Agenda of Evaluator PEC-II

Case no. 01: Contract manufacturering applications applied on Form-5F from a manufacturer whose product development and stability data is already approved on Form 5F, by the Registration Board:

Apixaban

1.	Name, address of Applicant / Marketing Authorization Holder	**M/s ICI Pakistan Limited ICI House, 5 West Wharf Karachi**
	Name, address of Manufacturing site.	M/s Novamed Pharmaceuticals (Pvt.)Ltd ., 28km Ferozepur Road Lahore
	GMP status of the manufacturer	GMP certificate garnted on 31/08/2021.
	Evidence of approval of manufacturing facility	License granted on 08/04/2006 and renewed on 08/04/2021 General tablet section approved and
	Dy. No. and date of submission & Details of fee submitted	Dy.No 7965 dated 25-03-2022 Rs.75,000/- dated 28-02-2022
	The proposed proprietary name / brand name	**Linara 5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film coated Tablet Contains: Apixaban …… 5mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Apixaban (Anticoagulant and direct inhibitor of factor Xa.
	Reference to Finished product specifications	In-House
	Proposed Pack size & Unit price	As per SRO
	The status in reference regulatory authorities	Eliquis Tablet, Company: Bristol Myers Squibb,USA
	For generic drugs (me-too status)	Apixaget tablet by Getz Pharma
	Name and address of API manufacturer.	Changzhou Pharmaceuticals Factory**,** 518 Laodong East Road,Changzhou,Jianngsu Province,China.
	Evaluation by PEC:	
	The applied product to be manufactured by M/s Novamed Pharmaceuticals(Pvt.) Ltd., 28km Ferozepur Road Lahore have already been approved by Registration Board in its 320th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product are as follows:	
	Applicant firm: M/s Novamed Pharmaceuticals(Pvt.)Ltd ., 28km Ferozepur Road Lahore Manufacturer firm: M/s Novamed Pharmaceuticals(Pvt.)Ltd ., 28km Ferozepur Road Lahore Brand Name: Apixo Tablet 5 mg	
	Decision: The Board noted the information and decided to consider the application on its turn as per Que or as per the direction of DRAP Authority, which ever is earlier.	
2.	Name, address of Applicant / Marketing Authorization Holder	**M/s ICI Pakistan Limited ICI House, 5 West Wharf Karachi**
	Name, address of Manufacturing site.	M/s Novamed Pharmaceuticals (Pvt.)Ltd ., 28km Ferozepur Road Lahore

	GMP status of the manufacturer	GMP certificate garnted on 31/08/2021.
	Evidence of approval of manufacturing facility	License granted on 08/04/2006 and renewed on 08/04/2021 General tablet section approved and
	Dy. No. and date of submission & Details of fee submitted	Dy.No 7964 dated 25-03-2022 Rs.75,000/- dated 28-02-2022
	The proposed proprietary name / brand name	**Linara 2.5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film coated Tablet Contains: Apixaban …… 2.5mg
	Pharmaceutical form of applied drug	Film coated tablet
	Pharmacotherapeutic Group of (API)	Apixaban (Anticoagulant and direct inhibitor of factor Xa.
	Reference to Finished product specifications	In-House
	Proposed Pack size & Unit price	As per SRO
	The status in reference regulatory authorities	Eliquis Tablet, Company: Bristol Myers Squibb,USA
	For generic drugs (me-too status)	Apixaget tablet by Getz Pharma
	Name and address of API manufacturer.	Changzhou Pharmaceuticals Factory**,** 518 Laodong East Road,Changzhou,Jianngsu Province,China.

	The proposed proprietary name / brand name	**Cuxone 500mg IM Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone (as sodium)……500mg
	Pharmaceutical form of applied drug	Sterilized white to off white crystalline dry powder contained in a glass vial with sterilized rubber stopper & aluminium flip seal on it.
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP specs
	Proposed Pack size & Unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone powder for solution for injection (MHRA Approved)
	For generic drugs (me-too status)	Oxidil Injection of M/s Sami
	Name and address of API manufacturer.	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District Zhuhai Guangdong P.R China.
	Evaluation by PEC:	
	The applied product to be manufactured by M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore have already been approved by Registration Board in its 324th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product are as follows:	

Applicant firm	M/s Genetics Pharmaceuticals (Pvt) Ltd. 539-A, Sunder Industrial Estate, Lahore.
Manufacturer firm	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
Brand Name	Genxone 500mg IM injection

	Decision: The Board noted the information and decided to consider the application on its turn as per Que or as per the direction of DRAP Authority, which ever is earlier.	
44.	Name, address of Applicant / Marketing Authorization Holder	**M/s Health Care Pharmaceuticals.** **40-Km Lahore Road, Multan**
	Name, address of Manufacturing site.	M/s Cunningham Pharmaceuticals (Pvt) Ltd. Plot No. 81, Sunder Industrial Estate, Lahore.
	GMP status of the manufacturer	Firm has submitted copy of GMP certificate of M/s Cunningham Pharmaceuticals dated 19-04-2019 based on the inspection dated 01-04-2019. The certificate was valid till 01-04-2022. The GMP certificate specifies dry powder injection (cephalosporin) section.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of issuance of Drug Manufacturing License to M/s Cunningham Pharmaceuticals dated 13-06-2016. The letter specifies dry powder injection (cephalosporin) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission & Details of fee submitted	Dy.No 17743 dated 14-07-2023 Rs.75,000/- dated 14-04-2023

	The proposed proprietary name / brand name	**Cuxone 250mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone (as sodium)……250mg
	Pharmaceutical form of applied drug	Sterilized white to off white crystalline dry powder contained in a glass vial with sterilized rubber stopper & aluminium flip seal on it.
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP specs

	The applied product to be manufactured by M/s Seraph Pharmaceuticals Islamabad have already been approved by Registration Board in its 316th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product are as follows:	
	Applicant firm	M/s Amson Vaccines and Pharma Pvt Ltd. Plot No. 154, Industrial Triangle Kahuta Road Islamabad.

	Manufacturer firm	M/s Seraph Pharmaceuticals Plot No. 210, Industrial Triangle, Kahuta Road, Islamabad
	Brand Name	Cesod 500mg IV injection
	Decision: The Board noted the information and decided to consider the application on its turn as per Que or as per the direction of DRAP Authority, which ever is earlier.	
55.	Name, address of Applicant / Marketing Authorization Holder	**M/s Linta Pharmaceuticals Pvt Ltd.** **Plot No. 03, Street No S-5, National Industrial Zone, Rawat, Islamabad**
	Name, address of Manufacturing site.	M/s Seraph Pharmaceuticals. Plot No. 210, Industrial Triangle, Kahuta Road, Islamabad
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the manufacturer	**Seraph Pharmaceuticals:** GMP certificate issued on the basis of inspection conducted on 11/07/2019.
	Evidence of approval of manufacturing facility	Firm (M/s Seraph Pharmaceuticals) has submitted copy of Issuance of DML letter dated 12-06-2017 specifying Dry Vial Cephalosporin section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 7486 dated 15-03-2023
	Details of fee submitted	Rs.75,000/- dated 08-03-2023
	The proposed proprietary name / brand name	**CT-X 500mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone (as sodium)……500mg
	Pharmaceutical form of applied drug	Sterilized white to off white crystalline dry powder contained in a glass vial with sterilized rubber stopper & aluminium flip seal on it.
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic
	Reference to Finished product specifications	USP specs
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Ceftriaxone 500mg powder for solution for injection (MHRA Approved)
	For generic drugs (me-too status)	Droncef injection 500mg by Seraph Pharmaceuticals
	Name and address of API manufacturer.	Sinopharm Weiqida Pharmaceutical Co. Ltd. First Medical zone, Economic & technological development zone, Datong Shanxi China.

	The applied product to be manufactured by M/s Biogen Life Scie nces8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan have already been approved by Registration Board in its 297th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product are as follows:	

Applicant firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Manufacturer firm	M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi
Brand Name	Listim 1MIU Injection

	Decision: The Board noted the information and decided to consider the application on its turn as per Que or as per the direction of DRAP Authority, which ever is earlier.	
77.	Name, address of Applicant / Marketing Authorization Holder	**M/s Seraph Pharmaceuticals.** **Plot No. 210, Industrial Triangle, Kahuta Road, Islamabad**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences. 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan
	GMP status of the manufacturer	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Dry Powder Injection section (General).
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission & Details of fee submitted	Dy.No 22081 dated 03-08-2022 Rs.75,000/- dated 11-05-2022
	The proposed proprietary name / brand name	**Coliser 1 MIU IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial Contains: Colistimethate sodium……1 MIU
	Pharmaceutical form of applied drug	Sterile white to yellowish fine powder filled in transparent glass vials.
	Pharmacotherapeutic Group of (API)	Antibiotic

Brand Name	**BIOCORT 500 mg Injection**

Note: The title of the manufacturer was changed to M/s Biogen Life Sciences 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan

	Decision: The Board noted the information and decided to consider the application on its turn as per Que or as per the direction of DRAP Authority, which ever is earlier.	
130.	Name, address of Applicant / Marketing Authorization Holder	**M/s ICU Pharmaceuticals.** **Khewat 13/13, Khatooni No. 57/66, Mouza Mirpur Kehna, Tehsil Sharakpur, District Sheikhupura**
	Name, address of Manufacturing site.	M/s Biogen Life Sciences. 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the manufacturer	Firm has been granted new license (DML No. 000911) by way of formulation dated 13-02-2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of section approval letter dated 14-02-2020 which specifies Hydrocortisone injection section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 37075 dated 20-12-2022
	Details of fee submitted	Rs.75,000/- dated 02-09-2022
	The proposed proprietary name / brand name	**Icurt 100mg injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Hydrocortisone Sodium Succinate equivalent to hydrocortisone…… 100 mg
	Pharmaceutical form of applied drug	White to off White color, Lyophilized, Sterile Powder filled in Glass Vial as 1's Injection
	Pharmacotherapeutic Group of (API)	Corticosteroid, Glucocorticosteroid
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	USFDA Approved
	For generic drugs (me-too status)	Cortizone injection by Global pharma
	Name and address of API manufacturer.	Symbiotec Pharmalab Private Limited Plot no.5, 6, 7 & 8, Special Economic Zone, Phase-II, Pharma Zone, Pithampur, Dist. Dhar-454774, (M.P.), India
	Evaluation by PEC:	

	The applied product to be manufactured by M/s Biogen Life Sciences 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan has already been approved by Registration Board in its 307th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product are as follows: Applicant firm: M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi Manufacturer firm: M/s Biogen Pharmaceuticals 8Km, Chakbeli Road Rawat, Rawalpindi Brand Name: **BIOCORT 100 mg Injection** **Note: The title of the manufacturer was changed to M/s Biogen Life Sciences 8-Km, Chakbeli Road, Rawat, Rawalpindi, Pakistan**	
	Decision: The Board noted the information and decided to consider the application on its turn as per Que or as per the direction of DRAP Authority, which ever is earlier.

	Status of the applicant	☐ Manufacturer ☐ Importer

		☒ Is involved in none of the above (contract giver)
	GMP status of the manufacturer	Firm has submitted copy of GMP certificate dated 04-01-2022 issued on the basis of inspection dated 03-01-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of Grant of additional section / amendment under DML No 000417 of M/s Global Pharmaceuticals Islamabad dated 18-12-2017 specifying reallocation of dry powder injection (carbapenem) section in place of withdrawn Biotech section (BSF)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 13220 dated 30-05-2022
	Details of fee submitted	Rs.75,000/- dated 12-05-2022
	The proposed proprietary name / brand name	**Meropen 500mg IV Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Meropenem (as trihydrate)……500mg (blended with sodium carbonate)
	Pharmaceutical form of applied drug	White or almost white, hygroscopic, crystalline, powder filled in clear glass vials
	Pharmacotherapeutic Group of (API)	Carbapenem antibiotic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Merrem Injection **(USFDA** Approved)
	For generic drugs (me-too status)	Merrem Injection of Global Pharmaceuticals
	Name and address of API manufacturer.	M/s CSPC Zhongnuo Pharmaceutical (Shijiazhuang) Co. Ltd. No. 88, Yangzi Road, Shijiazhuang Economic and Technological Development Zone, Hebei Province PR. China.
	Evaluation by PEC:	
	The applied product to be manufactured by M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad has already been approved by Registration Board in its 320th meeting based on the data of same batches of drug product as submitted in the instant case. The details of the already approved product are as follows:	

Applicant firm	M/s Swiss Pharmaceuticals (Pvt) Ltd. A/159, SITE, Super Highway Karachi
Manufacturer firm	M/s Global Pharmaceuticals (Pvt) Ltd. Plot No. 204-205, Industrial Triangle Kahuta Road Islamabad.
Brand Name	**MEPEN 500 mg Injection IV**

	Decision: The Board noted the information and decided to consider the application on its turn as per Que or as per the direction of DRAP Authority, which ever is earlier.	
186.	Name, address of Applicant / Marketing	**M/s Martin Dow Marker Limited.**

	Authorization Holder	**7, Jail Road, Quetta, Pakistan**

	GMP status of the firm	Firm has submitted copy of GMP certificate dated 06-04-2023 based on inspection conducted on 28-03-2023.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 24-03-2015 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 13182 dated 29-05-2023
	Details of fee submitted	PKR 30,000/- Dated 11-05-2023
	The proposed proprietary name / brand name	**Sitagmin (50/1000) film coated tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Film coated tablet contains: Sitagliptin (as Phosphate Monohydrate) …….. 50 mg Metformin HCl ……1000 mg
	Pharmacotherapeutic Group of (API)	Anti-diabetic
	Pharmaceutical form of applied drug	Light blue color oblong film coated tablet
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	2 x 7's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Janumet film coated tablet (50 /1000 mg) (USFDA Approved)
	For generic drugs (me-too status)	**Treviamet Tab 50mg/1000mg** of M/s **M/S Getz Pharma**, Karachi (Reg.No. 055443)
	Name and address of API manufacturer.	**Sitagliptin Phosphate Monohydrate** Anhui Haikang Pharmaceutical Co., Ltd. No21, Huancheng West Road, Daguan District, Anqing, Anhui 24600, China Metformin Hydrochloride Active Fine Chemicals Limited West Muktarpur, Munshigonj, Bangaladesh
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls,

		specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Janumet film coated tablet (50 /1000 mg) manufactured by MSD, Firm has submitted CDP results of their product against the innovator's product Janumet film coated tablet (50 /1000 mg) in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. DA/6-151/2011/8568) dated 05-05-2021 issued by Ministry of health & family welfare, Directorate general of Drug Administration Oushad Bhaban, Mohakhali Dakha-1212, Bangladesh . The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice on 25-05-2021 specifying 5.0Kg of Metformin HCl. And invoice no 20220722 dated 25-06-2022 of 0.5 kg Sitagliptin Phosphate Monohydrate
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section#	Observations	Firm's response
1.6.5	Submit valid GMP/DML certificate of the manufacturer of Metformin HCl	Firm has submitted copy of DML no. 275 valid till 04-10-2023 issued by DGDA Bangladesh.

Decision: Registration Board approved the applications of "Sitagmin (50/500)" & "Sitagmin (50/1000)" tablet.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

3.2.S.4.3	Submit analytical method verification studies for drug substance performed by M/s May & Baker.	Submitted.
3.2.S.4.4	Dissolution test has not been performed in drug substance analysis by M/s may & Baker.	Firm has submitted drug substance analysis COA from M/s May & Baker, wherein test for Dissolution has been included.
3.2.P.5.1	Justification shall be submitted for not including test of content uniformity in drug product specifications.	Firm had referred to the performance of test of weight variation for establishing uniformity of dosage units. Now firm has submitted revised drug product specifications including test of content uniformity.
3.2.P.5.3	Submit analytical method verification studies of drug product performed by M/s May & Baker.	Submitted.
3.2.P.8	Submit compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted.
2.3.R.1	Submit clarification regarding the dispensed weight per unit capsule.	Firm has submitted justification against the potency of drug substance determined during drug substance analysis.

Decision: Registration Board approved the applications of Llenzer 30mg & 60mg capsule

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

b. New/Additional section(s)

CLB in its 288th meeting held on 18-10-2022 has approved grant of additional section of "Liquid Injectable Ampoule (General) section" for M/s Seraph Pharmaceutical Plot # 210, Industrial Triangle Kahuta Road Islamabad.

320.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Seraph Pharmaceutical Plot # 210, Industrial Triangle Kahuta Road Islamabad.**
	Name, address of Manufacturing site.	M/s Seraph Pharmaceutical Plot # 210, Industrial Triangle Kahuta Road Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 11-11-2022 based on inspection conducted on 11-10-2022.

	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 08-11-2022 specifying Liquid Injectable Ampoule (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 10580 dated 26-04-2023
	Details of fee submitted	PKR 30,000/- Dated 26-04-2023
	The proposed proprietary name / brand name	**Seraph WFI 10ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each ampoule contains: Water for injection ……. 10ml
	Pharmacotherapeutic Group of (API)	Solvent
	Pharmaceutical form of applied drug	Clear, Colorless Liquid filled in glass Ampoules.
	Reference to Finished product specifications	BP
	Proposed Pack size	10ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Water for injection , MHRA UK
	For generic drugs (me-too status)	WFI 10ml Surge Laboratories
	Name and address of API manufacturer.	Seraph Pharmaceutical
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures, batch analysis and justification of specification, reference standard, container closure system.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted that water for injection in bulk is stored in SS container and is filled in ampoules within 24 hours therefore stability studies are not required to be carried out in this container closure system.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification

		of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical equivalence against WFI of M/s Surge Laboratories.
	Analytical method validation/verification of product	Not submitted

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Our facility has been inspected by panel of inspectors for verification of stability study data for following products. a) Dexpro (Dexlansoprazole) 30 and 60mg Capsule approved in 285th meeting of Registration Board. b) Neovel 800mg Tablet approved in 288th meeting of Registration Board. c) Serbica 20mg Capsule approved in 290th meeting of Registration Board.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. F.3-7/2018-Addl.Dir/(QA &LT-1) dated 11-11-2022. The certificate specifies that the firm is operating at satisfactory level of GMP compliance.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not applicable
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section #	Observation	Firm's response
3.2.P.2.2.1	Pharmaceutical equivalence report for the WFI 2 ml fill volume shall be submitted.	Submitted
3.2.P.8.3	Stability studies of 6th month time point shall be submitted.	Firm has submitted stability record for 6th month time point.

Decision: Registration Board approved the applications of "Seraph WFI 10ml ", "Seraph WFI 2ml ", & "Seraph WFI 5ml".

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 6 months. The real time stability data is conducted at 5°C ± 3°C / 60% ± 5% RH for 36 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted Pharmaceutical equivalence studies against the Xarenel® Injection.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Fermenta Biotech Limited. Village Takoli, P.O. Nagwain, Dist. Mandi-175121, Himachal Pradesh, India		
API Lot No.	CLC0421283		
Description of Pack (Container closure system)	Colecalciferol is filled clear, sterilized Printed Glass ampoule.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 3 months Accelerated: 3 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T001	T002	T003
Batch Size	2000 Injections	2000 Injections	2000 Injections
Manufacturing Date	11-2022	11-2022	11-2022
Date of Initiation	11-2022	11-2022	11-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Our facility has been inspected by panel of inspectors for verification of stability study data for following products.

		a) Dexpro (Dexlansoprazole) 30 and 60mg Capsule approved in 285th meeting of Registration Board. b) Neovel 800mg Tablet approved in 288th meeting of Registration Board. c) Serbica 20mg Capsule approved in 290th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP Certicate No 2062043 dated issued by Food & Drugs Control Administration, Gujarat State, India valid till 17-06-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Clearance certificate no. E-63186525961 dated 11-02-2022 for the import of 1Kg of Cholecalciferol.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing for the stability batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not applicable
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section#	Observations	Firm's response
1.1	Differential fee of Rs. 45,000/- shall be submitted since applied formulation is not previously registered by DRAP.	Firm has submitted Differential fee of Rs. 45,000/-. Vide deposit slip# 765198550034.
3.2.P.1	Justification shall be submitted for proposed excess fill volume per unit ampoule.	Frim has referred to USP general chapter for the provision of excess fill volume.
3.2.P.8.3	Submit stability studies for the 6th month time point.	Submitted
2.3.R.1	Complete batch manufacturing record for the stability batches shall be submitted.	Submitted

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

326.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Seraph Pharmaceutical Plot # 210 Industrial Triangle Kahuta Road, Islamabad.**

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Our facility has been inspected by panel of inspectors for verification of stability study data for following products. a) Dexpro (Dexlansoprazole) 30 and 60mg Capsule approved in 285th meeting of Registration Board. b) Neovel 800mg Tablet approved in 288th meeting of Registration Board. c) Serbica 20mg Capsule approved in 290th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Clearance Certificate No.E-3335386526318 for the import of 2Kg of Ceftazidime+Avibactam.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section#	Observations	Firm's response
3.2.S.4.4	Justification shall be submitted for not performing test for "Pyridine content" by M./s Seraph pharmaceuticals.	Firm has referred to the COA of drug substance manufacturer and stated that they have relied upon the results of "Pyridine content" performed by the Drug substance manufacturer.

3.2.P.2.5	Submit compatibility study with the reconstitution diluent.	Frim has submitted compatibility studies with water for injection.
3.2.P.5.1	Justification shall be submitted for not including test of "Pyridine content" in drug product specifications as recommended by Innovator drug product.	Firm has referred to the COA of drug substance manufacturer and stated that they have relied upon the results of "Pyridine content" performed by the Drug substance manufacturer since applied formulation is formulated as ready to fill powder for injection.
3.2.P.8.3	• Submit stability data of 6th month time point. • Submit valid GMP certificate of drug substance manufacturer issued by relevant regulatory authority.	• Firm has submitted 6th month time point study. • Firm has submitted Copy of GMP certificate (No.SD20190876) issued by CFDA China is submitted by the firm. The certificate is valid till 21-04-2024. • Firm has also submitted copy of DML of the firm (No. Lu 20160006) issued by CFDA China. The license is valid till 03-11-2025.
3.2.R	Justify the dispensed weight per unit vial with reference to the potency of drug substance determined during drug substance analysis.	Firm has referred to the potency of drug substance determined during drug substance analysis on "as is basis" for calculation of weight per unit vial.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

330.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Seraph Pharmaceutical Plot # 210 Industrial Triangle Kahuta Road, Islamabad.**
	Name, address of Manufacturing site.	M/s Seraph Pharmaceutical Plot # 210 Industrial Triangle Kahuta Road, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 11-11-2022, based on inspection conducted on 11-10-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 12-06-2017 specifying Dry vial Cephalosporin section.

	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 10576 dated 26-04-2023
	Details of fee submitted	PKR 30,000/- Dated 26-04-2023
	The proposed proprietary name / brand name	**Ceffosa Injection 600mg IV/IM**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftaroline Fosamil (As L-rginine) …… 600mg
	Pharmacotherapeutic Group of (API)	Third-generation cephalosporins
	Pharmaceutical form of applied drug	White to off white powder filled in glass vial.
	Reference to Finished product specifications	In house
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Teflaro 600mg Injecion, Allergan pharma Ireland, FDA Approved Drug.
	For generic drugs (me-too status)	Zinforo Injection 600mg, Pfizer Pvt Limited. (Reg.# 110515)
	Name and address of API manufacturer.	M/s Qingdao Xinnuo Pharmaceutical Chemical Co., Ltd. 50 meters North Yuanhou Neighborhood Committee Xifuzhen Street Chenyang Area Qingdao Shandong, CHINA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 25°C ± 2°C / 60% ± 5% RH for 9 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process

		and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence studies have been submitted against the Innovator drug product of Zinforo 600mg injection.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Our facility has been inspected by panel of inspectors for verification of stability study data for following products. a) Dexpro (Dexlansoprazole) 30 and 60mg Capsule approved in 285th meeting of Registration Board. b) Neovel 800mg Tablet approved in 288th meeting of Registration Board. c) Serbica 20mg Capsule approved in 290th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted Clearance certificate no. E-3326386523852 dated 07-11-2022 for the import of 801gm of Ceftaroline fosamil with L-Arginine.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing for the stability batches
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section#	Observations	Firm's response
1.6.5	Submit valid GMP certificate/DML for the drug substance manufacturer issued by the relevant regulatory authority.	Firm has submitted GMP certificate valid till 15-09-2025 issued by Center for evaluation & certification of Shandong Pharmaceutical Industry Association.
3.2.S.4	• Submitted specifications does not include test of "Acetic acid" content. • Drug substance specifications, analytical procedure and analytical method verification studies shall be submitted from M/s Seraph Pharmaceuticals. • Reports for sterility test of drug substance performed by M/s Seraph pharmaceutical shall be submitted.	• Firm has submitted analytical procedure and specifications applied by M/s Seraph pharmaceuticals including test of Acetic acid. • Firm has submitted microbial reports for the sterility testing of drug substance.
3.2.S.7.3	Stability studies of drug substance shall be submitted as per zone-IVA conditions.	Firm has submitted long term stability studies as per Zone IVA conditions form drug substance manufacturer.
3.2.P.2.5	Compatibility studies of the applied drug product with re constitution diluent shall be submitted.	Firm has submitted compatibility study with both water for injection and 0.9% NaCl as reconstitution diluent.
3.2.P.5.3	Performance of robustness parameter shall be submitted in drug product analytical method validation studies.	Submitted
3.2.P.5.4	Reports for sterility test of drug product of trial batches shall be submitted.	Microbiological reports submitted for performance for sterility tests.
3.2.P.8.3	Submit stability studies for the 6th month time point.	Submitted.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

CLB in its 276th meeting held on 03rd September, 2020 has approved grant of additional section of Tablet (General) section for M/s Quaper Private Limited 26-A Small Industrial Estate Lahore Road Sargodha. Now firm has applied following applications for priority consideration against new section priority.

331.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Quaper Private Limited 26-A Small Industrial Estate Lahore Road Sargodha.**
	Name, address of Manufacturing site.	M/s Quaper Private Limited 26-A Small Industrial Estate Lahore Road Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer

		☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 22-08-2022 based on inspection conducted on 16-08-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 29-09-2020 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 9210 dated 05-04-2023
	Details of fee submitted	PKR 30,000/- Dated 29-03-2023
	The proposed proprietary name / brand name	**PAINOXIA 90mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Etoricoxib…… 90 mg
	Pharmacotherapeutic Group of (API)	Antirheumatic
	Pharmaceutical form of applied drug	Film coated green colored round tablet
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Arcoxia Tablet approved by AEMPS of Spain
	For generic drugs (me-too status)	Starcox Tablet 90 mg of M/s Getz pharma, Pakistan Private Limited. (Reg.No. 105293)
	Name and address of API manufacturer.	M/**s** Kekule Pharma Limited MIA, Khazipally, Jinnaram Mandal Medak District, Telangana State. India – 502 319.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at

		30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Starcox Tablet 90 mg manufactured by Getz pharma, Pakistan Limited. Firm has submitted CDP results of their product against the Starcox Tablet 90 mg of mM/s Getz in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against the innovator's product Vonozan Tablet 20 mg manufactured by Getz pharma, Pakistan Limited. Firm has submitted CDP results of their product against the Vonozan Tablet 20 mg manufactured by Getz pharma, Pakistan Limited in 3 dissolution medias.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA	
Manufacturer of API	M/s Yinbin Hongguang Pharmaceutical Co., Ltd Luolong county nanxi district, Yinbin City, Sichuan Province China.
API Lot No.	MS103201-210901
Description of Pack (Container closure system)	Alu-PVC Blister

Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	**T1/22**	**T2/22**	**T3/22**
Batch Size	1500Tablet	1500 Tablet	1500 Tablet
Manufacturing Date	01-2022	01-2022	01-2022
Date of Initiation	11-01-2022	11-01-2022	11-01-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.6.5	Submit valid GMP certificate/DML of drug substance manufacturer from relevant regulatory authority since submitted GMP certificate has been issued by Yibin Association of Pharmaceutical Industry.	Firm has submitted copy of GMP Certificate# SC20170003 valid till 16-03-2022 issued by CFDA.
3.2.P.5.1	Justification shall be submitted for not including test of content uniformity in the drug product specifications.	Firm has submitted revised drug product specifications including test for content uniformity.
3.2.P.8.3	Documents confirming import of drug substance shall be submitted.	Firm has submitted copy of commercial invoice attested by AD I&E DRAP, Lahore dated 08-11-2021 specifying 200g of Vonoprazan fumarate.

Decision: Registration Board approved the applications of "QUZAN 10mg Tablet" & "QUZAN 20mg Tablet".

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

335.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Quaper Private Limited 26-A Small Industrial Estate Lahore Road Sargodha.**

	Name, address of Manufacturing site.	M/s Quaper Private Limited 26-A Small Industrial Estate Lahore Road Sargodha.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	Firm has submitted copy of GMP certificate dated 22-08-2022 based on inspection conducted on 16-08-2022.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 29-09-2020 specifying Tablet (General) section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales

	Dy. No. and date of submission	Dy.No 37583 dated 23-12-2022
	Details of fee submitted	Rs.30,000/- dated 15-12-2022
	The proposed proprietary name / brand name	**Welcef 2g IV injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Ceftriaxone Sodium eq. to Ceftriaxone…2g
	Pharmaceutical form of applied drug	Dry powder injection
	Pharmacotherapeutic Group of (API)	Cephalosporin Antibiotics
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved by US FDA
	For generic drugs (me-too status)	Oxidil Injection of M/s Sami
	GMP status of the Finished product manufacturer	GMP Certificate No.70/2021-DRAP(FID/2061717-540) Dated 08-09-21
	Name and address of API manufacturer.	M/s. SinopharmWeiqida Pharmaceutical Co., Ltd. Pharmaceutical Industrial Park, Economic & Technological Development Zone, Datong, Shanxi, China 037300.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD

		template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Ceftriaxone sodium is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C /65% ± 5%RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (Q012008048, Q012008049, Q012008050)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Oxidil injection 2g IV by M/s Sami by performing quality tests (Identification, PH, Assay)
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Approved in FDA (ZOSYN 2.25g Injection)
	For generic drugs (me-too status)	Tanzo 2.25g Injection by M/s Bosch Pharmaceutical Pvt. Ltd. Karachi Reg# 039593
	GMP status of the Finished product manufacturer	New section granted on 27-12-2021.
	Name and address of API manufacturer.	Shandong Anxin Pharmaceutical Co. Limited. Address: No. 849, Dongjia Town, Licheng District, Jinan, Shandong, China
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm is submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug

		substance.
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5% RH for 48 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader by M/s Bosch Pharma (Batch # PN220030).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	Shandong Anxin Pharmaceutical Co. Limited. Address: No. 849, Dongjia Town, Licheng District, Jinan, Shandong, China		
API Lot No.	HF1162D3		
Description of Pack (Container closure system)	Tazomac Injection 2.25g is filled in Glass vial USP Type-II further packed in unit carton along with patient leaflet insert		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	001	002	003
Batch Size	500 vials	500 vials	500 vials
Manufacturing Date	07-2022	07-2022	07-2022
Date of Initiation	28-07-2022	28-07-2022	28-07-2022
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	New DML Granted.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	--
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.no.	Sections	Observations	Firm's response
1.	**1.6.5**	Valid GMP certificate of the drug substance manufacturer issued by the relevant regulatory authority shall be submitted.	Copy of DML no. Lu20160009 valid till 09-11-2025 issued by CFDA
2.	**3.2.S.2.2**	Manufacturing procedure of drug substance indicate that formulated pre-mix sterile powder did not contain EDTA, how you will adjust the quantity of EDTA in the final dispensed powder per vial.	Firm has referred to the innovator drug product literature approved by US FDA stating that EDTA is only recommended for the Piperacillin/Tazobactam dry powder injection filled in plastic vial.
3.	**3.2.S.4.1**	Justify for adopting the assay limits different from that recommended in the USP monograph of Piperacillin and Tazobactam for injection.	Since we are procuring pre-mixed, ready to fill Sterile powder of APIs i.e Piperacillin and Tazobactam in (8:1) for which drug product monograph was not applied.
4.	**3.2.S.4.2**	• Evidence of availability of HPLC system equipped with Auto-sampler able to maintain temperature of 5 ± 3°, as required by USP monograph, shall be submitted. • Submitted analytical procedure for Assay test mentions the determination of "Meropenem" in calculation formula. Justification shall be submitted in this regard.	• Testing was performed with Shimadzu Shimadzu LC 20A system (Serial No. L20305566114, (Shimadzu, Tokyo, Japan). The system is equipped with a binary pump (LC-20AD), a temperature controlled auto-sampler (SIL-20ACHT), a temperature-controlled column compartment (CTO-20AC) which is equipped with thermoelectric Peltier technology, which has the ability to maintain temperature from 2oC to 50oC. Testing was carried by maintaining the temperature. • Documents of HPLC purchase, installation and calibration is submitted • Firm has submitted corrected analytical method.
5.	**3.2.S.5**	Justify of using Tazobactam pencillamine as working standard for analysis of drug substance since you have submitted the COA of working standard of Tazobactam Penicillamine, while USP recommends simple tazobactam reference standard for assay of drug substance.	Tazobactam penicillamine is used during analysis of related substance to identify the peak. Reference standard of Tazobactam penicillamine, is made by DS manufacturer i.e Shandong Anxin laboratory and it is used for the identity of peak

			and not for the calculation of impurity assay during the analysis. We used Tazobactam working standard as per USP monograph for Assay calculation. COA is submitted.
6.	**3.2.P.1**	• Justify the composition/strength (label claim) of the applied formulation i.e. 2352mg of pre-mix sterile powder of Piperacillin (as sodium) and Tazobactam (as sodium) and each vial contains a total of 2.79mEq (64mg) of sodium per gm of piperacillin and 0.5mg of EDTA in the combination product with reference to innovator product and submitted label claim.	• Actual weight of powder in a vial is to be decided after assay adjustment. Each 2.25g vial provides piperacillin sodium equivalent to 2 grams of piperacillin and Tazobactam sodium equivalent to 0.25 g of Tazobactam. Similarly, each 4.5g vial provides piperacillin sodium equivalent to 4grams of piperacillin and Tazobactam sodium equivalent to 0.5 g of Tazobactam. Mol. Weight of piperacillin sodium = 539.5 Mol. Weight of piperacillin sodium = 516.55 *Factor of Piperacillin = 1.042* Mol. Weight of Tazobactam sodium = 322.28 Mol. Weight of Tazobactam sodium = 300.29 *Factor of Tazobactam =1.073*
7.	**3.2.P.2.2.1**	• Justification shall be submitted for not performing tests of Bacterial endotoxin, sterility test, particulate matter test and uniformity of dosage unit test, as recommended by the USP monograph, during Pharmaceutical equivalence studies.	• Firm has referred to the performance of sterility testing during stability studies with acceptable results.
8.	**3.2.P.2.5**	Compatibility studies of the applied formulation with proposed re constitution diluent shall be submitted.	Submitted.
9.	**3.2.P.3.5**	Justification shall be submitted for not including all tests as per USP monograph in the finished product testing stage of process validation.	Firm has referred to the results of impurity testing performed by the drug substance manufacturer.
10.	**3.2.P.5.1**	• Submit the drug product analytical procedure document from M/s Fynk Pharmaceuticals instead of submitting the extract of USP monograph. • Evidence of availability of HPLC system equipped with Auto-sampler able to maintain temperature of 5 ± 3°, as required by USP monograph, shall be submitted. • Submitted analytical procedure for Assay test mentions the determination of "Meropenem" in	• Firm has submitted analytical procedure document form M/s Fynk Pharmaceuticals. • Testing was performed with Shimadzu Shimadzu LC 20A system (Serial No. L20305566114, (Shimadzu, Tokyo, Japan). The system is equipped with a binary pump (LC-20AD), a

		calculation formula. Justification shall be submitted in this regard. • Justify the variation in calculation formula from that proposed by USP monograph.	temperature controlled auto-sampler (SIL-20ACHT), a temperature-controlled column compartment (CTO-20AC) which is equipped with thermoelectric Peltier technology, which has the ability to maintain temperature from **2ºC to 50ºC**. Testing was carried by maintaining the temperature. • Evidence of HPLC purchase, installation and calibration is submitted
11.	**3.2.P.5.3**	• Submitted analytical method validation protocol declares that specificity test has to be performed under different conditions like heat, acid, base, oxidation to see the effects of theses on degradation, whereas no such performances are evident form the submitted analytical method verification report. • Justification shall be submitted that how the "specificity" of the applied method has been inferred without the performance of "Peak Purity Test (e.g., using diode array detector) to establish that analyte chromatographic peak is not attributable to more than one component".	Specificity by Force degradation was not skipped because the DS manufacturer has performed the same. Since we are using ready to fill powder and no excipient are to add. However, we assure that Specificity study with force degradation will be performed on commercial batches.
12.	**3.2.P.6**	• Justify of using Tazobactam pencillamine as working standard for analysis of drug substance since you have submitted the COA of working standard of Tazobactam Penicillamine, while USP recommends simple Tazobactam reference standard for assay of drug substance.	Tazobactam penicillamine is used during analysis of related substance to identify the peak. Reference standard of Tazobactam penicillamine, is made by DS manufacturer i.e Shandong Anxin laboratory and it is used for the identity of peak and not for the calculation of impurity assay during the analysis. • We used Tazobactam working standard as per USP monograph for Assay calculation.
13.	**3.2.P.8.3**	• Clearance certificate or commercial invoice attested by AD I&E DRAP, Lahore shall be submitted as evidence of import of the drug substance. • COAs and complete raw data sheets wherein details of standard & sample solution preparation along with calculation formula applied for the performance stability studies shall be submitted for each time point. • Submitted HPLC chromatograms declare the injection volume as 20µl	• Firm has submitted License to import for 10 Kg of Piperacillin sodium/ Tazobactam sodium issued by AD I&E DRAP, Lahore dated 07-04-2022. • Submitted. • To achieve the system suitability, we use 20µl injection volume as per USP <621>, Method Verification also has

		whereas the USP monograph recommends the performance of Assay test with injection volume of 10µl.	been conducted for this variation.

Decision: Registration Board approved the applications of "Tazomac Injection 4.5gram" & "S Tazomac Injection 2.25gram".

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Case no. 03 Registration applications of import cases

a. **New Cases (Human)**

340.	**Name, address of Applicant / Importer**	**M/s Gene-Tech Laboratories. B-246, Block 6, P.E.C.H.S, Karachi, Pakistan**

	The proposed proprietary name / brand name	**Agrabloc 12.5mg/50ml Concentrate Solution for Infusion**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 50ml Vial Contains: Tirofiban as hydrochloride monohydrate…12.5mg
	Pharmaceutical form of applied drug	Powder for injection
	Pharmacotherapeutic Group of (API)	B01AC17 Platelet aggregation inhibitors, except heparin
	Reference to Finished product specifications	In house
	Proposed Pack size	12.5mg/50ml, 1 vial per box
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Aggrastat 250mcg/ml injection approved by MHRA of UK
	For generic drugs (me-too status)	Agraban 12.5mg/50ml of M/s Pharmasol (Reg.106293)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Name, address of drug substance manufacturer	Farmabios S.p.A. Via Pavia, 1 27027 Gropello Cairoli, (PV) Italy
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	The accelerated stability study data is conducted at 40ºC ±2ºC / 75% ± 5% RH for 6 months. The real time stability data is conducted at 25ºC ± 2ºC and 60% ± 5% for 48 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation report, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or

		materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Comparative analysis Studies against the reference product of Caelyx injection has been submitted.
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies of the drug product.
	Container closure system of the drug product	AGRABLOC 12.5 mg/50 ml IV Concentrate Solution For Infusion is packed with the following primary packaging materials: - 50 ml colorless Type I glass vial - 20 mm bromobutyl red rubber stopper - 20 mm flip-off cover AGRABLOC is supplied as 1 vial with a PIL in box containing approved text, batch number and expiration date.
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches. The accelerated stability study data is conducted at 40 ± 2°C, 75 % ± 5 % R.H for 6 months. The real time stability study data is conducted at 30 ± 2°C, 75 % ± 5 % R.H for 24 months.

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
1.3.3	Submit original valid legalized GMP certificate of drug product manufacturer and COPP of applied product issued by relevant regulatory authority of country of origin.	
1.3.5	Copy of valid DSL of the applicant shall be submitted.	
3.2.P.2.1	Submit drug-excipient compatibility studies since qualitative composition of applied formulation is different from that of the innovator drug product. Moreover Clarification shall be submitted regarding inclusion of mannitol in master formulation since innovator drug product does not contain it.	
3.2.P.2.2.1	Justification shall be submitted for the limit & results of pH test applied in Pharmaceutical equivalence studies with reference to pharmacopoeial monograph.	
3.2.P.3.3	Justification shall be submitted for not performing terminal sterilization.	
3.2.P.8.3	• Long term stability studies on Zone-IV conditions till claimed shelf life shall be submitted for three batches	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings.

