	Brand Name +Dosage Form + Strength	Mili Alben 10% Drench
	Composition	Each ml Contains: Albendazole…100mg
	Diary No. Date of R& I & fee	Dy.No 28434 dated 15-10-2021 Rs.30,000/- dated 14-10-2021 (slip No. 890469735418)
	Pharmacological Group	Anthelmintic
	Type of Form	Form 5
	Finished product Specification	USP specifications
	Pack size & Demanded Price	50ml, 100ml, 250ml, 500ml and 1000ml: Decontrolled
	Me-too status	Albatop-10% Drench of M/s Wimits Pharmaceuticals, Lahore (Reg. No. 078334)
	GMP status	Panel inspection report recommended for grant of new DML based on inspection conducted on 09-10-2020 and 23-04-2021.
	Remarks of the Evaluator [X]	**Oral Liquid section (Veterinary)** confirmed from panel inspection report for grant of new DML based on inspection conducted on 09-10-2020 and 23-04-2021.
	Decision: Approved.	
558.	Name and address of manufacturer / Applicant	M/s Bio Labs Pvt Ltd., Plot # 145, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name +Dosage Form + Strength	Predex Injection 10ml and 50ml
	Composition	Each ml Contains: **Prednisolone Acetate**…7.5mg **Dexamethasone as Sodium Phosphate**…2.5mg
	Diary No. Date of R& I & fee	Dy.No 24722 dated 07-09-2021 Rs.30,000/- dated 02-09-2021 (slip No. 09534344)
	Pharmacological Group	
	Type of Form	Form 5
	Finished product Specification	Manufacturer's specifications

	Pack size & Demanded Price	10ml and 50ml: Decontrolled
	Me-too status	
	GMP status	cGMP certificate dated 28-02-2022 based on inspection dated 03-08-2021
	Remarks of the Evaluator [X]	**Shortcomings:** • Approval of **relevant manufacturing facility** by the Central Licensing Board. • Revise Form-5 along with its enclosures since Predex injection (**Prednisolone Acetate…7.5mg/ml and Dexamethasone as Sodium Phosphate…2.5mg/ml)** is mentioned on cover letter while Clarification regarding the applied formulation and demanded pack size is required • Separate registration is granted to separate pack size/fill volume of injectable dosage form. However, both 50ml and 10ml pack sizes of injectable dosage form are demanded in a single application. So clarification is required for which pack size/ fill volume you want to apply this dossier. • Accordingly provide evidence of applied formulation/drug already approved by DRAP (generic / me-too status) alongwith registration number, brand name and name of firm.
	Decision: Deferred for following: **i. Me too Status.** **ii. Confirmation of facility for Injecatble Steroids (Veterinary)**

Agenda of Evaluator PEC-XI

Case No. 1: Registration applications of Human Drugs on form 5F (New DML):
M/s Pinnacle Biotech (Pvt.) Ltd. Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi
The Central Licensing Board in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following three sections to **M/s Pinnacle Biotech (Pvt.) Ltd.,** Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi under Drug Manufacturing License No. 000939 by way of Formulation vide approval letter No. F. 2-10/2011-Lic(Vol-I) dated 13th September 2021. The Drug Manufacturing License No. 000939 by way of

formulation is hereby issued w.e.f. 13-09-2021.

S No.	Name of Sections
1.	Tablet (General)
2.	Capsule (General)
3.	Sachet (General)
4.	Research & Development Laboratory

Following applications have been submitted for registration by the firm.

713.	Name, address of Applicant / Marketing Authorization Holder	M/s Pinnacle Biotech (Pvt.) Ltd. Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi.
	Name, address of Manufacturing site.	M/s Pinnacle Biotech (Pvt.) Ltd. Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of cGMP certificate issued on 21-10-2022 based on inspection conducted on 21-10-2022.
	Evidence of approval of manufacturing facility	New license granted vide letter No. F. 2-10/2011-Lic(Vol-I) dated 13/09/2021. Tablet (general), Capsule (general), Sachet (general) and Research and Development Laboratory section is approved.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy.No 2986 dated 01-02-2023
	Details of fee submitted	Rs.30,000/- dated 18-01-2023 (Deposit slip#4595632206)
	The proposed proprietary name / brand name	**Azijet 500mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Azithromycin Dihydrate equivalent to azithromycin……500mg
	Pharmacotherapeutic Group of (API)	Tablet
	Pharmaceutical form of applied drug	Macrolide Antibiotics
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ZITHROMAX 500mg film-coated tablets, USFDA Approved.
	For generic drugs (me-too status)	Zetro 500mg Tablet by M/s Getz Pharma (Reg#53120)
	Name and address of API manufacturer.	M/s Huangshi Shixing Pharmaceutical Co., Ltd., No. 73 East Jinshan Road, Huangjinshan Development Zone, Huangshi, Hubei, P.R. China

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verifications, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data as per zone IV-A. Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH 6 months Batches: C0802-201909002, C0802-201909001, C0802-201909003
	Module-III Drug Product:	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Azomax 500mg tablet by M/s GSK Consumer Healthcare Pakistan Limited (mfgr) / Novartis Pharma (MAH) by performing quality tests (Identification, average weight, disintegration time, uniformity of dosage units, dissolution, assay) CDP has been performed against the product Azomax 500mg tablet by M/s Sandoz in Phosphate buffer (pH 4.5), Phosphate buffer (pH 6.0) & Phosphate Buffer (pH 7.5). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability) and Specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Huangshi Shixing Pharmaceutical Co., Ltd., No. 73 East Jinshan Road, Huangjinshan Development Zone, Huangshi, Hubei, P.R. China
API Lot No.	C0802-202111007
Description of Pack (Container closure system)	Alu-alu Blister strip packed in unit carton
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Batch No.	T-057	T-056	T-053
Batch Size	1500 Tab	1500 Tab	1500 Tab
Manufacturing Date	19-05-2022	19-05-2022	17-05-2022
Date of Initiation	01-06-2022	01-06-2022	01-06-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted written confirmation for active substance exported to EU to M/s Huangshi Shixing Pharmaceutical Co., Ltd., No. 73 East Jinshan Road, Huangjinshan Development Zone, Huangshi, Hubei, P.R. China issued by Hubei Medical Products Administration valid upto 1st June 2025. The certificate confirms that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices. Firm has submitted copy of DML (E20200125) in name of M/s Huangshi Shixing Pharmaceutical Co., Ltd., No. 73 East Jinshan Road, Huangjinshan Development Zone, Huangshi, Hubei, P.R. China issued by Hubei Drug Administration valid upto 28th September 2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.4	• Justification is required for setting assay specification of drug substance on "dried basis instead of anhydrous basis" by drug product manufacturer with reference to recommendations of USP monograph. • Submitted analytical method verification report declares the details for "Azithromycin 500mg tablets".	• The firm submitted that in specification and testing method Assay limits is 94.5% to 103.0% that is same as per USP monograph and mentioned in analytical raw data report and Certificate of Analysis. The firm submitted that rectification of dried basis has been made and Fees has been submitted against typographical error having challan No. 888753469724 of Rs.7500/- • The firm submitted that Azijet is a suggested brand name and Azithromycin is a generic. We have performed the verification on Azijet 500mg tablet and there is no difference in product "Azijet" and "Azithromycin".

3.2.P.1	• You have used dibasic phosphate anhydrous in your formulation instead of dibasic calcium phosphate anhydrous clarify?	We have use Dicalcium phosphate anhydrous. It is same as dibasic calcium phosphate anhydrous having same (CAS NO: 7757-93-9), against GRN: RM2122 COA of material is submitted
3.2.P.2	• Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product • Selection of dissolution media (phosphate buffer pH 4.5, pH 6, pH 7.5) in CDP studies shall be justified with reference to applicable guidelines • Clarification is required as the submitted details show that the reference product against which pharmaceutical equivalence and CDP studies is performed is from two different supplier	• Image/picture/ snap shot of innovator/reference/comparator pack is submitted. • The firm submitted that for stability testing, the dissolution media pH 6.0 phosphate buffer is used that is recommended by USP. While for CDP 3 different pH dissolution media used that is 0.1M phosphate buffer, pH 4.5, 0.1M phosphate buffer pH 6.0 and 0.1M phosphate buffer pH 7.5. Reference of selection of this 3 pH is "Clinical Pharmacology and biopharmaceutics review application number 50-784". CDP has been performed with reference to this guideline. • Pharmaceutical equivalence and CDP performed against same reference product that is Azomax 500mg tablet. Details are provided. Azomax 500mg tablet Manufactured for: Novartis Pharma (Pakistan) Limited By M/s GSK Consumer Healthcare Pakistan Limited Jamshoro Sandoz a Novartis Division
3.2.P.5	• Justification is required for not mentioning the time for dissolution test in finished product specifications as recommended by USP. • Justification is required for not including the test for uniformity of dosage unit in finished product specification as recommended by USP	• The firm submitted that dissolution time is 30minutes and is mentioned in analytical testing method and it is now mentioned in specification as well. Revised Specification and testing method is submitted. • The firm submitted that uniformity of dosage unit by weight variation already mentioned in finished product specification and submitted finished product specifications.
3.2.P.8	• Documents for the procurement of API with approval from DRAP is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted	• Firm has submitted copy of invoice dated 09-12-2021 for import of 04kg of Azithromycin Dihydrate in name of M/s Pinnacle Biotech (Pvt.) Ltd attested by AD (I&E) DRAP Karachi dated 28-12-2021. Firm has also submitted copy of form 6 dated 28-12-2021 for import of 04kg of Azithromycin Dihydrate in name of M/s Pinnacle Biotech (Pvt.) Ltd attested by AD (I&E) DRAP Karachi dated 28-12-2021. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Decision: Approved. Registration letter will be issued after submission of CDP studies in three physiological medias (i.e. 0.1N HCl pH 1.2, Acetate Buffer pH 4.5 and Phosphate Buffer pH 6.8)

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verifications, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance	Firm has submitted stability study data as per zone IV-

	(Conditions & duration of Stability studies)	A. Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH 6 months Batches: C0802-201909002, C0802-201909001, C0802-201909003
	Module-III Drug Product:	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Azomax 250mg tablet by M/s GSK Consumer Healthcare Pakistan Limited (mfgr) / Novartis Pharma (MAH) by performing quality tests (Identification, average weight, disintegration time, uniformity of dosage units, dissolution, assay) CDP has been performed against the product Azomax 250mg capsule by M/s Sandoz in Phosphate buffer (pH 4.5), Phosphate buffer (pH 6.0) & Phosphate Buffer (pH 7.5). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability) and Specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Huangshi Shixing Pharmaceutical Co., Ltd., No. 73 East Jinshan Road, Huangjinshan Development Zone, Huangshi, Hubei, P.R. China		
API Lot No.	C0802-202111007		
Description of Pack (Container closure system)	Alu-alu Blister strip packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-050	T-060	T-061
Batch Size	1500 capsule	1500 capsule	1500 capsule
Manufacturing Date	14-05-2022	14-05-2022	21-05-2022
Date of Initiation	01-06-2022	01-06-2022	01-06-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted written confirmation for active substance exported to EU to M/s Huangshi Shixing Pharmaceutical Co., Ltd., No. 73 East Jinshan Road, Huangjinshan Development Zone, Huangshi, Hubei, P.R. China issued by Hubei Medical Products Administration valid upto 1st June 2025. The certificate confirms that the manufacturing plant complies with

		requirement of Chinese Good Manufacturing practices. Firm has submitted copy of DML (E20200125) in name of M/s Huangshi Shixing Pharmaceutical Co., Ltd., No. 73 East Jinshan Road, Huangjinshan Development Zone, Huangshi, Hubei, P.R. China issued by Hubei Drug Administration valid upto 28th September 2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• Justification is required for not considering the hydrated form in label claim	The firm has revised the label claim as per reference formulation considering the hydrated form along with submission of Rs. 30000/- on deposit slip No#7210225081. The revised label claim is as under: Each Capsule Contains: Azithromycin Dihydrate equivalent to azithromycin……..250mg
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.4	• Justification is required for setting assay specification of drug substance on "dried basis instead of anhydrous basis" by drug product manufacturer with reference to recommendations of USP monograph. • Submitted analytical method verification report declares the details for "Azithromycin 500mg tablets".	• The firm submitted that in specification and testing method Assay limits is 94.5% to 103.0% that is same as per USP monograph and mentioned in analytical raw data report and Certificate of Analysis. The firm submitted that rectification of dried basis has been made and Fees has been submitted against typographical error having challan No. 7869667766 of Rs.7500/- • The firm has submitted Azijet is a suggested brand name and Azithromycin is a generic. We have performed the verification on Azijet 250 Capsules and there is no difference in product "Azijet" and "Azithromycin."
3.2.P.1	• Justify the role of purified water used in the applied formulation, clarify?	Purified water is used as a solvent for binder solution preparation.
3.2.P.2	• Finished Pharmaceutical development report for Aziject 500mg tablet is submitted instead of Aziject 250mg capsule, clarify? • Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name,	• Finished Pharmaceutical development report for Azijet 250mg Capsules is submitted. Pharmaceutical development report for Aziject 500mg tablet is attached by mistake • Image/picture/ snap shot of innovator/reference/comparator pack is submitted. • The firm submitted that for stability testing, the dissolution media pH 6.0 sodium dihydrogen

	manufacturer, batch# and expiry date of the innovator /reference/comparator product • Selection of dissolution media (phosphate buffer ph 4.5, ph 6, ph 7.5) shall be justified with reference to applicable guidelines • Clarification is required as the submitted details show that the reference product against which pharmaceutical equivalence and CDP studies is performed is from two different supplier	orthophosphate buffer is used that is recommended by BP. While for CDP 3 different pH dissolution media used that is 0.1M phosphate buffer, pH 4.5, 0.1M phosphate buffer pH 6.0 and 0.1M phosphate buffer pH 7.5. Reference of selection of this 3 pH is "Clinical Pharmacology and biopharmaceutics review application number 50-784". CDP has been performed with reference to this guideline. • Pharmaceutical equivalence and CDP performed against same reference product that is Azomax 250mg capsule. Details are provided. Azomax 250mg capsule Manufactured for: Novartis Pharma (Pakistan) Limited By M/s GSK Consumer Healthcare Pakistan Limited Jamshoro Sandoz a Novartis Division
3.2.P.5	• Justification is required for using BP specification for drug product while drug substance is analyzed as per USP monograph by drug substance manufacturer and drug product manufacturer • Justification is required for not mentioning the time for dissolution test in finished product specifications as recommended by BP. • In batch analysis in column of quantity 1500 tablets are written instead of capsule, clarify	• The firm submitted that according to USP monograph of Azithromycin Capsule "Amperometric electrochemical detector" is required that we don't have this detector so, we have adopted BP monograph for capsule analysis in which UV detector is used. • The firm submitted that dissolution time is 45minutes and is mentioned in analytical testing method and it is now mentioned in specification as well. Revised Specification and testing method is submitted. • The firm submitted that in Analytical Raw Data 1500 capsules mentioned while in the certificate of analysis it was mistakenly written 1500 tablets. The firm has submitted revised COA. Fees Rs.7500/- has been submitted against typographical error having challan No. 54963436130.
3.2.P.6	• The submitted COA of reference / working standard follow USP specifications while finished drug product follow BP specifications	We have procured one Reference standard that is of USP. So we utilize USP reference standard to standardize the working standard and that same working standard used for finished drug product analysis.
3.2.P.8	• Documents for the procurement of API with approval from DRAP is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted	• Firm has submitted copy of invoice dated 09-12-2021 for import of 04kg of Azithromycin Dihydrate in name of M/s Pinnacle Biotech (Pvt.) Ltd attested by AD (I&E) DRAP Karachi dated 28-12-2021. Firm has also submitted copy of form 6 dated 28-12-2021 for import of 04kg of Azithromycin Dihydrate in name of M/s Pinnacle Biotech (Pvt.) Ltd attested by AD (I&E) DRAP Karachi dated 28-12-2021. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Decision: Deferred for submission of following:

- **CDP studies in three physiological medias (i.e. 0.1N HCl pH 1.2, Acetate Buffer pH 4.5 and Phosphate Buffer pH 6.8)**
- **Justification for use of USP reference / working standard for analysis of product that follow BP specifications**

- **Analysis of drug substance as per BP monograph by drug product manufacturer**
- **Registration Board further decided that firm shall submit the fee of Rs. 7,500/- for correction/pre-approval change (typo error), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Case No. 2: Registration applications of Human Drugs on form 5F (New DML):

M/s Carer Pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat.
The Central Licensing Board in its 278th meeting held on 10th-11th December, 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five sections to M/s, Carer Pharmaceuticals Industries Plot # 27, Main Road, Rawat Industrial Estate, Rawat under Drug Manufacturing License No. 000925 by way of Formulation vide approval letter No. F. 1-32/2016-Lic dated 07th June 2021. The Drug Manufacturing License No. 000925 by way of formulation is hereby issued w.e.f. 18-03-2021.

S No.	Section
1.	Capsule Section (General) Section
2.	Dry Powder Suspension (General) Section
3.	Sachet (General) Section
4.	Ampoule (General) Section
5.	Tablet (General) Section

Following applications have been submitted for registration by the firm.

715.	Name, address of Applicant / Marketing Authorization Holder	M/s Carer Pharmaceuticals Industries., Plot No. 27 Main Road, Rawat Industrial Estate, Rawat
	Name, address of Manufacturing site.	M/s Carer Pharmaceuticals Industries., Plot No. 27 Main Road, Rawat Industrial Estate, Rawat
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	New license granted on 07/06/2021
	Evidence of approval of manufacturing facility	New license granted vide letter No. F. 1-32/2016-Lic dated 07/06/2021. Tablet (general), Capsule (general), Sachet (general), dry powder suspension (general) and ampoule (general) sections are approved.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy.No 13767 dated 02-06-2023
	Details of fee submitted	Rs.30,000/- dated 02-06-2023 (Deposit slip#84353931118)
	The proposed proprietary name / brand name	**Caraflox 500mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Levofloxacin (as Hemihydrate)……..500mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Fluoroquinolones
	Reference to Finished product specifications	USP

	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LEVAQUIN 500mg film coated tablets, USFDA approved *Discontinued**Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons*** Levofloxacin 500mg film-coated tablets MHRA Approved
	For generic drugs (me-too status)	Leflox 500mg Tablet by M/s Getz Pharma (Reg#26163)
	Name and address of API manufacturer.	M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., Economic Development Zone of Sanmen County, Zhejiang 31700, P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (DC-0401-1203001, DC-0401-1203002, DC-0401-1203003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for their product against product Leflox 500mg tablet by M/s Getz Pharma by performing quality tests (Identification, uniformity of dosage units, disintegration test, dissolution, assay) CDP has been performed against the product Leflox 500mg tablet by M/s Getz Pharma in acidic media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability).

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of cGMP certificate of M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., Coastal Industrial city, Pubagang town, Sanmen County, Zhejiang China issued by China Food & Drug Administration valid upto 15-08-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate for import of 05kg Levofloxacin Hemihydrate from M/s Zhejiang East Asia Pharmaceutical Company., Ltd China attested by AD (I&E) DRAP Islamabad dated 11-05-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required • Address mentioned on submitted GMP certificate is different than that given in section 1.6.5	• The firm has submitted copy of DML (License#20000312) of M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., Coastal Industrial city, Pubagang town, Sanmen County, Zhejiang China valid upto 07-10-2024 verified from NMPA website. • The firm has corrected address in section 1.6.5 as per DML: M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., Coastal Industrial city, Pubagang town, Sanmen County, Zhejiang 317100, P.R., China
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	• Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.4	• Signed copies of drug substance specifications by drug product manufacturer shall be submitted • Result for specificity test are not submitted in method verification study	• Signed copies of drug substance specifications by drug product manufacturer is submitted • Result for specificity test is submitted in method verification study

	• Test for specific rotation is not performed in batch analysis by drug product manufacturer as recommended by USP	• Firm has submitted revised batch analysis report of drug substance in which Test for specific rotation is performed
3.2.P.2	• Justification shall be submitted for not performing pharmaceutical equivalence and CDP studies against the innovator product • Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product	• The firm submitted that CDP has been performed with comparator pack (Leflox 500mg tablets) due to unavailability of innovator's pack • Image/picture/snapshot of innovator /reference/comparator against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed is submitted
3.2.P.5	• Justification is required for not mentioning the number of USP test used for dissolution study • The rpm used in dissolution study (50rpm) is different than that recommended by USP monograph (75rpm) • Result for specificity test are not submitted in method verification study	• The firm has submitted revised analytical method mentioning USP test 1 for dissolution test. • The firm submitted mentioned was a typing mistake and now rpm used in dissolution study is corrected as per USP monograph (75rpm). • Result for specificity test in method verification study is submitted
3.2.P.8	• The batch size of applied formulation is neither mentioned in batch analysis nor in stability summary sheets clarify? • The submitted UV spectra does not depict the batch number or dosage form of applied formulation	• The firm submitted that batch size is mentioned now in batch analysis report and revised batch analysis report is submitted • The firm submitted that UV spectra was software generated report now batch No. and strength of product added

Decision: Approved:

- **Fee of Rs. 7,500/- for correction/pre-approval change (typo error), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Registration Board directed the QA division to conduct the GMP inpevction during active production.**

Case No. 3: Registration applications of Human Drugs on form 5F (New DML):

M/s Pasteur & Fleming Pharma Plot No. P-70-A, Road No. 04, Phase 3, Industrial Estate Hattar, KPK**.** The Central Licensing Board in its 283rd meeting held on 28th October, 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five sections to **M/s Pasteur & Fleming Pharma** Plot No. P-70-A, Road No. 04, Phase 3, Industrial Estate Hattar, KPK under Drug Manufacturing License No. 000945 by way of Formulation vide approval letter No. F. 3-1/2017-Lic dated 11th November 2021. The Drug Manufacturing License No. 000945 by way of formulation is hereby issued w.e.f. 10-11-2021.

S No.	Name of Sections
1.	Tablet (Hormone)
2.	Tablet (General)
3.	Capsule (General)
4.	Dry Powder Suspension (General)
5.	Cream/Ointment Section (General)

Following applications have been submitted for registration by the firm.

716.	**Name, address of Applicant / Marketing Authorization Holder**	**Pasteur & Fleming Pharma, Plot # P-70-A, Phase–III, Road No.4, Industrial Estate Hattar KPK.**
	Name, address of Manufacturing site.	Pasteur & Fleming Pharma, Plot # P-70-A, Phase–III,

		Road No.4, Industrial Estate Hattar KPK.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML issued on 11-11-2021
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 11-11-2021 specifying Capsule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy.No 11784 dated 15-05-2023
	Details of fee submitted	Rs.30,000/- dated 06-04-2023 (Deposit slip#625437102309)
	The proposed proprietary name / brand name	**Loxit 30mg Capsules**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Duloxetine HCl enteric coated pellets (17%) eq. to Duloxetin……..……30mg
	Pharmacotherapeutic Group of (API)	Selective serotonin and norepinephrine reuptake inhibitors (SSNRIs) Anti-Depressants
	Pharmaceutical form of applied drug	Capsule
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	CYMBALTA (20mg, 30mg, 60mg) delayed-release capsules, USFDA Approved
	For generic drugs (me-too status)	Dulan 30mg capsule by M/s Hilton Pharma (Reg.No#055447)
	Name and address of API manufacturer.	Vision Pharmaceuticals (Pvt.) Ltd., Plot No. 22-23, Industrial Triangle , Kahuta Road Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability Studies of Drug Substance is submitted. However, Stability Studies of Drug Substance is not

		readable
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence studies of their product against the product Dulan capsule 30mg by performing quality tests (Description, Identification, dissolution and Assay).. Firm has submitted CDP results of their product against Dulan capsule 30mg by M/s Hilton Pharma Limited in 0.1N HCl (pH 1.2) Acetate buffer (pH 4.5), & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study including specificity, precision and accuracy.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted cGMP certificate of M/s Vision Pharmaceuticals issued on 31-01-2019 based on inspection conducted on 11-02-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice for purchase of 01Kg of Duloxetine (HCL) EC pellets 17% from M/s Vision Pharmaceuticals (Pvt.) Ltd., Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by unattested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	Submit valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	The firm has submitted copy of cGMP certificate of M/s Vision Pharmaceuticals issued on 22-08-2022 based on inspection conducted on 14-06-2022.
2.3.R.1	• Justification shall be submitted for the dispensed quantity of Duloxetine (HCl) EC Pellets 17% against the label claim with reference to the potency of Duloxetine (HCl) EC Pellets determined during drug substance analysis by M/s Pasteur & Fleming Pharma.	The firm submitted that actually we had done the calculation in the term of kilogram on the excel sheet the digits were not seen as after the decimal point were rounded off now we have done it again in the term of grams than three digits have been clarified. We have use this formula for dispensed quantity with given potency as 17.15 %. Qty per caps = 100/potency x label claim Loxit Capsules = 100/17.15 * 30= 175mg/ Cap So, Batch Size is = 1500 capsules 175x1500/1000 262.5gm/ Batch
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is submitted.
3.2.S.7	• Readable copies of stability data of drug substance shall be submitted	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 18 months. Batches: (DXT250, DXT256, DXT 258)
3.2.P.2	• Justification shall be submitted for not performing pharmaceutical equivalence and CDP studies against the innovator product • Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product	• The firm submitted that at the time of stability study we searched a Cymbalta capsules 30mg lot but couldn't find the innovator product of Loxit 30mg capsules, the innovator's product was not available at market and we got only the Brand Leader since we started this work for saving time brand leader Dulan Capsules 30mg capsules from Hilton Pharma Pvt. Ltd., Karachi having Registration Number.055447, DML # 000136, batch Number. 141104 instead of Innovator, Brand Leader has also done studies according to the innovator's specs that we also considered it appropriate. • Image/picture/snapshot of innovator / comparator pack against which Pharmaceutical

		equivalence/Comparative dissolution profile studies have been performed is submitted
3.2.P.5	• Signed copies of finished product specifications, analytical procedure and method verification studies shall be submitted • Justification shall be submitted for not including the test for uniformity of dosage unit in finished product specifications as recommended by USP • HPLC column details shall be submitted for assay test • The USP test number adopted for dissolution test is not mentioned in product specifications • Unsinged copies of Batch analysis of three batches are submitted	• Signed copies of finished product specifications, analytical procedure and method verification studies is submitted • The firm submitted that in Loxit hard gelatine capsules 30mg (Duloxetine HCl) the ratio of Active pharmaceuticals Ingredient (API) and label claimed of Loxit capsules 30mg is more than 25mg, so uniformity of content cannot be applied here only weight variation will be applied in this case. As per USP monograph the product Containing 25 mg or more of a drug substance or comprises 25% or more (by weight) of one capsule. However uniformity of dosage unit by content uniformity shall be included in specifications • The firm submitted that USP test No#01 is used for dissolution test. • The firm has provided details of HPLC column used for assay test, C8; 4.6X75MM,3.5µm • Singed copies of Batch analysis of three batches are submitted
3.2.P.8	• Unattested and unsigned documents like Raw data sheets, COA, summary data sheets etc. are submitted • Chromatograms for dissolution test are not submitted	• Signed documents like Raw data sheets, COA, summary data sheets etc. are submitted • Chromatograms for dissolution test are submitted

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued after submission of:

- **Revised finished product specifications including the test for uniformity of dosage unit i.e. content uniformity as per USP monograph**
- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Case No. 4: Registration applications of Human Drugs on form 5F (New DML):

M/s World Biz Pharmaceutical Company Plot#340 Phase-II, Industrial Estate, Multan
The Central Licensing Board in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following one section to **M/s World Biz Pharmaceutical Company** Plot#340 Phase-II, Industrial Estate, Multan under Drug Manufacturing License No. 000942 by way of Formulation vide approval letter No. F. 1-25/2008-Lic dated 17th September 2021. The Drug Manufacturing License No. 0009942 by way of formulation is hereby issued w.e.f. 13-09-2021.

S No.	Name of Sections
6.	Oral Liquid Syrup section (General).

Following applications have been submitted for registration by the firm.

717.	Name, address of Applicant / Marketing Authorization Holder	M/s World Biz Pharmaceutical Company Plot#340 Phase-II, Industrial Estate, Multan
	Name, address of Manufacturing site.	M/s World Biz Pharmaceutical Company Plot#340 Phase-II, Industrial Estate, Multan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML issued on 13-09-2021
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 17-09-2021 specifying Oral Liquid Syrup section (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy.No 5487 dated 27-02-2023
	Details of fee submitted	Rs.30,000/- dated 22-02-2023 (Deposit slip#460730580)
	The proposed proprietary name / brand name	**MetroBiz Suspension 200mg/5ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Metronidazole as benzoate……200mg (B.P Specifications)
	Pharmacotherapeutic Group of (API)	Anti-amoebic and anti-infective
	Pharmaceutical form of applied drug	Oral suspension
	Reference to Finished product specifications	B.P Specifications
	Proposed Pack size	30ml, 60ml, 90ml, 100ml, 120ml,, 450ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Metronidazole 200mg/5ml Oral Suspension by Rosemont Pharma (MHRA Approved)
	For generic drugs (me-too status)	Flygyl Suspension by M/s Sanofi-aventis Pakistan (Reg.No. 001214)
	Name and address of API manufacturer.	M/s Aarti Drugs Limited., Plot No 109 – D Mahendra Industrial Estate Road No 29, Sion (East), Mumbai - 400 022, INDIA.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module-III Drug Substance:	Firm has submitted detail of nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months. Batches: (MBO/402046, MBO/406279, MBO/410534)
	Module-III Drug Product:	Firm has submitted detail of drug product including its description, composition, Pharmaceutical development, manufacturer, manufacturing process and process control, process validation protocols, control of drug Product, specifications, analytical procedures, analytical method verification studies, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence is established against Citzin syrup by M/s Sanofi Aventis Pakistan by performing quality tests (Identification, pH, deliverable volume and Assay).
	Analytical method validation/verification of product	Firm has submitted method verification studies including linearity, range, accuracy, precision, specificity, LOD and LOQ.

STABILITY STUDY DATA

Manufacturer of API	M/s Aarti Drugs Limited., Plot No 109 – D Mahendra Industrial Estate Road No 29, Sion (East), Mumbai - 400 022, INDIA.		
API Lot No.	MBO/12090523		
Description of Pack (Container closure system)	An amber glass bottle containing yellow coloured suspension with characteristic pleasant flavour, labelled sealed with pp. aluminium cap packed in specific unit carton. (60ml)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	RD-MS-001	RD-MS-002	RD-MS-003
Batch Size	500 bottles	500 bottles	500 bottles
Manufacturing Date	10-2022	10-2022	10-2022
Date of Initiation	12-10-2022	12-10-2022	12-10-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate of M/s Aarti Drugs Limited., Plot No. K-40/41, MIDC, Tarapur, Biosar, Tal-Palghar, Dist Thane 401506 Mahrashtra State, India issued by Food and Drugs Administration Maharashtra State, India valid upto 29th November 2024. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of request for Loan of raw material to M/s British Pharmaceutticals 23-Km Sheikhupura Road, Lahore dated 11-07-2022. M/s British Pharmaceutticals 23-Km Sheikhupura Road, Lahore has accepted the request for Loan of Raw material dated 12-07-2022. Firm has submitted copy of Agreement for Loan of raw material to M/s British Pharmaceutticals 23-Km Sheikhupura Road, Lahore dated 12-07-2022. Firm has submitted copy of receiving letter addressed to assistant director PE&R dated 14-02-2023 for Borrowing of API, "Metronidazole Benzoate" for product development, R&D and Stability testing. Firm has submitted that the Metronidazole benzoate material of quantity 10Kg was obtained via loan from M/s British Pharmaceuticals Lahore. Copy of Form 3, 7, COA, commercial invoice (invoice# EXP/1750/22-23) dated: 21-09-2022 is submitted. *However the invoice not cleared by AD (I&E) DRAP filed office*
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Audit trail report for product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) for 3 months only.

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Address mentioned on GMP certificate is different than that given in section 1.6.5, clarify	The firm submitted that address mentioned on GMP certificate is same as mentioned on the used Lot of API. The firm has revised the address in section 1.6.5 as M/s Aarti Drugs Limited., Plot No. K-40,41, MIDC, Tarapur-Biosar, Tal-Plghar Dist. Thane, India
3.2.S.4	• In contrary to the recommendations of BP monograph justification shall be submitted for not including the tests for loss on drying and sulphated ash in drug substance specification by drug product manufacturer • Justification shall be submitted for not performing the tests for sulphated ash in batch analysis of drug substance by drug product manufacturer	• Firm has submitted revised drug substance specifications and included the tests for loss on drying and sulphated ash • The firm submitted that suphated ash test was performed but skipped in the certificate of analysis typographically and submitted revised certificate of analysis of API.
3.2.P.2	• In section 3.2.P.2 of form 5F details for Cetirizine Hydrochloride syrup is submitted • Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product	• The firm submitted that this was a typographical error. Revised data in section 3.2.P.2 is submitted • Image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence studies have been performed is submitted. • The firm submitted that comparative product used was Flagyl Suspension 200mg/5ml (120ml) Batch No#AA263 Mfg date; Sep, 2022 Exp date; Aug, 2024

	• The submitted pharmaceutical equivalence reports shows comparison of SetBiz Syrup against Citzin Syrup, clarify	• Revised Pharmaceutical equivalence report performed against Flagyl Suspension 200mg/5ml by M/s Sanofi Aventis Pakistan by performing quality tests (Appearance, Identification, pH, deliverable volume and Assay).
3.2.P.5	• Justification is required as specification for identification test is by HPLC instead IR with reference to recommendations of BP mongraph • Justification is required as tests for antimicrobial preservative content and efficacy of preservative is not included in specification • Method used for standard solution preparation for assay is not as per recommendations of BP monograph, clarify (Dimethylformamide is not used along with methanol for dissolution of standard metronidazole benzoate)	• The firm submitted that identification of the product was performed by the HPLC retention time. HPLC is more precise technique than FTIR. So, that's why in specifications, identification via HPLC is mentioned • Antimicrobial preservative content and efficacy test study was performed and documents are submitted. • The firm submitted that method used for standard solution preparation is same as per recommendation of BP, only Dimethyl formamide was skipped due to non-availability. Once product is registered, we will adopt the same procedure as of BP monograph
3.2.P.8	• Justification is required as batch analysis show pack size of 60ml while BMR shows pack size of 90ml of trial batches • 6th month time point stability study data is not submitted • The submitted commercial invoice is not attested by AD (I&E) DRAP field office	• The firm submitted that pack size use for stability and batch analysis was 90ml. The firm has submitted revised batch analysis report. • Firm has submitted stability study data at 6th month time point • Commercial invoice (invoice# EXP/1750/22-23) dated: 21-09-2022 is submitted. *However the invoice not cleared by AD (I&E) DRAP filed office*

Decision: Keeping in view the remarks of evaluater and the submission of revised information and data with multiple typographic errers as admitted by the firm and not submitting the DRAP office attested invoice for the API used for production of trial batches for stability studies, the board decided to deffer the case for the submission complete dossier with new batches with full fee of registration as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Case No. 05; Registration application of Human drugs on Form 5-F on export facilitation

Assistant director PR-I/EFD vide letter No.F.1-6/2019-PR-I (EFD) dated 28-02-2023 has informed that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis to the *pharmaceutical* i.e one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm have achieved the benchmark of more than **100,000 USD** during the **fiscal Year 2021-2022** and submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.,

718.	Name, address of Applicant / Marketing Authorization Holder	M/s Macter International Ltd., F-216, SITE, Karachi-Pakistan.
	Name, address of Manufacturing site.	M/s Macter International Ltd., F-216, SITE, Karachi-Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted copy of GMP certificate dated 05-08-2022 based on inspection conducted on 04-08-2021
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-13/95-Lic (Vol-III) dated 10-12-2019 which specifies injectable section (ceph)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 843 dated 10-01-2023
	Details of fee submitted	Rs.30,000/- dated 10-10-2022 (Deposit slip#387617737581)
	The proposed proprietary name / brand name	**Avicef 2.5gm Powder for Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftazidime as Ceftazidime pentahydrate……..…2g Avibactam as avibactam sodium ……0.5g
	Pharmaceutical form of applied drug	Sterile powder for injection
	Pharmacotherapeutic Group of (API)	Ceftazidime belongs to the group of antibiotics called "cephalosporin" Avibactam is "beta-lactamase inhibitor"
	Reference to Finished product specifications	Not submitted
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zavicefta 2 g/0.5 g powder for concentrate for solution for infusion MHRA Approved Zavicefta 2 g/0.5 g powder for concentrate for solution for infusion TGA Approved AVYCAZ (ceftazidime/avibactam) 2g/0.5g for injection USFDA Approved
	For generic drugs (me-too status)	Zavicefta Injection 2g/0.5g Powder for Concentrate for Solution for Infusion by M/s Pfizer Pakistan Ltd (Reg#106848)
	Name and address of API manufacturer.	M/s Chifeng Addisun Pharmaceutical Co., Ltd., No. 3 Minsheng street, Economic development zone of Hongshan District , Chifeng, Inner Mongolia, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (180601, 180602, 180603)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand that is Avycaz 2.5g Powder for injection by M/s GSK Italy., by performing quality tests (Appearance, identification, average weight, pH, Assay and related substances).
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, accuracy, precision, specificity and robustness.

STABILITY STUDY DATA

Manufacturer of API	M/s Chifeng Addisun Pharmaceutical Co., Ltd., No. 3 Minsheng street, Economic development zone of Hongshan District , Chifeng, Inner Mongolia, China		
API Lot No.	2105001		
Description of Pack (Container closure system)	25cc Clear glass vial, rubber stopper, flip off seal and leaflet in unit carton (1's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Manufacturing Date	07-09-2021	07-09-2021	07-09-2021
Date of Initiation	09-2021	09-2021	09-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate in the name of M/s Chifeng Addisun Pharmaceutical Co., Ltd., 3 Minsheng street, Economic development zone of Hongshan District , Chifeng, China issued by China Food and Drug Administration valid upto 21-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice dated 01-04-2020 for import of 1kg of Avibactam and Ceftazidime sterile (Working standard & Impurities) in name of M/s Macter International Limited. ***However, the invoice is not attested by AD (I&E) DRAP field office.***
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.6	• Mention the reference specifications of the finished product	• The firm has mentioned Innovator's specifications for applied product

1.6.5	• Valid GMP certificate of drug substance manufacturer issued by relevant regulatory authority of country of origin is required	Firm has submitted copy of DML (License#Nei20160028) in the name of M/s Chifeng Addisun Pharmaceutical Co., Ltd., 3 Minsheng street, Economic development zone of Hongshan District, Chifeng, China issued by Drug Administration of Nei Monggol China valid upto 27-12-2025.
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance shall be submitted. • Justification is required for not performing the test for content uniformity and pyridine content in batch analysis of drug substance by drug product manufacturer as recommended by drug substance manufacturer	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug product manufacturer is submitted. • Firm has submitted analytical method validation studies including linearity, accuracy, precision, specificity and robustness performed by the Drug Product manufacturer for drug substance. • Test for content uniformity has been performed by drug product manufacturer and revised reports submitted. *However, test for pyridine content is not submitted.*
3.2.P.1	• Provide information including type of diluent, its composition, quantity or volume, specifications and regulatory status in Pakistan for the diluent which is to be provided along with the applied drug.	• The firm submitted that sterile water for injection will be provided with applied drug product that is already registered with M/s Macter International
3.2.P.2	• Justification is required since pharmaceutical equivalence study does not include complete testing of the drug product and the innovator product including the tests recommended by innovator product review document (description on reconstitution, reconstitution time, pyridine content, uniformity of dosage unit, particulate matter, water content, bacterial endotoxins and sterility)	• Firm has submitted the justification on Pharmaceutical Equivalence included complete testing (Appearance, Identification, Avg. weight, pH, Assay, Related Substance, Any unspecified impurity, Total Impurity) of the drug product Avicef 2.5 g powder for injection and the innovator product recommended by the following guidelines, "Pharmaceutical equivalence – Drug products are considered pharmaceutical equivalents if they have the same active ingredients, the same dosage form and are identical in strength, quality, purity, and identity as the brand-name product [1, 2]".Report of pharmaceutical equivalence is submitted. • Also the equivalence relationships between brand name and generic drugs are the following parameters; (API, Dosage form, Dose, Route of Administration, Labeling. • The test parameters stated in query already performed in our in-house testing for finished product.
3.2.P.3	• Justify the batch size of trial batches against the number of units required for complete testing of drug product during stability study including real time stability study till claimed shelf life • Justification shall be submitted for the dispensed quantity of drug substance against the label claim with reference to the potency of drug substance determined during drug substance analysis by M/s Macter International Ltd. • Justification shall be submitted as the content of sodium bicarbonate in premixed drug substance	• No justification is submitted for batch size of trial batches against the number of units required for complete testing of drug product during stability study till claimed shelf life • The firm submitted that batch size was determined according to the standard mixture, which is 315.0g for 100vials. The firm further stated that batch was filled according to the potency of API, which was tested by M/s Macter International. • Firm has submitted that content sodium

	are different than that recommended by innovator product	carbonate in premixed drug substance has been corrected and mentioned Certificate of Analysis for drug substance and stated that COA is submitted in dossier.
3.2.P.5	• Justification is required for not including the test for reconstitution time, pyridine content, uniformity of dosage unit and water content in finished product specification by drug product manufacturer as recommended by innovator product review document • Justification is required for not performing the test for reconstitutions time, uniformity of dosage units, pyridine content and water content in batch analysis by drug product manufacturer as recommended by innovator product review document	• Firm submitted that reconstitution time, uniformity of dosage unit and water content tests were already performed but didn't incorporated in the report and specifications, now mentioned in revised report, while pyridine content test performed and mentioned in revised report of the drug substance of Avicef 2.5 g powder for injection. *However results for uniformity of dosage unit is not submitted*
3.2.P.7	• Description of the primary container closure systems including the type of glass shall be submitted	• Clear glass vial 25cc
3.2.P.8	• Justification is required for not performing the test for reconstitutions time, uniformity of dosage units, pyridine content and water content in stability study by drug product manufacturer as recommended by innovator product review document • Submit document for procurement of API with approval from DRAP	• Firm submitted that test for reconstitution time, uniformity of dosage unit and water content were already performed but didn't incorporated in the report and specifications, now mentioned in revised report, while pyridine content test *will be perform in ongoing stability study of the drug substance Avicef 2.5 g powder for injection. However, no revised reports are submitted* • Firm has submitted copy of invoice dated 17-06-2021 for import of 1kg of Avibactam and Ceftazidime sterile (& Impurities) in name of M/s Macter International Limited attested by AD (I&E) DRAP Karachi dated 22-06-2021

Decision: Deferred for submission of following:

- **Justification for not performing the test for pyridine content in batch analysis of drug substance by drug product manufacturer**
- **Justification as pharmaceutical equivalence study report does not include complete testing of the drug product and the innovator product including the tests recommended by innovator product review document (description on reconstitution, reconstitution time, pyridine content, uniformity of dosage unit, particulate matter, water content, bacterial endotoxins and sterility)**
- **Justification for the batch size of trial batches against the number of units required for complete testing of drug product during stability study including real time stability study till claimed shelf life**
- **Justification for not including the test for reconstitution time, pyridine content, uniformity of dosage unit and water content in finished product specification by drug product manufacturer**
- **Results for uniformity of dosage unit in batch analysis of drug product.**
- **Reports for reconstitution time, uniformity of dosage unit, water content in stability study**
- **Results for pyridine content in ongoing stability study**

Case No. 6: Deferred Registration applications of Human Drugs on form 5F (New DML):
M/s Pinnacle Biotech (Pvt.) Ltd. Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi

The Central Licensing Board in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following three sections to **M/s Pinnacle Biotech (Pvt.) Ltd.,** Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi under Drug Manufacturing License No. 000939 by way of Formulation vide approval letter No. F. 2-10/2011-Lic(Vol-I) dated 13th September 2021. The Drug Manufacturing License No. 000939 by way of formulation is hereby issued w.e.f. 13-09-2021.

S No.	Name of Sections
5.	Tablet (General)
6.	Capsule (General)
7.	Sachet (General)
8.	Research & Development Laboratory

Following applications have been submitted for registration by the firm.

719.	Name, address of Applicant / Marketing Authorization Holder	M/s Pinnacle Biotech (Pvt.) Ltd. Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi.
	Name, address of Manufacturing site.	M/s Pinnacle Biotech (Pvt.) Ltd. Plot No. FD-49-A8, FD-50-A8, FD-51-A8, Korangi Creek Industrial Park, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted cGMP certificate issued on 22-11-2022 based on inspection conducted on 21-10-2022.
	Evidence of approval of manufacturing facility	New license granted vide letter No. F. 2-10/2011-Lic(Vol-I) dated 13/09/2021. Tablet (general), Capsule (general), Sachet (general) and Research and Development Laboratory section is approved.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 1371 dated 16/01/2023
	Details of fee submitted	PKR 30,000/-: dated 06/01/2023 (Deposit slip#70103647320)
	The proposed proprietary name / brand name	**Neptune 500mg Tablets**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ciprofloxacin Hydrochloride equivalent to Ciprofloxacin……500mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Fluoroquinolones
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ciproxin 500mg film-coated Tablets, MHRA Approved.

	For generic drugs (me-too status)	Ciproxin 500mg Tablet by M/s Bayer Pakistan Private Limited (Reg#107222)
	Name and address of API manufacturer.	M/s Pharmagen Limited., Kot Nabi Bukhsh Wala 34-Km, Ferozpur Road, Lahore
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verifications, batch analysis and justification of specification, details of reference standards, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data as per zone IV-A. Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH 6 months Batches: 00510011/001/2014, 00510011/002/2014, 00510011/003/2014
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for their product against ciproxin 500mg tablet by M/s Novartis Pharma (mfgr) / Bayer Pakistan (MAH) by performing quality tests (Identification, average weight, disintegration time, uniformity of dosage units, dissolution, assay) CDP has been performed against the product ciproxin 500mg tablet by M/s Novartis Pharma (mfgr) / Bayer Pakistan (MAH) in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability) and Specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Pharmagen Limited., Kot Nabi Bukhsh Wala 34-Km, Ferozpur Road, Lahore		
API Lot No.	00510011 / 279 / 2021		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5% Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T047	T054	T055
Batch Size	1500 tab	1500 tab	1500 tab
Manufacturing Date	16-05-2022	18-05-2022	18-05-2022

Date of Initiation	01-06-2020	01-06-2020	01-06-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate of M/s Pharmagen Limited., Kot Nabi Bukhsh Wala 34-Km, Ferozpur Road, Lahore issued on 22-11-2022 based on inspection conducted on 18-11-2022 valid for two years from date of inspection
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	
3.2.S.4	• Clarification is required as Drug substance manufacturer has given both USP and BP specifications and analytical method while drug product manufacturer has given USP specifications. • Clarification is required as the batch number mentioned on COA of drug substance by drug substance manufacturer (00510011 / 279 / 2021) is different than that of drug product manufacturer (00510011 / 280 / 2021)	
3.2.S.5	• COA of primary / secondary reference standard including source and lot number shall be provided.	
3.2.P.5	• Justification is required for not mentioning the time for dissolution test in finished product specifications as recommended by USP.	
3.2.P.8	• Documents for the procurement of API is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted	

Previous Decision (327th–DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings.

Response by the firm (10th April 2023):

Section	Observations	Response
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.4	• Clarification is required as Drug substance manufacturer has given both USP and BP specifications and analytical method while drug product manufacturer has given USP specifications.	• *The firm submitted that drug product manufacturer tested their material on both specifications* to meet customer requirement while drug product manufacturer only tested the material as per USP.

	• Clarification is required as the batch number mentioned on COA of drug substance by drug substance manufacturer (00510011 / 279 / 2021) is different than that of drug product manufacturer (00510011 / 280 / 2021)	• The firm has submitted revised COA of batch No#(00510011 / 280 / 2021) from drug substance manufacturer
3.2.S.5	• COA of primary / secondary reference standard including source and lot number shall be provided.	Firm has submitted both COA of primary / secondary reference standard
3.2.P.5	• Justification is required for not mentioning the time for dissolution test in finished product specifications as recommended by USP.	The firm submitted that in specification and testing method on page No.09 on 3.6.3 in dissolution procedure time 30 minutes is mentioned while it was not mentioned in dissolution parameters and specifications so revised specification and testing method is submitted
3.2.P.8	• Documents for the procurement of API is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted	• Firm has submitted purchase order from M/s Pinnacle Biotech and sale tax invoice and delivery note from M/s Pharmagen Limited for procurement of API • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case No. 7: Registration applications of Human Drugs on form 5F (New DML):
M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.

The Central Licensing Board in its 282nd meeting held on 31st August, 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following seven (07) sections to M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot under Drug Manufacturing License No. 000944 vide approval letter No. F.1-5/2017-Lic dated 17/09/2021. The Drug Manufacturing License No. 000944 by way of formulation is hereby issued w.e.f. 13-09-2021.

S No.	Section
1.	Tablet (General)
2.	Capsule (General)
3.	Oral Liquid (General)
4.	Liquid Injectable – Vial & Ampoule (General)
5.	Capsule (Cephalosporin)
6.	Dry Powder Injectable (Cephalosporin)
7.	Oral Dry Powder Suspension (Cephalosporin)

Following applications have been submitted for registration by the firm.

721.	Name, address of Applicant / Mar keting Authorization Holder	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.
	Name, address of Manufacturing site.	M/s Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has been granted new license (DML No. 000944) by way of formulation dated 17-09-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of DML dated 17-09-2021 which specifies Capsule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3131 : 02/02/2023
	Details of fee submitted	PKR 30,000/-: 12/12/2022 (Deposit slip#7485549404)
	The proposed proprietary name / brand name	Praq 20mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Hard gelatine capsule contains: Enteric coated pellets (8.5%) of omeprazole equivalent to omeprazole …….20mg
	Pharmaceutical form of applied drug	Hard gelatine capsule
	Pharmacotherapeutic Group of (API)	Proton pump inhibitors
	Reference to Finished product specifications	USP
	Proposed Pack size	2x7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omeprazole 20 mg Gastro-resistant Capsules MHRA Approved
	For generic drugs (me-too status)	Risek Capsule 20mg by M/s Getz Pharma

		(Reg#19364)
	Name and address of API manufacturer.	Vision Pharmaceuticals Pvt. Ltd, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verifications, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (OMP073,)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Risek 20mg capsule by performing quality tests (appearance, identification, dissolution, assay)
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies including specificity, linearity, range, accuracy, precision (repeatability), system suitability.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals Pvt. Ltd, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.		
API Lot No.	OMP1199		
Description of Pack (Container closure system)	Alu-Alu Blister packed in unit carton 2x7's		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	658 capsule	658 capsule	658 capsule

Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	27-04-2022	27-04-2022	27-04-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No reference is submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of M/s Vision Pharmaceuticals issued on 22-08-2022 based on inspection conducted on 14-06-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	No document submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firms has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
2.3.R.1	• Justification is required for using 2% overage in finished product as mentioned in BMR • Justification shall be submitted for the dispensed quantity of Omeprazole pellets against the label claim with reference to the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma.	•
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Justification shall be submitted for incomplete testing of drug substance by drug product manufacturer as recommended by drug substance manufacturer (loss on drying, sugar test, pellet size, bulk density). • Clarification shall be submitted regarding declared the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma whether it is on "as is basis" or "anhydrous basis".	•
3.2.S.7	• Stability study of at least three batches of drug substance till claimed shelf life shall be submitted	•
3.2.P.2	• Submit the details of manufacturer, batch No# and expiry date of innovator/reference/comparator product against which pharmaceutical equivalence studies have been performed • Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP (uniformity of dosage units). • Justification is required since pharmaceutical equivalence have not been conducted against the innovator product. • Submit CDP studies of applied product as per guidelines approved by the registration board in its 293rd meeting	•
3.2.P.5	• Justification is required for not including the test for uniformity of dosage units in finished product specifications as recommended by USP.	•

	• Justification is required for not mentioning the test number and time for dissolution test in finished product specifications at buffer stage as recommended by USP. • Signed copies of the Drug product analytical procedures used for routine testing of the Drug product by Drug Product manufacturer is required from M.s Qadir Pharmaceuticals instead of referring to the USP monograph extract.	
3.2.P.8	• The batch number of manufactured batches mentioned in BMR is CTR001, CTR002, CTR003 while batch number mentioned stability summary sheet is T001, T002, T003, clarify • Justification is required since results of dissolution test in stability summary sheets at acid stage of batch No#T001 Accelerated conditions at 6th month time point, T002 Accelerated conditions at 6th month time point, T003 real time conditions at 3rd and 6th month time point show results in terms of negative percentage. • Justification shall be submitted for performing the dissolution test at acid stage on HPLC and at buffer stage on UV spectrophotometer in stability studies • Clarification shall be submitted regarding the calculation formula applied for the results of Acid stage dissolution test with reference to the USP monograph since firm has represented the dissolution results as more than 90% in raw data sheets of acid stage dissolution test and has further subtracted results of dissolution test at acid stage from assay test for calculating final results. • Submit document for procurement of API.	•

Previous Decision (M-327-DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings.

Firm's Response:

Section	Observations	Response
2.3.R.1	• Justification is required for using 2% overage in finished product as mentioned in BMR • Justification shall be submitted for the dispensed quantity of Omeprazole pellets against the label claim with reference to the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma.	• Firm submitted that No overage has been used in the formulation of finished product • In the BMR 240mg of omeprazole pellets has been used equivalent to 20mg of omeprazole on the basis of assay analysis by M/S Qadir pharmaceuticals i.e. 8.33% (on as is basis). COA of manufacturer of drug substance and drug product manufacturer are submitted.
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Justification shall be submitted for incomplete testing of drug substance by drug product manufacturer as recommended by drug substance manufacturer (loss on drying, sugar test, pellet size, bulk density). • Clarification shall be submitted regarding declared the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma whether it is on "as is basis" or "anhydrous basis".	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is not submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is not submitted. • Firm has submitted revised batch analysis report of drug substance by drug product manufacturer in which complete testing has been performed including loss on drying, sugar test, pellet size, bulk density. • Firm has submitted COA of drug substance wherein potency of omeprazole has been calculated on "as is basis".
3.2.S.7	• Stability study of at least three batches of drug substance till claimed shelf life shall be submitted	*Firm has submitted stability study data of only one batch of drug substance at accelerated and real time conditions:*
3.2.P.2	• Submit the details of manufacturer, batch No# and expiry date of innovator/reference/comparator product	• Firm has provided details on innovator product against which pharmaceutical equivalence studies have been performed

	against which pharmaceutical equivalence studies have been performed • Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP (uniformity of dosage units). • Justification is required since pharmaceutical equivalence have not been conducted against the innovator product. • Submit CDP studies of applied product as per guidelines approved by the registration board in its 293rd meeting	Losec 20mg capsule (Astra Zenenca) Barret hodgson Pakistan (Pvt) Ltd Lot No; YEWH Mfg. Date; 02-2022 Exp. Date: 01-2025 • Firm has submitted revised pharmaceutical equivalence report for their product against Losec 20mg capsule by M/s Barret Hodgson Pakistan (Pvt) Ltd by performing quality tests (appearance, identification, average weight, uniformity of dosage unit, dissolution, assay) • Firm has submitted CDP studies against the product Losec 20mg capsule by M/s Barret Hodgson Pakistan (Pvt) Ltd in 0.1N HCl (pH 1.2) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
3.2.P.5	• Justification is required for not including the test for uniformity of dosage units in finished product specifications as recommended by USP. • Justification is required for not mentioning the test number and time for dissolution test in finished product specifications at buffer stage as recommended by USP. • Signed copies of the Drug product analytical procedures used for routine testing of the Drug product by Drug Product manufacturer is required from M.s Qadir Pharmaceuticals instead of referring to the USP monograph extract.	• Firm has submitted revised finished product specifications containing the test for uniformity of dosage units and time for dissolution test at buffer stage. • Firm has referred to USP dissolution test 2 in analytical procedure. • Unsigned Copies of the Drug product analytical procedures used for routine testing of the Drug product by Drug Product manufacturer is submitted
3.2.P.8	• The batch number of manufactured batches mentioned in BMR is CTR001, CTR002, CTR003 while batch number mentioned stability summary sheet is T001, T002, T003, clarify • Justification is required since results of dissolution test in stability summary sheets at acid stage of batch No#T001 Accelerated conditions at 6th month time point, T002 Accelerated conditions at 6th month time point, T003 real time conditions at 3rd and 6th month time point show results in terms of negative percentage. • Justification shall be submitted for performing the dissolution test at acid stage on HPLC and at buffer stage on UV spectrophotometer in stability studies • Clarification shall be submitted regarding the calculation formula applied for the results of Acid stage dissolution test with reference to the USP monograph since firm has represented the dissolution results as more than 90% in raw data sheets of acid stage dissolution test and has further subtracted results of dissolution test at acid stage from assay test for calculating final results. • Submit document for procurement of API.	• The firm submitted that previously T001, T002 and T003 was used for all product that is why in stability sheet it is same while later on from R & D and production department for all dosage form a different batch series was introduced e.g. for capsule it is CTR001, for tablet it is TTR001 and liquid syrup it is LS001. As the stability sheet data of HPLC cannot be changed therefore it is requested to please allow us to change the BMR Batch no. • The calculation in the raw data sheet is incorrect. The undissolved pellets of acid stage were dissolved in the diluent and give a result more than 90%. So 100- dissolved %= Release in acid stage • The dissolution test 2 of USP 43 is followed in the stability studies which clearly indicate the buffer stage analysis that "Determine the amount of omeprazole dissolved from UV absorbances at the wavelength of maximum absorbance at about 305 nm" that is why acid stage is analyzed by HPLC and buffer by UV. • This is as given in USP Dissolution test 2 "Sample solution: After 2 h, remove each sample from the basket, and quantitatively transfer into separate volumetric flasks to obtain a solution having a final concentration of about 0.2 mg/mL. Proceed as directed for the Sample solution in the Assay, starting with "Add about 50 mL of Diluent " • Add about 50 mL of Diluent, and sonicate for 15 min. Cool, dilute with Diluent to volume, mix, and

		pass through a membrane filter of 0.45-µm or finer pore size. [NOTE— Bubbles may form just before bringing the solution to volume. Add a few drops of dehydrated alcohol to dissipate the bubbles if they persist for more than a few minutes. • The undissolved pellets of acid stage were dissolved in the diluent and give a result more than 90%. So 100- dissolved %= Release in acid stage • No document for procurement of API is submitted

Decision: Deferred for submission of following:

- **Justification for using overage in finished product as mentioned in BMR**
- **Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer**
- **Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance**
- **Stability study of at least three batches of drug substance till claimed shelf life**
- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Signed copies of the Drug product analytical procedures used for routine testing of the Drug product by Drug Product manufacturer**
- **Scientific justification for the calculation of dissolution test with reference to the pharmacopoeia monograph.**
- **Documents for procurement of API with approval from DRAP**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	No reference is submitted by the firm
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm have submitted cGMP certificate of M/s Vision Pharmaceuticals issued on 22-08-2022 based on inspection conducted on 14-06-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	No document submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firms has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm submitted that our system is not 21 CFR compliant and audit trail reports on product testing is not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
2.3.R.1	• Justification is required for using 1.25% overage in finished product as mentioned in BMR • Justification shall be submitted for the dispensed quantity of Omeprazole pellets against the label claim with reference to the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma.	•
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Justification shall be submitted for incomplete testing of drug substance by drug product manufacturer as recommended by drug substance manufacturer (loss on drying, sugar test, pellet size, bulk density). • Clarification shall be submitted regarding declared the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma whether it is on "as is basis" or "anhydrous basis".	•
3.2.P.2	• Submit the details of manufacturer, batch No# and expiry date of innovator/reference/comparator product against which pharmaceutical equivalence studies have been performed • Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product including the tests recommended by USP (uniformity of dosage units). • Justification is required since pharmaceutical equivalence have not been conducted against the innovator product. • Submit CDP studies of applied product as per guidelines approved by the registration board in its 293rd meeting	•
3.2.P.5	• Justification is required for not including the test for uniformity of dosage units in finished product specifications as recommended by USP.	•

	• Justification is required for not mentioning the test number and time for dissolution test in finished product specifications at buffer stage as recommended by USP. • Signed copies of the Drug product analytical procedures used for routine testing of the Drug product by Drug Product manufacturer is required from M.s Qadir Pharmaceuticals instead of referring to the USP monograph extract.	
3.2.P.8	• The batch number of manufactured batches mentioned in BMR is CTR001, CTR002, CTR003 while batch number mentioned stability summary sheet is T001, T002, T003, clarify • Justification is required since results of dissolution test in stability summary sheets at acid stage of batch No#T003 Accelerated conditions at 3rd month time point show results in terms of negative percentage. • Justification shall be submitted for performing the dissolution test at acid stage on HPLC and at buffer stage on UV spectrophotometer in stability studies • Clarification shall be submitted regarding the calculation formula applied for the results of Acid stage dissolution test with reference to the USP monograph since firm has represented the dissolution results as more than 90% in raw data sheets of acid stage dissolution test and has further subtracted results of dissolution test at acid stage from assay test for calculating final results. • Submit document for procurement of API.	•

Previous Decision (M-327-DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings.

