodium citrate content, sodium chloride content and related substance test.)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	100ml- neutral borosilicate glass Infusion bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 following batches The accelerated stability study data is conducted at 40°C ±2°C / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30°C ±2°C / 65% ± 5% RH. **B171001,B171002,B171003**

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	**1.3**	Submit valid original and legalized Certificate of Pharmaceutical Product (CoPP) / Free Sale certificate and GMP certificate of the Manufacturer issued

		by relevant regulatory authority in the country of origin and name of exporting country, since the submitted documents are invalid.
2.	**1.4**	Submit valid drug sale license of **VIZ Remedies Pakistan LLP ,**since you have submitted the expired DSL.
3.	**3.2.S.7**	Submit stability data of three batches of drug substance performed at long term stability conditions till the claimed re-test date since you have submitted the data of only 12 months.
4.	**3.2.P.3**	Justify the use of activated carbon in the manufacturing procedure of sterile preparation to remove the bacterial endotoxin in the light of guidance documents of reference agencies.
5.	**3.2.P.5.1**	Justify how the labelled amount of tirofiban will be quantify, since the assay method given in section 3.2.P.5.2 calculate the quantity of tirofiban hydrochloride instead of labelled quantity of tirofiban without the salt factor.
6.	**3.2.P.5.4**	Justify for using the excipient sodium chloride in the product name along with tirofiban hydrochloride.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Withdrawal of Registration Applications by M/s. Grace Pharmaceuticals:

M/s. Grace Pharmaceuticals in its letter dated 2nd February ,2023 informed that they would like to withdraw following registration application of their imported products:

Sr.no.	Name and Address of Manufacturer & Importer	Brand name along with composition	Details of Registration Application
1.	M/s Grace Pharma. 503, 5th Floor, Plot 42C/2, Lane 08, Bukhari Commercial, DHA Phase 6 Karachi **Marketing Authorization Holder of Manufacturer Abroad:** M/s Beijing Beilu Pharmaceutical Co., Ltd.No 3 Shuiyuan West Road, Miyun District, Beijing, China	Monopaque Injection Each 100ml Contains: Iohexol 100ml:35g(I)	Form-5F Dy.No 32572 dated 30-11-2021 Rs.75,000/- dated 29-10-2021
2. Administrative Portion		
7.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has referred to previous inspection of stability data of the same dosage form on the basis of which Registration Board in 289th meeting decided to approve registration of Promig Plus 500mg/20mg Tablet and Promig Plus 375mg/20mg Tablet. Inspection date: 14th March, 2019 The report shows that: The HPLC software is 21 CFR compliant. The firm has provided data loggers with stability chambers.
8.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**EMPAGLIFLOZIN:** Copy of GMP issued by Food & drug authority china valid till 23/08/2023. **METFORMIN HCL:** Copy of GMP certificate No. 20031933 issued by Food & drug Control Administration valid till 19/03/2023. **LINAGLIPTIN:** Copy of GMP certificate issued by drug Control Administration Andhra Pradesh valid till 07/12/2024.
9.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of **EMPAGLIFLOZIN** (1.5 Kg, Invoice # HN19120501-H) and attested copy of form 6 (I&E) DRAP, Islamabad dated 10-01-2020. The firm has submitted copy of invoice for the import of **METFORMIN HCL** (1000 Kg, Invoice # EXP/302/20-21) and attested copy of form 6 (I&E) DRAP, Islamabad dated 05-08-2020. The firm has submitted copy of invoice for the import of **LINAGLIPTIN** (0.350 Kg, Invoice # 202110329) and attested copy of form 6 (I&E) DRAP, Islamabad dated 08-03-2021.

10.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
11.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & Audit trail on testing reports of product submitted.
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	**3.2.S.4.2 Metformin HCl**	Justify for performance of assay via potentiometric titration, since the USP recommended HPLC method for assay testing of metformin HCl.	Firm replied that they have now performed the assay of metformin HCl via HPLC method as per USP 43 and accordingly performed the verification studies of assay procedure on HPLC.
2.	**3.2.S.4.2 Linagliptin**	Justify for using different method for performing the enantiomeric purity test from that specified by the drug substance manufacturer. Further, submit the evidence of availability of chiral HPLC (chiral Pak AD column) as you have mentioned in the procedure of enantiomeric purity test.	Firm again submitted the procedure of enantiomeric purity test which is different from the procedure followed by the drug substance manufacturer.
3.	**3.2.S.7**	Please confirm the claimed re-test period of empagliflozin and linagliptin, accordingly provide the stability data of long term till the claimed re-test date.	Firm submitted the stability data of both drug substance.
4.	**3.2.P.1**	Justify the double film coating on the core of metformin comparing the formulation of innovator product in which single film coating has been done on the core of metformin.	Firm replied that " we have performed drug coating of empagliflozin and Lina gliptin in single step as performed by innovator and then finish coat (film coating) is done in order to protect the drug coating and smoothen the final tablets.
5.	**3.2.P.5.1**	Justify for not including the arginine content test and water content in the finished product specification since these test are included in the specification of finished product of innovator product.	Firm replied that they now included the arginine content test and water content in the finished product specification since these tests are included in the specification of finished product of innovator product. Firm submitted the procedure of arginine content and water content test.
6.	**3.2.P.8**	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Firm submitted the stability data performed at long term stability condition till 12 months.
7.	**3.2.R.1.1**	Scientific justification is required for using 10% excess quantity of linagliptin and empagliflozin in the trail batches as evident from the submitted Batch manufacturing record comparing the review literature of innovator brand in which the composition did not mentioned	Firm replied that to compensate the machine loss in coating they use 10% excess quantity of linagliptin and empagliflozin.

		the excess amount of said active ingredients.	

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**EMPAGLIFLOZIN:** Copy of GMP issued by Food & drug authority china valid till 23/08/2023. **METFORMIN HCL:** Copy of GMP certificate No. 20031933 issued by Food & drug Control Administration valid till 19/03/2023. **LINAGLIPTIN:** Copy of GMP certificate issued by drug Control Administration Andhra Pradesh valid till 07/12/2024.		

3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the import of **EMPAGLIFLOZIN** (1.5 Kg, Invoice # HN19120501-H) and attested copy of form 6 (I&E) DRAP, Islamabad dated 10-01-2020. The firm has submitted copy of invoice for the import of **METFORMIN HCL** (1000 Kg, Invoice # EXP/302/20-21) and attested copy of form 6 (I&E) DRAP, Islamabad dated 05-08-2020. The firm has submitted copy of invoice for the import of **LINAGLIPTIN** (0.350 Kg, Invoice # 202110329) and attested copy of form 6 (I&E) DRAP, Islamabad dated 08-03-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & Audit trail on testing reports of product submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	**3.2.S.4.2 Metformin HCl**	Justify for performance of assay via potentiometric titration, since the USP recommended HPLC method for assay testing of metformin HCl.	Firm replied that they have now performed the assay of metformin HCl via HPLC method as per USP 43 and accordingly performed the verification studies of assay procedure on HPLC.
2.	**3.2.S.4.2 Linagliptin**	Justify for using different method for performing the enantiomeric purity test from that specified by the drug substance manufacturer. Further, submit the evidence of availability of chiral HPLC (chiral Pak AD column) as you have mentioned in the procedure of enantiomeric purity test.	Firm again submitted the procedure of enantiomeric purity test which is different from the procedure followed by the drug substance manufacturer.
3.	**3.2.S.7**	Please confirm the claimed re-test period of empagliflozin and linagliptin, accordingly provide the stability data of long term till the claimed re-test date.	Firm submitted the stability data of both drug substance.
4.	**3.2.P.1**	Justify the double film coating on the core of metformin comparing the formulation of innovator product in which single film coating has been done on the core of metformin.	Firm replied that " we have performed drug coating of empagliflozin and Lina gliptin in single step as performed by innovator and then finish coat (film coating) is done in order to protect the drug coating and smoothen the final tablets.
5.	**3.2.P.5.1**	Justify for not including the arginine content test and water content in the finished product specification since these test are included in the specification of finished product of innovator product.	Firm replied that they now included the arginine content test and water content in the finished product specification since these tests are included in the specification of finished product of innovator product. Firm submitted the procedure of arginine content and water content test.

6.	**3.2.P.8**	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Firm submitted the stability data performed at long term stability condition till 12 months.
7.	**3.2.R.1.1**	Scientific justification is required for using 10% excess quantity of linagliptin and empagliflozin in the trail batches as evident from the submitted Batch manufacturing record comparing the review literature of innovator brand in which the composition did not mentioned the excess amount of said active ingredients.	Firm replied that to compensate the machine loss in coating they use 10% excess quantity of linagliptin and empagliflozin.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

<tr><td>1.</td><td>Reference of previous approval of applications with stability study data of the firm (if any)</td><td>Firm has referred to onsite inspection report of their product:

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin)

Dayzol 30mg Capsules, Dayzol 60mg Capsules
(Dexlansoprazole)

which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June, 2021.
Registration Board decided to approve registration of

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin)

Dayzol 30mg Capsules, Dayzol 60mg Capsules
(Dexlansoprazole)

by M/s. Horizon Healthcare (Pvt) Ltd. Lahore. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.
Following two observations were reported in the report:
i. The HPLC software is 21 CFR compliant.
ii. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available.
iii. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
iv. Verification of performance of dissolution test at buffer stage pH 5.5 for Dayzol Capsules 30mg and 60mg.
Performance of dissolution test for EMPAZON 10mg and 25mg Tablets with revised specifications i.e not less than 80% (Q) in 15minutes at initial and 01-month time point.</td></tr>

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail reports have been submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:

INDICATIONS AND USAGE:

Edarbyclor is an angiotensin II receptor blocker (ARB) and a thiazide like diuretic combination product indicated for the treatment of hypertension, to lower blood pressure:

• In patients not adequately controlled with monotherapy

• As initial therapy in patients likely to need multiple drugs to help achieve blood pressure goals

Lowering blood pressure reduces the risk of fatal and nonfatal cardiovascular events, primarily strokes and myocardial infarctions.

DOSAGE AND ADMINISTRATION:

• Starting dose is 40/12.5 mg once daily

• Edarbyclor may be used to provide additional blood pressure lowering for patients not adequately controlled on azilsartan medoxomil 80 mg or chlorthalidone 25 mg

• Dose may be increased to 40/25 mg after 2 to 4 weeks as needed to achieve blood pressure goals

• Maximal dose is 40/25 mg

• May be administered with other antihypertensive agents

• Edarbyclor may be administered with or without food

• Replace volume in volume-depleted patients prior to use

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

<tr><td>1.</td><td>Reference of previous approval of applications with stability study data of the firm (if any)</td><td colspan="2">Firm has referred to onsite inspection report of their product:

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin)

Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole)

which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June, 2021.
Registration Board decided to approve registration of

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin)

Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole)

by M/s. Horizon Healthcare (Pvt) Ltd. Lahore. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.
Following two observations were reported in the report:
v. The HPLC software is 21 CFR compliant.
vi. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available.
vii. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
viii. Verification of performance of dissolution test at buffer stage
pH 5.5 for Dayzol Capsules 30mg and 60mg.
Performance of dissolution test for EMPAZON 10mg and 25mg Tablets with revised specifications i.e not less than 80% (Q) in 15minutes at initial and 01-month time point.</td></tr>

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail reports have been submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:

Sr.no.	Section	Observation	Firm's response
1.	**1.6.5**	Valid GMP certificate for the drug substance manufacturer of Chlorthalidone, issued by the relevant regulatory authority shall be submitted.	Firm submitted the updated GMP certificate of drug substance manufacturer of chlorthalidone.
2.	**3.2.S.4.3**	Clarification shall be submitted for the composition of placebo solution used for the performance of specificity parameter in the analytical method verification studies of drug substance.	Firm submitted the composition of placebo solution used for the performance of specificity parameter in the analytical method verification studies of drug substance.
3.	**3.2.P.2.2.1**	• Details shall be submitted for the dissolution parameters applied for the performance of CDP studies. • Clarification shall be submitted for the reported results of CDP studies without the aid of surfactant in the dissolution medium while referring to the innovator drug product literature wherein both the drug substances have been reported as BCS Class IV drug substances and Azilsartan has been declared as practically insoluble in acidic aqueous solutions.	Firm submitted the details of dissolution parameters applied for the performance of CDP studies. Firm submitted the reply that "for the performance of CDP Studies the standard solution was prepared in the same medium i.e., 0.1N HCL, hence the results are relative to the absorbance of standard solution. We are hereby submitting the CDP studies with standard solution prepared with diluents other than dissolution medium". Further, firm submitted report of CDP studies which has been performed with aid of surfactant.
4.	**3.2.P.5.3**	• Justification shall be submitted for the limits of peak purity test applied in the performance of specificity parameter in the analytical method validation studies. • Evidence of availability of HPLC equipped with PDA/ DAD detector applied for the performance of specificity parameter in the analytical method validation studies shall be submitted.	• Firm replied that Peak purity is calculated through software 98-100% is acceptable limit for peak purity • Further firm submitted the Spectrum which prove system equipped with PDA detector.
5.	**3.2.P.6**	COA of primary / secondary reference standard including source and lot number shall be provided.	Firm submitted the COA of primary / secondary reference standard.

Decision: Approved.
• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Cases of export facilitation:

	The status in reference regulatory authorities	OTEZLA TABLETS BY Amgen Inc. (USFDA Approved)
	For generic drugs (me-too status)	NA
	GMP status of the Finished product manufacturer	GMP certificate No. F. 11-6/2021-DRAP-65 granted on 25/08/2021 Valid up to 10-08-2023. Tablet (General) section approved vide letter No. F.3-14/2004-Lic, dated: 08-04-2015 is submitted.
	Name and address of API manufacturer.	Glenmark Life Sciences Limited Address: Plot No. Z-103-I, SEZ Phase II, Dahej, Taluka Vagra, District Bharuch, Gujarat – 392 130, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, tests for single/total impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 6 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(AMTab-001, AMTab-002, AMTab-003) (AMTab-004, AMTab-005, AMTab-006) (AMTab-007, AMTab-008, AMTab-009)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Otezla Tablets by Amgen Inc. (USA), by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Otezla Tablets by Amgen Inc. (USA). The dissolution profile has shown release less than 85 % in all three Buffer pH 1.2, Phosphate Buffer pH 6.8 and Acetate Buffer pH 4.5 in 15 minutes and similarity factor f2 calculated which complies acceptance criteria. Hence dissolution profile of both Apriva tablets and Otezla Tablet found similar.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.
STABILITY STUDY DATA		

Manufacturer of API	Glenmark Life Sciences Limited Address: Plot No. Z-103-I, SEZ Phase II, Dahej, Taluka Vagra, District Bharuch, Gujarat – 392 130, India.		
API Lot No.	82190049		
Description of Pack (Container closure system)	Apremilast Tablets 10mg: Alu-PVDC blister of 10 Tablets Apremilast Tablets 20mg: Alu-PVDC blister of 10 Tablets Apremilast Tablets 30mg: Alu-PVDC blister of 10 Tablets		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Apremilast Tablets 10mg AMTab-001, AMTab-002, AMTab-003.	Apremilast Tablets 20mg AMTab-004, AMTab-005, AMTab-006.	Apremilast Tablets 30mg AMTab-007, AMTab-008, AMTab-009.
Batch Size	1500 tablets	1500 tablets	1500 tablets
Manufacturing Date	08-2020	08-2020	08-2020
Date of Initiation	19-09-2020	19-09-2020	19-09-2020
No. of Batches	09		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted the document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 21082834 issued by Food and Drug Controls Administration, Block No.8, 1st floor, Dr. Jivraj Mehta Bhavan, Gandhinagar, Gujrat State, India valid till 06/08/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Form-6, No.00198/2019-DRAP (Ps)/817 dated 26/02/2019, DRAP acknowledgment for receiving of Apremilast, Commercial invoice, packing list, Form-3 & Form-7 and Goods declarations is submitted wherein the permission to import Apremilast for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	**3.2.P.5.2**	Justify for not adopting the updated dissolution condition of Apremilast tablet as specified in the dissolution database of USFDA.	Firm replied that the product is also tested by adopting updated dissolution conditions of Apremilast tablet as specified in the dissolution database of USFDA and found complies, result for the same along with chromatogram is attached.
2.	**3.2.P.7**	Please submit the revised packaging presentation of combo pack in compliance of decision of 321st meeting of Registration Board related	Firm submit the **primary packaging presentation for 14 days starter pack** i.e. 01 alu-PVDC blister 13 tablets (04 tablets of Apremilast 10mg, 04 tablets of Apremilast 20mg

		to presentation/pack size of Apremilast tablet.	and 05 tablets of Apremilast 30mg) and 01 Alu-pvdc blister of 14 tablets of Apremilast 30mg, both the blisters placed in their respective pouch (secondary packaging). **Primary Packaging presentation of 28 days starter pack:** Primary packaging presentation for 14 days starter pack i.e. 01 alu-PVDC blister 13 tablets (04 tablets of Apremilast 10mg, 04 tablets of Apremilast 20mg and 05 tablets of Apremilast 30mg) and 03 Alu-pvdc blister of 14 tablets of Apremilast 30mg both the blisters placed in their respective pouch (secondary packaging).

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Registration letter will be issued upon confirmation of availability of "Co-blistering" facility.

961. **Export Facilitation:** Applications was received through letter No.F.1-6/2019-PR-I (EFD) "M/s. SAMI Pharmaceuticals (Pvt.) Ltd. have achieved benchmark OF USD 1596135.35 as defined in the Board's decision during fiscal year 2020-2021. In this regard, please find the (1 molecule) 02 products applications submitted by the firm."

Dy. No. and date of submission	Dy.no. 31975 dated 04/11/2022
Details of fee submitted	PKR 30,000/-: dated 29/08/2022
The proposed proprietary name / brand name	**ONDIS 4mg/2ml Injection**
Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 2ml contains: Ondansetron Hydrochloride USP equivalent to Ondansetron…… 4mg USP specs
Pharmaceutical form of applied drug	Clear, colorless solution for injection
Pharmacotherapeutic Group of (API)	Antiemetic and Serotonin (5HT3) antagonists
Reference to Finished product specifications	USP
Proposed Pack size	1's & 5's
Proposed unit price	As per SRO
The status in reference regulatory authorities	Zofran Injection 4mg/2ml by Novartis Pharma UK Ltd
For generic drugs (me-too status)	Zofran Injection 4mg/2ml by Novartis Pharma (Pakistan) Ltd, Regn. no. 052259
GMP status of the Finished product manufacturer	GMP certificate issue date 03-08-2022
Name and address of API manufacturer.	**Cadila Pharmaceuticals Limited.** 294, G.I.D.C. Estate Ankleshwar - 393 002 .Gujarat, INDIA

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurity and related substances, specifications, analytical procedures and its Verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 75% ± 5%RH for 36 Months Batches: (17OS001, 17OS002) Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (15OS003, 15OS004, 15OS005) Declaration regarding stability study data is provided in dossier
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator product i.e. **ZOFRAN Injection 4mg/2ml** by **M/s. Novartis Pharma (Pak) Ltd** by performing quality tests (Appearance, Clarity, Identification, Assay, pH, Osmolarity, Wt/ml, Extractible volume, Chromatographic impurities, Sterility, Particulate Matter and Bacterial Endotoxin Test).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, accuracy, precision including repeatability & specificity.

STABILITY STUDY DATA

Manufacturer of API	**Cadila Pharmaceuticals Limited.** 294, G.I.D.C. Estate Ankleshwar - 393 002 .Gujarat, INDIA		
API Lot No.	20OS001		
Description of Pack (Container closure system)	Unprinted clear Ampoules 3ml USP Type-I		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Lab-16	Lab-17	Lab-18

Batch Size	1.700 L	1.700 L	1.700 L
Manufacturing Date	Nov 2021	Nov 2021	Nov 2021
Date of Initiation	Dec 2021	Dec 2021	Dec 2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Reference of our last onsite panel inspection for instant dosage form conducted during last two years i.e. IBRUO (Ibuprofen) 800mg/100 ml injection which was presented in 289th meeting of the registration board & hence approved & registered by registration board Date of inspection: 28th January 2019. The inspection report confirms following points • The HPLC software is 21CFR Compliant. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 21102987 issued by FOOD AND DRUGS CONTROL ADMINISTRATION Gujarat State valid till 20/10/2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Detail of loan material (200gm of Ondansetron HCl) from M/s Indus Pharma (Pvt.) Ltd. of the lot supplied by M/s. Cadila Pharmaceuticals Pvt Limited under their invoice no. 3202040403 dated 10-07-2020 attested by AD (I&E), Karachi dated 19-08-2020. (MOU regarding procuring material on loan provided in dossier)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC for all test intervals.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	**3.2. S.4.2**	According to the USP monograph of ondansetron water content limit is NMT 3.0%, justify for keeping the acceptance limit of water content between 9.0 to 10.5% for drug substance complying USP specification.	Firm reply that "In the USP, there are two separate monographs for ondansetron i.e., Ondansetron and Ondansetron HCl. According to the USP monograph of ondansetron water content limit is **NMT 3.0%** Whereas for Ondansetron HCl water content between **9.0% to 10.5%** We have used Ondansetron HCl in our formulation same as of Innovator products i.e. ZOFRAN, approved by USFDA. We have claimed the same API in our Invoice, label claim, BPIs, SPTM & Stability Sheets as well. Hence we comply with USP monograph.

2.	**3.2.S.7**	Submit stability data of three batches of drug substance performed at long term stability conditions.	Firm submit stability data with the statement that "We have submitted Long Term stability data of 36 month on zone IV-B 30 ±2ºC, 75 ±5% RH for batches 17OS001 and 17OS002 in dossier along with a declaration by M/s. Cadila Pharmaceutical that they will charge third batch on stability: • As per their Stability intimation sheet third batch was charged on stability on August 2022, • 3rd month stability result of third batch was found satisfactory is now attached. • 6th month stability data due on 3 March 2023 which is under analysis and will be shared by supplier after necessary testing."

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. MH/102854 issued by CFDA valid till 31/12/2023 submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of ADC approved invoice No.F30000001207, dated 03-12-2020 for 2.0 Kg Desloratadine imported from Glenmark Life Sciences Limited, cleared from DRAP office dated 18-12-2020 submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Stability studies data, supported with Chromatograms and raw data sheets for three batches i.e. 21CT04, 21CT05 and 21CT06 is submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	HPLC software is 21CFR complaint & complete audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers is submitted

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	**3.2. S.4.3**	Provide analytical Method verification studies including specificity, accuracy and repeatability parameter of drug substance performed by the Drug Product manufacturer.
2.	**3.2.S.4.4**	Provide COA of drug substance by drug substance manufacturer.
3.	**3.2.S.5**	Submit COA of reference/working standard which was used by drug product manufacturer for analysis of API.
4.	**3.2.P.1**	• Provide compatibility studies of the Drug Substance(s) with excipients as the qualitative composition of the formulation is not similar to innovator / reference product. • Formulation contain preservative **sodium benzoate**, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit. • Justify the use of saccharin in the syrup formulation, since the review document of reference product approve in EMA clearly mentioned that *saccharin was not found acceptable from peadriatic point of view*.
5.	**3.2.P.2**	Submit data of Pharmaceutical equivalence of the applied drug shall be established with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed
6.	**3.2. P.4**	Submit the analysis report/COA of excipients propylene glycol, sorbitol and glycerine, which includes the results of impurity testing related to the presence of ethylene glycol and diethylene glycol, in compliance of notification issued by DRAP vide No. F.6-30/2022-QA dated 21-10-2022.
7.	**3.2.P.5.1**	• According to the review literature of reference product approved in ema stability of active substance is demonstrated to be optimal in a solution with a pH between 5 and 6, Justify for keeping the pH acceptance limit between 4-5.5 when the stability of drug substance is optimized in the solution with a pH between 5 and 6.

		• Justify for not including the test of extractable volume and microbial content test in the finished product specification , since these tests are recommended by the pharmacopeias in their general chapter for oral solution preparation.
8.	**2.3. R.1.1**	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Previously deferred cases of form 5-F:

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	**1.5.9**	Submit regulatory status of approval of applied formulation by reference regulatory authority by way of routine procedure of market authorisation.
2.	**3.2.S.7**	Submit complete stability data of drug substance till the claimed retest date as per zone IV-a conditions.
3.	**3.2.P.2.2.1**	Justify for not performing the comparative study against the innovator product i.e.Lagevrio capsule 200mg.
4.	**3.2.P.5.4**	Justify for selecting 0.1N HCL as a dissolution medium ,when the drug dissolution behavior was similar in all three dissolution mediums as per the comparative dissolution profile submitted in section 3.2.P.2.2.1.
5.	**3.2.P.8**	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.
6.	**2.3. R.1.1**	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.

Decision of 324th meeting of Registration Board:

Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	**1.5.9**	Submit regulatory status of approval of applied formulation by reference regulatory authority by way of routine procedure of market authorisation.	Firm replied that "The European Medicines Agency (EMA) supports the development of medicines that address unmet medical needs. In the interest of public health, applicants may be granted a conditional marketing authorisation for such medicines on less comprehensive clinical data than normally required, where the benefit of immediate availability of the medicine outweighs the risk inherent in the fact that additional data are still required. Its use is also intended for a public health emergency (e.g. a pandemic).

			The approval of Lagevrio is a routine procedure considering the pandemic situation".
2.	**3.2.S.7**	Submit complete stability data of drug substance till the claimed retest date as per zone IV-a conditions.	Firm submit the real time stability data of 18 months while the submitted stability summary sheet revealed that the claimed re-test period is till 60 months.
3.	**3.2.P.2.2.1**	Justify for not performing the comparative study against the innovator product i.e. Lagevrio capsule 200mg.	Firm replied that License agreement between Optimus Pharma Pvt Ltd. & Medicine Patent Pool in which MSD grant the rights to sublicense certain Patents in furtherance of its policy of improving access to COVID-19 medicines is **attached as Annex-2**, that's why CDP is performed against the Optimus Product.
4.	**3.2.P.5.4**	Justify for selecting 0.1N HCL as a dissolution medium ,when the drug dissolution behaviour was similar in all three dissolution mediums as per the comparative dissolution profile submitted in section 3.2.P.2.2.1.	Firm replied that "as per US-FDA, "Dissolution Testing and Acceptance Criteria for Immediate-Release Solid Oral Dosage Form Drug Products Containing High Solubility Drug Substances" which recommends paddle method with 0.1N HCl as dissolution medium, that's why we select 0.1N HCl as dissolution medium." However, the reference guidance document of USFDA does not recommend any specific medium for capsule as depicted from the below statement of said guidelines "*The volume of the dissolution medium is generally 500, 900, or 1000 mL. Sink conditions are desirable but not mandatory. An aqueous medium with pH range 1.2 to 6.8 (ionic strength of buffers the same as in USP) should be used. To simulate intestinal fluid (SIF), a dissolution medium of pH 6.8 should be employed. A higher pH should be justified on a case-by-case basis and, in general, should not exceed pH 8.0. To simulate gastric fluid (SGF), a dissolution medium of pH 1.2 should be employed without enzymes. The need for enzymes in SGF and SIF should be evaluated on a case-by-case basis and should be justified. Recent experience with gelatin capsule products indicates the possible need for enzymes (pepsin with SGF and pancreatin with SIF) to dissolve pellicles, if formed, to permit the dissolution of the drug."*
5.	**3.2.P.8**	Submit the remaining stability data of drug product ,since you have submitted only three month stability data.	Firm submit the updated stability data of drug product i.e. of 6 months.
6.	**2.3. R.1.1**	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which	Submitted

		stability studies data is provided in Module 3 section 3.2. P.8.	

Decision: Deferred for regulatory status of approval of applied formulation by reference regulatory authority by way of routine procedure of market authorization.

Date of Initiation	12-2020	12-2020	12-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**M/s Zhejiang Huahai Pharmaceutical Co. Ltd China:** GMP Certificate No 201907047 issued by CFDA valid till 15-1-2023. **M/s Prudence Pharmachem:** GMP Certificate No S-GMP & GLP/22053332 issued by Food & Drug Control Administration Gujrat India valid till 26-05-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**M/s Zhejiang Huahai Pharmaceutical Co. Ltd China:** ADC Invoice No: HH20201167, 03-June-2020 is submitted wherein the permission to import API (Candesartan) for the purpose of test/analysis and stability studies is granted. **M/s Prudence Pharmachem:** ADC Invoice No: PPC/030/20-21, 30-May-2020 is submitted wherein the permission to import API (Amlodipine) for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	**Sections**	**Observations/Deficiencies/ Short-comings**	**Response of the Firm**
1.	**3.2.S.4.2 (Candesartan Cilexetil)**	Analytical procedure given in section 3.2.S.4.2 exhibited the assay method via HPLC while the assay method which has verified in section 3.2.S.4.3 performed via titration method, clarification is required in this regard.	Firm replied that, to address above mentioned query, we have revised the analytical procedure of Candesartan Cilexetil as per USP monograph and method verification has also been performed accordingly via HPLC
2.	**3.2.P.1**	Composition of applied product submitted in respective section is not qualitatively similar to the composition of innovator product, so, in this case please submit the compatibility study of active with the excipients.	Submitted
3.	**3.2.P.1**	Justify the quantity of amlodipine besylate used in the composition of applied product i.e. 7mg comparing the quantity mentioned in the	Firm replied that amlodipine besylate 6.93mg is equivalent to about 5mg of amlodipine as per innovator product. The

		composition of reference product i.e.6.93mg.	concentration of API 7mg is used in master formulation as 6.93 values are rounded off to 7mg.
4.	**3.2.P.2.2.1**	Justify for not performing all the quality test mentioned in specification of finished product while establishing the pharmaceutical against reference product.	Firm replied that Only significant quality tests including assay and dissolution were performed for establishing pharmaceutical equivalence. Other less critical tests including disintegration and average weight tests were not performed at this stage.
5.	**3.2.P.5.1**	Justify for not including loss on drying/water determination test in the specification of finished product.	Firm replied that "As loss on drying/water determination is not included in USP monographs of both Candesartan Cilexetil Tablets and Amlodipine Tablets and proposed packing of product is alu-alu blister , therefore, these tests not included in the specification of finished product".
6.	**3.2.P.5.2**	Scientific justification for setting the UV detector limit at 238nm, since the USP recommended the UV detection limit at 282nm for candesartan cilexetil both in individual and in combination product.	Firm replied that "With respect to selection of 238nm wavelength, please note that combination product having candesartan and Amlodipine is not present in USP, therefore, if we followed individual monographs of Candesartan and Amlodipine product as per USP monograph, we need to perform testing for both API is using different HPLC procedures which was more time consuming. To resolve this Issue, we followed a research article to develop and validate the analytical procedure for simultaneous determination of candesartan and Amlodipine via HPLC using 238nm wavelength".
7.	**3.2.P.5.2**	Justify the selection of Buffer pH 6.8 medium for dissolution from the international literature and pharmacoepial reference, further provide the percentile quantity of polysorbate 80 used in the dissolution medium.	Firm replied that "Preparation of buffer solution for dissolution test has been taken form USP monograph of candesartan Cilexetil Tablets and polysorbate 20 is used as per USP monograph which is mentioned in provided finished product testing method. However, as this product is a non-pharmacopeial product and according to CDP study against comparator product, dissolution results found comparable with comparator product in pH 6.8 buffer, therefore, we selected pH 6.8 for release testing as well".
8.	**3.2.P.8**	Justify for using different method for preparation of sample solution as evident from the raw data sheet from that specified in analytical	Firm replied that "Deviation from specified analytical procedure only observed in initial testing of product because at this stage

		procedure given in section 3.2. P.5.2.	method has been developed and under review if required any improvement. Once method has been finalized including method of preparation of sample solution, no deviation was observed from 3rd. month stability data".
9.	**3.2.P.8**	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted
10.	**3.2.P.8**	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted

Decision of 324th meeting of Registration Board:

Deferred for submission of scientific justification for:

- Applying different analytical procedure for the drug substance of "Candesartan cilexetil" analysis than that recommended by the USP monograph.
- Applied wavelength for Assay analysis of drug product in deviation to that recommended by pharmacopoeial monographs for candesartan cilexetil formulations.

Response of the Firm:

Applying different analytical procedure for the drug substance of "Candesartan cilexetil" analysis than that recommended by the USP monograph.

Firm replied that they have re-evaluated their method and revised it according to the current Candesartan cilexetil monograph of USP and a revised analytical procedure and verification report submitted accordingly.

Applied wavelength for Assay analysis of drug product in deviation to that recommended by pharmacopoeial monographs for candesartan cilexetil formulations.

Firm replied that "With respect to selection of 238nm wavelength, the combination of Amlodipine and candesartan cilexetil is not present in USP pharmacopeia, therefore if we allow individual monographs of candesartan and amlodipine products as per USP monograph, we need to perform testing for both APIs using different HPLC procedures. To resolve this issue, we followed a research article to develop and validate the analytical procedure for simultaneous determination of candesartan and amlodipine via HPLC using 238nm wavelength and according to this peaks of both APIs are well separated and no issue in quantification of both APIs.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: **(Candesartan Cilexetil)** Real time: 30°C ± 2°C / 75% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: 5258-12-208,5258-12-209,5258-12-210 Stability study conditions: **(Amlodipine Besylate)** Real time: 30°C ± 2°C / 65% ± 5%RH for 60 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: AMB/002/01/14,AMB/003/02/14,AMB/004/02/14

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Innovator product Unisia Tablet 8mg + 5mg Tablet (Innovator product) PMDA Japan by performing quality tests (Identification, Assay, Dissolution). CDP has been performed against the same brand that is Innovator product Unisia Tablet 8mg + 5mg Tablet (Innovator product) PMDA Japan, Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	**Candesartan:** M/s Zhejiang Huahai Pharmaceutical Co., Ltd.-Xunqiao site Xuqiao, Linhai, Zhejiang 317024, China. **Amlodipine:** M/s Prudence Pharmachem, Gujarat (India)		
API Lot No.	**Candesartan:** 5668-19-508 **Amlodipine:** AMB/111/05/20		
Description of Pack (Container closure system)	Aluminum and Cold forming foil (CFF) which are sealed together and packed in Unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months

Batch No.	T-01	T-02	T-03
Batch Size	10000 Tablets	10000 Tablets	10000 Tablets
Manufacturing Date	08-2020	08-2020	08-2020
Date of Initiation	12-2020	12-2020	12-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**M/s Zhejiang Huahai Pharmaceutical Co. Ltd China:** GMP Certificate No 201907047 issued by CFDA valid till 15-1-2023 **M/s Prudence Pharmachem:** GMP Certificate No S-GMP & GLP/22053332 issued by Food & Drug Control Administration Gujrat India valid till 26-05-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**M/s Zhejiang Huahai Pharmaceutical Co. Ltd China:** ADC Invoice No: HH20201167, 03-June-2020 is submitted wherein the permission to import API (Candesartan) for the purpose of test/analysis and stability studies is granted. **M/s Prudence Pharmachem:** ADC Invoice No: PPC/030/20-21, 30-May-2020 is submitted wherein the

		permission to import API (Amlodipine) for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	**Sections**	**Observations/Deficiencies/ Short-comings**	**Response of the Firm**
1.	**3.2.S.4.2 (Candesartan Cilexetil)**	Analytical procedure given in section 3.2.S.4.2 exhibited the assay method via HPLC while the assay method which has verified in section 3.2.S.4.3 performed via titration method, clarification is required in this regard.	Firm replied that, to address above mentioned query, we have revised the analytical procedure of Candesartan Cilexetil as per USP monograph and method verification has also been performed accordingly via HPLC
2.	**3.2.P.1**	Composition of applied product submitted in respective section is not qualitatively similar to the composition of innovator product, so, in this case please submit the compatibility study of active with the excipients.	Submitted
3.	**3.2.P.1**	Justify the quantity of amlodipine besylate used in the composition of applied product i.e. 7mg comparing the quantity mentioned in the composition of reference product i.e.6.93mg.	Firm replied that amlodipine besylate 6.93mg is equivalent to about 5mg of amlodipine as per innovator product. The concentration of API 7mg is used in master formulation as 6.93 values are rounded off to 7mg.
4.	**3.2.P.2.2.1**	Justify for not performing all the quality test mentioned in specification of finished product while establishing the pharmaceutical against reference product.	Firm replied that Only significant quality tests including assay and dissolution were performed for establishing pharmaceutical equivalence. Other less critical tests including disintegration and average weight tests were not performed at this stage.
5.	**3.2.P.5.1**	Justify for not including loss on drying/water determination test in the specification of finished product.	Firm replied that "As loss on drying/water determination is not included in USP monographs of both Candesartan Cilexetil Tablets and Amlodipine Tablets and proposed packing of product is alu-alu blister , therefore, these tests not included in the specification of finished product".
6.	**3.2.P.5.2**	Scientific justification for setting the UV detector limit at 238nm, since the USP recommended the UV detection limit at 282nm for candesartan cilexetil both in individual and in combination product.	Firm replied that "With respect to selection of 238nm wavelength, please note that combination product having candesartan and Amlodipine is not present in USP, therefore, if we followed individual monographs of Candesartan and Amlodipine product as per USP

			monograph, we need to perform testing for both API is using different HPLC procedures which was more time consuming. To resolve this Issue, we followed a research article to develop and validate the analytical procedure for simultaneous determination of candesartan and Amlodipine via HPLC using 238nm wavelength".
7.	**3.2.P.5.2**	Justify the selection of Buffer pH 6.8 medium for dissolution from the international literature and pharmacoepial reference, further provide the percentile quantity of polysorbate 80 used in the dissolution medium.	Firm replied that "Preparation of buffer solution for dissolution test has been taken form USP monograph of candesartan Cilexetil Tablets and polysorbate 20 is used as per USP monograph which is mentioned in provided finished product testing method. However, as this product is a non-pharmacopeial product and according to CDP study against comparator product, dissolution results found comparable with comparator product in pH 6.8 buffer, therefore, we selected pH 6.8 for release testing as well".
8.	**3.2.P.8**	Justify for using different method for preparation of sample solution as evident from the raw data sheet from that specified in analytical procedure given in section 3.2. P.5.2.	Firm replied that "Deviation from specified analytical procedure only observed in initial testing of product because at this stage method has been developed and under review if required any improvement. Once method has been finalized including method of preparation of sample solution, no deviation was observed from 3rd. month stability data".
9.	**3.2.P.8**	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted
10.	**3.2.P.8**	Documents for the procurement of API with approval from DRAP (in case of import).	Submitted

Decision of 324th meeting of Registration Board:

Deferred for submission of scientific justification for:

- Applying different analytical procedure for the drug substance of "Candesartan cilexetil" analysis than that recommended by the USP monograph.
- Applied wavelength for Assay analysis of drug product in deviation to that recommended by pharmacopoeial monographs for Candesartan cilexetil formulations.

Response of the Firm:

Applying different analytical procedure for the drug substance of "Candesartan cilexetil" analysis than that recommended by the USP monograph.

Firm replied that they have re-evaluated their method and revised it according to the current Candesartan cilexetil monograph of USP and a revised analytical procedure and verification report submitted accordingly.

Applied wavelength for Assay analysis of drug product in deviation to that recommended by pharmacopoeial monographs for candesartan cilexetil formulations.

Firm replied that "With respect to selection of 238nm wavelength, the combination of Amlodipine and candesartan cilexetil is not present in USP pharmacopeia, therefore if we allow individual monographs of candesartan and amlodipine products as per USP monograph, we need to perform testing for both APIs using different HPLC procedures. To resolve this issue, we followed a research article to develop and validate the analytical procedure for simultaneous determination of candesartan and amlodipine via HPLC

using 238nm wavelength and according to this peaks of both APIs are well separated and no issue in quantification of both APIs.
Decision: Approved. **• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** **• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Local manufacturing applications of priority categories defined by Registration Board in its 257th meeting

967.	Name, address of Applicant / Marketing Authorization Holder	M/s CCL Pharma Private Limited, Plot No 62 Quaid e Azam Industrial Estate, Lahore

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.4	Justify for not including the test of particle size (laser diffraction) and steroisomeric purity (Chiral HPLC) in the release specification of drug substance since these tests are included in the specification of drug substance by innovator brand.	As per FDA chemistry review, particle size is not included in the drug substance specification. For purity, Drug substance and Drug product manufacturer have performed Assay by HPLC and Impurites testing for ensuring the quality. However, in the public assessment report of EMA approved innovator brand both of these test is included in the release specification of drug substance. Further, the drug substance used in applied formulation is different from the drug substance of innovator brand as evident from the chemical structure given in section 3.2.S.1.
2.	3.2.S.4.4	According drug substance documents α polymorphic form of drug substance is supplied by drug substance manufacturer while the review literature of innovator products reveal that Polymorphic form-I is the only non-solvated, crystalline form of the active substance which has been used in the formulation of innovator product, clarification is required either the Form α is similar to	Firm replied that "It is the same form, only notation is different i.e., Form 1 or Form Alpha".

		polymorphic Form-I of eluxadoline.	
3.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.	Submitted
4.	3.2.S.7	Justify for not including water content, stereoisomeric purity in the shelf life specification of the drug substance, since these tests are included in the shelf life specification of drug substance of innovator brand.	Firm replied that The API manufacturer (Vendor) claims that loss on drying test was run to determine the water content, in line with the instructions provided in the drug master file. For purity, Drug substance and Drug product manufacturer have performed Assay by HPLC and Impurites testing for ensuring the quality. Impurities testing mentioned in the stability data is not related to the chiral impurity testing of drug substance.
5.	3.2.S.7	Provide complete stability data of drug substance performed at both accelerated and long term condition till the claimed re-test date, since you have submitted real time data of only 12 month time period.	Submitted
6.	3.2.P.8	Justify for not including the test of water content and chiral purity in the shelf life specification of drug product ,since both of these critical test are included in the shelf life specification of innovator product.	As per US-FDA chemistry review, Life cycle management, these tests are not included in the Critical Quality Attributes. However, the tests are the part of shelf life specification of innovator brand as per the review literature.

Indication:
VIBERZI is a mu-opioid receptor agonist, indicated in adults for the treatment of irritable bowel syndrome with diarrhoea (IBS-D).
DOSAGE AND ADMINISTRATION
The recommended dosage in adults is 100 mg twice daily taken with food.
The recommended dosage is 75 mg twice daily taken with food in patients
who do not have a gallbladder
are unable to tolerate the 100 mg dose
are receiving concomitant OATP1B1 inhibitors
have mild or moderate hepatic impairment
Discontinue VIBERZI in patients who develop severe constipation for more than 4 days.
If a dose is missed, take the next dose at the regular time; do not take 2 doses at once.

Decision of 324th meeting of Registration Board:
Deferred for scientific justification for following along with documented evidence:

- Variation of the chemical structure of the drug substance, as evident from section 3.2.S.1, from that of the innovator.
- According drug substance documents α polymorphic form of drug substance is supplied by drug substance manufacturer while the review literature of innovator products reveal that Polymorphic form-I is the only non-solvated, crystalline form of the active substance which has been used in the formulation of innovator product, clarification is required either the Form α is similar to polymorphic Form-I of Eluxadoline.

Response of the Firm:
Variation of the chemical structure of the drug substance, as evident from section 3.2.S.1, from that of the innovator.

Firm submitted the declaration from API Manufacturer in which they declare that they manufactured Eluxadoline Form-I same as innovator and specify the chemical structure which is similar to innovator brand.
However, the firm did not submit any clarification/correct document regarding the chemical structure previously submitted in section 3.2.S. which was similar to innovator product.
Full chemical name mentioned in the review literature of innovator product:
5-[[[(2S)-2-amino-3- [4-(amino carbonyl)-2,6-dimethylphenyl]-1- oxopropyl] [(1S)-1-(4-phenyl-1H-imidazol-2-yl) ethyl] amino] methyl]-2-methoxybenzoic acid.
Full chemical name mentioned in the section 3.2.S.1 section of previously submitted dossier:
5-[[[(2S)-2-amino-3- [4-(amino carbonyl)-2,6-dimethylphenyl]-1- oxopropyl] [(1S)-1-(5-phenyl-1H-imidazol-2-yl) ethyl] amino] methyl]-2-methoxybenzoic acid.

According drug substance documents α polymorphic form of drug substance is supplied by drug substance manufacturer while the review literature of innovator products reveals that Polymorphic Form-I is the only non-solvated, crystalline form of the active substance which has been used in the formulation of innovator product, clarification is required either the Form α is similar to polymorphic Form-I of Eluxadoline.
Firm replied that API manufacturer declared that "they undertake that polymorphic form α is form I only the notation is different, in China they write form I as form α.

Decision: Deferred for submission of open part of Drug Master File from API Manufacturer which confirms the chemical name and structure of drug substance.

3.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.	Submitted
4.	3.2.S.7	Justify for not including water content, stereo isomeric purity in the shelf life specification of the drug substance, since these tests are included in the shelf life specification of drug substance of innovator brand.	Firm replied that The API manufacturer (Vendor) claims that loss on drying test was run to determine the water content, in line with the instructions provided in the drug master file. For purity, Drug substance and Drug product manufacturer have performed Assay by HPLC and Impurities testing for ensuring the quality. Impurities testing mentioned in the stability data is not related to the chiral impurity testing of drug substance.
5.	3.2.S.7	Provide complete stability data of drug substance performed at both accelerated and long term condition till the claimed re-test date, since you have submitted real time data of only 12 month time period.	Submitted
6.	3.2.P.8	Justify for not including the test of water content and chiral purity in the shelf life specification of drug product ,since both of these critical test are included in the shelf life specification of innovator product.	As per US-FDA chemistry review, Life cycle management, these tests are not included in the Critical Quality Attributes. However, the tests are the part of shelf life specification of innovator brand as per the review literature.

Decision of 324th meeting of Registration Board:

Deferred for scientific justification for following along with documented evidence:

- Variation of the chemical structure of the drug substance, as evident from section 3.2.S.1, from that of the innovator.
- According to drug substance documents α polymorphic form of drug substance is supplied by drug substance manufacturer while the review literature of innovator products reveal that Polymorphic form-I is the only non-solvated, crystalline form of the active substance which has been used in the formulation of innovator product, clarification is required either the Form α is similar to polymorphic Form-I of Eluxadoline.

Response of the Firm:

Variation of the chemical structure of the drug substance, as evident from section 3.2.S.1, from that of the innovator.

Firm submitted the declaration from API Manufacturer in which they declare that they manufactured Eluxadoline Form-I same as innovator and specify the chemical structure which is similar to innovator brand.
However, the firm did not submit any clarification/correct document regarding the chemical structure previously submitted in section 3.2.S. which was similar to innovator product.
Full chemical name mentioned in the review literature of innovator product:
5-[[[(2S)-2-amino-3- [4-(amino carbonyl)-2,6-dimethylphenyl]-1- oxopropyl] [(1S)-1-(4-phenyl-1H-imidazol-2-yl) ethyl] amino] methyl]-2-methoxybenzoic acid.
Full chemical name mentioned in the section 3.2.S.1 section of previously submitted dossier:
5-[[[(2S)-2-amino-3- [4-(amino carbonyl)-2,6-dimethylphenyl]-1- oxopropyl] [(1S)-1-(5-phenyl-1H-imidazol-2-yl) ethyl] amino] methyl]-2-methoxybenzoic acid.

According drug substance documents α polymorphic form of drug substance is supplied by drug substance manufacturer while the review literature of innovator products reveals that Polymorphic Form-I is the only non-solvated, crystalline form of the active substance which has been used in the formulation of innovator product, clarification is required either the Form α is similar to polymorphic Form-I of Eluxadoline.
Firm replied that API manufacturer declared that "they undertake that polymorphic form α is form I only the notation is different, in China they write form I as form α.

Decision: Deferred for submission of open part of Drug Master File from API Manufacturer which confirms the chemical name and structure of drug substance.

Agenda of Evaluator PEC-XX

A) Registration applications of newly granted DML or New section (Human)

New DML:

1) M/s Carer pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat Islamabad, CLB in its 278th meeting held on 10th and 11th December 2020, has considered and approved the grant of DML with following three sections:

- **Tablet (General) section.**
- **Capsule (General) section.**
- **Dry Powder Suspension (General) section.**
- **Sachet (General) section.**
- **Ampoule (General) section.**

969.	Name, address of Applicant / Marketing Authorization Holder	M/s Carer pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat
	Name, address of Manufacturing site.	M/s Carer pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 33964 dated 24/11/2022
	Details of fee submitted	PKR 30,000/- dated 21/11/2022
	The proposed proprietary name / brand name	**Caremont 10 mg tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Montelukast as sodium……10 mg

	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonist
	Reference to Finished product specifications	USP
	Proposed Pack size	1x14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Accord Healthcare Limited United Kingdom **MHRA** Approved
	For generic drugs (me-too status)	M/s Sami Pharma **Brand Name & Strength**: Montika 10mg Film coated Tablet **Registration Number**: 035561.
	GMP status of the Finished product manufacturer	New license granted on 18/03/2021 Tablet (General) section was approved.
	Name and address of API manufacturer.	M/s Metrochem API Private Limited Unit-I Plot No 62/C/6, Pipeline Road, Phase-I, I.D.A. Jeedimetla, Quthbullapur (M), Medchal-malkajgiri (Dist), Telangana (State), India, Jeedimetla - Phase I&II (V), Quthbullapur(M), Medchal – Malkajgiri (Dist.)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances (specified & unspecified), analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: MLS-F # 001/16 MLS-F # 002/16 MLS-F # 003/16
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence and comparative dissolution profile was performed against **Montika 10 mg Tablet** by SAMI Pharma. Quality parameters were studied such as identification, uniformity of dosage, dissolution test and Assay. CDP was performed against same brand in Acid media (pH 1.0-1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Metrochem API Private Limited Unit-I Plot No 62/C/6, Pipeline Road, Phase-I, I.D.A. Jeedimetla, Quthbullapur (M), Medchal-malkajgiri (Dist), Telangana (State), India, Jeedimetla - Phase I&II (V), Quthbullapur(M), Medchal – Malkajgiri (Dist.)		
API Lot No.	MKS/2107023		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (14's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	1000 tab	1000 tab	1000 tab
Manufacturing Date	09-2021	09-2021	09-2021
Date of Initiation	09-2021	09-2021	09-2021
No. of Batches	03		

Administrative Portion		
13.	Reference of previous approval of applications with stability study data of the firm (if any)	Provided
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. L.DIS.No. 4084/A3/2019 dated 20.05.2020 issued by DCA(Drug control administration) Telangana, India valid till 20/05/2023.
15.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Invoice No AE/21-22/0172 DATE 21.07.2021 confirming import of Montelukast sodium 5gm Batch No MKS/2107023. Approval from DRAP is required.

16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
18.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of Assessor (DD PEC-XX): **2.3.S.3.1& 3.2.S.3** Elucidation of Structure and other Characteristics of Drug Substance has not been Provided. **3.2.S.4** Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided **3.2.S.4** Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer. **3.2.P.2** Batch no of innovator product and test product has not been mentioned under CDP. **3.2.P.8** Documents for the procurement of API (approval from DRAP) to be submitted. **3.2.P.8** Compliance Record of HPLC software 21CFR & audit trail reports is not submitted		
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.		
970.	Name, address of Applicant / Marketing Authorization Holder	M/s Carer pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. ZJ20180077 dated 24.07.2018 issued by China Food and Drug Administration valid till 23/07/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Invoice No F2020442 Dated 17.12.2020 confirming import of Vitamin D3 40MIU 3kg Batch No 01201203VD **in the name of M/s Amaan pharma,** Lahore. Approved from DRAP Lahore dated 05.01.2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor:

Excipient/diluent used in formulation was Crodamol oil (medium chain triglyceride) as per innovator product.

Sterilization was performed via membrane filtration (0.2 µm)

Observations:

Sr.#	Observation	Reply	Remarks
1.	The applied finished product specification is USP while instant formulation is not available in USP/BP or any other official monograph**.** Applied formulation to be corrected "as per innovator specification" along with fee (Rs 7500/-)	Finished product of applied formulation has been corrected "as per innovator specification" along with fee (Rs 7500/-) dated 07.03.2023.	Complied
2.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided.	Analytical Method Verification studies have been provided by Drug Product manufacturer	Complied
3.	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.	Detailed analytical procedures for the testing of drug substance provided by Drug product manufacturer.	Complied
4.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability	CoA of Drug Substance has been provided from both DS manufacturer as well as Drug product manufacturer Batch No **01201203VD**	Complied

	studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.		
5.	Stability data of Drug substance submitted with conditions such as: Real time: 5˚C ± 3˚**C** for 36 months Accelerated: 25˚C ± 2˚C / 60% ± 5%RH for 6 months The above mentioned conditions need to be justified or submit data as per zone IV-A**.**	Not provided Stability data for all three batches 200902181A, 200902171A and 200902161A has to be provided as per zone IV-A**.** Or Justify the conditions that have been mentioned.	Storage condition of Cholecalciferol has been verified from BP (2022) wherein refrigerated condition has been mentioned. Hence stability condition is justified.
6.	Batch no of innovator product and test product has not been mentioned under pharmaceutical equivalence study.	Not provided	Not complied
7.	Documents for the procurement of API submitted wherein name of firm was mentioned as **M/s Amaan pharma, Lahore.** Clarify it or submit loan agreement for purchase of API from M/s Amaan pharma, Lahore.	Loan agreement for purchase of API from M/s Amaan pharma, Lahore has been submitted dated 09.04.2022.	Complied
8.	Compliance Record of HPLC software 21CFR & audit trail reports is not submitted	Not provided	Not complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Before issuance of registration letter firm shall submit Batch no of innovator product and test product used for performing pharmaceutical equivalence study.**

973.	Name, address of Applicant / Marketing Authorization Holder	M/s Carer pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat

	Details of fee submitted	PKR 30,000/-: dated 07/12/2022

	The proposed proprietary name / brand name	**Cobal injection 500mcg/ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 1 ml ampoule contains: Mecobalamin…….500mcg
	Pharmaceutical form of applied drug	Sterile solution for I.V/I.M use
	Pharmacotherapeutic Group of (API)	B03BA05 - Mecobalamin ; Belongs to the class of Vitamin B12 (cyanocobalamin and analogues).
	Reference to Finished product specifications	BP
	Proposed Pack size	10's , 5s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Methycobal Injection PMDA (Japan) approved
	For generic drugs (me-too status)	**Brand Name & Strength**: Methycobal (by Hilton pharma Karachi) 500mcg/ml **Registration Number**: 010313.
	GMP status of the Finished product manufacturer	New license granted on 18/03/2021 Ampoule (General) section is approved.
	Name and address of API manufacturer.	M/s Mahima Lifesciences (Pvt) Ltd B.S.T road , Ganaur District Sonepat, Haryana, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Mecobalamin (Drug substance) is present in JP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities (individual and total), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: MLMCB-361113 MLMCB-381113 MLMCB-391213
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical

		procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence against Methycobal 500mcg/ml injection by M/s Hilton pharma karachi (Batch No 143800). Quality parameters studied were appearance, identification, sterility, Endotoxin, pH and Assay were studied.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Mahima Lifesciences (Pvt) Ltd B.S.T road , Ganaur District Sonepat, Haryana, India		
API Lot No.	Not provided		
Description of Pack (Container closure system)	USP Type 1 glass ampoule, packed in Unit Carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	2500 ampoules	2500 ampoules	2500 ampoules
Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	10-05-2022	10-05-2022	10-05-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 12/55-2 Drugs1-2020/7030 dated 26.10.2020 issued by Food and Drug Administration, Haryana Panchkula **valid till 12/09/2022.**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Remarks of Assessor (DD PEC-XX):		

- Excipient/diluent used in formulation was Mannitol, EDTA and WFI.
- Sterilization was performed via membrane filtration (0.2 µm). Since Mecobalamin is light and heat sensitive therefore terminal sterilization was not opted.
- Column temperature was adopted as constant temperature of about 40◦C (as per JP monograph)

Observations:

Sr.#	Observation	Reply	Remarks
1.	The applied finished product specification is BP while instant formulation is not available in USP/BP or any other official monograph**.** Applied formulation to be corrected "as per innovator specification" along with fee (Rs 7500/-).	Firm has submitted revised/corrected specification "As per innovator's specification" along with fee of Rs 7500/- Dated 08.03.2023	Complied
2.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Analytical Method Verification studies of **Mecobalamin** has been performed including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer	Complied
3.	Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.	Firm has provided CoA of relevant batch No MLMCB-230422 from both Drug Substance and Drug Product manufacturer.	Complied
4.	Elucidation of Structure and other Characteristics of Drug Substance has not been Provided	Provided	Complied
5.	Quantity of Drug substance to be justified in Batch formula/Master formula. Quantity per ml mentioned as 0.650mcg Quantity per commercial batch (50,000 ampoules) mentioned as 0.0325Kg Quantity per trial batch (2500 ampoules) mentioned as 0.001625Kg	Quantity of Drug Substance already mentioned in batch formula was typographic error, which has been corrected/revised as follows: Quantity per ml mentioned as 568.18mcg (Potency of mecobalamin taken as 88%) Quantity per trial batch (2500 ampoules) mentioned as 1420.45 g Quantity per commercial batch (50,000 ampoules) mentioned as 28,409 gm	Potency of drug substance taken as 88% is justified on as is basis.
6.	Justification for selection of assay limit as 90-125%. Moreover, variation in assay results during stability	Although assay limit mentioned was wide as 90-125% yet our assay result	Justified

	studies to be justified which found to be increased with time points (Batch No T-01 and T-03)	was according to 100% and will keep limit as 90-110% Moreover slight variation/increase in assay result was due to handling/systematic error, which was not "significant change".	
7.	Compatibility of the Drug Substance(s) with excipient such as EDTA and Mannitol is to be provided otherwise provide reference of excipients used in innovator/reference product	Mannitol has been used in innovator formulation EDTA has been omitted from trial batches practically. The actual formulation didn't contain EDTA	Verified Revised batch formula/master formula to be submitted alongwith prescribed fee
8.	Documents for the procurement of API to be submitted along with approval from DRAP.	Commercial invoice No EXP/53/22-23 dated 18.04.2022 confirming import of 5g mecobalamin batch No MLMCB-230422	Firm has submitted Airway bill as an evidence for import of drug substance.
9.	Compliance Record of HPLC software 21CFR & audit trail reports is not submitted	Not provided	Not complied

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

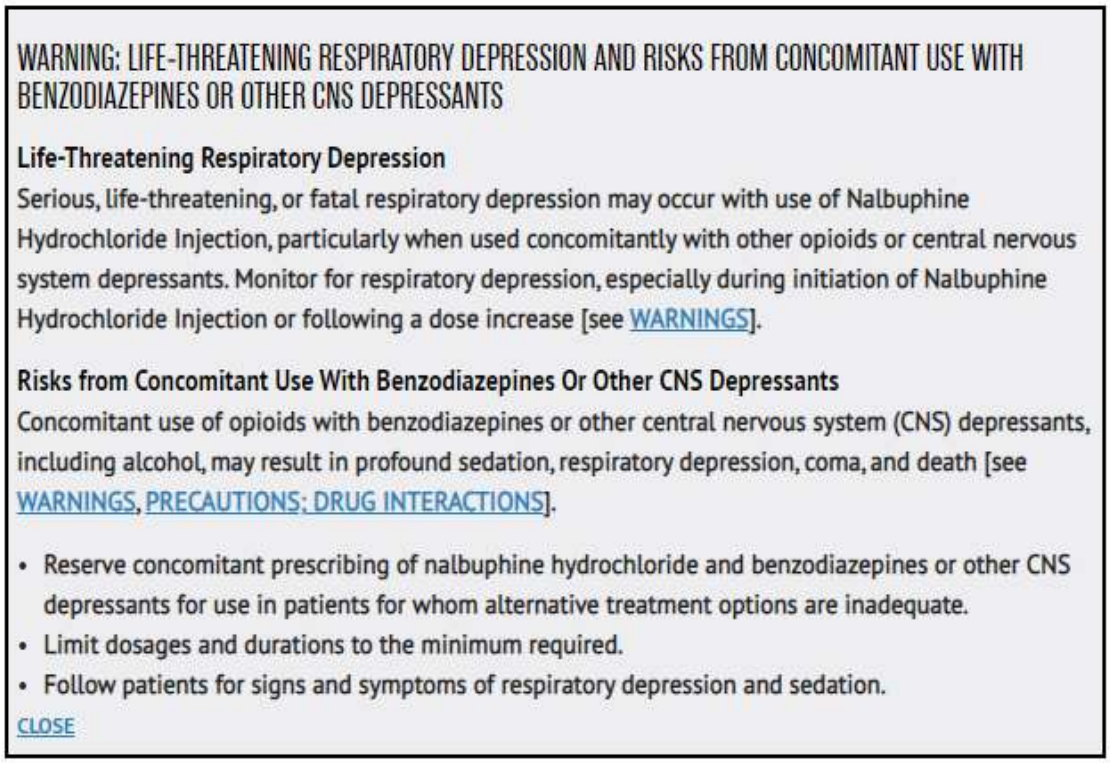
Remarks of Assessor (DD PEC-XX: Approved in USFDA with Box warning.			



WARNING: LIFE-THREATENING RESPIRATORY DEPRESSION AND RISKS FROM CONCOMITANT USE WITH BENZODIAZEPINES OR OTHER CNS DEPRESSANTS

Life-Threatening Respiratory Depression

Serious, life-threatening, or fatal respiratory depression may occur with use of Nalbuphine Hydrochloride Injection, particularly when used concomitantly with other opioids or central nervous system depressants. Monitor for respiratory depression, especially during initiation of Nalbuphine Hydrochloride Injection or following a dose increase [see WARNINGS].