	Name, address of drug substance manufacturer	M/s Northeast Pharmaceutical Group Co., Ltd., 29 Shenxi Liudong road, Shenyang Economic and Technical Development zone, China. (GMP certificate No. LN20190041 valid till 15/07/2024)
	Module-III Drug Substance:	Submitted
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 36 months real time stability data at 30˚C ± 2˚C / 65% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches
	Module-III Drug Product:	Submitted.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence has been established by conducting all the quality tests against the reference product, Fosmicin-S manufactured by M/s Meiji Seka Kaisha ltd, Japan.
	Analytical method validation/verification of product	COAs: 10119030002, 10119030003, 10119030.
	Container closure system of the drug product	Injection vials made up of molded soda lime glass, rubber stopper and aluminium -plastic laminated cap
	Stability study data of drug product, shelf life and storage conditions	• 18 months real time stability data at 30˚C ± 2˚C / 75% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches

Evaluation by PEC-I:

- The product in reference country in approved with a primary packaging of 100ml glass bottle while the volume of vial of the applied product is 30ml.
- The firm has submitted Original, legalized and vlaid CoPP (certificate No. 20210027) issued by Liaoning Medical Products Administration valid till 07/01/2023. The product is available for free sale in the market of exporting country. The facilities and operations conform to Chinese-GMP.
- Analytical method verification studies for API performed by drug product manufacturer are not submitted. The firm has stated that the API testing was conducted as per Chinese Pharmacopoeia therefore verification studies are not required. Moreover, the official monograph for API is present in British Pharmacopoeia.

Decision of 308th meeting:

Deferred for of following points;

- Clarification since the product in reference country in approved with a primary packaging of 50ml glass bottle while the volume of vial of the applied product is 30ml.
- Submission of analytical method validation/verification studies of drug substance performed by drug product manufacturer**.**
- Submission of real time stability study data according to the conditions of zone IV-A of 03 batches till shelf life since the submitted data is of 18 months only.

Evaluation by PEC-I:

- The firm has provided the following reference of the product which is approved with 30ml volume of the vial which is in-lined with the volume of the vial of the applied product.
  Ivozfo (Fosfomycin for injection) (2g, 4g, 8g) by M/s Verity Pharmaceuticals, Ontario, Health Canada Approved.

  IVOZFO™ (fosfomycin for injection) is supplied in clear type-I glass vials with a rubber stopper (bromobutyl rubber) and pull-off cap containing 2 g (in 30 mL vial), 4 g (in 30 mL vial) or 8 g (in 50 mL vial) of fosfomycin, respectively, in packs of 10 vials each.

  https://health-products.canada.ca/dpd-bdpp/info.do?lang=en&code=97819 (accessed on 12/11/2021 at 7pm)
- As per MHRA, Water for Injections and Glucose Infusion 50 mg/ml (5 %) or Glucose Infusion 100 mg/ml (10 %) may be used as solvent for the reconstitution and dilution while according to HealthCanada, 5% dextrose solution must be used. Whereas both the authorities recommend that Sodium chloride containing solvents must not be used.
- Reconstitution: (MHRA, Ireland & Health Canada)

Shake the vial prior to the reconstitution to loosen up the powder. Reconstitute the 2 g or 4 g vials with 20ml solvent.

- Dilution (MHRA, Ireland & Health Canada)
  Transfer the reconstituted contents of **2 g vials** into an infusion container with further **30 ml** of solvent.
  Transfer the reconstituted contents of **4 g vials** into an infusion container with further **80 ml** of solvent.
- The firm has submitted analytical method validation studies for Fosfomycin including precision, accuracy, linearity and specificity. The validation studies for impurities have also been submitted.
- The firm has submitted stability data with the following details;
  24 months real time stability data at 30˚C ± 2˚C / 75% ± 5%RH of 03 batches
  06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches
  Batches: 4190406, 4190407, 4190408
- As per the provided data, the in-use after reconstitution with 5% and 10% dextrose solution for 12 hours.
- The applied product is developed and tested according to In-House specifications while the official monograph of the product is available in J.P. The comparison of In-house and J.P specificaytions are given below.

Test	**Limits defined by J.P**	**In-house limits**
pH	6.5-8.5	6.5-8.5
Fosfomycin sodium diol (impurity A)	Test not performed	≤ 1%
Clarity of solution	Clear and colorless	Clear and colorless Should not be more pronounced than the reference suspension 1. Any color produced should not be more intense than reference solution yellow 1.
Water	≤ 4%	≤ 2%
Bacterial endotoxins	Less than 0.025EU/mg	Less than 0.033EU/mg
Visible particles	clear and free from foreign insoluble matters (foreign insoluble matter)	Absent
Particulate matter	≤ 6000/container (≥10um) ≤ 600/container (≥25um)	≤ 6000/container (≥10um) ≤ 600/container (≥25um)
Weight variation	Should meet the requirement <6.02>	±5%
Assay	90-110% **Cylinder plate method** Test Organism: Proteus Sp.	90-110% **Cup plate method** Test Organism: Micrococcus Luteus **Nephelometry test (parallel lines method)** Test Organism: Escheritia Coli

Decision of 313th meeting: The Board deliberated that the specifications limits as defined by Japanese Pharmacopoeia are more stringent and tighter than the established In-House specification as well as the method used for the testing of the applied product are also different from the method developed In-House. Therefore, the Board decided to defer the case and directed the firm to submitted all the relevant data according to the the monograph present in Japanese Pharmacopoeia.

Firm's response: According to our manufacture they recently adapted EP10.0/Innovator Standard Specification based upon International UK, Canada and Europe Fosfomycin Sodium 4 gm brands Standard. In UK, Europe and Canada they follow EP 1.0/Innovator standard instead of JPXVIL. Even in Bangladesh for Fosfomycin Sodium 4 gm they follow EP/Innovator standard. So, based upon European Pharmacopeia 10.0/Innovator standard of UK/German approved brand FOMICYT 4 GM (Infecto Pharm, Germany), Canada IVOZFO 4 GM (Verity Pharmaceuticals, Canada) & FOSFOCINE IV 4 gm Sanofi Aventis, France, our Manufacture Fosfomycir Sodium 4 gm follow EP 10.0/Innovator standard Overall our manufacturer (Northeast Pharmaceutica Group) current Fosfomycin Sodium 4 gm Sterile Powder vial follow EP10.0/Innovator

Decision: Deferred for submission of product development and stability studies data as per Japanese pharmacopeoia monograph of "Fosfomycin for injection".

	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose only
	Dy. No. and date of submission	Dy. No. 17603 dated 16-06-2022
	Details of fee submitted	PKR 75,000/- dated 13-04-2022
	The proposed proprietary name / brand name	Arbit Tablets USP 500mg
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet Contains: Abiraterone acetate …… 500mg
	Pharmaceutical form of applied drug	Tablet
	Pharmacotherapeutic Group of (API)	Other hormone antagonists and related agents
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	ZYTIGA 500 mg Janssen-Cilag International NV USFDA Approved.
	For generic drugs (me-too status)	--

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	BDR Life Sciences Private Limited R.S.NO.578, Near Effluent, Channel Road, Village Luna – 391 440, Ta.Padra, Dist. VADODARA, India
	Module-III Drug Substance:	Firm has submitted detailed drug substance data for both sources related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 75% ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical equivalence studies against the innovator product of Zytiga tablet 250mg while CDP studies have bene performed in three dissolution mediums of pH 1.2, 4.5 & 6.8 against the Zytiga 250mg tablet.
	Analytical method validation/verification of product	Firm has submitted analytical method validation studies for the applied product as per USP monograph.
	Container closure system of the drug product	HDPE Container
	Stability study data of drug product, shelf life and storage conditions	Firm has submitted stability study data of 3 batches The accelerated stability study data is conducted at 40oC ±2oC / 75% ± 5% RH for 6 months. The real time stability study data is conducted at 30oC ±2oC / 75% ± 5% RH for 36 months.

Remarks of Evaluator:

Section#	Observation
1.1	Fee for registration has been submitted from header of DML instead of DSL. Submit valid copy of DSL.
1.3	Submit original legalized valid COPP since the submitted COPP was expired at the time of submission of registration application. Submit evidence of approval for the required manufacturing facility “Tablet (steroid)” for the applied formulation.

3.2.P.2.2.1	Submit justification for performing Pharmaceutical equivalence studies against the Zytiga 250mg tablet while the applied strength is 500mg.

Decision of 324th meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Firm's response: Firm has submitted following vide their letter no. ref; SPL/BDR/3147 vide R&I dated 21-06-2023.

Section#	Observation	Firm's response
1.1	Fee for registration has been submitted from header of DML instead of DSL. Submit valid copy of DSL.	Not submitted
1.3	Submit original legalized valid COPP since the submitted COPP was expired at the time of submission of registration application. Submit evidence of approval for the required manufacturing facility "Tablet (steroid)" for the applied formulation.	Original Legalized COPP no. MFG/WHO GMP/COPP/2023/1951221591 issued by food 7 Drugs Control Administration, Gujarat, with following particulars: • Product license holder: M/s BDR Pharmaceuticals International Pvt. Ltd R.S.No. 578, Near Effluent Channel Road, Village: Luna, Ta: Padra, Dist : Vadodara– 391 440, (India). • Free sale status in country of origin (India): Yes. • GMP status of the manufacturer endorsed: Yes. • Validity: 09-01-2026 Firm has also submitted copy of GMP certificate no. 1711454 (valid till 07-11-2019) issued by Food & Drugs Control Administration in name Of M/s BDR Pharmaceuticals International Pvt. Ltd R.S.No. 578, Near Effluent Channel Road, Village: Luna, Ta: Padra, Dist : Vadodara– 391 440, Gujarat State (India) declaring availability of Tablet & Capsule (Cytotoxic) section.
3.2.P.2.2.1	Submit justification for performing Pharmaceutical equivalence studies against the Zytiga 250mg tablet while the applied strength is 500mg.	We BDR Pharmaceutical In. pvt. Ltd hereby justify that the Bioequivalence study with the title "A randomized open label balanced two period two sequence single dose two way crossover oral bioequivalence study of our Arbiraterone acetate 500mg tabklets of BDR Pharmaceutical international pvt. Ltd compare with Zytiga 250mg tablets of Janssen biotech inc., Horsham at a dose of 500mg (2 / 250mg) in a 36 healthy human adult male subjects under fasting conditions has started on Jan 2017 and completed on 02-02-2017 and complete don 02-02-2017. At the time of BE Study for Arbirtaerone tablet USP only Zytiga 250mg (N202379 001) HAS LISTED AS Rld IN ORANGE BOOK. Zytiga 500mg tablets has listed as RLD in Apr, 14, 2017. Therefore we selected the Zytiga 250mg as RLD against of the Arbirtaerone tablets 500mg.

Decision: Deferred for following:

- **Full fee of registration from the head of Drug Sale License.**

- **Pharmaceutical equivalence and CDP studies against the relevant strength i.e., 500mg of the Innovator drug product.**
- **Further deliberation regarding requirement of manufacturing facility for applied formulation.**

	The proposed proprietary name / brand name	**Cabozanix 20mg Capsule**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains: Cobazanitinib as S-Malate……20mg
	Pharmaceutical form of applied drug	Immediate release hard gelatin capsule
	Pharmacotherapeutic Group of (API)	Anti-cancer
	Reference to Finished product specifications	In-house

	Proposed Pack size	90's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Cometriq Capsule (20mg, 80mg) by Ipsen Pharma, EMA approved.
	For generic drugs (me-too status)	N/A
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Name, address of drug substance manufacturer	M/s Beijing Mesochem Technology Co., Ltd., Floor 23, Building 9, Lippo Plaza, Economic and technological Development zone Beijing (GMP certificate not provided).
	Module-III Drug Substance:	The API used belongs to BCS class II. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	• 24 months real time stability data at 25˚C ± 2˚C / 60% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches (150528, 150712, 150925)
	Module-III Drug Product:	Batch analysis (3590002, 3590003, 3590004) Detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product is submitted.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	CDP against the reference product, Cometric 20mg Capsule by M/s Ipsen Pharma, France (EMA Approved) is submitted with acceptable values of f1 and f2. (Batch number C22001).
	Analytical method validation/verification of product	Data of analytical method validation is submitted including, specificity, accuracy, ruggedness, precision and linearity etc for assay of API. (validation studies of analytical method for related substance have submitted as well.
	Container closure system of the drug product	HDPE pot with srew cap, induction sealable wad containing 90 capsules along with silica gel, packed in secondary outer carton.
	Stability study data of drug product, shelf life and storage conditions	Batches: (3590002, 3590003, 3590004) Batch size: 10,000 capsules • 24 months real time stability data at 30˚C ± 2˚C / 75% ± 5%RH of 03 batches

		• 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches

Evaluation by PEC-I:

The drug substance manufacturer is M/s Beijing Mesochem Technology Co., Ltd., China. The submitted GMP certificate is of M/s Kaifeng Pharmaceutical (group) Co., Ltd., China. The applicant has submitted a letter form M/s Beijing Mesochem Technology Co., Ltd., China stating;

"We Beijing Mesochem Technology Co., Ltd., certiifctae that Beijing Mesochem is a manufacturer. According to cooperation agreement currently, Beijing Mesochem tehnology Co., ltd., is manufacturing at Kaifeng Pharmaceutical (group) co., Ltd.,. as per the agreement enclosed. We guarantee the site equivalence and analytical/product equivalence".

Observation	**Response**
Since the excipients used in the manufacturing of the product are different from the excipients used in manufacturing of reference product, therefore, compatibility study of the excipients with API is required to be performed. The information should be presented under relevant section in module II and module III.	The excipients used comply to current pharmacopoeial monograph (BP). These excipients are pharmaceutically inert substances and These excipients are used below "Inactive Ingredient Guide" limit of FDA. Extensive analysis of the product is done and satisfactory results of assay, dissolution and impurity profile are obtained.
Test for Genotoxic impurities in addition to impurity profiling, is included in the final specifications of the reference product while the test is not included in the specifications of the applied product, please clarify.	Not responded
As per EMA assessment report of the innovator's product, the testing specification for Drug Substance include tests for malic acid content, organic volatile impurities, genotoxic impurities, crystal form, particle size distribution and percentage purity as well while the testing specifications for Drug Substance used for the manufacturing of the applied product do not include the above-mentioned tests, please explain. Moreover, a discussion shall be provided on the inclusion of certain tests, evolution of tests, analytical procedures and acceptance criteria with reference to above query under relevant sections in Module II and Module III.	Not responded
Pharmaceutical equivalence of the applied product is established against the innovator's product Cabometyx capsule by Ipsen Pharma France as per the submitted dossier, while Cabometyx by Ipsen Pharma, France is not actually Capsule dosage form. The mentioned brand name that is Cabometyx is film coated tablet as per the information provided on the official website of ANSM, France, please clarify.	The firm has submitted copy of clarification letter from M/s Beacon Pharmaceuticals Limited. **"**Cabometyx and Cometriq are two brand name drugs that both contain the same active ingredient of Cabozanitinib by Ipsen Pharma, France. While Cabometyx is film coated tablet and Cometriq is Capsule dosage form as per the information provided on EMc. During Bio-equivalence studies of Cabozanix 20mg Capsule, Cometriq Capsuel (B/NC21801) used as reference product".
Scientific justification for the use of 1% overage in the formulation is required.	Not responded

Previous Decision of 313th meeting: Deferred for the following;

- Submission of impurity profiling as per the innovator's product including the detail of testing of genotoxic impurities.
- Justification for not performing certain tests which include malic acid content, organic volatile impurities, genotoxic impurities, crystal form, particle size distribution and percentage purity for drug substance.
- Scientific justification for the use of 1% overage in the formulation

The dissolution specifications are as per USFDA dissolution method available online.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	The firm has performed Pharmaceutical Equivalence against the innovator's product, Cabometyx 60mg tablet by M/s Ipsen Pharma, France (EMA approved) (Batch number C91801). CDP against the reference product, Cabometyx 60mg tablet by M/s Ipsen Pharma, France (EMA Approved) is submitted. (Batch number C22001).
	Analytical method validation/verification of product	Data of analytical method validation is submitted including, specificity, accuracy, ruggedness, precision and linearity etc for assay of API. (validation studies of analytical method for related substance have submitted as well.
	Container closure system of the drug product	HDPE bottle with srew cap and induction sealable wad and silica gel containing 30 tablets packed in secondary outer packaging.
	Stability study data of drug product, shelf life and storage conditions	Batches: (3850002, 3850003, 3850004) Batch size: 6666 tablets • 24 months real time stability data at 30˚C ± 2˚C / 75% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches
Evaluation by PEC-I: The drug substance manufacturer is M/s Beijing Mesochem Technology Co., Ltd., China. The submitted GMP certificate is of M/s Kaifeng Pharmaceutical (group) Co., Ltd., China. The applicant has submitted a letter form		

M/s Beijing Mesochem Technology Co., Ltd., China stating;
"We Beijing Mesochem Technology Co., Ltd., certiifctae that Beijing Mesochem is a manufacturer. According to cooperation agreement currently, Beijing Mesochem tehnology Co., ltd., is manufacturing at Kaifeng Pharmaceutical (group) co., Ltd.,. as per the agreement enclosed. We guarantee the site equivalence and analytical/product equivalence".

Observation	**Response**
Since the qualitative composition of the applied product is different from the innovator/reference product, therefore, compatibility studies of the excipients with the drug substance is required. The information should be presented under relevant section in module II and module III.	The excipients used comply to current pharmacopoeial monograph (BP & USP). These excipients are pharmaceutically inert substances and These excipients are used below "Inactive Ingredient Guide" limit of FDA. Extensive analysis of the product is done and satisfactory results of assay, dissolution and impurity profile are obtained.
Justify the manufacturing process of the applied product since it is a type of direct compression method while the reference product is manufactured by wet granulation method.	"As per Beacon's manufacturing process, Direct compression method is used and the process is validated".
Test for Genotoxic impurities in addition to impurity profiling is including in the final specifications of the reference product while the test is not included in the specifications of the applied product, please clarify.	Not responded
As per EMA assessment report of the innovator's product, the testing specification for Drug Substance include tests for malic acid content, organic volatile impurities, crystal form, particle size distribution and percentage purity as well while the testing specifications for Drug Substance used for the manufacturing of the applied product do not include the above-mentioned tests, please explain. Moreover, a discussion shall be provided on the inclusion of certain tests, evolution of tests, analytical procedures and acceptance criteria with reference to above query under relevant sections in Module II and Module III.	Not responded

Decision of 313th meeting: Deferred for the following;

- Submission of impurity profiling as per the innovator's product including the detail of testing of genotoxic impurities.
- Justification for not performing certain tests which include malic acid content, organic volatile impurities, genotoxic impurities, crystal form, particle size distribution and percentage purity for drug substance.
- Submission of relevant data for drug substance as per the GUIDANCE DOCUMENT FOR SUBMISSION OF APPLICATION ON FORM 5-F FOR REGISTRATION OF PHARMACEUTICAL DRUG PRODUCTS FOR HUMAN USE available on the official website of DRUG REGULATORY AUTHORITY OF PAKISTAN.
- Clarification since the GMP certificate of M/s Kaifeng Pharmaceutical (group) Co., Ltd., China is submitted while as per submitted dossier the manufacturer of drug substance is M/s Beijing Mesochem Technology Co., Ltd., China and the relevant data related to drug substance is submitted from M/s Beijing Mesochem Technology Co., Ltd., China.

Firm's response: Firm has submitted following:

- Declaration form M/s Beijing Mesochem Technology Co., Ltd that Cabozanitinib malate is free of genotoxic impurities and organic solvents.
- Declaration form M/s Beijing Mesochem Technology Co., Ltdis a manufacturer. Acoridng to cooperation agreement currently Beijing Mesochem manufacture at Kaifeng Pharmaceutical (group) Co. ltd as per the agreement. We guarantee the site equivalence and analytical/product equivalence.
- COA of drug substance including tests of malic acid content, percentage purity and bulk density.

Decision: Registration Board approved the applications of "Cabozanix 20mg Capsule" & "Cabozanix 60mg Capsule" as per policy of inspection of manufacturer abroad.

Case no. 04. The Authority in its 165th meeting held on 20th July, 2023 approved the out of Que consideration of Form 5-F applications of the following molecules received till 31st December, 2023, keeping in view of their repeated shortage/non-availability reports in the market and to ensure timely access of these drugs to public.

1. **labetalol injection**
2. **Calcium gluconate injection**
3. **Digoxin injection**
4. **Propofol injection**
5. **Cholestyramine powder/sachet**
6. **Lithium Carbonate Tablet**
7. **Pilocarpine Eye Drops**
8. **Heparine Injection**
9. **Divalproex sodium Tablet and injction**
10. **Anti-D injection**
11. **Streptokinase injection**
12. **Octreotide acetate injection**
13. **Carbamazepine tablet**
14. **Penicillin-G Benzathine injection**
15. **Fucidic acid cream**
16. **Calcitonin injection**

In compliance to the Authority decision mentioned above the following applications were considered by the board after due evaluation.

345.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Mediate Pharmaceutical (PVT.) LTD. Plot No:-150-151, Sector 24, Korangi Industrial Area, Karachi Pakistan.**

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	--
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing for stability studies
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section#	Observations	Firm's response
1.6.5	Submit valid GMP certificate/ DML of the drug substance manufacturer.	Firm has submitted copy of Certificate# 16478/D1/4/2021 issued by Department of Food Safety & Drugs Control Administration, Government of Tamil Nadu, valid upto 31-12-2024.
3.2.P.2.2.1	Submit comparative dissolution profile along with f2 factor calculation	Submitted
3.2.P.8.3	Submit documents confirming import of drug substance issued by DRAP I&E office.	Firm has submitted copy of loan letter from Wimits Pharmaceuticals for 2Kg of Divalproex sodium along with import documents issued by DRAP I&E Lahore.
2.3.R.1	Submit complete batch manufacturing record for stability batches.	Submitted

Decision: Approved

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

346.	Name, address of Applicant / Marketing Authorization Holder	M/s Wimits Pharmaceuticals (Pvt) Ltd. Lahore Plot #129 Sundar Industrial Estate,Raiwind road,Lahore
	Name, address of Manufacturing site.	M/s Wimits Pharmaceuticals (Pvt) Ltd. Plot #129 Sundar Industrial Estate,Raiwind road,Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Evidence of manufacturing facility	GMP Certificate No.70/2021-DRAP(FID/2061717-540) Dated 08-09-21 declares availability of tablet general section
	GMP status of the Finished product manufacturer	GMP Certificate No.70/2021-DRAP(FID/2061717-540) Dated 08-09-21

	Intended use of pharmaceutical product	☐Domestic sale ☐ Export sale ☒Domestic and Export sales
	Dy. No. and date of submission	Dy.No 13223 dated 30-05-2022
	Details of fee submitted	Rs.30,000/- dated 01-11-2021
	The proposed proprietary name / brand name	**Dpiro 500mg CR tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Extended Release tablet contains: Divalproex sodium equivalent to Valproic acid……....500mg
	Pharmaceutical form of applied drug	Extended Release Tablet

	Pharmacotherapeutic Group of (API)	Antiepileptic
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Depakote ER 500mg tablet USFDA Approved.
	For generic drugs (me-too status)	Towprox CR 500mg tablet of M/s Crystolite (Reg.#087346).
	Name and address of API manufacturer.	M/s Sun Pharmaceutical Industries Ltd Address: Sathammai Village, Karunkuzhi Post, Madhuranthagam Taluk, Kancheepuram District, Tamilnadu – 603 303, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 72 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (PDMDVLFL183, PDMDVLFL184, PDMDVLFL185)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is EPIVAL 500mg CR tablet by Abbott Laboratories by performing quality tests (Identification, Assay, Dissolution, Uniformity of the dosage form). CDP has been performed against the same brand that is EPIVAL 500mg CR tablet by Abbott Laboratories in Acid media (pH-1.2), Acetate Buffer (pH-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method verification/validation studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA			
Manufacturer of API	M/s Sun Pharmaceutical Industries Ltd Address: Sathammai Village, Karunkuzhi Post, Madhuranthagam Taluk, Kancheepuram District, Tamilnadu – 603 303, India.

Manufacturing Date	03-2021	03-2021	03-2021
Date of Initiation	21-12-2021	22-12-2021	23-12-2021
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. K Dis, No: 17264/D1/4/2018 issued by Department of Safety & Drugs Control Administration Government of Tamilnadu valid untill 31/12/2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Copy of letter No.10847/2020-DRAP Dated 06/08/2020 is submitted wherein the permission to import different APIs including Divalproex sodium USP for the purpose of test/analysis and stability studies is granted. Invoice Number: 700004927, dated 20/07/2020
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

Section#	Observations	Firm's response
1.6.5	Submit valid GMP certificate/DML of the drug substance manufacturer.	Firm has submitted copy of Certificate# 16478/D1/4/2021 issued by Department of Food Safety & Drugs Control Administration, Government of Tamil Nadu, valid upto 31-12-2024.
2.3.R.1	Submit complete batch manufacturing record for stability batches.	Firm has submitted batch manufacturing record for three stability batches.

3.2.P.1	Submit clarification regarding the proposed quantity of Divalproex sodium per unit tablet against the label claim for Valproic acid.	Firm has referred to the molecular structure of Dilavproex sodium which is comprised of sodium valproate and valproic acid in a 1:1 molar relationship, hence proposed weight per unit tablet is justified with factor of molecular weight.
3.2.P.5.2	Specify which Dissolution test has been adopted from USP monograph for the drug product specifications.	Dissolution test 4 of USP monograph has been adopted.
3.2.P.8.3	Submit raw data sheets for the dissolution test for complete stability studies.	Submitted.

Decision: Approved with "Dissolution Test 4" of USP monograph of "Divalproex sodium extended release tablet".

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

347.	Name, address of Applicant / Marketing Authorization Holder	**M/s Cortex Pharmaceuticals. Plot # 16-A, SS-4, RCCI, Rawat, Rawalpindi, Punjab**
	Name, address of Manufacturing site.	M/s Shawan Pharmaceuticals Plot No. 37, Road: Ns-01, National Industrial Zone, Rawat, Rawalpindi
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver) (Contract manufacturing agreement between both firms dated 25-08-2020 is provided)
	GMP status of the firm	**Shawan Pharmaceuticals:** Firm has submitted copy of GMP certificate issued on the basis of inspection dated 24-04-2019
	Evidence of approval of manufacturing facility	Firm has submitted copy of Issuance of renewal of DML letter dated 03-09-2019 specifying Dry Vial Cephalosporin section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy.No 33300 dated 09-12-2021
	Details of fee submitted	Rs.75,000/- dated 25-11-2021
	The proposed proprietary name / brand name	**Q-Dux 1000mg Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Cefoperazone as Sodium…500mg Sulbactam as Sodium…500mg
	Pharmaceutical form of applied drug	Sterile white to almost white powder filled in transparent glass vials
	Pharmacotherapeutic Group of (API)	Cephalosporin antibiotic

	Reference to Finished product specifications	JP specs
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Sulperazone Intravenous Injection 1g (PMDA Japan Approved)
	For generic drugs (me-too status)	Cefbac injection by Seraph Pharmaceuticals
	Name and address of API manufacturer.	Qilu Antibiotics Pharmaceutical Co Ltd. No. 849, Dongia Town Licheng District Jinan City, Shandong Province China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for their product against Zantum Injection of Medizan.
	Analytical method validation/verification of product	Firm has submitted report of verification studies of analytical method for the drug substance and product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	N/A
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted Copy of GMP certificate (No. SD20190876) issued by CFDA China is submitted by the firm. The certificate is valid till 21-04-2024. Firm has also submitted copy of DML of the firm (No. Lu 20160006) issued by CFDA China. The license is valid till 03-11-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of License issued by AD I&E specifying import of 200Kg Cefoperazone sodium and Sulbactam sodium to M/s Shawan Pharmaceuticals dated 22-06-2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with chromatograms, raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Section#	Observations	Firm's response
3.2.P.8.3	Submit both accelerated & long term stability studies data till 6th month time point for all the stability batches.	Submitted

Decision: Registration Board approved the applications of "Q-Dux 1000mg Injection" & "Q-Dux 2000mg Injection".

- **Firm shall submit Pharmaceutical equivalence studies of each strength against the innovator/brand leader product before issuance of registration letter.**
- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Registration Board further authorized its Chairman for issuance of registration letter upon consideration of satisfactory capacity assessment of manufacturing and testing facility of M/s Shawan Pharmaceuticals Plot No. 37, Road: Ns-01, National Industrial Zone, Rawat, Rawalpindi.

	Name and address of API manufacturer.	**Empagliflozin:** M/s Fuxin Long Rui Pharmaceutical Co., Ltd China. Fluoride industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province - 123000, China **Linagliptin:** M/s Fuxin Long Rui Pharmaceutical Co., Ltd China. Fluoride industrial Park, Fumeng County (Yi Ma Tu), Fuxin City, Liaoning Province - 123000, China **Metformin HCl:** Wanbury Limited. Doctors Organic Chemical Division K Illindalaparru-534217, Iragavaram Mandal,		

		West Godavari District Andhra Pradesh; India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Empagliflozin Batches: (20160606, 20161017, 20161219) Linagliptin Batches: (L-20170429-D01-L9-01, L-20170604-D01-L9-02, L-20170604-D01-L9-03) Metformin HCL Batches: (MS-0220601 Lot A, MS-0220601 Lot B, MS-0230601 Lot A, MS-0230601 Lot B, MS-0240601 Lot A, MS-0240601 Lot B,
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, specifications, analytical procedure and its validation studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the innovator Trijardy XR 12.5mg / 2.5mg/ 1000mg Tablet manufactured by M/s Boehringer Ingelheim international by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Trijardy XR 12.5mg / 2.5mg/ 1000mg Tablet manufactured by M/s Boehringer Ingelheim in Acid media & Phosphate Buffer. The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Method validation studies have submitted including linearity, range, accuracy, precision, specificity.

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has submitted the list of products previously approved with stability study data.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Empagliflozin: Copy of GMP certificate valid till 23/08/2023 issued by Lioning Fuxin management committee. Linagliptin: Copy of GMP certificate valid till 23/08/2023 issued by Lioning Fuxin management committee. Metformin HCl: Copy of License retention certificate

		valid till 28-07-2023 issued by Drug Control Administration, Andhra Pradesh, India
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Empagliflozin: Commercial invoice no. HN21010701-J attested by AD I&E DRAP, Lahore dated 23/02/2021. • Linagliptin: Invoice No. HN201215-L attested by AD I&E DRAP, Lahore dated 15-Dec-2020 • Metformin HCl: Commercial Invoice No. 92003827 attested by AD DRAP I&E Lahore dated 05/02/2021.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response	Remarks
1.5.2	Submitted label claim shall elaborate the immediate release and extended release layer of the applied formulation.	Elaborated label claim is as follow: **Each film coated tablet contains;** Empagliflozin & Linagliptin as Immediate Release Metformin HCl as Extended-Release Firm has submitted fee of Rs.75,000/- for revision of label claim for each strength	
1.6.5	Copy of Valid GMP certificate./DML for M/s Fuxin Long Rui, issued by relevant regulatory authority shall be submitted.	Copy of Manufacturing License (License # LIAO 20150233) issued by Liaoning Medical Products Administration, valid upto 17-01-2027 for M/s Fuxin Long Rui has been submitted	
	Empagliflozin		
3.2.S.1.3	In contrary to the innovator drug product literature from the US FDA & EMA, the section declares the solubility in water as "practically insoluble". Justification shall be submitted in this regard.	The phrase "practically insoluble" was a typographical error. In section S.1.3, regarding quantitative aqueous solubility, we have stated that the solubility of Empagliflozin in water is 0.5 mg/ml.	Declaration from the drug substance manufacturer shall be submitted regarding the solubility of Empagliflozin. The submitted annexure still mentions the statement of practically

			insoluble in water.
	Metformin HCl		
3.2.S.4.4	Submitted COA of Metformin HCl from M/s Wanbury declare that the product complies with BP-2014/USP-35. Clarification shall be submitted in this regard. USP and BP monograph is not harmonized hence justification shall be submitted from the drug substance manufacturer for claiming both standards simultaneously.	We adhere to the specifications mentioned in the British Pharmacopoeia (BP). The specifications for the drug substance are attached as 3.2. S.4.1. The API manufacturer has stated their compliance with both compendia. We would like to state that Wanbury Limited is EDQM certified manufacturer bearing certificate number. R1-CEP 1998-079 - Rev 10. Further we have also submitted justification of specification attached by the drug substance manufacturer Drug substance specifications are submitted Further Manufacturer is complying to USP 35 and BP 2014, and both the monograph are harmonized. Furthermore, we are complying to BP 2022 specifications.	The Assay and related substances limits of USP & BP monograph are different.
	Linagliptin		
3.2.S.1.3	• Submitted DMF declare the Polymorphic form as A, whereas Innovator drug product literature declares that Linagliptin is manufactured as a mixture of anhydrous form A and anhydrous form B. Justification shall be submitted in this regard. • Clarification shall be submitted regarding the isomeric form of the drug substance.	As per CDER, Linagliptin exist in two polymorphic forms- Form A and Form B. these two forms are enantiotropically related and reversible interconvert at approximately room temperature. Both forms are stable and highly soluble and both forms are equivalent with respect to equilibrium solubility and intrinsic dissolution rate, which indicates that polymorphism does not affect manufacturability or bioavailability.	Innovator literature review declares the Linagliptin as a mixture of anhydrous form A and anhydrous form B while justification is required from drug substance manufacturer for declaring the drug substance as single polymorphic form.
3.2.S.4	• Justification shall be submitted for not including test of "Enantiomeric purity" in the drug substance specifications.	Test for Enantiomeric Purity can ensure that the content of S-enantiomer in the product which should be less than 0.15%. Further, it is evident from literature that interconversion of Linagliptin to S-Linagliptin	Innovator literature has recommended test of enantiomeric purity as stability test and identification test by Chiral HPLC. Firm has not

		does not show meaningful amounts of S-enantiomer in the drug substance. Hence, there is no need to perform Identification by chiral HPLC. Furthermore, both the API manufacturer and FPP manufacturer have already performed Identification using two different methods, namely HPLC and IR, in accordance with the recommendations outlined in ICH Q6A. However, we have requested our Drug substance manufacturer to add the test for Enantiomeric impurity in their Specifications. We have also revised our Drug substance specifications including Test for Enantiomeric Impurity	submitted any literature reference to establish the fact that performance of test for S-enantiomer (Enantiomeric purity test) is not necessary. Furthermore Registration Board in its 324th meeting has recommended performance of test Enantiomeric purity for Linagliptin.
3.2.S.4.4	• Submitted COA of drug substance from both drug product and drug substance manufacturer does not confirm "Enantiomeric purity". Justification shall be submitted in this regard.	Test for Enantiomeric Purity can ensure that the content of S-enantiomer in the product which should be less than 0.15%. Further, it is evident from literature that interconversion of Linagliptin to S-Linagliptin does not show meaningful amounts of S-enantiomer in the drug substance. Hence, there is no need to perform Identification by chiral HPLC.	
3.2.S.5	Submitted COA of working standard of Linagliptin does not declare the validity date.	Valid Working standard COA of Linagliptin was already attached in 3.2. P.6. Same has been submitted.	COA of reference/working standard used for the drug substance analysis of Linagliptin by M/s CCL shall be submitted.
3.2.P.1	• Justification shall be submitted for the seal coating applied on Metformin HCl core, while referring to the innovator drug product formulation. • Details of the equipment shall be submitted wherein Drug-Excipient compatibility study has been conducted with following stress conditions: • Temperature: 60°C	As per innovator patent document "PCT/EP2016/079465" the Metformin XR core is barrier coated using one or more barrier coating agents such as mixture of hydroxypropyl cellulose, HPMC or mixture of PVA, PEG. we have utilized HPMC,	Firm has submitted document for seal coating justification which is extract of a patent instead of submitting the reference from innovator drug product literature

	• Humidity: 75%RH	Talc, Purified water, and titanium dioxide for the seal coat, following the innovator's specifications. Reference is attached as **Annex-4.** We have dedicated, stability chamber for such use. Make: Memmert (X511.0138) Eqp ID: QC 018 Record of data logger is attached as Annex-5	approved by reference regulatory authorities.
3.2.P.2	• Justification shall be submitted for proposed quantity of Arginine in the formulation. • Submit the image/picture/snapshot of the innovator/reference/comparator pack against which Pharmaceutical equivalence / Comparative Dissolution Profile studies have been performed and shall reveal the details of brand name, manufacturer, batch# and expiry date of the innovator/reference/comparator product. • Justification shall be submitted for not performing tests of water content, uniformity of content, microbial purity and arginine content in Pharmaceutical equivalence studies as recommended by the innovator product literature review from reference regulatory authorities.	• As per FDA Inactive Ingredient Search for Approved Drug Products, the permitted quantity for Arginine is up to 50mg, while our product has quantity up to 10mg which is within the permitted limits. • Images of innovator packs used for pharmaceutical equivalence studies are submitted. • *We hereby commit that Arginine content; Water content & content uniformity test will be part of our next Stability Study Testing Interval* as well as said test will be part of our QC Release Specifications before commercialization. • We have already performed the uniformity of content for our product. • We have tested for Average weight, content uniformity and dissolution during the study. *Further, Arginine is considered as an excipient that is why he have not tested it during pharmaceutical equivalence studies. H*owever now we have	

		added it in our specifications	
3.2.P.3.4	In contrary to the recommendations of innovator product literature, "particle size" of Empagliflozin & Linagliptin has not been identified as Critical Quality Attribute.	We have been procuring Empagliflozin and Linagliptin from our prequalified source. We have already performed Comparative dissolution profile and dissolution of our various sku's and all product complies to the specification for claimed shelf life. However, we have also requested our Drug substance manufacturer to perform the said test on next batches for compliance.	
3.2.P.3.5	Submitted process validation protocol does not include details of in-process test applied to confirm that desired content for Empagliflozin and Linagliptin has been achieved via active coating.	Revised Process Validation Protocol has been submitted.	
3.2.P.5.1	• Justification shall be submitted for not including tests of water content, microbial purity and arginine content in drug product specifications as recommended by the innovator product literature review from reference regulatory authorities.	We hereby commit that Arginine content; Water content & content uniformity test will be part of our next Stability Study Testing Interval as well as said test will be part of our QC Release Specifications before commercialization.	Firm has not submitted revised analytical procedure including test for Arginine & water content.
3.2.P.5.4	• Justification shall be submitted for not performing tests of water content, microbial purity and arginine content in batch analysis as recommended by innovator drug product literature		
3.2.P.6	COA of primary / secondary reference standard including source and lot number shall be provided.	COA of working standard is submitted.	
3.2.P.8.3	• Justification shall be submitted for not including tests of water content, microbial purity and arginine content in stability studies. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing shall be submitted.	We hereby commit that Arginine content; Water content & content uniformity test will be part of our next Stability Study Testing Interval as well as said test will be part of our QC Release Specifications before commercialization.	
2.3.R	• Submitted BMR declare dispensing of Empagliflozin & Linagliptin as per 100% content of desired label claim. Justification shall be submitted that how dispensed quantity will produce 100% content of	• The justification for achieving 100% content when both APIs are included through Active coating is as follows:	Submitted process validation protocol declares use of Conventional coating pan.

	Empagliflozin & Linagliptin, when both APIs are being included by way of Active coating and how the wastage of coating solution will be compensated. • Justification shall be submitted for the seal coating applied on Metformin HCl core, while referring to the innovator drug product formulation. • Justification shall be submitted for proceeding for the seal final film coating step without establishing the content of Empagliflozin & Linagliptin at in process stage of active coating. • Clarification shall be submitted for the test applied to confirm that desired content for Empagliflozin and Linagliptin has been achieved via active coating since submitted trial batch manufacturing record does not include any in process testing. • Minimum handling capacity of the equipment used in the manufacturing of trial batches shall be submitted.	• Through careful formulation and testing, the coating solution is designed to provide adequate coverage and retention of both Empagliflozin and Linagliptin during the coating process. • Further, the coating process is conducted in Automatic coating machine. • As per innovator patent document "PCT/EP2016/079465" the metformin XR core is barrier coated using one or more barrier coating agents such as mixture of hydroxypropyl cellulose, HPMC or mixture of PVA, PEG. we have utilized HPMC, Talc, Purified water, and titanium dioxide for the seal coat, following the innovator's specifications. • The coating solution undergoes testing before the coating process takes place. However, the Certificate of Analysis (COA) for the coating solutions is not included in the Trial Batch Manufacturing Record (BMR). • Our R&D Laboratory is equipped with Automatic coating machine with minimum handling capacity of 500gm and maximum capacity of 3.0Kg. Model: BGC 400	

Decision: Registration Board deferred the applications of Trijardy XR Tablet 25mg/5mg/ 1000mg, Trijardy XR Tablet 12.5mg/2.5mg/ 1000mg, Trijardy XR Tablet 10mg/5mg/ 1000mg & Trijardy XR Tablet 5mg/2.5mg/ 1000mg for following:

- **Declaration from the drug substance manufacturer shall be submitted regarding the solubility of Empagliflozin.**

- **Evidence based justification for the claim of firm that USP & BP monograph of Metformin HCl is harmonized.**
- **Justification for from the drug substance manufacturer for claiming both standards i.e., USP & BP simultaneously for Metformin HCl.**
- **Scientific justification, with reference to innovator drug product literature, for claiming Linagliptin as "Polymorphic form A" insetad of "mixture of anhydrous form A and anhydrous form B".**
- **Clarification shall be submitted regarding the isomeric form of the drug substance.**
- **Scientific Justification shall be submitted for not including test of "Enantiomeric purity" in the drug substance specifications as recommended by the innovator drug product literature.**
- **Submitted COA of drug substance from both drug product and drug substance manufacturer does not confirm "Enantiomeric purity" and identification test of Chiral purity. Justification shall be submitted in this regard with reference to innovator drug product literature.**
- **COA of reference/working standard used for the drug substance analysis of Linagliptin by M/s CCL shall be submitted.**
- **Scientific justification shall be submitted for the role and impact of seal coating applied on Metformin HCl core, while referring to the innovator drug product formulation.**
- **Performance of Pharmaceutical equivalence studies against the innovator drug product including tests of water content, uniformity of content, microbial purity and arginine content.**
- **Scientific justification shall be submitted for not including tests of water content and arginine content in stability studies with reference to the innovator drug product literature.**
- **Justification shall be submitted for proceeding for the final film coating step without establishing the content of Empagliflozin & Linagliptin at in process stage of active coating.**
- **Evidence based justification regarding the claim of achieving 100% content as per label claim of Empagliflozin & Linagliptin, withput consuming excessive active coating solution.**

	The proposed proprietary name / brand name	**Parasafe Infusion 1gm/100ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 100ml infusion contains: Paracetamol ……. 1gm
	Pharmaceutical form of applied drug	Solution for infusion
	Pharmacotherapeutic Group of (API)	Analgesic and Antipyretic
	Reference to Finished product specifications	In house specification
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Paracetamol 10mg/ml solution for infusion (One 100ml vial contains 1000mg Acetaminophen) of M/s Accord-UK Ltd approved by MHRA of UK
	For generic drugs (me-too status)	Provas Infusion 1Gm/100ml by Sami Pharma

	GMP status of the Finished product manufacturer	Panel inspection report dated 09-07-2020 concludes satisfactory level of cGMP compliance.
	Evidence of manufacturing facility	Copy of panel inspection report dated 09-07-2020 has been submitted wherein availability of "Sterile Vial Infusion" & "Ampoule" section has been mentioned.
	Name and address of API manufacturer.	M/s Citi Pharma (Pvt) Ltd, 3KM Head Baloki Road Phool Nagar District Qasur
	Module-II (Quality3. Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Acetaminophen is present in USP and BP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence	Pharmaceutical Equivalence have been established against the Provas infusion 1Gm/100ml by Sami Pharma.
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, range, accuracy, precision, specificty.