Firm's Response:

Section	Observations	Response
2.3.R.1	• Justification is required for using 1.25% overage in finished product as mentioned in BMR • Justification shall be submitted for the dispensed quantity of Omeprazole pellets against the label claim with reference to the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma.	• Firm submitted that No overage has been used in the formulation of finished product • In the BMR 180mg of omeprazole pellets has been used equivalent to 40mg of omeprazole on the basis of assay analysis by M/S Qadir pharmaceuticals i.e. 22.5% (on as is basis). COA of manufacturer of drug substance and drug product manufacturer are submitted.
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Justification shall be submitted for incomplete testing of drug substance by drug product manufacturer as recommended by drug substance manufacturer (loss on drying, sugar test, pellet size, bulk density). • Clarification shall be submitted regarding declared the potency of Omeprazole pellets determined during drug substance analysis by M/s Qadir Pharma whether it is on "as is basis" or "anhydrous basis".	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is not submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is not submitted. • Firm has submitted revised batch analysis report of drug substance by drug product manufacturer in which complete testing has been performed including loss on drying, sugar test, pellet size, bulk density. • Firm has submitted COA of drug substance wherein potency of omeprazole has been calculated on "as is basis".
3.2.P.2	• Submit the details of manufacturer, batch No# and expiry date of innovator/reference/comparator product against which pharmaceutical equivalence studies have been performed • Justify why the pharmaceutical equivalence study does not include complete testing of the drug product and the comparator product	• Firm has provided details of comparator product against which pharmaceutical equivalence studies have been performed Risek 40mg capsule by M/s Getz (Pvt) Ltd Lot No; C04059 Mfg. Date; 02-2022 Exp. Date: 02-2025

	including the tests recommended by USP (uniformity of dosage units). • Justification is required since pharmaceutical equivalence have not been conducted against the innovator product. • Submit CDP studies of applied product as per guidelines approved by the registration board in its 293rd meeting	• The firm submitted due to unavailability of Losec 40mg capsule in Pakistan Risek 40mg was used as comparator for Pharmaceutical equivalence and CDP studies. • Firm has submitted revised pharmaceutical equivalence report for their product against Risek 40mg capsule by M/s Getz (Pvt) Ltd by performing quality tests (appearance, identification, average weight, uniformity of dosage unit, dissolution, assay) • Firm has submitted CDP studies against the product Risek 40mg capsule by M/s Getz (Pvt) Ltd in 0.1N HCl (pH 1.2) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
3.2.P.5	• Justification is required for not including the test for uniformity of dosage units in finished product specifications as recommended by USP. • Justification is required for not mentioning the test number and time for dissolution test in finished product specifications at buffer stage as recommended by USP. • Signed copies of the Drug product analytical procedures used for routine testing of the Drug product by Drug Product manufacturer is required from M.s Qadir Pharmaceuticals instead of referring to the USP monograph extract.	• Firm has submitted revised finished product specifications containing the test for uniformity of dosage units and time for dissolution test at buffer stage. • Firm has referred to USP dissolution test 2 in analytical procedure. • Unsigned Copies of the Drug product analytical procedures used for routine testing of the Drug product by Drug Product manufacturer is submitted
3.2.P.8	• The batch number of manufactured batches mentioned in BMR is CTR001, CTR002, CTR003 while batch number mentioned stability summary sheet is T001, T002, T003, clarify • Justification is required since results of dissolution test in stability summary sheets at acid stage of batch No#T003 Accelerated conditions at 3rd month time point show results in terms of negative percentage. • Justification shall be submitted for performing the dissolution test at acid stage on HPLC and at buffer stage on UV spectrophotometer in stability studies • Clarification shall be submitted regarding the calculation formula applied for the results of Acid stage dissolution test with reference to the USP monograph since firm has represented the dissolution results as more than 90% in raw data sheets of acid stage dissolution test and has further subtracted results of dissolution test at acid stage from assay test for calculating final results. • Submit document for procurement of API.	• The firm submitted that previously T001, T002 and T003 was used for all product that is why in stability sheet it is same while later on from R & D and production department for all dosage form a different batch series was introduced e.g. for capsule it is CTR001, for tablet it is TTR001 and liquid syrup it is LS001. As the stability sheet data of HPLC cannot be changed therefore it is requested to please allow us to change the BMR Batch no. • The calculation in the raw data sheet is incorrect. The undissolved pellets of acid stage were dissolved in the diluent and give a result more than 90%. So 100- dissolved %= Release in acid stage • The dissolution test 2 of USP 43 is followed in the stability studies which clearly indicate the buffer stage analysis that "Determine the amount of omeprazole dissolved from UV absorbances at the wavelength of maximum absorbance at about 305 nm" that is why acid stage is analyzed by HPLC and buffer by UV. • This is as given in USP Dissolution test 2 "Sample solution: After 2 h, remove each sample from the basket, and quantitatively transfer into separate volumetric flasks to obtain a solution having a final concentration of about 0.2 mg/mL. Proceed as directed for the Sample solution in the Assay, starting with "Add about 50 mL of Diluent "

		• Add about 50 mL of Diluent, and sonicate for 15 min. Cool, dilute with Diluent to volume, mix, and pass through a membrane filter of 0.45-µm or finer pore size. [NOTE— Bubbles may form just before bringing the solution to volume. Add a few drops of dehydrated alcohol to dissipate the bubbles if they persist for more than a few minutes.] • The undissolved pellets of acid stage were dissolved in the diluent and give a result more than 90%. So 100- dissolved %= Release in acid stage • No document for procurement of API is submitted

Decision: Deferred for submission of following:

- **Justification for using overage in finished product as mentioned in BMR**
- **Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer**

Case No. 08: Deferred Registration applications of Human drugs on Form 5-F (New Section)
M/s Titlis Pharma, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore

The Central Licensing Board in its 285th meeting held on 17th & 18th March, 2022 has considered and approved the grant of following sections of **M/s Titlis Pharma, Plot No. 528-A, Sundar Industrial Estate, Raiwand Road, Lahore** under Drug Manufacturing License No. 000779 (Formulation) vide approval letter No. F. 1-11/2009-Lic (Vol-I) dated 10th May, 2022.

S No.	Section
	Tablet Section II (General) **New**
	Dry Powder Suspension Section. **New**
	Dry Powder Sachet Section (General). **New**

Following applications have been submitted for registration by the firm.

723.	Name, address of Applicant / Marketing Authorization Holder	M/s Titlis Pharma (Pvt.) Limited., 528-A, Sunder Industrial Estate, Raiwind Road, Lahore.
	Name, address of Manufacturing site.	M/s Titlis Pharma (Pvt) Limited., 528-A, Sunder Industrial Estate, Raiwind Road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 26943 dated 23/09/2022

	Details of fee submitted	PKR 30,000/-: dated 09/09/2022 (Slip#1900631731)
	The proposed proprietary name / brand name	**Montit 4mg Sachet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Sachet contain Montelukast Sodium equivalent to Montelukast …….4mg
	Pharmaceutical form of applied drug	Sachet
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonists (LTRAs)
	Reference to Finished product specifications	USP
	Proposed Pack size	14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Montelukast 4 mg Granules MHRA Approved
	For generic drugs (me-too status)	Montika 4mg Sachet by M/s Sami Pharmaceuticals (Reg#50744)
	GMP status of the Finished product manufacturer	New section granted on 17th & 18th March, 2022 and letter issued on 10th May, 2022
	Name and address of API manufacturer.	Zhejiang Tianyu Pharmaceutical Co., Ltd., No.15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China 317016
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures, batch analysis and justification of specification, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (201310301, 201310302, 201310303)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Montiget Sachet 4mg of M/s Getz Pharma by performing quality tests (weight variation, Assay, Dissolution, of dosage form).
	Analytical method validation/verification of product	Firm has submitted method verification studies including specificity, accuracy and precision.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate No. ZJ20180033 of M/s Zhejiang Tianyu Pharmaceutical Co., Ltd., No.15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China issued by China Food and Drug Administration valid till 14-03-2023
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No# TY121643 dated 12th July 2021 in the name of M/s Titlis Pharma Lahore from M/s Zhejiang Tianyu Pharmaceutical Co., Ltd., for import of 20kg Montelukast Sodium Batch No# 11001-210505. ***However the invoice is not attested by AD (I&E) DRAP field office***
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (accelerated)

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.2	• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while name mentioned on DML is M/s Titlis Pharma., Clarification is required	
3.2.S.4	• Justification is required for not including the test for enantiomeric purity in drug substance specification by drug product manufacturer as recommended by USP. • Firm have used isocratic method for assay test with mobile phase composition of solution A and solution B (40:60) while USP recommends gradient method	

Table 1

Time (min)	Solution A (%)	Solution B (%)
0	60	40
3.0	60	40
16.0	49	51

- Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.
- Submit readable copy of Certificate of Analysis of the same batch of drug substance used during product development and stability studies from Drug Substance manufacturer.

3.2.S.5

- COA of primary / secondary reference standard including source and lot number shall be provided.

3.2.P.2

- Justify the difference in qualitative composition of applied product from that of reference / innovator product.

Applied product	Montelukast 4 mg Granules
Montelukast sodium	Montelukast sodium
Dextrose	Mannitol
	Hydroxy propyl cellulose
	Tribasic sodium phosphate
	Magnesium Stearate

- Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product?
- CDP of the applied product has not been submitted.
- Only protocol for CDP is submitted

3.2.P.5

- Clarification is required as the method of preparation and concentration of standard solution in analytical method of dissolution test is different from USP.
- Firm have used isocratic method for assay test with mobile phase composition of solution A and solution B (30:70) while USP recommends gradient method

Table 1

Time (min)	Solution A (%)	Solution B (%)
0	48	52
5	45	55
12	45	55
22	25	75
23	25	75
25	48	52
30	48	52

3.2.P.6

- Clarification is required since the submitted COA of reference / working standard states that it follows in house specifications while the product monograph is available in USP

3.2.P.8

- Submit DRAP attested documents for the procurement of API.
- Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time conditions)

Previous Decision (M-323rd –RB (6th -8th December 2022) (Publication date of Minutes; 10th January 2023): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's Response (6th June 2023):

Section	**Observations**	**Response**

<table>
<tr><td>1.3.2</td><td>• The name of applicant as per form 5F is M/s Titlis Pharma (Pvt.) Limited., while name mentioned on DML is M/s Titlis Pharma., Clarification is required</td><td>The firm submitted that the title of our company has been changed in 279th meeting of Central Licensing Board held on 18th February 2021, and the new approved title is “Titlis Pharma (Private) Limited”. The change of title approval letter No. F. 1-11/2009-Lic (Vol-I) from Central Licensing Board in the name of “Titlis Pharma (Private) Limited” is submitted.</td></tr>
<tr><td>3.2.S.4</td><td>• Justification is required for not including the test for enantiomeric purity in drug substance specification by drug product manufacturer as recommended by USP.
• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.
• Submit readable copy of Certificate of Analysis of the same batch of drug substance used during product development and stability studies from Drug Substance manufacturer.</td><td>• The firm submitted that we have imported Montelukast Sodium from Zhejiang Tianyu Pharmaceutical Co., Ltd, which is well reputed API manufacturer and supplying its Montelukast Sodium to leading companies of Pakistan like Highnoon Laboratories, CCL Pharmaceuticals, Sami Pharmaceuticals, Getz Pharma, and The Searle Company limited.
Our API manufacturer Zhejiang Tianyu Pharmaceutical Co., Ltd has performed the test for Enantiomeric purity and we rely on our API Manufacturer for Enantiomeric purity test. (COA of Drug Substance Manufacturer is attached for reference).
• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is submitted.
• Readable copy of Certificate of Analysis of the same batch of drug substance used during product development and stability studies from Drug Substance manufacturer is submitted.</td></tr>
<tr><td>3.2.S.4</td><td colspan="2">• Firm have used isocratic method for assay test with mobile phase composition of solution A and solution B (40:60) while USP recommends gradient method
Table 1
<table><tr><th>Time (min)</th><th>Solution A (%)</th><th>Solution B (%)</th></tr><tr><td>0</td><td>60</td><td>40</td></tr><tr><td>3.0</td><td>60</td><td>40</td></tr><tr><td>16.0</td><td>49</td><td>51</td></tr></table>Firm’s Response:
• The firm submitted that we have revised our testing method and now implemented the gradient method for assay testing truly according to the USP (revised method is submitted)
• We have also tested the API as per our revised method. (Revised method and chromatogram are submitted).</td></tr>
<tr><td>3.2.S.5</td><td>• COA of primary / secondary reference standard including source and lot number shall be provided.</td><td>Copy of Certificate of analysis of primary / secondary reference standard is submitted.</td></tr>
<tr><td>3.2.P.2</td><td>• Justify the difference in qualitative composition of applied product from that of reference / innovator product.<table><tr><td>Applied product</td><td>Montelukast 4 mg Granules</td></tr><tr><td>Montelukast sodium</td><td>Montelukast sodium</td></tr><tr><td>Dextrose</td><td>Mannitol</td></tr><tr><td></td><td>Hydroxy propyl cellulose</td></tr></table></td><td>• The firm submitted that as per literature review, it is notable that the active ingredient and all the excipients used in our formulation are inert, and are compatible with active pharmaceutical ingredient of Montit sachet 4mg. Moreover, their safety and compatibility have also been established as no harsh effect has been observed in our stability studies.
• The firm further stated that we have also performed Drug Excipients Compatibility</td></tr>
</table>

<table>
<tr>
<td></td>
<td>
<table>
<tr><td></td><td>Tribasic sodium phosphate</td></tr>
<tr><td></td><td>Magnesium Stearate</td></tr>
</table>
• Justify why Pharmaceutical equivalence of the applied product has not been performed against the innovator product?
• CDP of the applied product has not been submitted.
• Only protocol for CDP is submitted
</td>
<td>studies, which concludes that all the excipients are inert and has no harsh effect on product stability (Reports are submitted).
• The firm submitted that as the innovator product is not registered in Pakistan therefore, Pharmaceutical equivalence of Montit 4mg Sachet was performed against the reference product Montiget 4mg Sachet manufactured by Getz Pharma (Private) Limited. (Reports are submitted).
• As the innovator product is not registered in Pakistan therefore, Comparative Dissolution Profile of Montit 4mg Sachet was performed against the reference product Montiget 4mg Sachet manufactured by Getz Pharma (Private) Limited in Acid media (pH 1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range. (Reports are submitted).
• However, Innovator product singulair 4mg granules is registered in Pakistan
</td>
</tr>
<tr>
<td>3.2.P.5</td>
<td>• Clarification is required as the method of preparation and concentration of standard solution in analytical method of dissolution test is different from USP.</td>
<td>• The firm submitted that method of preparation and concentration of standard solution in analytical method of dissolution test is same per USP. There was a typographic error in already submitted method. However, the calculation sheet was accurately same as that of USP method. Moreover, we have also revised our testing method and the revised method is submitted.
• However the concentration of standard solution in dissolution test is still not as per USP monograph and firm have submitted details of dissolution test 1 in reply while in original dossier it was dissolution test 3.</td>
</tr>

3.2.P.6	• Clarification is required since the submitted COA of reference / working standard states that it follows in house specifications while the product monograph is available in USP		The firm submitted that we have revised our testing method and manufactured 3 new batches (Batch numbers: MT-04, MT-05 and MT-06) for performance of accelerated and long run stability testing by using gradient method for assay testing truly according to the USP and "0", & 3rd month testing has been completed and results are complying the Specs. The firm further stated that we have used the working standard (Batch No: WRS 20221017) that complies with the USP Specifications for the testing of our New Batches. (COA of reference standard used for testing of our product is enclosed herewith)	
3.2.P.8	• Submit DRAP attested documents for the procurement of API. • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time conditions)		• Firm has submitted copy invoice No. TY121643 dated 12-07-2021 for import of 20kg Montelukast Sodium in name of M/s Titlis Pharma attested by AD (I&E) DRAP Lahore dated 15-07-2021. • Record of Digital data logger for temperature and humidity monitoring of stability chambers at real time conditions is submitted	

Decision: Deferred for submission of following:

- **Fee of Rs. 30,000/- for revision in stability data as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Clarification as the method of preparation and concentration of standard solution in analytical method of dissolution test is different from USP monograph.**
- **Submission of 6th month time point stability data of the newly developed trial batches**

Case No. 09: Routine Registration applications of Human drugs on Form 5-F (Local)

724.	Name, address of Applicant / Marketing Authorization Holder	M/s Maxitech Pharma (Pvt) Ltd., Plot No. E-178, S.I.T.E. Super Highway, Phase II, Karachi
	Name, address of Manufacturing site.	M/s Maxitech Pharma (Pvt) Ltd., Plot No. E-178, S.I.T.E. Super Highway, Phase II, Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted copy of routine GMP inspection report dated 07-07-2021 which conclude as: Based on the stated facts and keeping in view the attitude of firm towards constant improvements their current GMP compliance level is rated a GOOD.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-12/2012-Lic dated 25-11-2016 which specifies ointment / cream/ lotion (General) section
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales

	Dy. No. and date of submission	Dy. No 3330 dated 03-02-2022
	Details of fee submitted	Rs.75,000/- dated 17-11-2021 (Deposit slip#35586726772)
	The proposed proprietary name / brand name	**Eurisa 2% Ointment**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Gram Contains: Crisaborole……20mg
	Pharmaceutical form of applied drug	Topical ointment
	Pharmacotherapeutic Group of (API)	PDE-4 Inhibitor (Phosphodiesterase-4 inhibitor)
	Reference to Finished product specifications	N/A
	Proposed Pack size	10gm, 20gm, 30gm
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	EUCRISA (crisaborole) 2% (w/w) ointment, USFDA Approved EUCRISA Crisaborole Ointment, 2 % Health Canada Approved STAQUIS crisaborole 2% w/w ointment TGA Approved
	For generic drugs (me-too status)	N/A
	Name and address of API manufacturer.	M/s Fujian Jinshan Zhundian Pharmaceutical Co., Ltd., Jintang Industry Zone, Shaowu City, Fujian Province China
	Module-II (Quality Overall Summary)	Not submitted as per requirement
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 25 ± 2°C / 60 ± 5% RH) for 24 months Accelerated: 40 ± 2°C / 75 ± 5% RH for 6 months Batches: (170101, 170102, 170103)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Staquis ointment 2% by M/s Pfizer Pharma USA**.**
	Analytical method validation/verification of product	Firm has submitted method validation studies including Specificity, Linearity, range, Accuracy, Precision-Repeatability, Intermediate Precision, detection limit, quantitation limit, Robustness.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 6 dated 31-01-2020 for import of 0.5kg of Crisaborole in name of M/s Maxitech Pharma (Pvt) Ltd attested by AD (I&E) DRAP Karachi dated 31-01-2020.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

THERAPEUTIC INDICATIONS

EUCRISA is a phosphodiesterase 4 inhibitor indicated for topical treatment of mild to moderate atopic dermatitis in adult and paediatric patients 3 months of age and older.

Section	Observations	Response
1.5.6	• Mention the reference specifications of the finished product	• No specifications submitted
1.6.5	• Name and address of drug substance manufacturer along with valid GMP certificate / DML issued by relevant regulatory authority of country of origin is required	• No details submitted in this section • The firm has submitted copy of cGMP certificate of M/s Fujian Jinshan Zhundian Pharmaceutical Co., Ltd., Jintang Industry Zone, Shaowu City, Fujian Province China issued by China Food and Drug Administration China valid till 22-02-2021. Firm has submitted declaration letter from API manufacturer wherein API manufacturer has informed that according to regulations of CFDA that GMP and GSP certification will be cancelled. The CFDA authority is not issuing the GMP certificates for now.
2.3	• Submit module 2 as per the CTD guidance document without referring to other modules	• Module 2 of form 5F is submitted
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for	• Firm has submitted copy of Batch Manufacturing Record (BMR) for all the

	which stability studies data is provided in Module 3 section 3.2.P.8.3>	batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3> • BMR shows pack size **15gm** which is different from that given in proposed pack size in module 1.
3.2.S.4	• Justification is required for not including the test for polymorphic form and palladium content in drug substance specification by drug substance manufacturer as recommended by innovator product review document • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug product is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance shall be submitted. • Provide results of analysis of relevant batch of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis of the same batch from Drug Substance manufacturer	• The firm has submitted declaration that crisaborole manufactured by API manufacturer is the most stable form i.e., form-I which is supported by XRPD spectra. The polymeric form identification is part of developmental studies that has been done as per innovator study. *No clarification for not including palladium content in drug substance specification by drug substance manufacturer is provided* • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug product is submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is not submitted. • COA of Drug Substance from Drug Product manufacturer and Drug Substance manufacturer is provided
3.2.S.7	• Submit stability study of drug substance till claimed shelf life as per zone-IV-A conditions	Stability study of drug substance till claimed shelf life as per zone-IV-A conditions is submitted Stability study conditions: Real time: 30 ± 2°C / 65 ± 5% RH) for 24 months Accelerated: 40 ± 2°C / 75 ± 5% RH for 6 months • Batches: (190601, 190602, 190603)
3.2.P.2	• Justification is required for using 2% overage in the formulation • Submit pharmaceutical equivalence report of the applied product	• The firm submitted that at the time of product development overage was proposed but after detail study it has been reviewed that no overage is required and all trial batches were manufactured without overages. • Pharmaceutical equivalence report of the applied product is not submitted
3.2.P.5	• Justification is required for not including the test for content uniformity in container, EDTA, apparent viscosity, package integrity and minimum fill as recommended by innovator product review document • Justification is required for using different chromatographic conditions in analytical method validation(mobile phase; purified water:ACN:TFA 650ml;350ml;0.5ml) wavelength 250nm, flow rate 2ml/min, column c18, 4.6mmx150mm; injection volume 10 ul) than that submitted in analytical procedure (mobile phase A; purified water:ACN:Acetic acid 950;50;5, Mobile phase B purified water:ACN:Acetic acid 50;950;5…mix mobile phase A&B 550;450)	• The firm submitted that test for content uniformity in container, EDTA, apparent viscosity, package integrity will be implemented on commercial batches and minimum fill test is already performed at initial stage. Now included in revised STM. • Firm has submitted revised testing method • Assay limits (90-115%) mentioned in COA is a typographical error. The specification limit is (90-110%) which is mentioned in stability data as well.

	wavelength 254nm, flow rate 1ml/min, column c18, 4.6mmx25cm; 5umpacking, injection volume 10 ul) • Assay limits mentioned in finished product specification is 90-110% while in batch analysis assay limit is mentioned as 90-115% clarify?	
3.2.P.6	• COA of primary / secondary reference standard including source and lot number shall be provided.	• COA of primary / secondary reference standard is not submitted
3.2.P.8	• The retention time of standard and sample solution at both accelerated and real time conditions after 3rd month time point is after 11 min while retention time of standard and sample solution after 6th month time point is after 04 min, clarify • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is required • Submit documents / commercial invoice for the procurement of API with approval from DRAP	• The firm submitted that retention time on 3rd month stability study varied due to the reason that column (C18-4.6mmx250mm) used instead of 150mm length column at that time of stability testing which causes delay in retention time • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted • No documents / commercial invoice for the procurement of API is submitted

Decision: Deferred for submission of following:

- **Reference specifications of the finished product**
- **Details of drug substance manufacturer in section 1.6.5 of module 1 of form 5F**
- **Clarification as the proposed pack size (15gm) of trial batches is different from that proposed in section 1.5.4 of module 1 form 5-F**
- **Clarification for not including palladium content in drug substance specification by drug substance manufacturer**
- **Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance**
- **Pharmaceutical equivalence report of the applied product against the innovator product**
- **Justification for not including the test for content uniformity in container, EDTA, apparent viscosity, package integrity and minimum fill in finished product specifications**
- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **COA of primary / secondary reference standard including source and lot number**
- **Scientific justification for using different length column at different time point (3rd month and 6th month) and stability study conditions.**
- **Documents for the procurement of API with approval from DRAP**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**<u>Empagliflozin:</u>** Firm has submitted copy of GMP certificate in the name of M/s Fuxin Long Rui Pharmaceutical Co., Ltd, Fluoride Industrial Park, Fuxin City, Liaoning Province - 123000, China issued by Fuxin Food and Drug Administration China valid upto 27-09-2020. Firm has submitted copy of DML (Certificate# Liao20150233) in the name of M/s Fuxin Long Rui Pharmaceutical CO., Ltd., China valid upto 20-12-2022. **<u>Metformin HCl:</u>**

		The firm has submitted GMP certificate for M/s Aarti Drugs Limited., (Unit-II) Plot No. 211 & 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat State India issued by Food & Drug Control Administration Gandhinagar India. The certificate is valid till 09-01-2020
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of invoice No. HN190108-C dated 08-01-2019 for import of 0.41Kg of Empagliflozin (Batch No# E-20181027-D02-E06-01) in name of M/s Welwrd Pharmaceuticals attested by AD (I&E) DRAP Peshawar dated 23-01-2019. Firm has also submitted copy of form 6 dated 23-01-2019 for import of 0.41Kg of Empagliflozin in name of M/s Welwrd Pharmaceuticals attested by AD (I&E) DRAP Peshawar dated 23-01-2019. **Metformin HCl:** Firm has submitted copy of invoice No. EXP/1678/18-19 dated 21-11-2018 for import of 500Kg of Metformin HCl (Batch No# MEF/18091912) in name of M/s Welwrd Pharmaceuticals attested by AD (I&E) DRAP Peshawar dated 05-12-2018.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, summary data sheets etc. Raw data sheets and COAs are not submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted copy of cGMP certificate issued on 10-06-2022 based on inspection conducted on 30-03-2022
1.4.1.	• The applied drug product is a generic drug product while you have applied for a new drug product, clarify	• Firm has corrected the application type in form 5F as Generic drug product
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer for Empagliflozin and Metformin issued by relevant regulatory authority of country of origin is required • Address of M/s Aarti drugs Limited in submitted application is different than that mentioned in GMP certificate, clarify	**Empagliflozin:** The firm has submitted written confirmation for active substance exported to EU to M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China for Active substance Empagliflozin confirming that the manufacturing plant complies with requirement of Chinese Good Manufacturing practices. This certificate is valid till 25-05-2024 Firm has also submitted copy of DML (License#Liao20150233) of M/s Fuxin Long Rui Pharmaceutical Co., Ltd, China valid upto 17-11-2027 verified from NMPA website. **Metformin HCl:** The firm has submitted GMP certificate for M/s Aarti Drugs Limited., (Unit-II) Plot No. 211 & 213, Road No.2 G.I.D.C., Sarigam, Dist.: Valsad, Gujarat State India issued by Food & Drug Control Administration Gandhinagar India. *The certificate is valid till 19-03-2023*

2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	• Firm has submitted copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>
3.2.S.3	• Submit details in this section as per the guidance document	• Details in this section are submitted as per guidance document
3.2.S.4	• Copies of the Drug substance analytical procedures used for routine testing of the Drug Substance Metformin HCl by drug substance manufacturer is required. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl by Drug Product manufacturer is required. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Empagliflozin by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance Metformin HCl and Empagliflozin shall be submitted. • Clarification is required as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC method as recommended by USP. • Justification is required for not performing test for identification (IR & Reaction of Chloride) and residue on ignition for drug substance metformin HCl in batch analysis by drug product manufacturer as recommended by USP • Justification is required for not performing test for identification and residue on ignition for drug substance empagliflozin in batch analysis by drug product manufacturer as recommended by drug substance manufacturer. • Provide Certificate of Analysis of the relevant batch of Drug Substance used during product development and stability studies batch from Drug Substance manufacturer.	• Copies of the Drug substance analytical procedures used for routine testing of the Drug Substance Metformin HCl by drug substance manufacturer is not submitted. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl by Drug Product manufacturer is not submitted. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Empagliflozin by Drug Product manufacturer is not submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance Metformin HCl and Empagliflozin is submitted • *No response submitted* • *No response submitted* • *No response submitted* • Certificate of Analysis of the relevant batch of Drug Substance used during product development and stability studies from Drug Substance manufacturer is submitted. However, the batch No# (MEF/19040649) of Metformin HCl is different from that mentioned in batch analysis of drug product manufacturer.
3.2.P.2	• Justify why Pharmaceutical equivalence and CDP of the applied product has not been performed against the innovator product? • Submit detailed CDP studies including details of dissolution parameters, dissolution media, sampling time point and details of analytical parameters used and f2 factor calculation	• Firm has again submitted Pharmaceutical Equivalence of applied product against the brand that is Empaa-M 5/500mg tablet by M/s Weatherfolds Pharma by performing quality tests (Identification, Assay, Dissolution, weight variation). • Firm has submitted details of CDP studies including details of dissolution parameters, dissolution media, sampling time point and details of analytical parameters. *However CDP has been performed against the comparator product Empaa-M 5/500mg tablet by M/s Weatherfolds Pharmaceuticals.*

3.2.P.5	• Justification is required for not including the test for assay in finished product specifications • Detailed analytical procedures used for testing the drug product shall be provided. • Complete analytical method validation studies including specificity test shall be submitted • Justification is required for not performing test for uniformity of dosage units (content uniformity/weight variation) in batch analysis as recommended by innovator product review document • Submit readable copies of batch analysis report of three batches	• Firm has submitted revised finished product specifications containing content uniformity test, time point for dissolution studies and details of assay test. • Firm has submitted detailed analytical procedures used for testing the drug product shall be provided • Firm has submitted analytical method validation studies including results of specificity test. • Firm has submitted copy of revised batch analysis report containing results of content uniformity test
3.2.P.6	Clarification is required whether the same Reference Standards or Materials of empagliflozin was used for test and analysis of drug product as the expiry date mentioned on the COA of Reference Standards or Materials is 18.04.2018 while manufacturing date of drug product as per submitted COA is 08-2020	• Firm has not submitted any clarification. However, Firm has submitted COA of another working standard. The expiry date mentioned on this reference standard is 05-08-2020 and manufacturing of trial batches is subsequent to this date.
3.2.P.8	• Submit complete analytical record of stability study including summary data sheets, COA, Raw data sheets, and chromatograms. Chromatograms of accelerated stability study are attached with summary sheet of real time study and vice versa • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted	• Firm has submitted analytical record of stability study including summary data sheets, COA. *However detailed Raw data sheets and chromatograms are not submitted* • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Decision: Deferred for submission of following:

- **Valid GMP certificate / DML of drug substance manufacturer for Metformin issued by relevant regulatory authority of country of origin**
- **Copies of the Drug substance analytical procedures used for routine testing of the Drug Substance Metformin HCl by drug substance manufacturer.**
- **Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug Substance Metformin HCl and Empagliflozin by Drug Product manufacturer.**
- **Clarification as the drug substance manufacturer has performed assay of drug substance Metformin HCl in batch analysis by potentiometric method instead of HPLC method as per USP monograph.**
- **Justification for not performing test for identification (IR & Reaction of Chloride) and residue on ignition for drug substance metformin HCl in batch analysis by drug product manufacturer as per USP monograph**
- **Justification for not performing test for identification and residue on ignition for drug substance Empagliflozin in batch analysis by drug product manufacturer as recommended by drug substance manufacturer.**
- **Certificate of Analysis of the relevant batch of Drug Substance used during product development and stability studies batch from Drug Substance manufacturer.**
- **Pharmaceutical equivalence and CDP of the applied product against the innovator product**
- **Clarification whether the same Reference Standards or Materials of empagliflozin was used for test and analysis of drug product as the expiry date mentioned on the COA of Reference Standards or Materials is 18.04.2018 while manufacturing date of trial batches is subsequent to this date.**
- **Detailed Raw data sheets and chromatograms are not submitted**
- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

726.	Name, address of Applicant / Marketing	M/s Ophth Pharma (Pvt) Ltd., Plot No. 241, Sector-24,

	Authorization Holder	Korangi Industrial Area, Karachi, Pakistan
	Name, address of Manufacturing site.	M/s Ophth Pharma (Pvt) Ltd., Plot No. 241, Sector-24, Korangi Industrial Area, Karachi, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 30259 dated 05-11-2021
	Details of fee submitted	Rs.20,000/- dated 26-02-2021
	The proposed proprietary name / brand name	**Ophth Cyclovir Topical Cream 5%**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Gram Contains: Acyclovir BP……..…50mg/g
	Pharmaceutical form of applied drug	Topical Cream
	Pharmacotherapeutic Group of (API)	Antiviral
	Reference to Finished product specifications	BP Specifications
	Proposed Pack size	10gm tube
	Proposed unit price	Rs. 800
	The status in reference regulatory authorities	ZOVIRAX Cream 5% w/w, USFDA Approved
	For generic drugs (me-too status)	Hepex Cream 5% by M/s Evolution Pharmaceuticals (Reg# 091965)
	GMP status of the Finished product manufacturer	The firm has submitted GMP certificate issued on 02nd October 2020 based on inspection conducted on 27th September 2019
	Name and address of API manufacturer.	M/s Hubei Yitai Pharmaceutical Co. Ltd., Fengchengyuan, Suburban District of Tianmen City, Hubei Province, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, batch analysis and stability studies of drug substance
	Stability studies	Stability study conditions: ***Real time: 30°C ± 2°C / 75% ± 5%RH for 12 months*** Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches:(02190501, 02190502, 02190503)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications,

		analytical procedure and its verification studies, batch analysis and justification of specification, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence has been established against the brand that is Zovirax Topical Cream by M/s Barrett Hodgson by performing quality tests (appearance, identification, fill weight, drug release).
	Analytical method validation/verification of product	Not submitted

STABILITY STUDY DATA

Manufacturer of API	M/s Hubei Yitai Pharmaceutical Co. Ltd., Fengchengyuan, Suburban District of Tianmen City, Hubei Province, China		
API Lot No.			
Description of Pack (Container closure system)	Printed aluminum tube with nozzle and cap packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 12 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12 (Months)		
Batch No.	TB 101	TB 102	TB 103
Batch Size	5 Kg	5 Kg	5 Kg
Manufacturing Date	12-2019	12-2019	12-2019
Date of Initiation	9-12-2019	17-12-2019	26-12-2019
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	No GMP certificate submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm have submitted Data of stability batches supported by respective documents like UV spectra, raw data sheets and summary data sheets etc. ***Raw data sheets does not show the storage conditions and time point at which performance is done***
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.4	• Submit valid copy of DML as the submitted DML is expired on 04-05-2021 and renewal of DML submitted on 17-05-2021	

<table>
<tr><td>1.3.5</td><td>• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted</td><td></td></tr>
<tr><td>1.6.5</td><td>• Valid GMP certificate / DML of drug substance manufacturer issued by relevant regulatory authority of country of origin is required</td><td></td></tr>

• Submit data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.</td><td></td></tr>
</table>

Previous Decision (M-322-DRB): Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the firm:

Section	Observations	Response
1.3.4	• Submit valid copy of DML as the submitted DML is expired on 04-05-2021 and renewal of DML submitted on 17-05-2021	Firm has submitted valid copy of DML renewed w.e.f. 05-05-2021
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	Firm has submitted cGMP certificate issued on 29th September 2021 based on inspection conducted on 27th September 2021.
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer issued by relevant regulatory authority of country of origin is required	Firm has submitted copy of cGMP certificate of M/s Hubei Yitai Pharmaceutical Co. Ltd., Fengchengyuan, Suburban District of Tianmen City, Hubei Province, China issued by Hubei Provincial Food & Drug Administration valid up to 17-09-2022.
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	Not submitted
3.2.S.4	• Copies of the analytical procedures used for routine testing of the Drug substance by Drug substance and drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Copies of the analytical procedures used for routine testing of the Drug substance by Drug substance and drug Product manufacturer is submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is submitted.
3.2.S.4.4	• Batch analysis of drug substance by drug substance manufacturer follow USP specifications while Finished product manufacturer have tested the API as per BP monograph, clarification is required • Drug substance was tested on 18.05.2020 as per submitted COA of API by drug product manufacturer while batches were manufactured in 12-2019 before testing of API, clarify	• *No clarification is submitted* • Firm has submitted another COA of API by drug product manufacturer in which date of analysis has been changed to 29-10-2019
3.2.S.5-6	• Container closure system data and reference standard details are not submitted	Details of container closure system and COA of primary / secondary reference standard are submitted
3.2.S.7	• Long term stability data of drug substance is submitted for 12 months only	Firm has submitted stability study data of other batches of drug substance at real time and accelerate conditions. Stability study conditions: Real time: 30˚C ± 2˚C / 75% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches:(02150501, 02150502, 02150503)
3.2.P.1	• Justify the use of butylene paraben and methyl paraben in formulation as the innovator product does not contain these excipients. Applied product | Innovator product (ZOVIRAX)	• The firm has not submitted any justification for use of butylene paraben and methyl paraben in formulation. However, the firm has changed the composition of applied formulation which does not contain butylene paraben and methyl paraben.

	<table><tr><td>Stearic acid powder</td><td>cetostearyl alcohol,.</td></tr><tr><td>Ethylene glycol monostearate</td><td>mineral oil,</td></tr><tr><td>Isopropyl myristate</td><td>poloxamer 407,</td></tr><tr><td>Tween 80</td><td>propylene glycol,</td></tr><tr><td>Butylene paraben</td><td>sodium lauryl sulfate,</td></tr><tr><td>Propylene glycol</td><td>water</td></tr><tr><td>Methyl paraben</td><td>white petrolatum</td></tr><tr><td>Sorbitol solution 70%</td><td></td></tr><tr><td>Lavender oil</td><td></td></tr><tr><td>Purified water QS</td><td></td></tr></table> • Pharmaceutical equivalence of applied product states that product follows the USP specification, while you have applied for BP specifications for the applied product, justification is required • Process validation protocols for applied product shall be submitted	<table><tr><td>Applied product</td><td>Innovator product (ZOVIRAX)</td></tr><tr><td>Cetostearyl alcohol,</td><td>cetostearyl alcohol,.</td></tr><tr><td>Liquid Parafin,</td><td>mineral oil,</td></tr><tr><td>propylene glycol,</td><td>propylene glycol,</td></tr><tr><td>sodium lauryl sulfate,</td><td>sodium lauryl sulfate,</td></tr><tr><td>white soft paraffin</td><td>white petrolatum</td></tr><tr><td></td><td>poloxamer 407,</td></tr><tr><td>Purified water q.s</td><td>water</td></tr></table> • No justification is submitted. However firm has submitted Pharmaceutical Equivalence against the brand that is Clovirex Cream by M/s Brookes Pharmaceuticals by performing quality tests (appearance, identification, fill weight, drug release, assay). • Process validation protocols for applied product is not submitted
3.2.P.5	• The limits of assay test as per monograph of BP pharmacopeia is 95-105% while you have applied 45-55mg/g (90-110%) which is different from BP, clarification is required. • Clarification is required since procedure of assay test given in analytical procedure is by UV while BP monograph for applied products states performance by HPLC. • Submit Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) for drug product as per BP method. • The copies of complete analysis of at least two batches shall be provided while you have provided batch analysis of only one batch, justify?	• Firm has submitted revised finished product specifications in which limits of assay test are revised as per BP monograph 47.5-52.5mg/g (95-105%) • Firm has submitted revised analytical procedure in which method of assay test is by HPLC as per BP monograph (BP-2022). *Firm has also submitted UV spectrophotometric method for assay test stating that it is as per BP 2003.* • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) *for drug product is performed as per UV method instead of HPLC.* • Complete batch analysis of three batches are submitted
3.2.P.6	• No details of reference standard is submitted	COA of primary / secondary reference standard is submitted
3.2.P.8	• Clarification is required since assay test is performed by UV throughout stability study instead by HPLC as recommended by BP. • Submit documents for the procurement of API with approval from DRAP (in case of import). • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) • Submit data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	• No clarification is submitted • Firm has submitted copy of invoice No. HYP191018-1 dated 18-10-2019 for import of 25kg of Acyclovir USP (Batch# 02190314) in name of M/s Ophth Pharma (Pvt.) Ltd., attested by AD (I&E) DRAP Karachi dated 24-10-2019 • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted • Firm has only submitted summary data sheet of real time conditions. COA and UV spectra for initial time point is also submitted. *Summary data sheet for accelerated conditions is not submitted. Stability studies data supported by attested respective documents like chromatograms, Raw data sheets, COA are not submitted*

Decision: Deferred for submission of following:

- **Valid GMP certificate / DML of drug substance manufacturer issued by relevant regulatory authority of country of origin**
- **Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>**
- **Clarification for following BP monograph in Batch analysis of drug substance by drug product manufacturer instead of USP monograph by drug substance manufacturer**
- **Clarification as Drug substance was tested on 18.05.2020 as per submitted COA of API by drug product manufacturer while batches were manufactured in 12-2019 before testing of API**
- **Process validation protocols for applied product**
- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**
- **Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) for drug product as per BP method.**
- **Submit the stability study by using pharmacopial method/specs.**
- **Stability summary data sheet for accelerated conditions is not submitted. Stability studies data supported by attested respective documents like chromatograms, Raw data sheets, COA are not submitted**

Case No. 10: Deferred Registration applications of Human drugs on Form 5-F (Local)

727.	Name, address of Applicant / Marketing Authorization Holder	M/s Genix Pharma (Pvt.) Ltd., 44-45B Korangi Creek Road Karachi
	Name, address of Manufacturing site.	M/s Genix Pharma (Pvt.) Ltd., 44-45B Korangi Creek Road Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Not submitted
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 2-12/93-Lic (Vol-V) dated 20-09-2021 which specifies Liquid Injection (Ampoule, Vial, Infusion) (General) section
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 1013 dated 11-01-2022
	Details of fee submitted	PKR 75,000/-: dated: 23-12-2021 (Deposit sip#8155830888)
	The proposed proprietary name / brand name	**Genfer Injection 100mg/2ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 2ml ampoule contains: Ferric hydroxide polymaltose complex equivalent to Iron(III)……100mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Use to treat Iron deficiency
	Reference to Finished product specifications	Innovator Specification
	Proposed Pack size	5's x2ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ferrosig Injection 100mg/2ml by M/s Sigma Company Limited., TGA Approved

	For generic drugs (me-too status)	N/A
	Name and address of API manufacturer.	Biofer S.p.A. Legal headquarters and manufacturing site: Via Canina, 2 - 41036 MEDOLLA (MO), Italy
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30 ± 2°C / 65 ± 5% RH) for 36 months Accelerated: 40 ± 2°C / 75 ± 5% RH for 6 months Batches: (FPJ 002 FP 01, FPJ 003 FP 01, FPJ 004 FP 01)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Hemafer 100mg/2ml Injection by M/s UNI-PHARMAKLEON LAORATORIES S.A by performing quality tests (Identification, pH, Assay)
	Analytical method validation/verification of product	Firm has submitted method validation studies including Specificity, Linearity, Accuracy, Precision-Repeatability, Intermediate Precision, Robustness.

No. of Batches		03
DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of GMP certificate in name of Biofer S.p.A. Legal headquarters and manufacturing site: Via Canina, 2 - 41036 MEDOLLA (MO), Italy issued by Italian Medicines Agency valid upto three years from the date of inspection (date of inspection 28/06/2019)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) for three months is submitted

Remarks of Evaluator [XI]:

THERAPEUTIC INDICATIONS

FERROSIG is indicated for the treatment of iron deficiency anaemia in the following circumstances:

- When oral therapy is contraindicated.
- When enteric absorption of iron is defective.
- When patient non-compliance or persistent gastrointestinal intolerance makes oral therapy impractical.

Section	Observations	Response
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted copy of cGMP certificate issued on 07-10-2021 based on inspection conducted on 15-06-2021.
1.5.5	• Submit correct Pharmacological class of the drug substance with proper reference	• Parenteral iron preparations. Anti-anaemic
1.6.5	• Valid GMP certificate / DML of drug substance manufacturer issued by relevant regulatory authority of country of origin is required	The firm submitted clarification from AIFA Italy stating that due to restrictions caused by covid-19, the period of validity of the GMP certificate is automatically extended until the end of 2023. Onsite inspections will resume as soon as there is a consensus that the period of public health crisis has passed
3.2.S.4	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer is required.	• Not submitted
3.2.S.5	• COA of primary / secondary reference standard including source and lot number shall be provided.	According to Biofer MOA no working standard are required for release analysis of the API Ferric Hydroxide Polymaltose Complex so, we cannot provide any CoA.
3.2.S.7	• Results of Assay test for iron is not submitted in stability study of drug substance, clarify	Firm submitted revised real time stability study data of drug substance wherein Assay test for iron and polymaltose has been performed. However, time point of stability study as per ICH guideline is not submitted. Furthermore accelerated stability study data is not submitted.

3.2.P.1	• Justification is required for not using hydrochloric acid or sodium hydroxide for pH adjustment in formulation	• In development of Genfer Injection 100mg/2ml, the active substance (Ferric Hydroxide Polymaltose Complex Inj.Grade) is dissolved in water for injection and mix until homogenization of solution will be formed. Then Check the pH of the solution. pH limit = 5.2 – 6.50. • The pH of the solution observed in the range as described above therefore no need to the addition of HCl or NaOH for pH adjustment in the formulation. • The product kept on stability and no changes observed in pH of the formulation and any other physical and chemical parameters. • Stability studies also demonstrated that the formulation is stable without the addition of pH adjusting agents.
3.2.P.2	• Submit details of country of origin of reference product against which pharmaceutical equivalence studies have been performed. • Justification is required for not performing test for bacterial endotoxin and particulate matter in pharmaceutical equivalence as submitted in finished product specifications	• The firm submitted details of country of origin: UNI-PHARMA KLEON TSETIS Pharmaceutical Laboratory S.A 14Km National Road 1, GR-145 64K, Kifissia GREECE • The firm has submitted revised pharmaceutical equivalence report wherein results of test for bacterial endotoxin and particulate matter has been submitted
3.2.P.5.2	• You have applied for innovator specifications in module 1 section 1.5.6 while in-house specification in this section, justify?	The firm submitted that this is typographic error and submitted revise specification stating innovator specifications
3.2.P.6	• COA of primary / secondary reference standard including source and lot number shall be provided.	We have conducted assay of Iron by complexometric titration, in this method working standard is not required.
3.2.P.8	• You have written liraglutide on initial page of summary sheet while applied product is ferric hydroxide polymaltose complex, clarify? • Compliance Record of HPLC software 21CFR & audit trail reports on product testing is required • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) upto 6th months is required • Submit documents for the procurement of API with approval from DRAP (in case of import). • Submit 6th month stability data of applied product	• The firm submitted that this is typographic error and submitted corrected summary reports. • Audit trial is not applicable as product testing is carried out via titration method • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted • Firm has submitted copy of invoice for import of 01Kg of Ferric Hydroxide Polymaltose Complex (Batch No# FPJ014FV20) in name of M/s Genix Pharma (Pvt.) Ltd., attested by AD (I&E) DRAP Karachi dated 26-04-2021. • 6th month stability data of applied product is submitted

Previous Decision (M-326-DRB): Deferred for submission of following:

- Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer is required.
- Stability study data of drug substance as per zone IV-A conditions till claimed shelf life.
- Pharmaceutical equivalence of applied product against innovator product

- Fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Firm's Response:

Section	Observations	Response
1	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer is required.	• Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer is submitted
2	• Stability study data of drug substance as per zone IV-A conditions till claimed shelf life.	Firm submitted revised stability study data of drug substance wherein Assay test for iron has been performed. Stability study conditions: Real time: 30 ± 2°C / 65 ± 5% RH) for 60 months Accelerated: 40 ± 2°C / 75 ± 5% RH for 6 months Batches: (FPJ 001 FV 17, FPJ 005 FV 16, FPJ 006 FV 15)
3	• Pharmaceutical equivalence of applied product against innovator product	• The firm has submitted pharmaceutical equivalence against Ferrosig 100mg/2ml injection by M/s Sigma Company Limited Rowville, VIC, 3176 Australia by performing quality test (Appearance, Identification, pH, Assay, BET, Particulate matter) • The firm has submitted revised pharmaceutical equivalence report wherein results of test for bacterial endotoxin and particulate matter has been submitted
4	• Fee of Rs. 7,500/- for correction/pre-approval changes in specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.	• Firm has submitted fee Rs. 7,500/- for correction/pre-approval changes in specifications vide deposit slip#24404399145.

Decision: Approved with innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

728.	Name, address of Applicant / Marketing Authorization Holder	M/s Bio-Labs (Pvt.) Ltd., Plot No. 145, Industrial Triangle, Kahuta road, Islamabad.
	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt.) Ltd., Plot No. 145, Industrial Triangle, Kahuta road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted GMP certificate issued on 21-05-2019 based upon inspection conduct 23-4-2019, valid upto 22-4-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F. 1-12/89-Lic (Vol-II) dated 23-07-2012 which specifies Lyophilized Vials (General) Section
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Dy. No. and date of submission	Dy. No. 2523 dated 26-01-2022
	Details of fee submitted	PKR 30,000/-: dated 20-12-2021 (Deposit Slip#1799701158)
	The proposed proprietary name / brand name	**Voricol 200mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Voriconazole lyophilized powder…….200mg
	Pharmaceutical form of applied drug	Lyophilized powder
	Pharmacotherapeutic Group of (API)	Antifungal
	Reference to Finished product specifications	In-House specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	VFEND 200mg lyophilized powder for injection, USFDA approved
	For generic drugs (me-too status)	V.Zde 200mg/Vial Injection by M/s Neutro Pharma (Reg. No. 097657)
	Name and address of API manufacturer.	M/s Lee Pharma Limited., Survey No. 10/G-1, Gaddapotharam (Village), Jinnaram (Mandal), Sangareddy (District) Telangana State, 502319 India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance. The firm has summarized information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation/verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study.
	Module III (Drug Substance)	Firm has submitted detailed data of drug substance related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at $40^{O} \pm 2^{O}$ C /75% ± 5% RH for 6 months. The real time stability data is conducted at 30^{O}C ± 2^{O} C / 65% ± 5% RH for 60 months. (Batches: VR0411003, VR0411004, VR0411005)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference

		standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand that is Vfend injection by M/s Pfizer by performing quality tests (Identification, pH, Assay).
	Analytical method validation/verification of product	Firm has submitted method validation studies including linearity, range, accuracy, precision, specificity, robustness, LOD, LOQ, system suitability.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate in the name of M/s Lee Pharma Limited., Survey No. 10/G-1, Gaddapotharam (Village), Jinnaram (Mandal), Sangareddy (District) Telangana State, 502319 India issued by Drugs Control Administration Government of Telangana valid upto 16-04-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. 1108/LP/2021-22 dated 18-06-2021 for import of 1.5kg of Voriconazole EP (Batch No# VZFP21019) in name of M/s Bio-Labs (Pvt.) Ltd., attested by AD (I&E) DRAP Islamabad dated 06-07-2021. Firm has also submitted copy of form 6 dated 06-07-2021 for import of 1.5kg of Voriconazole EP in name of M/s Bio-Labs (Pvt.) Ltd., attested by AD (I&E) DRAP Islamabad dated 06-07-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 03 months is submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) upto 03 months is submitted

Remarks of Evaluator [XI]:

Section	Observations
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted
1.6.5	• Valid GMP certificate of drug substance manufacturer issued by relevant regulatory authority of country of origin is required
3.2.S.4	• Clarification is required for use of placebo in specificity test of method verification studies for drug substance
3.2.P.1.3	• Reference shall be provided for recommending the use of 0.9% sodium chloride as diluent for reconstitution
3.2.P.5	• Justification is required for not including the test for water content, appearance and clarity of reconstituted solution, colour of solution, reconstitution time, uniformity of dosage units, osmolality, and particulate contamination in finished product specification as recommended by EMA public assessment report. • Justification is required for not including the test for filled weight in finished product specifications • Submit reference for selecting the limits of pH test in finished product specifications
3.2.P.6	• The submitted COA of Reference Standards or Materials states that it is valid upto 01-08-2021. Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug product as the 3rd month time point and 6th month time stability study have been performed on October 2021 (10-2021) and January 2022 (01-2022).
3.2.P.8	• Submit details of minimum handling capacities of the equipment used in manufacturing of trial batches • Submit stability study data of applied product at 6th month time point • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) upto 06 months is not submitted

Previous Decision (M-326 –RB (14th -16th March 2023) (Publication date of Minutes; 108th May 2023): Board deferred the case for submission of reply to the above cited shortcomings within six months as the board was apprised that the letter of shortcoming has been initially shared with the firm and waiting firm reply.

Firm's Response (19th June 2023):

Section	Observations	
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted copy of cGMP certificate issued on 28th February 2022, based on inspection conducted on 03-08-2021
1.6.5	• Valid GMP certificate of drug substance manufacturer issued by relevant regulatory authority of country of origin is required	• Firm has submitted copy of cGMP certificate in the name of M/s Lee Pharma Limited., Survey No. 10/G-1, Gaddapotharam (V), Jinnaram (M), Sangareddy (D) Telangana State, 502319 India issued by Drugs Control Administration Government of Telangana valid upto 08-05-2023.
3.2.S.4	• Clarification is required for use of placebo in specificity test of method verification studies for drug substance	• The firm submitted that placebo details are mistakenly added in the AMV verification report and protocol of Raw material. The revised report and protocol are submitted.
3.2.P.1.3	• Reference shall be provided for recommending the use of 0.9% sodium chloride as diluent for reconstitution	• The firm submitted that as per EMC assessment report dated, 26 March 2015 "EMA/CHMP/151531/2015 Committee for Medicinal Products for Human Use (CHMP)" Voriconazole is physically compatible and chemically stable when

		reconstituted with water for injection or Sodium chloride 0.9%.
3.2.P.5	• Justification is required for not including the test for water content, appearance and clarity of reconstituted solution, colour of solution, reconstitution time, uniformity of dosage units, osmolality, and particulate contamination in finished product specification as recommended by EMA public assessment report. • Justification is required for not including the test for filled weight in finished product specifications • Submit reference for selecting the limits of pH test in finished product specifications	• Firm has submitted revised SAP wherein test for water content, appearance after reconstitution, reconstitution time, uniformity of dosage units, are included in finished product specification. However, test for osmolality, and particulate contamination are still not included in specifications. • No justification is submitted • No reference provided
3.2.P.6	• The submitted COA of Reference Standards or Materials states that it is valid upto 01-08-2021. Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug product as the 3rd month time point and 6th month time stability study have been performed on October 2021 (10-2021) and January 2022 (01-2022).	• The firm submitted that we have used another working standard at 3rd month and 6th month time. The COA of reference standard is submitted.
3.2.P.8	• Submit details of minimum handling capacities of the equipment used in manufacturing of trial batches • Submit stability study data of applied product at 6th month time point • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is not submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) upto 06 months is not submitted	• Minimum handling capacity of equipment used for trials bathes is 100 vials. • Stability study data of applied product at 6th month time point is submitted • Compliance Record of HPLC software 21CFR & audit trail reports on product testing upto 06 months is submitted • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) upto 06 months is submitted

Decision: Deferred for submission of following:

- **Justification for not including the test for osmolality, filled weight and particulate contamination in finished product specification**
- **Submit reference for selecting the limits of pH test in finished product specifications**
- **Fee of Rs. 7,500/- for correction/pre-approval change in product specifications, as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.**

Case No. 11; Deferred Registration Application of Human Drugs on form 5F (cases of Dr. Akbar Ali): Priority applications as per 257th meeting of RB

	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy.31009 dated No 01-11-2022
	Details of fee submitted	PKR 75,000/-:slip No. 04893286804 dated 25-04-2022
	The proposed proprietary name / brand name	**DIMERE injection 250mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5 ml vial contains: Fulvestrant ……..….250mg
	Pharmaceutical form of applied drug	Solution for Injection
	Pharmacotherapeutic Group of (API)	oestrogen receptor antagonists (L02BA03)
	Reference to Finished product specifications	In house
	Proposed Pack size	2’s
	Proposed unit price	Rs 45,000 /- single dose vial
	The status in reference regulatory authorities	FASLODEX 250mg Injection (AstraZeneca UK Limited). (Pre Filled Syringe of 5 ml)
	For generic drugs (me-too status)	NA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures

		and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Farmabios S.p.A. Via Pavia, 1 27027 Gropello Cairoli, (PV) – Italy
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 5oC ± 3oC. The stability study data is till 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	USP type-I glass
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 25 °C ± 2ºC/ 60% ± 5% RH for 6 months. The real time stability study data is conducted at 5 °C ± 3ºC. The real time stability study data of 3 batches is for 24 months

Evaluation by PEC:

Sr. No	Observations
01	DSL of Importer /applicant is expired till 29-06-2022.
02	Provided copy of GMP certificate of API/Drug substance manufacturer, I-e M/s Farmabiosa S.P.A Italy, issued by AIFA, Italy vide certificate No. IT-API/167/H/2020 based on inspection conducted on 20-09-2019 was valid for 30 months, which has been expired.
03	Justification of applied container closer system of finished drug product as glass vial whereas the innovator product Faslodox is prefilled syringe.
04	Justification of overage of 0.4 ml excess filling in vial during filling process in line with innovator product which is prefilled syringe.

Previous Decision (M-324DRB): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of firm:

Sr#	Observations	Response of Firm
01	DSL of Importer /applicant is expired till 29-06-2022.	Firm has submitted valid copy of DSL. Details of DSL are; License No:05-352-0066-034461D Address: 5-KM Sunder Raiwind Road, Raiwind,

		District Lahore – Pakistan. Address of Godown: NA Validity: 29-06-2027. Status: License to sell drugs as distributor Renewal: NA
02	Provided copy of GMP certificate of API/Drug substance manufacturer, I-e M/s Farmabiosa S.P.A Italy, issued by AIFA, Italy vide certificate No. IT-API/167/H/2020 based on inspection conducted on 20-09-2019 was valid for 30 months, which has been expired.	Firm has submitted valid copy of GMP certificate of API/Drug substance manufacturer, i.e. M/s Farmabios S.P.A Italy, issued by AIFA, Italy vide certificate No. IT-API/167/H/2020 based on inspection conducted on 2020-06-12 was valid for three years from date of inspection.
03	Justification of applied container closer system of finished drug product as glass vial whereas the innovator product Faslodox is prefilled syringe.	Dimere 250mg solution for injection is a generic drug product whose formulation, strength, pharmaceutical form and dosage form are the same as innovator product Falsodex 250mg (Lab. Astra Zeneca) Dimere container closure system differs from Faslodex finished product which is a pre-filled syringe. It consists of vials appropriately closed with stoppers and flip-off aluminium seals evidencing the same quality on materials as pre-filled syringe. Stability studies performed on Dimere dosage form confirms compatibility and that the finished product keeps the original attributes without alteration. Selecting the right primary container presentation for a product is important decision. Dimere is packed in glass vials despite pre-filled syringes advantages due to cost / benefit analysis and unavailability to access to required technology facilities to use that container.
04	Justification of overage of 0.4 ml excess filling in vial during filling process in line with innovator product which is prefilled syringe.	The firm submitted explanation as: 0.4ml (0.8%) in excess is added per vial during the filling process to ensure the deliverable volume and administration of the labelled doses. The final volume overage was empirically decided during pilot batches evaluation and compliance is confirmed batch to batch by analysis extractable volume

Previous Decision (M-326-DRB): Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies which were adopted by the Registration Board in its 275th meeting in glass vial

Firm's Response:

The firm has submitted following response;

- Whereas, FULL V (Fulvestrant) 250mg Injection in Vial Form (M/s Laboratorios IMA S.A.I.C, Argentina) is approved for another applicant/importer during 316th (15-18 March 2023) with decision i.e. Approved as per Policy for inspection of Manufacturer abroad and verification of local storage facility. **(**Copy of minutes attached). *However, registration letter has not been issued.*
- Additionally, Fulvestrant 250mg/5ml in Vial Form is also suggested to add in WHO Model List of Essential Medicines, WHO Official link and document is attached for your kind reference.
  - *https://www.who.int/news/item/01-10-2021-who-prioritizes-access-to-diabetes-and-cancer-treatments-in-new-essential-medicines-lists*
  - *Application to add Fulvestrant to WHO Model List of Essential Medicines*

In view of above facts and references, we kindly request to re-visit the decision and allow fair chance to BF Biosciences Limited for registration of imported finished drug in Vial form, as BF Biosciences Limited is the joint venture of Ferozsons Laboratories Limited and Bago Laboratories Argentina, and through this joint venture, a number of lifesaving drugs are already registered by DRAP (eg. Panataxel, Donataxel and Oxaltie).