Risks from Concomitant Use With Benzodiazepines Or Other CNS Depressants

Concomitant use of opioids with benzodiazepines or other central nervous system (CNS) depressants, including alcohol, may result in profound sedation, respiratory depression, coma, and death [see WARNINGS, PRECAUTIONS; DRUG INTERACTIONS].

- Reserve concomitant prescribing of nalbuphine hydrochloride and benzodiazepines or other CNS depressants for use in patients for whom alternative treatment options are inadequate.
- Limit dosages and durations to the minimum required.
- Follow patients for signs and symptoms of respiratory depression and sedation.

CLOSE

Terminal sterilization was performed at 121°C for 30min

	Name and address of API manufacturer.	Vamsi Lab Ltd. A-14/15,MIDC Area,Chincholi, Solapur-413255 Solapur 413255 Maharashtra State, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Formoterol fumarate dihydrate** The firm as submitted detail of nomenclature, structure, general properties, solubility, physical

		form, manufacturers, description of manufacturing process and controls, tests for impurity A&F, unspecified impurity, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance **Budesonide:** The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity A,L,D,K & unspecified impurity, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	**Formoterol fumarate dihydrate** Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches:(FF-0071013 M, FF-0010514 and FF-0010515 M) **Budesonide:** Real time: 30˚C ± 2˚C / 75% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches:(BDS-0071216, BDS-0010415 and BDS-0020514)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence of Eye Drop dosage form is performed. Moreover comparator product is to be clarified.
	Analytical method validation/verification of product	Summary report of method validation studies submitted including accuracy, precision, linearity, robustness.

STABILITY STUDY DATA	
Manufacturer of API	Vamsi Lab Ltd. A-14/15,MIDC Area,Chincholi, Solapur-413255 Solapur 413255 Maharashtra State, India
API Lot No.	Not provided
Description of Pack (Container closure system)	Not provided
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0,1, 2, 3, 6 (Months)

	Real Time: 0, 3, 6, (Months)		
Batch No.	T-27	T-28	T-29
Batch Size	500 Caps	500 Caps	500 Caps
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	28-11-2021	28-11-2021	28-11-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Certificate of GMP (No NEW-WHO-GMP/CERT/PD/75003/2018/11/25587 valid till dated 02.11.2021 License retention certificate No 25-PD/29 dated 22/01/2018 valid till 31/12/2022 issued by FDA (Maharashtra state)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not provided
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor (DD PEC[XX]):

1) Label claim of RRA approved formulation (Symbicort® Turbohaler® 200 micrograms/6 micrograms/ powder for inhalation) is as follows:

   Each delivered dose (the dose that leaves the mouthpiece) contains: budesonide 160 micrograms/inhalation and formoterol fumarate dihydrate 4.5 micrograms/inhalation.
   Each metered dose contains: budesonide 200 micrograms/inhalation and formoterol fumarate dihydrate 6 micrograms/inhalation.
   Firm has not provided information regarding ***delivered dose***

2) **3.2.P.2** In reference product quantity of Lactose monohydrate used is 730microgram while in applied formulation the quantity of Lactose monohydrate used was 50mg. justify it

3) **3.2.P.2** In reference product Lactose monohydrate is the only excipient been used while firm used other excipients as well such as Talcum powder, Macragol 100, Povidone, Aerosil 200 . justify it, also provide Drug-Excepient compatibility studies of said excipients.
4) **3.2.P.2** The container closure system of reference product, is an inspiratory flow-driven, multidose powder inhaler containing metered doses which is made of different plastic materials, while the applied formulation is primarily pre-dispensed in unit dose hard capsules. Justification shall be submitted for pharmaceutical equivalence of the applied product against the reference product with respect to change in primary container closure system, compatibility of applied formulation with the hard gelatin capsule.
5) **3.2.P.5** Specification of Dug Product did not include water content test which is critical quality parameters for DPI.

6) **3.2.P.2** Pharmaceutical equivalence study to be performed including all quality parameters, Moreover, name batch no and manufacturer of both Test product and Reference product to be provided. 7) **3.2.P.2** Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards. 8) **3.2.P.2** Potency adjustment (salt factor) calculation was not provided for Formoterol fumarate dihydrate in Batch formula. 9) **3.2.P.2** Detailed Analytical testing method of Drug Product to be provided. 10) **3.2.P.2** Description of Packaging (Container closure system) is to be provided, also provide details of metered dose inhalation device (name, model, manufacturer and shelf life) provided in pack. 11) **3.2.P.8** Documents for the procurement of API to be submitted. 12) **3.2.P.8** Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted. 13) **3.2.S.4** Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer 14) **3.2.S.4** Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture. 15) **3.2.S.4** Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided 16) **3.2.S.4** CoA of Drug Substance Formoterol fumarate dihydrate particle size distribution test was not performed which is critical quality attribute in applied formulation i.e DPI.
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months. **Registration Board further advised to submit the registration status of previously registered products for "Sachet (general) section.**

Remarks of Assessor (DD PEC[XX]) :

1) Label claim of RRA approved formulation (SPIRIVA 18 microgram, inhalation powder, hard capsule) is as follows:

Each capsule contains 22.5 microgram tiotropium bromide monohydrate equivalent to 18 microgram tiotropium.

The delivered dose (the dose that leaves the mouthpiece of device) is 10 microgram tiotropium.

Firm has not provided information regarding potency adjustment (salt form) and delivered dose.

2) The finished product specifications include acceptable tests and limits for ***appearance, identity (HPLC and ultra violet), assay, content uniformity, water content, degradation products, mean delivered dose, uniformity of delivered dose, aerodynamic particle size, foreign particulate matter, amorphous content and microbial purity.***
https://www.tga.gov.au/sites/default/files/auspar-tiotropium-190613.pdf

while firm has mentioned finished product specifications including weight variation, identification, uniformity of delivered dose, particle size distribution, and Assay only. same have been tested during stability studies as well. Tests like **content uniformity, water content, mean delivered dose, foreign particulate matter, amorphous content and microbial purity** to be performed**.**

3) As per Public assessment report of **Tiogiva 18mcg Inhalation Powder** (MHRA approved) quality parameters such as dissolution testing, particle size distribution and delivered dose testing to be compared while firm has performed tests such as Identification, Assay and standard weight only

https://mhraproducts4853.blob.core.windows.net/docs/448c8da22b062d7f6226d1ed404ff80765b705aa

4) **3.2.S.4** Detailed analytical procedures for the testing of drug substance to be provided by both Drug product and Drug Substance manufacturer
5) **3.2.S.4** Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.
6) **3.2.S.4** Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
7) **3.2.P.2** Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards

8) **3.2.P.2** Detailed Analytical method validation studies of Drug product is not provided

9) **3.2.P.2** Description of Packaging (Container closure system) is to be provided, also provide details of metered dose inhalation device /Handihaler (name, model, manufacturer, shelf life) provided in pack.

10) **3.2.P.8** Documents for the procurement of API to be submitted.

11) **3.2.P.8** Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.
Registration Board further advised to submit the registration status of previously registered products for "Sachet (general) section.

New DML:

3) M/s Med Asia Pharmaceuticals (Pvt) Limited Plot #7 Nowshera Industrial Estate Risalpur KPK Pakistan , CLB in its 283rd meeting held on 28th October, 2021, has considered and approved the grant of DML with following three sections:

- **Tablet (General).**
- **Capsule (General).**
- **Oral Dry Powder Suspension (General).**

978.	Name, address of Applicant / Marketing Authorization Holder	M/s Med Asia Pharmaceuticals (Pvt) Limited Plot #7 Nowshera Industrial Estate Risalpur KPK Pakistan
	Name, address of Manufacturing site.	M/s Med Asia Pharmaceuticals (Pvt) Limited Plot #7 Nowshera Industrial Estate Risalpur KPK Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy No 612 dated 06.01.2023
	Details of fee submitted	PKR 30,000/- dated 30.11.2022
	The proposed proprietary name / brand name	**LEVOTEL 250mg Tablets**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Levofloxacin as hemihydrate.....250 mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Quinolone antibiotics
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LEVOFLOXACIN Tablets 250mg" Approved by Health USFDA manufactured by TEVA
	For generic drugs (me-too status)	LEFLOX TABLETS 250mg (Reg. No.: 026164) manufactured by M/s Getz Pharma (Pvt.) Limited, Plot no. 29 – 30, Sector 27 Korangi Industrial Area, Karachi
	GMP status of the Finished product manufacturer	New DML granted on 11/11/2021 Tablet General ,Capsule General ,Oral dry powder suspension General) section approved.
	Name and address of API manufacturer.	M/s Zhejiang, East-Asia Pharmaceutical Co., Ltd ,address, Coastal Industrial City, Pubagang town, Sanmen county, Zhejiang, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Levofloxacin hemihydrate is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity (A, B & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: DC-004-1512001,DC-004-1512002,DC-004-

		1512003
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Tavanic 250 mg tablet by sanofi aventis by performing quality tests (Identification, Assay, Dissolution, disintegration time). CDP has been performed against the same brand that is **Tavanic 250 Tablet** by sanofi aventis (Batch no. B0029) in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8) against test product (Batch no. T001). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor (DD PEC[XX]):

1.6.5 Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin
3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture.
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.
3.2.P.2 Batch formula for proposed commercial batch size should be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards.
3.P.2.1.1 Compatibility of the Drug Substance(s) with excipients (Crospovidone, Microcrystalline cellulose) is not provided since said excipients are not found in innovator/reference product.
3.2.P.8 Documents for the procurement of API to be submitted.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy No 613 dated 06.01.2023
	Details of fee submitted	PKR 30,000/-: dated 01.12.2022
	The proposed proprietary name / brand name	LEVOTEL 500mg Tablets
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet Contains: Levofloxacin as hemihydrate.....500 mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Quinolone antibiotics
	Reference to Finished product specifications	USP

	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LEVOFLOXACIN Tablets 500mg" Approved by Health USFDA manufactured by TEVA
	For generic drugs (me-too status)	LEFLOX TABLETS 500mg (Reg. No.: 026163) manufactured by M/s Getz Pharma (Pvt.) Limited, Plot no. 29 – 30, Sector 27 Korangi Industrial Area, Karachi
	GMP status of the Finished product manufacturer	New DML granted on 11/11/2021 Tablet General ,Capsule General ,Oral dry powder suspension General) section approved.
	Name and address of API manufacturer.	M/s Zhejiang, East-Asia Pharmaceutical Co., Ltd ,address, Coastal Industrial City, Pubagang town, Sanmen county, Zhejiang, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Levofloxacin hemihydrate is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity (A, B & unspecified), specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: DC-004-1512001,DC-004-1512002,DC-004-1512003
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is **Tavanic 500 mg tablet** by sanofi aventis by performing quality tests (Identification, Assay, Dissolution, Disintegration time).

		CDP has been performed against the same brand that is Tavanic 500 Tablet by sanofi Aventis (Batch No CRD0020) in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8) against Test product (Batch No T001). The values for f1 and f2 are in the acceptable range. CDP of Levotel 500mg tablet has not been performed in acetate buffer and phosphate buffer medium (instead Levotel 250mg was mentioned)
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020 dated 02.09.2020 based on inspection dated 22.06.2020 valid till Two Years issued by DRAP.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not applicable (drug substance is from local source)

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not provided

Remarks of Assessor (DD PEC[xx]):

1.6.5 Valid Approval of API/ DML/GMP certificate of API manufacturer issued by DRAP.
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.
3.2.S.4 In USP monograph specification of Drug Substance included test "Residue on Ignition" (NMT 0.1%) while same has not been performed by firm.
3.2.P.2: Potency adjustment of Drug substance as provided in Batch formula, need to be justified. Since quantity of Drug substance mentioned as 593.64 mg for 500mg tablet and 296.82mg for 250mg tablet.
3.P.2.1.1 Compatibility of the Drug Substance(s) with excipient (Sodium starch glycolate) is not provided since said excipients are not found in innovator/reference product.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	**Nil**
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 129/2020 dated 02.09.2020 based on inspection dated 22.06.2020 valid till Two Years issued by DRAP.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not applicable (drug substance is from local source)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of	Submitted

	stability chambers (real time and accelerated)	

Remarks of Assessor (DD PEC XX):

Sr.#	Observation	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by DRAP.	Firm has again submitted Copy of GMP certificate No. 129/2020 dated 02.09.2020 based on inspection dated 22.06.2020 valid till Two Years issued by DRAP.	Not complied
2.	In USP monograph specification of Drug Substance included test "Residue on Ignition" (NMT 0.1%) while same has not been performed by firm.	Firm has submitted CoA of Drug Substance wherein result for test "Residue on Ignition" has been mentioned.i.e 0.06%	Complied
3.	Compatibility of the Drug Substance(s) with excipient Lactose, cross carmellose sodium, Sodium Lauryl Sulphate, Primojel and Talcum is not provided since said excipients are not found in innovator/reference product.	Compatibility of the Drug Substance(s) with aforementioned excipients has been performed. (Binary mixtures). There was no loss of assay observed with selected excipients.	Complied
4.	CoA, Raw data sheet and chromatograms are provided for 0 and 3 months only (of all three stability batches), same to be provided for 6th month as well.	Provided	Complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Registration letter will be issued upon submission of Pharmaceutical equivalence & CDP studies against innovator product i.e., Ciproxin of M/s Bayer Pakistan Pvt Ltd.

	Details of fee submitted	PKR 30,000/-: dated 19/12/2022
	The proposed proprietary name / brand name	**CPX-500mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains:- Ciprofloxacin HCl Eq. to Ciprofloxacin …… …….500mg USP Specification
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Fluoroquinolone Antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1x10's, 2x10's, 10x10's, Blister
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ciprofloxacin film coated tablets (MHRA Approved)
	For generic drugs (me-too status)	Cip Val 500mg Tablet M/s GlaxoSmithKline Pakistan Limited , Reg. No. 050688
	GMP status of the Finished product manufacturer	New DML granted dated 28-04-2022.
	Name and address of API manufacturer.	M/s Pharmagen Limited 34-Km, Ferozepur Road, Lahore, Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ciprofloxacin Hydrochloride is present in USP/BP. The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 12 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: B#00510011/003/2014, B#00510011/004/2014, B#00510011/005/2014
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Cip Val 500mg tablet (Batch No YU5P) by GSK Pharma. by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form and DT) against Test product i.e CPX-500mg Tablet (Batch No TT004). CDP has been performed against the same brand that is CPX-500mg Tablet by ICU Pharma in Acid media (pH 1.0-1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	**Nil**
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. F.3-26/2019 Addl.Dir (QA&LT-22) dated 25.03.2022 based on inspection dated 11.02.2019 valid till 10.02.2022 issued by DRAP.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not applicable (pellets are from local source)

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC [xx]):

Sr.#	Observation	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by DRAP.	Firm has again submitted Copy of GMP certificate No. F.3-26/2019 Addl.Dir (QA&LT-22) dated 25.03.2022 based on inspection dated 11.02.2019 valid till 10.02.2022 issued by DRAP.	Not complied
2.	COA of primary / secondary reference standard including source and lot number to be provided. Since already provided CoA is of omeprazole (working standard) instead of Esomeprazole.	*According to USP we used omeprazole as working standard for analysis of Esomeprazole DR capsule.*	Justified
3.	Compatibility of the Drug Substance(s) with excipient Microcrystalline cellulose, Titanium dioxide and Diethyl phthalate (Eso-Rose 20mg Capsule) is not provided since said excipients are not found in innovator/reference product	*Our product contains Esomeprazole DR pellets which are ready to fill and does not require any preparation and are filled into empty hard gelatin shells received from the supplier.*	Same may be asked from pellet manufacturer by finished product manufacturer.
4.	Summary data sheets, CoA, Raw data sheet and chromatograms are to be provided for 6th month as well.	Provided	6th month stability data was already submitted dated 15.02.2023 (Dy No. 4371 DRAP (R&I)). Same has been evaluated.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Registration Board further decided to send reference to Licensing Division about excipients used by M/s Vision pharmaceuticals for formulating Esomeprazole magnesium trihydrate pellets, since excipients such as Microcrystalline cellulose, Titanium dioxide and Diethyl phthalate are not found in innovator/reference product, hence compatibility study of the Drug Substance(s) with said excipients is required.

Manufacturer of API	Shandong Qidu Pharmaceutical Co., Ltd.		
API Lot No.	200402		
Description of Pack (Container closure system)	Inner packaging and Intermediate packaging: Laminated film (PET/AI/PE) for pharmaceutical packaging; Outer packing: Cardboard drums		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.			TR-4/ RCT 10mg

	TR-2/ RCT 10mg	TR-3/ RCT 10mg	
Batch Size	2000 Sachet	2000 Sachet	2000 Sachet
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	12-2021	12-2021	12-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Canazin tablet 300mg Minutes of 289th Meeting of Registration Board (14-16 May,2019)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML No. Lu 2160064 issued by Shandong Medical Products Administration valid till 23/11/2025. GMP certificate No SD20180700 VALID TILL 22.05.2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of Invoice No.22200730 dated 25/05/2021 is submitted wherein the permission to import Racecadotril **150gm Batch No 200402** for the purpose of test/analysis and stability studies is granted. • DRAP AD attestation Date is 28-9-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Not Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC-XX):

Sr.#	Observation	Reply	Remarks
1.	COA of primary / secondary reference standard including source and lot number to be provided	Provided	complied
2.	Stability studies of Drug Substance to be provided.	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 12 months. **190101, 190301 and 190401**	Complied
3.	Pharmaceutical equivalence to be provided against	Pharmaceutical equivalence study has been	Complied

	innovator/comparator product by performing quality tests.	performed against the same brand that is Hidrasec 10mg Granules for Oral Suspension by Abbott Laboratories (Pakistan) Limited (Batch No SXN734)	
4.	Summary data sheets, CoA, Raw data sheet and chromatograms are to be provided for three batches against each time point (both real time and accelerated studies)	Summary data sheets, CoA, Raw data sheet and chromatograms are provided for all three batches **TR2/RCT**, **TR3/RCT** and **TR4/RCT** against each time point.	Complied

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Following registration application of firms may be considered on priority in light of Export Facilitation Policy as communicated vide letter No.F.1-6/2019-PR-I (EFD) dated 12th January 2023.

991.	Name and address of manufacturer / Applicant	**M/s Werrick Pharmaceuticals, 216-217, I-10/3, Industria Area, Islamabad.**
	Brand Name +Dosage Form + Strength	Obetab Tablets 5mg
	Composition	Each Film Coated Tablet Contains: Obeticholic Acid…….……5mg
	Diary No. Date of R& I & fee	Dy. No. 16633 dated 07-03-2019, Fee Rs: 50,000/- dated 07-03-2019 Stability data submission on 22.02.2022 Dy No 4963
	Pharmacological Group	Bile Acid Analog and Farnesoid X Receptor Agonist
	Type of Form	Form: 5D
	Finished product Specifications	Innovator's specification
	Pack size & Demanded Price	Not provided
	Approval status of product in Reference Regulator Authorities	Ocaliva Tablets (USFDA Approved)
	Me-too status	Not provided
	GMP status	GMP inspection report dated 09.11.2018 is provided

No. of Batches	03		
Date of Submission	22-02-2022		

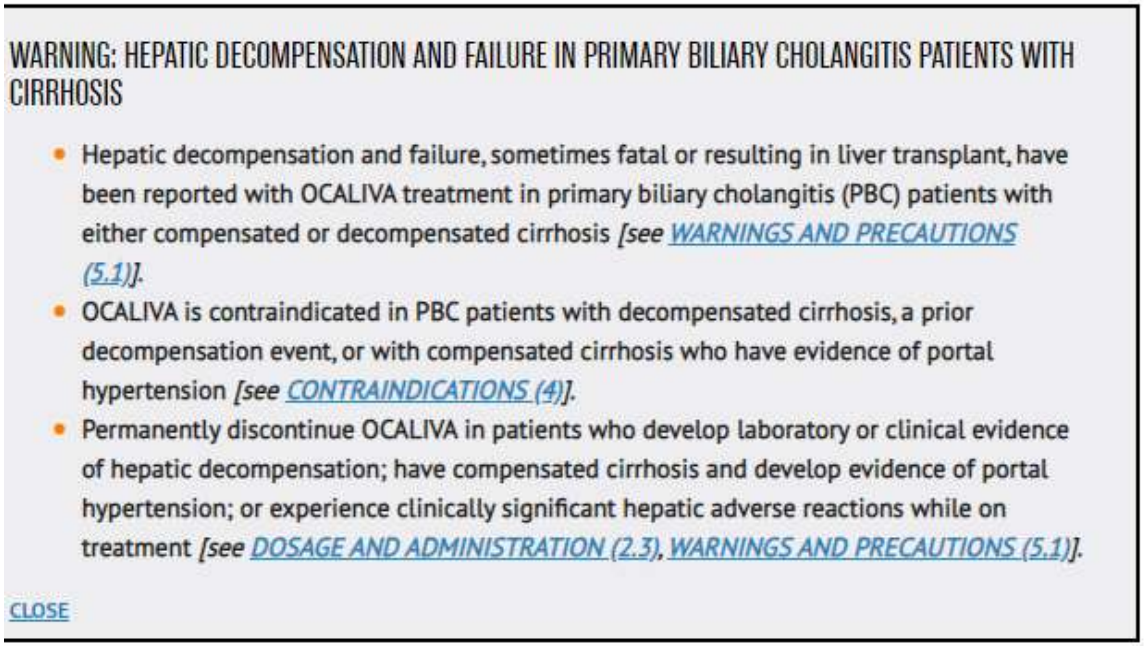
DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
15.	Reference of previous approval of applications with stability study data of the firm	The firm has submitted Reference of previous approva of applications with stability study data as Xetine 10mg tablet approved in 294th meeting of Registration Board.
16.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	**Obeticholic Acid** (Batch# AOBTC0118001) **API Manufacturer:** Copy of COA from M/ Virupaksha Organics Limited India was submitted. **Finished Product Manufacturer:** COA from Werrick Pharmaceuticals, Islamabad, was submitted.
17.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of APIs from Finished Produc Manufacturer is provided only
18.	Stability study data of API from API manufacturer	Not provided
19.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of updated GMP Certificate No L.Dis.No:70109/TS/2021, Dated 27-10-2021, valid up to 26-10-2022. in the name of M/s Virupaksha Organic Limited India.
20.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice No. VPPL/EXP/127/17-18 Dated 20-03-2018, attested by AD (I&E) DRAP on 03.04.2018 confirming import of API (0.12 Kg) Batch No AOBTC0118001
21.	Protocols followed for conduction of stability study.	Submitted
22.	Method used for analysis of FPP	Submitted
23.	Drug-excipients compatibility studies (where applicable)	Firm has used same excipients as that of the innovator's product therefore compatibility studies are not required.
24.	Complete batch manufacturing record of three stability batches.	The firm has submitted Batch Manufacturing record of following 03 Batches:
25.	Record of comparative dissolution data (where applicable)	The Reference Product Ocaliva Tablets 5mg (Obeticholi acid) is not available in Pakistan hence comparative dissolution is not performed.
26.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
27.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted

Batch No.	Batch Size	Mfg. Date
01	1500 tablets	12-2018
02	1500 tablets	12-2018
03	1500 tablets	12-2018

28.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC-XX)
Approved in USFDA with Box warning



WARNING: HEPATIC DECOMPENSATION AND FAILURE IN PRIMARY BILIARY CHOLANGITIS PATIENTS WITH CIRRHOSIS

- Hepatic decompensation and failure, sometimes fatal or resulting in liver transplant, have been reported with OCALIVA treatment in primary biliary cholangitis (PBC) patients with either compensated or decompensated cirrhosis *[see WARNINGS AND PRECAUTIONS (5.1)]*.
- OCALIVA is contraindicated in PBC patients with decompensated cirrhosis, a prior decompensation event, or with compensated cirrhosis who have evidence of portal hypertension *[see CONTRAINDICATIONS (4)]*.
- Permanently discontinue OCALIVA in patients who develop laboratory or clinical evidence of hepatic decompensation; have compensated cirrhosis and develop evidence of portal hypertension; or experience clinically significant hepatic adverse reactions while on treatment *[see DOSAGE AND ADMINISTRATION (2.3), WARNINGS AND PRECAUTIONS (5.1)]*.

Sr.#	Observation	Reply	Remarks
1.	Provide updated GMP status of both Drug substance and Drug product manufacturer.	Updated GMP from Drug substance manufacturer Certificate No.L.Dis.No:100509/TS/2022, Dated 21-12-2022, valid up to 20-12-2023. in the name of M/s Virupaksha Organics Limited India. GMP certificate of Drug Product manufacturer based on inspection dated 12.08.2022 valid till 2 years, submitted	Complied
2.	Provide Method used for analysis of API from API Manufacturer	Provided	Complied
3.	Physicochemical characteristics of the active substance that impact the quality of the finished product are particle size distribution which plays a critical role in the content uniformity and dissolution of the tablets. https://www.ema.europa.eu/en/documents/assessment-report/ocaliva-epar-public-assessment-report_en.pdf However, particle size distribution of active substance has not been controlled /performed either by Drug substance or Dug product manufacturer.	Particle size distribution of active substance has been controlled by Drug Substance manufacturer (performed by X-Ray diffraction) as mentioned in CoA.	Complied
4.	Tests like Sulphated ash particle size distribution and microbial limit have not been performed on Drug substance	Tests like Sulphated ash (residue on ignition) and particle size distribution have been performed by Drug Substance manufacturer as mentioned in CoA however firm commit that microbial	

		limit test will be performed before manufacturing of our product	
5.	Stability study data of API from API manufacturer to be provided.	Stability data of drug substance has been performed for 3 batches i.e AOBTC0217001, AOBTC0217002 and AOBTC0217003 The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months.	Complied
6.	The finished product release specifications include appropriate tests for this kind of dosage form: appearance, identification (HPLC, TLC), assay (HPLC), degradation products (HPLC), total specified and unspecified impurities (HPLC), dissolution (Ph. Eur.), uniformity of dosage units (Ph. Eur.), water content (Ph. Eur.), microbial limits (Ph. Eur.) https://www.ema.europa.eu/en/documents/assessment-report/ocaliva-epar-public-assessment-report_en.pdf However, tests like water content (Ph. Eur.), microbial limits (Ph. Eur.) have not been performed.	Firm commit that microbial limit test and water content will be performed before launching of product	
7.	Perform CDP against innovator/comparator product and submit report accordingly.	CDP was not performed due to non availability of reference product (ocliva tablet) in Pakistan. Firm commit that they will perform CDP before launching the product.	Generic versions are available in Pakistan.

Decision: Deferred for following reasons:

a) Microbial limit test has not been performed on Drug substance as per innovator product.

b) Tests like water content (Ph. Eur.), microbial limits (Ph. Eur.) have not been performed as per innovator product

c) **CDP has not been performed against innovator/reference/comparator product**.

Remarks of Assessor (DD PEC-XX):

Sr.#	Observation	Observation	Remarks
1.	Contract manufacturing agreement provided dated 01.04.2022 between M/s Stallion Pharmaceuticals Pvt, Ltd and M/s Nabiqasim Industries Pvt, Ltd instead of M/s Surge Laboratories (Pvt.) Ltd.	Contract manufacturing agreement between M/s Stallion Pharmaceuticals Pvt, Ltd and M/s Surge Laboratories (Pvt.) Ltd has been provided dated 31.12.2021.	Complied
2.	Submit valid GMP certificate/inspection report of contact manufacturer i.e M/s Stallion Pharmaceuticals Pvt, Ltd 581-Sundar Industrial Estate, Lahore.	GMP certificate based on inspection dated 20.09.2022, provided valid for 2 years.	Complied
3.	Submit approval letter for relevant section i.e Penicillin dry powder injection from CLB granted to manufacturer.	Section approval letter dated 06.02.2014 submitted wherein Dry Powder Injection (Penicillin) was approved by CLB.	Complied
4.	Mention correct pharmacotherapeutic group and ATC code	Pharmacotherapeutic group was corrected as Antibacterials for systemic use (Penicillin and Beta lactamase inhibitor)	Complied
5.	Title of Drug substance manufacturer mentioned on GMP certificate as **M/s Qilu Tianhe Pharmaceuticals Co. Ltd** while tile of drug substance manufacturer mentioned on rest of documents as **Shandong Anxin Pharmaceutical Co**	Company name/title has been changed from **M/s Qilu Tianhe Pharmaceuticals Co. Ltd** to **Shandong Anxin Pharmaceutical Co Ltd.** Firm has submitted reference for relevant change.	Complied

	Ltd. Clarify the title of manufacturer along with supportive documents.		

Later on firm submitted cross reference of same formulation (Piperacillin + Tazobactum 2gm/0.25g) applied by M/s Heathtek Pvt Ltd, manufactured at same site i.e M/s Stallion Pharmaceuticals Pvt Ltd. Lahore, approved in 308th meeting of Registration Board. The stability data was submitted for same stability batches as submitted in previous application and Drug substance source was also same.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals PVT, LTD. 581-Sundar Industrial Estate, Lahore.

994.	Name, address of Applicant / Marketing Authorization Holder	SURGE LABORATORIES (PVT.) LTD. Head Office: 5th Floor, Commerce Centre, Hasrat Mohani Road, Karachi. Telephone: UAN 111-742-762 E-mail address: info@surgelaboratories.com
	Name, address of Manufacturing site.	M/s Stallion Pharmaceuticals PVT, LTD. 581-Sundar Industrial Estate, Lahore Tel: +92 42 35297647-48
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 24971 dated 02/09 /2022
	Details of fee submitted	PKR 75,000/- dated 16/06/2022
	The proposed proprietary name / brand name	Torpicillin IV 4.5g Powder for Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Piperacillin Sodium eq. to Piperacillin….4.0g Tazobactam Sodium eq. to Tazobactam…0.5g
	Pharmaceutical form of applied drug	Dry powder for injection
	Pharmacotherapeutic Group of (API)	Antibacterials for systemic use, Carbapenems
	Reference to Finished product specifications	USP Specs.
	Proposed Pack size	1 vial of Powder for Injection + 2 ampoules of 10ml Sterile Water for Injection in a single pack
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Product Piperacillin / Tazobactam 4.0 g / 0.5 g Powder for solution for infusion IV is registered and being marketed by Wockhard Ash Road North, Wrexham Industrial Estate, Wrexham LL 13 9UF

	For generic drugs (me-too status)	Product TANZO 4.5g Injection (Piperacillin + Tazobactam) (039439) is registered and being marketed by M/s. Bosch Pharmaceuticals Pvt. Ltd (Pakistan)
	GMP status of the Finished product manufacturer	GMP Certificate granted based on inspection dated 02/10/2020 valid for 2 years
	Name and address of API manufacturer.	**M/s Qilu Tianhe Pharmaceuticals Co. Ltd** 849, Dongjia Town, Licheng District, Jinan, Shandong, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Piperacillin + Tazobactam is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (HF7001D1, HF7002D2, HF7003D3)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Tanzo Sterile Dry Powder Injection 4.5g (Piperacillin + Tazobactam) is registered and being marketed by M/s Bosch Pakistan Limited, by performing quality tests (Description, Identification, pH, water content, Reconstitution time, Endotoxin test, Sterility test and Assay.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	**M/s Qilu Tianhe Pharmaceuticals Co. Ltd** 849, Dongjia Town, Licheng District, Jinan, Shandong, China
API Lot No.	KA1007150016, KA1007150022
Description of Pack	1 glass vial of Powder for Injection + 2 ampoules of 10ml Sterile Water for

(Container closure system)	Injection in a single pack		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 24 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	P5001	P5002	P5003
Batch Size	8600 vials	8600 vials	10,630 vials
Manufacturing Date	03-2015	03-2015	04-2015
Date of Initiation	16-04-2015	16-04-2015	04-06-2015
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No 2018001issued by Centre for Evaluation & Certificate of Shandong Food & Drug Administration valid till 24/07/2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of invoice no. SL-150202-Z dated 04-02-2015 duly attested by Assistant Director, DRAP, Lahore on 09-02-2015were provided. Total quantity 100Kg.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC-XX):

Sr.#	Observation	Observation	Remarks
1.	Contract manufacturing agreement provided dated 01.04.2022 between M/s Stallion Pharmaceuticals Pvt, Ltd and M/s Nabiqasim Industries Pvt, Ltd instead of M/s Surge Laboratories (Pvt.) Ltd.	Contract manufacturing agreement between M/s Stallion Pharmaceuticals Pvt, Ltd and M/s Surge Laboratories (Pvt.) Ltd has been provided dated 31.12.2021.	Complied
2.	Submit valid GMP certificate/inspection report of contact manufacturer i.e M/s Stallion Pharmaceuticals Pvt, Ltd 581-Sundar Industrial Estate, Lahore.	GMP certificate based on inspection dated 20.09.2022, provided valid for 2 years.	Complied
3.	Submit approval letter for relevant section i.e Penicillin	Section approval letter dated 06.02.2014 submitted	Complied

	dry powder injection from CLB granted to manufacturer.	wherein Dry Powder Injection (Penicillin) was approved by CLB.	
4.	Mention correct pharmacotherapeutic group and ATC code	Pharmacotherapeutic group was corrected as Antibacterials for systemic use (Penicillin and Beta lactamase inhibitor)	Complied
5.	Title of Drug substance manufacturer mentioned on GMP certificate as **M/s Qilu Tianhe Pharmaceuticals Co. Ltd** while tile of drug substance manufacturer mentioned on rest of documents as **Shandong Anxin Pharmaceutical Co Ltd.** Clarify the title of manufacturer along with supportive documents.	Company name/title has been changed from **M/s Qilu Tianhe Pharmaceuticals Co. Ltd** to **Shandong Anxin Pharmaceutical Co Ltd.** Firm has submitted reference for relevant change.	Complied

Later on firm submitted cross reference of same formulation (Piperacillin + Tazobactum 4gm/0.5g) applied by M/s Heathtek Pvt Ltd, manufactured at same site i.e M/s Stallion Pharmaceuticals Pvt Ltd. Lahore, approved in 308th meeting of Registration Board. The stability data was submitted for same stability batches as submitted in previous application and Drug substance source was also same.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Stallion Pharmaceuticals PVT, Ltd. 581-Sundar Industrial Estate, Lahore.

Deferred cases:

995.	**Name, address of Applicant / Marketing Authorization Holder**	M/s British Pharmaceutical (Pvt) Ltd, 23 km, Sheikhupura Road, Lahore
	Name, address of Manufacturing site.	M/s British Pharmaceutical (Pvt) Ltd, 23 km, Sheikhupura Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	Evidence of approval of manufacturing facility	Copy of Valid DML No. 000729 (Formulation) renewed on 22-06-2021 along with covering letter is provided.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26862 Date: 22/9/2022
	Details of fee submitted	PKR 30000 dated: 16-09-2022 . SLIP No. 003359682193

	The proposed proprietary name / brand name	**BRIPROFEN 200 mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet contains: Ibuprofin …… 200mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	NSAID
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	10's, 20's,30's,100's,200's Blister (1000's Jar Pack)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved
	For generic drugs (me-too status)	**Brand Name:** Pando (200mg) Tablet **Registration holder:** M/s Efroze Pharma(Pvt) Ltd , Karachi. **Registration Number:** 012062
	Name and address of API manufacturer.	**Ibuprofen (BP) :** M/s Zenith Chemical Industry Lahore GMP Certificate No. 141/2019-DRAP(AD-813875-228) dated : **22-05-2019**
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 24 months. **(Batch No. ZIBU11-001, ZIBU11-002, ZIBU11-003)**
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have not been established/submitted with innovator Product, **but with Brufen 200 mg Tablet of M/s Abbot Pharmaceutical Pakistan Ltd, Karachi.** **CDP has been performed against the same brand that is** Brufen 200 mg Tablet of M/s Abbot Pharmaceutical Pakistan Ltd, Karachi **instead of Innovator / Reference Product** in

		Acid media (0.1N HCl),), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory(>50%).
	Analytical method validation/verification of product	Firm has submitted **report of verification studies of analytical method (BP)** of drug substance. Firm has submitted report of verification of analytical method (USP) for the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Zenith Chemical Industry Lahore GMP Certificate No. 141/2019-DRAP(AD-813875-228) dated : **22-05-2019**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	M/s Zenith Chemical Industry Lahore GMP Certificate No. 141/2019-DRAP(AD-813875-228) dated : **22-05-2019**
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not required.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	For march 2021 while the stability is initiated in May 2021.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Submitted.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	**Submitted.**

Evaluation by PEC:

1. GMP certificate of API manufacturer is issued on 22-05-2019.
2. Analytical assay method verification test reports/results of API by both Drug Substance and Drug Product manufacturer are not submitted
3. Provide detail of excipients along with specifications along with compatibility studies as the excipients used in Product development are different from the ones of innovator product.
4. Uniformity of Dosage forms is a USP Specified test for Drug Product but in stability study reports/results it is not performed and is not mentioned in Stability data test reports of 400mg tablet and both Uniformity of Dosage forms
5. Detail of equipment's/machinery as used in Product Development if not submitted.
6. Product Assay method as mentioned in Product Development is different from the one specified in (USP).
7. Specificity Method and test reports are not submitted for Drug Product.

8. %RSD is not calculated for tests performed for Drug Product analytical method verification.
9. In BMR check points include i.e. average tablet size to be 460mg, and target weight is also 460mg while the Tablet is of 200mg.
10. Chromatograms submitted along with stability data sheets in Briprofin 200mg tablets, date of data processing/acquiring is mentioned as 11-03-2021 while the stability is initiated in May 2021.

Decision of 323rd meeting of RB : Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

Updated submission:

Sr No	Observation	Reply	Remarks
1.	GMP certificate of API manufacturer is issued on 22-05-2019.	*API manufacturer has applied for renewal of GMP. Copy of valid DML is attached.*	Submitted copy of DML is valid till 14.06.2021. updated GMP status is still required
2.	Analytical assay method verification test reports/results of API by both Drug Substance and Drug Product manufacturer are not submitted	Analytical method verification of API from Drug product manufacturer is provided	Analytical method verification report/test results from Drug Substance manufacturer yet to be provided
3.	Provide detail of excipients along with specifications along with compatibility studies as the excipients used in Product development are different from the ones of innovator product.	Detail of excipients along with specifications and compatibility studies is provided	Complied
4.	Uniformity of Dosage forms is a USP Specified test for Drug Product but in stability study reports/results it is not performed and is not mentioned in Stability data test reports of 400mg tablet and both Uniformity of Dosage forms	As weight of API is greater than 25mg so the weight variation is applied which is the parameter of uniformity of dosage unit as per USP. In stability report weight variation is performed and results are mentioned.	Justified
5.	Detail of equipment's/machinery as used in Product Development if not submitted	Submitted	Complied
6.	Product Assay method as mentioned in Product Development is different from the one specified in USP.	Product Assay method is same as specified in USP. However for record purpose method is attached.	Verified.
7.	Specificity Method and test reports are not submitted for Drug Product.	Verification Method and test reports are provided wherein specificity parameter was not provided	Not Complied
8.	%RSD is not calculated for tests performed for Drug Product analytical method verification.	Analytical method verification study is provided wherein %RSD is mentioned.	Verified
9.	In BMR check points include i.e. average tablet size to be 460mg, and target weight is also 460mg while the Tablet is of 200mg.	*Production weight of Briprofen 200mg tablet is 460mg and its average weight is*	Justified

		also obtained in 460mg range. Selected check points/parameters are for Briprofen 200mg tablet.	
10.	Chromatograms submitted along with stability data sheets in Briprofin 200mg tablets, date of data processing/acquiring is mentioned as 11-03-2021 while the stability is initiated in May 2021	*Format of date on HPLC chromatograms was MM.DD.YY. Stability study was initiated in May 2021 and 6 months stability was completed on November 2021 and was tested on 3rd of Nov 2021. As the format of date on HPLC system is MM.DD.YY that's why date of data processing/acquiring shown as 11.03.2021.*	Justified
Decision: Deferred for submission of Analytical Verification study/test reports of Drug Product including specificity parameter to be provided from Drug Product manufacturer.

	Details of fee submitted	PKR30000 dated: 27.05.2022 bearing Deposit Slip No. 09713095356
	The proposed proprietary name / brand name	Darvin Forte 75mg/650mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Tramadol HCL … 75mg Paracetamol ….. 650mg
	Pharmaceutical form of applied drug	Film Coated Tablet
	Pharmacotherapeutic Group of (API)	Opioid & Non-Opioid Analgesic
	Reference to Finished product specifications	**USP Specifications**
	Proposed Pack size	1x 10's (Alu-PVC Blisters)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	CLANDERON 75 mg / 650 mg , Aristo Pharma Iberia, Madrid Spain.
	For generic drugs (me-too status)	Tonoflex-P Forte (film coated) of M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi
	Name and address of API manufacturer.	**Paracetamol (USP/BP):** M/s Saakh Pharma (Pvt) Ltd, Karachi. **GMP Certificate No. 83/2020-DRAP(K) dated 23-06-2022** **Certificate No. ZJ20170049** **Tramadol HCL USP :** M/s S.L.R. Pharma (Pvt) Limited, Situated at Plot No. A-69, API Estate Settipalli Post, Tirupati, Chittor District, Andhra Pradesh, India. License Retention Certificate dated 05-12-2019.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical

		form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30ºC ± 2ºC / 65% ± 5% RH for 24 months for both API's namely **Paracetamol & Tramadol HCL USP .**
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the Tonoflex-P Forte Tablet 75/650 mg by M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi by performing quality tests including Identification, water content, Assay, Dissolution, Disintegration. CDP has been performed against the same brand that is Tonoflex-P Forte Tablet 75/650 mg by M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. **The F2 values are not found satisfactory.**
	Analytical method validation/verification of product	Firm has submitted report of validation studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA

Manufacturer of API	**Paracetamol (BP):** M/s Saakh Pharma (Pvt) Ltd, Karachi. **GMP Certificate No. 83/2020-DRAP(K) dated 23-06-2022** **Certificate No. ZJ20170049** **Tramadol HCL USP :** M/s S.L.R. Pharma (Pvt) Limited, Situated at Plot No. A-69, API Estate Settipalli Post, Tirupati, Chittor District, Andhra Pradesh, India. License Retention Certificate dated 05-12-2019.		
API Lot No.	Paracetamol: ZPAR18-143 Tramadol HCL : TDH 0041019		
Description of Pack (Container closure system)	The proposed pack size of Darvin Forte Tablet is 1x10's in Alu—PVC Blister.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	• **Not Provided**
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Paracetamol (USP/BP):** M/s Saakh Pharma (Pvt) Ltd, Karachi. **GMP Certificate No. 83/2020-DRAP(K) dated 23-06-2022** **Certificate No. ZJ20170049** **Tramadol HCL USP :** M/s S.L.R. Pharma (Pvt) Limited, Situated at Plot No. A-69, API Estate Settipalli Post, Tirupati, Chittor District, Andhra Pradesh, India. License Retention Certificate dated 05-12-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Paracetamol (BP):** Not Required **Tramadol HCL USP :** **Not Provided**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail record of product testing of HPLC.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	**Not Provided.**

Evaluation by PEC:

1. Evidence of approval of applied formulation in reference regulatory authorities as defined by the registration Board shall be submitted. As the applied formulation in reference regulatory authorities is approved as "uncoated" tablets while the applicant has applied as film coated tablets

Decision: Since the applied product is approved as "uncoated tablet" in reference regulatory authorities while the applicant has applied for film coated tablet. Therefore, Registration Board decided to defer the case for evidence of approval of applied formulation in reference regulatory authorities/agencies a "film coated tablet" which were declared/approved by the Registration Board in its 275th meeting.

Reply of the firm :

Decision 322nd meeting of RB: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Sr. No	Observation	Reply	Remarks
1.	Provide certificate of analysis of relevant batch(es) of Drug Substance(s) (Paracetamol & Tramadol HCL) used in product development (By both Drug Substance and Drug Product manufacturer.	CoA are provided for different batches.	Not complied CoA to be provided for relevant batches. **The CoA of Tramadol HCl batch No TDH 0480218 has been provided instead of batch no TDH 0041019 which**

			was mentioned in import invoice.
2.	The Pharmaceutical equivalence studies and comparative dissolution Profile studies are not conducted with the innovator Product.	Pharmaceutical equivalence /CDP performed against the **Tonoflex-P Forte Tablet** 75/650 mg by M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi Batch No 001E	Pharmaceutical equivalence /CDP performed against established brand
3.	Documents for the procurement of API with approval from DRAP (in case of import) of DS **Tramadol HCL USP**	Copy of invoice provided No E002 dated 06.11.2019 , attested by DRAP Lahore confirming import of 200Kg Tramadol HCl Batch No **TDH 0041019**	Complied
4.	As per submitted data of comparative dissolution profile following points have been observed: **For Paracetamol:** Value of F2 factor is 46% in Buffer Acetate pH 4.5 Value of F2 factor is 38% in Phosphate Buffer pH 6.8 **For Tramadol HCl:** value of F2 factor is 44% in 0.1N HCL Value of F2 factor is 46% in Phosphate buffer pH 6.8 Please justify scientifically.	Rectified CDP report has been submitted with f2 values as follows **For Paracetamol:** Value of F2 factor is 53% in acid medium pH 1.2 Value of F2 factor is 52% in Buffer Acetate pH 4.5 Value of F2 factor is 53% in Phosphate Buffer pH 6.8 **For Tramadol HCl:** Value of F2 factor is 54% in 0.1N HCL Value of F2 factor is 67% in Buffer Acetate pH 4.5 Value of F2 factor is 55% in Phosphate buffer pH 6.8	The F2 values are found satisfactory.
5.	Specificity testing in Analytical method validation has not been performed for the applied Product.	Analytical method validation study has been performed including parameter Specificity.	Complied
6.	Analytical Method for related substances /impurities testing of DS Paracetamol (BP) the HPLC testing procedure/chromatographic conditions are different from the one as specified in BP	Analytical Method for related substances /impurities testing of DS Paracetamol (BP) has been submitted wherein HPLC testing procedure/chromatographic conditions are as per BP (2019)	Complied
7.	DS manufacturer of Paracetamol has followed analytical method for testing(Assay) of API of BP while the Drug Product manufacturer has tested by USP Specs. (The analytical method by DS	Drug Product manufacturer has tested Drug Substance (Paracetamol) as per BP. CoA has been provided.	Complied

	manufacturer is mentioned as BP but on COA of DS Assay is mentioned as USP)		
8.	The excipients being used are different from the ones used in Product Development of Innovator/Reference Product, therefore, provide compatibility studies protocol/method along with results.	Drug-Excipient compatibility study has been provided The binary study makes it clear that both API are compatible with all excipients	Complied
Decision: Deferred for following: • **Submission of CoA of relevant batch of Tramadol HCl i.e., TDH 0041019 as mentioned in import invoice.** • **Scientific justification for the results reported in CDP studies with acceptable f2 value, whereas previously firm had reported different results of f2 value which were not within acceptable range, while the firm has not made any formulation change.**			

d) Deferred cases:

Deferred case of 322nd meeting:

585.	Name and address of manufacturer / Applicant	M/s The Searle Company Limited F-319, S.I.T.E., Karachi, Pakistan.
	Brand Name +Dosage Form + Strength	Anzo D MR Capsule
	Diary No. Date of R& I & fee	Dy No. 2368 (PEC DRAP) Dated 17.10.2022 (duplicate) Rs: 50,000/- 22-12-2017
	Composition	Each modified release capsule contains: Diclofenac sodium…….75mg Omeprazole…….20mg
	Pharmacological Group	Anti-arthritis Anti-ulcer
	Type of Form	Form 5-D
	Finished Product Specification	Innovator's Specs.
	Pack size & Demanded Price	As per DPC
	Approval status of product in Reference Regulatory Authorities.	EMA Approved Diotop 75 mg / 20 mg modified release hard capsules
	Me-too status	Not Applicable
	GMP status	GMP inspection conduced on 07/07/2022 Capsule (General & General Antibiotic) section approved.

DOCUMENTS / DATA PROVIDED BY THE APPLICANT			
S. No.	Documents To Be Provided	Status	
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product for Tapendol (Tapentadol) Tablets 75mg & 100mg on 11th March, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019. The case was approved and the inspection report confirms following points: The HPLC software is 21CFR Compliant as per record available with the firm. Audit trail on the testing reports is available. Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software. Related manufacturing area, equipment, personnel and utilities are GMP compliant.	
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Diclofenac sodium MR pellets 35%: Firm has submitted COA of Diclofenac sodium MR pellets 35% (Batch No. RD0149-017) from M/s ALPHAMED FORMULATIONS PRIVATE LIMITED. COA (Batch No. RD0149-017)) from M/s The Searle Company Limited is also submitted. Omeprazole Delayed release pellets 20%w/w: Firm has submitted COA of Omeprazole Delayed release pellets 20%w/w (Batch No. 8000201-010.) from M/s ALPHAMED FORMULATIONS PRIVATE LIMITED. COA (Batch No. 8000201-010.)) from M/s The Searle Company Limited is also submitted	
3.	Method used for analysis of API from both API Manufacturer & Finished Product manufacturer	Submitted	
4.	Stability study data of API from API manufacturer	Diclofenac sodium MR pellets 35%: The firm has submitted copy of accelerated, 06 Months (40°C ± 2°C & 75±5%RH) & long term, 36 Months (30°C ± 2°C & 65±5%RH) stability study reports of 03 batches Omeprazole Delayed release pellets 20%w/w: The firm has submitted copy of accelerated, 06 Months (40°C ± 2°C & 75±5%RH) & long term, 36 Months (30°C ± 2°C & 65±5%RH) stability study reports of 03 batches	
5.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. L.Dis.No:93420/TS/2022 by M/s ALPHAMED FORMULATIONS PRIVATE	

<table>
<tr><td></td><td></td><td>LIMITED issued by Drugs Control Administration Government of Telangana. The certificate is valid till 15-08-2023.

<tr><td>11.</td><td>Record of comparative dissolution data (where applicable)</td><td>Firm has submitted Comparative dissolution study of their product against Aristo 75/20 capsule :
<table>
<tr><td>Feature</td><td>Reference product</td><td>Product of M/s The Searle Company</td></tr>
<tr><td>Brand name</td><td>Aristo capsule 75mg + 20mg</td><td>Anzo D MR capsule</td></tr>
<tr><td>Batch No.</td><td>1394180100</td><td>20PD-271</td></tr>
</table>
Comparative dissolution studies have been performed in following mediums:

1. pH 1.2 HCl buffer (omeprazole)
2. pH 4.5 Acetate buffer (diclofenac sodium)
3. pH 6.8 Phosphate buffer (both API)
4. purified water (diclofenac sodium)

on the basis of similarity factor (f2) result i.e NLT 50 of dissolution profile of both API in test product and reference product, both products are similar.</td></tr>
</table>

12.	Data of 03 batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
13.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
14.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:

Permission/approval for manufacturing omeprazole delayed release pellets from relevant DCA.
Analytical Method Validation studies to be submitted by the firm.
Justify selection of Aristo 75/20 capsule for conducting comparative dissolution profile. Give details of aforementioned brand i.e manufacturer, approval status etc
Whether omeprazole pellets are tested in acetate medium or not, its not clear in profile. Clarify the results/release profile of each API tested in different mediums and conclude results accordingly, in CDP report
Innovator (EMA approved) product is Each modified release capsule contains 75 mg diclofenac sodium (25 mg as gastro resistant pellets and 50 mg as prolonged release pellets) and 20 mg of omeprazole (gastro-resistant pellets) however MR pellets of diclofenac sodium used by the firm has to be clarified in this regard.
Method of analytical testing to be submitted from pellets manufacturer.
Drug excipient computability (carried out by pellets manufacturer) to be submitted.
Justification to be provided for selection of acceptance criteria of dissolution (Q value, dissolution time, sampling time and medium etc)

Firm has submitted reply against above mentioned shortcomings (dated 08.11.2022) which is found unsatisfactory.

Decision: Registration Board deferred the application for above mentioned shortcomings.

Sr.#	Observation	Reply	Remarks
	Permission/approval for manufacturing omeprazole delayed release pellets from relevant DCA.	Firm has submitted copy of GMP certificate No. L.Dis.No. 4073/stores/2020 to M/s ALPHAMED FORMULATIONS PRIVATE LIMITED dated 20.11.2020 issued by Drugs Control Administration Government of Telangana. The certificate is valid till 20-11-2023.	Complied
	Analytical Method Validation studies to be submitted by the firm.	submitted	Complied
	Justify selection of Aristo 75/20 capsule for conducting comparative dissolution profile. Give details of aforementioned brand i.e manufacturer, approval status etc	Aristo 75/20 capsule is enlisted in Nationally Authorized Medicinal Product by EMA , member state where product is authorized is Germany (DE).	Complied

	Whether omeprazole pellets are tested in acetate medium or not, its not clear in profile. Clarify the results/release profile of each API tested in different mediums and conclude results accordingly, in CDP report	We have performed CDP in guidance of WHO technical report series No 992, 2015 as follows: "for delayed-release product dissolution test in acid medium (pH 1.2) for 2 hours followed by dissolution in pH 6.8. Regarding CDP of MR diclofenac sodium pellets, firm clarified that due to enteric coated and prolonged release nature of pellets there is no significant release in Ph 1.2 therefore they used purified water instead fas per WHO technical report series No 992, 2015 as under: "Water may be considered as an additional medium, especially when the API is unstable in the buffered media to the extent that the data are unusable."	Complied
	Innovator (EMA approved) product is Each modified release capsule contains 75 mg diclofenac sodium (25 mg as gastro resistant pellets and 50 mg as prolonged release pellets) and 20 mg of omeprazole (gastro-resistant pellets) however MR pellets of diclofenac sodium used by the firm has to be clarified in this regard.	MR pellets of diclofenac sodium used by the firm are same as innovator product i.e: Each modified release capsule contains 75 mg diclofenac sodium (25 mg as gastro resistant pellets and 50 mg as prolonged release pellets)	Complied
	Method of analytical testing to be submitted from pellets manufacturer.	Submitted	Complied
	Drug excipient computability (carried out by pellets manufacturer) to be submitted.	Drug excipient computability studies submitted for both pellets (Diclofenac sodium and omeprazole) from pellets manufacturer	Complied
	Justification to be provided for selection of acceptance criteria of dissolution (Q value, dissolution time, sampling time and medium etc)	As described below	Complied

Reply:

This is in reference to query regarding "Justification to be provided for selection of acceptance criteria of dissolution (Q value, dissolution time, Sampling time and medium etc.,".

As the product is not available in any pharmacopoeia that is why We, The Searle Company Limited combine the both monographs available for different pellets i.e. Diclofenac delayed released pellets and Diclofenac Extended released pellets and design a criteria to make assure that the dissolution criteria should be able to quantify the release of delayed released pellets along with the prolong released pellets simultaneously. For further elaboration please find below the details in the table;

Time	**Delayed Released Pellets (i.e., 25mg)**	**Extended Released Pellets (i.e., 50mg)**	**Total (Delayed Released Pellets + Extended Released Pellets) (i.e., 75mg)**	**Proposed Limit**
1 Hr	75% (Q) of 25mg = 18.75mg	Minimum 10% of 50mg = 5mg	23.75 mg of 75mg = 31.6%	NLT 25%
5 Hr	75% (Q) of 25mg = 18.75mg	55% of 50mg = 27.5mg	46.25mg of 75mg = 61%	60%±10% i.e.(50 – 70)%
10 Hr	75% (Q) of 25mg = 18.75mg	75% of 50mg = 37.5mg	56.25mg of 75mg = 75%	75%±10% (65 – 85)%
16 Hr	75% (Q) of 25mg = 18.75mg	85% of 50mg = 42.5mg	61.25mg of 75mg = 81%	NLT 75%
24 Hr	75% (Q) of 25mg = 18.75mg	-	-	NLT 80%

Decision of 324th meeting:

Deferred for following:

- Review of applied formulation against the innovator product for clarification regarding the Diclofenac sodium pellets, whether both modified and delayed release pellets were used or only modified release pellets.
- Justification for the applied pharmacological group.

Reply:

- Firm has submitted CoA of MR Diclofenac sodium pellets from pellet manufacturer i.e M/s ALPHAMED FORMULATIONS PRIVATE LIMITED confirming proportion of both delayed release pellets and prolonged release pellets in formulation.
- Firm has submitted reference of WHO ATC code i.e **M01AB55** which justified mentioned pharmacotherapeutic group.

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application**

Date of Initiation	28-10-2021	28-10-2021	28-10-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Invoice NO JTRF210911-MQ Verified by DRAP Lahore 14373/204DRAP Dated 24-09-2021.wherein Cefepime HCl with L-Arginine 1000gm has been imported Batch No 1011AJ89DB.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (AD-PEC[XX]):

1.6.5 Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.
3.2.S.4 CoA from Drug Product manufacturer is not as per USP. The Assay limit as per USP (44) is 825ug/mg to 911ug/mg (on anhydrous basis) while assay result mentioned in CoA from Drug product manufacturer is 538 ug/mg (on anhydrous basis)
3.2.S.4 Following tests are not mentioned in CoA of Drug Substance (both from Drug Product manufacturer and Drug Substance manufacturer): crystallinity, water determination. Moreover, acceptance criteria for impurity testing is not as per USP.
3.2.S.4 The L-arginine, at an approximate concentration of 725 mg/g of cefepime, is added reference product (USFDA approved) to control the pH of the constituted solution at 4.0–6.0. Calculation of arginine quantity in bulk powder to be provided.
3.2.S.4 Provide results of analysis of relevant batch(es) of Drug Substance (Batch No 1011AJ89DB) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture

3.2.P.8 In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products_en.pdf)
3.2.P.8 In stability testing Pharmacopoeial tests like BET, sterility test, water determination and uniformity of dosage unit has not been performed.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports on product
3.2.P.1 Provide information including type of diluent, its composition, quantity or volume, specifications Regulatory status of diluent in Pakistan is required with details of manufacturer and Registration No.
3.2.P.2 Perform suitability testing of proposed container closure system (Ph.Eur type II glass vial) as per pharmacopeia.
3.2.P.2 Justify selection of that particular comparator product.
3.2.P.2 Compatibility studies of drug product with diluent is not provided.
3.2.P.3 Calculation regarding potency adjustment (salt factor and assay result of drug substance) has not been provided in Batch formula/ Master formula.

Decision 323rd meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months

Sr.#	Observations	Reply	Remarks
1.	Approval of Drug Substance/Drug Manufacturing License (DML)/Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided.	Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by China Food and Drug Administration (No SD20180660) valid till 08.02.2023 is provided	Complied
2.	CoA from Drug Product manufacturer is not as per USP. The Assay limit as per USP (44) is 825ug/mg to 911ug/mg (on anhydrous basis) while assay result mentioned in CoA from Drug product manufacturer is 538 ug/mg (on anhydrous basis)	CoA of Drug substance as per USP is submitted from Drug product manufacturer wherein assay result is mentioned as **893 ug/mg** (anhydrous basis) which falls within limit (**825ug/mg to 911ug/mg)** as per USP. The assay result obtained as 519ug/mg (on as is basis)	Complied
3.	Following tests are not mentioned in CoA of Drug Substance (both from Drug Product manufacturer and Drug Substance manufacturer): crystallinity, water determination. Moreover, acceptance criteria for impurity testing is not as per USP.	CoA of Drug substance as per USP (both from Drug Product manufacturer and Drug Substance manufacturer) wherein crystallinity and water determination tests were mentioned	Complied
4.	The L-arginine, at an approximate concentration of 725 mg/g of cefepime, is added in reference product (USFDA approved) to control the pH of the	The ratio of L Arginine and cefepime activity	Complied

	constituted solution at 4.0–6.0. Calculation of arginine quantity in bulk powder to be provided.	has been provided as under: Sterile arginine : cefepime activity 0.707 : 1 In total quantity (cefepime HCl with L arginine) of 1.707g, quantity of L arginine used = 0.707g (i.e 707mg/g or 39.94%)	
5.	Provide results of analysis of relevant batch(es) of Drug Substance (Batch No 1011AJ89DB) performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (COA) of the same batch from Drug Substance / API manufacture	CoA of Drug substance to be provided (from Drug product manufacturer) already provided CoA is of batch No **1011A18906**	CoA of Drug substance of Batch No 1011AJ89DB, to be provided from Drug Product manufacturer
6.	In use stability data (reconstituted form) to be provided as per guidance document by EMA. (https://www.ema.europa.eu/en/documents/scientific-guideline/note-guidance-use-stability-testing-human-medicinal-products en.pdf)	In use stability data (reconstituted with WFI) for period of 24 hours (at 30˚C ± 2˚C / 65% ± 5%RH) is provided, for all three stability batches	Complied
7.	In stability testing Pharmacopoeial tests like BET, sterility test, water determination and uniformity of dosage unit has not been performed.	Stability study report is provided wherein pharmacopoeial quality parameters like BET, sterility test, water determination and uniformity of dosage unit, were tested	Complied
8.	Compliance Record of HPLC software 21CFR & audit trail reports on product	Provided	Complied
9.	Provide information including type of diluent, its composition, quantity or volume, specifications Regulatory status of diluent in Pakistan is required with details of manufacturer and Registration No.	**Sterile water for injection** is used for reconstitution. Details mentioned below: **Aquakan 5ml Reg No:111993 by Jaskan pharmaceutical**	Complied
10.	Perform suitability testing of proposed container closure system (*Ph.Eur* type II glass vial) as per pharmacopeia	Tests and specifications of Type II glass vial is provided (including pharmacopoeial tests of hydrolytic resistance i.e glass surface test and glass grain tests)	Complied

11.	Justify selection of that particular comparator product. Moreover pharmaceutical equivalence study against Jaspime 500mg injection has not been performed (instead Jaspime 1000mg injection was used against Cefstar 500 mg Injection)	Innovator product is not available in Pakistan hence **Maxum 1.0gm Injection** Curexa Health Pvt LTD, Batch No 2180120 was selected for pharmaceutical equivalence study.	Justified
12.	Compatibility studies of drug product with diluent is not provided.	No any incompatibility is recorded with diluent.	
13.	Calculation regarding potency adjustment (salt factor and assay result of drug substance) has not been provided in Batch formula/ master formula.	Calculation provided including assay result, LOD and Arginine content.	Calculation regarding potency adjustment (salt factor) is not provided. Moreover, batch formula/master formula to be updated for clarification of quantity used after potency adjustment.