STABILITY STUDY DATA

Manufacturer of API	M/s Citi Pharma (Pvt) Ltd, 3KM Head Baloki Road Phool Nagar District Qasur
API Lot No.	PGP20-423, PARA/AWAS-001/20-001
Description of Pack (Container closure system)	Glass vial
Stability Storage Condition	Real time: 25˚C ± 2˚C / 60% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH
Time Period	Real time: 6 months Accelerated: 6 months
Frequency	Accelerated: 0, 3,6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)

Batch No.	001	002	003
Batch Size	400 vials	400 vials	400 vials
Manufacturing Date	09-2020	09-2020	09-2020
Date of Initiation	15-09-2020	16-09-2020	17-09-2020
No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	The firm has not submitted any document.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Not Submitted
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not Submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc..	Not Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	N/A
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator[II]:

Section#	Observations	Firm's response
3.2.S.3.1	The said section declares M/s Hebei Jiheng Pharmaceutical Co. Ltd as producer of Acetaminophen instead of M/s Citi Pharma.	According to invoice Neon chemical is our indenter which deals both companies. Now we are performing all the procedure according to Hebei Jiheng Pharma.
3.2.S.4.2	Analytical procedure submitted by Drug substance manufacturer is as per USP monograph, whereas Drug product manufacturer has submitted analytical procedure as per BP monograph. Justification shall be submitted for this variation.	Drug substance manufacturer complies both BP & USP specifications. Now we adopt analytical procedure according to USP specification.
3.2.S.4.3	• Clarification shall be submitted that whether submitted analytical method verification studies have been performed by M/s Citi Pharma or M/s Ahad International. • Clarification shall be submitted that whether submitted analytical method verification studies have been performed as per USP or BP monograph.	• Analytical method verification studies have been performed M/s Ahad International. • Performed according ot USP monograph.
3.2.S.4.4	• COA of Paracetamol submitted from M/s CITI Pharma declares it as "Analytical Working	• Firim has submitted COA of drug substance from M/s Hebei Jiheng Pharmaceutical Co. Ltd. China for batch# COS012012049 which also includes sterility test.

	Standard", whereas results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the same batch from Drug Substance manufacturer shall be submitted. • Submitted COA form M/s Citi Pharma & M/s Ahad International does not include test of sterility. Clarification shall be submitted in this regard, since the drug substance is to be used in the formulation of a sterile product.	
3.2.S.4.5	The said section declares that the specifications adopted are as per the monograph specified in USP while in section 3.2.S.4.2 analytical procedure as per BP monograph has been submitted.	Drug substance manufacturer complies both BP & USP specifications. Now we adopt analytical procedure according to USP specification.
3.2.P.3.5	Submitted process validation protocol mentions the strength as 1000mg/10ml whereas applied strength is 1000mg/100ml.	It is typographic mistake while the original strength is 1000mg/100ml.
3.2.P.5.1	Justification shall be submitted for the proposed pH range of 4.0 -7.0 for the drug product since the available literature of the reference product declares different pH range than that proposed by the applicant.	Actual pH range 5 – 7 for drug product according to USP specifications.
3.2.P.5.3	Performance of Linearity parameter shall be submitted in Analytical method validation studies.	Submitted.
3.2.P.5.4	The copies of complete analysis reports of all three trial batches shall be provided. Submitted analytical report of Trial-01 does not include test of Sterility & Endotoxin.	Firm has submitted copies of batch analysis reports fo all three stability bayches including results for sterility testing and endotoxin.
3.2.P.8	• Submitted invoice from M/s Neon Chemicals declare quantity of Paracetamol as of 50gm. Justification shall be submitted for manufacturing of three trial batches of 400vials each with 50gm of API. • Submitted stability summary sheets & reports declare condition of real time	• Firm has submitted copy of letter from M/s Neon Chemicals, declaring submission of drug sample of 2Kg from M/s Hebei Jiheng Pharmaceutical Co., Ltd., China to M/s Ahad International. • No document attested by AD I&E DRAP has been submitted in this regard. • Firm has submitted revised stability summary sheets m conditions as per Zone Iva. • Firm has submitted revised analytical record along with chromatograms.

	stability studies as 25˚C ± 2˚C / 60% ± 5%RH which is not as per Zone IVa. • Submitted analytical record shows that Assay calculations for all three stability batches at each time point of both accelerated & long-term stability studies have been performed by applying same value of Standard peak area. Justification shall be submitted in this regard. • Record of data logger of stability chambers shall be submitted. • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin shall be submitted.	• Record of digital data logger has been submitted. • GMP certificate eof the drug substance manufacturer has not been submitted.

Decision of 323rd meeting: Deferred for clarification regarding manufacturer of drug substance along with documents confirming procurement of drug substance with approval of DRAP I&E office.

Firm's response: Firm has submitted documents for the procurement of Paracetamol from M/s Citi Pharma (Pvt.) Ltd., 3.5-km, head Baloki Road, Phool Nagar, Kasur-Pakistan including commercial invoice, COA of drug substance and copy of GMP certificate issued on basis of inspection conducted on 17-12-2020.

Decision: Regsitration Board decided to defer the application for personal hearing of firm regarding the varied information submitted regarding the source of drug substance.

Administrative Portion		
	Reference of previous approval of applications with stability study data of the firm (if any)	Acidex 60mg Capsule Dexlansoprazole was approved in 312th Registration Board meeting. Compliance Record of HPLC software 21CFR & audit trail reports on product testing were present
	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	GMP Certificate No 18MPP077HFR02 issued by EUDRA . Period of validity is extended to 26.09.2023 in case of cholecalciferol .
	Documents for the procurement of API with approval from DRAP (in case of import).	M/s DSM Nutritional Product, France ADC Invoice No: 2831239200, 29-08-2019
	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of batches along with chromatograms, raw data sheets, COA and summary data sheets
	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted compliance record of HPLC software 21 CFR and copies of audit trail on testing of drug product.
	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks OF Evaluator:

Decision of 320th meeting: Deferred for following points:
Clarification of conditions of stability studies of drug substance and drug product.
Justification why comparative dissolution profile studies are not performed against the innovator drug product.

Firm's response:
Cholecalciferol is sensitive & not stable when exposed to high temperature condtion so in the light of above condition stability performed at 25oC +2oC/60% RH +5%RH. SmPc of innovator product "Fultium-D3 20,000IU capsules" clearly instructed to store the product below 25oC.
As Choleclaciferol is present in USP and its nature is fat soluble. Therefore, its dissolution is not recommended in any Pharmacopoeia as well as FDA dissolution guideline. While complete comparative analysis & Pharmaceutical equivalence with innovator has already been submitted with initial dossier.

Decision of 323rd meeting: Deferred for following:
Scientific justification for performing drug product stability studies on storage conditons different from that required by ICH/WHO guidelines for Zone IVA.
Submission of reference from pharmacopoeia/ innovator drug product literature regarding non-performance of dissolution test for applied formulation.

Firm's response:

S. No	Observation	Reply

	1.	Scientific justification for performing drug product stability studies on storage conditions different from that required by ICH/WHO guidelines for Zone IVA.	Cholecalciferol (Vitamin D3) is a sensitive vitamin & not stable when exposed to high temperature conditions so in the light of above condition stability performed at 25℃ ± 2℃ / 60% RH ± 5% RH. Leaflet (enclosed) of innovator product "Fultium 20,000 IU Capsule" clearly instructed to store the product below 25℃.
	2.	Submission of reference from pharmacopoeia/ innovator drug product literature regarding nonperformance of dissolution test for applied formulation.	Cholecalciferol (Vitamin D3) is present in USP pharmacopeia & its nature is fat soluble. Therefore, its dissolution is not recommended in any pharmacopeia as well as FDA dissolution guideline. USP Monograph of Cholecalciferol Capsule attached for reference. While complete comparative analysis and pharmaceutical equivalence with innovator has been done and already submitted with initial dossier.

Decision of 324th meeting: Deferred for submission of following:

- Justification of not performing stability studies as per Zone-IV A conditions since the MHRA Public Assessment Report of the innovator product i.e., Fultium –D3 20,000 IU capsule recommends storage condition as "Do no store above 30^0C".
- Justification on the basis of analytical record and stability studies that at what time point the product is unstable when stored at Zone IVA conditions for stability studies.

Firm's response:

- We performed long term stability studies at (25°C /60%RH) & accelerated at (40°C /75%RH) but due to appearance and degradation non-compliance at 6-month accelerated stability was observed. After that, we went for intermediate stability studies (30°C /65%RH) as per above mentioned guidelines to justify the stability of our product.
- Firm has now submitted real time stability studies data of three batches at 30°C /65%RH conditions for 24 months.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

- As per submitted BMRs potency adjustment has not been done for the Drug substance, based upon the actual Assay results.
- As per submitted BMRs, lactose monohydrate has been used in the formulation, whereas innovator product has been formulated without use of any excipient. Justification shall be submitted in this regard.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches shall be submitted shall be submitted.
- Submitted BMRs have not been filled completely.
- BMR was written with standard batch formula and now it been revised with potency adjustment as per potency of drug substance.
- Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas asper submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.
- Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.

Decision of 316th meeting: Deferred for following:

- **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.
- Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.
- Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.
- Specifications of fill weight/vial shall be submitted.
- Peak integration is not proper, since it does not coincide with the base line.
- Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.
- Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.
- Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.
- Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.
- Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection"

Firm's reply:

Observation	**Firm's Reply**
• **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.	Firm has submitted analytical procedure, wherein mobile phase composition is different from that proposed by the drug substance manufcaturer.
Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.	Fimr has submitted specification sof of auto sampler assembled with HPLC of Perkin Almer 200LC, wherein operating conditions for "Ambient temperature" are mentioned as 10- 30^{o}C.

Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.	The stability data has been done as per recommended storage conditions. There was typographic error in the data.
Specifications of fill weight/vial shall be submitted.	The product is in lyophilized form. For this 2 ml solution per vial was filled and then lyophilized. *It is pertinent to mention that vials are filled with 2 ml solution at an intermediate stage, whereas final dosage form of the applied product is in the powder form hence fill weight specifications are necessary to establish uniformity of dosage.*
Peak integration is not proper, since it does not coincide with the base line.	Firm has submitted chromatograms again with justification that the attenuation is increased which results in the proper coinciding of baseline.
• Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.	No reply submitted.
• Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.	The bulk and raw material of tigecycline is also available in lyophilized/sterilized form. The raw material was then formulated into solution form which is then filled and lyophilized.
• Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.	Firm has declared it as a typographic error, and has submitted revised COA of drug substance wherein Assay value has been declared as 99% on anhydrous basis, which still does not justify the dispensed amount on basis of "as is potency", since water content has been declared as 1.3%.
Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage	The solution is filled in the vials. The volume variation/checklist is attached.
• Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.	The solution is filled in glass beaker (5Ltr) whose minimum handling capacity is 500ml.
Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection".	Firm has submitted revised COAs of drug product for complete stability studies, wherein test of "Particular matter" has now been included.

Decision of 320th meeting: Deferred for following:

- Submission of commercial invoices attested by AD DRAP I&E, for the procurement of drug substance used to manufacture drug product batches. i.e. L-131 & L-138.
- Specifications for the fill weight/vial shall be submitted.
- Evidence of performance of sterility testing at the time of batch release shall be submitted.
- Scientific justification shall be submitted for using glass beaker (5Ltr) for the compounding the commercial scale batches.
- Verification of the claim of the firm regarding submitted HPLC chromatograms that "attenuation is increased which results in the proper coinciding of baseline."

Firm's response: Firm has submitted following:

- Firm has submitted copy of license to import issued by AD I&E Islamabad dated 20-12-2017 for import of 200gm of Tigecycline.
- The product is filled with a fill volume of 2ml± 0.2ml solution for lyophilisation, after lyophilisation dried cake is formed.
- Microbiological reports for the sterility testing for batch release of stability batches.
- The product is commercially manufactured with a batch size of approx. 2litre so it is manufactured in a 5litre glass beaker as per proper manufacturing procedure.
- As the attenuation or scale of the y-axis is changed the baseline is automatically changed as shown in the attached chromatograms.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

• Dates of testing written in the stability summary sheets for different time points, does not relate with the relevant duration in months. • As per submitted BMRs potency adjustment has not been done for the Drug substance, based upon the actual Assay results. • As per submitted BMRs, lactose monohydrate has been used in the formulation, whereas innovator product has been formulated without use of any excipient. Justification shall be submitted in this regard. • Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches shall be submitted shall be submitted. • Submitted BMRs have not been filled completely.	• BMR was written with standard batch formula and now it has been revised with potency adjustment as per potency of drug substance. • Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis. • Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage. • Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.

Decision of 316th meeting: Deferred for following:

- **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.
- Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.
- Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.
- Specifications of fill weight/vial shall be submitted.
- Peak integration is not proper, since it does not coincide with the base line.
- Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.
- Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.
- Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.
- Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.
- Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection"

Firm's reply:

Observation	Firm's Reply
• **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.	Firm has submitted analytical procedure; wherein mobile phase composition is different from that proposed by the drug substance manufacturer.
Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.	Fimr has submitted specification sof of auto sampler assembled with HPLC of Perkin Almer 200LC, wherein operating conditions for "Ambient temperature" are mentioned as 10- 30^{o}C.
Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.	The stability data has been done as per recommended storage conditions. There was typographic error in the data.
Specifications of fill weight/vial shall be submitted.	The product is in lyophilized form. For this 2 ml solution per vial was filled and then lyophilized. *It is pertinent to mention that vials are filled with 2 ml solution at an intermediate stage, whereas final dosage form of the applied product is in the powder form hence fill weight specifications are necessary to establish uniformity of dosage.*
Peak integration is not proper, since it does not coincide with the base line.	Firm has submitted chromatograms again with justification that the attenuation is increased which results in the proper coinciding of baseline.
• Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.	No reply submitted.
• Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.	The bulk and raw material of tigecycline is also available in lyophilized/sterilized form. The raw material was then formulated into solution from which is then filled and lyophilized.
• Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.	Firm has declared it as a typographic error, and has submitted revised COA of drug substance wherein Assay value has been declared as 99% on anhydrous basis, which still does not justify the dispensed amount on basis of "as is potency", since water content has been declared as 1.3%.
Submitted BMRs does not reflect any test	The solution is filled in the vials. The

of filled weight per vial, sterility testing at any stage	volume variation/checklist is attached.
• Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.	The solution is filled in glass beaker (5Ltr) whose minimum handling capacity is 500ml.
Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection".	Firm has submitted revised COAs of drug product for complete stability studies, wherein test of "Particular matter" has now been included.

Decision of 320th meeting: Deferred for following:

- Submission of commercial invoices attested by AD DRAP I&E, for the procurement of drug substance used to manufacture drug product batches. i.e. L-131 & L-138.
- Specifications for the fill weight/vial shall be submitted.
- Evidence of performance of sterility testing at the time of batch release shall be submitted.
- Scientific justification shall be submitted for using glass beaker (5Ltr) for the compounding the commercial scale batches.
- Verification of the claim of the firm regarding submitted HPLC chromatograms that "attenuation is increased which results in the proper coinciding of baseline."

Firm's response: Firm has submitted following:

- Firm has submitted copy of license to import issued by AD I&E Islamabad dated 20-12-2017 for import of 200gm of Tigecycline.
- The product is filled with a fill volume of 2ml± 0.2ml solution for lyophilisation, after lyophilisation dried cake is formed.
- Microbiological reports for the sterility testing for batch release of stability batches.
- The product is commercially manufactured with a batch size of approx. 2litre so it is manufactured in a 5litre glass beaker as per proper manufacturing procedure.
- As the attenuation or scale of the y-axis is changed the baseline is automatically changed as shown in the attached chromatograms.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of	The firm has not submitted any document.

	the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. CQ20180031) issued by Chongqing food and drug administration valid upto 09-10-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	• Firm has submitted copy of Licenses to Import Drug substance Tigecycline issued by AD I&E DRAP, Islamabad dated 05-08-2019 & 02-04-2020.
4	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	NA
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Section#	Observations	Firm's response
3.2. S.4	• Acceptance limits for test of pH submitted in the drug substance specifications is not as per the USP monograph for "Tigecycline". • The details of coloumn temperature, mobile phase preparation, system suitability solution mentioned in the Assay test method by Drug substance manufacturer is not as per the USP monograph for "Tigecycline". • Submitted COA from M/s Bio-labs reflect that tests of Bacterial Endotoxin & sterility have not been performed. • Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Drug Product manufacturer is required. • Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer shall be submitted. • Provide results of analysis of relevant batch(es) of Drug Substance performed by Drug Product manufacturer used during product development and stability studies, along with Certificate of Analysis (CoA) of the	• Firm has submitted revised documents submitted without justifying the deviations observed in previously submitted data. • Temperature for autosampler not reflected in analytical method. • Firm has submitted Bioburden test report from M/s Bio Lab for another batch than that submitted earlier. • Drug substance specifications and analytical procedure has been submitted from M/s Bio-Labs, but these documents are not formal and does not bear any document no., issue date or effective date. • Analytical method verification studies have been submitted from M/s Bio-Labs. • COA from API manufacturer has been submitted, which declares the product name as "Tigecycline lyophilized", whereas COA of M/s Bio-Lab declares it as "Tigecycline" only. • No Evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained.

	same batch from Drug Substance / /Active Pharmaceutical Ingredient manufacture. • Evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained.	
3.2.S.5	• COA of primary / secondary reference standard including source and lot number shall be provided.	COA of working standard has been submitted from M/s Fuan Pharmaceutical, China.
3.2. S.7	• The USP monograph for "Tigecycline" recommends storage condition as at refrigerated temperature, whereas stability studies data has been submitted as per room temperature conditions. • Specifications for pH & specific optical rotation applied in stability studies is different from that submitted in section 3.2.S.4.4.	Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as reuired for a refrigerated item, while the analytical values for all the tests are same as presented earlier.
3.2.P.1	• Inclusion of lactose monohydrate in the composition shall be justified since innovator product approved by US FDA & EMA is formulated without use of any excipient.	MHRA approved reference given.
3.2.P.2.1	• Compatibility studies of the Drug Substance(s) with Lactose shall be provided since innovator product approved by US FDA & EMA is formulated without use of any excipient.	MHRA approved reference given.
3.2. P.5	• Specifications of fill weight/vial shall be submitted. • Specifications does not include test of "Particulate matter". • Evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained. • Precision parameter has not been performed in the analytical method verification studies. • COAs of relevant batches for which stability studies data has been submitted, shall be provided.	: given s of fill weight/vial shall be submitted. availability of Auto sampler in HPLC, C temperature conditions could be ion is not proper, since it does not the base line. re not formal and does not bear any , issue date or effective date. Submitted COAs does no tinclude test of particulate matter as recommended by the USP monograph of "Tiogecycline for injection"
3.2.P.6	• Submitted working standard COA reflect date of analysis as 14-12-2019, whereas stability batches have been analysed prior to this date.	COA of working standard submitted with date of analysis as 25-12-2017, wherein the reference standard (lot# F0M325) used for its standardization was valid upto 30-09-2017.
3.2. P.8	• Firm has submitted copy of Licenses to Import Drug substance Tigecycline issued by AD I&E DRAP, Islamabad dated 05-08-2019 & 02-04-	ed are still subsequent to the date of g of two batches. i.e. L-131 & L-138 turing date of 03-2018, whereas oice is of 08-2019. voice is for "Tigecycline lyophilized".

	2020, whereas stability batches have been manufactured prior to these dates. • Clarification shall be submitted whether submitted stability studies data is of trial batches or commercial batches. • Raw data sheets for stability studies, reflecting the details of Standard weight, Sample dilution preparation, Potency of Reference standard and Calculation formula applied for the Assay test shall be submitted. • As per submitted stability studies data, test of particulate matter has not been performed, justification shall be submitted in this regard. • Dates of testing written in the stability summary sheets for different time points, does not relate with the relevant duration in months.	ubmitted that provided data is of atches. ets submitted. ity study sheets have been submitted.
	• As per submitted BMRs potency adjustment has not been done for the Drug substance, based upon the actual Assay results. • As per submitted BMRs, lactose monohydrate has been used in the formulation, whereas innovator product has been formulated without use of any excipient. Justification shall be submitted in this regard. • Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches shall be submitted shall be submitted. • Submitted BMRs have not been filled completely.	• BMR was written with standard batch formula and now it sbeen revised with potency adjustment as per potency of drug substance. • Revised BMR mentions the dispensed quantity of APi on the basis of 99% potency, whereas asper submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis. • Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage. Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.

Decision of 316th meeting: Deferred for following:

- **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.
- Evidence of availability of Auto sampler in HPLC, wherein 10°C temperature conditions could be maintained.
- Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.
- Specifications of fill weight/vial shall be submitted.
- Peak integration is not proper, since it does not coincide with the base line.
- Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.
- Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.

- Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.
- Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage.
- Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.
- Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection"

Firm's reply:

Observation	Firm's Reply
• **S**ubmission of formal documents for drug substance specifications & analytical procedures form M/s Bio-Labs, wherein details of document no., issue date or effective date shall have been mentioned.	Firm has submitted analytical procedure; wherein mobile phase composition is different from that proposed by the drug substance manufacturer.
Evidence of availability of Auto sampler in HPLC, wherein 10^{o}C temperature conditions could be maintained.	Firm has submitted specifications of auto sampler assembled with HPLC of Perkin Almer 200LC, wherein operating conditions for "Ambient temperature" are mentioned as 10- 30^{o}C.
Firm has submitted stability studies data of drug substance for the same batches as submitted earlier, wherein only conditions of storage have been changed as required for a refrigerated item, while the analytical values for all the tests are same as presented earlier.	The stability data has been done as per recommended storage conditions. There was typographic error in the data.
Specifications of fill weight/vial shall be submitted.	The product is in lyophilized form. For this 2 ml solution per vial was filled and then lyophilized. *It is pertinent to mention that vials are filled with 2 ml solution at an intermediate stage, whereas final dosage form of the applied product is in the powder form hence fill weight specifications are necessary to establish uniformity of dosage.*
Peak integration is not proper, since it does not coincide with the base line.	Firm has submitted chromatograms again with justification that the attenuation is increased which results in the proper coinciding of baseline.
• Submitted commercial invoices for the procurement of drug substance are still subsequent to the date of manufacturing of two batches. i.e. L-131 & L-138 with manufacturing date of 03-2018, whereas submitted invoice is of 08-2019.	No reply submitted.
• Scientific justification shall be submitted for use of Lyophilized powder of drug substance for the manufacture of finished drug product by way of lyophilization.	The bulk and raw material of tigecycline is also available in lyophilized/sterilized form. The raw material was then formulated into solution from which is then filled and lyophilized.

• Revised BMR mentions the dispensed quantity of API on the basis of 99% potency, whereas as per submitted COA of drug substance from M/s Bio-Labs, the potency of API is 98.4% on as is basis.	Firm has declared it as a typographic error, and has submitted revised COA of drug substance wherein Assay value has been declared as 99% on anhydrous basis, which still does not justify the dispensed amount on basis of "as is potency", since water content has been declared as 1.3%.
Submitted BMRs does not reflect any test of filled weight per vial, sterility testing at any stage	The solution is filled in the vials. The volume variation/checklist is attached.
• Details of the minimum handling capacity of the compounding vessel used for manufacturing of stability batches have not been submitted.	The solution is filled in glass beaker (5Ltr) whose minimum handling capacity is 500ml.
Submitted COAs of drug product does not include test of particulate matter as recommended by the USP monograph of "Tigecycline for injection".	Firm has submitted revised COAs of drug product for complete stability studies, wherein test of "Particular matter" has now been included.

Decision of 320th meeting: Deferred for following:

- Submission of commercial invoices attested by AD DRAP I&E, for the procurement of drug substance used to manufacture drug product batches. i.e. L-131 & L-138.
- Specifications for the fill weight/vial shall be submitted.
- Evidence of performance of sterility testing at the time of batch release shall be submitted.
- Scientific justification shall be submitted for using glass beaker (5Ltr) for the compounding the commercial scale batches as lyophilization is performed after filling the solution in vials.
- Verification of the claim of the firm regarding submitted HPLC chromatograms that "attenuation is increased which results in the proper coinciding of baseline."

Firm's response: Firm has submitted following:

- Firm has submitted copy of license to import issued by AD I&E Islamabad dated 20-12-2017 for import of 200gm of Tigecycline.
- The product is filled with a fill volume of 2ml± 0.2ml solution for lyophilisation, after lyophilisation dried cake is formed.
- Microbiological reports for the sterility testing for batch release of stability batches.
- The product is commercially manufactured with a batch size of approx. 2litre so it is manufactured in a 5litre glass beaker as per proper manufacturing procedure.
- As the attenuation or scale of the y-axis is changed the baseline is automatically changed as shown in the attached chromatograms.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**

• **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Previous Remarks of the Evaluator.	• The firm has submitted 26 weeks Accelerated and 26 weeks of Intermediate Stability Study Data for 03 Batches. • Firm has performed test for Identification, Assay, Appearance, Weight of filled tubes and Microbial testing only during stability studies, whereas WHO guidelines for Stability testing of active pharmaceutical ingredients and finished pharmaceutical products recommends as under: • "Topical preparations should be evaluated for clarity, homogeneity, pH, suspendability (for lotions), consistency, viscosity, particle size distribution (for suspensions, when feasible), level of microbial contamination/sterility and weight loss (when appropriate)." Also USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests", recommends tests for "Apparent viscosity" and "Uniformity in Containers" as "Specific Tests For Topically Applied Semisolid Drug Products." • GMP certificate of supplier of Lidocaine HCl is expired. • Commercial invoice of Lidocaine has not been attested by ADC DRAP. • Commitment to follow Drug Specification Rules, 1978 has not been submitted.
	Previous Decision	The case was initially presented in 259th meeting of Registration Board wherein the case was deferred for submission of stability data as per guidelines provided in 251st RB meeting. In 272nd meeting of Registration Board the case was again presented along with stability studies data, wherein Registration Board deferred the case for following observations: i. Firm has performed test for Identification, Assay, Appearance, Weight of filled tubes and Microbial testing only during stability studies, whereas WHO guidelines for Stability testing of active pharmaceutical ingredients and finished pharmaceutical products recommends as under: "Topical preparations should be evaluated for clarity, homogeneity, pH, suspendability (for lotions), consistency, viscosity, particle size distribution (for suspensions, when feasible), level of microbial contamination/sterility and weight loss (when appropriate)." Also USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests", recommends tests for "Apparent viscosity" and "Uniformity in Containers" as "Specific Tests For Topically Applied Semisolid Drug Products." ii. GMP certificate of supplier of Lidocaine HCl is expired.

		iii. Commercial invoice of Lidocaine has not been attested by DRAP. iv. Commitment to follow Drug Specification Rules, 1978 has not been submitted.
	Evaluation of Firm's reply	Firm has replied as under: i. "We conducted the study only for the major tests because DRAP allows only limited quantity of APIs to be imported for product development. Due to small batch size we cannot perform analysis of all the required tests but tests like clarity, homogeneity and consistency have been covered in appearance of the ointment." ii. Copy of GMP certificate of supplier of Lidocaine hydrochloride i.e. M/s Gufic Life sciences Pvt. Ltd, Gujrat, India issued by FDCA Gujarat has been submitted. The certificate is valid upto 20-07-2019. iii. "Regarding the purchase of Lidocaine hydrochloride, we would like to inform you that our ordered quantity waqs very small therefore the manufacturer M/s Gufic Biosciences Ltd, India dispatched the material via DHL courier service. The material directly received by us therefore we issued to obtain the approval of ADC from local DRAP office." iv. Copy of DHL airway bill has been submitted in the name of AGP (Pvt.) ltd. for Lidocaine hydrochloride. v. Form 6 (License to import raw material for trial production, test & analysis) has been submitted. The Form 6 has been issued on 14-07-2017, whereas batch stability batches were manufactured in October 2016. vi. Commitment to follow Drug Specification Rules, 1978 has been submitted.
	Decision: Registration Board directed the firm to perform tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests". Registration Board decided to constitute following panel for onsite investigation to confirm genuineness/ authenticity of stability data, including tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests" and related documents, import of API, quality, specification, test analysis, facilities etc. • Director DTL Quetta . • Mr. Aslam Shah. • Dr. Saif ur Rehman Khattak, FGA, CDL, Karachi.	

M/s. AGP Limited, Karachi. – 02 Products

S. No.	Molecule	Brand Name of the Product
96.	Calcium Dobesilate……..40mg/g Lidocaine HCl……20mg/g	Doxiproct Ointment

Background:

Registration Board in its 273rd Meeting directed the firm to perform tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests". Registration Board decided to constitute following panel for onsite investigation to confirm genuineness/ authenticity of stability data, including tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests" and related documents, import of API, quality, specification, test analysis, facilities etc.

Composition of Panel:

- Dr. Amanullah Khan, Director Drugs Testing Laboratory, Quetta.
- Dr. Saif-ur-Rehman Khattak, Federal Government Analyst, Central Drug Laboratory, Karachi.
- Mr. Aslam Shah, Senior Manager, Pharmacy & Purchase, Indus Hospital, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire. Objective evidence was done via physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases.

Detail of investigation has been summarized as under:

Q. No.	Question	Observation by panel
1.	Do you have documents confirming the import of Calcium Dobesilate and Lidocaine HCl APIs?	Calcium Dobesilate (already present in firm's inventory since used in an already registered product Doxium Capsules 500mg). However, Firm produced invoice (No. SI1016000559 dated 12.08.2016) of M/s OM pharma Switzerland, and furthermore the firm on routine basis use to import Calcium Dobesilate for their product Doxium Capsules 500mg. The firm has imported 390g of Lidocaine HCl API from Gufic Bioscience Ltd., India. Firm has taken approval from DRAP.
2.	What was the rationale behind selecting the particular manufacturer of APIs?	The rationale behind selecting the API manufacturer for Calcium Dobesilate is the GMP Compliance and the experience for using the same API for their other registered product DOXIUM CAPSULE 500mg. Lidocaine HCl imported from M/s Gufic Bioscience Ltd., India which is GMP compliant manufacturer.
3.	Do you have documents confirming the import of Calcium Dobesilate and Lidocaine HCl APIs and reference standard and impurity standards?	The firm has produced documents confirming the import of APIs and their working standards. However Impurities reference standards were not available.
4.	Do you have certificate of analysis of the APIs, reference standards and impurity standards?	The firm has certificates of analysis for APIs and working standard of APIs only.
5.	Do you have any approval of APIs or GMP certificate of APIs manufacturer issued by regulatory authority of country of origin?	The firm has copy of GMP certificates of APIs manufacturer and approval by concerned regularity authority of country of origin. Calcium Dobesilate: Secretaria De Salud, Comision Federal De Proteccion Contra Reisgos Sanitarios, Mexico manufactured for OM Pharma Switzerland. Lidocaine HCl: Commissioner Food & Drugs Control Administration. Gujarat, India.
6.	Do you use APIs manufacturer method of testing?	The APIs are compendial, the firm has used APIs' Compendial method of testing as follows: Calcium Dobesilate E.P Lidocaine HCl B.P
7.	Do you have stability studies reports on APIs?	The firm has stability studies reports for both the APIs.
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing of APIs has been performed by manufacturers as per SIM method and degradation products have also been quantified by the API manufacturers.
9.	Do you have method for quantifying the impurities in the APIs?	The firm has method for quantifying the impurities in the APIs.

<table>
<tr><td>10.</td><td>Do you have some remaining quantities of the APIs, their reference standard and impurities standards?</td><td>The firm has remaining quantities of the APIs & working standards of APIs only.</td></tr>
<tr><td>11.</td><td>Have you used pharmaceutical grade excipients?</td><td>The firm has used pharmaceutical grade excipients.</td></tr>
<tr><td>12.</td><td>Do you have documents confirming the import of the used excipients?</td><td>Import documents for some of the excipients are available. However, a few excipients were purchased from local markets.
Calcium Dobesilate : Import
Lidocaine HCl : Import
Polysorbatye 80 : Local Purchase

17.	Do you have product development (R&D) section?	The firm has dedicated product development (R&D) section for manufacturing of the product; however routine Quality Control lab has been used for analysis purpose.
18.	Do you have necessary equipment available in product development section for development of Doxiproct Ointment?	The firm has necessary equipment available in product development section for development of Doxiproct Ointment however routine Quality Control has been used for analysis purpose.
19.	Are the equipment in product development section qualified?	The equipment in product development section are qualified.
20.	Do you have proper maintenance / calibration / re-qualification program for the equipment used in PD section?	The firm has proper maintenance / calibration / re-qualification program for the equipment used in Product Development section.
21.	Do you have qualified staff in product development section with proper knowledge and training in product development?	The firm has three technical persons comprise of one Ph.D. and two Pharm-Ds in manufacturing of New Products and three Chemists and one Pharm-D working on analytical side.
22.	Have you manufactured three stability batches for the stability studies of Doxiproct Ointment?	The firm has manufactured three stability batches for the stability studies (at 40°C/75%RH, 30°C/65%RH and 25°C/60%RH) of Doxiproct Ointment with batch number TR-135, TR-142 and TR-143. Each batch has a size of 100 tubes of 15.0g.
23.	What were the criteria for fixing the batch size of stability batches?	The criteria for fixing the batch size of stability batches is the number of tubes required per testing with number of testing frequencies.
24.	Do you have complete record of production of stability batches?	Batch manufacturing records for three (3) trial batches are available.
25.	Do you have protocols for stability testing of stability batches?	The firm has detailed protocols for stability testing of stability batches.
26.	Have you developed and validated the method for testing of stability batches?	The firm has developed and validated the method for testing of stability batches of finished product.
27.	Do you have method transfer studies in case when the method of	Not applicable.

	testing being used by your firm is given by any other lab?	
28.	Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of Calcium Dobesilate and Lidocaine HCl APIs and the finished drug?	The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of Calcium Dobesilate and Lidocaine HCl APIs and the finished product Doxiproct Ointment.
29.	Do your method of analysis stability indicating?	The firm's method of analysis is stability indicating.
30.	Do your HPLC software is 21CFR compliant?	HPLC software is 21CFR Compliant.
31.	Can you show Audit Trail reports on Calcium Dobesilate and Lidocaine HCl testing?	Audit trail on the testing reports are available.
32.	Do you have some remaining quantities o degradation products and stability batches?	The firm has remaining quantities of stability batches for real time stability studies; however there is no quantity of degraded products.
33.	Do you have commitment batches kept on stability testing?	The firm has three commitment batches kept on stability testing for real time stability testing up to 24 months.
34.	Do you have valid calibration status for the equipment used in Doxiproct (Calcium Dobesilate and Lidocaine HCl) Ointment production in analysis?	The firm has valid calibration status for the equipment used in Doxiproct Ointment (Calcium Dobesilate and Lidocaine HCl) production and analysis.
35.	Do proper and continuous monitoring and control are available for stability chamber?	The firm has adequate monitoring and control system for stability chamber.
36.	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Firm has renovated their ointment/cream manufacturing area; however, this section still needs up gradation of HVAC system. Secondary change proper installation of ointment filling machine and utilities.

Conclusions:

On the basis of risk based approach the genuineness / authenticity of stability data submitted by the firm for registration of Doxiproct Ointment (Calcium Dobesilate 40mg/g and Lidocaine HCl 20mg/g) is verifiable to satisfactory level. However, the facilities related to ointment manufacturing area cannot be rated as GMP compliant.

Decision of 276th meeting: Registration Board decided to defer the application for registration of "Doxiproct Ointment (Calcium Dobesilate 40mg/g and Lidocaine HCl 20mg/g)" by M/s. AGP Limited, Karachi in view of the fact that the facilities related to ointment manufacturing area cannot be rated as GMP compliant.

Firm's response: Firm has submitted GMP certificate no. 30/2021-DRAP (K) issue don basis of inspection conducted on 03-06-2021,including Semisolid (Cream/Ointment) section.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**		
361.	**Name and address of manufacturer / Applicant**	**M/s AGP (Private) Limited, B-23, S.I.T.E, Karachi**
	Brand Name +Dosage Form + Strength	Doxiproct Plus Ointment
	Diary No. Date of R& I & fee	Dy.No: 334; Dated 21-010-2011, Rs.15000/- Rs.35,000/- (02-08-2013)

	Previous Remarks of the Evaluator.	• The firm has submitted 26 weeks Accelerated and 26 weeks of Intermediate Stability Study Data for 03 Batches. • There is a significant change in Assay results of Dexamethasone in accelerated stability studies of Batch#. TR-144 i.e. initial results were 107.17% while those at 4th week were 93.12%. • There is a significant change in Assay results of Dexamethasone in accelerated stability studies of Batch#. TR-145 i.e. initial results were 107.25% while those at 6th week were 94.28%. • There is a significant change in Assay results of Dexamethasone in accelerated stability studies of Batch#. TR-146 i.e. initial results were 107.54% while those at 4th week were 94.98%. • Firm has performed test for Identification, Assay, Appearance, Weight of filled tubes and Microbial testing only during stability studies, whereas WHO guidelines for Stability testing of active pharmaceutical ingredients and finished pharmaceutical products recommends as under: • "Topical preparations should be evaluated for clarity, homogeneity, pH, suspendability (for lotions), consistency, viscosity, particle size distribution (for suspensions, when feasible), level of microbial contamination/sterility and weight loss (when appropriate)." Also USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests", recommends tests for "Apparent viscosity" and "Uniformity in Containers" as "Specific Tests For Topically Applied Semisolid Drug Products." • GMP certificate of supplier of Lidocaine HCl is expired. • Commercial invoices for Lidocaine HCl have not been attested by ADC DRAP. • Commitment to follow Drug Specification Rules, 1978 has not been submitted.
	Previous Decision	The case was initially presented in 256th meeting of Registration Board wherein the case was deferred for submission of stability data as per guidelines provided in 251st RB meeting. In 272nd meeting of Registration Board the case was again presented along with stability studies data, wherein Registration Board deferred the case for following observations: i. Firm has performed test for Identification, Assay, Appearance, Weight of filled tubes and Microbial testing only during stability studies, whereas WHO guidelines for Stability testing of active pharmaceutical ingredients

		and finished pharmaceutical products recommends as under: "Topical preparations should be evaluated for clarity, homogeneity, pH, suspendability (for lotions), consistency, viscosity, particle size distribution (for suspensions, when feasible), level of microbial contamination/sterility and weight loss (when appropriate)." Also USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests", recommends tests for "Apparent viscosity" and "Uniformity in Containers" as "Specific Tests For Topically Applied Semisolid Drug Products." ii. GMP certificate of supplier of Lidocaine HCl is expired. iii. Commercial invoice of Lidocaine has not been attested by DRAP. iv. Commitment to follow Drug Specification Rules, 1978 has not been submitted.
	Evaluation of Firm's reply	Firm has replied as under: "We conducted the study only for the major tests because DRAP allows only limited quantity of APIs to be imported for product development. Due to small batch size we cannot perform analysis of all the required tests but tests like clarity, homogeneity and consistency have been covered in appearance of the ointment." Copy of GMP certificate of supplier of Lidocaine hydrochloride i.e. M/s Gufic Life sciences Pvt. Ltd, Gujrat, India issued by FDCA Gujarat has been submitted. The certificate is valid upto 20-07-2019. "Regarding the purchase of Lidocaine hydrochloride, we would like to inform you that our ordered quantity was very small therefore the manufacturer M/s Gufic Biosciences Ltd, India dispatched the material via DHL courier service. The material directly received by us therefore we issued to obtain the approval of ADC from local DRAP office." Form 6 (License to import raw material for trial production, test & analysis) has been submitted. The Form 6 has been issued on 14-07-2017, whereas batch stability batches were manufactured in October 2016. Commitment to follow Drug Specification Rules, 1978 has been submitted.
	Decision: Registration Board directed the firm to perform tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests". Registration Board decided to constitute the following panel for onsite investigation to confirm genuineness/ authenticity of stability data, including tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests" and related documents, import of API, quality, specification, test analysis, facilities etc. • Director DTL Quetta . • Mr. Aslam Shah. • Dr. Saif ur Rehman Khattak, FGA, CDL, Karachi.	