We also would like to apply for exemption of manufacturer abroad as **ANMAT (Administración Nacional de Medicamentos, Alimentos y Tecnología Médica) Argentina is the member of PIC/s.**

Decision: Deferred for evidence of approval of applied formulation in reference regulatory

authorities/agencies, which were adopted by the Registration Board in its 275th meeting in glass vial.

Case No. 12: Deferred cases of form 5F (Export Facilitation):

730.	Name, address of Applicant / Marketing Authorization Holder	M/s CCL Pharmaceuticals (Pvt.) Ltd., 62-Industrial Estate, Kot Lakhpat, Lahore.
	Name, address of Manufacturing site.	M/s CCL Pharmaceuticals (Pvt.) Ltd., 62-Industrial Estate, Kot Lakhpat, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted cGMP certificate issued on 13-05-2019 based on inspection conducted on 30-04-2019
	Evidence of approval of manufacturing facility	Firm has submitted copy of DML renewal letter No.F.1-8/84-Lic(Vol-V) dated 08-06-2022 which specifies Tablet section (General).
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 1308 dated 14-01-2022
	Details of fee submitted	Rs.75,000/- dated 30-12-2021 (Slip#4452496739)
	The proposed proprietary name / brand name	**Gablin CR 82.5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Pregabalin……..…82.5mg
	Pharmaceutical form of applied drug	Pink colored, oblong biconvex film coated tablet
	Pharmacotherapeutic Group of (API)	Anti-epileptics
	Reference to Finished product specifications	Innovator's specifications
	Proposed Pack size	5's, 10's, 14's, 20's, 28's, 30's, 50's, 100's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LYRICA CR extended-release tablets (82.5mg, 165mg, 330 mg) by USFDA Approved.
	For generic drugs (me-too status)	NA
	Name and address of API manufacturer.	M/s Kopran Research Laboratories Limited., K4/4, Additional MIDC, Post Birwadi, Tal. Mahad, District: Raigad, Raigad 402302, Maharashtra India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers,

		description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (PRG/P0904005, PRG/P0904006, PRG/P0904007)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator Lyrica CR 82.5mg Tablet distributed by M/s Parke-Davis Division of Pfizer Inc. NY, NY 10017, by performing quality tests (Description, Identification, Assay, Dissolution). CDP has been performed against the same brand that is Lyrica CR 82.5mg Tablet distributed by M/s Parke-Davis Division of Pfizer Inc. NY, NY 10017 in Acid media pH 1.2, acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Analytical method validation report is not submitted

STABILITY STUDY DATA			
Manufacturer of API	M/s Kopran Research Laboratories Limited., K4/4, Additional MIDC, Post Birwadi, Tal. Mahad, District: Raigad, Raigad 402302, Maharashtra India.		
API Lot No.	PRGH/P2012004D		
Description of Pack (Container closure system)	Printed Alu-Alu blister packed in bleach board unit carton		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Manufacturing Date	04-2021	04-2021	04-2021
Date of Initiation	05-2021	05-2021	05-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted License retention certificate dated 29-02-2020 of M/s Kopran Research Laboratories Limited., India., issued by Food & Drugs Administration Maharashtra State India valid upto 31-03-2025. Firm has submitted cGMP certificate dated 20-10-2020 of

		M/s Kopran Research Laboratories Limited., India., issued by Commissioner, Food & Drugs Administration Maharashtra State India valid upto 19-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. EXP-393 dated 28-12-2020 for import of 100kg of Pregabalin (Batch# PRGH/P2012004D) in name of M/s CCL Pharmaceuticals (Pvt.) Ltd., attested by AD (I&E) DRAP Lahore dated 04-01-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted DML renewal Inspection report conducted on 14.09.2020, 15.09.2020 and 21.10.2020 and panel has recommended renewal of DML for following sections; Tablet (General), Capsule (General), Oral Liquid, Dry Powder Suspension, Liquid Injectable & Capsule section (Steroid). • Firm has submitted Letter No. 8194/2022-DRAP (Addl.Dire) dated 07.07.2022 from Additional Director DRAP Lahore which states that; "The Firm has applied for GMP Inspection. The application is under process at DRAP Office and inspection will be done as per availability of Area FID. The firm's last GMP status is Compliant / Good.
1.5.2	• Clarification is required as you have applied for film coated tablets while the reference formulation is film coated extended release tablets or revise your label claim as per reference formulation along with submission of applicable fee.	The firm submitted that applied formulation is as per reference formulation i.e., film coated extended release that is evident from dissolution results. Label claim for products is: Each film coated extended-release tablet contain: Pregabalin…….82.5mg.
3.2.S.4	• Justification is required for claiming in-house specifications for drug substance by drug substance manufacturer and drug product manufacturer as the monograph for applied drug substance is available in pharmacopeia (BP, USP) • Justification is required for using in-house analytical method for drug substance by drug substance manufacturer and drug product manufacturer as the analytical method for applied drug substance is available in pharmacopeia (BP, USP)	• The firm submitted that Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why API manufacturer used in house specs. Moreover, Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and drug product manufacturer are in process of shifting the specification as per USP Monograph. • The firm submitted that Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why

	• Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug substance as the COA of Reference Standards or Materials states that it is to be used before 19-03-2016, while manufacturing date of drug substance as per submitted COA is Dec 2020.	API manufacturer used in house analytical method. Moreover, Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and Drug product manufacturer are in process of shifting the analytical method as per USP Monograph. • The firm submitted that provided COA of reference standard was taken from DMF. COA of working standard used for the analysis of drug substance is submitted which states that it is to be used before 11-07-2021**.**
3.2.P.2	• Submit evidence for storing samples prepared for compatibility study at 60˚C ± 3˚C / 75% ± 5%RH for 10 days	***The firm submitted record of data logger for temperature and humidity monitoring for sample prepared for compatibility study***
3.2.P.5	• Justification is required for changing wavelength during assay procedure in analytical method from 300nm to 210nm after 4.5 minutes • Submit analytical method validation report for the applied product	• The firm submitted that in product test method 300nm is used to suppress blank peak and the principal peak of pregabalin is around 5.1 that's why wavelength is changed at 210nm from 4.5min to onward. • Firm has submitted analytical method validation studies including specificity, linearity and range, accuracy, precision, LOD & LOQ, robustness and solution stability and system suitability studies.
3.2.P.6	• Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug product as the COA of Reference Standards or Materials states that it is to be used before 11-07-2021, while manufacturing date of drug product as per submitted COA is April 2021 and 3rd month time point and 6th month time stability study are due on July 2021 (07-2021) and October 2021 (10-2021).	• The firm submitted that same reference standard was used for analysis of drug product as the sequence / chromatograms against this standard was saved during trial analysis and same sequence / chromatograms of standard was used at 3rd and 6th Month stability study time point for analysis of drug product. It is to submit that the Reference Standards or Materials used for test and analysis of drug product was expired at 6th month time point (October 2021 (10-2021)) of stability study.
3.2.P.8	• The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required • Clarification is required for not including the results and calculation details for content uniformity test in raw data sheet at initial time point of stability study • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula shall be submitted • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• The firm submitted that in product test method wavelength started from 300nm and then changed to 210nm after 4.5min. So in chromatogram starting wavelength is mentioned which is 300nm. • Firm has submitted results and calculation details for content uniformity test in raw data sheet at initial time point of stability study. • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula is submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Previous Decision (324-DRB): Deferred for scientific justification of following points:

- Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.

- Use of dual wavelengths for the analysis of single drug substance containing formulation.
- The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required

Response of firm:

Sr#	Observations	Response
01	Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.	The firm submitted that we have also used the reference standard submitted as Annex-1 for the analysis of Drug product at 6th Month Stability study time point. Moreover, as we were in phase of shifting the Specs of Raw Material from In-house to USP so we have also used the Reference standard involved in Specification shifting attached as Annex-1. We are submitting the following Supporting documents. 1) Raw Material Test Method 2) COA of Raw Material 3) Verification of Analytical Method 4) COA of Reference Standard used in shifting the specification.
02	Use of dual wavelengths for the analysis of single drug substance containing formulation.	The firm submitted that in dissolution chromatograms you can see at 210nm is the main peak of pregabalin, 300nm wavelength is not interfaring with pregabalin response, specificity chromatogram is submitted in AMV report. Method trail is also attached.
03	The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required	The firm submitted that as already communicated that in product test method wavelength started from 300nm and then changed to 210nm after 4.5min. Method trail is also submitted. In Chromatograms starting wavelength is mentioned which is 300nm.

Previous Decision (M-326-DRB): Deferred for scientific justification of following points:

- Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.
- Use of dual wavelengths for the analysis of single drug substance containing formulation.
- The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required

Response of firm:

Sr#	Observations	Response
01	Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.	The firm submitted that Testing for the 3rd and 6th month was conducted using a valid (Validity date 07/07/2023) working standard provided by the Drug substance manufacturer. (WKS no. WS/PRG IP IH/21/01). As indicated in our initial dossier, the 3rd month testing was carried out on August 20, 2021, while the 6th month testing was conducted on November 18, 2021. Additionally, our company regularly produces and supplies Gablin capsules. We also procure the reference standard on a regular basis. COA of Valid working standard is submitted. Email correspondence for procurement of Working standard is also submitted.
02	Use of dual wavelengths for the analysis of single drug substance containing formulation.	The dual wavelength is employed to suppress the peak of the diluent sodium disulfide, as shown in the attached chromatogram. The peak height of sodium disulfide is significantly larger compared to Pregabalin when the sample is run at 210nm. Consequently, the peak or area of Pregabalin will not be visible in the chromatogram. With a retention time of approximately 5.5 minutes, the

		quantification of Pregabalin remains unaffected by the wavelength shift. This fact is confirmed in the AMV (Assay Method Validation) report of the drug product. Furthermore, we conducted a pharmaceutical equivalence assessment of our product against the innovator, and we observed a similar behavior of the diluent in the innovator product as well. Comparative chromatograms submitted
03	The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required	The firm submitted that the initial wavelength indicated on the chromatogram is 300nm, as there is no provision on the chromatogram format for both wavelengths. However, we have included the method audit trail which clearly shows that there was a wavelength shift from 300 nm to 210nm. (Acquisition method report is submitted).

Decision: Approved with innovator's specifications and following label claim:
Each film coated extended-release tablet contain:
Pregabalin…….82.5mg.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued after submission of fee of Rs. 75,000/- for correction/pre-approval change in composition (correction/change of formulation from film-coated tablet to film coated extended release tablet), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted DML renewal Inspection report conducted on 14.09.2020, 15.09.2020 and 21.10.2020 and panel has recommended renewal of DML for following sections; Tablet (General), Capsule (General), Oral Liquid, Dry Powder Suspension, Liquid Injectable & Capsule section (Steroid). • Firm has submitted Letter No. 8194/2022-DRAP (Addl.Dire) dated 07.07.2022 from Additional Director DRAP Lahore which states that; "The Firm has applied for GMP Inspection. The application is under process at DRAP Office and inspection will be done as per availability of Area

		FID. The firm's last GMP status is Compliant / Good.
1.5.2	• Clarification is required as you have applied for film coated tablets while the reference formulation is film coated extended release tablets or revise your label claim as per reference formulation along with submission of applicable fee.	The firm submitted that applied formulation is as per reference formulation i.e., film coated extended release that is evident from dissolution results. Label claim for product is: Each film coated extended-release tablet contain: Pregabalin…….165mg.
3.2.S.4	• Justification is required for claiming in-house specifications for drug substance by drug substance manufacturer and drug product manufacturer as the monograph for applied drug substance is available in pharmacopeia (BP, USP) • Justification is required for using in-house analytical method for drug substance by drug substance manufacturer and drug product manufacturer as the analytical method for applied drug substance is available in pharmacopeia (BP, USP) • Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug substance as the COA of Reference Standards or Materials states that it is to be used before 19-03-2016, while manufacturing date of drug substance as per submitted COA is Dec 2020.	• The firm submitted that Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why API manufacturer used in house specs. Moreover, Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and drug product manufacturer are in process of shifting the specification as per USP Monograph. • The firm submitted Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why API manufacturer used in house analytical method. Moreover, Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and Drug product manufacturer are in process of shifting the analytical method as per USP Monograph. • The firm submitted that provided COA of reference standard was taken from DMF. COA of working standard used for the analysis of drug substance is submitted which states that it is to be used before 11-07-2021**.**
3.2.P.2	• Submit evidence for storing samples prepared for compatibility study at 60˚C ± 3˚C / 75% ± 5%RH for 10 days	***The firm submitted record of data logger for temperature and humidity monitoring for sample prepared for compatibility study***
3.2.P.5	• Justification is required for changing wavelength during assay procedure in analytical method from 300nm to 210nm after 4.5 minutes • Submit analytical method validation report for the applied product	• The firm submitted that in product test method 300nm is used to suppress blank peak and the principal peak of pregabalin is around 5.1 that's why wavelength is changed at 210nm from 4.5min to onward. • Firm has submitted analytical method validation studies including specificity, linearity and range, accuracy, precision, LOD & LOQ, robustness and solution stability and system suitability studies.
3.2.P.6	• Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug product as the COA of Reference Standards or Materials states that it is to be used before 11-07-2021, while manufacturing date of drug product as per submitted COA is April 2021 and 3rd month time point and 6th month time stability study are due on July 2021 (07-2021) and October 2021 (10-2021).	• The firm submitted that same reference standard was used for analysis of drug product as the sequence / chromatograms against this standard was saved during trial analysis and same sequence / chromatograms of standard was used at 3rd and 6th Month stability study time point for analysis of drug product. It is to submit that the Reference Standards or Materials used for test and analysis of drug product was expired at 6th month time point (October 2021 (10-2021)) of stability study.
3.2.P.8	• The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability	• The firm submitted that in product test method wavelength started from 300nm and then changed

	study show 300nm, justification is required • Clarification is required for not including the results and calculation details for content uniformity test in raw data sheet at initial time point of stability study • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula shall be submitted • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	to 210nm after 4.5min. So in chromatogram starting wavelength is mentioned which is 300nm. • Firm has submitted results and calculation details for content uniformity test in raw data sheet at initial time point of stability study. • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula is submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Previous Decision (324-DRB): Deferred for scientific justification of following points:

- Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.
- Use of dual wavelengths for the analysis of single drug substance containing formulation.
- The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required

Response of firm:

Sr#	Observations	Response
01	Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.	The firm submitted that we have also used the reference standard submitted as Annex-1 for the analysis of Drug product at 6th Month Stability study time point. Moreover, as we were in phase of shifting the Specs of Raw Material from In-house to USP so we have also used the Reference standard involved in Specification shifting attached as Annex-1. We are submitting the following Supporting documents. 1) Raw Material Test Method 2) COA of Raw Material 3) Verification of Analytical Method 4) COA of Reference Standard used in shifting the specification.
02	Use of dual wavelengths for the analysis of single drug substance containing formulation.	The firm submitted that in dissolution chromatograms you can see at 210nm is the main peak of pregabalin, 300nm wavelength is not interfaring with pregabalin response, specificity chromatogram is submitted in AMV report. Method trail is also attached.
03	The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required	The firm submitted that as already communicated that in product test method wavelength started from 300nm and then changed to 210nm after 4.5min. Method trail is also submitted. In Chromatograms starting wavelength is mentioned which is 300nm.

Previous Decision (M-326-DRB): Deferred for scientific justification of following points:

- Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.
- Use of dual wavelengths for the analysis of single drug substance containing formulation.
- The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required

Response of firm:

Sr#	Observations	Response
01	Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.	The firm submitted that Testing for the 3rd and 6th month was conducted using a valid (Validity date 07/07/2023) working standard provided by the Drug substance manufacturer. (WKS no. WS/PRG IP IH/21/01). As indicated in our initial dossier, the 3rd month testing was carried out on August 20, 2021, while the 6th month testing was conducted on November 18, 2021. Additionally, our company regularly produces and supplies Gablin capsules. We also procure the reference standard on a regular basis. COA of Valid working standard is submitted. Email correspondence for procurement of Working standard is also submitted.
02	Use of dual wavelengths for the analysis of single drug substance containing formulation.	The dual wavelength is employed to suppress the peak of the diluent sodium disulfide, as shown in the attached chromatogram. The peak height of sodium disulfide is significantly larger compared to Pregabalin when the sample is run at 210nm. Consequently, the peak or area of Pregabalin will not be visible in the chromatogram. With a retention time of approximately 5.5 minutes, the quantification of Pregabalin remains unaffected by the wavelength shift. This fact is confirmed in the AMV (Assay Method Validation) report of the drug product. Furthermore, we conducted a pharmaceutical equivalence assessment of our product against the innovator, and we observed a similar behavior of the diluent in the innovator product as well. Comparative chromatograms submitted
03	The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required	The firm submitted that the initial wavelength indicated on the chromatogram is 300nm, as there is no provision on the chromatogram format for both wavelengths. However, we have included the method audit trail which clearly shows that there was a wavelength shift from 300 nm to 210nm. (Acquisition method report is submitted).

Decision: Approved with innovator's specifications and following label claim:
Each film coated extended-release tablet contain:
Pregabalin…….165mg.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued after submission of fee of Rs. 75,000/- for correction/pre-approval change in composition (correction/change of formulation from film-coated tablet to film coated extended release tablet), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted License retention certificate dated 29-02-2020 of M/s Kopran Research Laboratories Limited., India., issued by Food & Drugs Administration Maharashtra State India valid upto 31-03-2025. Firm has submitted cGMP certificate dated 20-10-2020 of M/s Kopran Research Laboratories Limited., India., issued by Commissioner, Food & Drugs Administration Maharashtra State India valid upto 19-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. EXP-393 dated 28-12-2020 for import of 100kg of Pregabalin (Batch# PRGH/P2012004D) in name of M/s CCL Pharmaceuticals (Pvt.) Ltd., attested by AD (I&E) DRAP Lahore dated 04-01-2021
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.3.5	• GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted	• Firm has submitted DML renewal Inspection report conducted on 14.09.2020, 15.09.2020 and 21.10.2020 and panel has recommended renewal of DML for following sections; Tablet (General), Capsule (General), Oral Liquid, Dry Powder Suspension, Liquid Injectable & Capsule section (Steroid). • Firm has submitted Letter No. 8194/2022-DRAP (Addl.Dire) dated 07.07.2022 from Additional Director DRAP Lahore which states that; "The Firm has applied for GMP Inspection. The application is under process at DRAP Office and inspection will be done as per availability of Area FID. The firm's last GMP status is Compliant / Good.
1.5.2	• Clarification is required as you have applied for film coated tablets while the reference formulation is film coated extended release tablets or revise your label claim as per reference formulation along with submission of applicable fee.	The firm submitted that applied formulation is as per reference formulation i.e., film coated extended release that is evident from dissolution results. Label claim for products is: Each film coated extended-release tablet contain: Pregabalin…….330mg.
3.2.S.4	• Justification is required for claiming in-house specifications for drug substance by drug substance manufacturer and drug product manufacturer as the monograph for applied drug substance is available in pharmacopeia (BP, USP) • Justification is required for using in-house analytical method for drug substance by drug substance manufacturer and drug product manufacturer as the analytical method for applied drug substance is available in pharmacopeia (BP, USP) • Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug substance as the COA of Reference Standards or Materials states that it is to be used before 19-03-2016, while manufacturing date of drug substance as per submitted COA is Dec 2020.	• The firm submitted that Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why API manufacturer used in house specs. Moreover, Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and drug product manufacturer are in process of shifting the specification as per USP Monograph. • The firm submitted that Pregabalin Monograph has become official as of 01-Nov-2020, and the substance lot being used in developmental studies, manufactured in Dec 2020, that's why API manufacturer used in house analytical method. Moreover, Pregabalin is already inducted material for CCL. Both Drug substance manufacturer and Drug product manufacturer are in process of shifting the analytical method as per USP Monograph. • The firm submitted that provided COA of reference standard was taken from DMF. COA of working standard used for the analysis of drug substance is submitted which states that it is to be used before 11-07-2021.
3.2.P.2	• Submit evidence for storing samples prepared for compatibility study at 60˚C ± 3˚C / 75% ± 5%RH for 10 days	***The firm submitted record of data logger for temperature and humidity monitoring for sample prepared for compatibility study***
3.2.P.5	• Justification is required for changing wavelength during assay procedure in	• The firm submitted that in product test method 300nm is used to suppress blank peak and the

	analytical method from 300nm to 210nm after 4.5 minutes • Submit analytical method validation report for the applied product	principal peak of pregabalin is around 5.1 that's why wavelength is changed at 210nm from 4.5min to onward. • Firm has submitted analytical method validation studies including specificity, linearity and range, accuracy, precision, LOD & LOQ, robustness and solution stability and system suitability studies.
3.2.P.6	• Clarification is required whether the same Reference Standards or Materials was used for test and analysis of drug product as the COA of Reference Standards or Materials states that it is to be used before 11-07-2021, while manufacturing date of drug product as per submitted COA is April 2021 and 3rd month time point and 6th month time stability study are due on July 2021 (07-2021) and October 2021 (10-2021).	• The firm submitted that same reference standard was used for analysis of drug product as the sequence / chromatograms against this standard was saved during trial analysis and same sequence / chromatograms of standard was used at 3rd and 6th Month stability study time point for analysis of drug product. It is to submit that the Reference Standards or Materials used for test and analysis of drug product was expired at 6th month time point (October 2021 (10-2021)) of stability study.
3.2.P.8	• The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required • Clarification is required for not including the results and calculation details for content uniformity test in raw data sheet at initial time point of stability study • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula shall be submitted • Submit Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• The firm submitted that in product test method wavelength started from 300nm and then changed to 210nm after 4.5min. So in chromatogram starting wavelength is mentioned which is 300nm. • Content uniformity for Gablin CR Tablet 330mg is performed by weight variation as per <USP 905>. • Raw data sheet for assay test with real time values for average area of sample, average area of standard, conc. of standard, conc. of sample, average weight, label claim and standard potency in calculation formula is submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Previous Decision (324-DRB): Deferred for scientific justification of following points:

- Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.
- Use of dual wavelengths for the analysis of single drug substance containing formulation.
- The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required

Response of firm:

Sr#	Observations	Response
01	Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.	The firm submitted that we have also used the reference standard submitted as Annex-1 for the analysis of Drug product at 6th Month Stability study time point. Moreover, as we were in phase of shifting the Specs of Raw Material from In-house to USP so we have also used the Reference standard involved in Specification shifting attached as Annex-1. We are submitting the following Supporting documents. 1) Raw Material Test Method 2) COA of Raw Material

		3) Verification of Analytical Method 4) COA of Reference Standard used in shifting the specification.
02	Use of dual wavelengths for the analysis of single drug substance containing formulation.	The firm submitted that in dissolution chromatograms you can see at 210nm is the main peak of pregabalin, 300nm wavelength is not interfaring with pregabalin response, specificity chromatogram is submitted in AMV report. Method trail is also attached.
03	The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required	The firm submitted that as already communicated that in product test method wavelength started from 300nm and then changed to 210nm after 4.5min. Method trail is also submitted. In Chromatograms starting wavelength is mentioned which is 300nm.

Previous Decision (M-326-DRB): Deferred for scientific justification of following points:

- Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.
- Use of dual wavelengths for the analysis of single drug substance containing formulation.
- The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required

Response of firm:

Sr#	Observations	Response
01	Use of sequence / chromatograms of standard saved during initial time point analysis for the drug product analysis of 3rd and 6th Month stability study time point.	The firm submitted that Testing for the 3rd and 6th month was conducted using a valid (Validity date 07/07/2023) working standard provided by the Drug substance manufacturer. (WKS no. WS/PRG IP IH/21/01). As indicated in our initial dossier, the 3rd month testing was carried out on August 20, 2021, while the 6th month testing was conducted on November 18, 2021. Additionally, our company regularly produces and supplies Gablin capsules. We also procure the reference standard on a regular basis. COA of Valid working standard is submitted. Email correspondence for procurement of Working standard is also submitted.
02	Use of dual wavelengths for the analysis of single drug substance containing formulation.	The dual wavelength is employed to suppress the peak of the diluent sodium disulfide, as shown in the attached chromatogram. The peak height of sodium disulfide is significantly larger compared to Pregabalin when the sample is run at 210nm. Consequently, the peak or area of Pregabalin will not be visible in the chromatogram. With a retention time of approximately 5.5 minutes, the quantification of Pregabalin remains unaffected by the wavelength shift. This fact is confirmed in the AMV (Assay Method Validation) report of the drug product. Furthermore, we conducted a pharmaceutical equivalence assessment of our product against the innovator, and we observed a similar behavior of the diluent in the innovator product as well. Comparative chromatograms submitted
03	The wavelength mentioned in analytical procedure is 210nm for assay test while submitted chromatograms of stability study show 300nm, justification is required	The firm submitted that the initial wavelength indicated on the chromatogram is 300nm, as there is no provision on the chromatogram format for both wavelengths. However, we have included the method audit trail which clearly shows that there was a wavelength shift from 300 nm to 210nm. (Acquisition method report is submitted).

Decision: Approved with innovator's specifications and following label claim:
Each film coated extended-release tablet contain:
Pregabalin…….330mg.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration letter will be issued after submission of fee of Rs. 75,000/- for correction/pre-approval change in composition (correction/change of formulation from film-coated tablet to film coated extended release tablet), as per notification No.F.7-11/2012-B&A/DRAP dated 13-07-2021.

Case No.13; Deferred cases of Human Drugs on Form 5

733.	Name and address of manufacture / Applicant	M/s Efroze Chemical Industries Pvt Ltd. 146/23, Korangi Industrial Area, Karachi
	Brand Name + Dosage Form and Strength	Dufanor 10mg Tablet
	Composition	Each Film Coated Tablet Contains: Dydrogesterone……..…10mg
	Dairy No. date of R &I fee	Form-5 Dy.No 11400 dated 05-03-2019 Rs.20,000/- 05-03-2019
	Pharmacological Group	Progestogens
	Type of form	Form 5
	Finished product specifications	USP
	Pack size and Demand Price	20's; As per SRO
	Approval status of product in Reference Regulatory Authorities	Duphaston 10mg film-coated tablets by M/s Mylan IRE Healthcare Limited (Ireland Approved)
	Me-too-status	Dydrstone 10mg Tablet by M/s Pharmasol (Pvt) Ltd (Reg#096477)
	GMP Status	GMP certificate issued to Efroze Chemical Industries (Pvt.) Ltd on dated 03-05-2020 based on inspection conducted on 17-03-2021
	Previous Remark of Evaluator [XI]	• Dydrogesterone is available as Cis and Trans isomer. The firm did not clarify about the type of isomer that will be used in formulation. (Trans Isomeric Form active) • The firm did not provide evidence of required manufacturing facility / section approval letter for the applied formulation
	Previous Decision (307-DRB)	Deferred for following: • Clarification about the type of isomer of Dydrogesterone that will be used in formulation • Evidence of required manufacturing facility / section from Licensing Division
	Evaluation by PEC	• The firm submitted that they will be using Trans-Isomer of dydrogesterone in their formulation and provided COA of API and GMP certificate of supplier M/s Yangzhou Aurisco Pharmaceutical Co., Ltd China. • The firm submitted letter No. F. 2-11/2000-Lic (Vol-V) dated 22nd November 2021 issued by Secretary Central Licensing Board showing the presence of Tablet section (Hormone)
	Previous Decision (316-DRB)	• Deferred for review of submitted COA of Dydrogesterone for compliance against the Pharmacopoeial monograph
	Evaluation by PEC	• The firm submitted that they will be using Trans-Isomer of dydrogesterone in their formulation and provided COA of API from supplier M/s Yangzhou Aurisco Pharmaceutical Co., Ltd China. • The submitted COA states that the API Dydrogesterone conforms to EP10.0 standard. The limits and number of tests are as per European Pharmacopeia monograph

	Previous Decision (322-DRB)	• Deferred for confirmation of already registered products in section of "Tablet (Hormone) section.)
	Firm's Response	• Firm has submitted copy of registration letter dated 30th May, 2023, of Eforeth-N 5mg tablets (Norethisterone) (Reg#115972)
	Decision: Approved as per decision of 312th meeting of Registration Board regarding formulation of "Dydrogesterone Tablet".	

Case No. 14: Withdrawal of Form 5-D Applications for Registration of Daplozmet XR 5mg/500mg Tablets, Daplozmet XR 5mg/1000mg Tablets, Daplozmet XR 10mg/500mg Tablets and Daplozmet XR 10mg/1000mg Tablets

The firm has written letter with reference to their product applied on Form 5-D details of which are given below:

S No.	Company Name	Applied product	Diary Number & R&I Date	Date of Submission
734.	M/s Highnoon Laboratories Ltd Lahore	Daplozmet XR 5mg/500mg Tablets Each tablets contains: Dapagliflozin……..5mg Metformin HCL (Extended release)……500mg	Form-5D Dy.No.2789 R&I date 12-07-2016	12-07-2016
735.	M/s Highnoon Laboratories Ltd Lahore	Daplozmet XR 10mg/500mg Tablets Each tablets contains: Dapagliflozin……..10mg Metformin HCL (Extended release) ……500mg	Form-5D Dy.No.2790 R&I date 12-07-2016	12-07-2016
736.	M/s Highnoon Laboratories Ltd Lahore	Daplozmet XR 5mg/1000mg Tablets Each tablets contains: Dapagliflozin……..5mg Metformin HCL (Extended release) ……1000mg	Form-5D Dy.No.2791 R&I date 12-07-2016	12-07-2016
737.	M/s Highnoon Laboratories Ltd Lahore	Daplozmet XR 10mg/1000mg Tablets Each tablets contains: Dapagliflozin……..10mg Metformin HCL (Extended release)……1000mg	Form-5D Dy.No.2792 R&I date 12-07-2016	12-07-2016

The firm informed that dossier of the same products were also applied on CTD/Form 5F and latterly got evaluated for registration by DRAP on export facilitation priority. The firm further stated that we are applying for the withdrawal of our applications of form 5-D as products are already under registration process through CTD/Form 5-D

Decision: Registration Board acceded the request of the firm and declared the above applications of Daplozmet XR Tablets of M/s Highnoon Laboratories Ltd as disposed off.

Case No. 15: Registration applications of Human Drugs on form 5F (New DML):

M/s Carer Pharmaceuticals Industries, Plot # 27, Main Road, Rawat Industrial Estate, Rawat.

The Central Licensing Board in its 278th meeting held on 10th-11th December, 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five sections to M/s, Carer Pharmaceuticals Industries Plot # 27, Main Road, Rawat Industrial Estate, Rawat under Drug Manufacturing License No. 000925 by way of Formulation vide approval letter No. F. 1-32/2016-Lic dated 07th June 2021. The Drug Manufacturing License No. 000925 by way of formulation is hereby issued w.e.f. 18-03-2021.

S No.	Section
7.	Capsule Section (General) Section

	Dy. No. and date of submission	Form-5F Dy.No 13768 dated 02-06-2023
	Details of fee submitted	Rs.30,000/- dated 02-06-2023 (Deposit slip#1826407677)
	The proposed proprietary name / brand name	**Caraflox 250mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet Contains: Levofloxacin (as Hemihydrate)……..250mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Fluoroquinolones
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LEVAQUIN 250mg film coated tablets, USFDA approved ***Discontinued****Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons*** Levofloxacin 250mg film-coated tablets MHRA Approved
	For generic drugs (me-too status)	Leflox 250mg Tablet by M/s Getz Pharma (Reg#26164)
	Name and address of API manufacturer.	M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., Economic Development Zone of Sanmen County, Zhejiang 31700, P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.

	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (DC-0401-1203001, DC-0401-1203002, DC-0401-1203003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted results of pharmaceutical equivalence for their product against product Leflox 250mg tablet by M/s Getz Pharma by performing quality tests (Identification, uniformity of dosage units, disintegration test, dissolution, assay) CDP has been performed against the product Leflox 250mg tablet by M/s Getz Pharma in acidic media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability).

STABILITY STUDY DATA			
Manufacturer of API	M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., Economic Development Zone of Sanmen County, Zhejiang 31700, P.R. China		
API Lot No.	DC-004-2112011		
Description of Pack (Container closure system)	Alu-Alu Blister packed in unit carton		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	2500 Tablets	2500 Tablets	2500 Tablets
Manufacturing Date	11-2022	11-2022	11-2022
Date of Initiation	26-11-2022	26-11-2022	26-11-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of cGMP certificate of M/s Zhejiang East-Asia Pharmaceutical Co., Ltd., Coastal Industrial city, Pubagang town, Sanmen County, Zhejiang China issued by China Food & Drug Administration valid

		upto 15-08-2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate for import of 05kg Levofloxacin Hemihydrate from M/s Zhejiang East Asia Pharmaceutical Company., Ltd China attested by AD (I&E) DRAP Islamabad dated 11-05-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required • Address mentioned on submitted GMP certificate is different than that given in section 1.6.5	•
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	•
3.2.S.4	• Signed copies of drug substance specifications shall be submitted • Result for specificity test are not submitted in method verification study • Test for specific rotation is not performed in batch analysis by drug product manufacturer as recommended by USP monograph	•
3.2.P.2	• Justification shall be submitted for not performing pharmaceutical equivalence and CDP studies against the innovator product • Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product	•
3.2.P.5	• Justification is required for not mentioning the number of USP test used for dissolution study • The rpm used in dissolution study (50rpm) is different than that recommended by USP monograph (75rpm) • Result for specificity test are not submitted in method verification study	•
3.2.P.8	• The submitted UV spectra does not depict the batch number or dosage form of applied formulation	•

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• Submit your label claim as per reference formulation along with submission of applicable fee	•
1.5.9	• Provide evidence of applied formulation in reference regulatory authorities which were approved by registration board in its 275th meeting	•
1.6.5	Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required	•
2.3.R.1	• Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3>	•
3.2.S.4	• Unsigned copies of drug substance specification and analytical procedure used for routine testing of drug substance by drug product manufacturer is submitted • Justification is required for not including test for sulphate in drug substance specifications by drug substance manufacturer as recommended by BP monograph	•

	• Justification is required for selecting different chromatographic conditions (mobile phase composition, wavelength, column oven temperature, run time) by drug product manufacturer for drug substance (BP Monograph) than that recommended by drug substance manufacturer • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Justification is required as whether the drug substance follow BP specifications or USP specifications as both are mentioned on COA provided by drug substance manufacturer in batch analysis	
3.2.S.5	• COA of primary / secondary reference standard including source and lot number shall be provided.	•
3.2.P.2	• Justification shall be submitted for not performing pharmaceutical equivalence studies against the innovator product • Justification is required for not performing the pH test for applied product in pharmaceutical equivalence studies • Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product	•
3.2.P.5	• Unsigned copies of finished product specifications and analytical procedure is submitted	•
3.2.P.6	• COA of primary / secondary reference standard including source and lot number used for the analysis for trial batches shall be submitted	•
3.2.P.8	• Submit documents for the procurement of API with approval from DRAP • Justification shall be submitted as the trial batches are manufactured before the import of API. • Label claim per injection is 250mg while calculated amount in assay test in raw data sheets of all batches at initial time point is more than 500mg, clarify • Label claim per injection mention in raw data sheets at 3rd month time point & 6th month time point at both real time and accelerated conditions of all batches is 500mg while applied product contains 250mg/2ml, clarify • Chromatograms, Raw data sheets, COA, summary data sheets etc. are not attested • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time) is not submitted	•

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings

Case No. 16: Registration applications of Human Drugs on form 5F (New sections):
M/s Curatech Pharma Pvt. Ltd., 35-Km, Multan Road, Lahore

The Central Licensing Board in its 278th meeting held on 10th-11th December, 2020 has considered and approved the grant of following four additional sections to **M/s Curatech Pharma Pvt. Ltd.,** 35-Km, Multan Road, Lahore under Drug Manufacturing License No. 000619 (Formulation) vide approval letter No. F. 1-4/2002-Lic (Vol-I) dated 22nd December 2020.

S No.	Section
1.	Syrup/Suspension (General) Section (Revised New)
2.	Capsule (Cephalosporin) Section (New)
3.	Dry Powder for Suspension (Cephalosporin) Section (New)
4.	Dry Powder for Injection (Cephalosporin) Section (New)

Following applications have been submitted for registration by the firm.

740.	Name, address of Applicant / Marketing Authorization Holder	M/s Curatech Pharma (Pvt.) Ltd., 12 Baqir Lane, Canal View Society Canal Road, Lahore
	Name, address of Manufacturing site.	M/s Curatech Pharma (Pvt.) Ltd., 35-Km, Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted copy of GMP certificate dated 08-04-2020 based on inspection conducted on 19-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of additional section dated 22-12-2020 specifying Capsule Cephalosporin New section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy.No 10838 dated 02-05-2023
	Details of fee submitted	Rs.30,000/- dated 10-01-2023 (Deposit slip#2573330204)
	The proposed proprietary name / brand name	**Curagon 250mg Capsules**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Cephalexin ……..….250mg
	Pharmaceutical form of applied drug	Capsule
	Pharmacotherapeutic Group of (API)	Cephalosporin-Antibiotics
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	12’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	KEFLEX (250mg, 500mg, 750mg) capsule USFDA Approved ***Discontinued****Federal Register determination that product was not discontinued or withdrawn for safety or effectiveness reasons*** Keflex Capsules 250mg MHRA Approved
	For generic drugs (me-too status)	Keflex Capsule 250mg by M/s AGP Ltd., (Reg#98686)
	Name and address of API manufacturer.	M/s Pharmagen Limited., Kot Nabi Bukshwala, 34-Km Ferozepur Road, Lahore
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III (Drug Product):	Firm has submitted data of drug product including description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted pharmaceutical equivalence of their product against the product Ceporex capsule 250mg by M/s GSK Pakistan Ltd by performing quality tests (Description, identification, average weight, disintegration, dissolution, assay). Firm has submitted CDP results of their product against the product Ceporex capsule 250mg by M/s GSK Pakistan Ltd in 0.1N HCl (pH 1.2) Acetate buffer (pH 4.5), & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability) and Specificity.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of cGMP certificate of M/s Pharmagen Limited., Kot Nabi Bukshwala, 34-Km Ferozepur Road, Lahore issued on 02-09-2020 based on inspection conduction on 22-06-2020 and valid upto two years from the date of inspection

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of proforma invoice from M/s Pharmagen Limited dated 30/04/2021 for purchase of Cephalexin (compacted) 3kg.
4.	Data of stability batches will be supported by attested respective document like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• Submit your label claim as per reference formulation considering the hydrated form along with submission of applicable fee	• The firm has revised label claim as per reference formulation considering the hydrated form along with submission of Rs. 30000/- on deposit slip#39867954. The revised label claim is as under: Each capsule contains: Cephalexin monohydrate equivalent to Cephalexin……..….250mg
1.3.5	• GMP certificate / GMP inspection report of manufacturing unit conducted with in last three years	• The firm has submitted the same previously submitted copy of cGMP certificate along with a copy of request letter dated 08-02-2022 made to area FID & Area Assistant Director (I&E) for renewal of cGMP and conduction of inspection.
1.6.5	• Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required	• The firm has submitted copy of cGMP certificate of M/s Pharmagen Limited., Kot Nabi Bukshwala, 34-Km Ferozepur Road, Lahore issued on 22-11-2022 based on inspection conduction on 18-11-2022 and valid upto two years from the date of inspection
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is submitted. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is submitted.
3.2.P.1	• Qualitative composition of applied formulation is not similar to innovator / reference product. Clarification shall be submitted **Applied product** / **KEFLEX capsule** Cephalexin / Cephalexin Magnesium stearate / Carboxymethylcellulose sodium Blue/blue empty shell size 2 / Microcrystalline cellulose, Dimethicone, Magnesium stearate, D&C Yellow No. 10, FD&C Blue No. 1, FD&C Yellow No. 6, Gelatin, Titanium dioxide.	• The firm submitted that composition of applied formulation is same as per the reference formulation ceporex 250mg capsule and submitted evidence of reference formulation ceporex 250mg capsule. • Firm has submitted revised pharmaceutical equivalence report of their product against the product Ceporex capsule 250mg by M/s GSK Pakistan Ltd containing test for uniformity of dosage units. • Firm has submitted values of f2 factor in CDP studies which are in acceptable range. • The image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed is submitted

	• Justification is required for not performing uniformity of dosage units test in pharmaceutical equivalence as recommended by USP monograph • Submit the values of f2 factor in CDP studies • Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product	
3.2.P.6	Clarification is required whether the same Reference Standards or Materials of cephalexin was used for test and analysis of drug product as it is mentioned on the COA of Reference Standards or Materials that it is to be used before 26th September, 2021 while drug product stability testing has been performed subsequent to this date.	• The firm has submitted complete trial of the COAs of reference standards that were used throughout testing of stability studies. The firm has submitted COAs of five reference standard that were used during stability testing.

Decision: Approved with following Label claim:
Each capsule contains:
Cephalexin monohydrate equivalent to Cephalexin……..….250mg

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Manufacturer of API		M/s Pharmagen Limited., Kot Nabi Bukshwala, 34-Km Ferozepur Road, Lahore		
API Lot No.		00214/013/2021		
Description of Pack (Container closure system)		Polished capsule of standard size filled with white to offwite color powder in Alu-Alu blistered packed in unit carton		
Stability Storage Condition		Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period		Real time: 12 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12 (Months)		
Batch No.		TR-CEP-27	TR-CEP-28	TR-CEP-29
Batch Size		1000	1000	1000
Manufacturing Date		07-2021	07-2021	07-2021
Date of Initiation		03-08-2021	03-08-2021	03-08-2021
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of cGMP certificate of M/s Pharmagen Limited., Kot Nabi Bukshwala, 34-Km Ferozepur Road, Lahore issued on 02-09-2020 based on inspection conduction on 22-06-2020 and valid upto two years from the date of inspection		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of proforma invoice from M/s Pharmagen Limited dated 30/04/2021 for purchase of Cephalexin (compacted) 3kg.		
4.	Data of stability batches will be supported by attested respective document like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted		

Remarks of Evaluator [XI]:

Section	Observations	Response
1.1	• Copy of fee challan is submitted…original fee challan shall be submitted	• Firm has submitted copy of online DRAP verified fee challan No#671147973107.
1.5.2	• Submit your label claim as per reference formulation considering the hydrated form along with submission of applicable fee	• The firm has revised label claim as per reference formulation considering the hydrated form along with submission of Rs. 30000/- on deposit slip#37593881707. The revised label claim is as under: Each capsule contains: Cephalexin monohydrate equivalent to Cephalexin……..….500mg
1.3.5	• GMP certificate / GMP inspection report of manufacturing unit conducted with in last three years	• The firm has submitted the same previously submitted copy of cGMP certificate along with a copy of request letter dated 08-02-2022

<table>
<tr><td></td><td></td><td>made to area FID & Area Assistant Director (I&E) for renewal of cGMP and conduction of inspection.</td></tr>
<tr><td>1.6.5</td><td>• Valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin is required</td><td>• The firm has submitted copy of cGMP certificate of M/s Pharmagen Limited., Kot Nabi Bukshwala, 34-Km Ferozepur Road, Lahore issued on 22-11-2022 based on inspection conduction on 18-11-2022 and valid upto two years from the date of inspection</td></tr>
<tr><td>3.2.S.4</td><td>• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required.
• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.</td><td>• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is submitted.
• Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance is submitted.</td></tr>
<tr><td>3.2.P.1</td><td>• Qualitative composition of applied formulation is not similar to innovator / reference product. Clarification shall be submitted

</table>
• Justification is required for not performing uniformity of dosage units test in pharmaceutical equivalence as recommended by USP monograph
• Submit the values of f2 factor in CDP studies
• Submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator /reference/comparator product</td><td>• The firm submitted that composition of applied formulation is same as per the reference formulation ceporex 500mg capsule and submitted evidence of reference formulation ceporex 500mg capsule.
• Firm has submitted revised pharmaceutical equivalence report of their product against the product Ceporex capsule 500mg by M/s GSK Pakistan Ltd containing test for uniformity of dosage units.
• Firm has submitted values of f2 factor in CDP studies which are in acceptable range.
• The image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed is submitted</td></tr>
<tr><td>3.2.P.6</td><td>Clarification is required whether the same Reference Standards or Materials of cephalexin was used for test and analysis of drug product as it is mentioned on the COA of Reference Standards or Materials that it is to be used before 26th September, 2021 while drug product stability testing has been performed subsequent to this date.</td><td>• The firm has submitted complete trial of the COAs of reference standards that were used throughout testing of stability studies. The firm has submitted COAs of five reference standard that were used during stability testing.</td></tr>
</table>

Decision: Decision: Approved with following Label claim:
Each capsule contains:
Cephalexin monohydrate equivalent to Cephalexin……..….500mg

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		
742.	Name, address of Applicant / Marketing Authorization Holder	M/s Curatech Pharma (Pvt.) Ltd., 12 Baqir Lane, Canal View Society Canal Road, Lahore

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of additional section dated 22-12-2020 specifying dry powder for injection (Cephalosporin) New section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy.No 10839 dated 02-05-2023
	Details of fee submitted	Rs.30,000/- dated 10-01-2023 (Deposit slip#2434963668)
	The proposed proprietary name / brand name	**Rivoceph 500mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Cefepime Hydrochloride L-Arginine …..500mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Cephalosporin-Antibiotics
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1's vial of 500mg
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MAXIPIME (500mg, 1g, 2g) for injection USFDA Approved
	For generic drugs (me-too status)	Maxipime 500mg Injection by M/s GSK Pakistan Limited (Reg#25548)
	Name and address of API manufacturer.	Orchid Pharma Ltd., Plot No. 121-128, 128-133, 138-151, 159-164, SIDCO Industrial Estate, Alathur, Kancheepuram District-603 110, Tamilnadu, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications,

		analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. However the results are not readable
	Module-III (Drug Product):	Firm has submitted data of drug product including description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted pharmaceutical equivalence of their product against the product Celfime 500mg Injection manufactured by Norwich Pharmaceuticals by performing quality tests (Description, identification, clarity of solution, pH, B.E.T., Sterility, assay).
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability) and Specificity.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. SO/GE/2122/0029 dated 15-07-2021 for import of Cefpodoxime Proxetil USP Micronise 02kg (Batch#CPP-2107011). However, the invoice is not attested by AD (I&E) field office
4.	Data of stability batches will be supported by attested respective document like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.5.2	• Submit your label claim as per reference formulation considering the salt factor along with submission of applicable fee	•

1.3.5	• GMP certificate / GMP inspection report of manufacturing unit conducted with in last three years	•
1.6.5	• Details of drug substance manufacturer in this section shall be submitted • Submit valid GMP certificate / DML of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	•
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted. • Clarification is required as Batch No. of API mentioned on COA of drug substance manufacturer is CPP-2107011while Batch No. of API mentioned on COA of drug product manufacturer is CPP-12107011	•
3.2.P.1	• Qualitative composition of applied formulation is not similar to innovator / reference product. Clarification shall be submitted	•
3.2.P.2	• Justification shall be submitted for not performing the test for uniformity of dosage units and deliverable volume in pharmaceutical equivalence studies as recommended by USP monograph • Submit the values of f2 factor in CDP studies	•
3.2.P.5	• Justification is required for not performing test for deliverable volume in batch analysis by drug product manufacturer as recommended by USP monograph	•
3.2.P.8	• Batch No. of API mentioned on stability summary sheet is CPP-12107011 while Batch No. of API mentioned on COA of drug substance manufacturer is CPP-2107011, clarify? • Submit documents for procurement of API with approval from DRAP	•

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings

745.	Name, address of Applicant / Marketing Authorization Holder	M/s Curatech Pharma (Pvt.) Ltd., 12 Baqir Lane, Canal View Society Canal Road, Lahore
	Name, address of Manufacturing site.	M/s Curatech Pharma (Pvt.) Ltd., 35-Km, Multan Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the Finished product manufacturer	Firm has submitted copy of GMP certificate dated 08-04-2020 based on inspection conducted on 19-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of additional section dated 22-12-2020 specifying dry powder for injection (Cephalosporin) New section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Form-5F Dy.No 12101 dated 17-05-2023
	Details of fee submitted	Rs.30,000/- dated 08-03-2023 (Deposit slip#2130984365)
	The proposed proprietary name / brand name	Bril 500mg Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Cefazolin (as Sodium)……..…...500mg
	Pharmaceutical form of applied drug	Injection
	Pharmacotherapeutic Group of (API)	Cephalosporin-Antibiotics

	Reference to Finished product specifications	USP specifications
	Proposed Pack size	1's vial of 500mg
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	SRATOP 0.5g cefazolin (as sodium) 0.5g powder for injection vial TGA Approved
	For generic drugs (me-too status)	Kefzol 500mg Inj of M/s AGP Limited (Reg# 3755)
	Name and address of API manufacturer.	M/s Shandong Lukang Pharmaceutical Co., Ltd., 88 Deyuan Road, High-Tech Zone, Jining City, Shandong Province, P.R. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module III (Drug Substance)	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months. (Batches; 2061801001, 2061801002, 2061801003)
	Module-III (Drug Product):	Firm has submitted data of drug product including description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability study.
	Pharmaceutical equivalence and comparative dissolution profile	Firm has submitted pharmaceutical equivalence of their product against the product Kefzol 500mg Injection m by M/s AGP Limited by performing quality tests (Description, identification, clarity of solution, pH, B.E.T., Sterility, assay).
	Analytical method validation/verification of product	Firm has submitted method verification studies including Accuracy, precision (repeatability) and Specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Shandong Lukang Pharmaceutical Co., Ltd., 88 Deyuan Road, High-Tech Zone, Jining City, Shandong Province, P.R. China
API Lot No.	2062103004
Description of Pack (Container closure system)	A white to off white practically odorless, crystalline powder or white to off white solid, filled in glass vial with rubber stopper and aluminium flip off seal.
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Time Period	Real time: 18 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 , 9, 12, 18 (Months)		
Batch No.	TR-CEP-63	TR-CEP-64	TR-CEP-65

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of cGMP certificate of M/s Shandong Lukang Pharmaceutical Co., Ltd., No. 88, Xinhua Road, Zoucheng Industrial Park, Zoucheng City, Shandong Province China issued by Shandong Food and Drug Administration China valid upto 08-07-2023. Firm has submitted copy of DML (License#LU20200470) of M/s Shandong Lukang Pharmaceutical Co., Ltd., 88, Deyuan Road, High-tech Zone, Jining, Shandong China issued by Shandong Provincial Drug Administration valid upto 01-09-2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice No. 2021G126 dated 28-06-2021 for import of Cefazolin Sodium Sterile 5kg (Batch#2062103004). *However, the invoice is not attested by AD (I&E) field office*
4.	Data of stability batches will be supported by attested respective document like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted

Remarks of Evaluator [XI]:

Section	Observations	Response
1.6.5	• Address of Drug substance manufacturer mentioned in submitted GMP certificate is different than that mentioned in form 5F section 1.6.5, clarify	•
1.3.5	• GMP certificate / GMP inspection report of manufacturing unit conducted with in last three years	•
3.2.S.4	• Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance by Drug Product manufacturer is required. • Copies of the Drug substance analytical procedures used for routine testing of the Drug substance by Drug substance manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance shall be submitted.	•
3.2.S.6	• COA of primary / secondary reference standard including source and lot number shall be provided.	•

3.2.P.5	• Justification shall be submitted for not including the test for content uniformity and particulate matter in finished product specification as per USP monograph • Justification shall be submitted for not performing the test for content uniformity and particulate matter in batch analysis of finished product as per USP monograph	•
3.2.P.6	COA of primary / secondary reference standard including source and lot number used for the analysis for trial batches shall be provided.	•
3.2.P.8	Documents for procurement of API with approval from DRAP shall be submitted	•

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings

Agenda of Evaluator PEC-XIII.

Registration applications of locally manufactured New License / New Section on form 5F.

Firm has submitted copy of Acknowledgment of receipt of application for grant of additional section under DML No. 000465 (Formulations) to M/s Well Care Pharmaceuticals (Pvt.) Ltd., dated 24-11-2021 from Secretary Central Licensing Board. The letter specifies that CLB in its 283rd meeting held on 28-10-2021 has approved the grant of following additional section to M/s Well Care Pharmaceuticals (Pvt.) Ltd., A/7, Small Industrial Estate, Lahore Road, Sargodha:

1. Capsule (General) New.

746.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.**
	Name, address of Manufacturing site.	M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP inspection report conducted by a panel of three members dated 10-09-2021 wherein the panel concluded that M/s Well care pharma was considered to be operating at satisfactory level of compliance with GMP guidelines.
	Evidence of approval of manufacturing facility	Capsule (general) - New section approved vide letter No.F.1-12/97-Lic (Vol-II) dated 24-11-2021.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 8793 Dated 30-03-2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 18335748 Dated 06-02-2023.
	The proposed proprietary name / brand name	**Welzole 20mg Capsule.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Omeprazole (as omeprazole EC pellets 8.5%) …….. 20mg.
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor (PPI).
	Pharmaceutical form of applied drug	Hard Gelatin capsule.
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	2 x 7's, 1 x 10's & 10 x 10's.
	Proposed unit price	As per SRO.

	The status in reference regulatory authorities	Omeprazole 20mg & 40mg capsule (delayed release pellets), USFDA Approved.
	For generic drugs (me-too status)	Risek 20mg capsule, M/s Getz pharma Karachi, Reg. No. 019364.
	Name and address of API manufacturer.	Vision Pharmaceuticals Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad-Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance related to nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. OMP736, mfg. date 29-12-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. B. No. (OMP076, OMP073 & OMP090).
	Module-III Drug Product:	Firm has submitted detailed information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence of their product against Risek 40mg capsule manufactured by Getz Pharma by performing quality tests (Description, identification, Uniformity of dosage unit, dissolution & assay). Firm has submitted CDP against the Risek 20mg capsules manufactured by Getz Pharma in acid media of pH 1.2 for 02 hours and Phosphate buffer with pH 6.8 for 45 minutes. Acid media has shown 0% release in both products till 120th minute while for phosphate buffer the F_2 value is in acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	Vision Pharmaceuticals Plot No. 22-23, industrial triangle, kahuta road, Islamabad-Pakistan.
API Lot No.	Not submitted.
Description of Pack (Container closure system)	14 capsules packed in Alu-Alu blister further packed in unit carton.

Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	1400 Capsules	1400 Capsules	1400 Capsules
Manufacturing Date	07-2022	07-2022	07-2022
Date of Initiation	11-07-2022	11-07-2022	11-07-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. F.3-26/2019-Addl.Dir.(QA & LT-1)) dated 31-07-2019 issued on the basis of inspection conducted on 11-02-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted of copy of invoice mentioning 1 kg of Omeprazole EC pellets 8.5% from M/s Vision Pharmaceuticals.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Valid copy of DML of the applicant shall be submitted.	Firm has initially submitted DML No. 000465 with renewal date of 30-06-2004. Now they have submitted a letter from Licensing division wherein panel has been constituted for renewal of their DML. It is also mentioned in the letter that their renewal is due w.e.f. 29-06-2019.
2.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. F. 3-26/2019-Addl. Dir. (QA&LT-I)-56 dated 22-08-2022 issued on the basis of inspection conducted on 14-06-2022.
3.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted. Revised table for literature references with correct information regarding the drug substance and applicable fee shall be submitted.	Firm has submitted revised and corrected table for literature references with submission of 7500/- fee vide slip No. 70502699174 dated 10-07-2023.

4.	3.2.S.4.1	• Specification for the drug substance provided by the drug substance manufacturer has mentioned USP while there is no monograph available for Omeprazole pellets in the USP. Justify. • Specification of the drug substance by the drug product manufacturer shall be submitted.	Firm has submitted that mistakenly it was mentioned as USP specifications. Furthermore, they also provided corrected specification for the drug substance from both the drug substance and finished product manufacturer. Submitted.
5.	3.2.S.4.2	Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.5	Details/COA of the working standard used in the analysis shall be submitted.	Submitted.
8.	3.2.S.7	Real time stability data for drug substance with B. No. OMP090 shall be submitted.	Submitted.
9.	3.2.P.2.2	• Justification shall be submitted for performing pharmaceutical equivalence against Risek 40mg capsule of M/s Getz Pharma. • Justification shall be submitted for not performing CDP & PE against the innovator product. • Graphical representation of the CDP in acidic media has shown full release of the content. Clarification shall be submitted. • • Details of the comparator i.e. batch number, manufacturing date etc. are not submitted.	Firm has submitted that it was a typo error and in newly submitted CDP results they have corrected the same. Firm has submitted that comparator product i.e. Risek 20 mg was easily available at the time of trial batches manufacturing, so we used it for the pharmaceutical equivalence and CDP. Firm has submitted that it was a typo error and also provided new graphical representation for CDP results in acidic medium. B. No C03123, Mfg. date 05-2022, Exp. Date 09-2025 and MRP 483.
10.	3.2.P.5.2	• Justification shall be submitted for the Flow rate, wavelength (305nm), standard preparation, and sample preparation with respect to the USP as all these parameters are changed from the official pharmacopoeia.	Firm has submitted that all the parameters are according to USP. They also provided analytical procedures wherein all these parameters are as per USP. *However, in initially submitted analytical procedures, all these parameters were changed.*
11.	3.2.P.8	• Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number. • Justification shall be submitted for carrying dissolution in acidic medium for 60 minute only. • Justification shall be submitted for dissolution in buffer medium with respect to official pharmacopoeia as it has mentioned NLT 80% in 60 minutes. • Justification shall be submitted for not performing uniformity of dosage units. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted revised stability data sheets with API lot number. Firm has submitted that it was typographical error and actually they have performed dissolution according to USP till 120 minutes. In revised stability data sheets, they have provided dissolution in acidic media till 120 minutes. Firm has submitted that by mistakenly uniformity of dosage unit is not performed, in real time next time point is performed. Firm has submitted audit trial report.

Decision: Registration Board decided to approve the case subject to onsite verification/authenticity of the product development and stability data by the QA/LT.

747.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.**
	Name, address of Manufacturing site.	M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.