Decision: Deferred for following reasons:

- **CoA of Drug substance of Batch No 1011AJ89DB, to be provided from Drug Product manufacturer**
- **Calculation regarding potency adjustment (salt factor) is to be provided. Moreover, batch formula/master formula to be updated for clarification of quantity used after potency adjustment.**

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 790 dated 10th January 2022.
	Details of fee submitted	PKR 75,000/- dated 08 December, 2021
	The proposed proprietary name / brand name	TIGLOZIN Tablet 5mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Ertugliflozin L Pyroglutamic acid equivalent to Ertugliflozin…5mg (Innovator's Specs.)
	Pharmaceutical form of applied drug	Light pink colored, spindle shaped coated tablet engraved NQ on one side while other side engraved bisect line.
	Pharmacotherapeutic Group of (API)	A10BK04 Drugs used in diabetes, Sodium glucose co-transporter 2 (SGLT2) inhibitors.
	Reference to Finished product specifications	Innovator's Specs.
	Proposed Pack size	10's, 14's, 20's, 28's & 30's tablets
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	STEGLATRO™ (Ertugliflozin) tablets, for oral use by Merck Sharp & Dohme Corp., (USFDA Approved).
	For generic drugs (me-too status)	Ertuvia 5mg Tablet (Reg. No. 110362) of M/s Ferozsons Laboratories Limited.

	GMP status of the Finished product manufacturer	GMP Certificate granted based on Inspection conducted on 19th September 2020, issued for Tablet (General & Antibiotic), Capsule (General & Cephalosporin), Dry Powder for Suspension (General Antibiotic & Cephalosporin), Oral Liquid (Syrup) (Non-Antibiotic & Antibiotic), Cream / Ointment / Lotion (Non-Antibiotic & Antibiotic & Steroids), Eye & Ear Drops (Non-Antibiotic & Antibiotic & Steroids), Liquid Enema (General), Sachet (General), Small Volume Lyophilized Injectable (Non-Antibiotic, Antibiotic), Gel & Tablet (Hormones) Sections.
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province-123000, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification / validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Monograph of Ertugliflozin is present as per In-house (Manufacturer's) specifications. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	API Stability Study Conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 Months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 Months. Batches: 20150328, 20150406 and 20150513.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer mediums) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against STEGLATRO Tablet 5mg (Ertugliflozin) of M/s Merck Sharp & Dohme Ltd. by performing quality tests (Description, Identification, Dissolution and Assay). CDP have been performed against the same brand

		i.e. STEGLATRO Tablet 5mg (Ertugliflozin) of M/s Merck Sharp & Dohme Ltd., in Acid Medium 0.1N HCl (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). More than 85% of both test and reference samples showed release within 15 minutes.
	Analytical method validation / verification of product	Method validation studies have been submitted including linearity, range, accuracy, precision, and specificity.

STABILITY STUDY DATA

Manufacturer of API	Fuxin Long Rui Pharmaceutical Co., Ltd.		
API Lot No.	IG-20210126-D01-IG06-01		
Description of Pack (Container closure system)	Alu - Alu blister of 10's, 14's, 20's, 28's & 30's tablets packed in unit carton.		
Stability Storage Condition	Real Time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real Time: 06 Months Accelerated: 06 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	435DS01	435DS02	435DS03
Batch Size	1,500 Tablets	1,500 Tablets	1,500 Tablets
Manufacturing Date	07 - 2021	07 - 2021	07 - 2021
Date of Initiation	30-07-2021	30-07-2021	30-07-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any).	The Firm have submitted information of 07 Products approved previously with stability data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Liaoning Fuxin Management Committee for Flouride Industrial Development Zone, China valid till 23/08/2023 along with copy of Manufacturing License.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. HN20210326-A dated 28/04/ 2021 duly attested by Assistant Director, DRAP, Karachi on 11-06-2021 has been provided.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:
Initial Stability Study Data was provided for 03 Months along with application dossier on Form 5F, which was later on completed to 06 Months vide Dy. No. 4534 dated 17 FEB 2022.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 791 dated 10th January 2022.
	Details of fee submitted	PKR 75,000/- dated 08 December, 2021
	The proposed proprietary name / brand name	**TIGLOZIN Tablet 15mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film-coated tablet contains: Ertugliflozin L Pyroglutamic acid equivalent to Ertugliflozin…15mg (Innovator's Specs.)
	Pharmaceutical form of applied drug	Reddish pink colored, spindle shaped coated tablet engraved NQ on one side while other side engraved bisect line.
	Pharmacotherapeutic Group of (API)	A10BK04 Drugs used in diabetes, Sodium glucose co-transporter 2 (SGLT2) inhibitors.
	Reference to Finished product specifications	Innovator's Specs.
	Proposed Pack size	10's, 14's, 20's, 28's & 30's tablets
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	STEGLATRO™ (Ertugliflozin) tablets, for oral use by Merck Sharp & Dohme Corp., (USFDA Approved).
	For generic drugs (me-too status)	Ertuvia 15mg Tablet (Reg. No. 110363) of M/s Ferozsons Laboratories Limited.
	GMP status of the Finished product manufacturer	GMP Certificate granted based on Inspection conducted on 19th September 2020, issued for Tablet (General & Antibiotic), Capsule (General & Cephalosporin), Dry Powder for Suspension (General Antibiotic & Cephalosporin), Oral Liquid (Syrup) (Non-Antibiotic & Antibiotic), Cream / Ointment / Lotion (Non-Antibiotic & Antibiotic & Steroids), Eye & Ear Drops (Non-Antibiotic & Antibiotic & Steroids), Liquid

		Enema (General), Sachet (General), Small Volume Lyophilized Injectable (Non-Antibiotic, Antibiotic), Gel & Tablet (Hormones) Sections.
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co., Ltd. Fluoride Industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province-123000, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification / validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Monograph of Ertugliflozin is present as per In-house (Manufacturer's) specifications. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	API Stability Study Conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 Months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 Months. Batches: 20150328, 20150406 and 20150513.
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer mediums) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against STEGLATRO Tablet 15mg (Ertugliflozin) of M/s Merck Sharp & Dohme Ltd. by performing quality tests (Description, Identification, Dissolution and Assay). CDP have been performed against the same brand i.e. STEGLATRO Tablet 15mg (Ertugliflozin) of M/s Merck Sharp & Dohme Ltd., in Acid Medium 0.1N HCl (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). More than 85% of both test and reference samples showed release within 15 minutes.
	Analytical method validation / verification of product	Method validation studies have been submitted including linearity, range, accuracy, precision, and specificity.

STABILITY STUDY DATA			
Manufacturer of API	Fuxin Long Rui Pharmaceutical Co., Ltd.		
API Lot No.	IG-20210126-D01-IG06-01		
Description of Pack (Container closure system)	Alu - Alu blister of 10's, 14's, 20's, 28's & 30's tablets packed in unit carton.		
Stability Storage Condition	Real Time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real Time: 06 Months Accelerated: 06 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	436DS01	436DS02	436DS03
Batch Size	1,500 Tablets	1,500 Tablets	1,500 Tablets
Manufacturing Date	07 - 2021	07 - 2021	07 - 2021
Date of Initiation	30-07-2021	30-07-2021	30-07-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any).	The Firm have submitted information of 07 Products approved previously with stability data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by Liaoning Fuxin Management Committee for Flouride Industrial Development Zone, China valid till 23/08/2023 along with copy of Manufacturing License.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Invoice No. HN20210326-A dated 28/04/ 2021 duly attested by Assistant Director, DRAP, Karachi on 11-06-2021 has been provided.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator: Initial Stability Study Data was provided for 03 Months along with application dossier on Form 5F, which was later on completed to 06 Months vide Dy. No. 4535 dated 17 FEB 2022.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer mediums) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against STEGLUJAN™ 5/100mg (Ertugliflozin / Sitagliptin) tablets, for oral use by Merck Sharp & Dohme Corp. by performing quality tests (Description, Identification, Dissolution and Assay). CDP have been performed against the same brand i.e. STEGLUJAN™ 5/100mg (Ertugliflozin / Sitagliptin) tablets, for oral use in Acid Medium 0.1N HCl (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). More than 80% of both test and reference samples showed release within 15 minutes.
	Analytical method validation / verification of product	Method validation studies have been submitted including Verification of Assay Method, Specificity, Accuracy, Precision, Linearity concentration and Peak Range.

No. of Batches	03		
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any).	Firm has referred to onsite inspection report of their products EMPAZON 10mg Tablets / EMPAZON 25mg Tablets (Empagliflozin), Dayzol 30mg Capsules / Dayzol 60mg Capsules (Dexlansoprazole) conducted on 1st June, 2021 and presented in 307th meeting of Registration Board held on 08-10th June , 2021.	

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Ertugliflozin L Pyroglutamic acid: Copy of GMP certificate issued by Zhejiang Medical Center for Economic Development, China along with copy of License. Sitagliptin Phosphate Monohydrate: Copy of GMP certificate issued by Zhejiang Food and Drug Administration, China along with copy of License.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Ertugliflozin L Pyroglutamic acid: Copy of Invoice No. CF20210706 dated 05/08/ 2021 duly attested by Assistant Director, DRAP, Lahore on 25-08-2021 has been provided. Sitagliptin Phosphate Monohydrate: Copy of Invoice No. 21APE040413 dated 08/05/ 2021 duly attested by Assistant Director, DRAP, Lahore on 21-05-2021 has been provided.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Initial Stability Study Data was provided for 03 Months along with application dossier on Form 5F, which was later on completed to 06 Months (Accelerated) and 09 Months (Real Time) vide Dy. No. 3653 dated 08 FEB 2023.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 02: Priority applications on the basis of Export Facilitation of Locally Manufactured Drugs:

The following dossiers have been evaluated reference to the letter No. F.1-6/2019-PR-I (EFD) dated 06th October 2022 from Assistant Director (PR-I/EFD) wherein it has been stated that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the pharmaceutical

i.e. one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm (M/s. Hilton Pharma (Pvt.) Ltd.) have achieved the benchmark of export of more than 100,000 USD (1123,074.35 USD) during the fiscal year 2021-2022 and have submitted their applications for priority consideration in lieu of export facilitation for Registration Board please: -

1004.	**Name and address of manufacturer / Applicant**	**M/s. Hilton Pharma (Pvt.) Ltd. Plot No. 13-14 & 43, Sector-15, Korangi, Industrial Area, Karachi.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
43.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product "HILVEL 400mg + 100mg (Sofosbuvir +Velpatasvir)", which was conducted on 14th December, 2017 and was presented in 277th meeting of Registration Board held on 27-29th December, 2017. Registration Board decided to approve registration of "HILVEL 400mg / 100mg (Sofosbuvir + Velpatasvir" by M/s. Hilton Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Following observations were reported in the report: i. The HPLC software is 21 CFR compliant. ii. Audit trail on the testing reports of Hilvel Tablets 400mg+100mg is available. iii. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
44.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	1. Copies of COAs (Batch # D84-201101) of API (Ertugliflozin) from M/s Chifeng Arker Pharmaceutical Technology Co., Ltd., China and M/s Hilton Pharma (Pvt.) Ltd are submitted. 2. Copies of COAs (Batch # MET/B/01/20100269) of API (Metformin hydrochloride) from M/s Abhilash chemicals and pharmaceuticals Pvt. Ltd. India and M/s Hilton Pharma (Pvt.) Ltd are submitted.
45.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Submitted.
46. DOCUMENTS / DATA PROVIDED BY THE APPLICANT		
Sr. No.	**Documents to Be Provided**	**Status**
1.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product "HILVEL 400mg + 100mg (Sofosbuvir +Velpatasvir)", which was conducted on 14th December, 2017 and was presented in 277th meeting of Registration Board held on 27-29th December, 2017. Registration Board decided to approve registration of "HILVEL 400mg / 100mg (Sofosbuvir + Velpatasvir" by M/s. Hilton Pharma (Pvt.) Ltd., Karachi. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Following observations were reported in the report: iv. The HPLC software is 21 CFR compliant. v. Audit trail on the testing reports of Hilvel Tablets 400mg+100mg is available. vi. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	3. Copies of COAs (Batch # D84-201101) of API (Ertugliflozin) from M/s Chifeng Arker Pharmaceutical Technology Co., Ltd., China and M/s Hilton Pharma (Pvt.) Ltd are submitted. 4. Copies of COAs (Batch # MET/B/01/20100269) of API (Metformin hydrochloride) from M/s Abhilash chemicals and pharmaceuticals Pvt. Ltd. India and M/s Hilton Pharma (Pvt.) Ltd are submitted.
3.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Submitted.
4.	Stability study data of API from API manufacturer	APIs' Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 48 Months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 06 Months Ertugliflozin L-Pyroglutamic acid: Batches: D84-161201, D84-161202, D84-170101 Metformin HCl: Batches: MET/1010525, MET/0910364, MET/08/00408, MET/07/00848, MET/06/00548, MET/06/00547

<tr><td colspan="3">Decision: Approved with Innovator’ specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.</td></tr>
</table>

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Registration Board further decided to verify fee challan as per decision of 285th meeting of Registration Board**

Case No. 03: Withdrawal of CTD (Form 5F) Application Dossiers:

M/s Hilton Pharma Pvt Ltd. Karachi vide their letter Ref. No. MN/ZA/230227-01 dated 27th Feb. 2023 have submitted that they had applied the following Product Registration Applications on both Form 5D and Form 5F, and have requested to consider Form 5D application dossiers and to withdraw following CTD / Form 5F applications: -

Sr. No.	Name and Address of Manufacturer	Brand Name	Composition	Type of Form, Diary No and Date of Submission, Deposited Fee and Date	Date
1008.	M/s Hilton Pharma Pvt Ltd. Plot No. 13-14, Sector 15, Korangi Industrial Area, Karachi, Pakistan	Ertihil-Met 2.5/500 mg Tablet	Each Film Coated Tablet Contains: Ertugliflozin L-Pyroglutamic Acid Eq. to Ertgliflozin…2.5mg Metformin Hcl…500mg	Form-5F Dy.No 11029 dated 06-05-2022 Rs.30,000/- dated 18-03-2022	2022-05-06
1009.	-do-	Ertihil-Met 2.5/1000 mg Tablet	Each Film Coated Tablet Contains: Ertugliflozin L-Pyroglutamic Acid Eq. to Ertgliflozin…2.5mg Metformin Hcl…1000mg	Form-5F Dy.No 11033 dated 06-05-2022 Rs.30,000/- dated 18-03-2022	2022-05-06
1010.	-do-	Ertihil-Met 7.5/500 mg Tablet	Each Film Coated Tablet Contains: Ertugliflozin L-Pyroglutamic Acid Eq. to Ertgliflozin…7.5mg Metformin Hcl…500mg	Form-5F Dy.No 11030 dated 06-05-2022 Rs.30,000/- dated 18-03-2022	2022-05-06
1011.	-do-	Ertihil-Met 7.5/1000 mg Tablet	Each Film Coated Tablet Contains: Ertugliflozin L-Pyroglutamic Acid Eq. to Ertgliflozin…7.5mg Metformin Hcl…1000mg	Form-5F Dy.No 11031 dated 06-05-2022 Rs.30,000/- dated 18-03-2022	2022-05-06

Decision: Registration Board acceded to the request of withdrawal of above cited applications of Form 5F from firm and declared them as disposed of.

Agenda of Evaluator PEC-XXII

Case No. 01 – Routine registration application of Human drugs on Form-5 (Local)

1012.	Name and address of manufacturer/ Applicant	M/s. Novartana Pharmaceuticals (Pvt.) Ltd., 87-B, Sunder Industrial Estate, Raiwind Road, Lahore.
	Brand Name + Dosage Form + Strength	Xenova-CF 12.5mg Tablet
	Composition	Each enteric film coated controlled release tablet contains Paroxetine (as paroxetine hydrochloride hemihydrate)….12.5mg
	Diary No. Date of R & I & fee	Dy. No. 17321 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 0768896 dated 06-03-2019
	Pharmacological Group	Selective serotonin reuptake inhibitors

		ATC code: N06AB05
	Type of Form	Form-5
	Finished product Specification	USP
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	Paxil CR Tablet approved by US-FDA
	Me-too status	Panox CR 12.5mg tablet Reg. No. 081953 by M/s. Regal Pharma
	GMP status	Not Provided
	Remarks of the Evaluator	i. Valid copy of DML is required ii. Latest GMP certificate/inspection report of M/s Novartana Pharmaceuticals conducted within last 03 years is required. iii. Section Approval Letter of Novartana Pharmaceuticals is required.
	Decision: Deferred for the updated status of GMP of the firm from the QA&LT divison.	
1013.	Name and address of manufacturer/ Applicant	M/s. Novartana Pharmaceuticals (Pvt.) Ltd., 87-B, Sunder Industrial Estate, Raiwind Road, Lahore.
	Brand Name + Dosage Form + Strength	Xenova 20mg tablet
	Composition	Each film coated tablet contains Paroxetine (as paroxetine hydrochloride hemihydrate)….20mg
	Diary No. Date of R & I & fee	Dy. No. 17329 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 0768895 dated 06-03-2019, endorsed on 07.03.2019.
	Pharmacological Group	Selective serotonin reuptake inhibitors ATC code: N06AB05
	Type of Form	Form-5
	Finished product Specification	USP
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	Paroxetine 20 mg film-coated tablets approved by MHRA
	Me-too status	Parotine 20mg tablet Reg. No. 61924 by M/s. Mediate Pharma
	GMP status	Not Provided
	Remarks of the Evaluator	i. Valid copy of DML is required ii. Latest GMP certificate/inspection report of M/s Novartana Pharmaceuticals conducted within last 03 years is required. iii. Section Approval Letter of Novartana Pharmaceuticals is required.
	Decision: Deferred for the updated status of GMP of the firm from the QA&LT divison.	
1014.	Name and address of manufacturer/ Applicant	M/s. Novartana Pharmaceuticals (Pvt.) Ltd., 87-B, Sunder Industrial Estate, Raiwind Road, Lahore.
	Brand Name + Dosage Form + Strength	Xenova-CF 25mg tablet
	Composition	Each enteric film coated controlled release tablet contains Paroxetine (as paroxetine hydrochloride hemihydrate)….25mg
	Diary No. Date of R & I & fee	Dy. No. 17327 dated 07.03.2019. Fee paid Rs. 20,000/- vide Slip No. 0768897 dated 06-03-2019, endorsed on 07.03.2019.

Agenda of Deputy Director PE&R (Mr. Muneeb Ahmed)

1062.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Horizon Healthcare (Pvt.) Ltd. Plot no. 33 Sundar Industrial Estate Lahore.**
	Name, address of Manufacturing site.	M/s Horizon Healthcare (Pvt.) Ltd. Plot no. 33 Sundar Industrial Estate Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2948 dated 31.01.2022
	Details of fee submitted	Rs.30,000/- dated 13.01.2022
	The proposed proprietary name / brand name	VALTRIL TABLETS 50MG
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Sacubitril/ Valsartan……24mg/ 26mg
	Pharmaceutical form of applied drug	Solid Dosage Form (Tablet)
	Pharmacotherapeutic Group of (API)	**Sacubitril:** A neprilysin inhibitor, antihypertensive drug. **Valsartan**: Angiotensin II Antagonist
	Reference to Finished product specifications	As per innovator Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ENTRESTO Tablets by US FDA
	For generic drugs (me-too status)	Savesto 50mg tablet by Getz Pharma (Pvt) Ltd.
	GMP status of the Finished product manufacturer	Last inspection report dated 14-10-2021 concluded good level of cGMP compliance.
	Name and address of API manufacturer.	**Zhuhai Rundu Pharmaceutical Co., Ltd.** No.6, North Airport Road, Sanzao Town, Jinwan District, Zhuhai City, Guangdong Province, P. R China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to structure, general properties, Manufacturers, description of manufacturing process and controls, Characterization, Impurities, Specifications, Analytical procedures, Validation of analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of General information, General properties, Manufacturers, description of manufacturing process and process controls, Characterization, Impurities, Control of drug substance, Reference standard or materials container closure system and stability studies of drug substance.

	Stability studies	**Sacubitril/Valsartan** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months **Batch No** / **Accelerated** / **Long Term** 57317080101 / 6 Months / 36 Months 57317080102 / 6 Months / 36 Months 57317080103 / 6 Months / 36 Months
	Module-III (Drug Product):	The firm has submitted detail of Drug Products including Description and composition of drug product, Pharmaceutical Development, Manufacturing process development, Microbiological attribution, Manufacturer, Master formulations, Description of Manufacturing Process and Process Controls, Control of Critical Steps and Intermediates, Process Validation and/ or Evaluation, Control of Excipients with specification and Analytical methods, Control of Drug Products including Finished product specifications and test methods, validation of Analytical methods, Batch analysis , Characterization of impurities, reference standard or impurities, Container closure and stabilities studies.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is UPERIO 50mg Tablet by Novartis Pharma by performing quality tests (Identification, Assay, Dissolution) CDP has been performed against the same brand that is Savesto 50mg Tablet by Getz Pharma in Acid media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8)
	Analytical method validation/verification of product	Method verification studies have submitted including Introduction, Verification of assay method, Specificity, Accuracy, Precision, Linearity concentration and peak range.

STABILITY STUDY DATA

Manufacturer of API	**Sacubitril/Valsartan** **Zhuhai Rundu Pharmaceutical Co., Ltd.** No.6, North Airport Road, Sanzao Town, Jinwan District, Zhuhai City, Guangdong Province, P.R.of China		
API Lot No.	57319070802		
Description of Pack (Container closure system)	Alu-Alu. Blisters with aluminum foil having leaflet and packed in unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 8, 12, 16, 20, 24(Months)		
Batch No.	SVL/ 001	SVL/002	SVL/003
Batch Size	1000 Tablets	1000 Tablets	1000 Tablets
Manufacturing Date	06-2020	06-2020	06-2020
Date of Initiation	07-06-2020	08-06-2020	09-06-2020
No. of Batches	03

<tr><th colspan="3">Administrative Portion</th></tr>
<tr><td>1.</td><td>Reference of previous approval of applications with stability study data of the firm (if any)</td><td>Firm has referred to onsite inspection report of their product:

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin)

Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole)

which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June , 2021.
Registration Board decided to approve registration of

EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin)

Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole)

by M/s. Horizon Healthcare (Pvt) Ltd. Lahore. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months.
Following two observations were reported in the report:
ix. The HPLC software is 21 CFR compliant.
x. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available.
xi. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
xii. Verification of performance of dissolution test at buffer stage pH 5.5 for Dayzol Capsules 30mg and 60mg.
Performance of dissolution test for EMPAZON 10mg and 25mg Tablets with revised specifications i.e not less than 80% (Q) in 15minutes at initial and 01-month time point.</td></tr>
<tr><td>2.</td><td>Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.</td><td>Sacubitril/Valsartan

Firm had provided valid GMP and DML Certificate of
Zhuhai Rundu Pharmaceutical Co., Ltd. Issued by Drugs Control Administration Government of China,
GMP Valid up to: 15-09-2026
DML Valid up to: 10-12-2025</td></tr>
<tr><td>3.</td><td>Documents for the procurement of API with approval from DRAP (in case of import).</td><td>Copy of commercial invoice attested by AD I&E DRAP, Lahore, has been submitted.
Sacubitril/Valsartan

<table>

</table>
</td></tr>
<tr><td>4.</td><td>Data of stability batches will be supported by attested respective documents like chromatograms,
Raw data sheets, COA, summary data sheets etc.</td><td>Submitted</td></tr>
</table>

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail reports have been submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of Digital data logger for temperature and humidity monitoring of stability chambers.

Remarks of Evaluator:
In response to the DRAP letter No. F.1-1/2022/PEC-DRAP dated 09.03.2023, the firm submitted reply vide Dy. No. 7054 dated 10.03.2023. The firm has rectified the shortcomings communicated vide aforesaid letter. Except where the firm was requested to pro vide justification for using wet granulation method for formulation development, as the innovator is performing the dry granulation roller compaction process. In response the firm submitted that they are using wet granulation method with IPA for enhancing tablet compressibility.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1066.	Name, address of Applicant / Marketing Authorization Holder	**M/s Next Pharmaceutical Products (Pvt.) Ltd., Plot # 44 A & B Sundar Industrial Estate, Lahore, Pakistan.**

	Name, address of Manufacturing site.	M/s Next Pharmaceutical Products (Pvt.) Ltd., Plot # 44 A & B Sundar Industrial Estate, Lahore, Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 1743 dated 19.01.2022
	Details of fee submitted	Deposit slip No. 390635913 PKR 30,000/-: dated 28/12/2021
	The proposed proprietary name / brand name	**VELVET-S 97/103MG FILM COATED TABLET**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Sacubitril…….97mg Valsartan…….103mg (as Sacubitril Valsartan Sodium Salt Complex)
	Pharmaceutical form of applied drug	Green colored, oblong biconvex tablet with score line one side. Film coated oral tablet
	Pharmacotherapeutic Group of (API)	Valsartan: Angiotensin II receptor Antagonist Sacubitril: Neprilysin inhibitor
	Reference to Finished product specifications	Innovator Specification
	Proposed Pack size	07's, 14's, 28's, 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Entresto 97mg/103mg film-coated tablets, Novartis Pharmaceuticals UK Limited, UK approved.
	For generic drugs (me-too status)	1. Savesto 200mg (97/103 mg) of M/s Getz Pharma (Pvt) Ltd, Karachi. 2. Valsatril 200mg (97/103 mg) of M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi
	GMP status of the Finished product manufacturer	GMP certificate granted on 02/06/2022 Tablet (General), Capsule (General), Oral liquid (General), Cream and Ointment (General) & General Antibiotic) sections are approved.
	Name and address of API manufacturer.	Sacubitril-Valsartan Complex Nantong Chanyoo Pharmatech Co., Ltd, China LCZ696 In-House Specifications
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of

		drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (T-0001TAU, T-0002TAU, T-0003TAU)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator that is Entresto 97/103mg Tablet by Novartis Pharma Limited by performing quality tests including Identification, water content, Assay, Dissolution, Disintegration. CDP has been performed against the same brand that is Entresto Tablet by Novartis Pharma Limited in 0.1N HCl (QC medium), Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory.
	Analytical method validation/verification of product	Firm has submitted report of validation studies of analytical method of drug substance. Firm has submitted report of validation of analytical method for the drug product.

STABILITY STUDY DATA			
Manufacturer of API	Sacubitril-Valsartan Complex Nantong Chanyoo Pharmatech Co., Ltd, China **In-House Specifications**		
API Lot No.	API Batch No. RD-LCZ696-202010101		
Description of Pack (Container closure system)	The proposed pack size of Velvet- S Tablet 97/103mg is 1x14's in Alu—Alu Blister.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 2, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	**T-0001TAU**	**T-0002TAU**	**T-0003TAU**
Batch Size	2000 tab	2000 tab	2000 tab
Manufacturing Date	05-2021	05-2021	05-2021
Date of Initiation	02-06-2021	14-06-2021	14-06-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Velvet-S 24/26mg Film Coated Tablet approved in 322 Minutes of Meeting.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Nantong Chanyoo Pharmatech Co, Ltd, Yangkou Chemical Industrial Park , Rundong Coastal Economic Development Zone, China. Manufacturing License No.Su 2016512
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**COA of Batch No.** RD-LCZ696-202010101 of API (Valsartan/Sacubitril) of both Drug Substance manufacturer and Drug Product manufacturer is provided.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

No. of Batches		02	
Administrative Portion			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product: EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin) Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June , 2021. Registration Board decided to approve registration of EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin) Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole) by M/s. Horizon Healthcare (Pvt) Ltd. Lahore. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months. Following two observations were reported in the report: The HPLC software is 21 CFR compliant. i. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available. ii. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well. iii. Verification of performance of dissolution test at buffer stage pH 5.5 for Dayzol Capsules 30mg and 60mg. Performance of dissolution test for EMPAZON 10mg and 25mg Tablets with revised specifications i.e., not less than 80% (Q) in 15minutes at initial and 01-month time point.

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 44 date of submission: 02-01-2023
	Details of fee submitted	PKR 30,000/-: dated 30-12-2022 Slip no. 8659851353
	The proposed proprietary name / brand name	**Eppra 100mg/ml Oral Solution**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Levetiracetam….100mg
	Pharmaceutical form of applied drug	Oral Solution
	Pharmacotherapeutic Group of (API)	Anticonvulsants
	Reference to Finished product specifications	USP specs
	Proposed Pack size	60ml, 90ml & 120ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Keppra (Levetiracetam) 100 mg/ml oral solution of UCB Inc. (FDA approved)
	For generic drugs (me-too status)	Lerace 100mg Oral Solution of Hilton Pharma Pvt. Ltd.
	GMP status of the Finished product manufacturer	The firm is granted GMP certificate based on inspection conducted on 03-01-2022 and it is valid till 02-10-2024.
	Name and address of API manufacturer.	**M/s Dhanuka laboratories Ltd.** Plot No. SP4-4, Industrial Area, Keshwana Rajput, Kotputli, Shahpura, Jaipur-303108, Rajasthan, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO

		QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: Temp.: 30°C ± 2°C, RH: 65% ± 5% for 36 month Accelerated: Temp.: 40°C ± 2°C, RH: 75% ± 5%for 6 months Batches: (LTR-F#0001/15, LTR-F#0002/15, LTR-F#0003/15)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	The Firm has performed pharmaceutical equivalence of their developed formulation Eppra 100mg/ml Oral Solution (B #ST22E004) with comparator product Lerace Oral Solution (B #144844) of M/s Hilton Pharma Pvt Ltd. The results were found comparable with the reference product.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	**M/s Dhanuka laboratories Ltd.** Plot No. SP4-4, Industrial Area, Keshwana Rajput, Kotputli, Shahpura, Jaipur-303108, Rajasthan, India.
API Lot No.	LTR- 2002008
Description of Pack (Container closure system)	Clear liquid free from foreign particles, filled in pet amber bottle with plastic seal and cap along with graduated oral

	syringe and an adapter for the syringe.

Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Lianyungang Jari Pharmaceutical Co., ltd No. 18 Zhenhua Road, Lianyungang China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Iclusig 45mg tablet , Incyte Biosciences UK limited has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months

Background of the case:

Decision in 321st meeting of Registration Board:

Deferred for following points:

i. Justification for conducting Comparative Dissolution studies at "M/s Alpha laboratories India", instead of M/s Beacon Pharmaceuticals Bangladesh.

ii. Regulatory status of Alpha Laboratories India, whether it is licensed entity or otherwise.

In response to the above decision of the Board the firm has submitted the reply on 04.011.2022 which is as under:

The firm has again submitted copy of business agreement dated 04.06.2018 b/w M/s Beacon Pharmaceuticals Bangladesh and M/s Alpha Laboratories India wherein the M/s Alpha Laboratories India shall provide the services being expert in Bioequivalence studies of generic molecules to M/s /s Beacon Pharmaceuticals Bangladesh.

Decision in 323rd meeting of Registration Board:

Deferred for submission of evidence of License/Approval of M/s Alpha Laboratories India, from the

relevant regulatory authority of India.

Remarks in 324th meeting:

The firm has now submitted letter from manufacturer i.e. M/s Beacon Pharmaceuticals Limited indicating a website link of M/s Alpha laboratories India (www.alphalaboratories.in). The website states that **Alpha Laboratories** is a unique and leading Contract Research Organization (CRO) in India with its own in-house laboratory facilities for undertaking **Bioequivalence / Bioavailability Studies, Clinical Trial Studies (Phase I, Phase II, Phase III and Phase IV), Animal Toxicity Study, Dossier and DMF preparation, PSUR (Periodic Safety Update Reports), Medical Writing, Stability Studies, Analytical Method Development and Validation**

Decision in 324th meeting of Registration Board

Deferred for the evidence of approval for conducting Bioequivalence / Bioavailability Studies in name of M/s Alpha Laboratories India from the relevant regulatory authority of India.

Remarks:

The firm has now submitted comparative dissolution studies conducted by the manufacturer with the Innovator Product.

Decision: Registration Board while considering the submitted comparative dissolution studies conducted by the manufacturer i.e. M/s Beacon Pharmaceuticals Limited Bangladesh, Registration Board approved above product with innovator's specifications as per import policy for finished drugs. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

1080.	**Name, address of Applicant / Importer**	**M/s Himmel Pharmaceuticals (Pvt.) Ltd. 793-D, Block C, Faisal Town Lahore.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shanghai Qingsong Pharmaceutical co., Ltd Suite No. 505 Building No. 2 No. 3377 Kangxin Rd, Pudong New Area Shanghai China 201318
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,

		impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted long term stability study data of 3 batches of drug substance at 25°C ± 2°C / 60 ± 5% RH for 24 months. The accelerated stability data is conducted at 40°C ± 2°C / 75 ± 5% RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product Iclusig 45mg tablet , Incyte Biosciences UK limited has been submitted
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	HDPE Bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. Accelerated stability studies have been conducted at 40°C±2°C and 75%±5% RH for 6 months. Real time stability studies conducted at 30°C±2°C and 65% ± 5% for 24 months
Background of the case: Deferred for clarification/ submission of following documents in 321st meeting of Registration Board		
You have submitted that drug substance is white to off white powder and no polymorphic form exists, however the as per innovator data the Olaparib exists as crystalline powder in four polymorphic forms.		Copy of letter from API manufacturer stating that Polymorphic form of Olaparib is Form-A and is synthesized at their site.
API is characterized by HNMR study only, characterization of the active substance, polymorphic forms/ impurities are required to be performed as per innovator product.		The firm submitted again the HNMR study only.
Particle size (being critical quality attribute) and residual solvents are not specified.		The CoA has been submitted by the manufacturer of API indicating particle size being specified and along with data of residual solvents.
The firm was requested to clarify that drug substance specifications by drug product manufacturer are required (3.2.S.4)) along with results of analysis of relevant batch(es) of drug substance performed by drug product manufacturer used during product developmentand stability studies, along with Certificate of Analysis (CoA).		CoA of the FPP manufacturer is submitted
Comparative dissolution profile is conducted by Alpha Laboratories Mumbai India, as the submitted justification is not relevant.		The firm has submitted copy of agreement between Alpha Laboratories Mumbai India and Beacon Pharmaceuticals Bangladesh. The firm has now submitted letter from manufacturer i.e. M/s Beacon Pharmaceuticals Limited indicating a website link of M/s Alpha laboratories India (www.alphalaboratories.in). The website states that **Alpha Laboratories** is a unique and leading **Contract Research Organization (CRO)** in India with its own in-house laboratory facilities for

	undertaking **Bioequivalence / Bioavailability Studies, Clinical Trial Studies (Phase I, Phase II, Phase III and Phase IV), Animal Toxicity Study, Dossier and DMF preparation, PSUR (Periodic Safety Update Reports), Medical Writing, Stability Studies, Analytical Method Development and Validation**
Stability data of Drug Product indicates same test results/ value for the parameters like moisture content, dissolution and assay, hence raw data needs to be submitted for verification	The firm has submitted the previous stability data.

Decision in 324th meeting of Registration Board

Deferred for the evidence of approval for conducting Bioequivalence / Bioavailability Studies in name of M/s Alpha Laboratories India from the relevant regulatory authority of India.

Remarks:

The firm has now submitted comparative dissolution studies conducted by the manufacturer with the Innovator Product.

Decision: Registration Board while considering the submitted comparative dissolution studies conducted by the manufacturer i.e. M/s Beacon Pharmaceuticals Limited Bangladesh, Registration Board approved above product with innovator's specifications as per import policy for finished drugs. 	Product License Holder & Manufacturer	M/s BEACON Pharmaceuticals Limited Plant address: Kathali, Bhaluka, Mymensingh Bangladesh Office Address: 9/B/2, Toyenbee Circular Road, Motijheel Dhaka, Bangladesh
	Name of exporting country	Bangladesh
	Type of Form	Form 5-A
	Diary No. & Date of R& I	Dy. No 7363 Dated 20-02-2019
	Fee including differential fee	Rs. 100,000/- Dated 20-02-2019
	Brand Name +Dosage Form + Strength	**Lapanix 250mg Tablet**
	Composition	Each film coated tablet contains: Lapatinib Ditosylate INN 398mg eq. to Lapatinib….250mg
	Finished Product Specification	In-house
	Pharmacological Group	Anti-cancer
	Shelf life	24 Months
	Pack size & Demanded Price	150's & As per SRO
	International availability	Tyverb® 250 mg film-coated tablets (UK)
	Me-too status	TYKERB TABLETS 250MG of M/s Gsk Karachi
	Stability studies	Firm has submitted long term (24 months) at 30+2oC, 65+5%RH & accelerated (06 months) stability data at 40+ 2oC, 75+ 5% RH for three batches.
	Detail of certificates attached	Original Legalized CoPP (Certificate#. DA/6-110/2016/22466 issued on 14-10-2018 by Govt. of the people's republic of Bangladesh, Ministry of Health & Family welfare, Directorate General of Drug Administration declaring the free sale of applied product and GMP compliant status of the manufacturer i.e., M/s BEACON Pharmaceuticals Limited. Original product specific letter of authorization from product license holder is submitted.
	Remarks of the Evaluator.	Reference formulation Each film-coated tablet contains lapatinib ditosylate monohydrate, equivalent to 250 mg lapatinib while applied Each film coated tablet contains: Lapatinib Ditosylate INN 398mg eq. to Lapatinib….250mg
	Decision of 293rd meeting: Deferred for revision of composition as per reference product along with submission of requisite fee for the revision. Submission by the firm: The firm has submitted several references from RRAs confirming the monohydrate for of the salt of the applied product that is Lapatinib Ditosylate monhydrtae. Hoever, the API used for manufacturing of the applied product is Lpatinib Ditosylate.	
	Decision of 308th meeting: The Board deferred the case for clarification since the reference product contains Lapatinib Ditosylate Monohydrate while the applied product is manufactured by using Lapatinib Ditosylate. Submission by the firm:	

	The firm has submitted attested copy of declaration from the API manufacturer stating that the API manufacturer had provided the API as Lapatinib Ditosylate to M/s Beacon Pharmaceuticals ltd Bangladesh (the drug product manufacturer).
	Decision of 312th meeting: The Board deferred the case for further deliberation since the API used for manufacturing of reference product is lapatinib ditosylate monohydrate while the applied product is manufactured by using lapatinib ditosylate. Submission by the firm: The firm has submitted that the drug substance used for the manufacturing of the applied product is Lapatinib Ditosylate. A declaration letter from Drug Substance manufacturer is also submitted stating that the drug substance which has been supplied to finished product manufacturer is Lapatinib Ditosylate. It is worthy to bring the fact before the Board that the drug substance falls in BCS Class II (low solubility/high permeability) (Sourse: USFDA Biopharamceutical review of the innovator's product). Decision of 313th meeting: The Board deferred the case for further deliberation since the API used for manufacturing of reference product is lapatinib ditosylate monohydrate while the applied product is manufactured by using lapatinib ditosylate. Submission by the firm: The firm has submitted the General information on drug substance from drug substance manfuactruer that is M/s Qilu AntiBiotic (Linyi) Pharmaceuticals Ltd, China. The firm has stated that the API used in the manufacturing of the applied product is Lapatinib Ditosylate monohydrate as per the structure of the API from DMf.
	Decision of 324th meeting: Deferred for submission of scientific evidence regarding the salt form of the drug substance used in the manufacturing of stability batches since the applicant in previous submission had claimed that they had used "Lapatinib ditosylate" for manufacturing of drug product whereas innovator product is of "Lapatinib ditosylate monohydrate."
Remarks: The firm has now submitted vide dy. No. 6179 dated 06.03.2023 that as per our manufacturer Beacon Pharmaceuticals Limited, they are obtaining API Lapatinib Ditosylate monohydrate from Qilu Antibiotics Pharmaceuticals Co., Ltd. Reference product and applied product both have same API Lapatinib Ditosylate monohydrate. We are submitting following documents for the justification of API; 1. Active substance General information 3.2.S.1 (API Manufacturer Qilu Antibiotics Pharmaceuticals Co., Ltd) 2. Structural formula of API Lapatinib Ditosylate monohydrate 3. Certificate of Analysis of API from API Manufacturer Qilu Antibiotics Pharmaceuticals Co., Ltd 4. Certificate of Analysis of API of M/s Beacon Pharmaceuticals Limited	
Decision: Approved with innovator's specifications as per import policy for finished drugs. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.	

Miscellaneous Cases

M/s Next Pharmaceutical Products (Pvt.) Ltd., Plot # 44 A & B Sundar Industrial Estate, Lahore has informed they have withdrawn below applications of drugs for local manufacturing on form-5F (CTD) as these products were also submitted on Form-5D and have been registered. Details are given below:

Sr No.	Brand name	Composition	R&I date	Dy. No
1084.	Dapaglif 5mg Tablet	Each Film Coated Tablet Contains: Dapagliflozin (Propanediol Monohydrate)…5mg	25.01.2022	2372
1085.	Dapaglif 10mg Tablet	Each Film Coated Tablet Contains: Dapagliflozin (Propanediol Monohydrate)…10mg	25.01.2022	2371

1086.	Empaglif Tablets 10mg	Each Film Coated Tablet Contains: Empagliflozin…10mg	15.02.2022	4303

Decision: **Registration Board acknowledged the above information, hence applications of above products submitted by M/s Next Pharmaceutical Products (Pvt.) Ltd., Plot # 44 A & B Sundar Industrial Estate, Lahore are hereby declared as disposed off being withdrawn by the firm.**

Agenda of ex AD PEC (Mr. Zia Ullah)

Agenda of Evaluator PEC-XVII

Case No.I Registration applications of locally manufactured (Human) drugs on Form 5F.

1087.	Name, address of Applicant / Marketing Authorization Holder	M/s Horizon Healthcare (Formerly M/s Wellness Pharmaceutical Pvt. Ltd. Pvt. Ltd.) Plot No.33, Sundar Industrial Estate, Lahore. (DML No.000782)
	Name, address of Manufacturing site.	M/s Horizon Healthcare (Formerly M/s Wellness Pharmaceutical Pvt. Ltd. Pvt. Ltd.) Plot No.33, Sundar Industrial Estate, Lahore. (DML No.000782)
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Form-5F, Dy. No. 2810 dated 28-01-2022
	Details of fee submitted	PKR: 75,000/- vide online deposit slip No.286415270 dated 13-01-2022.
	The proposed proprietary name / brand name	PRINONE Tablets 267mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film-Coated Tablet Contains: Pirfenidone……267 mg
	Pharmaceutical form of applied drug	Film-coated red color, oval tablet in alu-alu blister with leaflet pack in unit carton.
	Pharmacotherapeutic Group of (API)	Immuno-suppressants, other immune-suppressants, WHO ATC Code: L04AX05
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ESBRIET® (Pirfenidone) 267mg film-coated tablets (USFDA approved)
	For generic drugs (me-too status)	Pirfedow 267mg tablet of M/s Martin Dow Limited. Registration No. 107754
	GMP status of the Finished product manufacturer	GMP certificate issued on 06-07-2020, based on evaluation conducted on 18-06-2020. Tablet Section (General) mentioned GMP certificate.

	Name and address of API manufacturer.	M/s Optimus Drugs Pvt. Ltd. Sy.No. 239 & 240, Dothigudem Village, Pochampally Mandal, Yadadri – Bhuvanagiri District – 508 284, Telangana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data on CTD format related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications and analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Pirfenidone:** Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months at 0, 3rd, 6th, 9th, 12th months. Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months at 0, 1st, 2nd, 3rd & 6th months. Batches: (OP-PIF-A1-001/20, OP-PIF-A1-002/20, OP-PIF-A1-003/20)
	Module-III (Drug Product):	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacturing process and process control, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence established against innovators product Esbriet 267mg film-coated tablet (Batch No. M100221, Mfg. Date: 03-2021). Summarized test report/results submitted. Comparative dissolution was performed against the same product (Esbriet 267mg film-coated tablet, Batch No. M100221, Mfg. Date: 03-2021) in HCl buffer (pH 1.2), Acetate buffer (pH 4.5), Phosphate buffer (pH 6.8) and water as dissolution time with sampling time points as 05, 10, 15, 20, 30 & 45 minutes. The dissolution profile similarity factor f2 calculated as 92 (acidic buffer pH 1.2), 97 (Acetate buffer pH 4.5), 94 (Phosphate buffer pH 6.8) and 89 (water as dissolution medium).
	Analytical method validation/verification of product	Method validation studies have submitted including introduction, verification of assay method, Specificity, linearity, range, accuracy, precision Repeatability, Intermediate precision, Robustness, System Suitability.

STABILITY STUDY DATA

Manufacturer of API	M/s Optimus Drugs Pvt. Ltd. Sy.No. 239 & 240, Dothigudem Village, Pochampally Mandal, Yadadri – Bhuvanagiri District – 508 284, Telangana, India.
API Lot No.	OP-PIF-A1-002/20
Description of Pack (Container closure system)	A Film coated yellow color, oval tablet in Alu-Alu blister pack in unit carton occupied 21's tablets.
Stability	Real time: 30˚C ± 2˚C / 65% ± 5%RH

Storage Condition	Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	PFL-001	PFL-002	PFL-003
Batch Size	1500 Tablets	1500 Tablets	1500 Tablets
Manufacturing Date	10.2021	10.2021	10.2021
Date of Initiation	08.10.2021	09.10.2021	09.10.2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product: EMPAZON 10mg Tablets, EMPAZON 25mg Tablets (Empagliflozin), Dayzol 30mg Capsules, Dayzol 60mg Capsules (Dexlansoprazole), which was conducted on 1st June, 2021 and was presented in 307th meeting of Registration Board held on 08-10th June, 2021. Following observations were reported: xiii. The HPLC software is 21 CFR compliant. xiv. Audit trail on the testing reports of EMPAZON 10mg and 25mg Tablets, Dayzol 30mg and 60mg Capsules is available. xv. Adequate monitoring and control are available for stability chamber. Chamber are controlled and monitored through software having alarm system for alerts as well.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	G.M.P Certificate dated 22-05-2020, issued by Drug Control Administration, Government of Telangana. Valid for one year from the date of issuance. Firm has also submitted DML copy of API manufacturer which is valid till 09- 09- 2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. 2122OD029/EXP dated 29-04-2021 from Optimus Drug Pvt. Ltd. Sy.No. 239 & 240, Dothigudem Village, Pochampally Mandal, Yadadri – Bhuvanagiri District – 508 284, Telangana, India for import of Pirfenidone (Batch No. OP-PIF-A1-002/20, Mfg. Date: 01-07-2020), quantity 08kgs. However, the invoice has not been attested by the concerned AD (I & E). Working standard Batch No. 21 WS0161 (Mfg.Date 26-06-2021), Mfg. date 28-06-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator: (PEC-XVII)

Sr. No.	Section	Observation	Reply by the firm
1.	1.6.5b	Provide valid GMP certificate of API manufacturer as the submitted GMP certificate validity is for one year from the date of issuance that is 22-05-2020.	
2.		Impurities tests of API not performed by the drug product manufacturer.	
3.	2.3.P.2.2.1b	The batch number of Pirfenidone 267mg mentioned in pharmaceutical equivalence studies and that mentioned for comparative dissolution studies and of trial batches manufactured are different.	
4.	3.2.S.4.2	Chromatographic conditions given by API manufacturer has a C8 column, while that mentioned by the Drug product manufacturer as C18 column. Moreover, the run time as recommended by the BP monograph is 4 times that of Pirfenidone, while the run time employed in analysis is about 20 minutes.	
5.		Provide AD (I & E) attested invoice copy for import of Pirfenidone.	
6.		Provide Evidence for import of innovators products (Esbriet 267mg, 534mg & 801mg) for pharmaceutical equivalence and comparative dissolution studies.	
7.		Provide details of available minimum handling capacity for trial batches manufacturing.	
8.		Potency as per CoA of drug product manufacturer is 100.33% (on dried basis), while that given in stability studies calculation/analysis as 99.2.	
9.		API real time stability submitted for 12 months	
10.		Only 03 months stability studies data (both accelerated & real time) have been provided	

Decision: Registration Board was apprised that the letter of shortcoming has been initially shared with the firm hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Date: 01-07-2020), quantity 08kgs. However, the invoice has not been attested by the concerned AD (I & E). Working standard Batch No. 21 WS0161 (Mfg.Date 26-06-2021), Mfg. date 28-06-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator: (PEC-XVII)

Sr. No.	Section	Observation	Reply by the firm
1.	1.6.5b	Provide valid GMP certificate of API manufacturer as the submitted GMP certificate validity is for one year from the date of issuance that is 22-05-2020.	
2.		Impurities tests of API not performed by the drug product manufacturer.	
3.	2.3.P.2.2.1b	The batch number of Pirfenidone 267mg mentioned in pharmaceutical equivalence studies and that mentioned for comparative dissolution studies and of trial batches manufactured are different.	
4.	3.2.S.4.2	Chromatographic conditions given by API manufacturer has a C8 column, while that mentioned by the Drug product manufacturer as C18 column. Moreover, the run time as recommended by the BP monograph is 4 times that of Pirfenidone, while the run time employed in analysis is about 20 minutes.	
5.		Provide AD (I & E) attested invoice copy for import of Pirfenidone.	
6.		Provide Evidence for import of innovators products (Esbriet 267mg, 534mg & 801mg) for pharmaceutical equivalence and comparative dissolution studies.	
7.		Provide details of available minimum handling capacity for trial batches manufacturing.	
8.		Potency as per CoA of drug product manufacturer is 100.33% (on dried basis), while that given in stability studies calculation/analysis as 99.2.	
9.		Only 03 months stability studies data (both accelerated & real time) have been provided	

Decision: Registration Board was apprised that the letter of shortcoming has been initially shared with the firm hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks OF Evaluator: **(PEC-XVII)**

Sr. No.	Section	Observation	Reply by the firm
1.		Mobile phase ratio at 3.2.P.5.2 (Drug Product analytical procedure) for assay determination given as Acetonitrile and 0.02% of Formic acid (65:35) and flow rate of 1.3ml/minute while in the "analytical method validation summary report for Obeticholic acid" at 3.2.P.5.3 (Validation of analytical procedure), the Mobile phase mentioned as Acetonitrile: Buffer Solution (35:65), with flow rate as 01 ml/minute. Moreover, the standard solution preparation (0.5mg/ml), quantity of Obeticholic acid WS given as 50mg in 50ml diluent.	
2.		Chromatograms for the analytical method validation of raw material not provided by the drug product manufacturer. The title given as analytical method verification report of	

		Obeticholic acid with specificity and accuracy studies.	
3.		The stability studies data of both trial batches has been submitted in disorder fashion making it difficult to evaluate and understand. It is therefore advised to submit the requisite data in properly arranged form for both trial batches.	
4.		API stability studies data submitted for 18 months.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially shared with the firm hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Sr. No.	Section	Observation	Reply by the firm
1.		Mobile phase ratio at 3.2.P.5.2 (Drug Product analytical procedure) for assay determination given as Acetonitrile and 0.02% of Formic acid (65:35) and flow rate of 1.3ml/minute while in the "analytical method validation summary report for Obeticholic acid" at 3.2.P.5.3 (Validation of analytical procedure), the Mobile phase mentioned as Acetonitrile: Buffer Solution (35:65), with flow rate as 01 ml/minute. Moreover, the standard solution preparation (0.5mg/ml), quantity of Obeticholic acid WS given as 50mg in 50ml diluent.	
2.		Chromatograms for the analytical method validation of raw material not provided by the drug product manufacturer. The title given as analytical method verification report of Obeticholic acid with specificity and accuracy studies. Whether validation or verification studies required??	
3.		The firm has submitted two different finished analysis report titled as "Finished analysis report" and "Finished Product Certificate of analysis" for trial batch No. OBH-002 with different assay and dissolution results as 100.73%, 94.15% & 100.93%, 95.08% respectively. Same variation observed in the trial batch No.OBH-001 also. Moreover, chromatograms for sample 1 & sample 2 for assay determination of finished product also not provided.	
4.		Chromatograms for standard runs not provided for trial batch OBH # 001 for accelerated stability data at 3rd month time point.	
5.		Starting dates for stability studies given as 30th & 31st August 2021, while the 3rd month & 6th month stability studies conducted on 21st, 22nd November 2021 & 20th February 2022 that is few days earlier than the scheduled dates.	
6.		Submit audit trial reports for the 6th month time stability studies data	
7.		Submit digital data logger record from 14th November onward till 6th month time point for stability chambers (both accelerated & real time).	
8.		API stability studies data submitted for 18 months.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially shared with the firm hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Case No.I Registration applications of locally manufactured (Human) drugs on Form 5F (New DML).

M/s Fortune Pharma Private Limited. (New DML)

CLB in its 278th meeting held on 10th and 11th December 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five (05) sections to M/s Fortune Pharma Private Limited

1.	Tablet (General)	2.	Liquid Ampoule (General)
3.	Liquid Syrup (General)	4.	Liquid Vial (General)
5.	Capsule (General)	6.	Tablet (Psychotropic)
7.	Ointment (General) Section	8.	Capsule (Psychotropic)
9.	Sachet (General)	10.	Liquid Ampoule (Psychotropic)

1092.	Name, address of Applicant / Marketing Authorization Holder	M/s Fortune Pharmaceuticals, Plot No. K/201, S.I.T.E, Super Highway, Phase-II, Karachi.

	Status of the applicant	☒ Manufacturer. ☐ Importer. ☐ Is involved in none of the above (contract giver).
	Status of application	☐ New Drug Product (NDP). ☒ Generic Drug Product (GDP).
	Intended use of pharmaceutical product	☐ Domestic sale. ☐ Export sale. ☒ Domestic and Export sales.
	Dy. No. and date of submission	Dy. No 30769 dated 31-10-2022.
	Details of fee submitted	Rs.30,000/- vide challan No. 2890223452 dated 20-07-2022.
	The proposed proprietary name / brand name	VOMITA 4mg/5ml Syrup
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml syrup contains: Ondansetron hydrochloride……4mg
	Pharmaceutical form of applied drug	White color round shaped film-coated tablet, packed in Alu-Alu blisters (1×10's) and further packed in printed unit cartons along with a patient information leaflet.
	Pharmacotherapeutic Group of (API)	Serotonin (5HT3) antagonists, anti-emetics
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	3 × 10's
	Proposed unit price	As per policy.
	The status in reference regulatory authorities	ZOFRAN® (Ondansetron hydrochloride) oral solution, 4mg/5ml (contains 5 mg of ondansetron hydrochloride dihydrate equivalent to 4 mg of ondansetron per 5 mL in amber glass bottles of 50 mL with child-resistant closures) by Novartis pharmaceuticals, Co. (USFDA approved)
	For generic drugs (me-too status)	Xortron Oral Solution (Each 5ml contains: Ondansetron hydrochloride dihydrate eq to ondansetron: 4mg), Registration No. 102367 of M/s McOlson Research Laboratories, Sheikhupura.

	GMP status of the Finished product manufacturer	New DML (DML No. 000924 granted vide Licensing Division letter No.F.2-3/2016-Lic dated 22-02-2021.
	Evidence of section approval.	Liquid syrup (General) Section approval granted vide Licensing Division letter No.F.2-3/2016-Lic dated 22-02-2021.
	Name and address of API manufacturer.	M/s Anugraha Chemicals, No. D-47 to D-50 & C-62 to C-63, KSSIDC Industrial Estate Doddaballapur, Bengaluru-561203, India.
	Module-II (Quality Overall Summary)	Firm has submitted Quality Overall Summary: Product Dossier details as per WHO QOS-PD template.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substances.
	Stability studies (Drug substance.)	Incomplete stability studies summary data sheets of drug substance submitted: Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 06 & 09 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (AOND-17002, AOND-17003 & AOND-17004)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its composition, formulation development, pharmaceutical equivalence, comparative dissolution profile, manufacturer, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Zofran 8mg tablet of M/s GSK, Pakistan by performing quality tests such as Identification, Assay, Dissolution and Uniformity of dosage unit. Comparative dissolution profile (CDP) has been performed against the same brand that is Zofran 8mg tablet of M/s GSK, Pakistan in Acid media (pH 1.0-1.2), Acetate Buffer pH 4.5 & Phosphate Buffer (pH 6.8). Discrepancy in data observed. Details given below in remarks column.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted M/s Anugraha Chemicals, No. D-47 to D-50, C-62 & C-63, KSSIDC Industrial Estate, Doddaballapur, Bengaluru, Karnataka, India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted Quantity received 1kg as mentioned in CoA of API by drug product manufacturer. Date of received 12-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Incomplete submission as raw data sheets, summary data sheets, content uniformity data and dissolution data not provided.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks OF Evaluator:

-

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.2	• The strength/label claim provided is not in accordance with the innovators product that is: Each 5ml syrup contains: Ondansetron (As hydrochloride dihydrate) ……. 4 mg	
2.	1.5.4	• The pack size mentioned as 3×10's	
3.	1.5.10	• The applied dosage form mentioned as: White color round shaped film-coated tablet, packed in Alu-Alu blisters (1×10's) and further packed in printed unit cartons along with a patient information leaflet.	
4.	1.6.5 (b)	• No evidence of approval of manufacturing facility of API by concerned regulatory body submitted.	

5.	2.3	• In introduction part of QOS, the firm has mentioned that Drug product monograph exists in BP and Eu.Ph. However, the same couldn't be confirmed.	
6.	2.3.S.4.4	• The firm has provided HPLC method verification summary instead of Batch analysis data.	
7.	2.3.S..5 (a)	• The firm has submitted CoA of Ondansetron hydrochloride working standard instead of primary reference standard since Ondansetron Hydrochloride official monograph exits in USP.	
8.	3.2.S.4.1	• Specifications for drug substance provided by the drug product manufacturer has two different values for residue on ignition test. Clarification shall be submitted.	
9.	3.2.S.4.2	• Analytical procedure (signed) for the drug substance by the drug product manufacturer shall be submitted.	
10.	3.2.S.7.3	• Incomplete long term stability studies summary data sheets (only for 6 & 9 months) for the drug substance have been submitted by the firm.	
11.	3.2.P.1	• Description & composition of the drug product part is not provided.	
12.	3.2.P.2.1	• The sub-parts, 3.2.P.2.1.1 (Drug substance) & 3.2.P.2.1.2 (Excipients), under components of the drug product are not submitted. Compatibility studies of the Drug Substance(s) with excipients not provided as qualitative composition of the formulation is not similar to innovator / reference product.	
13.	3.2.P.2.2.1	• The API quantity given without considering salt factor of the API. As evident from the trial batches BMR attached at 2.3.R.1, the quantity of API has been dispensed/mentioned without salt factor calculation.	
14.	3.2.P.2.2.1	• In formulation development, the quantity given per bottle (60ml) is 0.04gm, which comes out to be 0.67mg/ml or 3.35mg/5ml while the applied composition is 4mg/5ml.	
15.	3.2.P.2.2.1	• The firm has mentioned that pharmaceutical equivalence conducted against market's comparator product namely Onseron 4mg/5ml oral solution. However, summarized test results of pharmaceutical equivalene submitted is against Zofran 4mg/5ml oral solution.	
16.	3.2.P.2.5	• The microbiological enumeration tests & tests for specified micro-organisms declared as "Not applicable". However, the same are given in USP	

		official monograph of Ondansetron Oral solution as Microbial enumeration tests <61> and Tests for specified Microorganisms <62>.	
17.	3.2.P.3.2	• In batch formula, for 1000 L batch size, the quantity of ondansetron HCl given as 0.4kg and also without considering salt factor calculation. With this quantity, composition/strength of product comes out to be 2mg/5ml of Ondansetron HCl while the applied composition is 4mg/5ml of Ondansetron (as HCl dihydrate).	
18.	3.2.P.4	• No details like specifications, analytical procedures, validation of analytical procedures etc are provided under Control of excipients.	
19.	3.2.P.5.1	• In drug product specifications, the deliverable volume specification mentioned as "In-house". However, the same is given in official monograph (USP) for Ondansetron oral solution under USP general chapter <698> Deliverable volume.	
20.	3.2.P.5.2	• Analytical procedure of drug product not provided by the firm. The firm has submitted extract of USP for Ondansetron Oral solution.	
21.	3.2.P.5.4	• CoA of 03 trial batches submitted in which the assay for trial batch T-03 given as 100.20%, while CoA of same batch has assay result as 101.49%.	
22.	3.2.P.8.1	• In the stability summary and conclusions, the firm has stated that trial batches were kept under real time stability conditions in stability chambers on 01-01-2022 and under accelerated stability conditions on 13-05-2021.	
23.	3.2.P.8.3	• In the stability study data, the Mfg. and Exp. Date of T-02 batch mentioned as 01-2023 and 01-2024 respectively. While stability studies dated provided from 01-01-2022 to 01-06-2022.	
24.	3.2.P.8.3	• Provide raw data sheets, summary data sheets, audit trial reports and digital data logger record for temperature & humidity monitoring of stability chambers (both real and accelerated) in support of stability studies performed of the trial batches.	
25.	3.2.P.8.3	• The wavelength mentioned in chromatogram/HPLC reports submitted is 328nm, however, as per analytical procedures submitted and official monograph of the product, the wave length for assay determination is 216nm.	