S. No.	Molecule	Brand Name of the Product
97.	Calcium Dobesilate……..40mg/g Lidocaine HCl……20mg/g Dexamethasone Acetate……0.25mg/g	Doxiproct Plus Ointment

Background:

Registration Board in its 273rd Meeting directed the firm to perform tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests". Registration Board decided to constitute the following panel for onsite investigation to confirm genuineness / authenticity of stability data, including tests of "Apparent viscosity" and "Uniformity in Containers" as recommended in USP chapter <3> titled "Topical and Transdermal Drug Products – Product Quality Tests" and related documents, import of API, quality, specification, test analysis, facilities etc.

Composition of Panel:

- Dr. Amanullah Khan, Director Drugs Testing Laboratory, Quetta.
- Dr. Saif-ur-Rehman Khattak, Federal Government Analyst, Central Drug Laboratory, Karachi.
- Mr. Aslam Shah, Senior Manager, Pharmacy & Purchase, Indus Hospital, Karachi.

Scope of investigation:

Investigation of the authenticity / genuineness of data (import of raw material and stability data), manufacturing of stability batches and stability studies on these batches.

Tools for Investigation:

The investigation was conducted by using a structured questionnaire. Objective evidence was done via physical inspection of the facilities for manufacturing and quality control, material used and retained, personnel involved, ongoing studies, printed data and integrity and security of data in respective databases.

Detail of investigation has been summarized as under:

Q.	Question	Observation by panel
1.	Do you have documents confirming the import of Calcium Dobesilate, Lidocaine HCl and Dexamethasone Acetate APIs?	Calcium Dobesilate (already present in firm's inventory since used in an already registered product Doxium Capsules 500mg). However, Firm produced invoice (No. SI1016000559 dated 12.08.2016) of M/s OM pharma Switzerland, and furthermore the firm on routine basis use to import Calcium Dobesilate for their product Doxium Capsules 500mg. The firm has imported 390g of Lidocaine HCl API from Gufic Bioscience Ltd., India and Dexamethasone Acetate 5.0g from Zhejiang Xianju pharmaceutical Co. Firm has taken approval of both APIs from DRAP.
2.	What was the rationale behind selecting the particular manufacturer of APIs?	The rationale behind selecting the API manufacturer for Calcium Dobesilate is the GMP Compliance and the experience for using the same API for their other registered product DOXIUM CAPSULE 500mg. Lidocaine HCl imported from M/s Gufic Bioscience Ltd., India is GMP compliant and similarly the Dexamethasone Acetate imported from M/s Zhejiang Xianju pharmaceutical Co., China which is GMP compliant manufacturer.
3.	Do you have documents confirming the import of Calcium Dobesilate, Lidocaine HCl and Dexamethasone Acetate APIs and reference standard and impurity standards?	The firm has produced documents confirming the import of APIs and their working standards. However Impurities reference standards were not available.
4.	Do you have certificate of analysis of the APIs, reference standards and impurity standards?	The firm has certificates of analysis for APIs and working standard of APIs only.
5.	Do you have any approval of APIs or GMP certificate of APIs manufacturer issued by regulatory authority of country of origin?	The firm has copy of GMP certificates of APIs manufacturer and approval by concerned regularity authority of country of origin. Calcium Dobesilate: Secretaria De Salud, Comision Federal De Proteccion Contra Reisgos Sanitarios, Mexico manufactured for OM Pharma Switzerland. Dexamethason Acetate: China Food and Drug Administration. Lidocaine HCl: Commissioner Food & Drugs Control Administration. Gujarat, India.
6. :	Do you use APIs manufacturer method of testing?	The APIs are compendial, the firm has used APIs' Compendial method of testing as follows: Calcium Dobesilate E.P

		Lidocaine HCl B.P Dexamethasone Acetate B.P
7.	Do you have stability studies reports on APIs?	The firm has stability studies reports for all the three APIs.
8.	If yes, whether the stability testing has been performed as per SIM method and degradation products have been quantified?	The stability testing of APIs has been performed by manufacturers as per SIM method and degradation products have also been quantified by the API manufacturers.
9.	Do you have method for quantifying the impurities in the APIs?	The firm has method for quantifying the impurities in the APIs.
10.	Do you have some remaining quantities of the APIs, their reference standard and impurities standards?	The firm has remaining quantities of the APIs & working standards of APIs only.
11.	Have you used pharmaceutical grade excipients?	The firm has used pharmaceutical grade excipients.
12.	Do you have documents confirming the import of the used excipients?	Import documents for some of the excipients are available. However, a few excipients were purchased from local markets. Calcium Dobesilate : Import Lidocaine HCl : Import Dexamethasone Acetate : Import Polysorbatye 80 : Local Purchase Propyl Gallate : Local Purchase Buthylhydroxyanisole : Local Purchase Anhydrous Citric Acid : Local Purchase Cetyl Alcohol : Local Purchase Polyethylene Glycol 300 : Local Purchase Polyethylene Glycol 1500 : Import Polyethylene Glycol 4000 : Import Propylene Glycol : Local Purchase
13.	Do you have test reports and other records on the excipients used?	The firm has test reports and other records on the excipients used.
14.	Do you have written and authorized protocols for the development of Doxiproct Plus Ointment?	The firm has written and authorized protocols for the development of Doxiproct Plus Ointment.
15.	Have you performed Drug-excipient compatibility studies?	The firm has not performed Drug-excipient compatibility studies as the composition of their ointment is similar to the innovator's product Doxiproct Plus Ointment. Manufactured by OM Pharma, Switzerland.
16.	Have you performed comparative studies?	The firm has performed comparative studies in respect of the following parameters against innovator product DOXIPROCT Plus Ointment, OM Pharma, Switzerland: 1. Physical Appearance 2. Viscosity 3. pH 4. Assay The product of the firm has comparable results with the product of innovator.

Each batch has a size of 100 tubes of 10.0g.</td></tr>
</table>

23.	What were the criteria for fixing the batch size of stability batches?	The criteria for fixing the batch size of stability batches is the number of tubes required per testing with number of testing frequencies.
24.	Do you have complete record of production of stability batches?	Batch manufacturing records for three (3) trial batches are available.
25.	Do you have protocols for stability testing of stability batches?	The firm has detailed protocols for stability testing of stability batches.
26.	Have you developed and validated the method for testing of stability batches?	The firm has developed and validated the method for testing of stability batches of finished product.
27.	Do you have method transfer studies in case when the method of testing being used by your firm is given by any other lab?	Not applicable.
28.	Do you have documents confirming the qualification of equipment / instruments being used in the test and analysis of Calcium Dobesilate, Lidocaine HCl and Dexamethasone Acetate APIs and the finished drug?	The firm has proper documents confirming the qualification of equipment / instruments being used in the test and analysis of Calcium Dobesilate, Lidocaine HCl and Dexamethasone Acetate APIs and the finished product Doxiproct Plus Ointment.
29.	Do your method of analysis stability indicating?	The firm's method of analysis is stability indicating.
30.	Do your HPLC software is 21CFR compliant?	HPLC software is 21CFR Compliant.
31.	Can you show Audit Trail reports on Calcium Dobesilate, Lidocaine HCl and Dexamethasone Acetate testing?	Audit trail on the testing reports are available.
32.	Do you have some remaining quantities o degradation products and stability batches?	The firm has remaining quantities of stability batches for real time stability studies; however there is no quantity of degraded products.
33.	Do you have commitment batches kept on stability testing?	The firm has three commitment batches kept on stability testing for real time stability testing up to 24 months.
34.	Do you have valid calibration status for the equipment used in Doxiproct Plus (Calcium Dobesilate, Lidocaine HCl and Dexamethasone Acetate) Ointment	The firm has valid calibration status for the equipment used in Doxiproct Plus Ointment (Calcium Dobesilate, Lidocaine HCl and Dexamethasone Acetate) production and analysis.

	production in analysis?	
35.	Do proper and continuous monitoring and control are available for stability chamber?	The firm has adequate monitoring and control system for stability chamber.
36.	Do related manufacturing area, equipment, personnel and utilities be rated as GMP compliant?	Firm has renovated their ointment / cream manufacturing section, however, this section still needs upgradation of HVAC system, creation of dispensing booth for dispensing dexamethasone. Secondary change proper installation of ointment filling machine & utilities.

Conclusions:
On the basis of risk based approach the genuineness / authenticity of stability data submitted by the firm for registration of Doxiproct Plus Ointment (Calcium Dobesilate 40mg/g, Lidocaine HCl 20mg/g and Dexamethasone acetate 0.25mg/g) is verifiable to satisfactory level. However, the facilities related to ointment manufacturing area cannot be rated as GMP compliant.

Decision of 276th meeting: Registration Board decided to defer the application for registration of "Doxiproct Plus Ointment (Calcium Dobesilate 40mg/g, Lidocaine HCl 20mg/g and Dexamethasone acetate 0.25mg/g)" by M/s. AGP Limited, Karachi in view of the fact that the facilities related to ointment manufacturing area cannot be rated as GMP compliant.

Firm's response: Firm has submitted GMP certificate no. 30/2021-DRAP (K) issue don basis of inspection conducted on 03-06-2021,including Semisolid (Cream/Ointment) section.

Decision: Approved with Innovator's specifications. The firm shall submit fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.
Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.

IV	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
V	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
VI	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Remarks of Evaluator-I:

Sr. No.	Observations	Response
1	The submitted stability data is till 3rd month time point, please provide stability study data till 6th month time point.	The firm has referred to the earlier submitted stability data of 6th month time point for all three strengths.
2	• Provide complete batch manufacturing record for the applied product along with the calculations for potency adjustment considering the assay value of the drug substance on As-is basis. • Provide detail of manufacturing method for the applied product.	Complete batch manufacturing record has been submitted for three batches of each strength. It is evident from the submitted batch processing record that instead of dispensing the whole API coating solution in excess to overcome the process loss, firm has used 100% excess of Empagliflozin only.

Justification of Overage:

Empator-M 25mg + 1000mg XR Tablet was developed with reference to the Innovator product, **Synjardy 25mg + 1000mg XR Tablet** of MSD, which contains extended-release core of Metformin HCl (1st API) and API coating of immediate release Empagliflozin (2nd API).

The coating process itself, is inevitable to process loss, due to which it is required to add an excess amount of raw materials in the coating solution so that the final landing quantity of API on the core tablet complies with the claimed amount.

Similar case was observed at development stage, during the coating of Empagliflozin on Metformin core, the quantity

of coating solution was gradually increased by hit n trial to comply the landing quantity of API on the tablet in accordance with the label claim.
With reference to the ***WHO Annex 3 Pharmaceutical development of multisource (generic) finished pharmaceutical products***, the excess quantity of API coating solution is justified as the excess is lost during the coating process and it was completely utilized to achieve the required quantity on the tablet after Drug loading stage.
The assay results of API Empagliflozin at release testing and throughout the stability studies, are within the label claimed amount, making it evident that the excess amount of API coating solution was lost during the coating process and was not part of the finished dosage form. The **Assay** results of the stability studies are given as reference:

Justification of dissolution profile:
Martin Dow Limited has developed following strengths of Empagliflozin + Metformin HCl XR tablets for new product registration applications,
Empagliflozin 5 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 12.5 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 10 mg + Metformin HCl 1000 mg XR Tablet
Empagliflozin 25 mg + Metformin HCl 1000 mg XR Tablet
As per the ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products
Bracketing can be applied to studies with multiple strengths of identical or closely related formulations. Examples include but are not limited to (1) capsules of different strengths made with different fill plug sizes from the same powder blend, (2) tablets of different strengths manufactured by compressing varying amounts of the same granulation, and (3) oral solutions of different strengths with formulations that differ only in minor excipients (e.g., colourants, flavourings).
Martin Dow has perfomed Extended-release dissolution profile at core stage before coating of Empator 12.5/1000mg XR and Empator 5/1000mg XR Tablet tablet, meanwhile establishing dissolution profile of Empator 25/1000mg XR Tablet of core stage as per the method of bracketing, and later on batches were found to have the satisfactory results with extended release dissolution profile of Metformin HCl specification at coated stage.

Decision of 326th meeting: Registration board deferred the applications of Empator-M XR Tablet 10mg + 1000mg, Empator-M XR Tablet 5mg + 1000mg & Empator-M XR Tablet 12.5mg + 1000mg for following reasons:

- Scientific justification on the basis of performance based data for using 100% excess of drug substance in the active coating of Empagliflozin.
- Submission of any performance based data to justify that 100% excessive Empagliflozin is required to overcome the process loss during active coating.
- Justification for referring the "ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products" for skipping the in-process test of dissolution of Metformin extended release core, since the cited guideline is intended to address recommendations on the application of bracketing and matrixing to stability studies.

No. of Batches	03		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Empator-M tablet 5mg+500mg (Empaglilozin + Metformin HCl) approved in 312th meeting of Registration Board.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	**Empagliflozin:** Copy of GMP Certificate for RUYUAN HEC Pharm Co., Ltd. (Certificate: 2018024) issued by Shaoguan Food and Drug Administration & valid upto 04-12-2021 is submitted. **Metformin HCl:** Copy of GMP certificate No. New-WHO-GMP/Cert/AD/67318/2018/11/24741 issued on 28/08/2018 valid till 27/08/2021.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Empagliflozin:** Firm has submitted copy of attested invoice (invoice# WIS200034) Dated: 16/04/2020 dy. No. 499 dated 04/05/2020. **Metformin HCl: Copy of attested** Invoice No. MEG2122/1630115 dated 02/04/2021 (diary No. 4247 dated 07/04/2021) imported from IPCA Laboratories limited attested by DRAP Karachi.

4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Record of digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated) is submitted.

Remarks of Evaluator-I:

Sr. No.	Observations	Response
1	The submitted stability data is till 3rd month time point, please provide stability study data till 6th month time point.	The firm has submitted stability summary sheets till 6 months for accelerated and long term stability studies along with the relevant documents.
2	As per submitted dossier, titration method has been used for assay estimation for Metformin HCl while according to latest edition of USP, HPLC method should be used for assay testing, please clarify.	*"The method used for assay estimation of Metformin for finished product by FPP manufacturer is HPLC as per latest edition of USP. API manufacturer has used titration method for assay estimation owing to the previous version of USP monograph".*
3	Provide complete batch manufacturing record for the applied product.	Complete batch manufacturing record is submitted.
4	As per submitted dossier, dissolution tests for Metformin core before coating has not been performed. Clarification is required for not establishing the dissolution profile for the tablet core.	*The Dissolution testing for Metformin HCl was performed at core stage before coating and results were well within specified limits. Since Metformin HCl in all strength have same label claim and same formulation, therefore dissolution profile is performed on film coated stage on risk basis. Satisfactory initial and stability results are also evident on Metformin HCl dissolution performance.* *Following core stage results are also attached herewith.* *Batch No. NPD-T-1108-T (Empagliflozin 5mg + Metformin HCl 1000 mg XR Tablet)* *Batch No. NPD-T-1107-T (Empagliflozin 12.5mg + Metformin HCl 1000 mg XR Tablet)*
5	Provide detail of manufacturing method for the applied product.	The firm has submitted complete batch manufacturing record for the applied product.

6. Scientific justification is required regarding addition of 100% overage for Empagliflozin for compensating the loss during coating.

Response:

Empagliflozin + Metformin HCl 25 + 1000 mg XR tablet is an API (Empagliflozin) coated tablet. Hence, the API is part of the coating suspension. As per label claim, 25 mg of Empagliflozin is coated on the tablet as mentioned in the Batch Production Record of Empagliflozin + Metformin HCl 25 + 1000 mg XR tablet, pp# 25 and is evident through the tablet weight that is 1479.0 mg, pp #43 95mg was coated on the tablet of 1384.0 mg thus taking it to 1479.00mg. Breakup is given below:

API Coating			
S.No.	*Raw Material*	*Quantity/tablet*	*Quantity/Batch*
1	*Empagliflozin*	*25.000 mg*	*250.000 g*
2	*Sheffcoat D white 5Y00692*	*42.000 mg*	*420.000 g*
3	*Talc*	*3.000 mg*	*30.000 g*
4	*Polysorbate 80 (Tween 80)*	*20.000 mg*	*200.000 g*

5	*Polyethylene Glycol 6000*	*5.000 mg*	*500.000 g*

Thus, no overages of the API are added which can be seen via the content increase of tablet before and after API coating mentioned above.

- *The 100% excess quantity mentioned in the BPR is for the clarity of the reviewer and the document itself.*
- *Excess quantity was added in coating material i.e., Sheffcoat D white 5Y00692, Polyethylene Glycol 6000, Talc, Polysorbate 80 (Tween 80) along with it is the **API Empagliflozin** to compensate for the process loss faced while Coating operation is being carried out, as it is an API coated tablet.*

*As it is understood that losses are observed/experienced during coating and thus extra quantities are added as a recompense. These extra quantities do not become part of the final film coated product, as is evident in the **Assay** results of **Empagliflozin** which are well within limits as per label claim.*

Decision of 322nd meeting: Registration Board deferred the case for;

- Scientific justification regarding addition of 100% overage for Empagliflozin for compensating the loss during coating.
- Clarification for not establishing the dissolution profile of the extended release core tablet before coating.

Firm's response:

Justification of Overage:

Empator-M 25mg + 1000mg XR Tablet was developed with reference to the Innovator product, **Synjardy 25mg + 1000mg XR Tablet** of MSD, which contains extended-release core of Metformin HCl (1st API) and API coating of immediate release Empagliflozin (2nd API).

The coating process itself, is inevitable to process loss, due to which it is required to add an excess amount of raw materials in the coating solution so that the final landing quantity of API on the core tablet complies with the claimed amount.

Similar case was observed at development stage, during the coating of Empagliflozin on Metformin core, the quantity of coating solution was gradually increased by hit n trial to comply the landing quantity of API on the tablet in accordance with the label claim.

With reference to the ***WHO Annex 3 Pharmaceutical development of multisource (generic) finished pharmaceutical products***, the excess quantity of API coating solution is justified as the excess is lost during the coating process and it was completely utilized to achieve the required quantity on the tablet after Drug loading stage.

The assay results of API Empagliflozin at release testing and throughout the stability studies, are within the label claimed amount, making it evident that the excess amount of API coating solution was lost during the coating process and was not part of the finished dosage form. The **Assay** results of the stability studies are given below as reference:

Batch No. NPD-T-1616-S			
Real Time			
Assay (Empagliflozin**)**	**0**	**3M**	**6M**
90.0 %-110.0 %	101.5 %	101.7 %	97.8 %
Accelerated			
90.0 %-110.0 %	101.5 %	101.9 %	98 %

Justification of dissolution profile:

Martin Dow Limited has developed following strengths of Empagliflozin + Metformin HCl XR tablets for new product registration applications,

Empagliflozin 5 mg + Metformin HCl 1000 mg XR Tablet

Empagliflozin 12.5 mg + Metformin HCl 1000 mg XR Tablet

Empagliflozin 10 mg + Metformin HCl 1000 mg XR Tablet

Empagliflozin 25 mg + Metformin HCl 1000 mg XR Tablet

As per the ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products

Bracketing can be applied to studies with multiple strengths of identical or closely related formulations. Examples include but are not limited to (1) capsules of different strengths made with different fill plug sizes from the same powder blend, (2) tablets of different strengths manufactured by compressing varying amounts of the same granulation, and (3) oral solutions of different strengths with formulations that differ only in minor excipients (e.g., colourants, flavourings).

Martin Dow has perfomed Extended-release dissolution profile at core stage before coating of Empator 12.5/1000mg

XR and Empator 5/1000mg XR Tablet tablet, meanwhile establishing dissolution profile of Empator 25/1000mg XR Tablet of core stage as per the method of bracketing, and later on batches were found to have the satisfactory results with extended release dissolution profile of Metformin HCl specification at coated stage.

Decision of 326th meeting: Registration board deferred the application for following reasons:

- Scientific justification on the basis of performance based data for using 100% excess of drug substance in the active coating of Empgaliflozin.
- Submission of any performance based data to justify that 100% excessive Empagliflozin is required to overcome the process loss during active coating.
- Justification for referring the "ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products" for skipping the in-process test of dissolution of Metformin extended release core, since the cited guideline is intended to address recommendations on the application of bracketing and matrixing to stability studies.

Firm's reply:

Sr.#	Observations
1.	• Scientific justification on the basis of performance based data for using 100% excess of drug substance in the active coating of Empagliflozin. • Submission of any performance based data to justify that 100% excessive Empagliflozin is required to overcome the process loss during active coating.

Firm's response:

- The excess quantity in the coating solution was achieved on hit and trial basis.
- Tablet coating is a process of applying a layer of polymer on rotating tablet in a coating pan which is highly susceptible to loss due to atomization, solvent evaporation, removal by exhaust system and accumulation on the surface of coating pan. So, the coating suspension/solution is generally prepared in excess to overcome these losses and achieve the desired amount of coating.
- To decide the percentage of film coating for **Empator-M XR tablet range**, various patents and coating applications were studied. As mentioned in **Aulton's Pharmaceutics – the design and manufacture of medicines Third Edition (p#502)**, coatings are up to 2-3% normally, but can deviate as per requirements.
- Keeping the above in view, a theoretical weight of each coating layer and the final coated tablet was determined to load a specific quantity of coating material and achieve the claimed amount of API-Empagliflozin on each tablet.

1st Trial batch:

The initial trial formulation was developed according to the excipients used by the Innovator and the coating suspension was prepared with 50% excess considering the losses during coating operation as described above.

Batch no.	Excess quantity (%)	Remarks
NPD-T-1135-T (B)	50% (initial)	Before achieving target theoretical weight, the coating suspension got finished. Hence, same quantity of materials was dispensed again, and suspension was prepared to complete coating.
	50% (re-dispensed)	
Total	100%	

The BPR of the above-mentioned batch is provided, which shows that during coating process the coating suspension was fully consumed, however, the theoretical weight of the tablet was not achieved. Hence, the coating suspension was dispensed again, coating was continued, and the desired theoretical weight was achieved.

2nd Trial batch:

The second trial was manufactured and, from the experience learned from 1st trial, the initial quantity of coating material was dispensed with only 75% excess to try to reduce the extra material, avoid the need for re-dispensing and achieve the desired theoretical weight in one-go.

Batch no.	Excess quantity %	Remarks
NPD-T-1135-T (D)	75% (initial)	Before achieving target weight, coating suspension was finished. Hence, same quantity of materials was dispensed again, and suspension was prepared to complete coating.
	75% (re-dispensed)	
Total	150%	

However, as mentioned in its provided BPR, the coating suspension was without reaching the desired theoretical weight. Hence, the coating suspension was dispensed again, coating was continued, and the desired theoretical weight was achieved while some of the coating suspension was left.

3rd Trial batch:

A third trial was manufactured and, from the experience learned from 1st and 2nd trials, the initial quantity of coating material was dispensed with only 85% excess to again try to reduce the extra material, avoid the need for re-dispensing and achieve the desired theoretical weight in one-go.

Batch no.	Excess quantity %	Remarks
NPD-T-1135-T (E)	85% (initial)	Before achieving target weight, coating suspension was finished. Hence, same quantity of materials was dispensed again, and suspension was prepared to complete coating.
	85% (Re-dispensed)	
Total	170%	

However, as mentioned in its provided BPR, the coating suspension was fully consumed without reaching the desired theoretical weight. Hence, the coating suspension was dispensed again, coating was continued, and the desired theoretical weight was achieved while some of the coating suspension was left.

4th Trial batch:

As per the experiences gained from previous trials, another trial batch was manufactured with 100% excess in coating suspension.

Batch no.	Excess quantity %	Remarks
NPD-T-1382-T (C)	100%	Target weight was achieved without the need of re-dispensing
NPD-T-1426-T (A)	100%	Target weight was achieved without the need of re-dispensing
NPD-T-1456-T (M)	100%	Target weight was achieved without the need of re-dispensing.

- The samples were tested with satisfactory results. The BPRs are provided. Report of satisfactory trial (1456 M) is also provided as same formulation and process controls were carried to stability batches.
- The final weight of tablets and utilization of coating suspension was monitored closely during development in order to reduce the excess as much as possible. And, in light of the development data obtained from the manufacturing and analysis of all the above-mentioned batches, the final formulation was fixed with 100% excess.
- Any excess quantity is lost during the coating process and final landing quantity of API on the tablets remains well within the specified limits and claimed amount, evident from the analytical reports, and thus, will not reach the patients. As patient safety & efficacy is MDL's prime concern.
- Moreover, from the knowledge and experience of commercial manufacturing, it can be expected that as the batch size and machine capacity will increase, the percentage of excess quantity that will be required to coat a commercial batch will reduce.

2. Justification for referring the "ICH Q 1 D guideline of Bracketing and Matrixing designs for Stability Testing of Drug Substances and Drug Products" for skipping the in-process test of dissolution of Metformin extended release core, since the cited guideline is intended to address recommendations on the application of bracketing and matrixing to stability studies.

Firm's response:

The Dissolution Profile on Metformin HCl extended release core tablets is performed on initial trail batches. The spcecification of product is adopted on the basis of FDA Dissolution Methods Database, Center of Drug Evaluation Application No. 208658Orig1s000" Chemistry Review & USP monograph Specifiaction of Metformin HCl extended release tablet.

The methdology adopted was based on the refrences of Metformin HCl core tablet which has following stages:

First stage:

In first stage of product devleopment, Metformin HCl extended release tablet at Core Stage was developed and assesed as mentioned in table below. All tablets in the Empagliflozin + Metformin HCl XR tablet range have the exact same core of Metformin HCL 1000mg.

S.No	Product Name	Batch	Specification	Dissolution on core Performed
			Dissolution (Metformin HCl)	
01	Empagliflozin + Metformin HCl XR Tablet 5 + 1000 mg	NPD-T-1108-T	(NMT 22 - 42% in 2 hours)	✓
			(NMT 49 - 69% in 4 hours)	

			(Not less than 85% (Q=80%) in 12 hours)	
02	Empagliflozin + Metformin HCl XR Tablet 12.5 + 1000 mg	NPD-T-1107-T	(NMT 22 - 42% in 2 hours)	✓
			(NMT 49 - 69% in 4 hours)	
			(Not less than 85% (Q=80%) in 12 hours)	

As the core of Metformin HCl is exactly same in all 4 strengths of this range, and considering the satisfactory results of Dissolution testing of core tablet in 1st stage, the Comparative Dissolution Profile on the final coated tablet was performed on all strengths in comparison with the Innovator Product **"Synjardy XR Tablet"** of **Boehrenger Ingelheim** (as given in the table below) and comparable results were acheived. Satisfactory stability reslults of all strengths are well within specified limits.

S.No	Product Name	Batch	Comparitive Dissolution Profile	Innovator Batch
01	Empagliflozin + Metformin HCl XR Tablet 5 + 1000 mg	NPD-T-1656-S*	Yes	3191437
		NPD-T-1660-S	-	-
		NPD-T-1661-S	-	-
02	Empagliflozin + Metformin HCl XR Tablet 10 + 1000 mg	NPD-T-1614-S*	Yes	3188976
		NPD-T-1623-S	-	-
		NPD-T-1624-S	-	-
03	Empagliflozin + Metformin HCl XR Tablet 12.5 + 1000 mg	NPD-T-1615-S*	Yes	3188979
		NPD-T-1625-S	-	-
		NPD-T-1626-S	-	-
04	Empagliflozin + Metformin HCl XR Tablet 25 + 1000 mg	NPD-T-1573-S*	Yes	3189877
		NPD-T-1616-S	-	-
		NPD-T-1617S	-	-

*Representative stability batch

To establish the analytical target profile (ATP) of products the knowledge, experience and referance research publication play an important role in setting method specification on identified CQA (Critical Quality Attributes). All tests are bieng perfomed to assure the product quality attributes. The use of ICH Q1D is just to understand the scope of ICH Q14. Section 4. **"Knowledge and risk management in Anlytical Procedure Development and Continual Improvement"**

All future and commercial batches will be tested for dissolution and assay at core stage also as per compliance with quality guidelines.

Decision: Registration Board approved the applications of Empator-M XR Tablet 10mg + 1000mg, Empator-M XR Tablet 5mg + 1000mg, Empator-M XR Tablet 12.5mg + 1000mg & Empator-M XR Tablet 25mg+1000mg. Registrationletter will be issued upon submission of protocol for in-process testing including dissolution test to establish dissolution profile of metofmrin HCl at core stage.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Firm's response: Firm has submitted request for withdrawal of Form 5-D application of Colimate 2MIU applied on Form 5.	
	Decision: Registration Board accede with the request of the firm and declared the application as disposed of.	

Agenda of Evaluator PEC-III

Case No. 01 Registration applications of CTD cases

a. Cases of Export Facilitation

M/s Welmark Pharmaceuticals
Depauty Director PRV/EFD vide its letter dated 2nd June 2023 informed that in pursuance of decision of 133rd meeting of the Authority wherein it was decided that for each 100,000 USD worth of export during a fiscal year one molecule will be considered on priority basis. In compliance to this, M/s Welmark Pharmaceuticals, Hattar has achieved the benchmark of more than 100,000 USD during the financial year 2022-2023. Accordingly, the firm has requested for priority consideration of the following molecule

371.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Welmark Pharmaceuticals, Plot No. 122, Block B, Phase V, Industrial Estate Hattar District Haripur.**
	Name, address of Manufacturing site.	M/s Weather Folds Pharmaceuticals Plot No. 69/2, Block B, Industrial Estate, Hattar, Haripur.
	Status of the applicant	☐ Manufacturer ☐ Importer ☒ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm has submitted copy of GMP certificate

		of M/s Weather Folds Pharmaceuticals, Hattar issued on the basis of inspection dated 12-10-2022. The firm has submitted copy of GMP certificate of M/s Welmark Pharmaceuticals, Hattar issued on the basis of inspection dated 11-11-2021.
	Evidence of approval of manufacturing facility	The firm has submitted copy of GMP certificate of M/s Weather Folds Pharmaceuticals, Hattar issued on the basis of inspection dated 12-10-2022. The certificate specifies Dry powder injection (Cephalosporin) section.
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13763: 02-06-2023
	Details of fee submitted	PKR 75,000/-: 01-06-2023
	The proposed proprietary name / brand name	**CEFZECT 2.5gm Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial Contains: Ceftazidime (as pentahydrate)……2000mg Avibactam (as sodium salt)……500mg
	Pharmaceutical form of applied drug	White to off white color sterile powder for injection filled in glass vials.
	Pharmacotherapeutic Group of (API)	Cephlosporin
	Reference to Finished product specifications	Innovator's
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	**(USFDA** Approved)
	For generic drugs (me-too status)	Zavicefta Injection by Pfizer (Reg No. 106848)
	Name and address of API manufacturer.	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District, Zhuhai Guangdong China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and

		stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 6 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Zavicefta Injection.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and analytical method validation of the drug product.

STABILITY STUDY DATA

Manufacturer of API	Zhuhai United Laboratories Co. Ltd. No. 2428, Anji Road, Sanzao Town, Jinwan District, Zhuhai Guangdong China.

Description of Pack (Container closure system)	Glass vials		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 3, 4, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T-01	T-02	T-03
Batch Size	200 vials	200 vials	200 vials
Manufacturing Date	08-2022	08-2022	08-2022
Date of Initiation	16-08-2022	16-08-2022	16-08-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their previous PSI inspection conducted for the product SACUVAL Tablet conducted on 01-09-2020 which was considered by Registration Board in its 296th meeting.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate (No. GD20180909) issued by CFDA China. The certificate is valid till 05-12-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Goods Declaration (GD) dated 16-05-2022 which mention 2Kg

		ceftazidime avibactam Batch No. 202112001.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted HPLC audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Observations communicated	Response by the firm
1.	Specify the details of applicant firm in section 1.3.1, since you have mentioned M/s weather folds pharmaceuticals as applicant, while the fee challan specifies that the applicant is M/s Welmark Pharmaceuticals.	Written mistakenly revised and correct resubmitted
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Copies of the drug substance specifications and analytical procedures used for routine testing of Drug substance /Active Pharmaceutical Ingredient by both Drug substance and Drug Product manufacturer is submitted.
3.	The specifications of API submitted in section 3.2.S.4.1 specifies that acceptance criteria for ceftazidime is NMT 68.5%, while the acceptance criteria for ceftazidime mentioned in API of batch 202112001 is 68.5% - 75%. Clarify how the specifications are different.	In S part data taken from DMF while received COA along with API shows limits range.
4.	Submit verification studies of the drug substance performed by drug product manufacturer, since you have only submitted a singke table for the results without any protocols and detailed results of each test of verification studies.	Verification studies of the drug substance performed by drug product manufacturer is submitted.
5.	The COA of API manufacturer specifies that the acceptance criteria for ceftazidime is 68.5% - 75% and avibactam is 17.1% to 18.9%, while your own COA for the same batch specifies that the acceptance criteria for ceftazidime and avibactam is 90% - 110%. Clarify how the drug product manufacturer can have different acceptance criteria.	We consider API as finish product that's why we give limits of finish product.
6.	Submit COA of reference standard actually used in the analysis of drug substance and drug product.	Submitted by the firm.
7.	Submit stability study data of drug substance till claimed shelf life, since you have only submitted stability data for 6 months.	Firm has submitted stability study data of drg substance till 24 months
8.	Specify the diluent along with its exact quantity which will be supplied with this product.	Water for injection
9.	Submit image/picture/snapshot claearly indicating batch number and expiry date of the reference product against which pharmaceutical equivalence studies have been conducted, since the submitted pictures do not show these details.	Submitted by the firm
10.	Submit microbiological properties in section	Submitted by the firm

	3.2.P.2.5 as per ICH requirement, since the submitted description doe not provide the required information.	
11.	Submit compatibility studies of the apllied product with the recommended diluent in section 3.2.P.2.6.	Already performed by innovators
12.	Justify why sodium content test is not included in the drug product specifications.	No sodium content test performed by innovator and API Manufacturer.
13.	Submit complete method of analysis of the drug product, since the submitted method is incomplete and not properly printed.	Submitted by the firm
14.	Submit complete report of validation studies of the drug product, since you have only submitted a singke table for the results without any protocols and detailed results of each test of verification studies.	Submitted by the firm
15.	Your batch size is 200 vials and your own calculation specifies that total vials required to carry out all physical and chemical tests during stability studies are 216 vials and that you have 360 injections as retained samples. Clarification is required in this regard.	Mistakenly written revised and correct data sheet resubmitted.
16.	Submit stability study data in section 3.2.P.8.3 as per the 6 points checklist as mentioned in the CTD guidance document, since you have randomly submitted the data without following the recommendations of guidance document.	Submitted by the firm
17.	Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 293rd meeting, which includes the following documents: o Reference of previous approval of applications with stability study data of the firm (if any) o Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin. o Documents for the procurement of API with approval from DRAP (in case of import). o Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc. o Compliance Record of HPLC software 21CFR & audit trail reports on product testing o Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted by the firm
18.	You have manufactured three batches while the BMR indicates that the filling of all the three batches was carried out on 16-08-2022 at the same time during 2.00 to 3.00 PM. Clarification is required how three batches can be filled at a time.	Capacity of vial filling machine 1000 per hour same container filled continuously.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Name, address of Manufacturing site.	M/s Horizon Healthcare (Pvt) Ltd. Plot No. 33, Sundar Industrial Estate, Lahore.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm has submitted copy of GMP certificate issued on the basis of inspection dated 14-10-2021.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of renewal of DML dated 07-06-2022 which specifies Tablet section (General).
	Status of application	☒ New Drug Product (NDP) ☐ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2257: 24-01-2023
	Details of fee submitted	PKR 75,000/-: 16-01-2023
	The proposed proprietary name / brand name	**ROXATA Tablet 20mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet Contains: Roxadustat……20mg
	Pharmaceutical form of applied drug	Red colored oval shaped film coated tablet
	Pharmacotherapeutic Group of (API)	Other antianemic preparations
	Clinical Indication	Evrenzo is indicated for treatment of adult patients with symptomatic anaemia associated with chronic kidney disease (CKD).
	Reference to Finished product specifications	Innovator's specs
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Evrenzo Tablet **(MHRA** Approved)
	For generic drugs (me-too status)	Not Applicable
	Name and address of API manufacturer.	Dr. Reddy's Laboratories Limited Chemical Technical operations Unit-VI, APIIC Industrial Estate, Pydibhimavaram village, Ranasthalam Mandal, Srikakulam District 532409, Andhra Pradesh, India.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted results of pharmaceutical equivalence for the quality tests for their product against Evrenzo tablet 20mg manufactured by M/s Astellas Pharma Ltd. Firm has submitted results of CDP for their product against Evrenzo tablet 20mg manufactured by M/s Astellas Pharma Ltd in 3 dissolution medium.
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their last product specific inspection conducted for "Empazon 10mg & 25mg Tablet", which was conducted on 1st June, 2021, and was presented in 307th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR Compliant. • Firm has demonstrated Audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh dated 18-02-2022. The certificate was valid till 1 year. Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh India dated 20-06-2022. The certificate is valid for 3 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice cleared by AD (I&E) DRAP dated 24-02-2022. The invoice specifies 1kg Roxadustat.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

•

Sr. No	Shortcomings communicated	Response by the firm
1.	Specify the exact polymorphic form of the drug substance used in the development of this product.	
2.	Specify the concentration of each solution used in the verification studies of the analytical method of drug substance.	
3.	Justify the results of CDP studies in which the drug product shows more than 85% release in 0.1N HCl and 4.5pH buffer in 30 minutes, since the innovator's product review reveals that very less drug release is	

	observed in 0.1N HCl and 4.5 buffer.	
4.	Provide image / snapshot of the pack of the reference product against which pharmaceutical equivalence and CDP studies were conducted.	
5.	Provide scientific rationale for selection of dissolution parameters and acceptance criteria.	
6.	Provide BMR for the three stability batches.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Last product specific inspection of firm was conducted for "Rofair 500mcg Tablet", which was conducted on 25th June, 2019, and was presented in 290th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR Compliant. • Firm has demonstrated Audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 License to import drugs for clinical trials examination, test of analysis dated 30-06-2020 for 0.5Kg roxadustat.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has not submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

Sr. No	Shortcomings communicated	Response by the firm
1.	Specify the exact polymorphic form of the drug substance used in the development of this product.	
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by	

	Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
3.	The analytical method of the drug substance specifies that the concentration of standard and sample solution is 0.04mg/ml, while in verification studies the accuracy test is performed at a concentration range of 0.16mg/ml to 0.24mg/ml. Justify how this verification studies are applicable to the analytical method.	
4.	The concentration of the sample solution used in precision studies is different from that concentration of standard and sample solution in assay method. Clarify how you have developed the protocols for verification studies.	
5.	Justify the accelerated stability studies of the drug substance performed till 12 months.	
6.	Provide master formulation as per the CTD guidance document in section 3.2.P.1	
7.	Justify the performance of CDP studies in which time points for 0.1N HCl and 4.5pH buffer is not taken as per WHO guidelines, since you have stopped the study samples before 85% drug release or before plateau is achieved.	
8.	Provide scientific rationale for selection of dissolution parameters and acceptance criteria.	
9.	Provide results of validation studies of the analytical method of drug product along with complete protocols as per ICH guidelines. Provide tabulated results for each test along with concentration of each solution and number of replicates used to study the average.	
10.	Submit valid GMP certificate / DML of the drug substance manufacturer, since the submitted GMP certificate is issued by Linhai Food and Drug Association which is not the relevant regulatory authority.	
11.	Submit evidence of import of drug substance since you have only submitted Form 6, License to import which does not confirm that the drug substance has been imported or not.	
12.	As per submitted Form 6, license to import, 0.5Kg of roxadustat was allowed for import while as per your COA of raw material the quantity of the raw material received and tested was 2.7gm. Clarification is required in this regard.	
13.	Provide BMR for the three stability batches.	

Decision: Registration Board deferred the case for submission of reply to the above cited

shortcomings and evaluation by PE&R Division.