5.	3.2.S.4.2	Analytical procedures for the drug substance by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.5	Details/COA of the working standard used in the analysis shall be submitted.	Submitted.
8.	3.2.S.7	Clear and readable copies of stability data sheets for the drug substance shall be submitted.	***Firm has once again submitted the same stability data for the drug substance which is not in readable form.***

9.	3.2.P.2.2	• Justification shall be submitted for not performing CDP & PE against the innovator product. • Graphical representation of the CDP in acidic media has shown full release of the content. Clarification shall be submitted. • Details of the comparator i.e. batch number, manufacturing date etc. are not submitted.	Firm has submitted that comparator product i.e. Risek 40 mg was easily available at the time of trial batches manufacturing, so we used it for the pharmaceutical equivalence and CDP. Firm has submitted that it was a typo error and also provided new graphical representation for CDP results in acidic medium. B. No C04088, Mfg. date 06-2022, Exp. Date 06-2025 and MRP 675.
10.	3.2.P.5.2	• Justification shall be submitted for the Flow rate, wavelength (305nm), standard preparation, and sample preparation with respect to the USP as all these parameters are changed from the official pharmacopoeia.	Firm has submitted that all the parameters are according to USP. They also provided analytical procedures wherein all these parameters are as per USP. ***However, in initially submitted analytical procedures, all these parameters were changed.***
11.	3.2.P.8	• Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number. • Justification shall be submitted for carrying dissolution in acidic medium for 60 minute only. • Justification shall be submitted for dissolution in buffer medium with respect to official pharmacopoeia as it has mentioned NLT 80% in 60 minutes. • Justification shall be submitted for not performing uniformity of dosage units. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Firm has submitted revised stability data sheets with API lot number. Firm has submitted that it was typographical error and actually they have performed dissolution according to USP till 120 minutes. In revised stability data sheets, they have provided dissolution in acidic media till 120 minutes. Firm has submitted that it was typographical error and actually they have performed dissolution according to USP for 45 minutes and limit is NLT 75%. In revised stability data sheets, they have corrected the same. Firm has submitted that by mistakenly uniformity of dosage unit is not performed, in real time next time point is performed. Firm has submitted audit trial report.

Decision: Registration Board decided to approve the case subject to onsite verification/authenticity of the product development and stability data by the QA/LT.

8.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.**
	Name, address of Manufacturing site.	M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP inspection report conducted by a panel of three members dated 10-09-2021 wherein the panel concluded that M/s Well care pharma was considered to be operating at satisfactory level of compliance with GMP guidelines.
	Evidence of approval of manufacturing facility	Capsule (general) - New section approved vide letter No.F.1-12/97-Lic (Vol-II) dated 24-11-2021.

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 7972 Dated 21-03-2023
	Details of fee submitted	PKR 30,000/- vide slip No. 591486904043 Dated 06-02-2023.
	The proposed proprietary name / brand name	**Mzole 20mg Capsule.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each delayed release capsule contains: Esomeprazole (as Esomeprazole Magnesium EC pellets 8.5%) …….. 20mg.
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor (PPI)
	Pharmaceutical form of applied drug	White to almost white EC Pellets filled in hard gelatin capsule shell.
	Reference to Finished product specifications	USP
	Proposed Pack size	2 X 7's.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	Nexium 20mg & 40mg delayed release capsule, USFDA Approved.
	For generic drugs (me-too status)	Nexum 20mg Capsule, Getz Pharma, Reg. No. 033890.
	Name and address of API manufacturer.	Vision Pharmaceuticals Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad-Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance related to nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis (B. No. EMZ046605, mfg. date 03-01-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months. B. No. (EMZ045058, EMZ044632 & EMZ044858)
	Module-III Drug Product:	Firm has submitted detailed information of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures,

		validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence of their product against Nexum 40mg capsule manufactured by Getz Pharma by performing quality tests (Description, identification, Uniformity of dosage unit, dissolution & assay) for their product against Nexum 20mg capsules manufactured by Getz Pharma. Firm has submitted CDP against the same brand i.e. Nexum 20mg capsules manufactured by Getz Pharma.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	Vision Pharmaceuticals Plot No. 22-23, industrial triangle, kahuta road, Islamabad-Pakistan.		
API Lot No.	EMZ046605		
Description of Pack (Container closure system)	14 capsules packed in Alu-Alu blister further packed in unit carton.

Manufacturing Date	07-2022	07-2022	07-2022
Date of Initiation	14-07-2022	14-07-2022	14-07-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. F.3-26/2019-Addl.Dir.(QA & LT-1)) dated 31-07-2019 issued on the basis of inspection conducted on 11-02-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted of copy of invoice mentioning 1 kg of Esomeprazole Magnesium EC pellets 8.5% from M/s Vision Pharmaceuticals.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm

1.		First page of form 5 is not submitted.	Submitted.
2.	1.3.4	Valid copy of DML of the applicant shall be submitted.	Firm has initially submitted DML No. 000465 with renewal date of 30-06-2004. Now they have submitted a letter from Licensing division wherein panel has been constituted for renewal of their DML. It is also mentioned in the letter that their renewal is due w.e.f. 29-06-2019.
3.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. F. 3-26/2019-Addl. Dir. (QA&LT-I)-56 dated 22-08-2022 issued on the basis of inspection conducted on 14-06-2022.
4.	2.3	Table for literature references of the drug substance has mentioned drug substance in different pharmacopoeias. Clarification shall be submitted. Revised table for literature references with correct information regarding the drug substance and applicable fee shall be submitted.	Firm has submitted revised and corrected table for literature references with submission of 7500/- fee vide slip No. 7016326022 dated 05-07-2023.
5.	3.2.S.4.1	• Specification for the drug substance provided by the drug product manufacturer has no test for identification. Justify. • Specifications provided by the drug product manufacturer has no limits for dissolution in phosphate buffer and no time for acidic release. Justification shall be submitted.	Firm has submitted revised drug substance specifications wherein they added identification test. Firm has submitted revised drug substance specifications wherein they added both time for acidic medium i.e. 120 minutes and release limits for buffer medium.
6.	3.2.S.4.2	Analytical procedures for the drug substance by the drug substance manufacturer shall be submitted.	Submitted.
7.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted. Details/COA of the working standard used in the analysis shall be submitted.	Not Submitted. Submitted.
8.	3.2.S.7	Accelerated stability data for drug substance with B. No. EMZ045058 shall be submitted.	Submitted.
9.	3.2.P.1	This section has mentioned 265mg of pellets quantity per capsule. Justification shall be submitted.	Firm has submitted that 1mg of Esomeprazole is eq. to 1.1134mg of Esomeprazole magnesium trihydrate. Due to this reason factor of 1.1134 was used. 100/8.4 (pellets potency) x 20 (label claim) x 1.1134 (factor) = 265.09mg/ capsule.
10.	3.2.P.2.2	• Justification shall be submitted for submitting same results of CDP for both 20mg and 40mg formulations. • • Justification shall be submitted for performing pharmaceutical equivalence against 40mg capsule of M/s Getz Pharma. • Justification shall be submitted for not performing CDP & PE against the innovator product. • Graphical representation of the CDP in acidic media has shown full release of the content. Clarification shall be submitted.	Firm has submitted that by mistakenly same CDP was attached. They also provided new CDP results for the applied formulation with Nexum 20mg capsules. Firm has submitted that it was a typo error and in newly submitted CDP results they have corrected the same. ***No justification submitted against this point.*** They also submitted new graphical representation for CDP results in acidic medium.

		• Details of the comparator i.e. batch number, manufacturing date etc. are not submitted.	B. No C01021, Mfg. date 09-2021, Exp. Date 09-2024 and MRP 297.
11.	3.2.P.3.2	Batch formula has also mentioned 265mg of pellets per capsule. Justification shall be submitted.	Firm has submitted that 1mg of Esomeprazole is eq. to 1.1134mg of Esomeprazole magnesium trihydrate. Due to this reason factor of 1.1134 was used. 100/8.4 (pellets potency) x 20 (label claim) x 1.1134 (factor) = 265.09mg/ capsule.
12.	3.2.P.5.2	• Justification shall be submitted for the concentration of standard solution and sample solution as analytical procedure submitted by the firm has mentioned 0.05mg/ml while USP has mentioned 0.04mg/ml. • Justification shall be submitted for the wavelength applied i.e. 280nm while USP has mentioned 302nm.	Firm has submitted that it was typo error and they also submit new analytical procedures as per USP. They once again submitted that it was typo error and they also submit new analytical procedures wherein they have corrected the same as per USP.
13.	3.2.P.5.3	Analytical method verification for the finished product shall be submitted.	Not submitted.
14.	3.2.P.8	• Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number. • Justify the weight of standard and sample taken in the calculation formula for the assay test. • Justify the wavelength applied in the submitted chromatograms with respect to the wavelength mentioned in analytical procedure.	Firm has submitted revised stability data sheets with API lot number. Firm has submitted that in initially submitted analytical procedures, there was a typo error. Now they have provided new analytical procedures which are in accordance with the submitted chromatograms. Same as above.

Decision: Registration Board decided to approve the case subject to onsite verification/authenticity of the product development and stability data by the QA/LT.

9.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.**
	Name, address of Manufacturing site.	M/s Well care Pharmaceuticals, A/7, Punjab Small Industrial Estate, Sargodha.

Decision: Registration Board decided to approve the case subject to onsite verification/authenticity of the product development and stability data by the QA/LT.

CLB in its 284th meeting held on 16th December 2021 has considered and approved the grant of following four (04) additional section to M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura;

- Capsule (Penicillin). – New.
- Oral Dry Powder Suspension (Penicillin). – New.
- Dry Powder Injectable (Penicillin). – New.
- Dry Powder Injectable (Carbapenem). – New.

Following applications of M/s Fynk Pharma are placed before the Board for consideration.

Batch Size	800 Capsules	800 Capsules	800 Capsules
Manufacturing Date	09-2022	09-2022	09-2022
Date of Initiation	09-02-2022	09-02-2022	09-02-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Proforma invoice No. PL/P-INV/HO/866 dated 03-01-2022 wherein they have purchased 1kg of Ampicillin trihydrate from M/s Pharmagen Limited. However, the invoice has not mentioned any batch number and manufacturing date of the drug substance.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 129/2020-DRAP (AD/1998630-530) dated 02-09-2020 issued on the basis of inspection conducted on 22-06-2020. GMP certificate is not within last three years.
2.	2.3	Table for literature references with correct information with applicable fee shall be submitted.	Firm has provided corrected information with submission of 7500/- fee vide slip No. 7428934818 dated 10-07-2023.
3.	3.2.S.7	Readable copies of the drug substance stability data sheets shall be submitted.	**Not submitted.**
4.	3.2.P.2.2	• Dissolution time is not mentioned in the pharmaceutical equivalence. Justification shall be submitted. • CDP sheets have mentioned Ampicillin sodium as drug substance. Justification shall be submitted.	Firm has submitted that dissolution time is mentioned in specifications and CDP. Firm has submitted that it was typo error and they attached updated CDP sheets. ***However, in the updated CDP sheets no dissolution medium is mentioned. Furthermore, the values at different time points are completely different from that of the originally submitted.***

5.	3.2.P.5.1	Justification shall be submitted for adopting all the specifications for the finished product from BP while only dissolution test is adopted from USP.	Firm has submitted that in BP monograph of ampicillin capsule, dissolution test has not been given, so they adopted dissolution test from USP.
6.	3.2.P.8	• Proforma invoice provided by the firm has not mentioned any batch number and mfg. date. Clarify. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted.	Firm has submitted new invoice wherein they have added batch number of the material used in trial batches. ***However, the batch number mentioned in COAs and stability data sheet is (B. No. 00003/093/2021) while the new submitted invoice has mentioned B. No. 00003-11/093/2021.***

Decision: Deferred for following;

- **Valid copy of GMP certificate/inspection report conducted within last three years of the drug substance manufacturer shall be submitted.**
- **Readable copies of the drug substance stability data sheets shall be submitted.**
- **Firm will perform Comparative Dissolution of their applied product with innovator product with complete details of the mediums, time points and details of the innovator product.**
- **Clarification regarding the API lot number as it is different in COAs, stability data sheets and submitted invoice.**

751.	**Name, address of Applicant / Marketing Authorization Holder**	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Name, address of Manufacturing site.	M/s Fynk Pharmaceuticals (Pvt.) Ltd., 19 km, G.T. Road, Kalashah Kaku, Tehsil Ferozwala, District Sheikhupura.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate No. 198/2022-DRAP (AD-9405944056-789) dated 17-11-2022 issued on the basis of inspection 14/11/2022.
	Evidence of approval of manufacturing facility	Dry Powder suspension (Penicillin) – New section approved vide letter No. F. 1-63/84-Lic (Vol III) dated 27-12-2021 is submitted.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 14708 dated 12-06-2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 9880312550 Dated 05-06-2023.
	The proposed proprietary name / brand name	**Ampiwell Dry Powder Suspension 125mg/5ml.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml contains: Ampicillin as trihydrate …… 125mg.
	Pharmacotherapeutic Group of (API)	Beta-Lactam Antibacterial, Penicillin.
	Pharmaceutical form of applied drug	Dry Powder Suspension.
	Reference to Finished product specifications	BP specifications.
	Proposed Pack size	60ml.
	Proposed unit price	As per SRO.

	The status in reference regulatory authorities	Ampicillin 125 mg/5ml Oral Suspension, Kent Pharmaceuticals Limited, MHRA Approved.
	For generic drugs (me-too status)	Ampcin 15 mg Dry Suspension, CSH Pharmaceuticals, Reg. No. 071538.
	Name and address of API manufacturer.	M/s Zafa Chemie, Raiwind Road Bypass, Sunder Industrial Estate, Mouza Bhaikot, Tehsil & District Lahore, Pakistan. Copy of GMP Certificate No. 79/2020-DRAP (AD/1992617-228) dated 20-04-2020 issued on the basis of inspection conducted on 23-10-2019.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detail of the drug substance including its nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis (B. No. 828, mfg. date 02-2021) and justification of specification, working standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. Real time: B. No. 804, 805 & 806. Accelerated: 808, 809 & 810.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the Ampicillin dry powder suspension with B. No. SM-022, mfg. date 05-2022 manufactured by M/s Amros Pharmaceuticals by performing quality test of identification, pH, average filled bottle weight, assay and microbial count test. Results of both the test product and reference product are within the specifications limit and comparable.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.
STABILITY STUDY DATA		

Manufacturer of API	M/s Zafa Chemie, Raiwind Road Bypass, Sunder Industrial Estate, Mouza Bhaikot, Tehsil & District Lahore, Pakistan.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Response by the firm
1.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer shall be submitted.	**Firm has once again submitted** Copy of GMP Certificate No. 79/2020-DRAP (AD/1992617-228) dated 20-04-2020 issued on the basis of inspection conducted on 23-10-2019. ***Not within last three years.***
2.	2.3	Table for literature references with correct information shall be submitted.	Firm has provided corrected information with submission of 7500/- fee vide slip No. 22193240162 dated 10-07-2023.
3.	3.2.S.7	Real time and accelerated stability study data of the drug substance for the same batches shall be submitted.	***Firm has once again submitted real time stability data of the drug substance for the same batches.*** ***Real time: B. No. 804, 805 & 806.*** ***Accelerated: 808, 809 & 810.*** ***Stability study data for same***

			batches is not provided.
4.	3.2.P.2.2	Justification for not performing the pharmaceutical equivalence test against the innovator product.	Firm has submitted that innovator product was not available in the market, so they used competitor product.
5.	3.2.P.8	• Stability data sheets as per decision of 293rd meeting of RB with inclusion of API lot number shall be submitted. • Justification shall be submitted for the applied wavelength (230) in the submitted chromatograms with respect to the analytical procedures and BP (254). • Justification shall be submitted for the injection volume (20) in the submitted chromatograms with respect to the analytical procedures and BP (50µl). • Raw data sheets for calculation of ampicillin content at each time point shall be submitted. • Documents for procurement of API shall be submitted.	Firm has submitted revised stability data sheets wherein they have included API lot number in the stability data sheets. Firm has submitted that wavelength of 230nm was adopted from USP monograph of Ampicillin. ***However, finished product specifications, analytical procedures have mentioned BP specifications.*** Firm has submitted that to achieve system suitability, they used 20 µl injection volume as per USP <621>, method verification also has been conducted for this variation. They further submitted that at 11-month time point they had tested by using 50 µl injection volume and using 254 nm wavelength and found satisfactory results. Firm has submitted that they attached raw data sheets for calculation of ampicillin content. ***However, they have not submitted any calculation sheets.*** Firm has submitted copy of invoice No. 293913 mentioning 10kg quantity of Ampicillin trihydrate with batch No. 828.

Decision: Deferred for following;

- **Valid copy of GMP certificate/inspection report conducted within last three years of the drug substance manufacturer shall be submitted.**
- **Real time and accelerated stability study data of the drug substance for the same batches shall be submitted.**
- **Pharmaceutical equivalence test of the applied formulation against the innovator product shall be submitted.**
- **Justification shall be submitted for adopting wavelength (230nm) in the submitted chromatograms while the specification and analytical procedures of the finished product has mentioned BP specification with wavelength of (254nm).**
- **Raw data sheets for calculation of ampicillin content at each time point shall be submitted.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate No. DC/A-I/2020/1517 dated 09-09-2020 issued by Drug Control Organization, Rajasthan, Jaipur. Valid till 11-04-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not readable.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.
6.	Record of Digital data logger for temperature and	Not submitted.

	humidity monitoring of stability chambers (real time and accelerated)	

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.		First page of Form 5F is not provided.	Submitted.
2.	1.6.5	Valid copy of GMP certificate of drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. DC/A-4/GMP/2022/2804 dated 07-09-2022 issued by Food Safety and Drugs Control Commissionerate (Drugs Control Wing) Rajasthan, India valid till 08-09-2023.
3.	2.3	• Revised table for literature references with correct information regarding the drug substance and finished product with applicable fee shall be submitted. • Justify the actual quantity/vial against mentioned in executed BMR's the potency of drug substance.	Firm has provided corrected information with submission of 7500/- fee vide slip No. 01832409787 dated 10-07-2023. Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor. Factor = 1.140 Potency = 83.56% 500 x 1.140/83.56 x 100 = 682.14
4.	3.2.S.4.1	Specification of the drug substance submitted by the drug substance manufacturer are for Ampicillin sodium instead of Meropenem. Justification shall be submitted.	Firm has submitted that during compilation of dossier, specifications for ampicillin were attached instead of Meropenem. They also submitted new specification for Meropenem.
5.	3.2.S.4.5	Justification of specification for the drug substance is for Doxycycline USP. Justify?	Firm has submitted that it was typo error and they also attached justification of specifications for Meropenem.
6.	3.2.S.7	• Clear and readable copies of the stability data sheets for drug substance shall be submitted. • Stability study data for the drug substance submitted is for Meropenem USP only. Justification shall be submitted. • Stability data sheets for the drug substance has also not mentioned sodium content. Justify. • Real time stability data is only for 09 months. Complete real time stability data shall be submitted.	Submitted. Firm has submitted that stability for drug substance is Meropenem trihydrate blended with sodium carbonate as evident from the specifications. Drug substance manufacturer writes product name as per USP monograph i.e. Meropenem USP Sterile. Real time stability study data for 48 months is submitted by the firm.
7.	3.2.P.1	Justify the proposed quantity/vial against the potency limit of drug substance declared in 3.2.S.4.1.	Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor. Factor = 1.140 Potency = 83.56% 500 x 1.140/83.56 x 100 = 682.14
8.	3.2.P.2.2	• Justification shall be submitted for not performing pharmaceutical equivalence against the innovator product.	Firm has submitted that they have also performed pharmaceutical equillance studies against the Meronem injection of M/s Pfizer Pakistan limited. They also provided the new

		• Content uniformity test and particulate matter tests are not performed in the pharmaceutical equivalence studies. Justify?	pharmaceutical equivalence studies of their product against the Meronem 500mg injection with batch No. 5B22H31, mfg. date 04-2022 by performing quality tests including pH, water content, uniformity of dosage unit, particulate matter, Assay of Meropenem, assay of sodium content and sterility.
9.	3.2.P.8	• Evidence of availability of atomic absorption spectroscopy shall be submitted. • Clear and readable copy of the clearance certificate for import of API shall be submitted. • Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Firm has submitted that they have attached commercial invoice for atomic absorption. However, no such invoice is attached. Firm has submitted copy of clearance certificate No. E-1393520227361 dated 07-06-2022 mentioning 0.50 grams of Meropenem with batch number of MRPS-0422032, mfg. date 30-Apr-2022. ***However, the actual quantity used in three trial batches is much more than the imported.*** ***Not submitted.*** Firm has submitted that in DRB 323rd meeting their two products i.e. Faxcil 250mg & 500. Submitted. Submitted.

Decision: Deferred for following;

- **Evidence of availability of atomic absorption spectroscopy shall be submitted.**
- **Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted.**
- **Justification shall be submitted regarding the quantity of drug substance imported i.e 0.5grams vide clearance certificate No. E-1393520227361 dated 07-06-2022 against the manufactured six trial batches of two different strengths of 500mg and 1gm with each trial of 300 vials.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate No. DC/A-I/2020/1517 dated 09-09-2020 issued by Drug Control Organization, Rajasthan, Jaipur. Valid till 11-04-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not readable.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.		First page of Form 5F is not provided.	Submitted.
2.	1.6.5	Valid copy of GMP certificate of drug substance manufacturer issued by the concerned/relevant regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. DC/A-4/GMP/2022/2804 dated 07-09-2022 issued by Food Safety and Drugs Control Commissionerate (Drugs Control Wing) Rajasthan, India valid till 08-09-2023.
3.	2.3	• Revised table for literature references with correct information regarding the drug substance and finished product with applicable fee shall be submitted. • Justify the actual quantity/vial against mentioned in executed BMR's the potency of drug substance.	Firm has provided corrected information with submission of 7500/- fee vide slip No. 01832409787 dated 10-07-2023. Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor. Factor = 1.140 Potency = 83.56% 1000 x 1.140/83.56 x 100 = 1364.29
4.	3.2.S.4.1	Specification of the drug substance submitted by the drug substance manufacturer are for Ampicillin sodium instead of Meropenem. Justification shall be submitted.	Firm has submitted that during compilation of dossier, specifications for ampicillin were attached instead of Meropenem. They also submitted new specification for Meropenem.
5.	3.2.S.4.5	Justification of specification for the drug substance is for Doxycycline USP. Justify?	Firm has submitted that it was typo error and they also attached justification of specifications for Meropenem.
6.	3.2.S.7	• Clear and readable copies of the stability data sheets for drug substance shall be submitted. • Stability study data for the drug substance submitted is for Meropenem USP only. Justification shall be submitted. • Stability data sheets for the drug substance has also not mentioned sodium content. Justify. • Real time stability data is only for 09 months. Complete real time stability data shall be submitted.	Submitted. Firm has submitted that stability for drug substance is Meropenem trihydrate blended with sodium carbonate as evident from the specifications. Drug substance manufacturer writes product name as per USP monograph i.e. Meropenem USP Sterile. Real time stability study data for 48 months is submitted by the firm.
7.	3.2.P.1	Justify the proposed quantity/vial against the potency limit of drug substance declared in 3.2.S.4.1.	Firm has submitted that actual weight per vial was calculated after adjustment of assay and factor. Factor = 1.140 Potency = 83.56% 1000 x 1.140/83.56 x 100 = 1364.29
8.	3.2.P.2.2	• Justification shall be submitted for not performing pharmaceutical equivalence against the innovator product.	Firm has submitted that they have also performed pharmaceutical equillance studies against the Meronem injection of M/s Pfizer Pakistan limited.

		• Content uniformity test and particulate matter tests are not performed in the pharmaceutical equivalence studies. Justify?	They also provided the new pharmaceutical equivalence studies of their product against the Meronem 500mg injection with batch No. 5B22H31, mfg. date 04-2022 by performing quality tests including pH, water content, uniformity of dosage unit, particulate matter, Assay of Meropenem, assay of sodium content and sterility.
	9. 3.2.P.8	• Evidence of availability of atomic absorption spectroscopy shall be submitted. • Clear and readable copy of the clearance certificate for import of API shall be submitted. • Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Firm has submitted that they have attached commercial invoice for atomic absorption. However, no such invoice is attached. Firm has submitted copy of clearance certificate No. E-1393520227361 dated 07-06-2022 mentioning 0.50 grams of Meropenem with batch number of MRPS-0422032, mfg. date 30-Apr-2022. ***However, the actual quantity used in three trial batches is much more than the imported.*** ***Not submitted.*** Firm has submitted that in DRB 323rd meeting their two products i.e. Faxcil 250mg & 500. Submitted. Submitted.

Decision: Deferred for following;

- **Evidence of availability of atomic absorption spectroscopy shall be submitted.**
- **Raw data sheets for calculation of assay of Meropenem and sodium content at each time interval with calculation formula shall be submitted.**
- **Justification shall be submitted regarding the quantity of drug substance imported i.e 0.5grams vide clearance certificate No. E-1393520227361 dated 07-06-2022 against the manufactured six trial batches of two different strengths of 500mg and 1gm with each trial of 300 vials.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Amoxicillin Trihydrate:** Copy of GMP certificate No. 06/2019-DRAP (AD/607409-530) dated 11-01-2019 on the basis of inspection conducted on 08-01-2019 is submitted. **Potassium Clavulanate:** Firm has submitted copy of GMP Certificate (No. SX20180229) issued by CFDA dated 06-06-2018 valid till 05-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate (E-2827420227964) dated 26-Sep-2022 specifying 1.0 Kg of Potassium Clavulanate. The invoice is cleared by DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.		First page of Form 5 is not submitted by the firm.	Submitted.
2.	1.6.5	Valid copy of GMP certificate of both the drug substance manufacturer shall be submitted.	**Amoxicillin Trihydrate:** Firm has submitted copy of GMP certificate No. DC/A-4/GMP/2022/2804 dated 07-09-2022 issued by Food Safety and Drugs Control Commissionerate (Drugs Control Wing) Rajasthan, India valid till 08-09-2023. ***However, in the submitted dossier, drug substance data from M/s Pharmagen Limited was submitted.*** **Potassium Clavulanate:** ***Not submitted.***

3.	3.2.S.4.1	• Specifications of both the drug substances from drug product manufacturer shall be submitted. • Specification of the drug substance provided by drug substance manufacturer has mentioned pH limit of 5.5 – 8 while the COA of finished product manufacturer has mentioned 4.8-8. Clarification shall be submitted.	Submitted. ***However, specifications from both the drug substance and drug product manufacturer are different from each other in assay, water content and sulphated ash.*** Firm has submitted specifications for the drug substance i.e. mixture of potassium Clavulanate with Avicel (1:1) wherein the pH is 4.8-8 for the mixture. They further submitted that the same mixture is used as drug substance instead of potassium Clavulanate alone.
4.	3.2.S.4.2	Analytical procedures for both the drug substances from drug product manufacturer shall be submitted.	Submitted.
5.	3.2.S.4.3	• Verification studies of the drug substance (amoxicillin trihydrate) performed by the drug product manufacturer shall be submitted. • Verification studies of the drug substance (Potassium Clavulanate) performed by the drug product manufacturer shall be submitted.	Submitted. Submitted.
6.	3.2.S.4.4	• COA of the drug substance from both drug substance manufacturer and finished product manufacturer with same batch numbers shall be submitted. • Specification submitted by the drug substance manufacturer are all changed in the COA of the finished product manufacturer. Justification shall be submitted.	***Firm has submitted COA of the drug substance Ampicillin trihydrate from drug substance manufacturer instead of Amoxicillin trihydrate.*** Firm has submitted that specifications are in compliance with the specifications of the Potassium Clavulanate Diluted (Avicel or Syloid) 1:1. They further submitted that since potassium Clavulanate is not stable, so, Avicel is added (in a ratio of 1:1 by weight) by drug substance manufacturer to make the final product stable during the storage, shipment and usage. They also provided specifications for the same.
7.	3.2.S.5	Details/COA of the working standard used in the analysis of Potassium Clavulanate shall be submitted.	Submitted.
8.	3.2.S.7.3	All the tests in the stability data sheets are in contrast to the specifications provided by the drug substance manufacturer. Justification is required.	Firm has submitted that stability data sheets of the drug substance is for the mixture of Potassium Clavulanate Diluted.
9.	3.2.P.5.2	Analytical procedures for the finished product shall be submitted.	Submitted. ***However, the submitted analytical procedure is completely different from BP monograph.*** ***Concentration of the standard solution for amoxicillin and potassium Clavulanate are different***

			from BP. Furthermore, BP specifies lithium Clavulanate as reference standard while firm in their analytical method has mentioned potassium Clavulanate as reference standard.
10.	3.2.P.8	• Stability data sheets as per decision of 293rd meeting of RB with inclusion of API lot number shall be submitted. • Raw data sheets for calculation of assay at each time point with formula shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Justification regarding the quantity of drug substance i.e. Potassium Clavulanate shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing and testing of all the three strengths of Falamox suspension.	**Not submitted.** **Not submitted.** Firm has submitted that in DRB 323rd meeting their two products i.e. Faxcil 250mg & 500. Firm has submitted that quantity of potassium Clavulanate was calculated to make three strengths. They further submitted that calculation sheet is attached. However, no calculation sheet is attached with the file. ***Firm has submitted copy of clearance certificate (E-2827420227964) dated 26-Sep-2022 specifying 1.0 Kg of Potassium Clavulanate. The invoice is cleared by DRAP, Lahore.*** ***As per record of the executed BMRs of the trial batches with strength of* 125mg/5ml*, 37.23mg/5ml quantity of potassium Clavulanate is used.*** ***60ml of bottle is used in stability data.*** ***37.23 x 12 = 446.76mg/bottle.*** ***Total of 03 trial batches with batch size of 500 each were manufactured.*** ***1500 x 446.76 = 670,140mg or 670gm.*** ***As per record of the executed BMRs of the trial batches with strength of* 250mg/5ml*, 74.38mg/5ml quantity of potassium Clavulanate is used.*** ***60ml of bottle is used in stability data.*** ***74.38 x 12 = 892.56mg/bottle.*** ***Total of 03 trial batches with batch size of 500 each were manufactured.*** ***1500 x 892.56 = 1,338,840mg or 1338gm.*** ***As per record of the executed BMRs of the trial batches with strength of 400*mg/5ml*, 67.83mg/5ml quantity of potassium Clavulanate is used.*** ***60ml of bottle is used in stability data.*** ***67.83 x 12 = 813.96mg/bottle.*** ***Total of 03 trial batches with batch size of 500 each were manufactured.*** ***1500 x 813.96 = 1,220,940mg or 1220gm***

			Total of 1220 + 1338 + 670 = 3228gm or 3.22kg.

Decision: Deferred for following;

- **Justification shall be submitted for change in the submitted specifications i.e assay, water content and sulphated ash between the specifications of drug substance manufacturer and drug product manufacturer.**
- **Justification shall be submitted for submission of COA of the drug substance i.e Amoxicillin trihydrate from drug substance manufacturer instead of Ampicillin trihydrate.**
- **Justification shall be submitted for Concentration of the standard solution for amoxicillin and potassium Clavulanate in the analytical procedure as both are different from BP.**
- **Justification shall be submitted for using potassium Clavulanate as reference standard while BP has mentioned lithium Clavulanate as reference standard.**
- **Stability data sheets as per decision of 293rd meeting of RB with inclusion of API lot number shall be submitted.**
- **Raw data sheets for calculation of assay at each time point with formula shall be submitted.**
- **Justification shall be submitted regarding the total quantity of drug substance Potassium Clavulanate imported i.e. 01kg vide clearance certificate (E-2827420227964) dated 26-Sep-2022 with respect to the total quantity of the drug substance used in manufacturing and testing of all the three strengths (09 trial batches) of Falamox suspension.**

Sr. No.	Section	Observation	Reply by the firm
1.		First page of Form 5 is not submitted by the firm.	Submitted.
2.	1.6.5	Valid copy of GMP certificate of both the drug substance manufacturer shall be submitted.	**<u>Amoxicillin Trihydrate:</u>** Firm has submitted copy of GMP certificate No. DC/A-4/GMP/2022/2804 dated 07-09-2022 issued by Food Safety and Drugs Control Commissionerate (Drugs Control Wing) Rajasthan, India valid till 08-09-2023. ***However, in the submitted dossier, drug substance data from M/s Pharmagen Limited was submitted.*** **<u>Potassium Clavulanate:</u>** ***Not submitted.***
3.	3.2.S.4.1	• Specifications of both the drug substances from drug product manufacturer shall be submitted. • Specification of the drug substance provided by drug substance manufacturer has mentioned pH limit of 5.5 – 8 while the COA of finished product manufacturer has mentioned 4.8-8. Clarification shall be submitted.	Submitted. ***However, specifications from both the drug substance and drug product manufacturer are different from each other in assay, water content and sulphated ash.*** Firm has submitted specifications for the drug substance i.e. mixture of potassium Clavulanate with Avicel (1:1) wherein the pH is 4.8-8 for the mixture. They further submitted that the same mixture is used as drug substance instead of potassium Clavulanate alone.
4.	3.2.S.4.2	Analytical procedures for both the drug substances from drug product manufacturer shall be submitted.	Submitted.
5.	3.2.S.4.3	• Verification studies of the drug substance (amoxicillin trihydrate) performed by the drug product manufacturer shall be submitted. • Verification studies of the drug substance (Potassium Clavulanate) performed by the drug product manufacturer shall be submitted.	Submitted. Submitted.

6.	3.2.S.4.4	• COA of the drug substance from both drug substance manufacturer and finished product manufacturer with same batch numbers shall be submitted. • Specification submitted by the drug substance manufacturer are all changed in the COA of the finished product manufacturer. Justification shall be submitted.	***Firm has submitted COA of the drug substance Ampicillin trihydrate from drug substance manufacturer instead of Amoxicillin trihydrate.*** Firm has submitted that specifications are in compliance with the specifications of the Potassium Clavulanate Diluted (Avicel or Syloid) 1:1. They further submitted that since potassium Clavulanate is not stable, so, Avicel is added (in a ratio of 1:1 by weight) by drug substance manufacturer to make the final product stable during the storage, shipment and usage. They also provided specifications for the same.
7.	3.2.S.5	Details/COA of the working standard used in the analysis of Potassium Clavulanate shall be submitted.	Submitted.
8.	3.2.S.7.3	All the tests in the stability data sheets are in contrast to the specifications provided by the drug substance manufacturer. Justification is required.	Firm has submitted that stability data sheets of the drug substance is for the mixture of Potassium Clavulanate Diluted.
9.	3.2.P.5.2	Analytical procedures for the finished product shall be submitted.	Submitted. ***However, the submitted analytical procedure is completely different from BP monograph.*** ***Concentration of the standard solution for amoxicillin and potassium Clavulanate are different from BP. Furthermore, BP specifies lithium Clavulanate as reference standard while firm in their analytical method has mentioned potassium Clavulanate as reference standard.***
10.	3.2.P.8	• Stability data sheets as per decision of 293rd meeting of RB with inclusion of API lot number shall be submitted. • Raw data sheets for calculation of assay at each time point with formula shall be submitted. • Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Justification regarding the quantity of drug substance i.e. Potassium Clavulanate shall be submitted with respect to the total quantity of the drug substance imported and total quantity used in manufacturing	**Not submitted.** **Not submitted.** Firm has submitted that in DRB 323rd meeting their two products i.e. Faxcil 250mg & 500. Firm has submitted that quantity of potassium Clavulanate was calculated to make three strengths. They further submitted that calculation sheet is attached. However, no calculation sheet is attached with the file. ***Firm has submitted copy of clearance certificate (E-2827420227964) dated 26-Sep-2022 specifying 1.0 Kg of***

		and testing of all the three strengths of Falamox suspension.	***Potassium Clavulanate. The invoice is cleared by DRAP, Lahore.*** ***As per record of the executed BMRs of the trial batches with strength of* 125mg/5ml*, 37.23mg/5ml quantity of potassium Clavulanate is used.*** ***60ml of bottle is used in stability data.*** ***37.23 x 12 = 446.76mg/bottle.*** ***Total of 03 trial batches with batch size of 500 each were manufactured.*** ***1500 x 446.76 = 670,140mg or 670gm.*** ***As per record of the executed BMRs of the trial batches with strength of* 250mg/5ml*, 74.38mg/5ml quantity of potassium Clavulanate is used.*** ***60ml of bottle is used in stability data.*** ***74.38 x 12 = 892.56mg/bottle.*** ***Total of 03 trial batches with batch size of 500 each were manufactured.*** ***1500 x 892.56 = 1,338,840mg or 1338gm.*** ***As per record of the executed BMRs of the trial batches with strength of 400*mg/5ml*, 67.83mg/5ml quantity of potassium Clavulanate is used.*** ***60ml of bottle is used in stability data.*** ***67.83 x 12 = 813.96mg/bottle.*** ***Total of 03 trial batches with batch size of 500 each were manufactured.*** ***1500 x 813.96 = 1,220,940mg or 1220gm*** ***Total of 1220 + 1338 + 670 = 3228gm or 3.22kg.***

Decision: Deferred for following;

- **Justification shall be submitted for change in the submitted specifications i.e assay, water content and sulphated ash between the specifications of drug substance manufacturer and drug product manufacturer.**
- **Justification shall be submitted for submission of COA of the drug substance i.e Amoxicillin trihydrate from drug substance manufacturer instead of Ampicillin trihydrate.**
- **Justification shall be submitted for Concentration of the standard solution for amoxicillin and potassium Clavulanate in the analytical procedure as both are different from BP.**
- **Justification shall be submitted for using potassium Clavulanate as reference standard while BP has mentioned lithium Clavulanate as reference standard.**
- **Stability data sheets as per decision of 293rd meeting of RB with inclusion of API lot number shall be submitted.**
- **Raw data sheets for calculation of assay at each time point with formula shall be submitted.**
- **Justification shall be submitted regarding the total quantity of drug substance Potassium Clavulanate imported i.e. 01kg vide clearance certificate (E-2827420227964) dated 26-Sep-2022 with respect to the total quantity of the drug substance used in manufacturing and testing of all the three strengths (09 trial batches) of Falamox suspension.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has submitted that Biogen pharmaceutical is a new license facility hence no such inspection has been conducted.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted that their HPLC system are not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted.

Remarks of Evaluator:

Sr. No.	Section	Observations	Reply by the firm
1.		First page of form 5F is not submitted.	Submitted.
2.	1.3.4	• Valid copy of DML for Biogen life sciences shall be submitted. • Valid copy of GMP certificate of the applicant shall be submitted.	Firm has submitted copy of DML No. 000911 in the name of M/s Biogen Pharmaceuticals w.e.f. 13-02-2020 and also provided change of title vide letter No. F. 1-2/2019-Lic. Dated 18-03-2021 from M/s Biogen Pharmaceuticals to M/s Biogen Life Sciences. ***Not submitted.***
3.	1.3.5	Section approval letter has mentioned Ampoule section SVP (General) while the applied formulation is in vial. Justification shall be submitted.	Firm has submitted that applied formulation is in ampoule and they also have ampoule general section.
4.	1.5.4	Proposed pack size shall be submitted.	1x5's Blister contain 5 ampoule of 1 ml packed in unit carton.
5.	2.3	Table for literature references with correct information regarding the drug product with applicable fee shall be submitted.	***Revised table for literature references is submitted without fee submission.***
6.	1.6.5	Valid copy of GMP certificate of the drug substance manufacturer issued by the relevant/concerned regulatory authority shall be submitted.	Firm has submitted copy of GMP certificate No. Drugs (3) pb. 2021/3124 dated 25-06-2021 issued by Food & Drugs Administration, Punjab in the name of M/s Saurav Chemical Limited., Derabassi-Barwala Road, Village Bhagwanpura, Tehsil Derabassi, District Saibzada Ajit Singh Nagar, (Punjab) valid till 25-06-2023. ***Data submitted in the dossier has mentioned Saurav Chemical Limited., 370 industrial area Phase II Panchkula, Haryana, India while the provided GMP certificate has mentioned some other address.*** ***Furthermore, validity of the certificate is till 25-06-2023.***
7.	3.2.S.4.1	Specifications of the drug substance by both the drug substance manufacturer and finished product manufacturer shall be submitted.	Submitted.
8.	3.2.S.4.2	Justification shall be submitted for the assay test in the analytical procedures	Firm has submitted that drug substance manufacturer used both the methods for analysis

		provided by the drug substance manufacturer wherein assay test is by potentiometry while USP has mentioned HPLC method.	of the drug substance. They also provided analytical procedure from the drug substance manufacturer by HPLC method.
9.	3.2.S.4.3	Verification of analytical procedures of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
10.	3.2.S.4.4	• COA's from both the drug substance and drug product manufacturer with same batch number shall be submitted. • COA of the drug substance from drug product manufacturer has only one identification test while the COA of the finished product manufacturer and USP monograph has three different test. Justification shall be submitted.	Firm has submitted copies of COAs from both the drug substance manufacturer and finished product manufacturer with COA No. KTM200008, mfg. date 01-2020. Firm has submitted they perform all the identification test on drug substance. Tests are also evident from the newly submitted COA.
11.	3.2.S.7.3	• Complete real time stability of all the three batches of the drug substance shall be submitted. • Justification shall be submitted for not conducting most of the test in the stability of the drug substance i.e. Sterility, bacterial endotoxin pH etc.	Firm has submitted real time stability data for three batches the drug substance for 48 months. Firm has submitted that due to Aseptic filling of Biorolac 30mg/ml solution (Ketorolac Tromethamine) the Raw material (Ketorolac Tromethamine) is non sterile powder. That why drug substance manufacturer does not perform Bacterial Endotoxin Test &Sterility test. Other test like pH ,LOD Melting Point, Assay Impurities performed by drug substance manufacturer which are mentioned in the stability summery sheet.
12.	3.2.P.2.2	Details of the comparator product including its manufacturer, batch No. and manufacturing date etc. shall be submitted.	**Product Name:** Toradol 30mg/ml Injection **Registration Number: 108584** **Batch No: 25003** **Mfg. Date**:06/2022 **Exp. Date**:05/2024 **Manufactured by** :Martin Dow Marker LTD
13.	3.2.P.3.3	Scientific justification shall be submitted for not performing the terminal sterilization of the finished product.	Firm has submitted that the Finished Product was Terminally sterilized as recorded on BMR page No. 12 Which could not be mentioned here.
14.	3.2.P.5.2	Complete analytical procedures for all the tests shall be submitted.	Submitted.
15.	3.2.P.5.6	This section has mentioned manufacturer specifications. Justification shall be submitted.	Specification of Biorolac Injection is USP specs however, due to typographical mistake, instead of USP Specifications Manufacturer specifications was mentioned.
16.	3.2.P.8	• Reference of previous approval of applications with stability study data of the firm (if any) shall be submitted. • Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) shall be submitted.	Not applicable. Firm has submitted commercial invoice No. SCL/2020-21/138 dated 26-09-2020 mentioning 50gm of ketorolac Tromethamine USP with batch no. KTM200008, mfg. date of 01-01-2020. ***However, invoice is not attested by DRAP.*** Submitted.

		• Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Submitted.

Decision: Deferred for following;

- **Valid copy of GMP certificate of the applicant shall be submitted.**
- **Clarification regarding the drug substance manufacturer shall be submitted as the submitted GMP certificate has different address than the information submitted in 3.2.S.**
- **Valid copy of the GMP certificate of the drug substance manufacturer shall be submitted.**
- **Scientific justification shall be submitted for performing the terminal sterilization of the finished product with reference to innovator drug product literature.**
- **Documents for the procurement of API with approval from DRAP (in case of import) shall be submitted.**
- **Submission of fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021 shall be submitted.**

B. Application of locally manufactured deferred drugs on Form 5F.

	The proposed proprietary name / brand name	**Pime-4 500mg Injection.**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Cefepime HCl with L-Arginine eq. to Cefepime ….500mg
	Pharmaceutical form of applied drug	Dry powder injection.
	Pharmacotherapeutic Group of (API)	01DE Fourth-generation cephalosporin
	Reference to Finished product specifications	USP specifications.
	Proposed Pack size	1’s.
	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	MAXIPIME 500mg & 1gm (Cefepime hydrochloride) for injection, USFDA Approved.
	For generic drugs (me-too status)	CefStar for injection 500mg IV/IM, Barret Hodgson Pakistan (Pvt.) Ltd., Registration No: 030953.
	GMP status of the Finished product	GMP Certificate No.70/2021-

	manufacturer	DRAP(FID/2061717-540) Dated 08-09-21
	Evidence of section approval.	Dry Powder Injection (Cephalosporin) - New section vide No.F.1-10/2012-Lic dated 07-06-2022 is approved.
	Name and address of API manufacturer.	M/s Kopran Research Laboratories Limited, K4/4, Additional MIDC, At & Post Birwadi, Taluka Mahad, District Raigad - 402 302 Maharashtra, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Cefepime HCl and L-Arginine is present in USP. Firm has submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis (CEIV/B2201004, mfg. date 11-2022) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted both real time and accelerated stability study data for the drug substance for three batches. Stability study conditions: Real time: 30°C ± 2°C /65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (CEIV/B1203011, CEIV/B1203012, CEIV/B1203013)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its description & composition, Pharmaceutical equivalence, manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Cefstar 500mg IV/IM injection by performing quality tests (Identification, Average weight content & Assay).

	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

REQUEST OF EXEMPTION FROM ON SITE INSPECTION				
The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.				
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate No. New-WHO-GMP/Cert/KD/89275/2020/11/33788 dated 20-10-2020 issued on the basis of inspection conducted on 06-03-2020 valid till 19-10-2023.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate No. E-897164883689 dated 19-04-2022 for 50Kg of Cefepime HCl and L-Arginine sterile USP having Batch No. CEIV/B2201004 with manufacturing date of 01-11-2021 issued in name of M/s Medisave attested by AD I&E DRAP, Lahore. Firm has also submitted copy of loan letter from M/s Medisave Pharmaceutical for 05kg.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted		
Remarks by the Evaluator:				

Sr. No.	Section	Observation	Reply by the firm
1.	1.3.4	Latest GMP certificate/last inspection report conducted within last three years for the Finished Product manufacturer shall be submitted.	Firm has submitted copy of GMP certificate No. 70/2021-DRAP (FID/2061717-540) dated 08-09-2021 issued on the basis of inspection conducted on 08-09-2021.
2.	2.3.R	Table for literature references shall be revised with inclusion of status of both drug substance and finished product in pharmacopoeia with applicable fee.	*Not submitted.*
3.	3.2.S.4.1	Drug Substance manufacturer has mentioned L-arginine quantity (on as is basis) between 34% - 44% while FPP has mentioned 37.1% - 44%. Clarify.	Firm has submitted that it was typographic error and also submitted corrected specification and corrected COA for the drug substance. *However, fee applicable to pre-registration variation is not submitted.*
4.	3.2.S.4.2	Calculation formula for assay of drug substance shall be provided.	Submitted.
5.	3.2.S.4.4	• Justification shall be submitted regarding the COA of the drug substance provided by the drug product manufacturer as assay of Cefepime base on as is basis in the same is 50.19% while the specification provided by the drug substance manufacturer has assay limit of Cefepime on as is basis of NLT 50.5%. • COA of the drug substance by the drug product manufacturer has manufacturing date of 11-2022 while that of the drug substance manufacturer has manufacturing date of 11-2021. Clarify.	Firm has only submitted COA of the drug substance from supplier. *However, initially submitted specification provided by the drug substance manufacturer has assay limit of Cefepime on as is basis of NLT 50.5% while the COA of the finished product manufacturer has assay of Cefepime on as is basis of 50.19 which is out of specifications.* Firm has submitted that it was typo error and they also provided corrected COA.
6.	3.2.P.2.2	• Justification shall be submitted for not performing Pharmaceutical Equivalence against the innovator product. • Details of the reference product used in the Pharmaceutical Equivalence shall be submitted. • pH test is not performed. • Justification shall be submitted for not performing most of the quality test applicable on powder for injection.	Firm has submitted that due to easy availability of market sample Cefstar injection was used in PE. CefStar 500mg Injection, Batch No. C7100, Mfg. date 03-2021 is submitted. Firm has submitted revised results for pharmaceutical equivalence wherein they have added pH test. Not submitted.
7.	3.2.P.8	In use stability data shall be submitted.	Firm has submitted that its ready to use injection.

Decision of 326th meeting of Registration Board: Deferred for following:

- Revised table for literature references with inclusion of status of the both drug substance and finished product in different pharmacopoeias shall be submitted.
- Justification shall be submitted for use of out of specifications drug substance in the trial batches.
- Submission of Pharmaceutical Equivalence against the innovator product.

- Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.

Reply by the firm:

S. No.	Reason for deferment	Reply submitted by the firm
1.	Revised table for literature references with inclusion of status of the both drug substance and finished product in different pharmacopoeias shall be submitted.	Firm has submitted revised table for literature references with correct information.
2.	Justification shall be submitted for use of out of specifications drug substance in the trial batches.	Firm has submitted that it was a typo error and they also submitted raw data sheets for the new calculation wherein the assay on as is basis is 50.60. ***However, they also submitted COA for the drug substance wherein still same value of 50.19% is mentioned.***
3.	Submission of Pharmaceutical Equivalence against the innovator product.	Firm has submitted pharmaceutical equillance with Maxipime 500mg injection by performing quality tests of Description, Identification, clarity of solution, pH, water content, Average weight content, uniformity of dosage units, BET, Sterility & Assay. ***However, no details of the comparator product such as manufacturer, batch number, manufacturing date expiry date etc. are not mentioned.***
4.	Submission of Rs. 7,500/- fee for revision of specifications as per notification No.F.7-11/2021-B&A/DRAP dated 07-05-2021.	Firm has submitted fee of 7500/- vide slip No. 81101392 dated 13-06-2023.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

		template. Summarized information related to nomenclature, structure, general properties, solubility, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Firm has submitted detail of the drug substance regarding its nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures, batch analysis (11C0742107001, Mfg. date 12-07-2021) and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies (Drug substance.)	Firm has submitted both real time and accelerated stability study data for the drug substance for three batches. Stability study conditions: Real time: 30˚C ± 2˚C /65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (11C0741702001, 11C0741702002 & 11C0741702003)
	Module-III (Drug Product):	The firm has submitted detail of the drug product including its description & composition, Pharmaceutical equivalence, manufacturers, description of manufacturing process and controls, process validation protocol, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand leader that is Maxipime 500mg IV/IM injection batch No. Y83J, mfg. date 01-2021 manufactured by GSK, Pakistan by performing quality tests (Identification, water content, pH, bacterial endotoxin, sterility & Assay).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA	
Manufacturer of API	M/s Shandong Luoxin Pharmaceutical Group Hengxin Pharmaceutical Co., Ltd., West Side of yanbin Road, Feixian Economic Development Zone, Shandong, China.
API Lot No.	11C0742107001.
Description of Pack	Transparent Type II glass vial filled with powder,

(Container closure system)	closed with rubber stopper and flip-off seal.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TDI001	TDI002	TDI003
Batch Size	500 vials	500 vials	500 vials
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	15-11-2021	15-11-2021	15-11-2021
No. of Batches	03		

REQUEST OF EXEMPTION FROM ON SITE INSPECTION

The firm has requested for Exemption from On-site Investigation of their submitted stability data and provided the following documents in conjunction with the checklist approved by the Registration Board.

Administrative Portion

13.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
14.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of manufacturing license No. Lu 20150511 valid till 26-10-2025. (Raw materials, Sterile raw materials)
15.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted.
16.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
17.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
18.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observations	Reply by the firm
1.	1.5.2 or 3.2.P.5.1	Label claim of the applied formulation shall be revised as per reference product with submission of full fee.	
2.	1.5.5	Pharmacotherapeutic group shall be changed from third generation cephalosporin to 4th generation cephalosporin.	
3.	2.3.	Table for literature references shall be revised with inclusion of status of both drug substance and finished product in pharmacopoeia.	
4.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	
5.	3.2.S.4.2	Analytical procedures for the drug substance used by the drug product manufacturer shall be submitted.	

6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	
7.	3.2.S.7	• Specifications of the drug substance provided by the drug substance manufacturer are different from the specification of the drug substance in the stability data sheets. Justification shall be submitted. • Specifications of the drug substance has mentioned "Contains NLT 90% and NMT 115% of Cefepime HCl calculated on anhydrous and Arginine free basis" while the stability data sheets for the drug substance has mentioned "NLT 83% of Cefepime calculated on anhydrous and Arginine free basis". Justification shall be submitted.	
8.	3.2.P.5.1	Specifications provided by the finished product manufacturer for the drug product is for Lidocaine HCl instead of Cefepime HCl with L arginine. Clarification shall be submitted.	
9.	3.2.P.5.2	Analytical procedures provided by the finished product manufacturer for the drug product is for Lidocaine HCl instead of Cefepime HCl with L arginine. Signed analytical procedures for the drug product shall be submitted.	
10.	3.2.P.8	• Identification test, water content tests are not performed in the stability studies of the drug product. • Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number, date of initiation of stability studies and total batch size. • Documents for the procurement of API with approval from DRAP shall be submitted. • Reference of previous approval of applications with stability study data of the firm shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision of 327th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Reply submitted by the firm:

Sr. No.	Section	Observations	Reply by the firm
1.	1.5.2 or 3.2.P.5.1	Label claim of the applied formulation shall be revised as per reference product with submission of full fee.	Firm has submitted revised label claim as under; Each Vial contains: Cefepime HCl with L-Arginine eq. to Cefepime …….500mg. ***Firm has submitted Fee of 7500/- vide slip***

			No. 92213403304 dated 29-05-2023 and differential fee of 22500/- vide slip No. 97100344 dated 13-07-2023.
2.	1.5.5	Pharmacotherapeutic group shall be changed from third generation cephalosporin to 4th generation cephalosporin.	Firm has submitted that it was a typographic error and revised Pharmacotherapeutic group from third generation cephalosporin to 4th generation cephalosporin.
3.	2.3.	Table for literature references shall be revised with inclusion of status of both drug substance and finished product in pharmacopoeia.	Firm has submitted revised table for literature references with correct information regarding both the drug substance and finished product.
4.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	Submitted.
5.	3.2.S.4.2	Analytical procedures for the drug substance used by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Submitted.
7.	3.2.S.7	• Specifications of the drug substance provided by the drug substance manufacturer are different from the specification of the drug substance in the stability data sheets. Justification shall be submitted. • Specifications of the drug substance has mentioned "Contains NLT 90% and NMT 115% of Cefepime HCl calculated on anhydrous and Arginine free basis" while the stability data sheets for the drug substance has mentioned "NLT 83% of Cefepime calculated on anhydrous and Arginine free basis". Justification shall be submitted.	Firm has submitted new stability data sheets for the same batches of the drug substance with specifications provided by the drug substance manufacturer. Firm has submitted new stability data sheets for the same batches of the drug substance with assay specifications of 34% to 42% of Arginine and NLT 90% NMT 115% of Cefepime calculated on anhydrous and arginine free basis.
8.	3.2.P.5.1	Specifications provided by the finished product manufacturer for the drug product is for Lidocaine HCl instead of Cefepime HCl with L arginine. Clarification shall be submitted.	Firm has submitted USP specifications for the drug product.
9.	3.2.P.5.2	Analytical procedures provided by the finished product manufacturer for the drug product is for Lidocaine HCl instead of Cefepime HCl with L arginine. Signed analytical procedures for the drug product shall be submitted.	Submitted.
10.	3.2.P.8	• Identification test, water content tests are not performed in the stability studies of the drug product. • Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number, date of initiation of stability studies and total batch size.	Firm has submitted revised stability data sheets for all the three trial batches as per decision of 293rd meeting of Registration Board with inclusion of API lot number, date of initiation of stability studies and total batch size. They also included Identification test, water content tests in the revised stability data sheets. API lot No. 11C0742107001.

		• Documents for the procurement of API with approval from DRAP shall be submitted. • Reference of previous approval of applications with stability study data of the firm shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	Trial batch size is 500 vials each. 15-11-2021 is the initiation date of stability studies. Firm has submitted commercial invoice No. CI-HXIP201910PK-074 dated 10-09-2021 mentioning 10kg quantity of Cefepime HCL L-Arginine with batch number 11C0742107001, Mfg. date 12-07-2021 attested by Assistant Director I&E, DRAP, Islamabad dated 22-10-2021. Submitted.

Decision: Approved with following label claim;

Each Vial contains:

Cefepime HCl with L-Arginine eq. to Cefepime …….500mg.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted

Remarks by the Evaluator:

Sr. No.	Section	Observations	Reply by the firm
1.	1.5.2 or 3.2.P.5.1	Label claim of the applied formulation shall be revised as per reference product with submission of full fee.	
2.	1.5.5	Pharmacotherapeutic group shall be changed from third generation cephalosporin to 4th generation cephalosporin.	
3.	2.3.	Table for literature references shall be revised with inclusion of status of both drug substance and finished product in pharmacopoeia.	
4.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	
5.	3.2.S.4.2	Analytical procedures for the drug substance used by the drug product	

		manufacturer shall be submitted.	
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	
7.	3.2.S.7	• Specifications of the drug substance provided by the drug substance manufacturer are different from the specification of the drug substance in the stability data sheets. Justification shall be submitted. • Specifications of the drug substance has mentioned "Contains NLT 90% and NMT 115% of Cefepime HCl calculated on anhydrous and Arginine free basis" while the stability data sheets for the drug substance has mentioned "NLT 83% of Cefepime calculated on anhydrous and Arginine free basis". Justification shall be submitted.	
8.	3.2.P.2.2	Justification shall be submitted for not performing PE against the innovator product.	
9.	3.2.P.5.2	Signed analytical procedures for the drug product shall be submitted.	
10.	3.2.P.8	• Identification test, water content tests are not performed in the stability studies of the drug product. • Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number, date of initiation of stability studies and total batch size. • Documents for the procurement of API with approval from DRAP shall be submitted. • Reference of previous approval of applications with stability study data of the firm shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision of 327th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Reply submitted by the firm:

Sr. No.	Section	Observations	Reply by the firm
1.	1.5.2 or 3.2.P.5.1	Label claim of the applied formulation shall be revised as per reference product with submission of full fee.	Firm has submitted revised label claim as under; Each Vial contains: Cefepime HCl with L-Arginine eq. to Cefepime …….2000mg. ***Firm has submitted Fee of 7500/- vide slip No. 166008087933 dated 29-05-2023 and***

			differential fee of 22500/- vide slip No. 26857018807 dated 13-07-2023.
2.	1.5.5	Pharmacotherapeutic group shall be changed from third generation cephalosporin to 4th generation cephalosporin.	Firm has submitted that it was a typographic error and revised Pharmacotherapeutic group from third generation cephalosporin to 4th generation cephalosporin.
3.	2.3.	Table for literature references shall be revised with inclusion of status of both drug substance and finished product in pharmacopoeia.	Firm has submitted revised table for literature references with correct information regarding both the drug substance and finished product.
4.	3.2.S.4.1	Specifications of the drug substance by the drug substance manufacturer shall be submitted.	Submitted.
5.	3.2.S.4.2	Analytical procedures for the drug substance used by the drug product manufacturer shall be submitted.	Submitted.
6.	3.2.S.4.3	Verification studies of the drug substance performed by the drug product manufacturer shall be submitted.	Not submitted.
7.	3.2.S.7	• Specifications of the drug substance provided by the drug substance manufacturer are different from the specification of the drug substance in the stability data sheets. Justification shall be submitted. • Specifications of the drug substance has mentioned "Contains NLT 90% and NMT 115% of Cefepime HCl calculated on anhydrous and Arginine free basis" while the stability data sheets for the drug substance has mentioned "NLT 83% of Cefepime calculated on anhydrous and Arginine free basis". Justification shall be submitted.	Firm has submitted new stability data sheets for the same batches of the drug substance with specifications provided by the drug substance manufacturer. Firm has submitted new stability data sheets for the same batches of the drug substance with assay specifications of 34% to 42% of Arginine and NLT 90% NMT 115% of Cefepime calculated on anhydrous and arginine free basis.
8.	3.2.P.2.2	Justification shall be submitted for not performing PE against the innovator product.	Firm has submitted USP specifications for the drug product.
9.	3.2.P.5.2	Signed analytical procedures for the drug product shall be submitted.	Submitted.
10.	3.2.P.8	• Identification test, water content tests are not performed in the stability studies of the drug product. • Stability data sheets shall be as per decision of 293rd meeting of Registration Board with inclusion of API lot number, date of initiation of stability studies and total batch size. • Documents for the procurement of API with approval from DRAP shall be submitted.	Firm has submitted revised stability data sheets for all the three trial batches as per decision of 293rd meeting of Registration Board with inclusion of API lot number, date of initiation of stability studies and total batch size. They also included Identification test, water content tests in the revised stability data sheets. API lot No. 11C0742107001. Trial batch size is 500 vials each. 23-11-2021 is the initiation date of stability studies. Firm has submitted commercial invoice No. CI-HXIP201910PK-074 dated 10-09-2021 mentioning 10kg quantity of Cefepime HCL L-Arginine with batch number 11C0742107001, Mfg. date 12-07-2021 attested by Assistant Director I&E, DRAP, Islamabad dated 22-10-2021. Submitted.