26.	3.2.P.8.3	• The time intervals among the chromatograms/HPLC reports of standard and samples analysis, mostly vary from 1-3minutes. While the runtime for each analysis is 15 minutes, with retention time of peaks for all standards and samples as 3.770-3.774 (approx. 3.77). Clarification and scientific justification is required in this regard, as to how such intervals among chromatograms possible, with aforementioned peak retention times and run time of the analysis performed.	
27.	3.2.R.1.1	• The BMR of trial batches (T-01, T-02 & T-03) submitted are blank BMRs, having no details of actual execution of production/manufacturing of the trial batches, such as personnel signatures, in-process checks, reconciliation record, time intervals for different manufacturing steps, quantities dispensed etc.	
28.		Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
29.		Documents for the procurement of API with approval from DRAP (in case of import)	
30.		Compliance record of HPLC software 21CFR & audit trail reports on product testing.	
31.		Record of digital data logger for temperature and humidity monitoring of both stability chambers.	

Decision: Registration Board was apprised that the letter of shortcoming has been initially shared with the firm hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Case No. III: Registration applications for local manufacturing of (Human) drugs (Differential Fee cases)

1093.	Name and address of manufacturer/ Applicant	M/s Friends Pharma (Pvt) Ltd.31-Km, Ferozepur Road, Lahore.
	Brand Name + Dosage Form + Strength	PRESIN 1mg Injection (IM)
	Composition	Each vial contains: - Lyophilized Terlipressin Acetate…….1mg
	Diary No. Date of R & I & fee	Dy. No. 548 dated 28-05-2011, Rs. 8,000/- dated 28-05-2011 challan dated 26-05-2011 (Photocopy), Differential fee Rs. 12,000/- vide challan No. 0574077 dated 01-08-2016 (Photocopy), "Duplicate dossier, R & I verified"
	Pharmacological Group	Hematinic
	Type of Form	Form 5
	Finished product Specification	Manufacturer specifications
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities	(MHRA approved) the product is both available as solution for injection and powder for solution for injection.

		Powder and solvent for solution for injection Vial contains white, freeze-dried powder. Ampoule contains solvent. Each vial of powder contains: 1 mg terlipressin acetate equivalent to 0.85 mg terlipressin. 1 ml of reconstituted solution contains 0.2 mg terlipressin acetate.
	Me-too status	Novapressin parenteral injection of M/s Ferozsons laboratories. Registration No. 028416 Terlip lyophilized powder for injection terlipressin (as acetate) ……1mg as lyophilized powder for injection of Getz pharma, Karachi. Reg.No. 066098
	GMP status	Firm has not provided the updated GMP status within last 03 years. However, panel inspection for renewal of DML conducted on 08-03-2019 provided with following recommendation: The panel of inspectors recommends the renewal of DML of M/s Friends Pharma, Lahore bearing No.000531 in respect to its approved sections.
	Remarks of the Evaluator (PEC-XVII)	• Revise the pharmacological group as Posterior pituitary lobe hormones (vasopressin and analogues) (H 01 BA 04) • Revise the label claim as: Each vial contains: - Lyophilized Terlipressin (As Acetate) …….1mg • Provide most recent GMP inspection report conducted within last three years. • In master formulation, average volume per vial mentioned as 1ml. while quantity of Terlipressin acetate given as 5.05mg. please clarify? • Equipment list provided is for Cephalosporin section. • The manufacturing outlines provided do not match the label claim/composition of the applied formulation. • The firm has claimed finished drug product specifications as per USP. However, monograph is not available in USP. • For above revision, submit applicable fee as per notifications 7-11/2012-B&A/DRAP dated 07-05-2021 & 13-07-2021. • Dry powder lyophilized injectable (General) section available as per DML renewal inspection dated 08-03-2019. • Registration Board in its 271st meeting has declared Terlipressin Acetate as biological drug
	Decision: Registration Board rejected the application since the applied formulation is a biological drug and firm does not possess required manufacturing facility of "Lyophilized Injectable vial (Biological) section.	

Registration-I Section

Case No.01. Requirement of Manufacturing Facility for Approved product of M/s Cibex Pvt. Ltd, Karachi

Registration Board in its 277th meeting held on 27th-29th December, 2017 approved the following product in favour of M/s Cibex Pvt. Ltd., Karachi

Name and address of manufacturer / Applicant	M/s Cibex Pvt. Ltd. Factory # 405, SITE, Karachi.
Brand Name +Dosage Form + Strength	Cidrom Gel
Diary No. Date of R& I & fee	Dy No. 658, 5-5-2014, Rs.20000/-
Composition	Each gm contains:

	Cetylpyridinium Chloride……..0.02% Lignocaine……..…0.6% Ethanol……..……33%
Pharmacological Group	Anti-infective, Anti-septic, local anaesthetic
Type of Form	Form-5
Finished Product Specification	Not available
Pack size & Demanded Price	15gm As per PRC
Approval status of product in Reference Regulatory Authorities.	Boots mouth ulcer Gel (EMC)
Me-too status	Somogel by Abbott
GMP status	Last GMP Inspection of Cibex Pvt. Ltd Conducted on 12-2-16 with no conclusive remarks.
Remarks of the Evaluator.	Latest report missing, and the presented report shows availability of 2 sections of oral solid and oral liquid section. Firm also fail to obtain site change approval.
Decision of 269th Meeting	Deferred for submission of latest GMP inspection report conducted within past one year.
Evaluation by PEC	Inspection Date: 16-11-2017 Purpose: GMP Compliance Conclusion: The standard and systems were found to be in compliance with standard GMP regulations.
Decision: Approved with innovator's specifications.	

During processing for issuance of registration letter, it was identified that reference product (i.e., Boots Mouth Ulcer Gel approved by MHRA) contains "Cetylpyridinium Chloride 0.02% + Lignocine base 0.6%". While, alcohol 96% has been included in formulation as an excipient. In this context, the firm has informed that in composition and batch master formula, "Ethanol" was mistakenly mentioned as "active" instead of "excipient". Accordingly, the firm has submitted revised form-5 and master formulation along-with fee of Rs.7500/-(Invoice #41987646836), verified from https://fee.dra.gov.pk/.

Furthermore, it was also observed that the firm has been granted approval of "Ointment (Steroid)" and "Ointment (Non Steroid)" sections (vide Licensing Division's letter dated 04-10-2019), regardless of stating route of administration i.e., "Topical" or "Oral". Accordingly, Licensing Division was requested to opine **whether both the oral and topical gel may be manufactured in the aforementioned facility or otherwise.**

In response, Licensing Division has stated as under:

"Central Licensing Board grants approval of sections with respect to dosage forms of drugs and not on the basis of route of administration and the layout plans for approval are also submitted by the firms on the basis of dosage form and class of drugs to be manufactured. Therefore, the matter regarding registration of drugs with respect to route of administration may be decided by the Registration Board."

Decision: **Registration Board deferred the case on following grounds:**

i. **The applicant will submit protocols for cleaning validation.**
ii. **Expert Committee will be constituted to review the matter regarding manufacturing of oral and topical gel within the same manufacturing facility. Committee will submit its recommendation within 15 days.**
iii. **Data will be compiled for previously issued registrations of oral gels along-with information regarding approved manufacturing facility.**

Case No.2. Request for Change in Registration Status of Products from M/s The Searle Company Limited, F-319, S.I.T.E Karachi to M/s. Searle Pakistan Limited C-14 Manghopir Road, S.I.T.E Karachi.

M/s. Searle Pakistan Limited C-14 Manghopir Road, S.I.T.E Karachi (DML No.000012) has requested for change in registration of below mentioned products from M/s The Searle Company Limited, F-319, S.I.T.E Karachi (DML No.000016) to their name.

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
Copy of registration letter and last renewal status.
Copy of DML of M/s. Searle Pakistan Limited (Formely M/s OBS Pakistan Pvt. Ltd.) C-14 Manghopir Road, S.I.T.E Karachi (Manufacturer) renewed w.e.f on 31-03-2020.

Copy of letter for change of title / management issued by CLB on 23rd November, 2021.
Copy of approved sections by Central Licensing Board of M/s. Searle Pakistan Limited (Formely M/s OBS Pakistan Pvt. Ltd.) C-14 Manghopir Road, S.I.T.E Karachi confirming "Tablet (general)" section.
Copy of GMP certificate M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi on the basis of inspection conducted on 08-10-2021. (Valid till 14th February, 2024) An inspection report dated 21-06-2022 also provided with conclusion that firm is found at good level of GMP compliance.
NOC dated 23-12-2022 issued by M/s The Searle Company Limited, F-319, S.I.T.E, Karachi for transfer of product in the name of M/s. Searle Pakistan Limited C-14 Manghopir Road, S.I.T.E Karachi.
Application with Form-5F and required fee as per relevant SRO.
Relevant undertakings & commitments.

The cases were referred to QMS for scrutinization /evaluation. Detail of submitted documents remarks of evaluators have been mentioned as under:

Evaluator: Mst. Urooj Fatima (DD-QMS)

	1.5.11-Proposed Label	Specimen of proposed label (secondary + primary) provided which are in accordance with the Drug (Labelling & Packing) Rules, 1986.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Levofloxacin hemihydrate, related structure, solubilities, and other general properties, manufacturing site, manufacturing process, character elucidation, impurities characterizations, specifications based on USP, analytical procedures and its validation, batch analysis, reference standard, container closure and stability studies summaries of Levofloxacin hemihydrate. Similarly, information summaries for drug product (Levoxin) including its description, composition, pharmaceutical development, excipients and their role, justification for selection of manufacturing process and in-process controls, analytical procedure and its verification, batch analysis and specification, reference standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism, structure elucidation, impurities, specifications, analytical method, its validation, analytical method verification performed by DP manufacturer, certificate of analysis, impurity profiling of all pharmacopeial listed impurities (Levofloxacin related compound A, Diamine derivative, Levofloxacin-N-oxide, Decarboxy Levofloxacin etc.), specifications based on USP,

<table>
<tr><td></td><td></td><td>analytical procedures, batch analysis, reference standard and its CoA, container closure system, specification and stability studies with study protocol.</td></tr>
<tr><td></td><td>Stability Studies of Drug Substance (Conditions & duration of Stability studies)</td><td>Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 48 months. DS was packed in a double layered LDPE bag and packaged again in cardboard drums. The DS remained within specified limits as tested on defined intervals.</td></tr>
<tr><td></td><td>Module-III Drug Product:</td><td>Firm has submitted data of drug product including its composition, manufacturing process and process control, manufacturing process validation protocol, excipients testing methods, pharmaceutical equivalence, specifications, analytical procedures and its verification, dissolution method verification, batch analysis, justification of specifications, USP procedure for organic impurities, reference standard or materials, container closure system and stability. The Specifications and control tests comply to USP.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>Pharmaceutical equivalence was performed against Leflox 250mg Tablet of M/s Getz Pharma, Pakistan which shows comparable results within specified limits. The comparative dissolution profile was performed for Levofin 250mg Tablet against the Leflox 250mg Tablet of M/s Getz Pharma, Pakistan. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 10 mins. Calculation of value is as under:
<table>
<tr><th>Sr</th><th>Mediums</th><th>Time interval</th><th>Leflox Tab</th><th>Levoxin Tab</th></tr>
<tr><td rowspan="3">i.</td><td rowspan="3">Acidic buffer (pH 1.2)</td><td>5 min</td><td>97%</td><td>98%</td></tr>
<tr><td>10 min</td><td>102%</td><td>101%</td></tr>
<tr><td></td><td></td><td></td></tr>
<tr><td rowspan="3">ii.</td><td rowspan="3">Acetate buffer (pH 4.5)</td><td>5 min</td><td>96%</td><td>87%</td></tr>
<tr><td>10 min</td><td>102%</td><td>101%</td></tr>
<tr><td></td><td></td><td></td></tr>
<tr><td rowspan="3">iii.</td><td rowspan="3">Phosphate Buffer (pH 6.8)</td><td>5 min</td><td>92%</td><td>69%</td></tr>
<tr><td>10 min</td><td>102%</td><td>94%</td></tr>
<tr><td></td><td></td><td></td></tr>
</table>
f1 and f2 value has not been calculated because both reference and test sample achieved 85% dissolution within 15 minutes, hence, comparative profile is considered similar.</td></tr>
<tr><td></td><td>Analytical method validation/verification of product</td><td>Firm has claimed USP specifications for which report of verification of analytical method for the drug product has been provided. Dissolution method verification protocol and study report were also provided.</td></tr>
</table>

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted: Copy of GMP certificate (Certificate No. ZJ20190157) issued by National Medical Products Administration China, dated 30-11-2019. (Valid up to 29-11-2024).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API purchased from M/s Zhejiang Jingxin Pharmaceutical import & export (manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China verified through COA and GMP certificate of manufacturer). Invoice dated 14-05-2020, cleared on 02-06-2020 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

The drug substance for Levoxin 250mg Tablet (Levofloxacin hemihydrate) is manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China. (GMP certified by National Medical Products Administration China) on USP specifications. The impurity profiling of DS is also carried out for pharmacopeial listed impurities (Levofloxacin related compound A, Diamine derivative, Levofloxacin-N-oxide, Decarboxy Levofloxacin etc). Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification is as per USP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to USP specifications.

The drug product is film coated tablet of 250mg manufactured by M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi-75700, Pakistan **(DML # 000012)** (White to off-white colored film coated, oval concave shaped tablet plain from one side and scored from other side). The method of manufacturing is wet granulation and film coating with adequate process controls at critical points. Submitted regulatory specifications are as per USP monograph and submitted stability data shows no degradation product at specified time points.

Analytical methods verification was performed in February, 2022, whereas product is manufactured and tested in November, 2020. However, testing was performed as per USP specifications.

M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi-75700, Pakistan **(DML # 000012)** is a GMP complaint unit as per inspection report dated 21-06-2022 with conclusion that firm is found at good level of GMP compliance.

Levoxin 250mg Tablets' pharmaceutical equivalence has been established against the Leflox 250mg Tablet of M/s Getz Pharma, which shows comparable results within specified limits. Comparative dissolution profile was conducted against the Leflox 250mg Tablet of M/s Getz. The clinical particulars and pharmacological properties of the Levofloxacin, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for acute bacterial sinusitis, uncomplicated cystitis, acute exacerbation of COPD including bronchitis, complicated skin and soft tissue infections / complicated skin and skin structure infections.

Conclusion:

The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.

The firm shall also ensure black boxed information on "Serious Adverse Reactions Including Tendinitis, Tendon Rupture, Peripheral Neuropathy, Central Nervous System Effects and Exacerbation of Myasthenia Gravis" in the beginning of the leaflet.

	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	1 x 10's
	Proposed unit price	PKR 703.96/-
	The status in reference regulatory authorities	Levofloxacin 500mg Tablet, Teva Pharma (USFDA)
	For generic drugs (me-too status)	Leflox 500mg Tablet, Getz Pharmaceuticals (Pvt) Ltd. (Reg#026163)
	Name and address of API manufacturer.	Shangyu Jingxin Pharmaceutical Co., Ltd. Address: No 31, Weisan Road, Zhejiang Hangzhou Bay Shangyu Industrial Area, Shangyu City, Zhejiang Province, P.R.China.
	1.5.11-Proposed Label	Specimen of proposed label (secondary + primary) provided which are in accordance with the Drug (Labelling & Packing) Rules, 1986.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Levofloxacin hemihydrate, related structure, solubilities, and other general properties, manufacturing site, manufacturing process, character elucidation, impurities characterizations, specifications based on USP, analytical procedures and its validation, batch analysis, reference standard, container closure and stability studies summaries of Levofloxacin hemihydrate. Similarly, information summaries for drug product (Levoxin) including its description, composition, pharmaceutical development, excipients and their role, justification for selection of manufacturing process and in-process controls, analytical procedure and its verification, batch analysis and specification, reference standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism, structure elucidation, impurities, specifications, analytical method, its validation, analytical method verification performed by DP manufacturer, certificate

<table>
<tr><td></td><td></td><td>of analysis, impurity profiling of all pharmacopeial listed impurities (Levofloxacin related compound A, Diamine derivative, Levofloxacin-N-oxide, Decarboxy Levofloxacin etc.), specifications based on USP, analytical procedures, batch analysis, reference standard and its CoA, container closure system, specification and stability studies with study protocol.</td></tr>
<tr><td></td><td>Stability Studies of Drug Substance (Conditions & duration of Stability studies)</td><td>Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 48 months. DS was packed in a double layered LDPE bag and packaged again in cardboard drums. The DS remained within specified limits as tested on defined intervals.</td></tr>
<tr><td></td><td>Module-III Drug Product:</td><td>Firm has submitted data of drug product including its composition, manufacturing process and process control, manufacturing process validation protocol, excipients testing methods, pharmaceutical equivalence, specifications, analytical procedures and its verification, dissolution method verification, batch analysis, justification of specifications, USP procedure for organic impurities, reference standard or materials, container closure system and stability. The Specifications and control tests comply to USP.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>Pharmaceutical equivalence was performed against Leflox 500mg Tablet of M/s Getz Pharma, Pakistan which shows comparable results within specified limits. The comparative dissolution profile was performed for Levofin 500mg Tablet against the Leflox 250mg Tablet of M/Getz Pharma, Pakistan. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 10 mins. Calculation of value is as under:
<table>
<tr><th>Sr</th><th>Mediums</th><th>Time interval</th><th>Leflox Tab</th><th>Levoxin Tab</th></tr>
<tr><td rowspan="3">i.</td><td rowspan="3">Acidic buffer (pH 1.2)</td><td>5 min</td><td>69%</td><td>91%</td></tr>
<tr><td>10 min</td><td>99%</td><td>99%</td></tr>
<tr><td></td><td></td><td></td></tr>
<tr><td rowspan="3">ii.</td><td rowspan="3">Acetate buffer (pH 4.5)</td><td>5 min</td><td>37%</td><td>67%</td></tr>
<tr><td>10 min</td><td>91%</td><td>97%</td></tr>
<tr><td></td><td></td><td></td></tr>
<tr><td rowspan="3">iii.</td><td rowspan="3">Phosphate Buffer (pH 6.8)</td><td>5 min</td><td>92%</td><td>69%</td></tr>
<tr><td>10 min</td><td>102%</td><td>94%</td></tr>
<tr><td></td><td></td><td></td></tr>
</table>
f1 and f2 value has not been calculated because both reference and test sample achieved 85% dissolution within 15 minutes, hence, comparative profile is considered similar.</td></tr>
<tr><td></td><td>Analytical method validation/verification of product</td><td>Firm has claimed USP specifications for which report of verification of analytical method for the drug product has been provided. Dissolution method verification protocol and study report were also provided.</td></tr>

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted: Copy of GMP certificate (Certificate No. ZJ20190157) issued by National Medical Products Administration China, dated 30-11-2019. (Valid up to 29-11-2024).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API purchased from M/s Zhejiang Jingxin Pharmaceutical import & export (manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China verified through COA and GMP certificate of manufacturer). Invoice dated 14-05-2020, cleared on 02-06-2020 from DRAP, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

The drug substance for Levoxin 500mg Tablet (Levofloxacin hemihydrate) is manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China. (GMP certified by National Medical Products Administration China) on USP specifications. The impurity profiling of DS is also carried out for pharmacopeial listed impurities (Levofloxacin related compound A, Diamine derivative, Levofloxacin-N-oxide, Decarboxy Levofloxacin etc). Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification is as per USP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to USP specifications.

The drug product is film coated tablet of 500mg manufactured by M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi-75700, Pakistan **(DML # 000012)** (White to off-white colored film coated, oval concave shaped tablet plain from one side and scored from other side). The method of manufacturing is wet granulation and film coating with adequate process controls at critical points. Submitted regulatory specifications are as per USP monograph and submitted stability data shows no degradation product at specified time points.

Analytical methods verification was performed in February, 2022, whereas product is manufactured and tested in November, 2020. However, testing was performed as per USP specifications.

M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi-75700, Pakistan **(DML # 000012)** is a GMP complaint unit as per inspection report dated 21-06-2022 with conclusion that firm is found at good level of GMP compliance.

Levoxin 500mg Tablets' pharmaceutical equivalence has been established against the Leflox 500mg Tablet of M/s Getz Pharma, which shows comparable results within specified limits. Comparative dissolution profile was conducted against the Leflox 500mg Tablet of M/s Getz. The clinical particulars and pharmacological properties of the Levofloxacin, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for acute bacterial sinusitis, uncomplicated cystitis, acute exacerbation of COPD including bronchitis, complicated skin and soft tissue infections / complicated skin and skin structure infections.

Conclusion:

The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.

The firm shall also ensure black boxed information on "Serious Adverse Reactions Including Tendinitis, Tendon Rupture, Peripheral Neuropathy, Central Nervous System Effects and Exacerbation of Myasthenia Gravis" in the beginning of the leaflet.

Remarks OF Evaluator:

The drug substance for Levoxin 750mg Tablet (Levofloxacin hemihydrate) is manufactured by Shangyu Jingxin Pharmaceutical Co. Ltd, Zhejiang, China. (GMP certified by National Medical Products Administration China) on USP specifications. The impurity profiling of DS is also carried out for pharmacopeial listed impurities (Levofloxacin related compound A, Diamine derivative, Levofloxacin-N-oxide, Decarboxy Levofloxacin etc). Manufacturing and controls, comparability protocols, structural characterization, and stability protocol has been submitted. Specification is as per USP monograph. Finished Pharmaceutical Product (FPP) manufacturer has also performed analysis of Drug Substance (DS) according to USP specifications.

The drug product is film coated tablet of 750mg manufactured by M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi-75700, Pakistan **(DML # 000012)** (White to off-white colored film coated,

oblong biconvex shaped tablet plain from one side and scored from other side). The method of manufacturing is wet granulation and film coating with adequate process controls at critical points. Submitted regulatory specifications are as per USP monograph and submitted stability data shows no degradation product at specified time points.

Analytical methods verification was performed in February, 2022, whereas product is manufactured and tested in July / August, 2021. However, testing was performed as per USP specifications.

M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi-75700, Pakistan **(DML # 000012)** is a GMP complaint unit as per inspection report dated 21-06-2022 with conclusion that firm is found at good level of GMP compliance.

Levoxin 750mg Tablets' pharmaceutical equivalence has been established against the Leflox 750mg Tablet of M/s Getz Pharma, which shows comparable results within specified limits. Comparative dissolution profile was conducted against the Leflox 750mg Tablet of M/s Getz. The clinical particulars and pharmacological properties of the Levofloxacin, based on the reliance principle, are as per the reference regulatory authority's product. This product is mainly indicated for acute bacterial sinusitis, uncomplicated cystitis, acute exacerbation of COPD including bronchitis, complicated skin and soft tissue infections / complicated skin and skin structure infections.

Conclusion:

The applicant shall maintain consistency in clinical particulars and pharmacological properties with the current version of the reference medicinal product as approved by reference regulatory authority and this information shall be updated regularly when the new information becomes available for reference medical product in accordance with the post registration variation procedures.

The firm shall also ensure black boxed information on "Serious Adverse Reactions Including Tendinitis, Tendon Rupture, Peripheral Neuropathy, Central Nervous System Effects and Exacerbation of Myasthenia Gravis" in the beginning of the leaflet.

Decision: Registration Board decided as under:

i. **Cancelled registration of following products from the name of M/s The Searle Company Ltd., F-319, S.I.T.E Karachi (DML No.000016) subject to submission of request for withdrawal/ cancellation of registration of below mentioned products:**

S. No.	Reg. No.	Product Name & Composition
1.	028756	Levoxin Tablets 250mg Each tablet contains: Levofloxacin Hemihydrate 256.23mg eq. to Levofloxacin……250mg

• Copy of last GMP Inspection report dated 01-07-2021 with following conclusion: ***"After detailed inspection meeting was held with the firm management Mr. Furqan along-with their technical staff. The firm has shown its willingness for improving their facility and made commitment to improve facility in line with the GMP requirements with minimum possible time."*** • Copy of DML (No. 000440) dated 15.06.2011 along-with application submitted for renewal of DML • Copy of panel inspection report for renewal of DML (dated 15-03-2011), confirming "Tablet (General/ Antibiotics) Section"				

Decision: **Registration Board noted that the last GMP Inspection of the applicant which was conducted on 01-07-2021 (i.e., almost 2 years ago) is not conclusive regarding GMP status (whether 'Compliant' or 'Non-Compliant'). Accordingly, the Board decided to refer the last GMP inspection report of M/s Onyx Pharmaceuticals, Plot No.30-A, Small Industrial Estate, Manshera to QA&LT Division, DRAP for seeking opinion/ comments regarding current GMP status of the firm.**

Case No.01: Registration of Glutathion 600mg Injection

Registration Board in its 323rd meeting while considering the case of TAD 600mg dry powder injection (Glutathione 600mg Injection) of M/s 2 World Traders Pakistan. 55/2, Main Khayaban-e-Hafiz, DHA, Karachi, Pakistan decided as under:

Proceedings & Decision of 323rd meeting: The Board was apprised that in 291st meeting application of M/s Friends Pharma, Lahore was approved on basis of international reference of AIFA of Italy. The application was submitted on Form 5D, whereas the firm didn't submit product development and stability studies data as required by the Board for such applications. Moreover, reference was also forwarded to the pricing division for MRP fixation. The Board deliberated the matter in detail and decided as follows:

- **To refer the case to "Society of Oncology, Pakistan" for expert opinion regarding therapeutic use and need of applied formulation.**
- **To advise M/s Friends Pharma, Lahore to submit the stability studies data as per checklist approved by Board in its 293rd meeting and case will be considered by the Board after above opinion.**

In response of above decision of the Board, M/s. Friends Pharma has replied that application for registration of Tationil-600 Injection (Lyophilized Glutathione) was submitted on Form-5D (for new molecules) but later on they had submitted stability data of 6 months for both accelerated and real time, as mentioned in minutes of 265th meeting the Registration Board. Extract of case presented in 265th meeting along with decision of the Board is as under:

Sr. No.	Name & Address of Manufacturer / Applicant	Brand Name (Proprietary Name + Dosage Form + Strength), Composition, Pharmacological Group, Finished Product Specification	Type of Form, Initial Diary & Date, Fee (including differential fee), Demanded Price / Pack size	International Availability / Local Availability GMP Inspection Report Date & Remarks	Previous DRB Decision / Remarks (if any)
1.	**M/s. Friends Pharma (Pvt.) Limited.** 31-Km, Ferozepur Road, Lahore.	Tationil-600 Injection Each Vial contains:- Lyophilized Glutathione (B.P)…600mg Antioxidant	Form 5-D Dy. No. 424 11-08-2014 Rs.20,000/- Rs. 30,000/- 29.01.15 As per SRO Not confirmed.	Not confirmed Form 5-D Panel got impression that the Operations at the factory premises were compliant to GMP and guidelines. (21-05-2014) However it has been stated about Lyophilized section that the dedicated section was found ready for inspection.	1. Deferred in **248th** Meeting. Final notice for 30 days for rectification of below mentioned shortcomings/ observations. a. An undertaking/commitment regarding Label claims and prescribing information being same as approved by reference drug agencies e.g., FDA, TGA, MHLW, EMA and Health Canada is required. b. International availability of

					formulation in reference Stringent Regulatory Agencies not confirmed. c. Evidence and verification of lyophilizer by area FID that the said instruments is in functional condition are required. d. Lab scale stability studies e. Undertaking that in case of resemblance of brand name and packaging of applied product, the firm will change these; is required.

1.	COA of API	**No**
2.	Approval of API by regulatory authority of country of origin	**No**

	or GMP certificate of API manufacturer issued by regulatory authority of country of origin.	
3.	Protocols followed for conduction of stability study and details of tests.	**No**
4.	Data of 03 batches will be supported by attested respective documents like chromatograms, laboratory reports, data sheets etc.	Yes
5.	Documents confirming import of API etc.	**No**
6.	All provided documents will be attested (name, sign and stamp) for ensuring authenticity of data / documents.	Yes
7.	Commitment to continue real time stability study till assigned shelf life of the product.	**No**
8.	Commitment to follow Drug Specification Rules, 1978.	**No**

REMARKS OF EVALUATOR
(AD PEC-I)

Firm has claimed Manufacturer Specification

- Firm has provided 06 Months accelerated and Real Time Stability Study Data.
- Aforementioned documents as required in 251st DRB Meeting are missing.
- Documents as required from the firm in 248th DRB meeting are missing except 'd. stability study data'.

Decision: Deferred for evidence of approval of applied formulation by reference regulatory authorities & shortcomings stated above

As per minutes of 265th meeting of the Board that firm has submitted stability data of 26 Week of real time and accelerated and case was deferred due to approval status of product in reference regulatory authorities. Formulation is approved in Italy and Registration Board in its 291st meeting approved the product and registration letter is pending due to fixation of MRP.

Decision: Registration Board deferred the case for submission of stability study data of three batches as per the guidelines and checklist approved by Registration Board in its 293rd meeting. Moreover, Board decided to refer the case to "Society of Oncology, Pakistan" for expert opinion regarding therapeutic use and need of applied formulation.

Case No. 02: Correction in Minutes of registration Board.

i. M/s Genesis Pharmaceuticals, Plot # 25, Sunder Industrial Estate, Lahore.

Registration Board in its 322nd meeting approved following registration application of M/s Genesis Pharmaceuticals, Plot # 25, Sunder Industrial Estate, Lahore. Detail is as under:

Name and address of manufacturer/ Applicant	M/s Genesis Pharmaceuticals, Plot # 25, Sunder Industrial Estate, Lahore.
Brand Name + Dosage Form + Strength	Irosak tablet 150mg
Composition	Each film-coated tablet contains: Elemental iron as iron polymaltose complex ….150mg
Diary No. Date of R & I & fee	Dy.No.17064; 04-10-2017; Rs.20,000/- (04-10-2017)
Pharmacological Group	Anti- Anemic.
Type of Form	Form-5
Finished product Specification	Manufacturers
Pack size & Demanded Price	2x 10's & s per SRO
Approval status of product in Reference Regulatory Authorities	Not applicable
Me-too status	Could not be confirmed in the applied formulation as 100mg is available.
GMP status	Last GMP inspection was conducted on 15-07-2016 and the report concludes: "A detailed re-inspection would be conducted in operational mode. At the time of inspection unit was found non-operational."
Remarks of the Evaluator	The evidence of applied strength of me-too status could not be verified.

	GMP status could not be confirmed by the report.
Previous decision	Deferred in 290th DRB meeting for evidence of applied formulation/ drug already approved by DRAP (generic /me-too status) along with registration number, brand name and name of firm. Further, Registration Board referred the case to QA & LT Division to update GMP status of Firm on priority.
Evaluation by PEC- XIII	Firm has submitted wrong me- too status as Ferricure Capsule of M/s S.J. & G Fazul Ellahie, Karachi 050637 while tablets are applied. Firm has submitted its latest GMP inspection report which was conducted on 03-02-2020 and the report concludes satisfactory level of GMP compliance.
Decision of 296th meeting.	Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me too status) along with registration number, brand name and name of firm.
Submission of the firm:	Firm has submitted their reply wherein they have requested to change their formulation of IROSAK tablet 150mg (Iron polysaccharide complex) from tablets to capsules and submitted fee of 5000/- vide deposit slip No. 1910045 dated 31-12-2020.
Evaluation by PEC- XIII	For change of formulation, requisite fee is 30,000/-.
Decision of 307th meeting.	Deferred for submission of fee applicable to the change of formulation.
Reply by the firm.	Firm has submitted a differential fee of 25000/- vide slip No. 2045102990 dated 27-09-2022.
Evaluation by PEC- XIII	**Revised formulation is as under;** **Each capsule contains:** **Elemental iron as iron polymaltose complex.…150mg** • Capsule (General) section approved vide letter No. F. 6-3/2014-Lic (M-234) dated 04-04-2014. • Copy of GMP certificate No. 114/2020-DRAP (AD-1910741-175) dated 22-07-2020 issued on the basis of inspection conducted on 03-02-2020 is submitted.
Decision: Approved with innovator's specifications. Registration letter will be issued after submission of fee of Rs. 7500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	

Firm has submitted that their original registration application was for Iron Polysaccharide complex while DRAP inadvertently considered it as an application for Iron Polymaltose complex. They have further submitted they had applied for change of formulation form Iron Polysaccharide Tablet to Capsule.

As evident from above agenda at point "Submission of the firm" and receiving of the application along with other correspondence, stance of the frim is justified that firm has applied form registration of Iron Polysaccharide Complex 150mg Capsule instead of Iron Polymaltose 150mg Capsule. Accordingly, correct formulation is as under:

"Each capsule contains:
Elemental iron as iron polysaccharide complex.…150mg"

Mee-too status: Irotit 150mg Capsules Reg. No. 110607 (M/s. Titlis Pharma)

Decision: **Registration Board decided to approve the correction in above product with following details.**

"Each capsule contains:
Elemental iron as iron polysaccharide complex.…150mg"

- **Registration letter will be issued after submission of fee of Rs. 7500/- for correction/pre-approval change in the method of manufacture/specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

ii. M/s. Xenon Pharmaceuticals (Pvt.) Ltd. 9.5-Km, Sheikhupura road, Lahore.

Registration Board in its 323rd meeting approved following registration application of M/s Xenon Pharmaceuticals (Pvt.) Ltd. 9.5-Km, Sheikhupura road, Lahore. Detail is under:

Name and address of manufacturer/ Applicant	M/s Xenon Pharmaceuticals (Pvt.) Ltd. 9.5-Km, Sheikhupura road, Lahore.
Brand Name + Dosage Form + Strength	VISKO PLUS Cream

Composition	Each gram contains: Fluocinolone acetonide……0.25mg Hydroquinone……..40mg Tretinoin…….…….0.05mg
Diary No. Date of R & I & fee	Dy. No. 1247 dated 11-01-2011, Rs. 8,000/- Challan dated 14-12-2010 (Photocopy), Dy. No. 25870 dated 03-12-2019 Differential fee Rs. 12,000/- vide challan No.1955348 dated 13-11-2019 (Original), "Duplicate dossier, R & I verified"
Pharmacological Group	Anti-inflammatory and antipruritic drugs
Type of Form	Form 5
Finished product Specification	Manufacturer Specifications
Pack size & Demanded Price	15gm, 30gm, As per SRO
Approval status of product in Reference Regulatory Authorities	TRI-LUMA® (fluocinolone acetonide, hydroquinone, and tretinoin) cream, 0.01%/4%/0.05%. Each gram of TRI-LUMA Cream contains 0.1mg of fluocinolone acetonide, 40 mg of hydroquinone, and 0.5 mg of tretinoin. (US FDA approved)
Me-too status	Troika Cream (Hydroquinone: 40mg (4% w/w); Tretinoin: 0.5mg (0.05% w/w); Fluocinolone acetonide: 0.1mg (0.01% w/w) of M/s ARP (Pvt) Ltd. National Industrial Zone, Rawat Islamabad. Registration No. 099219
GMP status	Panel inspection for renewal of DML and regularization of sections conducted on 11-02-2022 and recommended renewal of DML.
Remarks of the Evaluator (PEC-XVII)	• Ointment/cream Section (General) available as per Panel inspection for renewal of DML and regularization of sections conducted on 11-02-2022. • Firm revised label claim as per reference productd as: Each gram contains: Fluocinolone acetonide……0.01% Hydroquinone…….4% Tretinoin…….0.5%, but has not submitted the requisite fee. • The product is non-pharmacopoeial. • As per panel inspection for renewal of DML, "Three dispensing areas were developed where dispensing hoods were installed, on each for dispensing of general, psychotropic and steroidal materials". • Firm has provided undertaken that the product (Visko plus cream) has never been discussed or deferred in any meeting and that given information are true.
Decision: Approved with Innovator's specifications & revised label claim as: **Each gram contains:** **Fluocinolone acetonide……0.01%** **Hydroquinone……..4%** **Tretinoin……..0.5%.** • **Firm shall submit the fee of Rs. 30,000 for correction/pre-approval change in composition (correction/change of Fluocinolone acetonide quantitiy from 0.25mg/gm to 0.01% in line with reference product), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.** • **Registration Board further decided to verify fee challans (initial fee challan only) as per decision of 285th meeting.**	

While processing registration letter it was transpired that in USFDA approved reference product, strength of Tretinoin is 0.05% instead of 0.5%. firm has also submitted fee of Rs.30000/- vide challan No. 334402505, verified from website, as pre-registration variation fee. Firm has also submitted original fee challan of Rs.8000/- and yellow copy of fee challan of Rs.12000/- in lieu of verification of fee challan. Hence, formulation may be corrected as per reference. Accordingly, correct formulation is as under:

"Each gram contains:

Fluocinolone acetonide…….0.01%
Hydroquinone……...4%
Tretinoin……0.05%"

Decision: **Registration Board decided to approve the correction in above product with following details.**

"Each gram contains:
Fluocinolone acetonide…….0.01%
Hydroquinone……...4%
Tretinoin……0.05%"

iii. M/s Quaper Pharmaceuticals Plant 26-A Small Industrial Esatte Lahore Road Sargodha

Hence, correction ids required in decision of the Board. Firm has also submitted Firm has submitted revised label claim along with master formulation and fee of Rs.30,0000/-", [Rs.7500/-, vide challan No. 666070574000 and Rs.22500/- vide challan No. 58992619140, verified from website. Accordingly, correct formulation is as under:

"Each Film Coated Tablet Contains:
Rosuvastatin (as calcium)..…40mg"

Decision: Registration Board decided to approve the correction in above product with following details.

"Each Film Coated Tablet Contains:
Rosuvastatin (as calcium)..…40mg"

v. M/s Crystolite Pharmaceuticals, Plot # 1& 2, Street S-2, National Industrial Zone, Rawat.

Registration Board in its 271st meeting approved following registration application of M/s Crystolite Pharmaceuticals, Plot # 1& 2, Street S-2, National Industrial Zone, Rawat. Detail is under:

Name and address of manufacturer / Applicant	M/s Crystolite Pharmaceuticals, Plot # 1& 2, Street S-2, National Industrial Zone, Rawat.
Brand Name +Dosage Form + Strength	Dolopro gel 0.05%
Diary No. Date of R& I & fee	Dy No.2458; 25-07-2014; Rs.20,000/-
Composition	Each gram contains:-

	Piroxicam... 0.5% w/w
Pharmacological Group	NSAID
Type of Form	Form-5
Finished Product Specification	USP
Pack size & Demanded Price	1's (15gm tube and 30gm tube); As per PRC
Approval status of product in Reference Regulatory Authorities.	MHRA approved
Me-too status	Pharox gel of Valor Pharma
GMP status	Last GMP Inspection of M/s Crystolite Pharmaceuticals conducted on 18-01-2017 with conclusive remarks of good level of cGMP compliance.
Remarks of the Evaluator.	i. Primary packaging material of applied formulation is plastic tube while in MHRA it is Aluminum tube; however the firm has submitted commitment that the firm will conduct and submit complete stability studies to the DRAP with these plastic tubes to justify that our product is stable with these plastic tubes. ii. Firm has cream, ointment and lotion (general, steroidal section) now in which section gel has to be manufactured, is there any requirement of separate section for manufacturing of gels. iii. Firm has claimed USP specifications while applied formulation is not present in USP.
Decision: Approved.	

Registration letter of above product was not issued due to clarification of strength of formulation as in brand name it was mentioned as 0.05% while in formulation it was mentioned as 0.5%. Now firm has submitted receiving of registration application which reveals that applied strength is 0.5%. Hence, correct formulation is as under:

"Dolopro gel 0.5%
Each gram contains:
Piroxicam.....0.5% w/w"

Decision: **Registration Board decided to approve the correction in above product with following details.**

"Dolopro gel 0.5%
Each gram contains:
Piroxicam.....0.5% w/w"

	Remarks of the Evaluator.	Generic is not same as applied.
	Decision: Deferred for clarification regarding intended use / indication of applied formulation. **Firm submitted Indications of** SEPTISEL10% solution i.e. It is used as disinfectant against gram (+/-) bacteria, spore-forming bacteria, fungi, yeast, pathogenic viruses and mycoplasma	
Decision: Referred to EWG on veterinary drugs to review therapeutic requirement keeping in view safety, efficacy and quality parameters including its legal status in regional and global regulatory authorities.		

Case No. 04:- Reconstitution of Expert Working Group on Veterinary Drugs

Drug Registration Board in its 281st meeting held on 11-13th April, 2018 has constituted expert working group on veterinary drugs regarding matters related to veterinary drugs.

Decision of 281st meeting of RB: -

The Board observed that the constitution of the veterinary expert Committee notified under Section 10 of Drugs Act, 1976 vide SRO No.81(I)/2015 dated 26-01-2015 needs to be revised for inclusion of relevant expert(s) member(s) of the Board etc. However, since process of revision of constitution may take some time as the approval of Federal Government and other relevant organizations are required before revised Gazette notification, so, in order to avoid pendency/delay in processing of issues relating to veterinary drugs requiring input/recommendation of pertinent veterinary expert, the Board decided to constitute an Expert Working Group on Veterinary Drugs having following composition: -

1.	*Dr. Qurban Ali, Ex-Director General* *National Veterinary Laboratory, Islamabad.* *Expert Member Veterinary Drugs*	*Chairman*
2.	*Animal Husbandry Commissioner or his representative,* *M/o National Food Security & Research, Islamabad.*	*Member*
3.	*Dr.Mazhar-ul-Haq* *Veterinary Pharmacologist* *Arid Agriculture University, Rawalpindi.*	*Member*
4.	*Any other relevant expert(s)*	*As Co-opted member(s)*
5.	*Deputy Director (Reg-I), DRAP*	*Member, Secretary*

The expert working group will provide expert advice / views and recommendations to the Registration Board on matters relating to veterinary drugs referred by the Board including review of existing/new veterinary drug formulations. The group can Co-opt any relevant expert(s) as Co-opted member(s).

The Board further advised that in order to avoid any pendency, the "expert working group" needs be notified immediately without waiting till formal approval of the minutes of 281st meeting so that the meeting of the expert working group may be called earlier.

Accordingly notification of expert working group was issued on 08th May 2018. Chairman of Expert working Group co-opted Dr. Shabnum Firdous, Secretary PVMC as a co-opted member, and letter for in this regard was issued on 16th June 2022.

After completion of 2nd term Dr. Qurban Ali, (Chairman EWG) was retired as member registration board [under Rule 24 (f) of Drugs (LR&A) Rules, 1976 (Expert Member for Veterinary Drugs)]. Accordingly denotification letter of EWG, after approval from Chairman, Registration Board, was issued on 24th February, 2023 vide letter No. 7-4/2018 (M-281) and endorsed in 325th meeting of Registration Board.

Decision:- The Board observed that the constitution of the veterinary expert Committee notified under Section 10 of Drugs Act, 1976 vide SRO No.81(I)/2015 dated 26-01-2015 needs to be revised in order to avoid pendency/delay in processing of issues relating to veterinary drugs which require input/recommendation of pertinent veterinary expert, hence Board decided to constitute an Expert Working Group on Veterinary Drugs having following composition:-

1.	**Dr. Qurban Ali,** **Ex-Director General,** **National Veterinary Laboratory, Islamabad.**	**Chairman**
2.	**Dr. Ayesha Yaqoob, Drug Testing Laboratory,** **Rawalpindi.**	**Member**
3.	**Mst. Najia Saleem, Deputy Director (PE&R), DRAP**	**Member**

4.	Any other relevant expert(s)	As Co-opted member(s)
5.	Assistant Director (I&V-I), DRAP	Member, Secretary

The expert working group will provide expert advice / views and recommendations to the Registration Board on matters relating to veterinary drugs referred by the Board including review of existing/new veterinary drug formulations. The group can Co-opt any relevant expert(s) as Co-opted member(s).

The Board further advised that in order to avoid any pendency, the "expert working group" needs be notified immediately without waiting till formal approval of the minutes of 281st meeting so that the meeting of the expert working group may be called earlier.

Import & Vet-II Section

Case No: 01 REQUEST OF M/S ALI GOHAR & COMPANY (PVT) LTD, KARACHI FOR GRANT FOR ONE TIME PERMISSION FOR RE-PRINTING REVISED PRICES ON ALREADY PRIENTED PACKAGING OF IMPORTED DRUG.

M/s Ali Gohar & Company (Pvt) Ltd, State Life Building 1-B I.I. Chundrigar Road, Karachi has requested for grant of one-time permission for re-printing of revised MRPs on already printed packaging for their product Systane Lubricant Eye Drops (Reg. No.044834) which is imported in December 2022 and January 2023. Details are as under; -

Name of Product	Reg. No.	Manuf. Date	Batch No.	Batch Size	MRP already printed	Existing approved MRP
Systane Lubricant Eye Drops Contains:- Polyethylene Glycol 400…..0.4%w/v Propylene glycol…….0.3% w/v	044834	30-09-2022 30-10-2022 05-08-2022 21-11-2022 23-11-2022	11574 11F1W 11A6W 11ATP 11FKM	47,232 20,888 33264 12816 6912	Rs.998.87	Rs.1098.76

As per Drug Pricing Policy Section 3. Basis of Pricing Sub-section (6) No person including a manufacturer, importer, retailer, hospital, clinic, wholeseller or distributor shall be allowed to fix stickers, overlapping or masking of prices. However, in case of voluntary reduction in MRP, masking of previous MRP and reprinting of reduced MRP through laser inkjet will be permissible, if so required.

Decision: The Registration Board considered the request of the company and after detailed discussion and deliberations, the board didn't accede to the firm request.

Unipeg by Getz Pharma Pvt.Ltd.

			product is no longer drug of choice.	

SOP Requirement Firms Response	Documents Submitted by the Firms
Application.	Application with a fee Rs.7, 500/- is submitted.
Copy of registration letter.	Submitted
Justification.	Submitted
List of alternatives brands/ FPPs available in the country.	Submitted
An undertaking that: No case is pending at any forum / court of law Regarding this product. Provided information/ documents are true/ correct.	Submitted

Decision: Registration Board after discussion on the matter decided to call the management of the firm for personal hearing under section 42 of the Drugs Act, 1976 of schedule VI of DRAP Act 2012 before cancellation of the product.

CANCELLATION OF REGISTRATION

M/s Sanofi-Aventis Pakistan limited. Plot No. 23, Sector 22, Korangi Industrial Area, Karachi has submitted request for cancellation of registration/withdrawal of registration application of imported products as per following details:

Sr. No	Product name	Reg. No	Reason of license/registration application withdrawal stated by firm	Alternative registered products
2.	Vaxigrip	025266	Production of Vaxigrip was discontinued after NH 2020-2021 Influenza Season. Sanofi Pasteur has completed switch of Trivalent Influenza Vaccine production to Quadrivalent Influenza Vaccine. Quadrivalent Influenza Vaccine namely VAXIGRIP TETRA is already registered vide registration #: 105066 dated 7th October 2020 in Pakistan which includes two A strains and two B strains corresponding to both of the B lineages and same has been launched and is available in the market. The switch will allow broader protection against Influenza Virus strains. It will also enable to rationalize production capacities and optimize Influenza vaccine supply in context of high global demand increase.	Vaxigrip Tetra – Sanofi-Aventis Pakistan Limited
3.	Dengvaxia, Powder for Suspension for Injection with NaCl Solution 0.4%	082506 (Powder) 082509 (Solvent)	Sanofi Pasteur, France (manufacturer of subjected vaccines) has informed that they would like to withdraw the license of these vaccines, this decision is purely based on commercial reason and is not related to safety, quality or efficacy of the vaccines.	-
4.	Dengvaxia MD, Powder for Suspension for Injection with NaCl Solution 0.9%	082507 (Powder) 082510 (Solvent)		-
5.	Pentaxim	045699	*Sanofi has decided to withdraw the license of Pentaxim vaccine*, this decision is not based on any quality, safety or efficacy	Hexaxim - Sanofi-Aventis

			issues but has been taken for the following reason: Hexaxim vaccine which is already registered under the name of sanofi-aventis Pakistan limited bearing Reg No. 079275 is the only fully liquid, ready to use 6-in-1 vaccine to protect infants against diphtheria, tetanus, pertussis (whooping cough), Hepatitis B, poliomyelitis and invasive infections caused by Haemophilus influenzae type B. *A 6 in 1 pediatric vaccine reduces the number of vaccination visits for infants as compared to Pentaxim and an additional advantage of HepB antigen which is in high prevalence in Pakistan* that is available in Hexaxim. It is more convenient for parents to complete the recommended vaccination schedule and thus provide better protection to their children prone to 6 major diseases during childhood. It is also preferable to use 6 in 1 vaccine (Hexaxim) rather than 5 in 1 vaccine (Pentaxim) to avoid more visits and to improve the vaccination coverage rate.	Pakistan Limited

	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per ICH guidelines. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug

		substance and drug product. The firm has also submitted the non-clinical and clinical overviews and summaries.
	Name, address of drug substance manufacturer	Genentech, Inc.1 DNA Way South San Francisco, California 94080 USA.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 48 months real time stability data at -20°C of 03 batches • 06 month accelerated stability data 5°C of 03 batches
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	2 mL, USP/Ph. Eur./JP Type I glass, borosilicate, colorless
	Stability study data of drug product, shelf life and storage conditions	• 24 months real time stability data at 5°C of 03 batches • 06 month accelerated stability data 25°C of 03 batches
	Module-IV Non-Clinical	**4.2.1 Pharmacology** **4.2.1.1 Primary Pharmacodynamics** • 22-0083: In Vitro Biological Characterization of Mosunetuzumab for Human C1q Binding Activity • In Vitro Comparison of BTCT4465A Produced from E. coli and CHO Cells in B-Cell Killing, T-Cell Activation, and Cytokine Production With Human PBMCs • In Vitro Evaluation of BTCT4465A for Human Fc Gamma Receptor Binding Activities • Characterization of Anti-CD20/CD3 TDB Antibody Mechanism of Action and Efficacy • Comparison of Biological Activity (B-Cell Killing, T-Cell Activation, and Cytokine Production) of POC Anti-CD20/CD3 TDB Antibody and BTCT4465A with Human and Cyno Peripheral Blood Mononuclear Cells • In Vitro Pharmacologic Activity of Anti-CD20/CD3 TDB Antibody in the Presence of High Concentration of Rituximab-DANA • In Vitro Pharmacologic Activity of Anti-CD20/CD3 TDB Antibody in the Presence of High Concentration of Dexamethasone

		• In Vitro Evaluation of BTCT4465A (Anti-CD20/CD3 TDB) v0.1 and BTCT4465A v0.2 for Binding Activity to Human and Cynomolgus Monkey B Cells and T Cells • A Single-Dose Efficacy Study of Anti-CD20/CD3 T-Cell-Dependent Bispecific (TDB) Antibody and Non-CD20-Binding TDB Antibody in Human CD20/CD3 Double-Transgenic Mice • Dose Titration of Anti-CD20/CD3 T-Cell--Dependent Bispecific (TDB) Antibody in Depleting Endogenous B Cells in Human CD20/CD3 Double-Transgenic (TG) Mice • A Single Dose, Time-Course Efficacy Study with Anti-CD20/CD3 T-Cell--Dependent Bispecific (TDB) Antibody in huCD20/CD3 Double Transgenic Mice • A Repeat-Dose Efficacy Study of Anti-CD20/CD3 T-Cell-Dependent Bispecific (TDB) Antibody in Humanized NSG Mice **4.2.2 Pharmacokinetics** **4.2.2.1 Analytical Methods and Validation Reports** (if separate reports are available) • The Validation History of an ELISA Method for the Quantitation of BTCT4465A (Mosunetuzumab) in Cynomolgus Monkey Serum • The Validation History of an Immunoassay Method for Detection of Antibodies to BTCT4465A (Anti-CD20/CD3 TDB) in Cynomolgus Monkey Serum **4.2.2.7 Other Pharmacokinetic Studies** • Pharmacokinetics and Pharmacodynamics of E. coli- or CHO-Produced Anti-CD20/CD3 TDB Antibody in huCD20/huCD3 Transgenic Mice • A Single Dose Pharmacokinetic and Pharmacodynamic Study of BTCT4465A Administered by Intravenous Injection to Male Cynomolgus Monkeys • A Single Dose Pharmacokinetic Comparability Study of BTCT4465A via Intravenous Administration to Male • Cynomolgus Monkeys with a 11-Day Observation Period **4.2.3 Toxicology** **4.2.3.1 Single-Dose Toxicity (in order by species, by route)** • A Single Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of Anti-CD20/CD3 T-cell Dependent Bispecific Antibody via Intravenous Administration in Male Cynomolgus Monkeys • A Single Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of Anti-CD20/CD3 T-cell Directed Bispecific Antibody via Intravenous Administration in Male Cynomolgus Monkeys • A Single Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of

		BTCT4465A via Intravenous Infusion or Subcutaneous Administration in Cynomolgus Monkeys with a 7-week Recovery Period **4.2.3.2 Repeat-Dose Toxicity (in order by species, by route, by duration, including supportive toxicokinetics evaluations)** • A Multiple Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of anti-CD3/CD20 T-cell Dependent Bispecific Antibody Administered by Intravenous Injection to Cynomolgus Monkeys**.** • A Multiple Dose Toxicokinetic, Pharmacodynamic, and Toxicology Study of anti-CD3/CD20 with or without steroid or Rituximab pretreatment via Intravenous or Subcutaneous Administration in Male Cynomolgus Monkeys • Pilot 28-Day Repeat Dose Intravenous Study of Anti-CD20/CD3 T-cell Dependent Bispecific Antibody using Magnetic Resonance Imaging in the Cynomolgus Monkey • BTCT4465A: 25 Day Intravenous (Infusion) Administration Pilot Toxicity Study in the Monkey • BTCT4465A: 26 Week Multiple Dose Intravenous (Infusion) Administration Toxicity and Toxicokinetic Study in the Cynomolgus Monkey **4.2.3.5 Reproductive and Developmental Toxicity (including range-finding studies and supportive toxicokinetics evaluation) (If modified study designs are used, the following subheadings should be modified accordingly.)** **4.2.3.5.2 Embryo-fetal development** • The Weight-of-Evidence Assessment of Developmental Effects for Mosunetuzumab - for nonUS submission. **4.2.3.7 Other Toxicity Studies (if available)** **4.2.3.7.7 Other** • Tissue Cross-reactivity of BTCT4465A with Human and Select Cynomolgus Monkey Tissues • In Vitro Characterization of the Biological Activities of BTCT4465A in Human PBMCs and the Impact of Low Percentage of Anti-CD3 Homodimers on BTCT4465A Activity
	Module-V Clinical	**Study Design: GO29781** • An open Label, Multicenter, Phase I/II dose escalation study and expansion study evaluating the Safety, efficacy and tolerability study and Pharmacokinetics of mosunetuzumab as a single agent (and in combination with Tecentriq) in patients with Relapsed or Refractory B Cell Non-Hodgkin's Lymphoma and Chronic Lymphocytic Leukemia. • 447 enrolled into mosunetuzumab IV montherap cohorts (Group A and Group B escalation + expansion).
Remarks of Evaluator:		

Sr. No.	Observations	Response by the Firm
1.	Observer blind, Phase-III clinical study data are required since submitted clinical trial is an open label, Phase I/II study design. Justification is required.	The firm has submitted that the application for registration of new drug, Lunsumio (mosunetuzumab) 1mg and 30mg concentrate for solution for infusion, is applied on the basis of phase I/II GO29781 study, and same is the basis of approval for this product in the reference regulatory authorities such as USFDA, EMA and Swissmedic. We would like to add that the phase III (CELESTIMO study) trials for this drug are in process as informed by our principal, F. Hoffmann-La Roche Ltd., Basel, Switzerland.
2.	Relationship of product license holder with Basel, Switzerland.	Product Specific Authorization letter has been issued by M/s. F. Hoffmann-La Roche Ltd., Grenzacherstrasse 124, CH-4070 Basel Switzerland & the marketing authorization holder is Roche Registration GmbH Emil-Barell-Strasse 1, 79639 Grenzach- Wyhlen, Germany. For this purpose , the firm has submitted a copy of letter indicating relationships among Roch Group of Companies, wherein it has been mentioned M/s F.Hoffmann-La Roche Ltd., Basel Switzerland is the operational headquarter of the Roche Group.

<u>Decision:</u> Registration Board after due discussion decided to defer the case for further deliberation in the nest meeting.

7.	Name, address of Applicant / Importer	M/s Roche Pakistan Limited, 1st floor, 37-B, Block 6, PECHS, Karachi.

	The proposed proprietary name / brand name	**HUMODAR B 100R, suspension for injections, 100 IU/ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Insulin human (r-DNA) ……..... 100 IU/ml. Synonym of the applied drug - Isophane insulin
	Pharmaceutical form of applied drug	HUMODAR B 100R, suspension for injection in a vial or cartridge, a sterile of a white or almost white suspension, crystalline precipitate of isophane human insulin 100 IU/ml in an isotonic phosphate buffer. 1 ml of suspension contains 100 IU of insulin human recombinant (100 % crystalline protamine-insulin).
	Pharmacotherapeutic Group of (API)	Drugs used in diabetes. Insulins and analogues for injection, intermediate-acting. ***Code ATC:*** A10A C01.
	Reference to Finished product specifications	Monograph “Insulin injection, isophane”, Ph. Eur
	Proposed Pack size	- 3 ml in cartridge, 5 cartridges in package;
	Proposed unit price	As per SRO & Retrospective CPIs
	Shelf Life	36 Months
	Storage Condition	Store between 2°C to 8°C
	The status in reference regulatory authorities	Humulin NPH “Eli Lilly” (USA) 100IU/mL
	For generic drugs (me-too status)	HUMULIN-'N' Injection (Eli Lilly & CO, Ali Gohar & Co, Karachi) Reg. No.: 008299
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Name: Private Joint-Stock Company "On the production of insulin "INDAR" Address: 5, Zroshuvalna Str, Kyiv, 02099, Ukraine.

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API Insulin human recombinant powder substances at accelerated and real time (long term) conditions. The real time (long term) stability data is conducted at -18°C and lowered for 3 years.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted Assay Method Validation by performing linearity, accuracy, precision, and robustness.
	Container closure system of the drug product	**Package in cartridges** 3.0 ml of a medicinal product is filled in vial-cartridge, made from a transparent, colourless glass, hydrolytic type I (Ph. Eur.), tight closured by rubber plunger (Type I). On the other side cartridges are closured with combination seals consisting of rubber liner (Type I) with aluminium crimp cap. Type of vial-cartridge: Vial-cartridge made from transparent, colourless glass, hydrolytic class I (Type I) (Ph. Eur.) with inner siliconization. Type of rubber liner and plunger: Type I (Ph. Eur.)
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches. **For 3 ml in cartridge** The accelerated stability study data is conducted at 25°C±2°C for 6 months. The long-term stability study data is conducted at 5°C±3°C for 40 months (stable during 36 months). Batch no. 0010214, 0010315, 10116
	Module IV	Summarized in Biosimilarity data
	Module V	Summarized in Biosimilarity data
	The firm has submitted Biosimilarity data as per following details:	

WHO Biosimilarity Guidelines	**Data Submitted by M/s Galaxy Pharma (Pvt.) Ltd. Karachi**
Quality Comparison Physicochemical Characterization	Insulin human recombinant (100% of crystalline protamine insulin) Humodar B 100R (in 3.0 ml cartridges) in diabetes patients has been compared to Humulin NPH "Eli Lilly" (USA) (in 3.0 ml cartridges).

Category	**Quality Attributes**	**Analytical methods**
Structural characterization	Amino acid sequence Analysis	Peptide mapping and full-length sequencing by LC-ESI-MC AND –MS/MS
	Disulfide Linkage Analysis	LC-ESI-MS and – MS/MS
	N- Terminal sequencing	Edman: 10 Amino acids
Physicochemical properties	Molecular weight or size	By Mass spectroscopy: LC-ESI-MS of intact protein
	Related protein	HPLC Alliance systems with UV/VIS detectors, waters

Comparison of degradation profile (under accelerated stability study stressed condition) (temp +40°C±2°C, RH 75%±5%)	Test equipment – Water HPLC Alliance systems with UV/VIS Detectors The tests performed Insulin assay, high molecular weight proteins, related proteins, related proteins- perchlorate as determined by two orthogonal HPLC methods, one Ph. Eur and the other in-house.
Comparison of degradation profile (exposure to stress condition)	Test equipment – Water HPLC Alliance systems with UV/VIS Detectors Experimental conditions include Acid induced degradation (Ph 2.5), Alkaline induced degradation (Ph 11), Agitation induced degradation, Photodegradation, Oxidative degradation.
Comparison of three-dimensional structure & thermodynamic stability	Instrumentation: - FTIR Spectroscopy - CD spectroscopy - UV-Vis spectroscopy - Fluorescence spectroscopy - Dynamic light scattering - Differential calorimetry The extensive studies using above methods show there is no difference in secondary and tertiary structure between drug substances (highly comparable)
Biological Activity	Cell based Bioactivity Assay – In vivo test in rabbits The biological activity of tested Insulin human was determined in comparison with a standard Insulin human sample using the blood sugar-lowering effect in rabbits. Determination of the biological activity of Insulin human was performed in a certified Quality Control Laboratory of the Indar Company. The test was carried out on 18 rabbits (each weighing 2.5-3.5kg), which were previously determined as sensitive to Insulin human. The solution of the Insulin human (batch 0030108 ИРС) and the standard sample were administered to 18 rabbits divided into the investigational and control groups in quantity of 0.5 IU per 1 kg of the body weight. One hour and 2.5 h after each injection, a suitable blood sample was taken from the ear vein of each rabbit, with subsequent determination of blood glucose. The resulting index of the biological activity of the tested Insulin human satisfied the requirements.
Immunochemical properties	A randomized, open-label, clinical study was conducted in diabetes patients to determine the efficiency of Indar's product Humodar B 100R (in 3.0 ml cartridges) compared to Humulin NPH "Eli Lilly" (USA) (30 patients in each group). The treatment duration averaged to 21 days. Incidence of immune response (formation of antibodies against insulin) in the groups of the study drug and comparison drug in %; - Average therapeutic doses of Humodar B 100R were not different from those ones which were used in reference preparation – Humulin NPH. Statistical analysis showed its significant efficiency compared to Humulin NPH. - Humodar B 100R had a good acceptability in patients. During trials (21 days) no patient had adverse reactions.