Manufacturing Date	09-2020	10-2020	10-2020
Date of Initiation	22-10-2020	22-10-2020	22-10-2020
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Last product specific inspection of firm was conducted for "Rofair 500mcg Tablet", which was conducted on 25th June, 2019, and was presented in 290th meeting of Registration Board. The report confirms following points: • The HPLC software is 21CFR Compliant. • Firm has demonstrated Audit trail reports of testing.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form 6 License to import drugs for clinical trials examination, test of analysis dated 30-06-2020 for 0.5Kg roxadustat.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has not submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

Sr. No	Shortcomings communicated	Response by the firm
1.	Specify the exact polymorphic form of the drug substance used in the development of this product.	
2.	Submit data in section 3.2.S.4.1 and 3.2.S.4.2 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	
3.	The analytical method of the drug substance specifies that the concentration of standard and sample solution is 0.04mg/ml, while in verification studies the accuracy test is performed at a concentration range of 0.16mg/ml to 0.24mg/ml. Justify how this verification studies are applicable to the analytical method.	
4.	The concentration of the sample solution used in precision studies is different from that concentration of standard and sample solution in assay method. Clarify how you have developed the protocols for verification	

	studies.	
5.	Justify the accelerated stability studies of the drug substance performed till 12 months.	
6.	Provide master formulation as per the CTD guidance document in section 3.2.P.1	
7.	Justify how drug release at a later point is less than the drug release at earlier time point i.e. the average drug release after 30 mins in 0.1N HCl was 19.91% while the drug release in same medium after 45 minutes become 15.29%.	
8.	Justify the performance of CDP studies in which time points for 0.1N HCl and 4.5pH buffer is not taken as per WHO guidelines, since you have stopped the study samples before 85% drug release or before plateau is achieved.	
9.	Provide scientific rationale for selection of dissolution parameters and acceptance criteria.	
10.	Provide results of validation studies of the analytical method of drug product along with complete protocols as per ICH guidelines. Provide tabulated results for each test along with concentration of each solution and number of replicates used to study the average.	
11.	Submit valid GMP certificate / DML of the drug substance manufacturer, since the submitted GMP certificate is issued by Linhai Food and Drug Association which is not the relevant regulatory authority.	
12.	Submit evidence of import of drug substance since you have only submitted Form 6, License to import which does not confirm that the drug substance has been imported or not.	
13.	As per submitted Form 6, license to import, 0.5Kg of roxadustat was allowed for import while as per your COA of raw material the quantity of the raw material received and tested was 2.7gm. Clarification is required in this regard.	
14.	Provide BMR for the three stability batches.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their previous PSI inspection conducted for the product Dexlan DR Capsule 30 and 60mg conducted on 26-08-2019 which was considered by Registration Board in its 294th meeting. The Board approved the case and following things were noted in the inspection report: • HPLC used in the stability studies of current products was gradient and not 21CFR 11 compliant. • The audit trail was not active on the testing reports and log of data was available in the HPLCs. The data was also confirmed through record, chromatograms and logbooks.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh India dated 20-06-2022. The certificate is valid for 3 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate dated 13-07-2022 specifying import of 1.3Kg Roxadustat (Form A).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA,	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.

	summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

Sr. No	Shortcomings communicated	Response by the firm
1.	You have used Form A polymorphic form of the drug substance, provide scientific evidence that the same polymorphic form is also used by the innovator's product.	
2.	Submit complete accelerated stability studies of the drug substance, since the submitted studies are only till 2 months.	
3.	Provide details about the manufacturer of the innovator's product against which pharmaceutical equivalence and CDP studies were conducted.	
4.	The CDP studies at 6.8pH phosphate buffer shows that more than 85% drug is released at 10 minutes' time point, while in dissolution studies where the dissolution medium is same i.e. 6.8pH phosphate buffer, the acceptance criteria is NLT 75%(Q) in 30 minutes. Provide scientific justification how your dissolution method is discriminatory in nature.	
5.	Specify the exact date of initiation of stability studies for each batch instead of mentioning the month.	
6.	Provide BMR for the three stability batches.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their previous PSI inspection conducted for the product Dexlan DR Capsule 30 and 60mg conducted on 26-08-2019 which was considered by Registration Board in its 294th meeting. The Board approved the case and following things were noted in the inspection report: • HPLC used in the stability studies of current products was gradient and not 21CFR 11 compliant. • The audit trail was not active on the testing reports and log of data was available in the HPLCs. The data was also confirmed through record, chromatograms and logbooks.

2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Drugs Control Administration Government of Andhra Pradesh India dated 20-06-2022. The certificate is valid for 3 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate dated 13-07-2022 specifying import of 1.3Kg Roxadustat (Form A).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

Sr. No	Shortcomings communicated	Response by the firm
1.	You have used Form A polymorphic form of the drug substance, provide scientific evidence that the same polymorphic form is also used by the innovator's product.	
2.	Submit complete accelerated stability studies of the drug substance, since the submitted studies are only till 2 months.	
3.	Provide details about the manufacturer of the innovator's product against which pharmaceutical equivalence and CDP studies were conducted.	
4.	The CDP studies at 6.8pH phosphate buffer shows that more than 85% drug is released at 10 minutes' time point, while in dissolution studies where the dissolution medium is same i.e. 6.8pH phosphate buffer, the acceptance criteria is NLT 75%(Q) in 30 minutes. Provide scientific justification how your dissolution method is discriminatory in nature.	
5.	Specify the exact date of initiation of stability studies for each batch instead of mentioning the month.	
6.	Provide BMR for the three stability batches.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

383.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s CCL Pharmaceuticals (Pvt) Ltd. 62-Industrial Estate, Kot Lakhpat, Lahore**
	Name, address of Manufacturing site.	M/s CCL Pharmaceuticals (Pvt) Ltd. 62-Industrial Estate, Kot Lakhpat, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- On October 11, 2019, the U.S. Food and Drug Administration approved a new drug application for Reyvow (lasmiditan) tablets for oral use. Lasmiditan is chemically known as [2,4,6-trifluoro-*N*-(6-(1-methylpiperidine-4-carbonyl)pyridine-2-yl-benzamide]. Thereafter, the Department of Health and Human Services provided the Drug Enforcement Administration (DEA) with a scheduling recommendation to place **lasmiditan in schedule V of the Controlled Substances Act** (CSA). In accordance with the CSA, as revised by the Improving Regulatory Transparency for New Medical Therapies Act, DEA is hereby issuing an interim final rule placing lasmiditan, including its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible, in schedule V of the CSA.

Sr. No	Shortcomings / Observations	Response by the firm
1.	Specify the exact polymorphic form of drug substance used in the development of applied product.	
2.	The quality review depicts that particle size distribution of the drug substance was controlled by innovator's product. Justify how you have developed your product without controlling the particle size.	
3.	Justify how drug release at a later point is less	

	than the drug release at earlier time point i.e. the average drug release after 20 mins in 0.1N HCl was 100.2% while the drug release in same medium after 30 minutes become 99.7%, similarly average drug release in 6.8pH buffer after 15 minutes was 100.1% while it declined to 99.4% after 20 minutes and 98.8% after 30 minutes.	
4.	Justify the acceptance criteria if disintegration test i.e. NMT 30 minutes while more than 80% drug is dissolved within 15 minutes.	
5.	The quality review of the innovator's product depicts that disintegration test was used by the innovator's product since it has more discriminatory power as compared to the dissolution test. While you have used dissolution test and kept a wide acceptance criteria of disintegration test to compromise its discriminatory power. Clarify how your specifications can be considered equivalent to that of the innovator's product and how batch to batch consistency in drug release be ensured.	
6.	Submit valid GMP certificate / DML of the manufacturer of drug substance, issued by relevant regulatory authority of the country of origin since the submitted GMP certificate is issued by Guangdong pharmaceutical industry association which is not a concerned regulatory authority.	
7.	Specify the exact date of initiation of stability studies for each batch instead of mentioning the month.	

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division. Moreover, the Board also decided that the case shall be forwarded to Controlled Drug Division for their comments on the scheduling of the drug by USFDA.

Date of Initiation	01-03-2023	01-03-2023	01-03-2023
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Firm has referred to their previous PSI inspection conducted for the product Dapazin-M 5/1000 mg Tablet which was considered by Registration Board in its 307th meeting which confirms following: • Firm has 21 CFR compliant HPLC system • Audit trail reports were available • Proper and continuous monitoring record for stability chamber is available along with backup generator.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML of the firm (No. Yu 20150075) issued by NMPA China and also verified online from NMPA database. The certificate is valid till 09-08-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of clearance certificate issued by AD (I&E) dated 02-11-2022 specifying 35gm.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted HPLC audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

- The applied product falls under the pharmacological class of L01 as well as D11, while Registration Board in its 297th meeting decided to allow manufacturing of drugs falling in L01 class in anticancer section only. Clarification is required regarding manufacturing of the applied product in general section.

- The innovator's product contains 15mg roxulitinib as phosphate per gram of cream while you have applied 15mg roxulitinib phosphate per gram. Revise your label claim along with submission of full fee of registration.
- Specify the exact concentration of each solution used in the verification studies of the analytical method of drug substance performed by drug product manufacturer.
- Submit CoA of reference standard actually used in the analysis.
- Submit stability study data of drug substance till assigned shelf life since the submitted data is for 12 months only.
- Submit image / picture / snapshot of the innovator's product against which pharmaceutical equivalence and CDP studies were conducted.
- FDA review report of the innovator's product reveals that "The applicant has developed and validated an in-vitro release testing (IVRT) method using a vertical diffusion cell apparatus which will mainly be used for the determination of comparability drug product if post-approval manufacturing changes are made. The proposed IVRT method is not intended for routine release and stability testing". Justify how comparability of your formulation can be made with the innovator's product.
- Specify the exact concentration of each solution used in the verification studies of the analytical method of drug product.
- Submit stability study data till 6 moths, since only 3month stability data is submitted.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division. Moreover, the Board also decided that further deliberation shall be made in upcoming meeting regarding manufacturing requirements for drugs having multiple WHO ATC classification including L01.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of DML (No. Yu 20150075) issued by CFDA China. The certificate is valid till 09-08-2025.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy ofclearance certificate dated 21-02-2018 which mention 100g alitretinoin.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has not submitted HPLC audit trail reports
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC:

Sr. No	Shortcomings	Response by the firm
1.	The applied product falls under the pharmacological class of L01 as well as D11, while Registration Board in its 297th meeting decided to allow manufacturing of drugs falling in L01 class in anticancer section only. Clarification is required regarding manufacturing of the applied product in general section.	Applied product falls under L01 as well as D11, but we want to to register the product for the purpose of skin which only falls under D11 for which special section is not required. **Decision of 297th meeting of Registration Board:** Registration Board after thorough deliberation and considering the high-risk

		classification i.e., "Anticancer (L01)", and reviewing its previous decision decided to allow the manufacturing of such type of drugs which fall in both "Antineoplastic (L01)" & "Immunosuppressants (L04)" class including everolimus and methotrexate etc. in the "Anti-cancer" section only (being high risk products).
2.	Specify the exact concentration of each solution used in the verification studies of the analytical method of drug substance performed by drug product manufacturer.	Firm has submitted verification studies and mentioned %age of each solution
3.	Submit CoA of reference standard actually used in the analysis.	Firm has submitted COA of working standard
4.	Clarification is required how the required storage conditions of the drug substance was met during transportation and storage within the premises since the drug substance shall be stored at -20 degree.	Material was received in air tight sealed container with having multiple ice bag from supplier. We atored the material in pharmaceutical freezer in our premises.
5.	Submit image / picture / snapshot of the innovator's product against which pharmaceutical equivalence and CDP studies were conducted.	Submitted the firm
6.	Justify why assay test of alpha-tocopherol is not included in the drug product specificatons while the same test is recommended by the innovator's product.	We have used alpha tocopherol as an excipient and validation study of product shows that there is no effect of testing on alitretinoin.
7.	Provide scientific justification for adaptation of dissolution parameters and dissolution time.	Firm has submitted detailed justification as per USP guidelines.
8.	Specify the exact concentration of each solution used in the verification studies of the analytical method of drug product.	Firm has submitted verification studies and mentioned %age of each solution
9.	CDP studies result show very little drug release in all medium while in dissolution test the drug show more than 85% release in 6.8pH medium. Clarification is required in this regard.	CDP was performed in 3 medium (0.1N HCl pH 1.2, 4.5pH acetate buffer, and 6.8pH phosphate buffer. While in dissolution studies we have used medium borate buffer pH 8.0 containing 0.5% cetrimide 50mg/ml pancreatin.

Decision: Registration Board deferred the case for further deliberation shall be made in upcoming meeting regarding manufacturing requirements for drugs having multiple WHO ATC classification including L01.

Manufacturing Date	02-2021	02-2021	02-2021
Date of Initiation	27-02-2021	27-02-2021	27-02-2021
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API	Firm has submitted copy of GMP certificate issued

	manufacturer issued by concerned regulatory authority of country of origin.	by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 23-02-2021 specifying purchase of 2Kg dexlansoprazole pellets 22.5%.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm submitted that their HPLC system is not 21 CFR compliant therefore the audit trail reports are not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- GMP certificate / inspection report of the firm conducted within a period of last three years.
- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any method and procedures for preparation of each type of solution. Furthermore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.
- Section 3.2.S.6 specifies that the API manufacturer is using food grade double polyethylene bag for storing these pellets which are highly sensitive to moisture and light. Justification is required in this regard.
- Provide information in section 3.2.S.7.1 amd 3.2.S.7.2 as per CTD guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.
- The stability study of dexlansoprazole pellets performed by Vision Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.
- Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of dexlansoprazole pellets wherein the representative from the pellets manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarification is required in this regard.
- Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.
- Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be perfomed, since you have mentioned that pharmaceutical

equivaelence is not required and then you have also provided a brief report of dexlansoprazole tablet in which all tests are not performed.

- Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter.
- Submit information in section 3.2.P.3 as per the guidance document which specifies that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified".
- Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1.
- Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data to support this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified".
- Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."
- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established.
- Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.
- Provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarification is required in this regard.
- Provide validation studies of the analytical method of drug product in section 3.2.P.5.3.
- Provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.
- Provide COA of the reference standard / working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard.
- Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."
- You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard.
- Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.
- Justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets.
- Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.
- Justify the dissolution test in which the acceptance criteria is NLT 75% in 5 hours which is against the specificatiosn of innovator's product.
- Justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter <711> as well as defined by Registration Board in its 293rd meeting.
- Provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule.

- Provide stability study data in a proper sequence by providing stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and sperators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision of 323rd meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm:

Sr. No	Short coming	Annexure
01	GMP certificate /inspection report of the firm conducted within a period of last three years.	Firm has not submitted GMP certificate / inspection report.
02	Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.	Firm has **not** submitted QOS as per WHO template.
03	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."	Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer
04	Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.	Firm has **not** submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.
05	Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.	Firm has submitted COA of batch number DLP664.
06	Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch	Firm has **not** sumitted COA of reference / working standard.

	No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of hese pellets or any other source of reference standard manufacturing.	
07	Section 3.2.S.6 specifies that the API food grade double manufacturer is using polyethylene bag for storing these which are pellets highly sensitive to moisture and light. Justification is required in this regard.	Three polyethylene bag used for packing of pellets. Two transparent and one black color bags along with silica gel.
08	Provide information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.	Firm has submitted information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document.
09	The stability study of Vision Dexlansoprazole pellets performed by Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.	Study performed at lab scale and in chamber they placed sample in pet bottle and for commercial they provide polythene bags and drum which is not possible in pet bottle.
10	Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of Dexlansoprazole pellets wherein the manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarifications required in this regard.	DMF provided by vision pharma
11	Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.	Submitted by the firm.
12	Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be performed, since you have mentioned that pharmaceutical equivalence is not required and then you have also provided a brief report of Dexlansoprazole tablet in which all tests are not performed.	Firm has submitted pharmaceutical equivalence studies against the comparator product manufactured by Weatherfolds pharma.
13	Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter	Firm has submitted results of comparative dissolution profile against the brand leader.
14	submit information in section 3.2.P.3 as per the guidance document which specifies that The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be	Firm has submitted information in section 3.2.P.3 as per the guidance document.

	provided e.g., sterilization shall be explained and justified"	
15	Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1	Firm has submitted information in section 3.2.P.3.2 as per the guidance document.
16	Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data t supports this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified"	Firm has submitted information in section 3.2.P.3.3 as per the guidance document.
17	Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."	Firm has submitted information in section 3.2.P.3.4 as per the guidance document.
18	Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established	Firm has **not** submitted process validation protocols.
19	Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.	Firm has submitted specifications of the drug product in section 3.2.P.5.1.
20	provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarifications required in this regard	Firm has submitted specifications of the drug product in section 3.2.P.5.2.
21	Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.	Firm has **not** submitted complete validation studies of the analytical method of drug product in section 3.2. P.5.3.
22	provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of Dexlansoprazole pellets of	Firm has submitted Batch analysis report of 3 stability batches.

	Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.	
23	Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard	Firm has **not** submitted COA of reference standard / working standard.
24	Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."	Firm has submitted details of container closure system.
25	You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard	Written mistakenly, revised and correct submitted.
26	Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.	Firm has submitted information in section 3.2.P.8.1 and 3.2.P.8.2.
27	justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets	Firm has now submitted dissolution test results at different medium in stability studies.
28	Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.	Firm has submitted specifications and analytical method of drug product.
29	justify the dissolution test in which the acceptance criteria NLT 75% in 5 hours which is against the specifications of innovator's product	Typo mistake Revised COA attached
30	justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter as well as defined by Registration Board in its 293d meeting	Corrected and resubmitted by the firm
31	provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule	Revised COA are submitted by the firm.
32	provide stability study data in a proper se stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and separators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that	Firm has submitted stability data in a proper sequence.

	further evaluation may be carried out	
33	submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: • Reference of previous approval of applications with stability study data of the firm (if any) • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin • Documents for the procurement of APl with approval from DRAP (in case of import). • Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of both stability chambers	Firm has submitted response against the 6 points checklist as per CTD guidance document.

Decision of 324th meeting: Deferred for following observations:

- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of hese pellets or any other source of reference standard manufacturing.
- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established
- Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.
- Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard

Firm's response:

Sr.#	Observation	Reply
1.	Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document	Submitted
2.	Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the	Firm has submitted revised analytical method verification studies performed by M/s Wezen Pharmaceuticals.

	recommendations of ICH.	
3.	Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.	Firm has submitted COA of working standard form M/s Vision Pharmaceuticals.
4.	Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established	Firm has submitted revised process validation protocol including the critical steps, sampling plan, and evaluation criteria for the process of capsule filling, sealing and blistering.
5.	Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.	Submitted.
6.	Provide COA of the reference standard in working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard	Firm has submitted COA of working standard form M/s Vision Pharmaceuticals.

Decision of 327th meeting of Registration Board: Deferred for submission of Pharmaceutical equivalence and Comparative Dissolution Profile (CDP) studies against the innovator's product.

Response by the firm: Firm has submitted result of pharmaceutical equivalence and CDP studies against Dexilant 30mg Capsule. Firm has also submitted picture of the pack of the reference product.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Name and address of API manufacturer.	Vision Pharmaceuticals, Plot No. 22-23, Industrial Triangle Kahuta Road Islamabad.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Firm has submitted detailed data for drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65 ± 5% RH for 24 months.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	
	Analytical method validation/verification of product	Firm has submitted verification studies of the drug substance and the drug product.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP certificate issued by Additional Director DRAP, Islamabad dated 31-07-2019. The GMP certificate was granted based on inspection dated 11-02-2019. The GMP certificate is valid till 10-02-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of commercial invoice dated 23-02-2021 specifying purchase of 2Kg dexlansoprazole pellets 22.5%.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted complete record of testing of all batches along with raw data sheets, COA and summary data sheets.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm submitted that their HPLC system is not 21 CFR compliant therefore the audit trail reports are not applicable.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Evaluation by PEC[3]:

- GMP certificate / inspection report of the firm conducted within a period of last three years.
- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer is required."
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any method and procedures for preparation of each type of solution. Furthermore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since

you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.

- Section 3.2.S.6 specifies that the API manufacturer is using food grade double polyethylene bag for storing these pellets which are highly sensitive to moisture and light. Justification is required in this regard.
- Provide information in section 3.2.S.7.1 amd 3.2.S.7.2 as per CTD guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.
- The stability study of dexlansoprazole pellets performed by Vision Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.
- Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of dexlansoprazole pellets wherein the representative from the pellets manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarification is required in this regard.
- Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or heading.
- Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be perfomed, since you have mentioned that pharmaceutical equivaelence is not required and then you have also provided a brief report of dexlansoprazole tablet in which all tests are not performed.
- Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter.
- Submit information in section 3.2.P.3 as per the guidance document which specifies that "The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified".
- Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1.
- Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data to support this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified".
- Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."
- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established.
- Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.
- Provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarification is required in this regard.
- Provide validation studies of the analytical method of drug product in section 3.2.P.5.3.
- Provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.

- Provide COA of the reference standard / working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard.
- Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."
- You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard.
- Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.
- Justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets.
- Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.
- Justify the dissolution test in which the acceptance criteria is NLT 75% in 5 hours which is against the specificatiosn of innovator's product.
- Justify the dissolution acceptance criteria without specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter <711> as well as defined by Registration Board in its 293rd meeting.
- Provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule.
- Provide stability study data in a proper sequence by providing stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and sperators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out.
- Submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following:
    - Reference of previous approval of applications with stability study data of the firm (if any)
    - Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.
    - Documents for the procurement of API with approval from DRAP (in case of import).
    - Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
    - Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
    - Record of Digital data logger for temperature and humidity monitoring of both stability chambers.

Decision of 323rd meeting of Registration Board:
Registration Board deferred the case for submission of reply to the above cited shortcomings within six months.

Response by the firm:

Sr. No	Short coming	Annexure
01	GMP certificate /inspection report of the firm conducted within a period of last three years.	Firm has not submitted GMP certificate / inspection report.
02	Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.	Firm has **not** submitted QOS as per WHO template.
03	Submit data in section 3.2.S.4.1 as per the guidance document approved by Registration Board which specifies that "Copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product	Firm has submitted copies of the Drug substance specifications and analytical procedures used for routine testing of the Drug substance Active Pharmaceutical Ingredient by both Drug substance & Drug Product manufacturer

	manufacturer is required."	
04	Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.	Firm has **not** submitted report of verification studies of the analytical method of drug substance performed by drug product manufacturer.
05	Provide COA of relevant batch of drug substance from both API manufacturer as well as drug product manufacturer which is used in the manufacturing of batches of drug product, since you have submitted COA of multiple irrelevant batches in this section.	Firm has submitted COA of batch number DLP664.
06	Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of hese pellets or any other source of reference standard manufacturing.	Firm has **not** sumitted COA of reference / working standard.
07	Section 3.2.S.6 specifies that the API food grade double manufacturer is using polyethylene bag for storing these which are pellets highly sensitive to moisture and light. Justification is required in this regard.	Three polyethylene bag used for packing of pellets. Two transparent and one black color bags along with silica gel.
08	Provide information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document since you have only submitted stability data sheets in section 3.2.S.7 which is not in line with the Form 5-F as well as CTD guidance document.	Firm has submitted information in section 3.2.S.7.1 and 3.2.S.7.2 as CTD per guidance document.
09	The stability study of Vision Dexlansoprazole pellets performed by Pharmaceuticals specify that the pellets were stored in PET sealed bottles during stability studies while as per section 3.2.S.6 the packaging material of commercially manufactured pellets is food grade double polyethylene bag. Justify how these stability studies are applicable in this case and how it represents the true shelf life of the commercially manufactured pellets.	Study performed at lab scale and in chamber they placed sample in pet bottle and for commercial they provide polythene bags and drum which is not possible in pet bottle.
10	Registration Board in its 276th meeting held on 22-25th November, 2017 reviewed the formulation of Dexlansoprazole pellets wherein the manufacturer appeared before the Board and admitted that previously they were not specifying testing of pellets at 5.5 pH in the COA. The submitted stability study data of the three batches of pellets manufactured in 2014 is submitted in which testing at pH 5.5 is also specified. Clarifications required in this regard.	DMF provided by vision pharma
11	Submit complete information in section 3.2.P.1 as per form 5F without skipping any section or	Submitted by the firm.

	heading.	
12	Submit pharmaceutical equivalence report of the applied product along with reference / innovator's product in which all tests as per specifications shall be performed, since you have mentioned that pharmaceutical equivalence is not required and then you have also provided a brief report of Dexlansoprazole tablet in which all tests are not performed.	Firm has submitted pharmaceutical equivalence studies against the comparator product manufactured by Weatherfolds pharma.
13	Provide complete report of comparative dissolution profile along with test parameters, analytical method and how the results are obtained and analysed, since you have only submitted tabulated and graphical representation without specifying any parameter	Firm has submitted results of comparative dissolution profile against the brand leader.
14	submit information in section 3.2.P.3 as per the guidance document which specifies that The selection and optimization of the manufacturing process described in 3.2.P.3.3, in particular its critical aspects, shall be explained. Any specific manufacturing process development shall be provided e.g., sterilization shall be explained and justified"	Firm has submitted information in section 3.2.P.3 as per the guidance document.
15	Provide information in section 3.2.P.3.2 as per the CTD guidance document which specifies that "A batch formula for proposed commercial batch size shall be provided that includes a list of all components of the drug product to be used in the manufacturing process, their amounts on a per batch basis, and a reference to their quality standards, since you have only submitted the same table which is already provided in section 3.2.P.1	Firm has submitted information in section 3.2.P.3.2 as per the guidance document.
16	Provide information in section 3.2.P.3.3 as per the CTD guidance document which specifies that "A flow diagram shall be presented giving the steps of the process and showing where materials enter the process. The critical steps and points at which process controls, intermediate tests or final product controls are conducted shall be identified. Proposals for the reprocessing of materials (if any) shall be justified. Any data t supports this justification shall be provided in this section. The maximum holding time for bulk product prior to final packaging shall be stated. The holding time shall be supported by the submission of stability data if longer than 30 days. For an aseptically processed drug product, sterile filtration of the bulk and filling into final containers shall preferably be continuous; any holding time shall be justified"	Firm has submitted information in section 3.2.P.3.3 as per the guidance document.
17	Provide information in section 3.2.P.3.4 as per the CTD guidance document which specifies that "Tests and acceptance criteria shall be provided (with justification, including experimental data) performed at the critical steps identified in 3.2.P.3.3 of the manufacturing process, to ensure that the process is controlled."	Firm has submitted information in section 3.2.P.3.4 as per the guidance document.
18	Justify why the process validation protocols does	Firm has **not** submitted process validation

	not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established	protocols.
19	Provide specifications of the drug product in section 3.2.P.5.1 along with submission of fee for revision of specifications since you have submitted Vision pharmaceuticals specifications of pellets in this section.	Firm has submitted specifications of the drug product in section 3.2.P.5.1.
20	provide complete and analytical procedures of drug product in section 3.2.P.5.2 since you have provided analytical procedures of pellets in this section. Moreover, in assay test you have mentioned both UV and HPLC test. Clarifications required in this regard	Firm has submitted specifications of the drug product in section 3.2.P.5.2.
21	Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.	Firm has **not** submitted complete validation studies of the analytical method of drug product in section 3.2. P.5.3.
22	provide batch analysis certificate of three batches of drug product in section 3.2.P.5.4 where you have provided COA of Dexlansoprazole pellets of Vision Pharmaceuticals with same results and your signatures after removing header containing name of Vision Pharmaceuticals.	Firm has submitted Batch analysis report of 3 stability batches.
23	Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard	Firm has **not** submitted COA of reference standard / working standard.
24	Provide information in section 3.2.P.7 as per the CTD guidance document which specifies that "A detail of the container closure systems, description of the primary container closure systems, including materials of construction, unit count or fill size, container size or volume shall be provided."	Firm has submitted details of container closure system.
25	You have mentioned white to off white pellets in section 3.2.P.1 while white and green pellets in section 3.2.P.8.1. Justification is required in this regard	Written mistakenly, revised and correct submitted.
26	Provide information in section 3.2.P.8.1 and 3.2.P.8.2 as per the Form 5F and CTD guidance document, since you have skipped these two sections and did not provide any information in these sections.	Firm has submitted information in section 3.2.P.8.1 and 3.2.P.8.2.
27	justify why only assay and dissolution test at one medium is performed in stability studies as evident from the submitted stability summary sheets	Firm has now submitted dissolution test results at different medium in stability studies.
28	Your drug product specifications submitted in section 3.2.P.5.1 and specifications mentioned in COA of stability studies are different specifically in terms of dissolution test. Justify how you have performed stability studies without having any clear written specifications and analytical method.	Firm has submitted specifications and analytical method of drug product.
29	justify the dissolution test in which the acceptance criteria NLT 75% in 5 hours which is against the specifications of innovator's product	Typo mistake Revised COA attached
30	justify the dissolution acceptance criteria without	Corrected and resubmitted by the firm

	specifying the value of Q as well as without identifying the criteria for analysis of results of dissolution test as per the criteria defined in USP general chapter as well as defined by Registration Board in its 293d meeting	
31	provide complete results of dissolution test including result of individual unit of capsule in the summary sheet or COA since results cannot be analysed without having results of individual units of the capsule	Revised COA are submitted by the firm.
32	provide stability study data in a proper se stability summary sheet of individual batch along with proper separators to provide COA / raw data sheets along with HPLC chromatograms of standard and sample for the particular time point of that batch. Your submitted data is without any sequence, you have provided all COA and raw data sheets together and the rest of the data is also provided without proper sequence and separators as per the guidelines of Registration Board. Submit your aligned data in a sequence so that further evaluation may be carried out	Firm has submitted stability data in a proper sequence.
33	submit stability study data in section 3.2.P.8.3 as per the checklist approved by Registration Board in its 296th meeting and the CTD guidance document, which includes the following: • Reference of previous approval of applications with stability study data of the firm (if any) • Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin • Documents for the procurement of APl with approval from DRAP (in case of import). • Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of both stability chambers	Firm has submitted response against the 6 points checklist as per CTD guidance document.

Decision: Deferred for following observations:

- Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document.
- Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.
- Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.

- Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established
- Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.
- Provide COA of the reference standard I working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard

Firm's response:

Sr.#	Observation	Reply
1.	Provide Quality Overall Summary in module 2 as per WHO QOS PD template or as per the template defined by Registration Board by providing summarized data in the tabulated form. You have submitted same data of module 3 in QOS as well which is not in line with the CTD guidance document	Submitted
2.	Provide complete report of verification studies of the analytical method of drug substance performed by drug product manufacturer in section 3.2.S.4.3, since you have only submitted tabulated results without any procedures for preparation of each type of solution. Furtherore, you have performed 6 replicates in specificity test which is not in line with the recommendations of ICH.	Firm has submitted revised analytical method verification studies performed by M/s Wezen Pharmaceuticals.
3.	Provide COA of the reference standard / working standard in section 3.2.S.5 which is actually used in the analysis of drug substance / pellets along with its standardization record with the primary standard, since you have submitted COA of batch No WS/RLP/01 from Integrin Life Sciences whose product description is different from that specified in section 3.2.S.1 of your application and is neither the manufacturer of these pellets or any other source of reference standard manufacturing.	Firm has submitted COA of working standard form M/s Vision Pharmaceuticals.
4.	Justify why the process validation protocols does not include any step for validation of process of capsule filling, sealing and blistering. Moreover, no critical steps, sampling plan, and evaluation criteria has been established	Firm has submitted revised process validation protocol including the critical steps, sampling plan, and evaluation criteria for the process of capsule filling, sealing and blistering.
5.	Provide validation studies of the analytical method of drug product in section 3.2. P.5.3.	Submitted.
6.	Provide COA of the reference standard in working standard in section 3.2.P.6 which is actually used in the analysis of drug product along with its standardization record with the primary standard	Firm has submitted COA of working standard form M/s Vision Pharmaceuticals.

Decision of 327th meeting of Registration Board: Deferred for submission of Pharmaceutical equivalence and Comparative Dissolution Profile (CDP) studies against the innovator's product.

Response by the firm: Firm has submitted result of pharmaceutical equivalence and CDP studies against Dexilant 60mg Capsule. Firm has also submitted picture of the pack of the reference product.

Decision: Approved with Innovator's specifications.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Details of fee submitted	PKR 50,000/-: 20-04-2020
	Proposed proprietary name / brand name	**Cilomen 500mg injection**
	Strength/ concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains: Imipenem as monohydrate……500mg Cilastatin as sodium...500mg
	Pharmaceutical form of applied drug	Powder for solution for injection
	Pharmacotherapeutic Group of (API)	Anti bacterial / dehydropeptidase inhibitor
	Reference to Finished product specifications	USP
	Proposed Pack size	1's
	Proposed unit price	As per SRO
	status in reference regulatory authorities	Primaxin injection (500mg/500mg) by M/s Merck, USFDA Approved.
	For generic drugs (me-too status)	Cilapen 500mg injection by M/s Bosch, Reg. No. 048491
	GMP status of the Finished product manufacturer	GMP certificate issued on 06/12/2019 on the basis of inspection conducted on 16/09/2019. Dry powder injectable (Penicillin, Carbapenem) section is approved.
	Name and address of API manufacturer.	M/s Aurobindo Pharma limited, Unit-V, Plot no. 68-70, 73-91, 95, 96, 260, 261 IDA., Chemical zone, Pashmylaram, Patancheru Mandal, Saga Reddy district, Telangana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module-III (Drug Substance):	The drug substance is sterile bulk mixture of Imipenem abd cilastin in a ratio of 1:1.The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance

	Stability studies of Drug Substance conditions, duration	• 60 months real time stability data at 30˚C ± 2˚C / 65% ± 5%RH of 03 batches • 06 month accelerated stability data 40˚C ± 2˚C / 75% ± 5%RH of 03 batches Batches: EEC0821002, EEC0821003, EEC0821004
	Module-III (Drug Product):	Detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product is submitted.
	Analytical method validation/verification	Th firm has submitted analytical method verification studies. Official monograph for the product is available in USP.
	Comparative dissolution profile/Pharmaceutical Equivalence	

STABILITY STUDY DATA			
Manufacturer of API	M/s Aurobindo Pharma limited, Unit-V, Plot no. 68-70, 73-91, 95, 96, 260, 261 IDA., Chemical zone, Pashmylaram, Patancheru Mandal, Saga Reddy district, Telangana, India. Copy of GMP certificate of API manufacturer is submitted.		
API Lot No.	1605204528		
Description of Pack (Container closure system)	USP type I colorless glass vials

Batch Size	17600 vials	8700 vials	4400 vials
Manufacturing Date	10/2016	08/2017	02/2018
Date of Initiation	25/10/2016	23/08/2017	09/03/2018
No. of Batches	03		

Administrative Portion	
Reference of previous approval of applications with stability study data of the firm (if any)	Not submitted.
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Certificate No.
Documents for the procurement of API with approval from DRAP (in case of import).	ADC attested Invoice No. U05/17-18/73 dated 20th, July, 2017
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted supported documents including chromatograms, raw data sheets, COAs summary sheets.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

REQUEST OF EXEMPTION FROM ON SITE INSPECTION		
S.#	**Query**	**Response by the firm**
1	The documents from the API manufacturer in the submitted dossier show that Imipenem as monohydrate 500mg has been used in the manufacturing of blend of Imipenem and Cilastatin as well as the reference product contains Imipenem as monohydrate 500mg while documents from finished product manufacturer show that Imipenem anhydrous 500mg is used, clarify.	According to the firm's response, "It was a typographical error which is corrected from onward as we are procuring the material as monohydrate and our calculations are entirely as per monohydrate material". However, earlier the firm has submitted that the material is received in either form Monohydrate or Anhydrous.
2	Blend of 02 APIs is used for the manufacturing of finished product, for such products potency adjustment becomes very critical because by adjusting the potency of one API would cause the actual potency of the other API to be changed. Therefore, provide procedure for potency adjustment for the applied product.	According to firm "As the material is received in the blend form with ratio of 1:1 so the 100% material contains 50% of Imipenem and 50% of Cilastatin. Considering standard potency of both APIs equal to 50% (500mg) each, theoretical calculations are given in the following. Imipenem: Theoretical quantity= 500mg+2% = 510mg Cilastatin: Theoretical quantity= 500mg+2% = 510mg Total quantity of blend= 510+510 = 1020mg per vial
3	Section 3.2.P.2.2.1 shall include detail of all the quality tests along with the results performed on the developed product against innovator/reference/comparator product foe establishing the pharmaceutical equivalence.	The firm has submitted the required data of pharmaceutical equivalence in relevant section by performing the quality tests against the comparator product Cilapen 500mg by M/s Bosch Pharmaceuticals. The firm has stated that the innovator's product is not available in Pakistan.
4	Valid GMP certificate of API manufacturer is required.	Copy of renewal letter of drug manufacturing license of API manufacturer is submitted. License No.:48/MD/AP/98/B/R Valid till: 31/12/2021
5	Significant change has been observed in real time stability testing of batch number V8001 in assay value of both Imipenem as well as Cilastatin, justify.	According to the reply of the firm has placed 3 more batches in the year 2018 wherein no significant change has been observed, detail of which is given as under. Real time: 30˚C ± 2˚C / 65% ± 5%RH of 03 batches till 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH of 03 batches till 06 months

Batch No.	V8003	V8004	V8005
Batch Size	8900 vials	17540 vials	8900 vials
Manufacturing Date	04/2018	04/2018	08/02018
Date of Initiation	27/04/2018	10/05/2018	29/08/2018

- The diluent mentioned in section 3.2.P.2.6 is Water for Injection while as per the available information regarding innovator/reference product the contents of the vials must be reconstituted by adding approximately 10 mL of the appropriate diluent to the vial.
- List of appropriate diluents are as follows:

0.9% Sodium Chloride Injection
5% Dextrose Injection
5% Dextrose and 0.9% Sodium Chloride
5% Dextrose Injection with 0.225% or 0.45% saline solution

- The submitted testing method for analysis of drug product is different from the method described in USP monograph in terms of standard preparation, assay calculation and formula.

- The test of pH in which the firm specifies that 1gram of sample should be dissolved 100ml of distilled water, however USP specifies that reconstitute as directed in the labelling. The labelling of the innovator / reference product does not recommend reconstitution in WFI.

Decision of 312th meeting:

Registration Board deliberated the case in detail and observed that the contract manufacturer has not performed complete product development studies, the specifications adopted by the manufacturer throughout stability studies were not according to USP. Accordingly, the Board deferred for the case for following submissions:

- Scientific justification for your test of pH which specifies that "reconstitute the sample in 10ml WFI", however USP specifies that reconstitute as directed in the labelling and the labelling of the innovator / reference product does not recommend reconstitution in WFI.
- Scientific justification for having the method of sample solution preparation for the commercial batches which is different from that specified in USP monograph.
- Scientific justification for using an entirely different formula for calculation of assay results of commercial batches from that specified in USP monograph.

Keeping in view the above, the Board decided that the submitted stability study data is not acceptable and directed the manufacturer to either perform complete product development and stability studies or submit the aforementioned data as per USP specifications and submit data accordingly. The Board further directed the manufacturer to comply USP Specifications for already registered drug products.

Submission by the firm:

- The firm has submitted, "Imipenem & Cilastatin material is available and used in blend powder form for injection. For potency adjustment, the lower potency API will be adjusted so the quantity of other API might be slightly adjusted over the target value due to slight difference of potency of both API's.
  Calculations for potency adjustment:
  Batch of blend: AB88390
  Potency of Imipenem: 44.67%
  Potency of Cilastatin: 47.25%
  After considering both Imipenem & Cilastatin at 44.67%
  For the applied product: Cilomen 500mg = $\frac{100 \times 500}{44.67\%}$ = 1119.319 mg/vial
- "We would like to inform you that, we had tested the product according to USP but unfortunately due to some misunderstanding the different formula and concentration were used against USP. We have placed three new batches for stability studies and test it according to USP in all aspects. Revised method and raw data sheets with correct calculation has been attached for your reference".
- The firm has stated, "for the applied product, we have used 10ml of 0.9% Sodium chloride for testing purpose only'.
- The standard solutions have been run for Cilastatin and Imipenem separately for analysis of the sample.
- The chromatographic conditions include 50°C column temperature, 300mm×4.6mm with packing L1, flow rate 2mL/min, wavelength 254nm, Injection volume 10uL. Detail of the tailing factor and theoretical plates not provided by the firm.
- The firm has submitted the data of 03 batches detail of which is given as under;

Batch No.	V1002	V1001	V0003
Batch Size	16000	18340	9000 vials
Manufacturing Date	07/2021	03/2021	11/2020
Date of Initiation	19/07/2021	19/07/2021	19/07/2021
API Lot No.	9900680007E1	DBIMCNF002	AB88390
Attested Invoice no.	Not provided	7000057843 dated 31/12/2020	7000053843 dated 30/09/2020
Source of drug substance	ACS Doofar, Italy	Sun Pharmaceutical industries Ltd., India	Sun Pharmaceutical industries Ltd., India
Frequency	0, 3 (months)	0, 3 (months)	0, 3 (months)

- The formula used for calculation by the firm is given in the following along with complete calculation of a sample.

$$\frac{\text{Area of sp. x wt. of std. x 100 x 100 x Potency}}{\text{Area of std. x 25 x 1 x 10 x 100}} = \_\_\_\_\_ \text{mg of Imipenem / Vial}$$

Decision of 313th meeting of Registration Board: Registration Board deliberated that the commercial batches manufactured by the manufacturer i.e. Stallion Pharmaceuticals was not developed and tested as per the USP monograph. Keeping in view the USP monograph, public assessment report of the innovator product and the data submitted by the firm, the Board decided to defer the case and advised the manufacturer to perform product development studies keeping in view the innovator product and product testing and stability studies by complying USP monograph and submit data upon completion of 6 months stability studies.

Submission by the firm: Firm has now submitted data of newly manufactured batches in which source of drug substance has been changed to ACS Dobfar Italy. PE studies have been conducted against cilapen injection of Bosch pharma and three batches having batch size of 3530 vials manufactured in April 2022 has been submitted.

STABILITY STUDY DATA

Manufacturer of API	M/s ACS Dobfar S.p.A. Viale Addetta, 2s/12-3/5 Tribiano Milano Italy.		
API Lot No.	0069E1		
Description of Pack (Container closure system)	glass vials		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 1, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	V2001	V2002	V2003
Batch Size	3530 vials	3530 vials	3530 vials
Manufacturing Date	04-2022	04-2022	04-2022
Date of Initiation	16-04-2022	16-04-2022	16-04-2022
No. of Batches	03		

Administrative Portion

Reference of previous approval of applications with stability study data of the firm (if any)	NA
Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Certificate No. IT-API/87/H/2022 issued by Italian medicine agency on the basis of inspection dated 03-12-2021.
Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted clearance certificate dated 17-03-2022 for import of 12Kg imipenem and cilastatin sodium sterile.
Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted supported documents including chromatograms, raw data sheets, COAs summary sheets.
Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted by the firm
Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted by the firm

Remarks of the evaluator:

- Significant change i.e. more than 5% change in assay from initial value has bee observed in accelerated stability study for batch V2003.