		• Reference of previous approval of applications with stability study data of the firm shall be submitted. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	

Decision: Approved with following label claim;

Each Vial contains:

Cefepime HCl with L-Arginine eq. to Cefepime ……. 2000mg.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

C: Registration applications of deferred locally manufactured human drugs on Form 5.

763.	Name and address of manufacturer/ Applicant	M/s Alkemy Pharmaceuticals Labs Pvt Ltd, P/9, SITE, Hyderabad
	Brand Name + Dosage Form + Strength	Kemyfenac 100mg Tablet
	Composition	Each Tablet Contains: Aceclofenac…100mg
	Diary No. Date of R & I & fee	Dy. No. 40382; 05.12.2018 PKR. 20,000/-; 05.12.2018
	Pharmacological Group	Antiinflammatory and antirheumatic products, non-steroids
	Type of Form	Form 5
	Finished product Specification	The firm has claimed in-house specifications
	Pack size & Demanded Price	10's; As per SRO
	Approval status of product in Reference Regulatory Authorities.	Aceclofenac 100 mg film-coated Tablets. MHRA approved
	Me-too status	Anac 100mg Tablet. Reg. No. 81502
	GMP status	Latest GMP inspection report is required.
	Remarks of the Evaluator(IX)	The firm has applied for plain tablet. Coating composition are mentioned thereof. However, the manufacturing outlines does not depict coating process. The firm revised the manufacturing outlines. Revision of label claim to film-coated tablet is required.
	Decision of 296th meeting of RB	Deferred for: • Submission of latest GMP inspection report. • Revision of label claim to film-coated tablet along with submission of applicable fee.
	Evaluation by PEC	• The firm was inspected on 06.10.2021, wherein acceptable level of GMP compliance was reported. • The firm did not revise the label claim, but resubmitted the master formula. • The firm submitted Rs. 7,500/- fee (Challan: 3050179428)
	Decision of 313th meeting of Reg. Board.	Deferred for revision of label claim.
	Reply submitted by the firm.	Firm has submitted revised label claim as under; **Each film coated tablet Contains:** **Aceclofenac ……..…100mg**
	Evaluation by PEC	
	Decision: Approved with innovator's specifications and following label claim; **Each film coated tablet Contains:** **Aceclofenac ……..…100mg**	
764.	Name and address of manufacturer/ Applicant	M/s Alkemy Pharmaceuticals Labs Pvt Ltd, P/9, SITE, Hyderabad

	Brand Name + Dosage Form + Strength	Kemsartan Tablet 5mg/160mg
	Composition	Each Film Coated Tablet Contains: Amlodipine as besilate…5mg Valsartan…160mg
	Diary No. Date of R & I & fee	Dy. No. 40384; 05.12.2018 PKR. 20,000/-; 05.12.2018
	Pharmacological Group	Antihypertensive
	Type of Form	Form 5
	Finished product Specification	USP
	Pack size & Demanded Price	14's; Rs. 340/-
	Approval status of product in Reference Regulatory Authorities.	Exforge film-coated tablet 5/160mg. USFDA approved
	Me-too status	VALTAN -M 165 PLUS TABLET. Reg. No. 77206
	GMP status	Latest GMP inspection report is required.
	Remarks of the Evaluator(IX)	• The firm had applied for film-coated tablet. The firm revised the label claim and mentioned the coating composition in master formula. • In master formula, the label claim is amlodipine as besilate. However, in Form 5 it is amlodipine. The firm did not clarify the same. • The firm shall submit properly filled enclosure of Form 5. • The firm shall also revise amlodipine as besilate to amlodipine besilate in master formula only.
	Decision of 296th meeting of RB	Deferred for: • Submission of latest GMP inspection report. • Submission of applicable fee for revision of label claim to film-coated tablet. • Revision of amlodipine to amlodipine as besilate in Form 5. • Submission of enclosure of Form 5. • Revision of amlodipine as besilate to amlodipine besilate in master formula only. • Pack size & Demanded Price
	Evaluation by PEC	• The firm was inspected on 06.10.2021, wherein acceptable level of GMP compliance was reported. • The firm submitted Rs. 7,500/- fee (Challan: 131899163). • The firm did not adjust the weight of amlodipine besilate in master formula as salt factor.
	Decision of 313th meeting of Reg. Board.	Deferred for adjustment of weight of amlodipine besilate in master formula as salt factor.
	Reply submitted by the firm.	Firm has submitted revised master formula for the applied formulation wherein they have adjusted the weight of amlodipine besylate by applying salt factor.
	Evaluation by PEC	•
	Decision: Approved.	
765.	Name and address of manufacturer/ Applicant	M/s Alkemy Pharmaceuticals Labs Pvt Ltd, P/9, SITE, Hyderabad
	Brand Name + Dosage Form + Strength	Kemsartan Tablet 10mg/160mg
	Composition	Each Film Coated Tablet Contains: Amlodipine as besilate…10mg Valsartan…160mg
	Diary No. Date of R & I & fee	Dy. No. 40383; 05.12.2018 PKR. 20,000/-; 05.12.2018
	Pharmacological Group	Antihypertensives
	Type of Form	Form 5

	Finished product Specification	USP

	Me-too status	VALTAN -M 170 PLUS TABLET. Reg. No. 77207
	GMP status	Latest GMP inspection report is required.
	Remarks of the Evaluator(IX)	• The firm has applied for film-coated tablet. The firm revised label claim and mentioned the coating composition in master formula. • In master formula, the label claim is amlodipine as besilate. However, in Form 5 it is amlodipine. The firm did not clarify the same. • The firm shall submit properly filled enclosure of Form 5. • The firm shall also revise amlodipine as besilate to amlodipine besilate in master formula only.
	Decision of 296th meeting of RB	Deferred for: • Submission of latest GMP inspection report. • Submission of applicable fee for revision of label claim to film-coated tablet. • Revision of amlodipine to amlodipine as besilate in Form 5. • Submission of enclosure of Form 5. • Revision of amlodipine as besilate to amlodipine besilate in master formula only. • Pack size & Demanded Price
	Evaluation by PEC	• The firm was inspected on 06.10.2021, wherein acceptable level of GMP compliance was reported. • The firm submitted Rs. 7,500/- fee (Challan: 17055425) • The firm did not adjust the weight of amlodipine besilate in master formula as salt factor.
	Decision of 313th meeting of Reg. Board.	Deferred for adjustment of weight of amlodipine besilate in master formula as salt factor.
	Reply submitted by the firm.	Firm has submitted revised master formula for the applied formulation wherein they have adjusted the weight of amlodipine besylate by applying salt factor.
	Evaluation by PEC	•
	Decision: Approved.	
766.	Name and address of manufacturer/ Applicant	M/s Alkemy Pharmaceuticals Labs Pvt Ltd, P/9, SITE, Hyderabad
	Brand Name + Dosage Form + Strength	Kem- Mont 5mg Tablet
	Composition	Each chewable tablet Contains: Montelukast (as sodium)…….5mg
	Diary No. Date of R & I & fee	Dy. No. 40387; 05.12.2018 PKR. 20,000/-; 05.12.2018
	Pharmacological Group	Leukotriene receptor antagonists
	Type of Form	Form 5
	Finished product Specification	USP
	Pack size & Demanded Price	10's, 20's, 14's, 30's, 40's, 50's,60's, 70's, 80's, 90's, 100; Rs. 100 per tablet
	Approval status of product in Reference Regulatory Authorities.	SINGULAIR® (montelukast sodium) Chewable Tablets. USFDA approved
	Me-too status	Nohist Chewable Tablet 5mg. Reg. No. 85712
	GMP status	Latest GMP inspection report is required.
	Remarks of the Evaluator(IX)	Revise "Montelukast sodium eq. to. Montelukast" to "Montelukast sodium" in master formula only.
	Decision of 296th meeting of RB	Deferred for: • Submission of latest GMP inspection report.

		• Revision of Montelukast sodium eq. to. Montelukast" to "Montelukast sodium" in master formula only.
	Evaluation by PEC	• The firm was inspected on 06.10.2021, wherein acceptable level of GMP compliance was reported. • The firm submitted Rs. 7,500/- fee (Challan: 126310600433) • The firm did not adjust the weight of montelukast sodium in master formula as salt factor.
	Decision of 313th meeting of Reg. Board.	Deferred for adjustment of the weight of montelukast sodium as salt factor in master formula.
	Reply submitted by the firm.	Firm has submitted revised master formula for the applied formulation wherein they have adjusted the weight of montelukast sodium in the master formula.
	Evaluation by PEC	•
	Decision: Approved.	

Agenda of Evaluator PEC-XV

Cases of New sections & New licenses received on form 5-F:

767.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Fleming Pharmaceuticals 23 km Sheikhupura road-Lahore Pakistan.**
	Name, address of Manufacturing site.	M/s Fleming Pharmaceuticals 23 km Sheikhupura road-Lahore Pakistan.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML granted on 13-09-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 14-09-2021 specifying oral dry powder for suspension (Penicillin),Capsule(Penicillin), Tablet (Penicillin), Dry powder injectable(Penicillin),Dry powder injectable(Carbapenem) sections.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.no. 8956 dated 03-04-2023
	Details of fee submitted	PKR 30,000/- Dated 16-03-2023
	The proposed proprietary name / brand name	**Flepicin 125 mg/5mL Suspension**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5mL contains: Phenoxy methyl penicillin potassium eq to Phenoxy methyl penicillin…… 125mg
	Pharmacotherapeutic Group of (API)	penicillin antibiotics
	Pharmaceutical form of applied drug	White to off white well homogenized powder free from extraneous matter filled in ambered glass bottle sealed with flip and pp cap neatly labelled and packed in a unit carton with insertion of a leaflet, plastic measuring cup 20 mL and plastic spoon 5 mL on reconstitution with 40 mL of water off white suspension with sweet taste is availed.

	Reference to Finished product specifications	BP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Phenoxymethylpenicillin 125 mg Suspension (MHRA Approved)
	For generic drugs (me-too status)	Penicillin V Suspension of M/s. Lisko Pakistan Pvt. Ltd. Karachi, Reg.no. 006464
	Name and address of API manufacturer.	Hebei North China Pharmaceutical Huaheng Pharmaceutical Co., Ltd. Xingwang Road, Biological Industry Zone, Nanbaishe Town, Zhao County, Shijiazhuang, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the generic product Penicillin V Suspension 125 mg manufactured by Elite Pharma.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	Hebei North China Pharmaceutical Huaheng Pharmaceutical Co., Ltd.
API Lot No.	20062105043
Description of Pack (Container closure system)	FPP is packed in ambered colored glass bottle, further packed in unit carton along with patient leaflet insert.
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.		T01	T02	T03
Batch Size		700 Units	700 Units	700 Units
Manufacturing Date		04-2022	04-2022	04-2022

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Flemicillin Capsule 250 mg (322th Meeting) Flemicillin Capsule 500 mg (322th Meeting) F-Amox Suspension 125mg/5mL (323rd Meeting) F-Amox Suspension 250 mg/5mL (323rd Meeting) Fletazo Injection 2.25 g (323rd Meeting) Fletazo Injection 4.50 g (323rd Meeting) Flementin Injection 1200 mg (324th Meeting) Flementin Injection 600 mg (324th Meeting)		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. Yi 20180010) dated 23-09-2021 issued By Hebei Province Drug Administration China. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 27-01-2022 specifying 25.0 Kg of Phenoxymethyl penicillin Potassium. The invoice is cleared by AD (I&E) DRAP, Lahore.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.		

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	
1.	3.2.P.1	Formulation contain preservative sodium benzoate, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted the Antimicrobial Effectiveness test report with the remarks that sodium Benzoate is effective for use in oral product, while the antimicrobial effectiveness test should be performed specifically on the applied product.
2.	3.2.P.1	Provide information including type of diluent, its composition, quantity or volume which is to be provided along with the applied drug.	Firm replied that Diluent to be used for reconstitution is water. Direction for reconstitution is as: Add 30 mL water and shake well than add again 30 mL water to produce 100 mL solution.
3.	3.2.P.2.2.1	Specify Product name and	Firm replied that Pharmaceutical

		Registration number of reference product against which pharmaceutical equivalence has been established.Further,Justify why the pharmaceutical equivalence was studied against comparator product instead of using innovator / reference product.	Equivalence study is performed against comparator product penicillin V manufactured by Elite pharmaceutical with registration number 001852. However, the registration status of comparator product against which the pharmaceutical equivalence has established was not confirmed from the available registered data.
4.	3.2.P.7	Please specify the volume size of ambered glass bottle used to fill the suspension since you have not mentioned the volume size in the requisite section.	Firm replied that Volume size of ambered glass bottle used to fill the suspension is 120 mL.
5.	3.2.P.8	Chromatograms and audit trail reports of phenoxymethyl penicillin tablets has been attached in the dossier of suspension. Clarification is required in this regard.	Firm replied that We started working simultaneous on both products i.e Flepicin Suspension (Phenoxymethylpenicillin Potassium) and Flepicin Tablets (Phenoxymethylpenicillin Potassium) and during binding of Flepicin Suspension dossier, chromatograms and audit trail reports of phenoxymethyl penicillin tablets were attached. Now we have attached Chromatograms and audit trail reports of phenoxymethyl penicillin Suspension with this letter
6.	3.2.P.8	In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.	Firm replied that in-use stability study has already been conducted and data has been attached in ANNEX III. However, Annexure-III is not attached in the submitted reply.

Decision: Deferred for submission of following shortcomings:

- **Submit product specific preservative effectiveness studies performed in accordance with USP General Chapter <51>.**
- **In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Flemicillin Capsule 250 mg (322th Meeting) Flemicillin Capsule 500 mg (322th Meeting) F-Amox Suspension 125mg/5mL (323rd Meeting) F-Amox Suspension 250 mg/5mL (323rd Meeting) Fletazo Injection 2.25 g (323rd Meeting) Fletazo Injection 4.50 g (323rd Meeting) Flementin Injection 1200 mg (324th Meeting) Flementin Injection 600 mg (324th Meeting)
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. Yi 20180010) dated 23-09-2021 issued By Hebei Province Drug Administration China. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared on 27-01-2022 specifying 25.0 Kg of Phenoxymethyl penicillin Potassium. The invoice is cleared by AD (I&E) DRAP, Lahore.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary	Firm has submitted analytical record for product testing.

	data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	
1.	3.2.P.1	Formulation contain preservative sodium benzoate, so preservative effectiveness studies to be performed as per recommendations of pharmacopoeia and shall be submit.	Firm submitted the Antimicrobial Effectiveness test report with the remarks that sodium Benzoate is effective for use in oral product, while the antimicrobial effectiveness test should be performed specifically on the applied product.
2.	3.2.P.1	Provide information including type of diluent, its composition, quantity or volume which is to be provided along with the applied drug.	Firm replied that Diluent to be used for reconstitution is water. Direction for reconstitution is as: Add 30 mL water and shake well than add again 30 mL water to produce 100 mL solution.
3.	3.2.P.2.2.1	Specify Product name and Registration number of reference product against which pharmaceutical equivalence has been established.Further,Justify why the pharmaceutical equivalence was studied against comparator product instead of using innovator / reference product.	Firm replied that Pharmaceutical Equivalence study is performed against comparator product penicillin V manufactured by Elite pharmaceutical with registration number 001852. However, the registration status of comparator product against which the pharmaceutical equivalence has established was not confirmed from the available registered data.
4.	3.2.P.7	Please specify the volume size of ambered glass bottle used to fill the suspension since you have not mentioned the volume size in the requisite section.	Firm replied that Volume size of ambered glass bottle used to fill the suspension is 120 mL.
5.	3.2.P.8	Chromatograms and audit trail reports of phenoxymethyl penicillin tablets has been attached in the dossier of suspension. Clarification is required in this regard.	Firm replied that We started working simultaneous on both products i.e Flepicin Suspension (Phenoxymethylpenicillin Potassium) and Flepicin Tablets (Phenoxymethylpenicillin Potassium) and during binding of Flepicin Suspension dossier, chromatograms and audit trail reports of phenoxymethyl penicillin tablets were attached. Now we have attached Chromatograms and audit trail reports of phenoxymethyl penicillin Suspension with this letter
6.	3.2.P.8	In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.	Firm replied that in-use stability study has already been conducted and data has been attached in ANNEX III. However, Annexure-III is not attached in the submitted reply.

Decision: Deferred for submission of following shortcomings:

- **Submit product specific preservative effectiveness studies performed in accordance with USP General Chapter <51>.**
- **In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.**

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and

		drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the Innovator product Penicillin VK 250 mg manufactured by Sandoz GMBH., Austria.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

1.	3.2.P.2.2.1	In compliance of notification no. 14-1/2022-PEC dated 16th January,2023 issued by DRAP, submit the image/picture/snapshot of innovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.	Firm has only submitted the one sided picture of outer carton which did not reflect the batch number, mfg. date , expiry date of comparator product against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.
2.	3.2.P.8	BP monograph of phenoxymethyl penicillin potassium tablet recommend to calculate the assay content of phenoxymethyl penicillin, justify how you had calculate the content of phenoxymethyl penicillin by considering the peak of phenoxymethyl penicillin potassium, as chromatograms of assay revealed that main peak achieved at around 10 min was of phenoxymethyl penicillin potassium.	Firm replied that they have used Phenoxymethyl Penicillin Potassium in reference standard and in sample that's why peak naming was given as Phenoxymethyl penicillin potassium. While calculating the assay as we have taken weight equivalent to phenoxymethyl penicillin and thus assay calculated is of phenoxymethyl penicillin.

Decision: Approved.

The registration letter will be oisssued after submission of the details of the inovator /reference/comparator pack against which Pharmaceutical equivalence/Comparative dissolution profile studies have been performed.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.3	Firm has submitted analytical method validation reports in which they have not determined limit of detection and quantification in the validation of analytical procedures section 3.2.P.4.3, submit complete validation report including all the parameters in accordance with ICH guidelines.	Firm has not submitted the requisite document.
2.	3.2.P.1	Submit information in section 3.2.P.1 c) Description of accompanying reconstitution diluent(s) as per the guidance document approved by Registration Board which specifies that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".	Firm replied that the Diluent used for reconstitution is 0.9% sodium chloride injection and must be reconstituted in 100ml of 0.9% sodium chloride before reconstitution.
3.	3.2.P.2.2.1	Justify for not performing the pharmaceutical equivalence against the innovator product, since you have performed the equivalence study against the comparator product	Firm replied that due to unavailability of innovator product, Pharmaceutical equivalence was performed against comparator product.
4.	3.2.P.2.6	Submit data of compatibility of the drug product along with reconstitution solvent in section 3.2.P.2.6.	Firm submitted the compatibility data of drug product along with its reconstitution diluent.
5.	3.2.P.3	According to the manufacturing procedure given in section 3.2.P.3.3 filled vials are packed with WFI in unit carton, how can WFI will be used for reconstitution when the literature of innovator product revealed that "*do not use water for injection as the solution does not become isotonic."*	Firm replied that it was a clerical mistake, they used 0.9% sodium chloride injection for reconstitution.
6.	3.2.P.5.2	Justify, how you had achieved the complies result of test of *COMPLETENESS AND CLARITY OF SOLUTIONS* while using the water, since the product is sparingly soluble in water	Firm replied that in the test method it was written because of clerical error.

		according to the physicochemical properties of innovator product approved in PMDA Japan.	
7.	3.2.P.8	Submit data in section 3.2.P.8.1 as per the guidance document approved by Registration Board which specifies that "Summary of additional stability studies (if applicable) e.g. in-use studies for drug products which are to be reconstituted before use, along with proposed in-use storage statement and in-use shelf-life shall be provided".	Firm submitted the in-use stability data of Bi-penem injection till 24 hours.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Pharmacotherapeutic Group of (API)	Proton pump inhibitor
	Pharmaceutical form of applied drug	Capsules
	Reference to Finished product specifications	USP specifications
	Proposed Pack size	14's
	Proposed unit price	As per SRO

	The status in reference regulatory authorities	Omeprazole 20mg Capsule of M/s Sandoz Ltd UK (USFDA approved)
	For generic drugs (me-too status)	Risek 20 mg Capsule of M/s GETZ Pharma (Reg # 019364)
	Name and address of API manufacturer.	M/s Vision pharmaceuticals (pvt) Ltd., Plot no. 22-23, Industrial Triangle, Kahuta Road, Islamabad
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence and CDP of test formulation with comparator product Losec 20 mg Capsule (B # YEVA, Mfg Date: 09-2021, Exp Date 08-2024) of M/s Astrazeneca (Manufactured by M/s. Astrazeneca and Imported by M/s. Barrett & Hodgson, Pakistan. The results of the tests of both products were found to be within the specifications and are comparable.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	M/s Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad.
API Lot No.	OMP1158
Description of Pack (Container closure system)	14's blisters packed in unit carton
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0,3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	Tr-001	Tr-001	Tr-001
Batch Size	2000 caps	2000 caps	2000 caps
Manufacturing Date	08-2022	08-2022	08-2022
Date of Initiation	15-08-2022	15-08-2022	15-08-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	The firm has submitted copy of GMP Certificate for M/s Vision pharma pvt Ltd, Lahore issued by DRAP Lahore. It is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of invoice for the purchase of omeprazole EC pellets from M/s vision pharma dated 14-07-2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.1-3.2.S.4.2	• Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required".	Firm submit the specification and analytical of drug substance by drug product manufacturer only. Specification and Analytical Procedure of drug substance by drug substance manufacturer is not submitted by the firm.
2.	3.2.S.4.2	Further, justify the performance of dissolution testing on UV spectrophotometer by the drug substance manufacturer since the USP recommends test of	Firm replied that the drug substance manufacturer uses UV method for analysis of drug substance but they use HPLC method for both drug substance and drug product.

		dissolution on HPLC.	
3.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".*	Firm submitted the analytical method verification report in which the target concentration 0.3 mg/ml instead of 0.2mg/ml as per the submitted analytical procedure.
4.	3.2.S.4.3	Submit batch analysis report of drug substance in section 3.2.S.4.4 as per the guidance document approved by Registration Board which specifies that *"Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. A discussion and justification shall be provided for any incomplete analyses of the drug substance / API by Drug Product manufacturer (e.g. results not tested according to the proposed specification)".*	Firm submitted the Batch analysis report of drug substance.
5.	3.2.P.2.2.1	• Calculations of comparative dissolution profile is not in accordance with guidelines approved in 293rd meeting of Registration Board with reference to following points: • For f2 calculations a minimum of three time points (excluding point zero) must be used; mentioned the time point which were considered for the calculation of f2 value.	Firm replied that 3 time points were used during Comparative dissolution profile for buffer media at pH 6.8, the reading of 3rd time point are more than 85%, therefore no further reading required.
6.		Provide complete calculations of f2 value in all three physiological mediums.	Firm did not submit the reply of this query. Later Firm submit the F2 value calculations in all three physiological mediums.
7.	3.2.P.2.2.1	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests	Firm did not submit the reply of this query.

		(mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	
8.	3.2.P.5.3	Justify for performing the verification studies of assay procedure different from the method recommended in USP monograph of "Omeprazole delayed release capsule". Analytical method of drug product specifies that concentration of standard and sample preparation is 0.2mg/ml while you have performed verification studies keeping the target concentration 0.4mg/ml. Justify how these studies represent your analytical method which is in complies with USP monograph.	Firm replied that the Higher conc. Was taken to minimize errors in readings and graphs and for better resolution.
9.	3.2.P.8	• Justify for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, since the USP monograph recommends HPLC system of gradient elution over run time of 25minutes. • Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same upto three digits.	Firm replied that we perform tests and present the data as we received during the test and analysis and respectively calculate the values according to received data.
10.	3.2.P.8	• Submit raw data sheets and chromatograms of dissolution test since you have only submitted the chromatograms of assay. • Submit Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Firm replied that our HPLC Logs are recorded manually and we can share pages of our log book for your consideration.

Decision: Deferred for submission of following:

- **Specification and analytical procedure of drug substance by drug substance manufacturer.**
- **Analytical verification report of drug substance performed in accordance with analytical procedure given in section 3.2. S.4.2.**
- **Data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests should be submitted.**
- **Analytical Verification report of drug product performed in accordance with USP monograph of "Omeprazole Capsule".**
- **Justification for keeping the run time around 4.5-5mins as evident from the submitted chromatogram, while the USP monograph recommends HPLC system of gradient elution over run time of 25minutes.**

• **Justify how can the retention time, peak area, peak height, area% as well as height % of sample solutions on all the provided chromatograms of both strengths were same upto three digits.**

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Two products were approved in 326th DRB Meeting and Registration letter was issued on 31st May, 2023. CPX 250mg Reg. No.116595 & CPX 500mg Reg. No.116596.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. 4-138-I Drug 1-2019-8359) dated 18-11-19 issued by Food and Drugs Control Administration Haryana India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of loan letter from DeMont research Laboratories Pvt. Ltd. Borrowing Material qty. is 400g of Kimia Biosciences Limited India. Copy of Form 5 and ADC clearance Certificate issued by DRAP Lahore. ADC Clearance Certificate No. E-1725322807958 Dated 24-June, 2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.1	Drug substance manufacturer performed assay via potentiometric titration while the drug product manufacturer has performed assay of drug substance on UV-Vis spectrophotometer, justification is required in this regard.	Firm replied that "We perform the assay of drug substance by manual titration and UV-Vis Spectrophotometric method. But we mentioned the results in COA only UV-Vis Spectrophotometric."
2.	3.2.S.4.2	Submit Analytical procedure of drug substance by drug substance manufacturer , since you have only submitted the analytical procedure by drug product manufacturer.	Firm in their reply submitted the analytical procedure of drug substance by drug product manufacturer only. While, the query is related to the submission of analytical procedure of drug substance by drug substance manufacturer.
3.	3.2.P.2.2.1	Justify, why the pharmaceutical equivalence and comparative dissolution profile was studied against comparator product instead of using innovator product/brand leader.	• Firm replied that Comparative product sample was easily available at the time of trial batches manufacturing so we use that sample for Pharmaceutical equivalent study. • Now they perform pharmaceutical equivalence against innovator product Levopraid 25mg & 50mg Tablet of Pacific Pharma and accordingly revised Pharmaceutical equivalence report has submitted.
4.	3.2.P.2.2.1	Justify the submitted CDP data comparing the statement specify in the available public assessment report of reference product i.e. "*The active substance exhibits high solubility in the proposed dissolution medium, HCl 0.1N, as well as in the pH 4.5 and pH 6.8 medium, since the percentage dissolved is higher than 85% at 15 minutes (very rapidly dissolving scenario)".*	Firm has not submitted the reply against this query.
5.	3.2.P.5.2	Please specify the reference of acceptance criteria adopted for dissolution test and submit along with evidence of literature of innovator product.	Not submitted the reply of this query.
6.		Justify for adopting 0.06N HCl as a dissolution medium comparing the CDP report in which it was clearly revealed that drug is poorly dissolved in acidic medium, further justify the adopted dissolution medium considering the absorption window of drug in the physiological medium.	Not submitted the reply of this query.
7.		Justify for performing the assay of drug product via UV-Vis spectrophotometer instead of adopting HPLC method.	Firm replied that product monograph is not available in any pharmacopeia, so we adopted UV-Vis spectrophotometer method for stability study purpose and also performed validation of UV-Vis spectrophotometer method. Once the product is registered we will adopted HPLC method and also validate it.
8.	3.2.P.5.3	Firm has submitted analytical method validation reports in which they have	Firm submitted the Revised analytical method validation protocol and report.

		not determined limit of detection and quantification in the validation of analytical procedures, submit complete validation report including all the parameters in accordance with ICH guidelines. Further, repeatability of precision has been performed using 5 determinants while the ICH guideline/general chapter of USP recommends *"a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each); OR a minimum of 6 determinations at 100% of the test concentration",* so scientific justification is required in this regard.	
9.	3.2. P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Firm submitted the COA of working standard of ATLAS Life Science, Ahmedabad, Gujarat, India. While the API is imported from Kimia Biosciences Limited Formerly known as Laurel Organics Limited) Village Bhondsi, Tehsil Sohna, District-Gurgaon 122102 Haryana, India
10.	3.2.P.8	Submit valid GMP certificate of API manufacturer.	Firm has submitted the same INVALID GMP certificate of API Manufacturer (Valid from 18-11-2019 to 17-11-2022)

Decision: Deferred for submission of following shortcomings:

- **Submit Analytical procedure of drug substance by drug substance manufacturer, since you have only submitted the analytical procedure by drug product manufacturer.**
- **Justify the submitted CDP data comparing the statement specify in the available public assessment report of reference product i.e. "*The active substance exhibits high solubility in the proposed dissolution medium, HCl 0.1N, as well as in the pH 4.5 and pH 6.8 medium, since the percentage dissolved is higher than 85% at 15 minutes (very rapidly dissolving scenario)".***
- **Specify the reference of acceptance criteria adopted for dissolution test and submit along with evidence of literature of innovator product.**
- **Justify for adopting 0.06N HCl as a dissolution medium comparing the CDP report in which it was clearly revealed that drug is poorly dissolved in acidic medium.**
- **Submit valid GMP certificate of API manufacturer.**

775.	Name, address of Applicant / Marketing Authorization Holder	M/s ICU Pharmaceuticals, Khewat No. 13/13, Khatooni No. 57/66 Mouza Mirpur Kehna, Tehsil Sharkpur, District Sheikhupura
	Name, address of Manufacturing site.	M/s ICU Pharmaceuticals, Khewat No. 13/13, Khatooni No. 57/66 Mouza Mirpur Kehna, Tehsil Sharkpur, District Sheikhupura
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New License grant dated 28-04-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 29-04-2022 specifying Tablet (General) section, Oral Dry Powder Suspension (General), Capsule (General), Sachet (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No.7093 dated 10-03-2023
	Details of fee submitted	PKR 30,000/- Dated 08-03-2023
	The proposed proprietary name / brand name	**Privo 50mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet Contains: - Levosulpride……..50mg
	Pharmacotherapeutic Group of (API)	Antipsychotic
	Pharmaceutical form of applied drug	White colour round biconvex tablet having plain on both sides.
	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	1x10's, 2x7's 2x10's, 3x10's, 5x10's, 10x10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Levosulpiride Aristo 50 mg tablets, AIFA Italy approved
	For generic drugs (me-too status)	Levopiride 50 mg Tablet of M/s Medera Pharmaceuticals (Pvt.) Ltd. Islamabad (Reg.No. 066397)
	Name and address of API manufacturer.	Kimia Biosciences Limited Formerly known as Laurel Organics Limited) Village Bhondsi, Tehsil Sohna, District-Gurgaon 122102 Haryana, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of

		analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Scipride 50mg Tablet manufactured by Scilife Pharma Pvt. Ltd.(Reg.no. 057903) Firm has submitted CDP results of their product against the innovator's product Scipride 50mg Tablet in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	Kimia Biosciences Limited Formerly known as Laurel Organics Limited) Village Bhondsi, Tehsil Sohna, District-Gurgaon 122102 Haryana, India		
API Lot No.	KB/LSD/MC/22/001		
Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TT010	TT011	TT012
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	07-2022	07-2022	07-2022
Date of Initiation	29-07-2022	29-07-2022	29-07-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Two products were approved in 326th DRB Meeting and Registration letter was issued on 31th may, 2023. CPX 250mg Reg. No.116595 & CPX 500mg Reg. No.116596.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. 4-138-I Drug 1-2019-8359) dated 18-11-19 issued by Food and Drugs Control Administration Haryana India.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of loan letter from DeMont research Laboratories Pvt. Ltd. Borrowing Material qty. is 400g of Kimia Biosciences Limited India. Copy of Form 5 and ADC clearance Certificate issued by DRAP Lahore. ADC Clearance Certificate No. E-1725322807958 Dated 24-June, 2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Applicable

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.1	Drug substance manufacturer performed assay via potentiometric titration while the drug product manufacturer has performed assay of drug substance on UV-Vis spectrophotometer, justification is required in this regard.	Firm replied that "We perform the assay of drug substance by manual titration and UV-Vis Spectrophotometric method. But we mentioned the results in COA only UV-Vis Spectrophotometric."
2.	3.2.S.4.2	Submit Analytical procedure of drug substance by drug substance manufacturer , since you have only submitted the analytical procedure by drug product manufacturer.	Firm in their reply submitted the analytical procedure of drug substance by drug product manufacturer only. While, the query is related to the submission of analytical procedure of drug substance by drug substance manufacturer.
3.	3.2.P.2.2.1	Justify, why the pharmaceutical equivalence and comparative dissolution profile was studied against comparator product instead of using innovator product/brand leader.	• Firm replied that Comparative product sample was easily available at the time of trial batches manufacturing so we use that sample for Pharmaceutical equivalent study. • Now they perform pharmaceutical equivalence against innovator product Levopraid 25mg & 50mg Tablet of Pacific Pharma and accordingly revised Pharmaceutical equivalence report has submitted.
4.	3.2.P.2.2.1	Justify the submitted CDP data comparing the statement specify in the available public assessment report of reference product i.e. "*The active substance exhibits high solubility in the proposed dissolution medium, HCl 0.1N, as well as in the pH 4.5 and pH 6.8 medium, since the percentage dissolved is higher than 85% at 15 minutes (very rapidly dissolving scenario)".*	Firm has not submitted the reply against this query.
5.	3.2.P.5.2	Please specify the reference of acceptance criteria adopted for dissolution test and submit along with evidence of literature of innovator product.	Not submitted the reply of this query.
6.		Justify for adopting 0.06N HCl as a dissolution medium comparing the CDP report in which it was clearly revealed that drug is poorly dissolved in acidic medium, further justify the adopted dissolution medium considering the absorption window of drug in the physiological medium.	Not submitted the reply of this query.
7.		Justify for performing the assay of drug product via UV-Vis spectrophotometer instead of adopting HPLC method.	Firm replied that product monograph is not available in any pharmacopeia, so we adopted UV-Vis spectrophotometer method for stability study purpose and also performed validation of UV-Vis spectrophotometer method. Once the product is registered we will adopted HPLC

			method and also validate it.
8.	3.2.P.5.3	Firm has submitted analytical method validation reports in which they have not determined limit of detection and quantification in the validation of analytical procedures, submit complete validation report including all the parameters in accordance with ICH guidelines.Further,repeatability of precision has been performed using 5 determinants while the ICH guideline/general chapter of USP recommends *"a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each); OR a minimum of 6 determinations at 100% of the test concentration",* so scientific justification is required in this regard.	Firm submitted the Revised analytical method validation protocol and report.
9.	3.2. P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Firm submitted the COA of working standard of ATLAS Life Science, Ahmedabad, Gujarat, India. While the API is imported from Kimia Biosciences Limited Formerly known as Laurel Organics Limited) Village Bhondsi, Tehsil Sohna, District-Gurgaon 122102 Haryana, India
10.	3.2.P.8	Submit valid GMP certificate of API manufacturer.	Firm has submitted the same INVALID GMP certificate of API Manufacturer (Valid from 18-11-2019 to 17-11-2022)

Decision: Deferred for submission of following shortcomings:

- **Submit Analytical procedure of drug substance by drug substance manufacturer, since you have only submitted the analytical procedure by drug product manufacturer.**
- **Justify the submitted CDP data comparing the statement specify in the available public assessment report of reference product i.e. "*The active substance exhibits high solubility in the proposed dissolution medium, HCl 0.1N, as well as in the pH 4.5 and pH 6.8 medium, since the percentage dissolved is higher than 85% at 15 minutes (very rapidly dissolving scenario)".***
- **Specify the reference of acceptance criteria adopted for dissolution test and submit along with evidence of literature of innovator product.**
- **Justify for adopting 0.06N HCl as a dissolution medium comparing the CDP report in which it was clearly revealed that drug is poorly dissolved in acidic medium.**
- **Submit valid GMP certificate of API manufacturer.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Two products were approved in 326th DRB Meeting and Registration letter was issued on 31th may, 2023. CPX 250mg Reg. No.116595 & CPX 500mg Reg. No.116596.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. 01/2021-DRAP(FID-2036001-5101 dated 06-01-2021
3.	Documents for the procurement of API with approval from DRAP (in case of import).	API Received from Local manufacturer as 4 kg sample for trail Purpose only.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted the audit trail on product testing
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-	Response of the Firm

		comings	
1.	3.2.S.4.2	Submit Analytical procedure of drug substance by drug substance manufacturer, since you have only submitted the analytical procedure by drug product manufacturer.	Firm submitted the analytical procedure of drug substance again by the drug product manufacturer instead of submitting the analytical procedure of drug substance by drug substance manufacturer.
2.	3.2.S.4.2	Justify for adopting the assay procedure different from that recommended by USP for Azithromycin Dihydrate raw material.	Firm submitted the revised analytical procedure of drug substance in accordance with USP monograph of Azithromycin.
3.	3.2.S.4.4	Justify for adopting the acceptance criteria of assay different from that recommended criteria by USP, since you have mentioned the results of assay in percentage on the COA of API while USP specify the limits in µg/mg.	Firm submitted the revised COA of API in which the result of assay is in accordance with USP monograph.
4.	3.2.S.7	Specification of water content test mentioned on the stability data sheet is not the recommended criteria for the dihydrate labelled Azithromycin according to USP, justification is required in this regard.	Firm submitted the revised stability data of drug substance in which the specifications are in accordance with Azithromycin Dihydrate labelled API.
5.	3.2. P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Firm submitted the COA working standard supplied by API Manufacturer M/s. Citi Pharma.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Name and address of API manufacturer.	Nantong Jinghua Pharmaceutical Co., Ltd. No.20,3 Haibin Road, Yanhai Economic Development Zone,Rudong, Nantong, Jiangsu, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, Solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Felbex 20mg Tablet manufactured by Martin Dow Pharma Pvt. Ltd. Firm has submitted CDP results of their product against the innovator's product Felbex 20mg Tablet in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	Nantong Jinghua Pharmaceutical Co., Ltd. No.20,3 Haibin Road, Yanhai Economic Development Zone, Rudong, Nantong, Jiangsu, China.
API Lot No.	20211206

Description of Pack (Container closure system)	Alu-Alu Blister		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	TT019	TT020	TT021
Batch Size	1500 Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	08-2022	08-2022	08-2022
Date of Initiation	30-08-2022	30-08-2022	30-08-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Two products were approved in 326th DRB Meeting and Registration letter was issued on 31th may, 2023. CPX 250mg Reg. No.116595 & CPX 500mg Reg. No.116596.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. JS20180829 dated 01-06-2018 valid till 31-05-2023 issued by China Food and Drugs Administration china
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of loan letter from DeMont research Laboratories Pvt. Ltd. Borrowing Material qty. is 1kg of Nantong Jinghua Pharmaceutical Co., Ltd. Copy of Form 5 and ADC clearance Certificate issued by DRAP Lahore. ADC Clearance Certificate No. E-1582822802698 Dated 12-June, 2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	3.2.S.4.2	Submit Analytical procedure of drug substance by drug substance manufacturer, since you have only submitted the analytical procedure by drug product manufacturer.	Firm submitted the analytical procedure of drug substance again by the drug product manufacturer instead of submitting the analytical procedure of drug substance by drug substance manufacturer.
2.	3.2.S.4.3	Firm has submitted analytical method validation reports in which they have not determined limit of detection and quantification in the validation of analytical procedures, submit complete validation report including all	Firm submitted revised complete method validation as per ICH guideline is attached.

		the parameters in accordance with ICH guidelines. Further, repeatability of precision has been performed using 5 determinants while the ICH guideline/general chapter of USP recommends *"a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each); OR a minimum of 6 determinations at 100% of the test concentration",* so scientific justification is required in this regard.	
3.	3.2.P.2.1	Justify the quantity of Piroxicam Beta cyclodextrin i.e. 212.31mg used per tablet comparing the claim of innovator product i.e. Piroxicam Beta cyclodextrin 191.2 mg eq. to piroxicam 20mg.	Firm replied that "as per API assay results i.e. 9.42%, quantity of API per tablet is 212.31mg: 100/9.42x20=212.31mg per tablet.
4.	3.2.P.2.2.1	Justify, why the pharmaceutical equivalence and comparative dissolution profile was studied against comparator product instead of using innovator product/brand leader.	Firm replied that Comparative product sample was easily available at the time of trial batches manufacturing so we use that sample for Pharmaceutical equivalent study
5.	3.2.P.5.2	Justify how UV-Vis spectrophotometer method was adopted for the testing of drug product, since the testing method of drug substance manufacturer for assay of Piroxicam Beta cyclodextrin was based on HPLC.	Firm replied that "As product monograph is not available in any pharmacopeia, so we adopted UV-Vis spectrophotometer method for stability study purpose and also performed validation of UV-Vis spectrophotometer method. Once the product is registered we will adopted HPLC method and also validate it".
6.	3.2.P.5.2	Submit the detailed procedure of dissolution testing, since you have not submitted the method of dissolution.	Firm replied that "As product is innovator specification and product monograph is not available in any pharmacopeia and dissolution test is not available in FDA dissolution method, so we performed only disintegration test. Once the product is registered we will developed the dissolution method and will performed it on commercial scale product stability batched".
7.	3.2.P.5.2	Scientific justification is required for calculation of assay content of piroxicam Beta cyclodextrin instead of only piroxicam comparing the label claim of applied formulation.	Firm replied We claimed Piroxicam as beta cyclodextrin, so Piroxicam content is required for calculation purpose.

8.	3.2.P.5.2	Justify why water content test is not included in the finished product specification, further justify why water content test was not performed during the stability studies.	Firm replied that The water content test is performed during the raw material testing stage, while the bulk manufacturing test performed is LOD (Loss on Drying). Additionally, when analysing the finished product sample containing multiple inactive materials, conducting a water content test on Piroxicam beta cyclodextrin is not feasible. Also testing record is attached in BMR record.
9.	3.2.P.5.2	Justify why dissolution is not included in the finished product specification, further justify why dissolution test was not performed during the stability studies.	Firm in their reply stated that "As product is innovator specification and product monograph is not available in any pharmacopeia and dissolution test is not available in FDA dissolution method, so we performed only disintegration test. Once the product is registered we will developed the dissolution method and will performed it on commercial scale product stability batched".
10	3.2.P.5.2	Justify why content uniformity test is not included in the finished product specification, further justify why content uniformity test was not performed during the stability studies	Firm replied that "Revised finished product specification is attached. Further we adopted uniformity of dosage units by weight variation test, Once the product is registered we will adopt the content uniformity as per described in USP general chapter".Revised Finished product specification & certificate of analysis of finished product is attached.
11	3.2.P.5.3	Firm has submitted analytical method validation reports in which they have not determined limit of detection and quantification in the validation of analytical procedures, submit complete validation report including all the parameters in accordance with ICH guidelines. Further, repeatability of precision has been performed using 5 determinants while the ICH guideline/general chapter of USP recommends *"a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each); OR a minimum of 6 determinations at 100% of the test concentration",* so scientific justification is required in this regard.	Firm submitted revised complete method validation as per ICH guideline.
12	3.2. P.6	Provide certificate of analysis of reference standard /working standard used for testing of the product.	Firm submitted the COA of working standard from M/s. Kaifeng Pharmaceuticals (Group) Co. Ltd. Henan, China while the API is imported from Nantong Jinghua Pharmaceutical

			Co., Ltd. No.20,3 Haibin Road, Yanhai Economic Development Zone,Rudong, Nantong, Jiangsu, China.

Decision: Deferred for submission of following shortcomings:

- **Submit Analytical procedure of drug substance by drug substance manufacturer, since you have only submitted the analytical procedure by drug product manufacturer.**
- **Firm should include the dissolution test in the finished product analysis, accordingly submit the detailed analytical procedure of dissolution test and submit Performance of dissolution test at next time point of long term stability studies and CDP studies against the innovator/reference product using the same newly developed dissolution method.**

779.	Name, address of Applicant / Marketing Authorization Holder	M/s. TriVista Pharmaceuticals

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Zhejiang Taizhou Hisyn Pharmaceutical Co. Ltd. Chemical and Medical Raw Materials Base, Linhai Park Zhejian Province

		Zhejiang Starry Pharmaceutical Co. Ltd. No.1 Starry Road of Xianju Zhejiang Province, China
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25°C±2, 60% RH±5%. The stability study data is till 36 months. Zhejiang Taizhou Hisyn Pharmaceutical Co. Ltd. Chemical and Medical Raw Materials Base, Linhai Park Zhejian Province Batch no. H18920080501, H18920080502, H18920080503 Zhejiang Starry Pharmaceutical Co. Ltd. No.1 Starry Road of Xianju Zhejiang Province, China Batch no. C006-0802003, C006-0802004, C006-0802005
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence established against Omnipaque 350mgI/ML Vial (100ml)
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Colorless type I Glass vial (100ml), bromobutyl closure, blue tear off cap
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 2 batches of 50ml.The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 24 month has submitted.

INDICATIONS AND USAGE:
OMNIPAQUE (iohexol) injection is a radiographic contrast agent indicated for intrathecal, intravascular, oral, rectal, intraarticular and body cavity use. OMNIPAQUE oral solution is indicated for oral use only in conjunction with OMNIPAQUE injection administered intravenously for computed tomography (CT) of the abdomen.
DOSAGE AND ADMINISTRATION:
The concentration and volume required will depend on the indication, size and condition of the patient, and the equipment and imaging technique used. For CT of the head and body, OMNIPAQUE may be used with an automated contrast injection system or contrast media management system cleared for use with OMNIPAQUE. See full prescribing information for complete dosing information.
Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings along with Response of the Firm
1.	Submit valid drug sale license of importer Hospital supply corporation, since the submitted DSL was expired on 29-06-2022. Firm submitted the copy of valid DSL issued in the name of M/s. Hospital Supply Corporation 42, Darul Aman Housing Society, Karachi (DSL no. 0237) and validity granted till 29/06/2024.	

2.	According to the composition table associated with CoPP of drug product, API iohexol comply USP specification while the submitted COA of both API vendors claimed that their material complies EP specification, so clarification is required in this regard. Firm submit the explanation letter from Product License holder i.e. BIEM ILac Sanayi ve Ticaret A.S., Anittepe Mah, Turgut Reis Cad. No.: 21 Tandogan Cnkaya, Ankara Turkey, in which it is stated that "during pharmaceutical development and first application in country of origin, first DMF of API supplier Zhejiang Starry Pharmaceutical Co. Ltd. No.1 Starry Road of Xianju Zhejiang Province, China was in compliance of USP. Accordingly, batch formula was established according to USP specifications. Lately, starry pharmaceutical has update their specifications according to EP specifications and get approval for CEP. Biem has applied for CEP submission variation in 03-08-2016 and get approval for variation in 10.10.2016. Firm submitted the copy of variation letter issued from Turkish Medicines and Medical Agency for the approval of updated European Pharmacopeia certificate of conformity. However, the CoPP issued in 2021 did not specify the post registration variation approved in 2016 related to the change of specification of API from USP to EP.	
3.	3.2.S.4	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required". Firm submit the specification table of drug substance which did not include the test of related substance, test of free aromatic amine, test of iodide and test of ionic compounds as per BP monograph. Further, firm submitted the analytical procedure used for routine testing of drug substance.
4.	3.2.S.4.3	Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 as per the guidance document approved by Registration Board which specifies that *"Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted".* Since you have submitted the validation report of drug substance manufacturer. Not submitted the requisite information instead submit the verification report of Bacterial Endotoxin test..
5.	3.2.S.7	Justify for not performing the test of sterility, bacterial endotoxin test, ionic compound test, free iodide test, ionic compound test, heavy metal test, residual solvent test and color of solution test during the stability studies of drug substance as evident from the data of both API suppliers. Firm replied that the parameter such as ionic compound test, free iodide test, ionic compound test, heavy metal test, residual solvent test and color of solution test are not susceptible to change during storage and are not likely to influence quality, safety and efficacy of iohexol, so they did not perform them in stability study. However, these test are included in the specification of API and also the part of BP monograph of API iohexol , further the shelf life specification may related to widened the limit of specifications but the critical test may remain same both in release specification and shelf life specification.
6.	3.2.P.2.2.1	Justify for not performing the test of free iodine, particulate matter, sterility and bacterial endotoxin test while establishing the pharmaceutical equivalence against the reference product. • Product license holder replied that Product was developmental batches manufactured in non-sterile R&D Laboratory, because of this sterility test and bacterial endotoxin test was not performed. • Further, excipients used for manufacturing of Biemexol are standard excipient used in injectable solutions. Iohexol is very soluble in water. Trometamine dissolves in

<table>
<tr><td></td><td></td><td>water and it is used for increasing solubility in our formulation. Therefore, particulate matter test was not performed in the developmental phase.
• In the formulation of the drug product, the only source for free iodine is the API Iohexol. According to the analysis results (lower than 10 PPM) obtained from CoA of API, the free iodine was evaluated as low risk for effecting of product quality. Therefore, free iodine was not performed during the development phase. Also, it is confirmed by stability data that active ingredient has not got negative effects on free iodine and stability.
However, test of free iodine, particulate matter, sterility and bacterial endotoxin test are the part of both BP and USP monograph.</td></tr>
<tr><td>7.</td><td>3.2.P.5.1</td><td>Justify for not adopting the USP or BP specification for finished product, since the official monograph of iohexol injection is present in both BP and USP Pharmacopeia.
Firm replied that for specifications which limits given In-house methods as related substances, assay and density-analysis methods are established following the USP monographs.
Firm replied that for assay release and shelf life specification of Biemexol 350mg I/ml vial containing solution for IA, IV injection are proposed as 90%-110% according to the results obtained from analytical results of development batches, validation batches and reference product.
However, the assay limit recommended in USP monograph of iohexol injection is 95-105%.</td></tr>
<tr><td>8.</td><td>3.2.P.5.1</td><td>Justify for adapting the wider assay limits i.e. from 90-110% comparing the assay limit recommended in USP monograph of iohexol injection i.e. 95-105%.
Firm replied that the assay release and shelf life specifications of Biemexol 350mgI/ml vial containing solution for IA, IV Injection are proposed as 90.0%-110% according to the results obtained from analytical results of developmental batches, validation batches and reference product.
However, the assay limit recommended in USP monograph of iohexol injection is 95-105%.</td></tr>
<tr><td>9.</td><td>3.2.P.8</td><td>Submit the batch size details of batches whose stability data has been submitted in section 3.2. P.8.
Submit the stability data of drug product of 100ml filled volume vials since you have submitted the data of 50ml and 200ml only.

Firm claimed that they applied bracketing for BIEMEXOL 350mgI/100ml SOLUTION FOR Injection. The applied Bracketing Plan is as under:

<table>
<tr><td colspan="2">Strength</td><td colspan="3">BIEMEXOL 350mgI/ml solution for Injection</td></tr>
<tr><td colspan="2">Batch</td><td>1</td><td>2</td><td>3</td></tr>
<tr><td rowspan="3">Ambalage</td><td>50ml</td><td>T</td><td>T</td><td>T</td></tr>
<tr><td>100ml</td><td></td><td></td><td></td></tr>
<tr><td>200ml</td><td>T</td><td>T</td><td>T</td></tr>
</table>
<table>
<tr><th>Batch no.</th><th>Batch size (Litre)</th><th>Batch size (vials)</th><th>Submitted data</th></tr>
<tr><td>711001 (50ml)</td><td>80L</td><td>1,584</td><td>36-month real time
6 month accelerated</td></tr>
<tr><td>712002 (50ml)</td><td>80L</td><td>1,584</td><td>36-month real time
6 month accelerated</td></tr>
<tr><td>711001 (200ml)</td><td></td><td></td><td>36-month real time
6 month accelerated</td></tr>
<tr><td>712002 (200ml)</td><td></td><td></td><td>36-month real time
6 month accelerated</td></tr>
</table>
However, the firm submit only the data of 2 batches of both volumes, while the Bracketing plan given by manufacturer is consisting of stability data of three batches of both volumes of 50ml and 200ml. Further, the Justification of application of bracketing may be required in context of container closure size and/or Fills as described in ICH guidelines, which the manufacturer has not discussed in their bracketing plan.</td></tr>
</table>

Decision: Deferred for the submission of following shortcomings/justifications:

- **Justify, how the CoPP issued in 2021 did not specify the post registration variation approved in 2016 related to the change of specification of API from USP to EP.**
- **Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by the drug product manufacturer.**
- **Submit data of verification of analytical procedure of drug substance in section 3.2.S.4.3 by the Drug Product manufacturer for drug substance.**
- **Justification for not performing the test of sterility, bacterial endotoxin test, ionic compound test, free iodide test, heavy metal test, residual solvent test and color of solution test during the stability studies of drug substance as evident from the data of both API suppliers.**
- **Justification for not performing the test of free iodine, particulate matter, sterility and bacterial endotoxin test while establishing the pharmaceutical equivalence against the reference product.**
- **Justify for not adopting the USP or BP specification for finished product, since the official monograph of iohexol injection is present in both BP and USP Pharmacopeia.**
- **Justify for adapting the wider assay limits i.e. from 90-110% comparing the assay limit recommended in USP monograph of iohexol injection i.e. 95-105%.**
- **Submit stability data of batch sizes in accordance with the CTD guidance document approved by Registration Board. Further, submit the stability data of both 50ml and 200ml volumes in accordance with the given bracketing plan and Justification the bracketing plan in context of container closure size and/or Fills as described in ICH guidelines, which the manufacturer has not discussed in their bracketing plan.**

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy.No 28165 dated 04-10-2022
	Details of fee submitted	Rs.150,000/- dated 23-09-2022
	The proposed proprietary name / brand name	0.9% Sodium Chloride Injection 100ml.
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml contains: Each 100ml water contains Sodium Chloride …. 0.9g
	Pharmaceutical form of applied drug	Solution for injection
	Pharmacotherapeutic Group of (API)	API: Sodium Chloride Therapeutic classification: Electrolyte supplements (deficiency.) ATC code: B05XA03
	Reference to Finished product specifications	USP Specification
	Proposed Pack size	In one carton 80 bottles of 100ml
	Proposed unit price	Rs 70/- per single bottle
	The status in reference regulatory authorities	Normasil 0.9% (TGA Approved).
	For generic drugs (me-too status)	Not confirmed in 100ml.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shandong Feicheng Refined Salt Plant Address of the manufacturer (s): No.002, Feicheng City, Shandong Province, China.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation

		protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has not submitted Pharmaceutical Equivalence studies report
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	Sodium Chloride Injection is supplied in Polypropylene infusion bottle
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 3 batches is for 36 months

Evaluation by PEC:

Section no.	Observation	Firm's response
3.2.S.4	Analytical method verification studies for the drug substance shall be submitted from the drug product manufacturer.	Firm submitted the analytical verification report of assay of drug substance performed by drug product manufacturer.
3.2.P.2.2.1	Pharmaceutical equivalence against the innovator drug product shall be submitted.	Firm has submitted the comparison table of critical quality attributes between self-developed formulation of M/s. Shandong Hualu Pharmaceutical Co. Ltd and Reference Listed Drug (name of manufacturer and batch detail is not mentioned). Equivalence report did not include the test of Iron, test of particulate matter in injection and Bacterial Endotoxin test as per USP monograph.

Decision: Deferred for submission of details of Reference Listed product including name, manufacturing date, expiry date etc. against which pharmaceutical equivalence is submitted

CASE OF EXPORT FACILITATION:

Export Facilitation: Applications was received through letter No.F.1-6/2019-PR-I (EFD) dated 02-06-2023. "M/s Vision Pharmaceuticals (Pvt.) Ltd. have achieved benchmark OF USD 756,000 as defined in the Board's decision during fiscal year 2021-2022. In this regard, please find the (1 molecule) 01 products applications submitted by the firm."

	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30ºC ±2ºC / 65% ± 5% RH. The real time stability study data of 2 batches is for 12 months while the stability study data for 3rd batch is for 9 months only.

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings
1.	Evidence of approval / registration / marketing status of the applied formulation in the same composition, salt form and dosage form in any one of the reference regulatory authority specified by Registration Board in its 275th meeting for further evaluation of your application.

Decision of 326th meeting of Registration Board:
Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board

deferred the case for submission of reply to the above cited shortcomings within six months.

Reply of the Firm:
Firm submitted the evidence of approval status of applied formulations in the following in reference regulatory agencies:

No.	Brand name	Country	MA Holder / Manufacturer	Formulation
I	Ketosteril	RMS Portugal CMS Belgium (BE), Denmark (DK), Spain (ES), Finland (FI), Croatia (HR), Italy (IT), Netherlands (NL), Norway (NO), Sweden (SE), Slovenia (SI)	Fresenius Kabi Deutschland GmbH	Ketovaline Calcium 86 mg Lysine Acetate 105 mg Histidine 38 mg Threonine 53 mg Tryptophan 23 mg Isoleucine Calcium, Alfa-, Keto- 67 mg Leucine Calcium, Alfa-, Keto- 101 mg Phenylalanine Calcium, Alfa-Keto- 68 mg Hydroxymethionine Calcium, Alfa - 59 mg Tyrosine 30 mg
2	KETOSTERIL	Romania	FRESENIUS KABI DEUTSCHLAND GMBH - GERMANIA	Ketovaline Calcium 86 mg Lysine Acetate 105 mg Histidine 38 mg Threonine 53 mg Tryptophan 23 mg Isoleucine Calcium, Alfa-, Keto- 67 mg Leucine Calcium, Alfa-, Keto- 101 mg
3	Ketosteril Tabletten	Germany	FRESENIUS KABI DEUTSCHLAND GMBH - GERMANIA	Ketovaline Calcium 86 mg Lysine Acetate 105 mg Histidine 38 mg Threonine 53 mg Tryptophan 23 mg Isoleucine Calcium, Alfa-, Keto- 67 mg Leucine Calcium, Alfa-, Keto- 101 mg Phenylalanine Calcium, Alfa-Keto- 68 mg Hydroxymethionine Calcium, Alfa - 59 mg Tyrosine 30 mg

After the confirmation of approval status of applied formulation in the above given reference agencies, complete dossier has been evaluated and accordingly shortcoming letter has communicated to the firm. Firm submitted following reply in response of the shortcoming letter:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm

Clarification is required related to the strength of tablet i.e. 0.63g mentioned in the relevant section, since the innovator product do not mention the strength of tablet as it is a combination product.

In the response of above query firm submitted the clarification letter from the Finished Product Importer i.e. Hebei tiancheng pharmaceutical Co. Ltd. No. 18, Jinguang street, economic and technological development zone, cangzhou city, Hebei province, china, in which they stated that "The Applied Product (Compound α-Ketoacid Tablets, manufactured by Hebei Tiancheng Pharmaceutical Co., Ltd.) contains ten active substances the formulation of which is consistent with that of the Innovator Drug (Ketosteril). The formulation of Applied Product and Ketosteril are shown in the table below.

No.	Ingredients	Each tablet contains:	
		Applied Product	Ketosteril
1	α-Ketoleucine calcium	101mg	101mg
2	α-Ketovaline calcium	86mg	86mg
3	α-ketophenylalanine calcium	68mg	68mg
4	D L-α-ketoisoleucine calcium	67mg	67mg
5	D L-α-hydroxymethionine calcium	59mg	59mg
6	L-lysine acetate	105mg	105mg
7	L-threonine	53mg	53mg
8	L-tryptophan	23mg	23mg
9	L-histidine	38mg	38mg
10	L-tyrosine	30mg	30mg
Total		630mg	630mg

The strength of the finished product is specified as the weight (or potency) or content of the active substances as per the regulation of NMPA (National Medical Product Administration, China). Due to the Applied Product contains more active substances, the strength is specified as the weight of the active substances, 0.63g, in the dossier.

1.	1.5.6	Justify how you have claimed USP specification for the applied formulation when the official monograph is not present in USP.	Firm replied that the specification of applied is in-House standard.