<table>
<tr><td></td><td>- Humodar B 100R had a good hypoglycaemic effect in diabetes patients type I and type II diabetes of severe and medium severity level.
- It was concluded that the efficiency of Humodar B 100R was comparable to Humulin NPH of Eli Lilly (USA).</td></tr>

<tr><td>Non-clinical Comparison
I. In-vitro Studies
II. In-vivo Studies
a) Biological / Pharmacodynamic activity
b) Non- clinical Studies</td><td><u>Acute toxicity test</u>: White mice of both sexes. 5 groups of experimental animals (10 mice per group) were formed for testing every medication. Insulin medications were injected as solutions subcutaneously and slowly as single-shots in 10 – 100 IU doses per kg of body weight. The observation was done 14 days after the administration of drug products. “HUMODAR B” semisynthetic insulin suspension for injection, 40 IU/ml, manufactured by the “INDAR” PrJSC (Ukraine) (that previously was registered in Ukraine), was used as the reference product.
There is no difference between the values of LD50. It was concluded that the tested formulation of the medication corresponded to the reference product in values of acute toxicity and clinical pattern.
No evidence of toxic effects was found in proposed doses.</td></tr>
</table>

Clinical Studies	• To evaluate efficiency and acceptability of Humodar B 100R (in 3.0 ml cartridges) in diabetes patients compared to Humulin NPH "Eli Lilly" (USA) (in 3.0 ml cartridges). • Open label, comparative, randomized, multicenter clinical study of the efficiency and acceptability of Humodar B 100R (in 3.0 ml cartridges) in diabetes patients compared to Humulin NPH "Eli Lilly" (USA) (in 3.0 ml cartridges) in patients with diabetes mellitus. -30 in study group (with diabetes mellitus with severe and medium degree of disease: type I –16 pts; type II – 14 pts). -30 in control group (with diabetes mellitus with severe and medium degree of disease: type I –14 pts; type II – 16 pts). • Potency assignment of Humodar, and data collection on adverse reaction in comparison with standard insulin by the means of insulin dependent diabetic patients' treatment. • Randomized crossover clinical study of potency assignment of Humodar in comparison to standard insulin among **73 patients**, divided into 2 groups: (patients in study group and patients in control group) • To study the effect of test drug on the state of carbohydrate metabolism at patients with diabetes type 1 and type 2 (52 patients with diabetes mellitus type I and II in a state of decompensation); To study the tolerance, influence and possible adverse reactions of test drug, to define hypoglycemia frequency and intensity. • To evaluate the efficacy and tolerability of insulin Humodar B 100R for diabetics with type 1 and 2 (20 patients). • The study demonstrated safety and efficacy in the treatment of diabetics. Evaluation of efficacy and tolerability of the drugs Humodar B 100R (100 IU/ml, suspension for injection in 10 ml vials, 3 ml cartridges) (20 patients) produced by CJSC "Indar" (Ukraine) for diabetes type 1 and 2.

<u>Decision:</u> Keeping in view the legalized CoPP indicating product availability in the country of origin, Registration Board approved the product subject to compliance to the current Import Policy for finished drugs and submission of notarized LoA.

	The proposed proprietary name / brand name	**HUMODAR R 100R, solution for injections, 100 IU/ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each mL contains: Insulin human (r-DNA) ……..... 100 IU/ml. Synonym of the applied drug – Insulin soluble
	Pharmaceutical form of applied drug	HUMODAR R 100R, a solution for injections in a cartridge or vial, a sterile, clear, colourless, aqueous solution of human insulin, 100 IU/ml.1 ml of injections solution contains 100 IU of insulin human recombinant. Injection finished product formulation is manufactured with no overage of the active substance.
	Pharmacotherapeutic Group of (API)	Drugs used in diabetes. Insulins and analogues for injection, fast-acting. ***Code ATC:*** A10A B01.

	Reference to Finished product specifications	Monograph “Insulin injection, soluble”, Ph. Eur.
	Proposed Pack size	- 3 ml in cartridge, 5 cartridges in package;
	Proposed unit price	As per SRO & Retrospective CPIs
	Shelf Life	2 years (24 months)
	Storage Condition	Store between 2°C to 8°C
	The status in reference regulatory authorities	«HUMULIN REGULAR, solution for injection, 100 IU/ml, 10 ml in vials» production by company «Eli Lilly» (USA)
	For generic drugs (me-too status)	HUMULIN-'R' Injection (Eli Lilly & CO, Ali Gohar & Co, Karachi) Reg. No.:008302, 008301
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Name: Private Joint-Stock Company "On the production of insulin "INDAR" Address: 5, Zroshuvalna Str.,Kyiv, 02099, Ukraine
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API Insulin human recombinant powder susbtances at accelerated conditions 5°C± 3°C. The long term stability data is conducted at -18°C and lowered for 3 years.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Analytical method validation/verification of product	Firm has submitted Assay Method Validation by performing linearity, accuracy, precision, and robustness.
	Container closure system of the drug product	**Package in cartridges** 3.0 ml of a medicinal product is filled in cartridge, made from a transparent, colourless glass of I hydrolytic class (Type I), siliconed inside, tight closured by rubber plunger. On the other side cartridges are closured with combination seals consisting of rubber linear with aluminium crimp cap. Cartridge is labelled with label. 3 or 5 cartridges together with insert leaflet are packed into an individual pack made from a cardboard. Cover of a pack should be closed with the help of lock-clasps. <u>Type of vial-cartridge:</u> Vial-cartridges made from transparent, colourless glass, hydrolytic class I (Type I) (Ph. Eur., current edition) with inner siliconization <u>Type of rubber liner and plunger:</u> Type I (Ph. Eur., current edition) – bromobutyl rubber
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 03 batches. **For 3 ml in cartridge**

		The accelerated stability study data is conducted at 25°C±2°C for 6 months. The long-term stability study data is conducted at 5°C±3°C for 2 years. Batch no. 0010414, 0010315,10116
	Module IV	Summarized in Biosimilarity data
	Module V	Summarized in Biosimilarity data
	The firm has submitted Biosimilarity data as per following details:	

WHO Biosimilarity Guidelines	**Data Submitted by M/s Galaxy Pharma (Pvt.) Ltd. Karachi**
Quality Comparison Physicochemical Characterization	Insulin human (r-DNA) from INDAR has been compared to Insulin human (r-DNA) Humulin "Eli Lilly" (USA) (Reference drug).

Category	**Quality Attributes**	**Analytical methods**
Structural characterization	Amino acid sequence Analysis	Peptide mapping and full-length sequencing by LC-ESI-MC AND –MS/MS
	Disulfide Linkage Analysis	LC-ESI-MS and – MS/MS
	N- Terminal sequencing	Edman: 10 Amino acids
Physicochemical properties	Molecular weight or size	By Mass spectroscopy: LC-ESI-MS of intact protein
	Related protein	HPLC Alliance systems with UV/VIS detectors, waters
	Protamine content	SEC (Thermofisher scientific)
	Zinc content	AAS (Thermofisher scientific)
	Lys-insulin content	HPLC
	ModLys-insulin content	IC (Thermofisher scientific)
	Particle size distribution	Laser diffraction particle size analyzer mastersizer 2000, Malvern instruments
	Microscopic characterization of NPH crystals	Microscopic Nikon eclipse 80i with camera

Comparison of degradation profile (under accelerated stability study stressed condition) (temp +40°C ± 2°C, RH 75% ± 5%)	Test equipment – Water HPLC Alliance systems with UV/VIS Detectors The tests performed Insulin assay, high molecular weight proteins, related proteins, related proteins- perchlorate as determined by two orthogonal HPLC methods, one Ph. Comparison of three-dimensional structure & thermodynamic stability	Instrumentation: - FTIR Spectroscopy - CD spectroscopy - UV-Vis spectroscopy

<table>
<tr><td></td><td>- Fluorescence spectroscopy
- Dynamic light scattering
- Differential calorimetry
The extensive studies using above methods show there is no difference in secondary and tertiary structure between drug substances (highly comparable).</td></tr>
<tr><td>Biological Activity</td><td>Cell based Bioactivity Assay – In vivo test in rabbits
Biological activity of HUMODAR® R 100R was tested on 2.5 – 3.5 kg rabbits with the help of comparison of its expected activity with the biological activity of the standard insulin sample. 15 mg (precise batch) of the standard human insulin sample with the activity of 26 IU/mg was dissolved in 10 ml 0.003 M hydrochloric acid. 5 ml of received solution was diluted with phosphate buffer pH 7.4 to 100 ml. Biological activity of the insulin medication was examined no sooner than in 7 days after testing animals' insulin sensitivity. Animals chosen for examination were divided into 2 groups (control and research) (10 animals in each).</td></tr>
<tr><td>Immunochemical properties</td><td>A randomized, open-label, clinical study was conducted in diabetes patients to determine the efficiency of Indar's product Humodar R 100R compared to Humulin Regular "Eli Lilly" (USA) (30 patients in each group). All patients were also co-administered with 2-3 daily injections of short- acting Insulin preparation Humodar R. The treatment duration averaged to 21 days.
- Based on data of clinical trials stipulated in the report sugar lowering efficiencyof HUMODAR R 100R was proved in the course of treatment with HUMODAR R 100Rdiabetes patients what testify probable glycaemia lowering in the course of transfer to the administration of the tested preparation.
- HUMODAR R 100R is rational to use for intensify insulintherapy with high level of postprandial glycaemia and before each meal intake.
- Sugar lowering effect of HUMODAR R 100R was achieved by average daily dose of the preparation, which was not considerable different from the insulin dose of insulin which was used in control group previously.
- Clinical trials of preparation showed good tolerability and safety of HUMODAR R 100R and no ocuurence of adverse reactions.
- It was concluded that the efficiency of Humodar R 100R was comparable to Humulin R of Eli Lilly (USA).</td></tr>

	<u>Decision:</u> Registration Board after discussion on the matter decided to defer the case for further deliberations.	

Imported Veterinary Biologicals from Reference Countries:

Cancellation of Registration of Avipro Salmonella DUO of M/s Eli Lilly Pakistan (Pvt) Limited Karachi and grant of same brand to M/s Golden Harvest, Karachi on the NOC of M/s Eli Lilly Pakistan (Pvt) Limited Karachi

M/s Golden harvest, Karachi applied for registration of following veterinary biologicals in their name from M/s Eli Lilly Pakistan (Pvt.) Ltd., Karachi:

13.	**Name of Importer**	**M/s Golden Harvest,** Address: Plot No. 49-C, 24th Commercial Street Phase-II Extt: DHA, Karachi.
	DSL details	License to sell drug as distributor No. 054 valid till 26-02-2023
	Marketing authorization holder	**Lohmann Animal Health** Heinz-Lohmann-StraBe 4, 27472 Cuxhaven, Germany.
	Name of Manufacturer	**Lohmann Animal Health** Heinz-Lohmann-StraBe 4, 27472 Cuxhaven, Germany
	Name of exporting country	Germany.
	Brand Name +Dosage Form + Strength	Avipro Salmonella DUO
	Diary No. Date of R& I & fee	Dy. No. 2542 (R&I); Dated 21-01-2021 Rs.100,000 (Slip No.0711592)
	Composition	Composition per dose: 1 dose contains Each dose contains: Live Salmonella Enteritidis bacteria, strain Sm24/Rif12/Ssq, Atleast 1 x 10^8.0 CFU* Live Salmonella Typhimurium bacteria, strain Nal2/Rif9/Rtt, Atleast 1 x 10^8.0 CFU* *CFU = Colony Forming Units
	Pharmacological Group	Live Freeze dried bacterial veterinary vaccine
	Type of Form	Form-5A
	Finished Product Specification	Ph. Eur. Specification
	Shelf Life	18 months (2°C-8°C)
	Pack size and demanded price	10 × 2000 dose vial / Decontrolled
	International availability	Germany, EU , UK,
	Products already registered in Pakistan	Avipro Salmonella DUO is already registered in Pakistan as an innovative product with Reg no**. 083177**.
	Stability data of finished product	The firm has submitted stability study data of 26 months conducted at 2°C to 8°C for three consecutive batches as below: 200308-1C 200312-2C 200401-3C
	Document Details	• Legalized Free Sale Certificate No. 048/LAH/2020.issued by State Office for Consumer Protection and Food Safety, Germany (Niedersächsisches Landesamt für Verbraucherschutz und Lebensmittelsicherheit) Dated: 10/08/2020 • Legalized GMP Certificate No.075/LAH/2018 Dated: 23 Feb 2018.

Remarks of Evaluator
Valid copy of Drug sale license is required to be submitted.

Sr. No.	**Decision of 317th meeting of RB**	**Response by the firm**
1.	Original termination letter from manufacturer abroad for previous importer.	Original Letter of Termination dated 11/03/22 submitted by Firm
2.	Valid legalized approval of 21 months shelf life issued by regulatory authority of country of origin.	The firm has submitted revised Form 5A with correct shelf life for 18 months' shelf life which can be verified from online database of Germany.

3.	Real time stability data for both products including all the parameters as mentioned in finished product specifications. Only test for bacterial counts and residual moisture (%) have been provided. While as per CoA four tests are performed, i.e. identification of active substance, viable testing, purity test and residual moisture.	The firm has submitted an Explanation Letter regarding the vaccine AviPro Salmonella DUO: According to our previous explanation in the stability justification letter on March 12, 2022, the provisions that are taken in the account regarding veterinary vaccines in the European Union (EU), Germany, are the ones defined in monograph no. 62 of the European Pharmacopoeia (EP), section 2-2-3-Stability. *"For a live freeze-dried bacterial veterinary vaccine like the one we are dealing with, the bacterial counts and residual moisture testing are the parameters to be studied, and both have been tested in the provided stability trial.* *Monitoring all the parameters defined in batch release (CoA) is not a common practice as per se it has not added value. Only monitoring the parameters that may change and therefore influence on the quality and shelf-life of a veterinary vaccine are the ones to be controlled."* Having said that, regarding the 4 parameters mentioned by the Board: identification of active substance viable testing purity test residual moisture Viable testing (which are the bacterial count test) and residual parameters were assayed in the stability trial. In relation to the identification of the active substance, this a bivalent live bacterial vaccine composed by *Salmonella* Enteritidis and *Salmonella* Tiphymurium. *The full identification profile was done at batch release.* The characteristics to identify these 2 *Salmonella* serotypes do not change over time. Chemically-defined substances may change over time, but, for bacteria, if grown during shelf-life (confirmed by the viable bacterial count), they do not change its identity and therefore it does not need to be reconfirmed. In relation to purity, this test was also carried out at batch release. Once purity is confirmed, the vaccine is already manufactured, so filled in, freeze-dried and sealed. The vial is no longer manipulated and therefore it cannot be (re-contaminated). This is why purity is another parameter that does not need to be reconfirmed. To summarize, we would like to highlight that the 4 parameters the 2 critical ones (already mentioned in the EP) were carried out in the trial, and the 2 other ones were duly checked at batch release, are not susceptible to change over time and cannot influence shelf-life."

<u>Decision:</u> Registration Board decided to provide the opportunity of personal hearing to M/s Eli Lilly Pakistan (Pvt) Limited Karachi under section 42 of the Drugs Act, 1976 of schedule VI of DRAP Act 2012 for cancellation of Registration of Avipro Salmonella DUO of M/s Eli Lilly Pakistan (Pvt) Limited Karachi and as per NOC of M/s Eli Lilly Pakistan (Pvt) Limited Karachi,

	the case shall also be considered for grant of registration of said product to M/s Golden Harvest, Karachi after personal hearing.

CASES OF DD-III (Ms. HALEEMA SHARIF)

Imported Human Biologicals from Non-Reference Countries

M/s Bio Link (Pvt) Ltd., Karachi applied for the registration of following human biologicals:

Sr. No.	Name of Manufacture	Name of Product	Dy. No., Date of Application & Fee Status/ Pack Size
14.	M/s Sichuan Yuanda-Shuyang Pharmaceutical Co., Ltd., China	SUYA-HB 100 IU/mL	Dy. No.9721(R&I) Dated 11-02-2021 Rs.100,000/- 1's vial
15.		SUYA-HR 200 IU/mL	Dy.No.9722 (R&I) Dated 11-02-2021 Rs.100,000/- Dated 11-02-2021 1's vial

It is pertinent to mention that firm has submitted applications on Form-5A instead of Form-5F (CTD). Applicant was advised vide this division letter dated 10th February, 2022 to submit following documents for further processing of the case:

a. Applications on Form-5F (CTD) for both products.
b. Original valid legalized CoPP/ FSC & GMP.
c. Original or Notarized copy of letter of sole agency authorization.

Now the firm M/s Bio Link (Pvt) Ltd., Karachi in their reply on 27th January 2023 submitted following:

a. Module I of Form-5F (CTD) for both products which is also incomplete.
b. Original valid legalized CoPP for SUYA-HB 100 IU/mL & SUYA-HR 200 IU/mL
c. Copy of letter of sole agency authorization for product SUYA-HB 100 IU/mL only.

Evaluation by DBER:
It is submitted that both application of firm is still incomplete for following documents:

i. Module I (In-complete)
ii. Module II
iii. Module III
iv. Module IV
v. Module V
vi. Original or notarized copy of sole agency authorization for both products

Decision: Registration Board deferred the case for the following:

i. Submit Applications on Form-5F (CTD)including all its modules for both products.
ii. Original or notarized copy of sole agency authorization for both products.

	Pharmacological Group	Anti – Infective
	Type of Form	Form-5A
	Finished Product Specification	As per Innovator's specifications
	Shelf Life	24 months (In the vapor or liquid phase of liquid nitrogen)
	Document Details	Certificate of licensing and inspection (Certificate No. 21-01074) is submitted by the firm. **Sole Agency Agreement:** **Zoetis Inc** a corporation existing under the laws of USA, hereby authorizes; M/s UM Enterprises our sole agent in Pakistan for Bursal disease- Marek Disease Vaccine, Serotype 3 Live marek disease vector, USDA product code 1A88.R3
	Pack size	4000 doses
	Reference Regulatory Authority Availability	Approved by USDA
	Products already registered in Pakistan	Could not be confirmed with this combination

Remarks of Evaluator:

It is submitted that Expert opinion of Dr Qurban Ali Member Registration Board is received for PoulVac Procerta HVT-IBD 2000 doses which could also be considered in deciding this case as composition is same only No. of doses are different.

Expert opinion of Dr Qurban is as under:

Opinion of Dr Qurban Ali, Member Registration Board.

Kindly refer to your letter (i) F.No.1-15/2018-AD (BD) Vol. I dated Islamabad the 1st June, 2022 on the subject noted above. Please find below the opinion on the products namely as follows:

Poulvac Procerta HVT-IBD (Marek's Disease + Bursal Disease Vaccine) applied by M/s UM Enterprise, Karachi

Marek's disease (MD), and Infectious bursal disease (IBD) prevail is Pakistan and vaccination against these diseases are routine and therefore need remain. MD vaccine is not produced in the country and the IBD vaccine having varying quality produced locally are not normally used by commercial expensive parent and breeder flocks and at hatcheries producing layers and broilers chicks.

MD and IBD viruses are contagious pathogens that lead to poor field performance and condemnations. MD and IBD lead to immunosuppression, which predisposes both young and older birds to secondary infections. Moreover, the vaccine can especially help raising flocks without antibiotics, through establishing early, robust immunity through vaccination; similarly, it had advantage of control of two diseases with one dose.

The product is of USA origin by M/s Zoetis Inc. USA. M/s Zoetis has over 65 years' experience of animal health and over 20 years in-ovo expertise. The applied vaccine is a frozen, cell associated, live virus vaccine that contains the Marek's disease recombinant serotype 3 turkey herpesvirus (which is widely known to be safe and protect against Marek's disease) with the VP2 gene from infectious bursal disease virus. The product has been shown to be effective for the vaccination of healthy one-day-old chickens and 18- to 19-day-old embryonated chicken eggs against IBD and MD. The duration of immunity against standard IBD is at least 63 days; efficacy and safety data is also available at *productdata.aphis.usda.gov*. The vaccine is packaged in glass ampoules and supplied with diluent packaged in a separate container. The vaccine ampoules are inserted in metal canes, stored and shipped in a liquid nitrogen container. The product is used either s/c injection or in-ovo-injection.

	Based on continued need and advantages of quality, efficacy and safety, the product is recommended for registration with explicit warning on label *[Do not vaccinate within 21 days before slaughter. Use entire contents when first opened. Inactivate unused contents before disposal of empty vials]*.
	Decision: Keeping in view valid legalized Certificate of licensing and inspection indicating product availability in country of origin, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.

Imported Veterinary Biologicals from Non-Reference Countries

17.	**Name and address of Importer**	**M/s. Jovac Global-PAK,** Plot No. 17, Block D, EME, DHA Phase 12, Lahore
	Detail of DSL	M/s. Jovac Global-PAK Address: 4th floor, Plot No.17, Block D, EME DHA, Phase 12 Lahore. Valid up to:15.06.2023
	Name and address of Manufacturer	M/s. Jordan Bio Industries Center (Jovac). Address: Amman, Yajouz road, near Yajouz Agriculture Nursery Amman, Jordan.
	Name of exporting country	Jordan
	Brand Name +Dosage Form + Strength	Jova Zeit 6 Plus vaccine. (Injectable oil emulsion)
	Diary No. Date of R& I & fee	Dy. No. 25502 R&I Dated 14-09-2022 Rs. 150,000/- (Slip No. 9269169953)
	Composition	Each dose contains: Inactivated Adenovirus Serotype 2,4 &8 at least…. $10^{6.5}$ $TCID_{50}$
	Pharmacological Group	Inactivated Vaccine
	Type of Form	Form-5A
	Finished Product Specification	Manufacturer's specifications
	Shelf Life	2 years (2^0C-8^0C)
	Document Details	a. Valid legalized free sale certificate is submitted by the firm however it does not confirm the availability of product in country of origin. b. Valid legalized GMP certificate issued to M/s. Jordan Bio Industries Center (Jovac) valid for three years from the date of inspection i.e. 01/12/2020.
	Pack size	300ml(1000doses)
	Reference Regulatory Authority Availability	N/A
	Products already registered in Pakistan	GPVAC Hydro TC Plus of Grand Pharma Each 0.3ml contains: Inactivated Avian Adenovirus 4…. $\geq 7\log_{10}$ EID_{50}/dose Inactivated Avian Adenovirus-8…. $\geq 7\log_{10}$ EID_{50}/dose
	Remarks of Evaluator	i. Free sale certificate does not confirm the free sale status of product in country of origin. ii. Locally registered product contains Adenovirus serotype 4 & 8 but not serotype 2.
	Decision: Registration Board deferred the case for the following: • **For submission of valid legalized Free Sale Certificate indicating product availability in country of origin.** • **For submission of evidence of locally registered product containing all serotypes.**	

Imported Veterinary Biological applied by M/s Vety Care (Pvt.) Ltd. Islamabad deferred in 323rd meeting of Registration Board.

18.	**Name and address of Importer**	**M/s Vety Care (Pvt.) Ltd.** **Plot No. 77, Street No.6, I-10/3 Islamabad.**
	Detail of DSL	DSL No. DSL-156 ICT/2013 dated 31-12-2014 valid till 30-12-2018. Copy of Renewal receipt dated 26-12-2018
	Name and address of Manufacturer	M/s Intervet International B.V. Wim de Korverstraat 35, 5831 AN Boxmeer, The Netherlands
	Brand Name +Dosage Form + Strength	**Innovax ND-IBD**
	Composition	Each dose(ml) contains: Live Herpesvirus of turkey strain HPV 360*….at least $10^{3.3}$PFU** * HPV 360 is a HVT-based recombinant encoding the NDV F protein and the IBDV VP2
	Finished Product Specification	Innovator Specs
	Pharmacological Group	Veterinary Vaccine
	Shelf Life	36 months (Liquid Nitrogen)
	International availability	Not Provided.
	Products already registered in Pakistan	Not Available as per record.
	Type of Form Dy. No. & Date of application, Fee submitted	Form-5A Dy. No. 11337(R&I) Dated 28-03-2018 Rs. 100000/- 28-03-2018
	Demanded Price / Pack Size	1's Vial (2000 doses)
	General documentation	Valid legalized CoPP No. 249030 dated 21-03-2018 issued by Ministry of Agriculture Nature and Food, the Netherlands.
	Remarks of Evaluator	The product is not registered in country of origin. The firm submitted that some registrations in the Netherlands differ from the standard registration for a product. This does not mean that the product is in principle not registered or marketed in the Netherlands, but only with a deviation to the standard registration. Real time stability data provided is of 0, 6, 12, 18, 24, 30, 36, 39 months instead of appropriate time intervals and only titer is tested instead of all controls of finished product. The firm submitted that according to Ph. Eur. Monograph 0062, the test should be performed at regular intervals until 3 months beyond the end of shelf life. For veterinary vaccines the intervals at which the vaccines are tested for stability evaluation are not defined within European legislation. The monograph includes following tests in stability studies: Virus titrations, bacterial counts or potency tests carried out at regular intervals until 3 months beyond the end of the shelf life on not fewer than 3 representative consecutive batches of vaccine kept under recommended storage conditions together with results from studies of moisture content (for freeze-dried products), physical tests on the adjuvant, chemical tests on substances such as the adjuvant constituents and preservatives, and pH, as appropriate.
	Decision of RB in 288th meeting:	"Registration Board deferred the case for submission of following by the firm: a. Approval status of above product registration by reference regulatory authorities. b. Complete stability data indicating all the parameters tested in COA."
	Evaluation by DBER	The firm has now submitted the following: a. Copy of market authorization approval of product issued by Icelandic Medicine Agency.

		b. As per Intervet the stability data already provided as per European Union Guidelines, and is being accepted all over the world.
	Decision of RB in 292nd meeting:	Registration Board decided to refer the case to expert working group on veterinary drugs regarding the prevalence of strains and advised the firm to submit valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies.
	Evaluation by expert working group on veterinary drugs	Referred the case for expert opinion from Ministry of National Food Security & Research, Islamabad.
	Decision of RB in 313th meeting	Deferred for expert opinion from Ministry of National Food Security & Research, Islamabad.
	Evaluation by DBER	Expert opinion from Ministry of National Food Security & Research, Islamabad placed in 317th RB meeting: This is vector vaccine for gumboro(IBD) already 2 similar vaccines are available in Pakistan. May be recommended for import for making healthy competition.
	Decision of RB in 317th meeting	*As the firm had not submitted valid legalized CoPP indicating product availability in country of origin and European Union Guidelines regarding stability studies till 317th RB meeting so the Registration Board in its 317thmeeting decided as under:* ***Deferred the product for submission of valid legalized CoPPs indicating products availability in country of origin and European Union Guidelines regarding stability studies.***
	Evaluation by DBER	***Now the firm has submitted following:*** *Original legalized COPP indicating product availability in country of origin (firm has applied for approval of lyophilized part of product but product is supplied with diluent as per CoPP).* *European Union Guidelines regarding stability studies of veterinary vaccine wherein time interval for stability studies is 0,3,6, 9… months but stability studies of applied formulation* are at *0, 6, 12, 18, 24, 30, 36, 39 months' time intervals*
	Decision of 323rd RB meeting	Deferred for the following: • For Submission of complete stability data indicating all the parameters tested in COA and on all time points as recommended by European Union Guidelines. • For clarification regarding status of product would it be in combo pack or otherwise as firm has applied for approval of lyophilized part of product but product is supplied with diluent as per CoPP.
	Evaluation by DBE&R	Now the firm has submitted following: Stability studies data of three batches (1000 doses,2000doses,4000doses ampoule) for 36 months at storage in liquid nitrogen at 0,3,6….36 time intervals at following parameters; • Identity • Virus titer • Sterility • Mycoplasma • Extraneous Agents We Intervet International B.V., Boxmeer, The Netherlands, hereby declare that product Innovax-ND-IBD is not a combo pack, hence applied for registration separately. The diluent (Nobilis Diluent CA) is already registered in Pakistan with registration number 081293.
	<u>Decision:</u> Keeping in view valid legalized free sale certificate indicating product availability in country of origin, Registration Board approved the product subject to compliance of current Import Policy for finished drugs.	

Imported Veterinary Biological applied by M/s UM Enterprises. Islamabad deferred in 316th meeting of Registration Board.

Case No. 01: MANUFACTURE & SALE OF SUB-STANDARD MELOVETZ INJECTION, REG. NO. 102021, BATCH NO. 2199017 MANUFACTURED BY M/S. VETZ PHAARMACEUTICALS (PVT.) LTD., KOTRI

Federal Inspector of Drugs-IV, DRAP, Karachi inspected the premises of M/s. Vetz Pharmaceuticals (Pvt.) Ltd., Q-1, S.I.T.E., Kotri, Sindh on 31-05-2021 and drawn sample for the of test/analysis on prescribed Form-3. Details are:

S. No.	Name of Drug	Reg; No	Batch No.	Mfg. Date	Exp. Date	Mfg.by	Remarks of CDL
01	Melovetz 10 Injection	102021	2199017	05-2021	04-2023	M/s. Vetz Pharmaceuticals (Pvt.) Ltd., Q-1, S.I.T.E., Kotri, Sindh	Sub-Standard on the basis of pH.

02. Results of CDL on the basis of which sample under reference has been declared as Sub-Standard quality are reproduced as under: -

S.No.	Test	Specification	Result	Reference
1	**Description**	Yellow colored oily solution in ambered glass vial.	Complies	BP Vet. 2020

2	**Identification**	The identification test must identify Meloxicam.	Complies	BP Vet. 2020
3	**pH**	7.5 to 9.1	**13.45%** **``Does not Comply.**	BP Vet. 2020
4	**Assay** Meloxicam (Lebel claim 10mg/ml)	95.0% to 105.0%	99.8%-Complies	BP Vet. 2020

Remarks: The sample is **"Sub-Standard"** quality under the Drugs Act, 1976.

03. FID submitted the case that firm was involved in manufacturing & selling of Substandard drug Melovetz 10 Injection batch No.2199017 and violated the section 23(1)(a)(v) of the Drugs Act 1976 and rules framed thereunder. FID recommended action under section 42 of the Drugs Act 1976. FID also forwarded the firm request of firm for appellate testing of the product "Melovet Injection"

04. Registration Board in its 317th meeting deferred the case and directed to present with the registration status of the product i.e. Melovetz 10 Injection (Registration No. 102021) including approved specification of finished product for consideration of firm's request in next meeting.

05. Registration status was asked from Registration Division and following points have been revealed:

- The product was registered with the name of Melovetz 10 Injection, Registration No. 102021vide letter No.F.7-1/2020-I&V-I (M-293) (Vet) dated 30-04-2020 in name of M/s Vetz Pharmaceuticals (Private) Limited, Kotri, Sindh.
- The finished product specifications of "Melovetz 10 Injection" are Innovator's Specification.
- Further registration letter condition xv shows that: "The innovator's specifications, however, are valid only till inclusion of the product in the official pharmacopoeia of reference countries as specified by the Registration Board"
- Since the product is available in official pharmacopoeia i.e. BP 2020, the tests performed as per BP 2020 by CDL Karachi.

06. The case has been deferred due to paucity of time in 320th meeting of the Board.

07. Registration Board in its 321st meeting decided to issue show cause notice under clause (c) and (d) of sub section 11 of section 7 of the Drugs Act 1976 for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s. Vetz Pharmaceuticals (Pvt) Ltd., Kotri and called them for a personal hearing before Registration Board.

08. In compliance with the decision of the Board, a show cause has been served to the firm vide office letter of even number dated 23-11-2022. M/s. Vetz Pharmaceuticals replied and reiterated same point mentioned earlier and desired to appear in person.

09. Firm has been called for a personal hearing.

Proceedings and Decision of 326th Meeting of Registration Board.

Mr. Muhammad Hanif, QC Manager has appeared before the Board on behalf of M/s Vetz Pharmaceuticals (Pvt) Ltd., Kotri. He submitted that the product was registered on innovator specification therefore they manufactured the product as per innovator specifications. Registration Board considered the pH range of Injection Melovetz as per manufacturer specification as well as pharmacopoeial specifications and the result of the test and after detailed discussion and thorough deliberations decided:

i. Suspension of Registration of Melovetz Injection, Registration No. 102021 under section 42 of the Drugs Act, 1976 and rules framed thereunder, for six months or till verification of Root Cause Analysis (RCA) and Corrective and Preventive Action (CAPA) by a panel with satisfactory report; whichever is later.
ii. The firm was advised to follow the Pharmacopial specifications in compliance to the specification rules.
iii. Submission of RCA and CAPA by the firm.
iv. Product Specific Inspection including verification of RCA and CAPA by panel of inspectors/experts to be nominated by Director QA/LT. During inspection the panel will also confirm the compliance to the specification rules.

Case No. 02: MANUFACTURE & SALE OF SUB-STANDARD BIOFEN SUSPENSION, REG. NO. 046094, BATCH NO. SP-167, MANUFACTURED BY M/S. BIO-LABS PRIVATE LIMITED, ISLAMABAD.

The Federal Inspector of Drugs-I, DRAP Islamabad sampled Biofen Suspension from the premises of M/s. Bio-Labs Pvt. Ltd. Islamabad dated 03-08-2021. Details are:

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	Remarks of CDL
Biofen Suspension	M/s. Bio-Labs (Private) Limited, Islamabad.	046094	SP-167	06/21	05/23	Substandard on the basis of Bio-Burden.

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Description	Pink coloured suspension in ambered plastic bottles.	Complies.	Mfg. Specs.
2.	Identification	The identification test must identify Ibuprofen.	Complies.	USP 43
3.	**Bio-Burden (TAMC)**	**Not exceed 100 cfu/ml. (General chapter<61>.**	**1.5 x 103 cfu/ml Does not comply.**	**USP 43**
3.	pH	3.6 to 4.6	4.3-Complies	USP 43
4.	**Assay** Ibuprofen. (Label Claim 100mg/5ml)	90.0% to 110.0%	95.7%- Complies.	USP 43

Remarks: *The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.*

02. M/s. Bio-Labs replied to FID dated 11-11-2021 requested for retesting to Appellate Lab NIH Islamabad.

03. As per decision of 313th meeting of Registration Board regarding appellate testing, firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 23-12-2021. M/s. Bio-Labs replied dated 06-01-2022 that no deviation has been observed during the testing of this batch. They mentioned in their OOS investigation report that:

"As per investigation of Stage-I and Stage-II and detailed review of BMR, the product is found ok with respect to bioburden test."

04. Federal Government Analyst, CDL, Karachi submitted OOS investigation. The result of sample does not comply to the specification. Final decision is OOS is valid.

05. Firm has directed to submit method of testing and records vide office letter of even number dated 08-09-2022. Firm replied dated 10-09-2022 that they provided SOP for Microbiological limit test and test reports. As per documents submitted by firm, they performed the test by pour plate method and there results were in defined limits.

06. Technical Evaluation of the case:

- The product was declared sub-standard on the basis of failure of Bio-Burden (TAMC) results.
- Firm claimed that they performed Bio-Buden test as per USP and results are as per specification. CDL performed test as per USP 43. The limit of test as per USP is "Not exceed 100 cfu/ml". Result of CDL is 1.5 x 103 cfu/ml.
- The method is based on visual inspection of the sample

07. Registration Board in its 321st Meeting did not accede the firm's request of appellate testing and decided to issue show cause notice for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s. Bio-Labs (Private) Limited, Islamabad and called them for personal hearing before Registration Board.

08. Decision was communicated to firm vide office letter of even numbers dated 23-11-2022. Ms. Bio-Labs, Islamabad has replied dated 01-12-2022 where they reproduced already mentioned point in their earlier replies and desired to appear in person.

09. Firm has been called for personal hearing.

Proceedings and Decision of 326th Meeting of Registration Board.

Mr. Muhammad Shahzad Rashid, Quality Assurance Manager, Mr. Haroon ur Rasheed, Quality Control Manager and Advocate Muhammad Shahrukh Sheikh have appeared before the Board on behalf of M/s Bio-Labs (Private) Limited, Islamabad. He submitted that the same product was also tested in different DTLs and the report was of standard quality and presented the report to the Board. On review of the report, it has been noted that the test of Bioburden was not performed by DTLs. Registration Board after detailed discussion and thorough deliberations decided:

i. Suspension of Registration of Biofen Suspension, Registration No. 046094 under section 42 of the Drugs Act, 1976 and rules framed thereunder, for six months or till verification of Root Cause Analysis (RCA) and Corrective and Preventive Action (CAPA) by panel with satisfactory report.
ii. Submission of RCA and CAPA by the firm.
iii. Product Specific Inspection including verification of RCA and CAPA by panel of inspectors/experts to be nominated by Director QA/LT.

Case No. 03: MANUFACTURE & SALE OF SUB-STANDARD TEMPRAMINE SUSPENSION, REG. NO. 011432, BATCH NO. 5TE049, 5TR131, 5TR052 AND 5TR057 MANUFACTURED BY M/S. W. WOODWARD PAKISTAN (PVT.) LTD., KARACHI.

A complaint has been received on Citizen Portal Pakistan regarding glass particles in Tempramine Syrup Batch no. STR057. Area FID Islamabad inspected the premises of Ms. Health Plus Distributors, Rawalpindi on 29-01-2021 and found that the distributor has voluntarily returned the stock of 12 batches of Tempramine Suspension on the direction of the firm as suspected sugar crystallization was observed.

02. Area FID, Karachi was requested vide office letter of even numbers dated 02-03-2023 to investigate the matter and probe out the root cause analysis of suspected glass particles in various batches of Tempramine suspension (WW0056, WW0057, 4TE009, 4TE014, 4TE019, 4TE054, 4TE059, 5TE049, 5TE051, 4TR007, 4TR008, 5TR052, 5TR130, 5TR057 and 5TR131) manufactured by Ms. W.Woodward Pakistan Ltd., Karachi, take samples of the suspected stock for the purpose of test/analysis and initiate legal action as per relevant provision of the Drugs Act, 1976.

03. FID Karachi inspected the premises of Ms. W.Woodward Pakistan Ltd., Karachi and took the samples of Tempramine suspension from the available returned stock on Form 3 for test/analysis, details are:

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	Result of CDL
Tempramine Suspension (Paracetamol 120mg/5ml, Chlorpheniramine maleate 1mg/5ml)	W. Woodwards (Pvt.) Ltd., Karachi	011432	5TE049	11-2020	11-2022	Sub-standard **Description- Does not comply.** Non homogenous suspension containing large white crystals of Paracetamol settled at the bottom of the bottle which do not redisperse even on rigorous shaking of the suspension. **Assay- Does not comply.**
-do-	-do-	-do-	5TR131	11-2020	11-2022	-do-

-do-	-do-	-do-	5TR052	05-2020	05-2022	-do-
-do-	-do-	-do-	5TR057	05-2020	05-2022	Sub-standard **Description- Does not comply.** Non homogenous suspension containing large white crystals of Paracetamol settled at the bottom of the bottle which do not redisperse even on rigorous shaking of the suspension

04. The Federal Government Analyst, Central Drugs Laboratory, Karachi declared the above said samples as **"Sub-Standard"** quality.

05. FID issued explanation letter to the firm in the light of test reports dated 29-06-2021 and 19-07-2021. M/s. Woodward's Pakistan (Pvt) Ltd., Karachi replied that after Citizen Portal complaint they voluntarily recalled the stock from distributor to avoid any risk of infiltration of any spurious drug in the market and to investigate the complaint. They further mentioned that all batches were checked physically and chemically from retention sample as well as recalled quantities. Retention sample were ok while testing recalled bottle samples only in few bottles crystal formation was observed which might be formed during logistics and transportation and cold temperature exposure in winter weather of December and January.

06. FID recommended that M/s. W.Woodward's Pakistan (Pvt) Ltd., Karachi has violated the section 23(1)(a)(v) of the Drugs Act 1976 and rules framed thereunder. The complete case is submitted with the recommendation for necessary action under Section 41 and Section 42 of Drug Act, 1976.

07. A show cause notice vide office letter of even numbers dated 21-11-2022 has been served to Ms. W. Woodward's Pakistan (Pvt) Ltd., Karachi after verification of names of responsible persons from Licensing Division.

08. Ms. W. Woodward's Pakistan (Pvt) Ltd., Karachi submitted their reply vide letter no nil dated 30-11-2022 that recall was carried out on voluntary basis and kept for further investigation and research studies at the company's warehouse. They further mentioned that QC retention samples of Batch no. 5TE049, 5TR131, 5TR052 AND 5TR057 were checked physically and chemically and results were found within the specification and free from any crystalline particles or sedimentation. However, the voluntary recalled stock were found to contain crystal formation in some of the bottles which might be formed during logistics and improper storage and exposure to cold climatic conditions in winter weather season of December and January.

09. Firm further mentioned that as they recalled the stock voluntarily and above mentioned facts; show cause notice may be withdrawn.

Comments of QA&LT Division:

10. In view of above-mentioned facts, crystals settled at the bottom of the bottle which do not redisperse even on rigorous shaking of the suspension may be due to issues during formulation development including but not limited to low viscosity and improper use of suspending agent to maintain redispersability.

11. Firm has been called for a personal hearing.

Proceedings and Decision of 326th Meeting of Registration Board.

Ms. Anjum Sibghat Ullah, Quality Operation Head and Israr Qadri, Senior Manager Production have appeared before the Board on behalf of M/s W. Woodward's Pakistan (Pvt) Ltd., Karachi. They submitted that they have recalled the stock voluntarily as the complaint was received prior to sampling the product. Further, they identified that mixing was the issue and they have bought hi speed sheer mixer to manufacture new batches and kept them for stability and found satisfactory results.

"Registration Board after detailed discussion and thorough deliberations decided:

i. Suspension of Registration of Tempramine Suspension (Registration No. 011432) under section 42 of the Drugs Act, 1976 and rules framed thereunder, for six months or till

verification of Root Cause Analysis (RCA) and Corrective and Preventive Action (CAPA) by panel with satisfactory report; whichever is later.

ii. Submission of RCA and CAPA by the firm.

iii. Product Specific Inspection including verification of RCA and CAPA by panel of inspectors/experts to be nominated by Director QA/LT.

Case No. 04: MANUFACTURE & SALE OF SUB-STANDARD PANTOLOON TABLET, REG. NO. 095091, BATCH NO. 5602 MANUFACTURED BY M/S. ROCK PHARMACEUTICAL LABORATORIES (PVT) LTD., RISALPUR.

The Federal Inspector of Drug Peshawar inspected the premises of M/s. Rock Pharmaceutical Laboratories (Pvt) Ltd on 22-09-2021 on form-3. Details are:

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	CDL Results
Pantoloon tablets	M/s. Rock Pharmaceutical Laboratories (Pvt) Ltd., Risalpur.	095091	5602	12-2020	12-2022	Sub-Standard on the basis of Dissolution.

02. Results of CDL on the basis of which sample under reference has been declared as Substandard are reproduced as under:-

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Identification	The identification test must identify Pantoprazole Sodium	Complies.	USP 43
2.	Dissolution (Acid Stage)	**Stage 1**: Each unit is not less than Q=75% i.e. 75+5=80%. **Stage 2**: Average of 12 units (S1+S2) is equal to or greater than Q (75%) and no unit is less than Q-15% (75-15=60%). **Stage 3**: Average of 24 units (S1+S2+S3) is equal to or greater than Q (75%). Not more than 2 units are less than Q-15% (75-15=60%) and no unit is less than Q-25% (75-25=50%).	**Stage 1** Tablet no. / (%) age. 1 / 1.01 2 / 1.73 3 / 1.72 4 / 1.72 5 / 2.96 6 / 1.32 **Does not comply.**	USP 43
3.	**Assay** Pantoprazole. (Label Claim 20mg/tablet)	90.0% to 110.0%	107.9% Complies.	USP 43

Remarks: 1) *The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.*

03. FID submitted the request of appellate testing of the product Pantoloon Tablets Batch no 5602.

04. Firm submitted the OOS investigation dated 14-03-2022 to FID. CDL submitted the response dated 26-08-2022. The final decision of investigation is OOS valid. The remarks of Lab Manager:

"As the buffer stage results are not within the specification of any three stages of dissolution defined by USP. Hence no need of re-test."

05. Technical Evaluation of the case:

i. The product is available in USP 43

ii. The product was declared substandard on dissolution.

iii. CDL performed the test as per USP 43 Dissolution Test 1 while firm performed on USP 43 Dissolution Test 2.

iv. The requirement /condition to performed Test 2 is:

"If the product complies with this test, the labelling indicates that the product meets USP Dissolution Test 2."

v. There is no specific test mentioned on certificate of analysis nor on pack of the product. Therefore, as per USP 43, Dissolution Test 1 is performed by CDL.

06. Registration Board in its 321st Meeting decided to send the sample of Pantoloon Tablets Batch no. 5602 to Appellate Lab for retesting of Dissolution test on which the sample was declared as Substandard.

07. In compliance to the decision, sample of Pantoloon Tablets Batch no. 5602 has been sent to Appellate Lab, NIH, Islamabad as per the decision of the Board. Sample of Pantoloon Tablets Batch no. 5602 was declared substandard by Appellate Lab NIH, Islamabad. Details of result are:

DISSOLUTION **Determined:**
TEST: (USP-Test 1)

Acid Stage	All the six tablet are within the limit.
Buffer Stage	All the six tablet deviated from the limit.
Limit:	
Acid Stage	Not more than 10% of the label amount of pantoprazole is dissolved.
Buffer Stage	Not less than 75% (Q) of the label amount of pantoprazole is dissolved.
	Does not comply with USP-39.
Remarks	Percentage release of drug among all six units tested at first level is found less than 80% (Q+5%) of the stated amount of pantoprazole. Moreover, drug release in all six units found less than Q-25% at S1 level. Therefore, Dissolution test is stopped at first stage.
Conclusion	The sample is of Sub-standard quality on the basis of test performed.

08. A show cause notice in light of Appellate Lab report has been issued to the firm vide office letter of even number dated 07-02-2023.

09. Ms. Rock Pharmaceutical Laboratories (Pvt) Ltd, Risalpur replied dated 23-02-2023 Briefly, they mentioned same stance as earlier. Further they submitted that they raised CAPA against this matter in the month of Feb 2023 and are working to further improve the formulation for the captioned product and taken few trials of the captioned product and will study and compare our development against innovator product "Protonix" 20mg tablets which is FDA approved. And will share results with QA&LT Division on successful completion and requested that following action (s) should not be initiated against us; i.e.

i. Cancellation / Suspension of Registration of product.
ii. Prosecution in Drug Court.
iii. Any other action the board may deem fit.

10. **Comments of QA&LT Division:**

i. Pantoloon Tablet was declared substandard on the basis of dissolution test. CDL performed the test as per USP 43 Dissolution Test 1 while firm performed on USP 43 Dissolution Test 2. The requirement /condition to performed Test 2 is:

"If the product complies with this test, the labelling indicates that the product meets USP Dissolution Test 2."

ii. While, there is no specific test mentioned on certificate of analysis nor on pack of the product. Therefore, as per USP 43, Dissolution Test 1 is performed by CDL as well as NIH.

iii. Further an advisory was also issued from Secretory Registration Board dated 06-02-2023 on subject "Compliance to Pharmacopoeial Specifications for Dissolution Test; the Board decided as:

"The rnanufacturer shall mention the dissolution test Number on the secondary packing/ unit carton of product for dissolution tests No 2,3 or 4 as per requirement of USP otherwise it would be presumed that dissolution test No.1 shall be performed on the finished product."

iv. The subject formulation is Enteric coated delayed release product in which dissolution test has to be conducted in two parts, First one is conducted and compliance at acid stage (P.H 1.2) and second is conducted and complied at buffer stage (P.H 6.8). It has been observed that beside the testing apparatus used for USP testing method, the product qualifies initial dissolution testing in acid stage, however failed in buffer stage in both reports of CDL and NIH. This indicates potential of error in product development phase as the substance release mechanism is attain

through PH depended enteric coating which in not fully compliant with buffer stage P.H.

v. Firm was also given opportunity of personal hearing but they did not submit request for personal hearing before the Board.

11. Firm has been called for personal hearing.

Proceedings and Decision of 326th Meeting of Registration Board.

Mr. Dilawar Bakhat, Quality Control Manager and Mr. Asad Iqbal, Production Manager have appeared before the Board on behalf of M/s Rock Pharmaceutical Laboratories (Pvt) Ltd, Risalpur. They submitted that CAPA has been taken and they have worked on formulation improvement of the product.

"Registration Board after detailed discussion and thorough deliberations, considering the facts of the case and considering the subsequent offence of failure of another sample of same product vide CDL report No. IP-6-22-0000110 dated 09-09-2022 and considering the stance of firm; Board decided to cancel Registration of Pantoloon Tablets, Registration No. 095091 of M/s Rock Pharmaceutical Laboratories (Pvt) Ltd, Risalpur under section 42 of the Drugs Act, 1976 and rules framed thereunder."

Case No. 05: MANUFACTURE & SALE OF SUB-STANDARD PROTONIX 40MG TABLETS, BATCH NO. 052 & 069 BY M/S WILSHIRE LABORATORIES (PVT.) LTD., LAHORE.

The Federal Inspector of Drugs, Karachi visited the premises of M/s Marhaba Medicos, Shop No. 51, Bismillah Market, near New Sabzi Mandi Super Highway, Karachi on 25-04-18 and took sample of Protonix 40mg Tablets, Batch No.052 on form-3. Details are

S. No.	Name of Drug	Reg. No.	Batch No.	Mfg. Date	Exp. Date	Mfg. By	Reason of Sub-Standard Product
01	Protonix 40mg Tablet	030041	**052**	09-17	08-20	M/s Wilshire Laboratories (Pvt.) Ltd, Lahore	Dissolution test does not comply.

02. The Federal Government Analyst, CDL, Karachi declared the sample as of Sub-standard quality **on the basis of dissolution** vide test/analysis report R.KQ.310/2018. Details of report are:

Description:	*Yellow colored, circular shaped enteric coated tablets.*
Identification:	*Pantoprazole Sodium identified.*
Dissolution test:	***Does not comply.***
Uniformity of dosage unit	
By Weight Variation:	*Complies.*
Assay for Pantoprazole Sodium:	
Determined amount/tablet:	*38.2609mg*
Stated amount/tablet:	*40mg*
Percentage:	*95.7%*
Limits:	*90.0% to 110.0% Complies.*

Remarks: *The sample is of* ***"Substandard"*** *quality under the Drugs Act, 1976.*

03. Area FID, Karachi served an explanation letter to M/s Wilshire Laboratories (Pvt.) Ltd, Lahore dated 26-06-2018. M/s Wilshire Laboratories (Pvt.) Ltd, Lahore submitted their reply vide letter wherein *they have stated that*

"They received the sealed portion of their product Protonix 40mg Tablets (Samples quantity of 30 tablets) while Batch No/Mfg Date/Exp Date was not visible on sample pack. We also receive the sample after 41 days after picking the sample which is violation of Section 19 (3) of the Drugs Act 1976. As guidelines of the Drugs Act 1976 were not followed which is illegal and the said procedure is null and void in the eyes of law. The sample dispatched to us remained in transit during very hot months of May and June while no temperature and humidity conditions were maintained.

Storage conditions are not mentioned on the report where the sample was stored after receipt and we fail to understand as the sample remained untested for 54 days. We had provided reference standard to CDL but we are not sure whether our provided reference standard was used for testing or CDL arranged reference standard from some other source because USP 40 method was used. So, USP reference standard must have been used. Please provide a copy of reference standard of Pantoprazole USP. As per USP method of testing, 68 tablets are required while the sample sent to CDL, Karachi contain 30 tablets so how the required tests can be performed with provided sample."

04**.** Show cause notice has been issued to the technical staff/management of the firm vide letter No. 03-49/2018-(QC) dated 06-03-2019.

05. Firm's representatives had been appeared in 289th Meeting of Registration Board dated 16-05-2019 and re-iterated points already submitted in showcause reply and the firm requested for retesting of drug product. Registration Board after hearing them decided that the Board's portion of the sample shall be retested from appellate laboratory, NIH, Islamabad.

06. The Appellate Laboratory, NIH, Islamabad declared the said sample as Misbranded and Substandard quality (on the basis of dissolution) vide test report No.04-M/2019

07. Show cause notice has been served to the technical staff/management of the firm – responsible persons U/S 7(11) of the Drugs Act, 1976 vide letter no. 03-49/2018-(QC) dated 12-11-2019.

08. M/s Wilshire Laboratories (Pvt.) Ltd., Lahore vide reference No.WL/OC/S-344 submitted their reply that We have provided method of testing with "Manufacturer Specification" to NIH but we are surprised to learn that our product has been tested on USP-39. Also raised some other points which were not justified and requested to withdraw the show cause.

09. Firm's representatives had been appeared before the Board in 293rd meeting of Registration Board dated 08-01-2019 and stated that they still have concerns on the analytical method of NIH, Islamabad. Furthermore, they have made necessary improvements and shifted their product from manufacturer's specifications to Pharmacopoeial specifications. They further requested to analyze their product from individual laboratory.

10. Board after detailed discussion and deliberations considering the test reports of CDL & Appellate Lab NIH, Islamabad unanimously decided as under:

- **i.** Suspension of the Registration of the said product for six (06) months or till the verification of root cause analysis and satisfactory report by the panel whichever is later.
- **ii.** Corrective and preventive action (CAPA) by the firm and product development data.
- **iii.** Product Specific Inspection including verification of product development data and confirmation of CAPA by the following panel:
  - Mr. Iftikhar Ahmad Member Registration Board.
  - Area Federal Inspector of Drugs.
  - Hafiz Ahsan AD, PEC.

11. Decision letter was sent vide office letter of even numbers dated 21-04-2020.

12. FID, DRAP, Lahore has submitted the PSI report of M/s. Wilshire Labs (Pvt.) Ltd., Lahore. The inspection was conducted for verification of root cause analysis, corrective and preventive action (CAPA) and product development data of their product Protonix 40mg Tablet containing Pantoprazole sodium sesquihydrate.

Conclusion:

Based on the inspection proceedings, such as verification of documents, interaction with management e.t.c the panel concludes that the company has not given root cause analysis and rectified their dissolution problem through product development process. The firm only shifted their testing method from Mfg spec to UPS. However, the management made commitment and also agreed to make necessary improvements in procedures.

Recommendation:

Keeping in view the above observations the panel could not verify the product development process and root cause analysis conducted by the firm

at this stage. However, the final conclusion would be based upon the test report results received from the Central Drugs Laboratory, Karachi.
Hence, ***the panel recommend that the decision of the Drug Registration Board for suspension of registration of Protonix 40mg Tablets may remain intact.***

13. PSI report was presented in 308th meeting of Registration Board. The Board after thorough deliberations, considering the facts of the case, report submitted by the FID, DRAP, Lahore decided as
    i. The suspension of registration of Protonix 40mg Tablet remain intact.
    ii. The Comparative Dissolution Profile of the product with innovator's product will be submitted by the firm for consideration of the Board.
14. The decision has been communicated to the firm vide office letter of even numbers dated 08-09-2021.
15. M/s. Wilshire Labs (Pvt.) Ltd., Lahore vide Ref # WL/OC/S-597 dated 14-09-2021submitted that they used Dissolution Test 2 for testing of our product. They also requested for personal hearing.
16. The Board in its 313th meeting after thorough deliberations, considering the facts of the case, decided to issue show cause notice for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s. Wilshire Labs (Pvt.) Ltd., Lahore and called them for personal hearing before Registration Board.
17. Firm's representatives appeared before the Board in 316th meeting. The Board after considering the facts of the case and after thorough deliberations decided as follows:
    i) The sample of Protonix 40mg Batch No. 069 shall be sent for Appellate testing as per USP specification (Dissolution Test-Type 2)
    ii) Firm shall develop product as per guidelines approved in 293rd meeting and will share data with QA Division.
    iii) Registration of product 'Protonix 40mg Tablet' (Reg# 030041) shall remain suspended till compliance of both above points.
18. The decision of the Board has been communicated to firm and the Board's portion submitted in Appellate Lab NIH as per decision vide office letter of even numbers dated 27-02-2022.
19. Test report of the sample has been received from Appellate Lab NIH where in it is concluded as:
    "The sample is of Sub-standard quality on the basis of test performed."

Details of failed samples:

Name:	Protonix 40mg Tablet	Protonix 40mg Tablet
Composition:	Each tablet contain 40mg Pantoprazole	Each tablet contain 40mg Pantoprazole
Registration No:	030041	030041
Batch No:	**052**	**069**
Manufacturing Date:	09-17	Jan. 2020
Expiry Date:	08-20	Jan. 2023
Manufactured By:	M/s Wilshire Laboratories (Pvt.) Ltd, Lahore	M/s Wilshire Laboratories (Pvt.) Ltd, Lahore
Result of CDL	Substandard	Substandard
Result of Appellate Lab	**Substandard**	**Substandard**

20. The case has been presented in 323rd meeting of Registration Board, Board after detailed deliberation decide to issue show cause notice to the firm on manufacturing and sale of substandard Protonix 40mg Tablets, Batch no. 052 and 069 and provide personal hearing under section 42 of the Drugs Act, 1976 and rules framed thereunder.
21. Decision has been communicated vide letter of even number dated 23-01-2023.
22. Firm has replied dated 01-02-2023, they mentioned same stance already communicated vide their earlier letters. n their reply they have stated that " In report of (NIH) , the acid stage performance of dissolution is missing and release profile is not calculated quantitatively at this stage .Without acid stage results the overall drug releasing behavior of delayed release product cannot be concluded as in interpretation of dissolution of delayed released products USP<711> it is clearly stated as ,*the quality (Q)specified in the*

monograph is the total amount of active ingredients dissolved in the both acid stage and buffer stage ,expressed as percentage of the labeled content.

23. They have also pointed out calculation errors in NIH report and mentioned that they have further improved their formulation by working on core and seal coating which control mechanism of delayed release in tablet and has performed Comparative dissolution profile (CDP) with comparator brand Protium 40 mg of M/s Abbott labs.

24. Firm has requested to grant permission to proceed manufacturing of protonix tablet 40 mg with revised USFDA approved formulation and accept their proposal of collection of samples from the manufacturing premises during production of commercial batch.

Comments of QA&LT Division:

25. Firm has misquoted the interpretation and calculation of Q value form general chapter 711 of USP, under the heading of delayed release dosage form, it is stated that "***unless otherwise specified in the individual monograph, the requirements are met if the quantity of active ingredients dissolved from the units tested conforms to acceptance table 4. continue testing through the three levels unless the results of both stages conforms at an earlier level. the value of Q in acceptance table 4 is 75 % dissolved unless otherwise specified in the individual monograph. The quantity, Q, specified in the individual monograph ,is the total amount of active ingredient dissolved in both the acid stage and buffer stage ,expressed as percentage of the labeled content .The 5 %,15% and 25 % valve in acceptance table 4 are the percentage of the labled contents so that these values and Q are in the same terms .***

Acceptance table 4

Level	Number tested	Criteria
B1	6	Each unit is NLT Q+5 %
B2	6	Average of 12 units (B1+B2) is ≥ Q, and no unit is < Q-15
B3	12	Average of 24 units (B1+B2+B3) is ≥ Q, NMT 2 units are < Q-15, and no unit is < Q-25.

26. Moreover, the specific monograph of Pantoprazole sodium delayed release tablet in USP clearly mentioned qualification of both acid and buffer stage mentioned separate acceptance criteria for Acid stage and buffer stage and under;
Tolerance for Acid stage is: NMT 10 % of labeled amount of pantoprazole is dissolved
Tolerance for Buffer stage is: NLT 75%(Q) of the labeled amount of pantoprazole is dissolved.

27. Firm has been called for a personal hearing.

Proceedings and Decision of 326th Meeting of Registration Board.

Mr. Akhter Hussain, Head of Quality Operation, and Mr. Ahsan Sabir, Manager, Quality Control and Research and Development have appeared before the Board on behalf of M/s Wilshire Laboratories (Pvt.) Ltd, Lahore. They submitted that they have worked on product development and manufactured two trial batches in April 2022, kept them for stability, maintained the record and results will be provided to Board if required.

"Registration Board after detailed discussion and thorough deliberations considering the facts of the case as two batches of the product had been declared substandard from CDL and Appellate Lab *NIH; Board decided to cancel Registration of Protonix Tablets; Registration No. 030041 of M/s Wilshire Laboratories (Pvt.) Ltd, Lahore under section 42 of the Drugs Act, 1976 and rules framed thereunder."*

Case No. 06: **MANUFACTURE & SALE OF SUBSTANDARD KLEVRA ORAL SOLUTION, BATCH NO. 0N152, MANUFACTURED BY M/S. PHARMEVO (PVT.) LTD. KARACHI.**

Test/analysis report No.KQ.57/2021 dated 20th March, 2021, from the Federal Government Analyst, CDL, Karachi received on 29-04-2021. Wherein, the Federal Government Analyst has declared sample of Klevra Oral Solution as of **"Sub-standard quality"**. Details are:

S. No.	Name of Drug	Reg; No	Batch No.	Mfg. Date	Exp. Date	Mfg.by	CDL Results
01	Klevra Oral Solution (Levetiracetam)	066831	0N152	Dec. 2020	Dec. 2022	M/s. PharmEvo (Pvt.) Ltd. Karachi	Sub-Standard on the basis of pH.