Decision: Registration Board considering the submitted data of long term stability studies till 24 month time point decided to approve the applied application.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**
- **The manufacturer shall apply for post registration variation for the same formulation registered in the name of the firm as well as all contract manufactured products.**
- **The Board further decided that product specific and capacity assessment inspection shall be carried out for the instant product by a panel to be constituted by Chairman Registration Board. Registration Board further authorized its Chairman for issuance of registration letter upon consideration of satisfactory product specific and capacity assessment of manufacturing and testing facility of the firm.**

Case No. 04 Miscellaneous cases

M/s Gene-Tech Laboratories, Karachi has submitted the following application

Sr. No	Brand Name and composition	Fee details	Dy No
400.	Hyal Forte Each prefilled syringe (2ml) contains: Sodium hyaluronate…..20mg	PKR 100,000 dated 24-03-03-2021	Dy No. 10553, 06-04-2021

The application was initially submitted in BE&R Division, later on the application was forwarded to PE&R Division for confirmation whether the applied product falls under the definition of drugs or otherwise and for confirmation of source of the drug substance whether pharmaceutical or biological.

Decision: Registration Board deliberated the matter in detail and directed Pharmaceutical Evaluation Cell (PEC) to evaluate the complete application and present the detailed evaluation report in the forthcoming meeting.

M/s Mission Pharmacuticals, Karachi

M/s Mission Pharmaceuticals Karachi has informed that they have applied double dossiers of following products by mistake. They have applied for these products on 07-03-2019 while they were already registered.

Sr. No	Brand Name and composition	Fee details	Approved in RB meeting
401.	Elvox Tablet 250mg Each Film Coated Tablet Contains: Levofloxacin Hemihydrate eq to Levofloxacin Base…250mg	Dy No. 15135: 07-03-2019 PKR 20,000/-: 06-03-2019	327
402.	Elvox Tablet 500mg Each Film Coated Tablet Contains: Levofloxacin Hemihydrate eq to Levofloxacin Base…500mg	Dy No. 15146: 07-03-2019 PKR 20,000/-: 06-03-2019	327

The above products are already registered with the firm vide letter dated 28-06-2022, having registration number 112661 and 112662.

Now the firm has requested to cancel these products which were approved in 327th meeting of Board.

Decision: Registration Board acceded the request of the firm and decided to cancel the approval of

following products granted in 327th meeting of Registration Board.

- **Elvox Tablet 250mg**
- **Elvox Tablet 500mg**

Agenda of Evaluator PEC-IV

	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3337 dated 03-02-2022
	Details of fee submitted	PKR 30,000/-: Deposit slip # 33800594
	The proposed proprietary name / brand name	**Wilzon 5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Tablet Contains: Metolazone…..…5mg
	Pharmaceutical form of applied drug	Green colored Oval shaped tablets.
	Pharmacotherapeutic Group of (API)	(Diuretic/Saluretic/antihypertensive drug of the quinazoline class)
	Reference to Finished product specifications	USP Specs.
	Proposed Pack size	15’s, 30’s, 45’s
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Zaroxolyn Tablet 5mg of (USFDA approved)
	For generic drugs (me-too status)	Metxone tablet 5mg of M/s Genome (Reg.# 090699)
	GMP status of the Finished product manufacturer	cGMP certificated on the basis of evaluation conducted on 28-07-2022 and valid till 27-07-2024.
	Name and address of API manufacturer.	M/s Centaur Pharmaceuticals Pvt Limited. Plot No. 75,76 & 76/1 Chikhloli MIDC Ambernath (W) Dist. Thane 421 501 Maharashtra India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to

		nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Metolazone is present in USP pharmacopeia. The firm has submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (1503601P, 1503602P, 15036003PL1)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the comparator brand that is 'Metxone tablet 5mg of M/s Genome, by performing quality tests (Assay & Dissolution and Disintegration time). CDP has been performed against the comparator brand that is 'Metxone tablet 5mg of M/s Genome in Acidic media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8) and in Sodium phosphate buffer (pH 7.5) . The f2 values are in the acceptable range.
	Analytical method validation/verification of product	Method Verification studies have submitted including system suitability, linearity, range, accuracy, precision, specificity and stability of solution.

STABILITY STUDY DATA

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of DML License No. 25-KD/1149 issued by Food and Drug Administration Maharashtra India. Dated: 26-08-2018 and valid till 22-09-2023.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of, form 3 form 6, form 7 and clearance certificate of mentioning invoice (invoice# CP/EXP/C/030/19-20) dated 12-04-2019 cleared by DRAP Islamabad office dated 25-06-2019 specifying import of Metolozone 0.135Kg (Batch# 1803605P).
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.S.4.1	Copies of the Drug substance specifications of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Copies of the Drug substance specifications of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer are submitted.
2.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer are submitted.
3.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer drug substance(s) shall be submitted.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer drug substance is submitted
4.	3.2.P.5.1	You have not performed	Uniformity of dosage unit by content uniformity

		uniformity of dosage unit by content uniformity, as recommended by USP General Chapter <905>. Justification shall be submitted in this regard.	submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

b. Deferred cases

404.

Name and address of manufacturer / Applicant	M/s High-Q Pharmaceuticals B-64, KDA, Scheme No. 1, Main Karsaz Road, Karachi, Pakistan
Brand Name +Dosage Form + Strength	Tramax 100mg SR Capsule
Composition	Each Sustained Release Capsule Contains: Tramadol Hcl…100mg
Diary No. Date of R& I & fee	Dy.No. 41495 dated 07-12-2018 Rs.20,000/- Dated 07-12-2018
Pharmacological Group	Narcotic analgesic
Type of Form	Form 5
Finished product Specification	BP
Pack size & Demanded Price	10's, 20's, 30's: As per SRO
Approval status of product in Reference Regulatory Authorities	CONZIP 100mg Capsules of (USFDA approved)
Me-too status	Zultra SR 100mg of M/s. Wilshire Laboratories
GMP status	Last GMP inspection conducted on 10-04-18, and the report concludes that the firm was considered to be operating at an acceptable level of compliance with good manufacturing practices
Remarks of the Evaluator	Submit Master formula, manufacturing method, analytical method CIP-TRAMADOL ER (tramadol hydrochloride) extended-release) capsules are a new formulation of tramadol HCl for analgesia. The drug product consists of extended release film coated white beads and an immediate release tablet encapsulated in white opaque, size 1, 0 and 00, hard gelatin capsules

Dosage	Immediate release	Extended release
100 mg	25 mg	75 mg

Previous Decision (M-322): Deferred for review of formulation against the innovator product.

Reply by firm: We want to inform you that we had applied for Tramadol HCl 100mg as "Tablet". There was typographical error in the last reply sent in response to letter number F.1-1/2019/PEC-DRAP (AD PEC-IV) dated: 7th September, 2022. R & I copy of product is attached for reference.
We are also applying for the change in the label claim of the product

Name of Drug with Applied label claim	Name of Drug with Proposed label claim	Fee for change in label claim
Tramax 100mg SR Tablet Each Sustained Release Tablet Contains: Tramadol Hcl…100mg	Tramax 100mg SR Tablet Each Extended Release Film Coated Tablet Contains: Tramadol Hcl…100mg	Deposit slip No# 50754384014 Rs:7500/- Dated: 23-01-2023

Approval status of product in Reference Regulatory Authorities	ULTRAM ER of USFDA

	Remarks: Film coating is not mentioned in ULTRAM ER Master formula and manufacturing method is not submitted.
	Previous Decision (M-326): Registration Board deferred the case for submission of Master formula and manufacturing method.
	Evaluation by PEC: Master formula and manufacturing method as per Innovator is submitted by firm
	Decision: Approved as per following label claim: **"Tramax 100mg SR Tablet** **Each Extended Release Film Coated Tablet Contains:** **Tramadol HCl…100mg"** **The firm shall submit fee of Rs. 30,000/- for correction/pre-approval change in product label claim as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.**

Case no. 02 Registration applications of newly granted DML or New section (Human)

a. New DML

New case

M/s Oncogen Pharma Private Limited . (New DML)
CLB in its 287th meeting held on 24th June 2022 has considered and approved the grant of Drug Manufacturing License by way of formulation with following Two (02) sections to M/s Oncogen Pharma Private Limited.

1) Tablet (Oncology)
2) Capsule (Oncology)

Sr. No	Section	Molecules for consideration in 329th meeting	Products for consideration in 329th meeting
1	Tablet (Oncology)	01	01

405.	Name, address of Applicant / Marketing Authorization Holder	M/s Oncogen Pharma Private Limited. Plot No # WH 26 and 27-A3, Korangi Creek Industrial Park Karachi.
	Name, address of Manufacturing site.	M/s Oncogen Pharma Private Limited. Plot No # WH 26 and 27-A3, Korangi Creek Industrial Park Karachi.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 2102 dated 23-01-2023
	Details of fee submitted	PKR 30,000/-: Deposit slip # 249111749877
	The proposed proprietary name / brand name	**Imaver Tablet 100mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Imatinib Mesylate Ph. Eur. equivalent to Im ……..…. 100 mg.
	Pharmaceutical form of applied drug	Dark yellow to brownish orange color, round shape film coated tablet, debossing '100' on one side and plain on other side,

	Pharmacotherapeutic Group of (API)	Antineoplastic (Protein Kinase Inhibitors) L01EA01
	Reference to Finished product specifications	Innovator's Specifications
	Proposed Pack size	1 x 10's (10's) 3 x 10's (30's) 6 x 10's (60's) 12 x 10's (120's)
	Proposed unit price	1 x 10's (10's) = 17,000/- 3 x 10's (30's) = 51,000/- 6 x 10's (60's) = 102,000/- 12 x 10's (120's) = 204,000/-
	The status in reference regulatory authorities	Gleevec Tablets 100mg by M/s Novartis Pharmaceuticals corporation, New Jersey USA USFDA Approved.
	For generic drugs (me-too status)	Glivec Tablets 100mg by M/s Novartis Pharmaceuticals Pakistan. (Reg. No.: 033196)
	GMP status of the Finished product manufacturer	Last DML Inspection dated 08-06-2022 concludes as 'GOOD' based on designed and established at an acceptable level of compliance of GMP requirements. Tablet (Anti-cancer) and Capsule (Anti-cancer) sections were approved.
	Name and address of API manufacturer.	M/s CDYMAX (India) Pharma Private Limited (Formerly known as Acebright (India) Pharma Pvt. Ltd.) 116/117, KIDAB, Indl. Area, Jigani 2nd Phase, Jigani, Bangalore-560 105 India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Imatinib Mesylate is available in European Pharmacopeia. Firm has submitted detail of nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: Real time: 30°C±2°C/75±5%RH for 18 months Accelerated: 40°C±2°C/75±5%RH for 6 months Batches: (IMBE21001, IMBE21002, IMBE21003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and

		controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against innovator's product Glivec 100mg Tablet, Batch LM8549 by Novartis Pharmaceuticals Germany by performing quality tests (Appearance, Assay, Dissolution and Impurities). CDP has been performed against the innovator's product that is Glivec 100mg Tablet Batch LM8549 by Novartis Pharmaceuticals Germany, in Acidic medium (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8).
	Analytical method validation/verification of product	Method Verification studies have submitted including system suitability, linearity, range, accuracy, precision, specificity and stability of solution.

STABILITY STUDY DATA			
Manufacturer of API	M/s CDYMAX (India) Pharma Private Limited (Formerly known as Acebright (India) Pharma Pvt. Ltd.) 116/117, KIDAB, Indl. Area, Jigani 2nd Phase, Jigani, Bangalore-560 105 India.		
API Lot No.	IMBE21001 and IMBE21002		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (10's, 30's, 60's and 120's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	M/s CDYMAX (India) Pharma Private Limited (Formerly known as Acebright (India) Pharma Pvt. Ltd.) 116/117, KIDAB, Indl. Area, Jigani 2nd Phase, Jigani, Bangalore-560 105 India.		
Batch No.	001NS04	001NS05	001NS06

Manufacturing Date	09-09-2022	20-09-2022	20-09-2022
Date of Initiation	05-10-2022	05-10-2022	05-10-2022
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of Drug Manufacturing License (DML) License no. KTK/25/506/2005 issued by Govt. of Karnataka, Drug control department, India. (valid till 14-07-2025).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Form 6 was issued to firm bearing no. K-734956897361 issue date: 21-07-2022 to import the Imatinib Mesylate 2.7 Kg from CDYMAX (India) Pharma Private Limited (Formerly known as Acebright (India) Pharma Pvt. Ltd.) 116/117, KIDAB, Indl. Area, Jigani 2nd Phase, Jigani, Bangalore-560 105 India for manufacturing of

		Trial and stability batches
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted data of stability batches along with batch manufacturing record, analytical record and attested documents like chromatograms, Raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted compliance certificate of HPLC software and audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature & humidity monitoring of stability chambers (real time and accelerated)

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated	Reply
1.	3.2.S.4.4	Which Polymorphic form was chosen for the manufacturing of the finished product.	This is to inform you that the polymorphic form of imatinib Mesylate used by Oncogen Pharma is 13-beta form and the same polymorphic form is used by innovator in Gleevec 100mg tablet (Novartis). We are enclosing the COA of drug substance manufacturer confirming the polymorphic form and Innovator product reference document.
2.	3.2.P.5.1	US FDA review document of the Innovator product, specifies the dissolution limit as "NLT Q in 15 minutes" whereas submitted specifications declare the dissolution limits as "NLT 85% in 20 minutes"	This is to inform you that our product specification is in-house and not available in any pharmacopeia. Therefore, dissolution sampling time point was set as 20mins. We have performed Comparative dissolution profile (CDP) which shows that tablets were dissolved more than 85% within 15 minutes in acidic medium such as 0.IN HCI. We hereby commit that we will revise the dissolution sampling time on commercial specifications of our product in line with innovator specifications. CDP data is attached.

Decision: Approved. Firm shall submit revised drug product specifications with sampling time of 15 minutes for dissolution test along with fee of Rs. 7,500/- for correction/pre-approval change in product specifications as per notification No.F.7-11/2012-B&A/DRAP dated 07-05-2021, before issuance of registration letter.

M/s Swera Pharmaceuticals. (New DML)

CLB in its 282nd meeting held on 31st August 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following six (06) sections to M/s Swera Pharmaceuticals

1	Tablet(General)	4	Cream/ Gel (General)
2	Capsule (General)	5	Lotion Section (General)
3	Sachet (General)	6	Dry Powder Injection (General)

Tablet (General)

01 Molecule/ 01 product

408.	Name, address of Applicant / Marketing Authorization Holder	M/s Swera Pharmaceuticals. Plot No. 27, Street No. S-4, National Industrial Zone, Rawat, Islamabad
	Name, address of Manufacturing site.	M/s Swera Pharmaceuticals. Plot No. 27, Street No. S-4 National Industrial Zone, Rawat, Islamabad
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML letter issued dated; 16-09-2021
	Evidence of approval of manufacturing facility	New DML letter issued dated; 16-09-2021 in which Tablet (General) section mentioned.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 3932 dated 10-02-2023
	Details of fee submitted	PKR 30,000/- Deposit slip# 669914589
	The proposed proprietary name / brand name	Terbiera 10g Cream
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each gram cream contains: Terbinafine as HCl……10mg
	Pharmacotherapeutic Group of (API)	Antifungal
	Pharmaceutical form of applied drug	White to off white semisolid filled in Aluminum tube

	Reference to Finished product specifications	JP
	Proposed Pack size	1 x 10gm Tube
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LAMISIL 1% w/w Cream by GlaxoSmithKline Consumer Healthcare of (MHRA Approved)
	For generic drugs (me-too status)	LAMISIL 1% w/w Cream by M/s GlaxoSmithKline Consumer Health Care Pakistan Ltd Reg #084005
	Name and address of API manufacturer.	M/s Saptagir Laboratories Address: Sy.No.Parts of 27, 46 %0 to 56 Ananthasagar (Vill), Chegunta (Mandal) Medak (district, Telegana, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Official monograph of Terbinafine HCL is present in BP. Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (TH0131216, TH0141216, TH0151216)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the 'Lamisil cream 1% of M/s Glaxo smith Klien, by performing quality tests (Identification, weight variation, Assay).
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug

		product.

STABILITY STUDY DATA			
Manufacturer of API	M/s Saptagir Laboratories Address: Sy.No.Parts of 27, 46 %0 to 56 Ananthasagar (Vill), Chegunta (Mandal) Medak (district, Telegana, India.		
API Lot No.	TH0010122		
Description of Pack (Container closure system)	Aluminium Tube filled with cream		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	RD-TC001	RD-TC002	RD-TC003
Batch Size	300 Tubes	300 Tubes	300 Tubes
Manufacturing Date	05-2022	05-2022	05-2022
Date of Initiation	18-05-2022	18-05-2022	19-05-2022
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No.L.DIS. No.111050/TS/2023 dated 21-02-2023 issued by Drugs Control Administration Government of Telegana India. Valid till 20-02-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of form 5 and clearance certificate no # E-1226082941489 , dated;21-05-2022 specify commercial invoice 2223/SL/009 on 20-04-2022 specifying 1Kg of Terbinafine batch # TH0010122.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not 21CFR compliant
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.No	Section	Shortcoming communicated	Reply
1.	1.6.5	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Valid Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin submitted.
2.	3.2.P.3.5	Process validation protocol does not include sampling plan.	Process validation protocol including sampling plan submitted.

3.	3.2.P.8	• Submit COA's of all time points • Compliance Record of HPLC software 21CFR & audit trail reports on product testing	COA's of all time points submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

M/s Pine Pharmaceuticals. (New DML)
CLB in its 285th meeting held on 17th and 18th March 2022 has considered and approved the grant of Drug Manufacturing License by way of formulation with following three (03) sections to M/s Pine Pharmaceuticals

1.	Tablet (General)
2.	Capsule (General)
3.	Cream Ointment (General)

Accordingly, firm has applied for following products for consideration by Drug Registration Board

Tablet (General)
01 Molecules/ 01 Products

409.	Name, address of Applicant / Marketing Authorization Holder	M/s Pine Pharmaceuticals Rawat, Islamabad.
	Name, address of Manufacturing site.	M/s Pine Pharmaceuticals Plot# 40,Street#S-6,National Industrial Zone, Rawat, Islamabad.
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML letter issued dated; 29-04-2022
	Evidence of approval of manufacturing facility	New DML letter issued dated; 29-04-2022 in which Tablet (General) section mentioned.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 8830 dated 31-03-2023
	Details of fee submitted	PKR 30,000/- Deposit slip# 4362231089
	The proposed proprietary name / brand name	**Terbipine 125mg tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each uncoated tablet contains: Terbinafine as HCl …….125mg
	Pharmacotherapeutic Group of (API)	Antifungal
	Pharmaceutical form of applied drug	White color, round, uncoated tablets
	Reference to Finished product specifications	USP
	Proposed Pack size	1 x 10's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Terbinafine 125mg tablet MHRA/TGA Approved.

	For generic drugs (me-too status)	Lamisil 125mg Tablet by M/s Novartis Pharma Pakistan, Reg. No. 013208
	Name and address of API manufacturer.	M/s Tagoor Laboratories Pvt. Ltd., (Unit-1), Sy No 29, Tupakulagudem (V), Pochavaram Panchayat, Tallapudi (M), West Godavari, Dis-534341, A.P, India
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Official monograph of Terbinafine HCl is present in USP. Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 36 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (TBH0131216, TBH0141216, TBH0151216)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the brand leader that is Lamisil 125mg tablet by M/S Novartis Pharama Pakistan by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Lamasil 125mg tablet by M/S Novartis Pharma Pakistan in Acid media (pH 1.0-1.2), Acetate buffer (pH-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

	Module-III Drug Substance:	Official monograph of Ebastine is present in BP. Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (EB/161005, EB/161006, EB/161007)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the brand leader that is Kestine 10mg tablet by M/S Highnoon Laboratories limited Pakistan by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Kestine 10mg tablet by M/S Highnoon Laboratories limited Pakistan in Acid media (pH 1.0-1.2), Acetate buffer (pH-4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

M/s Fortune Pharma Private Limited. (New DML)

CLB in its 278th meeting held on 10th and 11th December 2020 has considered and approved the grant of Drug Manufacturing License by way of formulation with following five (05) sections to M/s Fortune Pharma Private Limited

1.	Tablet (General)	2.	Liquid Ampoule (General)
3.	Liquid Syrup (General)	4.	Liquid Vial (General)
5.	Capsule (General)	6.	Tablet (Psychotropic)
7.	Ointment (General) Section	8.	Capsule (Psychotropic)
9.	Sachet (General)	10.	Liquid Ampoule (Psychotropic)

Accordingly, firm has applied for following products for consideration by Drug Registration Board

Tablet (General)
01 Molecules/ 01 Products

417.	Name, address of Applicant / Marketing Authorization Holder	M/s Fortune Pharma Private Limited Head Office Suit # 731, 7th Floor Mashriq Centre, Opp National Stadium Road Karachi
	Name, address of Manufacturing site.	M/s Fortune Pharma Private Limited Plot # K/201,S.I.T.E (SHW) Phase-II, Karachi
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML letter issued dated; 22-02-2021
	Evidence of approval of manufacturing facility	New DML letter issued dated; 22-02-2021 in which Sachet Powder (General) section mentioned.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 14703 dated 12-06-2023
	Details of fee submitted	PKR 30,000/- Deposit slip# 971774668
	The proposed proprietary name / brand name	**Mon-Kast 4mg Sachet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Sachet Contains: Montelukast as Sodium…..4mg
	Pharmacotherapeutic Group of (API)	Leukotriene receptor antagonist
	Pharmaceutical form of applied drug	White to off white semisolid filled in Aluminum tube
	Reference to Finished product specifications	USP
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	SINGULAIR granules for powder 4mg of (MHRA Approved)

	For generic drugs (me-too status)	Lucast powder for Solution by M/s AGP Limited Reg #048716
	Name and address of API manufacturer.	M/s Morpen Laboratories Limited Address: Masulkana Parwanoo, Distt. Solan Himachal Pradesh India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Official monograph of Montelukast Sodium is present in USP. Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (MTN14-8015, MTN14-9001, MTN14-9036)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the 'Lucast 4mg of M/s AGP Limited, by performing quality tests Identification, average weight, Assay & Dissolution). CDP has been performed against the 'singulair 4mg of M/s MSD Thailand (importer), in Acidic media (pH 1.2), Acetate Buffer (pH 4.5) & Phosphate Buffer (pH 6.8) and in Sodium phosphate buffer (pH 7.5) . The f2 values are in the acceptable range.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA		
Manufacturer of API	M/s Morpen Laboratories Limited Address: Masulkana Parwanoo, Distt. Solan Himachal Pradesh India.	
API Lot No.	MS/2017003	
Description of Pack (Container closure system)	Filled in sealed printed foil sachet	
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH	
Time Period	Real time: 6 months Accelerated: 6 months	
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)	
Batch No.	MK/4-001	MK/4-002
Batch Size	5000	5000
Manufacturing Date	01-2022	01-2022
Date of Initiation	01-2022	01-2022
No. of Batches	03	

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No.L.HFW-hDrugs) 93/91 dated 23-02-2022 issued by Health and family Welfare Department Himachel Pradesh Baddi, District, Solan India. Valid till 11-05-2024
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Our system is not 21 CFR compliant.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.No	Section	Shortcoming communicated	Response of the Firm
1.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Firm submit the Trial Form of two batches.
2.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.	Firm submitted the Analytical Method Verification studies.
3.	3.2.S.5	COA of primary / secondary reference standard including source and lot number of montelukast	Firm submitted the COA of reference standard montelukast dicyclohexylamine.

		dicyclohexylamine shall be provided	
4.	3.2.P.2.2.1	• Pharmaceutical equivalence is not conducted against Innovator product. • CDP and pharmaceutical equivalence is performed against two different products. Clarify.	Firm in their reply stated that the innovator product was not available at the time of studies, so brand leader was procured and PE studies was conducted. Later on, as singular was available CDP was conducted.
5.	3.2.P.8	Documents for the procurement of API with approval from DRAP.	Firm submitted the DRAP attested invoice.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

M/s WALLACE PHARMA. (New DML)

CLB in its 284th meeting held on 16th December 2021 has considered and approved the grant of Drug Manufacturing License by way of formulation with following six (06) sections to M/s WALLACE PHARMA

1.	Capsule (Penicilline) Section
2.	Oral Dry powder Suspension (Penicilline) Section
3.	Injection (Carbapenem)
4.	Dry Powder Injection (Penicilline)Section

Dry Powder Injection (Penicilline) Section
01 Molecules/ 02 Products

418.	Name, address of Applicant / Marketing Authorization Holder	M/S Wallace Pharma Evolutions, Kalawala Stop, 20-Km, Lahore Jaranwala Road, Lahore
	Name, address of Manufacturing site.	M/S Wallace Pharma Evolutions, Kalawala Stop, 20-Km, Lahore Jaranwala Road, Lahore
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	New DML letter issued dated; 27-12-2021
	Evidence of approval of manufacturing facility	New DML letter issued dated; 27-12-2021 in which Dry Powder Injection (Penicilline)Section mentioned.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 11794 dated 15-05-2023
	Details of fee submitted	PKR 30,000/- Deposit slip# 20835349
	The proposed proprietary name / brand name	TAZOCIN 2.25gm Injection
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each Vial Contains: Piperacillin Sodium (USP) ……..... 2000mg Tazobactam Sodium (USP) …….....250mg (Product Complies USP Specs)
	Pharmacotherapeutic Group of (API)	combination medication containing the antibiotic Penicillins and the β-lactamase inhibitor tazobactam

	Pharmaceutical form of applied drug	Sterile, preservative-free, clear, white to off white to yellow color, Powder, free from foreign particles in a vial with rubber stopper and seals in unit carton.
	Reference to Finished product specifications	USP
	Proposed Pack size	1 x 1's
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Tazocin 2 g / 0.25 g powder for solution for infusion by Pfizer Limited of MHRA approved
	For generic drugs (me-too status)	Zosyn 2.25gm INJECTION of M/s Regent Laboratories Reg# 070759
	Name and address of API manufacturer.	Shandong Anxin Pharmaceutical Co., Ltd. Address: No. 849, Dongjia Town, Licheng District, Jinan, Shandong, China (Peviously Qilu Tianhe Pharmaceuticals co.,Ltd)
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product.
	Module-III Drug Substance:	Official monograph of Piperacillin + Tazobactam is present in USP. Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Stability study conditions: Real time: 30˚C ± 2˚C / 65% ± 5%RH for 24 months Accelerated: 40˚C ± 2˚C / 75% ± 5%RH for 6 months Batches: (HF7001D1, HF7001D2, HF7001D3)
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Pharmaceutical Equivalence have been established against the is A Tanzo 2.25gm injection by M/s Bosch Pharmaceuticals (Pvt) Ltd. by performing quality tests (Identification, pH,

		Sterility, Assay,).
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

STABILITY STUDY DATA			
Manufacturer of API	Shandong Anxin Pharmaceutical Co., Ltd. Address: No. 849, Dongjia Town, Licheng District, Jinan, Shandong, China		
API Lot No.	HF2065D3		
Description of Pack (Container closure system)	Sterile, preservative-free, clear, white to off white to yellow colour, Powder, free from foreign particles in a vial with rubber stopper and seals in unit carton.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	T01	T02	T03
Batch Size	460 packs	460 packs	460 packs
Manufacturing Date	10-2022	10-2022	10-2022
Date of Initiation	07.10.22	07.10.22	07.10.22
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 2018001 issued by Shandong Food and Drug Administration valid till 24/07/2023.(Qilu Tianhe Pharmaceuticals co.,Ltd)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	A letter to AD R-II was written from M/s Stallion Pharmaceuticals that they lend Piperacilline and Tazobactum 15kg Batch # HF2065D3 to M/s Wallace Pharma Evolution on dated: 04-10-2022 Firm has submitted copy of Clearnce certificate # E-2669242824625 specifying Commercial Invoice # WWM220705, dated; 30-08-2020 issue by DRAP Lahore office date: 15-11-2022 specifying 210Kg of Piperacilline Sodium and Tazobactum Sodium Sterile batch # HF2065D3.(Stallion Pharmaceuticals Pvt Ltd)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.No	Section	Shortcoming communicated

1.	2.3.R.1.1	Piperacillin Sodium and Tazobactam Sodium are in premixed for (8:1) than how separately dispensed per Vial.
2.	3.2.S.4.1	Copies of the Drug substance specifications Drug Product manufacturer is required.
3.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.
5.	3.2.S.4.4	Which specifications are followed by drug product manufacturer for drug substance.
6.	3.2.P.1	Clarify it is ready to fill form or further processing is done by you with addition of excipients.
7.	3.2.P.2.6	Compatibility studies with diluent for the dry powder for injections shall be performed as per the instructions provided in individual label of the drug product.
8.	3.2.P.5.3	Analytical method verifications protocols for drug product shall be submitted.
9.	3.2.P.5.4	Water determinations was not done on all the 3 batches as mentioned in USP monograph. Clarification is required.
10.	3.2.P.8	• Submit packaging list of import of material. • Water determinations was not done in both Real and accelerated stability studies as mentioned in USP monograph. Clarification is required.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 2018001 issued by Shandong Food and Drug Administration valid till 24/07/2023.(Qilu Tianhe Pharmaceuticals co.,Ltd)
3.	Documents for the procurement of API with approval from DRAP (in case of import).	A letter to AD R-II was written from M/s Stallion Pharmaceuticals that they lend Piperacilline and Tazobactum 15kg Batch # HF2065D3 to M/s Wallace Pharma Evolution on dated: 04-10-2022 Firm has submitted copy of Clearnce certificate # E-2669242824625 specifying Commercial Invoice # WWM220705, dated; 30-08-2020 issue by DRAP Lahore office date: 15-11-2022 specifying 210Kg of Piperacilline Sodium and Tazobactum Sodium Sterile batch # HF2065D3.(Stallion Pharmaceuticals Pvt Ltd)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Firm has submitted analytical record for product testing.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

S.No	Section	Shortcoming communicated
1.	2.3.R.1.1	Piperacillin Sodium and Tazobactam Sodium are in premixed for (8:1) than how separately dispensed per Vial.
2.	3.2.S.4.1	Copies of the Drug substance specifications Drug Product manufacturer is required.
3.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and

		repeatability (method precision) performed by the Drug Product manufacturer for drug substance(s) shall be submitted.
5.	3.2.S.4.4	Which specifications are followed by drug product manufacturer for drug substance.
6.	3.2.P.1	Clarify it is ready to fill form or further processing is done by you with addition of excipients.
7.	3.2.P.2.6	Compatibility studies with diluent for the dry powder for injections shall be performed as per the instructions provided in individual label of the drug product.
8.	3.2.P.5.3	Analytical method verifications protocols for drug product shall be submitted.
9.	3.2.P.5.4	Water determinations was not done on all the 3 batches as mentioned in USP monograph. Clarification is required.
10.	3.2.P.8	• Submit packaging list of import of material. • Water determinations was not done in both Real and accelerated stability studies as mentioned in USP monograph. Clarification is required.

Decision: Registration Board deferred the case for submission of reply to the above cited shortcomings and evaluation by PE&R Division.

Deferred case

M/s Nagarsons Pharmaceutical (Pvt) Ltd. (New DML)

Firm has submitted copy of Acknowledgment of receipt of application for grant of DML by way of formulation to M/s Nagarsons Pharmaceuticals dated 19-02-2021 from Secretary Central Licensing Board. The letter specifies that CLB in its 278th meeting held on 10th and 11th December 2020 has approved the grant of DML in the name of M/s Nagarsons Pharmaceuticals for following sections:

1. Tablet (General)
2. Tablet (Psychotropic)
3. Capsule (General)
4. Cream /ointment/Lotion/Gel

Sr. No	Section	Molecules for consideration in 327th meeting	Products for consideration in 327th meeting

6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Not submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated
1.	1.3.5.	GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.
2.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin
3.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
4.	3.2.S.4.1	Copies of the Drug substance specifications by Drug Product manufacturer is required.

5.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.
6.	3.2.P.2.2.1	• Justification shall be submitted for not carrying the CDP against the innovator's brand • Details and picture/image/ snapshot of product against which Pharmaceutical Equivalence and CDP conducted. • 6 units of each of both test and reference product are used for CDP. Clarification is required in the light of FDA guidance for industry and EMA guidelines of Comparative dissolution. • As per Innovator product in CDP percentage dissolved is higher than 85% at 15 minutes in all the 03 media i.e HCl 0.1N, 4.5 and pH 6.8 while as per your CDP data higher than 85% at 30 minutes. Justification is required.
7.	3.2.P.5.1	Applied formulations in section 1.5.6 are Innovator while in this section USP specifications are clamed. Clarify.
8.	3.2.P.5.3	Analytical method verification submitted while product is not available in any pharmacopeia.
9.	3.2.P.8	• Documents for the procurement of API with approval from DRAP as submitted Commercial Invoice is not in readable form. • Batch size is not mentioned • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Previous Decision (M-327): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation by PEC:

S.No	Section	Shortcomings Communicated	Reply
1.	1.3.5.	GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	We are new license facility and there fore till date our GMP inspection is not yet carried out by DRAP.
2.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	GMP certificate of API manufacturer is attached. *Copy of GMP certificate No# S-GMP/22113654 issued by Food and Drug Control Administration Gandhinagar, Gujrat state India. issued on 04-11-2022 and valid until 03-11-2024.*
3.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Copy of BMR of three batches is attached.
4.	3.2.S.4.1	Copies of the Drug substance specifications by Drug Product manufacturer is required.	Drug substance specifications of Nagarsons Pharmaceutical submitted.
5.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Drug substance analytical procedure of Nagarsons Pharmaceutical submitted.

6.	3.2.P.2.2.1	• Justification shall be submitted for not carrying the CDP against the innovator's brand • Details and picture/image/ snapshot of product against which Pharmaceutical Equivalence and CDP conducted. • 6 units of each of both test and reference product are used for CDP. Clarification is required in the light of FDA guidance for industry and EMA guidelines of Comparative dissolution. • As per Innovator product in CDP percentage dissolved is higher than 85% at 15 minutes in all the 03 media i.e HCl 0.1N, 4.5 and pH 6.8 while as per your CDP data higher than 85% at 30 minutes. Justification is required.	• Pharmaceutical equivalence and CDP studies have been performed against Levopraid tablet which is the brand leader in Pakistan, since the innovator's product is not registered in Pakistan. Moreover, the comparator brand Levopraid is registered in Pakistan under the License of a reference product Levopraid tablet of Ravizza Farmaceutici Italy. • CDP studies have been performed using 6 units of each, since we have 12 basket dissolution apparatus and all our products have been registered by Registration Board in which CDP studies have been performed using 12 basket apparatus. Moreover, we undertake to procure dissolution apparatus with 24 baskets for CDP studies in future. • Revised CDP with 75RPM in three media i.e in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8) percentage dissolved is higher than 85% at 15 minutes in all the 03 media i.e HCl 0.1N, 4.5 and pH 6.8.(*initially firm used 50 RPM so higher than 85% at 30 minutes in all the 03 media i.e HCl 0.1N, 4.5 and pH 6.8*)
7.	3.2.P.5.1	Applied formulations in section 1.5.6 are Innovator while in this section USP specifications are clamed. Clarify.	There was some typo error while drafting our specifications are as innovator's product since no USP or BP monograph exist for this product
8.	3.2.P.5.3	Analytical method verification submitted while product is not available in any pharmacopeia.	Analytical method validation studies are provided.
9.	3.2.P.8	• Documents for the procurement of API with approval from DRAP as submitted Commercial Invoice is not in readable form. • Batch size is not mentioned • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• Commercial Invoice attested by DRAP Islamabad submitted. • Batch size of our stability batches is 2000. *(Batch size in BMR is 2000 mentioned while on Raw data sheets of stability studies data Batch size of 2500 Tablets mentioned.)* • Our HPLC system is not 21 CFR compliant therefore audit trail report is not available. However, we have maintained complete log of he equipment as well as product testing as per GMP requirements. • Record of Digital data logger is provided.
Decision: Approved.			

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

1.	1.3.5.	GMP inspection report/ GMP certificate of the manufacturing unit issued within the last three years shall be submitted.	We are new license facility and there fore till date our GMP inspection is not yet carried out by DRAP.

2.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin	GMP certificate of API manufacturer is attached. *Copy of GMP certificate No# S-GMP/22113654 issued by Food and Drug Control Administration Gandhinagar, Gujrat state India. issued on 04-11-2022 and valid until 03-11-2024.*
3.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Copy of BMR of three batches is attached.
4.	3.2.S.4.1	Copies of the Drug substance specifications by Drug Product manufacturer is required.	Drug substance specifications of Nagarsons Pharmaceutical submitted.
5.	3.2.S.4.2	Analytical procedures used for routine testing of the Drug substance /Active Pharmaceutical Ingredient by Drug Product manufacturer is required.	Drug substance analytical procedure of Nagarsons Pharmaceutical submitted.
6.	3.2.P.2.2.1	• Justification shall be submitted for not carrying the CDP against the innovator's brand • Details and picture/image/ snapshot of product against which Pharmaceutical Equivalence and CDP conducted. • 6 units of each of both test and reference product are used for CDP. Clarification is required in the light of FDA guidance for industry and EMA guidelines of Comparative dissolution. • As per Innovator product in CDP percentage dissolved is higher than 85% at 15 minutes in all the 03 media i.e HCl 0.1N, 4.5 and pH 6.8 while as per your CDP data higher than 85% at 30 minutes. Justification is required.	• Pharmaceutical equivalence and CDP studies have been performed against Levopraid tablet which is the brand leader in Pakistan, since the innovator's product is not registered in Pakistan. Moreover, the comparator brand Levopraid is registered in Pakistan under the License of a reference product Levopraid tablet of Ravizza Farmaceutici Italy. • CDP studies have been performed using 6 units of each, since we have 12 basket dissolution apparatus and all our products have been registered by Registration Board in which CDP studies have been performed using 12 basket apparatus. Moreover, we undertake to procure dissolution apparatus with 24 baskets for CDP studies in future. • Revised CDP with 75RPM in three media i.e in Acid media (pH 1.2), Acetate buffer (pH 4.5) & Phosphate Buffer (pH 6.8) percentage dissolved is higher than 85% at 15 minutes in all the 03 media i.e HCl 0.1N, 4.5 and pH 6.8.(*initially firm used 50 RPM so higher than 85% at 30 minutes in all the 03 media i.e HCl 0.1N, 4.5 and pH 6.8*)
7.	3.2.P.5.1	Applied formulations in section 1.5.6 are Innovator while in this section USP specifications are clamed. Clarify.	There was some typo error while drafting our specifications are as innovator's product since no USP or BP monograph exist for this product
8.	3.2.P.5.3	Analytical method verification submitted while product is not available in any pharmacopeia.	Analytical method validation studies are provided.
9.	3.2.P.8	• Documents for the procurement of API with approval from DRAP as submitted Commercial	• Commercial Invoice attested by DRAP Islamabad submitted. • Batch size of our stability batches is 2000. *(Batch size in BMR is 2000 mentioned while*

		Invoice is not in readable form. • Batch size is not mentioned • Compliance Record of HPLC software 21CFR & audit trail reports on product testing. • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	*on Raw data sheets of stability studies data Batch size of 2500 Tablets mentioned.)* • Our HPLC system is not 21 CFR compliant therefore audit trail report is not available. However we have maintained complete log of he equipment as well as product testing as per GMP requirements. • Record of Digital data logger is provided.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

Manufacturing Date	27-11-21	29-11-21	30-11-21
Date of Initiation	30-11-21	30-11-21	30-11-21

No. of Batches		03
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No# S-GMP/20102297 issued by Food and Drug Control Administration Gandhinagar, Gujrat state India. issued on 22-10-2020 and valid until 21-10-2022.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of Form invoice (invoice# AV/I/00062/22-23) dated: 13-11-2021 specifying import 200gm Piroxicam (Batch# PCM-22041)
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator: During Evaluation it was observed that AGM pharmaceuticals, Gujranwala and Pharman Pharmaceutical, Gujranwala DML have same Name of Production in charge.

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Valid Drug Manufacturing License Or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Not submitted.
2.	3.2.S.4.3	Analytical Method Verification studies Submitted by HPLC while B.P specifications are claimed by drug product manufacturer.	USP specifications was applied for API testing that's why HPLC AMV studies were submitted. Evaluation: Firm claimed BP specification in COA of drug substance and limits are also according to BP i.e Assay limits applied are 98.5% to 101.0% which are according to BP specifications while USP specifications for Assay are 97.0% to 103.0%
3.	3.2.P.1	DC granular used as excipient in formulation. Explain what is DC granular.	DC lactose granular was used but lactose word was skipped. It is a typographical error. Revised documents submitted.
4.	3.2.P.5.1	Submit complete Specifications as per USP monograph.	Specification as per USP monograph are attached
5.	3.2.P.5.2	Submit analytical testing method of drug product instead of USP monograph presentation.	Analytical testing method of drug product submitted.
6.	3.2.P.5.4	Water content as per USP monograph not Performed. Clarification is required.	Water content is tested on next time point and report is attached.
7.	3.2.P.8	Documents for the procurement of API with approval from DRAP.	Commercial invoice without DRAP approval submitted.