Lysine Acetate

Justify for using API complying in-house specification when the official monograph of lysine acetate is present in USP.

Firm replied that The specifications of Lysine Acetate are ChP. For the amino acids such as Lysine Acetate, Chinese manufacturer can only purchase the APIs complied with ChP. Based on the stability results, the APIs complied with ChP can ensure the quality of the finished product.

Applied specification of L-Lysine Acetate	USP specification of L-Lysine acetate
Identification Infrared Absorption IR spectrum of the sample should be concordant with standard.	Identification Infrared Absorption IR spectrum of the sample should be concordant with standard.
Specific Rotation Between +8.5° and +10.0°.	Optical Rotation: Acceptance criteria: +8.4° to +9.9°
Transmittance T430 Clear and colourless. Not less than 98.0 %	NA

Ammonium Not more than 0.02 %	NA
Sulfate Not more than 0.02 %	Sulphate : NMT 0.03%
Iron Not more than 10 ppm	Iron: NMT 30 ppm
Heavy metals Not more than 10 ppm	NA
Arsenic Not more than 1.0 ppm	NA
Loss on drying Not more than 0.20 %	LOSS ON DRYING: it loses NMT 0.2% of its weight.
Residue on ignition Not more than 0.10 %	Residue on Ignition: NMT 0.4%

Chromatographic Purity i) Any individual impurity ii) Total impurities Not more than 0.5 % Not more than 2.0 %	Related Compounds: Any secondary spot of the *Sample solution* is not larger or more intense than the principal spot of the *Standard solution*. Individual impurities: NMT 0.5% Total impurities: NMT 2.0%
Assay (on anhydrous basis) 98.5 to 101.0 %	Assay: Acceptance criteria: 98.0%–102.0% on the dried basis (Direct Titration)
Residual Solvent	NA

2.	3.2.P.2.2.1	Submit data of Pharmaceutical equivalence of the applied drug with the innovator / reference/ comparator product and results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted and discussed".	Firm submitted the pharmaceutical equivalence report in which all the quality parameters are included as per the specification of finished product. Further, the applied product (Compound α, -ketoacid Tablets) is a generic drug, the reference product is Ketosteril from Fresenius. The dosage forms, route of administration and active substances of applied product (Compound α, -ketoacid Tablets) is identical with those of Innovator drug. The quality between the applied product and reference product is comparable.
3.	3.2.P.2.2.1	Justify for not performing the comparative dissolution profiling study of individual amino acids.	Firm replied that "According to the specification for Compound Alpha-Ketoacid Tablets published by the Chinese NMPA, only the dissolution test for ketoanalogue calcium is required. Therefore, manufacturer instead of carrying out dissolution study of individual amino acid, performed comparative dissolution study of each ketoanalogue calcium".
4.	3.2.P.5.2	Justify for not including the dissolution profiling of individual amino acids in the release specification of finished drug product.	Firm replied that "According to the specification for Compound Alpha-Ketoacid Tablets published by the Chinese NMPA, only the dissolution test for ketoanalogue calcium is required, dissolution for each amino acid is not required".
5.	3.2.P.8	Submit complete stability data of drug product till the claimed shelf , since you have only submitted the detail of stability batches.	Firm submitted the stability data of batches 11101401,11101402,1110140 performed both at accelerated and long term conditions. However, the stability data is not on the letter head of manufacturer, without owned/signed by any technical personnel neither the stability conditions were mentioned on individual stability table of each batches.

Decision: Deferred for submission of

1. **detailed analytical procedure of dissolution testing of individual amino acid used in the formulation**
2. **the stability data of drug product which includes the result of dissolution testing of each amino acid included in the applied formulation.**
3. **Comparative dissolution profiling data which includes the release profiling study of all the amino acids used in the applied formulation.**

S.no.	Observations/Deficiencies/ Short-comings
1.	Submit original legalized CoPP of Xenetix 300mg Iodine/ml (50ml),since you have submitted the copy of CoPP of product Xenetin 350mg Iodine /ml Injection.
2.	Submit original legalized letter of authorization from Guerbet, France mentioning the product alongwith the applied volume, since you have submitted the copy of letter without any details of applied product.
3.	Submit the legal agreement letter between Hong Kong site and the Guerbet, France since you have mentioned that the product will be exported from Hong Kong to Pakistan. Further,you have mentioned in Form-5F that secondary packaging of applied product will be performed in Pharmtech(HongKong Limited) for Pakistan, so, please clarify the final QC release site of applied product for Pakistan and why the secondary packaging site has not mentioned in the submitted copy of CoPP.

Decision of 324th meeting of Registration Board:
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit original legalized CoPP of Xenetix 300mg Iodine/ml (50ml), since you have submitted the copy of CoPP of product Xenetin 350mg Iodine /ml Injection. Firm submitted the copy of CoPP in which following disparities have been observed: • Name and Pharmaceutical Form of the medicinal Product: In French it was mentioned that "*Xenetix 300, solution injectable (300mg d'Iode/ml)100ml*" In English it was written as "*Xenetix 300, solution injectable (300mg Iodine/ml)50ml".* • Status of Marketing Authorisation Holder: In French language a response is encircled which means that "*MAH is the Manufacturer in France, responsible for batch release*" In English translation b response is encircles which means that "MAH *is involved in one of the steps of the finished product manufacturing without being the manufacturer or the importer in France in charge of the batch release*." Further, the auxiliary document along with CoPP i.e. the product characteristics resume is of Xenetix 350mg d'Iode/ml instead of Xenetix 300, solution injectable (300mg Iodine/ml)50ml.	
2.	Submit original legalized letter of authorization from Guerbet, France mentioning the product along with the applied volume, since you have submitted the copy of letter without any details of applied product.	Firm submit the letter of authorisation from M/s. Guerbet Asia Pacific located at Units 1502-03,15/F, Tower A, Cheung Kei Center, 18 Hung Luen Road, Hung Hom, Kowloon, Hong Kong ("GAP") in which they certify that M/s. Medical Equipment & Systems 60/61 F.C.C. Syed Maratib Ali Road, Gulberg IV, Lahore is appointed as the sole distributor for GAP in Pakistan. List of product given in the letter includes Xenetix 300mg/ml (50ml).
3.	Submit the legal agreement letter between Hong Kong site and the Guerbet, France since you have mentioned that the product will be exported from Hong Kong to Pakistan. Further, you have mentioned in Form-5F that secondary packaging of applied product will be performed in Partech (Hong Kong Limited) for Pakistan, so, please clarify the final QC release site of applied product for Pakistan and why the secondary packaging site has not mentioned in the submitted copy of CoPP.	Firm submit the letter with reference to products Xenetix 350mg/ml Solution for Injection 100ml and Dotarem Solution for Injection 15ml from Guerbet Boite Postale 57400 95943 Roissy CdG Cedex France in which it is confirm that /s. Guerbet Asia Pacific located at Units 1502-03,15/F, Tower A, Cheung Kei Center, 18 Hung Luen Road, Hung Hom, Kowloon, Hong Kong is a subsidiary of Geurbet in Hong Kong. Further, it is stated that Guerbet Asia Pacific Ltd. Is responsible for arranging the shipments to Pakistan and is not taking part in any manufacturing or packaging process of the captioned product.

Decision: Aproved as policy for inspection of manufacturer abroad. Firm shall submit legalized CoPP from the concerned regulatory authority before issuance of registration letter.

Evaluation by PEC:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.		Submit original legalized CoPP for 20ml volume of injection, since you have submitted the copy of CoPP, which was previously considered for 15ml injection.
2.		Submit original legalized letter of authorization from Guerbet, France mentioning the product alongwith the applied volume, since you have submitted the copy of letter without any details of applied product.
3.		Submit the legal agreement letter between Hong Kong site and the Guerbet, France since you have mentioned that the product will be exported from Hong Kong to Pakistan. Further,you have mentioned in Form-5F that secondary packaging of applied product will be performed in Pharmtech(HongKong Limited) for Pakistan, so, please clarify the final QC release site of applied product for Pakistan and why the secondary packaging site has not mentioned in the submitted copy of CoPP.
4.	3.2.P.8	Submit the stability data of 20ml filled volume vials as per zone-IV-a conditions till the claimed shelf life, since you have submitted the stability data of Dotarem Injection of 15ml filled volume.

Decision of 324th meeting of Registration Board:
Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response of the Firm:

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit original legalized CoPP for 20ml volume of injection, since you have submitted the copy of CoPP, which was previously considered for 15ml injection.	Firm submitted the original Legalized CoPP (certificate no.054552 dated 11May,2023) of product DOTAREM 0.5mmol/ml, solution for injection specifying the composition per 100ml. Further, Point 2A.1 of CoPP related to the Marketing Authorisation Number and date of issue mentioning the initial marketing authorization date of 20ml vial(glass), box of 1. The composition mentioned on Resume of product Characteristic attached with CoPP is of 100ml solution, Marketing Authorisation Details enlisted 20ml glass vial injection.
2.	Submit original legalized letter of authorization from Guerbet, France mentioning the product along with the applied volume, since you have submitted the copy of letter without any details of applied product.	Firm submit the letter of authorisation from M/s. Guerbet Asia Pacific located at Units 1502-03,15/F, Tower A, Cheung Kei Center, 18 Hung Luen Road, Hung Hom, Kowloon, Hong Kong ("GAP") instead of Guerbet, France, in which they certify that M/s. Medical Equipment & Systems 60/61 F.C.C. Syed Maratib Ali Road, Gulberg IV, Lahore is appointed as the sole distributor for GAP in Pakistan. List of product given in the letter includes Dotarem Solution for Injection 20ml.
3.	Submit the legal agreement letter between Hong Kong site and the Guerbet, France since you have mentioned that the product will be exported from Hong Kong to	Firm submit the letter with reference to products Xenetix 350mg/ml Solution for Injection 100ml and Dotarem Solution for Injection 15ml from Guerbet Boite Postale 57400 95943 Roissy CdG Cedex France in which it is

	Pakistan. Further,you have mentioned in Form-5F that secondary packaging of applied product will be performed in Pharmtech (HongKong Limited) for Pakistan, so, please clarify the final QC release site of applied product for Pakistan and why the secondary packaging site has not mentioned in the submitted copy of CoPP.	confirm that /s. Guerbet Asia Pacific located at Units 1502-03,15/F, Tower A, Cheung Kei Center, 18 Hung Luen Road, Hung Hom, Kowloon, Hong Kong is a subsidiary of Geurbet in Hong Kong. Further, it is stated that Guerbet Asia Pacific Ltd. Is responsible for arranging the shipments to Pakistan and is not taking part in any manufacturing or packaging process of the captioned product.

4. Submit the stability data of 20ml filled volume vials as per zone-IV-a conditions till the claimed shelf life, since you have submitted the stability data of Dotarem Injection of 15ml filled volume.
Firm submitted the stability data of three batches in which following disparities has been observed:

Sr. No.	Batch details	Accelerated Data (40°C±2°C/75%±5%RH)	Real time data 30°C±2°C/65%±5%RH
1	13GD061A Batch size 600L Primary Packaging: 20ml Vials Manufacturing site: GUERBET Aulnay Manufacturing Date: Apr 2012	Not submitted	36 months data submitted
2	16GD170B Batch size: 900L Primary Packaging: 20ml Filled in 10 ml vials Manufacturing site: GUERBET Manufacturing Date: Dec 2016	Data of 6 month submitted of same batch with different batch details: 16GD170B Batch size: 600L Primary Packaging: 20ml vials Manufacturing site: GUERBET Manufacturing Date: Sep,2011	36 months data submitted
	15GD040B Batch size: 600L Primary Packaging: 20ml Filled in 20 ml vials Manufacturing site: GUERBET Manufacturing Date: May 2015 Gadolinium Oxide Manufacturer: TIAG	6 months data has submitted.	36 months data submitted
	12GD037A Batch size: 600L Primary Packaging: 20 ml vials Manufacturing site: GUERBET Aulnay Manufacturing Date: April 2012	6 months data has submitted. Further, 6 months data of same batch has submitted with different manufacturing date i.e. Sep,2011.	

Decision: Aproved as policy for inspection of manufacturer abroad. Firm shall submit following before ssunace of registration letter:

- **Legalized CoPP from the concerned regulatory authority.**
- **Stability data of 20ml filled volume vials as per zone-IV-a conditions till the claimed shelf life.**

Remarks OF Evaluator:

Deficiencies/ Short-comings

Shortcomings communicated to the Firm:

- You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not available in USP, but present in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provide scientific justification in this regard.
- Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May-22 sodium, when the monograph has not been present in USP.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance manufacturers."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability data of 3 months has submitted despite the batch had been manufactured in 2017.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used for reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strength.
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both actives.
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module 1, and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. However, monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.

- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactured on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured in sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with the acceptance criteria mentioned on COA of drug substance by drug substance manufacturer i.e. 4.5-6.5 and NMT 3.0%. Elevation of pH and water content of drug product without any further processing of formulation needs to be justify with the pharmacopeial reference and innovator product.
- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference and innovator product.
- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data sheet represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptance limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
- In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Remarks of the Evaluator:
In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which drug substance was imported from a new source and accordingly data of trial batches of drug product manufactured from new source of drug substance has submitted. Newly submitted dossier has again evaluated and presented below before the Board for its consideration.

787.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22143 dated 11/04/2022
	Details of fee submitted	PKR 7,500/-: dated 02/08/2022
	The proposed proprietary name / brand name	Cef-Sulb Injection IV/IM
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder Cefoperazone sodium JP equivalent to Cefoperazone…….500mg Sterile Powder Sulbactam sodium JP equivalent to Sulbactam…….500mg
	Pharmaceutical form of applied drug	Dry powder for injection

	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	JP Specifications
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Sulperazone Injection 1gm by M/s Pfizer Ltd. USA, USFDA Approved.
	For generic drugs (me-too status)	Toxirid Injection 1gm by Global Pharmaceuticals, Reg. No. 042552
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Qilu Antibiotics Pharmaceutical Co. Ltd. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of cefoperazone sodium /sulbactam sodium Injection is present in JP pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (2003FJ81NH, 2002FJ81NH, 2001FJ81NH)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator product 2SUM (Cefoperazone Sodium + Sulbactam Sodium) 1g Injection of M/s. Healthtek Pvt. Ltd. Karachi, performing quality tests (Identification, Assay, constituted solution, BET & sterility test).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has not submitted the requisite document.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Form-6 grant permission for license to import from M/s. Qilu Antibiotics Pharmaceuticals Co. Ltd., China vide Dy. No. 11160/2021 DRAP Dated: 27-12-2021. Invoice attested vide Dy.no. 11160/2021 DRAP dated: 27-12-2021in which shipper was M/s. Shandong Luoxin Pharmaceuticals, China.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Raw data sheets and chromatograms attached.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr.no.	Section	Shortcomings/Observations
1.	3.2. S.4.1	Acceptance criteria of assay mentioned in specification of drug was not in accordance with JP monograph. Assay limit mentioned in COA and specification of drug substance by both drug substance manufacturer and drug product manufacturer was Cefoperazone on anhydrous basis ≥43.5% and sulbactam on anhydrous basis ≥44.5%. / Assay acceptance criteria in accordance with JP monograph is "It contains not less than 90.0% and not more than 110.0% of the labeled potency of cefoperazone (C25H27N9O8S2: 645.67), and not less than 95.0% and not more than 110.0% of the labeled potency of sulbactam (C8H11NO5S: 233.24)".
2.	3.2. S.4.3	Firm has not submitted the analytical method verification report of drug substance performed by drug product manufacturer.

<table>
<tr><td>3.</td><td>3.2. S.5</td><td>Firm has not submitted the COA of primary / secondary reference standard including source and lot number used for testing of drug substance.</td></tr>
<tr><td>4.</td><td>3.2. S.7</td><td>Firm has submitted only 6 months long term stability data of all three batches of drug substance.</td></tr>
<tr><td>5.</td><td>3.2P.2.1(a)(b)</td><td>Firm has not provided any details related to weight of powder filled per vial keeping in view the sodium content of both active substances.</td></tr>
<tr><td>6.</td><td>3.2.P.2.1(C)</td><td>Firm has not provided any details regarding the type of diluent, its composition, quantity or volume, specifications (as applicable) in which drug product has to be reconstitute before administration.</td></tr>
<tr><td>7.</td><td>3.2. P.2.2.1</td><td>Firm has submitted the pharmaceutical equivalence report in which the acceptance criteria of all the quality test was not in accordance with JP monograph:
<table>
<tr><td>Acceptance criteria in pharmaceutical equivalence report</td><td>Acceptance criteria in JP monograph</td></tr>
<tr><td>pH (6.0-8.8)</td><td>pH (4.5-6.5)</td></tr>
<tr><td>Assay (90%-110%)</td><td>Assay (It contains not less than 90.0 and not more than 110.0% of the labeled potency of cefoperazone (C25H27N9O8S2: 645.67), and not less than 95.0% and not more than 110.0% of the labeled potency of sulbactam (C8H11NO5S: 233.24).)</td></tr>

</table>
Further firm has not performed water content test and clarity and color of solution test which are also included in JP monograph.</td></tr>
<tr><td>8.</td><td>3.2. P.5.2</td><td>Firm has not submitted the analytical procedure used for testing of drug product.</td></tr>
<tr><td>9.</td><td>3.2.P.5.3</td><td>Analytical method verification report reflects that the assay has performed on UV method while the JP monograph recommends the HPLC method for assay of drug product.</td></tr>
<tr><td>10.</td><td>3.2.P.6</td><td>Firm has not submitted the COA of primary / secondary reference standard including source and lot number used for testing of drug product.</td></tr>
<tr><td>11.</td><td>3.2.P.8</td><td>Firm has not submitted following documents to support the stability data of drug product:
Reference of previous approval of applications with stability study data of the firm (if any)
Documents for the procurement of API with approval from DRAP (in case of import).
Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.</td></tr>
<tr><td>12.</td><td>3.2.R</td><td>Firm has not submitted the copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.</td></tr>
</table>

Decision of 321st meeting of Registration Board:

- Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.
- Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit long term stability data of drug substance till the claimed shelf life.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.

- Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.
- Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.
- Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug product.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply of the Firm:

Sr.no.	Decision	Response of the Firm
1.	Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.	Firm replied that "Ask the supplier about analytical method verification ,will be dispatched soon".
2.	Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.	Firm replied that "By mistake it was attached, actual criteria of drug substance as per JP monograph".
3.	COA of primary / secondary reference standard including source and lot number used for testing of drug substance.	Firm submitted the COA of USP primary reference standard
4.	Submit long term stability data of drug substance till the claimed shelf life.	Firm replied that " Ask to supplier for long term stability, will be dispatched soon."
5.	Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.	Firm submitted the formulation table in which only the material has been listed with the information that the API (cefoperazone sodium plus sulbactum sodium) was used 3% in excess, while the calculation of dispense quantity of API per vial was not submitted by the firm.
6.	Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.	Firm submitted the pharmaceutical equivalence report in which all the quality test has been performed.
7.	Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.	Submitted
8.	Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.	Submitted
9.	COA of primary / secondary reference standard including source and lot number used for testing of drug product.	Not submitted
10.	Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-

		2021 vide Dy.no. 11160/2021 DRAP.
11.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Not submitted
12.	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Not submitted
13.	Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm submitted the fee of Rs.30,000/- vide slip no. 057382167110 dated 04-11-2022

Decision of 323rd meeting of Registration Board:
Deferred for submission of following:

- Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Response of the Firm:
Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.
Firm submit the analytical verification report including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.

COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
Firm submit the copy of COA of primary reference standard of USP of both active substances, while the claimed specification of premixed powder of both API is JP specification.

Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
In their reply firm only submitted the composition table mentioning the quantity of both active per vial i.e. Cefoperazone sodium+ Sulbactam sodium 2gm per vial, instead of giving complete calculation of weight of powder filled per vial keeping in view the sodium content of both active substances.

Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
Firm submit the valid GMP certificate of the Drug Substance manufacturer, which is valid till 13-12-2023.

Previously firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. Now the firm again submitted a new invoice, in which the Beneficiary is Qilu Pharmaceuticals Co. Ltd, China while the Manufacturer is M/s. The United Laboratories (Inner Mongolia), China quantity of 10kg is imported dated 21-06-2021, attested by DRAP vide dy.no.11160/2021 DRAP dated 27-12-2021.

While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.

Decision: Deferred for verification of DRAP attested documents related to the procurement of API.

788.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited

Remarks OF Evaluator:

Deficiencies/ Short-comings

Shortcomings communicated to the Firm:

- You have mentioned USP specification in section 1.5.6 in module 1, while the drug product monograph is not available in USP, but present in JP. Revise the specifications along with submission of requisite fee.
- The drug substance manufacturer has claimed both USP and in-house standards for the drug substance, provide scientific justification in this regard.
- Justify, how you have claimed USP specification for drug substance cefoperazone sodium+Sulbactum30-May-22 sodium, when the monograph has not been present in USP.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance manufacturers."
- Submit data in section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board, which states that "Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for both compendial as well as non-compendial drug substance(s) shall be submitted". Further justify how the analysis of drug substance was conducted without performing verification studies of the analytical method of drug substance.
- Stability study data of 3 batches of drug substances till the assigned shelf life needs to be submitted, since stability data of 3 months has submitted despite the batch had been manufactured in 2017.
- Submit data in section 3.2.P.1 (c) as per the decision of 293rd meeting of Registration Board, which states that "Provide information including type of diluent, its composition, quantity or volume, specifications (as applicable) and regulatory status in Pakistan (as applicable) for the diluent which is to be provided along with the applied drug".
- Justify the use of 4ml printed glass vial for packaging of drug product with reference to the volume of diluent used for reconstitution of dry powder for injection as per innovator product.
- Justify how you have performed pharmaceutical equivalence studies using the reference product of different strength.
- Submit data in section 3.2.P.2.3 (Manufacturing process development) as per the decision of 293rd meeting of Registration Board, which states that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified. Where relevant, justification for the selection of aseptic processing or other sterilization methods over terminal sterilization shall be provided".
- Submit the data of compatibility studies in section 3.2.P.2.6 as per the decision of 293rd meeting of Registration Board, which states that "*Compatibility studies for the dry powder for injections and dry powder for suspension should be performed as per the instructions provided in individual label of the drug product*"
- Batch formula mentioned in section 3.2.P.3.1 evident that only the active ingredient is the part of batch formula, while manufacturing procedure specified in section 3.2.P.3.3 stated that "solution has been prepared in 50-liter pyrogen free water by dissolving the 1.5kg Citi-Taxime 250mg IM and later add propylene glycol, sodium chloride and sodium hydroxide. Clarification is required either the applied product is dry powder for injection or a solution for injection as evident from the detail manufacturing procedure given in section 3.2. P.3.3.
- Justify the weight variation limit of filled vial from1107-1152mg with reference to the claimed potency of both actives.
- Provide the Pharmacopeial reference of finished product specifications, since USP specs are mentioned in module 1, and USP does not contain any monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection. However, monograph for Cefoperazone Sodium and Sulbactam Sodium for Injection is present in Japanese Pharmacopeia.
- Provide COA of primary / secondary reference standard including source and lot number in section 3.2. P.6.

- According to the document submitted in section 3.2.P.8 batch no. T-CSP-002 and T-CSP-003 has been manufactured on 02-2021, while stability study data sheet submitted in section 3.2.P.8.3 stated these batches were manufactured in sep-2021. Clarification required in this regard.
- Specify the batch size of all three stability batches.
- Justify the pH acceptance criteria (6.0-8.0) and water content acceptance limit (8.0-11%) set for drug product with the acceptance criteria mentioned on COA of drug substance by drug substance manufacturer i.e. 4.5-6.5 and NMT 3.0%. Elevation of pH and water content of drug product without any further processing of formulation needs to be justify with the pharmacopeial reference and innovator product.
- Assay content of both active should be separately calculated and mentioned as per pharmacopeial reference and innovator product.
- As per release specification of drug product acceptance criteria of assay is 90-110% while the stability data sheet represents that assay content should be between 90-115%. Justification is required regarding the variation in acceptance limit of assay content in various section of module-III.
- Justify why the sterility test is not included in the stability studies of the product.
- Provide details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Provide data of stability batches properly arranged and supported by respective documents including analytical report / COA, raw data sheet and respective chromatograms separately for each time point.
- Provide Reference of previous approval of applications with stability study data of the firm (if any)
- Documents for the procurement of API with approval from DRAP (in case of import).
- Provide compliance Record of HPLC software 21CFR & audit trail reports on product testing.
- Provide Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).
- In-use stability studies of reconstituted suspension is required along with proposed in-use storage statement and in-use shelf-life.

Remarks of the Evaluator:
In response of above shortcomings, firm has submitted a complete new CTD dossier with fee of Rs.7500/- in which drug substance was imported from a new source and accordingly data of trial batches of drug product manufactured from new source of drug substance has submitted. Newly submitted dossier has again evaluated and presented below before the Board for its consideration.

789.	Name, / Marketing Authorization Holder address of Applicant	M/s Citi Pharma Private Limited
	Name, address of Manufacturing site.	M/s Citi Pharma Private Limited Factory: 3 K.M, Head Balloki Road, Phool Nagar, Distt. Kasur
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22144 dated 04/08/2022
	Details of fee submitted	PKR 7,500/-: dated 02/08/2022
	The proposed proprietary name / brand name	Cef-Slub Injection 2gm
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Sterile Powder of Cefoperazone sodium JP equivalent to Cefoperazone 1g Sterile Powder of Sulbactam sodium JP equivalent to Sulbactam 1g
	Pharmaceutical form of applied	Dry Powder for Injection

	drug	
	Pharmacotherapeutic Group of (API)	Broad-spectrum cephalosporin antibiotic
	Reference to Finished product specifications	JP Specifications
	Proposed Pack size	1×1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Sulperazone Injection 2gm by M/s Pfizer Ltd. USA, USFDA Approved.
	For generic drugs (me-too status)	Toxirid Injection 2gm by Global Pharmaceuticals, Reg. No. 042555
	GMP status of the Finished product manufacturer	New license granted on 21/09/2021 Cephalosporin section approved.
	Name and address of API manufacturer.	M/s Qilu Antibiotics Pharmaceutical Co. Ltd. China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of cefoperazone sodium /sulbactam sodium Injection is present in JP pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 6 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (2003FJ81NH, 2002FJ81NH, 2001FJ81NH)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator product 2SUM (Cefoperazone Sodium + Sulbactam Sodium) 2g Injection of M/s. Healthtek Pvt. Ltd. Karachi, performing quality tests (Identification, Assay, constituted solution, BET & sterility test).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

</table>

Decision of 321st meeting of Registration Board:

- Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.
- Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit long term stability data of drug substance till the claimed shelf life.

- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.
- Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.
- Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.
- COA of primary / secondary reference standard including source and lot number used for testing of drug product.
- Details that which lot number of drug substance has been used in manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.
- Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.

Reply of the Firm:

Sr.no.	Decision	Response of the Firm
1.	Submit analytical method verification studies including results of specificity and accuracy parameters as per requirement of section 3.2.S.4.3 of Form-5F.	Firm replied that "Ask the supplier about analytical method verification ,will be dispatched soon".
2.	Justification for adopting the acceptance criteria of assay of drug substance different from that specified in JP monograph.	Firm replied that "By mistake it was attached, actual criteria of drug substance as per JP monograph".
3.	COA of primary / secondary reference standard including source and lot number used for testing of drug substance.	Firm submitted the COA of USP primary reference standard
4.	Submit long term stability data of drug substance till the claimed shelf life.	Firm replied that " Ask to supplier for long term stability, will be dispatched soon."
5.	Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.	Firm submitted the formulation table in which only the material has been listed with the information that the API (cefoperazone sodium plus sulbactum sodium) was used 3% in excess, while the calculation of dispense quantity of API per vial was not submitted by the firm.
6.	Submit pharmaceutical equivalence report, in which all the quality test should performed in compliance with JP monograph.	Firm submitted the pharmaceutical equivalence report in which all the quality test has been performed.
7.	Submit analytical procedure used for testing of drug product under section 3.2.P.5.2.	Submitted
8.	Submit analytical method verification report of assay testing performed on HPLC in compliance with JP monograph.	Submitted
9.	COA of primary / secondary reference standard including source and lot number used for testing of drug product.	Not submitted
10.	Details that which lot number of drug substance has been used in	Firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s.

	manufacturing of each batch of drug product. Also provide documents confirming evidence of import of each lot of drug substance used in manufacturing of these batches of drug product.	Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.
11.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Not submitted
12.	Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.	Not submitted
13.	Full fee of Rs. 30,000 for revision of stability data as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021.	Firm submitted the fee of Rs.30,000/- vide slip no. 057382167110 dated 04-11-2022

Decision of 323rd meeting of Registration Board:
Deferred for submission of following:

- Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.
- COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
- Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
- Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
- Copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2. P.8.3.

Response of the Firm:
Submit analytical method verification studies including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.
Firm submit the analytical verification report including results of specificity and accuracy parameters by drug product manufacturer as per requirement of section 3.2.S.4.3 of Form-5F.

COA of primary / secondary reference standard including source and lot number used for testing of drug substance.
Firm submit the copy of COA of primary reference standard of USP of both active substances, while the claimed specification of premixed powder of both API is JP specification.

Submit weight of powder filled per vial keeping in view the sodium content of both active substances, under section 3.2.P.2.1.
In their reply firm only submitted the composition table mentioning the quantity of both active per vial i.e. Cefoperazone sodium+ Sulbactam sodium 2gm per vial, instead of giving complete calculation of weight of powder filled per vial keeping in view the sodium content of both active substances.

Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.
Firm submit the valid GMP certificate of the Drug Substance manufacturer, which is valid till 13-12-2023.

Previously firm submitted the invoice of import of drug substance according to which, supplier of the drug substance was M/s. Shandong Luoxin Pharmaceutical Co., Ltd China and quantity of 5kg has been imported and clearance granted on 27-12-2021 vide dy.no.11160/2021 DRAP. Now the firm again submitted a new invoice, in which the Beneficiary is Qilu Pharmaceuticals Co. Ltd, China while the Manufacturer is M/s. The United Laboratories (Inner Mongolia), China quantity of 10kg is imported dated 21-06-2021, attested by DRAP vide

dy.no.11160/2021 DRAP dated 27-12-2021. While the firm has also submitted Form-6 along with the invoice in which license to import drug from Qilu Antibiotics Pharmaceuticals Co. Ltd. China has given on 27-12-2021 vide Dy.no. 11160/2021 DRAP.		
Decision: Deferred for verification of DRAP attested documents related to the procurement of API.		
Central Licensing Board in 278th meeting held on 10th &11th December,2020 has considered and approved additional section "Liquid Ampoule (SVP) General Section" of M/s Islam Pharmaceuticals, Sialkot.		
790.	Name, address of Applicant / Marketing Authorization Holder	M/s Islam Pharmaceuticals 7KM Pasrur Road Sialkot
	Name, address of Manufacturing site.	M/s Islam Pharmaceuticals 7KM Pasrur Road Sialkot
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New Section for liquid ampoule (SVP) General was granted after inspection vide letter No. F. 1-19/2014-Lic (Vol-1) Dated: 18/12/2020
	Evidence of approval of manufacturing facility	New Section for liquid ampoule (SVP) General was granted after inspection vide letter No. F. 1-19/2014-Lic (Vol-1) Dated: 18/12/2020
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 22726 Dated: 11/08/2022
	Details of fee submitted	PKR 30,000/- Dated: 02/12/2021
	The proposed proprietary name / brand name	Diflo 75mg/3ml Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 3ml ampoule contains: Diclofenac Sodium …….75mg
	Pharmacotherapeutic Group of (API)	Clear and colorless solution filled in clear glass ampoules
	Pharmaceutical form of applied drug	Non-steroidal anti-inflammatory drug (NSAID)
	Reference to Finished product specifications	Innovator
	Proposed Pack size	3ml×10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Econac Injection 75mg/3ml, MHRA Approved.
	For generic drugs (me-too status)	Voren injection 75mg/3ml by Asian Continental (Pvt.) Ltd. Reg. No. 007737
	Name and address of API manufacturer.	Shaanxi Xiyue Pharmaceutical Co., Ltd. Huashan town, huayin city, veinan city, shaanxi province 714200, china.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard,

		container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 60 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 06 months Batches:(1702201,1702202, 1702203)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the comparator product that is Voren injection 75mg/3ml injection by Asian Continental Pvt. Ltd. by performing quality tests (Appearance, Identification, Assay, pH and Volume Variation). All parameters results are in the acceptable range
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document. (New Section)
2.	Approval of API/ DML/GMP certificate	Copy of GMP certificate No. SN20190340 issued by CFDA

	of API manufacturer issued by concerned regulatory authority of country of origin.	valid till 24/02/2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Copy of letter No.14850/2020/DRAP-AD-VIII (I&E) dated 16/10/2020 is submitted wherein the permission to import different APIs including Diclofenac sodium for the purpose of test/analysis and stability studies is granted. • AirWay Bill No.607PVG91267326 Dated 22/12/2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings
1.	3.2.S.4.4	Justify for not importing/using the sterile API for manufacturing of injection, since the results of sterility test and Bacterial Endotoxin test is not included in the COA of drug substance by both drug substance manufacturer and drug product manufacturer.
2.	3.2.P.1	• Clarify the role of benzyl alcohol in the applied formulation. • According to the literature of innovator brand the recommended quantity of Sodium metabisulphite is 2 mg per 3 ml and Benzyl alcohol is 120 mg per 3 ml, while the quantity of both excipients used in the applied formulation is different from the recommended quantity by the innovator, scientifically rationalize the quantity of both excipients used in the applied formulation.
3.	3.2.P.2.2.1	Justify for not performing the test of osmolality, particulate matter,sterility and Bacterial Endotoxin test while establishing the pharmaceutical equivalence against the reference product.
4.	3.2.P.3.3	Justify for prefering the aseptic filling procedure over terminal sterilization in the manufacturing procedure of drug product.
5.	3.2.P.5.1	• Submit reference of specification of pH test. • Justify for not including the test of osmolality in the finished product specification since it is the critical parameter in the injectable formulation.
6.	3.2.P.8	• Submit the updated stability data of drug product, since you have submitted only three-month stability data. • Clarify the volume of glass ampoule use for primary packaging of drug product, since it is mentioned 1ml on stability data sheet while the applied formulation is of 3ml.
7.	2.3.R.1.1	Submit minimum handling capacity of the equipment used in the formulation of trail batches.

Decision of 327th meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings.

Remarks of Evaluator:

S.no.	Sections	Observations/Deficiencies/ Short-comings	Response of the Firm
8.	Justify for not importing/using the sterile API for manufacturing of injection, since the results of sterility test and Bacterial Endotoxin test is not included in the COA of drug substance by both drug substance manufacturer and drug product manufacturer. Firm replied that "since applied product is liquid injection and to be manufactured through aseptic filling procedure (sterilization through filtration method) so it is not necessary to use sterile API. However, Reference of USP general test <1211> sterility assurance stated that		

	The preparation of sterile products encompass a wide range of materials including active pharmaceutical ingredients (small and large molecules), excipients, solvents (usually water), process gases and processing aids, all of which contribute to the microbiological quality attributes of the product. Depending upon the product being manufactured, this can require consideration of bacterial, endotoxin, and particulate contamination. Specific microbiological quality testing requirements for inactive and active ingredients testing is often specified in a relevant USP–NF monograph. Requirements for microbiological testing for total aerobic bacteria, yeast and mold counts, and specified organisms are given in Microbial Enumeration Tests and Tests for Specified Microorganisms, and the recommended but non-mandatory enumeration targets for microbiological testing are given in Microbiological Examination of Nonsterile Products: Acceptance Criteria for Pharmaceutical Preparations and Substances for Pharmaceutical Use. Some specific products may require other testing for specified organisms, including viruses, as a requirement of their regulatory approval. Requirements for bacterial endotoxin testing in injectable products are covered, which describes qualification of Limulus amebocyte lysate testing for acceptable levels of bacterial endotoxin. Raw material specifications must be appropriate to ensure that the manufacturing process consistently results, as demonstrated through process validation, in products conforming to the microbiological critical quality attributes.		
9.	3.2.P.1	Clarify the role of benzyl alcohol in the applied formulation.	Firm replied that "Benzyl alcohol is used as solvent (to enhance the solubility of drug substance) reference Handbook of pharmaceutical excipients 7th Edition by RayMond C Rowe a. It is also the part of innovator formulation. In literature of "Voltarol injection" which is MHRA approved, only the qualitative composition of injection is given and it does not mention quantities of excipients reference document is attached as annexure-IB.
10.	3.2.P.1	According to the literature of innovator brand the recommended quantity of Sodium metabisulphite is 2 mg per 3 ml and Benzyl alcohol is 120 mg per 3 ml, while the quantity of both excipients used in the applied formulation is different from the recommended quantity by the innovator, scientifically rationalize the quantity of both excipients used in the applied formulation.	Firm replied that in literature of "Voltarol injection" which is MHRA approved, only the qualitative composition of injection is given and it does not mention quantities of excipients. As per FDA document, limit of inactive ingredients for approved drug products, the maximum limit of benzyl alcohol in intramuscular injection is 144 mg and in our formulation it is 126mg. Limit of sodium metabisulphite is 40mg and in our formulation it is 9.98mg. *However, the USFDA Inactive ingredient database do not mentioned the maximum potency per unit dose of benzyl alcohol and sodium metabisulphite in the IM/IV liquid injection.*
11.	3.2.P.2.2.1	Justify for not performing the test of osmolality, particulate matter,sterility and Bacterial Endotoxin test while establishing the pharmaceutical equivalence against the reference product.	Firm replied that *All the tests including sterility, bacterial endotoxin, particulate matter were performed (mentioned in report under section 3.2.P.5.4 batch analysis) but were not added to pharmaceutical equivalence report. Pharmaceutical equivalence study report containing test results for particulate matter, Bacterial Endotoxin and sterility test* is submitted.
12.	3.2.P.3.3	Justify for prefering the aseptic filling procedure over terminal sterilization in the manufacturing procedure of drug product.	Firm replied that "*According to an article published in Journal of Pharmaceutical Sciences, Vol. 90, 541-544 (2001) Wiley-Liss, Inc. and the American*

			Pharmaceutical Association, "A known impurity "1-(2,6-diclorophenyl) indolin-2-one" is formed in the production of a parenteral dosage form of Diclofenac sodium if terminally sterilized by autoclave" research article is attached as annexure-III". Due to above reason we preferred aseptic filling over terminal sterilization.
13.	3.2.P.5.1	Submit reference of specification of pH test.	Firm replied that "At the time of product development we searched for reference of pH but did not found any authentic document, then we tested different brands of diclofenac sodium injection and found the pH around 8.3, so we set 8.3 as our target pH and adjusted the limits ± 0.5 of target pH (Limit: 7.8 – 8.8). Later on we got another reference "Handbook of Pharmaceutical Manufacturing Formulations Sterile Products" by Sarfaraz K. Niazi, Pharmaceutical Scientist, Inc. Deerfield, Illinois, USA, published in 2009 which gives the range of pH of diclofenac sodium injection from 8.0 – 9.0. Initial results of our stability batches and after 03 and 06-month stability studies are well within the limit which is given in above mentioned book.
14.	3.2.p.5.1	Justify for not including the test of osmolality in the finished product specification since it is the critical parameter in the injectable formulation.	Firm replied that "Osmolality test was performed on product development stage so it was not reported in finish product specification. Osmolality test results and revised finish product specifications after addition of osmolality test are submitted".
15.	3.2.P.8	Submit the updated stability data of drug product, since you have submitted only three-month stability data.	Stability data for 03 and 06 month of drug product was submitted by the firm.
16.	3.2.P.8	Clarify the volume of glass ampoule use for primary packaging of drug product, since it is mentioned 1ml on stability data sheet while the applied formulation is of 3ml.	In stability sheets 1ml glass ampoule is written by typographic mistake, corrected stability sheets are attached
17.	2.3.R.1.1	Submit minimum handling capacity of the equipment used in the formulation of trail batches.	Firm submitted the data of Minimum handling capacity of the equipment used for trial batches

Decision: Deferred for the submission of following shortcomings:

- **Scientific rationale for not performing terminal sterilization, with reference to the innovator product.**
- **Justify the quantitative composition of Sodium metabisulphite and Benzyl alcohol with reference to the innovator product, sinec the submitted reply has not verified from *USFDA Inactive ingredient database.***

Manufacturing Date		05-2018	09-2018	12-2018
Date of Initiation		29-05-18	03-10-18	21-12-2018
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empaglif 10mg & 25mg tablet in 296th meeting (Bio-Labs (Pvt). Ltd, Islamabad).		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (NEW-WHO GMP/CERT/KD/74238/2018/11/24897) issued by Maharashtra food and drug administration dated 11-09-2018. The certificate is valid till 10-09-2021.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Colistimethate sodium 5kg from Mac-Chem Products (India)Pvt. Ltd N-211/2/10, MIDC, Boisar District –Thane. The license was issued on 14-02-2020. • Firm has submitted copy of commercial invoice dated 14-02-2020 specifying import of Colistimethate sodium 5Kg. The invoice is signed by AD (I&E) DRAP.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches including COA and summary data sheets.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The product specifications of colistimethate sodium injection based on USP and there is no application of HPLC in testing method because the assay method based on microbial assay therefore compliance record of HPLC is not applicable here.		
6.	Record of Digital data logger for temperature and humidity monitoring	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability		

	of stability chambers (real time and accelerated)	chambers.

Remarks of Evaluator:

Observations	Firm's response
• Provide detailed analytical procedures for the testing of drug substance by the drug product manufacturer. • Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Firm submitted the analytical method verification studies. Verification has been done on assay procedure which is also not as per the USP.
Justify 90.1mg filled weight of colistimethate sodium per vial against the labelled claim of colistin activity as per the USP monograph of "colistimethate for injection".	Nominal potency of colistimethate sodium used for calculation of filled weight is not correct, according to the innovator product of Colistimethate sodium 1MIU the nominal potency of the drug substance =12,500 IU/mg. So, using of 90.1 filled weight is still not scientifically rationale.
All quality test as per USP monograph has not been performed while establishing the pharmaceutical equivalence against the reference product. Provide results of all quality test of applied and reference product as per USP to establish pharmaceutical equivalence.	Test for uniformity of dosage unit, loss on drying, and free colistin under Colistimethate Sodium are not performed while establishing pharmaceutical equivalence with the reference product, while these tests are included in the USP monograph of colistimethate sodium injection.
Details of type and quantity of diluents used for reconstitution for of applied product is required.	According to the submitted information, to reconstitute the injection, use 3ml 0.9% sodium chloride solution. While the international reference product including the innovator, use the range of 7ml-10ml of water for injection or 0.9% sodium chloride for reconstitution of colistimethate injection.
Provide detailed analytical procedures used to evaluate the quality of drug product by the Manufacturer M/s. Bio-Lab Pvt. Ltd.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Further, the test for uniformity of dosage unit, loss on drying, heavy metals, and free Colistin under Colistimethate Sodium are not included in finished product specification, since these tests are included in the USP monograph.
According to the filled BMR batch size of Batch L-159, L-199 and L-182 is 11090vials, 11,000 vials and 11050 vials respectively. While according to the stability data sheet batch size of all three batches are L-159 18,200 vials, L-199 30,000 vials and L-182 28,000 vials. Justification is required regarding the disparity observed in the batch sizes of the same batch.	Firm submitted the reply that "Batch sizes mentioned on stability was written mistakenly. Please consider BMR batch sizes (11,111 packs) as valid batch size. Correct stability data has been submitted.

Decision of 316th meeting of Registration Board:
Deferred for the submission of following:

- Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
- Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:
Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.
Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.

Decision of 321st meeting of Registration Board:
Registration Board deferred the case for following points:

1. Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
2. Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
3. Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
4. Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.

Response of the Firm:
Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
Firm submitted the Batch manufacturing record of three commercial batches of colicraft 1MIU Injection from M/s. Bio Labs Pvt. Ltd., from which it is evident that sterile colistimethate sodium has been used in the formulation of colicraft and lyophilization has done in the premises of M/s. Bio-Labs Pvt. Ltd.
Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
Firm has submitted only the microbial assay procedure of drug product without any performance data.
Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
Firm has submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasol Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay).
Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.
Firm has submitted the revised stability data sheets of batches L-159, L-199 and L-182 in which results of loss on drying test were included.

Decision of 324th meeting of Registration Board:
Deferred for submission of following:

• Analytical data for the performance of microbial assay of drug substance and drug product for complete stability studies, in accordance with USP general chapter of microbial assay <81>. • Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.		
Response of the Firm: Analytical data for the performance of microbial assay of drug substance and drug product for complete stability studies, in accordance with USP general chapter of microbial assay <81>. Firm has submitted the raw data sheets of stability batches L-159, L-199 and L-182 along with the performance report of microbial assay of drug product. Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation. Firm has again submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasol Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay) and according to the available record , M/s. Pharmasol Pvt. Ltd has not manufactured the colistim injection by way of lyophilisation.		
Decision: Approved. • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.** • **Firm will revise the label claim as per the decision taken by the Registration Board in 323rd meeting regarding "Review of Colistimethate for Injection" along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

• Provide detailed analytical procedures for the testing of drug substance by the drug product manufacturer. • Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Firm submitted the analytical method verification studies. Verification has been done on assay procedure which is also not as per the USP.
Justify 90.1mg filled weight of colistimethate sodium per vial against the labelled claim of colistin activity as per the USP monograph of "colistimethate for injection".	Nominal potency of colistimethate sodium used for calculation of filled weight is not correct, according to the innovator product of Colistimethate sodium 1MIU the nominal potency of the drug substance =12,500 IU/mg. So, using of 90.1 filled weight is still not scientifically rationale.
All quality test as per USP monograph has not been performed while establishing the pharmaceutical equivalence against the reference product. Provide results of all quality test of applied and reference product as per USP to establish pharmaceutical equivalence.	Test for uniformity of dosage unit, loss on drying, and free colistin under Colistimethate Sodium are not performed while establishing pharmaceutical equivalence with the reference product, while these tests are included in the USP monograph of colistimethate sodium injection.
Details of type and quantity of diluents used for reconstitution for of applied product is required.	According to the submitted information, to reconstitute the injection, use 3ml 0.9% sodium chloride solution. While the international reference product including the innovator, use the range of 7ml-10ml of water for injection or 0.9% sodium chloride for reconstitution of colistimethate injection.

Provide detailed analytical procedures used to evaluate the quality of drug product by the Manufacturer M/s. Bio-Lab Pvt. Ltd.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Further, the test for uniformity of dosage unit, loss on drying, heavy metals, and free colistin under Colistimethate Sodium are not included in finished product specification, since these tests are included in the USP monograph.
According to the filled BMR batch size of Batch L-159, L-199 and L-182 is 11090 vials, 11,000 vials and 11050 vials respectively. While according to the stability data sheet batch size of all three batches are L-159 18,200 vials, L-199 30,000 vials and L-182 28,000 vials. Justification is required regarding the disparity observed in the batch sizes of the same batch.	Firm submitted the reply that "Batch sizes mentioned on stability was written mistakenly. Please consider BMR batch sizes (11,111 packs) as valid batch size. Correct stability data has been submitted.

Decision of 316th meeting of Registration Board:
Deferred for the submission of following:

- Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
- Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:
Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.
Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.

Decision of 321st meeting of Registration Board:
Registration Board deferred the case for following points:

5. Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
6. Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
7. Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
8. Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.

Response of the Firm:

Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
Firm submitted the Batch manufacturing record of three commercial batches of colicraft 1MIU Injection from M/s. Bio Labs Pvt. Ltd., from which it is evident that sterile colistimethate sodium has been used in the formulation of colicraft and lyophilization has done in the premises of M/s. Bio-Labs Pvt. Ltd.
Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
Firm has submitted only the microbial assay procedure of drug product without any performance data.
Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
Firm has submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasole Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay).
Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.
Firm has submitted the revised stability data sheets of batches L-159, L-199 and L-182 in which results of loss on drying test were included.

Decision of 324th meeting of Registration Board:
Deferred for submission of following:

- Analytical data for the performance of microbial assay of drug substance and drug product for complete stability studies, in accordance with USP general chapter of microbial assay <81>.
- Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.

Response of the Firm:
Analytical data for the performance of microbial assay of drug substance and drug product for complete stability studies, in accordance with USP general chapter of microbial assay <81>.
Firm has submitted the raw data sheets of stability batches L-159, L-199 and L-182 along with the performance report of microbial assay of drug product.

Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.

Firm has again submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasol Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay) and according to the available record , M/s. Pharmasol Pvt. Ltd has not manufactured the colistim injection by way of lyophilisation.

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will revise the label claim as per the decision taken by the Registration Board in 323rd meeting regarding "Review of Colistimethate for Injection" along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**

Date of Initiation		29-05-18	03-10-18	21-12-2018
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empaglif 10mg & 25mg tablet in 296th meeting (Bio-Labs (Pvt). Ltd, Islamabad).		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (NEW-WHO GMP/CERT/KD/74238/2018/11/24897) issued by Maharashtra food and drug administration dated 11-09-2018. The certificate is valid till 10-09-2021.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 "License to import drugs for clinical trial, examination, test or analysis" for import of Colistimethate sodium 5Kg from Mac-Chem Products (India)Pvt.Ltd N-211/2/10, midc,Boisar District –Thane. The license was issued on 14-02-2020. • Firm has submitted copy of commercial invoice dated 14-02-2020 specifying import of Colistimethate sodium 5Kg. The invoice is signed by AD (I&E) DRAP.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches including COA and summary data sheets.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA		

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Shortcomings	Response of the Firm
• Provide detailed analytical procedures for the testing of drug substance by the drug product manufacturer. • Provide analytical Method Verification studies including specificity, accuracy and repeatability performed by the Drug Product manufacturer.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Firm submitted the analytical method verification studies. Verification has been done on assay procedure which is also not as per the USP.
Justify 90.1mg filled weight of colistimethate sodium per vial against the labelled claim of colistin activity as per the USP monograph of "colistimethate for injection".	Nominal potency of colistimethate sodium used for calculation of filled weight is not correct, according to the innovator product of Colistimethate sodium 1MIU the nominal potency of the drug substance =12,500 IU/mg. So, using of 90.1 filled weight is still not scientifically rationale.
All quality test as per USP monograph has not been performed while establishing the pharmaceutical equivalence against the reference product. Provide results of all quality test of applied and reference product as per USP to establish pharmaceutical equivalence.	Test for uniformity of dosage unit, loss on drying, and free colistin under Colistimethate Sodium are not performed while establishing pharmaceutical equivalence with the reference product, while these tests are included in the USP monograph of colistimethate sodium injection.
Details of type and quantity of diluents used for reconstitution for of applied product is required.	According to the submitted information, to reconstitute the injection, use 3ml 0.9% sodium chloride solution. While the international reference product including the innovator, use the range of 7ml-10ml of water for injection or 0.9% sodium chloride for reconstitution of colistimethate injection.
Provide detailed analytical procedures used to evaluate the quality of drug product by the Manufacturer M/s. Bio-Lab Pvt. Ltd.	Firm submitted the analytical procedure for the testing of drug substance but the microbial assay method is not in accordance with USP in terms of composition of media, volume of media, method of analysis, incubation temperature and potency calculation. Further, the test for uniformity of dosage unit, loss on drying, heavy metals, and free colistin under Colistimethate Sodium are not included in finished product specification, since these tests are included in the USP monograph.
According to the filled BMR batch size of Batch L-159, L-199 and L-182 is 11090 vials, 11,000 vials and 11050 vials respectively. While according to the stability data sheet batch size of all three batches are L-159 18,200 vials, L-199 30,000 vials and L-182 28,000 vials. Justification is required regarding the disparity observed in the batch sizes of the same batch.	Firm submitted the reply that "Batch sizes mentioned on stability was written mistakenly. Please consider BMR batch sizes (11,111 packs) as valid batch size. Correct stability data has been submitted.

Decision of 316th meeting of Registration Board:

Deferred for the submission of following:

- Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
- Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.

- Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
- For further deliberation regarding the label claim of Colistimethate sodium in line with the product approved in reference regulatory agencies and pharmacopeia.

Response of the Firm:
Scientific justification for using microbial assay procedure of drug substance and drug product different from that specified in relevant USP monograph.
Firm has submitted the revised microbial assay method which is again not in accordance with USP general chapter microbial assay <81> in terms of analysis and calculations.
Scientific justification using fill weight of 90.1 mg with respect to nominal potency of 1MIU Colistimethate sodium i.e.12,500IU/mg.
Firm has submitted the calculation, according to which quantity of 87.144mg of colistimethate injection has been filled per vial after adjustment of water content and sodium factor. Further, firm set the internal fill weight ±4% i.e. 83.65mg to 90.62 mg and fill weight set at 90mg/vial.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the pharmaceutical equivalence studies.
Firm has submitted revised pharmaceutical equivalence report in which only test for uniformity of dosage unit has been added but test for loss on drying and free colistin still not been included.
Scientific justification for not performing critical tests like "test for uniformity of dosage unit", "loss on drying" and "free colistin" during the stability studies.
Firm has submitted the revised stability data and COA of relevant stability batches, in which test for loss on drying and free colistin was still not included neither any scientific justification has been submitted.

Decision of 321st meeting of Registration Board:
Registration Board deferred the case for following points:

1. Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
2. Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
3. Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
4. Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.

Response of the Firm:
Submission of batch manufacturing details of most recent commercial batch from M/s Bio Labs Pvt Ltd., for applied formulation to confirm the fact whether Colistimethate injection is formulated from pre-lyophilised drug substance or otherwise.
Firm submitted the Batch manufacturing record of three commercial batches of colicraft 1MIU Injection from M/s. Bio Labs Pvt. Ltd., from which it is evident that sterile colistimethate sodium has been used in the formulation of colicraft and lyophilization has done in the premises of M/s. Bio-Labs Pvt. Ltd.
Performance of microbial assay of drug substance and drug product in accordance with USP general chapter of microbial assay <81>.
Firm has submitted only the microbial assay procedure of drug product without any performance data.
Submission of Pharmaceutical equivalence report in which all the quality test should be included in accordance with USP monograph of colistimethate injection.
Firm has submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasole Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay).
Performance of loss on drying test for drug product as per USP monograph of colistimethate injection.
Firm has submitted the revised stability data sheets of batches L-159, L-199 and L-182 in which results of loss on drying test were included.

Decision of 324th meeting of Registration Board:
Deferred for submission of following:

- Analytical data for the performance of microbial assay of drug substance and drug product for complete stability studies, in accordance with USP general chapter of microbial assay <81>.
- Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.

Response of the Firm:
Analytical data for the performance of microbial assay of drug substance and drug product for complete stability

studies, in accordance with USP general chapter of microbial assay <81>.
Firm has submitted the raw data sheets of stability batches L-159, L-199 and L-182 along with the performance report of microbial assay of drug product.

Pharmaceutical Equivalence studies against the innovator/reference product manufactured by way of lyophilisation.
Firm has again submitted the Pharmaceutical equivalence report performed against the comparator product Colistim Injection of M/s. Pharmasol Pvt. Ltd. Batch.no. KC032, which includes (Identification, LOD, pH, Uniformity of dose, Particulate matter, Free colistin, Sterility, bacterial endotoxin test & assay) and according to the available record , M/s. Pharmasol Pvt. Ltd has not manufactured the colistim injection by way of lyophilisation .

Decision: Approved.

- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **Firm will revise the label claim as per the decision taken by the Registration Board in 323rd meeting regarding "Review of Colistimethate for Injection" along with submission of requisite fee for pre-registration correction/changes of label claim (if required) as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.**

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to onsite inspection report of their product "Rofair 500mcg Tablet", which was conducted on 25th June, 2019, and was presented in 290th meeting of Registration Board. The report confirms: ▪ The HPLC software is 21CFR Compliant. ▪ Audit trail on testing reports is available ▪ Firm has adequate monitoring and controls for stability chambers. Chambers are controlled and monitored through software having alarm system for alerts as well
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. HI20160011 issued by HAINAN PROVINCIAL FOOD AND DRUG ADMINISTRATION valid till 03/08/2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Courier slip tracking number: 452563080508 delivery date: Aug 08, 2018
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:
Clinical Indication:
Rheumatoid Arthritis
Approved with the warning box:
Warning
In an overseas clinical trial, pancytopenia leading to a fatal outcome was observed in patients administered 125 mg/day. This drug should be used by physicians with sufficient knowledge of this drug and experience in treating rheumatoid arthritis at medical facilities where adequate measures can be taken in an emergency.

S.no.	Observations/Deficiencies/ Short-comings	Response of the Firm
1.	Submit copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by drug product manufacturer as per the guidance document approved by Registration Board.	Firm submit specification of drug substance and analytical procedure used for routine testing of drug substance by drug product manufacturer.
2.	Submit analytical method verification studies including specificity, accuracy and repeatability (method precision) of drug substance performed by the Drug Product manufacturer under section 3.2.S.4.3 as per the decision of 293rd meeting of Registration Board. Further justify how the analysis of	Firm submit analytical method validation report of drug substance by drug product manufacturer.

	drug substance was conducted without performing verification studies of the analytical method of drug substance.	
3.	Justify for not performing the comparative dissolution testing at pH 6.8, since it is the recommended medium in which the dissolution studies should be conducted. Further, you have to performed the comparative dissolution testing using test and innovator /reference products under a variety of test conditions as recommended in 293rd meeting of Registration Board. The test conditions may include different dissolution media (pH 1 to 6.8), addition of surfactant, and use of apparatus 1 and 2 with varying agitation. In all cases, dissolution profiles in comparison with the innovator / reference product should be generated. Submit the data in accordance with the said guidance of Registration Board.	Firm replied that Comparative dissolution studies were performed on multiple dissolution buffers including the phosphate buffer pH 6.8 as per USFDA guidelines (mentioned in 293rd meeting of Registration Board), no results were obtained in buffer pH 6.8 as tablet remained intact in this buffer. That's why calculation was not done. Tablet showed more than 90% dissolution in another buffer pH 8.0 as shown in the CDP.For reference we can enclose calculation sheet of CDP in phosphate buffer pH 6.8.
4.	Composition of applied product submitted in respective section is not qualitatively similar to the composition of innovator product, so, in this case please submit the compatibility study of active with the excipients.	Firm submitted the compatibility study of drug substance with excipient.
5.	Justify for selecting the pH 8.0 for the dissolution medium in the light of international literature, review literature of innovator drug, Pharmacopeial recommendations and BCS classification of drug substance.	Iguratimod belong to BCS class-II drug, dissolution of these drugs are obtained in intestinal pH range. Comparative drug profile performed with the dissolution medium pH 6.8 in which tablet remain intact. That's why its result were not included in CDP.
6.	Justify for adapting the broader acceptance criteria i.e. NLT 75% within 60 minutes, since the drug shows more than 90% drug dissolution within 60 minutes as evident from the stability data. Further, justify the adapted dissolution acceptance criteria in the light of guidance "for setting dissolution release specification" approved in 293rd meeting of Registration Board.	Firm replied that the dissolution studies were performed in phosphate buffer pH 8.0 according to the Chinese Journal of Pharmaceutical Analysis that is a Professional Journal administrated by China Association for Science & Technology sponsored by China Association held by National Institute for Food and Drug control. For BCS-II drugs the time points can be taken 30,45 and 60minutes for NLT 75%. But our product attains dissolution more than 85% at 45 minutes so we can take dissolution limit 75% Q at 45 minutes. We have changed the limits in Finished product specification. According to USFDA guidance document for dissolution "For slowly dissolving or poorly water soluble drugs (BCS class 2), a two-point dissolution specification, one at 15 minutes to include a dissolution range (a dissolution window) and the other at a later point (30, 45, or 60 minutes) to ensure 85% dissolution, is recommended to characterize the quality of the product".
7.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm submitted the invoice receipt, which is not attested from DRAP.
8.	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product under section 2.3.R.1.1, for which stability studies data is provided in Module 3 section 3.2. P.8.	Submitted.