Results of CDL on the basis of which sample under reference has been declared as Substandard quality are reproduced as under:-

S.No.	Test	Specification	Result	Reference
1.	Description	Clear, and transparent solution having cherry flavor.	Complies.	Mfg. Specs.
2.	Identification	The identification test must identify Levetiracetam.	Complies	USP 43
3.	pH	4.8 to 6.3	**4.52** **Does not Comply.**	USP 43
4.	**Assay** Levetiracetam. (Lebel claim 500mg/5ml)	90.0% to 110.0%	98.4%- Complies.	USP 43

Note:- The product is included in USP 32 now; therefore, PharmEvo Specs. Should be removed as printed on the label.

Remarks: *The sample is **"Sub-Standard"** under the Drugs Act, 1976.*

2. FID has been asked to submit complete case vide office letter of even number dated 04-05-2021. The recall alert to manufacturer issued dated 04-05-2021.

3. M/s. PharmEvo (Private) Limited, Karachi submitted that the product is registered with Manufacturer Specification (MS) while CDL declared the product as of substandard quality on USP specification. They further said that as DRAP has under circular no. F.3-5/2020-I&VII (M-297) dated 27-01-2021; the board allowed 6-month time for implementation of the decision. They also requested to withdrawn the Drug recall from website of DRAP.

4. Registration division confirmed that product is registered on MS and renewed on 06-08-2020. Firm has not applied for change of specification of subject drug till date. Further, Firm has been manufacturing product under consideration with manufacturer's specification despite of inclusion of said formulation in USP which is against the decision of Registration Board and Central Licensing Board communicated vide letter no. F.3-2/2006-Reg-II-South (M-197) dated 05-06-2006 where in it was decided that firms may adopt their own specifications for the drugs which are not included in the official Pharmacopeias, till the inclusion of these formulations in the official pharmacopeias listed in Section-3 of Drug Act 1976.

5. Furthermore, letter No.F.3-5/2020-I&VII(M-297) dated 27-01-2021 is issued in the context of labeling of specification due to which DTLs/QCLs declaring the products as "Misbranded" after deliberations/ discussion regarding the matter and does not apply if product is declared as Sub-Standard on being tested on official Pharmacopeia.

6. A letter has been issued to firm w.r.t. above decisions dated 02-08-2022.

7. M/s. PharmEvo Private Limited, Karachi submitted their reply in response to office letter dated 02-08-2021 wherein firm has mentioned that:

"The instructions of MOH/DRAP with regards to pharmacopoeial specifications stand suspended and have been held in abeyance by DRAP till January 26, 2022 vide notification circular No. F.3-5/2020-I&VII (M-297) dated 26-07-2021."

8. They further requested to withdraw the Medical product alert from DRAP website.

9. FID, DRAP, Karachi submitted the case details and recommended that:

"As per Federal Government Analyst, CDL Karachi test report No KQ-57/2021 dated 20-04-2021, M/s. PharmEvo Private Limited, Karachi violated the Section 23(1)(a)(v) of the Drugs Act 1976 and rules framed there under."

10 The case has been submitted for consideration in light of above-mentioned decision of Registration Board.

Proceedings and Decision of 317th Meeting of Registration Board

11. Registration Board deferred the case and directed to present with the registration status of the product i.e. Klevra Oral Solution (Registration No. 066831) including approved specification of finished product for consideration of firm's request in next meeting.

12. Registration status was asked from Registration Division and following points have been revealed:

- The product was initially registered with the name of Equip Oral Solution Reg No. 066831vide letter No.F.3-6/2010 Reg-II (M-227) dated 08-10-2010 in name of M/s PharmEvo Pvt Limited Karachi.
- The brand name was changed to Klevera Oral Solution vide letter No.F.6-1/2011-Reg-II dated 10-02-2011.
- The finished product specifications of "Klevra Oral Solution" were changed from "Manufacturer's Specification" to "USP Specification" vide approval issued dated 19-11-2021
- The renewal for year 2015 was received on 19.08.2015 and for year 2020 was received on 06.08.2020. Both of aforesaid renewals are within time w.r.t date of registration.

Decision of 320th meeting of Registration Board

13. The case has been deferred due to paucity of time.

Proceedings and Decision of 321st Meeting of Registration Board.

14. The Registration Board after discussion and by considering the facts of the case decided to issue show cause notice under clause (c) and (d) of sub section 11 of section 7 of the Drugs Act 1976 for suspension/cancellation/ prosecution in Drug Court of the subject cited drug to M/s. PharmEvo Private Limited, Karachi and called them for personal hearing before Registration Board.

15. Decision of the Board has been communicated vide office letter of even number dated 23-11-2022.

16. Firm submitted reply vide letter no nil dated 15-12-2022, they submitted their already mentioned points and said that manufacturer specification was mentioned on the pack of product while CDL declared the product substandard. Further they informed that they applied for change of registered specification and granted in November 2021. They further submitted that we hope the allegations leveled in the letter/notice under reply will be retracted and recalled and the needful will be done to negate the wrongful declaration made in the stated test report of CDL Karachi.

Comments of QA&LT Division:

17. Product has been registered dated 08-10-2010. The substandard batch no. 0N152 of Klevra oral solution was manufactured in December 2020 while the product's monograph i.e. Levetiracetam oral solution was already included in USP. Further, the matter of extension in compliance with pharmacopeial specifications was discussed in 297th meeting held on 12-14 January 2021 (after the manufacture of said batch) on reference sent by various forums viz DTL Faisalabad, PPMA, Pharma Bureau.

18. Firm has applied for change of specification after the substandard report and got approval in November 2021.

19. In view of above narrated facts, firm has to adapt the pharmacopeial specifications as soon as inclusion of the monograph in official pharmacopeia, in accordance with Drug Specification Rules 1978 and as per letter no. F.3-2/2006-Reg-II-South (M-197) dated 05-06-2006.

20. As change of specification has been granted, FID may be asked to take sample from new batch to verify the specification of the product.

21. Firm has been called for personal hearing.

Proceedings and Decision of 326th Meeting of Registration Board.

Mr. S. Safdar Abbas, Manager Regulatory and Mr. Khurram Anis, General Manager, Quality Operation have appeared before the Board on behalf of M/s PharmEvo Private Limited, Karachi. They submitted that the product was on manufacture specification and they applied in June 2021 for a change of specification and approved USP specification has also been granted for the product "Klevra oral solution" in November 2021. After that new batch has been manufactured as per USP specifications.

Registration Board after detailed discussion and thorough deliberations decided to issue a warning letter to M/s. PharmEvo Private Limited, Karachi in instant case, with directions to be more vigilant in future. Further, Board also directed the firm to review product specifications of their all registered products and adapt pharmacopoeial specifications where required, in accordance with Drug Specification Rules 1978 on priority basis.

Case No. 07: SUBSTANDARD 25% DEXTROSE INFUSION B. NO. A042C21 MANUFACTURED BY M/S. OTSUKA PAKISTAN LTD., HUB, BALOCHISTAN.

Federal Government Analyst CDL Karachi vide test report No. F. 5-3(K)/2021-CDL/S-1468 dated 03-12-2021 informed that sample of product "25% Dextrose Infusion" Batch No. A042C21 (Mfg. date 31-03-2021, Exp date 30-03-2024) sent to CDL Karachi by FID-II Karachi has been declared as of substandard quality on the basis on non-compliance of pH specifications. Details of the test report are given as under:

S. No.	Test	Acceptance Criteria	Result	Reference
1.	Identification	The identification test must identify Glucose (Dextrose)	Complies	BP 2020
2.	pH	3.5 to 6.5	**2.73 – Does not comply**	BP 2020
3.	Bacterial Sterility	Must be sterile	Complies	BP 2020
4.	Endotoxin	The Endotoxin limit concentration is 0.25 IU/ml	Complies	BP 2020
5.	Assay Glucose (Dextrose), (Label claim 250mg/ml)	95.0% to 105.0%	96.80% Complies	BP 2020

02. FID-III Karachi vide letter No. F. ARS-19-25/2021-FID-III (K) dated 28-12-2021 forwarded the request of M/s. Otsuka Pakistan, Hub dated 23-12-2021 for appellate testing of their product namely "25% Dextrsoe Infusion" batch No. A042C21 declared substandard by CDL Karachi on 03-12-2021.

03. Registration Board in its 313th meeting decided to fulfill the codal formalities. Therefore, in the light of decision of Registration Board, a vide letter No. F. 03-48/2021-QC dated 27-01-2021 issued to M/s. Otsuka Pakistan, and to FGA CDL Karachi for submission of OOS investigation and complete testing record of report vide No. F. 5-3(K)/2021-CDL-S-1486 dated 03-12-2021.

Technical evaluation of OOS report by QC section:

05. M/s. Otsuka Pakistan Limited, Hub vide letter dated 15-02-2022 and CDL Karachi vide letter No.1-1/2013-SRK/CDL/-1069 dated 15-03-2022 provided OOS investigation. Comparison is given as under:

S.	**Laboratory**	**Test Performed**	**Results**	**Standard Value**	**Remarks**
01	CDL Karachi	pH (BP 2020)	2.73	3.5 – 6.5	-
02	M/s Otsuka	pH (BP)	At the time of batch release: 5.38 **Retesting:** Sample 1: - 3.58 Sample 2: - 3.54 Sample 3:- 3.58	-do-	The results of retesting performed by the firm show a decline in pH value from 5.38 to 3.58 over a period on 10 months. Moreover, the value 3.58 is also very close to the lower acceptance criteria i.e. 3.5

06. The case has been deferred due to paucity of time in 320th meeting

In view of decision of 320th meeting, they have been called for personal hearing.

07. Decision of 321st meeting Keeping in view position narrated above, the Board did not accede the firm's request of appellate testing and decided to issue show cause notice and called them for personal hearing before Registration Board.

08. In compliance to the decision of RB show cause was issued to firm vide letter No. 03-45/2022-QC dated 21-Nov-22 to which the firm replied and again called for appellate testing of their product namely "25% Dextrose Infusion" batch No. A042C21 declared substandard by CDL Karachi on 03-12-2021 and briefed that due to temperature issue pH decreased but still remained within limits and submitted CAPA in which they manufacture 3 trial batches i.e bulk manufacturing

at 80&100^{o} & with addition of stabilizers that is showing stability after 8 months passed and they are going to change its label with indication "*Store below 25 degrees centigrade*".

09. Case was discussed in 324th meeting of Registration Board and decided as under:
Keeping in view position of firm narrated above, the Board decided that

i) Risk based sampling of all the batches of said formulations will be done.
i) Call the firm for personal hearing under section 42 as they are found to have contravened provision of this act.
ii) Product registration of 25% Dextrose Infusion Mfg by M/s. Otsuka Pakistan ltd., hub, Baluchistan will remain suspended till personal hearing before next meeting of Registration Board and decision by the board.

10. Decision was communicated to firm vide letter dated 03-04-2023-QC dated 08-03-2023 and called for personal hearing.

Submitted for consideration by board

Proceedings and Decision of 326th Meeting of Registration Board.

Mr Attique Rahman (Head of Quality Operations) along with Counsel, Mr Adv Rashid Mureed appeared before the Board for Personal hearing. They pleaded that they have already lodged appeal against the decision of 324th meeting of DRB in appellate board as their request for appellant testing was not acceded and their registration was suspended without giving an opportunity of personal hearing. The Board after considering the facts of the case and thorough deliberations decided as follows:

"As firm has challenged the decision of 324th meeting of DRB before appellate board under section 9 of the Drugs Act, 1976, as remedial quasi-judicial forum therefore the proceeding of registration board shall remain suspended till finalization and decision of appellate board".

Case No. 08: MISBRANDED BALINGO INJECTION B. NO. BL-1417 MANUFACTURED BY M/S. BAJWA PHARMACEUTICALS (PVT.) LTD., 36-KM OFF G.T ROAD LAHORE – QCB ISLAMABAD CASE.

Secretary Quality Control Board Islamabad vide letter vide F. No. 18(1)-QCB/ICT/2012/725 dated 22-02-2022 forwarded the case of manufacturing of Misbranded Injection Balingo 10ml (Lignocaine) Batch No. BL-1417 Manufactured by M/s. Bajwa Pharmaceuticals, Lahore. Brief facts of the case as under:

i. Inspector of Drugs Islamabad, during inspection of District Population Welfare office G-9 markaz Islamabad drew samples of injection Balingo 10ml Batch No. BL-1417 manufactured by M/s. Bajwa Pharmaceuticals Lahore for the purpose of test/analysis.
ii. DTL Rawalpindi declared the said batch of Injection Balingo 10ml as "Misbranded" under clause (vi) of subsection (s) of section 3 of the Drugs Act 1976.
iii. The accused were called before Quality Control Board Islamabad in its 50th meeting for personal hearing.

02. In view of above-stated facts, Quality Control Board Islamabad in its 50th meeting held on 30-12-2021 decided as under:

"The Board was briefed about the facts of the case as per record by the Secretary. The representative of firm alongwith supplier appeared before the Board and informed that the labeling error was rectified and replacement to the Department was also made. The members also questioned the representative about the existence of Quality Assurance arrangements of the firm. The Board considered the facts available on record and after discussion decided to refer the case to Drug Registration Board for cancellation of drug registration of i.e. Inj. Balingo 10ml of M/s Bajwa Pharmaceuticals, Lahore after fulfillment of all legal/codal formalities in this regard"

03. Secretary, Quality Control Board Islamabad in above-mentioned decision has requested the Registration Board for cancellation of Injection Balingo 10ml, Reg. No. 078952 manufactured by M/s. Bajwa Pharmaceuticals Lahore.

Proceedings and Decision of 320th meeting:

The case has been deferred due to paucity of time.

Proceedings and Decision of 321st Meeting of Registration Board.

Registration Board after discussion, considering the facts of the case decided:

"To issue show cause notice to M/s. Bajwa Pharmaceuticals Lahore for manufacturing and sale of Misbranded Injection Balingo 10ml (Lignocaine) Batch No. BL-1417" under clause (c) and (d) of sub section 11 of section 7 of the Drugs Act 1976 for suspension/cancellation/ prosecution in Drug Court of the subject cited drug and called them for personal hearing before Registration."

04. Firm replied vide letter no BPL/DRAP/BL/23/01/001 dated 17-01-2023 in response to Show-Cause notice vide office letter of even numbers 03-45/2022-QC dated 06-01-2023 that they had rectified their label as per Labeling and Packing Rules 1986 and submitted the rectified label in 50th meeting of Quality Control Board Islamabad dated, 30-12-2021. Kindly give us a chance to we will strictly follow labelling and packing rules 1986.

05 Letter has been issued to firm dated 08-03-2023 for personal hearing.

Submitted for consideration by Board

Proceedings and Decision of 326th Meeting of Registration Board.

Mr Farhat Munawar Bajwa (C.E.O) appeared before the Board for Personal hearing. He pleaded that he had rectified their label as per Labeling and Packing Rules 1986 and also presented the rectified label in 50th meeting of Quality Control Board Islamabad dated, 30-12-2021.

The Board after thorough deliberations and considering the facts of the case that product was declared misbranded of the basis of not mentioning product specification on unit carton however remaining quality attributes of product as per DTL Rawalpindi report are satisfactory, Therefore Board decided to:

i) issue warning letter to M/s. Bajwa Pharmaceuticals, Lahore to remain vigilant in future in this regard.

ii) direct M/s Bajwa Pharmaceuticals, Lahore to review and check product specifications as per pharmacopoeia, are mentioned on all of their registered products and submit report in QA/LT division.

iii) Include M/s Bajwa Pharmaceutical, Lahore in risk based inspection as per schedule of QA/LT division.

APPELLATE TESTING

Case No. 09: MANUFACTURE & SALE OF SUB-STANDARD STERILE WATER FOR INJECTION BATCH NO. W-20017 & W-20024, MANUFACTURED BY M/S. MEDIATE PHARMACEUTICAL (PVT.) LTD., KARACHI.

The Federal Inspector of Drug, DRAP, Karachi visited the premises of M/s Mediate Pharmaceutical (Pvt.) Ltd., Karachi on 14-04-2021 wherein following samples along with other drugs were taken for the purpose of test/analysis on prescribed Form-3. Details are:

Name of Product	Manufactured by	Reg. no.	Batch no.	Mfg. Date	Exp. Date	CDL remarks
Hitaxime 1gm Injection (vial) Cefotaxime	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	044109	V-20059	11-2020	11-2022	Standard.
Sterile water for injection (ampoule)	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	053244	W-20017	07-2020	07-2023	Substandard on the basis of Bacterial endotoxin.
Hilixophin 500mg Injection (vial) Ceftriaxone	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	044105	V-20085	12-2020	12-2022	Standard.
Sterile water for injection (ampoule)	Mediate Pharmaceutical (Pvt.) Ltd., Karachi	053244	W-20024	12-2020	12-2023	Substandard on the basis of Bacterial endotoxin.

02. Results of CDL on the basis of which sample under reference has been declared as Substandard are reproduced as under:-

i. Reports No. KQ.91/2021:

(STERILE WATER FOR INJECTION)

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Description	Clear sterile water, free from visible particles, preserved in single dose glass or plastic container.	Complies.	USP 43
2.	Bacterial Sterility	Must be sterile.	Complies.	USP 43
3.	**Bacterial Endotoxin**	**Less than 0.25 EU per ml.**	**Does not comply.**	**USP 43**

(HITAXIME 1GM INJECTION)

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Description	Offwhite powder in clear glass vial	Complies.	Mfg. Specs.
2	Identification	The identification test must identify Cefotaxime Sodium.	Complies.	USP 43
3.	pH	4.5 to 6.5	Complies.	USP 43
4.	Bacterial Sterility	Must be sterile.	Complies.	USP 43
5.	Bacterial Endotoxin	Not more than 0.20 EU per mg.	Complies.	USP 43
6.	Assay Cefotaxime (label claim 1gm/vial)	90.0% to 115.0%	105.0% complies	USP 43

NOTE: Initial report has been released for the purpose to facilitate prompt regulatory action in larger public interest. Final report will be released after completion of further relevant tests.

Remarks: *The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.*

ii. Reports No. KQ.92/2021:

(STERILE WATER FOR INJECTION)

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Description	Clear sterile water, free from visible particles, preserved in single dose glass or plastic container.	Complies.	USP 43
2.	Bacterial Sterility	Must be sterile.	Complies.	USP 43

(HILIXOPHIN 500MG INJECTION)

S.No.	Test	Acceptance Criteria	Result	Reference
1.	Description	Off white powder in clear glass vial.	Complies.	Mfg. Specs.
2	Identification	The identification test must identify Ceftriaxone Sodium.	Complies.	USP 43
3.	pH	6.0 to 8.0	Complies.	USP 43
2.	Bacterial Sterility	Must be sterile.	Complies.	USP 43
3.	Bacterial Endotoxin	Not more than 0.20 EU per mg.	Complies.	USP 43
6.	Assay Ceftriaxone. (label claim 500mg/vial)	90.0% to 115.0%	100.3% complies	USP 43

NOTE: Initial report has been released for the purpose to facilitate prompt regulatory action in larger public interest. Final report will be released after completion of further relevant tests.

Remarks: *The sample is of **"Sub-Standard"** quality under the Drugs Act, 1976.*

03. FID, DRAP, Karachi informed that the firm has requested for retesting. The firm stated that:

"[…] we are requesting you to retest Bacterial Endotoxin test of both WFI injections, for this purpose we retest samples in our QC Dept. with three different kits and find results as given below:

Test performed	***Bioendo***	***Lonza***	***Cape-Cod***
Bulk sample	*Fail*	*Pass*	*Pass*
Sample after autoclave	*Fail*	*Pass*	*Pass*
W-20017	*Fail*	*Pass*	*Pass*
GSK WFI SPW9/1 (02-2018)	*Fail*	*Pass*	*Pass*

04. As per decision of 313th meeting of Registration Board regarding appellate testing, firm and Federal Government Analyst, CDL Karachi has been asked to submit OOS investigation dated 26-01-2022.

05. M/s. Mediate Pharmaceutical Pvt Ltd., Karachi replied that they have conducted investigation but found no fail results. Firm has mentioned that they cross checked the recalled product and QC retention samples and performed bacterial endotoxin test by using three different kits out of which results of Bioendo endotoxin kit were not satisfactory. Details are:

S.no	**Reagent used**	**Results**
Lonza Endotoxin Kit		
1	Lysate reagent	Satisfactory
2	Control standard endotoxin	Satisfactory
3	Lal reagent water	Satisfactory
Cape code Endotoxin Kit		
4	Lysate reagent	Satisfactory
5	Control standard endotoxin	Satisfactory
6	Lal reagent water	Satisfactory
Bioendo Endotoxin Kit		
7	Lysate reagent	Un-satisfactory
8	Control standard endotoxin	Un-satisfactory
9	Lal reagent water	Un-satisfactory

06. While CDL, Karachi submitted OOS investigation, the result was OOS is confirmed.

Technical Evaluation of the case:

- The product was declared sub-standard on the basis of results of Bacterial endotoxin.
- Endotoxin test performed by Gel Clot method both by firm and CDL as given in USP 43.
- The method is based on visual inspection of the sample after incubation for presence of gel or otherwise.

Proceedings and Decision of 326th Meeting of Registration Board.

Out of Specification (OOS) investigations and testing records submitted by M/s. Mediate Pharmaceutical (Pvt.) Ltd., Karachi and CDL, DRAP Karachi was presented before Registration Board.

After Through discussion about (OOS) Investigation report submitted by the firm and deliberation the case in detail and decided

1. not to accede the firm's request for appellate testing of this product and
2. to issue show cause notice under Section 42 of the Drugs Act, 1976 and rules framed thereunder, for suspension / cancellation of product Sterile water for injection (ampoule) Registration # 053244 manufactured by M/s. Mediate Pharmaceutical (Pvt.) Ltd., Karachi and called for personal hearing before Registration Board in this instant case.

ROUTINE CASES

CASE NO. 10: MANUFACTURE & SALE OF SUBSTANDARD PARAPALS INFUSION, BATCH NO. LI-100, LI-101 & LI-102, MANUFACTURED BY M/S INVENTOR PHARMA, KARACHI.

The Federal Inspector of Drugs, DRAP inspected the premises of M/s. Sindh Government Hospital, UP Mor, New Karachi on 22-10-2020 wherein, following samples of drugs with apparent discoloration in the solution of Parapals Infusion were taken on Form-3 for the purpose of test/analysis and remaining stock ordered Not to Dispose of on Form-1 under Section 18(1) of the Drugs Act, 1976.

S. No.	Name of Drug	Reg. No.	Batch No.	Mfg. Date	Exp. Date	Mfg. By	Reason of Adulterated and Sub-Standard Product (Initial Report)	Reason of Adulterated and Sub-Standard Product (Final Report)
01	Parapals IV Infusion 100ml (R. No. 088360)	088360	**LI-101**	03/2020	03/2022	M/s. Inventor Pharma, Karachi	Deep brown colored solution containing very large fiber particles. Does not Comply.	-Deep brown colored solution- Does not comply. -pH does not comply. -Bacterial sterility- Does not Comply.
02	-do-	-do-	**LI-100**	-do-	-do-	-do-	-do-	Deep brown colored solution- Does not comply. -Bacterial sterility- Does not Comply.
03	-do-	-do-	**LI-102**	-do-	-do-	-do-	-do-	-Deep brown colored solution- Does not comply. -Bacterial sterility- Does not Comply.

02. FID served a number of explanation letters but no reply from the firm is received yet.

03. FID submitted that M/s. Inventor Pharma, Karachi has violated the Section 23(1) (a) (iv) and 23(1) (a) (v) of Drugs Act, 1976 in view of non-positive attitude of the firm towards GMP compliances and product failure ratio. FID recommended that:

i. Registration of the product **Parapals Infusion Reg. No. 088360** may kindly be

suspended/cancelled for a certain period being a non-safer drug and all other drugs being manufactured at their premises may kindly be reviewed after detailed panel GMP inspection by the panel.

ii. The names of technical persons may be obtained from Licensing Division, DRAP, Islamabad as firm did not provided the names despite of several letters.

04. A show cause notice has been issued vide office letter of even number dated 05-10-2021 to the firm. No reply has been received so far.

05. Registration Board in its 316th meeting of Registration Board heard the firm's representative and after deliberated the facts of the case in detail decided:

i. Suspension of the Registration of Parapals Infusion (Registration No. 088360) for six months or submission of product development data, root cause analysis along with CAPA; which is later.

ii. Product Specific Inspection shall be conducted by following panel:
   a. Mr. Rafeeq Alam
   b. Mr. Affan Ali

06. Panel has been revised vide office letter of even number dated 25-11-2023, PSI was conducted dated 10-01-2023. Conclusion of the report reproduced as:

"Based on the above stated facts the panel concluded that failure was because of the improper Nitrogen Gas supply during filling operations which could have caused oxidation resulting blackish of solution. The firm has taken CAPA and manufactured more three trial batches of said product and found satisfactory results of ongoing stability studies thus recommended the resumption of production of Parapals Infusion 1000mg/100ml Registration Number 088360 after taking fresh sample from 1st commercial batch for test/analysis by CDL Karachi on the expense of manufacturer and then firm will sell the product after standard CDL report."

Comments of QA&LT Division:

07. Though the panel recommended the resumption of registration of Parapal Infusion relying upon the RCA & CAPA submitted by the firm. However, it is noted that in RCA the firm only focused on adulteration and did not address the failure of product on the basis of pH and bacterial sterility test. Simlarly, CAPA for these two failures were not conducted.

08. Moreover, it is pertinent to mention that in addition to above mentioned 03 batches, other 09 batches (cases are in process) were also drawn from FIDs on different occasions and declared as adulterated and substandard. Following are the details:

S. No.	Name of Drug	Batch No.	Mfg. Date	Exp. Date	Mfg. By	Report No. and date	Remarks of CDL & basis of

Proceedings and Decision of 326th Meeting of Registration Board.

"The Board after considering the facts of the case and after thorough deliberations decided:

i. Suspension of the Registration of Parapals Infusion (Registration No. 088360) under section 42 of the Drugs Act, 1976 and rules framed thereunder, for six months or till verification of Root Cause Analysis (RCA) and Corrective and Preventive Action (CAPA) by panel with satisfactory report; whichever is later.

ii. Resubmission of RCA and CAPA by the firm regarding all quality attributes of product which are declared non-compliant in CDL reports.

iii. To conduct Product Specific Inspection, including but not limited to following TORs, by panel of inspectors/experts to be nominated by Director QA/LT.

(a) To verify the all aspect of RCA and CAPA submitted by firm in the light of test /analysis report of CDL regarding all quality attributes of product which are declared non-compliant.

(b) To verify manufacturing and compliance of sterile product manufacturing in light of Schedule BI and BII of Drugs(L.R.&A.) rules 1976.

(c) To verify and report manufacturing and testing capacity of SVP/Liquid infusion (Vail) section along with ancillary facilities for contract/toll manufacturing as per in practice format with clear recommendation.

Case No. 11: VOLUNTARY RECALL OF HUMAN ALBUMIN 20% BIOTEST MANUFACTURED BY M/S BIOTEST AG, GMBH

Back Ground:

1. DRAP has received a rapid alert from the Paul-Ehrlich Institute, Federal Institute of Vaccine and Biomedicines, Ministry of Health, Germany, with respect to the quality defect and **voluntary recall** of 06 batches of Human Albumin 20%, 100mL manufactured by the Biotest AG, GmbH. Out of these six batches, one batch was imported in Pakistan by the authorized registration holder M/s Eastren Trade & Distribution Co, (Pvt) Limited, Karachi.

2. In response to this alert QA/LT division issued Medical Product alert dated 07-10-2022 and the importer has been directed to immediately recall the stock of defective batch **C236831P02** from the market. Regulatory field force is directed to supervise the recall progress. Details are:

Product Name	**Reg. No.**	**Lot. No.**	**Mfg. date**	**Exp. date**	**Mfg. by**	**Name of Importer**	**Details of defect/ Reason of Recall**
Human Albumin 20% Biotest	008459	C236821P02	17-09-2021	31-08-2024	M/s. Biotest AG, GmbH	M/s. Eastern Trade & Distribution Co., (Pvt) Limited. Karachi	Suspicious results within determination of endotoxins by monocyte activation test and limulus amoebocyte lysate test 10-11 months after certification for marketing. At the time of batch release rabbit pyrogen test was well within specifications.

3. Accordingly, the importer vide letter dated 28-12-2022 intimated that they had imported 2500 vials of above batch and they have recalled their stock from market and hospitals, after recall they have a stock of 1176 vials in their warehouse and 1324 has been consumed. Accordingly, letter dated 23-01-2023 was issued to Area FID for reconciliation of recalled stock, FID visited their premises on 03-02-2023 and intimated that 1176 vials of above batch are recalled and are present

in their stock. Now firm is requesting for permission to discard/destroy the above said voluntary recalled stock.

4. As per Schedule B-II , section 6.6 and 6.7 mentioned about the storage and destruction recalled stock of recalled product by the manufacturer/importer after intimation to Concerned Board. However, there is no distinction between Regulatory Recall arise after testing and reporting of Governmental testing laboratories and Voluntary Recalls initialed by firms on their own

5. Moreover at page 27 & 29 of DRAP "**,** also mentions about destruction and disposal of recalled stock after intimation to QA/LT division in the presence of FID or panel.

6. Now case is placed before Board for deliberation and consideration regarding fate of recalled Stock arises by Voluntary recall and all such matters of **VOLUNTRY RECALLS,** where in no regulatory action has been initiated due to lack of Test reports form CDL/DTLs.

Proceedings and Decision of 326th Meeting of Registration Board.

"The Board after considering the facts of the case and after thorough deliberations decided that the cases of products which would be recalled in result of any regulatory decision and action with quality attributes would be presented before Board as per requirement of Drug Act 1976 and DRAP Act 2012 and rules frame there under as per ongoing practice.

The Board further decided that in this instant case and related cases wherein the firm has initiated any voluntary recall by itself or on the behalf of their principle abroad wherein no regulatory action is initiated, the case would be processed as per practice in QA/LT division and Director QA/LT shall decide the fate/disposal of the recalled stock in appropriate manner in light of DRAP **Guideline of Rapid Alert and Recall of Defective therapeutic goods".**

Case No. 12: RELAXATION IN LABELING AND PACKING REQUIREMENYTS FOR AMPOULES HAVING CAPACITY OF 2ML OR LESS UNDER DRUGS (LABELLING AND PACKING) RULES 1986.

This is with reference to the request of M/s Friends Glass Pvt Ltd Swabi regarding difficulties in printing of art work on glass ampoules having capacity of 1ml and printing material is so huge that it is not visible with naked eyes and it is more difficult when it comes to printing the same matter on the ampoules.

2. It is submitted that the Rule 3 of The Drugs (Labeling and Packing) Rules, 1986 that deals with labeling requirements is as under: -

(3) Manner of Labeling:

The following particulars shall appear either in print or in writing in indelible ink in a conspicuous manner on a label of the innermost container of drug and also on the in which such container is packed namely: -

(a) The registered name of the drug;

(b) If the registered name is a proprietary name, then immediately following the registered name, the international non-proprietary name, and if no such non-proprietary name is known the Pharmacopoeial name or any other name, if any, approved by the registration board for this purpose in conspicuous manner;

(c) The international non-proprietary name of the pharmacopoeial name of the generic name, and if no such name is known the chemical name of each active ingredient of a drug with weight.

Added by SRC 1122 (i) 86 dated 23-12-1986 Manual of Drug Laws or measures in metric system, or the number of units of activity as the cause may be, expressed: - (i) In the case of oral liquid preparations in terms of contents per specified volume, the volume being indicated in militaries; (ii) In the case of liquid parenteral preparations ready for administration in terms of militaries or percentage by volume or dose. Provided that in the case of a preparation contained in ampoule, it shall be sufficient if the ingredients are shown on the label or wrapper affixed to any package in which such ampoule is issued for sale. (iii) In the case of drugs in solid form intended for parenteral administration in terms of weight or unit per milligram or gram or per container. (iv) In the case of tablets, capsules pill or other units as the case may be; and (v) In the case of other preparations in terms of percentage by weight or volume or unit-age per gram or milliliter as the case may be;

(d) The name and principal place of business of the manufacturer

(e) The drug manufacturing license number.

(f) The drug registration number.

(g) The date of expiry.
(h) Urdu version of the following namely;
(i) Name of drug (ii) dosage; and (iii) Instructions;
(i) The distinctive batch number date of manufacture and the maximum retail price;

Provided that in the case of a drug packed in a strip of paper or blister or foil or contained in an ampoule of a capacity of not more than two milliliter or in an ampoule containing a sterile suture or ligature and such strip foil blister or ampoule is placed in other package and also in the case of printed collapsible tubes it shall be sufficient to give the information on the outer packing containing such strips, foils, blister or ampoule.

Provided further that the registration board may allow relaxation of any of these conditions.

3. It is submitted that drug contained in an ampoule having capacity of not more than 2ml have space constrains to print all the information on the ampoule, furthermore, as per Rule 3 of The Drugs (Labeling and Packing) Rules, 1986 the Registration Board is empowered to allow relaxation of any of labeling and packing conditions.

4. In light of above it is proposed that we may allow the ampoules of capacity of 2ml or less to contain following minimum information: -

i. The registered name of the drug;
ii. If the registered name is a proprietary name, then immediately following the registered name, the international non-proprietary name, and if no such non-proprietary name is known the Pharmacopoeial name or any other name, if any, approved by the registration board for this purpose in conspicuous manner;
iii. The international non-proprietary name of the pharmacopoeial name of the generic name, and if no such name is known the chemical name of each active ingredient of a drug with weight.
iv. The name of the manufacturer
v. The drug manufacturing license number.
vi. The drug registration number.
vii. The date of expiry.
viii. Urdu version of the following namely; (i) Name of drug
ix. The distinctive batch number and the maximum retail price;

Proceedings and Decision of 326th Meeting of Registration Board.

The Board after considering the facts of the case and after thorough deliberations and technical discussion keeping in view of small size of the ampoule which is difficult to print and read, in light of provision of Section 3 of Drugs (Labelling and Packing) Rules 1986 decided following minimum particulars shall appear in print or in writing in indelible ink in a conspicuous manner on the ampoules of capacity of 2ml or less: -

i. Registered name of drug both in Urdu and English version.
ii. International non-proprietary name or Pharmacopoeial name or generic name as the case may be.
iii. DML number.
iv. Registration Number.
v. Expiry Date.
vi. Batch No.
vii. Company Name with District of its Location. (Complete address such as street No., plot etc may be relaxed e. g X (Company), plot No. Y Street Z, ABC Industrial area, Islamabad may be written as **X, Islamabad**)

However, on the outer packing all the information as required under Drugs (Labelling & Packing) Rules 1986 must appear in print or in writing in inedible ink in a conspicuous manner.

Item No. V: Additional Agenda

Division of Pharmaceutical Evaluation & Registration

Pharmaceutical Evaluation Cell

Agenda of Mr. Farooq Aslam

Case No. I: Registration applications submitted on Form 5F (Routine Applications):

3.	Name, address of Applicant / Marketing Authorization Holder	M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate Raiwind Road, Lahore
	Name, address of Manufacturing site.	M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate, Raiwind Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2947 dated 31/01/2022
	Details of fee submitted	PKR 30,000/-: dated 18/10/2021
	The proposed proprietary name / brand name	**Dysit 4mg/2ml injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Ondansetron as Hydrochloride Dihydrate….2mg
	Pharmaceutical form of applied drug	Clear colorless solution for parenteral use (IV/IM) filled in type-I glass ampoules
	Pharmacotherapeutic Group of (API)	Serotonin 5HT3 antagonist / Antiemetic
	Reference to Finished product specifications	USP
	Proposed Pack size	1x5s,1x1s As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved. 8mg/4mL (PL 04543/0508) 4mg/2mL (PL 04543/0507)
	For generic drugs (me-too status)	Onset 4mg/2ml Injection by M/s Pharmedic (Pvt) Ltd.
	GMP status of the Finished product manufacturer	M/s Wimits Pharmaceuticals: GMP certificate No. 70/2021 DRAP (FID / 2061717-540) Dated: 08/09/2021 Liquid Injection (Ampoule Human General) Section
	Name and address of API manufacturer.	M/s CTX Lifesciences Pvt. Ltd. Address:Block No. 251-252 Sachin- Magdalla Road GIDC, Sachin, Surat – 394 230,Gujarat, INDIA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and

		stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ondansetron Hydrochloride USP is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (ON130001, ON130002, ON130003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Onset 2mg/ml Injection by M/s Pharmedic (Pvt) Ltd by performing quality tests (Identification, Assay, pH).
	Analytical method validation/verification of product	Method verification/validation studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA

Manufacturer of API	M/s CTX Lifesciences Pvt. Ltd. Address: Block No. 251/P, 252/P, 253 to 255, 256/P, 258/P, 276/P, 278/P, 279 to 282, 283/P, 284/P, GIDC, Sachin, dist. Suat, Gujarat, INDIA		
API Lot No.	20ON00029 (99.42 anhydrous)		
Description of Pack (Container closure system)	Filled in glass ampoules which are placed in PVC trays and further packed in cardboard unit cartons with leaflet.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TDX001	TDX002	TDX003
Batch Size	2857 Ampoules	2857 Ampoules	2857 Ampoules
Manufacturing Date	10-2020	10-2020	10-2020
Date of Initiation	13-10-2020	14-10-2020	15-10-2020
No. of Batches	03		

Administrative Portion

I	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
II	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 19061470 valid till 01/07/2022 issued by Food and Drugs Control Administration, Gujarat is submitted. Firm has also submitted License issued by Food and Drugs Control Administration, Gujarat valid till 23-01-2026.

III	Documents for the procurement of API with approval from DRAP (in case of import).	Attested Invoice Number: EI/3002100309, Dated 31/08/2020 cleared on 07/10/2020 vide diary number 14289/2020-DRAP.
IV	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
V	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
VI	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Sr.#	**Observations**	**Firm's response**
1	Pharmaceutical equivalence studies have been performed against comparator's product while the studies are required against the innovator's / reference product.	Firm has submitted Pharmaceutical equivalence studies against the Zofran Injection 4mg/2ml (Reg.#084166) of M/s Novartis.
2	Detail of sterilization process for the applied product is not provided. Submit 3protocol for sterilization process along with the relevant information in relevant section.	Firm has submitted details of terminal sterilization to be performed at 121^{o}C for 15 minutes in autoclave.
3	As per USP monograph for performing system suitability testing, the mobile phase containing reference standard (Ondansetron) Ondansetron related compound A should have been prepared while you have prepared the dilution by taking only RS as it is depicted from the submitted chromatograms, clarify.	Firm has submitted that system suitability parameter has been performed as per USP monograph during the analytical method verification studies.
4	Clarification is required regarding the injection volume which is 10uL as per USP while you have selected 20uL for analysis.	The selected injection volume is same for the standard and sample solution and within the range of concentration of linearity.
5	As per submitted documents (BMR), As-is potency is 79.64% while as per COA of drug substance anhydrous potency is 99.42%, justify. Moreover, justify the quantity adjustment that is 15.07gm for 2857 ampoules for 4mg/2mL made as presented in submitted BMR of the applied product along with the complete calculations for potency adjustment.	Firm has submitted detailed calculation for the Assay results for both "on anhydrous basis" and "on as is basis". The potency of 79.64% used for dispensing of drug substance for trial batch manufacturing is justified for adjustment of theoretical factor for the salt form of HCl.
6	Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
7	GMP certificate / latest inspection report valid within the last three years	GMP certificate of M/s Wimits Pharmaceuticals issued on basis of inspection conducted on 08-09-2021 has been submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate Raiwind Road, Lahore

4.	Name, address of Applicant / Marketing Authorization Holder	M/s Asian Continentals House, D-133, Tipu Sultan Road, KDA Scheme 1, Karachi-Pakistan

	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2953 dated 31/01/2022
	Details of fee submitted	PKR 75,000/-: dated 18/10/2021
	The proposed proprietary name / brand name	**Stawia 4mg/2ml injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ml contains: Ondansetron as Hydrochloride Dihydrate….2mg
	Pharmaceutical form of applied drug	Clear colorless solution for parenteral use (IV/IM) filled in type-I glass ampoules
	Pharmacotherapeutic Group of (API)	Serotonin 5HT3 antagonist / Antiemetic
	Reference to Finished product specifications	USP
	Proposed Pack size	1x5s,1x1s As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved. 8mg/4mL (PL 04543/0508) 4mg/2mL (PL 04543/0507)
	For generic drugs (me-too status)	Onset 4mg/2ml Injection by M/s Pharmedic (Pvt) Ltd.
	GMP status of the Finished product manufacturer	M/s Wimits Pharmaceuticals: GMP certificate No. 70/2021 DRAP (FID / 2061717-540) Dated: 08/09/2021 Liquid Injection (Ampoule Human General) Section
	Name and address of API manufacturer.	M/s CTX Lifesciences Pvt. Ltd. Address:Block No. 251-252 Sachin- Magdalla Road GIDC, Sachin, Surat – 394 230,Gujarat, INDIA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ondansetron Hydrochloride USP is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions:

		Real time: 30°C ± 2°C / 75% ± 5%RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (ON130001, ON130002, ON130003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Onset 2mg/ml Injection by M/s Pharmedic (Pvt) Ltd by performing quality tests (Identification, Assay, pH).
	Analytical method validation/verification of product	Method verification/validation studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA

Manufacturer of API	M/s CTX Lifesciences Pvt. Ltd. Address: Block No. 251/P, 252/P, 253 to 255, 256/P, 258/P, 276/P, 278/P, 279 to 282, 283/P, 284/P, GIDC, Sachin, dist. Suat, Gujarat, INDIA		
API Lot No.	20ON00029		
Description of Pack (Container closure system)	Filled in glass ampoules which are placed in PVC trays and further packed in cardboard unit cartons with leaflet.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TDX001	TDX002	TDX003
Batch Size	2857 Ampoules	2857 Ampoules	2857 Ampoules
Manufacturing Date	10-2020	10-2020	10-2020
Date of Initiation	13-10-2020	14-10-2020	15-10-2020
No. of Batches	03		

Administrative Portion

I	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
II	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 19061470 valid till 01/07/2022 issued by Food and Drugs Control Administration, Gujarat is submitted.
III	Documents for the procurement of API with approval from DRAP (in case of import).	Attested Invoice Number: EI/3002100309, Dated 31/08/2020 cleared on 07/10/2020 vide diary number 14289/2020-DRAP.
IV	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
V	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
VI	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:		
1	Form 5F is submitted by the manufacturer which should be from the applicant. Moreover, applicant mentioned in Form 5F is M/s Wimits Pharmaceuticals which is manufacturing site. Submit revised Form 5F signed and stamped by the applicant along with the submission of full fee.	Firm has referred to the submitted covering letter and fee voucher which is from the applicant i.e., M/s Asian Continental and has submitted revised section 1.3.2.
2	Pharmaceutical equivalence studies have been performed against comparator's product while the studies are required against the innovator's / reference product.	Firm has submitted Pharmaceutical equivalence studies against the Zofran Injection 4mg/2ml (Reg.#084166) of M/s Novartis.
3	Detail of sterilization process for the applied product is not provided. Submit protocol for sterilization process along with the relevant information in relevant section.	Firm has submitted details of terminal sterilization to be performed at 121^{o}C for 15 minutes in autoclave.
4	As per USP monograph for performing system suitability testing, the mobile phase containing reference standard (Ondansetron) Ondansetron related compound A should have been prepared while you have prepared the dilution by taking only RS as it is depicted from the submitted chromatograms, clarify.	Firm has submitted that system suitability parameter has been performed as per USP monograph during the analytical method verification studies.
5	Clarification is required regarding the injection volume which is 10uL as per USP while you have selected 20uL for analysis.	The selected injection volume is same for the standard and sample solution and within the range of concentration of linearity.
6	As per submitted documents (BMR), As-is potency is 79.64% while as per COA of drug substance anhydrous potency is 99.42%, justify. Moreover, justify the quantity adjustment (15.07gm for 2857 ampoules for 4mg/2mL and 251.13gm for 8mg/4mL) made as presented in submitted BMR of the applied product along with the complete calculations for potency adjustment.	Firm has submitted detailed calculation for the Assay results for both "on anhydrous basis" and "on as is basis". The potency of 79.64% used for dispensing of drug substance for trial batch manufacturing is justified for adjustment of theoretical factor for the salt form of HCl.
7	Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
8	GMP certificate / latest inspection report valid within the last three years	GMP certificate of M/s Wimits Pharmaceuticals issued on basis of inspection conducted on 08-09-2021 has been submitted.

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in Form 5F as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate Raiwind Road, Lahore

5.	Name, address of Applicant / Marketing Authorization Holder	M/s Asian Continentals House, D-133, Tipu Sultan Road, KDA Scheme 1, Karachi-Pakistan

Date of Initiation		02-04-2021	07-04-2021	13-04-2021
No. of Batches		03		
Administrative Portion				
I	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
II	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 19061470 valid till 01/07/2022 issued by Food and Drugs Control Administration, Gujarat is submitted.		
III	Documents for the procurement of API with approval from DRAP (in case of import).	Attested Invoice Number: EI/3002100309, Dated 31/08/2020 cleared on 07/10/2020 vide diary number 14289/2020-DRAP.		
IV	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
V	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted		
VI	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted		
Remarks of Evaluator:				
1	Form 5F is submitted by the manufacturer which should be from the applicant. Moreover, applicant mentioned in Form 5F is M/s Wimits Pharmaceuticals which is manufacturing site. Submit revised Form 5F signed and stamped by the applicant along with the submission of full fee.	Firm has referred to the submitted covering letter and fee voucher which is from the applicant i.e., M/s Asian Continental and has submitted revised section 1.3.2.		
2	Pharmaceutical equivalence studies have been performed against comparator's product while the studies are required against the innovator's / reference product.	Firm has submitted Pharmaceutical equivalence studies against the Zofran 8mg tablet (Reg.#084164) of M/s Novartis along with CDP studies in three dissolution		

		mediums of pH 1.2,4.5 & 6.8 with acceptable results of f2 value
3	As per USP monograph of the applied product, the strength of the standard solution is 0.05mg/mL while as per submitted method of analysis the strength of 0.01mg/mL, clarity.	Firm has submitted that it was a typographic error whereas the actual performance has been with the concentration of 0.05mg/ml as evident from the submitted raw data sheets for stability studies.
4	As per USP monograph for performing system suitability testing for drug substance, the mobile phase containing reference standard (Ondansetron) Ondansetron related compound A should have been prepared while you have prepared the dilution by taking only RS as it is depicted from the submitted chromatograms, clarify.	Firm has submitted that system suitability parameter has been performed as per USP monograph during the analytical method verification studies.
5	As per labelling requirement described in official USP monograph of the applied product, when more than one Dissolution test is given, the labeling states the Dissolution test used only if Test 1 is not used. Test 3 is selected for dissolution test for the product but the label of the product does not contain any such information. Submit revised labelling indicating that the product complies with USP Dissolution Test 03.	Firm has submitted revised labelling specimen with declaration of USP Dissolution test 3.
6	As per submitted documents (BMR), As-is potency is 79.64% while as per COA of drug substance anhydrous potency is 99.42%, justify. Moreover, justify the quantity adjustment (0.85kg for 8mg tablet) made as presented in submitted BMR of the applied product along with the complete calculations for potency adjustment.	Firm has submitted detailed calculation for the Assay results for both "on anhydrous basis" and "on as is basis". The potency of 79.64% used for dispensing of drug substance for trial batch manufacturing is justified for adjustment of theoretical factor for the salt form of HCl.
7	Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
8	GMP certificate / latest inspection report valid within the last three years	GMP certificate of M/s Wimits Pharmaceuticals issued on basis of inspection conducted on 08-09-2021 has been submitted.
9	Compatibility studies of excipients with the drug substance are required since excipients used in the applied formulation are different from the excipients used by the innovator.	Firm has submitted drug excipient compatibility studies for the binary combination of drug substance with each excipient.
Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in Form 5F as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** **Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate Raiwind Road, Lahore**

	Module III (Drug Substance)	Official monograph of Ondansetron Hydrochloride USP is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (ON130001, ON130002, ON130003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of

		specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Onset 4mg tablet by M/s Pharmedic by performing quality tests (Identification, Assay, Dissolution, Uniformity of the dosage form). CDP has been performed against the same brand that is Onset 4mg tablet by M/s Pharmedic in Acid media (pH-1.2), Acetate Buffer (pH-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification/validation studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA

Manufacturer of API	M/s CTX Lifesciences Pvt. Ltd. Address: Block No. 251/P, 252/P, 253 to 255, 256/P, 258/P, 276/P, 278/P, 279 to 282, 283/P, 284/P, GIDC, Sachin, dist. Suat, Gujarat, INDIA		
API Lot No.	20ON00029 (99.42 anhydrous)		
Description of Pack (Container closure system)	ALu-ALu blister pakced in secondary uit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TOB001	TOB002	TOB003
Batch Size	2500 Tablet	2500 Tablet	2500 Tablet
Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	20-04-2021	26-04-2021	30-04-2021
No. of Batches	03		

Administrative Portion

I	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
II	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 19061470 valid till 01/07/2022 issued by Food and Drugs Control Administration, Gujarat is submitted.
III	Documents for the procurement of API with approval from DRAP (in case of import).	Attested Invoice Number: EI/3002100309, Dated 31/08/2020 cleared on 07/10/2020 vide diary number 14289/2020-DRAP.
IV	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
V	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
VI	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

1	Form 5F is submitted by the manufacturer which should be from the applicant. Moreover, applicant mentioned in Form 5F is M/s Wimits Pharmaceuticals which is manufacturing site. Submit revised Form 5F signed and stamped by the applicant along with the submission of full fee.	Firm has referred to the submitted covering letter and fee voucher which is from the applicant i.e., M/s Asian Continental and has submitted revised section 1.3.2.
2	Pharmaceutical equivalence studies have been performed against comparator's product while the studies are required against the innovator's / reference product.	Firm has submitted Pharmaceutical equivalence studies against the Zofran 8mg tablet (Reg.#084163) of M/s Novartis along with CDP studies in three dissolution mediums of pH 1.2,4.5 & 6.8 with acceptable results of f2 value
3	As per USP monograph of the applied product, the strength of the standard solution is 0.05mg/mL while as per submitted method of analysis the strength of 0.01mg/mL, clarity.	Firm has submitted that it was a typographic error whereas the actual performance has been with the concentration of 0.05mg/ml as evident from the submitted raw data sheets for stability studies.
4	As per USP monograph for performing system suitability testing for drug substance, the mobile phase containing reference standard (Ondansetron) Ondansetron related compound A should have been prepared while you have prepared the dilution by taking only RS as it is depicted from the submitted chromatograms, clarify.	Firm has submitted that system suitability parameter has been performed as per USP monograph during the analytical method verification studies.
5	As per labelling requirement described in official USP monograph of the applied product, when more than one Dissolution test is given, the labeling states the Dissolution test used only if Test 1 is not used. Test 3 is selected for dissolution test for the product but the label of the product does not contain any such information. Submit revised labelling indicating that the product complies with USP Dissolution Test 03.	Firm has submitted revised labelling specimen with declaration of USP Dissolution test 3.
6	As per submitted documents (BMR), As-is potency is 79.64% while as per COA of drug substance anhydrous potency is 99.42%, justify. Moreover, justify the quantity adjustment (0.85kg for 8mg tablet) made as presented in submitted BMR of the applied product along with the complete calculations for potency adjustment.	Firm has submitted detailed calculation for the Assay results for both "on anhydrous basis" and "on as is basis". The potency of 79.64% used for dispensing of drug substance for trial batch manufacturing is justified for adjustment of theoretical factor for the salt form of HCl.
7	Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
8	GMP certificate / latest inspection report valid within the last three years	GMP certificate of M/s Wimits Pharmaceuticals issued on basis of inspection conducted on 08-09-2021 has been submitted.
9	Compatibility studies of excipients with the drug substance are required since excipients used in the applied formulation are different from the excipients used by the innovator.	Firm has submitted drug excipient compatibility studies for the binary combination of drug substance with each excipient.

Decision: Approved. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in Form 5F as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate Raiwind Road, Lahore		
8.	Name, address of Applicant / Marketing Authorization Holder	M/s Asian Continentals House, D-133, Tipu Sultan Road, KDA Scheme 1, Karachi-Pakistan

1	The address of drug substance manufacturer mentioned in GMP certificate is different from the address mentioned in Form 5F, clarify.	Firm has declared it as typo error and submitted that Details of Drug substance manufacturer are same as presented in section 3.2.S.2.1, GMP certificate and COA of drug substance.
2	Provide complete batch manufacturing record for the applied product.	Submitted
3	Provide Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	N/A
4	Provide detail of strength of serial dilutions prepared for accuracy testing in analytical method verifications studies for drug product.	Frim has submitted details of concentrations as 0.5mg/ml, 1mg/ml & 1.5mg/ml against the concentration levels of 50%, 100%, & 150% respectively.
5	Proivde Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted

6	Provide Documents (invoice) for the procurement of API with approval from DRAP (in case of import.	Commercial invoice attested by AD DRAP I&E Lahore Dated 21-04-2020 is submitted

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration Board further authorized its Chairman for issuance of registration letter upon satisfactory capacity assessment of manufacturing and testing facility of M/s Bio-Mark Pharmaceuticals, Plot No. 527, Sundar Industrial Estate Lahore.

11.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Jupiter Pharma. Plot No. 25, Street # S-6, National Industrial Zone, Rawat, Rawalpindi**
	Name, address of Manufacturing site.	M/s Jupiter Pharma. Plot No. 25, Street # S-6, National Industrial Zone, Rawat, Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	GMP certificate issued on basis of inspection conducted on 18-11-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 27-06-2019, declaring grant following additional sections: "Capsule (Cephalosporin) Dry powder suspension (Cephalosporin) Dry Powder injection (Cephalosporin)"
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 11280 dated 13-04-2021
	Details of fee submitted	Rs.20,000/- dated 05-01-2021
	The proposed proprietary name / brand name	**M-Xime 400mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule Contains: Cefixime as Trihydrate…400mg
	Pharmaceutical form of applied drug	Capsuel
	Pharmacotherapeutic Group of (API)	Third-Generation Cephalosporin's
	Reference to Finished product specifications	USP specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	Cefspan capsule
	Name and address of API manufacturer.	M/s Pharmagen Ltd., Ferozpur Road, Lahore
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch

		analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence Studies & CDP studies against the reference product of "Cefspan capsule of M/s Barret Hodgson Karachi" has been submitted.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.
	Stability studies	Firm has submitted stability studies data of three batches at both accelerated and long-term conditions.

STABILITY STUDY DATA

Manufacturer of APIs	M/s Pharmagen Ltd., Ferozpur Road, Lahore		
API Lot No.	004243/022/2020		
Description of Pack (Container closure system)	Alu Alu foil		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr.#	**Documents To Be Provided**	**Status**
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP certificate issued on basis of inspection conducted on 08-01-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of commercial invoice for 10Kg of Cefixime has been submitted.
4.	Data of stability batches will be supported by attested respective	Firm has submitted data of stability batches along with batch manufacturing record and analytical record.

	documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	N/A
6.	Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)
Remarks of Evaluator: Firm had initially applied USP specifications instead of the monograph notified by DRAP in its 313th meeting. Upon communication of observation firm has submitted revised stability studies data of three batches for both accelerated and long-term stability studies as per the monograph of Cefixime capsule notified by DRAP.		
Decision: Approved with manufacturer specifications as approved by Registration Board in its 313th meeting and notified vide letter No. F.14-I/2022-PEC dated 14th March 2022. The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

DOCUMENTS / DATA PROVIDED BY THE APPLICANT

Sr. No.	Documents to Be Provided	Status
57.	Reference of previous approval of applications with stability study data of the firm	Firm has referred to onsite inspection report of their product for Estine (Ebastine) Tablets 10mg & 20mg on 6th May, 2019. Further, the said panel inspection report was discussed in 289th Drug Registration Board meeting held on 14th – 16th May 2019. The case was approved and the inspection report confirms following points: • The HPLC software is 21CFR Compliant as per record available with the firm. • Audit trail on the testing reports is available. • Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well. • Related manufacturing area, equipment, personnel and utilities are GMP compliant.
58.	Certificate of Analysis of API from both API Manufacturer and Finished Product manufacturer.	Copies of COAs **(Batch# TPL/505/03/20)** of API from **M/s RA Chem Pharma Ltd.**, R.S. No. 50/1, Mukteswarapuram (V), Jaggaiahpet (M), Krishna Dist-521175, Andhra Pradesh, India. and M/s Getz Pharma (Pvt.) Limited Karachi are submitted.
59.	Method used for analysis of API from both API Manufacturer and Finished Product Manufacturer	Methods used for analysis of API from both API Manufacturer and Finished Product Manufacturer are provided by the firm.
60.	Stability study data of API from API manufacturer	Firm has submitted stability study data of API as per zone IVA. Stability study is conducted at Real time conditions; 30˚C ± 2˚C / 65% ± 5%RH for 24 months and at Accelerated conditions; 40˚C ± 2˚C / 75% ± 5%RH for 06 months at intervals 0, 3, 6, 9, 12, 24 & 0, 1, 2, 3 & 6 months respectively. Batches: TPL/03/502/19, TPL/03/503/19, TPL/03/504/19)
61.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP certificate of **M/s RA Chem Pharma Ltd.,** R.S. No. 50/1, Mukteswarapuram (V), Jaggaiahpet (M), Krishna Dist-521175, Andhra Pradesh, India issued, dated 19-07-2019 by Directorate of Drug Control Administration, Government of Andhra Pradesh valid till 19-07-2022.