Previous Decision (M-326): Deferred for following:

- Submission of valid Drug Manufacturing License or valid Good Manufacturing Practice (GMP)

- certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country
- of origin.
- Justification for applying USP monograph for the drug substance analysis and analytical method
- verification studies whereas drug product manufacturer has claimed BP specifications for the drug
- substance.
- Documents for the procurement of API with approval from DRAP.

Registration Board was further apprised that during evaluation it was identified that "Production In charge" of two firms i.e., M/s AGM Pharmaceuticals Eminabad Road, G.T. Road, Gujranwala & M/s Pharman Pharmaceuticals 6 Km, Bohmaan Bath Road, Kalasky, Gujranwala, was same, as evident form submitted documents. Hence Registration Board advised PE&R Division to refer the case to Licensing Division for clarification/necessary action.

Evaluation by PEC:

S.No	Reason of deferment	Reply
1)	Submission of valid Drug Manufacturing License or valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by relevant regulatory authority of country of origin.	Valid Drug Manufacturing License And valid Good Manufacturing Practice (GMP) Certificate is attached
2)	Justification for applying USP monograph for the drug substance analysis and analytical method verification studies whereas drug product manufacturer has claimed BP specifications for the drug substance.	We are applying USP monograph for Drug Substance and Drug Product with all parameters. Due to typographical mistake on claimed BP Specification
3)	Documents for the procurement of API with approval from DRAP.	We used Loan material from Batala Pharma. Loan letter is attached. Commercial invoice #2020-21/000447 dated: 05-11-2020 Approved by DRAP Lahore dated: 04-12-2020 specifying import of

Registration Board was further apprised that during evaluation it was identified that "Production In charge" of two firms i.e., M/s AGM Pharmaceuticals Eminabad Road, G.T. Road, Gujranwala & M/s Pharman Pharmaceuticals 6 Km, Bohmaan Bath Road, Kalasky, Gujranwala, was same, as evident form submitted documents. Hence Registration Board advised PE&R Division to refer the case to Licensing Division for clarification/necessary action.

Justification:

We, M/s AGM Pharmaceuticals, ensure that during the hiring process of technical staff for the positions of Production Incharge and Quality Control, we abide by the Manual of Drug Law. Both the CEO and the technical staff are required to sign an undertaking stating that they are full-time employees of our firm and do not work elsewhere. In case of any violation, the responsible person will face necessary action from DRAP (Drug Regulatory Authority of Pakistan).

Furthermore, we have also made changes to our technical staff and have applied for an approval letter from the Licensing Department of DRAP. Attached is the evidence of our application for the approval of the technical staff.

Decision: Approved. Registration letter will be issued upon submission of fee of Rs. 7,500/- for pre-approval change in drug substance specifications

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The status in reference regulatory authorities	Paracetamol 500MG tablet of USFDA Approved.
	For generic drugs (me-too status)	Panadol 500mg Tablet of M/s GSK
	GMP status of the Finished product manufacturer	New DML issued on 10/11/2021
	Name and address of API manufacturer.	Citi Pharma (Pvt.) Ltd. 3.5 Kilometer, Head Balloki Road, Phool Nagar, Kasur -55050 Punjab, Pakistan.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 72 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (TRT016, TRT017, TRT018)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the brand leader that is Panadol 500mg capsules BY GSK Pharma by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is PARACETAMOL TABLET 500MG capsule by GSK in Acid media (pH 1.0-1.2) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable

		range.		
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.		
STABILITY STUDY DATA				
Manufacturer of API		Citi Pharma (Pvt.) Ltd. 3.5 Kilometer, Head Balloki Road, Phool Nagar, Kasur -55050 Punjab, Pakistan.		
API Lot No.		PGP21-401		
Description of Pack (Container closure system)		Alu-Alu blister packed in unit carton (2×10's)		
Stability Storage Condition		Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period		Real time: 6 months Accelerated: 6 months		
Frequency		Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.		TRT016	TRT017	TRT018

Manufacturing Date		01-12-21	02-12-21	03-12-21
Date of Initiation		04-12-2021	04-12-2021	04-12-2021
No. of Batches		03		
Administrative Portion				
1.	Reference of previous approval of applications with stability study data of the firm (if any)			
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate issued by DRAP on the basis of Evaluation conducted on 17-12-2020 and valid for 2 years.		
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Local purchase.		
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.		
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	The firm has submitted Compliance Record of HPLC software 21CFR & audit trail reports on product testing.		
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).		
Decision: Deferred for submission of complete new pharmaceutical development data including the stability data of newly formulated trial batches along with full fee of registration.				

b. New/Additional section(s)
Deferred case

M/s PDH Laboratories Pvt Ltd. (New Section)
CLB in its 285th meeting held on 17th & 18th March 2022, has approved the following 01 additional sections
of M/s PDH Laboratories Pvt Ltd.

1.Oral liquid Section (General) Additional

Sr. No	Section	Molecules for consideration in 327th meeting	Products for consideration in 327th meeting
1	Oral liquid Section (General)	01	02

425.	Name, address of Applicant / Marketing Authorization Holder	M/s PDH Laboratories Pvt Ltd. 9.5 km, Sheikhupura Road, Lahore, Pakistan
	Name, address of Manufacturing site.	M/s PDH Laboratories Pvt Ltd. 9.5 km, Sheikhupura Road, Lahore, Pakistan
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 3222 dated 03-02-2023
	Details of fee submitted	PKR 30,000/-: Deposit slip # 708047908
	The proposed proprietary name / brand name	**Temol Suspension 120mg/5ml**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each 5ml Contains: Paracetamol…….120mg
	Pharmaceutical form of applied drug	Clear, viscous liquid light orange to orange colour
	Pharmacotherapeutic Group of (API)	Analgesic and Antipyretic
	Reference to Finished product specifications	USP
	Proposed Pack size	1's x 60ml
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Paracetamol 120 mg/5 ml Oral Suspension by Pinewood Laboratories Limited, Ireland of MHRA approved.
	For generic drugs (me-too status)	Calpol Pediatric Suspension of M/s GlaxosmithKline Pakistan. No.000354
	GMP status of the Finished product manufacturer	Copy of cGMP certificate on the basis of Evaluation conducted on 04-01-2022 and valid for two years.
	Name and address of API manufacturer.	M/s Saakh Pharma (Pvt) Ltd Address: C-7/1, Nwiz, Port Qasim Karachi.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and

		justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Official monograph of Paracetamol(Actaminophen) is present in USP. The firm as submitted detail of nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, tests for impurity, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 18 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (21GN60001, 21GN60002, 21GN60003)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence is established against the brand that is Calpol Suspension by M/s GSK Batch # 372R by performing quality tests (description, Identification, pH, Deliverable Volume, Viscosity, Microbial Enumeration, Assay)
	Analytical method validation/verification of product	Method verification studies have submitted including accuracy, precision, specificity.

STABILITY STUDY DATA

Manufacturer of API	M/s Saakh Pharma (Pvt) Ltd Address: C-7/1, Nwiz, Port Qasim Karachi.		
API Lot No.	21GN60187		
Description of Pack (Container closure system)	Clear, viscous liquid light orange to orange colour sweet in taste filled in ambered glass bottle of USP type III sealed with Aluminium cap, neatly labelled and packed in a unit carton with insertion of a leaflet		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12 (Months)		
Batch No.	T-006	T-007	T-008
Batch Size	40 bottles	40 bottles	40 bottles
Manufacturing Date	11-2021	11-2021	11-2021
Date of Initiation	10-12-2021	10-12-2021	10-12-2021

No. of Batches		03
Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of cGMP certificate on the basis of evaluation conducted on 07-10-2022 and valid for 02 years.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Not submitted
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	The firm has submitted Data of stability batches supported by attested respective documents like chromatograms, raw data sheets, COA, summary data sheets etc.
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Not submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	The firm has submitted Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated
1.	3.2.S.4.3	In Drug Substance Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).
2.	3.2.P.2.2.1	In Pharmaceutical Equivalence Test product is tested on USP specifications while GSK product (Reference/Comparator) tested on BP Specifications. Clarify why different specifications are used.
3.	3.2.P.5.2	In Assay final concentrations is 0.01mg/ml while 96 mg of paracetamol from oral suspension taken. Clarify how from 96mg 0.01mg/ml concentration prepared.
4.	3.2.P.5.3	In Drug Product Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).
5.	3.2.P.8	Purchase Documents for Paracetamol. Compliance Record of HPLC software 21CFR & audit trail reports on product testing

Previous Decision (M-327): Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Evaluation:

S. No	Section	Shortcomings Communicated	Reply
1.	3.2.S.4.3	In Drug substance Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).	The revised precision parameter of analytical method verification of drug substance is attached.
2.	3.2.P.2.2.1	In Pharmaceutical Equivalence Test product is tested on USP specifications while GSK product (Reference/Comparator) tested on BP Specifications. Clarify why different specifications are used.	The testing of reference product was performed as per claimed product specifications (BP Specs). Temol suspension was built on USP specifications during the product development phase. However revised

			pharmaceutical equivalence according USP specifications is submitted.
3.	3.2.P.5.2	In Assay final concentrations is 0.01mg/ml while 96 mg of paracetamol from oral suspension taken. Clarify how from 96mg 0.01mg/ml concentration prepared.	It was typo error. The revised analytical method is submitted. 100mg of paracetamol from oral suspension taken.
4.	3.2.P.5.3	In Drug Product Precision parameter of Analytical method verification is not conducted as per ICH Q2(R1) guidelines. Which states "a minimum of 9 determinations covering the specified range for the procedure (e.g., 3 concentrations/3 replicates each) while you have used 6 determinations (3 concentrations /2 replicates each).	The revised precision parameter of analytical method verification of drug product is submitted.
5.	3.2.P.8	• Purchase Documents for Paracetamol. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing	• The API was locally purchased. Purchased documents of paracetamol are attached. (Invoice #PRT/2021/0185 dated: 29-07-2021) • Compliance record of HPLC software 21 CFR & audit trail reports on product testing

Decision: Deferred for following clarifications:

- **Manufacturing facility along with details of equipmentswherein the trial batches have been manufactured along with evidence of approval of required manufacturing facility from CLB.**
- **Scientific rationale for selecting the batch size of 40 bottles for manufacturing of trial batches, along with the submission of complete record of no. of bottles used in analytical testing of trial batches of finished product at different time points of stability studies.**

M/s Crystolite Pharmaceuticals. (New Section)
CLB in its 290th meeting held on 28th April 2023, has approved the following 04 additional sections of M/s Crystolite Pharmaceuticals.

1. Dry Vial Section (Cephalosporin)
2. Dry Vial Section (Carbapenem)
3. Oral Dry Powder Suspension Section (Cephalosporin)
4. Capsule Section (Cephalosporin)

Sr. No	Section	Molecules for consideration in 330th meeting	Products for consideration in 330th meeting
1	Dry Vial Section (Carbapenem)	03	05

427.	Name and address of manufacturer / Applicant	M/s Crystolite Pharmaceuticals. Plot # 1 & 2, Street S-2, National Industrial Zone, Rawat, Islamabad
	Brand Name +Dosage Form + Strength	**Erapam 1gm Powder for concentrate for solution for**

		infusion
	Composition	Each Vial Contains: Ertapenem…….1gm
	Diary No. Date of R& I & fee	Dy.No 8218 dated 25-02-2019 Rs.20,000/- Dated 25-02-2019
	Pharmacological Group	Carbapenems
	Type of Form	Form 5
	Finished product Specifications	Manufacturer specifications
	Pack size & Demanded Price	1's: As per SRO
	Approval status of product in Reference Regulatory Authorities	INVANZ (ertapenem for injection) for intravenous (IV) or intramuscular (IM) use by M/s Merck Sharp & Dohme USA (USFDA Approved)
	Me-too status	Ernem Injection of M/s Genix Pharma, (Reg.# 081179)
	GMP status	Inspection date 13/07/2018, panel recommend grant of DML
	Remarks of the Evaluator	• Approval of section/manufacturing facility (carbapenem section) by the Central Licensing Board. • In reference as sodium while applied without sodium clarify, otherwise revise your formulation with submission of applicable fee
	Previous Decision (M-324): Deferred for submission of evidence of approval of required manufacturing facility i.e., Dry powder injection (Carbapenem) section from CLB or else while firm may transfer the registration application to by way of contract manufacturing upon submission of Form 5F, within six months.	
	Evaluation by PEC: Firm submitted section approval letter dated:12-07-2023 for Dry Vial Injection Section (Carbapenem)	
	Decision: Approved with innovator's specifications as per following label claim: **"Each Vial Contains:** **Ertapenem as sodium…….1gm"** **Firm shall submit fee of Rs. 30,000/- for pre-approval correction/change in salt form of rug substance, before issuance of registration letter.**	
428.	Name and address of manufacturer / Applicant	M/s Crystolite Pharmaceuticals. Plot # 1 & 2, Street S-2, National Industrial Zone, Rawat, Islamabad
	Brand Name +Dosage Form + Strength	Cinipem IV 250mg/250mg Powder for solution for infusion
	Composition	Each Vial Contains: Imipenem (as 265mg Imipenem Monohydrate)..……..250mg Cilastatin (as 265mg cilastatin sodium salt)……250mg (Sterile mixture also contains sodium bicarbonate as buffer)

	GMP status	Inspection date 13/07/2018, panel recommend grant of DML
	Remarks of the Evaluator	Approval of section/manufacturing facility (carbapenem section) by the Central Licensing Board.
	Previous Decision (M-324): Deferred for submission of evidence of approval of required manufacturing facility i.e., Dry powder injection (Carbapenem) section from CLB or else while firm may transfer the registration application to by way of contract manufacturing upon submission of Form 5F, within six months.	
	Evaluation by PEC: Firm submitted section approval letter dated:12-07-2023 for Dry Vial Injection Section (Carbapenem)	
	Decision: Approved **Registration letter will be issued after submission of evidence of Atomic absorption spectrophotometer along with its IQ, OQ and PQ reports.**	
431.	Name and address of manufacturer / Applicant	M/s Crystolite Pharmaceuticals. Plot # 1 & 2, Street S-2, National Industrial Zone, Rawat, Islamabad
	Brand Name +Dosage Form + Strength	Merolite 1g Powder for solution for injection or infusion
	Composition	Each Vial Contains: Meropenem (as 1141.56mg Meropenem Trihydrate eq to Anhydrous Meropenem) …… 1g (with anhydrous Sodium Carbonate)
	Diary No. Date of R& I & fee	Dy.No 8308 dated 25-02-2019 Rs.20,000/- Dated 25-02-2019
	Pharmacological Group	Carbapenems
	Type of Form	Form-5
	Finished product Specifications	USP
	Pack size & Demanded Price	1's; As per SRO
	Approval status of product in Reference Regulatory Authorities	MERREM® IV (meropenem for injection) 1g, for intravenous use. US-FDA approved
	Me-too status	Olver Injection of M/s Genix
	GMP status	Inspection date 13/07/2018, panel recommend grant of DML
	Remarks of the Evaluator	Approval of section/manufacturing facility (carbapenem section) by the Central Licensing Board.
	Previous Decision (M-324): Deferred for submission of evidence of approval of required manufacturing facility i.e., Dry powder injection (Carbapenem) section from CLB or else while firm may transfer the registration application to by way of contract manufacturing upon submission of Form 5F, within six months.	
	Evaluation by PEC: Firm submitted section approval letter dated:12-07-2023 for Dry Vial Injection Section (Carbapenem)	
	Decision: Approved. Registration letter will be issued after submission of evidence of atomic absorption spectrophotometer along with its IQ, OQ and PQ reports.	

Case no. 05 Registration applications of categories to be considered on priority

a. Local manufacturing applications of priority categories defined by Registration Board in its 257th meeting

Deferred case:

432.	Name, address of Applicant / Marketing Authorization Holder	M/s OPHTH PHARMA (PVT.) LTD. Plot No. 241, Sector-24, Korangi Industrial Area, Karachi-Pakistan
	Name, address of Manufacturing site.	M/s OPHTH PHARMA (PVT.) LTD. Plot No. 241, Sector-24, Korangi Industrial Area, Karachi-Pakistan
	Status of the applicant	☒ Manufacturer

		☐ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☒ New Drug Product (NDP) ☐Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 7346 dated 15/03/2022
	Details of fee submitted	PKR 75,000/-: Deposit slip # 4577578069
	The proposed proprietary name / brand name	PRIMLA (Topical Cream 5%)
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each gram of cream contains: Lidocaine Base USP.... 25mg Prilocaine Base USP… 25mg
	Pharmaceutical form of applied drug	Topical Cream
	Pharmacotherapeutic Group of (API)	Local Anesthetics
	Reference to Finished product specifications	USP
	Proposed Pack size	30 gm
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	LIDOCAINE AND PRILOCAINE Cream of M/s Tolmar Inc of USFDA approved
	For generic drugs (me-too status)	N/A
	GMP status of the Finished product manufacturer	cGMP certificate on the basis of Evaluation conducted 0n 27 -09-2021 and valid for 2 years. (Section Sterile Eye Ointment/Topical Cream mentioned)
	Name and address of API manufacturer.	Lidocaine and Prilocaine : Shandong Chengui Shuangda Pharmaceutical Co., ltd. Address: Economic Development zone, Pingyuan County, Dezhou City, Shandong Province253100, China Shandong Chengui Shuangda Pharmaceutical Co., ltd.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	Lidocaine: Official monograph of Lidocaine is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, tests for impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance

		Prilocaine : Official monograph of Prilocaine is present in USP. The firm has submitted detail of nomenclature, structure, general properties, solubility's,, physical form, manufacturers, description of manufacturing process and controls, tests for impurities & related substances, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance
	Stability studies	Stability study conditions: Lidocaine: Real time: 30°C ± 2°C / 65% ± 5%RH for 24 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (17050301, 17061502, 17062203) Prilocaine : Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months Batches: (16091101, 16091702, 16092303)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against the Emla Topical cream by performing quality tests (Appearance, Identification, pH, Fill volume Drug Release).
	Analytical method validation/verification of product	Method verification studies have submitted including linearity, accuracy, precision, specificity, robustness.

STABILITY STUDY DATA			
Manufacturer of API	Lidocaine and Prilocaine : Shandong Chengui Shuangda Pharmaceutical Co., ltd. Address: Economic Development zone, Pingyuan County, Dezhou City, Shandong Province253100, China Shandong Chengui Shuangda Pharmaceutical Co., ltd.		
API Lot No.	Lidocaine: 21081605 Prilocaine : 21091206		
Description of Pack (Container closure system)	Aluminium Tube		
Stability Storage Condition	Real time: 30°C ± 2°C / 65% ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 24 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6, 9, 12, 18, 24 (Months)		
Batch No.	TB-101	TB-102	TB-103
Batch Size	3Kg (100 Tubes)	3Kg (100 Tubes)	3Kg (100 Tubes)
Manufacturing Date	01-2019	01-2019	01-2019
Date of Initiation	02-01-2019	02-01-2019	02-01-2019
No. of Batches	03		
Administrative Portion			

1.	Reference of previous approval of applications with stability study data of the firm (if any)	
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	
3.	Documents for the procurement of API with approval from DRAP (in case of import).	
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks of Evaluator:

S.No	Section	Shortcomings Communicated
1.	1.6.5	Valid Drug Manufacturing License or Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by the relevant regulatory authority of country of origin.
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3
3.	3.2.S.4.2	Copies of the Drug substance specifications and analytical procedures used for routine testing of the both Drug substance /Active Pharmaceutical Ingredient (Lidocaine and Prilocaine) by Drug Product manufacturer is required.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance (Lidocaine and Prilocaine) shall be submitted.
5.	3.2.P.2.2.1	• Details , origin and procurement documents of product against which Pharmaceutical equivalence is established. • Assay was not conducted of both test product and reference product in Pharmaceutical equivalence. Clarification is required. • Provide reference of Drug release performed in Pharmaceutical equivalence.
6.	3.2.P.3.5	A brief description of process validation including the proposed protocol shall be Submitted.
7.	3.2.P.5.1	Microbial Enumeration tests and test for specified organism is not included in specification however USP monograph include these tests.
8.	3.2.P.8	• Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin Documents for the procurement of API with approval from DRAP. • Date of Initiation of stability study. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)

Previous Decision: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

S.No	Section	Shortcomings Communicated	Reply
1.	1.6.5	Valid Drug Manufacturing License or	Firm has submitted copy of DML (Lu20170365)

		Valid Good Manufacturing Practice (GMP) certificate of the Drug Substance manufacturer issued by the relevant regulatory authority of country of origin.	dated 12-10-2022 issued by Shandong Drug administration China. Valid till 11/10/2027.
2.	2.3.R.1.1	Provide copy of Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section 3.2.P.8.3	Batch Manufacturing Record (BMR) for all the batches of drug product for which stability studies data is provided in Module 3 section is submitted.
3.	3.2.S.4.2	Copies of the Drug substance specifications and analytical procedures used for routine testing of the both Drug substance /Active Pharmaceutical Ingredient (Lidocaine and Prilocaine) by Drug Product manufacturer is required.	Copies of the Drug substance specifications and analytical procedures used for routine testing of the both Drug substance /Active Pharmaceutical Ingredient (Lidocaine and Prilocaine) by Drug Product manufacturer are submitted.
4.	3.2.S.4.3	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance (Lidocaine and Prilocaine) shall be submitted.	Analytical Method Verification studies including specificity, accuracy and repeatability (method precision) performed by the Drug Product manufacturer for drug substance (Lidocaine and Prilocaine submitted.
5.	3.2.P.2.2.1	• Details , origin and procurement documents of product against which Pharmaceutical equivalence is established. • Assay was not conducted of both test product and reference product in Pharmaceutical equivalence. Clarification is required.	• Emla Topical cream by Aspen pharma used for pharmaceutical Equivalence. • Revised pharmaceutical equivalence with assay submitted.
6.	3.2.P.3.5	A brief description of process validation including the proposed protocol shall be Submitted.	A brief description of process validation including the proposed protocol Submitted.
7.	3.2.P.5.1	Microbial Enumeration tests and test for specified organism is not included in specification however USP monograph include these tests.	Revised specification with microbial enumeration tests and test for specified organism submitted.
8.	3.2.P.8	• Documents for the procurement of API with approval from DRAP. • Date of Initiation of stability study. • Compliance Record of HPLC software 21CFR & audit trail reports on product testing • Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	• Commercial Invoice # 30112018 dated 30-11-2018 approved by DRAP Karachi dated: 31-12-2018 submitted. • Date of Initiation of stability study. • Submitted • Submitted.

Decision: Approved.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

b. Export facilitation

Export Facilitation: Applications was received through letter No.F.1-6/2019-PR-I (EFD) " M/s Focus & Rulz Pharmaceuticals Pvt Ltd. Islamabad have achieved benchmark of USD 533,670.4 as defined in the Board's decision during fiscal year 2021-2022. In this regard, please find the (1 molecule) 01 products applications submitted by the firm."

	Status of the applicant	☒Manufacturer ☐ Importer ☐Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No. 13166 dated 29.05.2023.
	Details of fee submitted	PKR 30,000/- vide slip No. 02532889343 dated 19.01.2023
	The proposed proprietary name / brand name	**Primget 250mg (IM/IV) Powder for Injection**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each vial contains; Sterile Cefepime HCl with L-Arginine equivalent to Cefepime……250mg
	Pharmaceutical form of applied drug	White to off-white powder, filled in clear glass USP type II vial with blue coloured flip-off seal on top of

		grey coloured rubber stopper. Supplied with 5ml sterile water for injection.
	Pharmacotherapeutic Group of (API)	Fourth generation cephalosporin. ATC Code: J01DE01
	Reference to Finished product specifications	USP Specifications
	Proposed Pack size	1's
	Proposed unit price	Rs. 400/-
	The status in reference regulatory authorities	Could not be verified for 250mg strength.
	For generic drugs (me-too status)	Cefstar Powder for Injection 250mg Reg No. 076005 M/s Barrett Hodgson Pakistan (Pvt.) Ltd.
	GMP status of the Finished product manufacturer	**Manufacturer:** M/s. Getz Pharma (Pvt.) ltd. Plot No. 1, Sector 25, Korangi Industrial Area, Karachi. New section granted in February 2023.
	Evidence of section approval.	Dry Powder Vial Injection (Cephalosporin) issued vide letter No. F.2-9/2014-Lic (Vol-I) dated 27.02.2023.
	Name and address of API manufacturer.	M/s NCPC Hebei Huamin Pharmaceutical Co. Ltd. No. 18, Yangzi Road, Economic & Technological Development Zone Shijiazhuang. Copy of GMP certificate No. HE20190059 dated 11.06.2019, issued by Hebei Drug Administration, valid till 10.06.2024 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification / validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties (solubility & physical form), general properties of drug pellets., description of manufacturing process and controls, tests for related. Any other Individual unspecified impurity, Total Impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: **Real time**: 30˚C ± 2˚C / 75% ± 5%RH for 24 months **Accelerated**: 40˚C ± 2˚C / 75% ± 5%RH for 6 months **Batches**: H2231608001, H2231608002, H2231608003
	Module-III (Drug Product):	The firm has submitted detail of the description and composition of the drug product, manufacturers, description of manufacturing process and controls, Process validation, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug

		product.
	Pharmaceutical equivalence and comparative dissolution profile	**Test product: Cefepime IV/IM Powder for Injection 250mg** Batch No. C010DS01 Mfg 09.2022 Exp 09.2024**.** **Reference Product:** CefStar Injection 250mg, Batch No. D2521, Mfg date: Jul-2022, Exp. Date: June 2024. of M/s Barrett Hodgson Pakistan. (Images of Pack are provided) Pharmaceutical Equivalence is established against the comparator CefStar Injection 250mg, Batch No. D2521, Mfg date: Jul-2022, Exp. Date: June 2024. of M/s Barrett Hodgson Pakistan by performing quality tests (Physical attributes, Identification, Assay, Uniformity of dosage unit, water content, pH test and related substances). Results of both the products are comparable with each other.
	Analytical method validation/verification of product	Method verification studies are submitted including specificity, linearity and range.

12.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.9	RRA could not be verified for strength of 250mg	The firm vide letter No. RA-QL/316/0723 dated 07.07.2023 has submitted following justification; *"This is to inform you that Cefepime Injection 250mg is available in local market with the brand name of CefStar Injection 250mg (Reg. No.: 076005) manufactured by M/s Barrett Hodgson Pakistan (Pvt.) Ltd since December 2013. Further, this is to inform you that 250mg is the lowest strength while its higher strengths i.e., 500mg, 1g and 2g are already approved by RRAs as notified by DRAP. Considering availability and approval of 250mg by DRAP and higher strengths by RRAs / DRAP, it is evident that 250mg strength is safe."*
2.	1.6.5	The list of API given in GMP certificate of API manufacturer doesn't mention that Cefepime HCl will be with L-Arginine.	The firm has submitted a copy of letter of Hebei Food and drug administration China that indicates approval for manufacturing of Cefepime dihydrochloride with L-Arginine.
3.	3.2.S.4.5	In justification of specifications,API name is mentioned as Cefepime dihydrochloride L arginine. Is it dihydrochloride or monohydrochloride? At other points its only mentioned as hydrochloride, the USP reference standard is also of Cefepime hydrochloride.	The firm has stated that name of Cefepime as per USP, BP and Ph. Eur. is as follows; USP: Cefepime Hydrochloride. BP: Cefepime Hydrochloride monohydrate Ph. Eur: Cefepime Dihydrochloride monohydrate. There is only difference in the naming of said API among different pharmacopoeias while there is no change in molecular formula or molecular weight. The reply of firm is verifiable.
4.		Documents for the procurement of API with approval from DRAP (Import license and AD attested invoice) are required.	Submitted.
5.	3.2.P.8	For drug product, stability studies data of only 3 months is submitted. Stability studies data of 6 months is required.	The firm has submitted complete stability data for 6 months vide letter No. RA-SD/280/0623 dated 21.06.2023

Deferred for evidence of approval of applied formulation in reference regulatory authorities / agencies which were adopted by the Registration Board in its 275th meeting. The Board further decided that the applicant shall submit the response within 1 month after publication of the minutes, .

1.	1.6.5	The list of API given in GMP certificate of API manufacturer	The firm has submitted reply vide letter No. RA-QL/319/0723.

		doesn't mention that Cefepime HCl will be with L-Arginine.	The firm has submitted a copy of letter of Hebei Food and drug administration China that indicates approval for manufacturing of Cefepime dihydrochloride with L-Arginine.
2.	3.2.S.4.5	In justification of specifications, API name is mentioned as Cefepime dihydrochloride L arginine. Is it dihydrochloride or monohydrochloride? At other points its only mentioned as hydrochloride, the USP reference standard is also of Cefepime hydrochloride.	The firm has stated that name of Cefepime as per USP, BP and Ph. Eur. is as follows; USP: Cefepime Hydrochloride. BP: Cefepime Hydrochloride monohydrate Ph. Eur: Cefepime Dihydrochloride monohydrate. There is only difference in the naming of said API among different pharmacopoeias while there is no change in molecular formula or molecular weight. The reply of firm is verifiable.
3.	-	Copy of AD attested invoice of API clearance is required.	Submitted.
4.	3.2.P.2	Justification shall be submitted for not performing Pharmaceutical equivalence studies against innovator product.	The firm has stated that as per DRAP guidelines "Guidance document for submission of application on Form 5-F (CTD) for registration of pharmaceutical drug products for human use," to perform Pharmaceutical Equivalence *'The comparison of the developed formulation and the innovator/ reference/ comparator product including the results of all the quality tests shall be submitted and discussed.'* The firm has further stated that they have established pharmaceutical equivalence with comparator product as innovator brand is currently not available in Pakistan.
5.	3.2.P.8	For drug product, stability studies data of only 3 months is submitted. Stability studies data of 6 months is required.	The firm has submitted complete stability data for 6 months vide letter No. RA-SD/283/0623 dated 21.06.2023

Decision: Registration Board approved the application of Primget 2g (IM/IV) Powder for Injection.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	The proposed proprietary name / brand name	**Getaclor Capsule 250mg**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each capsule contains; Cefaclor monohydrate equivalent to Cefaclor…….250mg
	Pharmaceutical form of applied drug	Hard gelatin capsule, containing white to off-white coloured crystalline powder. Packed in Alu-PVC blister.
	Pharmacotherapeutic Group of (API)	Second generation cephalosporin ATC Code: J01DC04

	Reference to Finished product specifications	BP Specifications
	Proposed Pack size	12's
	Proposed unit price	Rs. 700/-
	The status in reference regulatory authorities	CEFACLOR CAPSULES 250MG, KEFTID CAPSULES 250MG MHRA Approved.
	For generic drugs (me-too status)	Ceclor Capsules 250mg Reg No. 098681 M/s AGP Limited Karachi.
	GMP status of the Finished product manufacturer	**Manufacturer:** M/s. Getz Pharma (Pvt.) ltd. Plot No. 1, Sector 25, Korangi Industrial Area, Karachi. New section granted in February 2023.
	Evidence of section approval.	Capsule (Cephalosporin) issued vide letter No. F.2-9/2014-Lic (Vol-I) dated 27.02.2023.
	Name and address of API manufacturer.	M/s Zhejiang Dongbang Pharmaceutical Co. Ltd, Pharm-Chem Zone, Duqiao Linhai, Taizhou, Zhejiang China. Copy of GMP certificate No. ZJ20190147 dated 30.11.2019, issued by National Medical Products Administration, valid till 29.11.2024 is submitted.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification / validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	The firm as submitted detail of nomenclature, structure, general properties (solubility & physical form), general properties of drug pellets., description of manufacturing process and controls, tests for related. Any other Individual unspecified impurity, Total Impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	Stability study conditions: **Real time**: 30˚C ± 2˚C / 75% ± 5%RH for 24 months **Accelerated**: 40˚C ± 2˚C / 75% ± 5%RH for 6 months **Batches**: DBC-1010-202108001, DBC-1010-202108002, DBC-1010-202108003
	Module-III (Drug Product):	The firm has submitted detail of the description and composition of the drug product, manufacturers, description of manufacturing process and controls, Process validation, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative	**Test product: Cefaclor Capsule 250mg** Batch No.

	dissolution profile	C004DS01 Mfg 26.09.2022 Exp 26.09.2024**.** **Reference Product:** Ceclor Capsules 250mg Batch No. A7387, Mfg date: May-2022 Exp. Date: April.2024. of M/s AGP Limited. (Images of Pack are provided) **Comparative Dissolution profile: Comparable at all pH** pH 1.2 HCl solution: 89.62% released in 15mins F2 NA pH 4.5 Acetate buffer: 93.56% release in 15mins, F2 NA pH 6.8 Phosphate buffer:90.38% released in 15mins F2 NA Pharmaceutical Equivalence is established against the comparator Ceclor Capsules 250mg Batch No. A7387, Mfg date: May-2022 Exp. Date: April.2024. of M/s AGP Limited by performing quality tests (Physical attributes, Identification, Assay, Uniformity of dosage unit, water content, disintegration, dissolution and related substances) Results of both the products are comparable with each other.
	Analytical method validation/verification of product	Method verification studies are submitted including specificity, linearity and range.

STABILITY STUDY DATA			
Manufacturer of API	M/s Zhejiang Dongbang Pharmaceutical Co. Ltd, Pharm-Chem Zone, Duqiao Linhai, Taizhou, Zhejiang China		
API Lot No.	DBC-1010-202111017		
Description of Pack (Container closure system)	Hard gelatin capsule, containing white to off-white crystalline powder. In Alu-PVC blister.		
Stability Storage Condition	Real time: 30˚C ± 2˚C / **75%** ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	C004DS01	C004DS02	-
Batch Size	5000 capsules	5000 capsules	-
Manufacturing Date	26.09.2022	26.09.2022	-
Date of Initiation	06.10.2022	06.10.2022	-
No. of Batches	02 batches		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted. The applications are of new sections. There are no previous registrations in these sections.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. ZJ20190147 dated 30.11.2019 in the name of M/s Zhejiang Dongbang Pharmaceutical Co. Ltd, Pharm-Chem Zone, Duqiao Linhai, Taizhou, Zhejiang China, issued by issued by National Medical Products Administration, valid till 29.11.2024 is submitted.

3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Drug Substance: Cefaclor USP 43** Batch No.: DBC-1010-202111017 Mfg. Date: 27.11.2022 Exp. Date: 26.11.20240 Quantity: 35kg Invoice No.: 20220602-1 dated: 29.07.2022.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	-	Copy of AD attested invoice of API clearance is required.	The firm has submitted required documents vide letter No. RA-QR/323/0723 dated 03.07.2023.
2.	3.2.P.5.3	Protocol and report for Dissolution method validation/verification is required.	Required report is submitted.
3.	3.2.P.8	For drug product, stability studies data of only 3 months is submitted. Stability studies data of 6 months is required.	The firm has submitted complete stability data for 6 months vide letter No. RA-SD/287/0623 dated 21.06.2023

Decision: Registration Board approved the application of Getaclor 250mg Capsule.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Module-III (Drug Product):	The firm has submitted detail of the description and composition of the drug product, manufacturers, description of manufacturing process and controls, Process validation, specifications, analytical procedure and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	**Test product: Cefotaxime Injection 250mg** Batch No. C013DS01 Mfg 09.2022 Exp 09.2024**.** **Reference Product:** Claforan Injection 250mg Batch No. AA043, Mfg date: June-2022 Exp. Date: May.2024 of M/s Sanofi-Aventis Pakistan Limited (Images are provided) Pharmaceutical Equivalence is established against the comparator Claforan Injection 250mg Batch No. AA043, Mfg date: June-2022 Exp. Date: May.2024 of M/s Sanofi-Aventis Pakistan Limited by performing quality tests (Physical attributes, Identification, Assay, Uniformity of dosage unit, water content, and related substances) Results of both the products are comparable with each other.
	Analytical method validation/verification of product	Method verification studies are submitted including specificity, linearity and range.

STABILITY STUDY DATA	
Manufacturer of API	M/s Sinopharm Weiqida Pharmaceutical Co. Ltd., Economic & Technological Development Zone, Firt Medical Zone, Datong, Shanxi, China
API Lot No.	S012204021
Description of Pack (Container closure system)	Off white to pale yellow crystalline powder, filled in clear glass USP type II vial along with 2ml sterile water for injection.

Stability Storage Condition	Real time: 30°C ± 2°C / **75%** ± 5%RH Accelerated: 40°C ± 2°C / 75% ± 5%RH		
Time Period	Real time: 6 months Accelerated: 6 months		
Frequency	Accelerated: 0, 3, 6 (Months) Real Time: 0, 3, 6 (Months)		
Batch No.	C013DS01	C013DS02	-
Batch Size	2000 Vials	2000 Vials	-
Manufacturing Date	23.07.2022	23.07.2022	-
Date of Initiation	15.10.2022	15.10.2022	-
No. of Batches	02 batches		

Administrative Portion

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted. The applications are of new sections. There are no previous registrations in these sections.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	M/s Sinopharm Weiqida Pharmaceutical Co. Ltd., Economic & Technological Development Zone, Firt Medical Zone, Datong, Shanxi, China Copy of GMP certificate No. SX20180229 dated 06.06.2018, issued by Shanxi Province FDA, valid till 05.06.2023 is submitted.
3.	Documents for the procurement of API with approval from DRAP (in case of import).	**Drug Substance: Cefotaxime Sodium Sterile USP40** Batch No.: S012204021 Mfg. Date: 24.04.2022 Exp. Date: 23.04.2024 Quantity: 10Kg Invoice No.: 20220602-1 dated: 29.07.2022
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Submitted

Remarks OF Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	1.5.9	RRA could not be verified for strength of 250mg	The firm vide letter No. RA-QR/321/0623 dated 03.07.2023 has submitted that product is approved in CIMA Spain. The reference is verifiable.
2.	-	Copy of AD attested invoice of API clearance is required.	Documents are submitted.
3.	3.2.P.8	For drug product, stability studies data of only 3 months is submitted. Stability studies data of 6 months is required.	The firm has submitted complete stability data for 6 months vide letter No. RA-SD/284/0623 dated 21.06.2023

Decision: Registration Board approved the application of Cefastola 250mg Powder for Injection.

• **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.** • **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

	Pharmacotherapeutic Group of (API)	Agents for dermatitis, excluding corticosteroids ATC Code: D11AH06
	Pharmaceutical form of applied drug	Topical ointment White coloured ointment filled in Aluminium tube.
	Reference to Finished product specifications	Innovator's Specification.
	Proposed Pack size	5g, 10g, 15g, 30g, 50g
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Eucrisa ointment FDA Approved.

	For generic drugs (me-too status)	Not available.
	Name and address of API manufacturer.	M/s Honour Lab Limited (Unit III) Plot No.4, Hetero Infrastructure Ltd., SEZ, N. Narasapuram Village, Nakkapalli Mandal, Visakhapatnam District - 531 081, Andhra Pradesh, INDIA
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility's, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance (CS20120002) and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 48 months. Batches: 18070002, 18070003, 18070004.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis, justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against product Eucrisa Ointment 2% Batch No. PMEK, mfg date: -, Exp date: 09.2022 manufactured by M/s Pfizer labs (spain). Tests like physical characteristics and Assay were performed and results of both products are comparable. Firm has not performed tests like viscosity, content uniformity Dissolution: Acid stage F2: 69.04, Acetate buffer F2: 68.50, Phosphate buffer F2: 70.60 Firm has used Tefose 63 premix (Polyoxyl 6 Stearate Type I, Ethylene Glycol Stearates and Polyoxyl 32 Stearate Type I) instead of mixture of mono and di glycerides (used by innovator), rest of the formulation is same.

		Pictorial evidence of pack of Reference product is provided but batch No. and expiry are not visible.
	Analytical method validation/verification of product	Firm has submitted analytical method validation study reports for drug substance as well as drug product.

5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm

1.	-	Product is non-steroidal, the section approval is for steroidal topical products, justification is required.	The firm vide letter No PDFLL-1417317032 dated 13.07.2023 has submitted section approval letter of topical general section. The section was granted vide letter No. 03-14/2004-Lic(pt) dated 09.04.2020. It was approved in 274th meeting.
2.	-	Copy of GMP certificate of drug substance manufacturer is required.	Submitted. Cert No. HMF 07-14051/1220/2022-ADMN-DCA, issued on 15.12.2022. Valid till15.12.2025 Issued by Drugs Control Administration Andhra Pradesh India.
3.	3.2.P.8	Clear image of reference product pack is required in which batch No and expiry shall be readable.	Submitted; Eucrisa Ointment 2% Made in Spain Distributed by Pfizer Lot No. PMEK EXP: Sep 2022.

Decision: Registration Board approved the application of CRISA 2% Topical Ointment.