Decision of 324th meeting of Registration Board: Deferred for following: • Documents for the procurement of API with approval from DRAP. • Scientific justifications for the adopted parameters and specifications for dissolution test, while referring to the guidelines from reference regulatory authorities.
Response of the Firm: Documents for the procurement of API with approval from DRAP. Firm in their reply stated that "Previously the invoice was not attested by DRAP, therefore we procured the API again along with attestation of invoice. We made new batches with the new procured API and all the documents along stability data of new batches are being submitted now." Firm has submitted complete new dossier on form-5F without submission of fee with the request to consider this new product formulation data along with stability data for the registration of their applied product.
Decision: Deferred for evaluation of newly submitted data as per the CTD guidance document approved by Registration Board. Further, Firm shall submit full fee for pre-registration changes as per notification 7-11/2012-B&A/DRAP dated 07.05.2021 and 13.07.2021.

	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonist
	Reference to Finished product specifications	USP
	Proposed Pack size	1x14's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Accord Healthcare Limited United Kingdom MHRA Approved

	For generic drugs (me-too status)	M/s Sami Pharma Brand Name & Strength: Montika 10mg Film coated Tablet Registration Number: 035561.
	GMP status of the Finished product manufacturer	New license granted on 18/03/2021 Tablet (General) section was approved.
	Name and address of API manufacturer.	M/s Metrochem API Private Limited Unit-I Plot No 62/C/6, Pipeline Road, Phase-I, I.D.A. Jeedimetla, Quthbullapur (M), Medchal-malkajgiri (Dist), Telangana (State), India, Jeedimetla - Phase I&II (V), Quthbullapur(M), Medchal – Malkajgiri (Dist.)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances (specified & unspecified), analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: MLS-F # 001/16 MLS-F # 002/16 MLS-F # 003/16
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug

		product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence and comparative dissolution profile was performed against Montika 10 mg Tablet by SAMI Pharma. Quality parameters were studied such as identification, uniformity of dosage, dissolution test and Assay. CDP was performed against same brand in Acid media (pH 1.0-1.2), acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA				
Manufacturer of API		M/s Metrochem API Private Limited Unit-I Plot No 62/C/6, Pipeline Road, Phase-I, I.D.A. Jeedimetla, Quthbullapur (M), Medchal-malkajgiri (Dist), Telangana (State), India, Jeedimetla - Phase I&II (V), Quthbullapur(M), Medchal – Malkajgiri (Dist.)		
API Lot No.		MKS/2107023		
Description of Pack (Container closure system)		Alu-Alu blister packed in unit carton (14's)		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)

Manufacturing Date		09-2021	09-2021	09-2021
Date of Initiation		09-2021	09-2021	09-2021
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Provided		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. L.DIS.No. 4084/A3/2019 dated 20.05.2020 issued by DCA(Drug control administration) Telangana, India valid till 20/05/2023.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Invoice No AE/21-22/0172 DATE 21.07.2021 confirming import of Montelukast sodium 5gm Batch No MKS/2107023. Approval from DRAP is required.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted		

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC-XX):
2.3.S.3.1& 3.2.S.3 Elucidation of Structure and other Characteristics of Drug Substance has not been Provided.
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.
3.2.P.2 Batch no of innovator product and test product has not been mentioned under CDP.
3.2.P.8 Documents for the procurement of API (approval from DRAP) to be submitted.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports is not submitted

Decision 326th meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of Assessor:
Now the firm has submitted reply against above mentioned shortcomings as follows:

Sr.#	Observations	Reply	Remarks
1.	Elucidation of Structure and other Characteristics of Drug Substance has not been Provided.	Provided	Instead of submitting documents/required information from Drug Substance manufacturer, firm has submitted documents regarding Elucidation of Structure and relevant spectrum downloaded from online published sources (Pubchem etc)
2.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	Results of analytical method verification study including specificity parameter has not been provided alongwith HPLC Chromatograms (sample, standard and blank) Moreover document need to be signed by authorized person.
3.	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.	Provided	Complied
4.	Batch no of comparator product and test product has not been mentioned under CDP.	Not provided	Not complied
5.	Documents for the procurement of API (approval from DRAP) to be submitted.	Provided Invoice No AE/21-22/0172 DATE 21.07.2021 confirming import of Montelukast sodium 5gm Batch No MKS/2107023.	Complied

		Acknowledgment/approval from I&E DRAP, Islamabad dated 31.08.2021	
6.	Compliance Record of HPLC software 21CFR & audit trail reports is not submitted	Not provided	Not complied

Remarks of Assessor:
The reply submitted against above mentioned shortcomings was found unsatisfactory

Decision: Registration Board deferred the case for following shortcomings:

1. **Elucidation of Structure and other Characteristics of Drug Substance to be Provided from Drug substance manufacturer**
2. **Results of analytical method verification study including specificity parameter to be provided preferably HPLC Chromatograms (sample, standard and blank)**
3. **Provide details of Innovator Pack against which pharmaceutical equivalence study was performed (brand name, manufacturer, batch no. and expiry date)**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Invoice No E1/3012100205 Dated 21.06.2021 confirming import of Rosuvastatin calcium 0.25gm Batch No 21RU000026. Approval from DRAP is required.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC-XX):

1.5.5 Provide correct Pharmacotherapeutic group of Drug Substance.

1.6.5 Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin

2.3.S.3.1& 3.2.S.3 Elucidation of Structure and other Characteristics of Drug Substance has not been Provided

3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided

3.2.S.4 Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.

3.2.P.2 Potency adjustment (salt factor) of Drug substance to be justified in Batch formula i.e 10.4mg of Rosuvastatin calcium eq to 10mg Rosuvastatin, since reference product (MHRA approved) is provided as:

46.36 mg Rosuvastatin calcium eq to 10mg Rosuvastatin.

3.P.2.1.1 Compatibility of the Drug Substance(s) with excipient (Calcium phosphate) is not provided.

3.2.P.2 Batch no of innovator product and test product has not been mentioned under CDP.

3.2.P.8 Documents for the procurement of API (approval from DRAP) to be submitted.

3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports is not submitted

Decision 326th meeting : Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of assessor:

Sr.#	Observation	Reply	Remarks
1.	Provide correct pharmacotherapeutic group of Drug Substance.	Pharmacotherapeutic group of Drug Substance has been corrected as HMG CoA reductase	Fee of Rs 7500/- is required as per SRO
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Copy of Retention of license No G/25/1723 is submitted valid till 23.01.2026 issued by Food and Drug Control Administration Gujrat state	Complied
3.	Elucidation of Structure and other Characteristics of Drug Substance has not been Provided.	Provided	Instead of submitting documents/required information from Drug Substance manufacturer, firm has submitted documents regarding Elucidation of Structure and relevant spectrum downloaded from online published sources (Pubchem etc)
4.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	Results of analytical method verification study including specificity parameter has not been provided alongwith HPLC Chromatograms (sample, standard and blank) Moreover document need to be signed by authorized person.
5.	Detailed analytical procedures for the testing of drug substance to be provided by Drug product manufacturer.	Provided	Complied
6.	Potency adjustment (salt factor) of Drug substance to be justified in Batch formula i.e 10.4mg of Rosuvastatin calcium eq to 10mg Rosuvastatin, since reference product (MHRA approved) is provided as: 46.36 mg Rosuvastatin calcium eq to 10mg Rosuvastatin.	Firm has provided reference of RRA (Netherland) approved formulation wherein potency of rosuvastatin is mentioned as 10.40mg of Rosuvastatin calcium eq to 10mg Rosuvastatin	Complied Same has been verified from this link. https://www.geneesmiddeleninformatiebank.nl/smpc/h126585_smpc_en.pdf
7.	Compatibility of the Drug Substance(s) with excipient	Firm has provided reference of product monograph/SmPC of	Complied Compatibility study of the Drug Substance(s)

	(Calcium phosphate) is not provided.	MHRA/EMA approved product i.e Crestor Tablet wherein Calcium phosphate was mentioned as excipient	with excipient is not required	
8.	Batch no of innovator product and test product has not been mentioned under CDP.	Not provided	Not complied	
9.	Documents for the procurement of API (approval from DRAP) to be submitted.	Firm has submitted Invoice No E1/3012100205 Dated 21.06.2021 confirming import of Rosuvastatin calcium 0.25gm Batch No 21RU000026.	Approval from DRAP is required	
10.	Compliance Record of HPLC software 21CFR & audit trail reports is not submitted	Not provided	Not complied	
Remarks of Assessor: The reply submitted against above mentioned shortcomings was found unsatisfactory				
Decision: Registration Board deferred the case for following shortcomings: **a) Elucidation of Structure and other Characteristics of Drug Substance to be Provided from Drug substance manufacturer** **b) Results of analytical method verification study including specificity parameter to be provided preferably HPLC Chromatograms (sample, standard and blank)** **c) Provide details of Innovator Pack against which pharmaceutical equivalence study was performed (brand name, manufacturer, batch no. and expiry date).** **d) Documents for the procurement of API (approval from DRAP) to be submitted.** **e) Fee of Rs 7500/- is required as per SRO for correction of pharmacotherapeutic group**

	Name, address of Manufacturing site.	M/s Biogen Life Sciences 8 km Chakbeli Road Rawat Rawalpindi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the drug product manufacturer	Copy of current GMP certificate dated 17-01-2022 is provided.
	Evidence of approval of manufacturing facility	copy of Valid DML No. 000911 (Formulation) valid till 13-02-2025 along with covering letter is provided.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 27912 Date: 03/10/2022
	Details of fee submitted	PKR 30000 dated: 28-07-2022 . SLIP No. 9108432875
	The proposed proprietary name / brand name	Actogen 100ml Vial

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial contains: Paracetamol 10mg/ml solution for infusion
	Pharmaceutical form of applied drug	Solution for Infusion
	Pharmacotherapeutic Group of (API)	Anti-Pyretic
	Reference to Finished product specifications	Innovator Specs
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Brand Name: Provas (10mg/ml) Registration holder: M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi. Registration Number: 050650
	Name and address of API manufacturer.	M/s Citi Pharma (Pvt) Ltd, 3 km, Head Balloki Road, Phool Nagar, Kasur. GMP Certificate No. 10444/2016-DRAP/2016
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40oC ± 2oC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30oC ± 2oC / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have not been established/submitted with innovator Product, but with Provas Infusion of M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi

	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method of drug substance. Firm has submitted report of validation of analytical method (In-House) for the drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Citi Pharma (Pvt) Ltd, 3 km, Head Balloki Road, Phool Nagar, Kasur. GMP Certificate No. 10444/2016-DRAP/2016		
API Lot No.	Not Provided		
Description of Pack (Container closure system)	1's		
Stability Storage Condition	Real time : 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 06 months Accelerated: 06 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	500 vials	500 vials	500 vials
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	20-11-2021	20-11-2021	20-11-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted. Firm has stated that Biogen is a new license section and no such data is submitted
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Sun Pharmaceutical Industries Limited, Industrial Area - 3 A.B. Road 455001 Madhya Pradesh , India DML No. 24/24/83 in form no. 25 & 28/15/83 in form no.28
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not required.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted.

Evaluation by PEC :
Provide updated GMP certificate of API manufacturer M/s Citi Pharma Kasur as the submitted GMP certificated is dated 2016.
API manufacturer (M/s citi Pharma Kasur) has performed melting point test for identification of API but has set specifications different from those as mentioned in BP.
API manufacturer (M/s citi Pharma Kasur) has performed impurities testing as mentioned in BP but the acceptance criteria is kept at Not more than 1 % while the one mentioned in BP is max .2%
Provide the detailed analytical method with complete detail (method verification) along with test reports of API as performed by the Drug Product manufacturer.
The Manufacturing Protocol/Procedure for manufacture/Product Development (including sterility testing)

are not submitted.
Batch detail along with BMR (including sterility testing) is not provided for manufacturing of Drug Product.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not Provided.
Submit microbial reports for the sterility testing of drug product along during stability studies.
Pharmaceutical Equivalence studies along with test reports results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted with innovator Product of Drug Product are not submitted.
Submit microbial reports for the sterility testing of drug product during stability studies.
Provide compatibility study protocol along with reports as the excipients being used are different from the ones mentioned/used in innovator Product (USFDA)
In chromatogram of stability studies, study on blank and respective chromatogram of blank is not submitted.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing needs to be submitted.
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted.

Decision 322nd meeting : Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Updated reply

Sr. No	Observations	Reply	Remarks
1.	Provide updated GMP certificate of API manufacturer M/s Citi Pharma Kasur as the submitted GMP certificate is dated 2016.	Not provided	Later on GMP certificate based on inspection dated 17.12.2020 was provided.
2.	API manufacturer (M/s citi Pharma Kasur) has performed melting point test for identification of API but has set specifications different from those as mentioned in BP	The mentioned melting point specification range is as per BP.	Justified
3.	API manufacturer (M/s citi Pharma Kasur) has performed impurities testing as mentioned in BP but the acceptance criteria is kept at Not more than 1 % while the one mentioned in BP is max .2%	The mentioned impurities specification/ acceptance criteria is as per BP.	Justified
4.	Provide the detailed analytical method with complete detail (method verification) along with test reports of API as performed by the Drug Product manufacturer.	Detailed analytical method with method verification studies/ test reports of API are provided.	Complied
5.	The Manufacturing Protocol/Procedure for manufacture/Product Development (including sterility testing) are not submitted.	Not provided	Manufacturing Protocol/Procedure for manufacture/Product Development to be provided with details of sterilization mechanism (whether aseptic filling/membrane filtration/terminal sterilization)
6.	Batch detail along with BMR (including sterility testing) is	Provided	Complied

	not provided for manufacturing of Drug Product		
7.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not Provided.	Not provided	Firm submitted that HPLC Instrument is not 21CFR Compliance we already submitted the logbook of HPLC .
8.	Submit microbial reports for the sterility testing of drug product along during stability studies.	Provided	Complied
9.	Pharmaceutical Equivalence studies along with test reports results of all the quality tests (mentioned in any official pharmacopoeia or section 3.2.P.5.1 of this application) of the developed formulation and the innovator / reference / comparator product shall be submitted with innovator Product of Drug Product are not submitted.	Pharmaceutical Equivalence have been established against established brand Provas Infusion by M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi Batch No 148 G	Complied
10.	Provide compatibility study protocol along with reports as the excipients being used are different from the ones mentioned/used in innovator Product (USFDA)	Excipients being used are same as used in innovator Product (USFDA)	Verified.
11.	In chromatogram of stability studies, study on blank and respective chromatogram of blank is not submitted.	Not provided	Later on firm submitted analytical study report of blank and respective chromatogram
12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is not submitted.	Provided	Complied

Decision 326th meeting of RB: Deferred for submission of manufacturing procedure for applied product along with details of sterilization procedure applied.

Remarks of Assessor:
Now the firm has submitted following:
Detailed manufacturing process along with process control
Sterilization process (Terminal sterilization at 121ºC for 15 minutes)

Firm has provided required documents, which are found satisfactory.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Time Period	Real time: 06 months Accelerated: 06 months		
	Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
	Batch No.	004	005	006
	Batch Size	700 vials	700 vials	700 vials
	Manufacturing Date	11-2021	11-2021	11-2021
	Date of Initiation	04-12-2021	04-12-2021	04-12-2021
	No. of Batches	03		
	DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA			
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted. Firm has stated that Biogen is a new license facility and no such data is submitted		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Sun Pharmaceutical Industries Limited, Industrial Area -3 A.B. Road 455001 Madhya Pradesh , India DML No. 24/24/83 in form no. 25 & 28/15/83 in form no.28		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The invoice of relevant batch AB06493 used in Product Development is not provided.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Submitted.		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not Submitted.		
	Evaluation by PEC: Pack size of Drug Product is not submitted. Provide the analytical method with complete detail as the submitted documents contain, missing/cutting along with test reports of API as performed by the Drug Substance manufacturer. Provide the analytical method with complete detail along with test reports of API as performed by the Drug Product manufacturer. The Manufacturing Protocol/Procedure for manufacture/Product Development are not submitted. Batch detail along with BMR is not provided for manufacturing of Drug Product. Stability data along with data sheets of three batches of API as performed by the API manufacturer needs to be submitted. Documents for the procurement of API with approval from DRAP of relevant batch AB06493 used in Product Development is not provided. Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not Provided. Submit microbial reports for the sterility testing of drug product along during stability studies. Pharmaceutical Equivalence studies along with test reports of Drug Product with innovator Product are not submitted. Provide supportive data i.e. attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. Detail of equipment/machinery needs to be submitted. The chromatograms of HPLC submitted along with stability data sheets do not specify the analyte (whether standard , sample etc).			
	Decision 322nd meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.			

Sr No	Observation	Reply	Remarks
1.	Pack size of Drug Product is not submitted.	Not provided	Later on firm provided proposed Pack size of Drug Product as 1's As per SRO.
2.	Provide the analytical method with complete detail as the submitted documents contain missing/cutting along with test reports of API as performed by the Drug Substance manufacturer.	Not provided	Later on firm submitted detailed analytical method of Drug Substance from Drug Substance manufacturer.
3.	Provide the analytical method with complete detail along with test reports of API as performed by the Drug Product manufacturer	Not provided	Later on firm submitted detailed analytical method of Drug Substance from Drug Product manufacturer.
4.	The Manufacturing Protocol/Procedure for manufacture/Product Development are not submitted.	Not provided	Not complied
5.	Batch detail along with BMR is not provided for manufacturing of Drug Product.	Provided	Complied
6.	Stability data along with data sheets of three batches of API as performed by the API manufacturer needs to be submitted.	Not provided	Not complied
7.	Documents for the procurement of API with approval from DRAP of relevant batch AB06493 used in Product Development is not provided.	Documents for the procurement of API with approval from DRAP of relevant batch AB06493 provided Invoice No 7000041892 dated 12.10.2021	Complied
8.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing is not Provided.	Not provided	Firm submitted that HPLC Instrument is not 21CFR Compliance we already submitted the logbook of HPLC .
9.	Submit microbial reports for the sterility testing of drug product during stability studies	Provided	Complied
10.	Pharmaceutical Equivalence studies along with test reports are not submitted	Pharmaceutical Equivalence studies along with test reports are provided against Tienam 500mg injection by M/s OBS pharma Batch No 154 C Quality parameters compared were	Complied

		identification, LOD, Ph, constituted solution, uniformity of dosage unit, particulate matter, Assay, BET, Sterility	
11.	Provide supportive data i.e. attested respective documents like chromatograms specifying whether of standard or sample etc, Raw data sheets, COA, summary data sheets etc.	Supportive data i.e. chromatograms specifying whether of standard or sample etc, Raw data sheets, COA, summary data sheets etc. are provided	Complied
12.	Detail of equipment/machinery needs to be submitted.	Complied	Complied
13.	The chromatograms of HPLC submitted along with stability data sheets do not specify the analyte (whether standard , sample etc).	Provided	Complied

Decision 326th meeting: Deferred for following reasons:
The Manufacturing Protocol/Procedure for manufacture/Product Development to be submitted.
Stability data along with data sheets of three batches of API as performed by the API manufacturer needs to be submitted.

Remarks:
Firm has submitted manufacturing protocol, manufacturing process /flow diagram for the product.
Stability data of API as performed by the API manufacturer has been submitted as follows:

Batches	2854000	2854022	2854406
Condition /duration	Real time : 30°C ± 2°C / 65% ± 5%RH 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH 6months	Real time : 30°C ± 2°C / 65% ± 5%RH 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH 6months	Real time : 30°C ± 2°C / 65% ± 5%RH 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH 6months

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Deferred cases of 327th meeting:

802	Name, address of Applicant / Marketing Authorization Holder	M/s Pine Pharmaceuticals Rawat, Islamabad.
	Name, address of Manufacturing site.	M/s Pine Pharmaceuticals Plot#40, Street#S-6,National Industrial Zone, Rawat, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP)

		☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 4615 dated 17/02/2023
	Details of fee submitted	PKR 30,000/- dated 06/02/2023
	The proposed proprietary name / brand name	Deslor 5mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Desloratadine …….5mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Antihistamines
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Clarinex 5mg tablet by M/s Schering-Plough USFDA approved
	For generic drugs (me-too status)	Larinex 5mg Tablet by M/s Getz Pharma Pakistan, Reg. No. 039175
	GMP status of the Finished product manufacturer	New DML granted on 29.04.2022, approved in 285th meeting of CLB. The sections approved as under: Tablet (General) section Capsule (General) section Cream/ointment (General) section
	Name and address of API manufacturer.	M/s Smaart Pharmaceuticals Limited. B-22/23, MIDC, Ajanta Road, Jalgaon Maharashtra (India) - 425 003.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Desloratadine is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (DH-1501, DH-1502, DH-1503)

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Clarinex 5mg tablet by M/s Schering-Plough Corporation (Batch No CL9562) by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form, Disintegration time and microbial limit test). CDP has been performed against the same brand that is Clarinex 5mg tablet by M/s Schering-Plough Corporation in Acid media (pH 1.0-1.2), Acetate buffer (pH-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA			
Manufacturer of API	M/s Smaart Pharmaceuticals Limited. B-22/23, MIDC, Ajanta Road, Jalgaon Maharashtra (India) - 425 003.		
API Lot No.	SMAART/DSL/2021/003		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (2×10's)		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	DS-01	DS-02	DS-03
Batch Size	2,000 tab	2,000 tab	2,000 tab
Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	10-05-2022	10-05-2022	10-05-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted document (invoice No E-086/2020-2021) for import of 5Kg of Desloratadine (Batch No SMAART/DSL/2021/003) wherein name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, attested by AD (I&E) DRAP

		Islamabad dated 08-03-2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PECXX):

1.6.5 Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin
3.2.S.4 Acceptance criteria/specifications for impurities (both single and total impurities) as mentioned in CoA from Drug Substance re different from those mentioned in USP. Justify it
3.2.P.2 Parameters like Linearity and Range are not performed under product Analytical method verification study
3.2.P.2 Results of specificity parameter along with HPLC chromatograms (sample, standard, placebo and blank) has not been provided under product Analytical method verification study
3.2.P.2.1.1 Compatibility of the Drug Substance(s) with excipient (Magnesium stearate) is not Provided since said ingredient is not found in innovator's formulation.
3.2.P.8 Documents for import of API was submitted wherein the name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, attested by AD (I&E) DRAP Islamabad dated 22-02-2021. Clarify it.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports on product testing to be provided.

Decision 327th meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Remarks: Now the firm has submitted reply as follows:

Sr.#	Observation	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Firm has provided GMP certificate No 6093820 dated 29.04.2020 issued by Food and Drug Administration Maharashtra state valid up to 28.04.2021	GMP certificate submitted is invalid
2.	Acceptance criteria/specifications for impurities (both single and total impurities) as mentioned in CoA from Drug Substance are different from those mentioned in USP. Justify it	Drug substance specifications submitted from Drug Product manufacturer were as per USP	Performance of impurity testing of Drug substance as per USP criteria is required either from Drug substance manufacturer or Drug product manufacturer
3.	Parameters like Linearity and Range are not performed under product Analytical method	Being pharmacopoeial Drug Product analytical method verification studies (specificity, accuracy and	Justified

	verification study	repeatability) were performed rather than validation studies	
4.	Results of specificity parameter along with HPLC chromatograms (sample, standard, placebo and blank) has not been provided under product Analytical method verification study.	Provided	Complied
5.	Compatibility of the Drug Substance(s) with excipient (Magnesium stearate) is not Provided since said ingredient is not found in innovator's formulation.	Not provided	Magnesium stearate found available in MHRA approved formulation i.e Desloratadine Mylan tablet 5mg https://www.medicines.org.uk/emc/product/2600/smpc#gref
6.	Documents for import of API was submitted wherein the name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, attested by AD (I&E) DRAP Islamabad dated 22-02-2021. Clarify it.	We have borrowed API from M/s Panacea pharmaceuticals Islamabad as per decision of DRAP Authority 134th meeting.	Loan agreement to be provided between M/s Panacea pharmaceuticals Islamabad and applicant. Moreover, approval from DRAP/clearance certificate yet to be provided
7.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	Our HPLC is not 21CFR compliant however record of Digital data logger for temperature and humidity monitoring is submitted	
Remarks: The reply submitted against above mentioned shortcoming was found unsatisfactory.			
Decision: Registration Board deferred the case for following shortcomings: **a) Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin** **b) Performance of impurity testing of Drug substance as per USP criteria is required either from Drug substance manufacturer or Drug product manufacturer** **c) Loan agreement to be provided between M/s Panacea pharmaceuticals Islamabad and applicant. Moreover, approval from DRAP/clearance certificate to be provided**

	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer

		medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.		
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Avelox 400mg tablets (Batch No AT9562) by M/s Bayer Corporation by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). against Test product i.e Moxopine tablet 400mg (Batch No MP-01) CDP has been performed against the same brand that is Avelox 400mg tablets (Batch No AT9562) by M/s Bayer Corporation in Acid media (pH 1.0-1.2), Acetate buffer (pH-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.		
	Analytical method validation/verification of product	Method verification studies have submitted including, accuracy, precision, specificity and system suitability.		
STABILITY STUDY DATA				
Manufacturer of API		M/s Rini Life Sciences Pvt. Limited. RR Industrial Estate, Khasra No 115/2/3, Bhawrasla, Sanwer road, India.		
API Lot No.		MH/002/09/2021		
Description of Pack (Container closure system)		Alu-Alu blister packed in unit carton		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.		MP-01	MP-02	MP-03
Batch Size		2000 tablets	2000 tablets	2000 tablets
Manufacturing Date		05-2022	05-2022	05-2022
Date of Initiation		13-05-2022	13-05-2022	13-05-2022
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Nil		
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not provided		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted documents for import of 50Kg of Moxifloxacin HCl (Batch No MH/002/09/2021) invoice no. GESAC2/3 dated 04.04.2022 wherein name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned		

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC XX):

1.6.5 Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin

3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided

3.2.P.2 Parameters like Linearity and Range are not performed under product Analytical method verification study

3.2.P.2 Results of specificity parameter along with HPLC chromatograms (sample, standard, placebo and blank) has not been provided under product Analytical method verification study.

3.2.P.2 Quantity of Lactose monohydrate used in innovator product as 68mg while firm used 87.8mg Lactose monohydrate in instant formulation. Justify it.

3.2.P.8 Documents for import of API (invoice no. GESAC2/3 dated 04.04.2022) was submitted wherein the name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, Clarify it. Moreover, approval from DRAP has not been provided.

3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports on product testing to be provided.

Decision 327th meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Remarks:

Now firm has submitted reply as follows:

Sr.#	Observation	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Firm has provided GMP certificate No INDBGMP202105552 dated 23.06.2021 issued by Food and Drug Administration Madhya Pradesh valid up to 5 years.	Complied
2.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided	Provided	HPLC chromatograms for different parameters tested (specificity, accuracy and repeatability etc) during verification study have not been provided
3.	Parameters like Linearity and Range are not performed under product Analytical method verification study	Being pharmacopoeial Drug Product analytical method verification studies (specificity, accuracy and repeatability) were performed rather than validation studies	Justified

4.	Results of specificity parameter along with HPLC chromatograms (sample, standard, placebo and blank) has not been provided under product Analytical method verification study	Provided	Complied
5.	Quantity of Lactose monohydrate used in innovator product as 68mg while firm used 87.8mg Lactose monohydrate in instant formulation. Justify it.	Lactose monohydrate is used as filler/diluent in tablet. It doesn't have any impact on formulation	Justified
6.	Documents for import of API (invoice no. GESAC2/3 dated 04.04.2022) was submitted wherein the name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, Clarify it. Moreover, approval from DRAP has not been provided.	We have borrowed API from M/s Panacea pharmaceuticals Islamabad as per decision of DRAP Authority 134th meeting.	Loan agreement to be provided between M/s Panacea pharmaceuticals Islamabad and applicant. Moreover, approval from DRAP/clearance certificate yet to be provided.
7.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	Our HPLC is not 21CFR compliant however record of Digital data logger for temperature and humidity monitoring is submitted	

Remarks: The reply submitted against above mentioned shortcoming was found unsatisfactory.

Decsion: Deferred for submission of analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided.

805	Name, address of Applicant / Marketing Authorization Holder	M/s Pine Pharmaceuticals Plot No. 40. Street No. S-4,,RCCI, Industrial estate. Rawat.
	Name, address of Manufacturing site.	M/s Pine Pharmaceuticals Plot No. 40. Street No. S-4,,RCCI, Industrial estate. Rawat.
	Status of the applicant	☒Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 4379 dated 15/02/2023
	Details of fee submitted	PKR 30,000/- dated 06/02/2023
	The proposed proprietary name / brand name	Q-Pine 25mg tablet

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: - Quetiapine (as fumarate)...25mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Psycholeptic, Diazepines, oxazepines, thiazepines and oxepines
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved
	For generic drugs (me-too status)	Evokalm Tablet by M/s Pharmevo, Karachi Reg. No. 039621
	GMP status of the Finished product manufacturer	New DML granted on 29.04.2022, approved in 285th meeting of CLB. The sections approved as under: Tablet (General) section Capsule (General) section Cream/ointment (General) section
	Name and address of API (pellets) manufacturer.	M/s Laksh Finechem (Pvt) Ltd Plot No. 1801/02, Phase –IV G.I.D.C Vitthal Udyognagar, Anand, Gujrat India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: QTP/II/V/026/14-15, QTP/II/V/027/14-15, QTP/II/V/028/14-15,
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.

	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the reference product that is Seroquel tablet 25mg Batch No 4983763 by ICI Pakistan Ltd, by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form and weight Variation and DT) against Test Product Q-Pine 25mg tablet Batch No Q001. CDP has been performed against the same brand that Seroquel tablet 25mg in Acid media (pH 1.0-1.2), Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity and system suitability.

Manufacturing Date	05-2022	05-2022	05-2022	
Date of Initiation	07-05-2022	09-05-2022	10-05-2022	
No. of Batches	03			

Administrative Portion		
1	Reference of previous approval of applications with stability study data of the firm (if any)	Nil
2	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of License No. G/25/2046 dated 16.05.2014 valid till 15.05.2019 issued by Food and Drug Administration ,Gujrat state, India .
3	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. ZHI-CI/5073/1220 dated 04-12-2020 for import of 55Kg of Quetiapine fumarate (Batch No LF-QUEF/112020/013) wherein name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, attested by AD (I&E) DRAP Islamabad dated 31-12-2020.

4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not provided
6	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor (DD PEC XX):

1.6.5 Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin
3.2.S.4 Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer to be provided
3.2.P.2.1.1 Compatibility of the Drug Substance(s) with excipients (Talc and IPA) is not Provided. Since said ingredients are not found in innovator's formulation.
3.2.P.2 Parameters like Linearity and Range are not performed under product Analytical method verification study
3.2.P.2 Results of specificity parameter along with HPLC chromatograms (sample, standard, placebo and blank) has not been provided under product Analytical method verification study
3.2.P.2 Brand names of innovator and Test product used in Pharmaceutical equivalence study/CDP, to be provided. Also justify selection of said brand instead of innovator.
3.2.P.8 Documents for import of API was submitted wherein the name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, attested by AD (I&E) DRAP Islamabad dated 31-12-2020. Clarify it.
3.2.P.8 Compliance Record of HPLC software 21CFR & audit trail reports on product testing to be provided

Decision 327th meeting: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Remarks:
Now the firm has submitted reply as follows:

Sr.#	Observation	Reply	Remarks
1.	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin	Firm has provided GMP certificate No S-GMP/20082155 issued by Food and Drug Control Administration Gandhinagar Gujrat state valid up to 09.07.2022	GMP certificate submitted is invalid
2.	Analytical Method Verification studies including specificity, accuracy and repeatability	Provided	HPLC chromatograms for different parameters tested (specificity, accuracy and repeatability etc) during verification study have not been provided
3.	Compatibility of the Drug Substance(s) with excipients (Talc and IPA) is not provided	Not provided	Drug-excipient compatibility study to be provided
4.	Parameters like Linearity and Range are not performed under product Analytical method verification study	Being pharmacopoeial Drug Product analytical method verification studies (specificity, accuracy and repeatability) were performed	Justified

		rather than validation studies	
5.	Results of specificity parameter along with HPLC chromatograms (sample, standard, placebo and blank) has not been provided under product Analytical method verification study	Provided	Complied
6.	Brand names of Comparator and Test product used in Pharmaceutical equivalence study/CDP, to be provided	Comparator product: Evokalm tablet 200mg by M/s Pharmevo, Karachi Test Product: Q-Pine 200mg tablet	Batch No of comparator and Test product yet to be provided
7.	Documents for import of API was submitted wherein the name of M/s Panacea pharmaceuticals Islamabad, Pakistan was mentioned, attested by AD (I&E) DRAP Islamabad dated 31-12-2020. Clarify it.	We have borrowed API from M/s Panacea pharmaceuticals Islamabad as per decision of DRAP Authority 134th meeting.	Loan agreement to be provided between M/s Panacea pharmaceuticals Islamabad and applicant. Moreover, approval from DRAP/clearance certificate yet to be provided
8.	Compliance Record of HPLC software 21CFR & audit trail reports and record of Digital data logger for temperature and humidity monitoring is not submitted.	Our HPLC is not 21CFR compliant however record of Digital data logger for temperature and humidity monitoring is submitted	

Remarks: The reply submitted against above mentioned shortcoming was found unsatisfactory

Decision: Registration Board deferred the case for following shortcomings:

a) **Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin**
b) **Drug-excipient compatibility study (Talc and IPA).**
c) **Results of Analytical verification study of Drug Substance preferably HPLC chromatograms for different parameters tested (specificity, accuracy and repeatability etc)**
d) **Provide details of Innovator Pack against which pharmaceutical equivalence study was performed (brand name, manufacturer, batch no. and expiry date).**
e) **Loan agreement to be provided between M/s Panacea pharmaceuticals Islamabad and applicant. Moreover, approval from DRAP/clearance certificate to be provided**

	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale

		☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 4618 dated 17/02/2023
	Details of fee submitted	PKR 30,000/- dated 06/02/2023
	The proposed proprietary name / brand name	Q-Pine 300mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: - Quetiapine (as fumarate)...300mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Psycholeptic, Diazepines, oxazepines, thiazepines and oxepines
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved
	For generic drugs (me-too status)	Rekyt Tablet by M/s High Q, Karachi Reg. No. 112752
	GMP status of the Finished product manufacturer	New DML granted on 29.04.2022, approved in 285th meeting of CLB. The sections approved as under: Tablet (General) section Capsule (General) section Cream/ointment (General) section
	Name and address of API (pellets) manufacturer.	M/s Laksh Finechem (Pvt) Ltd Plot No. 1801/02, Phase –IV G.I.D.C Vitthal Udyognagar, Anand, Gujrat India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, Solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 12 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: QTP/II/V/026/14-15, QTP/II/V/027/14-15, QTP/II/V/028/14-15,
	Module-III (Drug Product):	The firm has submitted detail of manufacturers,

		description of manufacturing process and controls, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the reference product that is Evokalm tablet 300mg by M/s Pharmevo, Karachi by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form and weight Variation and DT) against Test Product Q-Pine 300mg tablet CDP has been performed against the same brand that Evokalm tablet 300mg in Acid media (pH 1.0-1.2), Acetate Buffer (pH 4.5) and Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity and system suitability.

Registration applications of newly granted DML (Human)
M/s Akhsah Pharmaceuticals (Pvt) Ltd, Plot No. 47, Street No S-10,RCCI, Industrial estate, Rawat

CLB in its 282nd meeting held on 31st August 2021, has considered and approved the grant of DML by way of Formulation with following 3 sections:

Tablet Section (General)
Capsule Section (General)
Cream/ointment section (General)

809	Name, address of Applicant / Marketing Authorization Holder	M/s Akhsah Pharmaceuticals (Pvt) Ltd, Plot No. 47, Street No S-10,RCCI,Industrial estate, Rawat
	Name, address of Manufacturing site.	M/s Akhsah Pharmaceuticals (Pvt) Ltd, Plot No. 47, Street No S-10,RCCI,Industrial estate, Rawat
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Inspection report for grant of DML has been provided (dated 24.08.2021)
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML dated 14-09-2021 specifying Tablet (General) section..
	Status of application	☒ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 31016 dated 01-11-2022
	Details of fee submitted	PKR 30,000/- Dated 31/10/2022
	The proposed proprietary name / brand name	ANVIL TAB 10 MG
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Ebastine……..10mg
	Pharmacotherapeutic Group of (API)	antihistamine
	Pharmaceutical form of applied drug	Oral tablet
	Reference to Finished product specifications	BP specification
	Proposed Pack size	1 x10’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	EBASTINE ARROW 10 mg film-coated tablets ANSM (France) Approved
	For generic drugs (me-too status)	Beceptor 10mg tablet by M/s Sami pharmaceutical Reg No 094929
	Name and address of API manufacturer.	M/s Bal Pharma Limited 5 th Floor, Laxmi Narayan Complex 10/1, Palace Road Bangalore – 560 052, Karnataka, INDIA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form,

		manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance (EBS5100107, EBS5100207 and EBS5100307) at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Beceptor 10mg tablet (Batch No 008G) by Sami pharmaceutical, Karachi Quality parameters such as Description, identification, dissolution and assay against Test product (Batch No TB-01-A10) Firm has submitted CDP results of their product against the same comparator product Beceptor 10mg tablet (Batch No 008G) by Sami pharmaceutical, Karachi in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	Bal Pharma Limited 5 th Floor, Laxmi Narayan Complex 10/1, Palace Road Bangalore – 560 052, Karnataka, INDIA

Manufacturing Date	04/22	04/22	04/22
Date of Initiation	27/4/22	27/4/22	27/4/22
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. DCD/CR 2096/SPL.CL-I/2017-2018) dated 05-04-2018 issued by Drugs Control Department, Government of Karnataka, India. The certificate is valid till 1 year from date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of commercial invoice (Invoice# M02/2122/EXP/AEX/00362 dated 31st January 2022, with received quantity i.e. 0.5Kg) for the purchase of Ebastine (Batch No 5001012201003) from Bal Pharma Limited Bangalore – 560 052, Karnataka, India with attestation of DRAP dated 03/03/2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted CoA for each time point to be provided.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided	Again firm has submitted invalid GMP certificate (valid till 05.04.2019)	Not complied
2.	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied
3.	3.2.S.4 The DS manufacturer adopted BP specification (2020) of Ebastine while Drug product manufacturer did not perform quality test (sulphate, residual solvent) as per BP monograph moreover assay limit mentioned was not as per BP and silver suphadiazine was mentioned	Firm has submitted corrected CoA of Ebastine as per BP wherein quality parameters and assay limit was mentioned as per BP.	Complied

	instead of Ebastin with assay parameter (CoA)		
4.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Method used for analysis of API has been provided	Results of specificity parameter to be provided preferably HPLC chromatograms of sample, blank and standard
5.	3.2.P.2.2.1 CDP has been performed against comparator product Beceptor 10mg tablet (Batch No 008G) by Sami pharmaceutical, Karachi instead of innovator product in Pakistan i.e Kestine tablet by M/s Highnoon Laboratories, Lahore.	Not submitted	Yet to be justified
6.	3.2.P.2.2.1 Provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	Not provided	Not complied
7.	3.2.P.4 Applied specification (as mentioned in Form5F) is BP while applied formulation is available in JP only. Rectify it along with prescribed fee.	Finished product specification has been corrected as JP in Form5F	Fee of Rs 7500/- to be provided as per SRO.
8.	3.2.P.4 Analytical Method Verification studies of Drug Product including results of specificity parameter be provided (against blank, placebo, standard and sample) preferably HPLC chromatograms.	Not provided	Results of specificity parameter be provided (against blank, placebo, standard and sample) preferably HPLC chromatograms.
9.	3.2.P.8 Stability data supported by documents like chromatograms, raw data sheets and summary sheets has been provided except CoA against each time point. Provide it.	Provided	Complied
10.	3.2.P.8 Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month and onward (both accelerated and real time) to be provided.	Provided	Stability data (both accelerated and real time) to be provided for 6th month time point. Moreover, data against each time point for all 3 batches to be provided.

Decision: Registration Board deferred the case for following shortcomings:

a) **Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin**
b) **Fee of Rs 7500/- to be provided for correction of finished product specification.**
c) **Results of specificity parameter preferably HPLC chromatograms (against blank, standard and sample) under analytical method verification of Drug Substance**
d) **Justify selection of comparator product Beceptor 10mg tablet (Batch No 008G) by Sami pharmaceutical, Karachi instead of innovator product i.e Kestine tablet by M/s Highnoon Laboratories, Lahore for performing pharmaceutical equivalence/CDP.**
e) **Results of specificity parameter preferably HPLC chromatograms (against blank, placebo, standard and sample) under analytical method verification of Drug Product.**
f) **Provide details of Innovator Pack against which pharmaceutical equivalence study was performed (brand name, manufacturer, batch no. and expiry date).**
g) **Stability data (both accelerated and real time) to be provided for 6th month time point. Moreover, data against each time point for all 3 batches to be provided.**

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Ebaget D 20mg tablet (Batch No 006T76) by Getz pharma Pvt Ltd, Karachi Quality parameters such as Description, identification, dissolution and assay against Test product (Batch No TB-01-A20) Firm has submitted CDP results of their product against the same comparator product Ebaget D 20mg tablet (Batch No 006T76) by Getz pharma Pvt Ltd, Karachi in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	Bal Pharma Limited 5 th Floor, Laxmi Narayan Complex 10/1, Palace Road Bangalore – 560 052, Karnataka, INDIA		
API Lot No..Batch number	5001012201003		
Description of Pack (Container closure system)	Alu-Alu blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 3months Accelerated: 3 months		
Frequency	Accelerated: 0, 3 (Months) Real Time: 0, 3 (Months)		
Batch No.	TB-01-A20	TB-02-A20	TB-03-A20

Batch Size	5300 Tablet	5300 Tablet	5300 Tablet
Manufacturing Date	04/22	04/22	04/22
Date of Initiation	27/4/22	27/4/22	27/4/22
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not applicable
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. DCD/CR 2096/SPL.CL-I/2017-2018) dated 05-04-2018 issued by Drugs Control Department, Government of Karnataka, India. The certificate is valid till 1 year from date of issue.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Provided copy of commercial invoice (Invoice# M02/2122/EXP/AEX/00362 dated 31st January 2022, with received quantity i.e. 0.5Kg) for the purchase of Ebastine (Batch No 5001012201003) from Bal Pharma Limited Bangalore – 560 052, Karnataka, India with attestation of DRAP dated 03/03/2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted CoA for each time point to be provided.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Provided
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Provided

Remarks of Assessor:

Sr.#	Observations	Reply	Remarks
1.	Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance / API manufacturer issued by concerned regulatory authority of country of origin to be provided	Again firm has submitted invalid GMP certificate (valid till 05.04.2019)	Not complied
2	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Provided	Complied
3.	3.2.S.4 The DS manufacturer adopted BP specification (2020) of Ebastine while Drug product manufacturer did not perform quality test (sulphate, residual solvent) as per BP monograph moreover assay limit mentioned was not as per BP and silver suphadiazine was mentioned instead of Ebastin with assay parameter (CoA)	Firm has submitted corrected CoA of Ebastine as per BP wherein quality parameters and assay limit was mentioned as per BP.	Complied
4.	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Method used for analysis of API has been provided	Results of specificity parameter to be provided preferably HPLC chromatograms of sample, blank and standard

5.	3.2.P.2.2.1 CDP has been performed against comparator product Beceptor 10mg tablet (Batch No 008G) by Sami pharmaceutical, Karachi instead of innovator product in Pakistan i.e Kestine tablet by M/s Highnoon Laboratories, Lahore.	Not submitted	Yet to be justified
6.	3.2.P.2.2.1 Provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date	Not provided	Not complied
7.	3.2.P.4 Applied specification (as mentioned in Form5F) is BP while applied formulation is available in JP only. Rectify it along with prescribed fee.	Finished product specification has been corrected as JP in Form5F	Fee of Rs 7500/- to be provided as per SRO.
8.	3.2.P.4 Analytical Method Verification studies of Drug Product including results of specificity parameter be provided (against blank, placebo, standard and sample) preferably HPLC chromatograms.	Not provided	Results of specificity parameter be provided (against blank, placebo, standard and sample) preferably HPLC chromatograms.
9.	3.2.P.8 Stability data supported by documents like chromatograms, raw data sheets and summary sheets has been provided except CoA against each time point. Provide it.	Provided	Complied
10.	3.2.P.8 Stability data including summary data sheet, COA, raw data sheet and chromatograms for 6th month and onward (both accelerated and real time) to be provided.	Provided	Stability data (both accelerated and real time) to be provided for 6th month time point. Moreover, data against each time point for all 3 batches to be provided.

Decision: Registration Board deferred the case for following shortcomings:

a) **Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin**
b) **Fee of Rs 7500/- to be provided for correction of finished product specification.**
c) **Results of specificity parameter preferably HPLC chromatograms (against blank, standard and sample) under analytical method verification of Drug Substance**
d) **Justify selection of comparator product Beceptor 10mg tablet (Batch No 008G) by Sami pharmaceutical, Karachi instead of innovator product i.e Kestine tablet by M/s Highnoon Laboratories, Lahore for performing pharmaceutical equivalence/CDP.**
e) **Results of specificity parameter preferably HPLC chromatograms (against blank, placebo, standard and sample) under analytical method verification of Drug Product.**
f) **Provide details of Innovator Pack against which pharmaceutical equivalence study was performed (brand name, manufacturer, batch no. and expiry date).**
g) **Stability data (both accelerated and real time) to be provided for 6th month time point. Moreover, data against each time point for all 3 batches to be provided.**

	Status of the applicant	☒ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Inspection report for grant of DML has been provided (dated 24.08.2021)
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML dated 14-09-2021 specifying Capsule (General) section..
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 31013 dated 01-11-2022
	Details of fee submitted	PKR 30,000/- Dated 31/10/2022
	The proposed proprietary name / brand name	Ibex 100mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Celecoxib……..100mg
	Pharmacotherapeutic Group of (API)	Non-steroidal Anti-inflammatory Drug
	Pharmaceutical form of applied drug	Oral capsule
	Reference to Finished product specifications	BP specification
	Proposed Pack size	2 x10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA approved Celecoxib 100mg capsule by Lupin Ltd
	For generic drugs (me-too status)	Celbexx 100mg capsule by M/s Getz pharmaceutical Reg No 028694
	Name and address of API manufacturer.	M/S AARTI DRUGS LIMITED PLOT NO.W-60(B)W-61(B)W-62(B)W-71(B)W-72(B)W-73(B),MIDC,TARAPUR,DIST THANE 401506 MAHARASHTRA STATE,INDIA.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of

		drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance (CEL/13040001, CEL/13040002 and CEL/13040003) at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Celbex 100mg capsule (Batch No 173C01) by Getz pharmaceutical, (Pvt) Ltd Karachi. Quality parameters such as Description, identification, dissolution and assay against Test product (Batch No CP-01-1100 RT) Firm has submitted CDP results of their product against the same comparator product Celbex 100mg capsule (Batch No 173C01) by Getz pharmaceutical, (Pvt) Ltd Karachi in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

		☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Inspection report for grant of DML has been provided (dated 24.08.2021)
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter for issuance of DML dated 14-09-2021 specifying Tablet (General) section..
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 28385 dated 06-10-2022
	Details of fee submitted	PKR 30,000/- Dated 29/09/2022
	The proposed proprietary name / brand name	Canadiene 500mg Tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each tablet contains: Clotrimazole……...500mg
	Pharmacotherapeutic Group of (API)	Azole antifungal group of API Clotrimazole
	Pharmaceutical form of applied drug	Vaginal tablet
	Reference to Finished product specifications	USP specification
	Proposed Pack size	1 x1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA approved Canesten 500mg Pessary by M/s Bayer plc 400 South Oak Way Reading RG2 6AD
	For generic drugs (me-too status)	Canesten 1 500mg vaginal Tablet by M/s Bayer pharmaceuticals Pakistan Reg No 107224
	Name and address of API manufacturer.	M/s Halycon labs Pvt. Ltd. Plot No 409, Phase-IV G.I.D.C Industrial estate, Naroda, Ahmadabad, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance (HCZ05216, HCZ05316 and

		HCZ05416) at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence was determined against Canesten –I Tablet (Batch No BAA710) by M/s Bayer pharmaceuticals Pakistan. Quality parameters such as Description, identification, DT and assay against Test product (Batch No TB-01-C500 RT) CDP not applicable (dissolution test is not required in USP)
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Halycon labs Pvt. Ltd. Plot No 409, Phase-IV G.I.D.C Industrial estate, Naroda, Ahmadabad, India

Firm has provided chromatograms only for in use stability study	In use stability data (reconstituted form) to be provided wherein all pharmacopoeial quality parameters will be tested and results should be shown in summary data sheet for each batch.
2	3.2.P.2 CDP has not been performed while dissolution testing is mentioned in USP monograph.	Not provided	Not complied
3	3.2.P.2 Applied formulation contains taste masked micro pellets of Azithromycin while same has not been found in innovator formulation or any reference product. Justify it.	Not provided	Not complied
4	3.2.P.2 Provide Drug excipients compatibility study report for following excipients used in micro pellets (Microcrystalline cellulose, Mannitol, pre-gelatinized starch and coating material such as Methacrylic copolymer dispersion, Glyceryl monostearate, Di ethyl phthalate and titanium dioxide being qualitatively different from innovator product.	Not provided	Not complied
5	3.2.P.2.2.1 Provide image/snapshot/picture of Innovator Pack against which pharmaceutical equivalence study was performed. It should reveal, brand name, manufacturer, batch no. and expiry date.	Provided	Complied

6	3.2.P.5 & 3.2.P.8 Deliverable volume testing, uniformity of dosage and dissolution testing has not been performed under finished product specification and stability study	Deliverable volume testing has been incorporated in stability testing however uniformity of dosage and dissolution testing not performed	Not complied
7	3.2.P.4 Results of specificity and accuracy has not been provided under analytical method verification study of Drug Product	Results of specificity (against standard, blank and placebo) and accuracy yet to be provided.	Not complied
8	3.2.P.7 Provide details about container closure system (description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume)	Material of construction of plastic bottle yet to be provided	Not complied
9	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Analytical Method used for analysis of API yet to be provided	Not complied
10	3.2.S.4 Neither Drug substance (micro pellets) manufacturer nor finished product manufacturer has performed Dissolution testing while micro pellets (tasked masked) are coated with Methacrylic copolymer dispersion which is used in enteric coating.	Dissolution testing of micro pellets not performed by both Drug substance (micro pellets) manufacturer and finished product manufacturer.	Not complied
11	2.3.R.1.1 Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	BMR of stability batches has not provided (T01, T02 and T03)	Not complied
12	Provide Inspection report of product manufacturer for grant of DML	Not provided	Not complied

Decision: Registration Board deferred the case for following shortcomings:

a) **In use stability data (reconstituted form) of all pharmacopoeial quality parameters summarized in data sheet for each batch.**
b) **CDP to be performed**
c) **Justification for using taste masked micro pellets of Azithromycin in light of innovator formulation or any reference product.**
d) **Provide Drug excipients compatibility study report for following excipients used in micro pellets (Microcrystalline cellulose, Mannitol, pre-gelatinized starch and coating material such as Methacrylic copolymer dispersion, Glyceryl monostearate, Di ethyl phthalate and titanium dioxide being qualitatively different from innovator product.**
e) **Performance of uniformity of dosage and dissolution testing and incorporating under finished product specification and stability study**
f) **Results of specificity (against standard, blank and placebo) and accuracy to be provided under analytical method verification study of Drug Product**
g) **Provide details about container closure system (Material of construction of plastic bottle)**
h) **Analytical Method used for analysis of API from Drug Product manufacturer to be provided**
i) **Dissolution testing of micro pellets to be performed by either Drug substance (micro pellets) manufacturer or finished product manufacturer.**
j) **Provide Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided**

818	Name, address of Applicant / Marketing Authorization Holder	M/s May & Baker Private Limited, 45 KM Dina Nath Multan road, Lahore.
	Name, address of Manufacturing site.	M/s May & Baker Private Limited, 45 KM Dina Nath Multan road, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Inspection report for grant of DML to be provided.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 29-04-2022 specifying Capsule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	18-05-2023 Dy No 12209
	Details of fee submitted	PKR 30,000/- Dated 04-05-2023
	The proposed proprietary name / brand name	Maylax 100 mg Capsule
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Itraconazole…… 100mg
	Pharmacotherapeutic Group of (API)	Antimycotic for systemic use, triazole derivative
	Pharmaceutical form of applied drug	Hard gelatin capsule
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	4’s,6’s, 14’s, 28’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Itraconazole Capsule 100mg MHRA approved
	For generic drugs (me-too status)	Rolac of M/s Sami pharma, Karachi (Reg.No. 024491)
	Name and address of API manufacturer.	Vision Pharmaceuticals (Pvt.) Ltd, Plot No. 22-23, Industrial Triangle, Kahuta Road, Islamabad- Pakistan
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical

		procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches (Batch No ICZ1464, ICZ1465, ICZ1466) of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 6 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the comparator product Rolac 100mg Manufactured by Sami Pharmaceutical Karachi. Firm has submitted CDP results of their product against the comparator product Rolac capsule 100mg (Batch No 011H) in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted GMP certificate No F.3-26/2019-Addl.Dir (QA&LT-I)-56 dated 22.08.2022 based on inspection dated 14.06.2022 valid till 13.06.2024.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Purchase invoice wherein batch no of Itraconazole pellets (22%) was mentioned, to be provided.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has recently installed HPLC software 21CFR, in future stability studies shall be performed using HPLC software 21CFR
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Assessor:

Sr.#	Observations	Updated status	Remarks
1	3.2.P.2 Provide Drug excipients compatibility study report for Microcrystalline cellulose and Titanium dioxide being qualitatively different from innovator product.	It is evidence from the stability studies that product is compatible with the excipients and Drug Product is stable throughout the stability studies.	Not Complied Drug excipients compatibility study report for Microcrystalline cellulose and Titanium dioxide yet to be provided
2	3.2.P.2 CDP has been performed against generic product (locally manufactured) instead of innovator product Sporanox capsule by M/s Janssen-Cilag limited. Uk (also registered in Pakistan Reg No 012647)	CDP report has been submitted against innovator brand Sporanox capsule by M/s Janssen-Cilag limited. Uk MA holder M/s Aspin pharma Pvt Ltd. Batch No BV0012	Complied
3	3.2.P.2 Provide CDP report with detailed result (% result of drug in different time interval in each medium from both Test and comparator product, along with values for f1 and f2).	CDP report with detailed result (% result of drug in different time interval in each medium) has been provided but f1 and f2 values are not calculated.	Not complied f1 and f2 values are to be calculated.
4	3.2.P.4 Results of specificity and accuracy has not been provided under analytical method verification study of Drug Product	Results of specificity (against standard, blank and placebo) yet to be provided.	Not complied
5	3.2.P.8 Purchase invoice wherein batch no of Itraconazole pellets (22%) was mentioned, to be provided	Firm has provided loan letter from M/s vision Islamabad that	

		Iitraconazole IR pellets have been provided as loan.	
6	3.2.S.4 Method used for analysis of API from Finished Product Manufacturer to be provided along with analytical method validation studies.	Method used for analysis of API from Finished Product Manufacturer yet to be provided	Not complied
7	3.2.S.4 Drug substance (IR pellets) manufacturer performed Dissolution testing as mentioned in analytical method/CoA while same has not been provided under CoA of Itraconazole pellets IR from Drug product manufacturer.	Dissolution testing has been performed as provided in CoA of Itraconazole pellets IR from Drug product manufacturer.	complied
8	3.2.S.7 Submit real time stability data of Drug Substance up to shelf life. Already submitted data was for 6-month period.	Not provided	Not complied

Decision: Deferred for following:

a) **Drug excipients compatibility study report for Microcrystalline cellulose and Titanium dioxide being qualitatively different from innovator product.**
b) **Calculate f1 and f2 values under CDP**
c) **Results of specificity (against standard, blank and placebo) to be provided under analytical method verification study of Drug Product**
d) **Purchase invoice/document wherein batch no of Itraconazole pellets (22%) was mentioned, to be provided**
e) **Method used for analysis of API from Finished Product Manufacturer to be provided**
f) **Submit real time stability data of Drug Substance up to shelf life.**

	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Baloxavir Marboxil……..20mg
	Pharmaceutical form of applied drug	White to off-white colored, oval shaped film coated tablets, plain on one side and break line on other side.
	Pharmacotherapeutic Group of (API)	Antiviral (WHO ATC code: J05AX25)
	Reference to Finished product specifications	Innovator's Specifications

	Proposed Pack size	10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	XOFLUZA ™ (Baloxavir marboxil) Tablets 20mg of M/s Genetech USA, Inc (USFDA approved)
	For generic drugs (me-too status)	Not applicable
	Name and address of API manufacturer.	M/s Fujian Jinshan Zhundian Pharmaceutical Co. Ltd, Address: Jintang Industry Zone, Shaowu City, Fujian Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, characterization, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm has submitted details of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, tests for impurity A, B, individual impurity and total impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, working standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (180801, 180802, 180803)
	Module-III (Drug Product):	The firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical equivalence and CDP studies could not be performed due to the unavailability of innovator products, justification regarding the comparative studies and innovator pack procurement have been submitted.
	Analytical method validation/verification of product	Method validation studies have been submitted including precision, accuracy and specificity studies.

STABILITY STUDY DATA	
Manufacturer of API	M/s Fujian Jinshan Zhundian Pharmaceutical Co. Ltd., Address: Jintang Industry Zone, Shaowu City, Fujian Province, China
API Lot No.	200101
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×10's)
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH
Time Period	Real time: 6 months

		Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
BALOXA 20MG TABLET				
Batch No.		Lab-01	Lab-02	Lab-03
Batch Size		1000 Tablets	1000 Tablets	1000 Tablets
Manufacturing Date		07-2020	07-2020	07-2020
Date of Initiation		21-08-2020	21-08-2020	21-08-2020
No. of Batches		03		
DOCUMENTS / DATA PROVIDED BY THE APPLICANT				
1 2	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted reference of last onsite panel inspection for instant dosage form conducted during last two years i.e. EMPOLI (Empagliflozin) 10mg & 25mg Tablets which was presented in 290th meeting of the registration board & hence approved & registered by registration board Date of inspection: 13th June 2019. The inspection report confirms following points The HPLC software is 21CFR Compliant. Audit trail on the testing reports is available. Adequate monitoring and control are available for stability chamber. Chambers are controlled and monitored through software having alarm system for alerts as well.		
3 4	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. FJ20160009 issued by Food and Drug Administration of china valid till 22/02/2021. As per Chinese Government website no more GMP certificates are being issued after December 2019.		
5 6	Documents for the procurement of API with approval from DRAP (in case of import).	The firm has submitted copy of commercial invoice (Invoice# WIS200028 MAR 18, 2020 with received quantity i.e. 300 g) for the purchase of Baloxavir Marboxil by M/s Fujian Jinsahn Zhundian Pharmaceutical Co., Ltd attested by DRAP dated 25-03-2020.		
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.		
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	The Firm has submitted audit trail record of product testing of HPLC for all test intervals.		
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	The firm has submitted record of data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).		

Remarks of Evaluator:

Sr.#	Observations communicated	Response by the firm
1.	Submit differential fee for the registration of applied product since the applied product since the application was received in R&I section of DRAP after 7th May 2021.	Differential fee deposit slip # 772863043 of Rs. 25000/- has been submitted.