Remarks of Evaluator:

Sr.#	Observations	Firm’s response
1.	Submit valid GMP certificate issued by the relevant regulatory authority for the drug substance manufacturer.	This is to bring to your kind attention that due to business decision following changes /amendments has been made in name of drug manufacturer of Tapentadol HCI which has been effected from 01.11.2022. However, there is no change in manufacturing site address. In context of above firm has submitted valid GMP certificate with the name of Cohance Lifesciences Limited (valid till 13-12-2023), issued by Drug Control Administration Andhra Pradesh, India
2.	• Details shall be submitted for the dissolution parameters adopted	• Firm has submitted details of dissolution parameters for the CDP studies.

		for the performance of CDP studies. • Justification shall be submitted for not performing CDP studies against the innovator drug product.	• With reference to DRAP GUIDANCE DOCUMENT FOR for not performing CDP studies SUBMISSION OF APPLICATION ON FORM 5-F (CTD) FOR against the innovator drug REGISTRATION OF PHARMACEUTICAL DRUG PRODUCTS FOR product. HUMAN USE wherein it is mentioned as "The comparison of the developed formulation and the innovator /reference / comparator product including the" results of all the quality tests shall be submitted and discussed". In light of above provision, we have performed CDP studies of T-Penta Tablets 75mg against Comparator Product that is Tapento IR Tablets 75mg manufactured by M/s Sarni Pharmaceutical (Pvt.) Ltd., Karachi.
	3.	Justification shall be submitted for the dissolution parameters and limits for the drug product batch release.	We have adopted dissolution parameter and limit for T-Penta Tablets 75mg from "Clinical Pharmacology and Biopharmaceutics Review(s)" document of innovator product NUCYNTA Tablets 75mg.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Empagliflozin:** Official monograph of Empagliflozin is not present in any pharmacopeia. The firm has submitted details of nomenclature, structure, molecular formula, relative molecular mass, general properties, appearance, solubilities, chirality, partition coefficient, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

		Linagliptin: Official monograph of Linagliptin is not present in any pharmacopeia. The firm has submitted details of nomenclature, structure, molecular formula, relative molecular formula, general properties, solubilities, physical form, melting range, pka value, hygroscopicity, chirality, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin HCl:** Official monograph of Metformin HCl is present in USP. The firm has submitted details of nomenclature, structure, molecular mass, relative molecular mass, general properties, solubilities, physical form, melting temperature, pH, pKa, chirality, polymorphism, Organoleptic properties, hygroscopicity, partition coefficient, ultraviolet absorption maxima, molar absorptivity, loss on drying, log P, stereochemistry, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**EMPAGLIFLOZIN:** Stability study conditions: Long-term (I): 25°C ± 2ºC & RH 60%+/- 5% for 12 months Long-term (II): 30°C ± 2ºC & RH 65%+/- 5% for 12 months Accelerated: 40°C ± 2ºC & RH 75%+/- 5% for 6 months Batches: [H-E-20210605-D01-E06-01, H-E-20210605-D01-E06-02, L-E-20210414-D01-E06-01] **LINAGLIPTIN:** Stability study conditions: Long term: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: [LGLT-201405001, LGLT-201405002, LGLT-201405003] **METFORMIN HYDROCHLORIDE:** Stability study conditions: Long term: 30˚C ± 2˚C / 75% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: [MEF/1510145, MEF/1510146, MEF/1510147]
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Trijardy XR 12.5mg + 2.5mg + 1000mg tablet, USFDA (US) approved by BOEHRINGER INGELHEIM PHARMACEUTICALS INC by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Trijardy XR 12.5mg + 2.5mg + 1000mg tablet, USFDA (US) approved by BOEHRINGER INGELHEIM PHARMACEUTICALS INC in Hydrochloric Acid Solution (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity, robustness, and system suitability

The firm has submitted details of nomenclature, structure, molecular formula, relative molecular mass, general properties, appearance, solubilities, chirality, partition coefficient, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Linagliptin:** Official monograph of Linagliptin is not present in any pharmacopeia. The firm has submitted details of nomenclature, structure, molecular formula, relative molecular formula, general properties, solubilities, physical form, melting range, pka value, hygroscopicity, chirality, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. **Metformin HCl:** Official monograph of Metformin HCl is present in USP. The firm has submitted details of nomenclature, structure, molecular mass, relative molecular mass, general properties, solubilities, physical form, melting temperature, pH, pKa, chirality, polymorphism, Organoleptic properties, hygroscopicity, partition coefficient, ultraviolet absorption maxima, molar absorptivity, loss on drying, log P, stereochemistry, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**EMPAGLIFLOZIN:** Stability study conditions: Long-term (I): 25°C ± 2ºC & RH 60%+/- 5% for 12 months Long-term (II): 30°C ± 2ºC & RH 65%+/- 5% for 12 months Accelerated: 40°C ± 2ºC & RH 75%+/- 5% for 6

		months Batches: [H-E-20210605-D01-E06-01, H-E-20210605-D01-E06-02, L-E-20210414-D01-E06-01] **LINAGLIPTIN:** Stability study conditions: Long term: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: [LGLT-201405001, LGLT-201405002, LGLT-201405003] **METFORMIN HYDROCHLORIDE:** Stability study conditions: Long term: 30˚C ± 2˚C / 75% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: [MEF/1510145, MEF/1510146, MEF/1510147]
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Trijardy XR 25mg + 5mg + 1000mg tablet, USFDA (US) approved by BOEHRINGER INGELHEIM PHARMACEUTICALS INC by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Trijardy XR 25mg + 5mg + 1000mg tablet, USFDA (US) approved by BOEHRINGER INGELHEIM PHARMACEUTICALS INC in Hydrochloric Acid Solution (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity, robustness, and system suitability

Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted documents for Reference of Previous Approval		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** **DML Certificate** Fuxin Long Rui Pharmaceutical Co., Ltd Valid Till: 17-Jan-2017 Linagliptin: **DML Certificate of** Manufacturer: Ruyuan Hec Pharm Co., Ltd Valid Till: October-07-2026 **Metformin HCl:** **DML Certificate** of Aarti Drugs Limited Valid Till: 20-March-2024		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** **Invoice** Invoice Num: HN210805-J Quantity: 25 kgs x 2 Batch: H-E-20210605-D01-E06-01 Mfg Date: Aug-06-2021 Exp Date: Aug-05-2023 **DRAP Attestation date: 03-09-2021** **Linagliptin:** **Invoice** Invoice Num: WIS200315 Quantity: 1 kgs Batch: C/0117/20/2675 (LGLT-RD202011202) **DRAP Attestation date: 18-01-2021** **Metformin HCl:** **Invoice** Invoice Num: EXP/1344/21 22 Quantity: MEF/11072137 : 25 kgs MEF/11072155 : 25 kgs Batch: MEF/11072137 MEF/11072155 **DRAP Attestation date: 06-08-2021**		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted		

Remarks of Evaluator:

Section#	Observations	Firm's response

1.6.5	Copy of Valid GMP certificate for M/s Fuxin Long Rui, issued by relevant regulatory authority shall be submitted.	Firm has submitted valid DML# Liao 20150233
	Empagliflozin	
3.2.S.5	COA of primary / secondary reference standard including source and lot number shall be provided.	Submitted
	Linagliptin	
3.2.S.4.3	• Performance of specificity parameter shall be submitted for analytical method verification studies. • Submitted method of analysis from drug substance manufacturer for the test of "Enantiomeric purity declares use of tests sample for both standard and sample solution. Justification shall be submitted din this regard.	• Submitted. • In system suitability test the diluted portion of test sample can be used as standard to assure system precision i.e., repeatability at LOD or LOQ level which ensure the system is précised at LOD or LOQ level.
3.2.P.1	• Clarification shall be submitted for the achievement of desired label claim of Empagliflozin & Linagliptin via active coating while submitted batch formulation does not declare any extra contents of coating solution.	• Provided formulation in "Description & Composition" depicts quantities in mg per tablet. Extra contents (10%) of coating solution for achieving the desired label claim are mentioned in the "Manufacturing Process Development" in Pharmaceutical development report (3.2.P.2).
3.2.P.2	• Justification shall be submitted for proposed quantity of Arginine in the formulation. • Submit the image/picture/snapshot of the innovator/reference/comparator pack against which Pharmaceutical equivalence / Comparative Dissolution Profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator/reference/comparator product. • Justification shall be submitted for not performing tests of water content and arginine content in Pharmaceutical equivalence studies as recommended by the innovator product literature review from reference regulatory authorities.	• L-Arginine is used as a stabilizer for Linagliptin in the formulation and the quantity is taken on the basis of patent – WO 2017/093419 Al. Applicant of the patent: BOEHRINGER INGELHEIM INTERNATIONAL. • Submitted. • Firm has submitted revised the protocol and report for pharmaceutical equivalence studies along with performance of test of water content and content of arginine.
3.2.P.3.4	• In contrary to the recommendations of innovator product literature, "particle size" of Empagliflozin & Linagliptin has not been identified as Critical Quality Attribute.	• We, The Searle Company Limited has revised PD (Product Development) and to incorporate particle size as critical quality attributes however we confirm that consistent particle size is received from lot to lot.
3.2.P.5.1	• Justification shall be submitted for not including tests of arginine content in drug product specifications as recommended by the innovator product literature review from reference regulatory authorities.	Firm has submitted revised specifications and drug product method for the test of L-arginine content and moisture content test.

3.2.P.5.3	• Performance of specificity parameter shall be submitted for analytical method validation studies.	Submitted.
3.2.P.5.4	Justification shall be submitted for not performing tests of arginine content in drug product batch analysis as recommended by the innovator product literature review from reference regulatory authorities.	Firm has submitted revised specifications and drug product method for the test of L-arginine content and moisture content test.
3.2.P.8.3	• Justification shall be submitted for not including tests of arginine content in stability studies.	Firm has submitted revised stability protocol including test of L-arginine content and moisture content test.
2.3.R	• Complete batch manufacturing record of trial batches shall be submitted.	Submitted.

Decision: Registration Board approved the applications of EMTRO XR 12.5/2.5/1000mg Tablets, EMTRO XR 25/5/1000mg Tablets, EMTRO XR 10/5/1000mg Tablets & EMTRO XR 5/2.5/1000mg Tablets. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications for each strength as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 02 Registration application submitted on form 5F for New Drug Manufacturing License:

17.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Fortune Pharmaceuticals. Plot No K/201, S.I.T.E (SHW) Phase II, Karachi, Pakistan**
	Name, address of Manufacturing site.	M/s Fortune Pharmaceuticals. Plot No K/201, S.I.T.E (SHW) Phase II, Karachi, Pakistan
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) (Contract manufacturing agreement between both firms dated 05-01-2022 is provided)
	GMP status of the firm	New license granted on 22/02/2021 Capsule (General) section approved.
	Evidence of approval of manufacturing facility	New license granted on 22/02/2021 Capsule (General) section approved.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 27132 dated 26-09-2022
	Details of fee submitted	Rs.30,000/- dated 21-07-2022
	The proposed proprietary name / brand name	**Throtsin 250mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Azithromycin……250mg
	Pharmaceutical form of applied drug	Capsule contained in Alu Alu blister
	Pharmacotherapeutic Group of (API)	Antibiotic
	Reference to Finished product specifications	USP

	Proposed Pack size	1×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by MHRA
	For generic drugs (me-too status)	Azomax of M/s AGP
	Name and address of API manufacturer.	M/s Hebei Guolong Pharmaceuticals Co., LTD, No.9 xingye street, Shijiazzhuang economic and technological development zone, Hebei province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module-III Drug Substance:	. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability. Firm has also submitted process validation report
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has performed comparative analysis of their developed formulation against the comparator product. Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against the comparator product. Firm has further performed comparative dissolution profile (CDP) testing as per the in three dissolution mediums. The results of CDP also demonstrates similarity of the developed formulation in terms of release profile from the comparator product.
	Analytical method validation/verification of product	Firm has submitted report of validation of analytical method for the drug product. Firm has submitted report of verification studies of analytical method for the drug substance.

STABILITY STUDY DATA

Manufacturer of API	M/s Hebei Guolong Pharmaceuticals Co., LTD China
API Lot No.	220207001
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×10's)
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 2, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-61	T-62	T-63
Batch Size	1500 capsule	1500 capsule	1500 capsule
Manufacturing Date	08-2021	08-2021	08-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Drug Manufacturing License of Hebei Guolong Pharmaceutical Co. Ltd. (No. JI20150058) issued by Hebei Provincial Drug Administration dated 22-07-2020. The certificate is valid till 21-07-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	N/A

Evaluation by PEC:

Sr.#	Observations	Firm's response
1	Provide analytical method verification studies including specificity, precision and accuracy for drug substance performed by drug product manufacturer.	Submitted.
2	Submit detail analytical method used for drug product instead of submitted copy of pharmacopoeial monograph.	Firm has submitted drug product analytical procedure.
3	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. • Documents for the procurement of API with approval from DRAP (in case of import). • Complete batch manufacturing record of stability batches.	Frim has submitted following: • Copy of License to import drugs for clinical trial issued by AD I&E DRAP Karachi for import of Azithromycin 10 kg. • Copy of commercial invoice attested by AD I&E DRAP, Karachi dated 18-11-2021 for import of Azithromycin 10Kg. • Batch manufacturing record of three stability batches. • Copy of Drug Manufacturing License of Hebei Guolong Pharmaceutical Co. Ltd. (No. JI20150058) issued by Hebei Provincial Drug Administration valid till 21-07-2025.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 03: Routine Registration application of Human drugs on Form 5F (Local manufacturing)

VI	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Remarks of Evaluator-I:

Sr. No.	Observations	Response
1	The submitted stability data is till 3rd month time point, please provide stability study data till 6th month time point.	The firm has referred to the earlier submitted stability data of 6th month time point for all three strengths.
2	• Provide complete batch manufacturing record for the applied product along with the calculations for potency adjustment considering the assay value of the drug substance on As-is basis. • Provide detail of manufacturing method for the applied product.	Complete batch manufacturing record has been submitted for three batches of each strength. It is evident from the submitted batch processing record that instead of dispensing the whole API coating solution in excess to overcome the process loss, firm has used 100% excess of Empagliflozin only.

Justification of Overage:
Empator-M 25mg + 1000mg XR Tablet was developed with reference to the Innovator product, **Synjardy 25mg + 1000mg XR Tablet** of MSD, which contains extended-release core of Metformin HCl (1st API) and API coating of immediate release Empagliflozin (2nd API).

The coating process itself, is inevitable to process loss, due to which it is required to add an excess amount of raw materials in the coating solution so that the final landing quantity of API on the core tablet complies with the claimed amount.
Similar case was observed at development stage, during the coating of Empagliflozin on Metformin core, the quantity of coating solution was gradually increased by hit n trial to comply the landing quantity of API on the tablet in accordance with the label claim.
With reference to the ***WHO Annex 3 Pharmaceutical development of multisource (generic) finished pharmaceutical products***, the excess quantity of API coating solution is justified as the excess is lost during the coating process and it was completely utilized to achieve the required quantity on the tablet after Drug loading stage.
The assay results of API Empagliflozin at release testing and throughout the stability studies, are within the label claimed amount, making it evident that the excess amount of API coating solution was lost during the coating process and was not part of the finished dosage form. The **Assay** results of the stability studies are given as reference:

Justification of dissolution profile:
Martin Dow Limited has developed following strengths of Empagliflozin + Metformin HCl XR tablets for new product registration applications,
Empagliflozin 5 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 12.5 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 10 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 25 mg + Metformin HCl 1000 mg XR Tablet
As per the ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products
Bracketing can be applied to studies with multiple strengths of identical or closely related formulations. Examples include but are not limited to (1) capsules of different strengths made with different fill plug sizes from the same powder blend, (2) tablets of different strengths manufactured by compressing varying amounts of the same granulation, and (3) oral solutions of different strengths with formulations that differ only in minor excipients (e.g., colourants, flavourings).
Martin Dow has perfomed Extended-release dissolution profile at core stage before coating of Empator 12.5/1000mg XR and Empator 5/1000mg XR Tablet tablet, meanwhile establishing dissolution profile of Empator 25/1000mg XR Tablet of core stage as per the method of bracketing, and later on batches were found to have the satisfactory results with extended release dissolution profile of Metformin HCl specification at coated stage.

Decision: Registration board deferred the applications of Empator-M XR Tablet 10mg + 1000mg, Empator-M XR Tablet 5mg + 1000mg & Empator-M XR Tablet 12.5mg + 1000mg for following reasons:

- **Scientific justification on the basis of performance based data for using 100% excess of drug substance in the active coating of Empagliflozin.**
- **Submission of any performance based data to justify that 100% excessive Empagliflozin is required to overcome the process loss during active coating.**
- **Justification for referring the "ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products" for skipping the in-process test of dissolution of Metformin extended release core, since the cited guideline is intended to address recommendations on the application of bracketing and matrixing to stability studies.**

b. Deferred cases:

21.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Parkar Pharma. Plot No. O/7-A, S.I.T.E Area Kotri, Sindh**

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Remarks of Evaluator-I:

Sr. No.	Observations	Response
1	The submitted stability data is till 3rd month time point, please provide stability study data till 6th month time point.	The firm has submitted stability summary sheets till 6 months for accelerated and long term stability studies along with the relevant documents.
2	As per submitted dossier, titration method has been used for assay estimation for Metformin HCl while according to latest edition of USP, HPLC method should be used for assay testing, please clarify.	*"The method used for assay estimation of Metformin for finished product by FPP manufacturer is HPLC as per latest edition of USP. API manufacturer has used titration method for assay estimation owing to the previous version of USP monograph".*
3	Provide complete batch manufacturing record for the applied product.	Complete batch manufacturing record is submitted.
4	As per submitted dossier, dissolution tests for Metformin core before coating has not been performed. Clarification is required for not establishing the dissolution profile for the tablet core.	*The Dissolution testing for Metformin HCl was performed at core stage before coating and results were well within specified limits. Since Metformin HCl in all strength have same label claim and same formulation, therefore dissolution profile is performed on film coated stage on risk basis. Satisfactory initial and stability results are also evident on Metformin HCl dissolution performance.* *Following core stage results are also attached herewith.* *Batch No. NPD-T-1108-T (Empagliflozin 5mg + Metformin HCl 1000 mg XR Tablet)* *Batch No. NPD-T-1107-T (Empagliflozin 12.5mg + Metformin HCl 1000 mg XR Tablet)*

5	Provide detail of manufacturing method for the applied product.	The firm has submitted complete batch manufacturing record for the applied product.

6. Scientific justification is required regarding addition of 100% overage for Empagliflozin for compensating the loss during coating.

Response:

Empagliflozin + Metformin HCl 25 + 1000 mg XR tablet is an API (Empagliflozin) coated tablet. Hence, the API is part of the coating suspension. As per label claim, 25 mg of Empagliflozin is coated on the tablet as mentioned in the Batch Production Record of Empagliflozin + Metformin HCl 25 + 1000 mg XR tablet, pp# 25 and is evident through the tablet weight that is 1479.0 mg, pp #43 95mg was coated on the tablet of 1384.0 mg thus taking it to 1479.00mg. Breakup is given below:

API Coating			
S.No.	*Raw Material*	*Quantity/tablet*	*Quantity/Batch*
1	*Empagliflozin*	*25.000 mg*	*250.000 g*
2	*Sheffcoat D white 5Y00692*	*42.000 mg*	*420.000 g*
3	*Talc*	*3.000 mg*	*30.000 g*
4	*Polysorbate 80 (Tween 80)*	*20.000 mg*	*200.000 g*
5	*Polyethylene Glycol 6000*	*5.000 mg*	*500.000 g*

Thus, no overages of the API are added which can be seen via the content increase of tablet before and after API coating mentioned above.

- *The 100% excess quantity mentioned in the BPR is for the clarity of the reviewer and the document itself.*
- *Excess quantity was added in coating material i.e., Sheffcoat D white 5Y00692, Polyethylene Glycol 6000, Talc, Polysorbate 80 (Tween 80) along with it is the **API Empagliflozin** to compensate for the process loss faced while Coating operation is being carried out, as it is an API coated tablet.*

*As it is understood that losses are observed/experienced during coating and thus extra quantities are added as a recompense. These extra quantities do not become part of the final film coated product, as is evident in the **Assay** results of **Empagliflozin** which are well within limits as per label claim.*

Decision of 322nd meeting: Registration Board deferred the case for;

- Scientific justification regarding addition of 100% overage for Empagliflozin for compensating the loss during coating.
- Clarification for not establishing the dissolution profile of the extended release core tablet before coating.

Firm's response:

Justification of Overage:

Empator-M 25mg + 1000mg XR Tablet was developed with reference to the Innovator product, **Synjardy 25mg + 1000mg XR Tablet** of MSD, which contains extended-release core of Metformin HCl (1st API) and API coating of immediate release Empagliflozin (2nd API).

The coating process itself, is inevitable to process loss, due to which it is required to add an excess amount of raw materials in the coating solution so that the final landing quantity of API on the core tablet complies with the claimed amount.

Similar case was observed at development stage, during the coating of Empagliflozin on Metformin core, the quantity of coating solution was gradually increased by hit n trial to comply the landing quantity of API on the tablet in accordance with the label claim.

With reference to the ***WHO Annex 3 Pharmaceutical development of multisource (generic) finished pharmaceutical products***, the excess quantity of API coating solution is justified as the excess is lost during the coating process and it was completely utilized to achieve the required quantity on the tablet after Drug loading stage.

The assay results of API Empagliflozin at release testing and throughout the stability studies, are within the label claimed amount, making it evident that the excess amount of API coating solution was lost during the coating process and was not part of the finished dosage form. The **Assay** results of the stability studies are given below as reference:

Batch No. NPD-T-1616-S			
Real Time			
Assay (Empagliflozin**)**	**0**	**3M**	**6M**
90.0 %-110.0 %	101.5 %	101.7 %	97.8 %
Accelerated			

90.0 %-110.0 %	101.5 %	101.9 %	98 %

Justification of dissolution profile:

Martin Dow Limited has developed following strengths of Empagliflozin + Metformin HCl XR tablets for new product registration applications,

Empagliflozin 5 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 12.5 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 10 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 25 mg + Metformin HCl 1000 mg XR Tablet

As per the ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products

Bracketing can be applied to studies with multiple strengths of identical or closely related formulations. Examples include but are not limited to (1) capsules of different strengths made with different fill plug sizes from the same powder blend, (2) tablets of different strengths manufactured by compressing varying amounts of the same granulation, and (3) oral solutions of different strengths with formulations that differ only in minor excipients (e.g., colourants, flavourings).

Martin Dow has perfomed Extended-release dissolution profile at core stage before coating of Empator 12.5/1000mg XR and Empator 5/1000mg XR Tablet tablet, meanwhile establishing dissolution profile of Empator 25/1000mg XR Tablet of core stage as per the method of bracketing, and later on batches were found to have the satisfactory results with extended release dissolution profile of Metformin HCl specification at coated stage.

Decision: Registration board deferred the application for following reasons:

- **Scientific justification on the basis of performance based data for using 100% excess of drug substance in the active coating of Empgaliflozin.**
- **Submission of any performance based data to justify that 100% excessive Empagliflozin is required to overcome the process loss during active coating.**
- **Justification for referring the "ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products" for skipping the in-process test of dissolution of Metformin extended release core, since the cited guideline is intended to address recommendations on the application of bracketing and matrixing to stability studies.**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted
Pharmaceutical equivalence and CDP Studies data in three dissolution mediums of pH 1.2, 4.5 & 6.8 has been submitted against the Tamsolin-S tablet pf M/s Getz Pharma		

Section#	Observations	Firm's response
3.2.S.4 (Tamsulosin HCl)	• Submitted drug substance specifications of Tamsulosine granules does not include test of dissolution hence it's not evident that the Tamsulosine granules are modified release or otherwise. Justification shall be submitted in this regard. • Submitted COA from both drug substance and drug product manufacturer does not declare the Tamsulosine granules as "modified release". • Justification shall be submitted for using Tamsulosine granules 0.178% w/w% for drug product formulation without establishing its dissolution profile.	• With reference to the control of drug substance, API manufacturer has tested the dissolution against the RLD Vesomni, but did not include the test in release specifications. Moreover, FPP Manufacturer has included the Dissolution Testing of Tamsulosin Granules at finished product stage, that shows the granules release is modified. • Dissolution testing is not included in the release specification. However, modified release of tamsulosin granules is declared in the label claim of the Finished Product. • Dissolution profile of the granules established at FPP stage as evident from the Product testing Method and CDP.

3.2.P.1	• Submitted label claim does not elaborate the immediate release & modified release layer of the dosage form.	Label claim of the tablet is as follow: Each bilayer modified release tablet contains: Solifenacin succinate… 6mg (Corresponding to 4.5mg of Solifenacin base) (Immediate release layer) Tamsulosin hydrochloride….0.4mg (Corresponding to 0.37mg of Tamsulosin base) (Modified release layer)
3.2.P.2.2.1	• Justification shall be submitted for performing CDP studies till 12 hours' time point only, whereas the drug product specifications mention the last time point as of 16hrs.	For Tamsulosin in CDP, release NLT 80% achieved in 12hours therefore next time point was not included in consideration.
3.2.P.5	• Justification shall be submitted for applying speed of 100rpm with USP Apparatus II in the dissolution test with reference to the provisions of USP general chapter <1092>.	According to USP General Chapter <1092>, Please consider the following, *"100 rpm may be used with Apparatus 2, especially for extended-release products. Decreasing or increasing the apparatus rotation speed may be justified if to achieve an in vitro–in vivo correlation (IVIVC) the resulting profiles better reflect in vivo performance, or if the method results in better discrimination without adversely affecting method variability."*
3.2.P.8.3	• Documents confirming import of drug substance used for formulation of stability batches, attested by DRAP, shall be submitted.	Copy of letter issued by AD I& E DRAP Islamabad, dated 28-10-2021, permitting import of Solifenacin 6% granules (25Kg) & Tamsulosin HCl 0.178% granules (50 Kg)
	• Submitted BMRs does not reflect the dispensing of Magnesium stearate, whereas the composition submitted in section 3.2.P.1 includes magnesium stearate. • Dispensed quantity of Tamsulosine HCl granules & Solifenacin granules, shall be justified against the potency determined during drug substance analysis.	• Mg. stearate in Section 3.2.P.1 is approximately 2% of the formulation which is used to increase the flow properties of granules only if required and that would be of Pharmacopeial Grade (BP), if used. Therefore, submitted BMR does not includes the Mg. Stearate. • Potency determined during the Analysis of both the drug substance is more than 100%, that's why Potency is considered equivalent to 100% while dispensing of Drug substance.

Decision of 323rd meeting: Deferred for following:

- Justification for claiming "Tamsulosine HCl granules" as modified release since no such declaration has been maned in drug substance specifications and COA.
- Scientific justification from drug substance manufacturer for not including test of "Dissolution" in the specifications of "Tamsulocin HCl granules" for establishing the modified release profile.
- Scientific justification from drug product manufacturer for not establishing dissolution profile of "Tamsulosine HCl granules" vide performance of dissolution test before using them as in the drug product formulation.
- Capacity assessment of manufacturing and testing facility of M/s Global Pharmaceuticals Pvt Ltd. Plot # 204-205, Industrial Triangle, Kahuta Road, Islamabad

Firm's response: Firm has submitted as under:

i. Tamsulosin HCl granules contains 0.178% active while other is excipient for modified release profile, it is the restricted / hidden part of DMF.

ii. Modified release profiles can be achieved upon compression of granules to tablet and in tablets; dissolution has been performed by drug product manufacturer.

iii.	We have performed testing as per manufacturer's method of analysis and dissolution profile can be analysed after compression of granules to tablets. The granules contain polymer and its function is effective after compression.	
Decision of 326th meeting: Deferred for following: • **Submission of restricted / hidden part of DMF of "Tamsulosine HCl granules" from the drug substance manufacturer.** • **Justification for claiming "Tamsulosine HCl granules" at drug substance stage as modified release since firm has submitted that Modified release profiles can be achieved upon compression of granules into tablet.**

Firm's response:

Remarks of Evaluator:

Section#	Observation	Firm's response
3.2.S.4.2	• Justification shall be submitted for applying UV spectrophotometric method for the analysis of Ciprofloxacin taste masked pellets. • The dissolution parameters applied for the analysis of Ciprofloxacin pellets are different form that recommended by USP monograph of Ciprofloxacin for oral suspension.	• Firm has submitted that we followed the substance manufacturer analytical method validated and then used for the analysis of substance. • In finished product specifications followed the USP monograph and their dissolution parameters for oral suspension.
3.2.P.1	• Clarification shall be submitted regarding proposed excipients, whether they are part of the formulation or diluent.	Firm has submitted that the proposed excipients are part of diluents.
3.2.P.2.2.1	• Details of reference product, against which Pharmaceutical equivalence studies have been performed, shall be submitted. • Justification shall be submitted for not performing CDP.	• Firm has submitted comparative dissolution study reports for both applied strengths against the Novidat suspension of M/s Sami Pharmaceuticals.
3.2.P.2.5	• Justification shall be submitted for preservative effectiveness studies, since no preservative has been proposed in applied formulation.	• Firm has declared it as a clerical mistake.
3.P.2.6	• Proposed diluent is not as recommended by the innovator product.	• Firm has submitted the revised information wherein diluent as recommended by innovator has been mentioned, while no analytical data has been reported for the compatibility studies.
3.2.P.3.3	• The manufacturing process mentions the steps of tablet manufacturing.	• Firm has submitted revised description of manufacturing process for applied dosage form.
3.2.P.3.5	• Submitted process validation protocol does not mention any details of critical process parameters and sampling plan.	• Firm ha submitted revised process validation protocol wherein details of critical process parameters and sampling plans are still not mentioned.
3.2.P.5.2	• Submitted analytical procedure does not mention any details for dissolution test. • Evidence of availability of HPLC equipped with the autosampler, capable of maintaining 10°C temperature shall be submitted.	• Firm has submitted revised analytical procedure including dissolution test. • Firm has submitted HPLC report wherein Tray temperature for autosampler has been mentioned as 10°C.

3.2.P.8	• Submitted raw data sheet for dissolution test does not declare the determination of density of reconstituted suspension, as required by the USP monograph, also the calculation formula has not been mentioned. • Raw data for the Assay test has not been submitted. • In-use stability data shall be submitted.	• Firm has submitted calculation formula along with values of various factors, density etc. • The results of the dissolution test reported in the raw data sheet does not coincide with the provided formula. • Raw data sheets for assay test have been submitted.
	• Section 3.2.P.1 mentions water in formulation, whereas submitted BMRs does not declare use of water in the formulation. • Evidence of reference product shall be submitted wherein the excipients proposed in applied formulation have been used.	

Decision of 316th meeting: Registration Board deferred both the applications of "Celozin 250mg/5ml Dry Suspension" & "Celozin 125mg/5ml Dry Suspension" for following:

- Submission of compatibility studies with the diluent as recommended by the innovator product.
- Clarification regarding manufacturing area where the proposed diluent will be manufactured.
- Submission of process validation protocol wherein details of critical process parameters and sampling plan shall have bene mentioned.
- Justification for the results of dissolution test since results of the dissolution test reported in the raw data sheet does not coincide with the provided calculation formula.
- Submission of fee of Rs.7,500 for correction/pre-approval change in the method of manufacture & drug product testing method, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Firm's reply:

Observations	**Firm's response**
Submission of compatibility studies with the diluent as recommended by the innovator product.	Firm has performed compatibility studies with the diluent as recommended by innovator product.
Clarification regarding manufacturing area where the proposed diluent will be manufactured.	Firm has referred to the oral liquid section for the preparation of diluent.
Submission of process validation protocol wherein details of critical process parameters and sampling plan shall have bene mentioned.	Submitted.
Justification for the results of dissolution test since results of the dissolution test reported in the raw data sheet does not coincide with the provided calculation formula.	Firm has submitted revised calculation formula against the raw data sheets for the performance of dissolution test.
Submission of fee of Rs.7,500 for correction/pre-approval change in the method of manufacture & drug product testing method, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	Firm has submitted fee of Rs. 7.,500/- vide deposit slip# 23252609 & 326074755 for 125mg & 250mg strength respectively.

Decision: Registration Board deferred the applications Celozin 125mg/5ml Dry Suspension & Celozin 250mg/5ml Dry Suspension for further deliberation regarding requirement for the diluent for applied formulation.

The registration Board discussed and deliberated the case in detail regarding the diluent and decided to constitute an expert working group consisting of members from RB, DRAP, national and International health professionls in the relevant fields, stake holders and member nominated by WHO. This working

group will look into the matter considering all the technical aspects and will forward its report to RB for its consideration and decision.

Agenda of Evaluator PEC-XI

Case No. 04; New application for registration of Human drugs on Form 5-F on export facilitation
Assistant director PR-I/EFD vide letter No.F.1-6/2019-PR-I (EFD) dated 29-12-2022 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the *pharmaceutical* i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than **100,000 USD** during the **fiscal Year 2021-2022** and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.,

27.	Name, address of Applicant / Marketing Authorization Holder	Highnoon Laboratories Limited., 17.5km, Multan Road, Lahore
	Name, address of Manufacturing site.	Highnoon Laboratories Limited., 17.5km, Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted cGMP certificate issued on 19-01-2022 based on inspection conducted on 11-11-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 1-30/92-Lic (Vol-VII) dated 04-01-2022 which specifies Tablet (General) Section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2 / 3.2.P.1	• Label claim of the applied formulation with reference to the innovator product shall be submitted along with submission of applicable fee	•
1.5.6	• Clarification is required as you have applied for Manufacturer's Specifications / Innovator specifications?	•
3.2.S.4	• Justification is required for not including the test for propylene glycol content in drug substance specifications (dapagliflozin) by drug substance manufacturer and drug product manufacturer as recommended by innovator product review document	•
3.2.P.2	• Justification is required for using 5% (0.615mg) overage in case of dapagliflozin propanediol monohydrated in applied formulation	•
3.2.P.5	• Justification is required for not performing the identification test in batch analysis as recommended by innovator product review document • Specify the mesh size used with USP type-I apparatus used in dissolution studies	•
3.2.P.8	• Submit stability study data of applied product at 6th month time point • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is not submitted	•

Decision: Registration Board was apprised that the letter of shortcoming has been initially shared with the firm hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Agenda of Evaluator PEC-XX

Case No: 01. **Priority consideration of Propofol applications due to its shortage in market**

M/s Ghani Brothers, Karachi vide letter dated 01-03-2023 has informed that they have applied for registration of Freefol-MCT 1% Injection 20ml Vial (Propofol 10mg/ml), manufactured by Daewon Pharm, Co Ltd, South Korea on 31-08-2022. The firm further informed that currently there is severe shortage of Propofol injection which is also an essential drug and also enclosed the minutes of 1st meeting of the Cabinet Committee on supplies of medicines and medical devices of Specialized Healthcare & Medical Education Department (SHC&ME), Govt. of Punjab held on 20-02-2023 in which it was discussed about shortage of medicines including Propofol Injection. The firm has requested to include the above subject mentioned product in the upcoming registration board meeting on priority basis, so that the product can be approved earliest possible to contribute in removing the shortage of Propofol injection from the market and serve the patients. In the light of above and on the directions of Chairman RB, following application(s) of Propofol are placed before the Board for its consideration:

29.	**Name, address of Applicant / Importer**	**M/s Ghani Brothers, 1st Floor, Karimjee Building, Opp HBL Bank, North Napier Road, Karachi, Pakistan**
	Details of Drug Sale License of importer	**License No: 094** **Address:**. 1st Floor, Karimjee Building, Opp HBL Bank, North Napier Road, Karachi, Pakistan **Address of Godown:** NA **Validity:**.28-04-2023 **Status:** License to sell drugs as wholesale **Renewal:** NA
	Name and address of marketing authorization holder (abroad)	Daewon Pharm Co.,Ltd, 24 Jeyakgondan 1-gil Hyangnam-eup, Hwaseong-si, Gyeonggi-do, Republic of Korea
	Name, address of manufacturer(s)	Daewon Pharm Co.,Ltd, 24 Jeyakgondan 1-gil Hyangnam-eup, Hwaseong-si, Gyeonggi-do, Republic of Korea.
	Name of exporting country	South Korea
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted original, legalized copy of CoPP certificate No 2021-A1-0028 and GMP certificate issued by Food and Drug Administration Republic of South Korea for Freefol MCT 1% Injection 20ml Vial (Propofol 10mg/ml). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 year.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of Sole Agency Agreement from Daewon Pharm Co. Ltd, South Korea. The letter species that the manufacturer appoints M/s Ghani Brothers. to register their products in Pakistan. The authorization letter is valid till 19-03-2026
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 24632 : 31-08-2022

	Details of fee submitted	PKR 150,000/-: on 11-10-2021, Challan No 623767235857
	The proposed proprietary name / brand name	**Freefol MCT 1% Injection 20ml Vial (Propofol 10mg/ml)**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Propofol…….200mg
	Pharmaceutical form of applied drug	White color Emulsion for injection Packed in vial.
	Pharmacotherapeutic Group of (API)	General Anesthetic properties (N01AX10)
	Reference to Finished product specifications	European pharmacopeia
	Proposed Pack size	20ml vial x10's
	Proposed unit price	As per brand leader
	The status in reference regulatory authorities	Propofol Lipuro 1% **(USFDA** Approved).
	For generic drugs (me-too status)	Propofol 1% MCT Fresenius Injection of Fresenius (Reg #099485)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Bachem SA, Succursale de Vionnaz, Route du Simplon 22, 1895, Vionnaz, Switzerland
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25 °C /60 % RH for 60 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence performed against reference product i.e Fresofol MTC 1% Injection Lot No 16FC0249. All quality parameters as per official monograph were compared against Test product Lot No N001
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.

	Container closure system of the drug product	USP type-I clear glass vial
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. Batch No 19034. 19048, 19062 The real time stability study data is conducted at 30 °C / 75% RH. The real time stability study data of 3 batches is for 24months. Batch No R015, R016, R017.
Decision: Registration Board decided to refer the case to Authority for seeking guidance upon priority consideration of the applied formulation.		

Case No.02; Deferred cases of form 5F.

30.	**Name, address of Applicant / Marketing Authorization Holder**	M/s Biogen Life Sciences 8 km Chakbeli Road Rawat Rawalpindi
	Name, address of Manufacturing site.	M/s Biogen Life Sciences 8 km Chakbeli Road Rawat Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the drug product manufacturer	Copy of current GMP certificate dated 17-01-2022 is provided.
	Evidence of approval of manufacturing facility	copy of Valid DML No. 000911 (Formulation) valid till 13-02-2025 along with covering letter is provided.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 27912 Date: 03/10/2022
	Details of fee submitted	PKR 30000 dated: 28-07-2022 . SLIP No. 9108432875
	The proposed proprietary name / brand name	**Actogen 100ml Vial**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Paracetamol 10mg/ml solution for infusion
	Pharmaceutical form of applied drug	Solution for Infusion
	Pharmacotherapeutic Group of (API)	Anti-Pyretic
	Reference to Finished product specifications	Innovator Specs
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	**Brand Name:** Provas (10mg/ml) **Registration holder:** M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi. **Registration Number:** 050650
	Name and address of API manufacturer.	M/s Citi Pharma (Pvt) Ltd, 3 km, Head Balloki Road, Phool Nagar, Kasur. GMP Certificate No. 10444/2016-DRAP/2016

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have not been established/submitted with innovator Product, but with Provas Infusion of M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of validation of analytical method (In-House) for the drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Citi Pharma (Pvt) Ltd, 3 km, Head Balloki Road, Phool Nagar, Kasur. GMP Certificate No. 10444/2016-DRAP/2016		
API Lot No.	**Not Provided**		
Description of Pack (Container closure system)	1's		
Stability Storage Condition	Real time : 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	500 vials	500 vials	500 vials
Manufacturing Date	11-2021	11-2021	11-2021

Date of Initiation	20-11-2021	20-11-2021	20-11-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	• Not Submitted. • Firm has stated that Biogen is a new license section and no such data is submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Sun Pharmaceutical Industries Limited, Industrial Area - 3 A.B. Road 455001 Madhya Pradesh , India DML No. 24/24/83 in form no. 25 & 28/15/83 in form no.28
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not required.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Not Submitted.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	**Not Submitted.**

Evaluation by PEC :

1. Provide updated GMP certificate of API manufacturer M/s Citi Pharma Kasur as the submitted GMP certificated is dated 2016.
2. API manufacturer (M/s citi Pharma Kasur) has performed melting point test for identification of API but has set specifications different from those as mentioned in BP.
3. API manufacturer (M/s citi Pharma Kasur) has performed impurities testing as mentioned in BP but the acceptance criteria is kept at Not more than 1 % while the one mentioned in BP is max .2%
4. Provide the detailed analytical method with complete detail (method verification) along with test reports of API as performed by the Drug Product manufacturer.
5. The Manufacturing Protocol/Procedure for manufacture/Product Development (including sterility testing) are not submitted.
6. Batch detail along with BMR (including sterility testing) is not provided for manufacturing of Drug Product.
7. Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not Provided.
8. Submit microbial reports for the sterility testing of drug product along during stability studies.
9. Pharmaceutical Equivalence studies along with test reports results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted with innovator Product of Drug Product are not submitted.
10. Submit microbial reports for the sterility testing of drug product during stability studies.
11. Provide compatibility study protocol along with reports as the excipients being used are different from the ones mentioned/used in innovator Product (USFDA)
12. In chromatogram of stability studies, study on blank and respective chromatogram of blank is not submitted.
13. Compliance Record of HPLC software 21CFR & audit trail reports on product testing needs to be submitted.
14. Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted.

Decision 322nd meeting : Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Updated reply

Sr. No	Observations	Reply	Remarks
9.	Provide updated GMP certificate of API manufacturer M/s Citi Pharma Kasur as the submitted GMP certificate is dated 2016.	Not provided	Later on GMP certificate based on inspection dated 17.12.2020 was provided.
10.	API manufacturer (M/s citi Pharma Kasur) has performed melting point test for identification of API but has set specifications different from those as mentioned in BP	The mentioned melting point specification range is as per BP.	Justified
11.	API manufacturer (M/s citi Pharma Kasur) has performed impurities testing as mentioned in BP but the acceptance criteria is kept at Not more than 1 % while the one mentioned in BP is max .2%	The mentioned impurities specification/ acceptance criteria is as per BP.	Justified
12.	Provide the detailed analytical method with complete detail (method verification) along with test reports of API as performed by the Drug Product manufacturer.	Detailed analytical method with method verification studies/ test reports of API are provided.	Complied
13.	The Manufacturing Protocol/Procedure for manufacture/Product Development (including sterility testing) are not submitted.	Not provided	Manufacturing Protocol/Procedure for manufacture/Product Development to be provided with details of sterilization mechanism (whether aseptic filling/membrane filtration/terminal sterilization)
14.	Batch detail along with BMR (including sterility testing) is not provided for manufacturing of Drug Product	Provided	Complied
15.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not Provided.	Not provided	Firm submitted that HPLC Instrument is not 21CFR Compliance we already submitted the logbook of HPLC .
16.	Submit microbial reports for the sterility testing of drug product along during stability studies.	Provided	Complied
17.	Pharmaceutical Equivalence studies along with test reports results of all the quality tests	Pharmaceutical Equivalence have been established against	Complied

	(mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted with innovator Product of Drug Product are not submitted.	established brand **Provas Infusion** by M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi Batch No 148 G	
18.	Provide compatibility study protocol along with reports as the excipients being used are different from the ones mentioned/used in innovator Product (USFDA)	Excipients being used are same as used in innovator Product (USFDA)	Verified.
19.	In chromatogram of stability studies, study on blank and respective chromatogram of blank is not submitted.	Not provided	Later on firm submitted analytical study report of blank and respective chromatogram
20.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted.	Provided	Complied

Decision: Deferred for submission of manufacturing procedure for applied product along with details of sterilisation procedure applied.

Agenda of Evaluator PEC-XV

Case No. 01 OUT OF QUEUE CONSIDERATION OF APPLICATION OF REGISTRATION OF DRUGS OF MANUFACTURES HAVING GMP CERTIFICATE FROM PIC/S MEMBER NRAS:

DRAP in its 157th meeting of Authority held on 20th January,2023 decided that, "*For pharmaceutical manufacturers who acquire GMP certification from any PIC/S member country, the Authority as an incentive approved the out-of-queue consideration of registration of 05 molecules, on CTD per calendar year during the validity of the PIC/S country' issued GMP certificate to boost the pharmaceutical exports".*

Accordingly, *M*/s Dynatis Pakistan (Pvt.) Ltd., Lahore had requested for consideration of following registration applications out of queue, since the firm has acquired GMP Certificate from PIC/S member country. Two molecules of the firm under instant priority have been considered by the Board in its 324th meeting. Third molecule of the firm is submitted for consideration of the Board.

33.	Name, address of Applicant / Marketing Authorization Holder	M/s Dynatis Pakistan (Pvt.) Ltd. Plot No. 710, Sundar Industrial Estate, Lahore, Pakistan.
	Name, address of Manufacturing site.	M/s Dynatis Pakistan (Pvt.) Ltd.

		Plot No. 710, Sundar Industrial Estate, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 5897 dated 02/03/2023
	Details of fee submitted	PKR 75,000/-: dated 28/02/2023
	The proposed proprietary name / brand name	**Versi Tablet 2.5mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Vericiguat…….……..….2.5mg
	Pharmaceutical form of applied drug	White colored round biconvex film coated tablets plain from both sides.
	Pharmacotherapeutic Group of (API)	Cardiac therapy, other vasodilator, use in cardiac disease.
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	5's, 7's, 10's, 14's, 20's, 28's, 30's, 50's, 98's and 100's.
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Verquvo Tablet 2.5mg by Bayer AG, Leverkusen, Germany., USFDA Approved.
	For generic drugs (me-too status)	Not applicable, since applied product is not registered yet in Pakistan.
	GMP status of the Finished product manufacturer	GMP certificate based on evaluation conducted on 26-03-2021.
	Name and address of API manufacturer.	**Vericiguat:** Changzhou Pharmaceutical Factory. **Address:** No.518, Laodong East Road, Changzhou, Jiangsu Province 213018, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and process controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: **Vericiguat:**

		Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (PIVCG-2110001, PIVCG-2112001, PIVCG-2112002).
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Verquvo Tablet 2.5mg by Bayer AG, Leverkusen, Germany., Inc., USFDA Approved by performing quality tests (Assay, Dissolution, Average weight). CDP has been performed against the same brand that is Verquvo Tablet 2.5mg by Bayer AG, Leverkusen, Germany, Inc., USFDA Approved, in HCl buffer pH 1.2, Acetate Buffer pH 4.5, Phosphate buffer pH 6.8 and Release medium (0.01M HCl). The values are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity & range, precision (repeatability & intermediate precision), accuracy (recovery), specificity, robustness, solution stability, system suitability, LOD and LOQ.

STABILITY STUDY DATA

Manufacturer of API	**Vericiguat:** Changzhou Pharmaceutical Factory. **Address:** No.518, Laodong East Road, Changzhou, Jiangsu Province 213018, China.		
API Lot No.	Vericiguat: SYVCG-210601		
Description of Pack (Container closure system)	The product is filled in Alu-Alu blister. Each blister contains seven tablets and each unit carton contains two blisters (2 x 7's tablets/pack).		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 9 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3 and 6 (Months) Real Time: 0, 3, 6 and 9 (Months)		
Batch No.	TEA-002	TEA-003	-
Batch Size	5000 Tablets	5000 Tablets	-
Manufacturing Date	12-2021	12-2021	-
Date of Initiation	15-12-2021	24-12-2021	-
No. of Batches	02		

Administrative Portion

13.	Reference of previous approval of applications with stability study data of the firm (if any)	Submitted.
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Vericiguat:** GMP certificate issued by Jiangsu Changzhou Drug Administration valid till 15/11/2024.

15.	Documents for the procurement of API with approval from DRAP (in case of import).	**Vericiguat:** Vericiguat invoice # CY121287, DRAP# 14394/2021 DRAP signed on: 24/09/2021.
16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
18.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	**3.2.S.1**	Please provide the detail related to the polymorphic form of drug substance, since according to the review report of innovator brand five polymorphic forms were identified during development, along with several solvated and hydrated forms and amorphous material.	Firm replied that as per innovator review literature and DMF there are five polymorphic forms along with solvated and hydrated forms. Whereas, different polymorphic forms do not differ in dissolution behavior and drug substance manufacturer synthesize polymorphic Form-I which is the most thermodynamically stable.
2.	**3.2. S.4.1**	Justify for not including the test of palladium and particle size test (laser diffraction) in the specification of drug substance ,since these test are included in the specification of drug substance of innovator product.	Firm replied that "we developed the product as per FDA. Test for palladium is not mentioned in FDA chemistry review for this product. Moreover, particle size test by drug substance manufacturer is added in the specifications".
3.	**3.2.P.2.2.1**	Justify for using polysorbate in the dissolution medium of pH 4.5 and pH 6.8 for dissolution profiling of applied product with reference product and submit the reply along with supporting international reference.	Firm replied that "According to BCS classification, vericiguat belong to class II (low soluble & high permeable). According to USP chapter 1092; the aqueous solution (acidic or buffer solution) may contain a percentage of surfactant to enhance solubility of drug substance. Ideally the amount of surfactant added is sufficient to achieve the sink condition in the desired volume of dissolution medium, so we can use surfactant according to USP chapter 1092".
4.	**3.2.P.5.2**	Clarify the pH of dissolution medium, the submitted analytical procedure did not specify the pH of dissolution medium.	Firm replied that "We have used pH 2.0 for dissolution medium as per innovator approved dissolution specifications. Revised Finished Drug Product testing method along with Innovator reference is submitted".

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application. **• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Decision: Approved.
• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Case No. 02 EXPORT FACILITATION CASE:

Export Facilitation: Applications was received through letter No.F.1-6/2019-PR-I (EFD) dated 28th Feb,2023 "M/s Ferozsons Laboratories Limited, have achieved benchmark OF USD 2108059.57 as defined in the Board's decision during fiscal year 2020-2021. In this regard, please find the (1 molecule) 1 products applications submitted by the firm."		
35.	Name, address of Applicant / Marketing Authorization Holder	M/s Ferozsons Laboratories Limited, PO Ferozsons, Nowshera - Pakistan.
	Name, address of Manufacturing site.	M/s Ferozsons Laboratories Limited, PO Ferozsons, Nowshera - Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 30784 dated 31-10-2022
	Details of fee submitted	PKR 75,000/-: dated 12/09/2022
	The proposed proprietary name / brand name	APRIVA TABLETS 30mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablets contains: Apremilast ….30mg
	Pharmaceutical form of applied drug	Brown Round, 9.5mm biconvex film coated tablet with "*f*" on one side and plain on other side
	Pharmacotherapeutic Group of (API)	Antineoplastic and Immunomodulating Agents
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	7's, 10's, 14's, 20's, 28's and 30's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	OTEZLA TABLETS BY Amgen Inc
	For generic drugs (me-too status)	NA
	GMP status of the Finished product manufacturer	GMP certificate No. F. 11-6/2021-DRAP-65 granted on 25/08/2021 Valid up to 10-08-2023. Tablet (General) section approved vide letter No. F.3-14/2004-Lic, dated: 08-04-2015 is submitted.
	Name and address of API manufacturer.	Glenmark Life Sciences Limited Address: Plot No. Z-103-I, SEZ Phase II, Dahej, Taluka Vagra, District Bharuch, Gujarat – 392 130, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form,

		manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Apremilast is In-house, the firm submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, tests for single/total impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 6 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (AMTab-007, AMTab-008, AMTab-009)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Otezla Tablets by Amgen Inc (USA), by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Otezla Tablets by Amgen Inc (USA). The dissolution profile has shown release less than 85 % in all three Buffer pH 1.2, Phosphate Buffer pH 6.8 and Acetate Buffer pH 4.5 in 15 minutes. So, calculation of similarity factor f_2 is calculated which is "66" for Buffer pH 1.2, "63" for Phosphate Buffer pH 6.8 and "75" for Acetate Buffer pH 4.5 which is more than 50. Hence dissolution profile of both Apriva tablets and Otezla Tablet found similar.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Glenmark Life Sciences Limited Address: Plot No. Z-103-I, SEZ Phase II, Dahej, Taluka Vagra, District Bharuch, Gujarat – 392 130, India.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted the document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 21082834 issued by Food and Drug Controls Administration, Block No.8, 1st floor, Dr. Jivraj Mehta Bhavan, Gandhinagar, Gujrat State, India valid till 06/08/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of Form-6, No.00198/2019-DRAP (Ps)/817 dated 26/02/2019, DRAP acknowledgment for receiving of Apremilast, Commercial invoice, packing list, Form-3 & Form-7 and Goods declarations is submitted wherein the permission to import Apremilast for the purpose of test/analysis and stability studies is granted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
3.	**3.2.P.5.2**	Justify for not adopting the updated dissolution condition of Apremilast tablet as specified in the dissolution database of USFDA.	Firm replied that the product is also tested by adopting updated dissolution conditions of Apremilast tablet as specified in the dissolution database of USFDA and found complies, result for the same along with chromatogram is submitted.

Decision: Approved.

• Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

• Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Agenda of Evaluator PEC-X

Case no. 01: Registration applications of New DML (Veterinary)

a. New DML

I. M/s Acme Pharmaceuticals, Rawat, Islamabad.

CLB in its 289th meeting held on 23rd January, 2023 has considered and approved the grant of DML by way of formulation with following sections.

1. **Oral Dry Powder-I**
2. **Oral Dry Powder-II**
3. **Oral Liquid-I**
4. **Oral Liquid-II**

Accordingly, firm has applied for following products for consideration by the Registration Board.

Section	No. of Products applied	No. of Molecules applied
Oral Dry Powder-I	27	10

Oral Dry Powder-I

34.	Name and address of manufacturer / Applicant	M/s Acme Pharmaceuticals, Plot No 29, St No SS-22, Rawat National Industrial Zone, RCCI Estate Rawat, Islamabad
	Brand Name +Dosage Form + Strength	Acavon 98% WSP
	Composition	Each 100gm Powder Contains: Metrifonate (Trichlorophon)…98gm
	Diary No. Date of R& I & fee	Dy.No 6826 dated 10-03-2023 Rs.30,000/- dated 08-03-2023
	Pharmacological Group	Cholinesterase inhibitor/ insecticide
	Type of Form	Form 5
	Finished product Specification	As per innovator's specifications
	Pack size & Demanded Price	50gm, 100gm, 250gm, 500gm, 1Kg: Decontrolled
	Me-too status	Trinoor-98 Oral Powder of M/s Kohinoor Industries, Sahiwal. (Reg. No. 081306)
	GMP status	New DML
	Remarks of the Evaluator [X]	
	Decision: Referred to EWG on veterinary drugs to review therapeutic requirement keeping in view safety, efficacy and quality parameters including its legal status in regional and global regulatory authorities.	
35.	Name and address of manufacturer / Applicant	M/s Acme Pharmaceuticals, Plot No 29, St No SS-22, Rawat National Industrial Zone, RCCI Estate Rawat, Islamabad
	Brand Name +Dosage Form + Strength	Acavon 96% WSP
	Composition	Each 100gm Powder Contains: Metrifonate (Trichlorophon)…96gm
	Diary No. Date of R& I & fee	Dy.No 6827 dated 10-03-2023 Rs.30,000/- dated 08-03-2023
	Pharmacological Group	Cholinesterase inhibitor/ insecticide
	Type of Form	Form 5
	Finished product Specification	As per innovator's specifications
	Pack size & Demanded Price	50gm, 100gm, 250gm, 500gm, 1Kg,2.5Kg, 5Kg: Decontrolled
	Me-too status	Nawagan Powder of M/s Attabak Pharmaceuticals Islamabad. (Reg. No. 053922)
	GMP status	New DML
	Remarks of the Evaluator [X]	
	Decision: Referred to EWG on veterinary drugs to review therapeutic requirement keeping in view safety, efficacy and quality parameters including its legal status in regional and global regulatory authorities..	
36.	Name and address of manufacturer / Applicant	M/s Acme Pharmaceuticals, Plot No 29, St No SS-22, Rawat National Industrial Zone, RCCI Estate Rawat, Islamabad
	Brand Name +Dosage Form + Strength	Parapex-C WSP
	Composition	Each 100gm Powder Contains: **Paracetamol**…20gm

		Vitamin C…5gm Potassium Carbonate…12.5gm Sodium Bicarbonate…12.5gm Vitamin E…12.5gm
	Diary No. Date of R& I & fee	Dy.No 6821 dated 10-03-2023 Rs.30,000/- dated 09-03-2023
	Pharmacological Group	Analgesic /Vitamins
	Type of Form	Form 5
	Finished product Specification	As per innovator's specifications
	Pack size & Demanded Price	50gm, 100gm, 250gm, 500gm, 1Kg: Decontrolled
	Me-too status	Para Ce Oral Powder of M/s Biogen Pharma, Rawat Chak Beli Road, Rawat (Reg. No. 063812)
	GMP status	New DML
	Remarks of the Evaluator [X]	
	Decision: Referred to EWG on veterinary drugs to review therapeutic requirement keeping in view safety, efficacy and quality parameters	
37.	Name and address of manufacturer / Applicant	M/s Acme Pharmaceuticals, Plot No 29, St No SS-22, Rawat National Industrial Zone, RCCI Estate Rawat, Islamabad
	Brand Name +Dosage Form + Strength	Acme-Aspro-C WSP
	Composition	Each 100gm Powder Contains: **Vitamin C**…20gm **Aspirin**…6.7gm
	Diary No. Date of R& I & fee	Dy.No 6803 dated 10-03-2023 Rs.30,000/- dated 09-03-2023
	Pharmacological Group	Salicylate/Vitamins
	Type of Form	Form 5
	Finished product Specification	As per innovator's specifications
	Pack size & Demanded Price	50gm, 100gm, 250gm, 500gm, 1Kg: Decontrolled
	Me-too status	B.G Aspro-C Water Soluble Powder of M/s Biogen Pharma, Rawat Chak Beli Road, Rawat (Reg. No.080146)
	GMP status	New DML
	Remarks of the Evaluator [X]	
	Decision: Referred to EWG on veterinary drugs to review therapeutic requirement keeping in view safety, efficacy and quality parameters	
38.	Name and address of manufacturer / Applicant	M/s Acme Pharmaceuticals, Plot No 29, St No SS-22, Rawat National Industrial Zone, RCCI Estate Rawat, Islamabad
	Brand Name +Dosage Form + Strength	Tylofos WSP
	Composition	Each 100gm Powder Contains: Tylosin Tartrate…5gm Calcium Fosfomycin…20gm Fructose 1,6 diphosphate…18gm Sodium Phosphate…15gm Magnesium Phosphate…10gm

Agenda of Evaluator PEC-III

Cases of New Section:

M/s Don Valley has submitted copy of a letter dated 05-11-2019 for grant of additional section. The letter specifies Tablet II (General) Section.		
36.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Don Valley Pharmaceuticals (Pvt.) Ltd 31-Km, Ferozepur Road, Lahore.**
	Name, address of Manufacturing site.	M/s Don Valley Pharmaceuticals (Pvt) Ltd 31-Km, Ferozepur Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	GMP status of the firm	The firm has submitted copy of inspection report dated 13-02-2020 confirming good compliance to GMP.
	Evidence of approval of manufacturing facility	Firm has submitted copy of GMP certificate dated 23-08-2019 issued on the basis of inspection dated 06-08-2019 which specifies Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2254: 24-01-2023
	Details of fee submitted	PKR 30,000/-: 18-01-2023
	The proposed proprietary name / brand name	**EMPADON 25mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Empagliflozin…25mg
	Pharmaceutical form of applied drug	Pink colored, round biconvex coated tablet plain on both sides
	Pharmacotherapeutic Group of (API)	Antidiabetic
	Reference to Finished product specifications	In house specs
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**(USFDA** Approved)
	For generic drugs (me-too status)	Xelglu Tablet by Hilton
	Name and address of API manufacturer.	Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications,

		analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for all the quality tests for their product against Jardiance Tablet Firm has submitted results of CDP for their product against Jardiance Tablet.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and analytical method validation of the drug product.

STABILITY STUDY DATA

Manufacturer of API	Fuxin Long Rui Pharmaceutical Co. Ltd. Fluoride Industrial Park, Fumeng County Fuxin City Liaoning Province China.		
API Lot No.	L-E-20211130-D06-E06-02		
Description of Pack (Container closure system)	Alu-alu blister pack		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-IY-22-01	T-IY-22-02	T-IY-22-03
Batch Size	5000 Tablet	5000 Tablet	5000 Tablet
Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	27-05-2022	27-05-2022	27-05-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML certificate No. Liao20150233, dated: 21/12/2017 valid till 20/12/2022, issued by Food & Drug Administration of Liaoning Province- China is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate specifying import of 0.25Kg Empagliflozin. The clearance certificate is issued on 20-04-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- Submit data in section 3.2.S.4.1 and 3.2.S.4.2 for Nirmatrelvir drug substance as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."

- Justify the verification studies of analytical procedure of drug substance from drug product manufacturer, since the drug product manufacturer has adopted a different analytical method in terms of column size, column temperature, standard solution and sample solution.
- The result of sample 3 at 80% concentration in repeatability test gives 60% result. Justify how you passed this test since the test does not qualify the acceptance criteria.
- The HPLC chromatograms of verification studies depict that the date acquired for all analysis of linearity and range is 1-May -22: 10:07AM which is not practically possible. Justify how multiple HPLC chromatograms having different peak areas were acquired on same date and same time.
- The analytical method provided in verification studies specifies 20µL injection volume while all chromatograms specify 10µL injection volume.
- HPLC chromatogram for sample 1 of 120% specify the height as 544.73 while the scale of chromatogram is till 480. Justify how the height could be 544 while the chromatogram is below 480 as per vertifcal scale.
- Three chromatograms submitted after sample 3 of 140% concentration with sample name 0, date acquired 1-May-22 10:07AM and date processed 1-May-22 12:59 PM show retention time 2.59 with exactly same peak as in other chromtaograms but the area and height is 0. Clarify how the peak area and height is 0 with the clear peak in the print.
- Justify why the qualitative composition of your formulation is different from the innovator's product.
- Provide information regarding batch number, expiry date and manufacturer of the innovator product against which pharmaceutical equivalence and CDP studies were conducted.
- Justify the adaptation of dissolution parameters, since they are different from that recommended by the innovator's product in terms of RPM. You have selected 100RPM while the innovator's product has specified 75 RPM.
- Justify the dissolution acceptance criteria NLT 75%(Q) in 45 minutes, while the innovator's product acceptance criteria is NLT (Q) in 15 minutes. Justify your dissolution criteria in the light of decision of Registration Board taken in its 293rd meeting which specifies that "*For rapidly dissolving as well as immediate release drug products, wherein the stability batches will be manufactured after 01-06-2020, variation from innovator / reference product with reference to dissolution specification will not be acceptable"*
- Justify why content uniformity test is not included in the drug product specifications.
- Analytical method of drug product specifies that concentration of standard and sample preparation is 0.025mg/ml while you have performed verification studies keeping the target concentration 0.1mg/ml. Justify how these studies represent your analytical method.
- USFDA review documents reveals that the innovator's drug product shows more than 85% release in 15 minutes, while your stability results indicate that the product disintegration time is greater than 15 minutes. Justify how your product could be considered equivalent to the innovator's product.
- Submit valid GMP certificate / Drug manufacturing license of API manufacturer issued by relevant regulatory authority of country of origin, since the submitted GMP is not issued by relevant regulatory authority of China.
- The submitted audit trail report shows different time of acquisition of HPLC chromatograms than that mentioned on the relevant chromatograms. Clarification is required in this regard.
- Submit BMR of three executed stability batches.

Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Agenda of Evaluator PEC-XXIII

Case no. 01 Registration applications for local manufacturing of (Human) drugs (Form 5)

a. New cases

37.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	ZETI 10mg tablet
	Composition	Each film coated tablet contains: Ezetimibe ……..….10mg
	Diary No. Date of R& I & fee	Dy No. 14602 dated 07-03-2019 Fee paid PKR 20,000/- dated 07-03-2019 vide Deposit Slip No. 0792392 dated 06-03-2019
	Pharmacological Group	Other lipid modifying agents ATC Code C10AX09
	Type of Form	Form 5

	Finished Product Specification	Firm has not stated the product specifications.
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Zetia 10mg tablet Company: Organon USFDA Approved
	Me-too status	Zitamibe 10mg Tablet Mass Pharma
	GMP status	Last GMP inspection conducted on 10-07-2019
	Remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required. • Change in specifications to Pharmacopoeial Specs (USP) along with PKR 7500/- fee is required • Evidence of product approved in reference regulatory authority is of uncoated tablets, applied product is film coated. Approval of film coated tablet in reference regulatory authorities/agencies (which were adopted by Registration Board in its 275th meeting) or change in formulation from film coated to uncoated tablet as available in reference regulatory authority is required, along with prescribed fee.
	Decision: Deferred for following: • **Evidence of approval of applied formulation as film coated tablet dosage form, in reference regulatory authorities/agencies (which were adopted by Registration Board in its 275th meeting) or change in formulation from film coated to uncoated tablet as available in reference regulatory authority, along with prescribed fee as per notification No.F.7-11/2012- B&A/DRAP dated 13-07-2021.** • **Latest GMP inspection report conducted within last three years.** • **Submission of reference for pharmacopoeial specifications along with prescribed fee as per notification No.F.7-11/2012- B&A/DRAP dated 13-07-2021.**	
38.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	MCAM 15mg tablet
	Composition	Each tablet contains: Meloxicam…… 15mg
	Diary No. Date of R& I & fee	Dy No. 16736 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0792367 dated 06-03-2019.
	Pharmacological Group	Oxicams ATC Code M01AC06
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Mobic 15mg tablet USFDA Approved
	Me-too status	Melor Tablet by Sami
	GMP status	Last GMP inspection conducted on 10-07-2019
	Remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required.
	Decision: Deferred for submission of latest GMP inspection report conducted within last three years.	
39.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	MCAM 7.5mg tablet
	Composition	Each tablet contains: Meloxicam ……..….. 7.5mg
	Diary No. Date of R& I & fee	Dy No. 16735 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0792368 dated 06-03-2019.
	Pharmacological Group	Oxicams

		ATC Code M01AC06
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Mobic 7.5mg tablet USFDA Approved
	Me-too status	Melor Tablet by Sami
	GMP status	Last GMP inspection conducted on 10-07-2019
	Remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required.
	Decision: Deferred for submission of latest GMP inspection report conducted within last three years.	
40.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	TIZAN 2mg tablet
	Composition	Each tablet contains: Tizanidine Hydrochloride equivalent to Tizanidine ….....2mg
	Diary No. Date of R& I & fee	Dy No. 16737 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0792365 dated 06-03-2019.
	Pharmacological Group	Muscle relaxants, centrally acting agents ATC Code M03BX02
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	MHRA Approved
	Me-too status	Tizafed 2mg Tablet Fedro Pharmaceutical Labs Pvt Ltd
	GMP status	Last GMP inspection conducted on 10-07-2019
	Remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required.
	Decision: Deferred for submission of latest GMP inspection report conducted within last three years.	
41.	Name and address of manufacturer / Applicant	M/s Linta Pharmaceuticals Plot No. 3, St No. S-5, National Industrial Zone, Rawat, Islamabad (DML No. 000810) Tablet section (General)
	Brand Name +Dosage Form + Strength	TIZAN 4mg tablet
	Composition	Each tablet contains: Tizanidine Hydrochloride equivalent to Tizanidine….. 4mg
	Diary No. Date of R& I & fee	Dy No. 16738 dated 07-03-2019 Fee paid PKR 20,000/- vide Deposit Slip No. 0792363 dated 06-03-2019.
	Pharmacological Group	Muscle relaxants, centrally acting agents ATC Code M03BX02
	Type of Form	Form 5
	Finished Product Specification	USP
	Pack size & Demanded Price	As per SRO
	Approval status of product in Reference Regulatory Authorities.	Zanaflex 4mg tablet USFDA Approved
	Me-too status	Tizafed 4 mg Tablet Fedro Pharmaceutical Labs Pvt Ltd
	GMP status	Last GMP inspection conducted on 10-07-2019
	Remarks of the Evaluator[xxiii].	• Latest GMP inspection report conducted within a period of last three years is required.
	Decision: Deferred for submission of latest GMP inspection report conducted within last three years.

Registration-I Section

Case No.1. Request for Change in Registration Status of Products from M/s The Searle Company Limited Karachi to M/s Searle Pakistan Limited (Formerly OBS Pakistan Private Limited Karachi)

M/s. Searle Pakistan Limited (Formerly OBS Pakistan Pvt Ltd.), C-14, Manghopir Road, S.I.T.E, Karachi (DML No.000012) has requested for change in registration of below mentioned products from M/s The Searle Company Ltd., F-319, S.I.T.E Karachi (DML No.000016) to their name.

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of registration letter and last renewal status.
ii. Copy of GMP certificate of M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi issued on 15-02-22 on the basis of inspection conducted on 08-10-2021.
iii. Copy of DML (000012) of M/s. Searle Pakistan Limited, C-14, Manghopir Road, SITE, Karachi, renewed w.e.f. 31-03-2020. Copy of letter for change of title / management issued by CLB on 23rd November, 2021.
iv. Copy of panel inspection report of M/s Searle Pakistan for GMP Certification dated 08-10-2021 confirming "Tablet (General) Section on the GMP Certification" Copy of approved sections by Central Licensing Board of M/s. Searle Pakistan Limited (Formely M/s OBS Pakistan Pvt. Ltd.) C-14 Manghopir Road, S.I.T.E Karachi confirming "Tablet (general)" section.
v. NOC from M/s. The Searle Company Ltd; Karachi for transfer of Co-Olesta 40mg/12.5mg Tablets and Co-Olesta 20mg/12.5mg Tablets in the name of M/s. Searle Pakistan Limited (Formerly OBS Pakistan Pvt Ltd.), C-14, Manghopir Road, S.I.T.E, Karachi issued on 28-10-2022

vi. Relevant undertakings & commitments.

The cases were referred to Pharmaceutical Evaluation Cell / QMS for scrutinization/evaluation. Detail of submitted documents along-with remarks of evaluator have been mentioned as under:

Evaluator: Mr. Asadullah (DD-QMS)

I	II	III	IV
S.No.	**Reg. No.**	**Registered Brand Name & Composition of Product**	**Registration Trail**
4.	058023	Co-Olesta 40mg/12.5mg Tablets Each tablet contains: - Olmesartan Medoxomil…..…40mg Hydrochlorthiazide 12.5mg (Manufacturer's Specification)	Initial Reg. Date: **01-08-2009** Change of Manufacturer Name: **19-08-2016** Last Renewal Submission date: **30-06-2021 with fee of Rs.15000/-**
	Name, address of Applicant / Marketing Authorization Holder		**M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan (Pvt.) Ltd.) Address: C-14, Manghopir Road, S.I.T.E , Karachi- 75700,,Sindh, Pakistan**
	Name, address of Manufacturing site.		M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan (Pvt.) Ltd.) Address: C-14, Manghopir Road, S.I.T.E , Karachi-75700, Sindh, Pakistan. **(DML 000012)** (change of Name / Title of DML holder by CLB in 283rd meeting letter date 23-11-2021)
	Status of the applicant		☒Manufacturer ☐ Importer ☐Is involved in none of the above (contract giver)
	GMP status of the firm		**For transfer of registration:** GMP certificate of M/s Searle Pakistan Ltd (Formerly OBS Pakistan (Pvt Ltd, C-14, Manghopir Road, S.I.T.E , Karachi- 75700, issued on 15-02-2022 based on inspection conducted on 08.10.2021.
	Evidence of approval of manufacturing facility		Applicant has provided copy of letter dated 26-10-2020 of renewal of DML mentioning Tablet (General) section among Formulation sections.
	Status of application		☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product		☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission		Dy.No.35295 (R&I) dated 06-12-2022
	Details of fee submitted		**For transfer of registration:** PKR 30,000/- DS# 938228899 dated 29-11-2022
	The proposed proprietary name / brand name		Co-Olesta 40 mg/12.5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit		Each film coated tablet contains: Olmesartan Medoxomil 40mg Hydrochlorothiazide 12.5mg
	Pharmaceutical form of applied drug		Blue round concave film coated tablet shaped with

		break-line on one side and plain from other side.
	Pharmacotherapeutic Group of (API)	Angiotensin receptor blocker + Diuretic, Anti-hypertensive
	Reference to Finished product specifications	As per innovator's Specifications
	Proposed Pack size	1 x 10's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Benicar HCT 40mg/12.5mg Tablet, (FDA Approved)
	For generic drugs (me-too status)	Co-Baritec 40mg/12.5mg Tablet, Barret Hodgson Pakistan (Pvt) Ltd. (Reg#067519)
	Name and address of API manufacturer.	**Olmesartan:** Glenmark Life Sciences Limited, A-80, MEDIC, Kurkumbh, Tal, Daund, Pune, Zone-4, India **Hydrochlorothiazide:** CTX Life Sciences Pvt Ltd, Gujrat State, India
	1.5.11-Proposed Label	Submitted
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Olmesartan medoxomil (DS) physical properties, solubilities, polymorphism, other general properties, manufacturing site, Characterization elucidation using FTIR, impurities profiling of organic / in-process known impurities as per USP monograph and analysis of 03 batches data (NMT 0.10% and total impurities NMT 1.30%), other impurities like heavy metals and residual solvents were also controlled in DS specifications. USP based DS specifications were followed by DP manufacturer. Analytical procedures for DS were verified against USP methods by DP manufacturer. DS lot procured is analyzed. Working standards, container closure and stability studies summaries of 03 batches of Olmesartan medoxomil was provided under Zone IV-b. Information related to Hydrochlorothiazide was summarized for its chemical structure, physical properties, solubility, polymorphism (Form-I is produced by CTX Life sciences), manufacturing site, brief manufacturing process was provided. DS characterization was performed using various spectrometric techniques. Specification was assigned as per USP monograph and analytical method was developed and verified. Reference standard from USP lot J0F070 was used to prepare working standard. LDPE bags packed in HDPE drum was used as Container closure system and stability studies were performed at zone iv-b conditions. Similarly, information summaries for drug product (Co-Olesta) including its description, composition, choice of excipients, compatibility, pharmaceutical development, manufacturing process development, pharmaceutical equivalence, comparative dissolution profile, justification for selection of manufacturing process and in-process controls, DP specification based on Inhouse method, analytical procedure and its validation, batch analysis, reference/working standard, container closure system and stability studies has been

		provided.
	Module-III Drug Substance:	Firm has submitted data for both drug substances. **For Olmesartan medoxomil,** information related to its nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism (no isomerism), structure elucidation using UV, FTIR, NMR, etc. Impurity profiling, heavy metals and residual solvents were also identified and analysed in 03 DS batches which reveals within acceptable limits. USP Specifications were assigned except for residual solvents, bulk density and particle size which were tested as per in house method. Analytical method was developed and validated for assay, related substances and residual solvents by Glenmark pharma, India. Searle Pakistan ltd also developed analytical method verification protocol and provided verification report. Batch analysis of 3 batches were provided with their Certificate of analysis. DS lot procured by Searle Pakistan was also analysed against specifications based on USP and compared with CoA of DS manufacturer. Preparation of working standards and its CoA was provided. Container closure system, specification and test methods for packing materials, and stability studies with study protocol was provided. For Hydrochlorothiazide: information related to nomenclature, physical properties, manufacturing and laboratory sites details, brief on manufacturing process, starting materials were provided. Critical manufacturing steps and intermediate, manufacturing process development and validation were not disclosed. Structure elucidations studies were performed using various spectroscopy techniques. Impurities, related substance and was identified. Specification was assigned as per USP monograph by both DS and DP manufacturers. Analytical method was developed and verified based on USP method by DS manufacturer followed by DP manufacturer. Batch analysis of 3 batches were provided which complied the specifications. DS lot procured by Searle Pakistan Ltd was analysed and compared with CoA of DS manufacturer Justification for specification is provided. Working standard was prepared against USP reference standard and its CoA was provided. Reference standards for related substances were inhouse developed. Information related to Container Closure system, its CoAs and safety certificates were provided. Stability study protocol and result sheets were provided.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Olmesartan Medoxomil:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months** and the **long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 36 months**. DS was packed in a double polyethylene bag (inner clear and outer black opaque) and placed in a

fibre board / HDPE Drum. The DS remained within specified limits as tested on defined intervals.

Hydrochlorothiazide:

Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months** and the **long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 72 months**. DS was packed in LDPE bags which is closed with twist tie and inserted in a second LDPE bag which is also closed with a twist tie. The bag is finally placed in a well closed fibre Drum. The DS remained within specified limits as tested on defined intervals.

Module-III Drug Product:

Firm has submitted data of drug product including its physical appearance, composition, choice f excipients, compatibility studies, manufacturing process and process control, formulation development, manufacturing process development and validation protocol, critical quality attributes, process flow and summary, excipients testing methods based on pharmacopeial methods, pharmaceutical equivalence, specifications based on inhouse methods, analytical procedures and its verification, dissolution method verification, batch analysis, justification of specifications, reference standard for DS, container closure system, and stability studies were provided.

Pharmaceutical Equivalence and Comparative Dissolution Profile

Pharmaceutical equivalence was performed against Olmetec Plus 40mg/12.5mg Tablets manufactured by Daiichi Sankyo, Turkey, which shows comparable results within specified limits.

The comparative dissolution profile was performed for Co-Olesta 40mg/12.5mg Tablet (Batch# 024DT01, Exp Date:04-2022) against the Olmetec Plus 40mg/12.5mg (Batch #18N348, Exp Date:09-2023) manufactured by Daiichi sankyo, Turkey. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 45min. Calculation of value is as under:

Mediums	**Time interval**	**HCZ**		**Olmesartan**	
		Test	**Ref**	**Test**	**Ref**
Acidic buffer (pH 1.2)	05 min	96	88	94	88
	10 min	96	98	93	96
	15 min	96	97	90	92
	20 min	97	98	88	90
	30 min	98	98	87	88
	45 min	96	99	83	85
	f1 = 3 f2= 71			f1 = 3 f2= 74	
Acetate buffer (pH 4.5)*	05 min	93	82	6	6
	10 min	95	98	8	8
	15 min	95	98	8	8
	20 min	95	100	8	9
	30 min	98	99	8	8
	45 min	97	100	8	8
	f1=5 f2=63			f1=2 f2=98	
Phosphate Buffer (pH 6.8)	05 min	93	89	56	41

	Analytical method validation/verification of product	Firm has claimed inhouse (as per innovator's) specifications for which report of validation of analytical method for the drug product has been provided. Dissolution method verification protocol and study report were also provided which meets the acceptance criteria for verification.

STABILITY STUDY DATA

Manufacturer of API	**Olmesartan:** Glenmark Life Sciences Limited, A-80, MEDIC, Kurkumbh, Tal, Daund, Pune, Zone-4, India **Hydrochlorothiazide:** CTX Life Sciences Pvt Ltd, Gujrat State, India		
API Lot No.	**Olmesartan:** 83191080 / 0098NPD **Hydrochlorothiazide:** 20HZ00044 / 0084NPD		
Description of Pack (Container closure system)	Alu/PVC blister in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 75% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months (Continue for 24 months) Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9,12,18.24 (Months)		
Batch No.	024DT01	024DT02	024DT03
Batch Size	3000 Tablets	3000 Tablets	3000 Tablets
Manufacturing Date	04-2020	04-2020	04-2020
Date of Initiation	04-2020	04-2020	04-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Olmesartan:** Firm has submitted copy of GMP certificate issued by Food and Drug Administration (Maharashtra State) Pune, India , dated 25-01-2022. (Valid up to 24-01-2023). **Hydrochlorothiazide:** Firm has submitted copy of GMP Certificate issued by Food and Drug Administrating (Gujrat, India) on 30-05-2022 (valid upto 29-05-2025)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Olmesartan API was purchased from Glenmark Life Sciences, Pune, India, invoice dated 31-12-2019, cleared 27-01-2020 from DRAP, Karachi. Hydrochlorothiazide API was purchased from CTX Life Sciences, India invoice dated 24-12-2019, cleared 10-02-2020 from DRAP Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

S.No.	**Reg. No.**	**Registered Brand Name & Composition of Product**	**Registration Trail**
5.	058022	Co-Olesta 20mg/12.5mg Tablets Each tablet contains: - Olmesartan Medoxomil…..…20mg Hydrochlorthiazide 12.5mg (Manufacturer's Specification)	Initial Reg. Date: **01-08-2009** Change of Manufacturer Name: **19-08-2016** Last Renewal Submission Date: **30-06-2021 with fee of Rs.15000/-**
	Name, address of Applicant / Marketing Authorization Holder		**M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan (Pvt.) Ltd.) Address: C-14, Manghopir Road, S.I.T.E , Karachi- 75700,,Sindh, Pakistan**
	Name, address of Manufacturing site.		M/s Searle Pakistan Limited, (Formerly M/s OBS Pakistan (Pvt.) Ltd.) Address: C-14, Manghopir Road, S.I.T.E , Karachi-75700, Sindh, Pakistan. **(DML 000012)** (change of Name / Title of DML holder by CLB in 283rd meeting letter date 23-11-2021)
	Status of the applicant		☒Manufacturer ☐ Importer ☐Is involved in none of the above (contract giver)
	GMP status of the firm		**For transfer of registration:** GMP certificate of M/s Searle Pakistan Ltd (Formerly OBS Pakistan (Pvt Ltd, C-14, Manghopir Road, S.I.T.E , Karachi- 75700, issued on 15-02-2022 based on inspection conducted on 08.10.2021.
	Evidence of approval of manufacturing facility		Applicant has provided copy of letter dated 26-10-2020 of renewal of DML mentioning Tablet (General) section among Formulation sections.
	Status of application		☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product		☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission		Dy.No.35294 (R&I) dated 06-12-2022
	Details of fee submitted		**For transfer of registration:** PKR 30,000/- DS# 73955131364 dated 29-11-2022
	The proposed proprietary name / brand name		Co-Olesta 20 mg/12.5mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit		Each film coated tablet contains: Olmesartan Medoxomil 20mg Hydrochlorothiazide 12.5mg

	Pharmaceutical form of applied drug	white round concave shaped film coated tablet shaped with break-line on one side and plain from other side.
	Pharmacotherapeutic Group of (API)	Angiotensin receptor blocker + Diuretic, Anti-hypertensive
	Reference to Finished product specifications	As per innovator's Specifications
	Proposed Pack size	1 x 10's
	Proposed unit price	As per DPC
	The status in reference regulatory authorities	Benicar HCT 20mg/12.5mg Tablet, (FDA Approved)
	For generic drugs (me-too status)	Co-Baritec 20mg/12.5mg Tablet, Barret Hodgson Pakistan (Pvt) Ltd. (Reg#067251)
	Name and address of API manufacturer.	**Olmesartan:** Glenmark Life Sciences Limited, A-80, MEDIC, Kurkumbh, Tal, Daund, Pune, Zone-4, India **Hydrochlorothiazide:** CTX Life Sciences Pvt Ltd, Gujrat State, India
	1.5.11-Proposed Label	Submitted
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information of Olmesartan medoxomil (DS) physical properties, solubilities, polymorphism, other general properties, manufacturing site, Characterization elucidation using FTIR, impurities profiling of organic / in-process known impurities as per USP monograph and analysis of 03 batches data (NMT 0.10% and total impurities NMT 1.30%), other impurities like heavy metals and residual solvents were also controlled in DS specifications. USP based DS specifications were followed by DP manufacturer. Analytical procedures for DS were verified against USP methods by DP manufacturer. DS lot procured is analyzed. Working standards, container closure and stability studies summaries of 03 batches of Olmesartan medoxomil was provided under Zone IV-b. Information related to Hydrochlorothiazide was summarized for its chemical structure, physical properties, solubility, polymorphism (Form-I is produced by CTX Life sciences), manufacturing site, brief manufacturing process was provided. DS characterization was performed using various spectrometric techniques. Specification was assigned as per USP monograph and analytical method was developed and verified. Reference standard from USP lot J0F070 was used to prepare working standard. LDPE bags packed in HDPE drum was used as Container closure system and stability studies were performed at zone iv-b conditions. Similarly, information summaries for drug product (Co-Olesta) including its description, composition, choice of excipients, compatibility, pharmaceutical development, manufacturing process development, pharmaceutical equivalence, comparative dissolution profile, justification for selection of manufacturing process and in-process controls, DP specification

		based on Inhouse method, analytical procedure and its validation, batch analysis, reference/working standard, container closure system and stability studies has been provided.
	Module-III Drug Substance:	Firm has submitted data for both drug substances. **For Olmesartan medoxomil,** information related to its nomenclature, structure, general properties, solubilities, character elucidation, physical form, manufacturer, a brief on manufacturing process, polymorphism (no isomerism), structure elucidation using UV, FTIR, NMR, etc. Impurity profiling, heavy metals and residual solvents were also identified and analysed in 03 DS batches which reveals within acceptable limits. USP Specifications were assigned except for residual solvents, bulk density and particle size which were tested as per in house method. Analytical method was developed and validated for assay, related substances and residual solvents by Glenmark pharma, India. Searle Pakistan ltd also developed analytical method verification protocol and provided verification report. Batch analysis of 3 batches were provided with their Certificate of analysis. DS lot procured by Searle Pakistan was also analysed against specifications based on USP and compared with CoA of DS manufacturer. Preparation of working standards and its CoA was provided. Container closure system, specification and test methods for packing materials, and stability studies with study protocol was provided. For Hydrochlorothiazide: information related to nomenclature, physical properties, manufacturing and laboratory sites details, brief on manufacturing process, starting materials were provided. Critical manufacturing steps and intermediate, manufacturing process development and validation were not disclosed. Structure elucidations studies were performed using various spectroscopy techniques. Impurities, related substance and was identified. Specification was assigned as per USP monograph by both DS and DP manufacturers. Analytical method was developed and verified based on USP method by DS manufacturer followed by DP manufacturer. Batch analysis of 3 batches were provided which complied the specifications. DS lot procured by Searle Pakistan Ltd was analysed and compared with CoA of DS manufacturer Justification for specification is provided. Working standard was prepared against USP reference standard and its CoA was provided. Reference standards for related substances were inhouse developed. Information related to Container Closure system, its CoAs and safety certificates were provided. Stability study protocol and result sheets were provided.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	**Olmesartan Medoxomil:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months** and the **long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 36**

		months. DS was packed in a double polyethylene bag (inner clear and outer black opaque) and placed in a fibre board / HDPE Drum. The DS remained within specified limits as tested on defined intervals. **Hydrochlorothiazide:** Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions**. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months** and the **long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for 72 months**. DS was packed in LDPE bags which is closed with twist tie and inserted in a second LDPE bag which is also closed with a twist tie. The bag is finally placed in a well closed fibre Drum. The DS remained within specified limits as tested on defined intervals.
	Module-III Drug Product:	Firm has submitted data of drug product including its physical appearance, composition, choice f excipients, compatibility studies, manufacturing process and process control, formulation development, manufacturing process development and validation protocol, critical quality attributes, process flow and summary, excipients testing methods based on pharmacopeial methods, pharmaceutical equivalence, specifications based on inhouse methods, analytical procedures and its verification, dissolution method verification, batch analysis, justification of specifications, reference standard for DS, container closure system, and stability studies were provided.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was performed against Olmetec Plus 20mg/12.5mg Tablets manufactured by Daiichi Sankyo, Turkey, which shows comparable results within specified limits. The comparative dissolution profile was performed for Co-Olesta 20mg/12.5mg Tablet (Batch# 023DT03, Exp Date:04-2022) against the Olmetec Plus 20mg/12.5mg (Batch #20F971, Exp Date:05-2023) manufactured by Daiichi sankyo, Turkey. Comparison was performed using 12 samples at pH 1.2, pH 4.5 and pH 6.8 for 45min. Calculation of value is as under:

Mediums	**Time interval**	**HCZ**		**Olmesartan**	
		Test	**Ref**	**Test**	**Ref**
Acidic buffer (pH 1.2)	05 min	88	97	84	87
	10 min	93	100	87	86
	15 min	94	97	84	83
	20 min	93	99	82	82
	30 min	94	95	80	77
	45 min	95	96	79	76
	f1 = 5 f2= 63			f1 = 2 f2= 81	
Acetate buffer (pH 4.5)*	05 min	95	77	10	10
	10 min	97	100	13	12
	15 min	95	100	14	12
	20 min	100	103	16	14
	30 min	101	102	16	14
	45 min	104	106	17	14

Decision: Registration Board decided as under:

ii. Cancelled registration of following products from the name of M/s The Searle Company Ltd., F-319, S.I.T.E Karachi (DML No.000016) subject to submission of request for withdrawal/ cancellation of registration of below mentioned products:

S. No.	Reg. No.	Product Name & Composition
4.	**058023**	**Co-Olesta 40mg/12.5mg Tablets** **Each tablet contains: -** **Olmesartan Medoxomil……..…..…40mg** **Hydrochlorthiazide……12.5mg** **(Manufacturer's Specification)**
5.	**058022**	**Co-Olesta 20mg/12.5mg Tablets** **Each tablet contains: -** **Olmesartan Medoxomil……...…20mg** **Hydrochlorthiazide…….12.5mg** **(Manufacturer's Specifications)**

iii. Approved registration of following products in the name of M/s Searle Pakistan Limited (Formerly M/s OBS Pakistan Pvt. Ltd.) C-14, S.I.T.E, Karachi (DML No.000012) and given the same brand name on the basis of NOC submitted by M/s The Searle Company Ltd., F-319, S.I.T.E Karachi (DML No.000016).

c. Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

d. Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.

S. No.	Product Name & Composition
iv.	**Co-Olesta 40 mg/12.5mg Tablet** **Each film coated tablet contains:** **Olmesartan Medoxomil …….40mg** **Hydrochlorothiazide ……12.5mg** **(As per *Innovator's Specifications)**

iv. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP).

Case No.2. Request for Change in Registration Status of Rolac 100mg Capsules from M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) to M/s Sami Pharmaceuticals Pvt Ltd., F-140/A, S.I.T.E, Karachi (DML#000938).

M/s. Sami Pharmaceuticals Pvt Ltd. Karachi has requested to change the manufacturing site for their product Rolac 100mg Capsules (Reg. No 024491) from M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) to M/s Sami Pharmaceuticals Pvt Ltd., F -140/A, S.I.T.E, Karachi (DML#000938).

The detail of cases is as following:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of DML of M/s Sami Pharmaceuticals Pvt Ltd., F -140/A, S.I.T.E, Karachi (DML#000938) issued on 13-09-2021.
ii. Copy of approval letter (dated 13-09-2021) for issuance of DML (No.000938; by way of formulation) confirming "Spansules (General)".
iii. NOC from M/s. Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) to transfer product, issued on 12-12-2022
iv. Relevant undertakings & commitments.

The cases were referred to Pharmaceutical Evaluation Cell / QMS for evaluation. Detail of submitted documents and remarks of evaluators have been mentioned as under:

Evaluator: Mr. Asadullah (DD-QMS)

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Monograph of Iitraconazole (DS) and capsule (FPP) is available in USP and BP. Firm has summarized information of Iitraconazole (DS) for its nomenclature, structure, physical properties, solubility and other general properties. The DS is Iitraconazole pellets was manufactured by Sami Pharma using API from Hetro Drugs Limited. Pellets manufacturer is a certified and is responsible for all steps of manufacturing, packing and quality testing. Characterization elucidation studies was conducted using IR, UV, NMR and mass spectrum. Potential impurities related to API was not identified. DS manufacturers followed in-house specification and accordingly analytical methods were developed and verified. DS batch was analyzed by DP manufacturer and compare against the CoA of DS manufacturer. Working standards, container closure and stability studies summaries of 03 batches were provided under Zone IV-b. Similarly, information summaries for drug product related to its description, composition, formulation development, manufacturing process, pharmaceutical equivalence and comparative dissolution profile against reference product were provided. Development of manufacturing process and in-process controls, batch formula, DP specification based on BP specification, analytical procedure and its verification, batch analysis, reference/working standard, container closure system and stability studies has been provided. BMR of three stability batches were also provided.
	Module-III Drug Substance:	Firm has submitted data for drug substance related to nomenclature, structure, general properties, solubility, Character elucidation using spectroscopy IR and NMR. DS specifications were based on the in-house method and accordingly analytical method were developed and its verification studies were performed. DP manufacturer

<table>
<tr><td></td><td></td><td>also performed analytical analysis and method verification of itraconazole 22% pellets. Certificate of analysis of DS lot, batch analysis, reference/working standard and its CoA, container closure system, its specification and test methods for packing materials were provided. stability studies sheets were also provided.</td></tr>
<tr><td></td><td>Stability Studies of Drug Substance (Conditions & duration of Stability studies)</td><td>Firm has submitted stability study data of 3 batches of drug substance accelerated and 3 batches at real time conditions. The accelerated stability data was conducted at 40ºC ± 2ºC / 75% ± 5% RH for 6 months and the long-term stability data was conducted at 30ºC ± 2ºC / 75% ± 5% RH for months. DS was packed in a transparent polyethylene bags placed in dark blue / black polyethylene bags in HDPE drum. The DS, remained stable and within specified limits as tested on defined intervals.</td></tr>
<tr><td></td><td>Module-III Drug Product:</td><td>Firm has submitted data of drug product including its qualitative and quantitative composition, formulation development, manufacturing process development and in-process control, manufacturing process validation protocol and report. Pharmaceutical equivalence and comparative dissolution profile, specifications and analytical procedures developed on the basis of BP monograph and its verification studies were performed, batch analysis, reference standard, container closure system with specification and analysis reports were provided. Stability studies were performed for 3 batches.</td></tr>
<tr><td></td><td>Pharmaceutical Equivalence and Comparative Dissolution Profile</td><td>Pharmaceutical equivalence was performed against Sporanox 100mg Capsule manufactured by Aspin Pharma Pakistan which shows comparable results within specified limits.
The comparative dissolution profile was performed of the stability batch (PL-003) against the Sporanox 100mg Capsule (Batch A0953). Comparison was performed in 0.5% sodium lauryl sulphate in water using 12 samples for 60 minutes (BP monograph). Calculation of value is as under:

Manufacturer of API	Sami Pharmaceuticals (Pvt) Ltd, F-95, Off Hub River Road, SITE, Karachi (DML # 000907)
API Lot No.	004T
Description of Pack (Container closure system)	Alu-Alu blister pack (10s).
Stability	Real time: 30˚C ± 2˚C / 65% ± 5%RH

Storage Condition	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 9 months (Continue for 24 month) Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, (Months)		
Batch No.	PL001	PL002	PL003
Batch Size	10,000 Capsules	10,000 Capsules	10,000 Capsules
Manufacturing Date	11-2021	12-2021	12-2021
Date of Initiation	12-2021	12-2021	12-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	-
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by DRAP Karachi.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API was procured from Sami Pharmaceuticals (Pvt) Ltd, F-95, Off Hub River Road, SITE, Karachi.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail of stability batches.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Decision: **Registration Board decided as under:** M/s. Sami Pharmaceuticals Pvt Ltd. Karachi has requested to change the manufacturing site for their product Rolac 100mg Capsules (Reg. No 024491) from M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) to M/s Sami Pharmaceuticals Pvt Ltd., F -140/A, S.I.T.E, Karachi (DML#000938)

i. **Cancelled registration of following products from the name of** M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072) **subject to submission of request for withdrawal/ cancellation of registration of below mentioned products:**

S. No.	Reg. No.	Product Name & Composition
1.	**024491**	**Rolac 100mg Capsules** **Each capsule contains: -** **Itraconazole……100mg** **(BP Specification)**

ii. **Approved registration of following products in the name of M/s Sami Pharmaceuticals Pvt Ltd., F -140/A, S.I.T.E, Karachi (DML#000938) and the same brands were given on the basis of NOC from M/s Sami Pharmaceuticals Pvt Ltd, F-95, off Hub, River Road, S.I.T.E, Karachi (DML #000072)**
   a) **Manufacturer will place first three production batches of both products on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
   b) **Manufacturer will perform process validation of first three batches of both products as per the commitment submitted in the registration application.**

c) Before issuance of registration letter, the applicant shall submit comparative dissolution studies performed against the innovator's/ reference product in line with the guidance published vide minutes of 293rd meeting of Registration Board. [*Ref. Dissolution Profile Comparisons Through Model Independent Approach Using Similarity Factor; Page No. 43-44*]

S. No.	Product Name & Composition
i.	**Rolac 100mg Capsules** **Each capsule contains:** **Coated pellets of Itraconazole MS equivalent to Itraconazole 100 mg (BP Specification)** **Source of Pellets:** **Sami Pharmaceuticals (Pvt) Ltd, F-95, Off Hub River Road, SITE, Karachi (DML # 000907)**

iii. Reference will be sent to Costing and Pricing Division for confirmation of maximum retail price (MRP).

Case No.03. Request for Change in Registration Status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro Along-with End to End Local Manufacturing.

Registration Board in its 323rd meeting held on 06th-08th December16th-17th May, 2022 considered the request of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro for change in registration status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name as per following details:

Detail of Previous Proceedings:

M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro initially applied for change in registration status from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name along-with end to end local manufacturing (Dy.No.33338/R&I dated 21-12-2021). However, the firm vide their letter No.REF/DRAP/Reg-003/0322 received dated10-03-2022 (Dy.No.6669) revised their request by informing that there is no change in manufacturing site (abroad) and repacking site (local). The case was considered by the Registration Board in its 317th meeting (held on 16th-17th May, 2022) and decided as under:

Decision of M-317:

Registration Board deferred the case for submission of updated approval status of the applied formulation along-with safety and efficacy profile in reference regulatory authorities adopted by the Board in its 275th meeting. Moreover, the Board further advised to submit valid and legalized CoPP of the product as existing has been expired.

In line with the above-mentioned decision of Registration Board, following information has been collected regarding risk-benefit profile of Paracetamol MR Tablet and regulatory steps taken by different reference regulatory authorities in the best interest of patients.

[Reference: Application to amend the Poisons Standard - Modified Release Paracetamol (tga.gov.au) accessed dated 04-11-2022]:

Paracetamol Modified Release Tablet:

Paracetamol MR tablets are constructed in two layers, an IR layer (31%) and a SR layer (69%) that gradually releases paracetamol over a period of 8 hours at normal doses.

The highest recommended dose of paracetamol for adults is 1.3 g and the maximum daily dose is 4 g (i.e., 2 tablets 3 times a day with highest dose of 6 tablets a day). A toxic dose is 10g or 200mg/kg (whichever is greater). The majority of patients who overdose take less than 30 g.

Summary of Benefits of MR Paracetamol:

i. Three times daily dosing and reduction of tablet burden (compared with four times daily dosing of IR formulations);
ii. MR paracetamol may be preferred over IR paracetamol for long term use in patients with chronic pain conditions such as osteoarthritis.

Summary of Risks of MR paracetamol:

i. Unpredictable and undefined pharmacokinetic profile following an overdose with MR paracetamol.
ii. Severe consequences of overdose may be more likely to occur in patients who have ingested MR paracetamol;
    a. High potential for treating clinician to not be aware that a patient has ingested MR paracetamol

b. Unpredictable pharmacokinetic profile making monitoring and treatment difficult

iii. Current best practice guidelines do not completely address MR toxicity.

iv. Chronic supratherapeutic overdose is also thought to be not uncommon. This is likely largely due to confusion about the difference in dose between MR and IR paracetamol with the maximum dose being 6 tablets per day for the MR formulation rather than 8 tablets per day for IR. This confusion may be contributed to by the products being available adjacent to one another OTC without counselling/education provided at the point of sale.

v. Paracetamol overdose can result in liver failure requiring liver transplant and may be fatal if not treated appropriately in a timely manner.

To overcome the risk associated with overdosing of Paracetamol MR Tablet, following different regulatory actions have been taken by EMA and TGA:

A. European Medicines Agency (EMA) on recommendations of Pharmacovigilance Risk Assessment Committee (PRAC) suspended the marketing of MR paracetamol formulations in September 2017 as the **advantages of a longer-acting product did not outweigh the complications of managing an overdose of the medicine**, since the treatment procedures for immediate-release products are not appropriate for modified-release paracetamol.

In many cases, it may not be known whether an overdose of paracetamol involves immediate-release or modified release products, making it difficult to decide how the overdose should be managed.

Furthermore, the **medicines will remain suspended unless the companies that hold the marketing authorizations can provide evidence of appropriate and practical EU-wide measures to help prevent overdose with these products and adequately reduce its risks.**

B. Therapeutic Goods Administration (TGA) Australia has up-scheduled MR paracetamol from ***Schedule 2 'Pharmacy Medicine'*** to ***Schedule 3 'Pharmacist Only'*** in order to ensure appropriate patient counselling on correct dosing and the risks associated with overdose, whether intentional or accidental.

- There are well established guidelines in Australia for the management of paracetamol overdose including with MR paracetamol.
- The treatment of paracetamol overdose is dependent on a number of factors and treatment given will vary accordingly. Key parameters include dose taken and time since exposure, if known.
- The mainstay of treatment is with acetylcysteine. Whether acetylcysteine is administered depends on certain clinical parameters, including the use of the paracetamol treatment nomogram which plots the blood paracetamol concentration against time.
- Other investigations include measurement of liver function to assess for liver toxicity.

Approval status of Paracetamol extended-release tablets in different regulatory authorities is as under:

S/N	Country	Authority	Product	Approval status
1.	Australia	TGA (Therapeutic Goods Administration) PANADOL OSTEO (reformulation) paracetamol 665 mg modified release tablet blister pack (260264) | Therapeutic Goods Administration (TGA)	PANADOL OSTEO paracetamol 665mg modified release tablet of M/s GlaxoSmithKline Consumer Healthcare Australia Pty Ltd	Active (Non-prescription medicine) **(Pharmacist Only Medicine)**
2.	Australia	TGA (Therapeutic Goods Administration) PANADOL BACK & NECK LONG LASTING paracetamol 665mg modified release tablets blister pack (78493) | Therapeutic Goods Administration (TGA)	PANADOL BACK & NECK LONG LASTING paracetamol 665mg modified release tablets of M/s GlaxoSmithKline Consumer Healthcare Australia Pty Ltd	Active (Non-prescription medicine) **(Pharmacist Only Medicine)**
3.	USA	US FDA Drugs@FDA: FDA-Approved Drugs	Acetaminophen 650mg extended release tablet	Active (Human OTC drug)
4.	Canada	Health Canada Search results summary (canada.ca)	ARTHRITIS PAIN EXTENDED RELIEF tablet	Approved.

5.	Finland	The Finnish Medicines Agency (Fimea) Drug search - Fimea	Panadol Extend 665mg modified release tablets of M/s GlaxoSmithKline Consumer Healthcare APS	Marketed.
6.	Denmark	Danish Medicine Agency Search - Summary of Product Characteristics (produktresume.dk)	Panodil, Modified Release Tablets 665mg of M/s GlaxoSmithKline Consumer Healthcare APS	Marketed.

List of Countries (Other than RRAs) where Paracetamol MR Tablet has been reported to be available	
i.	New Zealand **(Pharmacist Only Medicine)**
ii.	Singapore
iii.	Hong Kong
iv.	Malaysia
v.	UAE
vi.	Lebanon
vii.	Oman
viii.	Qatar
ix.	Bahrain
x.	Jordan
xi.	Kuwait
xii.	Egypt
xiii.	Saudi Arabia

Approval Status of Paracetamol MR tablets in Pakistan:

Application for registration of Panadol Extend Tablet (containing Paracetamol 665mg in modified release form) for finished import from Australia was received dated 22.06.2012 from M/s GlaxoSmithKline Pakistan Limited, 35-Dockyard Road, West Wharf, Karachi and initially considered by the Registration Board in its 243rd meeting held on 08th – 09th May, 2014. Later on, the firm revised the application from 'finished import' to 'bulk import and local repacking'. Registration Board in its 289th meeting held on 14th – 16th May, 2019 approved registration of aforementioned product such that the tablets will be imported in bulk from M/s GlaxoSmithKline Australia Pty Limited, Consumer Healthcare Division, 82 Hughes Avenue, Ermington NSW 2115, Australia and will be blistered and packed along-with final quality control release of the finished pharmaceutical product at M/s. GlaxoSmithKline Pakistan Limited, F-268 S.I.T.E, Karachi. The approval was granted on following grounds:

- Evidence of approval of applied formulation by the reference regulatory authority i.e., Therapeutic Goods Administration (TGA), Australia and confirmation of free sale status in Australia as determined from submitted legalized Certificate of Pharmaceutical Product (CoPP) for bulk labeled tablets.
- On-site Investigation by a panel comprising of Dr. Saif ur Rehman Khattak (Director, CDL, DRAP, Karachi), Dr. Najam us Saqib (Additional Director, DRAP, Karachi) and Mr. Kirshan Das (Assistant Director, DRAP, Karachi) for confirmation of Authenticity / Genuineness of stability data in final container closure system performed by M/s. GlaxoSmithKline Pakistan Limited, F-268 S.I.T.E, Karachi.

Reg. No.	**Product Name & Composition**	**Registration Trail**
097070	Panadol Extend Tablet Each modified release tablet contains: Paracetamol……665mg (USP Specifications) Bulk Import & Local Repacking	**Initial Reg. Date:** 08-07-2019 **Change of Source of Bulk Tablets dated 12- 03-2021:** From M/s GlaxoSmithKline Australia Pty Limited, Consumer Healthcare Division, 82 Hughes Avenue, Ermington NSW 2115, Australia to M/s Glaxo Welcome, S.A. Avda. Extremadura, 3, Pol. Ind. Allendeduero, Arvanda de Duero, 09400 Burgos, Spain **Change of Local Repacking Site dated 26- 10-2021**: From M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro

Information printed on label regarding management of Overdose:	In case of overdose, immediate medical management is required by visiting nearest Emergency Medical Center, even if symptoms of overdose do not appear.

Detail of Revised Application Considered in M-323-RB:

M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro has now requested for change in registration status of Panadol Extend Tablet (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to their name along-with **end to end local manufacturing**. The product is currently registered for bulk import (of tablets) from Glaxo Welcome Spain and local repacking along-with quality control release at M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro.

Evaluation report will be placed before the Registration Board during the meeting.

Decision of M-323:

Registration Board deferred the case for following reasons:

i. *Evaluation of application submitted for change in registration status of Panadol Extend Tablet 665mg (Reg. No.097070) from M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi to M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro along-with end to end local manufacturing.*
ii. *The applicant shall submit detail of measures adopted by other countries (whether RRA or non-RRA) to mitigate the risk as reported by EMA.*
iii. *The applicant shall also submit detail of practicable measures which will be adopted after grant of marketing authorization to prevent the risk of toxicity associated with over-dose of above-mentioned product.*

i. Evaluation Report:

Administrative Documents Submitted in the light of SOP approved by the Registration Board in its 283rd meeting
i. Copy of GMP certificate on the basis of inspection conducted on 15-09-2020.
ii. Copy of DML (000010) of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro renewed w.e.f. 31-03-2020.
iii. Approval of "Tablet (General) Section" confirmed from Licensing Division's letter dated 27-01-2022.
iv. NOC (dated 13-01-2022) issued by M/s. GlaxoSmithKline Pakistan Limited in the light of De-Merger order of Sindh High Court.
v. Relevant undertakings & commitments.

Evaluator: Mr. Abdul Mughees Mudassir (AD to CEO)

	Name, address of Applicant / Marketing Authorization Holder	GlaxoSmithKline Consumer Healthcare, Sandoz Nagar, Petaro road, Jamshoro, Sindh, Pakistan.

Panadol Extend Tablets are white to off-white, bi-layer, capsule-shaped, film-coated tablets with flat edges embossed with an 8 logo on the front face and plain on the back face.

Remarks OF Evaluator:	**Firm's Response:**
• GMP certificate of DS manufacturer and Invoice clearance from ADC.	• The applicant has submitted certificate of suitability of API by EDQM i.e., valid till to date along-with copy of invoice attested by ADC on 12-11-2019.

• Forced degradation studies of DS are required as the long-term stability has been performed on 25°C ± 2°C, 60%RH ± 5%.	• Not submitted yet

ii. Measures Adopted by other Countries (whether RRA or non-RRA) to mitigate the risk as reported by EMA:

The applicant has shared following information under the heading of "Risk Mitigation Measure Adopted in Finland":

Risk Minimization Measure	Purpose	Information
Implementing additional warnings on the packaging material/leaflet	Proposal by GSK: Inform and increase focus on use of paracetamol, increase focus on handling overdose. FIMEAS response: *Please provide the updated PI for assessment.* GSK CH response: *Updated SPC sections 4.4 and 4.9 is attached to this response.*	GSK CH commits to submit the next global data sheet v 7 after closure of the current ongoing GDS updates. The updated text linked to OD in v7: "the lowest dose necessary to achieve efficacy- should be used for the shortest duration of treatment." The updated sections in the FI SPC were approved by Fimea.
Education of HCPS	Proposal by GSK: Encourage HCPs to educate patients of safe use and storage of the medicine. Encourage HCPs to prescribe 48 tablet blister packs for acute cases, 96 tablets blister packs for chronic cases and 100 tablet bottles only for hospital use and dose dispensing. FIMEAS response: *Encouraging HCPS to educate patients on safe use and storage of the medicine and to prescribe 48 blister packs for acute case is not consider necessary.* *The 100 tablet bottles should be restricted to hospital use only. Only the blister packages should be available for dispensing to patients from pharmacies. The Applicant is asked to comment on this proposal.* GSK CH response: *We confirm that 100 tablet bottles will be restricted to hospital use only and that only*	GSK CH commits to send out communication to HCPs upon relaunch if the suspension would be lifted. The final Finnish DHCP communication that was accepted by Fimea was sent out to HCPs in FEB 2019.

	blister packages will be dispensed by pharmacies. We will make the necessary changes to implement this and in the meantime we will not produce or deliver any bottles. <u>Proposal by GSK:</u> Increased focus on risk of overdose. <u>*FIMEAS response:*</u> *Informing emergency department and the PIC that MR paracetamol is back on the market is essential as well as a reminder of the updated treatment guideline. The current Finnish guideline states that the nomogram should only guide treatment in case of acute intoxications and is not reliable in case of intoxication with MR products. To minimise the risk of liver damage the Applicant should send out a DHCP communication to the Finnish emergency departments and the PIC emphasizing this update of the guideline as well as the need for repeated sampling of paracetamol.*	
Patient information campaigns	<u>Proposal by GSK:</u> Inform about risk of liver damage and importance of appropriate use of paracetamol. Inform and increase focus on the importance of storing medicines safely – both at home and on the move. Help parent to have "safe medicine" conversations with their children.	GSK CH commits to roll out: "Safe storage of medicine" campaign. Guide to guidegivers regarding medication management in elderly. Parent's guide. Patient folder. Information campaign targeting young people.
Child proof packaging	<u>Proposal by GSK:</u> Limit accessibility for children with child resistant packages. <u>*FIMEAS response:*</u> *Will GSK implement child resistant blister packaging? And if so, the Applicant is asked to give an estimate of the timetable for this implementation.*	GSK CH is committed to implementing child resistant packaging on all their products. CRSF foil is implemented for all the registered pack types.

Furthermore, the applicant has also shared a review article on ***"Updated guidelines for the management of paracetamol poisoning in Australia and New Zealand"*** (https://pubmed.ncbi.nlm.nih.gov/31786822/)

iii. <u>Measures to prevent the risk of overdosing after grant of marketing authorization:</u>

<u>PANADOL EXTEND TABLETS - OVERDOSING PREVENTION</u>

Following are the practicable measures which will be adopted to prevent the overdosing risk of paracetamol through our product:

Globally we are mitigating the risk of overdose associated with all paracetamols' containing products including modified-release paracetamol through routine risk minimisation measures that includes product's labelling (GDS), the company's signal management activities and a targeted follow-up questionnaire (TFUQ) for medically confirmed spontaneous reports of liver or hepatobiliary adverse events in the context of paracetamol overdose. Also, our routine pharmacovigilance practices include:

- Established processes for the collection and as required, notification of any adverse events occurring anywhere in the world.
- Established processes for the regular and systematic review of ongoing safety data relating to its pharmaceutical products.

This employs a routine, pro-active process for identifying safety signals with four main components:

A. Ongoing awareness and review of important individual cases, including all reports with a fatal outcome.
B. Systematic, regular and proactive review of aggregate safety data. This includes trend analysis to detect increased frequency of reporting and, qualitative and quantitative methodologies to detect safety signals.
C. Systematic, regular review of the literature.
D. Starting 22 Feb 2018, regular review of data from EudraVigilance, the pharmacovigilance database of the EMA, for products included in EMA's list of medicines under additional monitoring as of 25 Oct 2017. Note that paracetamol is not included in EMA's list of medicines under additional monitoring.

Also, the TFUQ includes a comprehensive set of questions aimed at capturing specific and pertinent details regarding the potential paracetamol overdose such as: patient demographics, whether the patient was hospitalised, the quantity of paracetamol taken, the type of packaging, details about any other drugs ingested and quantities, whether treatment with N-acetylcysteine was given, details of any relevant laboratory results including serum paracetamol levels, N-acetyl-p-benzoquinoneimine and glutathione levels etc. Potential safety issues identified from non-clinical studies, clinical trials, individual case reviews, signal detection and data mining activities, Periodic Benefit Risk Evaluation Report/Periodic Safety Update Reports, from regulatory queries or other sources are carefully evaluated. Adverse drug reactions identified during these reviews are incorporated into the Core Safety Information for paracetamol and subsequently reflected in local country labelling.

On the basis of above locally we have following in place and in process:

1. Updated Patient information leaflet with paracetamol overdosing.
2. We have safety contact, and one may reach out to us through published e-mail and telephone numbers on our product's labelling and packaging.
3. We will establish website and upload right dosing and overdosing information for both healthcare professionals (HCPs) and patients.
4. Our on-ground expert team will reach out hospitals and provide related literature, educate on right dosing and overdosing.
5. In UK we have a website for patient awareness on different products www.letstreatitright.com we will develop one such for Pakistan and see the utility for HCPs and Patients.

In addition to above-mentioned information, the firm has also shared the following statistics regarding overdose instances reported globally with respect to paracetamol containing product:

Data Collected Globally Regarding Overdose Instances of Paracetamol Containing Products:

a. Since, Panadol Extend Tablet was launched, no complaints have been received with respect to formulation safety and no healthcare professional has raised any concern; in fact, this is currently the most in-demand product due to its efficacious nature and ease of administration.
b. Due to proper product labelling w.r.t. its indication, dosage and maximum daily intake quantity, no cases of overdosing or misuse of the product have been reported and nothing was communicated by authorities either.
c. From July 1, 2020, to December 31, 2022, a total of 46 overdose instances of Paracetamol products were reported globally as mentioned below in the country-wise table. Out of these, 20 were paracetamol combination products and junior, or children's, range products of paracetamol. Two of the remaining 26 cases are of Panadol Osteo, which is an SR formulation, while the rest are reported from the source countries as adult Paracetamol overdose cases.

Country	Count of Case Number
Australia	14
Sweden	6
Turkey	5
Spain	3
Denmark	2
Peru	2
United Kingdom	2
Canada	1
Russian Federation	1

Finland	1
China	1
South Africa	1
Colombia	1
Sri Lanka	1
New Zealand	1
France	1
Costa Rica	1
Hong Kong	1
India	1
Grand Total	**46**

d. Further dissecting the provided data with the available information of below 26 cases, global overdose instances were less than 26 during the last 30 months, as it includes some reported countries where Paracetamol SR formulation is not on the market. Out of these, 11 are reported as serious cases, and most were reported during the peak COVID period, where healthcare professionals' (HCP) accessibility was compromised.

Country	**Count of Case Number**
Australia	7
Sweden	3
Turkey	5
Spain	1
Denmark	1
United Kingdom	1
Finland	1
China	1
South Africa	1
Colombia	1
New Zealand	1
Costa Rica	1
Hong Kong	1
India	1
Grand Total	**26**

e. As a result, the proposal to educate HCPs and patients via different modes, highlighting the maximum daily intake, warnings and precautions of this formulation are helpful in ensuring its safe use in the local market.

Proceedings of M-326th Meeting:

i. Mr. Abdul Mateen, Deputy Director (Division of Pharmacy Services, DRAP) apprised the Board that the firm has merely reported number of overdose instances regardless of submitting complete case reports. Furthermore, keeping in view the practices adopted by different RRAs/ Non- RRAs, following proposals were also placed for consideration of Registration Board:

a. Possibility for change in prescription status of Panadol Extend Tablet in Pakistan from OTC to prescription only medicine; Or to be sold through pharmacies only across Pakistan *"Pharmacist only"*.
   - Or the firm should be asked about the legal status (OTC, prescription or pharmacist only) in all countries where the drug is registered/marketed.

b. Warning on outer carton/pack regarding the risk
   - Reference: Public assessment report of EMA (Page 24)

   https://www.ema.europa.eu/en/documents/referral/paracetamol-article-31-referral-prac-assessment-report_en.pdf

c. Reduction in pack size of OTC product or the firm should be asked to submit detail of pack size in all the countries where the drug is registered/marketed both for prescription and OTC product.
   - 12 caplets in Malaysia and EMA public assessment report (https://www.panadol.com/en-my/adult-products/panadol-extend/
   - Australia has decided to reduce the OTC pack size to 16 from 20 (https://www.tga.gov.au/resources/publication/scheduling-decisions-interim/interim-decision-paracetamol-access-controls-poisons-standard-questions-and-answers)

- 18 in Singapore (https://www.panadol.com/en-sg/products/adult/muscle-and-joint-pain-relief/panadol-extend.html)
- 18 in Egypt (https://www.panadol.com/en-eg/products/adult-products/panadol-joint.html)

d. Educational tool for healthcare professionals and patients for reduction of risk of overdose toxicity.

ii. Dr. Ayesha Yaqoob, Govt. Analyst, DTL, Rawalpindi apprise that Board that DTL, Rawalpindi receive some samples from the market, which show different manufacturing sites / MA Holder. Accordingly, the case was taken up by the PQCB regarding availability of 3/three different types of packs of Panadol Extend Tablet in the market.

Decision: Registration Board deferred the case on following grounds:

i. The applicant shall submit following information/ documents for further deliberation by the Board:

a. Stability studies of active substance (API) as per conditions of Zone IV-A or/otherwise submission of requisite information/ documents as already decided by the Registration Board in its 290th meeting under *"Requirement of The Storage Conditions for The API Stability and FPP Stability".*

b. Reports of Pharmaceutical Equivalence and Comparative Dissolution Profile Study performed against the innovator's product.

c. Justification for adopting USP specifications with reference to following claim of innovator's product regarding release profile:

USP Dissolution Test 1		**Claim of Innovator's Product (regarding release profile)**
Time	**Amount Dissolved**	**MR paracetamol tablets are constructed in <u>two layers</u>, an IR layer that is absorbed rapidly (similar to standard paracetamol formulations) and a sustained release layer which allows for the gradually release of paracetamol from tablet <u>over a period of 8 hours.</u>**
15min	**45%-65%**	
1h	**60%-85%**	
3h	**NLT 85%**	

ii. Existing registration holder i.e., M/s GlaxoSmithKline Pakistan Limited, F-268, S.I.TE. Karachi (DML No.000233) shall submit NOC (issued within 6 months) for grant of same brand name in favour of M/s GSK Consumer Healthcare Pakistan Limited, Petaro Road Jamshoro (DML No.000010) along-with a request for withdrawal/ cancellation of registration of Panadol Extend Tablet (R#097070).

iii. The firm shall submit the details of its pharmacovigilance system in line with guidelines issued by DRAP regarding the reporting of any ADR/ADE. The firm shall report any ADR/ADE accordingly.

iv. Educational tool to be adopted for healthcare professionals and patients to reduce the risk of toxicity associated with overdose

v. All the provincial health departments shall be requested to report any case/incidence regarding the Panadol Extend Tablet to the Quality Assurance Division DRAP.

<u>Post Registration-I Section</u>

7.	109734	Baydal Tablets

The details of the sites are as under:

DMl Site	DSL Site	Manufacturing Site
DML No. 000243 Bayer Pakistan Pvt Ltd Plot No. 108, Quaid-e-Azam Industrial Esate, Kot Lakhpat, Lahore Pakistan	DSL No. 01. Bayer Pakistan Pvt Ltd. Plot No. 23 Sector No. 22, Korangi Industrial Area, Karachi 74900, Pakistan	Manufacturing site shall remain same i.e M/s Novartis pharma, C-21, S.I.T.E Karachi

Registration Board decided as follows:

"Registration Board deferred the case for opinion of Legal Affairs Division whether clause (c) of Rule 20A of Drugs (Licensing, Registration and Advertising) Rules, 1976 is also applicable for already registered drug products of such firm in Pakistan on its DML and now firm has requested for registration on DSL basis."

Accordingly, the case was referred to Legal Affairs Division and they furnished the following opinion:

"This Division is of considered view that these drug products are registered in the name of M/s Bayer Pakistan for local manufacturing as a licensee of DRAP. The validity of registered products for local manufacturing is, inter alia, dependent on validity and ownership of drug manufacturing license. As soon as the drug manufacturing license is transferred to another entity, the earlier licensee would not be able to hold registration of products. It is clear that a foreign pharmaceutical company (like Bayer) having drug sale license may enter into contract manufacturing of its research, innovator, originator drug products or drug products already registered for sale by any reference regulatory authority under rule 20A(1)(c) of the 1976 rules. In such a case the company (DSL holder) has to apply for registration of products a fresh for entering into contract manufacturing with any DML holder."

The said opinion has already been communicated to the firm for compliance. Submitted for information and consideration of Board please.

Decision: The Registration Board, in light of opinion of Legal Affairs Division (as already communicated to them) advised M/s Bayer Pakistan Limited, Lahore (DSL holder) to apply for registration of imported products a fresh for entering into contract manufacturing with any DML holder as per the contract manufacturing prescribed under the rule 20(A) of Drugs (Licensing, Registering and Advertising) Rules, 1976 amended through SRO 1347(1) 2021 dated 15th October, 2021.

Division of Quality Assurance & Laboratory Testing

RELAXATION IN LABELING AND PACKING REQUIREMENYTS FOR AMPOULES HAVING CAPACITY OF 2ML OR LESS UNDER DRUGS (LABELLING AND PACKING) RULES 1986.

This is with reference to the request of M/s Friends Glass Pvt Ltd Swabi regarding difficulties in printing of art work on glass ampoules having capacity of 1ml and printing material is so huge that it is not visible with naked eyes and it is more difficult when it comes to printing the same matter on the ampoules.

2. It is submitted that the Rule 3 of The Drugs (Labelling and Packing) Rules, 1986 that deals with labelling requirements is as under: -

(3) Manner of Labelling:

The following particulars shall appear either in print or in writing in indelible ink in a conspicuous manner on a label of the innermost container of drug and also on the in which such container is packed namely: -

(a) The registered name of the drug;

(b) If the registered name is a proprietary name, then immediately following the registered name, the international non-proprietary name, and if no such non-proprietary name is known the Pharmacopoeial name or any other name, if any, approved by the registration board for this purpose in conspicuous manner;

(c) The international non-proprietary name of the pharmacopoeial name of the generic name, and if no such name is known the chemical name of each active ingredient of a drug with weight.

Added by SRC 1122 (i) 86 dated 23-12-1986 Manual of Drug Laws or measures in metric system, or the number of units of activity as the cause may be, expressed: - (i) In the case of oral liquid preparations in terms of contents per specified volume, the volume being indicated in militaries; (ii) In the case of liquid parenteral preparations ready for administration in terms of militaries or percentage by volume or dose. Provided that in the case of a preparation contained in ampoule, it shall be sufficient if the ingredients are shown on the label or wrapper affixed to any

package in which such ampoule is issued for sale. (iii) In the case of drugs in solid form intended for parenteral administration in terms of weight or unit per milligram or gram or per container. (iv) In the case of tablets, capsules pill or other units as the case may be; and (v) In the case of other preparations in terms of percentage by weight or volume or unit-age per gram or milliliter as the case may be;

(d) The name and principal place of business of the manufacturer

(e) The drug manufacturing license number.

(f) The drug registration number.

(g) The date of expiry.

(h) Urdu version of the following namely;

(i) Name of drug (ii) dosage; and (iii) Instructions;

(i) The distinctive batch number date of manufacture and the maximum retail price;

Provided that in the case of a drug packed in a strip of paper or blister or foil or contained in an ampoule of a capacity of not more than two milliliter or in an ampoule containing a sterile suture or ligature and such strip foil blister or ampoule is placed in other package and also in the case of printed collapsible tubes it shall be sufficient to give the information on the outer packing containing such strips, foils, blister or ampoule.

Provided further that the registration board may allow relaxation of any of these conditions.

3. It is submitted that drug contained in an ampoule having capacity of not more than 2ml have space constrains to print all the information on the ampoule, furthermore, as per Rule 3 of The Drugs (Labelling and Packing) Rules, 1986 the Registration Board is empowered to allow relaxation of any of labelling and packing conditions.

4. In light of above it is proposed that we may allow the ampoules of capacity of 2ml or less to contain following minimum information: -

i. The registered name of the drug;
ii. If the registered name is a proprietary name, then immediately following the registered name, the international non-proprietary name, and if no such non-proprietary name is known the Pharmacopoeial name or any other name, if any, approved by the registration board for this purpose in conspicuous manner;
iii. The international non-proprietary name of the pharmacopoeial name of the generic name, and if no such name is known the chemical name of each active ingredient of a drug with weight.
iv. The name of the manufacturer
v. The drug manufacturing license number.
vi. The drug registration number.
vii. The date of expiry.
viii. Urdu version of the following namely; (i) Name of drug
ix. The distinctive batch number and the maximum retail price;

Proceedings and Decision of 326th Meeting of Registration Board.

The Board after considering the facts of the case and after thorough deliberations and technical discussion keeping in view of small size of the ampoule which is difficult to print and read, in light of provision of Section 3 of Drugs (Labelling and Packing) Rules 1986 decided following minimum particulars shall appear in print or in writing in indelible ink in a conspicuous manner on the ampoules of capacity of 2ml or less: -

i. Registered name of drug both in Urdu and English version.
ii. International non-proprietary name or Pharmacopoeial name or generic name as the case may be.
iii. DML number.
iv. Registration Number.
v. Expiry Date.
vi. Batch No.
vii. Company Name with District of its Location. (Complete address such as street No., plot etc may be relaxed e. g X (Company), plot No. Y Street Z, ABC Industrial area, Islamabad may be written as X, Islamabad)

However, on the outer packing all the information as required under Drugs (Labelling & Packing) Rules 1986 must appear in print or in writing in indelible ink in a conspicuous manner.