- **Manufacturer will place first three production batches on long term stability studies throughout proposed shelf life and on accelerated studies for six months as per the commitment submitted in the registration application.**
- **Manufacturer will perform process validation of first three batches as per the commitment submitted in the registration application.**

The Central Licensing Board in its 278th meeting approved following new sections of M/s Wezen Pharmaceuticals (DML No. 000880);

i. Tablet (General)
ii. Capsule (General)
iii. Sachet (General)
iv. Ointment/ Cream/ Gel (General)

2. The above new sections were granted vide letter No. F.1-30/2014-Lic dated 30.12.2020.

448.	**Name, address of Applicant / Marketing Authorization Holder**	**M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat.**
	Name, address of Manufacturing site.	M/s Wezen Pharmaceuticals, Plot No. 23 & 24, S-1, RCCI Industrial Estate, Rawat. DML No. 000882
	Status of the applicant	☒ Manufacturer ☐ Importer ☐ Is involved in none of the above (contract giver)
	GMP status of the firm	The firm was granted Tablet (General) section on 30.12.2020.
	Evidence of approval of manufacturing facility	Firm has submitted copy of letter of grant of section dated 30.12.2020 specifying Tablet (general) Section.
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☐ Domestic sale ☐ Export sale ☒ Domestic and Export sales
	Dy. No. and date of submission	Dy. No 3224 dated 03.02.2023
	Details of fee submitted	PKR 30,000/- Slip No. 94847755 Dated

		01.01.2023
	The proposed proprietary name / brand name	**ROSTA 5mg Tablet**
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains; Rosuvastatin calcium equivalent to Rosuvastatin……5mg
	Pharmacotherapeutic Group of (API)	HMG CoA reductase inhibitors ATC Code: C10AA07
	Pharmaceutical form of applied drug	White, round, biconvex film coated Tablets.
	Reference to Finished product specifications	USP Specifications.
	Proposed Pack size	As per SRO
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Rosuvastatin 5 mg, 10 mg, 20 mg and 40 mg Film-Coated Tablets (rosuvastatin calcium) - PL 08553/0590-593 MHRA Approved.
	For generic drugs (me-too status)	Rovista Tablet 5mg Reg No. 044043 M/s Getz Pharma (Pvt.) Ltd. Karachi.
	Name and address of API manufacturer.	M/s Morepen Laboratories Limited, Village Malkumajra (Morepen Village), Baddi Nalagarh Road, Badi Solan, Himachal Pradesh, India.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its validation, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance (RT12-9058) and drug product.
	Module-III Drug Substance:	Firm has submitted detailed drug substance data related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Firm has submitted stability study data of 3 batches of drug substance at both accelerated as well as real time conditions. The accelerated stability data is conducted at 40°C ± 2°C / 75% ± 5% RH for 6 months. The real time stability data is conducted at 30°C ± 2°C / 65% ± 5% RH for 36 months. Batches: RT-12-KL-0001, RT-12-KL-0002, RT-12-KL-0003.
	Module-III Drug Product:	Firm has submitted data of drug product including its description, composition, pharmaceutical development, manufacture, manufacturing process and process control, process validation protocols, control of excipients, control of drug product, specifications, analytical procedures, verification of analytical procedures, batch analysis,

		justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	Firm has submitted pharmaceutical equivalence of their product against product Rovista 5mg Tablet Batch No. F05008, mfg date: 04.2022, Exp date: 04.2025 manufactured by M/s Getz Pharma Karachi. Tests like Appearance, DT, Weight variation, Identification, Dissolution and Assay were performed and results of both products are comparable. Dissolution: Acid stage F2: 96, Acetate buffer F2: 98, Phosphate buffer F2: 97 Pictorial evidence of pack of Reference product is not attached
	Analytical method validation/verification of product	Firm has submitted analytical method verification study reports for drug substance as well as drug product.

<u>Case No. 02 Priority registration of Isoflurane Inhalational Solution</u>

DRAP in its 143rd meeting of Authority held on 05th August, 2022, keeping in view of essentiality, criticality of isoflurane and pursuance from Government of Punjab to ensure its availability in Pakistan decided that registration application of Isoflurane shall be considered "out of queue" by the Registration Board. Available applications of Isoflurane 100ml & 250ml liquid for inhalation, are presented below:

451.	**Name, address of Applicant / Importer**	M/s MAFHH Enterprises, Shop No. A-71, Rabia Palace Block-10A, Gulshan-e-Iqbal, Karachi.
	Details of Drug Sale License of importer	**License No**: 0302 **Address**: MAFHH Enterprises, Shop No. A-71, Rabia Place Block-10A, Gulshan-e-Iqbal, Karachi. (a) Shop No. A-71, Rabia Place Block-10A, Gulshan-e-Iqbal, Karachi (b) A-42 Bukhari Town, Block 10-A, Gulshan-e-Iqbal, Karachi. **Validity**: 08.01.2028 **Status**: License to sell Drugs by way of Wholesale.
	Name and address of marketing authorization holder (abroad)	M/s Pharmastars Pharmaceuticals, 24 Ahmed Tayseer St, Ard El Golf, Caro, Egypt.

	Name, address of manufacturer(s)	**M/s Sunny Pharmaceutical** Address: Badr City- 1-00, Acre Zone- Piece No. 37 & 38 Cairo- Egypt.
	Name of exporting country	Arab Republic of Egypt
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted legalized CoPP certificate (No. 01017/2023/H) dated 06.04.2023 issued by the Egyptian Drug Authority. Name and dosage form on the CoPP certificate mentioned is "Isoflurane-Pharmastars Pharmaceuticals Volatile liquid for inhalation" and name of the product license holder is **Pharmastars Pharmaceuticals, 24 Ahmed Tayseer St, Ard El Golf Cairo, Egypt**. The certificate also confirms that the applied formulation is actually on the market in the exporting country. The name of importing country on CoPP is mentioned as Pakistan. The validity of COPP is not mentioned. **GMP:** Applicant has submitted **Copy** of GMP certificate No. P-850/2022 dated 11.10.2022 issued by Egyptian Drug Authority in the name of M/s Sunny Pharmaceutical, Parts No. (37, 38), Industrial Zone (100 Fadan Shark El Roubaky)- Badr City-Cairo having its manufacturing site at same address. The certificate confirms that manufacturing facility complies with the principles and guidelines for the pharmaceutical dosage form categories and/or activities listed in the part 2. (in part 2 Production line for liquid anesthetics for inhalation is mentioned under heading of non-sterile products.) The certificate is valid till 11.10.2023
	Details of letter of authorization / sole agency agreement	Firm has submitted **Copy** of Authorization letter. The letter specifies that product license holder i.e. M/s Pharmastars Pharmaceuticals, 24 Ahmed Tayseer Street, Ard El Golf, Helipolis, Cairo, Egypt **authorizes** M/s MAFHH Enterprises, Suit No. A-71, Rabia Palace, Gulshan-e-Iqbal Block 10/A, Main Rashid minhas Road, Karachi to register Pharmastars product "Isoflurane-Volatile Liquid for inhalation", trade name "MAFRANE" at the Drug Regulatory Authority of Pakistan (DRAP and import it exclusively to the market of Pakistan The authorization is valid till 31.12.2028.
	Status of the applicant	☐ Manufacturer ☒ Importer ☐ Is involved in none of the above (contract giver)
	Status of application	☐ New Drug Product (NDP) ☒ Generic Drug Product (GDP)
	Intended use of pharmaceutical product	☒ Domestic sale ☐ Export sale ☐ Domestic and Export sales
	For imported products, specify one the these	☒ Finished Pharmaceutical product import ☐ Buk import and local repackaging ☐ Buk import and local repackaging for export purpose

	Proposed unit price	As per SRO.
	The status in reference regulatory authorities	AERRANE 100% LIQUID INHALATION VAPOUR MHRA Approved.
	For generic drugs (me-too status)	FORANE LIQUID FOR INHALATION Reg No. 011081 M/s Getz Pharma Karachi.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Firm has summarized information related to nomenclature, structure, general properties, solubility, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Name, address of drug substance manufacturer	M/s Shandong New Times Pharmaceutical Co. Ltd. No. 1 North outer ring road, Feixian county, Shandong Province, China.
	Module-III Drug Substance:	Firm has submitted partial data. (3.2.S.2.2, 3.2.S.2.3, 3.2.S.2.4, 3.2.S.2.5, 3.2.S.2.6 & 3.2.S.3 not provided) Firm has not submitted detailed drug substance data related to nomenclature, structure, general properties, solubility, appearance, manufacturers, description of manufacturing process & controls and container closure system. Firm has submitted specifications (3.2.S.4.1), analytical procedures (3.2.S.4.2) and its verification (3.2.S.4.3.1), batch analysis (3.2.S.4.4) and justification of specification, reference standard (3.2.S.5). The firm has submitted Certificate of Suitability to the Monograph of the European Pharmacopoeia (CEP) issued by EDQM. The certificate of suitability is issued vide No. R1-CEP 2010-078 - Rev 00 dated 22.04.2016. The certification is valid as per online record of EDQM (Substance No. 1673)
	Stability Studies of Drug Substance (Conditions & duration of Stability studies)	Submitted. Long term: 25±2°C, RH 60%±5% (Zone II) 36 months Accelerated: 40±2°C, RH 75%±5% 6 months. Batches: 090401G, 090402G, 090403G

		Degradation studies are also submitted.
	Module-III Drug Product:	Firm has submitted data of drug product including its description , manufacture, manufacturing process and process control, process validation protocols, control of drug product, specifications, analytical procedures, validation of analytical procedures, batch analysis (20392, 20393, 20394), justification of specifications, reference standard or materials, container closure system and stability.
	Pharmaceutical Equivalence and Comparative Dissolution Profile	**Test Product:** Isoflurane- Pharmastars **Reference Product:** Aerrane Details of batch numbers and comparison of test parameters is not provided. The firm has claimed that their product is equivalent to innovator product A As per EMA guideline on the investigation of bioequivalence "if the product is a gas for inhalation, bioequivalence studies are not required."
	Analytical method validation/verification of product	Firm has submitted analytical method verification studies for the applied product.
	Container closure system of the drug product	Carton box containing amber glass bottle (Type III) containing 100ml liquid, covered with screw cap with inner liner made of polypropylene and violet polyethylene plastic collar with insert leaflet.
	Stability study data of drug product, shelf life and storage conditions	Shelf life 24 months Storage conditions: store at temperature not exceeding 30°C Stability Studies conditions: Long term: 30°C ± 2°C, RH 65% ± 5% (upto 12 months) Accelerated: 40°C ± 2°C, RH 75% ± 5% (upto 6 months) Batches: 20392, 20393, 20394 (Commercial batches)
	Therapeutic indications in USFDA.	FORANE (isoflurane, USP) may be used for induction and maintenance of general anesthesia. Adequate data have not been developed to establish its application in obstetrical anesthesia.

Evaluation by PEC:

Sr. No.	Section	Observation	Reply by the firm
1.		Copies of following documents are submitted, their original legalized copies are required; i. COPP. ii. GMP certificate. iii. Authorization Letter.	• The firm has submitted legalized COPP. • GMP certificate is not legalized but is verifiable from official website of Egyptian Drug Authority. • p-850-2022.pdf (edaegypt.gov.eg) • Notarized Authorization letter is submitted.
2.	**3.2.S.7**	Stability studies of drug substance done by drug substance manufacturer as per ICH guidelines for Zone-IVa along with details of container closure system are required.	Submitted. Long term: 25±2°C, RH 60%±5% (Zone II) Accelerated: 40±2°C, RH 75%±5%

3.	**3.2.P.2.2.1**	It is mentioned that your product is pharmaceutically equivalent to innovator product Aerrane. Batch Numbers, manufacturing date, expiry date and comparison of both products is not provided. Further pictorial evidence of Aerrane used for comparison is required indicating its batch number, manufacturing date and expiry date.	The MA holder has submitted Pharmaceutical equivalence studies, **Test product:** Isoflurane-Pharmastars Pharmaceuticals. Batch No. 220814, 220815, 220816. **Reference product:** Isoflurane-Genomics Batch No. 22655001, manufactured by The Arab Company for Gelatin and Pharmaceutical Products – Egypt. **Parameters compared:** Appearance, solubility, Identification, Limit tests for Chloride, impurities, fill volume and assay. As per comparison, both products are pharmaceutically equivalent.
4.	**3.2.P.5.1**	Finished product specifications are claimed to be Ph. Eur Specifications but assay specifications are mentioned as USP. Clarification is required.	The reply of firm is reproduced below; "Regarding assay specifications, there is no actual chemical test for the assay in both EP and the USP monographs. The only chemical test is for the quantification of impurities. Only the USP monograph states that assay is calculated by subtracting the sum of percentages of the impurities from 100% and gives a limit of 99.9%-100% The finished product specifications adopted this method of calculation from the USP monograph." The reply of firm is satisfactory.
5.	**3.2.P.5.2**	In procedure for Identification by IR it is written that sample shall be applied to scanning lens of FT-IR apparatus by using glass pipette indicating acquisition of spectra in liquid phase, whereas as per European Pharmacopoeia identification test spectra is to be acquired in gaseous state. Clarification is required for deviation from the pharmacopoeial procedure. Further submit the following; i. Ph. Eur reference spectrum of Isoflurane. ii. IR Spectra of 3 batches of Isoflurane acquired by drug product manufacturer. iii. Evidence of FT-IR equipment capable of acquiring spectra in gaseous phase/ FTIR gas analyser being available with drug product manufacturer.	The drug product manufacturer has given following reply; *"Kindly be informed that identification of isoflurane by FT-IR is done using Bruker Alpha IR instrument in liquid phase due to lack of an instrument capable of measuring the sample in gaseous phase.* *Identification is done using isoflurane EDQM reference standard measured and saved in the instrument library, comparing spectrum of sample with that of standard is done automatically by software"* The drug product manufacturer has deviated from pharmacopoeial testing method for identification of isoflurane due to lack of required instrument.
6.	**3.2.P.8.3**	Shelf life claimed is of 24 months, whereas real time stability data of 3 batches is only submitted for up to 12 months. Complete stability studies data for whole of shelf life of mentioned batches is required.	Required data is submitted for batch No. 20392, 20393 & 20394
Decision: Approved as per Policy for inspection of Manufacturer abroad.			

Case No. 3:

The Authority in its 165th meeting held on 20th July 2023 approved out of que consideration

of Form-5F applications of Carbamazepine tablet received/applied till 31st December 2023 keeping in view of their repaeated shortage/ non-availability reports in the market and to ensure timely access of these drugs to public.

452.	**Name, address of Applicant / Importer**	M/s We Care, Flat B 6, Block 12D, 2nd Floor, G-8 Markaz, Islamabad.
	Details of Drug Sale License of importer	**License No**: DHO-ISB-930 **Address**: We-Care Revolution in Health Care, Flat No. B-6, 2nd Floor, Block D-12, Sector G-8 Markaz, Islamabad. (b) Nil **Validity**: 18.06.2025 **Status**: Distribution License.
	Name and address of marketing authorization holder (abroad)	M/s. Troikaa Pharmaceuticals Ltd. C-1 Sara Industrial Estate, Selaqui, Dehradun, Uttarakhand India.
	Name, address of manufacturer(s)	M/s. Troikaa Pharmaceuticals Ltd. C-1 Sara Industrial Estate, Selaqui, Dehradun, Uttarakhand India.
	Name of exporting country	India
	Detail of certificates attached (CoPP, Free sale certificate, GMP certificate)	**CoPP:** Firm has submitted notarized copy of CoPP certificate (No. WHO-GMP-CERT/17P/1/58/2006/5039) dated 24.06.2022 issued by Directorate General of Medical Health Services, Uttarakhand, India. Name and dosage form on the CoPP certificate mentioned is "TROYPOFOL (PROPOFOL INJECTION BP IV (1% W/V) 20ML VIAL" and name of the product license holder is **Troikaa Pharmaceuticals Ltd. C-1 Sara Industrial Estate, Selaqui, Dehradun, Uttarakhand India.** The certificate also confirms that the applied formulation is actually on the market in the exporting country. The name of importing country on CoPP is mentioned as Pakistan. Validity: 27.05.2024 **GMP:** Applicant has submitted Notarized **Copy** of GMP certificate No. 17P/1/58/2006 dated 01.06.2021 issued by Directorate General of Medical Health Services, Uttarakhand, India in the name of M/s **Troikaa Pharmaceuticals Ltd. C-1 Sara Industrial Estate, Selaqui, Dehradun, Uttarakhand India** having its manufacturing site at same address. The certificate confirms that the firm is following Good Manufacturing practices as per WHO TRS Guidelines. (SVP Ampoule & Vial Non beta lactam) The certificate is valid till 27.05.2024
	Details of letter of authorization / sole agency agreement	Firm has submitted notarized copy of Authorization letter. The letter specifies that product license holder i.e. M/s Troikaa Pharmaceuticals Ltd, **office:** Commerece house – 1, Satya marg, bodakdev Ahmedabad Gujrat India **manufacturing site**: C-1 Sara Industrial Estate, Selaqui, Dehradun, Uttarakhand India **authorizes** M/s We Care, Flat B 6, Block 12D, 2nd Floor, G-8 Markaz,

		Islamabad **as exclusive distributor** for product "Troypofol (Propofol Injecton BP I.V (1%W/V)" in Paksitan The authorization is valid till revoked by Troikaa Pharmaceuticals Ltd.

Date of Initiation	07.06.22	07.06.22	07.06.22
No. of Batches	03		

DOCUMENTS / DATA TO BE PROVIDED ALONG WITH STABILITY STUDY DATA

1.	Reference of previous approval of applications with stability study data of the firm (if any)	Not Submitted Submission is optional
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Firm has submitted copy of GMP Certificate (No. ZJ220018) dated 26.01.2022 issued by Zhejiang Medical Products Administration China. The certificate specifies that the firm complies with the requirements of the Chinese GMP (=GMP of EU, WHO/ICH Q7). Certificate was valid till 25.01.2025
3.	Documents for the procurement of API with approval from DRAP (in case of import).	CARBAMAZEPINE Quantity: 2125 kg Batch No. 200100A200309, 200100A200310 Mfg. Date: 03.2020 Clearance date: 20.03.2020 Invoice No. 20SJ03052 Invoice date: 18.03.2020 API imported for manufacturing of product registered for export purpose.
4.	Data of stability batches will be supported by attested respective documents like	Firm has submitted analytical record for product testing.

	chromatograms, Raw data sheets, COA, summary data sheets etc.	
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing	Firm has submitted certificate of 21 CFR compliance for the HPLC system along with audit trail report for product testing.
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated)	Firm has submitted record of digital data logger for temperature and humidity monitoring of real time and accelerated stability chambers.

Remarks of Evaluator:

Sr. No.	Section	Observation	Reply by the firm
1.	2.3.P.5	In description its mentioned that product will be film coated. In Form-5F, the product is not mentioned as film coated tablet. In all other sections of module 3, product is mentioned as film coated. -Innovator product is not film coated whereas the product manufactured for trials is film coated. Clarification is required.	The firm vide letter No. R.A/TP/2023/113 dated 12.07.2023 has stated their product is aqueous film coated. They have said that their product is pharmaceutically equivalent to brand leader Tegral 200mg Tablet. -The firm has not provided any evidence of RRA approved product that is film coated.
2.	3.2.P.5.3	Analytical method validation protocol/Report for dissolution is required.	Submitted vide letter No. R.A/TP/2023/113 dated 12.07.2023

Decision: The Board deferred the case for submission of product development & stability studies data for revised formulation as per innovator drug product i.e., uncoated tablet along with full fee of registration as per SRO 496(I)/2023 dated 17.04.2023.

Case No. 4: Deferred Cases.

	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.
	Module III (Drug Substance)	**Sacubitril sodium:** Official monograph of sacubitril sodium does not exist so firm has followed in house specifications. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity SCB-4-Imp-1, SCB-5-Imp-2, SCB-5-I Sodium (chiral isomer, SCB-5-II Sodium (chiral isomer SCB-5-III Sodium (chiral isomer) specifications, analytical procedures and its validation , batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance **Valsartan:** Official monograph of valsartan exists in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity Valsartan Related Compound A: Not

		more than (NMT) 1.0% Valsartan Related Compound B: Not more than (NMT) 0.2% Valsartan Related Compound C: Not more than (NMT) 0.1% Any other individual impurity: Not more than (NMT) 0.1% Total impurities: Not more than (NMT) 0.3%, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Sacubitril Sodium:** Stability study conditions (Zone IVb). Real time: 30°C ± 2°C / 75% ± 5%RH for 24 months 0, 3, 6, 9, 12, 18, 24 months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months at 0, 1, 2, 3, 6 months Batches: (13700-181001, 13700 -181002, 13700-181003) **Valsartan:** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months 0, 3, 6, 9, 12, 18, 24, 36 months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months. Batches: (201207301, 201207302, 201207303)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Savesto 50mg tablet of Getz Pharma, Karachi by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand that is Savesto 50 mg tablet, batch No. 007FB2 by Getz Pharma in Acid media (pH 1.0-1.2), Acetate buffer (PH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	**Sacubitril Sodium:** Method validation studies including linearity, range, accuracy, precision, intermediate precision, repeatability, robustness, specificity, LOD and LOQ. **Valsartan:** Verification studies for valsartan including Linearity, range, accuracy, precision (repeatability) and specificity along with chromatograms and raw data sheets submitted.

STABILITY STUDY DATA			
Manufacturer of API	Zhejiang Tianyu Pharmaceutical Co., Ltd. China.		
API Lot No.	Sacubitril Sodium (222920-210103) & Valsartan (10252-210201)		
Description of Pack (Container closure system)	Alu-Alu blister packed in unit carton (1×14's) (2×14's)		
Stability Storage Condition	Real time: 30˚C ± 2˚C / 65% ± 5%RH Accelerated: 40˚C ± 2˚C / 75% ± 5%RH

Manufacturing Date	07-2021	07-2021	07-2021
Date of Initiation	3-08-2021	3-08-2021	3-8-2021
No. of Batches	03		

Administrative Portion		
1.	Reference of previous approval of applications with stability study data of the firm (if any)	NA.
2.	Approval of API/ DML/GMP certificate of API manufacturer issued by concerned regulatory authority of country of origin.	Copy of GMP certificate No. 201904044 issued by Zhejiang Medicine Center for Economic Development valid till 02/06/2022. Scope of inspection include (Sacubitril Sodium Valsartan).
3.	Documents for the procurement of API with approval from DRAP (in case of import).	Firm has submitted copy of invoice No. TY121266 dated 19-03-2021 for import of 1.6kg Sacubitril Sodium and 1.7kg Valsartan USP from Zhejiang Tianyu Pharmaceutical Co., Ltd. Jiangkou Development Zone Huangyan Taizhou, Zhejiang, China, attested by AD (I & E), DRAP Islamabad.
4.	Data of stability batches will be supported by attested respective documents like chromatograms, Raw data sheets, COA, summary data sheets etc.	Submitted
5.	Compliance Record of HPLC software 21CFR & audit trail reports on product testing.	Submitted
6.	Record of Digital data logger for temperature and humidity monitoring of stability chambers (real time and accelerated).	Submitted

Remarks of Evaluator:-(PEC-XVII)

Sr. No.	Section	Observation	Reply by the firm
1.	3.2.S.4.4	Peak areas given for replicates 2-5 of standard injections for assay determination of Sacubitril sodium are different than those mentioned in corresponding chromatograms (sample information).	Revised calculation sheet submitted vide letter No. HB/0039/DRAP/PEC/23

2.		The assay calculation formula as given in the analytical procedure by the drug product manufacturer is different than that given in analytical method validation protocol/data of the drug product manufacturer. Moreover, the assay calculation formula as mentioned in the analytical method of the drug substance manufacturer and that given in the analytical method of the drug product manufacture are not the same.	Corrected formula submitted vide letter No. HB/0039/DRAP/PEC/23
3.	3.2.P.2.2.1	In the procedure for CDP, the time point for sample withdrawal mentioned as 45 minutes, while in dissolution parameters for CDP and raw data sheets, the time points mentioned as 10, 15, 20, 30, 45 and 60 minutes.	Firm has stated that it was a mistake and has submitted correct report vide letter No. HB/0039/DRAP/PEC/23
4.	3.2.P.5.2	Wavelength mentioned as 267nm under chromatographic conditions, however, as per reference/innovator's product dissolution method/parameters, the detection wavelength (HPLC/UV) given as 255 nm.	Firm has stated that it is their in-house method and is validated.
5.		The flow rate in analytical method of drug product given as 1ml/min however, in method validation protocol for the drug product the flow rate given as 0.8ml/min.	Firm has stated that it is a typographic error and has been corrected to 0.8ml/min.
6.		As per various documents such as CoA of APIs from substance manufacturer and drug product manufacturer, import invoice, AD (I & E) clearance certificate, product development data, trial batch manufacturing record and separate stability summary data sheets for Sacubitril sodium and Valsartan by the drug substance manufacturer reflect that Sacubitril sodium and Valsartan used as separate materials, while the innovator product is designed as a combination of sacubitril and valsartan in a co-crystal, is a salt complex comprising LCZ696 (Sacubitril/Valsartan anionic moieties), sodium cations, and water molecules. Please justify how the applied formulation is in line with innovator's product.	**The firm has stated that they have developed product 'Estresto tablet' with claims as Sacubitril/Valsartan 24mg/26 mg, Sacubitril/Valsartan 49mg/51mg and Sacubitril/Valsartan 97mg/103 mg.** **This happened only because of availability of Raw materials at the time of development which was the peak era of Covid-19 and there were lot of issues in importing raw materials.** **Now their R&D team has started product development using Sacubitril valsartan complex, its trial batch is under development please** **They will also share the initial data as it will be charged on stability** **Form 6 of Sacubitril valsartan complex is also provided.**
7.		Most recent GMP compliance inspection report conducted within last three years.	Firm has submitted GMP certificate valid till 03.07.2024

Decision of 324th RB meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of Evaluator: The firm has submitted reply in compliance to decision of 324th meeting of RB but they will require more time to submit stability data of batches manufactured from Sacubitril valsartan complex. The firm has submitted initial data in which product is placed on stability in July 2023.

Decision of 330th meeting: Keeping in view the request of the firm, the Registration Board further extended time for submission of shortcomings within a period of 6 months of publication of minutes of instant meeting.

455.	Name, address of Applicant / Marketing Authorization Holder	M/S Herbion Pakistan Pvt Ltd Islamabad.
	Name, address of Manufacturing site.	M/s Herbion Pakistan Pvt Ltd Industrial Triangle Kahuta road, Islamabad. (DML No. 000795)

	The proposed proprietary name / brand name	Estresto 100 mg tablet
	Strength / concentration of drug of Active Pharmaceutical ingredient (API) per unit	Each film coated tablet contains: Sacubitril ---------- 48.6 mg Valsartan ----------51.4 mg
	Pharmaceutical form of applied drug	Oval shaped, pale-yellow colored, film coated tablet, plain on both sides.
	Pharmacotherapeutic Group of (API)	Sacubitril, a neprilysin inhibitor, and valsartan, an angiotensin II receptor blocker indicated: to reduce the risk of cardiovascular death and hospitalization for heart failure in patients with chronic heart failure (NYHA Class II-IV) and reduced ejection frac
	Reference to Finished product specifications	As per Innovator's specifications
	Proposed Pack size	1* 14's (14's) 2*14's (28's)
	Proposed unit price	As per SRO
	The status in reference regulatory authorities	Entresto tablets 100 mg Novartis Pharmaceuticals (FDA Approved)
	For generic drugs (me-too status)	Savesto 49/51mg tablet of M/s Getz Parma, Karachi. Registration No.093111
	GMP status of the Finished product manufacturer	Most recent GMP inspection report conducted within last three years required.
	Name and address of API manufacturer.	**Sacubitril Sodium & Valsartan:** Zhejiang Tianyu Pharmaceutical Co., Ltd. Address No.15, Donghai 5th Avenue, Zhejiang Provincial Chemical and Medical Raw Materials Base Linhai Zone, Taizhou City, Zhejiang Province, China.
	Module-II (Quality Overall Summary)	Firm has submitted QOS as per WHO QOS-PD template. Summarized information related to nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance and drug product is submitted.

	Module III (Drug Substance)	**Sacubitril sodium:** Official monograph of sacubitril sodium does not exist so firm has followed in house specifications. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity SCB-4-Imp-1, SCB-5-Imp-2, SCB-5-I Sodium (chiral isomer, SCB-5-II Sodium (chiral isomer SCB-5-III Sodium (chiral isomer) specifications, analytical procedures and its validation , batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance **Valsartan:** Official monograph of valsartan exists in USP. The firm as submitted detail of nomenclature, structure, general properties, solubilities, physical form, manufacturers, description of manufacturing process and controls, tests for impurity Valsartan Related Compound A: Not more than (NMT) 1.0% Valsartan Related Compound B: Not more than (NMT) 0.2% Valsartan Related Compound C: Not more than (NMT) 0.1% Any other individual impurity: Not more than (NMT) 0.1% Total impurities: Not more than (NMT) 0.3%, specifications, analytical procedures and its verification, batch analysis and justification of specification, reference standard, container closure system and stability studies of drug substance.
	Stability studies	**Sacubitril Sodium:** Stability study conditions (Zone IVb). Real time: 30°C ± 2°C / 75% ± 5%RH for 24 months 0, 3, 6, 9, 12, 18, 24 months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months at 0, 1, 2, 3, 6 months Batches: (13700-181001, 13700 -181002, 13700-181003) **Valsartan:** Stability study conditions: Real time: 30°C ± 2°C / 65% ± 5%RH for 36 months 0, 3, 6, 9, 12, 18, 24, 36 months. Accelerated: 40°C ± 2°C / 75% ± 5%RH for 6 months. Batches: (201207301, 201207302, 201207303)
	Module-III (Drug Product):	The firm has submitted detail of manufacturers, description of manufacturing process and controls, impurities, specifications, analytical procedure (including dissolution testing at acidic and buffer medium) and its verification studies, batch analysis and justification of specification, reference standard, container closure system

		and stability studies of drug product.
	Pharmaceutical equivalence and comparative dissolution profile	Pharmaceutical Equivalence have been established against Uperio 100mg tablet (Batch No. TAY84) of Novartis Pharma (Pakistan), Karachi by performing quality tests (Identification, Assay, Dissolution, Uniformity of dosage form). CDP has been performed against the same brand in Acid media (pH 1.0-1.2), Acetate buffer (PH 4.5) & Phosphate Buffer (pH 6.8). The values for f1 and f2 are in the acceptable range.
	Analytical method validation/verification of product	**Sacubitril Sodium:** Method validation studies including linearity, range, accuracy, precision, intermediate precision, repeatability, robustness, specificity, LOD and LOQ. **Valsartan:** Verification studies for valsartan including Linearity, range, accuracy, precision (repeatability) and specificity along with chromatograms and raw data sheets submitted.

Sr. No.	Section	Observation	Reply by the firm
1.	3.2.S.4.4	Peak areas given for replicates 2-5 of standard injections for assay determination of Sacubitril sodium are different than those mentioned in corresponding chromatograms (sample information).	Revised calculation sheet submitted vide letter No. HB/0039/DRAP/PEC/23
2.		The assay calculation formula as given in the analytical procedure by the drug product manufacturer is different than that given in analytical method validation protocol/data of the drug product manufacturer. Moreover, the assay calculation formula as mentioned in the analytical method of the drug substance manufacturer and that given in the analytical method of the drug product manufacture are not the same.	Corrected formula submitted vide letter No. HB/0039/DRAP/PEC/23

3.		The run time for Valsartan USP given as 40 minutes in analytical method by the drug substance manufacturer, while the chromatograms for method verification data showed run time around 15-20 minutes. Moreover, retention time of valsartan in method verification chromatograms/data is about 5.5 minutes while the chromatograms for assay determination of valsartan (Batch No.10252-210201) has Retention time of 13.1 minutes.	Firm has stated vide letter No. HB/0039/DRAP/PEC/23 dated 22.06.2023 that analysis was performed according to USP; drug substance manufacturer method claims 40 minutes but USP does not recommend 40 minutes The standard retention time in verification studies is 5.5 minutes updated analysis is attached having same retention time i.e. 5.5 minutes While previous submitted analysis having 13.1 retention time was due to human error & instrumental error. Although both reports having same and satisfactory results.
4.	3.2.P.2.2.1	In the procedure for CDP, the time point for sample withdrawal mentioned as 45 minutes, while in dissolution parameters for CDP and raw data sheets, the time points mentioned as 10, 15, 20, 30, 45 and 60 minutes.	Firm has stated that it's a typographic error and has been corrected
4.	3.2.P.5.2	Wavelength mentioned as 267nm under chromatographic conditions, however, as per reference/innovator's product dissolution method/parameters, the detection wavelength (HPLC/UV) given as 255 nm.	Firm has stated that it is their in-house method and is validated.
5.		The flow rate in analytical method of drug product given as 1ml/min however, in method validation protocol for the drug product the flow rate given as 0.8ml/min.	Firm has stated that it is a typographic error and has been corrected to 0.8ml/min.
6.		As per various documents such as CoA of APIs from substance manufacturer and drug product manufacturer, import invoice, AD (I & E) clearance certificate, product development data, trial batch manufacturing record and separate stability summary data sheets for Sacubitril sodium and Valsartan by the drug substance manufacturer reflect that Sacubitril sodium and Valsartan used as separate materials, while the innovator product is designed as a combination of sacubitril and valsartan in a co-crystal, is a salt complex comprising LCZ696 (Sacubitril/Valsartan anionic moieties), sodium cations, and water molecules. Please justify how the applied formulation is in line with innovator's product.	**The firm has stated that they have developed product 'Estresto tablet' with claims as Sacubitril/Valsartan 24mg/26 mg, Sacubitril/Valsartan 49mg/51mg and Sacubitril/Valsartan 97mg/103 mg.** **This happened only because of availability of Raw materials at the time of development which was the peak era of Covid-19 and there were lot of issues in importing raw materials.** **Now their R&D team has started product development using Sacubitril valsartan complex, its trial batch is under development please** **They will also share the initial data as it will be charged on stability** **Form 6 of Sacubitril valsartan complex is also provided.**
7.		Most recent GMP compliance inspection report conducted within last three years.	Firm has submitted GMP certificate valid till 03.07.2024

Decision of 324th RB meeting: Registration Board was apprised that the letter of shortcoming has been initially issued to the firm, hence Board deferred the case for submission of reply to the above cited shortcomings within six months.

Remarks of Evaluator: The firm has submitted reply in compliance to decision of 324th meeting of RB but they will require more time to submit stability data of batches manufactured from Sacubitril valsartan complex. The firm has submitted initial data in which product is placed on stability in July 2023.

Decision of 330th meeting: Keeping in view the request of the firm, the Registration Board further extended

time for submission of shortcomings within a period of 6 months of publication of minutes of instant meeting.

Case No. 5: Form-5 Deferred Cases

457.	Name and address of manufacturer/ Applicant	M/s Hiranis Pharmaceuticals (Pvt.) Limited, Located at plot No. E-145 to E-149, North Western Industrial Zone, Port Qasim, Karachi.
	Brand Name + Dosage Form + Strength	Brethease 400mcg/6mcg Capsule
	Composition	Each capsule contains: Formoterol Fumarate…….6mcg Budesonide…….400mcg
	Diary No. Date of R & I & fee	Dy.No. 939, 28-10-2013, 20,000/-, 28-10-2013
	Pharmacological Group	Corticosteroid + selective beta2–adrenergic agonist
	Type of Form	Form 5.
	Finished product Specification	Manufacturer‘s specifications
	Pack size & Demanded Price	As per PRC
	Approval status of product in Reference Regulatory Authorities	Not confirmed
	Me-too status	Combivair 400mcg + 6mcg capsule of M/s Highnoon
	GMP status	Last GMP inspection conducted on 07-09-2017, and the report concludes that the firm was considered to be operating at satisfactory compliance with GMP guidelines.
	Remarks of the Evaluator	
	Previous decision(s)	Deferred for product specific inspection by Director DTL Karachi alongwith FID with following verifications **(M-243)**: Confirmation of approval of formulation by the stringent regulatory agencies. Confirmation of API in ultramicronized form.
	Remarks of the Evaluator	The firm has submitted copy of product specific inspection conducted by Director DTL, Karachi and Area FID which concludes as below: *―In the light of manufacturing, Quality Control, Storage facilities and technical persons met, the panel is of the view to recommend Registration of a) Aclidum Capsule, b) Brethease 200mcg/6mcg Capsule, c) Brethease 100mcg/6mcg Capsule, d) Brethease 400mcg/6mcg Capsule to the firm under the Drug Act, 1976."*
	Decision of 289th meeting of RB	Deferred for evidence of approval of applied formulation in reference regulatory authorities/agencies adopted by the Registration Board in 275th meeting.
	Remarks of the Evaluator	The firm vide letter No. nil dated 13.06.2023 has submitted a revised formulation along with fee of Rs. 30,000/-. The revised formulation is; <u>Each Capsule Contains;</u> Budesonide…….400mcg Formoterol Fumarate…….12mcg

		(Innovator's Specifications) For reference of RRA approval, firm has provided information of Symbicort Turbohaler 400/12 Inhalation Powder MHRA approved. **The reference product is a multi-dose dry powder inhaler, whereas reference product is a capsule to be loaded in a DPI device.** The firm couldn't provide proper evidence of RRA approval of applied formulation.
	Decision: Registration Board decided to reject the application since the firm has not submitted stability study data of 3 batches of the drug product before the lapse of deadline decided by DRAP Authority i.e. till 31st December 2022.	
458.	Name and address of manufacturer/ Applicant	**M/s Bio-Mark Pharmaceuticals.** 527-Sunder Industrial Estate, Lahore.
	Brand Name + Dosage Form + Strength	**DIVAL Suspension 250mg/5ml**
	Composition	Each 5ml contains: Sodium valproate eq to valproic acid…250mg
	Diary No. Date of R & I & fee	Diary No: 6176, 14/06/2017, Rs: 20,000/-
	Pharmacological Group	Anti-epileptic drug.
	Type of Form	Form-5
	Finished product Specification	Innovator's specifications
	Pack size & Demanded Price	60ml, 120ml/ As per SRO.
	Approval status of product in Reference Regulatory Authorities	DEPAKENE (valproic acid) oral solution by M/s AbbVie Inc, USFDA approved.

	Finished product Specification	Innovator's Specifications
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	Xonvea 10 mg/10 mg gastro-resistant tablets (doxylamine succinate and pyridoxine hydrochloride) - PL 16853/0147 MHRA Approved.
	Me-too status	Nausidox 10mg/10mg Tablet. Reg. No. 076292 M/s OBS Pakistan (Pvt.) Ltd. Karachi.
	GMP status	Last inspection conducted on 06.07.2022. GMP status is good. GMP certificate valid till 05.07.2024 is submitted.
	Remarks of the Evaluator	-
	Decision of 326th RB meeting.	**Deferred for evidence of bi-layer tablet manufacturing facility.**
	Remarks of the Evaluator	The firm vide letter No. nil dated 27.05.2023 has submitted that their applied product is not bilayer so they do not need a bilayer tableting machine. It is further added that products approved by MHRA and USFDA are also not bilayer. As per products approved by RRA, it can be a single tablet that is delayed release.
	Decision: Approved.	
463.	Name and address of manufacturer/ Applicant	M/s Ethical Loboratories Pvt Ltd, 14 KM, Multan Road, Lahore
	Brand Name + Dosage Form + Strength	OLO 0.1% eye drop solution
	Composition	Each ml contains: Olopatadine HCL…1mg
	Diary No. Date of R & I & fee	Dy. No. 3456; 25.01.2019 PKR. 20,000/-; 25.01.2019 PKR. 20,000/-; 07.05.2020
	Pharmacological Group	Other antiallergics
	Type of Form	Form-5
	Finished product Specification	USP Specifications.
	Pack size & Demanded Price	As per SRO.
	Approval status of product in Reference Regulatory Authorities	Pataday twice daily relief / Patanol (olopatadine hydrochloride ophthalmic solution) 0.1%. USFDA approved.

	Me-too status	Ogate 0.1% Ophthalmic Solution. Reg. No. 75915.
	GMP status	The firm was inspected on 21.11.2017, wherein renewal of DML was recommended.
	Remarks of the Evaluator	• The firm revised the dosage form in line with the reference product with submission of Rs. 20000/- fee. The fee challan has not been endorsed by the Division of Budget and accounts. • Undertaking at the end of Form 5 is missing.
	Decision of 295th RB meeting.	Deferred for following: (M-295th) • Submission of fee for revision of formulation after getting endorsement from Budget and Account Division. • Submission of undertaking of Form 5.
	Remarks of the Evaluator	The firm submitted the required undertaking and copy of the challan (not been endorsed by the Division of Budget and accounts).
	Decision of 313th meeting:	Registration Board referred the case to QA & LT Division to conduct GMP inspection of Firm on priority.
	Remarks of the Evaluator	Submission by the firm: The firm has submitted copy of last inspection report dated 08-03-2022. The panel recommended the renewal of DML. Eye drops section (Non-Steroidal) approved.
	Decision of 322nd meeting	Registration Board was apprised that the firm had requested change of strength of the applied formulation from 0.1% to 0.2% Ophthalmic solution. The Board discussed that since both of the strengths are approved in reference regulatory authorities, therefore the Board did not accede to the request of firm.
	Remarks of the Evaluator	The vide letter No. nil dated 02.062023 has stated that they never requested for change of formulation from 0.1% to 0.2%, they had only revised it as per innovator. The label requested by firm is reproduced below; Each ml of solution contains; Olopatadine (as hydrochloride)…… 1 mg
	Decision: Approved with following label claim; **Each ml of solution contains;** **Olopatadine (as hydrochloride)…… 1 mg**	
464.	Name and address of manufacturer/ Applicant	M/s Gillman Pharmaceuticals. 41/2-A, Phase I & II, Industrial Estate, Hattar, Pakistan By M/s Aulton Pharmaceuticals.Plot No. 84/1, Block A, Phase V, Industrial Estate, Hattar, K.P.K