2.	The reference product literature showed that the structure and absolute stereochemistry of Baloxavir marboxil is verified by single crystal x-ray determination. The submitted COA from drug substance manufacturer does not contain this test.	The structure and absolute stereochemistry of Baloxavir Marboxil is verified by single crystal x-ray determination is mentioned on COA as polymorphic form, i.e: form I. Revised COA and XPRD Spectra is attached for your reference.
3.	Give a detailed account on polymorphic form of drug substance used in drug product development since several polymorphic forms of drug substance are possible as per reference literature.	Description of polymorphic form of material is defined in DMF (3.2.S.3.1.9 summary) as material is polymorphic form I.
4.	Elaborate the test of "Microbial limit Test" mentioned in certificate of analysis of Baloxavir Marboxil.	Microbial examination of non-sterile products is performed as per following USP method given in the texts on Microbial Enumeration Test <61>, Tests for Specified Microorganisms <62> and Microbiological examination of non-sterile products (acceptance criteria for pharmaceutical preparations and substances for pharmaceutical use) <1111>. As per pharmacopeia the acceptance criteria for non-sterile pharmaceutical products based on the total aerobic microbial count (TAMC), total yeast and molds count (TYMC) and objectionable microorganisms which must be absent and these are called as Microbial Limit Tests. We followed the same practice and set restricted microbiological limits as per SAMI's Specs, that is TAMC: NMT 100 cfu/g, TYMC: NMT 10 cfu/g as well as absence of pathogenic organisms including E. Coli, Salmonella, S. Aureus in our raw material.
5.	The submitted acceptance criteria for release and shelf life specifications are same. Scientific justification is required for adopting such acceptance criteria.	We develop the product specifications according to the general monograph of USP and from the chemistry reviews of USFDA, EMA. In addition, ICH Q6A states that the acceptance criteria are the same from release throughout shelf life of product. Therefore, we have also set the same specification limits for release and shelf life.
6.	The submitted process validation protocol does not describe the critical process steps and controls in defined ranges.	Existing protocol captures the required information and describes critical process parameters along with process controls. However, to make this more elaborative, we have revised these sections and version 2 of protocol is attached.
7.	Since the strategy for product development is planned according to identified QTPP which is based on evaluation of the innovator/reference product therefore, justify the authenticity of product development studies for applied formulation without comparison with innovator/reference product.	The innovator of Baloxavir Marboxil Tablet i.e. XOFLUZA 40mg & 20mg Tablets, already published a detailed characterization of API (Baloxavir Marboxil) in FDA chemistry review as well product assessment report of European Medicine Agency (EMA). This part of QTPP was derived from FDA chemistry review & EMA assessment report. Appearance of API, its solubility, pKa, partition coefficient, stereoisomerism and polymorphic form etc. were mentioned in detail by the innovator, therefore, all these required details are gathered from literature data. As the reference finished product is presented as immediate-release film-coated tablets for oral administration containing 20mg or 40mg of Baloxavir Marboxil as the active substance, therefore, we have designed our product same as reference product to ensure pharmaceutical equivalency.

		Product dissolution parameters and other related specification are already disclosed by the manufacturer of the reference product. Due to poor solubility of API, to ensure reproducible dissolution results, we have selected micronized grade of API for development of our product as suggested by the reference brand in FDA chemistry review. Due to unavailability of innovator samples, the dissolution profile in different pH mediums i.e., pH 1.2, 4.5 and 6.8 buffers as recommended in WHO for CDP is checked and the release profile found similar to that of innovator product "Xofluza Tablet" in FDA chemistry review publically available. Information related to product packaging, storage and labeling were also gathered from the above mentioned product assessment reports i.e. FDA chemistry review as well product assessment report of European Medicine Agency.

Decision 316th meeting of RB: Registration Board decided to defer the case for submission of pharmaceutical equivalence and CDP studies with innovator / reference product.

Remarks of Assessor:
Firm has provided pharmaceutical equivalence and CDP studies against reference product as follows:
Product name: Xofluza (Baloxavir marboxil) Tablets 20mg
Manufactured by: M/s Shionogi, Incorporated (USFDA approved)
Batch No: 0137
Exp date: 09-2025
Quality parameters compared were appearance, Disintegration time, Assay, identification, impurity dissolution, uniformity of dosage unit, and microbial enumeration test.
CDP was performed against same reference product in Acid media (pH 1.0-1.2) in Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The f2 value was not required since more than 85% drug release within 15 min.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

822.	Name and address of manufacturer/ Applicant	M/s Pharma Lord (Pvt.) Ltd., 12 KM, Lahore Road, Layyah, Punjab (Tablet general).

	Composition	Each Chewable Tablet Contains: Loratadine ……..…10mg
	Diary No. Date of R & I & fee	Dy. No 10371 dated 05-03-2019; Rs.20,000 dated 05-03-2019.
	Pharmacological Group	Antihistamine for systemic use.
	Type of Form.	Form-5
	Finished product Specification.	USP specifications.
	Pack size & Demanded Price	1 x 10's; 10 x 10's.
	Approval status of product in Reference Regulatory Authorities.	Alavert 10mg orally disintegrating tablet, USFDA approved.
	Me-too status.	Lorefect tablets, Bosch pharmaceuticals, Reg. No. 023018.
	GMP status.	Same as above.
	Remarks of the	Evidence of applied formulation already approved by DRAP in

	Evaluator.	chewable formulation. Firm has also provided Allord, Allordin, Allfix & Allerdin as alternative brand names.
	Decision 312th meeting of RB:	Deferred for evidence of applied formulation/drug already approved by DRAP (generic / me-too status) in chewable formulation along with registration number, brand name and name of firm.
	Remarks of Assessor	Firm has revised formulation as follows: Each Tablet Contains: Loratadine ……..…10mg Fee of Rs 30,000/- has been deposited in this regard (Deposit slip no. 51398823) dated 12.06.2023 Reference for Generic version of applied formulation was provided as: Antial tablet (Reg No 019675) by M/s Sami pharmaceuticals (Pvt) Ltd.
	Decision: Approved as per following label claim: **Each Tablet Contains:** **Loratadine ……..…10mg**	

823	Name and address of manufacturer / Applicant	M/s Delux Chemical Industries, LT 26 A/1 Landhi Industrial Area, Karachi-22
	Brand Name +Dosage Form + Strength	Reoflox-C oral solution.
	Composition	Each 100ml solution contains: Enrofloxacin …….25% w/v Colistin Sulphate……50 M.I.U.
	Diary No. Date of R& I & fee	Dy. No. 512, R&I Dated 20-06-2016, (Rs.20,000/-) (20-6-2016)
	Pharmacological Group	Anti-bacterial
	Type of Form	Form -5
	Finished product Specifications	Not provided
	Pack size & Demanded Price	100ml, 500 ml, 1000ml, 2.5-liter, 5-liter bottle & Decontrolled
	Approval status of product in Reference Regulatory Authorities	
	Me-too status	Vitaflox-C 25% liquid of M/s Vetz Pharma
	GMP status	Last inspection was conducted on 24-12-2013 and the report concludes renewal of DML by way of formulation.
	Remarks of the Evaluator PEC	Latest inspection report. Species: Poultry & Ruminants Section needs to be verified. Provide specs. Firm has not submitted the reply even after being issued letter and reminder dated 13th Nov, 2017 & 4th Jan, 2018 respectively.
	Decision of 278th meeting of Registration Board.	Deferred for submission of latest GMP inspection report conducted within a period of last 1 year by DRAP.
	Submission by the firm.	Firm has submitted GMP inspection report conducted on 22-06-2021 wherein it is concluded that the firm is operating at an acceptable level of GMP compliance at the time of inspection.
	Remarks of the Evaluator PEC XIII	Inspection report has also mentioned that firm holds DML No. 000033 (by way of formulation) last renewed w.e.f. 09-01-2011. The last inspection was carried out by the panel for renewal of DML on 24-12-13.

	Decision 313th meeting of RB: Deferred for updated GMP and renewal status of the firm.
	Remarks: Firm has submitted latest panel inspection report (for DML renewal) dated 26.10.2022 wherein renewal of DML was recommended. Moreover, copy of updated DML (w.e.f 09.01.2021) has also been submitted.
	Decision: Approved.

Following application of M/s FYNK Pharmaceuticals, Lahore was considered and approved in 324th meeting of Registration Board:

824.	Name, address of Applicant / Marketing Authorization Holder	M/s FYNK Pharmaceuticals, 19 km, GT Road, Kalashah Kaku, Lahore

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the drug product manufacturer	Copy of current GMP certificate dated 08-08-2019 is provided.
	Evidence of approval of manufacturing facility	Firm has submitted copy of covering letter for renewal of DML and approval letters of licensed sections.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 11090 Date: 07/5/2022
	Details of fee submitted	PKR 30000 Slip No. 1530874057
	The proposed proprietary name / brand name	**TENDOL TABLET 50mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each immediate release Film Coated tablet contains: Tepentadol as Hydrochloride… 50mg
	Pharmaceutical form of applied drug	Tablet (General)
	Pharmacotherapeutic Group of (API)	Opioid Analgesic (ATC code : N02AX06)
	Reference to Finished product specifications	Innovator Specifications
	Proposed Pack size	10’s,20’s & 30’s (Alu-Alu Blister)
	Proposed unit price	Rs.500 for 10’s Rs.1000 for 10’s Rs.1500 for 30’s
	The status in reference regulatory authorities	USFDA Approved NUCYNTA 50mg (Tepentadol HCL) Tablet manufactured by Janssen Ortho, LLC, gurabo,
	For generic drugs (me-too status)	Tapento Tablet 50 mg (M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi)
	Name and address of API manufacturer.	Tapentadol Hydrochloride: M/s Ami Life Sciences Private Limited, Block No. 82/B, ECP Road, Taluka Padra, Gujrat, India.

		Certificate No. 19041306 dated 25-04-2019.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for both drug substance data related to nomenclature, structure, general properties, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability is conducted at 40oC ± 2oC / 75% ± 5% RH for 6 months and data is provided for (batch no. TPT50040513, TPT50050513, TPT50050513). The real time stability data is conducted at 30oC ± 2oC / 65% ± 5% RH for 24 months. (TPT50111119, TPT50121119, TPT50131119)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence study is not performed against the innovator / Reference Product CDP has been performed against the same brand that is Plaxodol Tablet 50mg (M/s Jenner Pharma, Skeikhupura) instead of Innovator / Reference Product of same strength.in Acid media (0.1N HCl), acetate buffer pH 4.5 & Phosphate Buffer pH 6.8. The F2 values are found satisfactory(>50%).
	Analytical method validation/verification of product	Firm has submitted report of validation studies of analytical method of drug substance. Firm has submitted report of verification of analytical method for the drug product.

STABILITY STUDY DATA	
Manufacturer of API	Tapentadol Hydrochloride: M/s Ami Life Sciences Private Limited, Block No. 82/B, ECP Road, Taluka Padra, Gujrat, India.
API Lot No.	Not Provided
Description of Pack (Container closure system)	The proposed pack size is 10's,20's & 30's Alu-Alu Blister.
Stability Storage Condition	Real time : 30°C ± 2°C / 75% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH

Time Period	Real time: 24 months Accelerated: 06 months

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Provided
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Tapentadol Hydrochloride: M/s Ami Life Sciences Private Limited, Block No. 82/B, ECP Road, Taluka Padra, Gujrat, India. Certificate No. 19041306 dated 25-04-2019.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The document regarding import of Tramadol HCL is Provided.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Evaluation by PEC:

Following Documents are found deficient:
Provide copy of valid DML.
Provide analytical method verification Protocol and test reports for API Tepentadol Hydrochloride as performed by Drug Product manufacturer.
Pharmaceutical equivalence study and test results are not submitted against Innovator / Reference Product of same strength For Tendol Tablets 100mg.
Comparative Dissolution Profile studies are performed for Tendol Tablets 75mg against Tapento Tablet 75mg manufactured by (M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi instead of Innovator / Reference Product of same strength.
RSD is not calculated for Robustness test as performed during analytical method validation of Drug Product.
Precision and accuracy test and test report in analytical method validation of Drug Product are not submitted.
Provide stability studies summary sheets on Prescribed format as recommended by the DRB in its 293rd meeting including batch No, batch size, manufacturing date, date of initiation, API lot No etc.
Documents for the procurement of API with approval from DRAP (in case of import) along with COA of relevant batch needs to be submitted.
Batch manufacturing record for all batches prepared for stability testing needs to be provided for all strengths.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm has submitted following reply/documents : Firm has submitted copy of valid DML No. 000494 valid till 10-10-2023. Firm has Provided analytical method verification Protocol and test reports for API Tepentadol Hydrochloride as performed by Drug Product manufacturer. Firm has stated that the innovator Product is Nucynta film coated tablet which is a controlled drug and is only available on prescription , therefore, locally manufactured Topentadol tablet manufactured by Jenner Pharma, Sheikhupura is used for CDP studies. Test reports for Robustness , Precision and accuracy in method validation are submitted. Documents for the procurement of API with approval from DRAP (in case of import) along with COA of relevant batch is submitted. Stability studies summary sheets on Prescribed format as recommended by the DRB in its 293rd meeting including batch No, batch size, manufacturing date, date of initiation, API lot No and storage conditions etc are submitted.
Decision of 324th meeting: Approved. Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application. Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Now the firm has submitted that strength mentioned in agenda was Tepentadol HCl 50mg while applied strength was 75mg. Firm has submitted copies of online challan as well, wherein Tepentadol HCl 75mg was applied against Challan no. 1530874057. Moreover, application of Tepentadol HCl 50mg was already considered and approved in same meeting (Case No 1332) hence instant case is resubmitted as follows:

	Name, address of Applicant / Marketing Authorization Holder	M/s FYNK Pharmaceuticals, 19 km, GT Road, Kalashah Kaku, Lahore
	Name, address of Manufacturing site.	M/s FYNK Pharmaceuticals, 19 km, GT Road, Kalashah Kaku, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

Evaluation by PEC:

Following Documents are found deficient:
Provide copy of valid DML.
Provide analytical method verification Protocol and test reports for API Tepentadol Hydrochloride as performed by Drug Product manufacturer.
Pharmaceutical equivalence study and test results are not submitted against Innovator / Reference Product of same strength For Tendol Tablets 100mg.

Comparative Dissolution Profile studies are performed for Tendol Tablets 75mg against Tapento Tablet 75mg manufactured by (M/s Sami Pharmaceuticals (Pvt) Ltd, Karachi instead of Innovator / Reference Product of same strength.
RSD is not calculated for Robustness test as performed during analytical method validation of Drug Product.
Precision and accuracy test and test report in analytical method validation of Drug Product are not submitted.
Provide stability studies summary sheets on Prescribed format as recommended by the DRB in its 293rd meeting including batch No, batch size, manufacturing date, date of initiation, API lot No etc.
Documents for the procurement of API with approval from DRAP (in case of import) along with COA of relevant batch needs to be submitted.
Batch manufacturing record for all batches prepared for stability testing needs to be provided for all strengths.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm has submitted following reply/documents :
Firm has submitted copy of valid DML No. 000494 valid till 10-10-2023.
Firm has Provided analytical method verification Protocol and test reports for API Tepentadol Hydrochloride as performed by Drug Product manufacturer.
Firm has stated that the innovator Product is Nucynta film coated tablet which is a controlled drug and is only available on prescription , therefore, locally manufactured Topentadol tablet manufactured by Jenner Pharma, Sheikhupura is used for CDP studies.
Test reports for Robustness , Precision and accuracy in method validation are submitted.
Documents for the procurement of API with approval from DRAP (in case of import) along with COA of relevant batch is submitted.
Stability studies summary sheets on Prescribed format as recommended by the DRB in its 293rd meeting including batch No, batch size, manufacturing date, date of initiation, API lot No and storage conditions etc are submitted.

Decision 234th meeting: Approved
Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.
Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.

Remarks: Correction in minutes (324th meeting of Registration Board) pertaining to above mentioned case solicited. Please.

Proceeing:
It was apprised to the Board that two product of Tendol 50mg Tablets and Tendol 75mg Tablets were presented and discussed, at S. No. 1332 and 1333, in 324th meeting of Registration Board but during the recording of minutes both product were recorded as tendol 50mg Tablets. Subsequesntly on the intimation of firm the correction in the minutes of 324th registration Board was presented in this meeting. Firm has submitted copies of online challan as well, wherein Tepentadol HCl 75mg was applied against Challan no. 1530874057.
Decision: Registration Board corrected the minutes of 324th meeting of Registration Board and approved TENDOL TABLET 75mg against Fee Challan No. against Challan no. 1530874057 which were indavetently mentioned as TENDOL TABLET 50 mg in 324th meeting of registration Board.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	M/s Zenith Chemical Industry Lahore GMP Certificate No. 141/2019-DRAP(AD-813875-228) dated : 22-05-2019
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not required.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	For march 2021 while the stability is initiated in May 2021.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted.

Evaluation by PEC:
GMP certificate of API manufacturer is issued on 22-05-2019.
Analytical assay method verification test reports/results of API by both Drug Substance and Drug Product manufacturer are not submitted
Provide detail of excipients along with specifications along with compatibility studies as the excipients used in Product development are different from the ones of innovator product.
Uniformity of Dosage forms is a USP Specified test for Drug Product but in stability study reports/results it is not performed and is not mentioned in Stability data test reports of 400mg tablet and both Uniformity of Dosage forms
Detail of equipment's/machinery as used in Product Development if not submitted.
Product Assay method as mentioned in Product Development is different from the one specified in (USP).
Specificity Method and test reports are not submitted for Drug Product.
%RSD is not calculated for tests performed for Drug Product analytical method verification.
In BMR check points include i.e. average tablet size to be 460mg, and target weight is also 460mg while the Tablet is of 200mg.
Chromatograms submitted along with stability data sheets in Briprofin 200mg tablets, date of data processing/acquiring is mentioned as 11-03-2021 while the stability is initiated in May 2021.

Decision of 323rd meeting of RB : Registration Board deferred the case for submission of reply to the above cited shortcomings within six (06) months.

Updated submission:

Sr No	Observation	Reply	Remarks
1.	GMP certificate of API manufacturer is issued on 22-05-2019.	API manufacturer has applied for renewal of GMP. Copy of valid DML is attached.	Submitted copy of DML is valid till 14.06.2021. updated GMP status is still required
2.	Analytical assay method verification test reports/results of API by both Drug Substance and Drug Product manufacturer are not submitted	Analytical method verification of API from Drug product manufacturer is provided	Analytical method verification report/test results from Drug Substance manufacturer yet to be provided
3.	Provide detail of excipients along with specifications along with compatibility studies as the excipients used in Product development are different from the ones of innovator product.	Detail of excipients along with specifications and compatibility studies is provided	Complied
4.	Uniformity of Dosage forms is a USP Specified test for Drug Product but in stability study reports/results it is not performed	As weight of API is greater than 25mg so the weight variation is applied which is	Justified

	and is not mentioned in Stability data test reports of 400mg tablet and both Uniformity of Dosage forms	the parameter of uniformity of dosage unit as per USP. In stability report weight variation is performed and results are mentioned.	
5.	Detail of equipment's/machinery as used in Product Development if not submitted	Submitted	Complied
6.	Product Assay method as mentioned in Product Development is different from the one specified in USP.	Product Assay method is same as specified in USP. However for record purpose method is attached.	Verified.
7.	Specificity Method and test reports are not submitted for Drug Product.	Verification Method and test reports are provided wherein specificity parameter was not provided	Not Complied
8.	%RSD is not calculated for tests performed for Drug Product analytical method verification.	Analytical method verification study is provided wherein %RSD is mentioned.	Verified
9.	In BMR check points include i.e. average tablet size to be 460mg, and target weight is also 460mg while the Tablet is of 200mg.	Production weight of Briprofen 200mg tablet is 460mg and its average weight is also obtained in 460mg range. Selected check points/parameters are for Briprofen 200mg tablet.	Justified
10.	Chromatograms submitted along with stability data sheets in Briprofin 200mg tablets, date of data processing/acquiring is mentioned as 11-03-2021 while the stability is initiated in May 2021	Format of date on HPLC chromatograms was MM.DD.YY. Stability study was initiated in May 2021 and 6 months stability was completed on November 2021 and was tested on 3rd of Nov 2021. As the format of date on HPLC system is MM.DD.YY that's why date of data processing/acquiring shown as 11.03.2021.	Justified
Decision 326th meeting: Deferred for submission of Analytical Verification study/test reports of Drug Product including specificity parameter to be provided from Drug Product manufacturer.			
Remarks of Assessor: Firm has provided Analytical Verification study/test reports of Drug Product including specificity			

parameter from Drug Product manufacturer.		
Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Decision: Approved. • **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

827.	Name and address of manufacturer / Applicant	M/s Remington Pharmaceuticals Industries Pvt Ltd. 18 km, Multan Road, Lahore
	Brand Name +Dosage Form + Strength	Recibet Ointment 50mcg/0.5mg
	Composition	Each Gram Contains: Calcipotriol As Monohydrate…50mcg Betamethasone As Dipropionate…0.5mg
	Diary No. Date of R& I & fee	Dy. No.11757 dated 06.03.2019 Rs. 20,000/- dated 06.03.2019
	Pharmacological Group	Calcipotriol, Combinations
	Type of Form	Form 5
	Finished Product Specification	The firm has submitted copy of BP specs. available in BP.
	Pack size & Demanded Price	15g; Leader price
	Approval status of product in Reference Regulatory Authorities.	Calcipotriol (as monohydrate) /Betamethasone (as dipropionate) Sandoz 50 micrograms per g / 500 micrograms per g ointment. MHRA approved
	Me-too status	Calbet Ointment. Reg. No. 84025
	GMP status	The firm was inspected on 15-16.01.2018, wherein GMP was rated Good.
	Remarks of the Evaluator.	The drug product specifications have not been evaluated.
		Revised the pharmacological group from antipsoriatics to Calcipotriol, Combinations. Mentioned eye ointment form in the manufacturing outlines. Later, revised it. Initially applied for Betamethasone As Dipropionate, then, revised Betamethasone As Dipropionate to Betamethasone in the label claim. Already adjusted the weights of API as per equivalency factors. Then, revised Calcipotriol As Monohydrate to Calcipotriol as Monohydrate 52.2mg eq. to calcipotirol..50mcg in master formula and 5.24mg in master formula (100kg). Already adjusted the weights of API as per equivalency factors the, revised Betamethasone As Dipropionate 0.643mg to Betamethasone as Dipropionate eq. to betamethasone… 0.5mg in the unit formula and 64g in master formula (100kg). Submitted Rs. 7500/- fee, challan- 6877773434
	Decision 317th meeting: Deferred for: Revision of label claim as per the innovator's product along with submission of Rs.22500/-. Submission of valid GMP inspection report conducted within a period of last three years.	
	Remarks: Firm has submitted fee of Rupees Rs.22500 (deposit slip no 46527293722) dated 22.06.2023 for revision of label claim as per innovator: Each gram contains: Calcipotriol (as monohydrate)……..50 micrograms Betamethasone (as dipropionate)……. 0.5 mg	

	Valid GMP inspection report conducted within a period of last three years (dated 30.09.2021) wherein firm was operating with Good level of GMP compliance.
	Decision: Approved

	Proposed unit price	Rs 2400/-
	The status in reference regulatory authorities	Diprivan – Aspen Pharma – Ireland Fresenius Kabi – Austria
	For generic drugs (me-too status)	Propofol Abbot I.V. Injection, 10mg Each ml of emulsion for injection/ infusion contains 10 mg of propofol. Reg.no: 023142 20mlx5's – Rs 1367/=
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Bachem S.A Succursale De Vionnaz Route Du Simplon 22 CH-1895 Vionnaz Switzerland
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25oC ± 2oC 60% RH. The stability study data is till 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of

		analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Not submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	European Pharmacopoeia 20 mL, Type I, Clear, Glass Ampoule
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted (40ºC ± 2ºC), %75 ± 5 Humidity for 6 months. The real time stability study data is conducted at (30ºC ± 2ºC), % 65 ± 5 Humidity for 24 months. (Batch # A06110007A, A06110009A, A06110010A)

Evaluation by PEC:

The formulation is different from RRA
Certificate of Analysis (COA) of both drug substance(s) manufacturer and drug product manufacturer:
Stability data of 3 batches at accelerated and real time conditions:

S.#	Section #	Deficiencies	Zam Zam Reply
1	1.6.5	Valid Latest DSL which should have been provided for application.	Copy of valid DSL licence is attached along with renewal dated 14 feb 2022
2	1.33	Importer shall provide Certificate of Pharmaceutical Product (CoPP) / Free Sale Certificate issued by the relevant regulatory authority in the country of origin and name of exporting country.	Original CoPP # 29/04/2021 already provided with dossier valid till 29-04-2023, facility is GMP certified
3	1.5	Original, Legalized, and valid GMP of drug product manufacturer is required.	Original legalized and valid GMP of POLIFARMA was provided dated 31Aug.2021.
4	2.3.P.4	The excipients are different from the reference product justification is needed	The declaration letter is provided. PROPOFOL-PF 1% 200 mg/20 mL Emulsion for I.V. Injection/Infusion product is qualitatively and quantitatively equivalent to Propofol 1% Fresenius Anaesthetic Agent for Intravenous Injection or Infusion. The excipients contained in PROPOFOL-PF 1% 200 mg/20 mL Emulsion for I.V. Injection/Infusion are the same as reference product PROPOFOL 1% Fresenius Anaesthetic Agent for Intravenous Injection or Infusion
5	3.2.S.44	Certificate of Analysis (COA) of both drug substances(s) manufacturer and drug product manufacturer Stability Data of 3 batches at accelerated and real time conditions	Certificate of analysis for 3 different batches conducted by the API manufacturer and the finished product manufacturer to the Propofol API used in production by Polifarma İlaç are provided. The API manufacturer does not have to proceed stability study each batches that manufactured. The stability data of the batches produced by the API manufacturer within the scope of process validation are provided.
6	3.2.S.4.3	Analytical method Verification studies	Related substances and assay analytical method

		including specificity, accuracy, and repeatability (method precision) performed by the Drug manufacturer drug substance (s) shall be submitted.	verification protocol and reports are provided
7	3.2.S.7	The name on stability data of drug substance is not clear not indicating clearly that who is conducting this stability.	The up-to-date signed and stamped stability data of drug substance is provided by BACHEM, Switzerland.
8	3.2.P.3.5	Process validation reports including the protocols and results for critical process steps shall be provided.	Latest PVP and PVR are provided

Decision 321st meeting : Deferred for submission of Pharmaceutical equivalence studies against the innovator drug product.

Remarks of Assessor:
Firm has submitted Pharmaceutical equivalence studies against reference product i.e Propofol 1% IV injection by FRESENIUS KABI DEUTSCHLAND GMBH (EMA approved) Batch No 10LK5235.
Following quality parameters were tested such as: Particles size, Globular size, Assay, free fatty acids, organic impurities. BET and sterility test.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Molecules/drugs reported short in the market:

M/s Ghani Brothers, Karachi vide letter dated 01-03-2023 has informed that they have applied for registration of Freefol-MCT 1% Injection 20ml Vial (Propofol 10mg/ml), manufactured by Daewon Pharm, Co Ltd, South Korea on 31-08-2022. The firm further informed that currently there is severe shortage of Propofol injection which is also an essential drug and also enclosed the minutes of 1st meeting of the Cabinet Committee on supplies of medicines and medical devices of Specialized Healthcare & Medical Education Department (SHC&ME), Govt. of Punjab held on 20-02-2023 in which it was discussed about shortage of medicines including Propofol Injection. The firm has requested to include the above subject mentioned product in the upcoming registration board meeting on priority basis, so that the product can be approved earliest possible to contribute in removing the shortage of Propofol injection from the market and serve the patients. In the light of above and on the directions of Chairman RB, following application(s) of Propofol are placed before the Board for its consideration:

829.	Name, address of Applicant / Importer	M/s Ghani Brothers, 1st Floor, Karimjee Building, Opp HBL Bank, North Napier Road, Karachi, Pakistan
	Details of Drug Sale License of importer	License No: 094 Address:. 1st Floor, Karimjee Building, Opp HBL Bank, North Napier Road, Karachi, Pakistan Address of Godown: NA Validity:.28-04-2023 Status: License to sell drugs as wholesale Renewal: NA
	Name and address of marketing authorization holder (abroad)	Daewon Pharm Co.,Ltd, 24 Jeyakgondan 1-gil Hyangnam-eup, Hwaseong-si, Gyeonggi-do, Republic of Korea
	Name, address of manufacturer(s)	Daewon Pharm Co.,Ltd, 24 Jeyakgondan 1-gil Hyangnam-eup, Hwaseong-si, Gyeonggi-do, Republic of Korea.
	Name of exporting country	South Korea

	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	CoPP: Firm has submitted original, legalized copy of CoPP certificate No 2021-A1-0028 and GMP certificate issued by Food and Drug Administration Republic of South Korea for Freefol MCT 1% Injection 20ml Vial (Propofol 10mg/ml). The CoPP confirms free sale status of the product in exporting country as well as GMP status of the manufacturing site through periodic inspection every 3 year.
	Details of letter of authorization / sole agency agreement	Firm has submitted copy of Sole Agency Agreement from Daewon Pharm Co. Ltd, South Korea. The letter species that the manufacturer appoints M/s Ghani Brothers. to register their products in Pakistan. The authorization letter is valid till 19-03-2026
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 24632 : 31-08-2022
	Details of fee submitted	PKR 150,000/-: on 11-10-2021, Challan No 623767235857
	The proposed proprietary name / brand name	Freefol MCT 1% Injection 20ml Vial (Propofol 10mg/ml)
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Propofol…….200mg
	Pharmaceutical form of applied drug	White color Emulsion for injection Packed in vial.
	Pharmacotherapeutic Group of (API)	General Anesthetic properties (N01AX10)
	Reference to Finished product specifications	European pharmacopeia
	Proposed Pack size	20ml vial x10’s
	Proposed unit price	As per brand leader
	The status in reference regulatory authorities	Propofol Lipuro 1% (USFDA Approved).
	For generic drugs (me-too status)	Propofol 1% MCT Fresenius Injection of Fresenius (Reg #099485)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation,

		batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	Bachem SA, Succursale de Vionnaz, Route du Simplon 22, 1895, Vionnaz, Switzerland
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of API at accelerated as well as real time conditions. The real time stability data is conducted at 25 °C /60 % RH for 60 months
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence performed against reference product i.e Fresofol MTC 1% Injection Lot No 16FC0249. All quality parameters as per official monograph were compared against Test product Lot No N001
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product.
	Container closure system of the drug product	USP type-I clear glass vial
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. Batch No 19034. 19048, 19062 The real time stability study data is conducted at 30 °C / 75% RH. The real time stability study data of 3 batches is for 24months. Batch No R015, R016, R017.
Decision 326th meeting: Registration Board decided to refer the case to Authority for seeking guidance upon priority consideration of the applied formulation.		
Remarks: Since Authority in its 165th held on 20th July 2023, meeting has decided to consider "Propofol injection" as priority molecule hence case is resubmitted for consideration please.		
Decision: Approved. • **Manufacturer will place first three production batches on long-term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**		

Agenda Item No. 01: Priority Applications of Human Drugs Locally Manufactured (New DML) applied on Form - 5F.

Case 01: M/s Oncogen Pharma (Pvt.) Limited WH-26 & 27-A3, Korangi Creek Industrial Park, Karachi. was granted License w.e.f. 04-07-2022 with following sections: -

i. Tablet (Oncology)
ii. Capsule (Oncology)

831.	**Name, address of Applicant / Marketing Authorization Holder**	Oncogen Pharma (Pvt.) Limited WH-26 & 27-A3 , Korangi Creek Industrial Park, Karachi.
	Name, address of Manufacturing site.	Oncogen Pharma (Pvt.) Limited WH-26 & 27-A3 , Korangi Creek Industrial Park, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	The Firm was granted DML by way of Formulation w.e.f. 04-07-2022 in 287th meeting of CLB held on 24th June, 2022, for following two (02) sections: - i. Tablet (Oncology) ii. Capsule (Oncology)
	Evidence of approval of manufacturing facility	The Firm was granted DML by way of Formulation w.e.f. 04-07-2022 in 287th meeting of CLB held on 24th June, 2022, for following two (02) sections: - i. Tablet (Oncology) iii. Capsule (Oncology)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 5685 dated 28-02-2023.
	Details of fee submitted	Slip No. 67560067722 PKR 30,000/- dated 26-01-2023.
	The proposed proprietary name / brand name	**NILOGEN 150mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Nilotinib HCl Monohydrate (Ph. Eur.) equivalent to Nilotinib…… 150 mg (Innovator's Specifications)
	Pharmacotherapeutic Group of (API)	Hard gelatin capsule with blue color cap and off-white color body
	Pharmaceutical form of applied drug	L01EA03, Antineoplastic And Immuno-modulating Agents, BCR-ABL tyrosine kinase inhibitors.

	Reference to Finished product specifications	Innovator's Specification
	Proposed Pack size	7 x 4's (28's) 10 x 4's (40's) 28 x 4's (112's) 30 x 4's (120's)
	Proposed unit price	The firm have proposed as follows in their application. 7 x 4's (28's) = 80,000/- 10 x 4's (40's) = 114,286/- 28 x 4's (112's) =320,000/- 30 x 4's (120's) =342,857/-
	The status in reference regulatory authorities	Tasigna (Nilotinib) 150mg Oral Capsules by M/s Novartis Pharmaceuticals Corporation (USFDA Approved).
	For generic drugs (me-too status)	Nitonib 150mg Capsule (Reg. No. 094596) by M/s Pharmasol (Pvt.) Ltd. Lahore.
	Name and address of API manufacturer.	M/s Shandong Lixin Pharmaceutical Co., Ltd. No. 9, Jinyang Road, Gaoqing Economic Development Zone, Zibo City, Shandong Province, P.R. China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module-III Drug Substance:	Official monograph of Nilotinib HCl Monohydrate is available in European Pharmacopeia. Firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30°C±2°C/65±5%RH for 24 months Accelerated: 40°C±2°C/75±5%RH for 6 months Batches: (C39-202005002, C39-202005003 and C39-202005004)
	Module-III Drug Product:	Official monograph of Nilotinib Capsules is not present in any pharmacopeia. The firm has

		submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against Tasigna 150mg capsule, Batch No. LF7595 by Novartis Pharma Stein AG, Stein, Switzerland by performing quality tests (Appearance, Assay, Dissolution and Impurities). CDP has been performed against Tasigna 150mg capsule, Batch No. LF7595 by Novartis Pharma Stein AG, Stein, Switzerland in Acidic medium (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8). The f2 values are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including, system suitability, specificity, linearity, accuracy, precision, robustness and range.

STABILITY STUDY DATA

Manufacturer of API	M/s Shandong Lixin Pharmaceutical Co., Ltd. No. 9, Jinyang Road, Gaoqing Economic Development Zone, Zibo City, Shandong Province, P.R. China.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	None submitted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Drug Manufacturing License (DML) License no. Lu20160171 issued by Shandong FDA China. (valid till 10-12-2024).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	The firm have submitted Form 6 (Drug Import License) bearing no. K-774556896948 dated

		30-07-2022 to import 4.5Kg Nilotinib HCl monohydrate from Shandong Lixin Pharmaceutical Co., Ltd. No. 9, Jinyang Road, Gaoqing Economic Development Zone, Zibo City, Shandong Province, P.R. China. The firm have submitted copy of Commercial Invoice, Packing List and AWB. **However Clearance Certificate (for Import against above mentioned Drug Import License) from Assistant Director, DRAP Karachi vide Commercial Invoice No. SDLX20228701M dated Aug 10th 2022 has not been submitted.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with batch manufacturing record, analytical record and respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted compliance record and audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator:

Initial Stability Study Data was provided for 03 Months along with application dossier on Form 5F, which was later on completed to 06 Months (Accelerated and Real Time) vide Dy. No. 11125 dated 04 MAY 2023.

i. **Clearance Certificate (for Import against above mentioned Drug Import License) from Assistant Director, DRAP Karachi vide Commercial Invoice No. SDLX20228701M dated Aug 10th 2022 has not been submitted.**

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator:
Initial Stability Study Data was provided for 03 Months along with application dossier on Form 5F, which was later on completed to 06 Months (Accelerated and Real Time) vide Dy. No. 11126 dated 01-06-2023.

i. **Clearance Certificate (for Import against above mentioned Drug Import License) from Assistant Director, DRAP Karachi vide Commercial Invoice No. SDLX20228701M dated Aug 10th 2022 has not been submitted.**

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case 02: M/s. Qadir Pharmaceuticals, Veerum Fateh Garh Sahuwala Road, Sialkot was granted New DML w.e.f. 13-09-2021 with following sections: -

i. Tablet, capsule, and oral liquid (general)
ii. Liquid injectable - vial & ampoule (general)
iii. Capsules (cephalosporin), oral dry powder suspension (cephalosporin) and dry powder injectable (cephalosporin) sections.

833.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Qadir Pharmaceuticals Veerum Fateh Garh Sahuwala Road, Sialkot.**
	Name, address of Manufacturing site.	M/s Qadir Pharmaceuticals Veerum Fateh Garh Sahuwala Road, Sialkot.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML granted w.e.f. 13-09-2021.
	Evidence of approval of manufacturing facility	Tablet, capsule, and oral liquid (general), liquid injectable - vial & ampoule (general), capsules (cephalosporin), oral dry powder suspension (cephalosporin) and dry powder injectable (cephalosporin) sections approved vide letter No. F.1-5/2017-Lic dated 17th September, 2021.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3130 dated 02 FEB 2023
	Details of fee submitted	PKR 30,000/- Dated 14-12-2022

		(Challan / Receipt # 98850219)
	The proposed proprietary name / brand name	**Bezin 0.4mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Capsule contains: Sustained released pellets of Tamsulosin HCl equivalent to Tamsulosin … 0.4mg (USP Specifications)
	Pharmacotherapeutic Group of (API)	Drugs used in benign prostatic hypertrophy, Alpha-adrenoreceptor antagonists.
	Pharmaceutical form of applied drug	Capsule
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	2 x 10's, 1x10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Omsula 0.4 mg prolonged-release capsule of M/s Gedeon Richter Plc. Gyömrői út 19-21. 1103 Budapest, Hungary (MHRA Approved).
	For generic drugs (me-too status)	Tamsolin 0.4mg Capsule (Reg. No. 50392) of M/s Getz Pharma Pvt. Ltd. Karachi.
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals, Plot No. 22 & 23, Industrial Triangle, Kahuta Road, Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control,

		process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against Tamsolin 0.4mg Capsule of M/s Getz Pharma by performing quality tests (Identification, Assay, Dissolution, and Uniformity of dosage form). Firm has submitted CDP results of their product against Tamsolin 0.4mg Capsule of M/s Getz Pharma in pH 1.2 and pH 6.8.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, precision and repeatability for drug substance as well as drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals, Plot No. 22 & 23, Industrial Triangle, Kahuta Road, Islamabad.		
API Lot No.	TMS363		
Description of Pack (Container closure system)	Alu-Alu Blister packed in unit carton 1x10's and 2x10's.		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 Months Accelerated: 6 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	840 Capsules	840 Capsules	840 Capsules
Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	02/05/2022	02/05/2022	02/05/2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP Certificate No. F.3-26/2019-Addl. Dir. (QA&LT-1)-56 dated 22nd August, 2022 issued based on inspection conducted on 14-06-2022 has been submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not Submitted.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software	**Firm has not submitted certificate of 21**

	21CFR & audit trail reports on product testing	**CFR compliance for the HPLC system along with audit trail report for product testing.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The following deficiencies / shortcomings were communicated to the firm and their response was received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	Label claim has been mentioned as "Sustained released pellets of Tamsulosin HCl equivalent to Tamsulosin HCl 0.4mg". Please clarify/correct the same.	The firm submitted that the label claim for Bezin 0.4mg is as "sustained release pellets of Tamsulosin HCl equivalent to Tamsulosin 0.4mg" in dossier stating that there was a writing mistake.
ii.	Please confirm the Batch Size of Trial Batches as the same have been mentioned as 330 Capsules each & 840 Capsules each on separate instances.	The firm submitted that the batch size for trial is 840 capsules each, stating 330 was a typographic error.
iii.	Please provide documents for the procurement of API. Also confirm API Lot No. TMS363 or TM5363.	The firm submitted copy of Invoice for procurement of API Lot No. TMS363.
iv.	Please provide certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.	Certificate of 21 CFR compliance for the HPLC system was submitted however audit trail report for product testing was not provided.
v.	Please provide CDP Results for mentioned Time points.	Submitted.
vi.	1.3.7 Signatures of Authorized Persons are missing in provided document as required in this section of CTD application.	Submitted.
vii.	Please provide evidence along with Batch details of Reference pack used for Pharmaceutical Equivalence and CDP.	Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

834.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Qadir Pharmaceuticals Veerum Fateh Garh Sahuwala Road, Sialkot.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML No. 000325 w.e.f. 25-10-2015 and subsequent renewal application dated 11 AUG 2020 has been submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not Submitted.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	**Firm has not submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers for applied product.**

Remarks of Evaluator:

The following deficiencies / shortcomings were communicated to the firm and their response was received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	Please provide certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.	Certificate of 21 CFR compliance for the HPLC system was submitted however audit trail report for product testing was not submitted.
ii.	Please provide documents for the procurement of API.	**The firm has submitted copy of Invoice No. 646 dated 24/09/2022 from M/s Pharmagen Lahore for API Lot.**

		00510011-01/026/2022. However the Trial Batches have been manufactured and placed on Stability in 05/2022. Justification is required.
iii.	Please provide record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers for applied product.	Submitted.
iv.	Please provide approval of API and GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Submitted.
v.	Real Time Stability Study Data of API has been submitted for 12 Months only whereas applicant has mentioned that the same was conducted for 36 Months. Please clarify.	Submitted.
vi.	Please provide evidence along with Batch details of Reference pack used for Pharmaceutical Equivalence and CDP.	Submitted.

Decision: Registration Board deferred the case for justification of following observation: "The firm has submitted copy of Invoice No. 646 dated 24/09/2022 from M/s Pharmagen Lahore for API Lot. 00510011-01/026/2022. However the Trial Batches have been manufactured and placed on Stability in 05/2022."

	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against Calpol 6 Plus 250mg/5ml Suspension of M/s GlaxoSmithKline Pakistan Limited by performing quality tests (Identification, Assay, and filled volume).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, precision and repeatability for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	M/s Pharmagen Limited 34- Km, Ferozepur Road, Lahore.
API Lot No.	00510921/335/2022
Description of Pack (Container closure system)	PET bottle amber colour in unit carton 1x1's.
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH

	Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 Months Accelerated: 6 Months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	LS004	LS005	LS006
Batch Size	55 Bottles	55 Bottles	55 Bottles
Manufacturing Date	Dec-2022	Dec-2022	Dec-2022
Date of Initiation	23-12-2022	26-12-2022	26-12-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML No. 000325 w.e.f. 25-10-2015 and subsequent renewal application dated 11 AUG 2020 has been submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Not Submitted.**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Firm has not submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The following deficiencies / shortcomings were communicated to the firm and their response was received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	Please confirm the name of applied Product as "Qadmol 250mg/5ml Suspension or Qadmol Forte 250mg/5ml Suspension" as both names have been mentioned in your application on separate instances.	The firm have submitted that the brand name for their product is Qadmol Forte 250mg/5ml. Further stating that forte is missing in some places due to Typographic error.
ii.	Please provide 06th Month Real Time Point Stability Study Testing Data along with its supporting documents.	Submitted.
iii.	Please provide certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.	Certificate of 21 CFR compliance for the HPLC system was submitted however audit trail report for product testing was not submitted.
iv.	Please provide documents for the procurement of API.	**The firm has submitted copy of Invoice No. CP22-11024 dated 08-Dec-2022 from M/s Citi Pharma Lahore for API Lot.**

		PGS22-095. **However, the Substance part in CTD dossier has been submitted of API Lot. 00510921/335/2022 of M/s Pharmagen Lahore. Justification is required.**
v.	Please provide legible copy of approval of API and GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**The firm has submitted copy of GMP Certificate of M/s Citi Pharma Lahore.** **However, the Substance part in CTD dossier has been submitted of M/s Pharmagen Lahore. Justification is required.**
vi.	Submitted Undertakings / commitments are without signatures.	Submitted.
vii.	Please justify with supporting evidence whether the quantity of 55 Bottles is sufficient enough for complete testing of Accelerated as well Real Time Stability Study Testing throughout the proposed Shelf Life of product as committed.	**Justification is required along with quantities required for testing throughout the proposed shelf life.**
viii.	Please provide evidence along with Batch details of Reference pack used for Pharmaceutical Equivalence	Submitted.

Decision: Registration Board deferred the case for justification of following observations:

- **The firm has submitted copy of Invoice No. CP22-11024 dated 08-Dec-2022 from M/s Citi Pharma Lahore for API Lot. PGS22-095. However, the Substance part in CTD dossier has been submitted of API Lot. 00510921/335/2022 of M/s Pharmagen Lahore.**
- **The firm has submitted copy of GMP Certificate of M/s Citi Pharma Lahore. However, the Substance part in CTD dossier has been submitted of M/s Pharmagen Lahore.**
- **Batch size of stability batches shall be justified against the number of units required to complete stability studies.**

Case 03: M/s Fortune Pharmaceuticals, Plot # K/201, SITE, Super Highway Phase-II, Karachi was granted New DML (No. 000924) w.e.f. 22-02-2021 with following sections: -

i. Capsule (General)
ii. Sachet Powder (General)
iii. Liquid Injection vials (General)
iv. Sterile Liquid Injection Ampoule SVP(General)
v. Tablet (General)
vi. Liquid Syrup (General)
vii. Cream / Ointment (General)

841.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Fortune Pharmaceuticals, Plot # K/201, SITE, Super Highway Phase-II, Karachi.**
	Name, address of Manufacturing site.	M/s Fortune Pharmaceuticals, Plot # K/201, SITE, Super Highway Phase-II, Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

	GMP status of the firm	New DML (No. 000924) granted w.e.f. 22-02-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter No. F.2-3/2016-Lic dated 14th June, 2021 for grant of DML specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 15013 dated 14 JUN 2023
	Details of fee submitted	PKR 30,000/- dated 08-06-2023 (Fee Challan / Receipt # 89982021416).
	The proposed proprietary name / brand name	**MOXINE 400mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film Coated Tablet contains: Moxifloxacin as Hydrochloride…… 400mg (BP Specifications)
	Pharmacotherapeutic Group of (API)	Fluoroquinolone Antibiotic
	Pharmaceutical form of applied drug	Oral Film Coated Tablet
	Reference to Finished product specifications	BP
	Proposed Pack size	5's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Avelox® 400mg Tablet by M/s Bayer Pharms, USA (USFDA approved).
	For generic drugs (me-too status)	Moxiget 400mg Tablet (Reg. No. 047117) by M/s Getz Pharma, Karachi.
	Name and address of API manufacturer.	M/s Shanku's Pharmaceuticals, Plot No. 9, 10, 11 Milan Industrial Estate, Vadsar Road, At Santej,Kajol- 382 721, District Gandhinagar Gujrat India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.

	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 Months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 Months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Avelox 400mg Tablet by Bayer Corporation. Firm has submitted CDP results of their product against the innovator's product Avelox 400mg Tablet in 3 dissolution media.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Shanku's Pharmaceuticals, Plot No. 9, 10, 11 Milan Industrial Estate, Vadsar Road, At Santej, Kajol- 382 721, District Gandhinagar Gujrat India.

No. of Batches	02		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. 2072077) dated 01-07-2020 issued by Commissioner Foods & Drug Control Administration, India. The certificate specifies

		that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Commercial Invoice No. EXP/151 (20-21) dated 22-08-2021 cleared on 18-11-2021 by AD (I&E) DRAP, Karachi, specifying 04Kgs of Moxifloxacin Hydrochloride.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	**Not Submitted. The Firm have mentioned that their HPLC system is not 21 CFR compliant.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The following deficiencies / shortcomings have been communicated to the firm: -

i. Please confirm the name of your Firm (along with its supporting evidence) as the same has been mentioned as "M/s Fortune Pharmaceuticals" as well as "M/s Fortune Pharma (Pvt.) Ltd." in your application dossier on separate instances.
ii. Please provide Commitments / Undertakings as required vide Sections **1.5.15 – 1.5.20** of CTD application.
iii. Please provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3, as required vide section '**2.3.R.1.1 Executed Production Documents'.**
iv. Please provide evidence of Reference / Innovator's pack used for Pharmaceutical Equivalence and CDP.
v. Please provide calculations summary regarding utilization of 4Kgs of Moxifloxacin Hydrochloride (including but not limited to Production of Stability Batches / QC Testing / RND / Process loss etc.).
vi. None of the supporting respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. have been attested by the applicant. Please justify.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The following deficiencies / shortcomings have been communicated to the firm: -

i. Please confirm the name of your Firm (along with its supporting evidence) as the same has been mentioned as "M/s Fortune Pharmaceuticals" as well as "M/s Fortune Pharma (Pvt.) Ltd." in your application dossier on separate instances.
ii. Please provide Commitments / Undertakings as required vide Sections **1.5.15 – 1.5.20** of CTD application.
iii. Please provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3, as required vide section '**2.3.R.1.1 Executed Production Documents'.** The submitted BMRs are not of relevant Batches (FTX-001, FTX-002 and FTX-003).
iv. Please provide evidence of Reference / Innovator's pack used for Pharmaceutical Equivalence and CDP.
v. Please provide approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
vi. Please provide documents for the procurement of API with approval from DRAP.
vii. In Section 2.3.S.4.4 (a), it has been mentioned that *"COA of the relevant batch of both API Manufacturer and Biogen Pharmaceutical is provided in Module 3 under section 3.2.S.4.4"*. Please clarify.
viii. In Section 2.3.S.7.3 it has been mentioned that the drug substance is stable for 18 Months when stored in recommended conditions, however in Section 2.3.S.7.1 its Expiry Period has been mentioned as 1 Year. Please clarify.
ix. Please provide scientific justification / supporting evidence of adopting '100℃ for 30 minutes' conditions for autoclaving as mentioned in Section 2.3. P.3.3.
x. In submitted Batch Manufacturing Records, STEP –II suggests addition of Benzyl Alcohol. Please justify the rationale for using the same as no excipients other than WFI has been mentioned throughout the application.
xi. In Section 3.2.S.7, Long Term Stability Study Data submitted for Batch 100301 has been conducted on 25°C ± 2°C / 60% ± 5% RH, which is not as per Zone IV and also different from remaining other two batches. Please clarify.
xii. In Section 3.2 P.8.3, against point 5, it has been mentioned that *"Not applicable since no HPLC method is involved in this analysis".* Please clarify.
xiii. None of the supporting respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. have been attested by the applicant. Please justify.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

Agenda Item No. 02: Priority applications on the basis of Export Facilitation of Locally Manufactured Drugs:

The following dossiers have been evaluated reference to the letter No. F.1-6/2019-PR-I (EFD) dated 12th January 2023 from Assistant Director (PR-I/EFD) wherein it has been stated that DRAP Authority in its 133rd meeting held on 13th April 2022, decided to grant registration on priority basis

to the pharmaceutical i.e. one molecule for each 100,000 USD worth of export of medicines (to a maximum of 15 such molecules) during a fiscal year. In compliance to the aforementioned decision of the authority, the following firm (M/s Bio-Labs (Pvt.) Ltd.) have achieved the benchmark of export of more than 100,000 USD during the fiscal year 2021 - 2022 and have submitted their applications for priority consideration in lieu of export facilitation for Registration Board please.

843.	**Name, address of Applicant / Marketing Authorization Holder**	M/s Bio-Labs (Pvt.) Ltd. Plot No 145 Industrial Triangle, Kahuta road, Islamabad.

Batch Size	250 Vials	250 Vials	250 Vials
Manufacturing Date	05-2021	05-2021	05-2021
Date of Initiation	31-5-2021	31-5-2021	31-05-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP Certificate No. HB20170363 issued by China Food and Drug Administration valid till 28/8/2022 has been submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Clearance Certificate No. 1201 dated 12 April 2021 issued by Assistant Director (I&E) DRAP Islamabad for import of 05Kgs of Ibuprofen (against Invoice No. **B21017106** dated **23-02-2021).**
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

- The Firm have submitted that they have written mistakenly 200mg/100ml in deposit slip number 302856939 whereas the applied strength is 200mg/50ml.

The following deficiencies / shortcomings were communicated to the firm and their response was received as follows: -

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	It has been claimed in your application that the applied strength is not registered locally whereas the fee has been paid for Generic Drug Product application (i.e. PKR 30,000/-) instead of that of New Drug Product (i.e. PKR 75,000/-). Please clarify.	The firm has submitted that they'll submit the requisite differential fee.
ii.	Pharmaceutical equivalence has been performed against 400mg/100ml Infusion instead of 200mg/50ml Infusion. Please justify.	The firm has submitted that Pharmaceutical equivalence was performed with 400mg/100ml Infusion due to unavailability of Innovator/ Reference product. Furthermore, in Pharmaceutical equivalence, appearance, identification, pH, assay and particulate matter of Test and Reference products were compared having same specifications.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

● **Furthermore, the firm shall submit requisite differential fee before issuance of Registration letter.**		
844.	**Name, address of Applicant / Marketing Authorization Holder**	M/s Bio-Labs (Pvt) Ltd. Plot No 145 Industrial Triangle, Kahuta road, Islamabad.
	Name, address of Manufacturing site.	M/s Bio-Labs (Pvt) Ltd. Plot No 145 Industrial Triangle, Kahuta road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm have submitted copy of GMP Certificate No. F3-19/2019-Addl. Dir. (QA&LT-I) dated 28th Feb 2022 based on inspection conducted on 03-08-2021.
	Evidence of approval of manufacturing facility	The Firm have submitted copy of Grant of Additional Sections vide No. F.1-12/89-Lic (Vol-II) dated 23rd July 2012.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 10400 dated 23 APR 2022.
	Details of fee submitted	PKR 30,000/- Dated 03-02-2022 (Challan / Receipt # 4478866626)
	The proposed proprietary name / brand name	**BIOFEN 400mg/100ml Infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml vial contains: Ibuprofen … 400mg
	Pharmacotherapeutic Group of (API)	Non-steroidal anti-inflammatory drug (NSAID)
	Pharmaceutical form of applied drug	Clear colourless sterile solution
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	MHRA Approved of M/s B. Braun B. Braun Melsungen AG Carl-Braun-Straße 1 34212 Melsungen Germany.
	For generic drugs (me-too status)	Ubrof (Reg. No. 097180) of M/s Sami Pharma.
	Name and address of API manufacturer.	Hubei Bio Cause Heilen Pharmaceuticals Co., Ltd. 122 Yangwan Road Jingmen City, Hubei Province 448000, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis

		and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 06 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 60 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has performed pharmaceutical equivalence against the product **Inbufin Infusion 400mg/100ml** of M/s Searle IV Solutions (Pvt.) Ltd. Lahore.
	Analytical method validation/verification of product	Method validation studies have been submitted including linearity, range, accuracy, precision, specificity.

Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. Batches: DLP281, DLP283 and DLP284.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures,

		validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Dexilant 30mg Delayed Release Capsules (Batch. No. 11954694) manufactured by Takeda Pharms USA. Firm has submitted CDP results of their product against the innovator's product Dexilant 30mg Delayed Release Capsules in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance and analytical method validation study reports for drug product.

STABILITY STUDY DATA

Manufacturer of API	M/s Vision Pharmaceuticals Plot No. 22-23, Industrial triangle, Kahuta Road, Islamabad Pakistan.		
API Lot No.	DLP579		
Description of Pack (Container closure system)	Alu-Alu foil blister		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	DEX-30T008	DEX-30T009	DEX-30T010
Batch Size	2,000 Capsules	2,000 Capsules	2,000 Capsules
Manufacturing Date	04 / 2021	04 / 2021	04 / 2021
Date of Initiation	21-04-2021	24-04-2021	27-04-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	**Not provided. Old GMP Inspection report enclosed instead.**
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. F.3-26/2019-Addl. Dir. (QA&LT-I) dated 25th Feb, 2019 issued based on inspection conducted on 11th February, 2019 (valid till 10th February 2022). The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Local purchase. Firm has submitted copy of Invoice No. 701219 dated 10/9/2020 from M/s Vision Pharmaceuticals (Pvt.) Limited, Islamabad specifying 3.00Kg of Dexlansoprazole DDR Pellets 22.5%.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail report for product testing. **Certificate of 21 CFR compliance for the HPLC system is not submitted.**
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

The deficiencies / shortcomings were communicated to the firm and their response is received as follows:

Sr. No.	Deficiencies / shortcomings communicated	Response of the Firm
i.	GMP Certificate was issued based on Inspection conducted on **09-03-2020** which is more than 03 years old. Please provide latest GMP Inspection Report (not older than 03 years).	The firm have submitted copy of GMP certificate No. F.3-49/2020-Addl. Dir. (QA&LT-I)-24 dated 24th April 2022 based on inspection conducted on 22-02-2022.
ii.	The submitted GMP Certificate of API Manufacturer was issued based on Inspection conducted on 11th February 2019 and was valid until 10th February 2022. Please provide a valid GMP Certificate of API Manufacturer.	The firm have submitted copy of GMP Certificate of API Manufacturer No. F.3-26/2019-Addl. Dir. (QA&LT-I)-56 dated 22nd August 2022 based on inspection conducted on 14-06-2022.
iii.	Please provide Reference of previous approval of applications with stability study data of the firm (if any).	The firm have referred to their CTD (Form 5F) applications approved in 321st Meeting of Registration Board (20th – 22nd September, 2022).
iv.	Please provide Certificate of 21 CFR compliance for the HPLC system.	The Firm have claimed that they have used EZ Chrome Elite CDS Version 3.3.2 HPLC Software which is 21CFR11 Compliant.
v.	Please provide evidence of Innovator's pack i.e. Dexilant 30mg Delayed Release Capsules used for Pharmaceutical Equivalence and CDP.	The firm have submitted copy of packshot of Dexilant 30mg Capsules: Lot/ Batch # 119544694 SN 30329916841977 GTIN 00364764171308 Distributed by: Takeda Pharmaceuticals America Inc. Deerfield. IL 60015.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

849.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Caraway Pharmaceuticals, Plot No. 12, St. No. N-3, National Industrial Zone (RCCI) Rawat.**

	The proposed proprietary name / brand name	**DAXID 60mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Dexlansoprazole dual delayed release (DDR) pellets equivalent to Dexlansoprazole … 60mg
	Pharmacotherapeutic Group of (API)	Proton Pump Inhibitor
	Pharmaceutical form of applied drug	White to greyish white pellets enclosed in hard gelatin capsule shells.
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	3 x 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Dexilant 60mg Delayed Release Capsules (USFDA Approved)
	For generic drugs (me-too status)	DDR-60mg DR Capusle of M/s Genome Pharma (Reg. No. 088379)
	Name and address of API manufacturer.	M/s Vision Pharmaceuticals Plot No. 22-23, Industrial triangle, Kahuta Road, Islamabad Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container

		closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. Batches: DLP281, DLP283 and DLP284.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Dexilant 60mg Delayed Release Capsules (Batch. No. Not Provided) manufactured by Takeda Pharms USA. Firm has submitted CDP results of their product against the innovator's product Dexilant 60mg Delayed Release Capsules in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance and analytical method validation study reports for drug product.

	Me-too status	Not confirmed
	GMP status	Panel inspection conducted on 15-06-2021 whereby renewal of DML and grant of one additional section was recommended.
	Remarks of the Evaluator[xxiii].	• Cyproterone is a steroidal modulator of sex hormone. Application may be referred to EWG for veterinary drugs for clarity regrading classification of Cyproterone; whether it is a steroid only or a steroidal hormone, or otherwise.

		• Accordingly, evidence of required manufacturing facility is required. Firm has Liquid Injectable section (General) (Veterinary) but does not have section for manufacturing steroidal and/or hormonal liquid injectable. • Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm is required or in case of unavailability applicant shall apply on Form 5-D. • Latest GMP inspection report conducted within a period of last three years is required.
	Decision: Deferred for review of EWG on veterinary drugs for clarity regarding classification of Cyproterone; whether it is a steroid only or a steroidal hormone, or otherwise, and for submission of the following: • **Evidence of dedicated manufacturing facility for Veterinary Liquid Injectable (steroidal hormone) (small volume parenterals) and its approval thereof from CLB, DRAP (in case the EWG decides that the applied drug is a steroid hormone)** • **Latest GMP inspection report conducted within a period of last three years,** • **Evidence of applied formulation/drug already approved by DRAP (generic / me-too status) along with registration number, brand name and name of firm.** **The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, .**
